Besides John, certain of the number of Jewish believers were prophets of the New Covenant; thus the daughters of Philip the evangelist (Acts xx: 19); Judas and Silas (xv: 12); Agabus (xxii: 2); Simon, Niger and Lucius of Cyrene and Manaen (Acts xiii: 1).

It is stated that the inhabitants of Saron and Lydda turned to the Lord; one of them was Eneas (Acts ix: 33). At Joppa many believed in the Lord on account of Tabitha being raised from the dead by Peter (Acts ix: 36). At Cesarea Paul found many believers, among whom were Philip the evangelist (already mentioned) with his four daughters, and Miason, an old disciple (xiii: 16).

Beyond the boundaries of Palestine we find Christians in Antioch (Acts xiii: 43), and a great multitude of believers at Iconium (xv: 1). We may mention Jason, Aristarchus and Secundus at Thessalonica (xvii: 6; xx: 4); Sopater, of the city of Illyricum (xvii: 21); Gaius of Derbe (Rom. xvi: 23); Tyrannus, who kept a school at Ephesus; Justus and Crispus and Sosthenes, chiefs of the community at Corinth (Acts xviii: 7, 8, 17; Cor. i: 1), and the numerous believing Jews at Philippi and Rome (Acts xxviii: 24).

The first nucleus of the seven apocalyptic churches consisted also of Israelites. Peter wrote the first epistle in the midst of a Jewish-Christian Church at Babylon, and addressed it to the strangers scattered at Jerusalem, Galatia, Cappadocia, Asia and Bithynia. James also wrote his epistle “to the twelve tribes which are scattered abroad,” and this proves that in the most remote countries there were believing Israelites.

It is but natural to assume that these believing Israelites were the means of spreading, if not the Gospel, as such, yet the sayings of Jesus. Thus these sayings found their way into the Talmud, a fact overlooked by modern Jewish apologists who claim the priority of the Talmud to the New Testament, and make the latter the copy of the former.

According to Eusebius, up to the reign of Constantine (300 a.d.), there were five Jewish-Christian bishops at Jerusalem. Among the teachers of the ancient Church who were of Jewish origin we may mention Hegesippus (150-180); Ariston of Pella, and especially Eupaphasmus, Bishop of Constantinople, who also tells (Hoeres. xxx) of the conversion of the Jewish patriarch Hillel, a descendant of the famous Gamaliel.

Without dwelling on the manner in which the Christian Church developed itself, which, on the one hand, brought the Jews for complaining of the great seal of the Church in converting them, and on the other hand, to the Church for complaining of the great obstinacy of the Jews, we will glance at some of the most famous converts prior to the Reformation, who were especially animated to spread the Gospel among their former coreligionists. But it is remembered that these converts were only samples of a whole list of witnesses to the power of the truth—single ears selected out of a multitude of sheaves gathered into the garner of God.

Commencing with Spinoza, we find in the latter part of the 17th century, Michael Pufendorf, archbishop of Cologne (died 1680). He was a keen opponent of the errors of Judaism concerning the coming of the Messiah, entitled: De sexta aetatis comprobatione contra Judaeos.

Between 1066 and 1108 flourished Pedro Alfonso, formerly Rabbi Moses de Huesca in Aragon, physician to King Alfonso VI., and author of an apologetical work against the Jews.

A contemporary of Pedro Alfonso was Samuel, by birth an African, but baptized in Toledo in 1085. He returned to Morocco, where he held a public discussion with a learned Arab on the truth of Christianity. Of other converts we mention John de Valladolid; also John de Podico of the 14th century; Joseph Hallorci, called after his baptism Hieronymus de Sancta Fide, of the 15th century, famous as Talmudist and physician.

But the greatest of all were Paulus of Burgos, and De Santa Maria, formerly Rabbi Solomon Levy of Burgos, and baptized with his four sons in 1390. He studied theology after his baptism and received from the University of Paris the degree of Doctor of Divinity. He was consecrated as Archdeacon of Burgos, and subsequently Bishop of Carthagena and lastly Bishop of Burgos, where also he died August 25, 1440. Of his four sons, Don Alfonso, who for many years was archdeacon of Compostella, succeeded his father in the bishopric of Burgos. He took his seat at the Council of Basel in 1431, as a representative of Castile, and was treated with high honor on account of his great talents and distinguished excellence.

Without increasing the number, suffice it to say that even the Jewish historian Graetz, who means a friend of the Church, still less of converts, must admit: “By the conversion of learned and educated men, physicians, authors, poets, Judaism was deprived of many talents; some of them were possessed of a zeal for conversion, as if they were born Dominicans.” (Geschichte vii: 83.)

In France we hear, besides, of Nicolas de Lyre, professor of theology (1300-1340), who was of Jewish descent; of Philipp D’Aquin (died 1650), professor of Hebrew at Paris; Louis Compiagne de Veil and his brother Charles; Pierre Vignoles (died 1640), for fifty years professor at the College of Paris.

In Italy the Jews had to listen, since the time of Gregory XIII., once a week to a sermon, and many a one was thus led to Christ. Paul III. founded in 1550 a special institute for the conversion of the Jews. The 16th century is especially rich in Jewish converts, of whom we mention the following: Andreas de Monte, Jechiel Piauauris, philosopher and physician, and his contemporary, Paul Eustachius de Neia, Hebrew teacher of Thomas Aldrobradisper, brother of Pope Clement
Jews, the

VIII; Sixtus Senensis, author of the Bibliotheca Sancta (Venice, 1566); Alessandro di Francesco, friend of Clement VIII. and Bishop of Forti; Fabianus Fioghi, professor of Hebrew at the college of the Jesuits in Rome; Emannuel Tremelius, one of the most celebrated men of his time (said to have been converted by Marco Antonio Flaminius), who died in 1580; Paulus Canosa; also Paulus Paradus, professor of Hebrew (died 1543); Felix Pratensis (died at Rostock); John Baptista Ignatius, one of the first Rabbinc Hebrew Bible; Raphael Aquilino, John Baptista Emanuel, and others too numerous to be mentioned.

In England the Jews had their vicissitudes. Yet in spite of the manifold troubles special care was taken of those who embraced Christianity. Special buildings, converts' houses, were created, in which the Gospel was not only preached to the Jews, but the converts were educated there, and many a dignitary in the State and Church proceeded from these houses. We shall again speak of some of the sequel.

In Germany the Jews had to undergo many sufferings. The inroads of the Tartars, the Crusades, more especially the Black Death, were causes for persecutions. Compulsory baptisms were the only means of escaping the fiercest persecutions, and it was in vain that some popes, and teachers like Bernard of Clairvaux, protested against such compulsory measures. Yet there were not wanting such among the Jews who could not resist the workings of the divine grace, and who of their own conviction joined the Church. This we see especially in the case of Cappenberg, who after his baptism entered in 1123 the order of the Premonstratensians and became abbot of Cappenberg in Westphalia. He, too, protested against compulsory measures, but in vain. In the 18th session of the Council of Basel in 1434 it was enacted that the bishops everywhere should see that the Jews were instructed in the Christian religion. The worldly powers showed a better disposition toward the Jews by protecting them, altho this protection was bought at a great price. Yet, after all, it showed how the Reformation, better spirit seemed to prevail in Germany, which had the good effect that many a Jew was brought to the truth as it is in Christ, without compulsion.

In our rapid survey we have come down to the Reformation period, with which a brighter morning came, tho, on the whole, the Reformation, whether in its early days or in later times, with all its great teachers and numerous adherents, effected little or no change in the disposition of the Christians toward the Jews. Luther appeared well disposed toward them in the beginning of his career as a reformer. But afterward he spoke very differently of the Jews, either from indignation at some theologians of Wittenberg, whom he looked upon as infused with the leaven of rabbinism, or from disappointment because the Reformation, by which he had promised a favorable influence over the minds of the Jews and their conversion to the Gospel, found no more favor or assistance than Romanism with this entirely singular nation.

Yet after all it cannot be denied that the influence which the Reformation, especially by the more careful study of the Bible and its translation, had a salutary effect on the people in general and on the clergy especially. In speech and in writing, the preachers and teachers endeavored to impress upon the Jewish mind the truth as it is in Christ, and in this respect they were assisted by the writings of such Jewish Christians as: Emanuél Hebraeus, professor of Hebrew at Heidelberg; John Harzige, who in 1540 published his translation of the New Testament in rabbinical type; Christian Gerson and Georg Philipp Lichtenstein, both ministers of the Gospel; Victor von Carben, a priest at Cologne; Paul Weidner, and others of the Roman Catholic Church.

A new impulse was given to the missions among the Jews in the 17th century, especially by the efforts of Esdras Edzard, of Hamburg. He had studied at different universities and had especially devoted himself to the study of rabbinic literature. Buxtorf, in Basel, and the Jewish rabbi of his native place, Cohen de Lars, were his teachers in Talmudic literature. In 1655 he took his degree as licentiate of theology at Rostock without entering upon the academical career. Being a man of means, he lived as a private man at Hamburg, devoting his knowledge and time to the conversion of the Jews, and he succeeded in bringing a great many Jews to Christ. He not only preached the Gospel, but also helped those in a practical manner who had joined the Church, and founded a sinking-fund, the interest of which was to be devoted to missions among the Jews. From all parts of Europe scholars flocked to Hamburg to hear from him how to converse with Jews and how to refute their arguments. After his death, in 1708, Edzard's sons continued the work of their father, and the sinking-fund, founded in 1667, is now under the administration of the Hamburg Senate, still serving the original purpose. The good seed sown by Edzard bore its fruit in due season, and in many places houses were built for the temporal relief of Jewish converts.

Outside of Germany, the Christians of Holland showed an especial interest for the conversion of the Jews, to whom, toward the end of the 16th century, permission had been granted to settle again in Holland. The Synod, held at Dort in 1619, at Utrecht in 1676 and 1678, passed resolutions concerning the spiritual welfare of the Jews. Men like Hugo Grotius, Labbadie, Isaac Vossius, John Hoornbeck, the two Spanhems, Cocceius, Episcopius, Holstius, Willem, Sararius, and others, wrote with a view of convincing the Jews, and many a Jew was received into the Church.

The Jews, formerly banished from England, were again allowed to settle there under Charles II. We have already spoken of the early missionary work among the Jews in England. Suffice it to say that after the resettlement of the Jews the work of converting them was continued. Of the literary productions of this period we only mention Bishop Kidder's A demonstration of the Messiah, in which the truth of the Christian religion is defended, especially against the Jews, London, 1684-1700, and translated also into German by F. E. Rambach, Rostock, 1751. Another missionary work was Leslie's A short and easy method with the Jews, London (1698, and after).

But we return again to Germany, where with the 18th century a new era commenced for the Mission among the Jews.

The first quarter of the 18th century was a period of great religious excitement in Germany,
owing to the indefatigable labors of Spener and A. H. Francke (especially by the "collegia pietatis" of the former), which quickly spread far and wide, among high and low, poor and rich. The Bible, which had been entirely neglected and forgotten, was taken in hand and read again; and how extreme the desert into which the word of God had fallen may be gathered from the fact that Spener had to procure a special order from the Elector for the practical explanation of some part of the Bible at the universities. A fruit of this law was later in the Church (for it was a word of regeneration) was the foundation of the University of Halle. Bible and missionary societies were also called into existence. Nor were God's ancient people forgotten. An interest for the Jews was evinced to a degree exceeding anything known in former periods of the Church. It seems as if rulers, magistrates, professors, the clergy had been alike animated with zeal for the conversion of Israel, for we find that Reineccius, in one of his works, published 1713, says: "The general topic of conversation and discussion of the present day is about the conversion of the Jews." This new-born zeal for the Jewish cause was so great that we are told that many Christians learned to read Jewish-German in order to make themselves better acquainted with Jewish books and more efficient for conversa-
tion with Jews. Professor Callenberg lectured on that language and had an auditory of 150 persons.

The Rev. John Müller of Gotha, who very often came in contact with traveling Jews, and took a lively interest in them, wrote a tract for the Jews, called "The Light of Essentials in a Dialogical Form," which was intended to prepare the Jewish mind for the reception of Jesus Christ the Messiah, and through the extraordinary exertions of Dr. Frommann, a physician and Jewish convert, it was published in Jewish-German for wider circulation among the Jews. This tract produced the greatest sensation. For soon it was not only reprinted and translated into Hebrew, but also a German (1736), Dutch (1735), Italian (1732), French (1748) and an English translation was published, the latter by the Society for Promoting Christian Knowledge, in the year 1734, and it is still used for missionary purposes.

Even Roman Catholic priests took an interest in its circulation and sent subscriptions for promoting it to Prof. Callenberg. This tract is the more remarkable because it became in part the foundation-stone for the well-known Callenberg Institution, or Institutum Judaicum, established in 1728, the object of which was the conversion of the Jews, and also of Mohammedans. This institution, however, was closed in 1792. But the interest in behalf of the Jews was not confined to Germany alone; it also spread beyond the Continent, for the well-known Jewish missionary, Stephen Schults, tells us in his Leitungen des Höchsten (iv: 74), that when he visited England in 1749, he was told that there were many laymen in London zealous for the conversion of the Jews.

In order to Spener we must mention the early efforts made by the Moravian Brethren. It was in the year 1738 that Leonhard Dober, who had established the first mission among the negroes in the West Indies, felt an earnest desire to labor for the conversion of the Jews. For this purpose he repaired to Amsterdam and hired a lodging in the so-called Juden-Dork. In 1729 Samuel Lieberkuhn succeeded Dober in Amsterdam, who devoted himself entirely to the service of the Jews. On account of his knowledge of Hebrew and his love of Israel, the Jews called him "Rabbi." For thirty years Lieberkuhn labored among the Jews with great success.

The Callenberg Institute, as we have seen, was closed in the year 1792, but in the providence of God soon another way was to be opened for the mission among the Jews. It was only a few years after the first great thunderslap of the French Revolution, when three German students, in whose hearts God had begun a work of grace, were assembled together for mutual consultation and direction, in a room in the metropolis of Northern Germany. They were pondering in their minds what they should do, and what they should go, that they might be successfully employed in the cause of missions. Berlin, their native metropolis, was at that time the stronghold of rationalism, the center of religious infidelity; and evangelical religion, or pietism, was considered and treated with contempt and spoken against. Where, therefore, were the three German students to go? Pastor Jânicek and some few other pious Christians in Berlin, who had established a seminary where six or seven students were trained for missionary enterprise, were often in the greatest straits for want of funds. Their cause met with little sympathy and they were almost in despair, when one day help came in time of need from another great metropolis, with a demand for three missionaries to occupy an important missionary post among the heathen tribes of Africa. This was in the autumn of 1801. Our three students went to London in order to enter the service of the London Missionary Society, and one of these was a Christian Israelite, C. F. Frey by name, who was a member of the Baptist denomination. During his stay in London it was put into his heart to visit his brethren after the flesh. He found them in a state of total darkness and bondage worse than that of their fathers in Egypt. He spoke to them of Christ and His salvation. He engaged a few Christian friends to feel a concern for their spiritual welfare. He made known to the directors of the London Missionary Society his earnest desire to be permitted to preach the Gospel to his own brethren. This application was favorably considered by the directors; they acceded to his request, and some three years having been consumed in the needful preliminary preparation, we find him, in 1805, commencing in earnest missionary work under the auspices of the London Missionary Society. It was soon, however, discovered that the work required distinctive and peculiar machinery. Accordingly, after the brief existence of a few years, in 1808 a separate society, which contemplated Jews exclusively as its object, the present London Society for Promoting Christianity among the Jews, was founded in the beginning of 1809. The main promoter of this Society was the nobleman Lewis Way. It was in the year 1808 that Lewis Way, while riding with a friend of his in Devonshire, passed a park where some Jews were at their prayers. His friend told him that the owner of this park in her last will forbade the cutting down of these trees until "the Jews would again have come to Jerusalem." These words so deeply impressed themselves on the mind of Lewis Way that he never forgot them. From
that day he devoted his large fortune as well as his talents to the conversion of the Jews. At the first the newly constituted society was composed of both churchmen and dissenters. In 1815, by an amicable arrangement, the dissenting members retired from its management, and its liabilities having been discharged by Way's munificent donation of £10,000, it entered on the present phase of its existence as a Church of England Society on the 11th of March, 1815. In the year 1814 the Duke of Kent, the father of the late Queen Victoria, and the Earl of Liverpool, contributed £1,000, which sum on mission work has been carried on systematically. In speaking of the missionary societies we must commence with England, as the motherland of the Protestant Jewish mission.

I. England: The London Society for Promoting Christianity among the Jews, founded in 1809, has over 50 stations, with 200 missionaries. It employs nearly 100 Christian Israelites, and has its stations in Europe, Asia and Africa, occupying 52 stations, with a staff of about 200 laborers, of whom nearly 100 are Christian Israelites. It has recently also opened a station at Montreal, Canada. We have reached that period in the history of our mission among the Jews, when it was seen that much work ought to be carried on systematically. In speaking of the missionary societies we must commence with England, as the motherland of the present Protestant Jewish mission.

The London City Mission, founded in 1831, has admitted about 1,000 persons, of whom more than 100 have entered the missionary service. The Wandering Home has received during the forty-five years of its existence over 2,500 Jews, most of whom were baptized. The Society records over 5,000 Jewish baptisms; the church record of Zion's Church, at Jerusalem, the oldest evangelical church in the East, shows 367 Jewish baptisms. The annual income of the Society amounted March 31, 1903, to over £48,000. It receives an annual contribution from the Emperor of Germany and from India, Sierra Leone, Australia and Canada.

The British Society for the Propagation of the Gospel among the Jews, founded in 1842. It has 34 missionary workers in 18 stations in England, Germany, Austria, Russia, Turkey and Italy. It has schools, medical missions and homes for aged converts. Whereas the London Society distributes the Hebrew New Testament of Delitzseh, with the Millstone of the Episcopal Chapel in Palestine Place, in which up to this day divine service is held in different languages. This Society, which was so small at the beginning, has not only its own printing establishment of Hebrew Bibles, tracts, etc., but also its stations in Europe, Asia and Africa, occupying 52 stations, with a staff of about 200 laborers, of whom nearly 100 are Christian Israelites. It has recently also opened a station at Montreal, Canada. We have reached that period in the history of our mission among the Jews, when it was seen that much work ought to be carried on systematically. In speaking of the missionary societies we must commence with England, as the motherland of the present Protestant Jewish mission.

The Presbyterian Church of England, founded in 1831, carries on its work in Cologne, Hanover, and Beirut, and has 10 schools.

The Central Organization of Evangelical Lutheran Missions among Israel, founded in 1871, in Leipzig, is supported by the Jewish missionary societies in Saxony, Bavaria, Wurttemberg and Hanover.

The West German Association in Cologne, founded in 1842, carries on its work in Cologne, Frankfort and Strasbourg.

The Evangelical National Society, founded in Scotland in 1840, employs 40 workers in Smyrna, Salonica, Alexandria, Constantinople and Beirut, and has 10 schools.

The United Free Church of Scotland Mission to the Jews, founded in 1843, employs 80 workers in Edinburgh, Breslau, Budapest, Constantinople, Safed, and Trieste, and has 20 schools.

The Scottish Home Mission to Jews, in Glasgow; The Jewish Medical Mission, in Edinburgh; The Bonar Memorial Mission, in Glasgow, and some small local societies all do good work.

II. Scotland: The Jewish Mission of the Church of Scotland, founded in 1840, employs 40 workers in Smyrna, Salonica, Alexandria, Constantinople and Beirut, and has 10 schools.

The United Free Church of Scotland Mission to the Jews, founded in 1843, employs 80 workers in Edinburgh, Breslau, Budapest, Constantinople, Safed, and Trieste, and has 20 schools.

The Scottish Home Mission to Jews, in Glasgow; The Jewish Medical Mission, in Edinburgh; The Bonar Memorial Mission, in Glasgow, and some small local societies all do good work.

III. Ireland: The Jewish Mission of the Presbyterian Church in Ireland, founded in 1841, has 20 workers in Hamburg, Altona and Damascus. The work in Hamburg is flourishing.

The Church of Ireland Jews' Society, founded in 1859, carries on work in Cork, Dublin and Belfast.

IV. Germany: Besides the Esdras Edzard Fund, mentioned already, we have:

The Society for Promoting Christianity among the Jews, in Berlin, founded in 1822. It has its stations in Berlin, Vienna and Stanislaus.

The Central Organization of Evangelical Lutheran Missions among Israel, founded in 1871, in Leipzig, is supported by the Jewish missionary societies in Saxony, Bavaria, Wurttemberg and Hanover.

The West German Association in Cologne, founded in 1842, carries on its work in Cologne, Frankfort and Strasbourg.

The Institut Judaica, one at Leipzig, the other at Berlin, help to prepare theological students for the work among the Jews by making the students acquainted with Rabbinic and Jewish literature.

V. Switzerland: The Society of the Friends of Israel, in Basel, has a station at Strasbourg and Prague.

VII. The Netherlands: The Netherlands Society for Israel, founded in 1861, has 2 missionaries at Amsterdam.

VIII. Norway, Sweden and Denmark: The Central Committee for Jewish Missions, in Christiania, works in Braila and Galatz.

The Evangelical National Society, in Stockholm, employs a missionary in Hamburg.

The Society for Missions to Israel, in Stockholm, has 9 workers in Sweden, Hungary and Russia.

The Swedish Missionary Union has 2 missionaries in Algiers.

The Society for Missions to Israel, in Copenhagen, supports a missionary in Stanislaus.

IX. Russia: Missionary work is carried on by Pastor Faltin, of Kischinev.
X. Africa, Asia and Australia: In Africa we have the *Alexandria Jewish Mission*, in Asia we have small local societies in Bombay, Calcutta, Hebron, Jerusalem, whereas in missionary work is 4 missionary societies are working in Australia.

XI. America: There are in America societies, denominational and undenominational or interdenominational. As missionary work is also carried on by individuals, it is very difficult to give correct lists.

2. The Board of Foreign Missions of the Presbyterian Church, founded in 1871, has been carrying on work among the Jews in Persia and Syria.

The Lutheran Church is represented by

5. The Norwegian Zionstforeningen for Israel-missionen blant Norske Lutheraner i America, founded in 1873 at Minneapolis. It has stations in New York City, Minnesota and Odessa.

10. The Baptists founded in 1887 the Missionary Society of the Seventh-Day Baptists. Besides these missions, there are a number of independent workers and societies, which makes it impossible to give very accurate and complete statistics. Nevertheless, the work goes on everywhere. A German missionary has stated that during the 19th century about 300,000 Jews joined the Church; this number, if based upon records is undoubtedly a conservative minimum, since it is very difficult to get access to the church records of the Roman Catholic and Greek Churches.

Prof. Heman, in the third edition of *Protestant Enzyklopädie*, now edited by Prof. Hauck, of Leipzig, estimates that among the more than 10,000,000 Jews of the globe, more than 50 societies with about 500 workers do missionary work. According to the tables of the Rev. L. Meyer (see Appendix) this is a very low estimate.

The Rev. A. E. Thomson, in his book, "A Century of Jewish Missions," gives the following numbers:

</table>

It is impossible to give an accurate estimate of the Jewish population of the world. Prof. Dalman, in his *Das Handbuch der Jüdischen Missionen*, published in 1893, sets the total down as 11,404,250. In *Israel, My Glory*, published in 1892, Rev. John Wilkinson makes an independent estimate, the total of which is 9,706,500. The American Jewish Year-Book for 1901-1902 puts the number down at 10,766,749. A comparison of the figures with those of the Statesman's Year-Book for 1903 shows great differences. At the Zionist Congress, in London, in August, 1900, it was stated that "according to the latest statistics we muster about 12,000,000." From all may safely be stated that the population is, perhaps, between 11,000,000 and 12,000,000. But whatever the number, Judaism is not a unit. It is divided and split up in parties. The great mass is indifferent and this indifference is especially seen in the number of mixed marriages. A Jewish writer in a pamphlet published in 1900 tells us that during the years 1891-1896, 2,087 mixed marriages took place in Prussia, and 986 in Berlin alone. In New South Wales, we glean from another source, as many as 301 mixed marriages took place, whereas 1,502 Jews married within their own religion. Many Jews belong outwardly to Judaism, but their children are brought up as Christians. The rich and influential Jews have no interest whatever in Judaism, and "Zionism" is to the ones a stumbling block, to others, foolishness. What the Jews need is the Gospel as the only power which can burst the chains in which their consciences lie stricken, and fill their unsteady hearts with that peace and security which passeth understanding.

The Jews like to say that there are no converts really convinced of the truth of Christianity; that they were all bought, somehow or other, etc. It would be a waste of time and of paper to refute these assertions. It were a very easy matter to mention a host of professors, ministers, teachers and others, who were blessed with earthly means, and yet became followers of Christ. If names count, we could fill page after page with names of Jewish converts who distinguished themselves in every sphere of life.
We could mention bishops, translators of the Bible, physicians, chemists, church historians, etc., that they thus became famous was not because they happened to be born within the pale of Judaism, but because Christianity gave their lives a new direction. Modern Jews, with whom not religion, but the race, is all, are prone to call these followers of Christ "apostates" and "renegades," but this arrogant and insulting nomenclature will neither disgrace the Jewish converts nor hinder others from joining the army of apostates. We know that there are different views concerning the mission among the Jews. There are many well-meaning Christians who think that the Jews should be left alone. But the command of the Lord is still valid, and it is the duty of the Church to be obedient to that command, leaving the result of the work to Him Who commanded it.

**JEBPUR.** See JAIPUR.

**JHALOA:** A town in the Bombay Presidency, India, situated in the district of Panch Mahals. Population (1891) 6,000, of whom 5,000 are Hindus. Station of the Presbyterian Church in Ireland, with (1900) 1 missionary and his wife, 9 native workers, 5 day schools and an orphanage.

**JHENG BAR:** A district in the Punjab, India, lying along the Chenab River and about 100 miles west of Lahore. Station circuit of the CMS (1899), with (1903) 1 missionary, 13 native workers, 1 day school and 4,699 professed Christians, of whom 176 are communicants. The field covers some 5,000 square miles and the Christians are scattered in 130 congregations, separated sometimes by considerable distances.

**JHANSI:** A town in the Central Provinces, India, 65 miles south of Gwalior. A walled town, strongly fortified; surrounded by fine groves. It is a military post and a railway center. Climate, intensely hot. Altitude, 855 feet. Population (1891), 52,000, of whom 35,400 are Hindus and 8,100 are Mohammedans. Station of the PN (1886), with (1903) 1 missionary and his wife, 2 women missionaries, 4 native workers, men and women, and 4 elementary schools. Station also of the WMS, with (1903) 1 missionary, 7 native workers and 4 outstations. Station also of the Woman's Union Missionary Society (1898), with 2 women missionaries, 3 native women workers, 1 dispensary and 1 hospital. The YWCA also has 2 women agents here and a Young Woman's Christian Association.

**JHELUM.** See JELAM.

**JIAGANJ:** A town in Bengal, India, situated in the district of Murshidabad, on the Bhagarnath River, about 14 miles N. of Berhampur. Population, with Azriganj, on the other side of the river, is 13,500. Station of the LMS (1892), with (1903) 1 missionary and his wife, 2 women missionaries, 4 native workers, men and women, and 4 elementary schools. Station also of the WMS, with (1903) 1 missionary, 7 native workers and 4 outstations. Station also of the Woman's Union Missionary Society (1898), with 2 women missionaries, 3 native women workers, 1 dispensary and 1 hospital. The YWCA also has 2 women agents here and a Young Woman's Christian Association.

**JHINJAR:** A town in Rajputana, India, capital of the native state of Jodhpur (also called Marwar). It is situated 98 miles W. of Ajmere. The town was built in 1540 and is surrounded by a strong wall six miles in circuit, with seventy gates. The Maharaja's palace stands on the crest of a hill overlooking the town several hundred feet below. Population (1901) 60,407, of whom more than three-fourths are Hindus. Station of the UMS (1885), with (1903) 1 missionary and his wife, 1 woman missionary, 3 native workers, a dispensary and a hospital. Name also written Jodpur.

**JOHANNESBURG:** A town in the Transvaal Colony, S. Africa, situated 30 miles S. by W. of Pretoria, at an altitude of 5,600 feet, in the Witwatersrand gold fields. The climate is pleasant and healthful. The European population exceeds 40,000, and the whole population is (1896) 105,000. Station of the WMS, with (1903) 12 missionaries, 278 native workers, men and women; 99 preaching places, 9 elementary schools, 1 boarding school and 3,029 professed Christians. Station also of the Berlin Missionary Society (1887), with (1900) 1 missionary, 11 native workers, 7 outstations, and 395 professed Christians. Also of the ABCFM (1893), with 1 missionary and his wife and 1 woman missionary. Also station of the South Africa Baptist Missionary Society, with 1 missionary.

**JOHNSON, Albert Osborne:** Born at Cadiz, O., June 22, 1835; graduated at Jefferson College, 1852; Western Theological Seminary, 1853; ordained by Presbytery of Ohio in June and sailed July 17, same year, for India, as a missionary of the PN. He was stationed at Fatehgarh. At the commencement of the Sepoy mutiny he with others attempted to reach Alahabad, a British station, but was made prisoner and put to death at Cawnpur by order of the rebel chief Nana Sahib, June 13, 1857.

**JOKEREA:** A settlement in British New Guinea, situated on the S. coast of the island, about 90 miles N. W. of Port Moresby. Station of the LMS (1894), with (1903) 1 missionary and 2 native workers.

**JOKYOKARTA:** A town in Java, Dutch East Indies, situated 55 miles south of Samarang. It is the capital of the Dutch residency. Population 50,000. Station of the Reformed Church of the Netherlands (1805), with (1900) 2 missionaries (one of them a physician) and their wives, 2 native workers, 2 outstations and 1 dispensary. Name written by the Society, Djokjokarta.

**JOLOF LANGUAGE:** One of the Negro group of African languages. It is spoken by a considerable number of tribesmen inhabiting the region bordering on the Gambia River in West Africa. It has been reduced to writing by mis-
sionaries, with use of the Roman alphabet. It is also called Wolo.

**JROD.** See ERODE.

**JUDÆO-GERMAN, JUDÆO-SPANISH, etc., language:** These and similar compounds are used to designate the name, when written with Hebrew letters, of the German, Polish, Spanish, etc., languages used by Jews to whom these languages (or some dialect of them) have become vociferous.

**JUDG.** Gerrit Parmelee: Born at Paris, N. Y., April 23, 1803; studied medicine with his father at Paris, and at the Medical College, Fairfield, N. Y.; sailed as a medical missionary of the American Board for the Sandwich Islands, reaching Honolulu March 31, 1828. In 1840 he accompanied Captain Wilkes in his exploring expedition through the islands. After fourteen years' faithful missionary work his connection with the mission ceased, and in 1842 he became recorder and interpreter to the Government of Kamehameha III. When Lord George Paulet took possession of the islands in 1843, Dr. Judg was appointed one of the joint commission to represent the king. When the government was restored to Kamehameha July 31, 1843, he was invited by the king to organize a ministry, which he did, and this was the first Hawaiian cabinet. In 1844 he became minister of finance, which office he held till 1853. He extricated the government from its financial embarrassments and in many ways was eminently serviceable to the nation. He died at Honolulu, January 12, 1853.

**JUDSON,** Adoniram: Born at Maiden, Mass., August 9, 1788; graduated at Brown University, first in his class, 1807. After graduating he taught school for a year, and published *Elements of English Grammar and Young Ladies' Arithmetic.* In 1808 he entered Andover Theological Seminary, not as a candidate for the ministry or a professor of religion, but as a person deeply in earnest on the subject, and desirous of arriving at the truth. In the seminary that year he was converted. The reading of Buchanan's *Star in the East* and his association with Mills, Richards and others had already led him toward the principle of the heathen. The ABCFM having been formed in 1810, and its funds not being sufficient to justify the appointment of the six young men who wished to go on a foreign mission, Mr. Judson was sent to England to secure the cooperation of the London Missionary Society in the support of a mission in the East. On the voyage the English ship was captured by the French and he was thrown into prison at Bayonne. Released, he proceeded to England. Unsuccessful in the immediate object of his journey, he was, on his return, appointed by the American Board as a missionary to India or Burmah, and, embarking February 19, 1812, reached Calcutta June 17. Having charged his wife with a report of this fact in 1850, he severed his connection with the Board. Being forbidden to remain in the East India Company's territories, he went, with his wife, to Mauritius. Here he remained four months, laboring among the English sailors of the garrison, and then sailed for England with a report that in 1850 he had visited the Board. In 1833 he was married to Mrs. Sarah H. Boardman. In 1834 he became minister of finance, which office he held till 1853. He extricated the government from its financial embarrassments and in many ways was eminently serviceable to the nation. He died at Honolulu, January 12, 1853.

**Judson,** Jabez: Born at Salem, Mass., May 26, 1812. In 1831-32 Mr. Judson made three tours among the Karens, and with encouraging success. In 1834 he was married to Mrs. Sarah H. Boardman. During that year he completed the translation of the Bible into Burmese, which he had commenced seventeen years before in Rangun. In 1838 he says there were above a thousand converts from heathenism formed into churches. In 1839, threatened with pulmonary disease, he took a short voyage, returning to Maulmain in two months with health somewhat improved. In 1842 he commenced, at the urgent request of Board, the preparation of a Burman dictionary. In 1845 he embarked for America for his own health and that of his wife, accompanied by two Burman assistants to help him in his work on the dictionary. Mrs. Judson died at St. Helena. He reached Boston October 15. Too weak for public speaking, he addressed crowded assemblies through an interpreter. Having again married, he returned to Burma in 1846, and soon resumed work at Rangun on the dictionary. But the intolerance of the Burmese Government and the sickness of the missionaries caused him to leave Rangun and return to Maulmain, which he reached September 5, 1847. Here he worked steadily at the dictionary, which he was compelled to leave unfinished, for his health had so utterly failed that in 1850 he sailed for a long voyage, and was lost as the only hope of saving his life. He died April 12, 1850, nearly three days out of sight of the mountains of Burma, and his body was committed to the deep. Dr. Judson was a man of vigorous intellect and fervent piety, a close student and very thorough in his work. He was well known throughout India. The Crown Prince of Siam invited him to visit Siam at his expense. The English took up their residence in the house of Mr. Felix Carey, who was then absent, and who afterward resigned his mission in their favor. After six years' labor, the first convert, Moung Nau, was baptized. From 1824 to 1829 he was in England with Burmaw, Mr. and Mrs. Judson endured terrible hardships. Suspected of being a spy, he was arrested in his house by an officer, accompanied by an executioner, who seized him, threw him on the floor, bound him fast with cords and dragged him away from his wife and wife. In 1833 he was thrown into the death-prison, and for seventeen months confined in the loathsome jails of Ava and Gung-pen-la, being bound during this period with three and, during two months, with five pairs of fetters. His sufferings from fever, heat, hunger, and the cruelty of his keepers were excruciating. Mrs. Judson also suffered, tho not imprisoned. By her persistent entreaties and large presents, and finally by the demand of General Campbell, he was, at the end of two years, released. In 1826 the headquarters of the mission were transferred to Amherst. But he was soon called to Ava to act as interpreter in the negotiation of a new treaty between the English and the Burmese. In his absence his wife died. In 1829 he joined the Boardmans at Maulmain, which became the chief seat of the Baptist missions in Burma. Desiring to carry the Gospel to Central Burma, Mr. Judson in 1830 made long tours in the interior, and spent three months in futile efforts to establish a mission in the ancient city of Prome. Before returning to Maulmain he spent a year in Rangun. At a great festival here he was applied to by thousands for help, and was soon called to help.
JUDSON, Ann Hasseltine: Born at Bradford, Mass., December 22, 1789; taught for several years after leaving Bradford Academy; married Dr. Judson and embarked with him for Burma February 19, 1812, and in July, 1813, reached Rangun. Her health having failed in a year and a half, she sailed for Madras January, 1815, returning after an absence of three months with health much improved. Several thousands of Siamese being in Rangun, she studied that language, and with the assistance of her teacher translated into it the Burman Catechism, a tract, and the Gospel of Matthew. She also translated a celebrated Siamese work into English. She had frequent meetings with the women. In 1820 she became seriously ill, and was taken by Dr. Judson to Calcutta, partly for a voyage and partly for the sake of the health partially restored she returned to Burma with Mr. and Mrs. Wade, reaching Rangun December 5, 1823, and with Dr. Judson removed to Ava. There she soon had a school of native girls. But on the breaking out of war with England she was called to share in his sufferings. While he was fettered in the death prison, she was guarded in her own house by ten ruffianly men, deprived of her furniture and most of her personal effects. Being released the third day, she sought in the darkness of the night or under a noonday sun, much of the time with a babe in her arms.” After a treaty of peace was concluded, Dr. and Mrs. Judson were again at Rangun March 21, 1826, having been absent two years and three months. The English having made the new town of Amarthet their capital, Dr. and Mrs. Judson established the mission there. During his absence at Ava as interpreter to the Burman king, Mrs. Judson built a small bamboo dwelling-house and two school-houses, in one of which she gathered ten children; in the other she herself assembled the few native converts for worship on the Sabbath. In the midst of these toils she was attacked with fever, and, after sixteen days’ illness, died, October 24, 1826, in the 37th year of her age. She was a woman of mental endowments, earnest piety, self-denial, great perseverance, unaffected dignity and refinement.

JUDSON, Emily Chubbuck: Born at Eaton, N. Y., August 22, 1817; taught at Utica; married Dr. Judson, and in 1847 sailed with him for Burma. A popular writer, she wrote, under the pseudonym of “Fanny Forester,” articles of prose and poetry for various magazines. She wrote also several Sunday school books. While in Rangun she wrote the memoirs and history of the Burmese language, and in Maulmain composed several of her best poems. After her husband’s death she returned home in 1851 with health much impaired, and devoted herself to the care of her children and aged parents, and to literary pursuits. She gave much time to the preparation of the translation for President Wayland’s Memoirs of Dr. Judson. She died at Hamilton, N. Y., June 1, 1854.

JUDSON, Sarah Hall (Boardman): Born at Alstead, N. H., November 4, 1803; married Rev. George Dana Boardman and embarked July 16, 1825, for Burma, but was detained in Calcutta by the war till 1827. After Mr. Boardman’s death she determined, urged by friends in America and another for the study of the Bible. She translated into Burmese the first part of Pilgrim’s Progress, several tracts, twenty of the best hymns used in the Chapel Hymn-book, four volumes of Scripture Questions for Sunday schools and a series of Sunday cards, each containing a short hymn. She learned also the language of the Paganians, and supervised the translation of the New Testament and the principal Burmese tracts into that language. Her health having failed, she left for home with Dr. Judson April 20, 1846. She died on shipboard in the harbor of St. Helena, September 1, 1845 and was buried on the island, having spent twenty-one years in mission work.

JUZ DE FORA: A town in Brazil, S. America, situated on the Parahiba River, 85 miles N. of Rio de Janeiro, at an altitude of 2,300 feet. Population (with the district) 15,000. Station of the MES (1884), with (1900) 3 missionaries and their wives, 3 women missionaries, 3 native workers, 2 outstations, 8 Sunday schools, 2 day schools, 1 boarding school, 1 theological training school and 328 professed evangelical Christians. Also called Parahiba.

JU-JU, The Long: This was a fetish jealously guarded by the Aro tribe at a point not far from Cross River in Southern Nigeria. The Aro tribe has long been celebrated for slave-hunting, cannibalism, guardianship of this important shrine, and determined refusal to recognize the British rule or to permit foreigners in their land. In the heart of their country the Ju-ju is shrouded in mystery. Fierce and bloodthirsty guards surrounded the place, in a circle of villages where all had to settle who wished to consult the Ju-ju. Such visitors after some delay were taken in batches, blindfolded, and led to the terrible place which no man of West Africa mentions without a shudder. Few who trusted themselves to the...
guards of the Long Ju-ju ever returned. Those who did return were worn and prematurely aged, stripped of all possessions and unwilling to speak of what they had seen. A case reached the ears of the British Government where 500 wretches from Nigeria, who had been charged by their tribes with various crimes, had sought to prove their innocence by the weary pilgrimage involved in an appeal to the arbitrament of the Long Ju-ju. A miserable remnant of 136 feeble and broken creatures was all that ever returned, and since the Aro country is in British territory, credit for the horrors of the great fetish was laid at the door of the English. After much evidence that the place was a center of infernal rites and beastly cannibalism, the British Government demanded that the Aros suppress these practises. The demand having been insolently refused, a force was sent into the country in 1901 which broke the power of the Aros and captured the Long Ju-ju shrine. The place of the shrine was a narrow pit-like crater seventy feet deep and 200 feet long, surrounded by dense brush. In the bottom of the crater was a singular, rent rock from which poured forth two large streams of water. This curious double stream pouring from rents in the solid sock, was the Long Ju-ju. It was shut in by a roof of human skulls and veiled by a curtain of cloth and matting. In front of the double water source were two altars foul with blood and covered with votive offerings and the recently stripped skulls of men. The water of the great double spring flowed away in a stream of some depth, and in the water were fish. There were numerous fish—strange, yellow-eyed creatures, tame through confidence that abundance of blood and offal from human sacrifices would continue to fatten them as of old. All the approaches to this awful place were bordered by piles of human skulls. It was the last stronghold of the infernal cult of fetishism which insists on human flesh for its sacrament. But one thing could be done with a place of such infamy and influence, and the English commander had the place blown up with dynamite.

JULFA: A town in Persia, lying on the Zende Rud, opposite Isphahan, with which it is connected by bridges as a suburb. It is peopled largely by Armenians, the descendants of captives brought by Shah Abbas from the Caucasus. Station of the CMS (1875), with 14 missionaries, men and women (including hospital nurses); 32 native workers, men and women; a printing house, 3 day schools, 2 hospitals and dispensaries and 245 professed Christians. Great extension has been given to medical work here, which has offered special channels of access to Mohammedans. There is also a sub-agency of the BFBS, with branch depots at Yezd, Shiraz and Sultanabad.

JULLUNDUR. See JALANDHAR.

JUMBA: A settlement in British East Africa, situated about 20 miles N. W. of Mombasa. Station of the Leipzig Missionary Society (1886), with (1900) 4 missionaries, one with his wife. Name also written Jimba.

JUNGO: A settlement in Uganda, Central Africa, situated on the northern shores of the Victoria Nyanza, about 32 miles S. W. of Mого. Station of the CMS (1895), with (1903) 109 native workers, men and women; 1 preaching place; 1 day school and 2,320 professed Christians, of whom 423 are communicants.

JU-NING-FU: A town in the province of Ho-nan, China, situated in the E. part of the province, about 100 miles east of Nan-yang. Station of the American Norwegian Church Mission Society (1899), with (1900) 1 missionary and his wife and 1 native worker. Name written by the Society Running Fu.

JUNNAR: A town in the Bombay Presidency, India, situated about 50 miles N. of Poona. Station of the CMS (1843), with (1903) 1 missionary and his wife.

K

KABAKADA: A settlement on the island of New Britain, or Neu Pommern, in the Bismarck archipelago, Western Pacific Ocean. It is situated at the northern extremity of the island, and is a station of the Australian Wesleyan Methodist Mission Society, with (1900) 1 missionary, 65 native workers, 4 outstations, 21 places of worship, 23 day schools, 1 theological training school and 331 professed Christians.

KABANIROE: A town on the western coast of Sumba Island, Dutch East Indies. Station of the Leipzig Missionary Society (1886), with (1900) 1 missionary and his wife, 2 native workers and 281 professed Christians.

KABAROLE: A settlement in the Toro district of Uganda, Africa, situated 170 miles W. of Mого. Station of the CMS (1899), with (1903) 4 missionaries, two with their wives; 2 women missionaries, 30 native workers, 1 village school, 1 female helpers' training class, 1 dispensary, 1 hospital and 2,209 professed Christians, of whom 645 are communicants. The Butiti Church statistics are included with these.

KABOERANG ISLAND: The same as Kabruang in the Talaut Islands, Dutch East Indies.

KABYLE LANGUAGE: Belongs to the Hamitic family of African languages and is spoken by various tribes found in Algeria and Tunis. It is written with Arabic letters. It is also sometimes called the Kabail language, Kabail being the plural of Kabail.

KACHABARI: A village in Lohardaga, district of Chota Nagpur, Bengal, India, situated 20 miles southeast of Lohardaga. A station of the SPG, with 9 native workers, 1 chapel, 3 day schools and 311 professed Christians.

KACHCH: A native state situated in the Bombay Presidency, India, between Kathiawar and Sindh. Its southwestern border rests upon the
Indian Ocean. Its habitable area is about 6,500 square miles, and its population (1901) 487,374. North and east of the state, covering an area of nearly 9,000 square miles (making the total area within the limits of Kachch over 15,000 square miles), stretches a salt desert, uninhabitable, uninhabited, and often in the rainy season impassable, known as the "Rann of Kachch." It is believed to be the bed of what was once an arm of the sea, but which has been raised above its original level and cut off from the ocean. During the rainy season it is often inundated, partly by the waves of the sea, driven against it by strong southerly winds, and partly by the rainfall from the adjacent region draining into it. During the dry season its surface is often encrusted and glittering with salt. The surface of Kachch as a whole is described as treeless, rocky and barren. It is cut by ranges of hills, rising at the highest point to an altitude of 1,450 feet above the sea. There is a fair proportion of good soil, the grain figures among the articles imported. Kachch is especially noted for its beautiful embroideries and its manufactures of silverware. The population is about three-fifths Hindu and a little more than one-fifth Mohammedan; the Jains number about 67,000. The roads are poor, and during the rainy months the country is nearly impassable. Missionary operations have been undertaken by the Kurku Inland Mission at one point (1897), where is now a beginning of a Christian community.

KACHIWA: A town in the United Provinces, India, situated about 20 miles W. of Benares. Station of the LMS (1897), with (1903) 2 missionaries and their wives, 1 hospital and 1 dispensary.

KADAVELLY: A town in the N. W. part of Ceylon, India, situated about 40 miles S. of Jaffna. Station of the WMS, with 44 native workers, 7 outstations, 8 Sunday schools, 8 day schools and 76 professed Christians. It possesses the only Jewish colony in China, with an entire population of 100,000 people. Station of the CIM (1902), with 4 missionaries and 1 dispensary.

KADIRI: A town in the district of Cuddapah, Madras, India, situated about 40 miles W. of Madras. Population (1891) 6,600. The Hindu Station of the LMS (1899), with (1903) 1 missionary and his wife, 20 native workers, men and women; 11 outstations, 11 Sabbath schools, 10 day schools and 293 professed Christians. It is a center of Jewish activity, with a Jewish colony of 100,000 people. Station of the ME, with (1900) 2 women missionaries, and a dispensary.

KAFIR LANGUAGES: Belongs to the family of African languages and is spoken in the Transkei district of Cape Colony, South Africa. It has been reduced to writing by missionaries of the WMS, the Roman alphabet slightly modified being used.

KAFIRLAND: A region in the eastern part of Cape Colony, South Africa, lying between the rivers Kei and Umzimkulu, once occupied by the Kafirs. It was also sometimes called Cafirria. It is now known by the names of the different districts into which it has been divided: Transkei, Tembland and Griqualand East. The great attractions of the country, its being at once the most luxuriant and fertile region in South Africa, have helped to overcome the difficulties and dangers of colonization, and there is now a continuous zone of European settlements throughout the region.

KAFIRS: The Xosa, or Kafirs, are a tribe of Bantu blood found in the eastern part of Cape Colony. Their account of themselves is that they came gradually down from the northeast, some two or three hundred years ago, and settled in districts lying between the Kei and the Umzimkulu, out of which they crowded the weaker Hottentot and Bushmen tribes. The name Kafr, which in Arabic signifies infidel, or those who do not hold the Muslim faith, was first applied by Arabs to the heathen tribes with which as traders they came in contact, along the East Coast of Africa, which would seem to give sanction to the above historic saying. And then, in the Kafr's practice of polygamy and the rite of circumcision, and especially in his proud bearing and martial spirit, in his somewhat Arabian features, and in his hue, not generally so dark as that of the pure negro, many see proof of his having been for a time associated with the Arab race.

KAGOSHIMA: A town in Kiushiu, Japan, situated on a bay on the S. E. coast, opposite the volcanic island of Satawa Shima, and about 88 miles S. S. E. of Nagasaki. One of the most ancient cities of Japan. It has a large number of pottery factories. Population 50,000. Station of the BCA (1893), with (1903) 1 missionary and his wife, 1 woman missionary, 5 native workers, 5 outstations, 1 chapel, 3 Sunday schools and 75 professed Christians. Station also of the CMS (1895), with (1903) 1 missionary and his wife, 1 woman missionary, 3 native workers, 1 outstation, 2 Sunday schools and 15 professed Christians, of whom 34 are communicants. Station also of the ME, with (1900) 2 women missionaries, 1 native worker, 1 chapel, 3 Sunday schools and 47 professed Christians.

KAI-FENG-FU: The capital of the province of Ho-nan, China, situated 110 miles E. of Ho-nan-fu and about 9 miles from the right bank of the Hoang Ho. It was the capital of the empire from 1280 to 1405 under the name of Tung King. It possesses the only Jewish colony in China, with an entire population of 100,000 people. Station of the CIM (1902), with 4 missionaries and 1 dispensary.

KAI-HSIEN: A town in Sze-chwan, China, situated 55 miles W. of Kwei-chau-fu. Station of the CIM (1902), with 1 missionary and 4 outstations.

KAILANG: A village in the Punjab, India, situated in the Lahoul region, 45 miles northeast of Dharmshala. Station of the Moravian Mission (1856), with (1900) 3 missionaries and their wives, 4 native workers, 10 day schools, 1 industrial school. Name sometimes spelled Kyelang.

KAIRWAN: A city in Tunisia, N. Africa, situated in the center of a vast plain 31 miles W. S. W. of Sussa. It was founded in 670. For two centuries it was the capital of successive Arabian dynasties. It has fine mosques, of which the largest is 460 feet square. Population about 10,000. Station of the North African Mission (1897), with (1900) 1 missionary and his wife, 2 women missionaries, and a dispensary.

KAISARIYEH: A city in Asiatic Turkey, situated in the province of Angora and about 200 miles S. by W. of the City of Angora. It lies in a fertile plain at an altitude of 585 feet, near the foot of Mt. Argeas (Erjish). It was in ancient times capital of Cappadocia, and is now the seat of an Armenian bishop. The climate is dry, pleasant and healthful, with a tendency to
extremes of heat and cold, however, owing to the altitude of the plain. Population, 72,000, of whom 45,000 are Mohammedans, 14,500 Greeks, 9,000 Armenians, and about 2,000 Evangelical. The Christian part of the population furnish many enterprising business men who find the way into foremost places in Constantinople, Smyrna, Adana, etc., and have even made their mark in mercantile circles in London, Manchester and New York. Evangelistic work was begun in Cesarea in 1823 by Mr. B. Barker, Agent of the EFBS. The Scriptures which he distributed here were as seed falling into good ground. Later the persecution of Protestant Armenians in Constantinople had for one of its incidents the exile to Cesarea in 1839 of a preacher, Hohannes der Sahagian, and of other Evangelicals in 1845. These all preached the Gospel wherever they were, with the result that a number of the people of the city, in 1849, sent to the ABCFM missionaries at Aintab an earnest request for a preacher. In 1854 the ABCFM sent Rev. W. A. Farnsworth and Rev. J. N. Ball to occupy the city as a permanent station. It now (1903) has 3 missionaries and their wives, 6 women missionaries, 74 native workers, men and women; 35 outstations, 25 places of worship, 31 day schools, 2 boarding schools, 1 hospital, 1 dispensary, and 1,088 evangelistic Christians. The place is commonly called Cesarea by English-speaking people, the name Kaisariyeh being the Turkish corruption of this.

KAI-YUEN: A town in Manchuria, Chinese Empire, situated in the province of Liaotung, 68 miles N. N. E. of Mukden. Population, 35,000. Station of the UFS (1890), with (1903) 1 missionary and his wife, 1 woman missionary, 17 native workers, 4 outstations, 18 Sunday schools, 1 hospital, 1 dispensary, and 838 professed Christians.

KAKONDA: A town in Portuguese West Africa, situated 140 miles S. E. by E. of Benguela in the district of that name. Altitude, 5,500 feet. Station of the FCMS (1900), with 1 missionary and his wife.

KALAHASTI: A town in the north Arcot district, Madras, India, 60 miles N. N. W. of Madras, on the Suvaramukhi River. Population, 11,800. The town has large bazars, and is a place for pilgrimage, as it contains one of the most famous temples of Siva. Station of the Hermannsburg Missionary Society (1873), with (1902) 1 missionary and his wife, 6 native workers, 2 outstations, 3 day schools, and 193 professed Christians, of whom 104 are communicants.

KALASAPAD: A town in the district of Nellore, Madras, India, situated about 62 miles northwest of Nellore. A station of the SPG (1861), with (1903) 1 missionary, 60 native workers, 3 chapels, 53 day schools, 2 boarding schools, and 4,732 professed Christians, of whom 1,477 are communicants. Name sometimes spelled Kasapad.

KALAN. See CHANG-KIA-KALU.

KALIBASI: A settlement in Natal, S. Africa, 33 miles N. N. E. of Ladysmith. Station of the UFS (1897), with (1903) 1 missionary and his wife, 14 native workers, 14 outstations, 10 day schools, and 427 professed Christians.

KALIMPONG: A town in Bengal, India, situated on the borders of Bhutan and Sikkim, about 15 miles E. by N. of Darjiling, at an altitude of 5,000 feet. It is a strange meeting place of races and religions. The town has about 13,000 inhabitants, who are Nepalis, Lepches, Bhutias, and other hillmen, besides plainmen of various classes. In religion there are seen Buddhists, Hindus, Spirit-worshipers, Mohammedans, and Christians, and all contrive to carry on traffic in spite of divergences of language and creed. Station of the Church of Scotland Foreign Missions' Committee (1873), and the C. of S. Woman's Missions Committee (1889), with, together (1900), 3 missionaries and their wives, 12 native workers, men and women, and 1 dispensary. Another name of this place is Dalingkot.

KALITJERET: A town in the island of Java, Dutch East Indies, situated 30 miles S. W. of Samarang. Station of the Neukirchen Missionary Society (1885), with 2 missionaries, 11 native workers, 10 outstations, and 2 schools.

KALKA: A village in the Punjab, India, 23 miles S. W. of Simla. Altitude, 2,000 feet. Population, about 5,000. Station of the BMS (1885), with (1903) 3 missionaries, 1 missionary's wife, 15 native workers, men and women; 5 outstations, and 9 day schools.

KALKHAS LANGUAGE: A Mongolian dialect used in Chinese Mongolia. The alphabet is nearly the same as that of the Manchu.

KALAKURCHI: A town in the Presidency of Madras, India, situated 58 miles W. of Cuddalore. Station of the Danish Missionary Society (1894), with 2 missionaries and 2 native workers. The station is called by the Society, Batticaloa.

KALLAR: A village in the E. part of North Ceylon, India, situated about 20 miles S. E. of Batticaloa. A station of the WMS (1903), with 24 native workers, 12 outstations, 13 chapels, 12 Sunday schools, 12 day schools, and 121 professed Christians.

KALKMUCKS. See MONGOLS.

KALMUNAI: A town on the E. coast of Ceylon, India, situated about 26 miles S. E. of Batticaloa. Station of the WMS with (1903) 2 missionaries, 1 woman missionary, 35 native workers, 6 outstations, 7 chapels, 7 Sunday schools, and 178 professed Christians.

KALNA: A town in the district of Bardwan, Bengal, India, on the right bank of the Bhagirathi River, 42 miles N. of Calcutta. Population (1891) 9,700, of whom about 8,500 are Hindus. Medical station of the UFS, with (1903) 2 missionary physicians, 4 native workers and 4 dispensers. The church statistics are included in those given at Hugli.

KALUTTURAI: A town in the western part of Ceylon, situated about 27 miles south by east of Colombo. Population, 11,000. A station of the SPG, with (1903) 40 native workers, 3 chapels, 8 day schools and 189 professed Christians. The WMS also has a station at this place, with (1903) 2 missionaries, 35 native workers, 8 outstations, 8 chapels, 8 Sunday schools, 12 day schools and 160 professed Christians, of whom 126 are communicants. Name is also sometimes spelled Kalutara.

KAMAMET: A town in Haidarabad, India, situated 100 miles N. W. of Masulipatam. It is a station of the CMS (1888), with (1903) 1 missionary and his wife, 42 native workers, 1 chapel, 8 village schools and 1,464 professed Christians,
of whom 348 are communicants. Station also of the CEZ (1889), with (1903) 2 women missionaries, 28 native workers, 7 village schools and 1 dispensary. The name is sometimes spelled Khammamet and Khammamett.

KAMBLA: A town in Sierra Leone, W. Africa, situated near the frontier of French Guinea and about 25 miles from the sea. Station of the Pongas Mission (1897), with 1 missionary and his wife.

KAMBOLE: A settlement in British East Africa, situated about 25 miles S. W. of the southern end of Lake Tanganyika. Station of the LMS (1894), with (1903) 2 missionaries and their wives, 6 native workers, 9 schools and 1 dispensary.

KAMERUN: A German protectorate in Western Africa, lying between Nigeria on the northwest and the French Congo on the east, extending to Lake Chad on the north, and having the Bight of Biafra for its western boundary, with a coast line of 199 miles. Its area is 191,130 square miles, with a population estimated at 3,500,000. The coast mountains over against the island of Fernando Po rise at one point to a peak of 14,000 feet, surpassed on the African continent only by Kilimanjaro, 18,000 feet in Ethiopia. The summit is bare, except for a few trailing plants sheltered in the hollows. The surrounding country is well watered by small lakes and rivers, with their confluentes and deltas. But little of the region has been explored or brought under the influence of its European masters. In the summer rainy season (May to August) the rainfall is very heavy, and the season of the winter rains is characterized by squalls, tornados and dense vaper. The chief station and seat of government is Buea, beautifully situated on the mountain.

Kameruns is a name applied collectively to a dozen populous villages on the east side of the Kamerun estuary. The chief inhabitants are of Bantu origin and speech. These include the lively, intelligent and daring but very superstitious Bakwiri, between the coast and the mountains; the industrious and equally superstitious Bakundo of the northern slopes; the communal Bantelse and trading Abo east of the Bakundo; the tom-tom beating and well-known Dualla of the Kamerun estuary; farther south the savage Bakoko and the Batangs, who are the most skilful boat-builders in Africa, and the Fangs, who are pressing to the coast from the interior.

In the northern portion of the territory the population is composed almost entirely of the Sudanese negroes.

The first missionary operations in this region were undertaken by the BMS in 1858, when its missionaries were driven from Fernando Po by Spanish bigotry. At that time the missionaries found danger from the savages on the mainland less than that of the Europeans who ruled the island. They transferred their work to the Basel Missionary Society in 1886, two years after the German Protectorate was announced. The PN (1885) and the German Baptiste (1891) also have stations. There are altogether in Kamerun 16 stations where missionaries reside, with 115 schools of various grades and about 2,500 native communicant Christians.

KAMPTI: A town in the Central Provinces, India, 8 miles N. E. of Nagpur, and just below the confluence of the Kahan with the Pench and Kolar Rivers. It has considerable trade in timber and grain. Population (1891), 43,000, of whom 28,500 are Hindus and 11,500 are Mohammedans. Station of the ME, with (1900) 1 missionary and his wife, 14 native workers, men and women; 5 day schools, an orphanage and 88 professed Christians.

KAMUNDONGA: A town in Angola, W. Africa, 245 miles E. of Benguela. Station of the ABCFM (1886), with (1901) 2 missionaries and their wives, 2 women missionaries, 7 native workers, 1 industrial school, 1 theological training class, 1 hospital, 1 dispensary and a printing house.

KANA: A settlement in the Transvaal Colony, S. Africa, 52 miles E. by N. of Pretoria. Station of the Hermannsburg Missionary Society (1867), with (1900) 2 missionaries, 1 missionary's wife, 9 native workers, 5 outstations, 5 day schools and 1,407 professed Christians.

KANAUJ: A town in the United Provinces, India, situated in the district of Farukhabad, 49 miles N. W. of Cawnpur, on the right bank of the Kali Nadi, formerly bed of the Ganges. The change in the bed of the river ruined the town. Anciently it was a city of importance, capital of a great Aryan kingdom. It was the scene of several battles of the Turkish conquerors of India. Population (1891) 17,600, of whom 10,000 are Hindus. Station circuit of the ME, with (1903) 14 native workers, 14 Sunday schools, 5 day schools and 89 professed Christians.

KANAZAWA: A town in Japan, situated on the W. coast of the main island of Hondo, 125 miles N. N. E. of Kioto. It is celebrated for its manufactures of fans, pottery, and bronze ware overlaid with gold and silver. Population 96,600. Station of the PN (1879), the PE and the Methodist Church in Canada (1891). Taken together these missions have (1900) 4 missionaries, 3 wives of missionaries, 6 women missionaries, 7 native workers, men and women; 3 outstations, 3 day schools, 1 boarding school, 1 orphanage, 3 industrial schools, 5 places of worship and 8 Sabbath schools.

KAN-CHAU-FU: A town in the province of Kiang-si, China, situated on the Kia-kiang, 213 miles N. N. E. of Canton. It has somewhat important manufactures of Chinese ink and varnish. Station of the CIM (1899), with (1903) 5 missionaries, two of whom are accompanied by their wives.

KANDUKUR: A town in the Madras Presidency, India, 58 miles N. of Nellore. Population (1891) 7,600, of whom 6,000 are Hindus. Station of the ABMU (1893), with (1903) 1 missionary and his wife, 9 native workers, 21 outstations, 2 places of worship, 1 day school and 783 professed Christians.

KANDY: A town situated near the center of the island of Ceylon, built on the margin of an artificial lake 1,734 feet above the sea, 58 miles N. E. by E. of Colombo. It was formerly the capital of a kingdom called by that name, and con-
tains the tombs of the Kandian kings, together with many handsome temples. Population (1891) 20,400. It is the headquarters for mission work among the Kandies, who are dominated by Fulani Mohammedans, who are not by any means a coherent nation, but are divided on the subject of this origin. The Karaites have produced a valuable literature, not only on Biblical interpretations, dogmaties, and other religious topics, but also on philosophy and mathematics, written partly in Hebrew or Arabic, partly in a curious dialect of Turkish, which is a peculiar idiom of their own, in a region bordering on the Black Sea, and partly in the languages of the several countries which they inhabit. Their literature is, however, very little known to the Occidental world. Several of their
principal writings have been published at Eupatoria, in the Crimea. The name is also written Caraites.

KARAIC TARTAR TURKISH. See Turkish Language.

KARAKAL: A town in South Kanara, Madras, India, 30 miles N. E. of Mangalore. Station of the Basel Missionary Society (1872), with (1903) 2 missionaries, 1 with his wife; 13 native workers, 4 outstations, 5 elementary schools, and 188 professed Christians. The name as written by the Society is Karkala.

KARASS LANGUAGE: Name improperly given to the Nogai dialect of Turkish.

KARATA: A settlement in Nicaragua, Central America, in the Mosquito Reservation, about 140 miles north of Bluefields. Station of the Mora­vian Mission (1880), with (1900) 1 missionary and wife, 6 active workers, men and women; 1 church and 1 day school.

KARELLAN LANGUAGE: A dialect of the Finnish which is spoken in the district of Tver in Russia. It is written with the Russian alphabet.

KARENS: The Karens include several related tribes, scattered over various portions of Lower Burma, and extending into Northern Siam. All told they number probably not far from one million. Evidence seems to indicate that their ancestors came into Burma from western China. Indeed they bear a considerable resemblance to the alien people of western China to-day, called by the Chinese Ya-yin or "wild people." The language of the Karens is of the monosyllabic class and Tibeto-Burman family. It was unwritten until the coming of the missionaries, who adapted the Burmese alphabet to its use. Its various dialects so far resemble each other that missionary work is carried on mainly through the use of two, the Sgau and the Pwo dialects. Dr. Mason has grouped the various Karen tribes concisely under three sub-divisions, viz., the Sgaus, Pwos, and Bghais. With the Sgaus proper he included the Pakus, Maunepghas, and the small tribe of the We-was; while the Mopghas are classed with the Pwos. The total number of Pwos and of Sgaus has been given as 310,000 and 260,000, respectively. Both these tribes are scattered widely over Lower Burma, between the eastern and western Yoma mountain ranges, over the deltas of the Irrawaddy and the Salwen, and on the extreme southern part of the province of Tenasserim. The Sgaus and allied tribes extend as far north as Prome and Taung-ngu, the Pakus being found in the southern portion of the Taung-ngu district, while the Maunepghas are east from Shwegyin. The Pwos are possessed of rather stronger natural traits, and stand rather higher in the scale of civilization than the Sgaus. Being more Burmanized, however, they are less accessible to the Gospel, and the transforming power of Christian education is seen chiefly among the Sgaus. These tribes are somewhat low in stature, with olive complexion, and dark hair and eyes and gentle manner; attractive faces are common. In the plains the so-called villages are simply small groups of houses, usually from six to twenty, in the rice fields, a village of fifty houses being unusual. The people are chiefly agriculturists, those of the plains industriously raising rice in large quantities.

The Bghais, including several minor tribes, as the Geckhs, Padaungs and others, inhabit the mountains N. E. of Taung-ngu. They are fierce and warlike, and, except when modified by Christianity, locate their villages on elevation difficult of access. Each village consists of a single house, through which runs a long hall, with rooms opening off either side. The Red Karens, classed by Dr. Mason with the Bghais, receive their name from the color of their dress. They occupy a territory N. E. of Taung-ngu, separate from other tribes, and are the most warlike of the Karens, never having been conquered by the Burmese.

The Karens are notably simple-minded, and except for the wilder hill-tribes, peace-lovers, men of peace, and possess a character that is a curious mixture of timidity and courage. Timid and retiring ordinarily, on occasions, as during the Anglo-Burman wars, they have risen to notable heights of courage, showing complete indifference to death. Nevertheless, the Red Karens, by their natural quietness of disposition, together with the smallness of their numbers, kept them in subjection to the Burmese, prior to the British occupation of lower Burma. With a certain stoicism under misfortune, they have a good deal of natural, though undemonstrative, kindness. They are both obstinate and tractable, it being a common saying that a Karen can be led anywhere, but driven nowhere. Petty lying is universal, treachery rare. Much inferior to the Burmese in personal cleanliness, they are also much less immoral. Their extreme clannishness is perhaps an outcome of their long oppression under the rule of other races. The Karens of the plains, however, have largely adopted the Burmese mode of dress, while the use of the Burmese language is rapidly on the increase, especially among the Pwo-Karens. When instructed they develop a decided taste for music, excelling in singing. Under education, their mental processes are slow, but persistent and fruitful. The original nat, or spirit-worship, prevalent among the Karens, has been less modified among the Bghais than in any of the others. God has but little active concern in the world at present, and nothing is to be feared either from him or from good spirits. The Karens in general, therefore, give little thought to either, but concentrate their effort upon misleading, or placating, a personal devil, in whom they believe, and the innumerable sat or evil spirits which swarm on every hand, in mountains, streams, trees, and in almost every natural object. Idolatry is found only among those Karens, chiefly Pwos, who have adopted Buddhism.

The remarkable body of precepts and traditions handed down from the Karen elders has often arrested attention, and has led some to infer a Jewish origin for this people, many of the precepts possessing much beauty and moral weight. A few condensed extracts from the traditions are here given:

"Anciently God commanded, but Satan appeared deceiving unto death.

The dragon beguiled the woman and Tha-nai. A white fruit took the great dragon.

And gave to the daughter and son of God. They kept not all the law of God; were deceived—deceived unto death."

The story of the creation of woman from the rib of the first man, and of the forbidden fruit, the woman first transgressing, then persuading
her husband, closely resembles the Scripture narrative.

Sense of estrangement from God, and an almost Messianic hope mingle in the following:

"God formerly loved the Karen nation above all others, but because of their transgression he cursed them.

God departed with our younger brother, the white foreigner.

When God departed, the Karens became slaves to the Burmans."

In the midst of their suffering they remembered the ancient sayings of the Elders:

"That God would yet save them, that a Karen king would yet appear.

When he arrives there will be but one monarch, everything will be happy; and even lions and leopards will lose their savageness."

Missionary work among these people has been much helped by the traditions of which these lines are samples:

"Our ancestors said, that when our younger brothers come back, the white foreigners, (in ships from the west), who were able to keep company with God, the Karens will be happy.

Hence the Karens longed for those who were to come by water."

**KARIB, or KARIF:** The aboriginal inhabitants of Dutch Guiana, South America.

**KARIKAL:** A town on the Coromandel coast, India, and a French possession, situated 13 miles N. of Negapatam. It has an important rice trade. Population (1891) 70,500. Station of the Leipzig Missionary Society (1895), with 3 native workers and 130 professed Christians.

**KARIMGANJ:** A town in Assam, 28 miles E. of Sylhet. Station of the Welsh Calvinistic Missionary Society, with (1900) 1 missionary and his wife, 1 woman missionary, an elementary school and a dispensary.

**KARIMNAGAR:** A town in the native state of Haidarabad, India, situated about 85 miles N. E. of Haidarabad. A station of the WMS, with 1 missionary, 46 native workers, 28 Sunday schools, 23 day schools and 1,495 professed Christians, of whom 373 are communicants.

**KARKALA.** See KARAKAL.

**KARKLOOF:** A town in the district of Coimbatore, Madras, India, situated about 44 miles west north west of Trichinopoly. It is the capital of the ancient kingdom of Chera, taken by the English in 1801. Population 11,000, nearly all of whom are Hindus. The station of the ABMU (1870), with 1 missionary and his wife, 41 native workers, men and women; 20 outstations, 10 day schools, 2 boarding schools and 1,036 communicants. Station also of the SPG, with (1902) 1 missionary, 51 native workers, men and women; 20 day schools and 2 boarding schools. Name written by the societies Kurnool.

**KARONGA:** A post of the African Lake Corporation in Nyasalnd, Africa, situated on the west shore of Lake Nyasa at the eastern terminus of the Stevenson Road. Station of the UFS, with (1903) 1 missionary and his wife, 59 native workers, 24 outstations and 27 elementary schools.

**KARRACHI.** See Karachi.

**KARS:** A strongly fortified city of Turkey in Asia, historically important, and taken by Russia from Turkey in the war of 1877-78. Its population (12,000) is largely Armenian, and it was successfully worked as an outstation of Erzerum (ABCFM) up to 1879. After the city became Russian territory the Evangelical Armenian Church was officially recognized and protected by the government, but the missionaries were not allowed to visit it. The permanency and vitality of the missionary church at this place has been tested by this experience and it has not failed under the test.

**KARSHUN LANGUAGE.** See Syriac.

**KASITUNGI:** A town in Bengal, India, situated 12 miles S. W. of Darjiling. Station of the Church of Scotland Woman's Missionary Committee (1896), with 2 women missionaries and 2 native women workers.

**KARUNKODDATIVE:** A town on the east coast of Ceylon, India, situated 38 miles S. S. W. of Batticaloa. A station of the WMS, with 1 missionary, 9 native workers, 2 outstations, 1 chapel, 4 Sunday schools, 4 day schools and 59 Christians.

**KARUR:** A town in the district of Coimbatore, Madras, India, situated about 44 miles west north west of Trichinopoly. It is the capital of the ancient kingdom of Chera, taken by the English in 1801. Population 11,000, nearly all of whom are Hindus. Station of the SWMS, with (1903) 4 missionaries, 35 native workers, 4 outstations, 5 chapels, 8 Sunday schools, 13 day schools, 1 high school, 1 industrial school, 1 orphanage and 219 professed Christians, of whom 130 are communicants.

**KASERGOD.** See Cassergode.

**KASHGAR:** A city in Chinese Turkestan, the most western city of the Chinese Empire, and capital of the province of Sin-kiang. It stands at an altitude of 4,000 feet, at the confluence of several routes of travel, in a rich oasis. Population 50,000. Station of the Swedish Missionary Union (1894), with (1900) 3 missionaries and their wives, 2 native workers, a day school and a dispensary.

**KASHING.** See KIA-HSING-FU.

**KASHMIR.** See Srinagar.

**KASHMIR:** A native state in India, lying among the great mountains of the Himalaya range north of the Punjab. Tibet touches it on the east, and after passing the great Karakorum range on the north, one enters soon the territories of Kashgar, which lie outside the limits of India. The country is for the most part an elevated valley, over 5,000 feet above the sea, surrounded by lofty mountains. Total area, nearly
Kashmiri Kerepu

THE ENCYCLOPEDIA OF MISSIONS

81,000 square miles, with a population of 2,643,952. The ruler is known as the Maharaja of Kash-Cashmir, and, like the other native rulers of India, he is in political subordination to the British Government. The predominant religion is Mohammedanism, Hinduism being the religion of about one-third of the people. About one percent of the population are Buddhists. Missions have been conducted there with the utmost difficulty until within very recent times on account of the hostility of the native government (the Maharaja is a devout and intense Hindu) and also because the regulation debarring Europeans from permanent residence in the valley compelled the missionaries to break off their labors with the close of the season and leave the country entirely for a large part of each year. In 1844 and again in 1862 explorations and tours were made through Kashimir by missionaries of the CMS stationed in the Punjab, who made an unsuccessful attempt to establish a permanent mission in 1864. In 1885 Dr. Elmslie, a Scotch medical missionary in the service of that Society, reached Srinagar, and in spite of all obstacles had made a promising beginning, when his labors were terminated by his death, in 1872. The Society, however, has been able to carry on the mission since, and it has been of great benefit to the people, especially during the famines of 1880 and the distress following the great earthquake in 1884, and the cholera epidemics which sweep through the land almost periodically. The CMS now has two mission stations in Kashimir.

KASHIKI LANGUAGE: Belongs to the Indic branch of the Aryan family of languages. It is spoken in Kashimir and is written with Arabic letters slightly modified for the purpose.

KASUR: A town in the Punjab, India, situated 32 miles S. by E. of Lahore. Population (1891) 20,300, of whom 15,400 are Muslims. Station of the Zenana Bible and Medical Mission, with (1900) 4 women missionaries.

KATANA: A village on the west coast of Ceylon, situated about 25 miles north of Colombo. Station of the WMS (1903), with 1 missionary, 12 native workers, 3 outstations, 5 chapels, 5 Sunday schools, 5 day schools and 50 professed Christians, of whom 61 are communicants.

KATCHI LANGUAGE: Belongs to the Indic branch of the Aryan family, being a dialect of Sindhi, strongly affected by the Gujarati. The alphabet used is the Hindi, with some slight modifications.

KATHIAWAR: A peninsula, nearly square in shape, which forms the western part of Gujarat (q.v.).

KATNI: A town in the Central Provinces, India, situated 50 miles N.E. of Jabalpur. Station of the CEZ (1897), with (1903) 1 woman missionary, 13 native workers, 1 outstation and 2 village schools. The CMS also has a station here, with (1900) 1 missionary and his wife and 1 outstation.

KAU: A settlement in the island of Malheira, Moluccas, Dutch East Indies, situated on Kau Bay in the east central part of the island. Station of the Utrecht Missionary Society (1898).

KAVALI: A town in the Presidency of Madras, India, situated in the district of Nellore, 33 miles N. of Nellore City. Population (1891) 5,000.

Station of the ABMU (1893), with (1902) 1 missionary and his wife, 2 women missionaries, 34 native workers, men and women; 20 outstations, 3 places of worship, 4 day schools, 1 boarding school, 1 dispensary and 1,200 professed Christians, of whom 331 are communicants.

KAWATARIA: A station of the Australian Wesleyan Methodist Missionary Society on the Trobriand Islands, lying off the E. shore of British New Guinea, South Pacific Ocean. It now (1900) has 1 missionary and his wife, 2 women missionaries, 5 native workers, 2 outstations, 4 places of worship, 3 day schools and a theological training class.

KAWIMBE: A village in Nyasaland, Central Africa, situated at an altitude of 5,300 feet, about 21 miles E. S. E. of the southern end of Lake Tanganyika. Station of the LMS (1887), with (1903) 2 missionaries, 1 missionary's wife, 6 native workers, 13 schools and 1 industrial school.

KAYIN, or KAYINTOCHAU. See KIA-YING-CHAU.

KAZAK, or KAZAN TURKI LANGUAGE. See Turkish LANGUAGE.

KEDOEMEN: A town in the island of Java, Dutch East Indies, situated about 75 miles S. W. of Samarang. Station of the Reformed Church of the Netherlands (1900).

KEDIRI: A town in the island of Java, Dutch East Indies, situated in a lovely valley 60 miles S. W. of Surabaya. Population 16,000. Station of the Netherlands Missionary Society (1849), with (1900) 1 missionary and his wife, 26 native workers, 15 outstations, 11 day schools and 1 industrial school.

KEDOENG PENDJALIN: A town on the northern coast of Java, Dutch East Indies, about 45 miles N. E. of Samarang. Station of the Netherlands Mennonite Board of Missions (1865).

KEETMANNSHOOP: A station of the Rhenish Missionary Society in German Southwest Africa, situated 140 miles E. of Angra Pequena, among the Namaquas. It has now (1903) 2 missionaries, 1 missionary's wife, 4 native workers, 1 day school and 1,329 professed Christians, of whom 546 are communicants.

KEGALLA: A town in Ceylon, situated 20 miles W. of Kandy. Station of the CMS (1880), with (1903) 1 missionary, 2 women missionaries, 3 native workers, 7 outstations, 1 village school and 1 high school. Name is sometimes spelled Kegalle.

KEHURUKO: A station in the Kikuyu district of British East Africa, situated near Ft. Smith, on the Uganda Railway, about 300 miles N. W. of Mombasa. Station of the CMS (1883), with (1900) 1 missionary, 1 woman missionary, 1 native worker, 1 day school and 6 Christians. The place is sometimes spoken of as Kikuyu.

KEITH-FALCONER, Ion: Born in Edinburgh, Scotland, in 1856. Died at Sheikh-Othman, Aden, Arabia, May 11, 1887. Born of a noble lineage, surrounded by the most attractive social advantages, blessed by a strong body and vigorous mind, he, early in life, dedicated all of his powers to the service of his Lord. While pursuing his brilliant career at Cambridge, the missionary spirit burned in him, and before leaving his native land for the foreign field he entered...
upon varied forms of Christian service. He became the leader of a band of Christian students who, in an old theater, near Cambridge, carried on ragged school work and Gospel evangelism, and in after years he joined Mr. Charrington in his mission work in the Hamlets Mission in the East End of London. After he passed his last examination at Cambridge, in 1880, he commenced the study of Arabic, including the Koran, and afterward, in order that he might acquire the colloquial language and learn the temper of the Arabic mind in following the Mohammedan faith, he went to the Nile, and to Assiout, residing, for several months, with the well-known missionary, Dr. H. W. Hogg. In the autumn of 1885 he went to Aden "to prospect," and as a result he determined to locate at Sheikh-Othman, within the territory but 10 miles from the town of Aden. While visiting Scotland in 1886 he laid his plans for a large work in Southern Arabia. He decided to establish a school, a medical mission and a depot for the distribution of the Scriptures. He was willing to put himself under a Scottish Foreign Mission Board with the understanding that he was himself to pay all costs of the mission. In the winter of 1886 he laid the foundation of his mission premises and work, and soon the impress of his consecrated life was felt among the Muslims. But the Aden fever proved a fatal foe, and in May, 1887, the "Martyr of Aden entered God's Eden." The Keith-Falconer Mission to Arabia has not died; it is carried on by the United Free Church of Scotland, and since its founder was buried new impulse has been given to the attempt to carry Christianity to the land of Ishmael.

KELE LANGUAGE: Of the Bantu family. It is spoken by tribes found in the Gabun district of the coast region of French Congo, W. Africa. Missionaries of the PN have made literary use of it, writing it with Roman letters. Also called Dikele.

KELLOGG, Samuel H.: Dr. Kellogg went out to India, as a missionary of the American Presbyterian Board (N), in 1864, sailing from Boston on December 20. He had been graduated from Princeton College in 1861, and from the Princeton Theological Seminary in 1864. Mrs. Kellogg died, and he was obliged to return home on account of his inability to arrange otherwise for his four motherless little children, all of them under ten years of age. Early in 1877 he became pastor of the Third Presbyterian Church of Pittsburgh, and in September of the same year succeeded Dr. A. A. Hodge in the Western Theological Seminary. On May 20, 1886, he became pastor of the St. James Square Presbyterian Church of Toronto, Canada, where he exerted a great influence until his resignation in September, 1892, when he returned to India to accept the appointment of the North, India and British and Foreign Bible societies as one of a committee of three to translate the Old Testament Scriptures into Hindi.

In his death, by accident, May 3, 1899, the mission cause suffered a profound loss.

KEMENDINE: A village in Burma, British India, situated 4 miles north by west of Rangun, with a population of 5,000. Station of the SPG, with (1902) 1 missionary, 36 native workers, 3 day schools, 2 high schools, and 1,090 professed Christians, of whom 183 are communicants.

KENDAL: A village on the N. coast of Java, Dutch East Indies, about 10 miles N. N. W. of Samarang. Station of the Neukirchen Missionary Society (1894).

KENG TUNG: A town in Burma, British India, situated in the Laos or Shan states, about 240 miles E. by S. of Mandalay and 150 miles N. N. W. of Chiengmai, in Siam. Station of the ABMU (1901), with (1903) 1 missionary and his wife and 3 native workers. Name locally pronounced Chiang Toong.

KENT: A town in Sierra Leone, Africa, situated on Cape Shilling 25 miles S. of Freetown. The church there is charged of religious work in the Banana Islands. Station of the CMS (1819), with (1903) 16 native workers, 6 outstations, 1 chapel, 1 Sunday school, 7 village schools, and 958 professed Christians, of whom 347 are communicants. The work, however, is carried on by the local church and not the SPG.

KEPPEL ISLAND: An island about 22 miles in circumference lying in the South Atlantic near West Falkland Island and a little to the N. of it. The South American Missionary Society occupied this island in 1855 in order to make of it a base for missionary operations in Tierra del Fuego. At the first they did not permit any natives to land upon the island, but after buildings had been erected an industrial and training school was opened with the purpose of preparing the Tierra del Fuego children for usefulness among their own people. The island is not at present retained on the Society's list of stations.

KERAK: A town in Syria, Turkey (Kir of Moab), formerly the capital of Moab. It has a citadel founded in 1131. The town was captured during the crusades, and is now the seat of the bishop. Population, 8,000, of whom 6,000 are Muslims. This town is the last on the road from Damascus to Mecca. It was captured by the Christian Crusaders in 1187. It may be seen from Jerusalem, 50 miles away, since it stands on the mountains of Moab. It is rapidly growing in importance by reason of the Pilgrim Railroad now being built to Mecca. The Turkish Government hampers the mission there considerably, with especial vigilance against the entrance of Western ideas. Station of the CMS (1894), with (1903) 1 missionary and his wife, 1 dispensary. The statistics are included under Es Salt.

KERBELA: A town in Mesopotamia, Asiatic Turkey, situated about 100 miles S. W. of Baghdad. It is famous for the tombs of Hassau and Hussein, the murdered sons of the Caliph Ali. Since these two men are regarded by the Shi'ite Muslims as martyrs, the place of their burial is sacred. To the Shi'ites Kerbela is quite as important a place of pilgrimage as Mecca.

KEREPUŅU: A settlement on the southern coast of British New Guinea, situated about 70 miles S. E. of Port Moresby. Station of the LMS (1877), with (1903) 1 missionary and his wife, 35 native workers, men and women; 21 schools,
Kerman

Kerman: A town in the province of Kerman, Persia, situated 225 miles N. by E. of Bender Abbas. It stands on a plain surrounded by mountains, just at the confluence of several trade routes. It is a great trading emporium and has many lofty and well-built bazaars. Altitude, 5,680 feet. Population, 40,000. Station of the CMS (1897), with (1903) 1 missionary and his wife, 3 women missionaries, 1 native worker, 1 village school, 1 dispensary, and 7 confessed Christians. The name is sometimes spelled Kirman.

KERR, John G., M.D.: Died at Canton, China, August 10, 1901. Dr. Kerr was born in Ohio in 1828, and was appointed by the PN a medical missionary to China in 1853; he remained on the field until 1876, when he came home to educate his children. He remained in the United States until 1878, during which time he was engaged in missionary work among the Chinese in California. He returned to his work at Canton in 1878, and with the exception of the usual furloughs in the United States, he labored with wonderful fidelity and success until his death, completing a service of over forty-four years. During this period he published twelve works, of thirty-two volumes, in Chinese, on medicine and surgery, besides contributing to many other lines of Chinese literature. His great work was in the Canton Hospital, which he built up from a daily dispensary. During the last few years he was deeply interested in providing a refuge for the insane, and at the time of his death had a building accommodating fifty patients. It is impossible in a brief sketch to give more than a glimpse of the life work of Dr. Kerr. He has gone to his reward, but his works will remain as monuments to his memory.

Keta: A town in the Gold Coast Colony, W. Africa, situated 150 miles E. of Christiansborg. Station of the North German Missionary Society (1853), with (1903) 3 missionaries, 1 with his wife; 3 missionary women, 17 native workers, men and women; 1 dispensary, 9 day schools, 1 boarding school, 1 woman's training school, and 710 professed Christians.

Keti: A settlement in the western part of Madras, India, situated in the Nilgiri Hills, about 25 miles N. W. of Coimbatore. Station of the Basel Missionary Society (1840), with (1903) 3 missionaries and their wives, 47 native workers, men and women; 26 outstations, 24 elementary schools, 1 normal school for teachers, 1 theological training class, and 473 professed Christians.

Khadsawpira: See Mao-phlang.

Khairagarh: A town in the Central Provinces, India, about 48 miles W. N. W. of Raipur. Station of the Pentecost Bands of the World (1901), with 1 missionary and his wife and 1 woman missionary.

Khama: A town in the Central Provinces, India, situated near Bithron, about 40 miles W. S. W. of Bhopal. Station of the Kurku Indian Mission (1889), with (1903) 1 missionary.

Khammamet: A town in the native state of Haidarabad, India, situated about 115 miles E. of the city of Haidarabad. Station of the CMS (1888) and CEZ (1889), with (together, 1903) 1 missionary and his wife, 2 women missionaries, and 1,400 professed Christians, of whom 644 are concomuntics.

Khandala: A town in the Bombay Presidency, India, well known as a sanitarium, situated about 41 miles N. W. of Poona. Station of the Poona Indian Village Mission, with 3 missionary women and a dispensary.

Khandwa: A town in the Central Provinces, India, headquarters of the district of Nimar, and situated 70 miles S. S. E. of Indore. The climate of Nimar district is, on the whole, good, tho the jungle parts inhabited by the hill tribes are extremely malariac. Population (1891) 15,500, of whom 10,000 are Hindus and 5,500 Muslims. It was once a famous seat of the Jain worship. Station of the ME, with (1903) 1 missionary and his wife, 1 woman missionary, 23 native workers, men and women; 18 Sunday schools, 2 day schools, 1 orphanage, and 689 professed Christians, of whom 70 are communicants.

Kharar: A town in the Punjab, India, 27 miles N. by W. of Ambala. Population, 5,006. Station of the BMS (1890), with (1903) 1 missionary and his wife, 33 native workers, men and women; 16 outstations, 5 Sunday schools, 15 day schools, 1 boarding school and 530 professed Christians, of whom 28 are communicants.

Kharmatar: A town in Bengal, India, 12 miles S. S. E. of Madhapur. Station of the PB, with 1 missionary and his wife and an orphanage. Name written by the missionaries, Karmatar.

Khartoum: A town on the left bank of the Blue Nile, close to its confluence with the White Nile, founded by Mohammed Ali Pasha, Viceroy of Egypt, in 1823. It stands at an altitude of 1,273 feet, and has been a center of considerable commerce. For many years it was the capital of the Egyptian Sudan, and was the scene of the tragic death of General Gordon when it was captured by the Mahdi's troops in 1885. It was recaptured by the Anglo-Egyptian forces under General Kitchener, September 4, 1898, and was then found to be in a ruined condition. It has since been recovering its lost prosperity. Population (estimated) 25,000. Station of the UP (1900), with 2 missionaries, 1 a physician. Station also of CMS (1902), with 1 missionary and 1 day school.

Khasi Hills: A range of mountains forming with the Jaintia Hills the border between Assam and Bengal. These mountains are inhabited by various hill-tribes,—the Garos, the Khasis, the Jaintias, Nagas, etc.,—who were very degraded, without books or a written language, and engaged mainly in hunting, and at times in robbery. In 1864 the British Government made a treaty with the kings of Khasi, providing for the establishment of a military post at Cherra and the construction of a road to Assam. In 1840 the Welsh Calvinistic Methodist Missionary Society sent out their first missionary to the hills, where now, in the seven districts, flourishing churches have been formed, with a membership of over 3,000; and within the day schools and Sunday schools about 10,000 pupils are gathered.

Khasian Language: Belongs to the aboriginal and non-Aryan languages of Assam. It was written in the Bengali character by Dr. Carey in 1827. Late missionaries, and especially those of the Welsh Calvinistic Society, have
adapted the Roman letters to its uses, and have taken steps toward the beginnings of a Khasian literature.

KHAITTOLO: A village in Chota Nagpur, Bengal, India, situated 60 miles S. W. of Lohardaga. Station of the Gossner Missionary Society, with (1903) 2 missionaries, 72 native workers, 33 places of worship, a day school, a boarding school, and 14,427 professed Christians. Name written by the Society, Khutitoli.

KHERWARA: A town in Bombay, India, situated 90 miles N. E. of Ahmadabad, in the Bhil country of Rajputana. Station of the CMS (1850), with (1903) 1 missionaries, 2 of them with their wives; 2 women missionaries, 15 native workers, 11 village schools, 1 dispensary, 1 orphanage, and 165 professed Christians. These statistics include Bilaria and Lusaria.

KHOKAND: A territory in Western Turkestan, annexed by Russia in 1876, and now called Ferghana.

KHORAL. See Kural.

KHUAWANDPUR: A station of the Kurku Indian Mission (1900), in the outskirts of Ellichpur, in the Central Provinces, India. It consists of the station buildings connected with an orphanage and a flourishing industrial enterprise for the instruction and support of the orphans. The name, which means City of God, was given to it by the missionaries.

KHULNA: A town in Bengal, India, 78 miles east-northeast of Calcutta. It is a place of considerable importance, with a thriving trade, as well as the grain traffic from the E. and N. E. passes by this point. Population (1891) 8,700, of whom 5,060 are Hindus and nearly 3,000 Mohammedans. Station of the BMS (1860), with (1903) 2 missionaries and their wives, 37 native workers, men and women; 15 outstations, 23 day schools, 1 boarding school, 1 dispensary, and 1,039 professed Christians, of whom 389 are communicants.

KHAMMAUT. See Kammat.

KHURJA: A town in the United Provinces, India, situated in the district of Bulandshahr, 50 miles S. by E. of Delhi. It is quite a center of trade and has a population (1891) of 26,300, of whom 14,800 are Hindus and 11,000 Mohammedans. Station circuit of the ME, with (1903) 12 native workers, 4 places of worship, 35 Sunday schools, 5 day schools, and 1,656 professed Christians, of whom 490 are communicants.

KHUTITOLI. See Khutitolo.

KIA: DING. See Kiating.

KIA-HSING-FU: A town in the province of Chia-kiang, China, situated on the Grand Canal, midway between Soo-chow and Hang-kau. Built in 897. It is an important commercial center, celebrated for its rice, tiles, and brass-work. Station of the PE (1882), with (1903) 3 missionaries and their wives, 1 woman missionary, 5 native workers, men and women; 2 places of worship, 3 day schools, 1 boarding school, and 1 dispensary.

KIAI-CHAU: A town in the province of Shan-si, China, 215 miles S. W. of Tai-yuen-fu. Station of the CIM (1895), with (1903) 1 missionary and his wife, 2 women missionaries, 4 native workers, and 1 boarding school. Name written by the Society, Hiai-chau.

KIAI-HIU. See Kiei-hiu-hsien.

Kiang Cha: A town in the province of Shan-si, China, situated on the Fen River 165 miles S. W. of Tai-yuen-fu. Station of the CIM (1898), vacant as yet (1903) since the massacre of missionaries during the Boxer troubles.

Kiang Tsing: A town in the province of Szechwan, China, situated 28 miles S. W. of Chungking-fu. Station of the CIM (1902), with 1 missionary and his wife.

Kiang Yin-Hsien: A town in the province of Kiang-su, China, situated on the south bank of the Yangtse River, 85 miles from Wu-sung. Population, about 200,000. Station of the PS (1895), with (1903) 2 missionaries and their wives, 1 native worker, 4 outstations, and 4 places of worship.

Kiating: A town in the province of Kiang-su, China, 28 miles N. W. of Shanghai. Station of the PE (1892) and of the BMS. Name also written Kading and Kia-ding.

Kia-Ting-Fu: A town in the province of Szechwan, China, situated 82 miles S. of Cheng-tu on the right bank of the Min River, at the confluence of the Tung-ho and Ya-ho. It is a center of the silk-weaving industry in that province. Population, about 25,000. Station of the CIM (1888), with 1 missionary and his wife, 2 women missionaries, 4 native workers, 1 day school and 1 dispensary. Station also of the Methodist Church in Canada (1902), with (1900) 2 women missionaries, 1 day school, 1 dispensary, and 1 hospital. Station also of the ABMU (1894), with (1903) 2 missionaries and their wives, 6 native workers, 10 outstations, and 11 places of worship. Name written by the Societies, Kiating.

Kia Ying Chau: A town in the province of Kwang-tung, China, among the Hakka people; situated on the Min River 68 miles N. N. W. of Swatow. Population, about 30,000. Station of the Basel Missionary Society (1883), with (1903) 3 missionaries (one with his wife), 7 native workers, men and women; 4 outstations, 1 boarding school and 357 professed Christians, of whom 261 are communicants. Station also of the ABMU (1890), with (1903) 2 missionaries with their wives, 8 native workers, men and women; 4 outstations, 3 places of worship, 3 day schools, and 455 professed Christians, of whom 305 are communicants. The name is written by the Societies Kayintschu and Kayin.

Kibokola: A town in Angola, W. Africa, 280 miles N. E. of San Paolo de Loanda. Station of the BMS (1899), with (1903) 2 missionaries and 2 wives of missionaries.

Kibunzi: A settlement in the Congo Free State, W. Africa, situated near the right bank of the Congo River, about 20 miles N. of Bansa Mavetche. Station of the Swedish Missionary Society (1887), with 1 missionary woman, 12 native workers, 15 outstations, 1 boarding school, 1 orphanage, 1 dispensary, and 385 professed Christians.

KIBUNZI: A town in the province of Chi-li, China, lying about 200 miles S. W. of Tien-tsin.
Ki-chan
King William's Town

THE ENCYCLOPEDIA OF MISSIONS

Station field of the LMS (1888), with (1903) 4 missionaries and their wives (the missionary residing at Haaloa-bang), 17 native workers, men and women; 33 outstations, 2 dispensaries, 1 hospital, and 950 professed Christians, of whom 704 are communicants. Name of district written by the Society, Chi-chow.

KI-CHAU: A town in the province of Shan-si, China, 260 miles west of Ping-yan-fu. Station of the CIM (1891), with (1903) 1 missionary, his wife, 2 women missionaries, and a native worker. Name written by the Society, Ki-chau.

KICHELE: A settlement in German East Africa, about 12 miles E. S. E. of Dar es Salaam. Station of the Universities' Mission (1893), with (1900) 1 native worker, 2 native women workers, 2 day schools, and 160 professed Christians.

KIDUGALA: A settlement in German East Africa, about 40 miles N. from the north end of Lake Nyasa. Station of the Berlin Missionary Society (1898), with (1903) 2 missionaries.

KIFWAN: A town in the province of Shan-si, China, situated 50 miles S. W. of Ta-yuen-fu. Station of the CIM (1891), with (1903) 1 missionary and his wife, 2 women missionaries, and 1 native worker. Name written by the Society, Kian-hiu.

KIE-YANG-HSIEN: A town in the province of Kwang-tung, China, 25 miles N. W. of Swatow. Station of the ABMU (1896), with (1903) 1 missionary and his wife, 2 women missionaries, 22 native workers, men and women; 20 outstations, 14 places of worship, 7 day schools, and 2,600 professed Christians, of whom 639 are communicants. The name is written by the Society Kian-yang.

KIEL MISSION TO CHINA. See Germany; Missionary Societies in.

KIEN-CHANG-HSIEN: A town in the province of Kiang-si, China, 42 miles S. W. of Ku-liang. Station of the German China Alliance (1898), with 2 missionaries and a native worker. Station also of the PE.

KIEN-CHAU: A town in the province of Shensi, China, situated about 40 miles N. W. of Hsi-ngan-fu. Station of the CIM (1894), with (1903) 1 missionary and his wife and 1 woman missionary.

KIEN-NING-FU: A town in the province of Fo-kien, China, situated 90 miles N. W. by N. of Fu-chau. Station of the CEZ, with (1903) 5 women missionaries, 1 native worker, and 1 hospital. The CMS also has a station there (1874), with (1903) 4 missionaries, 2 of them with their wives; 11 native workers, 1 chapel, 1 boarding school, 2 dispensaries, 1 hospital, 1 institute for lepers, and 260 professed Christians, of whom 98 are communicants. This Society writes the name Kien-Ning.

KIEN-PING-HSIEN: A town in the province of Ngan-hwei, China, 55 miles S. S. E. of Nanking. Station of the CIM (1894), with (1903) 1 missionary and his wife, 2 women missionaries, and 1 native worker. Name written by the Society, Kien-p'ing.

KIEN-YANG: A town in the province of Shen-si, China, 95 miles W. N. W. of Hsi-ngan-fu. Station of the CIM (1897), with (1903) 1 woman missionary.

KIEN-YANG-HSIEN: A town in the province of Fo-kien, China, situated 118 miles N. W. of Fu-chau. A station of the CMS (1891), with 3 women missionaries. Name is sometimes written Kien-yang.

KIFWA: A settlement in the Congo Free State, Africa, situated about 60 miles E. S. E. of Stanley Pool. Station of the ABMU (1890), with (1903) 2 missionaries (one with his wife), 35 native workers, 39 outstations, 4 places of worship, 39 day schools and 492 professed Christians.

KIH-CHAU: See Ki-cha.

KIH-YAN: See Ki-nan-fu.

KIKUYU: See Kikuyu.

KILIMANJARO: A settlement on the island of Zanzibar, situated S. of the town of Kidugala, with (1903) 2 dispensaries, 10 Kien-yang.

KING-WILLIAM'S TOWN: A town in the province of Manchuria, China, about 50 miles west of Ping-yan-fu. Station of the CMS (1891), with (1903) 1 missionary and his wife, 2 women missionaries, 12 outstations, 9 places of worship, 5 day schools and 476 professed Christians.

KIMBERLY: A town in Cape Colony, S. Africa, situated in Griqualand West, 647 miles by railway N. W. of Cape Town. It is capital of the Kimberley District, and stands at an altitude of 4,000 feet in the midst of the great diamond fields not far from the W. border of the Orange River Colony. It is lighted by electric lights and is furnished by a quadruplet with good water. Station of the Berlin Missionary Society (1875), with (1903) 1 missionary, 2 missionary women, 8 native workers, 5 outstations, and 939 professed Christians, of whom 370 are communicants. Station also of the SPG (1851), with 1 missionary; also of the South African Wesleyan Methodist Society, with (1900) 41 native workers, 12 outstations, 9 places of worship, 5 day schools and 476 professed Christians.

KI-MBUNDU LANGUAGE. See Mbundu.

KINCAID, Eugenio: Born at Wethersfield, Conn., 1797, graduated at Hamilton Literary and Theological Institution 1822, in the same class with Rev. Jonathan Wede. Appointed a missionary of the Baptist Triennial Convention for Burma; sailed May 24, 1830. On his arrival in Burma he preached to the English congregation at Maulmain, but soon entered upon work among the natives. Bold, ardent, brave, he determined to establish a mission at the capital, and in 1833 he went to Ava. There he baptized his first converts. In 1837 he undertook to reach Assam by crossing the mountains between Burma and that country, but was forced to turn back, and having been repeatedly taken prisoner and robbed, he reached Ava in extreme destitution, after a journey of thirteen days. After a short residence in Are in he was obliged to leave Burma and the missionary service on account of ill-health. In 1850 he returned to Burma under the ABMU and won the confidence of the king, who showed him much favor. After his return to Burma the same year, he labored principally at Prome until 1863, when he took his final departure from the mission field. He was an energetic missionary, especially noted for his long journeys into unexplored regions of heathen territory. He died at Girard, Kan., April 3, 1883.

KIN-CHAU-FU: A town in Manchuria, China, situated about 75 miles W. N. W. of Niu-chwang. Station of the Presbyterian Church in Ireland (1891), with (1900) 2 missionaries and their wives, 2 missionary women, 27 native workers, men and women; 10 outstations, 11 places of worship, 7 day schools, 1 theological training...
class, 2 dispensaries, 2 hospitals and 180 professed Christians.

KINCOLITH: A settlement in Alaska on the W. side of Portland Canal. Station of the CMS (1850), with (1903) 1 Sunday school, 2 village schools, 255 professed Christians, of whom 75 are communicants.

KING, Josa: Born July 29, 1792, at Hawley, Mass. His father was a farmer noted for his love of the Scriptures and rigid adherence to their teachings. Under his instruction Josiah read the Bible through once between the ages of four and six, and then once yearly until the age of sixteen. His conversion occurred at the age of fifteen. Without funds or aid he determined on an education, learned the English grammar while hoeing corn, read the twelve books of the Iliad of Virgil in fifty-eight days, and the New Testament in Greek in six weeks. He graduated at Williams College 1816, and Andover Seminary 1819. While in Andover his mind was strongly drawn toward foreign mission work, especially in the East, and he desired to go to Europe to study Arabic, and then enter whatever field of labor should be open—perhaps among the Arabs or Persians. He decided to go to Paris to study with the celebrated De Sacy. On the eve of embarkation he was appointed professor of Oriental languages at Amherst College. Advised to accept the appointment, and the trustees approving his plan to study abroad, he sailed for Paris August 18, 1821. While engaged in this study he received a pressing invitation from Dr. Fisk—Mr. Parsons having died—having decided to join him in mission work in the Holy Land. Having served during three years in Syria and Egypt, he left Beirut for America in 1827, going overland to Smyrna, where he spent several months in the study of modern Greek. After his return home he was invited by a ladies' committee in New York to go to Greece to distribute aid to the people suffering from Turkish oppression. He resigned his professorship at Amherst, declined a similar appointment at Yale, and went to Greece, reaching Piraeus July 28, 1828. He visited many important places, everywhere preaching, establishing schools, and relieving want. In 1829 he married a Greek lady of influence, who proved an efficient helper in the mission work. In 1830 the mission was transferred to the American Board. Having previously visited Athens, and arranged to reside there after the Turks had vacated the place in 1831, it became his permanent home. He built a school house, in which he had service in Greek every Sabbath till 1830. The establishment of schools was a prominent object with Dr. King, and he made it a condition that in them the Scriptures should be studied. At the "Evangelical Gymnasium," which he established, he gave religious instruction several times a week to about seventy pupils varying in age from thirty-five years. He also formed a theological class composed of Greeks and Italians, to whom he gave regular and frequent instruction. Some of these have occupied important positions as teachers or in the employment of government. But the hierarchy became alarmed at the influence of his preaching, his schools, and his persistent circulation of the Scriptures. At the instigation of the Greek Synod he was brought before the Areopagus, the highest court in Athens, charged with reviling the "mother of God" and the "holy images." He was not, however, tried. After many threats against his life, in 1852 he was again arrested, put on trial for blasphemy and condemned to imprisonment for thirty years. This sentence was quashed through the influence of the United States Government.

Dr. King was never free from petty persecution until he died, May 22, 1869, in his seventieth year. He was a thorough linguist, having studied eleven languages, and speaking fluently five. His original works in Arabic, Greek and French were ten in number, some of them being widely read, and translated into other tongues. He revised and carried through the press eleven others. He distributed 400,000 copies of Scripture portions, religious tracts, and school books in Greece and Turkey, besides what he scattered during his travels in other parts of Europe and in Palestine, Syria and Egypt. He left his impress on the Greek nation. To him preeminently is it owing that the Scriptures since 1831 have been so extensively used in the schools, and that in Greece the Word of God is not bound.

KING-CHAU: A town in Kan-su, China, situated about 160 miles S. W. of Nan-ch'uan-fu, on the left bank of the Kan River. Station of the CIM (1891), with (1903) 1 missionary and his wife and 1 native worker and 1 opium refuge. Name written by the Society, Kian-fu.

KING-ChAU: A town in Kan-su, China, situated on the King River, about 45 miles E. S. E. of Ping-hang-fu. Station of the CIM (1885), with (1903) 1 missionary and his wife and 1 native worker.

KINGSBURY, Cyrus: Born at Alstead, N. H., November 22, 1786; graduated at Brown University 1812; Andover Theological Seminary 1815; ordained as a missionary of the ABCFM to the Chocowas and went to the Cherokee country in 1816, commencing a station at Brainerd. In June, 1818, he left Brainerd with Mr. and Mrs. Williams, to commence the mission among the Chocowas. They traveled in a wagon four hundred miles through the wilderness, to the place afterward called Elliot. In May 1820, a new station called Mayhew was established, and in November Mr. and Mrs. Kingsbury made it their permanent home. Mr. Kingsbury continued in the Chocowas Mission, laboring with zeal and success until the ABCFM withdrew its work, and then continuing in the same field in connection with the Presbyterian and Southern Presbyterian Boards till his death, June 27, 1870. His period of missionary service was fifty-four years.

KING-TSE-KWAN: A town in the province of Ho-nan, China, situated about 95 miles W. of She-ki-chen. It is a frontier station, with a custom-house. Population about 10,000. Station of the CIM (1896), with (1903) 1 missionary and his wife and 1 native worker.

KING WILLIAM'S TOWN: A town in Cape Colony, S. Africa, situated 29 miles W. N. W. of East London, at an altitude of 1,300 feet. It has been an important center of trade for the Kafirs. Population, 7,200. Station of the SPG, with (1902) 1 native worker and 280 professed Christians. Station also of the South African Wesleyan Methodist Mission, with (1900) 39 native workers, 6 outstations, 10 places of worship, 6 day schools and 383 professed Christians.
Station also of the National Baptist Convention (1900), with 1 missionary, 2 native workers and 25 professed Christians.

**KIN-HWA-FU:** A town in Che-kiang, China, 75 miles S. W. of Hang-chau. Climate, tropical, 25°-95°. Population, 50,000. Natives outwardly very prosperous; morally low. Station of the CIM (1875), now (1903) vacant. Station also of the ABMU (1883), with (1903) 2 missionaries (one with his wife), 3 women missionaries, 5 native workers, 6 outstations, 3 places of worship and 154 professed Christians, of whom 159 are communicants.

**KINSEL:** A town in Chota Nagpur, Bengal, India, 58 miles S. W. of Lohardaga. Station of the Gossner Missionary Society, with (1903) 2 missionaries, one having a wife, 58 native workers, men and women; 21 places of worship, 2 schools and 7,258 professed Christians, of whom 1,348 are communicants.

**KINKENGE:** A settlement in the Congo Free State, 10 miles W. of Banda Manteke. Station of the Swedish Missionary Society (1897), with (1903) 2 missionaries, two of them with their wives; 1 boarding school and 1 dispensary.

**KINWINA.** See KIN-HWA-FU.

**KIOTO:** An important city of Japan, situated in the southwestern part of Honjo, the main island, and 329 miles by railway S. W. of Tokio, 5 miles from the S. end of Lake Biwa, with which it is connected by a navigable canal. It was founded in 723, and until 1868 was the capital of Japan. With its schools, hospitals, lunatic asylum, prisons, dispensary, almshouses, fountains, public parks and gardens, exquisitely beautiful cemeteries, and streets of almost painless cleanliness, Kioto is the best arranged and best managed city in Japan. It is noted for its manufactures of copper, bronze goods, and porcelain. For a long time foreigners were jealously excluded from this sacred city.

The town and the vicinity are crowded with objects of interest. The Mikado’s palace covers 25 acres, and is a collection of very fine buildings. Among other objects of interest are the temple of the bust of Buddha, 58 feet high. The climate is temperate. Population (1898) is 353,139. Sta-

**KIRCHDORF:** A village in Natal, S. Africa, near New Hanover. Station of the Lutheran Free Church of Hannover (1892), with (1903) 1 missionary, 1 native worker, 1 day school, and 200 professing Christians.

**KIRGHIZ TURKIC LANGUAGE.** See TURKISH LANGUAGE.

**KIRIN:** A city in Manchuria, China, capital of the province of Kirin, situated 225 miles N. E. of Mukden, in a charming region enclosed by hills on the north and by the Sungari River on the south. It stands at the head of navigation on this river, and many junks are built here. Population, 200,000. Station of the Presbyterian Church in Ireland (1894), with (1900) 2 missionaries, 1 with his wife; 22 native workers, 10 outstations, 11 places of worship, 3 day schools, 1 theological training class, 1 dispensary, a hospital, and 115 church members. The BFBS has an agency here with a Bible depot.

**KIRMAN.** See KERMAN.

**KIRWINA.** See KAWATIRA.

**KISAUNI, or Frere Town:** A village in British East Africa situated on the E. side of the inlet bordering Mombasa on the E., and 2 miles N. N. E. of Mombasa. Station of the CMS (1874), with (1903) 5 missionaries, four of them with their wives; 4 women missionaries, 15 native workers, 1 chapel, 2 boarding schools, 1 theological class, 1 orphanage, 565 professed Christians, of whom 265 are communicants.

**KISMAYU:** A settlement in the northern part of British East Africa, situated on the coast near the mouth of the Juba River. Station of the Evangelical Swedish National Missionary Society (1897).

**KISSABAWE:** A town in German East Africa, situated 30 miles S. W. of Dar es Salaam. Station of the German East Africa Missionary Society (1892), with (1903) 4 missionaries, 1 with his wife; 8 native workers, 7 outstations, 3 places of worship, 7 day schools, 1 industrial school, 1 theological training class, and 197 professed Christians.

**KISSAY:** A town on the coast of Sierra Leone, Africa, situated 3 miles S. E. of Freetown, with a population of 2,000. Station of the CMS (1816), with (1903) 8 native workers, 4 day schools, and 1,714 professed Christians, of whom 1,094 are communicants. The congregation of this station is now under the care of the native church.

**KITAKATLA:** A settlement 30 miles S. by W. of Port Errington, British Columbia. Station of the CMS (1903), with 1 missionary and his wife, 2 native workers, 1 Sunday school, 1 village school, 241 professed Christians, of whom 59 are communicants.

**KIT YANG.** See KIE-YANG-HSIEH.

**KIU-CHAU.** See KU-CHAU-FU.

**KIU-KIANG-FU:** A city in Kiang-si, China, on the north bank of the Yangtse, far from the outlet of Lake Po-yang, and 135 miles by river S. E. of Han-kau. It was formerly the great center of the tea traffic. The climate is fairly good, hot in the summer, but bracing and cold in the winter. Opened to foreign trade in 1861. Population, about 35,000. Station of the ME, with (1903) 2 missionaries and their wives, 6 women missionaries, 19 native workers, men and women; 5 outstations, 5 day schools, 2 boarding schools, a college, a dispensary, a hospital, and 781 professed Christians. Station also of the CIM (1889), which serves as a center for the business transactions of the missionaries in the
province, with (1903) 2 missionaries and their wives and 1 native worker. Station also of the PB; outstation of the FE, with 1 native worker and a sanitarium for the missionaries of the Society. Name also written Ru-kiang.

KUNGANGI: A suburb of the town of Zanzibar on the E. coast of the island. Station of the Universities Mission (1840), ABM (1900) 6 missionaries, 1 missionary woman, 23 native workers, 1 day school, 1 boarding school and 1 dispensary.

KUNG-CHAU: A town in the province of Sze-chwan, China, situated 40 miles S. W. of Cheng-tu-fu. Station of the CIM (1901), with 2 missionaries, one with his wife.

KUNG-CHAU-FU: A town on the island of Hainan, China, 250 miles southwest of Hoke-kong. Population, about 200,000. Station of the PN (1886), with (1900) 5 missionaries, 3 wives of missionaries, 2 women missionaries, 5 native workers, men and women; a dispensary, and a hospital. Name written by the Society, Kiung Chow.

KIUNKAN: A dialect of the Marathi, which belongs to the Indic branch of the Aryan family of languages. It is spoken by about 1,000,000 people of the Bombay Presidency living in the region between the Western Ghats of India and the shore of the Arabian Sea. It is written with the Marathi alphabet.

KLEINSCHMIDT, J. C.: One of the first missionaries of the Moravian Church to Greenland. He went to Lichtenau, about 40 miles from the Danish colony, Julianeshaap, in 1777. After Kleinschmidt had worked in Greenland nineteen years he visited Europe, and after his return he completed the translation of the New Testament in June, 1821. All the missionaries joined in revising it, and it was sent to the British and Foreign Bible Society.

KLERKSDORP: A town in the Transvaal, Africa, situated about 123 miles southwest by west of Pretoria, and 7 miles north of the Vaal River. It is the center of a small gold field. Population, 1,500. Station of the WMS, with (1903) 1 missionary, 40 native workers, 34 outstations, 3 chapels, 9 Sunday schools, 2 day schools, and 827 professed Christians, of whom 562 are communicants.

KLIPDAM: A village in the Transvaal Colony, S. Africa, situated 25 miles N. W. of Pietersburg. Station of the National Baptist Convention, with (1900) 2 missionaries and 1 missionary woman. Outstation also of the Berlin Missionary Society; its statistics being included in Kreuzburg, two miles distant.

KNIGHT, Joseph: Born at Stroud, Gloucestershire, England; educated by Rev. Dr. Williams at Stroud; ordained deacon September 21, 1817, and priest, 1818, by Bishop of Gloucestershire; embarked as a missionary of the CMS December 15, 1817, for Jaffna, North Ceylon; was stationed at Galle. He was probably unsurpassed, if not unequalled, by any in India in his critical knowledge of the Tamil language. He was engaged for several years in preparing a Tamil and English dictionary and had made great progress in it when failure of health required him to leave for England in 1833. On his return in 1840 he died at Colombo, October 11, having been twenty-three years in the service.

KOB: A city on the main island of Japan, 22 miles west of Osaka, on a small bay adjoining Hiogo Bay. It was opened to foreign commerce in 1878 at the same time as Hiogo, but owing to more favorable harbor conditions it has attracted foreign commerce more than Hiogo, and has grown so as to form with Hiogo a large city. The vicinity is beautiful and interesting. The climate is pleasant and healthful. Population of Kobe and Hiogo together, 104,000. Station of the ABCFM (1869), SPG (1878), ABMU (1881), MES (1886), PS (1890), with (1902) all together and including outstations, 13 missionaries, 10 wives of missionaries, 17 women missionaries, 92 native workers, men and women; 22 places of worship, 41 Sabbath schools, 6 day schools, 5 boarding schools, 1 theological school, 1 training school for women workers, 1 dispensary, and 1,300 professed Christians. Special features of the missionary equipment here are the fine college for girls (ABCFM) and the vessel for missionary touring of the Inland Sea (ABMU).

KOH: A town on the southeast coast of Shikoku, Japan, situated at the head of a beautiful bay. Population, about 40,000. Station of the PS (1885), with (1903) 1 missionary and wife, 1 woman missionary, 3 native workers, 27 outstations, 8 Sunday schools, and 1,750 professed Christians, of whom 750 are communicants.

KODAL: A town in Madras, India, situated in the region formerly known as Malabar, 32 miles S. E. of Calicut. Station of the Basel Missionary Society (1857), with (1903) 4 missionaries, two with their wives; 37 native workers, men and women; 7 outstations, 8 day schools, and 1,387 professed Christians, 649 of whom are communicants.

KODANKOتكامل.school for missionary children: A school at a summer resort in the Madras Presidency, India, established in 1902 by the concerted action of missionaries of the ABCFM and the RCA and benevolent friends in the United States. The site is at a mountain village, 50 miles N. W. of Madura, at an altitude of 7,000 feet, where the air is bracing and uninfected by the intense heat of the plains. The buildings belong to the ABCFM, and the school is under the management of a joint committee of the two missions interested. It designs to furnish instruction for missionaries' children between the ages of ten and fifteen years. While the school has been established for the children of members of the Madura mission and the Arcot Mission, children of other missionaries will be admitted.

Long experience has shown that white children cannot safely live in the hot plains of tropical India after they are nine or ten years old. This fact and the lack of suitable schools for American
children in outlying districts have led to those separations of children in tender years from their parents which are among the most wearing griefs of missionaries in that land. But it has now been shown that young children can safely stay at Kodakanal during ten months of the year. By the simple expedient of establishing a suitable school on that hill, the missionaries can have their children near them some years longer than has been possible hitherto.

KODUR: A town in the Madras Presidency, India, situated 86 miles N. W. of Madras. Station of the Hermannsburg Missionary Society (1853), with (1903) 1 missionary and his wife and 10 native workers.

KOELLE, Sigismund Wilhelm: Born at Kleebroun, Wurttemberg, in 1822; died in 1902. He was educated at Basel Seminary and C. M. College, at Islington, and, with marked success, he studied Arabic under Prof. Ewald at Tubingen, which university conferred on him his Ph.D. degree. He was first sent by the CMS to Sierra Leone in 1847, and there he taught Hebrew to the College students, with the result of enabling several negroes to read the Old Testament in the original. During his five years on the west coast he collected the materials for his great work, Polyglotta Africana, in which one hundred African languages and dialects are compared. This book was submitted to the French Institute, and Koelle was given the Veuvey prize. In 1855-59 he was attached to the Egypt and Palestine Missions, and in 1862 he joined Dr. Pfander at Constantinople in the mission started by the Society after the Crimean War. He held this position for twenty years, receiving many Mohammedan inquirers who came to him by night, and who were generally, after a time, caught by the Turkish police and disappeared. In 1880 Dr. Koelle's name was brought prominently into public notice. He and a distinguished Muslim Ulema named Ahmed Tewfik, who assisting him linguistically, were arrested in the street by order of the minister of police. Koelle was soon released, but the Ulema was sentenced to death. The outrage produced great excitement in England, and it was only after an appeal had been sent to the Porte and the British fleet was ordered to the Dardanelles that the Sultan yielded and reprieved Ahmed Tewfik, who afterward embraced Christianity.

Koelle was one of the greatest linguists on the OM Society's roll of missionaries. He was the author of Syllabic System of Writing amongst the Vei Tribe, Grammar and Vocabulary of Vei Language, Grammar of Kanuri or Bornu Language, Bornu Literature and Vocabulary, Polyglotta Africana, Kanuri Proverbs, Food for Reflection, Life of Christ, Prophecies Concerning Christ, The Death of Christ (in English and Turkish), Translation of Book of Common Prayer into Turkish, and Mohammed and Mohammedanism. The last named work is a very severe analysis of the character of Mohammed as described by Muslim writers. It is too merciless for general acceptance, but is an admirable corrective when taken with the many works which err upon the side of unrestricted praise of the man of Mecca. For this work alone Dr. Koelle merits remembrance.

KOENIGSBERG: A settlement in Natal, Africa, 10 miles S. W. of Newcastle, and station of the Berlin Missionary Society (1868), with (1903) 2 missionaries, 12 native workers, men and women; 7 outstations and places of worship, and 510 professed Christians, of whom 213 are communicants.

KOFOU: A town in Japan, situated on Handy, the main island, 70 miles W. of Tokio. Station of the Methodist Church in Canada (1876), and of the Women's Society of that Church (1889), with (1900) 3 missionaries, 13 native workers, men and women; 15 outstations, 6 places of worship, 1 day school, 1 boarding school, 1 training class for women workers, and 360 professed Christians.

KOIMA: A frontier post in the Naga hills, Assam, India, and the headquarters of the British Government supervising the hill tribes. It is at an elevation of 5,000 feet, and has a healthful climate. Population, 4,000; language, Angami Naga. Station of the ABMU (1879), with (1903) 1 missionary and his wife and 3 native workers.

KOI LANGUAGE: A dialect of the Gond, one of the Dravidian languages of Central India, and spoken by about 100,000 people. It has been reduced to writing by natives under the direction of the CMS, and is written with Roman letters.

KOIMBATUR. See COIMBATORE.

KOIS. See GONDS.

KOKSTAD: A town in Cape Colony, Africa, lying in Griqualand East, 55 miles W. of Shop­stone. Station of the Church of Scotland (1878), with (1900) 2 missionaries, 6 native workers, 3 outstations, 4 places of worship, 1 day school and 396 professed Christians.

KOKURA: A town on Kiushiu Island, Japan, on the Inland Sea, and situated 100 miles N. E. by N. of Nagasaki. Population, 14,000. Station of the SDC (1892), with 1 missionary and his wife, 2 native workers, 4 outstations, 1 Sunday school and 64 professed Christians. Station also of the CMS (1898), with 1 missionary and his wife, 2 women missionaries, 6 native workers, 3 outstations, 1 chapel, and 242 professed Christians, of whom 119 are communicants.

KOLAR: A town in the native state of Mysore, India, situated 39 miles E. by N. of Bangalore. Population, 11,006. Station of the ME, with (1903) 1 missionary and his wife, 8 women missionaries, 37 native workers, men and women; 5 preaching places, 6 day schools, and an orphanage with industrial department.

KOLHAPUR: Capital of the native state of that name, Bombay, India, situated about 97 miles W. of Bijapur, opposite a gap in the Sahyadri Hills. It is a picturesque town, and quite a flourishing trading-place. The people, who are mainly high-caste Hindus, together with the aborigines and low-caste, speak the Marathi and Hindustani languages. There are Buddhist remains of the 3rd century B.C. in the vicinity. Population (1891), 45,800. Station of the PN (1853). The work was commenced by Mr. Wilder, as an independent enterprise, and was taken over by the PN in 1870; the station has now 2 missionaries and their wives, 3 women missionaries, 13 native workers, 4 outstations, 5 day schools, and 1 boarding school. Station also of the SPG (1870), with (1900) 2 missionaries, 1 woman missionary, 17 native workers, 2 day
schools, and 2 boarding schools. The place is locally called Karvir.

KOLLEGAL. See COLLEGEAL.

KOLLUPUTTYA: A village in Ceylon, situated 3 miles west of Kolombo. Station of the WMS, with 26 native workers, 4 outstations, 4 chapels, 6 Sunday schools and 118 professed Christians. The name is sometimes spelled Koluputyia.

KOLO: A settlement in Basutoland, S. Africa, 10 miles N. W. of Mokja, and a station of the Paris Evangelical Mission Society, with (1903) 11 native workers, men and women, 3 outstations, 4 day schools and 533 professing Christians.

KOLOGWE. See KOROGWE.

KOLS: Name of a collection of aboriginal tribes mainly occupying the mountain districts and plateaus of the Chota Nagpur division of western Bengal, India, and found to a smaller extent in Orissa and in some districts of the Central Provinces. Chota Nagpur is of about the area of England. Kol is a generic word for the whole group of tribes included linguistically within the word Kolarian, but it is usually applied to three principal tribes, the Mundah Kols, of the Lohardaga District; the Larka ("fighting") Kols or Kols of Manbhum; and the Buruj Kols of Manbhum, one part of whom, however, have been assimilated to the Mundahs, and the other to the Hindus. Another tribe, the Oraons, scattered over Chota Nagpur, tho not really such, are classed with Mundah Kols, as they live in amity and have many customs and most beliefs in common. But the Oraons will not intermarry with the Kols, to whom they regard themselves as superior. The census of 1891 gave Mundahs 362,000, Hos and Kols 393,000, Oraons 482,000, out of a population of 4,628,000 in Chota Nagpur. The majority of whom belong to diverse aboriginal groups. The bulk of the Kol people live in little mud-hut villages, less than five per cent. of the population of Chota Nagpur dwelling in towns. They follow the chase, do a very little in agriculture, engage somewhat in mining and washing for gold and many go to Calcutta and Assam to labor. Both sexes of the Hos are clothed with a loin cloth, and the women adorn themselves with a profusion of beads and earrings. They eat anything, including carrion. The Mundahs especially are ugly people, with thin faces, high cheek bones and tawny skin. Faithfulness and honesty the Kols compare favorably with the Hindus. The Kol language is a dialect of the Gond, and unwritten except as elaborated by the missionaries. The SPG, beginning in 1869 with the Gossner mission, has worked mostly in the Ranchi district, with some stations in the Hazaribagh district to the north and Lingham to the south. Schools of all grades are maintained. In 1901 the mission enrolled 16,261 Christians, scattered in some 500 villages. The progress of the Protestant missions, especially the SPG, has been hampered by the violent prosecution of a Jesuit counter mission, which at one time baptized within a few days 16,000 heathens without preparation, and boasted of 90,000 Catholic Kols. Catholic sources in 1901 reduced this number to 33,155, including 5,436 catechumens, and little is now heard of the Kol mission of which they formerly boasted so greatly. That so primitive and degraded a race should have been so lifted in half a century is one of the marvels of missions, and the promise of the future is bright.

KOMAGGAS: A station of the Rhenish Missionary Society among the Nama or Namaqua people; situated in the N. W. part of Cape Colony, S. Africa, 60 miles S. E. of Port Nolloth. The station was founded by Mr. Schmelen, of the LMS, in 1824 and was transferred to the Rhenish Society in 1840. It now (1903) has 1 missionary and his wife, 6 native workers, 1 school, and 498 professing Christians, of whom 271 are communicants.

KONAKRY: A town in the Presidency of Madagascar, W. Africa, situated on a small island off the coast. It was occupied by the mission in 1899, and has (1901) 1 missionary and his wife, 6 native workers, 1 school, and 498 professing Christians, of whom 271 are communicants.

KONDOWI. See LIVINGSTONIA.

KÖNIGSBERG. See LIVINGSTONIA.

KONKORDIA. See LIVINGSTONIA.

KONKORDIA MINE. See LIVINGSTONIA.

KORAPUT: A town in the Presidency of Madras, India; situated in the District of Vizagapatnam, 18 miles N. of the headquarters. Station of the Breklum Missionary Society (1884), with (1903) 2 missionaries (1 with his wife), 7 native workers, 10 outstations, 2 day schools, 8 places of worship, and 1,925 professing Christians.
KOREA: The kingdom of Korea, properly called Cho-sen (Morning Calm), comprises the peninsula lying between Japan and the mainland of China, together with a multitude of adjacent islands. It is washed by the Yellow Sea on the west and the Japan Sea on the east; on the north it is bounded by Chinese and Russian territory. Its surface is rugged and mountainous, being divided into two watersheds by an irregular range of mountains running from north to south near the coast. These two well-watered streams are the largest rivers falling into the Yellow Sea. Considering the mountainous character of the country it is exceedingly productive. All kinds of cereals are produced. From wheat in the northern part to rice in the more temperate southern provinces. The pine and fir grow almost side by side with the bamboo. The mineral wealth of Korea is very great; large deposits of gold, silver, and coal have been found; but the mineral resources have not yet been fairly tested. A few mining concessions have been granted to foreigners during recent years.

Government: Korea is an absolute monarchy of the paternal type. There is a written constitution which serves as a guide, in a loose way, to the administration of government, but this does not include anything like representation of the people in Government Councils. While the country is nominally independent, its position between China and Japan makes it liable to attack from either; and it has many times been a vassal state of either or both. It has also suffered several times as the battlefield on which China and Japan have settled their differences.

In 1876 Japan invaded Korea and forced the king to sign a treaty opening certain ports to foreign commerce, and accepting in principle certain reforms of internal administration held to be essentials of development to the country. The United States had vainly attempted in 1870 to open negotiations with Korea, even going so far as to attack and capture a number of fortified ports in order to punish officials who fired upon the ships bearing the embassy. But the actual opening of diplomatic and commercial intercourse with Korea and the security of Korea and Manchuria was secured by Japan. In 1894 China undertook to encourage Korea in resisting reform, and to resume the protectorate which she had formally renounced. Japan declared war, drove the Chinese armies from the country, and having thoroughly broken the military power of China, dictated a peace by which the independence of Korea was secured. In 1897 the king assumed the title of Emperor, the privileges of the aristocracy were abolished, and important reforms were introduced, among others the adoption of English and German principles of law and justice. A strong reaction against these radical changes did not fail to show itself; and Russia, which had acquired railway interests in neighboring regions in Manchuria, in 1900, began to take advantage of these reactionary tendencies to become a rival of Japan. The partition of Korea and the whole question of the Empire. The steady, onward march of Russian influence, interfering in Korean affairs at innumerable points, has been a potent factor in deciding Japan to take arms against such encroachments. The war opened in February, 1904, and was finally ended by the peace treaty which Japan decides, must trample down Korean territory once more and seriously retard the civilization and development of the country, that strangers may settle their differences with least inconvenience to themselves.

People: The population of Korea is probably about 12,000,000, although the lack of a proper census renders an exact estimate impossible. This population is distributed unevenly over the eight provinces composing the kingdom, the most thickly settled portions being the southern and western provinces. The people of Korea are of mixed stock, doubtless Mongoloid in race, sweeping down from the north and overrunning the country, together with large numbers of Chinese who from time to time found in Korea an asylum from the oppression of their native land, have produced a conglomerate mass, of whose origin it is impossible to say more. The affinities of the people are Japanese rather than Chinese. But there is not much affection for the Japanese among the common people.

Language: The language of the Koreans is distinct from that of their neighbors in its grammatical construction and idioms, but it has borrowed from the Chinese a large number of words, just as English has borrowed largely from the Latin. The Chinese character is used in all official and literary writing, and in fact in all writing on the part of the better class of people. The Korean language was reduced to writing about three hundred years ago. It has an alphabet whose simplicity, flexibility, and comprehensiveness compare favorably with those of any other known alphabet. It is as unlike the inflexible syllabary of Japan as it is unlike the unwieldy ideography of China. The Korean written language is used only by the lower classes, who form, however, the vast majority of the population.

Religion: The religious history of Korea may be divided into five periods or movements. The first includes the early centuries of the kingdom, and terminates about 550 A.D. Of the religious history up to that time little is known. It is probable that there was no one form of religion prevalent throughout the different tribes and clans living in the land, but that each had its own religious observances and rites. Buddhism still exists, but is confined exclusively to a few monasteries, whose inmates are looked down upon by the people at large. Near the close of the 18th century some of the members attached to the Korean Embassy to Peking came in contact with Roman Catholic missionaries and brought back that faith to Korea. It took root almost immediately and spread with great rapidity. But the history of Roman Catholicism in Korea is one of persecutions from the very beginning of the 19th century. In 1864 the first Korean who was forced to sign a treaty with the Romanists was arrested, and the Yi dynasty died—a king under whom the Romanists were not only tolerated, but even allowed to obtain a
great deal of influence in the affairs of the kingdom. The reins of government fell into the hands of a regent who was intensely opposed to foreign influences, and to the Romanists in particular. Soon after he took the lead of affairs Bishop Berneux and eight of his associates were seized and put to death, and an inquisition was instituted which bade fair to exterminate Christianity from the land. It is not known how many missionaries were there at that time, but there must have been not less than 60,000. Of these, 10,000 were put to death. In some localities whole communities and villages were put to the sword. The effects of this persecution were very widespread and permanent, and it is probable that the power of the Romanists has never rallied from the stroke it then received.

There is now a strong force of Roman Catholic missionaries in Korea. One of the greatest benefits that they have conferred upon the cause is the compiling and publishing of a complete lexicon and grammar of the Korean language.

Protestant Missions: The first Protestant mission work for Korea was done by the Rev. John Ross of the United Presbyterian Church of Scotland. About 1875 he came in contact with Koreans near the border between Korea and China. He took up the Korean language, and, although never having set foot upon Korean soil, he translated the whole of the New Testament into Korean and sent it across the border, together with large numbers of Chinese Bibles. He thus became the means of beginning a work of great importance in Northern Korea. When Protestant missionaries came to Korea later they found whole communities in the north professing Protestant Christianity, studying the Bible among themselves, and only waiting for some one to come and teach them. The treaty between Korea and the United States was signed in 1882; and then for the first time the eyes of the civilized world were turned upon Korea. The first movement made toward putting men in the field was the appointment by the American Presbyterian Board of Dr. J. W. Herson, M.D., as medical missionary to Korea in the spring of 1884. His coming was delayed, and in the summer of the same year Rev. R. S. McIay of the Japan Methodist Conference was sent to look over the ground and report on the advisability of sending missionaries. Before his favorable report was acted upon, Dr. H. N. Allen, M.D., of China, was transferred from that field to Korea, and he, working with his family in the autumn of 1884, became the first resident Protestant missionary. Meanwhile the report of Dr. McIay had been acted upon, and the Missionary Society of the Methodist Episcopal Church of America had appointed to the field Dr. Wm. B. Scranton and Rev. H. G. Appenzeller, and the Woman's Foreign Missionary Society of the Methodist Episcopal Church appointed Mrs. M. F. Scranton. In November of the same year the Presbyterian Board appointed Rev. H. G. Underwood. In December of 1884, before any of these appointees had arrived in Korea, occurred the riot in Seoul, during which Prince Min Yong Ik was severely wounded. The skilful and successful treatment of the case by Dr. Allen produced such a favorable impression that a general government hospital was founded by his majesty, and Dr. Allen was placed at its head. It is said that at the time the good feeling that had already begun to make itself manifest on the part of Koreans toward foreigners. In the spring of 1885 Rev. H. G. Underwood, who had been spending some months in Japan studying the Korean language, arrived in Korea. For a time the object of his coming was kept from the Korean officials through fear that the interests of the missionary work might be endangered; but that fear proved to be groundless, and soon it became generally known that he had come, and that the object of his coming was something besides medical work. The Methodist Mission was opened the same year.

The first Korean was baptized in the autumn of 1886, and from the first the work took on a most encouraging aspect. Large numbers of inquiries came in from distant parts of the country, and it was not long before a little native church was organized. Korea is to-day thrown open wide open to the Christian religion; the Emperor is the open friend of Protestant missionaries, and while recently destroying thirty heathen temples in and about Seoul, and at distant places, he declares that the money annually squandered upon the worship of idols, he allows Christian churches, schools and hospitals to be scattered throughout the land. Christian literature in the vernacular and several mission periodicals are disseminating the truth; a Bible society, which sold 70,000 copies of the Scriptures in 1900, has been formed; and of the 70,000 Catholics and Protestants, 40,000 have been gathered in during the last decade. One of the Korean leaders recently remarked: "The only hope of the country is in the churches. There is no moral character in Korea. It is being created in the churches. To convert and educate the common people is the only hope of the land."

Bishop (Isabella Bird), Korea and Her Neighbors, London and New York; Gifford (E. L.), Everyday Life in Korea; Gale (J. H.), Korean Sketches; also, The Vanguard, New York, 1904.

KOROGWE: A town in German East Africa, situated on the Pangani River, in the Usambara region, 55 miles by railway from Tanga. Station of the Universities Mission (1899), with (1900) 2 missionaries, 7 native workers, 10 stations, 4 day schools, and a boarding school.

KÔSHI, Rev. Koshi: Born in February, 1825. Died in November, 1898. A Syrian Christian, who, after his education at Kottayam College, became, under the CMS, a catechist, translator and lay reader, being finally ordained. During a useful career he was stationed at Kottayam, Trichur, and other places, and was appointed one of the examining Chaplains to the Bishop of Madras. In 1885 he was made Archdeacon of Mavelicara, and in 1891 the degree of Doctor of Divinity was conferred upon him by the Archbishop of Canterbury in recognition of his labors as a translator and litterateur. In his early days he was taught the Malayalam language, and afterward, under the ablest teachers, he studied to make himself proficient in this and other tongues. When quite a young man he was offered the post of Head Interpreter to the Travancore Government, a most honorable post, but he chose the poorer and more honorable work of the mission. As pastor, as archdeacon, and as vice-chairman of the Church Council, he exercised great influence and did
much to develop the spiritual and intellectual life of the native church; but his great work was associated with the Malayalam Bible Revision. He was regarded as one of the best Malayalam scholars in Travancore, and he was, for the most of the time, the only native delegate on the Revision Committee. What the late Mr. Baker, Senior, was to the Malayalam CMS Mission, from a missionary point of view, Archdeacon Koshi was from the native—a valuable link with the past and the future. He has left no history of the mission written from his actual knowledge. He spoke to one of his associates of the early days when portions of the Old Testament were first received at his home on the Rani River. The Syrian Christians would assemble round a lamp in the house of one who happened to possess a copy of the valuable document, and listen while chapter after chapter was read until the night grew into the morning; and then he lived to see the work develop into an orderly diocese with all the congregations ministered by pastors of their own race, and supported, in great part, by native contributions; and himself as archdeacon, and vice-chairman under the Bishop, of a church Council embracing twelve pastors and more than 15,000 Christians. He was the Chief Reviser on the Prayer-book Committee; and it was especially for this work that the Archbishop of Canterbury conferred on him the degree of D.D., on the recommendation of Bishop Speeley.

Among his other works may be mentioned his translation into Malayalam of the Pilgrim's Progress, and the Treasury of Knowledge.

KOTAGIRI: A town in the Presidency of Madras, India, situated in the Nilgiri district, about 27 miles E. of Utakamund. Station of the Basel Missionary Society (1887), with (1903) 3 missionaries and his wife, 15 native workers, men and women; 8 outstations, 6 day schools, and 314 professed Christians.

KOTA: See Kotah.

KOTAGERI: A town in the Presidency of Madras, India, situated in the Nilgiri district, about 27 miles E. of Utakamund. Station of the Basel Missionary Society (1887), with (1903) 1 missionary and his wife, 15 native workers, men and women; 8 outstations, 6 day schools, and 314 professed Christians.

KOTAH: A town in Rajputana, India; situated 120 miles S. of Jaipur, on the Chambal River. Population (1891) 38,650. Station of the UFS mission (1889), at present (1903) carried on by 18 native workers, men and women.

KOTA-KOTA: A village in the British Nyasaland Protectorate, Central Africa, situated on the W. shore of Lake Nyasa. It is celebrated for its fine crops of rice, and was formerly an important center of Arab commercial operations in the interior. Station of the Universities' Mission (1894), with (1902) 1 missionary, 2 missionary women, 5 native workers, 6 schools, a dispensary and 378 professed Christians, of whom 92 are communicants.

KOTGARH: A village in the Native Hill States, India, situated 20 miles E. of Simla. A station of the CMS, with 3 missionaries and their wives, 6 native workers, 1 chapel, 2 village schools and 58 professed Christians, of whom 28 are communicants.

KOTPAD: A town in the Presidency of Madras, India, situated in the Visagapatam district, about 120 miles N. W. of the town of that name. Station of the Breklum Missionary Society (1885), with (1903) 3 missionaries (one with his wife), 1 woman missionary, 23 native workers, men and women; 8 outstations, 3 day schools, 1 orphanage, 1 dispensary and 3,207 professed Christians, of whom 1,657 are baptized. Name also written Kotapad.

KOTGUR. See Kotgarh.

KO-THA-BYU: The first convert to Christianity from the Karens, a people among whom the labors of the Baptist missionaries in Burma have met with remarkable success. He was a robber and murderer in early life, and was the slave of a Buddhist Burman at Rangoon, when he was redeemed and became a servant in the family of Adoniram Judson. He was converted after some time and was baptized by Rev. George Dana Boardman at Tavoy on May 16, 1828. He very soon began to manifest a wonderful zeal and power in winning his own people to Christ, and was constantly bringing them to the missionaries for conversation and instruction. He traveled to remote portions of the country preaching the Gospel. More than one thousand Karens, it is estimated, were the result of his labors. He was not highly educated and his preaching was not sought by the more intelligent Christian Karens, yet he had a power second to none of his race over a congregation of untaught Karens. He died in 1940 in Arakan, whither he had gone with the missionaries Abbott and Kincaid to provide a place of refuge for the persecuted Karens of Burma. He was certainly one of the most remarkable native evangelists that Burma has produced.

KOTTA: A town in Ceylon, India, situated about 6 miles S. E. of Colombo. A station of the CMS (1882), with (1903) 1 missionary and his wife, 1 woman missionary, 96 native workers, 48 village schools, 3 high schools and 1,375 professed Christians, of whom 315 are communicants. Name sometimes spelled Cotta.

KOTTAYAM: A town in the province of Travancore, Madras, India, situated 32 miles S. E. by E. of Cochin, with a population (1881) of 11,300. A station of the CEZ (1871), with (1903) 49 native workers and 2 day schools. Station also of the CMS (1882), with (1903) 4 missionaries (three of them with their wives), 2 women missionaries, 49 native workers, 1 printing press, 5 village schools, 1 high school, 1 theological school and 1 college. There are also in the Native Church Council of the district 172 native workers, 90 village schools and 20,645 professed Christians, of whom 5,194 are communicants. Name sometimes spelled Cottayam.

KOTZEBUE: A station of the AFFM on the N. shore of Kotzebue Sound, an inlet of Bering's Strait, on the W. coast of Alaska. The station was established in 1897 and has a missionary and his wife and 1 woman missionary.

KRAPP, John Ludwig: Born in Wurttemberg, 1810; educated in the Basel Mission House; and by the Church Missionary Society to join the Abyssinian Mission begun by Gobat in 1830, and conducted by Isenberg and Blumhardt. Two or three months after his arrival they were all expelled, through the hostile influence of two French Romish priests, who persuaded the Prince of Tigré that they themselves were more in accord with Abyssinian Christianity than the
Protestants. Having been invited by the King of Shoa to visit his country, Dr. Krapf left Suez with Mr. Isenberg, January 27, 1839, with the hope of entering Abyssinia by way of Zella, and after many difficulties reached in May the kingdom of Shoa, lying south of Abyssinia, and in its widest sense including the whole of the Ethiopian highlands. The king received them favorably and promised his protection. Isenberg went in November to England to prepare for the press Amharic works, while Dr. Krapf remained, studying the Galla language and laboring among the Abyssinians. In 1840 he accompanied the king on an expedition to the Galas, a brave, vigorous, and daring nation, inhabiting a vast extent of territory stretching southward nearly to Mombasa, and numbering from six to eight millions. The slave-trade was carried on by them. In a second visit he noted three places where a Galla mission might be established and had many opportunities of proclaiming the Gospel message. The population of Shoa is to a large extent nominally Christian, similar to the Coptic Church in Egypt, but the Gallas were heathen. The committee were so impressed with their providential openings, both in Abyssinia and among the heathen Galla tribes, that they resolved to form the Abyssinians into a new mission, to be called the East Africa Mission. In 1841 the people of Shoa expressed great desire for the Word of God. Dr. Krapf spent three years among them, but in 1842 he was again excluded through Romish influence. He greatly desired to reach the Galla tribes. He translated the Gospels into their language. To devise a plan to reach them from the Indian Ocean he sailed down the coast in 1843, and visited Aden. Having received the approval of the committee, he sailed with his wife for Zanzibar, January 3, 1844, at Mombasa, which, after visiting Zanzibar, he selected as the site of his mission. Here he and his wife were proscribed by fever, and in two months she and their infant child died. He now devoted himself with zeal to the work of the mission, especially to the study of the languages of that region. He made excursions among the Wanika and Wakamba tribes, preaching and surveying the ground with reference to future operations. He found the natives extremely degraded, intemperate, and in the habit even of selling their children to obtain the means of indulgence. He applied himself to the work of translation, and in three years after the founding of the mission had translated Acts, Romans, Galatians, Peter, 1 John into the Swahili language, and had completed a dictionary of 10,000 words of the Swahili, Wanika and Wakamba languages. Repeated attacks of fever had greatly impaired his constitution. Yet he continued his missionary tours, gathering valuable information concerning the interior tribes and preaching the Gospel, which the natives who heard it would repeat to others.

In 1846 he was joined by John Rebmann, and together they established the mission station at Kisulutini in the Rabai district, fifteen miles inland. They were both for three weeks with fever, and before they had fully recovered their strength they set out for the new mission. They found the place more salubrious than Mombasa, but the people were deeply sunk in ignorance, superstition and sensuality. Continuing their explorations in the interior, they found wonderful openings, and came in sight of the Galla country, so long the object of Dr. Krapf’s desire. Dr. Krapf visited Usambas and Ukamba, and sailed down the coast as far as Cape Delgado. In 1849 he proceeded to Ukambani, 300 miles to the northwest, to visit the Wakamba tribe numbering about 70,000 people. He went again the next year with the view, as instructed by the committee, of founding a mission among the Wakamba on the heights of Yata. But the plan failed. In this journey he sighted Mount Kenya. On the journey he was repeatedly in the greatest danger, from hunger and thirst, wild beasts and savage robbers. He continued the study of the language and the translation of the Scriptures. He came to the conclusion that from the Galla boundary to the Cape of Good Hope there is one family of languages, which stock, he thinks, judging from specimens he had received of West African languages, commences on the southern bank of the Gabun River. The missionaries in their tours obtained much geographical information. In 1850 Dr. Krapf visited England and Germany and on his return explored the interior, penetrating to Ukamba, but was forced to return by extraordinary sufferings, peril and enmity of the tribes. In later years he established and directed the remarkable “Pilgrim Mission” in connection with the St. Chrischona Institute, which was to begin the “chain of missions” from the north instead of from the east. Twelve stations were planned, embracing Egypt, Nubia and Abyssinia. He afterward visited Usambara and was well received by the chief, who desired him to establish a mission on a mountain thirty miles distant, offering him his protection. In 1855 he returned to Europe, and tho he went again twice to Africa on temporary missions, the great work of his later years was linguistic, in connection with the St. Chrischona Institute, preparing dictionaries of several languages and translating the Scriptures into the East African tongues. He was found dead at his home, on his knees in the attitude of prayer, November 26, 1851, and on the 30th his body was buried in the presence of 3,000 people, assembled from all parts of the country.

Claus (Vos W.) Johann Ludwig Krapf, Basel, 1882.

KRISHNAGAR: A town in the district of Nadiya, Bengal, India, situated 55 miles N. of Calcutta. It has a population of (1891) 25,500, of whom 17,500 are Hindus. Station of the CMS (1831), with (1903) 2 missionaries and their wives, 21 native workers, 1 place of worship, 1 chapel, 8 day schools, 3 training schools for Christian teachers. In 1892 120 professed Christians, of whom 119 are communicants. The CEZ also has a station there (1871), with (1903) 7 women missionaries, 21 native workers, 1 high school, 2 dispensaries, 1 hospital, and 39 Zenana pupils.

KRISHNAGIRI: A town in Madras, India, situated in the district of Salem, 53 miles S. E. of Bangalore. Population (1891), 3,700, of
opened in 1895, and it has (1900) 2 missionaries (one with his wife) and 3 native workers.

KROONSTAD: A town in Cape Colony, S. Africa, situated in the district of the same name, of which it is the capital, 96 miles S. W. of Johannesburg. Population, 2,000. Station of the South African Wesleyan Methodist Missionary Society, with 63 native workers, 37 outstations, 3 day schools, and 951 professed Christians.

KRÜGERSDORP: A settlement in the Transvaal, Africa, situated 18 miles northwest of Johannesburg. A station of the Berlin Missionary Society (1899), with (1903) 1 missionary, 5 native workers, 5 outstations and 78 Christians. Station of the WMS (1903), with 1 missionary, 10 native workers, 11 outstations, 11 places of worship, 1 Sunday school, 1 day school, and 261 professed Christians, of whom 173 are communicants.

KUALA LUMPUR. See Kwala Lumpur.

KUANGCHI. See Kwăng-chi-hsien.

KU-ChAU-FU: A city in Che-kiang, China, on the left bank of the Yangtse River, 106 miles S. W. of Hang-chau. It is a large and prosperous place, and considered one of the keys to the empire. Station of the CIM (1872), but as yet (1903) vacant since the Boxer troubles of 1900. Name written by the Society, Kiu-chau.

KU-CHENg. See Ku-tien-hsien.

KUCHING, or SARAWAK: A town in British Borneo, Malaysia, capital of the district of Sarawak; situated at the head of navigation of the Sarawak River, 18 miles from its mouth. Population, 25,000. A station of the SPG (1848), with (1903) 2 missionaries, 11 native workers, 4 outstations, 4 places of worship, 2 high schools, and 689 Christians.

KUDAT: A station in British North Borneo, Malaysia, situated on an inlet running west from Marudu Bay. A station of the SPG (1888), with (1902) 5 native workers, 2 places of worship, 2 day schools, and 584 professed Christians, of whom 285 are communicants.

KU-DE: A town in the province of Fo-kien, China, situated 58 miles N. W. of Fu-chau. Station circuit of the ME, with (1903) 45 native workers, men and women; 15 places of worship, 20 Sabbath schools, 10 day schools, and 890 professed Christians, of whom 516 are communicants.

KUDELUR. See Cuddalore.

KU-DING: A town in the province of Chekiang, China, situated about 50 miles north by west of Hang-chau. A station of the PS (1895), with (1903) 1 missionary and wife, 4 native workers, 3 outstations, 4 places of worship, 3 Sunday schools, 2 day schools, and 218 professed Christians, of whom 100 are communicants.

KUEL-LIN. See Kwei-lin-fu.

KUENENG: A station of the Paris Evangelical Missionary Society in Basutoland, S. Africa, situated in the northern part of the territory, with (1902) 10 native workers, 3 day schools, 5 outstations, and 563 professed Christians, of whom 336 are communicants.

KU-HSIEH: A town in the province of Szechwan, China, situated 48 miles E. N. E. of Shun-king-fu. Station of the CIM (1898), with (1903) 1 missionary and his wife and 1 woman missionary. Name written by the Society, Ku-hien.

KUH-TSI-ING. See Ku-ting-fu.

KU'WU. See Ku-wu-hsien.

KULBARGA: A town in the native state of Haidarabad, India; situated on an undulating plain in the district of the same name, of which it is the chief town, and 75 miles E. N. E. of Bijapur. It was the capital city of a powerful dynasty from 1347 to 1432, and its chief mosque is a copy of that in Cordova, Spain. Its fine palaces, however, are mostly allowed to decay uncared for. Population, 29,000. Station of the ME, with (1903) 1 missionary, 6 native workers, and an orphanage.

KULESA: A station of the Scandinavian Alliance (U. S.) in British East Africa, situated 30 miles N. W. of Witu.

KULLUKO: A village in Eritrea, East Africa, situated on the frontier of Abyssinia, about 135 miles W. S. W. of Massaua. Station of the Evangelical National Missionary Society of Sweden (1867), with (1900) 2 missionaries, 1 of them accompanied by his wife.

KUMAGAI: A town on the Honjo, or main island of Japan, situated about 50 miles E. by N. of Nagasaki. It is the most populous city in the island and is the center of a large rice trade. It has a celebrated fortress built of enormous stones. Malaria prevails in the region. Population, 47,600. Station of the CMS (1888), with (1903) 2 missionaries (one with his wife), 4 native workers, 1 place of worship, 2 Sunday schools, and 234 professed Christians, of whom 109 are communicants. The EL US also has a station there (1898), with 1 missionary and his wife. Also station of the SBC, with (1903) 1 missionary and his wife, 1 native worker, 1 Sunday school, and 15 professed Christians. Station also of the ME, with (1903) 2 missionaries, 4 native workers, 1 outstation, 1 place of worship, 4 Sunday schools and 160 professed Christians.

KUMASE. See Kumassi.

KUMASSI: A town situated 104 miles north by west of Cape Coast Castle, in the Gold Coast Colony, Western Africa. A station of the Basel Missionary Society (1896), with (1903) 2 missionaries and their wives, 5 native workers, 3 outstations, 4 day schools and 80 professed Christians. Station of the WMS also, with (1903) 1 missionary, 8 native workers, 35 outstations, 35 places of worship, 4 Sunday schools, 4 day schools, and 55 professed Christians. Name sometimes spelled Kumase.

KUMBAKONAM. See Combaconum.

KUMUKI DIALECT. See Turkish Language.

KUNDikut. See Kandukur.

KUNDI: A village in the eastern part of the native state of Rewa, Central India, near the Chota Nagpur frontier. A station of the WMS, with (1903) 1 missionary, 13 native workers, 7 places of worship, 7 Sunday schools, 7 day schools, and 444 professed Christians, of whom 57 are communicants.

KUNNANKULAM: A town in the native state
of Cochin, India, situated about 28 miles S. W. of Coimbatore. A station of the CMS (1854), with (1903) 55 native workers, 4 outstations, 7 day schools, and 97 professed Christians.

KURDS: To say that the Kurds are the Carduchi mentioned with painful reminiscences by Xenophon, does not answer the question of their origin. Nor can one define their relations by saying that they are the people of Kurdistan. No definite territory called by that name exists, and the Kurds, wherever found, live as detached groups in the midst of other races. They abound in the regions extending from the Russian border in the north to the fig-producing hills of Persia in the south, and from the Tigris, the Euphrates at Samosata, the Taurus of Armenia, to the Araxes and the Halys on the north, the one to the Caspian and the other to the Black Sea; and to the south, the Euphrates, and the Tigris, with its tributaries, into the Persian Gulf.

Such endless combinations of mountains and valleys, lakes and gorges, rivers and plateaus, snow-clad peaks and grassy plains, render the scenery beautiful, grand, weird, and wild by turns.

The region described above was inhabited, in the times of the Assyrian Empire, by a warrior race named "Gutu." The Assyrians called them Gardu and Kardu; the Greeks later called them Kardokas (Kardakes). They were Scythians or Turanians. After the subjugation of Assyria the Gardu were absorbed by a still more energetic race (the southern Kurmanj), who claim to be lineal descendants of Madai, the son of Japheth, and of the same stock as the Medes. The Kurds also claim that one of the tribes of the "Gutu" remaining in its early habitat produced Nebuchadnezzar and in the Babylonian Empire became imbued with Semitic qualities of blood. The Lur tribes of southern Kurdistan. In a similar manner emigrations of Lurs from Persia and of Wends from Afghanistan brought in Aryan blood, so that the eastern Kurds have distinctly Aryan qualities. These various traditions of the Kurds are sifted to this day in one particular, namely, that the Kurds of to-day are of mixed Aryan, Semitic and Turanian stock. But to seek to identify the various strains of blood or their source is useless in a land where the people have clung to their rocky heights while they have been trampled into many forms during fifteen centuries by conquering hosts coming from south and east and west.

The Kurds to-day are found in three great groups, the Kurmanj, the Guran and the Lur. The Lur are found in Persia, and the two first named groups in both Turkey and Persia. The language of each group is a separate dialect, and many of the tribes of each family have also their own dialect.

For various reasons exactness in statements of the numbers of the Kurds is simply impossible; the following tabulation gives only approximate estimates:

Total, 3,400,000

As to mode of life the Kurds are of three classes: (a) Those who are purely pastoral are nomadic (called Glitches) and oscillate between the mountains and the plains occupying the former in summer and the latter in winter. (b) Those partly pastoral and partly agricultural occupy fixed abodes in winter, but in summer dwell in tents among pastures not remote from their harvest fields. (c) Those purely agricultural remain throughout the year in fixed abodes. Some Kurds also have taken up trades and live in cities as merchants and mechanics. Generally speaking, one-half, perhaps more, of the Kurds belong to class a, while the remainder are distributed between classes b and c in the proportion of 2 to 1.

The Kurds of these three classes are of two distinct types—the northern and the southern. The northern Kurd is bold, but not courageous, hospitable but full of theft and treachery, loud-voiced and brutal, lazy and ignorant, fond of villiger, feuds and feuds. He is shiftless and likewise shiftless in regard to his person, dress and...
Kurds

Kurdish manners. He has black eyes and hair, is of fine physique and athletic, is temperate and of sturdier morals than his Turkish ruler. As a rule he is monogamous, and treats his wife more after the manner of Europeans than of the Turk. He is intellectually dull, and dogged in his commercial dealings; ready to owe and acknowledge a debt, but slow to cancel it. The southern Kurd who has learned to dwell in a fixed abode is not less athletic, but of finer grain, more polite in his bearing, more quiet in his manners, and more careful of his person and dress than the northern type or the nomad Kurd. He has a more intellectual cast of features, and is brighter looking. The organization of the southern Kurds is more compact than that of the northern tribes, and there is among them the quiet consciousness of power. They obey Abdul Hamid more as Caliph than as Sultan. A considerable number of the southern Kurds have been educated in Arabic and Persian literature, and such are to be found in high office under the Turkish Government. In general, Kurds are the untamed highlanders of Turkey and Persia-bound of freedom, but lawless in their use of it, thereby occasioning great uneasiness to both those powers. Clannishness and tribal feuds are powerful preventives of their racial homogeneity and political power.

All Kurds are Muslims. They are about equally divided between the Sunni and the Shi'a denominations. The Shi'a Kurds are the Lur and Wend tribes of Persia and Afghanistan, the Kurmanj of Bolitan, Sert, and Bitlis, and the Gurans of the Dersim Mountains in Turkey. All Kurds are bigoted and are fanatically attached to their Sheikhs, if not to their religion. Comparatively few of them have an intelligent grasp of Islam, which indeed is a foreign religion in a foreign tongue.

Missionary work among the Kurds does not exist, because neither Turkey nor Persia would tolerate organized work in their behalf; and their contact with the evangelistic efforts of the Eastern Turkey and West Persia missions for the nominal Christians residing in their midst is of the slightest.

The evangelical churches of Turkey support a "Kurdish Mission," which is conducted from Harpoot; but it is for Kurdish-speaking Armenians, and not for the Kurds. In connection with this work a translation of the New Testament and also a small hymn-book have been published in Kurmanj Kurdish.

Some effort for Kurdish-speaking Syrians is now prosecuted by the Mardin station of the ABCFM. It would seem the intention of Providence to use these evangelized Kurdish-speaking Christians as an entering wedge for work among the Muslim Kurds when all things are ready for such a movement. The Persian Mission of the PN and that of the CMS are also making efforts to reach this neglected people in many unobtrusive ways.

As a rule those who have come into close acquaintance with Kurds have acquired a profound respect for their sturdy and admirable qualities of heart, their mental abilities and their capacity for religious and political development. Not a few believe that through their progress in culture may be found a solution of the Eastern question.

Kurdish Language: Belongs to the Iranian branch of the Aryan family of languages. Its immediate relations seem to be still unsettled, although there is reason to connect it with the Pehlevi. It is found in two distinct dialects—the Kurmanj and the Gurani, which are Western Kurdish, and the Lur and Wend, which are Eastern. These two groups are broken into many smaller dialects to the formation of which there seems to be no limit, such as is found in the existence of a literary class. Nothing in Kurdish has ever been printed except by strangers. The Kurds have a vast collection of materials for a literature, but they have not even an alphabet as yet, making use of the Arabic alphabet for correspondence, etc. Certain Armenians who speak Kurdish use the Armenian alphabet, and missionaries have printed some books for their use in Kurdish written with Armenian letters.

Kurnool. See Karnul.

Kurseong. See Kanshung.

Kuruman: A town and district in the Bechuanaland country in the northeastern part of Cape Colony, S. Africa; situated 100 miles N. W. of Barberton, West and 90 miles S. W. of Vryburg. Station of the LMS (1818), with (1903) 1 missionary and his wife, 13 native workers, 14 schools, and 666 communicants.

Kusai: The easternmost of the Caroline Islands, North Pacific Ocean. It is used by the ABCFM as a center for work among the Micronesian islands. It is also called Strong Island and Ululan.

Kusai Language: Belongs to the Micronesian family. It was reduced to writing by missionaries of the ABCFM working among the people of Kusie, one of the Caroline Islands. They have done a certain amount of literary work in this language, writing it with Roman letters.

Kushiyo: A town and the capital of the Kushiyo province in Hokkaido, Japan, situated on the S. E. coast of the island, about 205 miles E. N. E. of Hakodate. Its exports are sulphur and coal. Station of the CMS (1889), with (1903) 1 woman missionary, 8 native workers, 2 outstations, 1 place of worship, 3 Sunday schools, 3 day schools, and 321 professed Christians, of whom 128 are communicants.

Kushtia: A town in the Nadiya District of Bengal, India, situated on the right bank of the Ganges, about 60 miles E. S. E. of Murshidabad. Population, 11,200, of whom 6,000 are Muslims and 5,000 Hindus. Station of the CMS (1901), with (1903) 1 missionary, 4 native workers and 26 professed Christians.

Ku-tien-hsien: A town in the province of Fo-kien, China, situated about 50 miles N. N. W. of Fuchau. Station of the CMS (1887), with (1903) 1 missionary and his wife, 60 native workers, 2 outstations, 1 place of worship, 25 day schools, 1,780 professed Christians, of whom 682 are communicants. Station also of the CEZ (1889), with (1903) 3 women missionaries, 2 native workers, 1 boarding school. Station also of the MS with (1903) 2 missionaries, 2 women missionaries, 44 native workers, 6 outstations, 10 places of worship, 10 Sunday schools, 14 young people's societies, 9 day schools, 1 hospital, 1 dispensary, and 939 professed Christians, of whom 531 are communicants. Station of the Mission to Lepers in
India and the East (1892), with 1 place of worship and 1 leper asylum. Name sometimes written Kucheng.

KU-CHENG-TSZE: A town in Manchuria, China, situated about 62 miles N. E. of Kirin. Station of the Presbyterian Church in Ireland (1895), with 1 missionary, 5 native workers, 4 schools, and 170 communicants (1900).

KWAGHTO-LANGUAGE: Belongs to the Pacific Coast branch of the North American family of languages, being spoken by Indians of Vancouver Island. It has been reduced to writing by missionaries of the CMS, the Roman alphabet being used for the purpose.

KWALA KAPUAS: A station of the Rhenish Missionary Society, in Southeastern Borneo, Dutch East Indies, 30 miles N. by W. of Banjermasin. The station was opened in 1886 and now (1903) has 1 missionary and his wife, 7 native workers, 15 Sunday schools, 6 day schools, and 488 professed Christians, of whom 308 are communicants.

KWALA LUMPUR: A town in the district of Selangor, Malay Peninsula; situated near the head of the Klang River. It is the capital of the British protectorate, and is destined to grow in importance as time passes. Station of the ME, with (1903) 1 missionary and his wife, 3 native workers, 2 Sunday schools, 1 day school, and 205 professed Christians.

KWAMAGWAZA: A town in Natal, Africa; situated in the district of Eshowe, 9 miles N. W. of the town of that name. Station of the Zululand Diocese of the Church of England (1886), with 1 missionary, 1 woman missionary, and 2 native women workers.

KWAMERIA: A mission station of the New Hebrides Missionary Society, on the southern part of the Island of Tanna, New Hebrides. It was established in 1858 and has (1900) 1 missionary and his wife and 2 native workers.

KWAMERIA LANGUAGE: A dialect of the Massai spoken in the Island of Tanna, New Hebrides.

KWO: A town in the province of Honan, China, situated 70 miles S. E. of Ju-nung-fu. Station of the CIM (1899), with (1903) 1 missionary.

KWAN-CHENG-TSZE: A town in Manchuria, China, situated in the district of Kirin, 62 miles W. of that city. It has a considerable trade in indigo and opium. Population, 70,000. Station of the Presbyterian Church in Ireland (1891), with (1900) 4 missionaries (3 with their wives), 25 native workers, men and women; 10 outstations, 11 places of worship, 1 day school, 1 theological seminary, 1 dispensary, 1 hospital and 100 church members.

KWANG-CHI-HSIEN: A town 75 miles southeast of Wu-chiang in the province of Kiang-su, China. Station of the CMS (1893), with 1 missionary, 7 native workers, 5 chapels, 3 Sunday schools, 2 day schools, and 140 professed Christians.

KWANG-FENG-HSIEN: A town in the province of Kiang-si, China, situated 138 miles E. N. E. of Nan-chang-fu. Station of the CIM (1895), with (1903) 4 women missionaries, 5 native workers, men and women, and 3 outstations.

KWANG-HSIN-FU: A town in the province of Kiang-si, China; situated on the Kin River, 150 miles N. W. of Wen-chau and 135 miles E. of Nan-chang-fu. Station of the CIM (1902), with 2 missionaries and 3 native workers. Name is sometimes spelled Kwang-sin-fu.

KWANG-HUN-CHI: A town in Manchuria, Chinese Empire; situated in the province of Liaotung, about 45 miles N. N. E. of New-chwang. Station of the Presbyterian Church in Ireland (1895), with (1900) 2 missionaries (1 with his wife), 27 native workers, men and women, 24 outstations, 16 places of worship, 1 dispensary, 1 hospital, and 300 church members. Name written by the Society, Kwangning.

KWANG-TÉ-CHAU: A town in the province of Sze-chwan, China; situated in the southeastern terminus of a route across the desert of Gobi. Population, about 200,000. Station of the LMS (1891), with (1903) 1 missionary and his wife. Name written by the Society, Kwang-teh.

KWANG-YUEN-HSIEN: A town in the province of Sze-chwan, China; situated about 124 miles N. E. of Cheng-fu-fu. Station of the CIM (1889), with (1903) 2 women missionaries. Name written by the Society, Kwang-yuen.

KWANG-CHEN-HSIEN: A town in the province of Sze-chwan; situated on the Min River at the northwestern edge of the Cheng-fu plain and about 70 miles N. W. of the city of Cheng-fu-fu. Station of the CIM (1889), with (1903) 1 missionary and his wife and 2 native workers.

KWATO: A town at the S. E. extremity of British New Guinea. Station of the LMS (1891), with (1903) 1 missionary and his wife, 11 native workers, 15 schools, and 241 communicants.

KWIEI-HWA-CHENG-TING: A town in the province of Shen-si, China; situated at an altitude of 3,600 feet in the N. W. part of the province, 50 miles N. W. of So-ping-fu and about 250 miles W. N. W. of Peking. The town is divided by gardens and public squares into two sections, the traders occupying one section and the military and the religious bodies occupying the other. It stands at the confluence of trade routes to the Kokonor region and Eastern Turkestan, being the southeastern terminus of a route across the desert of Gobi. Population, about 200,000. Station of the Christian and Missionary Alliance.

KWEI-KI. See Kwei-hsiien.

KWEI-LIN-FU: A town in the province of Kiang-si, China; situated at the headwaters of the Kwei River, 230 miles N. W. of Canton. Station of the CMS (1899), with (1903) 2 missionaries (1 with his wife) and 1 dispensary. The CA also has a station at this place. The name is sometimes written Kwei Lin.

KWEI-TSI-HSIEN: A town in the province of Kiang-si, China; situated about 90 miles E. S. E.
LABRADOR: The easternmost portion of British America, on the Atlantic coast, comprising the region draining into the Atlantic bounded northeast and east by Hudson Strait and the Atlantic Ocean, southeast by the Strait of Belle Isle, and west by Ungava and Quebec. It is a dependency of Newfoundland and its area is about 120,000 square miles. The population is estimated (1901) at 3,947. The climate is very cold. One coast is rugged and forbidding. Vegetation is scanty, because of cold, and only stunted trees, shrubs, and lichens grow well there. The people are chiefly Eskimos, with some descendants of early French adventurers. Their occupations are fishing in the summer, hunting and trapping in the winter. The important settlements are scattered along the shore of the Strait of Belle Isle, and on the ocean coast to Cape Webeck, just north of Hamilton Inlet.

The Moravians are the foremost Christian workers in Labrador.

Their stations are, from S. to N., the following: Rigolet (1901), Makkovik (1896), Hopevale (1782), Nain (1771), Okak (1776), Hebron (1830) and Ramon (1871).

The Labrador Medical Mission is also in the field, and, of the Medical Mission, in his hospital yacht, steams from point to point, healing the sick among the Eskimos and preaching the Gospel.

The CMS, through Mr. Peck, has accomplished good results in Labrador.

Grenfell (W. T.), The Vikings of Today, 1895.

LABUAN ISLAND: A small island off the N. W. coast of Borneo and about 6 miles distant. It belongs to the British North Borneo Company, is flat, well-wooded and has extensive coal mines, and produces agio flour in large quantities. It has an area of 30 square miles and a population of 6,000. Station of the SPG (1869), with (1903) 1 missionary, 4 native workers, 14 outstations, 2 places of worship, 1 day school and 114 professed Christians, of whom 46 are communicants.

LA CAROLINA: A village in the S. part of the State of Maranhão, Brazil, S. America, near the Tocantins River. Station of the South American Evangelical Mission, with 2 missionaries, one with his wife.

LACCADIVE ISLANDS: A group of 14 islands, only 9 of which are inhabited, lying in the Indian Ocean, about 200 miles off the west coast of Malabar. Population (1891), 14,473, of whom 46 are communicants. Name written by the Society, Kwelki.

KWEI-YANG-FU: A town in the province of Kwai-chau, of which it is the capital; situated 310 miles S. W. of Chang-te in Hunan, at the sources of important affluents of the Yangtse River. It has considerable commercial importance. Station of the CIM (1877), with (1903) 4 missionaries, 2 wives of missionaries, 2 missionary women, and 5 native workers.

KWEI-YANG-FU: Station of the CIM (1878), with (1903) 8 missionary women, 11 native workers, men and women; 3 outstations, 9 places of worship, 2 day schools, 1 boarding school and 246 professed Christians. Name written by the Society, Kwelki.

KWEI-YANG-FU: A town in the province of Kwai-chau, of which it is the capital; situated 310 miles S. W. of Chang-te in Hunan, at the sources of important affluents of the Yangtse River. It has considerable commercial importance. Station of the CIM (1877), with (1903) 4 missionaries, 2 wives of missionaries, 2 missionary women, and 5 native workers.

KYELANG. See KAILANG.

KYOTO. See KIOTO.
of the group, was ceded to the United States. The next year (1899) the remaining islands were ceded by Spain to Germany. The present inhabitants of the islands are immigrants or the descendants of immigrants from the Philippines.

Guam has an area of about 200 miles and a population of 9,000. Of these, two-thirds live in Agaña, the capital. The ABCFM has a station here (1901). Spanish has been the language of the islands, but English is making progress in Guam.

LAGOS: A town in Lagos Colony, West Africa, situated 48 miles S. of Abeokuta, on an island in a lagoon at the mouth of the Ogun. It is accessible to vessels of considerable size, and has water communication far into the interior. Since 1861 a British possession; often called the "African Lake" on account of its enormous extent of water and the surrounding country. It is now the capital of the district.

LAGOS: A British Colony and Protectorate on the Gulf of Guinea, West Africa, between Dahomey and Southern Nigeria, and northward within undefined boundaries to the French possessions on the Middle Niger. The colony proper comprises Lagos Island and about 146 miles of coast, containing altogether 3,400 square miles; the protectorate extends inland, with 25,454 square miles. The estimated population of all (1901) is 1,500,000.

Missions were commenced in this territory by Christianized negroes removing from Sierra Leone to Abeokuta about 1840. Their representatives were the establishment by the CMS of stations at Badagry (1845), Abeokuta (1846), Lagos (1852) and Ibadan (1852). The CMS has since occupied three other stations. The WMS, the SBC and the National Baptist Convention also have missionaries at some of the same stations, and altogether there are 89 missionary stations and about 7,500 native communicants.

LAGUDOTTI: A village on the S. shore of Toba Lake, Sumatra. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, 1 with his wife; 12 native workers, 13 outstations, 10 Sunday schools, 11 day schools and 2,245 professed Christians, of whom 870 are communicants.

LAHAVI: A village in the central part of the island of Nias, Dutch E. Indies, situated about 20 miles S. W. of Gunong Sitoli. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 1 day school, 1 Sunday school and 205 professed Christians, of whom 124 are communicants.

LAHORE: A town in Punjab, India; situated on the left bank of the Ravi River, 32 miles W. of Amritsar. Has several fine mosques and a number of Hindu temples. The surrounding country is covered with vast ruins, attesting the ancient magnificence of the city. Population (1901), 202,964. The city is also celebrated for the ancient magnificence of its ruins, of which 130 are communicants. Station also of the ME, with (1903) 1 missionary and his wife, 12 native workers, 2 chapels, 5 Sunday schools, and 520 professed Christians, of whom 380 are communicants. Station also of the Rhenish Missionary Society, with (1849), with (1903) 3 missionaries, 2 with their wives; 1 woman missionary, 2 native workers, 1 place of worship, 2 day schools, 1 theological class and 1,600 professed Christians, of whom 130 are communicants. Station also of the ME, with (1903) 1 missionary and his wife, 12 native workers, 2 chapels, 5 Sunday schools, 8 day schools, 2 boarding schools, 1 college, 1 dispensary, and 215 professed Christians. The YMCA (1890) and the YWCA both have agents here with branches of their respective associations. Station also of the ZBM, with (1903) 11 women missionaries, 12 native workers, 2 boarding schools, and 240 Zenana pupils.

LAHUSA: A village on the S. coast of the island of Nias, Dutch E. Indies; situated about 35 miles S. of Gunong Sitoli. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, 1 with his wife; 6 native workers, 2 outstations, 1 Sunday school, 2 day schools, and 311 professed Christians, of whom 202 are communicants.

LAI-AN. See Lai-angan-hsien.

LAI-ANGAN-HSIEN: A town in the province of Ngan-twei, China, situated about 20 miles N. by E. of Chu-chang. Station of the CIM (1899). Name also written Lui-an.

LAINGSBURG: A village in the District of Prince Albert, Cape Colony, Africa; situated on the railroad to Kimberley, 213 miles from Cape Town. Population, 1,500. Station of the Berlin Missionary Society (1884), with (1903) 1 missionary, 11 native workers, 15 outstations, 2 day schools, and 580 professed Christians, of whom 284 are communicants.

LAITLYJKOT: A village in Assam, India; situated 10 miles S. by W. of Shillong. Station of the Welsh Calvinistic Methodist Missionary Society, with (1903) 1 missionary and his wife, 24 native workers, 14 outstations, 15 places of wor-
ship, 13 Sunday schools, 13 day schools, 1 dispensary, and 346 professed Christians, of whom 99 are communicants.

LAKAWAN: A town on the Me Wang, Siam; situated 65 miles S. E. of Chiang Mai. Population is composed very largely of Laos. Station of the PN (1885), with 5 missionaries, 4 with their wives; 1 missionary woman, 4 native workers, 3 outstations, 1 chapel, 4 Sunday schools, 2 boarding schools, 1 hospital and 209 professed Christians. Name also written Lakom.

LAKEMBA ISLANDS: A group of small islands east of the Fiji Islands, to which they politically belong. It is occupied by the Australian Wesleyan Missionary Society, with (1900) 2 missionaries, 251 native workers, 11 outstations, 72 places of worship, 72 Sunday schools, 73 day schools, 1 dispensary, and 460 professed Christians.

LAKHIMPUR: A village is Assam, India; situated 55 miles W. S. W. of Dibrugarh. Population, 5,000. Station of the ABMU (1893), with (1903) 2 missionaries and their wives, 19 native workers, 5 outstations, 4 chapels, 1 Sunday school, 5 village schools, 1 boarding school, 1 dispensary, and 392 professed Christians.

LALITPUR: A town in the District of Lalitpur, United Provinces, India; situated 110 miles S. by E. of Gwalior. Population 11,300, 8,700 of whom are Hindus and 1,600 Muslims. Station of the Reformed Episcopal Foreign Mission Society (1889), with (1901) 3 missionaries, 1 woman missionary, 1 with his wife; 2 women missionaries, 17 native workers, 5 outstations, 1 place of worship, 5 Sunday schools, 2 young people's societies, 5 day schools, 2 industrial training schools, 1 dispensary, 1 medical class, 1 orphanage, and 131 Christians.

LAMBARENE: A settlement on the Ogowe River, French Congo, Africa; situated about 150 miles from its mouth. The PN opened a mission station in 1867, but transferred it to the Paris Evangelical Society in 1895. It now (1903) has 4 missionaries, 3 with their wives; 1 woman missionary, 5 outstations, 1 chapel, 1 Sunday school, 2 day schools, and 1 dispensary.

LAMU: A town and the capital of the District of Lamu Island, British East Africa; situated on the east side of Lamu Island. The island is 7 miles long and separated from the land by a narrow channel. It lies off the coast about 150 miles N. W. of Mombasa. The town is a port of call for English and German steamers, and is connected with Mombasa by telegraph. It has a population of 5,000 people, and is a mission station of the Neukirchen Mission Society (1889), with (1901) 3 missionaries and their wives and 1 boarding school.

LAN-CHAU: A town in the Province of Chi-li, China, about halfway between Tien-tsin and Shan-hai-kwan. Station of the ME (1884). After the mission work was broken up and the missionaries driven out in the Boxer troubles, it is now being reorganized and carried on with (1903) 16 native workers, 6 outstations, and 744 Christians.

LAN-CHAU-FU: The capital of the province of Kan-su, China; situated on the right bank of the Yellow River in a narrow valley which the river fills, 450 miles W. N. W. of Hsi-nan-fu. It has important manufactures of coarse woolen goods. Altitude, 5,000 feet. Population, 250,000, of whom many are Mohammedans. Station of the CIM (1885), with (1903) 6 missionaries, 2 with their wives; 1 woman missionary, 1 chapel, and 1 dispensary.

LANDAU: A village and sanitarium in the District of Dehra Dun, United Provinces, India; situated 77 miles E. of Ambala. Altitude, 7,459 feet. Population (1891), 2,000. Station of the PN (1874), with (1903) 1 missionary and his wife, 1 woman missionary, and 1 boarding school. Station of the ZBM, with (1902) 2 women missionaries, 2 native workers, and 81 Chinese pupils. The name is sometimes spelled Landour. The place is also called Woodstock.

LANG-CHAU: A town in the province of Shen-si, China, situated 115 miles W. N. W. of Hsi-nan-fu. Station of the CIM (1893), with (1903) 1 missionary and his wife, 1 woman missionary and 1 chapel.

LANGUAGES: Missions and the Unwritten: Christianity had its origin in the midst of the greatest civilization of the times. It was not born in some obscure corner of the earth. It found its way at once into the imperial centers of the mightiest empire of the ancient world. It expressed itself at the outset in the supreme language the human race has ever invented. The oracles out of which it sprang had already been translated into this tongue, and the new oracles of the New Covenant were given in the same speech. It is a significant fact that cannot be too often commented upon that Christianity at once conquered the best and possessed it for the New Kingdom. It swiftly also invaded the other living languages of power and influence—the Syriac, which reached out eastward from the Euphrates and beyond, and the Latin, which was the speech of the civilization of the West. This could not take place without affecting the very life and forms of these languages, changing their vocabulary, enriching their content.

It would be interesting to trace the influence of Christianity—aggressive, conquering, missionary Christianity—on these languages, already the vehicle of polished thought. Without the very language of Greece, in which the New Testament was first given form, received a new imprint from these holy writings. So too the Scriptures, translated into the Vulgate, the common speech of the Latin peoples, had their modifying influences on the language of the Caesars. Except, however, in adding elevation of thought and in the gift of spiritual ideals it is doubtful whether Christianity really added anything to these already classic languages. When we come to another class of languages another set of facts are to be considered. Christianity, ever restless and moving outward from its early centers, came in contact with the West with peoples that had already developed incipient literatures. They had created their alphabets and begun their progress. The new light of the Spirit, however, proved to be that we add, and as we trace these origins of literature we find, as in our earliest forms of English literature, the presence of the creative power of the Christian story. Even later in their development it is the power of the Bible translated by the missionary church into their tongue that gives it as in England and in Germany, or the power of a missionary soul that lifted it to its loftiest possibilities, as Dante, the tongue of Italy.
But this is not enough for Christianity. It is not satisfied to vivify existing literature, and give a mighty uplift to those in the weakness of their infancy—it has created the very forms of literature and has made languages.

The language of Russia and Bulgaria, and Servia, all the languages however modified that take their origin from the old Slavic of the early centuries, owe their very letters, their alphabet, to missionaries from Constantinople: Cyril and Methodius, who in the 9th century went to the South Slavic peoples and gave their language form in the quaint characters that abide to this day. This work of missionaries in the 9th century is being carried forward by missionaries in the 20th century. A missionary in Central Africa has just reduced the Kairondo language to writing and begun the translation of the Gospel into this speech. In the year 1903 the complete New Testament translated by the Rev. E. H. Richards was issued in Sheetswa, the speech of millions of people on the east coast of Africa, who had no written language until the advent of the missionary. What is true of these African peoples is also true of the many peoples living in the scattered islands of Micronesia. In 1856 the Rev. Hiram Bingham, the son of one of the first missionaries to the Sandwich Islands, left the United States on the Morning Star. He arrived in Apia on Nov. 18, 1857. He spent the first eighteen months after his arrival in acquiring the language and putting it in writing. In February, 1859, he commenced the translation of the New Testament, which was not completed until 1873, and the Old Testament twenty years later. The whole story of this fascinating tribe is a fascinating one. In the translation nearly 400 foreign words had to be introduced for which there were no equivalents in the new tongue.

The language of Ponape, one of the Caroline Islands, was also reduced to writing by missionaries. Matthew and John were translated in 1859. This translation was made by the Rev. Dr. Gulick, who had the help of a runaway Portuguese who had been on the island, and who had acquired the language and had been converted by reading the Portuguese New Testament given him by a missionary, so that from this incident we see how the Divine Word reproduces itself by giving shape to languages which had no written form until the missionary influence came in contact with it.

In the Marshall Islands the missionaries reduced the language to writing in order to translate into the language the Holy Scriptures. The New Testament was finally given to these people in 1885.

What was true of the Gilbert Islands and the Ponape and the Marshall Islands was also true of Kusaie and the Mortlock and Ruk languages. Another interesting group of languages which has been reduced to form by missionary effort is that of the Indians of North America. It is true that the Cherokee language owes its alphabet to a newspaper enterprise,—a certain educated Cherokee, Geo. Guess, purposing to introduce the English alphabet to his nation. The missionaries, however, much to his disgust, made use of his work for circulating the Scriptures, and the first actual printing in type from the letters originated by the newspaper enterprise was the Book of Genesis, translated by the Rev. S. A. Worcester, D.D., and published in 1827.

The work of the Moravians among the Delawares and of the American Board missionaries among the Dakotas and among the Choctaws, all had to do with the shaping and forming of these languages. So much was it realized that this missionary work had been an important aid in the civilizing of the tribes that in 1887 the Dakota Indians appealed from the decision of the United States abolishing the use of the vernacular in their schools on the ground that the Vernacular Bible had been a great and effective agency in their civilization.

Not only has missionary effort, especially in connection with the translation of the Scriptures, been a creative power giving shape and form to many unwritten languages, of which the above incidents are simply occasional examples, and giving an elevation and dignity to those that already had been reduced to writing, but in many instances the work of the missionaries has been the only influence that has given permanence to these languages. In some cases the only memorial of these languages that exists is the product of the labor of the missionary.

LAN-KI-HSIEN: A town in the province of Che-kiang, China, situated 75 miles S. W. of Hang-chau. It is an important commercial center. Population, 200,000. Station of the C.I.M. (1894), with (1903) 3 women missionaries, 5 native workers, and 1 chapel. Name is sometimes written Lan-k'1.

LAN-TIEN-HSIEN: A town in the province of Shen-si, China, situated 28 miles S. E. of Hsingan-fu. Station of the C.I.M. (1895), with (1903) 1 missionary and his wife, 1 native worker, 1 chapel, 1 Sunday school, and 1 day school. The name is sometimes written Lan-t'ven.

LAO-HO-KAU: A town and river port on the Han River, in the province of Hu-pe, China, situated 200 miles N. W. of Han-kau. Station of the C.I.M. (1887), with (1903) 2 missionaries and their wives, 9 native workers, 1 outstation, 2 places of worship, 1 Sunday school, 1 day school, and 44 Christians. Station also of the Norwegian Lutheran China Mission (1894), with (1900) 2 missionaries, 2 women missionaries, 1 day school, and 1 boarding school. Station also of the PB, with 1 missionary and his wife and 2 women missionaries. Name spelled by the Society Lao-ho-k'ou and Lao-ho-keo.

LAO-LING. See LE-LING-HSIEN.

LAOS: The name Laos is the French method of writing the name Lao, given by the Siamese to a people of the Shan stock, often called Eastern Shans, and found in North Siam and in the French territories of Indo-China. The word has become naturalized in English through the adoption of the French spelling by writers in English. The northern limits of the Laos tribes have not yet been fixed, but they are said to form the majority of the population as far north as the southern part of the Chinese province of Yun-nan. The hill tribes of the Chinese island of Hai-nan also speak a dialect which can be understood by the Laos of Siam. The general theory of this race is that they lived in China before the Chinese appeared, were crowded into the hills first, and so gained their name Shan (mountain), and were next crowded gradually southward, those who took the western river valleys becoming the Shans of Eastern Burma, and those who followed the eastern valleys becoming the Siamese and Cam-
bodians, the later comers becoming known to the world by the name Lao, applied to them by the Siamese. They call themselves “Tai,” which means the free.

The number of these people is variously estimated from five to ten millions. Estimate in any case is little better than a guess, since the northern regions of their domains have not been fully explored. Various hill tribes inhabiting the same regions as the Laos are often confounded with them because those of them who write use the Laos written characters. But they are not of Laos blood and their languages are entirely distinct from the Laos dialects. Of these hill tribes several are found in Siamese territory, such as the Musu, the Kamu, the Mee, the Yao, and Lwa. The first two of these hill tribes have been reached to some extent by missionaries. They are worshipers of ancestors or of spirits, and some of them are notable exceptions to the rule of laziness which governs the Laos. They also show considerable mechanical aptitude in a rude way.

In stature the Laos are rather short, averaging about five and a half feet in height. In complexion they are rather tawny, with brown eyes but black hair. In bearing they are manly, and they have considerable pride of race. The peasants are attached in feudal style to some lord, but with considerable liberty to change their relations to him at pleasure. For a reason, perhaps, the feudal lords are somewhat restrained in exacting labors from their retainers. Slavery exists to some extent among the Laos. Slaves are handed down by inheritance, or purchased, or captured in war. In their slavery, too, there is some amelioration in the fact that the slaves are often allowed to live by themselves, merely answering when called upon for service for a few days or a week at a time. The Laos treat women as equals, and upon marriage it is quite common for the husband, to leave his father and mother and join the family of his wife. They are hospitable to strangers, rather inclined to laziness, and passionately fond of gambling. A curious custom in reference to the disposition of their dead, is that the body of a deceased friend is embalmed and kept at the house for weeks and perhaps months, as is done in parts of China, and the final disposition of the body is by cremation.

Mission work among the Laos of Siam was commenced by Messrs. McIlvory and Wilson of the American Presbyterian Board (N.) in 1867. After a careful exploration of the country, they selected Cheuang Mai as the first station, and from the first marked success met them. The Laos mission of the PN is now in a very flourishing condition.

See El Araish.

LA PLATA: A town in Argentina, South America, situated 39 miles E. S. E. of Buenos Aires, and capital of the province of Buenos Aires. Population, 65,000. Station of the ME, with (1903) 3 native workers, 1 place of worship, 2 Sunday schools, and 123 professed Christians, of whom 53 are communicants.

LARACHE: See El Araish.

LARAISH: See El Araish.

LARANGEIRAS: A town in the State of Sergipe, Brazil, 19 miles W. N. W. of Aracaju; situated at the head of steam navigation on the Cotindiba River. Population, 3,000. Occupied as a station by the PN in 1884, and left in care of native workers in 1901, the missionary removing to Estancia.

LA RES: A town in Porto Rico, West Indies, situated 60 miles W. S. W. of San Juan, with a population of 17,100. Station of the American Missionary Association, with (1901) 1 missionary and his wife, 2 women missionaries, 1 Sunday school, and 1 day school.

LARNACA: A town on the S. coast of Cyprus, situated 28 miles S. E. of Nicosia. It is the chief commercial port and island and has many ruins of antiquity. It is the ancient Cilium. It is occupied by the RP (1891), with (1901) 2 missionaries and their wives, 3 native workers, 1 place of worship, 2 Sunday schools, 1 day school, 1 dispensary and 22 professed Christians.

LAS FLORES: A town in Argentina, South America, situated 165 miles S. W. of Buenos
Aires. Station of the RBMU, with (1901) 1 missionary and his wife and 1 Sunday school.

LEPAK: A village of Java, situated 50 miles S. by E. of Tjipat. It has the remains of the ancient Roman city of Laodicea ad Mare. It is the chief town of the Nusariyeh region. Population, 12,000. Station of the RP (1859), with (1901) 3 missionaries and their wives, 3 station missionaries, 14 native workers, 4 outstations, 1 place of worship, 2 Sunday schools, 1 society for young people, 1 book-room, 4 day schools, 2 boarding schools, 1 dispensary, 1 hospital, and 196 professing Christians.

LAVRAS: A town in Minas Geraes, Brazil, South America, situated in the mountain district, 200 miles N. N. E. of Santos. Climate is healthful and dry. Altitude, 2,000 feet. Population, 4,000. Station of the PS (1892), with (1903) 1 missionary and his wife, 3 women missionaries, 4 native workers, 13 outstations, 3 places of worship, 1 Sunday school, 1 boarding school, 1 printing press, and 110 Christians.

LEALUYI. See Lialuyi.

LEBAK: A village of Java, situated 50 miles S. by E. of Batavia. Station of the Netherlands Mission Society (1894), with (1901) 1 missionary, 2 native workers, 1 outstation and 1 hospital.

LEBANON: A semi-autonomous province in Syria comprising the range of mountains of the same name, with an area of 2,500 square miles. It was given a constitution by the Turkish Government, under pressure from the great powers of Europe, who intervened to stop the massacres of 1860. The Governor of the Lebanon is not removable by the Sultan, nor can any but a Christian be appointed to the post. In consequence of these arrangements it is far more prosperous and progressive than any neighboring districts of Turkey.

LEGGE, James: Born at Huntly, Aberdeen-shire, Scotland, in 1815; graduated at King’s College and University, 1835. After studying at Highbury Theological College, London, he was appointed in 1839, by the LMS, a missionary to China. He landed Malacca in December of the same year. In 1840 he took charge of the Anglo-Chinese college, founded by Dr. Morrison and Dr. Chma,, and reached Malacca in December of the same year. In 1840 he took charge of the Anglo-Chinese college, founded by Dr. Morrison and Dr. Chma,, and reached Malacca in December of the same year. In 1840 he took charge of the Anglo-Chinese college, founded by Dr. Morrison and Dr. Chma,, and reached Malacca in December of the same year. In 1840 he took charge of the Anglo-Chinese college, founded by Dr. Morrison and Dr. Chma,, and reached Malacca in December of the same year. In 1840 he took charge of the Anglo-Chinese college, founded by Dr. Morrison and Dr. Chma,, and reached Malacca in December of the same year. In 1840 he took charge of the Anglo-Chinese college, founded by Dr. Morrison and Dr. Chma,, and reached Malacca in December of the same year. In 1840 he took charge of the Anglo-Chinese college, founded by Dr. Morrison and Dr. Chma,, and reached Malacca in December of the same year.
the burning of a leper and was so impressed by the helplessness of these outcasts that he established a hospital for them at Hemel en Aarde, and the first in all India. In 1819 the Colonial Government of South Africa, fearing the spread of leprosy, erected a hospital at Henry en Aarde, and the first in all India. The British establishment by the Moravian Church, missionaries working among the Natives, to send missionaries to manage the institution and look after the spiritual as well as the material welfare of its inmates. In 1846 the establishment was removed to Robben Island, and was continued in the care of the Moravians till 1867, when the Government appointed a chaplain of the Church of England, and the Moravians withdrew.

As early as 1840 provision for lepers was made at Almora, India, through the efforts of a government official, and in 1845 the work was turned over to the CMS. In 1855 an asylum for lepers was established at Ambala, Punjab, by missionaries of the PN, again aided and largely supported by a government official. But, with the exception of the one asylum in South Africa and the mission homes in India, which leprosy is so prevalent, Asylums were established at Chamba, Rawal Pindi, Sabathu and Tarn Taran, in the Punjab; at Agra, Allahabad, Almora, Banda and Chandigarh, near Pithoragarh in the N. W. (United) Provinces; at Purulia in Bengal, at Ujjain in Central India and at Aleppo, Mangalur and Nagpur, in the south of Hindustan. The CMS established a leper settlement on the Zanzibar coast in Africa and the Norwegian Missionary society began work for lepers at two stations in Madagascar. In Jerusalem the Moravians established an asylum and home for lepers.

While the various existing missionary organizations were directly or indirectly working for lepers, the expansion of the work during this period is largely due to the formation of the society called the "Mission to Lepers in India and the East," by Mr. Wellesley C. Bailey, who, while a missionary of the American Presbyterian Church in the Punjab, as early as 1869 became much impressed with the condition of the lepers at the Ambala asylum of that mission. In 1874 he visited Great Britain and succeeded in forming a society for developing this special work. While as an organization it is independent, it cooperates with the various societies engaged in the work.

Work especially directed to lepers has greatly expanded since 1890. At that date organized effort for lepers did not exist in China, Japan, Burma and many other countries, and there were but twenty institutions for lepers in all the mission fields together. Since 1890, sixty-two asylums and homes for these afflicted people have been established, more than three times as many as in all previous years. Twenty-two prominent missionary societies are receiving aid in their work from the Mission to Lepers, which now has fifty-five stations in India, Burma and Ceylon, ten in China, two in Jutland, and thirty asylums or hospitals in these countries owned by the Mission to Lepers itself, as well as in institutions supported by private benevolent societies which are found in various parts of India. Perhaps the best known among the workers for lepers in India is Miss Mary Reed, of the American ME Mission, who contracted the disease while living among the lepers at Chandag, with no other associates than the afflicted natives, since 1890.

The first institution for lepers in Burma was opened in 1891 at Mandalay. At Singapore, a government leper colony is regularly visited by a missionary. At Lakawn, among the Laos people, the native Christians support two leper families. At Pak-hoi, in South China, in 1891 the CMS founded one of the finest institutions for lepers in the foreign field, and has since opened work for them at Hang-chau-fu, Fu-chau-fu, Kien-ning-fu, Lo-ngwong and Ku-tien-hwa-fu. In 1895 the first asylum for lepers in China was established by the LMS. The American ME Mission has a work for lepers at Haing-hwa-fu, and the Protestant Episcopal Church, U. S. A., has begun work at Nyang-king, on the Yangtze River. Work for the lepers of Japan was begun by the American Presbyterians in 1894 in a suburb of Tokio, and the CMS has a leper hospital at Kumamoto.

In Africa, besides the colony on Robben Island, the Moravian missionaries work among the lepers within the bounds of their mission north of Lake Nyasa. In the Transvaal, the Hermannsburg Mission has a work at Mosetta. The government asylum at Emmanjana, in Kaffraria, is visited by a missionary of the Scottish Episcopal Church. Another leper colony is cared for near the town of Zanzibar. In Madagascar the LMS began work for lepers in 1895, about four miles from Fianarantsoa. Manakavaly, the leper village near Toamasina built by the LMS, has been taken over by the Paris Evangelical Missionary Society.

The Norwegian Missionary Society established a station for lepers at Antalaha, Madagascar, and another at Fianarantsoa. The United Norwegian Lutheran Church of America also has a leper home and asylum in Madagascar. The French Roman Catholics have two hospitals for lepers in the island and also work for them at Fort of Spain, Trinidad, and at Mandalay.

In Hawaii a leper settlement was established by the Government at Molokai, in which work is carried on by the Hawaiian Evangelical Association and the Roman Catholics. This leper colony was the scene of the labors of Father Damien, who established the Roman Catholic Mission there in 1873, contracted the disease, and died at his post in 1889.

In the New Hebrides a leper colony has been established by the Melanesian Mission in one of the Banks Islands. The CMS began work in 1897 among the lepers of Belep Islands.

The first work for the lepers of Persia was begun by the American Presbyterians at Tabriz in 1894. In 1896 the Moravian Missionary Society established a leper asylum at Surinam, in South America. Summary (1901)—Africa: 6 asylums and settlements, with 840 inmates. Burma: 2 asylums, with 162 inmates; 1 home for untainted children,

Totals: 71 asylums in 12 different fields; 6,528 inmates; 15 homes for untaught children, with 268 inmates.

LERIBE: A village in Leribe district, in the north of Basutoland, Africa. Station of the Paris Evangelical Missionary Society (1859), with (1903) 1 missionary and his wife, 20 native workers, 12 outstations, 1 place of worship, 1 Sunday school, 13 day schools and 1,137 professed Christians, of whom 752 are communicants.

LES CAYES. See Aux CAYES.

LEVUKA: A town on the island of Ovalau, former capital of the Fiji Islands, Oceania, situated on the E. coast and surrounded by hills. Station of the Australian Wesleyan Missionary Society, with (1900) 1 missionary, 87 native workers, 30 places of worship, 103 Sunday schools, 123 day schools and 1,091 Christians. The SPC also has a station there, with 1 missionary.

LIALUI: A village in the Barotsi valley, Rhodesia, Africa, situated on a low hill, 15 miles E. of the Zambesi River, with which it is connected by a canal constructed by the Barotse chief Lewanika. Station of the Paris Evangelical Missionary Society (1892), with (1903) 2 missionaries, 2 women missionaries and 1 day school. The name is sometimes spelled Lealui.

LIANG-CHAU-FU: A town in the province of Kan-su, China, situated in a fertile plain, 180 miles from Lan-chau. The plain is often flooded by the Biwun-fai River. Altitude, 5,000 feet. Population, 20,000. Station of the CIM (1888), with (1903) 3 missionaries, 2 with their wives, and one woman missionary.

LIANG-SHAN: A town in the province of Szechuan, China, situated in the S. W. near the boundary of Yunnan, at the foot of the mountains of the same name. It is important for its deposits of a salt of lead used in the manufacture of porcelain ware. It is a station of the CMS (1902), with 1 woman missionary.

LIAO-YANG-CHAU: A town in the province of Liaotung, Manchuria, China, situated 40 miles S. S. W. of Mukden. It is a mission station of the UFS (1882), with (1903) 4 missionaries, 2 with their wives, 4 women missionaries, 37 native workers, 16 outstations, 13 Sunday schools, 5 day schools, 1 dispensary, 1 hospital, and 650 professed Christians.

LIBERIA: A republic on the coast of Western Africa, including 500 miles along the coast, with an average breadth of 100 miles, and an area of about 366,000 square miles. It lies between Sierra Leone on the west and the Ivory Coast on the east, and is bounded on the north by French Guinea. A colony of negroes from America was planted here in 1816 by an American colonization society, with the object of giving the negro a chance for self-improvement. An unfortunate selection of locality caused the failure of the attempt, as the climate was fatal. A treaty made with the native princes in 1821 secured a more healthful locality. The land was portioned out; settlements sprang up, and were named Monrovia, the capital; Caldwell, Edina; new lands were acquired; neighboring chiefs were received into the colony, and hostile chiefs were conquered, until, in 1847, Liberia was declared an independent government, with a president, senate and house of representatives. A property qualification restricts the right of suffrage, and, for the time, whites are not allowed citizenship. Great Britain and other European powers recognized the republic. The original plan of the colony has not been fully carried out, since it draws its people more from the surrounding districts and native tribes than from the emancipated negroes in North America. In 1880 the kingdom of Medina, a rich and populous country, was annexed.

The people are estimated at 2,000,000, of whom 60,000 speak the English language. Sugar is the principal product of agriculture, the farming of all kinds is conducted with results in crops of cocoa, coffee, cotton, and rice. Trade is in gold-dust, ivory, palm-oil, coffee, and other products, but is badly managed and languishes.

The inhabitants are the seafaring Kroos, between Cape Palmas and the Sinu River, the Bassas, the Barlins, south of the St. Paul; the Mandingan Veis, agriculturists; the fierce Golas, dwelling along the western affluents of the St. Paul; the war-like Pussis and Bussis; and, in the uplands of the interior, the powerful Mandingans. The Protestant faith prevails along the coast. The PE, the ME, the ELGS, and the African Methodist Episcopal Church all have missions in Liberia.

Stockwell (G. S.), The Republic of Liberia, New York, 1868; Blyden (E. W.), A Chapter in the History of Liberia, Free-town, 1892.

LIEU-CHAU-FU: A town in the N. part of the province of Kwang-ting, China, situated about 130 miles N. W. of Canton. Station of the PN (1891), with (1903) 3 missionaries, 2 with their wives; 1 woman missionary, 7 native workers, 3 outstations, 4 places of worship, 3 Sunday schools, 6 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 207 professed Christians. The name is sometimes spelled Lieu Chow.

LIFU: The largest of the Loyalty Islands, Oceania. Station of the LMS (1843), with (1903) 1 missionary and his wife, 216 native workers, 28 Sunday schools, 1 boarding school, and 3,855 professed Christians, of whom 2,027 are communicants.

LIJENBURG. See LYDENBURG.

LIKHOELÉ: A village in Basutoland, Africa, situated about 18 miles S. E. of Hebron. Station of the Paris Evangelical Missionary Society (1880), with (1903) 1 missionary and his wife, 23 native workers, 7 outstations, 1 chapel, 1 Sunday school, 8 day schools, 1 dispensary, 1,362 professed Christians, of whom 813 are communicants.

LIKOMA ISLAND: An island 5 miles long in Lake Nyassa, Africa. It is the headquarters of
the UM, with 5 missionaries, 4 women missionaries, 7 native workers, 3 outstations, 1 chapel, 5 day schools, 2 boarding schools, 1 theological class, 1 dispensary, 1 hospital, 1 printing press, and 397 professed Christians, of whom 415 are communicants.

LI-LONG: A town in the province of Kwang-tung, China, about 75 miles S.E. of Canton, on Mrs Bay. Station of the Basel Missionary Society (1852), with (1903) 3 missionaries, 2 with their wives; 9 native workers; 3 outstations, 1 theological class, 1 boarding school, and 397 professed Christians, of whom 229 are communicants.

LIMA: The capital of Peru, South America, situated in a valley 6 miles from Callao. It was founded in 1535 by Pizarro as the capital of the viceroyalty, and is the most handsome city in South America, with many modern buildings. Large manufactures of glass and gold laces. Its climate is pleasant, but not healthful, owing in part to bad sanitation. There is little or no rain, but dews and fogs are abundant in winter. It has an altitude of 505 feet, and a population of (1901) 103,000 people. Station of the ME (1891), with (1900) 1 missionary and his wife and 1 woman missionary.

LIMAO: A settlement in Bechuanaland, Rhodesia, Africa, situated about 10 miles W. of the railroad station of Ramoutsa. Station of the Hermannsburg Missionary Society (1864), with (1903) 1 missionary and his wife, 2 native workers, 1 outpost, 1 chapel, and 2 day schools.

LIMON: A town and seaport on the E. coast of Costa Rica, Central America, situated about 80 miles E. of San Jose. Station of the Jamaica Baptist Mission Society (1888), with (1901) 4 missionaries, 3 with their wives; 7 outstations, 7 chapels, 6 Sunday schools, and 367 Christians. These statistics include Ebeneser or Porvenir. The Western Missionaries, Wesleyan Methodists, have there (1901) 1 missionary and his wife, 22 native workers, 5 outstations, 6 places of worship, 1 Sunday school, 1 Young People's Society, 1 day school, 1 temperance society, and 281 Christians. Name is also written Port Limon.

LINARES: A town in Nuevo Leon, Mexico, situated 96 miles S. of Monterrey. Population, 10,000. Station of the FS (1887), with 1 missionary and his wife, 1 native worker, and 2 day schools.

LIN-CHING: See LIN-TSING-CHAU.

LINDLEY, Daniel: Born August 24, 1801, in Washington County, Penn.; graduated at Ohio University and Union Theological Seminary, Va., in 1829. He preached three years in Charlotte, N. C., and, in 1834, was appointed missionary to Africa by the ABCFM. The disturbed state of the country made Mr. Lindley's first few years in Africa exceedingly dangerous and wearing. At length, in 1839, he established himself at Durban (then called Port Natal), and labored among the Zulus for thirty-five years. He not only preached to the Zulus, but also at the Cape of Good Hope, and in the interior. At the Cape, he showed the native Christians who wished to improve their modes of life how to make brick, build houses, construct implements and furniture. He often defended the people with his rifle from the attacks of wild beasts, and in sickness ministered to them. In 1846 five commissioners were appointed by the Colonial Government to allot lands to the natives and to encourage them to industry. Mr. Lindley was one of these commissioners. He was always greatly honored and loved by the Zulus. The proverbial saying of the Dutch Boers used to savor him as "If there be a name that warms the heart of a Natal Teck Boer, it is the ever-to-be-remembered name of Daniel Lindley." He returned home in ill-health in 1874, and died at Morristown, N. J., September 3, 1880.

LIN-KIANG-FU: A town in the province of Kiang-si, China, situated 195 miles S. S. E. of Han-kau. Station of the CIM (1898), with (1903) 1 missionary and 1 chapel.

LINOKANA: A village in the Marico District of the Transvaal, Africa, situated 15 miles N. of Zeerust. Station of the Hermannsburg Missionary Society (1859), with 1 missionary and his wife, 1 native worker, 2 outstations, 1 place of worship, 2 day schools and 1,113 professed Christians.

LIN-TSING-CHAU: A town in Shan-tung, China, situated on the W. border of the province, on the Wei-ho River, about 75 miles W. of Tsin-man-fu. Station of the ABMU. Although the mission work was broken up by the Boxer outbreak it is now (1902) being reorganized and carried on with 2 missionaries, 1 with his wife; 10 native workers, 5 outstations, 5 places of worship, 5 Sunday schools, 1 day school, and 60 Christians. The name is sometimes spelled Lin-ching.

LIQUOR TRAFFIC AND MISSIONS: It is an axiom in physics that without the application of force water will not rise higher than its source. In the light of this truth a glance at the use of ardent spirits in some Christian lands may show us what to expect in their commerce with heathen tribes. Belgium is a fair specimen of a papal country, and there 70,000,000 litres—a litre = 2.113 pints—are consumed annually. Every year her 6,000,000 of population spend eight times as much for liquor as for public instruction, and the amount that is drunk continually increases. The net revenue from the excise in Great Britain in 1902 was £231,597,962, all but £674,465 of it from the manufacture and sale of liquor.

Such figures prepare us for dark pages in the records of commerce with heathen, and we are not disappointed; the reality even exceeds the expectation. In 1887, 150,000 gallons were imported from Christian lands into Sierra Leone alone, and into the neighboring district of Lagos 1,231,302 gallons were sent annually. Rev. W. Allan states that the Niger Company imported 220,000 gallons in two years, and 500,000 gallons went with him in the ship Caliban from Liverpool. The Hon. and Rev. James Johnson, a native member of the government, who has labored there for eighteen years, states that packages of gin and rum were found everywhere. Large steamers loaded with liquor lay at anchor; warehouses were crammed with the article to the very doors; canoes were heavily laden with it; streets and lanes, both near and far, were littered with demijohns. The very soil of Abokuta seemed composed of broken bottles; and at Afarjupa, forty miles inland, the seats in the church were empty gin-boxes. The traders at Bonny complain that there is no good train on the shelf, and the only demand is for rum and
gin, which is sold for four and even threepence per bottle. Such prices seem fabulously cheap, and these prices are enough to be envied. One who had himself seen the state of things may say this is the testimony of missionaries; yes, and in it they are unanimous. Christ-like love for men neither disqualifies to see nor to describe the truth; but we are not confined to missionary testimony. Mr. Burton states: "It is my sincere belief that if the slave trade were revived with all its horrors and Africa could get rid of the white man with his derber and rum, she would be a gainer by the exchange." This is strong testimony from one who had himself seen the state of things which he thus describes. One of these runners, without intending it or perhaps even being aware of his damaging concessions, has turned State's evidence. Mr. Betts, a leading merchant of Sierra Leone, tells his story: "The liquor traffic destroys body and soul. It is a greater evil than the slave trade. I am myself a large dealer in spirits. I have on the road now thousands of gallons of rum, and several thousand demijohns of gin. I am by no means insensible to the evil this traffic does to these lands and commerce itself. And I regret it much. They have become slaves to the white man's rum. Rum and gin is their incessant cry."

The Rev. J. Johnson, already quoted, styles this "a criminal trade," and calls upon his people to protest with all their might against this deadly traffic of Europe with Africa. Let the guilt of ruining our land for gain be the guilt of strangers only, if they persist in their un-Christian course, and all good people in Christian lands say Amen. Again he says: "There has been no peace in Africa for centuries, but this drink traffic makes it worse. Negroes have survived the evils of the slave trade, cruel as they were, but they cannot withstand the terrible evils of the drink. If they go on, the extinction of the negro is a question of time."

Malike, King of Nupé, wrote thus to Bishop Crowther: "Liquor has ruined our country. It has made our people insane. I favor all trade, except in liquor. We implore Crowther, the great Christian minister, to beg the great Priests (the Church Missionary Society Committee) to beseech the Queen of England to keep liquor out of this land. Let him help us in this for God's sake. He must not let our country be destroyed." This evil is not confined to Western Africa, nor is the native opposition to it limited to that region. The Sultan of Zanzibar has forbidden the traffic; but he has no power to control Europeans, who are the leaders in this wrong, and so his own people are being demoralized in spite of all his efforts.

The natives of the diamond-fields in South Africa implored the Cape parliament to have the saloons removed from among them; but the petition was refused. The market for British spirits is not to be interfered with, whatever misery it brought to the natives. Mr. W. S. Caine, M.P., while traveling in Egypt, found more than 400 saloons in Cairo with English names and English placards, setting forth the excellence of their wares, and heard an Egyptian speaker denounce in a large meeting the foreigners who introduced the traffic into his country.

Rev. W. Allan conversed with some of the owners of two lines of steamships to Western Africa, and they not only did not deny his statements, but informed him that the whole of their cargoes which they took out from Hamburg and Rotterdam consisted of nothing but rum and gin. He had heard this on the coast, and now it was confirmed at headquarters. The Secretary of the Hamburg Chamber of Commerce, in reply to a letter from Rev. Mr. Lang of the Church Missionary Society, says: "Merchants here interested in the African trade are of the opinion that measures for limiting this traffic (in liquors) are injurious to the development of trade in these countries, and that the importation of liquors as carried on at present has no injurious effect upon
Liquor Traffic

Literature

The Encyclopedia of Missions

the natives." We can understand the first part of this, but how to reconcile the closing sentence with truth, in the light of the testimony of Mr. Betta, through whose hands a part of these same liquors passed in Africa, is beyond our power.

Khami, the Bechuana chief, voices the sentiments of the Africans themselves when he says: "I fear Lo Bengula less than I fear brandy. I fought with Lo Bengula, and drove him back, and he never came again, and God, who helped me, would help me again. Lo Bengula never gives me a sleepless night, but to fight against drink is to fight against demons and not men. I dread the white man's drink more than all the assegais of the Matabele, which kill men's bodies, and it is quickly over, but drink puts devils into men and destroys both their souls and bodies forever; its wounds never heal." And for this reason he forbade European drinkers to live in his land.

So far our view has been confined to Africa, but the deadly fruits of this traffic are not peculiar to Africa. India also suffers, and that, too, worse classes, so that, tho the people were almost bodies, and it is quickly over, but drink puts devils into men and destroys both their souls and bodies forever; its wounds never heal." And for this reason he forbade European drinkers to live in his land.

So far our view has been confined to Africa, but the deadly fruits of this traffic are not peculiar to Africa. India also suffers, and that, too, worse classes, so that, tho the people were almost bodies, and it is quickly over, but drink puts devils into men and destroys both their souls and bodies forever; its wounds never heal." And for this reason he forbade European drinkers to live in his land.

So far our view has been confined to Africa, but the deadly fruits of this traffic are not peculiar to Africa. India also suffers, and that, too, worse classes, so that, tho the people were almost bodies, and it is quickly over, but drink puts devils into men and destroys both their souls and bodies forever; its wounds never heal." And for this reason he forbade European drinkers to live in his land.

1708, as one of his first discoveries, "Great progress in Christianity cannot be expected until the non-Christian finds the Word of God in their tongue." So Ziegenbalg straightforwardly fell to work—upon translating the Bible? No; before he began his translation of the New Testament he prepared a Tamil primer and grammar and dictionary. For such work no funds had been provided, and the missionary had much ado to collect the money, part from merchants in India and part from European scientists who could appreciate such an addition to their apparatus for linguistic study. Henry Nott of Tahiti, plain, uneducated mechanic as he was, became the one mighty man in that first band of English missionaries to the South Seas, because he alone saw the place which literature must take at the very foundation of all stages of missionary success. His message reached a whole nation because of a little tract in his own tongue. Dr. Elias Riggs of Turkey was preeminently a Bible translator. Yet among his earliest, as well as his most important, works were primers and catechisms and hymns. As lately as one hundred years ago missionaries in China unitedly pled for general Christian literature to be allowed a place by the side of the Bible, urging the Bible Societies to permit colporteurs to distribute tracts and religious books as well as the Bible, and repeatedly begging that the Bible be printed with notes here and there books for the heathen practices which they inculcate. The same is true of the woman evangelist. A woman visits people in their houses. She leaves literature for multiplying his means of expression to the people, who throng the dispensary or lie long days in the hospital. Such an invention is found in the text-cards, leaflets and printed sheet together the child becomes a messenger of the Cross to a fortress garrisoned by superstition against any direct approach of the missionary. In Uganda this office of literature in evangelization used to be fully understood. The phrase by which the mission had rejected the invitation of the Gospel used to be: "No, I do not wish to become a reader." To read was to commit oneself to respect the message of the missionary. Hence, to be a "reader" used to be the earliest mark of a follower of Jesus. It is safe to say that it is because of the free use of the press in that field that the Uganda church is now a type of the power of the Gospel, for, within one single generation from ferocious savagery, it is taking its little books and evangelizing all adjoining regions.

In the Arctic regions of our own continent, the Eskimos of Blacklead Island in Cumberland Sound have realized, perhaps quite as clearly as we, the effect of the printing press in multiplying preachers, for after having grasped the fact that thought can be conveyed through written words they said, "Letters are as good as men, because they, too, can speak."

The fundamental importance of literature to the educational work of missions is particularly hard to be realized in lands where books seem to grow of themselves like the fruit in an apple orchard. In Christian lands the chief task seems to be to teach children to read books. In non-Christian countries the task of the missionary is to teach the children to read and also to make the reading sheets and the primers and many others of the books used in the school; for there books for the young either do not exist or they are as much to be shunned and dreaded as the heathen practices which they inculcate. Let us look beyond the region of school books, however. After the people have been taught to read, what are they going to read? Those who leave the schools in the early part of the course, where their work has been largely that of the memory, ought to have books which it is worth while to remember. Those who have stayed in school long enough to gain some training in the comparison of facts, need to have books which contain facts. But on the mission field, if literature exists, it is saturated with superstition, vice and the foolish science of the Dark Ages. If it does not exist, to those who leave school at twelve or fourteen years of age the world is almost a blank so far as stimulus to further growth is concerned. Men in Christian lands rely upon the library to be high school, college and university to the half-educated part of the community and even to act as an auxiliary force for the mental, moral and spiritual nurture of the families of the educated. But on the mission field, where there are no libraries for the common people, and books that will foster development can come from mission presses only, until the growth of the Christian community shall have made native Christian publishing houses possible.

Such a situation compels us at this point to face the question of the completeness of our plans for forwarding the enterprise of missions. Let us not baulk the great work that has been spent for the production of books by the various societies directly or indirectly missionary in aim. The total number of missionary printing houses
found in strictly non-Christian lands is 122. These are distributed as follows:

- Angola, W. Africa ........................................ 2
- Arabia .................................................................. 1
- Basutoland ........................................................... 2
- Cape Colony, Africa ............................................. 3
- British East Africa .............................................. 3
- China .................................................................... 22
- Congo Free State .................................................. 5
- Eritrea, Africa ....................................................... 1
- German East Africa .............................................. 2
- India and Ceylon .................................................. 45
- Japan and Formosa ............................................... 2
- Korea .................................................................... 2
- Liberia, W. Africa ................................................. 2
- Madagascar ........................................................... 4
- Nigeria, W. Africa ................................................. 3
- Nyasaland, Central Africa ...................................... 3
- Oceania .................................................................. 8
- Persia .................................................................... 2
- Portuguese East Africa ........................................... 1
- Siam ...................................................................... 2
- Singapore .............................................................. 1
- Turkey (including Syria and Bulgaria) ....................... 1
- Uganda ................................................................... 1

The power for good of these printing establishments is incalculable. It is well, however, to note in passing that they do not fill the need, first, for lack of proper equipment, not more than thirty of them being on a scale that would entitle them to the name of printing house in civilized lands; second, because a number of them were opened in a period when the necessity for cooperation in such matters was not understood, and some of the best equipped offices crowd each other while populous regions are without means of publication; thus of the 22 mission presses in China 14 are concentrated in four provinces; of the 45 printing establishments in India seven are in the United Provinces, and the four presses in Madagascar are all in one city. In the third place, the inability of these 122 presses to meet the need of the non-Christian field is because of the vast number of different languages which have to be dealt with. Missionaries are at work in somewhat over 300 languages, and altho some thirty of the missionary printing establishments are on a scale that permits printing in several languages, one cannot pretend that these can meet the needs of the vast field of the world.

As matters are at present, the lonely worker in the mission field, weighed down by the knowledge that multitudes are not reached by his voice, longing to use the press as a means by which a few can sway the thoughts of masses of men, is eating out his heart in helplessness because the necessary means of expression are grudgingly supplied. The case offers special justification for the proposal of a witty friend of missions for the formation of a Society for the Prevention of Cruelty to Missionaries.

Some desirable things which ought to be done to improve the literary department of the missionary enterprise: (1) For missionary societies to select and set apart qualified missionaries, men and women, for literary work. (2) To increase the number and especially to improve the quality of the periodicals published in native languages by missionaries on the field. These periodicals have considerable influence in non-Christian lands. There are now about three hundred such periodical publications, varying in importance from the Sunday school lesson-paper, and the children's illustrated paper, to the family weekly newspaper and the monthly magazine. Improvement in the quality of these periodicals is of very great importance for the increase of their influence. (3) Plans should be made in a large way for the development of a permanent Christian literature in all non-Christian lands. For this purpose discussion of the needs and the possibility of the literary department should be a permanent feature in the programs of interdenominational conferences of missionary societies or of missionaries. Much can be accomplished by a wise cooperation between existing presses.

The task of providing books for masses of people is not so stupendous as it appears, since one powerful and good book in a land where a living literature does not exist is equal in point of influence to a hundred good books in the lands where each competes with multitudes of others for a hearing. The most sanguine optimist cannot, however, claim that provision will be made enabling mission presses to publish works for the nurture of communities already evangelized and seeking growth. The expenditure of great sums for the maintenance of schools and colleges is an accepted feature of the scheme of missions. But many a missionary revolt against teaching people to read when he must drop them, as they leave the school house door, into the morasses of doubt and corruption gladly made ready for them by non-Christian and anti-Christian writers.

Another unsupplied need which springs to light in this connection is the need to train and bring forward native writers to be the spokesmen of the native Christian element in each nation. Such writers cannot be developed in non-Christian lands until the missions have funds for encouraging their efforts and fostering the creation of an indigenous Christian literature. Until the missions receive a mandate from the homeland to engage seriously in literary work in non-Christian lands, Christendom will look in vain for Eastern scholars to appear who can stand forth as champions of Christ against the men in the guise of Eastern sages who already wait by the doors of our churches to rehash for us at home ideas and arguments furnished to the men of the East by Western rationalists.

Another point of serious gravity in this situation is that Christianity should take a commanding position in the revival of literature, already begun in Japan and rapidly approaching in India, China and the Mohammedan countries. One century ago representatives of Western nations in all heathen lands confronted despotic rulers, whose bearing toward Christians and Christendom was the arrogance of unassailable might. Before the end of the century the sceptre of world-sovereignty passed to Christendom, and now every non-Christian ruler throughout the world is dependent upon the tolerance of Christian nations for the privilege of maintaining a semblance of power. To the Christian there is solemn meaning in this change of the centers of domination. But has this change not been used by the Almighty to bring the educated Hindu and Chinese and Japanese and Turkish men and Persians under comparable conditions to examine the case? Never before have missionaries in those lands stood upon the vantage ground of rank as repre-
sentatives of the world’s progress. If they are
given means to publish, then by virtue of intellect-
ual superiority they can hold the position of influence
while they clearly set forth the causes which have lifted Christian peoples
to supremacy. If supplied with funds in time,
missionaries in all these lands can take leadership
in the approaching revival of literature, injecting
into the thought of many lands a strong Christian
element with all that this means of gain to the
people in justness of vision and elevation of
national ideals. At such a time, as Edwin
Greaves of Benares has said, “what we need is not
writers of Christian books, but Christian writers
of books.”

It is true that as at present supported the
missionary societies cannot assume the expense
of book publication to the extent demanded by
the requirements of the growing opportunity
during years which must elapse before the people
of the various fields can fully sustain the Chris-
tian publishing enterprise. But some solution of
the problem of providing literature essential to
the full success of missionary effort should be
diligently and strenuously sought by all bodies
to which belong the discussion and improvement
of mission methods. Some steps should be
taken of common accord, also, to bring before the
almoners of great wealth at home the fact that
in non-Christian lands books do not grow, but
for some time to come must be painfully provided
by the beneficence of those who appreciate their
permanent and penetrating and vitalizing power.

LITTIZ: A mission station in the S. part of
the island of Jamaica, West Indies, situated
about 7 miles W. N. W. of New Brompton.
Station of the Moravian Mission Society (1839),
with (1900) 1 missionary and his wife, 47 native
workers, 1 outstation, 2 places of worship, 2
Sunday schools, 2 day schools, and 602 pro-
fessed Christians.

LITTLE-POPO: A village of Togoland, Africa,
situated 10 miles E. of Porto Seguro. It has
a strong Roman Catholic mission. Station of the
WMS, with (1903) 1 missionary, 14 native worker-
s, 11 outstations, 11 places of worship, 7 Sun-
day schools, 6 day schools, and 667 professed
Christians; 208 white, 317 negro, and 238, are of
communicants. The German official name is Klein
Popo.

LIU-HO-ISIEN: A town in the W. part of
the province of Kiang-su, China, situated about
20 miles N. of Nan-king. Station of the AFFM
(1898), with (1901) 1 missionary and his wife, 1
woman missionary, 4 native workers, and 1 Sun-
day school. Name is sometimes written Liu-
hoh.

LIU-NGAN-CHAU: A town in the province of
Ngan-hwei, China, situated 48 miles W. of
Lo-chau. Station of the CIM (1890), with (1903)
1 missionary and his wife. The name is some-
times written Lo-gan.

LIVERPOOL (Africa). See LUKOLELA.

LIVINGSTONE, David: Born in Durnyre,
Scotland, March 19, 1813. Died May 1, 1873.
His parents were religious, and he was early
impressed with the noble life of Jesus spent in
healing the body and instructing the ignorant.
At ten, part of his first week’s wages as “picker
boy” between Lo and Luachs a strong Chris-
tian. His evening hours, often from 8 o’clock till midnight,
were spent in the study of Latin, Greek, botany,
and geology. At nineteen he resolved to be a
medical missionary. By “plain living” and
“high thinking,” working as a spinner in the
summer and studying in Glasgow in the winter,
meanwhile “picking up all the useful branches of
learning and other useful trades as possible,” he prepared
himself for his future life. After his acceptance as a
missionary by the LMS in 1838, he studied the-
ology, medicine, and science for two years in
London, took his medical degree in the Faculty
of Physicians and Surgeons in Edinburgh, and sailed
December 8, 1840, for Cape Town; thence pro-
ceeded to Kuruman, the station of Moffat and
Hamilton. For two years he traversed the
Bechuana country, visiting the Bakwains and
other tribes. In 1843 he selected Makotas for a
mission station. Here a lion crushed his arm,
and nearly put an end to his life. A fearful
drought compelled Livingstone to seek a more
favorable region, and the whole tribe followed him
to Kolobeng. While there he visited the Doers.
They regarded himself as the “white man” and
the natives, whom they looked upon as
“black property,” and resisted every attempt to
found a mission near their settlements. The
river at Kolobeng, which had yielded him water
for irrigation, and gradually failed, and in the third
year disappeared. Livingstone had heard of
“a great lake,” surrounded by a manly tribe,
rulled by Sebituane, a powerful chief, friendly to
strangers. There he hoped to find a place for
future labors. Accompanied by Oswald and
Murray, English travelers, he crossed the Kali-
hi Desert, and on August 1, 1849, he sighted
Lake Ngami, but failed to reach Sebituane through
the jealousy of a chief who refused to transport
him across the Zonga River. A second attempt
failed owing to the illness of his children. A
third, with his family and Sechele, was successful.
In June, 1851, Livingstone reached the Zambesi
River at Sekeheke E. of latitude 25°. This was an
important geographical discovery, as it had
been supposed to rise much further east. His
family, having suffered greatly from illness, he
decided to send them to England for two years,
himself explore the country in search of a healthful
center for mission work, also to trace the Zambesi
to its source and to the coast. On May 23, 1853,
he reached Linyanti, on the Chobe, capital
of the Makololo, was cordially received by Seke-
letu, Sebituane’s son and successor, and re-
mained for some months, “preaching the Gospel
and healing diseases.” He proceeded, November
11, tracing the course of the Zambesi and its
affluents, the Leebah, to its source in Lake
Dilolo. On this hazardous expedition he took
twenty-seven men provided by Sekeletu, partly
in the hope of opening up a trade-route between
their own country and the coast. They suffered
from extreme hunger and thirst, disease, carrier
fevers, attacks of wild beasts, robbers, and hostile
tribes. Proceeding from Lake Dilolo, he arrived,
May 31, 1854, at St. Paul de Loanda, capital of
Angola, on the west coast.

In great physical prostration and mental
depression by disease, hunger and thirst, he was
kindly received by the British Commissioner.
The Portuguese merchants and officials also were
most hospitable and courteous. From this place
he sent his astronomical observations to Maclear,
royal astronomer at the Cape, and an account of
his journey to the Royal Geographical Society of
England, which awarded him its highest honor,
the gold medal. Maclear, speaking of the num-
ber and accuracy of his astronomical and geo-
graphical observations, says: "You could go to any point across the entire continent, along Livingston's track, and feel certain of your position." After returning from his travels the atrocities of the internal slave-trade had so revealed themselves to him, and the obstacles it presented to mission work in Central Africa so impressed him, that the question of its suppression became "the uppermost idea in his mind." Hitherto his explorations had aimed solely at opening fields for mission work; thenceforth they sought to open up the country to legitimate and productive commerce as a means of superseding the destructive slave and inhuman traffic in flesh and blood. His motive appears in these words: "The opening of the new central country is a matter for congratulation only so far as it opens up a prospect for the elevation of the inhabitants. I view the geographical exploration as the beginning of the missionary enterprise. I include in the latter term everything in the way of effort for the amelioration of our race."

Having severed his connection with the LMS, he returned in 1856, appointed British consul for Eastern Africa, and the districts of the interior, and also leader of an expedition for exploring Eastern and Central Africa. He was accompanied by his brother Charles, Dr. John Kirk, and others. At Cape Town he was accorded a reception by the people and authorities of the Colony, the Governor presenting him with 800 guineas in a silver casket, as a testimonial to the value of his services. Most of the year was spent by the party in exploring the Shire River and making the discovery of Lake Shirwa, April 18, and Lake Nyasa, September 16, 1859. Around the latter the missionary found the slave-trade rampant, "desolating the country and paralyzing all effort." Returning to Tete in 1860, he fulfilled his pledge made three years before to his Archdeacon MacKenzie of Natal, consecrated bishop for the mission in 1861, and the mission was settled at Magomero. In July, 1862, the bishop died from exposure and fatigue.

In the new iron steamer, the "Lady Nyasa," the explorers steamed up the Shiré; but before it could be carried over the cataracts his brother and Dr. Kirk were obliged by sickness to return home. He resolved to continue the explorations alone. An order from home recalling the expedition, he set sail for Zanzibar in 1864 in the "Lady Nyasa." Needing funds and desiring to sell the vessel building the book of his history, he manned the little craft with nine natives, English and Europeans, himself navigating her to Bombay, which he reached after an adventurous voyage of a month. Thence he embarked for England. He published The Zambesi and Its Tributaries. When urged by Sir Roderick Murchison to relinquish the missionary work and attend only to discovery, he wrote: "I would not consent to go simply as a geographer, but as a missionary, and to do geography by the way." In this spirit he accepted the commission of the Geographical Society to ascertain "the watershed of South Central Africa," to "determine whether the ultimate sources of the Nile" were "among the hills or lakes" south of the point where Speke and Grant saw that river flowing from the Victoria Nyanza, and also to "settle the relation of the Nyasa with the Tanganika." And also to prove to the London Missionary Society that the question of its suppression became "the uppermost idea in his mind." Hitherto his explorations had aimed solely at opening fields for mission work; thenceforth they sought to open up the country to legitimate and productive commerce as a means of superseding the destructive slave and inhuman traffic in flesh and blood. His motive appears in these words: "The opening of the new central country is a matter for congratulation only so far as it opens up a prospect for the elevation of the inhabitants. I view the geographical exploration as the beginning of the missionary enterprise. I include in the latter term everything in the way of effort for the amelioration of our race."

In July, 1862, the bishop died from exposure and fatigue.
Nyangwe, “a ruckle of bones,” as he said, to Ujiji, 600 miles, which he reached October 25, only to find that the rascal who had charge of his stores had stolen and used them all. While Livingston was making this journey under compulsion to Ujiji from the western extremity of his explorations, Henry M. Stanley, the traveling correspondent of the New York Herald, sent from America by Mr. James Gordon Bennett to find and relieve him, was urging his way from the east coast in search of him, and reached Ujiji five days later than Livingston. Not in vain his extreme solicitude for the man who had taken him under his protection; for it was not until he reached Ujiji that, the means having been provided, Livingstone was enabled to send word by Stanley to his friends and to the press at home. "I commit myself to the Almighty Disposer of events." He and Stanley together visited the north end of the lake, and settled in the negative the long disputed question whether the Tanganyika was connected with either the Victoria Nyanza or the Albert Nyanza. At the end of the year 1871 they journeyed together to Unyamwezi, where Stanley had left stores brought for Livingstone. Here they parted March 15, 1872, Stanley bearing with him the precious journal of six years, which “contained a wealth of information and peoples hitherto unexplored and unknown,” and Livingstone, with renewed health and spirits, ready to pursue his work on the arrival of reliable men from Stanley. He started, August 25, 1872, to make another exploration of the Chambezi system. To Mr. Motolwe he writes: “I set out on this journey with a strong presentiment that I shall never finish it.” He was most of the time wading through “sponges” and wet with torrents of rain. Dysentery in aggravated form renewed its exhausting attacks, and his constitution could no longer withstand it. He had to be carried in a litter, by turns suffering excruciating pain and for hours insensible or fainting from loss of blood. Still he would at times ask regarding distant hills, or of the rivers crossed, whence they came and where they went. Approaching Mala, on the south shore of Lake Bangweulu, men were sent in advance to build a hut for him, and he was laid upon his bed of sticks and grass. Next morning Chief Chitambo called, but he was too ill to talk. At about 1 a.m., May 1, he asked Susi for his medicine-chest. Selecting the calomel and asking for water, he added: “All right, you may go out now.” Before dawn the boy, who slept within the hut to be ready at his call, found him kneeling by the bed, his head buried in his hands upon the pillow. The spirit had departed. His faithful men, after embalming the body as well as they could, wrapped it in calico and barks, and carried it, with all his papers, instruments, etc., a year’s journey to Zanzibar. On April 15, 1874, accompanied by Susi and Chuma, it arrived in England, and was deposited in Westminster Abbey, the arm which had been crushed by the lion being a means of his identification. His journals kept during these last seven years’ explorations were published in 1874 under the title of The Last Journals of David Livingstone in Central Africa. (2 vols.)

LIVINGSTONIA: A settlement in Nyasaland, British Central Africa. Station of the UFS (1875), with (1903) 12 missionaries, 3 with their wives and 9 women missionaries; 32 native workers, 1 chapel, and 87 professed Christians. The station was originally opened at the S. end of the Lake, was abandoned in 1883 for Bandawe on the W. shore, and later removed to Kondowi, nearly 100 miles N. of Bandawe.

LOANZA: A settlement on the W. shore of Lake Mweri, in the southern part of Congo Free State, Africa. Station of the PB (1900), with 2 missionaries and 2 missionary women. The name is sometimes written Luanza.

LOBETHAL: A settlement in Kamerun, Africa, situated about 20 miles W. S. W. of Eda Falls. Station of the Basel Mission Society (1892), with (1903) 3 missionaries, 1 with his wife, 17 native workers, 21 outstations, 21 day schools, 1 boarding school and 962 professed Christians, of whom 824 are communicants.

LOBETHAL: A town in the Transvaal, East South Africa, northwest of Leydensburg. Station of the Berlin Mission Society (1877), with (1903) 1 missionary, 14 native workers, 8 outstations, and 634 professed Christians, of whom 345 are communicants.

LOEWENTHAL, Isidor: Born in Posen, Prussian Poland, 1829, of Jewish parents; died at Peshawur in 1864. At an early age he showed great aptitude for language and philology. In 1851 he became a Christian, and in 1852 entered the Theological Seminary at Princeton, taking high rank in philology and writing important articles for the Biblical Repository. He was tutor in Princeton College in 1855; ordained by the Presbytery of New York as an evangelist, and sailed in 1856 as a missionary of the Presbyterian Board for Northern India. He acquired a knowledge of Persian, Arabic, Kashmiri, Hindustani, and the Pushto, the language of the Afghans. He could speak Persian fluently. He completed a translation of the New Testament into the Pushto, which is now in circulation among the Afghans. He was shot one evening in 1864 in his own garden by his watchman, a Sikh, who alleged that he mistook Dr. Loewenthal for a robber. He had nearly completed a dictionary of the Pushto language, and left a collection of Pushto works in manuscript.

LOFTCHA: A town in Bulgaria, 20 miles south of Plevna, 80 miles northeast of Sofia. Climate, foggy, damp. Population, 7,020. Station of the ME (1857), with (1903) 4 women missionaries, 19 native workers, 3 outstations, 4 chapels, 6 Sunday schools, 1 boarding school, and 189 professed Christians, of whom 60 are communicants.

LOHARA: A village in the Central Provinces of India, situated near the E. border of Rewa, and about 65 miles N. by W. of Bilsapur. It is a mission station of the PB (1900), with 3 missionaries, 2 with their wives; 1 woman missionary, 2 native workers, 1 Sunday school, 1 industrial school, and 1 orphanage.

LOHARDAGA: A town in the Chota Nagpur district of Bengal, India, situated 155 miles S. by W. of Patna. Population, 7,100. Station of the Gosmer Mission Society, with (1893) 1 woman missionary, 1 with his wife; 55 native workers, 27 places of worship, 10 Sunday schools, and 4,137 professed Christians, of whom 2,029 are communicants. There is also a leper asylum, a home for incurables, 1 orphanage, and 1 dispensary. The Mission to Lepers in India has 1 chapel and 1 home for untainted children of lepers. The name is also written Lohardugga.
LOIKAW: A village in Burma, British India, situated about 100 miles N. E. of Taung-u. The people are Karens. Station of the ABMU (1899), with (1903) 3 missionaries and their wives, 26 native workers, 19 outstations, 20 chapels, 14 day schools, 1 boarding school, 1 dispensary and 3,468 professed Christians, of whom 132 are communicants.

LOKOJA: A town in the district of Gando, Nigeria, W. Africa, situated on the right bank of the Niger, above the confluence with the Benue. It was occupied by the British in 1865, and a strong force of troops is kept there now. The climate is less unhealthy than at the mouth of the Niger. The CMS has a mission station there (1853), with (1903) 2 missionaries, 1 with his wife; 2 native workers, 1 outstation, 1 chapel, 1 day school, and 179 professed Christians, of whom 27 are communicants.

LO-KONG: A village in the highlands of the province of Kwang-tung, China, situated near Hsin-ning-hsien. Station of the Basel Mission (1871), with (1903) 2 missionaries, 7 native workers, 2 day schools, and 287 professed Christians.

LOLODORF: A village in the Ngumba district of the Kamerun, Africa, and German official headquarters, situated 90 miles N. E. of Great Batanga. It is on the Government road to the interior and is a station of the PN (1897), with 2 missionaries and their wives, 1 place of worship, 1 boarding school, and 1 dispensary.

LOLOMBOLI: A settlement about 5 miles from Strombo, on the S. W. coast of the island of Nias, Dutch E. Indies. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 1 native worker, 1 day school, and 62 professed Christians, of whom 36 are communicants.

LOLOWUA: A settlement in the center of the Island of Nias, Dutch E. Indies. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 5 native workers, 1 outstation, 1 Sunday school, 2 day schools, and 584 professed Christians, of whom 366 are communicants.

Lomas de Zamora: A town in Argentina, South America, situated near Buenos Aires. Station of the ME, with 2 missionaries and their wives, 2 native workers, 2 chapels, 2 Sunday schools, and 280 professed Christians, of whom 66 are communicants.

Lombok: An island of the Dutch East Indies, lying between Bali and Sumbawa, to the eastward of Java. Its inhabitants are Malays and Moham medans, and no regular missionary work is now carried on among them.

LOME: A village on the coast of Togoland, Africa, situated near the W. frontier of the colony. Station of the German Mission Society (1896), with (1903) 2 missionaries, 1 with his wife; 8 native workers, 2 outstations, 4 day schools, 1 kindergarten, and 216 professed Christians, of whom 104 are communicants.

LONAND: A village in the Poona District of Bombay, India, situated about 40 miles S. E. of Poona and in the Indian Village Mission, with (1901) 2 missionaries, 1 day school, 1 Sunday school, 1 theological class, and 1 dispensary.

LONDE: A village in the Congo Free State, N. E. from Matadi; station of the Swedish Mission Society (1892), with 2 missionaries, 1 with his wife; 2 native workers, 1 outstation, 1 chapel, 1 Sunday school, 1 boarding school, 1 temperance society, 1 printing press, 1 dispensary, and 64 professed Christians.

LONDON MISSIONARY SOCIETY (1795): During the latter part of the 18th century the preaching of George Whitefield and others brought to the Christian Church a realization of its larger responsibilities, and some people dropped their watchword of "England for Christ!" for the larger one of "the world for Christ," and thus the great modern missionary movement had its genesis. An additional impetus was given by Carey's Essay in 1792, and his sermon on attempting and expecting great things from God, which led to the formation of the Baptist Missionary Society. These bore fruit beyond the bounds of his own denomination, and associations of the Independent churches began to consider the question of missionary duty. Missionary work belonging to several denominations united in 1793 in founding The Evangelical Magazine, for the purpose of arousing the Christian public from its prevailing torpor, and exciting a more clear and serious consideration of its obligations to use means for advancing the Redeemer's kingdom. The principal editor of the new publication was an Episcopal clergyman, the Rev. John Eyre, of Homerton; the Rev. Matthew Wilks, famous as the minister of Whitefield's Tabernacle, was also connected with the movement, and both men were afterward prominent in founding the Missionary Society.

Another clergyman of the Establishment whose writings aroused interest in missions was the Rev. Melville Horne, at one time chaplain to the colony of Sierra Leone, a quality which gave practical weight to his words. His views on what ought to be done found instant response in Dr. Haweis' declaration that "only by a general union of all denominations can a broad basis be laid for missions." Dr. Haweis caused an offer of £500 to be inserted in the Evangelical Magazine for the equipment of the first missionaries. The Rev. Dr. D. Bogue, of Gosport, pointed out that through the same publication, students alone were doing nothing in the line of foreign missions, and urged not only the equipment of missionaries, but also their appropriate mental and spiritual training in a seminary established for this distinct purpose. The result of this appeal was a meeting held November 4, 1794, at Baker's Tavern. The ministers who attended it were of various connections and denominations, but "glowing and harmonious" in their missionary zeal. These ministers sent out, in January, 1795, a circular to various persons in which it was proposed that a meeting should be held in London the ensuing summer for the purpose of organizing a missionary society. On the 15th of January a number of ministers convened in the city of London, and appointed a committee to ascertain the sentiments of ministers throughout the country in regard to the great plan under consideration. Accordingly, a circular letter addressed to ministers was drawn up acquainting them with the plan and object of the proposed Society; they were requested to make the matter known to their congregations with the gates to the convention, which was appointed for the 22d, 23d, and 24th days of September.

On the evening preceding the meeting a con-
sultation of ministers was held. Interesting letters from ministers and "private Christians" were read and addressed by the Rev. Dr. Haweis of Aldwinkle. Dr. Rowland Hill closed the meeting with prayer, and the assembly broke up with feelings of delight, "which the highest gratification of sensuality, avarice, ambition, or party zeal could never have inspired."

The following day, September 20, a large congregation assembled at Spa Fields Chapel. Dr. Haweis preached an animating sermon from Mark xvi: 15, 16, and after the meeting a large number of ministers and laymen adjourned to the "Castle and Falcon," Aldersgate Street, and formed "The Missionary Society." In the evening a sermon was preached by the Rev. G. Burder, and on the three following days successive meetings were held in different parts of the city. The cause of missions was pleaded with solemnity and earnestness, and the Christian world seemed to awake as from a dream, "rousing persons, but it could have slept so long while the heathen were waiting for the Gospel of Jesus Christ."

The first time Christians of all denominations, forgetting their party prejudices and partialities, assembled in the same place, sang the same hymns, united in the same prayers, and felt themselves one in Christ. This unanimity of spirit, which time has only served to strengthen, is found embodied in the constitution of the Society, which has remained unchanged.

**Constitution and Organization:** "The Missionary Society" was largely assisted, in its early years, by Presbyterians and Episcopalians, but is now supported mainly by the Independent or Congregationalists, the other denominations directing their gifts in large measure to the societies since formed in their own communions. But the fundamental principle of the Society remains the same as at the outset, namely: "That its design is not to send Presbyterianism, Independency, Episcopacy, or any other form of church order and government (about which there may be differences of opinion among persons), but the glorious Gospel of the blessed God, to the heathen, and that it shall be left (as it ought to be left) to the minds of the persons whom God may call into the fellowship of His Son from among them, to assume for themselves such form of church government as to them shall appear most agreeable to the Word of God."

The sole object of the Society is to spread the knowledge of Christ among heathen and other unenlightened nations.

The condition of membership in the Society is an annual payment of one guinea.

A general meeting of members is held annually in London during the month of May, for the purpose of appointing a treasurer, secretaries, and directors; to receive reports and to audit accounts; and to deliberate on any measures which may promote the object of the Society. All matters proposed are determined by a majority vote of the members present.

The management of the Society is in the hands of a Board of Directors, annually chosen out of the members of the Society, not more than one-third of whom reside in or near London. The directors are empowered to collect and receive all moneys contributed to the Society, and to expend the same in its behalf; to select and manage mission stations; to appoint, send forth, and fittingly maintain missionaries; to make, alter, and amend by-laws for the general conduct of business, and otherwise to carry out in a suitable manner the object of the Society.

The directors appoint the secretaries, but themselves transact the business of the Society without emolument.

For greater facility and expedient in the conduct of business the directors are empowered to subdivide into committees, but no proceedings of committees are valid until ratified by the board. It is interesting to note that the experience gained by this Society in bringing into existence and successfully carrying on an undenominational organization for missionary work led to the foundation, on the same catholic basis, of the Religious Tract Society, and the British and Foreign Bible Society. As the years passed many local missionary societies were formed in different cities, and their existence made it necessary that this "Missionary Society" have a more definite name. It soon, therefore, became known as the London Missionary Society.

The constituency of the Society being largely Congregational, the plan was adopted in 1889 of electing the majority of the directors from that denomination. In 1891 two crowded and earnest meetings for conference and prayer were held, with reference to the severe financial situation, which had again become grave in the treasury. Nevertheless, in 1894 the Society again faced a crisis and a large deficit. The Centenary Fund was now opened, and somewhat relieved the situation; nevertheless, the directors felt it necessary to issue a statement declining further offers of service until the finances improved.

The centennial of the Society was celebrated by a meeting in the Mansion House, on November 3, 1894; and on January 15, 1895, the meeting at the Castle and Falcon Inn was also commemorated. Both gatherings were attended by large and most enthusiastic audiences.

In 1902 the directors summoned a large and representative committee to consider the financial situation, which had again become grave in view of the increasing pressure from the field for expansion. This committee, after carefully discussing the situation, decided that it is not desirable that any policy of withdrawal should be seriously contemplated. At the same time, recognizing that the Society had got so far in advance of its supporters that its position was critical, the directors resolved that "the Board give to the constituency of the Society the assurance that during the next five years they will not increase the average expenditure of 1901-2, unless additional contributions are provided, and then only to the extent of such additional contributions."

**Development of Foreign Work:** Soon after the formation of the Society, it was called upon to decide in what part of the world its work should begin. Like Carey, Dr. Haweis had become much interested in the South Sea Islanders from Captain Cook's "Narrative of his Voyages in the Pacific Ocean," and in an address delivered at Surrey Chapel drew such a picture of these "dark places of the earth" that intense
interest was excited, and the directors decided to establish a mission at Tahiti.

At the same time attention was especially called to Africa, where the Baptist Missionary Society had during the previous year made an attempt to establish a mission. The London Missionary Society joined with the Glasgow and Scottish Missionary societies in 1796 in sending an expedition to Sierra Leone. This, however, not proving a success, and the recent conquest of Cape Colony directing public notice to South Africa, in December, 1796, Dr. Vanderkamp and his associates set sail for Cape Town. In 1798 a missionary was sent to Calcutta, where he was not allowed to stay, and there was no definite mission organized in India until 1804, when Messrs. Ringeltaube, Crane and Dea Granges were stationed at Vizagapatam and Travancore, and Mr. Vesey at Colombo, Ceylon. It was not until 1816 that the North India Mission was definitely inaugurated. In 1800 the Rev. William Moseley, an independent minister at Long Buckley, Northamptonshire, published a valuable "Memoir on the Importance and Practice of Translating and Publishing the Holy Scriptures in the Chinese Language." He had discovered in the British Museum a manuscript containing a Harmony of the Four Gospels, the Acts of the Apostles, the Epistles of Paul, and the first chapter of the Bible from Chinese. It was a folio volume, and was lettered by mistake "Evangelica Quatuor Sinice." On a blank leaf, at the beginning of the volume, is the following note: "This transcript was made at Canton in 1738 and 1738, by order of Mr. Hodgson, who says it has been collated with care and found very correct. Given by him to Sir Hans Sloane, Bart., Matavai Bay, Tahiti. The missionaries were landed. Captain Wilson welcomed and protected by the notoriously savage and barbarous king, Pomare, and his wife, Idia, who never withdrew their friendly aid. A large bamboo house was placed at their disposal, and after 208 days the "Duff" anchored safely in Matavai Bay, Tahiti, and in the course of the voyage proved prosperous; and everything seemed to favor them, yet one may well imagine the solemnity of the moment when they realized their position of isolation as the "Duff" sailed away to the Friendly, or Tonga, Islands. The "Duff" arrived at Tangatabu, one of the so-called Friendly Islands, twelve hundred miles west of Tahiti, in April, 1797, where nine unmarried missionaries were landed. Captain Wilson then took one missionary to Santa Christina, one of the Marquesas Islands, and after leaving him there revisited Tahiti, and sailed for England by way of China.

The story of the missionaries thus left at Tangatabu is of two and a half years of horror. The island was over run by released convicts from Australia, who incited the savages to attack the missionaries and steal their property. One of the laymen belonging to the mission deserted his comrades and joined the natives. War breaking out among the islanders, one band chased five of the missionaries, and on capturing them stripped them of all their property, even to the clothing which they had on, and then set fire to the mission house. The other three missionaries were rescued from the island, when in 1800 the mission to Mongolia was established to reach Tataria from the east. In 1879 the LMS responded again to the call from the Dark Continent, and established a mission in Central Africa, taking as its district Lake Tanganyika. This closed the long story of effort with which the Society has sought to girdle the earth. Single ventures there have been, besides, such as one to Buenos Aires and another to Prince Edward's Island, but they did not result in permanent work, and are of interest chiefly as indicating the breadth of view of the founders and promoters of the Society, who were resolved that if possible no nation should remain without the Gospel. The fields upon which the Society has concentrated effort are in Polynesia and the South Pacific, India, Africa, China, and Madagascar.

The Missions: 1. Polyneisa (1796): A Tahiti, Samoa, etc.; The Society purchased the full-rigged ship "Duff" of a little less than 300 tons burden, to convey its first expedition to the South Seas. Great public interest was felt in the enterprise, and important contributions of stores, furnishings and equipment were sent in by merchants and others, while high officials of government showed in many ways their good will. Captain James Wilson, a man bred to the sea and matured by hardship and by dangers of battle in America and the East Indies, offered his services gratuitously to command the ship. On the morning of August 10, 1796, the "Duff" hoisted the mission flag—three white doves with olive branches on a purple field—and sailed from London, having a crew of twenty men, and carrying a mission band of four ministers, one surgeon, and twenty-five artisans. The voyage proved prosperous, and after 208 days the "Duff" anchored safely in Matavai Bay, Tahiti, where nine unmarried missionaries were landed. Captain Wilson welcomed and protected by the notoriously savage and barbarous king, Pomare, and his wife, Idia, who never withdrew their friendly aid. A large bamboo house was placed at their disposal, and after 208 days the "Duff" anchored safely in Matavai Bay, Tahiti, and in the course of the voyage proved prosperous; and everything seemed to favor them, yet one may well imagine the solemnity of the moment when they realized their position of isolation as the "Duff" sailed away to the Friendly, or Tonga, Islands. The "Duff" arrived at Tangatabu, one of the so-called Friendly Islands, twelve hundred miles west of Tahiti, in April, 1797, where nine unmarried missionaries were landed. Captain Wilson then took one missionary to Santa Christina, one of the Marquesas Islands, and after leaving him there revisited Tahiti, and sailed for England by way of China.
taken the establishment of a mission at Santa Christina was more kindly treated, but by a curious accident he was carried away from the island in an American vessel to which he had gone for supplies, but which was wrecked on the way. The Americans landed him on another island of the group. But after working there some months, he took an opportunity of returning to England to plead with the Society to give him assistance in the work.

Meanwhile an attempt had been made to strengthen the Polynesian Mission by sending out the “Duff” a second time, in December, 1798, with thirty more missionaries. But the ship was captured by a French frigate off the coast of South America, and taken with all her belongings as a lawful prize of war. The missionaries after being carried about the ocean for some weeks were finally put ashore at Lisbon.

The party of missionaries landed at Tahiti at the first seemed to have promise of great prosperity. Two Swedish sailors, long resident in Tahiti, acted as their interpreters and helped them learn the language, while the chiefs were won to favor the mission by the skill of the artisans. The missionaries encountered their first serious trouble when a merchant ship came to Tahiti, and several of the seamen deserted. The missionaries tried to secure the runaways, but natives interfered to prevent this and knocked the missionaries about pretty roughly. The affair was not serious, but eleven of the missionaries, panic-stricken, fled to Australia; only one of them, Mr. Henry, remained, to return afterward returning. Of the little group of seven men and one woman (Mrs. Eyre) who remained at Tahiti, one fell away and left the work, another lost his health and went back to England, and a third separated himself from his associates, married a native wife, and was murdered not long afterward. Including the two who returned from the flight to Australia, but five men and two women now remained of the band of missionaries landed by the “Duff” at Tahiti in 1797. They were joined the next year by two other missionaries, and a more hopeful spirit prevailed, especially as Henry Nott and Mr. Jefferson had now so far mastered the language that they could preach in it, and, having reduced the language to writing, began making books, from which the children were taught to read. But the spirit of war seems to have possessed the whole world. Piracy made the long voyage from England uncertain and dangerous, and five years passed before either stores or letters reached the missionaries from England. Meanwhile their clothes dropped to pieces; their shoes were out and they were left barefoot; their tea, sugar, and other household comforts were exhausted. They seemed to be abandoned by their home friends, as well as by the Society which sent them out.

Some things, however, had been accomplished. It was now agreed (Mr. and Mrs. Henry) to stay on and to try and to reduce it to writing. But they had not won a single soul to acceptance of the Gospel, and they were in constant difficulties through wars between different parties of natives. King Pomare protected them as best he could, and did his best to help them, after the death of the old king. But what made the young king their friend was interest in their ability to write his language. He wished to learn to write, but did not care to hear the Gospel. His power, moreover, was not supreme, and in 1808 he notified the missionaries that they were no longer safe under his protection. All but four single men of the missionary band now fled from Tahiti to Australia, and in the next year the rebel chiefs took the mission and melted the type belonging to the printing press into bullets, and drove the four remaining missionaries from the island. Twelve years of hardship for the sake of these people had resulted in this! Two of the four missionaries now went to Australia. The other two, Messrs. Nott and Hayward, chose to remain, and took refuge in the islands of Huhuine and Eimeo (now called Moorea). There Mr. Nott devoted himself to translating the Bible, which he was certain that the people would soon accept.

The Society in London began to discuss abandoning so unprofitable a field. Some earnest friends of continuance of the mission appointed a day of prayer for the conversion of King Pomare and the triumph of Christianity. This was in July, 1812, and at the very same time King Pomare came to the missionaries at Eimeo, asking to be baptized. The king’s conversion was the turning point. Alto, naturally, the missionaries insisted that they must delay his baptism until he had received more instruction, he was a changed man. But the need for the missionaries who had fled to Australia came back to Eimeo on his invitation, and the next year, two of the missionaries having ventured again to Tahiti, found, to their surprise, two Christians there. These men had remembered the teachings of the missionaries and together had tried regularly to worship God as the missionaries had done. By the time that Rev. John Williams and William Ellis arrived at Eimeo in 1817, a church of native believers had been formed, the islands of Huhuine, Raiatea, and Tahiti had destroyed their idols, not without fierce opposition from the priests, and peace, prosperity and progress had begun to rule. So long as the people were heathen they cared not to better their material condition. But as soon as they accepted the Gospel, they began to build houses and to learn useful arts. King Pomare built a great church at Tahiti, in which he was at last baptized. Little more than a score of years after the first missionaries reached the island grateful native Christians of the Society Islands sent a contribution to the LMS amounting to £1,700.

Mr. Williams now settled at Raiatea, and began that splendid career of evangelization among neighboring islands which gave him the title of the Apostle to Polynesia. Going out by boat to the next islands; sending out native workers, who were of like devotion with himself; building, without tools or lumber, a little ship, that he might go further, Mr. Williams and his native co-workers evangelized the Hervey or Cook Islands, Samoa, began the work on Fiji Islands, and finally in the midst of the blessed work of building up and extending the kingdom, when he would enter the New Hebrides, 1,500 miles from his Samoan home, with the Gospel, he was killed by the cannibal inhabitants of Eromanga, November 20, 1839. In twenty years of arduous service he had visited and opened a great number of islands of the South Pacific to the Gospel. He also had infused his own devoted spirit into the converted islanders in such a degree that they were unfailing in responding to calls for volunteers for dangerous
London Missionary

THE ENCYCLOPEDIA OF MISSIONS

and seemingly impossible service. At his death a wail went up from all parts of the broad Pacific, “Oh my father! my father! Williamu!”

The devoted service rendered by the native workers sent out from the stations of the LMS in the vast area to be covered, and with their families, sailed for the new field of labor, landing on July 1 at Darnley Island, where the chiefs consented to try a teacher for a year. Native teachers were placed on other islands in the group, and many others were occupied by missionaries of the LMS, and native workers in several places in the southeastern coast of British New Guinea. The whole New Testament has also been translated into the language most widely used. On April 3, 1901, Rev. James Aird landed with 114 native workers, and ordered the missionaries to cease teaching the people in the native language, for which French must be substituted. When the missionaries questioned the authority for such orders, the French marine destroyed the mission buildings and the native homes near them. The indignation caused in England by these proceedings led the French Government to modify its plans, and the work of the missionaries was resumed and carried on under restrictions. The suspicion and dislike shown toward the English missionaries led to the transfer of the work in the Society Islands and in Mare (Loyalty Islands) to the Paris Evangelical Society, which now has charge of the field of laborious efforts of the LMS during eighty-nine years. In the Loyalty Islands (10 with their wives), 114 native workers, 6 schools, and 1,500 professed Christians, of whom 813 are communicants. In Polynesia, as a whole, including New Guinea, the LMS reports (1903) 57 English missionaries, 128 native helpers, 49,920 professed Christians, of whom 18,805 are communicants; 272 schools, and 11,854 pupils. Native contributions, £5,162.

During all these years since John Williams built the first missionary ship of the LMS the work in the island world has been done in a substantial vessel, which, happily, bears his name. The first missionary vessel, the “John Williams,” was built by the children, and for twenty years sailed the Southern Seas. In 1864 she was wrecked, and the following year a second vessel was launched only to go on the rocks at Niuatoputapu two months later. In 1868 the third “John Williams” was built, and for a quarter of a century carried on the work. But a steamer was needed, owing to the vast area to be covered, and in 1893 the fourth “John Williams” was sent out.

Training institutions were established at Raratonga in 1839, and the Malua Institution of Samoa in 1845, where the native teachers, evangelists and pastors receive efficient training for their work.

B. New Guinea: In 1870 the LMS Directors sent Rev. S. Macfarlane of Lifu as a pioneer to New Guinea. At the May meeting of the Loyalty Islands Mission eight native helpers were elected for the work. In May, 1871, Messrs. Macfarlane and Murray took temporary supervision of the New Hebrides by the Nova Scotia Presbyterians and the present New Hebrides Mission, has already been described elsewhere. The same heroic devotion of converts to Christ opened the way for missionary occupancy of New Caledonia in 1841, the Loyalty Islands (1841), the Tokelau Islands (1858), Niue or Savage Island (1830-1859), Eлисе Islands (1865), and Gilbert Islands (1870).

The progress of the mission in Polynesia has been injuriously affected, as elsewhere, by the coming in of European traders, bringing with them liquors and arms, which it is their determination to induce the natives to buy, as well as vicious practices quickly credited to Christianity by the islanders. But its most serious calamity fell upon it when the French Government in 1838-41 used force at Tahiti to make the islanders receive Roman Catholic missionaries, and in 1841 took possession of the islands. A similar attack by the French Government was made upon the mission of the LMS in Lifu (Loyalty Islands) in 1876. A French man-of-war entered the harbor and ordered the missionaries to cease teaching the people in the native language, for which French must be substituted. When the missionaries questioned the authority for such orders, the French marines destroyed the mission buildings and the native homes near them. The indignation caused in England by these proceedings led the French Government to modify its plans, and the work of the missionaries was resumed and carried on under restrictions. The suspicion and dislike shown toward the English missionaries led to the transfer of the work in the Society Islands and in Mare (Loyalty Islands) to the Paris Evangelical Society, which now has charge of the field of laborious efforts of the LMS during eighty-nine years. In the Loyalty Islands (10 with their wives), 114 native workers, 6 schools, and 1,500 professed Christians, of whom 813 are communicants. In Polynesia, as a whole, including New Guinea, the LMS reports (1903) 57 English missionaries, 128 native helpers, 49,920 professed Christians, of whom 18,805 are communicants; 272 schools, and 11,854 pupils. Native contributions, £5,162.

2. Africa. A. South Africa: Cape Colony in South Africa was a settlement of the Dutch East India Company, commenced in 1652. The Dutch settlers drove back the Hottentots, making slaves of a large part of those whom they did not destroy. Dr. Vanderkamp was the first missionary of the LMS, sent to Africa in 1789. He made a strong effort to establish a mission among the Kaffirs in eastern South Africa, but after some years was obliged to leave for safety at Reinet, where, meanwhile, other missionaries of the Society had settled. As soon as the mission at this place began to be successful the Dutch colonists raised an outcry that it was sheltering Hottentot robbers and murderers; they even went so far as to try to kill Dr. Vanderkamp for his friendship to the Negroes. The English Governor of Cape Town then advised him, in 1820, to establish his Hottentots upon a piece of land which the Government gave him near Algoa
Bay (Port Elizabeth). Almost immediately after this the country passed again into the hands of Holland, and the Dutch Governor, on hearing complaints that he harbored robbers and murderers, persuaded Dr. Vanderkemp to give up his settlement and remove to another place less favorable, which, however, was called Bethelsdorp. This experience was a sample of what Dr. Vanderkemp had to encounter during his whole mission. He was champion of the rights of the Hottentots against grasping and conscienceless white settlers, and, at his death, after thirteen years of work of this nature, he had fairly won the hearts of many Hottentots and Kaffirs and so had prepared the way for those who were to follow him.

Messrs. Kicherer and Kramer were sent out by the LMS at the same time as Dr. Vanderkemp, and they went to the western part of South Africa, attempting to reach the Bushmen. While Hottentots and Griquas became Christians, the Bushmen would not listen to the missionaries, and Kicherer having resigned in 1806 in order to become pastor of a local (Dutch) church, the mission was abandoned. This mission first brought the Bechuana to the knowledge of the Christian world. Another attempt to reach the Bushmen was made at Caledon in 1814, and with some success. This excited the enmity of the white settlers, and the missionaries were ordered by the Government to abandon this outpost and retire within the limits of the Cape Colony, where the work of the Society was still going on.

Messrs. A. and C. Albrecht were sent by the LMS in 1806 to work in Namakauland, north of the Orange River. The region was infested by the outlaws led by Africaner. This chief was a Hottentot slave, who, driven by a mad desire to be revenged for punishment inflicted upon him by his master in Cape Colony, had fled to the wilderness; a price was set upon his head, and he was the terror of the whole country. The missionaries settled at Warmbad, about one hundred miles west of Africaner’s place of abode. The outlaws fled to the ady to the province of the Bushmen, but some other settlers at Warmbad having made an expedition against him, he became furious, and the missionaries were compelled to flee before his anger.

The next attempt in this direction was by Rev. Dr. Moffat, who, in 1817, established himself in the village where Africaner lived. It was but a short time before this terrible chief became a Christian, was baptized, and went with Dr. Moffat to Cape Town to express his willingness to live at peace with the colonists. This visit in 1818 was almost the first convincing evidence offered to officials and colonists of the advantage of missions. Messrs. Ander and Crane, two other missionaries of the Society, founded a station in Griquatown in 1820. This place is about one hundred miles west of the diamond fields of Kimberley, in Griqualand West. Their labors among the people were crowned with success, but after a few years the Governor of Cape Town, having sent a demand that the missionaries should send the best of their young men to the army, the people became suspicious and hostile. This caused a withdrawal of the missionaries and the work was practically broken up.

To this place Mr. Moffat went in 1820, and reorganized the work. After seeing the enter-
THE ENCYCLOPEDIA OF MISSIONS

3. **North India** (1798): The first missionary of the LMS in India was Mr. Nathaniel Forsyth, who reached Calcutta in 1798, and who, not being allowed to establish a mission there, labored for fourteen years in the Dutch settlement of Chinsurah, a few miles north of that city. In 1809 Mr. May was sent out to aid in carrying on the work. He was enthusiastic in education of the children, and by 1812 he had succeeded in establishing thirty schools, obtaining from the Government grants in aid of their support. These efforts at Chinsurah, continued through thirty years, were the foundations of the splendid work now carried on by the UFS in that district, the station having been transferred to the Free Church of Scotland in 1849. Two missionaries of the LMS were sent in 1815 to work among both English and natives in Calcutta. A fund was locally raised and the Union Chapel was built in 1821, which has been a center of Christian influence ever since. Five schools for girls were opened the same year. This marks the beginning of work for women in India. A Miss Piffard of Calcutta voluntarily undertook the supervision of these schools, and, what is more, has defrayed their expenses. The work in the city and vicinity is now actively pressed in twenty-one separate centers, and has become very important in influence and extension.

A chapel was opened on the road to Bhowanipur, a suburb of Calcutta, in 1820. Mr. Lacroix in 1827 took charge of the work in the villages south of the city, and in 1837 took up his place of residence at Bhowanipur. He there opened a boarding school for boys, and the following year a girls' boarding school and an English school for native children. That English school afterward was developed into the present Bhowanipur Institution. When pupils were converted in 1843, the natives, panic-stricken, withdrew their children. But the desire for English education outweighed the fear of Christianity, and in 1845 branch schools had to be established, to relieve the pressure on the main institution; these were located at Behala and Ballygunge.

The present noble Institution building was completed in 1845, at a cost of nearly £7,000. When conversions continued among the pupils, the parents tried to force their grown children to hold to Hinduism, and in some cases they sued the missionaries for abduction. The proceedings were resisted in the courts, and the result was that verdicts were given for liberty of conscience. The native church building was built in 1867 and paid for by the people. Bhowanipur is now the chief seat of the LMS work in the city of Calcutta.

Surat, on the western side of the peninsula of Hindustan, was occupied by the LMS in 1816. Messrs. Fyvie and Skinner translated the Bible into Gujarati, and Mr. Skinner went to Bombay and learned printing in order to carry on a printing house. The enormous mass of publications issued from that printing house made Surat a center for Christian literature second to Carey and Ward's Serampore only. After thirty years of vigorous activity the mission there was transferred in 1847 to the Irish Presbyterian Church, which now carries it on. Benares was occupied for the LMS by Rev. M. T. Adam in 1819, who gave much of his time to translation and literary work, and the station has been the center of much effective influence up to this time.

A station was opened at Almora by Rev. J. H.
Budden and wife in 1850, and from the beginning school work prospered. Two orphanages have been established there, but the most striking feature of the mission has been the Lepers' Asylum. Recently the work of the station has been extended to Bhot, in the extreme north of the district, where a school, a dispensary, and Zenana work have been established on the very frontier of Tibet. As that immediately followed the Muyni marked the beginning of Zenana work in North India by Mrs. Joseph Mullens, who was a pioneer in that work, if not the very first to grasp the idea of its possibilities in missions.

The work thus begun has spread among all classes of the people, Hindu, Mohammedan, and European, and includes medical, evangelistic, and educational work, the latter being particularly strong.

There are now in the North India section of the LMS Indian missions, 9 stations, 58 missionaries, men and women, including wives of missionaries; 242 native workers, 2,996 professed Christians, of whom 798 are communicants; 63 Sunday schools with 2,292 scholars, 104 other schools with 5,753 pupils.

4. South India (1805): Messrs. Cran and Des Granges of the LMS established a station at Vizagapatam in 1805. They began work among the English as well as the native population; translated the Gospels into Telugu, and established schools. A later missionary here, John Hay, laid the Church in India under incalculable obligation by his notable literary labors. But the station is still occupied the results have not reached great proportions. Mr. and Mrs. Loveless began work in Madras in 1805. This beginning has been followed up in the city in Blacktown and the suburb of Vepery, and in the district, where are twelve outstations. Mr. Hands established a station at Bellary in 1810, and by 1812 he had translated the first three Gospels into Kannarese. He could not get permission to print them until 1819. By that time he had the whole Bible ready. His labors were the beginning of a strong and blessed work here. Work was begun at Belgaum in Bombay Presidency in 1812. It has been slowly extending, but the Society has decided to give it up to some society having other stations in that region. In the same year missionaries were sent southward to Bangalore to open a station. No real foothold was gained, however, until 1827. Mr. Reeves then took up the work and the success of the station has been steady and important. Ten years later Mr. Benjamin Rice began work at Bangalore, and for twenty years was at the head of the Kannarese Seminary for training native workers. A theological institution was opened for education of Hindus and Mohammedans. A theological class was conducted in connection with it, and the work continues quietly to progress to the present time. Cuddapah was occupied as a station of the LMS by Mr. Hands in 1822. Little fruit appeared from his work until 1851. Then suddenly whole villages renounced heathenism and desired baptism. A new station was established at Nandyal in 1855, which was continued till 1881, when the missionary force was transferred to Gooty, thus bringing the stations near LMS at Bellary, Gooty, and Coimbatore into line with Belgaum on the west, and Madras on the east, and forming a belt across India from sea to sea. At Gooty, because of its central position, a training institution for teachers and catechists has been opened.

South of the Nilgiri Hills and north of Travancore are three stations at Tirupur, Trichinopoly, and Coimbatore. The work continues to gain in the outlying districts year by year, tho interrupted in 1901 at Tirupur by plague and other diseases, accompanied by famine of both food and water. School houses have been built, teachers supplied, and the missionaries as well as the native evangelists make long tours from village to village. Medical work is successfully carried on, with a well equipped hospital at Jammalamadugu. There are (1903) 14 stations and 382 outstations, 78 English missionaries, including wives and unmarried women; 691 native workers, 27,886 professed Christians, of whom 2,796 are communicants, and 356 schools with 14,534 pupils. The school fees paid by the pupils in 1902 amounted to £3,300 and other native contributions to the Society were £296.

5. Travancore (1806): Among the missionaries of the LMS who went out to India in 1804 was Mr. Ringeltaube. While his colleagues went to Vizagapatam he returned to Travancore. He had previously had experience in work in India under the Society for the Promotion of Christian Knowledge. He studied Tamil for a time at Tranquebar. In 1806 he undertook to begin his mission in the native State of Travancore. He was not permitted to reside in Trivandrum, and therefore began the Travancore mission from Palamcotta, a CMS station in Tinnevelly. The first foothold in Travancore was gained at Nellaiapallam, some 40 miles distant, where forty people were soon baptized and the first chapel was built, and by the end of 1812 Ringeltaube reported 677 communicants. In 1815 he broke down from overwork, and was succeeded by Mr. Mead in 1818. The quality of Ringeltaube's work was such that, tho left to themselves during three years, the native preachers and their churches were in vigorous life when the new missionaries came. Mead and Knill opened a station at Nagarcoll and the Word grew mightily and prevailed. In 1822 the number of adherents was found to be 5,000. The field was then divided, the eastern part being worked from Nagarcoll, and a new station being opened at Neyyor as a center for the western district.

Quilon, in the north of Travancore, had been occupied in 1821, but the enterprise was not successful; another attempt was made in 1827, with some success in educational work. The first church was formed in 1837. Trivandrum was at last made a missionary station in the same year. The progress of Christianity has been steady and remarkable in Travancore. There was a sharp outburst of persecution in 1827-30, renewed in 1858 and 1859. The ostensible cause of the persecution was the course of Christian women in covering the upper part of the person as soon as their awakened sensibilities made them feel the indecency of going without covering. On the other hand, Hindu caste rules required that the women of the caste to which these belonged must wear nothing above the waist. It is characteristic of the debasing effect of Hinduism that even educated men saw no weak point in their demand that Christian women should not wear the shoulder cloth. This was made the ground for a great destruction of Christian property and a vast amount of brutality.
toward Christians. At last the Travancore Government ordered that the Christian women be permitted to travel over the North River. In 1851 the Tai-ping rebelion checked missionary enterprise. In 1850 Griffith John went two hundred and fifty miles up the Yangtse River to the headquarters of the Tai-ping leader, at Nan-king, where he succeeded in getting a writ of toleration for missionaries to work in the districts where the insurgents were in power. He then pushed on into the interior and established stations at Han-kau, Wu-chang, and Han-yang, the three cities facing each other at the junction of the Han and Yangtse Rivers. About the same time Messrs. Edkins and Lee began work in Tientsin, and Mr. Lockhart, after twenty years' service in Shanghai, volunteered to open a station in Peking. It was in 1879 that the power of the medical mission was illustrated in Dr. Mackenzie's help to the sick wife of Li Hung Chang, which won the friendship of that statesman, who had been Mackenzie's death. The work at Tientsin progressed steadily until the riots of 1870, when eight chapels were burned, and heavy losses affected the church, the native Christians of most profound convictions only coming through the fire of persecution unsathed.

During the Boxer movements of 1900 the LMS in North China suffered with the others, one missionary, the Rev. J. Stonehouse, losing his life. In Peking the East City Church lost more than one-half of its numbers, and two chapels in Tientsin were left in ruins. But since the outbreak was suppressed, there has been a general advance.

There are in the China mission of the LMS (1903) 19 stations and 208 outstations, 112 English missionaries, men and women (including wives); 326 native workers, 17,782 professed Christians, of whom 9,983 are communicants; 13 schools with 2,904 pupils, 13 hospitals and dispensaries, native contributions to the general work, £159, and as fees to the schools, £857, making a total sum from the people of £1,016.

Mongolia: In 1819 the LMS commenced a mission to the Buriat Mongols of southern Siberia. Messrs. Stallybrass, Swan, and Yuille were the missionaries sent out for this work, and they established themselves at Selenginsk, near the Chinese frontier, a little to eastward of the southern end of Lake Baikal. Russian territory was chosen rather than Chinese for this enterprise, because of the liberal views of the Czar Alexander I., then on the Russian throne. The Czar not only gave the mission a grant of land, but a considerable sum of money for erecting buildings. Messrs. Stallybrass and Swan translated into Mongol and printed one O.T. until 1853, and the Gospels. They had a printing house, schools, and regular services in Mongol, and were rejoiced by several converts, among them two Buriat nobles, who were Buddhists before conversion. In 1836 the Society reported satisfactory progress in the girls' school at Khodon, while at Onagen Mr. Swan was training ten Buriat youths "whose chief desire" was "to impart to their countrymen the blessings they so much prize." But after the Czar Alexander's death in 1826, his brother Nicholas I. came to the throne and made a radical change in the policy of toleration of the religious liberty which Alexander had favored. The various evangelical missionary enterprises established in Russia under patronage
of the late Czar were one by one suppressed. The turn of this hopeful mission of the LMS came in 1841. The missionaries were curiously informed that their work must stop and they must leave the country because the mission did not coincide with the form of Christianity established in the Russian Empire. Twenty-two years' accumulation of material was sacrificed, but we may not believe that the results of that period of self-sacrificing labor were utterly lost.

After a lapse of nearly thirty years, the new relations established with China made it possible to resume efforts among Mongols from the Chinese side of the frontier. The LMS in 1870 assigned Rev. James Gilmour to this work. Mr. Gilmour, in the latter part of that year, set forth from Peking, to which he returned for a part of each year. But his long marches over the Mongolian plains, his life in Mongol families, and his earnest efforts to conquer Mongol suspicions, were the essentials of a missionary activity for the most part meeting with but slight return from this shy and undemonstrative people. It was not until 1884 that the first Mongolian was baptized.

The people whom Mr. Gilmour was to reach were nomads and, therefore, not easily taught, and they were Buddhists, and therefore not easily converted. He made his headquarters at Peking, to which he returned for a part of each year. But his long marches over the Mongolian plains, his life in Mongol families, and his earnest efforts to conquer Mongol suspicions, were the essentials of a missionary activity for the most part meeting with but slight return from this shy and undemonstrative people. It was not until 1884 that the first Mongolian was baptized.

The eastern part of Mongolia, where the people led a more settled life, was the field of operations after that year, and in 1887 Chao-yang was occupied as a permanent center of work. Gilmour died in 1891. Others took up his work, but the effort to reach the Mongolians has practically failed. The missionaries in Eastern Mongolia succeeded in collecting a Christian church of about two hundred members, chiefly from the Chinese population. In 1891 the LMS transferred this mission to the Irish Presbyterian Church, which has extensive missions in Manchuria, and withdrew its missionaries to other stations in China.

7. British Guiana (1808): A Dutch planter named Post, living on the banks of the Demerara River, sent an urgent appeal to the LMS in 1807 for some one to instruct his negroes in Christian conduct. In response to this appeal the Rev. John Wray was sent to Guiana the following year. A church and a house for the missionary were built, chiefly by contributions from the planter and his friends, and a very encouraging work was begun among the negroes at Le Resouvenir estate. The next year Mr. Post gave a house in Georgetown to be used as a school, and Rev. John Davies was sent out to take charge of it. These proceedings excited alarm among the planters, who knew enough about Christianity to know that it is dangerous to give a man Christ's teachings if freedom is not also given him. The history of the mission during the next twenty-five years is one of struggle for the right to teach negro slaves against the will of slave-owners and Government. There is little in missionary literature more inspiring by way of record of fortitude and devotion than the story of this struggle, in which the missionaries Davies and Smith sacrificed health and life against the greed that made it a crime for a negro slave to know the love of God. The result was to build up a strong body of negro converts among the emancipated slaves of Jamaica. The Congregational churches of Jamaica and Guiana have long been independent, and the LMS now maintains but one missionary in the West Indies. He is stationed in Guiana, and his main duty is to superintend the training of candidates for the ministry.

8. Madagascar (1818): The history of the development of this field of the LMS is so fully described in the article on Madagascar that its repetition in this place is needless. The Society now has in that field (1903) 17 principal stations, 57 missionaries, men and women, including missionaries' wives; 3,323 native workers, 72,000 professed Christians, of whom 24,716 are communicants; 630 schools with 31,770 scholars; 1 hospital and dispensary, and local contributions amounted to £5,822 in 1902.

The organs of the society are: The Chronicle, a monthly magazine established in 1818, and for young people; News From Afar, monthly, established in 1842, under the name of The Juvenile Missionary Magazine. For fuller information about the Society the following may be consulted: Lovett (J.), History of the London Missionary Society, 2 Vols., London, 1900; Horne (S.C.), The Story of the L. M. S., London, 1894 (a good summary).

LONGHEU: A town in the province of Kwang-tung, China, situated 8 miles N. E. of Li-long. Station of the Basel Mission Society (1882), with (1903) 1 missionary and his wife, 8 native workers, 4 outstations, 1 boarding school, and 602 professed Christians, of whom 365 are communicants.

LO-ON-WONG: A town in the province of Fo-kien, China, situated on the coast about 30 miles N. E. of Fu-chau. Station of the CMS (1889), with (1903) 31 native workers, 12 day schools, and 1,021 professed Christians, of whom 318 are communicants. Station also of the CBM (1893), with (1903) 3 women missionaries, 3 native workers, 6 day schools, 2 boarding schools, 1 dispensary and 1 hospital. Station also of the Mission to Lepers in India and the East (1891), with 1 chapel and a home for untainted children of lepers.

LOOMIS, Augustus W.: Died at San Francisco, Cal., July 26, 1891. He first went as a missionary of the Presbyterian Board (N.) to China in 1844, and was there until 1856. In 1852 he began mission work among the Creek Indians, and was with them about a year. In 1859 he was called to take charge of the Chinese work in California, in which department of Christian missions he spent the remainder of his life. Dr. Loomis published several important works in connection with Chinese missions, and his whole work has been of the highest value. He was a man of great intellectual attainments, and his Board will find it difficult to supply his place in their missionary force.

Lourengo Marques: A town in Portuguese East Africa, situated on the coast in the N. W. of Delagoa Bay, founded as a trading post of the Portuguese in 1544. Station of the MR (1889), with (1903) 2 missionaries and their wives, 3 women missionaries, 10 native workers, 8 outstations, 9 places of worship, 9 Sunday schools, 1 book room, 21 day schools, and 1,508 professed Christians, of whom 624 are com-

municants. Station of the SPG (1894), with 1 missionary, 1 woman missionary, 7 outstations, and 475 professed Christians, of whom 101 are communicants.

LOVEDALE: A town in Cape Colony, Africa, 700 miles northeast of Cape Town, near Alice. It is the seat of a missionary institution, which is of absorbing interest, since its methods of work when it was commenced were novel, and have been proved to be successful—the Lovedale Mission. In 1841 Rev. William Govan opened here a missionary institute, and the place was called Lovedale, after Dr. Love, the first secretary of the Glasgow Missionary Society. The aims of the institution were these: 1st. To take young men of intellectual and spiritual qualifications and educate them to be preachers. 2d. To train young men and women as teachers for native mission schools. 3d. Industrial education in various arts, such as wagon-building, blacksmithing, printing, bookbinding, telegraphy and agricultural work of various kinds, was carefully to be given to the natives in order that they might be industrious and useful citizens; 4th. An education of a general character to all whose course in life had not yet been definitely determined. The two departments, industrial and educational, are carried on in two buildings, one for the males and the other for the females. Each department has its own special aim, but the grand purpose of each and both is to Christianize, not merely to civilize; and the conversion of the individual is the great aim and the desired end of all the work that is conducted. The solution of the problem how to develop Christian character and energy amid the existing conditions surrounding barbarous and indolent races is fraught with many difficulties; and in order to Christianize successfully, it has been proved of great assistance to civilize at the same time. The principles which govern the management of the Lovedale Institution are: (1) Non-sectarian and undenominational. The United Free Church of Scotland supports it financially, but all denominations in the country have been represented in it at one time or another. At Lovedale among the pupils all colors and nearly all tribes in South Africa and Rhodesia are represented. No indorsement is brought to bear upon the students to join the Free Church of Scotland in preference to the church with which they are connected. Even in the theological course those who are trained as agents for other bodies are not weakened in their denominational ties. (2) Broad Christianity does not mean lax Christianity. Instruction in the Bible and in practical religion is the first work of the day in all the classes. Morning and evening worship is held in the dining-halls. At noon every Wednesday a prayer meeting is held, and each workman drops his tools and takes part in the meeting, also it involves a pecuniary loss by reason of the time taken from the week's work. (3) Self-support is the theory. In the trades departments especially this principle is carried out.

In addition to these general principles other lesser ones are: The education is practical; habits of industry and activity are urged and encouraged; and promotion in the classes depends first upon the moral character, then upon the intellectual.

The curriculum in the educational depart-
commentary on the Gospel of Matthew, when he died at Shanghai of chronic diarrhoea, April 26, 1860.

LOWRIE, Walter Macon: Born at Butler, Pa., February 18, 1819; graduated at Jefferson College 1847, with the first honor; decided while in college to be a missionary to the heathen; graduated at Princeton Theological Seminary 1846; ordained November 18, 1846; sailed January 24, 1847, for China as a missionary of the PN. In August, 1846, he published several essays in the Chinese Repository on the proper Chinese words to be used in translating the name of God into Chinese. His views agreed with those of Drs. Boone and Bridgman, but differed from those of Medhurst and others. He commenced also the preparation of a dictionary of the Four Books, and decided to include also the Five Classics. These books contain the body of the Chinese language. This work, he thought, would require two or three years without interfering with more direct and important missionary labors. His plan would include biographical and historical notices of China from B.C. 2100 to B.C. 300, in a large quarto volume. But he did not live to complete the work. In 1847 he was appointed one of the delegation for the revision of the Chinese translations of the Bible. While attending the meeting of the revision committee at Shanghai he received a message requesting his immediate return to Ningpo. On the 19th of August while on this journey they were attacked by pirates armed with swords and spears. One of the boatmen who was near him states that while the pirates were maiming the sailors and ransacking the boat, Lowrie sat at the bow reading his pocket Bible, and as they were in the act of seizing him, he turned himself partly round and threw his Bible on the deck. Three men seized him and threw him into the sea. The Bible was a copy of Bagster's 12mo. edition in Hebrew, Greek and English, the same copy he had preserved with great difficulty in the shipwreck of the "Harmony." The death of Mr. Lowrie was a great loss to the missionary cause, since his natural and acquired preparation for important literary work in the Chinese language was of the first order.

LOYALTY ISLANDS: A group in the South Pacific, consisting of Uvea, Lifu and Mare, besides some smaller islands. Lifu, the largest, is about 50 miles long and 25 broad, and contains a population of about 6,000. The island is of coral formation, and the thin layer of soil is produced of vegetables and fruit. Mare has about 2,500 inhabitants. The island is about 50 miles long and 25 broad, and contains a population of about 10,000 (estimate). Station of the CIM (1890), with (1903) 2 missionaries, one with his wife; 2 women missionaries, 3 native workers, 1 chapel, 1 Sunday school and 1 day school.

LU-CHAU: A town in the province of Shansi, China, situated on the left bank of the Yangtze River at the confluence of the To River, about 146 miles S. E. of Cheng-tu. It is an important salt market. Population 100,000 (estimate). Station of the CIM (1890), with (1903) 2 missionaries, one with his wife; 1 native worker, 1 place of worship, 1 society for young people, 1 book room, 1 day school, 1 dispensary, 1 hospital and 19 professing Christians. The Society spells the name Lu-choo-fu.

LU-CHENG-HSIEN: A town in the province of Shao-si, China, situated about 15 miles N. E. of Lu-ung-fu. Station of the CIM (1889), with (1900) 2 missionaries, one with his wife; 1 native worker, 1 place of worship, 1 Sunday school, 1 boarding school and 2 refuges for opium victims. The name is sometimes written Lu-ch'eng-hsien.

LU-CHAU: A town in the United Provinces, India, on the Cunti River, 42 miles from Cawnpur and 199 miles from Benares. It is the capital of a district, and formerly of Oudh. Viewed from a distance, Lucknow presents a picture of unusual magnificence and architectural splendor, having (1902) 1 missionary on the last named island, and on both islands together 182 native workers and 2,300 church members.

LUANZA. See LOANZA.
which fades on nearer view into the ordinary aspect of an Oriental town. Nevertheless, it is one of the most important cities in India, and many of its streets are broader and finer than in most Indian towns, and the sanitary condition of the city is constantly being improved. It has a celebrated school of Mohammedan theology, manufactures silver and gold work and embroidery, and has extensive railway workshops. During the mutiny of 1857 it was besieged by the rebels for six months, when the garrison was saved by Sir Colin Campbell. Altitude, 369 feet. Population (1901), 264,000, of whom 146,000 are Hindus and 99,000 are Mohammedans. Station of the CMS (1857), with (1903) 4 missionaries, 3 with their wives; 14 native workers, 1 outstation, 5 village schools, 2 boarding schools, 1 dispensary, and 473 professed Christians, of whom 174 are communicants. Station also of the ME, with 6 missionaries, 1 with his wife; 9 women missionaries, 16 native workers, 2 chapels, 37 Sunday schools, 1 printing press, 17 day schools, 1 boarding school, and 2 colleges, 432 professed Christians and a leper's asylum. Station also of the ZBM, with (1903) 1 missionary and his wife, 1 native worker, 1 day school, 4 chapels, 14 Sunday schools, 7 day schools, and 98 Christians. Station also of the ZBM, with (1903) 11 women missionaries, 27 native workers, 3 day schools, 1 dispensary, and 1 hospital.

LUDD: A town in Palestine, situated about 1½ miles S. E. of Jaffa, on the caravan road from Damascus to Egypt. It is the Lydda of the New Testament. St. George is said to have been born and buried here. Station of the CMS (1876), with (1903) 1 native worker, 1 day school. Name is spelled by this society Lydd. The Jaffa Medical Mission has (1898) 2 women missionaries, 1 native worker, 1 Sunday school, 1 dispensary. This Society spells the name Lydda.

LUDHIANA: A town in the Ludhiana District of the Punjab, India, situated about 3 miles S. of Sutlej River, and 73 miles S. E. by E. of Amritsar. Altitude, 812 feet. Population (1891), 46,300, of whom 30,800 are Muslims and 13,900 Hindus. Station of the PN (1834), with (1903) 4 missionaries and their wives, 6 missionary women, 54 native workers, 9 outstations, 9 places of worship, 40 Sunday schools, 4 day schools, 2 boarding schools, 1 industrial school, 1 printing press, and 320 professed Christians. Society spells the name Lodiana. Mission station of the North India School of Medicine for Christian Women (1895), with (1901) 10 women missionaries, 6 native workers, 1 Sunday school, 1 Young Woman's Christian Association, 1 female helpers' training class, 5 dispensaries, 2 hospitals, 1 medical class, 1 lepers' asylum.

LUKEBO: A settlement in the Congo Free State, Africa, situated on the left bank of the Congo River, surrounded by dense forests. Station of the BMS (1884), with (1903) 1 missionary and his wife, 1 native worker, 174, 1 day school. The station is also known under the name of Liverpool.

LUKUNGA: A town in the Congo Free State, Africa, on the Congo River, about midway between the mouth and Stanley Pool. Station of the ABMU (1882), with (1903) 2 missionaries and their wives, 22 native workers, 19 outstations, 1,022 professed Christians, of whom 511 are communicants; 10 chapels, 1 Sunday school, 19 day schools, 1 boarding school, and 1 dispensary. Society spells the name Lolanga.

LULANGA: A settlement in Congo Free State, Africa, situated at the confluence of the Lulanga River with the Congo, about 50 miles N. of Equatorville. Station of the RBMU (1889), with 5 missionaries, 2 women missionaries, 1 native worker, 1 place of worship, 1 Sunday school, 1 day school, 1 dispensary. Society spells the name Lulonga.

LULL, Raymund: Born in 1235. Died in 1315. From Zwemer's biography of this first and, perhaps, greatest missionary to Mohammedans, we gather the following facts: Raymund Lull lived during a most eventful epoch. Five years after his birth the rise of the Ottoman Turks occurred, and before he was twenty Louis IX. had failed in his crusade, and the Inquisition had begun in Spain to torture Jews and heretics. As he was growing into manhood, the beneficial effects of the Crusades were being felt; physical science was struggling into feeble life; discoveries of distant lands were being made; the University of Oxford was founded, and the world, as Lull knew it, was the world of medieval legend and chivalric lore. The Mohammedan world was, with all Europe, in a state of ferment, and Raymund Lull was raised up to prove what the Crusades might have done if they had fought for the cross with the weapons of the Prince of Peace. Lull was a member of a distinguished Catalanian family, and when the island of Majorca was taken from the Saracens by James I., King of Aragon, Lull's father was rewarded with large estates in the conquered territory, for his distinguished services. A succession of twenty proud sovereigns reigned from the year 1035 to 1516, and at such a court, probably in the capital town of Zaragoza (Saragossa), Lull spent several years of his life. He was a court poet, and a

places of worship, 29 Sunday schools, 29 day schools, 1 theological class, and 556 professed Christians.

LU-CHAN. See Lu-NGAN-FU and Lu-NGAN-CHAU.

LU-GANDA: The Bantu term for the language spoken by the Wa-Ganda; the term might be rendered into English as Ugandan, q. v.

LUH HOH. See Luh-ho-hsien.

LUKANOR ISLAND. See Mortlock Islands.

LUK-HANG: A town in the province of Kwang-tung, China, situated about 28 miles N. by W. of Canton. Station of the Berlin Mission Society (1897), with (1903) 3 missionaries, 29 native workers, 19 outstations, 2 day schools, and 769 professed Christians, of whom 549 are communicants.

LUKOLELA: A settlement in the Congo Free State, Africa, situated on the left bank of the Congo River, surrounded by dense forests. Station of the BMS (1884), with (1903) 1 missionary and his wife, 1 native worker, 14 Sunday schools, 1 dispensary, and 473 professed Christians.
skilled musician. Gifted with rare mental accomplishments, the heir to large wealth, he was a gay knight at the banquets of James II., before he became a scholastic philosopher and an ardent missionary. It was at Palma, when thirty-two years old, that he made his decision to forsake all and become a preacher of righteousness. His example was one of the great impulses of Spain on his way to Damascus, and of St. Augustine under the fig tree at Milan. He sold all his property, gave the money to the poor, and reserved only a scanty allowance for his wife and children. He determined to attack Islam with the weapons of Christian truth; and assuming the coarse garb of a mendicant, he made pilgrimages to various churches in the island, praying for grace and assistance in the work of his life.

In the 13th century, Islam, the mistress of philosophy and science, had political influence and prestige; and against this mighty power this knight of Christ was to lead an attack with the weapons of love and learning, instead of the crusaders' weapons of force and fanaticism. He entered upon a thorough course of study, mastered the Arabic language, spent much time in spiritual meditation, and at about the age of forty he entered upon the most useful part of his life, as author and missionary. His Ars Major was completed in 1275, and under the patronage of the King of Majorca this first book of his Method was published. Soon after the publication of this work, he persuaded James II. to found and endow a monastery in Majorca, where Franciscan monks should be instructed in the Arabic language, and trained to become able disputants among the Muslims. In 1276 such a monastery was opened, and Lull began to study Lull's method and imitate his spirit. Lull now longed for a new Pentecost, and for world-wide missions. Fired with apostolic zeal, he went to Rome and Paris; and, altho in his fifty-sixth year, he determined to set out alone and single-handed and preach Christ in North Africa. On arriving at Tunis he invited the Muslim literati to a conference. He announced that he had studied the arguments on both sides of the question, and was willing to submit the evidence for Christianity and for Islam to a fair comparison. The challenge was willingly accepted, and after a long, fruitless discussion Lull advanced the following propositions, which strike the two weak points of Mohammedan monophysitism: 'Lack of love in the being of Allah, and lack of harmony in his attributes.' Some accepted the truth and others became fanatical. Lull was cast into a dungeon, and for six months remained a close prisoner, befriended only by some merchants of Genoa and Spain, who took pity on the aged missionary of the cross. He was banished again from Africa, with threats that his life would be taken if he ever returned, but with unabated love and zeal he went there again in 1314. For over ten months this veteran of the cross dwelt in hiding, talking and praying with his converts, and trying to influence those who were still in darkness. Weary of seclusion, he, at length, came forth into the open market and presented himself to the people as the man whom they had expelled, and who desired still to preach Christ to them. He seemed to court martyrdom. He was seized and dragged out of the town, and by the command, or at least the connivance, of the king, he was stoned to death.

Lull's life-work was three-fold: he devised a philosophical or educational system for persuading non-Christians of the truth of Christianity, he established missionary colleges, and he himself went and preached to the Musulmans, sealing his witness of Christ with his blood. There exists no complete catalog of his books, but he wrote on nearly every known subject, and in the first published edition of his works (1721) two hundred and eighty titles are given.

LUMBAN NA BOLAN: A settlement in the Toba Lake region of Sumatra. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 1 native worker, 1 Sunday school and 1 day school.

LUNDU: A settlement in Sarawak, Borneo, situated on Datu Bay, about 40 miles W. of Kuching. Station of the SPG (1853), with (1903) 1 missionary, 3 native workers, 2 places of worship, 2 day schools and 60 Christians.

LU-NGAN-FU: A town in the province of Shan-si, China, situated in the S. E. of the province, about 100 miles N. N. E. of Ho-nan-fu. Station of the CIM (1899), with 2 missionaries, 3 native workers, 1 chapel, 1 Sunday school and 35 professed Christians. Name is sometimes spelled Lung-gan.

LUNG-CHAU. See Lang-chau.

LUNG-TSUEN-HSIEN: A town in the province of Che-kiang, China, situated about 95 miles W. of Wen-chau. Mission station of the CIM (1894), with (1903) 1 missionary and his wife, 4 native workers, 1 chapel and 1 Sunday school. The name is sometimes spelled Lung-ch'un.

LUPEMBA: The name of a tribe found 100 miles E. of the north end of Lake Nyassa in German East Africa, among whom the Berlin Mission Society carry on work (1899), with (1903) 3 missionaries, 4 native workers, 2 outstations, 1 day school and 11 professed Christians.

LUTHERAN FOREIGN MISSIONARY SOCIETIES in the United States: The early Lutheran Church in the United States was predominantly German, tho with some English and Swedish elements, and was chiefly confined to Pennsylvania. The lack of a regular ministry and the heavy strain on a few pastors resulted in a earnest appeal to Europe for help. France, at Halle, was much interested, and at his request Heinrich Melchior Muhlenberg, who had been intending to go as a missionary to India, came to Philadelphia in 1742. While chiefly absorbed in the organization of the Church (which gave him
the title of Patriarch Muhlenberg) he kept missionary work among the Indians at home as well as in foreign lands constantly in mind.

The first direct interest in foreign missions appears to have been aroused by the work of the Rev. C. T. E. Rhenius, a German missionary of the CMS in India. In 1821 the General Synod at its first meeting resolved to form a missionary institute, and some aid was sent to the work of Rhenius in India. Contributions were also made to the ABCFM, then a distinctively undenominational organization. In 1833 the General Synod urged the subject upon the district synods, and in 1835 the Central Missionary Society was organized at Mechanicsburg, Pa., followed in 1837 by the German Foreign Missionary Society in the U. S. A. It was hoped that all would unite in this, but the German Reformed Church and several Lutheran churches held aloof. Soon the name was changed to the Foreign Missionary Society of the Evangelical Lutheran Church in the U. S. A. From this time until 1859 the greater part of the Lutheran churches contributed through this organization, but in that year the General Council organized its own missionary institute, and some aid was sent to the CMS entirely willing to be relieved of additional burdens. Overtures were made to the General Council, and at its meeting in Chicago, November, 1869, it formally accepted the responsibilities. During the same year the General Synod affected a reorganization of its work under a new name.

General Synod of the Evangelical Lutheran Church in the U. S. A.: Headquarters of the Board of Foreign Missions, 1005 West Lavalle St., Baltimore, Md.

The General Synod has worked through its own Board of Foreign Missions since the arrangement with the General Council in 1869.

1. India: That arrangement left under the care of the Foreign Missionary Society of the General Synod the Guntur and Palnad stations, embracing a territory about sixty miles broad and sixty miles in width, with a population of about 1,000,000 souls, chiefly Telugus, among whom practically nothing had been done at that time. Rev. E. Unangst remained the only missionary on this field until 1871, when he was obliged to take his family to America. Remaining there only one year to recruit, he returned to India in 1872 without his family, accompanied by the Rev. J. H. Harpster. Since then the mission has been reinforced at various times, and a large force of native laborers has been raised up in the different departments of work.

At the close of 1902 there were 27 missionaries (including wives), 6 Eurasian assistants, 220 native evangelistic workers, including pastors, catechists, Bible women, etc., and 286 teachers. The number of stations has increased to 7, while 449 congregations assembled regularly and the villages reached number 618. The buildings were 7 churches, 157 prayer and school houses, 11 mission bungalows, 1 hospital, 1 college and 1 printing house. The communicant membership was 5,886, and there were 9,163 inquirers and 35,955 under direct Christian influence, the total number of missions in a single year numbering 2,581. The Sunday school work has grown until there are 269 schools, with 465 teachers and 15,965 scholars.

Closely associated with this is the medical and Zenana work carried on by 5 missionary women, with 4 assistants and 52 teachers. Of these, 9 are specially engaged in the home work, visiting 115 homes and instructing 150 Zenana pupils. In the hospital there are 650 patients, while the dispensary patients were 15,759.

In common with other successful missions in India, considerable attention is paid to education. The policy of the mission is to educate the children as far as the primary grade, when they are sent to the branch schools at Guntur, where are the college under the presidency of the Rev. L. B. Wolf, D.D., a boarding and training school for boys, etc. The report for 1902 shows in the college 7 Christian, 21 Hindu and 4 Mohammedan teachers, 73 Christian, 552 Hindu and 50 Mohammedan pupils, a total of 675. The year showed an increase of 87 in attendance and an income amounting to 88 per cent. of total ex-
The foreign mission work of the General Council of the Evangelical Lutheran Church in North America, with its headquarters at 33d and Diamond Sts., Philadelphia, Pa., comprises the districts of Rajamahendri, Dowgulamulla, and Sika in Ceylon; the district of Tagurupad and Bhimawaram in Hyderabadd; and the station of Shajahanpur in the United Provinces of Oudh. The station of Shajahanpur, situated 2 miles S. of Karnak, on the site of ancient Thebes, and having magnificent ruins of temples in a rock-bound valley. The name is from the Arabic El Kusr (The Palaces). Station of the Rev. Henry Heigerd, arrived in Liberia April 5. The location selected, and still occupied by the mission, is a high bluff on St. Paul's River, about thirty miles above Monrovia. A grant of one hundred acres of land was secured from the Liberian Government for a mission farm, and a reserve of two hundred acres more for future settlers about the mission. Suitable buildings were erected, and a short time afterward 40 children were secured from a large number of recaptured slaves that had been landed at Monrovia. These children were bound to the mission by the government, were then named after well-known women in the church at home, and thus the Muhlenberg Mission was begun, and the foundation laid of the Christian settlement which has since grown up around the mission. A native Christian church, organized in 1861, is self-sustaining, and there are two other churches and five outstations. The pastor was one of the slave children with whom the mission was started and a corps of native workers has been developed.

The industrial department has always been one of the special features of this mission, and its coffee plantation was long relied upon to meet many of the current expenses. Difficulties in marketing the coffee emphasized the mercantile side so much that there was a general feeling that the distinctively missionary element was being crowded out, and of late the coffee farm occupies a minor place in the view of the missionaries.

Meanwhile, educational and general evangelistic work is being pushed very vigorously, both in Liberia itself and in the surrounding districts, from which come appeals for teachers and preachers.

A Woman's Home and Foreign Missionary Society has been formed in connection with the General Council of the Evangelical Lutheran Church in North America, with its headquarters at 33d and Diamond Sts., Philadelphia, Pa.

United Synod of the Evangelical Lutheran Church in the South: Headquarters of the Board of Missions and Church Extension, 376 Spring St., Atlanta, Ga.

This society was organized in 1886, but did not commence distinct foreign work until 1892, when a missionary, the Rev. J. A. B. Scherer, was sent to Sago in Japan. There are now (1903) three ordained missionaries, one of them being Rev. R. B. Peery, Ph.D., author of The Gist of Japan, etc. There are also 3 native evangelists at work in Sago and Kumamoto and the 3 Sunday schools are prosperous. The number of church members reported is 77 and there are about 150 in the Christian community.

Several synods combine in this work, as also three organisations conducted by women.

LUXOR: A village on the left bank of the Nile, situated 2 miles S. of Karnak, on the site of ancient Thebes, and having magnificent ruins of temples in a rock-bound valley. The name is from the Arabic El Kusr (The Palaces). Station of the UP (1875), with 1 missionary and his wife, 1 woman missionary, 11 native workers, 5 outstations, 1 Sunday school, 1 boarding school, 3 day schools and a boat on the Nile for missionary tours.

LYALLPUR: A growing city in the Jhang district of India, situated about 100 miles W. S. W. of Lahore. Station of the Reformed Presbyterian General Synod, with (1900) 1 missionary, 2 native workers, 1 outstation, 63 professed Christians, 1 place of worship and 1 Sunday school. Society spells the name Lyalpur. Station of the UP (1869), with (1903) 1 missionary and wife, 4 women missionaries, 36 outstations, 4 Sunday schools, 4 day schools and 110 professed Christians.

LYDD, or LYDDA. See LUDD.
Lydenburg: A town in Eastern Transvaal, Africa, south of the Limpopo River, northeast of Pretoria. Population, 2,000. Station of the Berlin Mission Society (1896), with (1903) 1 missionary, 19 native workers, 9 outstations and 1,921 professed Christians, of whom 992 are communicants. Name also written Leidersburg and Lydensburg.

Lyman, Henry: Born 1810, in Massachusetts; graduated at Amherst College 1829, Andover Seminary 1832; studied medicine and sailed with Rev. Samuel Munson, 1833, under the ABCFM, with instructions to explore the Indian Archipelago. Landing at Batavia, April, 1834, they visited Padang in Sumatra and the Butu group of islands, spending there a month, and collecting much valuable information. Thence they went back to Sumatra, intending if practicable to visit the Battas of the interior. They were advised, on account of dangers, not to attempt it.

But as others had visited the interior with safety they ventured to proceed, and June 23 set out on foot with a few native assistants, among them an interpreter. After five days' journey they came to Sacca, a region where war was raging among the villagers, and they were soon surrounded by two hundred armed men, and Mr. Lyman was shot and Mr. Munson pierced with a spear. A terrible punishment was inflicted on the murderers. The people of the neighboring villages having learned that the strangers were good men, who had come to benefit the Batta people, leagued together, burnt the village of Sacca, killing many of the inhabitants, and destroyed their gardens and fields. The death of these men produced a deep sensation throughout the Christian world. Mr. Lyman was the author of Condition of Females in Pagan Countries.

Macaboo: A town on an island of the same name in Canton River, China, situated 38 miles W. by S. of Hongkong. It is divided into two parts—Chinese and Portuguese. It was here that Camoens composed much of his Lusiad in 1556. The town was rented to the Portuguese in 1855, but the treaty was revoked in 1868, and the Portuguese now hold Macao with two adjacent islands as a colonial possession. Population (1896), 78,627, of whom 74,568 are Chinese. Mission station of the CA. The Canton College (PN) is temporarily established at Macao.

Macassar Language: A Malay dialect, spoken in the island of Celebes, Dutch East Indies. It is written with characters special to the dialect. The full form of the name is Maugkassar.

Macedonia: Name given by foreigners to the Turkish provinces of Kosovo, Monastir, and Salonica, in the main coincident with a part of the ancient Macedonia. Mission work is carried on there by the ABCFM, the Church of Scotland missions to the Jews, and the BFBS.

Macedonian-Roumanian Language: A dialect of the Roumanian, which is spoken by Wallachs settled in European Turkey. When written, the Slavic (Cyrillian) letters in their modern form, or modified Roman letters, are used.

Macfarlan: A town of Cape Colony, Africa, situated 12 miles N. by E. of Alice. Station of the UFS, with (1903) 16 native workers, 6 outstations, 1 place of worship, 7 day schools, and 554 professed Christians.

Mackay, Alexander M.: Born at Rhyne, Aberdeenshire, Scotland, October 13, 1849; a son of a minister of the Free Church. At three years of age he read the New Testament; at seven, Milton's Paradise Lost, Gibbon's Decline and Fall of the Roman Empire, and Robertson's History of the Discovery of America. His father taught him geography, astronomy, and geometry, stopping in their walks to demonstrate a proposition of Euclid, or illustrate the motions of the heavenly bodies, or trace the course of a newly discovered river of the Dark Continent with his cane in the sand. He listened with interest to letters and conversations of men of science, as Hugh Miller, Sir Roderick Murchison, and others, who were sometimes visitors at the manse, sometimes in correspondence with his father. He chose engineering as his profession, and for some time he was draughtsman and designer to a large engineering establishment in Berlin. In 1875, in response to an appeal from the CMS for a practical business man to go to Mombasa, he offered himself, but another person had been secured. Later in the year an offer of a highly lucrative secular position was made him, but he declined it, that he might be ready, when the Lord should permit him, to go to the heathen. Early the next year he was appointed by the CMS to go to the Victoria Nyanza, reaching Zanzibar May 29, 1876. In November, on the march through Ugogo, he was taken very ill, and was sent back by Dr. Smith, but recovered before reaching the coast. Instructed by the secretary not to return before the close of the rainy season, he constructed 230 miles of road to Mpwapwa. In November, 1878, he reached Uganda. Alluding to the kind treatment he had received from the natives, he says: "Wherever I find myself in Stanley's track, I find my treatment of the natives has invariably been such as to win from them the highest respect for the face of a white man." Mr. Mackay had acquired a knowledge of the Swahili language, and was able immediately to print portions of the Scriptures (cutting the type himself) and read and explain them to the king and his people. King Mfere showed much interest in the truth. In 1884 the native church consisted of 86 mem-
ers. But in that year King Mtesa died, being succeeded by his son Mwanga, who proved to be weak and vacillating, lending himself now to the Mohammedan and now to the Roman Catholic party, persecuting the evangelicals, and often threatening Mr. Mackenzie with expulsion. But Mr. Mackay held his ground, and was allowed for a time to continue his work, his skill as the engineer and mechanic, of which the king often availed himself, helping to secure his favor. In 1886 the persecution broke out again, many under great tortures exhibiting a Christian fortitude and heroism unsurpassed in apostolic times. In 1887 the Arabs succeeded in persuading Mwanga to expel Mr. Mackay. Having locked the mission premises, he embarked July 20 for the southern end of the lake, making his abode at Usambaro. Here he remained for three years, translating and printing the Scriptures, teaching the Christian in attendance from Uganda, instructing the natives of the district, as far as he could, with an imperfect knowledge of their language, and working at house-building, brick-making, and the construction of a steam-launch with which to navigate the lake. He was attacked with malarial fever February 8, 1890. Mr. Mackay utilized the knowledge of both classical and modern languages in reducing the vernacular of Uganda to writing. He was a born leader of men, as gentle as he was brave. He was no mere industrial and civilizing missionary, and took a leading part in the evangelistic work of the mission.

MACKENZIE, J. Kenneth, M.D.: A medical missionary of the LMS; was first appointed to Hankau; he took charge of the mission hospital there till 1878, when in the autumn he was transferred to Tientsin. A dispensary was opened in the Viceroy Li Hung Chang’s theater, with a female department, and large subscriptions were made by the Viceroy and other high officials toward the building of a hospital. In 1881 the hospital, on the premises of the London Mission, was opened by the Viceroy, and plans were adopted for a medical school, to which the students formerly sent to the United States of America by the government were sent to be trained as doctors, and a thorough organization of a medical staff for the Chinese army and navy was in course of formation. Amid his arduous duties Dr. Mackenzie found time to pursue evangelistic work, both among the poor patients and those “in Cesar’s household,” for the favor of the Viceroy secured him access to many of the high officials. The work at Tientsin grew and extended, so that in his last report, 1887, he gave 13,799, in-patients in the hospital 591, and 9,209 outstations, 3 chapels, 3 day schools, and 116 Christians.

MACUATA: A settlement on the S. side of Vanua Levu, Fiji Islands, situated near Cacaudroove. Station of the Australian Wesleyan Mission, with (1900) 1 missionary and his wife.

MADAGASCAR: An island in the Indian Ocean nearly parallel with the eastern coast of South Africa, from which it is separated by the Mozambique Channel, which varies in width from 220 to 540 miles. Its northernmost point is in 11° 37' 30" south latitude, and the southernmost in 25° 38' 55" south latitude. Its breadth is at the widest point over 7° of longitude. Its extreme length is 975 miles, and its breadth varies from 250 to 350 miles. Its area is about 230,000 English square miles. It is the third largest island in the world, ranking only below Borneo and New Guinea.

Madagascar has a coast-line of over 2,000 miles, and on the northwestern, northern, and northeastern coasts there are many good and some excellent harbors; but south of latitude 19° there are very few roadsteads where a vessel can ride in safety, either on the east or west coast.

The island is of volcanic origin, and has many extinct volcanoes and some which, if not now active, have been so within the historic period. Its general structure includes three or four ranges of mountains, not parallel, but extending from north to south, with many spurs; these are in the central portions of the island, the nearer to the east than the west coast. Some of the ranges extend nearly to the northern limit of the island, and others to the southern coast. This montaneous region constitutes the finest portion of the island. Immediately below this region is a forest region varying in latitude from 1,800 to 4,000 feet, and in breadth from 30 to 50 miles. From the forest belt to the coast extends the alluvial region, flat, low, and marshy, and from 20 to 30 miles wide on the east coast, but from 40 to 60 on the west coast. It is sickly and hot, the decaying vegetation producing fevers and miasmic diseases.

The climate is temperate and healthful in the highland provinces, the temperature rarely above 85° F., or below 40° F., except in the mountains, where it sinks to 32° at night perhaps once or twice in a year. In the forest belt, less healthful and more moist, and at times hot; in the more open timber the climate is delightful. In the littoral region the heat is intense, and the Malagasie fever prevails, and very often proves fatal to those who are not fully acclimated.

Natural History and Products: Madagascar is remarkable in its zoology. There are no great beasts of prey. The lemurs takes the place of the various families of monkeys; there are several species of ant-eaters, two or three civet cats, the aye-aye, an animal found nowhere else, and there are several rodents. Reptiles are numerous, but, except the crocodile and three or four species of pythons, are generally harmless. Birds are numerous, and many of them of beautiful plumage. About two-thirds of the birds are peculiar to the island.

The fish are plentiful, and many of them of edible species. Most of the domestic animals have been introduced, and cattle and sheep are raised and exported in large numbers. Wild dogs are so numerous as to be a pest.

The flora of Madagascar is abundant, and about 700 out of 3,000 species are peculiar to the island. Many of them are of exquisite
beauty. It is a paradise for the orchids, more and more beautiful species being found here than in all other countries. The forests abound in peculiar and valuable timber.

Ethnology and Tribal Divisions: The origin of the Malagasy and their race affinities with the other Oriental nations have led to great controversies among the most eminent ethnologists.

It is generally agreed that the original inhabitants of the island were from some of the African races, and most probably Zulus or Kaffirs. They dark, they seem to have been negroes rather than negroes. A small remnant of them were still living in 1843, and it is believed that a few are yet to be found in the southwest.

In regard to the present inhabitants of the island, known as the Malagasy, these facts are settled: They all speak the same language, the dialects differing no more than the Yorkshire and Lancashire do in England; and this language is of very close kindred with the Malay. There is a marked difference in color, features, and hair among the different tribes: some are of fine stature and physique, but very dark, with curly or frizzly black hair; their features are more of very close kindred with the Malay. There is a

dia. They all speak the same language, the
dialects differing no more than the Yorkshire and
Lancashirle do in England; and this language is
of very close kindred with the Malay. There is a

The theory of their origin which is best supported seems to be that these tribes are of Malayan or Malayo-Polynesian stock; that they came to the island at different times, crowding the aboriginal inhabitants before them, and in the case of the Betamena tribes south of Imerina, perhaps, intermarrying with them.

In 1810 the principal tribes of Madagascar were: 1. The Sakalava, divided into the northern and southern tribes, occupying the western coast and including many smaller clans; their main village was Tamatave, 1,000,000. 2. The Betamissimara, with several clans, and including the Betamena, occupying the coast east, about 1,500,000 more. 3. The Sihanaka and Tanaka-rana, northeast provinces; about 500,000. 4. The Bam and Tanka and some smaller tribes, in the southeast, 500,000. 5. Imerina, the land of the Hovas, then about 600,000; and 6. The Betsileo, 1,200,000. The last two were the highland provinces.

Social and Religious Conditions: The discovered in medieval times, no effort was made by Europeans to explore or colonize Madagascar till 1506, when the Portuguese, after some exploration in 1540, undertook to enslave and Christianize its inhabitants. They made repeated efforts to this end in the next hundred years, landing small colonies and establishing trading-posts, whence they sold the people who came under the name of slaves. These natives lived as Sakalavas, who did not choose to be the prey of European slave-dealers, and massacred the Portuguese colonists and priests in 1548, 1585, 1600, and 1615. The English and Dutch made several attempts to plant colonies at various points on the coast of the island between 1555 and 1640. Both nations were at that time engaged in the slave trade.

In 1642 the French undertook to colonize Madagascar, and within the next 170 years they had organized several great companies or societies, and planted many colonies, in which Lazarist and Jesuit priests were always conspicuous; but owing to their maintenance of the slave-trade, and their treacherous dealings with the natives, four or five of these colonies were attacked and massacred. The last of these societies was obliged, in 1698, to surrender its charter and its whole property to Louis XIV., King of France, who claimed, but never exercised, authority over it. For the next thirty or thirty-five years the northern part of the island was the most formidable rendezvous of pirates who infested the Indian Ocean. They treated the natives well, and several of the tribes were on friendly terms with them; but their rendezvous was finally broken up in 1723. It was not until 1754 that another attempt was made by the French to plant a colony in Madagascar, and this was broken up by a massacre; and during the war between France and England, in 1781, the only two remaining trading-posts, Tamatave and Poule Point, with a mere handful of men in each, were surrendered to the English, as the sole possessions of France in Madagascar.

In all these 170 years of French occupancy there is no mention of more than one Malagasy convert. He had been taken to France and educated, and was killed by his own countrymen with some French priests murdered in 1663. The social condition of these tribes at the beginning of the 19th century was deplorable. They were in continuous war with each other, taking captives to sell as slaves to any foreign merchant who was willing to buy. In fact, the staples of Malagasy trade being slaves and rum, the state of morals was as low as it could be.

The religious system of the Malagasy exercised no influence on their moral natures, and indeed made no pretense of doing so. It was simply supposed to confer upon them temporal benefits; why or for what service on their part does not appear. Their religious system was not as artificial or philosophical as that of many heathen nations; they believed in a supreme being who was willing to buy. In fact, the staples of Malagasy trade being slaves and rum, the state of morals was as low as it could be.

In fact, the staples of Malagasy trade being slaves and rum, the state of morals was as low as it could be.

In the place of priests were "medicine men," who were masters of divination, and who professed to discover crime by the ordeal of administering poison to the suspected one. As to religious worship in public, on certain great feasts, such as the new year, the curious fetishes which served for idols were brought out and during five days were carried about in procession. Mean-time all law was in abeyance and the most incredible licentiousness prevailed.

The government of the various tribes was by chiefs. It was not necessarily hereditary, but confined to the class of nobles (Andriana), and was as often, perhaps, in the female as in the male line, and there was much intrigue, and
sometimes bloodshed, before the ruler was selected. Once on the throne, however, the chief's government was an absolute despotism, sometimes 'tempered by assassination.' There was no written language in the tribes; the decrees of the sovereign were promulgated by heralds. The government was feudal in its character; the chief and the nobles held the tribe in bondage; they owned all the land, and the people as well; either the ruler or the nobles required any work done, the clansman was called out and required to perform the service, providing themselves with food and clothing for the time required. This forced service was called Janomposana, and it existed in a modified form until some time after Madagascar became a French colony.

For the most part, during the 17th and 18th centuries, the Sakalavas, who were divided into two great tribes—the Northern and Southern Sakalavas—seem to have been in the ascendancy. The Hovas and Betsileo were at this time under the English ruler, the Portuguese, the French, the Dutch, nor the English had ever heard of them except in terms of contempt. They were the dogs, the slaves of the Sakalavas. But in 1785 an Andrian, or chief, of the Hovas, called Impoinimerina (the desire of Imerina), succeeded in uniting the divided class of the province of Imerina under his own authority, and by his superior abilities and diplomacy gained to his cause several of the smaller adjacent tribes; but while he proceeded to subdue most of the forest tribes, he was yet compelled to pay tribute to the Sakalava of the western coast. Between 1806 and 1810 he died, and his son, trained in part by Arab teachers, and not over 17 years of age, was proclaimed as Radama, King of the Hovas.

Radama was a very remarkable man. It was his purpose from the day he ascended the throne to throw off the Sakalava yoke and make himself king of Madagascar. To carry out this purpose he negotiated a treaty with the English Governor of Mauritius, Sir Robert Farquhar, by which in return for a promise to suppress the export of slaves from Madagascar, the king was to receive yearly from the British Government money, arms, ammunition, etc., etc. This treaty was ratified after much difficulty October 11, 1820.

Meanwhile, early in 1818, without waiting for the final ratification of the treaty, the LMS sent two missionaries, Rev. S. Bevan and D. Jones, with their families, as their first missionaries to Madagascar. Messrs. Bevan and Jones landed at Tamatave August 18, leaving their families in Mauritius. They were kindly received by some of the chiefs, and collected together a number of children, whom they taught, and made some studies in the language. Two months later they brought their families to Andovoranto, on the coast, where a station was established. But soon all were attacked with the deadly Madagascan fever, and before two months had passed Mr. Jones was the sole survivor of the two families. Mr. Jones was obliged to go to Mauritius to recuperate, and did not return to Madagascar until October 4, 1820. King Radama welcomed him cordially, and gave the fullest permission for English Protestant missionaries to settle at his capital, for the protection of the young and teachable Malagasy boys in the art of printing. No missionaries ever worked harder, and none had more evident manifestations of the divine blessing on their labors. Necessarily, the schools held a prominent position in their work for the first few years. Nearly 100 schools were established in the capital and its vicinity, and between 4,000 and 5,000 pupils of both sexes passed through them before 1828, having received the elements of a good education. The instruction in the arts and trades was also making great progress. A church was organized in the capital. It was entirely in the Malagasy tongue. It was very active in Christian work, and those who understood the Malagasy tongue were encouraged to gather the young Hovas for religious instruction and singing. Two congregations of natives for Christian worship were formed in Antananarivo, and very fully attended; others were formed in villages around the capital. In January, 1828, the Gospel of St. Luke in Malagasy was put to press, and other portions of the Scriptures were printed as rapidly as they could be properly prepared.

It was at this time that the missionaries were beginning to feel encouraged at the great success which seemed to be within their grasp, that King Radama died, on the 27th of July, 1828. Radama was not a Christian, and his death, at the early age of thirty-six, was undoubtedly due to the excesses. He was patriotic, manly, and truthful; he was far-sighted; ambition led him to desire the improvement and elevation of his people, and without any convictions of the necessity of personal religion, he was persuaded that Christianity would be a blessing to his country. The loss of such a ruler, at such a time, seemed the severest blow which could be inflicted upon this infant mission. Radama had selected his nephew as his successor, if he left no son; but one of his twelve wives contrived to secure the throne, which she assented as Ranavalona I. Her first official act was the putting to death of all the near relatives of the late king, and all the officers who had been most attached to him. Some of these were speared, but others of the highest rank, and among them the mother and sister of Radama, and the husband of the latter, were starved to death. No one was left alive who could contest her claim to the throne. The British resident, Mr. Lyall, was ordered to leave the country at a few hours' notice, and his family were subjected to gross insults. The missionaries and their followers were naturally alarmed at these indications of a coming storm of persecution.

In 1829-1831 the queen was engaged in war with the French, whom she defeated. The revolution in France prevented a renewal of the invasion, and the queen turned her armies upon the coast tribes, ravaging their lands and slaughtering the inhabitants during three years.

During this period she found little time to
persecute the Christians, among whom she believed there were very few natives; while she hated the missionaries, she was disposed for a time to allow them to improve the condition of the island and the welfare of the inhabitants. But the strict watch kept up by the queen rendered it impossible for the missionaries to resume their labors, and the schools, the translation of the Scriptures and other books, and their printing went forward rapidly; the New Testament translation was completed, and soon after, by the aid of the British and Foreign Bible Society, its printing was commenced. Through the children in the schools, and those who had got out from them, these portions of the Scriptures were widely circulated; and when in 1832 all the boys above thirteen years of age in the schools were drafted into the army, large quantities of these and other good books were widely circulated. In 1833 not less than 15,000 copies of parts of the Scriptures were finished, and upward of 6,000 of them were sent out.

Meantime there were many converts. On the 29th of May Mr. Griffiths baptized twenty, and the first native church was formed. In the course of a few months there were several churches with nearly 2,000 members. Then the queen forbade the permission to baptize converts, forbade the use of wine at communion, and those of her officials who had been baptized were put into inferior positions. Before 1833 the attempt was made to divest the education given in the schools of any religious character. In July, 1834, the queen forbade any native except those in the government service to learn to read or write. This and other proclamations indicated that the whole force of the queen's displeasure was to be visited on the native Christians; and a few who had manifested some friendship for the Christians (not one of those who had received baptism) began to withdraw from them, and associate with the heathen portions of the community.

Ratsimanisa, who had been the commander-in-chief of the army, and about this time became prime minister to the queen, was the chief persecutor and prompted cruelty greater than even her brutal nature demanded. It was clear to him that if Christianity was not arrested the idolatry of the country would be overturned, and the customs of their ancestors forgotten; and in January, 1835, at his instigation, a formal accusation was made against the Christians, before the chief judges of the Hovas, and the following charges were preferred: 1st. They despise the idols; 2d. They are always praying; 3d. They will not swear, but merely affirm; 4th. Their women are chaste; 5th. They are of one language. All of those of her officials who had been baptized were fined, while any Malagasy seen in company with a missionary was ordered to be put in chains. All portions of the Scriptures and other religious books were ordered to be given up, under the severest penalties; but many were concealed, and gave comfort to the persecuted ones in after years. All religious meetings were prohibited, and spies commissioned to hunt the Christians and their forbidden books.

Altho in June and August, 1835, Messrs. Cameron, Freeman, Chick, and Kitching left Madagascar by order of the queen, Rev. Messrs. D. Johns and E. Baker remained to give what comfort and help they could to the little band of faithful disciples. They also determined to complete the translation and printing of the entire Scriptures and of The Pilgrim's Progress. Their Malagasy printers and compositors had been compelled to leave them, but they toiled on till they had completed both books, and printed an edition of about one thousand copies, which were soon absorbed by the Christians, who concealed them, as far as possible, from the government spies. Probably the larger part were eventually confiscated, but a considerable number came to light after Ranavalona's death. Being again ordered to leave the island, Messrs. Johns and Baker departed in July, 1836, but not till they had bid the converts an affectionate farewell, preaching at great risk in the old chapel at Ambatonakanga from the text, "Lord, save us; we perish." They retreated to Mauritius, but Mr. Johns, at least, visited the island more than once, and in 1840 penetrated to the capital, where he found to his sorrow that their permits of residence had expired. On the 26th of February, 1838, several officers, headed by Ratsimanisa, entered the chapel at Ambatonakanga in the capital and read a letter from the queen addressed to the missionaries, forbidding religious worship, the rite of baptism, and the assembling of a society, to her subjects. The Europeans were permitted to follow their own customs and religious practices, but they could not be allowed to teach them to the subjects of Ranavalona. They would be allowed to teach such arts and sciences as would be beneficial to her subjects, but not theology or the arts and sciences of the Christian Church.

A great mass meeting, or kabary, of all the people was now called for March 1. There was firing of cannon and musketry, and the soldiers surrounded the multitude to inspire them with terror, and then the principal judge addressed the kabary delivery and long missionaries had never heard. The queen, calling upon all who had been baptized, all who had worshiped and kept the Sabbath, or had entered into a Christian society, to come forward and accuse themselves, and confess such crimes, under pain of death. Ratsimanisa repeated the substance of the queen's royal message, and some of the head men replied to it with severity. Others seemed reluctant to make reply, when Rainiharo, one of the queen's chief officers, and for twenty-five years a prime minister, the bitterest of persecutors, said that unless the guilty came forward within a month to accuse themselves, the officers and judges would cut off their heads. The queen reduced the time for confession to a week. About two thousand confessed, and on the 9th of March, 1835, she pronounced sentence on them. Some hundreds of Christian officers were degraded and about 1,600 persons not in government service were fined, while any Malagasy seen in company with a missionary was ordered to be put in chains.

All portions of the Scriptures and other religious books were ordered to be given up, under the severest penalties; but many were concealed, and gave comfort to the persecuted ones in after years. All religious meetings were prohibited, and spies commissioned to hunt the Christians and their forbidden books. French island of Nosî-Bê, near the northwestern coast of Madagascar, but succumbed to the fever, and died a martyr to his zeal for the rescue of the Malagasy converts.

Greatly to the astonishment of Queen Ranavalona, her plan for extinguishing Christianity in Madagascar signalily failed. She had closed the schools; prohibited all religious meetings; sent away all the missionaries; confiscated all the Scriptures and religious books she could find; degraded, fined, and whipped the Christians, and threatened them with severer punishments; and yet the faith was increasing every day. Some determined upon severer measures, for she had sworn a solemn oath to root out Christianity if she had to put every Christian to death.

Early in 1836 Rapharavavy, a woman of high rank, was accused of Christianity, and was condemned to death; but the queen, being alarmed by a great fire in the capital, spared her life, but fined her heavily. The avowed executions for professing Christianity did not begin until August, 1837, when a prayer-meeting was discovered and broken up. The storm of persecution now increased in violence, and a large number of Christians were condemned to death. There were many hundreds of these sufferers for Christ's sake, but none of them turned back to the vile life of the heathen; and, what was especially astonishing to the queen, there were scores of adherents to the new faith for every one whom she put to death. The persecution raged fiercely in 1839, 1840, 1841, and 1842.

The years from 1843 to 1848 were marked by a decided lull in the persecution. The queen was in difficulties with both England and France, and her attention was diverted from the Christians by the incidents of the war. In this lull of the persecuting spirit the Gospel made great progress. The queen's son, Rakoto (afterward Radama II.), took a great interest in the Christians, and it is said professed conversion; Prince Ramanja, his cousin, was already an active Christian, and had suffered for the faith, and, among others of noble rank, the son of Rainiharo, the prime minister of the queen, and the most violent persecutor among the Havas, had joined the Christians. The native preachers preached and baptized almost openly in the suburbs of the capital were driven from their homes by the queen. In the city daily meetings were held in the churches. Another fiery baptism came in the early months of 1849. Some of the Christians were hurled over the cliffs; some were burned at the stake—many were crucified.

Every possible indignity was inflicted upon those who were condemned to death. These executions were continued till hundreds had perished. In addition to those who endured the extreme penalty of death by these various modes of destruction, a far larger number suffered in other ways, and in very many instances their sufferings terminated in death or helplessness. Thirty-seven preachers, with their wives and families, were consigned to a life of irredeemable slavery. Altogether, in the early spring of 1849 probably more than 2,000 were thus punished and tortured and executed for the friends of Christianity. This cruel persecution went on for years. Numbers fled to the mountains, or hid themselves in the depths of the neighboring forests, eking out a scanty subsistence, until want and exposure put an end to their lives. Others constructed hiding-places in their own houses, in their rice-pits, and on their own farms, and were there tended and supplied with food by their relatives for years, reappearing long after they had been accounted dead. All the testimony, both heathen and Christian, shows that not only was there no recantation among these converts to Christianity, many of whom were illiterate, but recently brought to Christ, but that they bore the gross indignities and the cruel and terrible deaths to which they were subjected with quiet heroism and unaltering trust in God. "Let us go and see how these Christians behave: they are said not to be afraid to die," were the words of some of the principal officers of the royal household. The same officers said afterward: "We were near, and saw all that took place. The Christians were not afraid, and did not recant."

Their fortitude and courage produced a deep impression on the minds of the people. Mary said: "This is the finger of God; there must be something divine in this belief;" and they were led to become Christians notwithstanding the peril to which it exposed them.

This persecution continued with great fury till 1852, when the death of Rainiharo, the prime minister; the influence of the young prince, which was exerted in favor of Christianity; and of his cousin Ramonga, who was an active Christian—were instrumental in producing greater toleration.

During this period of comparative quiet, Rev. William Ellis, Foreign Secretary of the London Missionary Society, made three visits to Madagascar, in the hope of bringing comfort to the suffering, faithful disciples in Imerina, in 1853, 1854, and 1856. In these visits he was able to cheer and comfort many of the Christians, to distribute many copies of the Malagasy New Testament, and in his third visit to make the acquaintance of the young Prince Rakoto (later Radama II.). He was also presented to the queen, who treated him courteously, but coldly.

Three months after his last visit, on the 2d of July, 1857, the last great persecution commenced. On that day the population of the capital were driven from their homes by the soldiers to a great National Assembly. The queen announced her determination to stamp out Christianity. All suspected persons were imprisoned, and daily tribunals were held to sentence the Christians by the incidents of the war. The queen announced her determination to stamp out Christianity. All suspected persons were imprisoned, and daily tribunals were held to sentence the Christians.

It was believed that this was the most fatal of all the persecutions. A large number were sentenced to the tangena ordeal, by which many died, and many more were put in chains and reduced to slavery. This persecution was maintained for nearly three years. But on the 15th of August, 1861, the queen died. She had reigned thirty-three years, and twenty-five of those years had been marked by vain efforts to root out Christianity from the island. The result had been that those who were persecuted "went everywhere, preaching the Word." Christian life had attained a depth, power, and reality which would have been impossible in a time of ease and prosperity. Several thousands had been put to death in ways so horrible that a company of believing men and women, left as sheep without a shepherd in 1836, had multiplied at least twenty-fold in 1861.

On the 15th of August in that year, Prince Rakoto, the son of Ranavalona I., succeeded his mother with the title of Radama II. "The sun
did not set on the day on which Radama II. became King of Madagascar," says Mr. Ellis, "before he had proclaimed equal protection to all its inhabitants, and declared that every man was free to worship God according to the dictates of his own conscience, without fear or danger." Within a month after the queen’s death, seven houses were opened for the worship of God in the capital and great numbers in the adjacent country, and churches were being erected everywhere, and filled Sabbath after Sabbath with rejoicing and prayer. Within very few years more churches were erected on the chief places of martyrdom. Thus, Antananarivo became famous alike for its churches and palaces.

Radama II. invited the missionaries of the LMS, and especially his friend, Rev. William Ellis, to return. Mr. Ellis reached the capital in June, 1862, and was followed by three ordained ministers, a medical missionary, a teacher and a printer, who were all soon busy resuming the work laid down in 1836. Christianity had triumphed. The 2,000 adherents to the Christian cause, who then braved the persecuting queen, had become a host of 40,000, only about one-fifth of them baptized believers, but all witnesses for Christ, and ready to suffer and die for Him. Back of these were more than 100,000, who, not believers, had rejected idols and were ready to embrace Christianity.

Radama II. was a man of fair abilities and of a kindly and amiable disposition. He had, in the later years of his mother's life, been very much influenced by the missionaries, and was prepared to embrace Christianity.

THE ENCYCLOPEDIA OF MISSIONS 424

understood that Madagascar was to be a Christian kingdom, and that Ranavalona II. was to be the first Christian queen of the island. On the 3d of September, 1868, the first public occasion when the sovereign formally appeared before the people took place. It was celebrated with great pomp and ceremony, and prayers were offered by one of the native pastors. On the 19th of February, 1869, the queen, following the example of former queens, was married to the prime minister, Rainilaiarivony. Two days later, a very careful and thorough examination, very minute inspection, was made of the palace, one of the most eloquent and devoted of the native pastors. It was the custom with each sovereign of Madagascar to erect at the beginning of the reign some stately building, usually a palace, in the royal enclosure. Queen Ranavalona II. commenced the erection of a stone church in the palace enclosure in July, 1869.

The idol-keepers and the idol-worshippers of Imerina saw that the power would soon pass out of their hands, and they were enraged. The principal idol-keepers were at the palace, and they demanded that the queen should return to the worship of her ancestors. The language used was unreasonable, and after a hasty consultation it was decided to burn the idols of the Royal Palace. This was done on the 8th of September, 1869, in the presence of many witnesses. The people followed the example of the queen, tho with many apprehensions of evil and disaster, and the greater part of the idols were destroyed.

In a few days requests came from all parts of the island: "You have destroyed our gods, and we know not how to worship according to the new religion; send us teachers." So many requests of this sort came to the prime minister that he called the missionaries together, and after deliberation 126 teachers were sent out, all selected by the missionaries of the LMS.

Thus was the final blow struck which insured the supremacy of Christianity in the island of Madagascar. Fifty years before they were in the darkest depths of heathenism; forty years before there was not a native Christian among the millions of the Malagasy; now there were probably 50,000 communicants, 150,000 adherents, many thousand scholars in the schools, and a population of at least 1,500,000 asking for Christian instruction. Outside of Imerina, the Sakalava, the Bara, the Betanimena, the Betsimisaraka, and many of the smaller tribes—that is to say, at least two-thirds of the whole population—were still savages and idolaters of the worst sort, liars, thieves, bloodthirsty, and lustful; they persisted in making raids for plunder and slaves, until the queen's firm and gentle management made them ashamed. Even of her own Hova and Betsileo people, nearly 2,500,000 in number, only about 150,000 were nominally Christians; and the rest, tho their idols were burned, were liable to lapse into idolatry again if they had a determined leader.

The queen, as soon as possible, sent missionaries and teachers to those tribes in the darkest depths of darkness. Above all her other acts of patriotism were those relating to slavery. She, by severe edicts, prohibited the importation or sale of any slaves in Madagascar; and, finding these edicts evaded, she ordered that every Mozambique slave should be set free, and be at liberty
to return to Africa or remain on the island. As there were about 150,000 of these, the cost of this liberation was borne by her husband and herself from their own private fortunes. They had previously emancipated all their own personal slaves. This heavy sacrifice was made for the good of her country, and to please God.

It was now settled that Madagascar would henceforth be a Christian country, ruled by a most devoted Christian. This is not the place to go into details of the later history of Madagascar, or of the attacks made upon it by France. What seems most absurd of all was the proposal presented under the ill-grounded influence of Lambert and his Jesuit friends, finally arising out of the attacks made upon it by France, that there were about 150,000 of these, the cost of this liberation was borne by her husband and herself from their own private fortunes. They had previously emancipated all their own personal slaves. This heavy sacrifice was made for the good of her country, and to please God.

MADANAPALLI: A town in the District of Cuddapah, India, situated 45 miles N. by W. of Chittur, with a population of 9,000. Mission station of the BMS (1886), with (1903) 1 missionary and wife, 3 native workers, 18 converts, and 350 professed Christians.

MADARIPUR: A town in the District of Faridpur, India, situated at the confluence of the Arial Khan and Kumar Rivers, 40 miles S. W. of Dacca. Population, 13,800, of whom 9,100 are Hindus and 4,700 Muslims. Mission station of the BMS (1886), with (1903) 2 missionaries and their wives, 43 native workers, 17 outstations, 23 day schools, 3 young people's societies, 13 day schools, 3 boarding schools, 1 dispensary, and 581 professed Christians, of whom 176 are communicants.

MADRAS: Capital of the Madras presidency, and the third city in size and importance in all India, being outranked only by Bombay and Calcutta. It is situated on the east coast of the peninsula of India. Population (1901) 509,346. The first settlement was begun in 1639, when a grant of land was obtained by Mr. Francis Drake, a servant of the East India Company, from the Hindu prince who possessed jurisdiction in that region. A factory or mercantile establishment of the Company and slight fortifications were at once erected, and the city has grown steadily from that beginning. The name of the city is uncertain. The word "Madras" signifies a Mohammedian school, and some scholars consider the name of the city to have been derived from that word. In 1653 Madras was the seat of the local government or presidencies of the Company, in opposition to Bombay, which was the seat of the Company in South India. In 1748, during the time when the French power in South India threatened to eclipse the English, it was taken by the French commander La Bourdonnais, but was restored two years later by the treaty of Aix-la-Chapelle.
had become the largest city in South India. Its growth since then has been less than that of Calcutta or Bombay, for its natural advantages are far less than those enjoyed by its sister cities. It has no natural harbor; vessels are obliged to lie off at a distance of a mile, more or less, from the shore, and for many years freight and passengers were transported between the shore and the ships in surfboats, for the skilful management of which, through the surf which breaks ceaselessly on the beach, the boatmen of Madras are famed. In 1862 a pier was constructed, which extends out 300 yards into the sea; and more recently still the construction was undertaken of an artificial harbor, consisting of two parallel breakwaters curving toward each other at the outer end. The city is by no means compact, but stretches along the shore of the Bay of Bengal for more than 9 miles, and its territory extends 3 miles inland. Of the population more than three-fourths are Hindus. The Mohammedans number only one-eighth; Christians nearly as many. Tamil is spoken by more than half of the entire population; Telugu by a little less than a quarter.

Danish missionaries had been operating at Tranquebar and other points south of Madras for a number of years early in the 18th century but had no central office of the Danish government in Madras itself. In the year 1716, with the help of the English chaplain at Madras, they commenced a Christian school, which, however, languished and soon ceased altogether. In 1726, Schultze, one of the missionaries at Tranquebar, made a journey to Madras, began the school work again, and laid the foundations of the first Protestant mission in the capital of South India. A few years afterward the Society for the Propagation of Christian Knowledge, of England, undertook its support, Schultze devoting himself in charge of it. The missionary labored hard, preaching, teaching, translating and writing. Results were not slow in appearing. In the one year 1729 Schultze baptized 140 persons; by the end of 1736 the converts numbered 415. The mission was encouraged by the Madras government, and other missionaries arrived from Europe, and the work went on apace. In 1746 the capture of the city by the French was the occasion of much distress to the mission; its work was interrupted, its buildings destroyed, and in 1749, when the French conquered the island as a magazine. In 1748, when the city was returned to the English, the missionaries and Christians who had fled during the troubles came back, and operations were resumed—still under the fostering care of the government. By the end of the 18th century some 4,000 persons had been received into the Christian church. With all this apparent success it may be doubted if the real achievements were very great. These numerical results were not carried over into the present century; on the other hand, when the mission was revived after a similar career which rears up, the work began in 1814. From the first this mission paid much attention to education, as well as to preaching, and schools for both sexes were carried on with vigor. The CEZ began its work for women in 1876. The YMCA and the YWCA also took a strong part in the work. About the year 1826—just 100 years after its establishment by Schultze—the original mission of the Christian Knowledge Society was transferred to the care of the SPG. The ABCFM entered the field in 1830, and withdrew in 1864 in order to concentrate its strength more effectively elsewhere. The Leipzig Society entered Madras in 1848. The Established Church of Scotland began a mission in 1837, and devoted its energies, as in Calcutta and Bombay, especially to the higher education, through the medium of the English language. The fervid eloquence of Dr. Duff of Calcutta during his first visit home is said to have been the exciting cause of the beginning of the Madras work. The Scotch institution was begun in 1837 with 59 pupils but had 277 on its rolls at the end of the following year. After the disruption of the Scotch Church the Madras missionaries sided with the Free Church and their work is now carried on by the UFS. In 1843 another mission of a similar character was begun by the Old Kirk, and in 1893 the Church of Scotland Women's Committee took up work there. The Strict Baptists have a small mission in Madras, begun in 1866, and the Danish Lutherans another dating from 1878. The Christian Literature Society for India has here its central station, to whose schools for the training of teachers are in other parts of India. There is also a mission especially for lepers, over 400 of whom were reported in the census of 1881. The usual missionary agencies are reenforced by the Bible and Tract Societies, and by the Society for the Propagation of Christian Knowledge—the venerable organization which so long supported the mission started by Schultze, but which now works wholly through the press. The ME, under the lead of Rev. Wm. Taylor, began work in 1872, at first directing its efforts especially to the evangelization of Europeans and Eurasians, the noble neglecting persons of other races who might be brought under its influence. The ABMU commenced its operations in 1878. The YMCA and the YWCA also have flourishing centers in the city. The Salvation Army has a strong post here.

Besides the mission chapels, the city is well provided with Protestant churches for the accommodation of Europeans, and with Roman Catholic churches for persons of all nationalities who adhere to that form of Christianity. The usual institutions of a philanthropic or literary character which spring up everywhere in the path of enlightened and liberal government, such as hospitals, libraries and the like, are not wanting in Madras. Education is in a fair state of progress. Taking all of the societies together the Protestant missionary enterprise in Madras and its suburbs now (1903) has 104 missionaries, men and women; 766 native workers, men and women; 36 places of worship, 135 day schools, 18 boarding schools and higher educational institutions, 2 printing houses and 8,551 professed Christians, including baptized children and 4,508 communicants.

**MADRAS PRESIDENCY:** One of the general divisions into which British India is divided. It is ruled by a governor and council appointed by the crown under the governor-general and vice-
roy of India. This presidency covers the southern portion of the Indian peninsula—with the exception of the territory still under native princes. Its eastern boundary is the Bay of Bengal, its western the Indian Ocean. But the territory of the presidency extends along the coast for some 1,200 miles, while its western shore line, along the Indian Ocean, extends only 540 miles. On the north and north-west it joins (proceeding from east to west) Orissa, a part of the Bengal presidency; then the Central Provinces; then the dominions of the Nizam at Haidarabad, and finally, as its boundary line nears the Indian Ocean, the presidency of Bombay. Near the center of this irregular triangular territory is the great native state of Mysore, including five smaller native states which are closely related to the Madras Government, and directly subordinated to it. The total area of the presidency is 149,092 square miles, and the population (1901) 42,400,000. The presidency may be divided, as to its physical aspects, into three well-marked areas. Along the northern coasts is a tableland, supported on its western edge by the Western Ghats and sloping down gradually toward the Bay of Bengal on the east, its boundary on that side being the eastern range just alluded to. Much of the high interior is occupied by the native state of Mysore. The mountains rise to greater heights as they go south; the highest peaks of Southern India are those of the Nilgiri and Anumalai groups, several of which are between eight and nine thousand feet high.

The population is chiefly Hindu. 37,026,471 Hindus, 2,732,931 Mohammedans and 1,934,480 Christians, with 673,905 Animists or spirit-worshippers, make up the list of religions in the census of 1901, whose adherents exceed 30,000. The Hindus of this presidency, and some of the so-called aboriginal tribes also, belong to the Dravidian family, of which the strongest subdivision is that now known as the Tamil. People of this race appear, in prehistoric times, to have occupied the Gangetic valley, and to have been pushed south by the invading Aryans some centuries ago, and this “Syrian Church of Malabar” preserves its ancient liturgies, and still acknowledges subjection to the patriarch of Antioch. Here also Xavier preached and baptized in the 16th century, and the Jesuit missionaries of Madura in the 17th. And here was the beginning of the Protestant missionary movement in India, by the hands of two young Denmark missionaries (Bartholomew Ziegenbalg and Henry Plutschau), in 1705. Tranquebar (on the coast south of Madras) was the first station occupied. The Society for Promoting Christian Knowledge in a few years assumed the mission. But it was long before a distinctively English mission was founded. Schultze came in 1719, and in 1726 began the first really successful mission in Madras City. Kierander came in 1740; but in 1746, when the French were besieging Cuddalore, where he was stationed, and rendering his operations there impossible, he removed to Calcutta, and became the father of Protestant missions in the Bengal presidency. In 1750 Christian Frederic Schwartz,
landed in South India, and until his death in 1798 labored uninterruptedly for the good of the people and the progress of the cause of Christ. No better or greater name adorns the history of Protestant missions in India than his. By the labors of these great and good men and their associates congregations were gathered, schools established and churches founded at Tranquebar, Madras, Trichinopoly, Tanjore and other places. Converts were baptized by the hundred and the thousand. Yet with all their excellences of character, their ability, their piety and their zeal, these men did not plant a self-sustaining, manly and vigorous Christianity. Their churches exist, but with diminished numbers and deplored strength. The churches gathered by them have in many cases been surpassed by those more recently organized, not alone in numbers, but in aggressive character and influence. For about a hundred years the work begun by the missionaries of the 18th century was subsidized by the SPCK, which to a large extent furnished the funds, while the missionaries themselves came from Denmark and Germany. Early in the 19th century this Society transferred the missions to the SPG, and in due time the personnel of the mission staff came to be recruited wholly from the English source, even as the money came from the same source.

The introductory labors of the missionaries of the 18th century were followed by work on a larger scale, more systematically and energetically pursued during the 19th century. We record here the principal agencies operating in this more recent era. The London Missionary Society leads the way. Two missionaries of this Society occupied Vizagapatam, on the east coast, far north of Madras, in 1805, during a period when the Indian Government, taught by the directors of the East India Company at home, was bitterly opposed to the entrance of missionaries in India. The missionaries at Vizagapatam, however, were not molested, and when in 1814 Parliament, in the new charter granted to the company, inserted a clause favoring missionary operations, and the opposition of the government ceased in consequence, the LMS was all ready to establish a station in Madras City. Bellary, northwest of Madras, near the boundary line now separating the presidency from that of Bombay, had been occupied in 1810, and Coimbatore was occupied in 1830. The Church Missionary Society entered Madras City in 1815, and took over the Palamcottta station (in the Tinnevelly district) from the Danish missionaries, who had planted it in 1785, in 1817. In the same year the SPG began work at Chudalore, and assumed, during the years 1820-29, charge, from the Society for Propagating Christian Knowledge, of most of the old Danish missions. The Wesleyan Missionary Society arrived upon the scene in 1816, and at Trichinopoly two years later. The Basel Evangelical Missionary Society began its work, which since has spread over all the western portion of the presidency, and into many of the Kanarese districts of the Bombay presidency, in 1834. The English Baptist Missionary Society established and churches founded at Madras in 1815, and took over the Palamcottta station (in the Godavari Delta, which dates from 1838). The chief successes of this army of Christian laborers have been won in the Tinnevelly district, where the Christian churches and communities are very numerous, and where the native Christians are numbered by thousands. In the Telugu districts, also under the charge of the American Baptists, there have been ingatherings of surprising vastness and power; the American missionaries in the Arcot and Madura districts have also been very successful. Probably in no other part of India has Christianity taken so firm a hold.

MADURA: See Majam.

MADURA: A city (and district, the city being the capital of the district) in the Madras presidency, India, situated on the S. bank of the Vaigal River, about 275 miles south-southwest from Madras. The population of the city is (1901) 105,984, of whom 94,000 are Hindus. The language of the Hindus is Tamil, the with the progress of education the rising generation of natives is more and more familiar with English. Madura has long been a most important place. It was the seat of an ancient dynasty of Hindu kings (the Pandya kings), whose history goes back into prehistoric times, and is adorned with the usual wealth of myth and legend. As the Mohammedan power stretched south in the 15th and 16th centuries this Hindu kingdom was overthrown, the no Mohammedan dynasty took its place; but on the ruins of the old state arose another Hindu dynasty—that of the Nayaks—which culminated in the 17th century, when most of the architectural works at Madura, which still attest the power and wealth of this line of princes, were completed. During the political chaos of the next century the Nayak kingdom in its turn crumbled. Maharrata and Mohammedan armies successively overran the region, until at last the British came, and in 1801 Madura passed into their possession. The religious history of the place chiefly concerns us now. It contains one of the most famous Hindu temples—that of the goddess Minakshi—in India. The temple enclosure is 847 feet long and 744 feet broad, and contains, besides the shrines of the goddess and of the god Siva, a vast collection of buildings—halls, bazaars, etc.—occupied by North Ceylon, had been begun soon after 1820, colonized thence, first to Madura in 1834 and to Madras in 1836; Aroet was occupied by this Society in 1855, but its work there was a year or two afterward transferred to the Dutch Reformed Church (as it is called) of the United States, by which church it has since been maintained with much vigor. The Church of Scotland came to Madras in 1837, and since the Disruption in 1843 two Scotch missions have worked there side by side, and to some extent also in the interior. The American Baptist Missionary Union began its work—now of large proportions and of extraordinary success—in Nellore and other parts of the Telugu portion of the presidency, in 1840. The Leipzig Lutherans came in 1841 to Tranquebar and adjacent stations, where the Lutherans of the preceding century had labored with such assiduity. There are also small German missions elsewhere in the presidency—that of the Hermannsburg Lutherans at Nellore (1865), of the American German Lutherans in the Krishna district (1842), and an independent, the successful German mission in the Godavari Delta, which dates from 1838.
the priests and temple attendants. The conspicuous features of the temple are the great
towers, 9 in number, which rise above its outer
walls, in one case reaching to the height of 152
feet.

The Christian history of Madura is of much
interest. The famous Roman Catholic mission-
ary Francis Xavier gathered a little church here
in the 16th century. In 1606 a Jesuit mission
was begun here by Robert de Nobili, who lived
as an ascetic, was renowned for his sanctity and
learning, and his complete mastery of the Tamil
language. Following him were men of like
spirit, notably John de Britto, who suffered mar-
dom in 1693, and Beschi, who prepared the
walls, in one case reaching to the height of 152
feet.

The native converts in the region about Madura were
estimated at a million or more, won largely by
the great concessions to Hinduism which the
missionaries made. The number of Catholic
Christians now in the district has greatly dwin-
dled, hardly 70,000 being returned in the census
of 1881.

The history of Protestant effort begins in 1834,
when the place was occupied by Messrs. Todd
and Hoisington, connected with the ABCFM
mission in Jaffna, Ceylon, which had been
founded in 1836. The work of the American
missionaries has been carried on vigorously and
successfully ever since. In process of time they
occupied most of the important towns in the
district round Madura as mission stations, estab-
lished schools of different grades, gathered con-
gregations of Christian adherents and founded
churches, composed of such as gave credible evi-
dence of piety. They have labored as preachers
on their tours and in the churches, as teachers in
their schools, as writers, and editors through the
medium of the press, as physicians through their
labors in hospitals and dispensaries. This So-
ciety now (1902) has at Madura 2 mission-
aries and their wives, 3 women missionaries, 140
native workers, men and women; 18 outstations,
14 preaching places, 13 day schools, 3 high-grade
boarding schools, 2 hospitals, 2 dispensaries and
700 professed Christians. It is a station also of
the Leipzig Missionary Society (1874), with
(1903) 2 missionaries, one with his wife; 1 woman
missionary, 22 native workers, men and women;
14 outstations, 10 places of worship, 5 day
schools, 1 boarding school and 727 professed
Christians, of whom 697 are communicants.
The SPG also has a native evangelist here.

MAHABALASHWAR: A town in British Guiana,
South America, situated on the Mahaica River,
40 miles S. of Better Hope. Station of the West
Indies Wesleyan Eastern Annual Conference,
with 1 missionary and his wife, 4 outstations, 5
chapels, 5 Sunday schools, 6 young people's
societies, 3 young men's Christian associations,
5 day schools, 1 temperance society, and 422
professed Christians.

MAHANORO: A town on the E. coast of Mad-
gascar, situated about 90 miles S. E. of Antan-
narivo. Station of the Paris Mission, with (1903)
1 missionary, 1 native worker, 1 day school, and 629 professed Chris-
tians, of whom 124 are communicants. Society spells the name Mahanero.

MAHASOARIVO: A suburb of Antananarivo
containing the normal school (for Imerina) of
the Paris Mission Station of the Paris Evan-
gelical Society (1899), with 1 missionary and
wife, 1 missionary woman, 3 native workers, and
1 hospital. Society spells the name Mahasoar-
ivo.

MAHE ISLAND. See SEYCHELLES ISLAND.

MAHERESA: A village in Madagascar, 125
miles W. of Fianantarisoa. Station of the Paris
Evangelical Mission Society (1898), with (1903)
3 missionaries, two of them with their wives; 102
native workers, 37 outstations, 7 Sunday schools,
3 societies for young people, 2 young men's
Christian associations, 2 young women's associa-
tions, 37 day schools, 2 boarding schools, 1 indus-
trial school, 1 dispensary, 2 orphanages, 1 theo-
logical class, and 850 professed Christians.
Society spells the name Maheresa.

MAHITSY: A village and district in Imerina,
Madagascar, lying to the N. W. of Antananarivo,
on the Majunga road about 15 miles from the
city. Station of the LMS (1902), with 1 missionary and his wife.

MAHORA: A town in the United Provinces, India, situated 87 miles S. S. W. of Cawnpur on the railway between Banda and Allahabad. Population, 8,500. Station of the CWBM (1895), with (1903) 1 missionary and his wife, 9 women missionaries, 3 native workers, 1 chapel, 2 Sunday schools, 1 day school, 1 kindergarten, 1 dispensary, 1 orphanage, 91 professed Christians.

MAHONORO. See MAHANORO.

MAHOW. See MHOW.

MAIANA. See GILBERT ISLANDS.

MAIDZURU: A town in Honkon, Japan, situated near the coast about 40 miles N. of Kobe. Station of the PE (1895), with (1903) 1 missionary, 1 native worker, 4 chapels, 4 outstations, and 25 professed Christians.

MAIJAM: A town in Bengal, India, situated about 30 miles N. by W. of Raniganj. Station of the PB, with (1900) 1 missionary and wife and 1 orphanage. Society spells the name Mihijam.

MAI-MAI-KAI: A town in Manchuria, China, situated 120 miles N. N. E. of Mukden. Station of the UFS (1898). The work has not been fully reorganized since the Boxer disturbance, but is carried on (1903) with 14 native workers, 6 outstations, 2 places of worship, 5 Sunday schools, and 377 professed Christians.

MAIMANSINGH: A town of Bengal, India, situated by Nasirabad, 74 miles N. of Dacca; capital of the District of Maimansingh. Population, 6,500 are Hindus. Station of the Victoria Baptist Foreign Mission Society (1885), with 1 missionary and wife, 3 women missionaries, 6 native workers, 2 places of worship, 2 Sunday schools, 2 young people's societies, 2 day schools, 1 orphanage, and 23 professed Christians. Society spells the name Myimansingh.

MAIN: A village in the Transkei District of Cape Colony, situated 78 miles N. of East London. Station of the UFS (1876), with 1 missionary and his wife, 26 native workers, 12 outstations, 1 place of worship, 11 day schools, and 573 professed Christians.

MAINPURU: A town in the United Provinces of India, situated 40 miles W. of Fateghar; capital of the District of Mainpur. The town is in two sections, one of which is called Mukhanganj. Population, 18,800, of whom 13,800 are Hindus and 4,000 Muslims. Station of the PN (1843), with (1903) 2 missionaries and their wives, 11 native workers, 2 outstations, 1 place of worship, 14 Sunday schools, 5 day schools, 1 boarding school, and 220 professed Christians, of whom 44 are communicants. Society spells the name Mainpurie.

MAIRANG: Village in Assam, India, situated in the Khasia Hills, near Mac-phlang, with which its mission statistics are included.

MAJAM: A village in German East Africa, situated in the Wagaja region on the slopes of Mt. Kilima Njaro, 350 miles N. W. from the seaport of Tanga. Station of the Leipzig Mission Society (1893), with (1903) 1 missionary and his wife, 7 chapels, 4 day schools, 1 high school, and 40 professed Christians, of whom 19 are communicants. Society writes the name Medschane.

MAJAWERAM. See MAYAVARAM.

MAKAPANSPoord: A village in the Transvaal, South Africa, situated in the Waterberg district, at the foot of the Sefakaolo Mountain. Station of the Berlin Missionary Society (1865), with (1903) 1 missionary, 13 native workers, 10 outstations, 1 day school, and 487 professed Christians, of whom 247 are communicants. The chief, Lekalekale, when the missionaries first took up their residence at the station, prohibited his tribe, on pain of death, from intercourse with them, and what success the station has had has been won in the face of great obstacles.

MAKAPANSTADT: A village in the Transvaal, South Africa, situated on the Aapies River, in the Waterberg district, about 22 miles N. of Pretoria. Station of the WMS, with 1 missionary, 9 native workers, 14 outstations, 24 places of worship, 14 Sunday schools, 9 day schools and 1,771 professed Christians, of whom 1,497 are communicants.

MAKERE: A settlement in British East Africa, situated in the extreme S. W. of the colony, about 60 miles N. W. of Lourenço Marques. Station of the Romande (French Switzerland) Missionary Society, with (1903) 1 missionary and his wife, 2 native workers, 3 outstations, 4 places of worship, 5 Sunday schools, 4 day schools and 28 professed Christians.

MAKOWE: A settlement in Zululand, South Africa, about midway between Durban and Lourenço Marques. Station of the South Africa General Mission (1896), with 1 missionary and his wife, 1 woman missionary, 1 native worker, 1 chapel, 1 Sunday school and 1 day school.

MALABAR, Syrian Church of: Travancore and its sister kingdom, Cochin, which adjoins it on the north, are famous as the home of an exceedingly ancient branch of the Christian Church, usually known as the "Syrian Church of Malabar," Malabar being the name applied for many centuries to the strip of coast embracing the kingdoms named and the British district just north of them. The origin of this church is doubtful. The traditions current among the people go back to the preaching of Thomas, in the middle of the 1st century; but scholars suppose that a small colony from Antioch (Syria) may have landed here in the 4th century. The church is Syrian in doctrine and ritual, maintaining the Nestorian type of Christology, and is subject to the Patriarch of Antioch, tho the Romanists have tried hard to subject it to the Pope, and did succeed, in 1599, in detaching some 80,000 members from the patriarch, and in placing this Syrian community, which is still allowed, however, to retain the Syrian ritual and language. The remainder of the Roman Catholic population represents chiefly the results of Francis Xavier's missionary activity in the 16th century. The existence of this ancient Syrian Church attracted
the attention of Rev. Dr. Buchanan (then chaplain to the East India Company at Tinsevelly), and at his urgent suggestion the Church Missionary Society, in 1816, sent missionaries to labor among them. At first the Syrian priests cooperated with them, but in 1838 signs of hostility appeared, which culminated in the Syrian Mission (or Metropolitan) dissolving all connection with the English missionaries. Since then the Church Mission has devoted its attention to the people at large, with the most gratifying results, drawing their converts from the old church in part, but very largely from Hindus, and especially from certain low castes. Gradually there has arisen in the Syrian Church a reform party which is in close relations with the CMS missionaries and appears to be gaining influence for the awakening of the long slumbering Malabar church.

MALACCA: A portion of the Straits Settlements, lying on the western coast of the Malay peninsula between Singapore and Penang; consists of a strip of territory about 42 miles in length and from 8 to 24½ miles in breadth. Its surface is hilly, but not mountainous, and it is drained by five navigable rivers, forming a network of canals. Its climate is equable and healthful. In 1901 the population numbered 95,487, of whom 73,833 were Eurasians, 74 Europeans or Americans and 1,498 of mixed blood. There is no mission station in Malacca.

MALAGASI LANGUAGE: A language of the malnized peoples of Madagascar. It is of the Malayan family and was reduced to writing by missionaries, being written with Roman letters.

MALAY: A village in the Transkei district of Cape Colony, South Africa, situated 13 miles N. E. of Butterworth. Station of the UFS (1875), with (1903) 1 missionary and his wife, 14 native workers, 15 outstations, 20 Sunday schools and 655 professed Christians.

MALANG: A village in the Loanda district, Angola, Africa, situated about 250 miles W. from San Paolo de Loanda, on the line of the railway from that place. Station of the ME (1885), with (1903) 4 missionaries, two of them with their wives; 3 women missionaries, 1 place of worship and 6 professed Christians.

MALAYALAM LANGUAGE: One of the Dravidian family of Indian languages, spoken by the people of Malabar and Travancore in the southwest part of the peninsula of Hindustan. It is the vernacular of about three millions of people and is written with characters peculiar to itself. It is also called Malayalam.

MALAYAN LANGUAGES: A family of languages, of great simplicity of structure and of sounds, used by the natives of the Malay peninsula, of Madagascar, of the islands of the Dutch East Indies, the Philippines, Polynesia and New Zealand. The tribes in the interior of the larger of these islands have languages generally classified as of independent stock, and the same seems to be true of the people of the Melanesian Islands, although they are often classified as Malayans. Australians have an entirely distinct language. In the case of those islands which we have named, the Malay characteristics are clearly evident, although the various dialects are numerous. The Malay language proper is the lingua franca of the East Indian Archipelago. Its most cultured dialect is that of the towns of Sumatra and Java. Its phonetic elements are simple, the grammatical structure is regular and the vocabulary, especially in nautical terms, is very copious. It has the five vowels, a, e, i, o, u, short and long, with one diphthong. The consonants are b, d, g, h, j, k, l, m, n, ñ, p, r, s, f, t, w, y, ng, ch. Malay is a disyllabic language, with the accent on the penultimate, except when that syllable is open and short. Derived words are formed by prefixes, affixes, infixes and reduplication. Much skill is displayed in the idiomatic use of the hundred or more derivative forms. There are no inflectional forms to distinguish number, gender or case. Number is denoted only when absolutely necessary by the use of the adjectives sagala, all, and bahāhā, many, or by sa or satu, one, with a classifier. As in the Chinese language, classifiers are numerous, such as ong, used in speaking of persons, and the classifier for flat things. Gender is distinguished by the use of auxiliary words. Case is indicated by position. Verbs have no person, number, mood, or tense. Long sentences are avoided, and in a sentence first comes the subject, then the verb, followed by the object, and qualifying words follow the words they qualify.

The Arabic alphabet is used for writing Malay, having been introduced at the time of the Mohammedan conquest. A great number of Arabic words have also been introduced into the vocabulary.

The literature of the Malays consists mainly of proverbs, and love poems of four lines. Their religious literature is remarkable mainly for its independence, and the fact that it does not show the influence of Islam.

The great branches of the Malay language are the Polynesian, found in the islands of the South Pacific, the Hawaiian, the Malagasi and perhaps the Fijian, found in the Fiji Islands. As said above, the evidence of a Malay origin for the language of Fiji and the multitudinous dialects of Melanesia is not conclusive.

The earliest recorded use of a Malay language for evangelistic writings was in 1662, when Brouwers, one of the Dutch Church ministers in Java, began a translation of the Bible, using Roman letters in writing it. Roman letters have become established as the alphabet for writing the Malagasi and the Polynesian Malay languages. But in the Malay Islands the Arabic letters having become naturalized long before the date above named, the use of Roman letters in writing Malay has not widely found favor.

MALAYS: In its strictest sense this name is given to the inhabitants of the Malay peninsula, Penang and Sumatra, who belong to the Mongol race, modified by the mixture of other blood. In physical appearance they are of somewhat short stature; brown complexion—not so light as the Chinese or so dusky as the Hindu; have straight, black, coarse hair; no beard; large mouth; flat nose; large, dark eyes; thick lips; short hands and feet, with thin, weak legs. In temperament the Malays are thoroughly Asiatic—taciturn, undemonstrative, cunning, treacherous, and at times cruel. Their passions are easily aroused, and under specially exciting circumstances, such as love, jealousy or religious
seas. Their deeds of cruelty, treachery and cunning are found, varying with the presence of superstition, of fetishism and of Mohammedanism does not apply to the Malays. Mohammedanism does not apply to the Malays, yet whom he considers to be of the same stock. They, representing the extreme terms of stories of adventure. Even at the present time, few ship captains care to have a crew composed entirely of Malays, they form the largest part of the sailors on the Indian and Chinese coasts.

Mohammedanism was embraced by the Malays in the 13th and 14th centuries, the fierce, uncompromising, aggressive spirit of that religion finding quick response in their natural temperament.

2. In a wider sense the term is applied to the races inhabiting the Indian Archipelago and the islands of the Pacific, embracing an area 13,000 by 5,000 miles, from Easter Island to Madagascar, and from New Zealand to the Hawaiian Islands. This wide dispersion of the race has been the subject of much study and theory, but the causes of it, and proof as to the fact, are not within the limits of this article. A classification of this wider sense is as follows: (1) Malay. (2) Malay Javanese: the inhabitants of the Ladrones, Formosa, Philippine Islands, the Dutch East Indies and Madagascar. (3) Melanesia, Fiji Islands, which, by the way, is not always admitted. (4) Polynesian: the Hawaiians, Marquesas Islanders, Tahitians, Raratongans, Samoans, Tongans, Maoris. To these Wallace adds the Papuans, who are the farthest removed from the Malays, yet whom he considers to be of the same stock. They represent the extreme difference in type, due to the mingling of other races, and have frizzy hair, tall and black, bearded and hairy-bodied. The mental characteristics of the Papuan are also different from the Malay type, and they are imperfect and noisy. Between the two extremes every gradation is found, varying with the preponderance of either the Malay or Papuan type. In some of the provinces of China, in Formosa and Hainan, the aborigines, who seem to have affinity with the Shans and Laos, are also allied to the Malays. Mohammedanism does not accompany the Malays in their dispersion, and low forms of superstition, of fetishism and of monomaniacal flight take its place. Christianity has made considerable headway, not only in Madagascar and Polynesia, but in the Malay Archipelago and even among Mohammedan Malays.

MALAYA: One of the Solomon Island group in Melanesia, lying S. E. of Isabel Island. It has an area of 2,395 square miles. Station of the Melanesia Mission. Society spells the name Mala.

MALAYA ISLAND: One of the Solomon Island group in Melanesia, lying S. E. of Isabel Island. It has an area of 2,395 square miles. Station of the Melanesia Mission. Society spells the name Mala.

MALAYAN: A town in Bombay Presidency, India, situated in the District of Nasik, on the Gurna River, 64 miles N. W. of Aurangabad. Altitude, 1,460 feet. Population, 15,500, of whom 9,300 are Muslims and 5,600 Hindus. Station of the CMS (1849), with (1903) 1 missionary and wife, 43 native workers, 2 outstations, 16 day schools, 1 dispensary, and 619 professed Christians, of whom 172 are communicants. Society spells the name Malegam.

MALAYI: A village in the Transvaal, South Africa, situated 16 miles N. W. of Pietersburg. Station of the Berlin Missionary Society (1877), with (1903) 1 missionary, 9 native workers, 6 outstations, 2 day schools, and 232 professed Christians, of whom 114 are communicants. Society spells the name Malatsha.

MALAYI: A settlement in the Shire Highlands, British Central Africa, situated about 13 miles N. W. of Blantyre. Station of the Zambesi Industrial Mission, with 1 missionary and his wife, 3 outstations, 1 place of worship, 4 Sunday schools, 4 day schools, 1 industrial farm, and 10 professed Christians. Society spells the name Maleya.

MALAYOLLO ISLAND: See NEW HEBRIDES.

MALNA: A settlement in Upolu, Samoa, and station of the LMS.

MALO: Station in southern part of Espiritu Santo Island in the New Hebrides. See MALA.

MALOKONG: A village in the Transvaal, South Africa, situated about 35 miles W. by N. of Pietersburg. Station of the Berlin Missionary Society (1867), with (1903) 1 missionary, 11 native workers, 15 outstations, 1 day school, and 281 professed Christians, of whom 186 are communicants.

MALTA: An island in the Mediterranean, south of Italy; a British crown colony, and an important naval station. Area, 35 square miles. Population, 188,141 (English, 2,138; foreigners, 1,097, the remainder natives). Language, a patois of Arabic. Religion, Roman Catholic, the old laws of the island for the defense of that church being maintained by the British Government.

Malta was for many years the most important missionary station in the Mediterranean, and was occupied by all the missionary societies seeking to work in the Levant. The mission press of the ABCFM was established here prior to its removal to Smyrna, and it was here that Wm. Goodell and his associates studied the Turkish and Armenian before establishing themselves at Smyrna, Constantinople, and Beirut. It is now occupied as a preaching station by several of the Colonial Societies of England and Scotland, especially the Scotch Free Church. Representatives of other societies visit the island, and the Bible has been published in Maltese with some acceptance.

MALVALLI: A town in Mysore, India, situated about 30 miles W. N. W. of Mysore City. Station of the PB, with 2 missionaries and their wives, 1 woman missionary, and 1 orphan asylum.

MAMBA: A village in German East Africa, situated on the slopes of Mt. Kilimanjaro, in the Wagasa District, about 10 miles N. by W. of Taveta. Station of the Leipzig Mission Society (1894), with (1903) 3 missionaries, 4 places of worship, 2 day schools, 1 boarding school, and 65 professed Christians.

MAMBO: A town in German East Africa, situated in the Usagara Hills, about 130 miles W. by N. of Bagamoyo. Station of the CMS (1879), with (1903) 1 missionary, 2 women missionaries, 1 missionary...
3 native workers, 4 outstations, 4 places of worship, 7 day schools, 1 dispensary, and 64 professed Christians, 22 of whom are communicants.

MAMRE: A village in the Malmesbury District of Cape Colony, Africa, situated 28 miles N. of Cape Town, with a population of 1,500. Station of the Moravian Missions (1808), with 3 missionaries and their wives, 26 native workers, 1 place of worship, 2 day schools, and 311 professed Christians.

MANAGUA: Capital of Nicaragua, Central America, situated 157 miles S. E. of Taguicigalpa, on Managua Lake, and connected by rail with Gra nada on Lake Nicaragua. Station of the Central America Mission, with 2 missionaries and their wives and 1 woman missionary.

MANAKAVALY: A village of lepers, in Madagascar, situated 3 miles N. of the LMS station of Isoavina, 12 miles E. of Antananarivo. It was built some ten years ago on the initiative of Rev. Mr. Penke (LMS); and its preacher and inhabitants are all lepers, maintained by the French Government, cared for by the deaconesses of the Paris Missionary Society, and aided in church and school work by the LMS. The Paris Evangelical Society has there 2 women missionaries, 4 native workers, and 1 leper asylum, belonging to the French Government. There is also a home for untainted children of lepers. The LMS has 1 native worker and 1 place of worship, with 200 professed Christians, all lepers.

MANAMADURA: A town in Madras, India, situated 30 miles S. E. of Madura. Station of the ABCFM (1864), with (1903) 2 missionaries and their wives, 36 native workers, 36 outstations, 14 places of worship, 4 Sunday schools, 6 day schools, 2 boarding schools, 1 industrial school, and 153 professed Christians.

MANANJARY: A town in Madagascar, situated at the mouth of Mananjary River, on the E. coast. Station of the SPG, with (1903) 2 missionaries and their wives, 36 native workers, 36 outstations, 14 places of worship, 4 Sunday schools, 6 day schools, 2 boarding schools, 1 industrial school, and 153 professed Christians. Society spells the name Mananjara.

MANANTENINA: A settlement on the E. coast of Madagascar, situated about 62 miles N. E. of Ft. Dauphin. Station of the Lutheran Free Church Mission Society (1895), with 1 missionary and wife, 10 native workers, 7 outstations, and 1 place of worship.

MANASOA: A village in Madagascar, situated about 83 miles E. of St. Augustine's Bay. Station of the Lutheran Free Church Mission Society (1901), with 1 missionary and wife, 4 native workers, 4 outstations, and 1 place of worship.

MANCHU LANGUAGE: The language of Manchuria, Chinese Empire, and the court language of the present Imperial dynasty of China. It belongs to the Tungusian branch of the Ural-Altaic family, and on the whole is the best-known of the Tungusian tongues. It follows the rule of all Tatar languages in observing the Syriac alphabet. It is written with an alphabet peculiar to itself, which, however, can be traced to the letters of the Syriac alphabet.

MANCHURIA: One of the divisions of the Chinese Empire lying north of China proper, between latitude 42° and 53° north. In accordance with the treaty of 1860 between Russia and China, nearly one-half of the former territory was given over to Russia, and the present limits are the Amur on the north, the Usuri and Sunga-cha on the east, Korea on the south, from which it is separated by the Shan-Alin range, and on the west the Khingan Mountains, the Sira-Muren River, and the district of Upper Sungari separate it from the desert of Gobi. Its area is about 363,000 square miles. The population of Manchuria is estimated by the Chinese as 8,509,000. Physically, the country is divided into the mountain ranges on the north and east, among which lie numerous fertile valleys, and the plain which stretches south from Makden to the Bata. A few weeks of autumn usher in the snow and the winter. During four months of the year the rivers are frozen up; a short spring is followed by the heat of summer, and a few weeks of autumn usher in the snow and ice of the winter. Manchuria is gradually losing its native language and system of education under the influence of the Chinese. Until Russia's interference in 1900 the native Manchus had been used to reinforce Manchu garrisons in China, while a tide of Chinese had been pouring into Russia. Hitherto seemed to be one of the most promising fields for Christian missions.

MANDALAY: A town in Upper Burma, British India, situated 386 miles by rail N. of Rangoon in a plain 2 miles from the Irawadi River. Part of the city is walled and is now a British military post, called Fort Dufferin. There are manufacture of silk goods. Population, 163,300, of whom 147,000 are Buddhists and 13,700 Hindus. Station of the ABMU (1886), with (1903) 4 missionaries, three with their wives; 2 woman missionaries, 46 native workers, 279 professed Christians, 2 places of worship, 5 Sunday schools, 4 day school, and 2 boarding schools. Station is also the Mission to Lepers in India and the East (1890), with 1 place of worship and 1 home for untainted children of lepers. Station also of the Missionary
Pence Association (1892), with 1 missionary and his wife, 1 native worker, 1 outstation, 1 place of worship, 2 Sunday schools, and 40 professed Christians. Also station of the SPG (1868), with (1903) 1 missionary, 16 native workers, 1 day school, 1 place of worship, 1 boarding school, and 283 professed Christians, of whom 160 are communicants. Station also of the WMS, with 3 missionaries, 1 woman missionary, 21 native workers, 8 outstations, 6 Sunday schools, 7 day schools, 1 temperance society, and 166 professed Christians, of whom 137 are communicants.

MANDARI LANGUAGE: One of the non-Aryan languages of India; also called the Kol, and spoken by the Kolarian aborigines of Chota Nagpur in Bengal. It has been reduced to writing by missionaries with use of the Roman letters.

MANDOMAI: A village in the island of Borneo, situated 55 miles N. W. of Banjernassin. Station of the Rhenish Missionary Society, with (1903) 1 missionary and wife, 1 woman missionary, 10 native workers, 5 outstations, 1 Sunday school, 6 day schools, and 446 professed Christians, of whom 288 are communicants.

MANDRINDRANO: A town in Madagascar, situated 50 miles S. W. of Antananarivo. Station of the FFMA (1888), with (1901) 1 missionary and wife, 1 woman missionary, 80 native workers, 40 outstations, 250 professed Christians, 40 places of worship, 40 Sunday schools, 1 Young People's Society, and 1 dispensary.

MANY: A village in Ceylon, situated 5 miles N. W. of Jaffna. Station of the ABCFM (1831), with (1902) 1 missionary and his wife, 41 native workers, 4 outstations, 12 day schools, and 308 professed Christians.

MANGAIA. See HERVEY ISLANDS.

MANGALORE: A town and sea port in Madras, India, and capital of the District of South Canara, situated on the W. coast of Hindustan, at the mouth of Netravati River, 127 miles N. N. W. of Calicut. Much of the coffee grown in Coorg is exported here. Population (1891), 41,000, of whom 23,000 are Hindus, 10,000 are Christians, and 7,600 are Muslims. Population (1904), 52,000. Station of the Basel Missionary Society (1834), with (1903) 15 missionaries and their wives, 3 women missionaries, 77 native workers, 6 outstations, 1 Sunday school, 18 day schools, 1 kindergarten, 1 theological class, 1 boarding school, and 2,799 professed Christians, of whom 1,687 are communicants. Station also of the Mission to Lepers in India (1891), with 1 leper asylum. The Societies spell the name Mangalur.

MANGAMBA: A village in Kamerun, Africa, situated about 10 miles N. of Bonaberi. Station of the Basel Missionary Society (1889), with (1903) 3 missionaries and their wives, 29 native workers, 35 outstations, 20 day schools, 1 boarding school, and 442 professed Christians.

MANGARI: A village in the United Provinces, India, situated near Babatpur Station on the railway, 14 miles N. W. of Benares. Station of the LMMS (1874), with (1903) 1 missionary and wife, 28 native workers, 7 Sunday schools, 1 Young Men's Society, 9 day schools, and 19 professed Christians.

MANILA: The principal city and capital of the Philippine Islands, situated on the S. W. coast of Luzon Island, at the head of Manila Bay. It has important suburbs on the N. bank of Pasig River. It was taken by the Spaniards in 1571, and by the U. S. in May, 1898. It has extensive commerce in sugar, hemp, tobacco, rice and dyestuffs. It has been many times visited by earthquakes, and is subject to typhoons. The climate is hot, damp and unhealthy. Population, 300,000. Station of the ABS (1899), with 1 agent. Also of the BFBS, with 1 agent and 1 bookroom. Also station of the ME, with 3 missionaries and their wives, 3 women missionaries, 3 places of worship, 4 Sunday schools, and 1,889 professed Christians, of whom 597 are communicants. Also station of the PS, with 4 missionaries. Also station of the Peniel Mission Society, with 2 women missionaries. Station also of the PN (1899), with 3 missionaries, one with his wife; 6 native workers, 1 place of worship, 1 Sunday school, 3 day schools, 1 dispensary, and 336 professed Christians. Station also of the United Brethren Women's Association (1901), with 2 missionaries. The YMCA (1900) also has a representative here and a Young Men's Christian Association.

MANISA: A town in Asiatic Turkey, about 50 miles east of Smyrna; the ancient Magnesia. It is still an important city. Population about 40,000, Muslins, Greeks and Armenians. For many years it was a station of the ABCFM, used as the missionary residence, on account of the heat of Smyrna. It is now (1903) an outstation of Smyrna, which is again the missionary center for the field.

MANKAR: A town and railway station in Bengal, India, situated in the District of Bankura, 32 miles N. W. of Burdwan. Station of the CEZ (1895), with (1903) 2 women missionaries, 6 native workers, 1 day school, and 1 dispensary.

MANNARGUDI: A town of Madras, India, situated 24 miles E. S. E. of Tanjore. Population (1891), 20,400, of whom 19,300 are Hindus. Station of the Leipzig Missionary Society (1897), with (1903) 10 native workers and 5 day schools. Church statistics are included in Sidambaram. Station of the WMS, with (1903) 3 missionaries, 73 native workers, 4 outstations, 7 places of worship, 12 Sunday schools, 12 day schools, and 201 professed Christians, of whom 133 are communicants.

MANNING'S HILL: A village in Jamacia, W. I., situated about 7 miles N. W. of Kingston. Station of the CWBM, with 1 missionary, 133 professed Christians, 1 place of worship, 1 Sunday school, 1 day school, and 1 Young People's Society.

MANONA: An islet of the Samoan Islands, situated 2 miles from the W. end of Upolu. It forms a natural fortress with the adjacent isle of Apolima, and has had great importance in local history. Station of the Australian Wesleyan Methodist Society, with 9 native workers, 2 places of worship, 3 Sunday schools, 3 day schools, and 62 professed Christians. Society spells the name Manono.

MANOW: A village in German East Africa, situated about 20 miles N. W. of the N. end of Lake Nyassa. Station of the Berlin Missionary Society (1892), with 1 missionary, 2 native workers, and 37 professed Christians.

MANSINAM: A village of New Guinea Malay-
MAPUTA: A settlement in Portuguese East Africa, situated on the River Maputa, about 35 miles from its mouth in Delagoa Bay. The territory between Maputa and the Bay is called one of the most pestilential districts of Africa. Station of the South African General Mission (1898), with 1 missionary, 1 native worker, 3 outstations, 1 place of worship, 1 Sunday school, 1 day school, 1 dispensary, and 3 professed Christians.

MAPULE: A settlement on the W. side of Cape York Peninsula, Australia. Station of the Federate Churches of Australia, with (1900) 2 missionaries, 1 with his wife; 1 woman missionary, 1 Sunday school, 2 day schools. Station of the Moravian Missions (1891), with (1900) 1 missionary and his wife, 1 woman missionary, 1 place of worship, 1 Sunday school, 1 day school, 1 dispensary, and 3 professed Christians.

MAPULES, Chauncy: Second Bishop of Likoma, Africa. Born February 17, 1852. Died 1895. Sailed for Zanzibar in May 1877, he left Zanzibar for Masasi, where, for some years, he was to labor. About a year after Maples' arrival, a new station was founded at Newala, nearer the River Rovuma, where a number of native Christians from Zanzibar were settled; and from these stations missionary work gradually extended. From Newala, accompanied by a fellow-missionary and ten Masasi men as porters, he took a journey south from the Rovuma River into the unexplored country lying between it and the Mozambique, a tract which was an almost uninterrupted blank on the maps of those days and which he was the first European to penetrate. On the 12th of July they reached the goal of their journey, after a walk of three hundred and sixty miles in three weeks. On the 29th of July they arrived at the port of Luli, and thence they sailed northward by dhow and started north-west from Kischaga for another three weeks' walk, which brought them to Masasi, after they had accomplished over nine hundred miles of difficult country in sixty-eight days. In the latter part of 1886 Mr. Maples was appointed Archdeacon of Nyasa, and in the Autumn of 1887 he left Likoma to visit the wild Gwangwara bands on the mainland. Among these "thieves, robbers, and murderers," as he called them, he labored heroically, and never lost faith that "God's grace is able to turn these savage hordes into the children of Christ's Church." He was consecrated Bishop of Likoma in St. Paul's Cathedral in 1895, and without delay he set out again for Africa, where, nearly twenty years before, he had embarked upon his missionary career. When he reached Fort Johnston, at the junction of Lake Nyasa with the Shire River, he found a little sailing boat belonging to the mission, and, not waiting for the German steamer, he decided to take Likoma at once, by way of Kota-kota, on the west shore, where he was to leave his fellow-worker, Mr. Williams. During a violent storm the vessel sank, and both Bishop Maples and Mr. Williams were drowned. Bishop Maples had a special facility for acquiring languages, and through his efforts, within the first four years of his sojourn in Africa he mastered Swahili and Yao, and enough Makua to begin the translation of the New Testament.

MARAKELI. See Gilbert Islands.
MARAKESH: A town in Morocco, N. Africa, situated about 120 miles E. of Mogador, the southern capital of the Empire. Station of the South Moroccan Mission (1891), with 3 missionaries and 13 native workers; 5 women missionaries, 2 orphanages, 1 day school, a dispensary, and 1 hospital. The place is also called Morocco by Europeans.

MARANHÃO. See SAO LUIZ DE MARANHAO.

MARAPJANE. See NEU HALLE.

MARAS: A town in the Province of Aleppo, Asiatic Turkey, situated about 80 miles N. of Aleppo. Station of the ABCFM (1854), with (1902) 2 missionaries, 1 with his wife; 3 women missionaries, 65 native workers, 15 outstations, 13 places of worship, 17 Sunday schools, 39 day schools, 1 boarding school, 1 theological college, 1 college, 2 orphanages, and 1,582 professed Christians. Site of the Asia Minor Apostolic Institute (1895), with 1 native worker, 1 Sunday school, 1 day school, and 1 orphanage.

MARATHI LANGUAGE: One of the Indic branches of the Aryan family, spoken by a large part of the population of the Bombay Presidency. It is a language of culture, and is written with the Devanagari characters slightly modified. In trade and common life a special set of characters called the Modi characters is used. The modified Devanagari character used in writing Marathi is called Balbodh. Missionaries have attempted to introduce the Roman letters for writing this language, but without great success.

MARBURG: A village near the E. coast of Natal, South Africa, situated 70 miles S. W. by W. of Durban. Station of the Hermannsburg Mission (1887), with (1902) 1 missionary and wife, 2 native workers, 1 day school, 2 places of worship, and 128 professed Christians.

MARDIN: A town in the N. of Mesopotamia, Asiatic Turkey, situated about 50 miles S. of Diarbekir, with a population of 15,000. Station of the ABCFM (1858), with (1902) 2 missionaries and wives, 1 woman missionary, 43 native workers, 18 outstations, 20 places of worship, 12 Sunday schools, 21 day schools, 1 boarding school, 1 hospital, and 946 professed Christians. The sectaries organized evangelists and teachers to the CMS and the RCA in Arabia.

MARKAPUR: A town in Madras, India, about 18 miles N. E. of Cumbum. Station of the ABMU (1895), with (1903) 1 missionary and his wife, 2 native workers, 26 outstations, 7 places of worship, 9 Sunday schools, 10 day schools, and 4,060 professed Christians, of whom 2,700 are communicants.

MARIANNE ISLANDS. See LADRONA ISLANDS.

MARONITES: The Maronites of Syria take their name from John Maron, their political leader and first patriarch, who died in 701. During the 6th and 7th centuries of our era the Monophysite controversy was raging throughout the Eastern Church. Armenia, Syria, and Egypt, frontier lands of the Byzantine Empire, were deeply infected by the heresy. The Emperor Heradius (610-640) was anxious to reunite the Church that he might the more effectively ward off the Saracen invasion from Arabia, which threatened to despoil the empire of its southeastern provinces. With the help of Sergius, Patriarch of Constantinople, a Syrian, he arranged a compromise doctrine which he hoped would put an end to the rancorous theological dispute. The statement proposed was that, whatever might be said as to Christ having one (divine) or two (human and divine) natures, all ought to agree that He has but one will (divine, and therefore sinless). Honorius, Bishop of Rome, assented to this proposition, and many of the Monophysites agreed to accept it. But no imperial decree could stop the quarrel; and after a long controversy (during which the Saracens conquered Syria, Egypt, and all North Africa) the case was decided against the Monophysites (mones, one, thelo, to will), and Bishop Honorius (afterward called "Pope") was declared heretical.

Among many who accepted the Monothelite heresy were Christians of Syria who fled to the mountains before the Saracen invader. John Maron was their leader. High up on the shoulders of Lebanon and Anti-Lebanon these vigorous people managed for five hundred years to maintain their independence in the face of Byzantine Greek and Saracen. Defended by tremendous ravines and snowy mountain passes, they were never seriously in danger. The long contest developed many qualities and industry. They spoke Syriac, and used it in all their communications with the paral hierarchy. The Crusaders brought to light this interesting people, so long cut off from Christendom. William of Tyre and Jacob de Nitry have left us accounts of the Maronites, who leagued themselves with the Crusaders, and in 1187 opened communications with the papal hierarchy. They gradually dropped their heretical tendencies, adopted the Arabic language as their vernacular, and in 1445, at the Council of Florence, were taken entirely under the wing of the Roman Church. They were allowed to retain their own liturgy, the celebration of the communion in both kinds, the marriage of the lower clergy, their own fast-days, and their own saints. In 1596 the decrees of Trent were accepted by them; transubstantiation, prayers for the Pope, and other novelties were introduced. A special college was established at Rome (Collegeum Maronitarum) for investigations by Maronite scholars, which gave to the world the learned Assemani. Schools for the clergy and printing presses were established in Syria. A papal legate was sent to Beirut, and so-day the Maronites are submissive followers in the Latin Church.

There are about 250,000 of this sect scattered all over the Lebanon range and the Anti-Lebanon. They are massed somewhat in the northern districts of Lebanon (Kessarwan and Beirergh), and have considerable local affairs. They are found as far south as Mt. Hermen, in the heart of the Druse country. The hostility of Druse and Maronite, fostered by the Turks through policy, culminated in the massacre of 1780, in which thousands of the Maronites were butchered. European intervention compelled the Sultan to organize the semi-autonomous province of the Lebanon, which is under protection of the great powers of Europe. The stronghold of the Maronites in the North Lebanon region is high up on the mountains, with
surpassing views over the Mediterranean to the west. It is a bit of the Middle Ages left over. The most notable is the Baatara gorge, or Wadi Qelt, and the people are frugal and industrious. They are illiterate for the most part, and only recently began to favor schools as having other value than as a means of keeping their people from Protestant influences. The rough mountain sides are terraced, and every available bit of soil utilized. The raising of cattle, silk-culture and weaving, vineyards, grain, maize, and potatoes (Irish) occupy the attention of the people. Hundreds of monasteries are scattered over the mountains, the most notable being the monastery of Lebonin, which is romantically situated in the gorge of the Kadisha River, and is the summer home of the Maronite Patriarch. At the head of this profound ravine is the famous group of 400 ancient cedars, which are carefully guarded as sacred. Some of them are 40 feet in circumference and over 100 feet high.

When the American missionaries entered Syria, in 1823, the Roman Catholic authorities became alarmed, and have put forth every effort to hold the Maronites to allegiance to the Pope. In the face of this rivalry a young Maronite, Asaad Shidiak, who had adopted the evangelical faith, was imprisoned in the Kennobin monastery, where he died from rigorous treatment. He has been called "The Martyr of Lebanon." The Jesuits and Lazarists now have in hand the task of holding the Maronites to the Latin faith. A fine school for boys is found at Antura, conducted by the Lazarites, not far from Birkheh, the winter home of the Patriarch. The Jesuit College at Beirut is an imposing institution, with a fine library and a very complete scientific apparatus. The Jesuits were forced to issue an Arabic Bible in order to compete successfully with the Protestants, and it is interesting to note that they made the translation from the original Greek and Hebrew Scriptures.

At the time of the massacre of 1860 the Protestant missionaries had the privilege of caring for thousands of Maronite orphans and other fugitives in Sidon and Beirut. But as yet the northern portions of the Lebanon range have been held in Protestant influence. Isaac Bird, in the early days of the mission, was driven from the region, and missionaries have made no attempt since then permanently to reside in the Kesrawan and in Bsharah. Missions occasionally have summered in the mountains above Tripoli, and the prejudice against them is gradually subsiding. An incidental benefit of Mr. Bird's attempt is that the potatoes which Mr. Bird left behind in his garden have spread all over the mountains, and form a staple of agriculture along with maize. Other societies besides the Presbyterian Board are reaching the Maronites. The Free Church of Scotland has occupied the Metu region just south of Kesrawan for some years. The English schools for girls, established after 1860, and which are scattered over the mountains to the south, are doing very efficient work. The mission of the Irish Presbyterian Church in Damascus is reaching the Maronites in that region. In spite of the great care of the Roman Catholic education is transforming the whole sect, and evangelical truth is more and more winning its way among them.

Church (C. H.), Ten Years' Residence in Mt. Lebanon, 4 vols., 3d ed., London, 1862 (the 4th vol. refers to Druses and Maronites).

MARPATH: A village in the Central Provinces, India, situated in the Gondwana District, 20 miles N. W. of Mahoba, and the natives, with (1903) 4 missionaries and 1 woman missionary. Further statistics included in Mandla.

MARQUESAS ISLANDS: A group of islands belonging to France in the South Pacific, north-west of the Society Islands. Area, 480 square miles. Population, 5,000. During the last forty years, mission work in these islands has been greatly begun and abandoned, and the natives have been made to suffer greatly by this. They have also been injured by the evil influence coming among them from godless foreigners.

The Paris Evangelical Society now occupies Atuona and Paumotu, with (1902) 1 missionary and 1 native pastor. The Hawaiian Evangelical Association also has 2 stations in the islands, at Atuona and Hakehaua.

MARSHALL ISLANDS: Two chains of lagoon islands, in Micronesia, called Ratak (13) and Ralik (11); comprise an area of 1,400 square miles, with an estimated population of 10,000. A missionary of the ABCFM is located at Eausa, in the Caroline Islands, and the work among the various islands is carried on by native preachers and teachers under his supervision. Ebon and Jalut and nine other islands have schools and preaching stations. The whole group contains 11 churches, 8 pastors, and 15 preachers. The German occupation of the islands has not improved the morals of the natives.

MARSHMAN, Joshua: Born April 20, 1768, in Westbury-Leigh, Wilts, England. When young he showed a great passion for reading. His parents being poor, his school education was defective, and he followed the occupation of a weaver till 1794. Removing then to Bristol, he taught a small school, and at the same time became a student in Bristol Academy, where he studied Latin, Greek, Hebrew and Syriac. Having decided to be a missionary to the heathen, he offered himself to the BMS, and in 1799 was sent, with three others, to join Dr. Carey in his mission north of Bengal. As the East India Company prohibited missions in its territories, they were advised not to undertake to land at Calcutta, but to go direct to the Danish settlement of Serampur. They reached Serampur in October 1800, and were cordially received by the governor, Colonel Bie. Carey soon joined them. Dr. Marshman, finding the support granted by the Society insufficient, with the aid of his wife opened two boarding schools for European children and a school for natives. The income from these schools rendered the mission nearly independent of support from the Society. The Society disapproved of the course followed, and altho' Dr. Marshman went to England to make explanations, the Serampur mission was separated from the BMS for some years. This disturbance of pleasant relations, the death of his associate, Mr. Ward, and family afflictions prostrated him, and he died December 5, 1837. Dr. Marshman studied Bengali, Sanskrit and Chinese. He translated into Chinese the Book of Genesis, the Gospels, and the Epistles of Paul to the Romans and Corinthians. In 1811 he published A Dissertation on the Characters and Sounds of the Chinese Language; The Works of Confucius, containing the Original Text, with a Translation; and a Preliminary Dissertation on the Characters and
Colloquial Mediums of the Chinese. He was associated with Dr. Carey in preparing a Sanskrit grammar and Bengali-English dictionary, and published the latter. In 1808, Rammohun Roy having assailed the miracles of Christ in a work entitled *The Precepts of Jesus the Guide to Peace*, Dr. Marshman replied in a series of articles in the *Friend of India*, afterward published in a volume entitled *A Defence of the Law and Atonement of Jesus Christ*. To this Rammohun Roy replied. The degree of D.D. was conferred on Mr. Marshman by Brown University in 1811.

**MARSOVAN:** A town in the western part of the Province of Sivas, Asiatic Turkey, situated about 130 miles N. W. of Sivas, and 60 miles S. W. of Samsun, its port. Station of the ABCFM (1852), with (1902) 4 missionaries and their wives, 4 women missionaries, 51 native workers, 17 outstations, 12 places of worship, 32 Sunday schools, 18 day schools, 1 boarding school, 1 theological school, 1 industrial institute, 1 dispensary and 1 hospital, and 661 professed Christians. The educational center of the Western Turkey Mission. Anatolia College, a flourishing institution whose buildings make the mission premises conspicuous through all the surrounding district, is the only establishment of its high grade to be found within a radius of 250 miles.

**MARTYN, Rev. Henry:** Born at Truro, Cornwall, February 18, 1781; attended the grammar school of Dr. Carden in his native town; entered St. John's College, Cambridge, 1797; received in 1802 the honor of a scholarship, the scholarship of the *senior wrangler,* and also the prize for the greatest proficiency in mathematics. In 1802 he was chosen fellow of his college, and took the first prize for the best Latin composition. He was twice elected public-examiner. It was his intention to devote himself to the bar, but the sudden death of his father and the faithful preaching and counsels of Mr. Simeon, the university preacher, led to his conversion and dedication to the ministry. In 1802 a remark of Mr. Simeon on the good accomplished in India by a single missionary and particularly in the case of Mr. Marshman, led Mr. Martyn to devote himself to the work of a Christian missionary. He was ordained deacon October 22, 1803, then priest, and served as curate of Mr. Simeon. But his heart was still set on work in heathen lands, and he designed to offer himself to the Church Missionary Society. Financial disaster made it necessary for him to take a position which would give him the means of supporting his sister, and he accepted a chaplaincy under the East India Company. In October, 1806, he went to his station Dinapur. On the boat he studied Sanskrit, Persian, and Arabic, and translated the Parables. At Dinapur and Cawnpur most of his work in India was done in the space of four and a half months. He not only labored among the soldiers and English residents as chaplain, but preached to the natives in their vernacular, established schools, and spent much time in the work of translation. He studied Sanskrit, soon became fluent in Hindustani, and had religious discussions daily with the munshis and pundits. In February, 1807, he finished the translation of the Book of Common Prayer, in Hindustani, and immediately, after a Commentary on the Parables. In March, 1808, he completed a version of the New Testament in Hindustani, which was pronounced by competent judges to be idiomatic, and intelligible by the natives.

In April, 1809, he was removed to Cawnpur, 925 miles from Calcutta. He lived in a palankeen in the hottest season. In his journey of 400 miles from Chunar, the intense heat nearly proved fatal to him. On his arrival he fainted away. There being no church building at Cawnpur, he preached to a thousand soldiers, drawn up in a hollow square in the open air, with so much heat that many of them were overpowered. And as the service was held before sunrise, at the end of this year he made his first attempt to preach to the heathen in his own compound, "amidst groans, hissings, curses, blasphemies, and threatenings," but he pursued his work among the hundreds who crowded around him, comforting himself with the thought that if he should never see a native convert, God "might design by his patience and continuance to encourage other missionaries." He now translated the New Testament into Hindi and the Gospels into Judeo-Persian. Having perfected himself in the Persian, he prepared, by the advice of friends, with the assistance of the munshi Sabat, a version of the New Testament in that language. His health being seriously impaired, the doctors ordered him to take a sea voyage; and his version not being sufficiently idiomatic, he decided to go to Persia and correct it with the aid of learned natives, and also revise the Arabic version, which was nearly finished. After preaching in the new church, whose erection he had accomplished, he left Cawnpur October 13, 1810. Delayed at Calcutta a month, he left, January 7, 1811, for Bombay, and after a five months' journey reached Shiraz June 9, 1811, where, with the help of learned natives, he revised his Persian and Arabic translations of the New Testament. He made also a version of the Psalms from the Hebrew into Persian. He held frequent discussions with the mollahs and sibs, many of whom were greatly impressed. "Henry Martyn," said a Persian mollah, "was never beaten in argument; he was a good man, a man of God." To counteract the influence of these discourses and the perusal of the *Life of David Brainerd*, led him to devote himself to the work of a Christian missionary. He was ordained deacon October 22, 1803, then priest, and served as curate of Mr. Simeon. But his heart was still set on work in heathen lands, and he designed to offer himself to the Church Missionary Society. Financial disaster made it necessary for him to take a position which would give him the means of supporting his sister, and he accepted a chaplaincy under the East India Company. In October, 1806, he went to his station Dinapur. On the boat he studied Sanskrit, Persian, and Arabic, and translated the Parables. At Dinapur and Cawnpur most of his work in India was done in the space of four and a half months. He not only labored among the soldiers and English residents as chaplain, but preached to the natives in their vernacular, established schools, and spent much time in the work of translation. He studied Sanskrit, soon became fluent in Hindustani, and had religious discussions daily with the munshis and pundits. In February, 1807, he finished the translation of the Book of Common Prayer, in Hindustani, and immediately, after a Commentary on the Parables. In March, 1808, he completed a version of the New Testament in Hindustani, which was pronounced by
distant. The plague was raging at Tokat, he was compelled to stop there from utter prostration, and, after a week's illness, died, October 16, 1812, in the thirty-second year of his age, among strangers, with no friendly hand to care for his wants. His body rests in the Armenian cemetery. A monument was erected over the grave in 1813 by Mr. Claudius James Rich, the accomplished British resident at Bagdad, with an inscription in Latin. The East India Company had another constructed, bearing on its four sides an inscription in English, Armenian, Turkish, and Persian. The monument stands in the Armenian cemetery. He published Sermons Preached in Calcutta and Elsewhere (1812); Controversial Tracts on Christianity and Mohammedanism (1824); Journals and Letters (1837). The great work of Martyn's life was the translation of the Bible. His versions of the New Testament in Hindustani and Persian, spoken by many millions of people, are enduring monuments not only to his scholarship, but to his Christian zeal.

MASASIL: A village in the fertile Rovuma region of German East Africa. Station of the UM (1877), with (1903) 3 missionaries, 18 native workers, 12 outstations, 1 place of worship, 13 day schools, 1 boarding school, and 1,129 professed Christians, of whom 942 are communicants. The climate is very hot and malarious. Population, 40,000, mostly Arabs. Station of the R.C.A. (1893), with 1 missionary, 1 native worker, and 1 boarding school. Society spells the name Masasi.

MASCAT: Town and capital of Oman, Arabia, situated on the south coast of the Gulf of Oman, on a bay closed in front by a small island, and bordered E. and W. by high rocks with fortifications. It is an important commercial center in trade between Persia, Arabia, and India. The climate is very hot and malarious. Population, 8,500, mostly Arabs. Station of the R.C.A. (1893), with 1 missionary and his wife, 31 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 3 day schools, and 555 professed Christians, of whom 351 are communicants. Society spells the name Mascat.

MASERU: A village in Basutoland, Africa, situated on Caledon River about 100 miles N. N. E. of Aliwal North. Station of the Paris Evangelical Mission Society, with (1902) 10 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 3 day schools, and 555 professed Christians, of whom 351 are communicants. Society spells the name Maseri. Also station of the SPG (1887), with 1 missionary. Society spells the name Masiti.

MASITSI: A village in the S. part of Basutoland, Africa, situated near the Orange River, 63 miles N. N. E. of Aliwal North. Station of the Paris Evangelical Mission Society (1886), with (1903) 1 missionary and his wife, 31 native workers, 11 outstations, 1 place of worship, 1 Sunday school, 13 day schools, 1 industrial school, and 1,660 professed Christians, of whom 1,106 are communicants. Society spells the name Masitsi. Station of the SPG (1887), with 1 missionary. Society spells the name Masiti.

MASON, Rev. Francis: Born York, England, April 2, 1799. Died at Rangoon March 3, 1846. He was appointed by the American Baptist Missionary Convention, November 12, 1822, ordained May 23, 1830, and sailed May 26 for Burma. After spending a short time at Maulmain he was stationed, January, 1831, at Tavoy. The province contained fifty Burmese villages. He was met at the wharf by Mr. Boardman. He accompanied Mr. Boardman on his last tour among the Karens, and witnessed his triumphant death. Entering upon the work in his new field, he labored earnestly among the Karens, visiting them in their jungle homes, preaching, organizing churches, establishing schools. The rainy season was occupied in translating the Scriptures, and instructing in the theological seminary established for training Karen preachers.

Mr. Mason was not only a preacher among the Karens; he was also a man of science and a linguist. He translated the Bible into the two principal dialects of the Karen, the Sgaw and Pwo. He also translated Matthew, Genesis, and Psalms into the Bghai, another dialect. He wrote and printed a grammar of the first two for the use of missionaries. Wishing to give the pupils of his theological school some scientific knowledge, he wrote an original treatise on Trigonometry, with its Applications to Land Measuring, etc. This was printed in Sgaw and Burmese, and the government paid for an edition in Bghai Karen. At the request of English residents at Maulmain he prepared and had printed for work on the natural productions of his new field a work on the Natives of German East Africa, entitled Tenasserim; or, Notes on the Fauna, Flora, Minerals, and Nations of British Burma and Pegu, of which The Friend of India says: "It is one of the most valuable works of the kind which has ever appeared in this country, not only for the complete originality of its information, but also for the talent exhibited in collecting and arranging it." His motive in investigating these subjects was the more accurate translation of the Scriptures, having observed that incorrect renderings of words used to designate natural objects often made the sense obscure or absurd. He studied medicine after reaching Burma, and wrote a small work on Materia Medica and Pathology, in three languages. His greatest literary work was a Pali Grammar with Chrestomathy and Vocabulary, which was received by scholars with great favor. In 1842 he started a Karen periodical, the first native paper published east of the Ganges, and the next year a similar monthly in Burmese at Maulmain. The Karens had no books but many traditions, among which were many remarkable Scripture traditions, all of which Mr. Mason collected. Those relating to Scripture were published in an appendix to his Life of Ko-Thah-Bhu. In 1846 he yielded to the advice of the mission to return for rest to America. On arriving in Calcutta with health improved, he concluded to return to Burma and continue work on the translation of the Old Testament, stopping at Maulmain in order to have the advice of the missionaries there. The translation was finished in 1853, and, returning to Tavoy, he had the entire Bible printed. In appreciation of his marked literary and Biblical attainments, the degree of D.D. was conferred upon him in 1853 by Brown University. After the printing of the Karen Bible he took his final departure from Tavoy for England and America. On reaching Maulmain with health improved, he decided to visit Taung-ngu, the ancient capital, and begin a new mission. He started, with Mrs. Mason in a canoe, and found the people, who had never heard the Gospel message, wonderfully eager listeners. Dr. Mason continued to labor until utter exhaustion compelled him to leave. He
returned to Taung-ngu in 1857. There, living next to the printing office, he learned the printer's work through the press, but was attacked with fever at Rangoon and died after 46 years of missionary labor.

Besides the works mentioned, he published a memoir of his second wife, Mrs. Helen M. Mason, Life of Helen M. Mason, a collection of Karen hymns, and The Story of a Working-man's Life, an autobiography.

**MASSAU: A town and seaport, capital of Eritrea, Africa, on a coral island in the Red Sea, 200 yards from the mainland. It is connected with the mainland by an embankment, which also carries an aqueduct. It is the chief trading exchange for Abyssinia. Its climate is unhealthy, dysentery and fever being prevalent. Its population is 20,000, and is very mixed. It has a strong Roman Catholic mission.**

**MASULIPATAM: A city and seaport in Madras, India, situated in the District of Krishna, 143 miles N.E. by E. of Nellore. Population, 38,800, of whom 33,500 are Hindus. The name means Fish-town and its port is called Massibandar (Fish-port). This gives the official name to the town, which is Bandar. Station of the CEZ (1875), with (1903) 6 women missionaries, 33 native workers, 15 day schools, 1 boarding school, 1 industrial school, 1 orphanage, and 1,072 Zenana pupils. Station of the CMS (1841), with (1903) 5 missionaries, four of them with their wives; 77 native workers, 1 orphanage, 1 place of worship, 1 young men's Christian association, 53 day schools, 1 boarding school, 1 college, and 4,875 professed Christians, of whom 897 are communicants.**

**MATADI: A trading post in the Congo Free State, Africa, on the left bank of the Congo, opposite Vivi, just below the lowest falls. It is the starting point of the Congo Railroad. Station of the BMJ (1898), with (1903) 1 missionary and his wife, 1 native worker, and 1 day school. Station of the RBMU (1889) for forwarding stores to other stations.**

**MATAIEA: A village on the S. side of Tahiti Island. Station of the Paris Evangelical Mission Society (1886), with (1902) 1 missionary and wife, 1 place of worship, 1 Sunday school and 135 professed Christians.**

**MATALA: A village in the Transvaal, South Africa, situated about 22 miles N. W. of Pretoria. Station of the Berlin Missionary Society (1865), with (1903) 1 missionary, 12 native workers, 4 outstations, 1 day school and 304 professed Christians, of whom 116 are communicants. Society writes the name Ga Matale, the meaning being "At (chief) Matale's."**

**MATEBA: A town in the central province of Ceylon, situated 12 miles N. of Kandy. Population, 5,000. Station of the BMJ (1837), with (1903) 1 missionary, 5 native workers, 5 outstations and 2 day schools. Station of the FIMA (1896), with (1901) 2 missionaries, one with his wife; 17 native workers, 4 outstations, 7 places of worship, 6 Sunday schools, 8 day schools and 1 dispensary.**

**MATAMOROS: A town in the state of Tamaulipas, Mexico, situated on the Rio Grande del Norte, 185 miles E. by N. of Monterrey. Population, 13,000. Station of the AFM (1871), with (1900) 1 missionary and wife, 2 women missionaries, 5 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 boarding school, 1 temperance society and 100 professed Christians. Station of the PS (1874), with (1903) 1 woman missionary, 1 native worker, 13 outstations, 1 Sunday school, 1 day school, 1 boarding school and 30 professed Christians.**

**MATANZAS: A town and seaport on the N. coast of Cuba, situated 48 miles E. of Havana. It has a large trade in sugar. Its climate is malarious. Population, 27,000. Near by are some very fine stalactite caves. Station of the American Church Missionary Society (1883), with (1900) 2 missionaries, one with his wife; 4 women missionaries, 7 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 industrial class, 1 orphanage. Station of the MES, with (1902) 1 missionary, 2 women missionaries, 53 native workers, 7 outstations, 2 places of worship, 13 Sunday schools, 15 day schools, 2 boarding schools and 109 professed Christians.**

**MATATIELA, or MATATILO: A settlement in Cape Colony, South Africa, situated in Griqualand East, 110 miles N. W. of Pietermaritzburg. Station of the ECS (1878), with (1900) 8 missionaries, 18 native workers, 7 outstations, 9 places of worship, 7 day schools and 372 professed Christians.**

**MATAUTU: A settlement in Savaii, Samoa. Station of the LMS.**

**MATEHUALA: A village in the state of San Luis Potosi, Mexico, situated 22 miles W. S. W. of Catorce. Station of the AFM (1889), with (1900) 1 missionary and wife; 4 women missionaries, 3 native workers, 1 place of worship, 1 Sunday school, 1 Young People's Society, 1 printing press, 1 day school, 1 temperance society and 30 professed Christians.**

**MATHER, Robert Cotton: Born November 8, 1808, at New Windsor, Manchester, England; educated at Edinburgh, Glasgow, and Hamerton College; sailed July 9, 1833, for India, as a missionary of the LMS. He was stationed at Benares for four years, and then removed with his family to Mirzapur, founding a new station. In 1844 he went to England for his health. Returning in 1846, he continued his work in and around Mirzapur, and prepared Christian vernacular literature. He again visited England in 1857, where he resided during three years, at the request of the North India and the British and Foreign Bible Societies, engaged in making a revision, with marginal references, of the whole Bible in Urdu. This was carried through the press, and the New Testament in English and Urdu was reprinted. He reembarked for India November 20, 1860, with Mrs. Mather. In 1862 he received the degree of LL.D. from the University of Glasgow. In 1869 he left Mirzapur, for Almora, seeking to benefit his health. He aided
in mission work while carrying on his literary work, completing a new edition of the entire Bible in Urdu printed in Roman letters. He commenced work on an edition in Urdu printed in Arabic characters with references. He returned to Mirzapur in 1870. In 1875 he left India, on his final return to England. At the request of the Religious Tract Societies of North India and London, he undertook to prepare and carry through the press a Hindustani version of the New Testament portion of the Tract Society's Annotated Red Paragraph Bible. This was completed in two years. He then undertook the preparation of a similar version of the Old Testament portion of the same work. Unable to resume foreign missionary work, he thus continued in England to work for India with his pen. He died at Finchley, near London, April 21, 1877.

MATTOON, Rev. Stephen: Born at Champion, N. Y., U. S. A., May 5, 1816; graduated at Union College 1842, at Princeton Theological Seminary 1846; sailed for Siam as a missionary of the Presbyterian Board July 20, 1846, reaching Bangkok March 22, 1847. Bitterly opposed at first, he soon won the confidence of the people, and carried forward the missionary work with great success. He was the first to translate the Gospels into the Siamese tongue, and his last great work before returning home was the revision of the entire New Testament in that language. He was a leader in all the enterprises connected with the mission, and his prudent counsel was sought and his advice accepted by all. He resided and labored mainly in Bangkok, and was pastor of the First Presbyterian Church in that city from 1860 to 1866. In the latter year, on account of the failure of Mrs. Mattoon's health, he returned home. He was in the pastorate and in educational work in the United States, never neglecting the opportunity to preach until he died in 1889.

MAUBIN: A town in the district of Thongwa, Burma, British India, situated 32 miles W. of Rangoon. Population, 5,300, mostly Karens, and of whom 4,500 are Buddhists. Station of the ABMU (1879), with (1903) 1 missionary and his wife, 1 woman missionary, 27 native workers, 17 places of worship, 4 Sunday schools, 6 day schools, 1 boarding school and 879 professed Christians.

MAU: One of the Hawaiian Islands, between Hawaii and Oahu. The inhabitants, 12,109 in number, are all nominally Christians. Station of the Hawaiian Evangelical Society.

MAULMAIN: A town and seaport on the left bank of the Salwin River, Burma, British India. Low hills run north and south through the town, with European quarters on the west and native on the east of the hills. Population (1901) 58,446, of whom 27,000 are Buddhists and 13,500 are Hindus. Station of the ABMU (1827), with (1903) 4 missionaries and their wives, 3 women missionaries, 125 native workers, 28 outstations, 37 places of worship, 4 boarding schools, 1 dispensary and 1 hospital, 43 Sunday schools, 42 day schools and 5,300 professed Christians, of whom 2,542 are communicants. Station of the SPG (1859), with 1 missionary, 1 woman missionary, 27 native workers, 2 day schools, 2 boarding schools and 109 professed Christians. The name is also written Moulmein.

MAULVI BAZAAR. See MULVI BAZAR.

MAURITIUS: An island lying in the Indian Ocean, 500 miles east of Madagascar. Area, 708 square miles. Together with its dependencies, the Seychelles group, Rodrigues and Diego Garcia (total area, 172 square miles), it forms a colony of Great Britain. Climate tropical, and very malarious and unhealthful on the coast. Population in 1901 was nearly 376,000; of this number 251,550 are Indians, and the remainder of mixed African, mixed European, and Chinese origin. The Chinese number 3,935. The people are divided in their religious belief as follows: Hindus, 206,000; Roman Catholics, 113,000; Mohammedans, 41,000, and Protestants, 6,644. State aid is granted to both Roman Catholic and Protestant churches. English, French, and the languages of the different races represented are spoken there. The island was originally a French colony, and a stronghold of pirates in the Indian Ocean. In 1810 the English took possession of it, and in 1834 the 90,000 negro slaves were emancipated. The island is one of the foremost sugar-producing places of the globe, and the emancipation of the slaves necessitated the importation of labor from China and India, with the resulting conglomerate population. Education is conducted partly in government and partly in state-aided schools. There is also a Royal College. Missionary work was commenced here in 1814 by the LMS. After the Society gave up the mission in 1832 Mr. Le Brun, their missionary, returned to the island and took the pastoral care of the people, and the church of 50 members. When persecution in

THE ENCYCLOPEDIA OF MISSIONS

442

Madagascar (1836) drove out both Christians and missionaries, one of the latter, Mr. Johns, went to Mauritius, and continued to labor among the Malagasy. A plot of land was procured, and a community of Malagasy refugees was gathered together in 1845, after Mr. Johns' death, and theological instruction was given to young men from Madagascar, to prepare them for work, as soon as the persecution ceased. In the meantime Mr. Le Brun continued his labors among the natives, and in 1850 there were 173 church members at the stations of Port Louis and Moka. The SPG and the CMS are practically confining their efforts to the immigrants from India, who are engaged in work on the sugar plantations. These form two-thirds of the population.

The language difficulty is a very serious one. A missionary writes that a class of thirty received instruction in five languages—the English, French, Creole, Tamil, and Hindi. Even in this difficult field harvests have been gathered, and the CMS has received over 5,000 in the course of its work.

Mauritius-Creole Language: A dialect of the French which has become the medium of business in Mauritius and is the society language of the Creoles of the island.

Mayebash: A town in Japan, situated 70 miles W. of Tokio, having an important silk trade, Mayebashi silk being among the best of raw silks. Population, 20,000. Station of the ABCFM (1894), with (1902) 1 missionary and his wife, 2 women missionaries, 11 outstations, 3 places of worship, 9 Sunday schools, 1 boarding school, and 1 orphanage. Station of the PE (1888), with 1 missionary, 1 woman missionary, 1 native worker, 2 places of worship, and 46 professed Christians. The name is also written Maebashi.

Mayhew, Experience: Born Martha's Vineyard, Mass., and tend to become one. The Ki-Mbundu was

Mayombo: A settlement in British East Africa, situated 8 miles from the Uganda Railway station for Kikuyu, about 150 miles S. E. of the railway terminus at the Victoria Uganda, and 338 miles N. W. from Mombasa. It is in a fine forest district at an altitude of 6,900 feet, and has a bracing and healthy climate. Station of the CMS (1904), with 2 missionaries and 1 missionary's wife. The station at Fort Smith has been removed to this place.

Mazagan: A town and seaport on the W. coast of Morocco, in a fertile district, which gives it commercial importance. The climate is not unhealthy. Station of the South Morocco Mission Society (1891), with (1900) 2 missionaries, one with his wife, and 1 dispensary.

Mazatlan: A town on the W. coast of Mexico, situated 100 miles S. W. by W. of Durango. It is a trade center for the mining district of Sinaloa. The climate is healthy from November to May, but hot, wet, and unhealthy the rest of the year. Population, 20,000. Station of the MES (1890), with (1902) 1 missionary and wife, 1 native worker, 1 outstation, 1 Sunday school.

Mazeras: A settlement in British East Africa, 15 miles W. by S. of Mombasa. Station of the United Methodist Free Church (1893), with (1905) 1 missionary, 2 native workers, 2 outstations, 2 places of worship, 2 day schools, 2 Sunday schools, and 163 professed Christians.

Mazizin: A village on the W. side of Zanzibar Island; a suburb of the town of Zanzibar. Station of the UM (1889), with (1900) 2 missionaries, 6 native workers, 1 place of worship, 1 day school, 1 boarding school, 1 theological class, and 10 professed Christians.

Mbeeza's: A settlement, in Africa, of a chief whose tribe is found about 75 miles E. N. E. of the north end of Lake Tanganyika and 9 miles S. of Mpingle. Station of the Berlin Missionary Society (1899), with 1 missionary and 19 professed Christians.

Mbundu Language: An important African language belonging to the Bantu family, and spoken in Angola, Portuguese West Africa, and as a trading language over a wide region to the eastward. There are two principal dialects, the Ki-Mbundu and the U-Mbundu; indeed, some consider these as separate languages, whose differences are radical and permanent. It is to be hoped, however, that they will follow the general laws of language under civilized environment, and tend to become one. The Ki-Mbundu was reduced to writing in 1862. He Roman Catholic missionaries in 1642, and grammars and dictionaries of it in Portuguese have long existed. The Meth-
odist missionaries (U. S.) have done good work in studying its peculiarities and establishing a Christian literature in it. In Bihe the ABCF missionaires are doing the same kind of work in the U-Mbundu branch.

MBWENI: A village on the W. side of Zanzibar Island, a little S. of Zanzibar town. Station of the UM (1874), with (1903) 2 missionaires, 6 women-missionaries, 15 native workers, 1 post-station, 2 places of worship, 3 day schools, 1 boarding school, 1 industrial school, 1 dispensary, and 456 professed Christians, of whom 268 are communicants.

McALL MISSION: Known in France as the Mission Populaire Evangelique, Headquarters, 36 rue Godet de Mauroy, Madeleine, Paris. Founded in 1872 by the Rev. Robert W. McAll, then a pastor in Hadleigh, England, in response to the remark of a Parisian workingman to the effect that the people of France would have nothing to do with "an imposed religion of forms and ceremonies," but were "ready to hear" if any one would teach them "a religion of freedom and earnestness." These words, spoken August 18, 1871, moved Mr. and Mrs. McAll, after taking counsel with eminent Parisian pastors, to devote themselves to the evangelization of the working people of France. The requisite permission was obtained from the police commissioner, and on January 17, 1872, the mission was opened in Belleville, the communist quarter of Paris. Its opportuneness at once became evident. Calls for new stations came from many quarters, and volunteer service was freely offered, especially by French pastors and laymen. It was several years before any salaried worker was added to the staff, and Dr. and Mrs. McAll never received any stipend from the Mission.

By 1888 the number of mission halls was twenty-two in Paris and its environs, and 108 in provincial towns and cities, including Corsica, Tunis, and Algiers, with 20,000 sittings and an aggregate attendance of 1,556,600. The number of mission halls has since been gradually reduced by nearly one-third, altho the number of persons reached weekly by increased number of mission halls is in part due to financial necessity, but mainly to development in the activities of the French Protestant churches, many of which have taken over one or more of the mission halls. Thus the McAll Mission is becoming more and more a pioneering agency and feeder to the churches. Its halls, however, are still centers of a great variety of activities: Sunday and Thursday Bible schools, mothers' meetings, Christian endeavor, temperance work, dispensaries, lending libraries, domestic visitation, and an extensive circulation of tracts and of the Scriptures. But all these works are tributary to the evangelistic purpose of the mission, evangelistic meetings being held in every hall at least twice, and in many, seven times a week. These meetings are purely public, including no preaching or criticism or comment upon other forms of teaching or worship being allowed. No effort is made to win converts from the church of Rome, and many who are unquestionably converted remain in its communion. The majority of converts, however, are from free thinking and atheistic ranks—that immense multitude that have shaken off allegiance to Roman Catholicism.

Except in one or two cases of extreme urgency the Mission invests no money in buildings and founds no churches. Its halls are hired shops, and converts are sent to unite with some neighboring church, with whose pastor they are well acquainted through his regular work in the mission hall. It has often occurred that the majority of new members of a church in any given year are from the nearest mission hall.

The expenses of the Mission (which average less than $1,000 annually per hall) are met by voluntary contributions from Great Britain, Ireland, Protestant Europe, the United States, Canada, the descendants of the Huguenots in South Africa, and, in ever increasing amount, from the Protestants of France. The American McAll Mission Association, founded in 1883 to collect funds for the Mission, has 67 auxiliaries and provides more than a third of its income.

An important work was carried on in the three exposition years, 1878, 1889, 1900, by the Mission, in cooperation with the British and Foreign Bible Society and the Religious Tract Societies of London and Paris. Halls were opened near the exposition gates, with unceasing services, opportunities for religious conversation, and an enormous distribution of tracts and Scripture portions. In 1890 a citizen of New York provided 10,000 copies of the "Marked New Testament" in French, which were put to judicious use. Many remarkable conversions were due to this work in the exposition.

About 1885-1888, a missionary vessel having been lent to the Mission by Mr. Henry Cook, of the English Seaman's Mission, an important work was carried on in the seaboard towns of Brittany and Normandy, and up the Seine to Paris, resulting in the founding of several important stations. The chief advantage of the method was that the vessel, being commissioned and equipped to hold meetings, encountered no delay in obtaining local permits or suitable halls for the purpose. This suggested a similar mission along the inland water-ways of France. Two chapel boats, expressly designed for the work, now carry the Gospel along these "silent highways." "Le Bon Messager" was commissioned in 1890, and "La Bonne Nouvelle" (mainly the gift of an American woman) in 1902. This pioneer work has been singularly fruitful. Municipal and communal authorities almost invariably, and parish priests not infrequently, show hearty sympathy. The people come in crowds, making necessary two and often three successive services evening after evening. An increasing number of permanent works follow the boats, established by French Home Mission Societies or by resident Protestants.

In January, 1892, the Mission celebrated its twentieth anniversary, and Dr. McAll's seventieth birthday, with many tributes of honor and gratitude. In these the French Government joined by conferring upon Dr. McAll the cross of the Legion of Honor. On May 11, 1893, worn with the toil and care of his work for nearly twenty years, Dr. McAll was laid to rest in the exposition gates, with unceasing services, opportunities for religious conversation, and an enormous distribution of tracts and Scripture portions. He had already called to the Honorary Presidency a prominent business man of Paris, M. Louis Sauter, and to the active direction of the work the Rev. C. E. Greig, trained in the Mission under his own eyes. Since then the success of the Mission has been unabated, its importance increasingly recognized by French Protestants. The most important events of recent date (1903), besides the growing success of the boast work, are...
a remarkable awakening in nineteen mountainous villages in the south of France, due to itinerating work from Grasse as a center, and a still more notable revival in Corsica, where, after many years of persecution of McAll missionaries, the people of Aullene have abandoned the Church of Rome, provided funds to build a church and asked the Government to send them a Protestant pastor.

McALL, Rev. Robert Whittaker: The founder of the McAll Mission, Paris, began his ministry in 1848 at Sunderland, and had successive pastorate in Leicester, Birmingham, Manchester, and Hadleigh. Mr. McAll was known as a keen student of natural history, being an accomplished botanist, and becoming a Fellow of the Linnean Society. The three subjects, architecture, botany, and geography, were specially interesting to him, and he turned them all to good account in his pastoral work, and later on in his mission work in France.

In the summer of 1872 Mr. and Mrs. McAll crossed the Channel for the first time for a short visit to France. Taking with them a supply of French tracts, they made a point of distributing them wherever they went, and on the last evening of their stay in Paris, August 17, 1871, they found their way to the populous quarter of Belleville, where the people had so terribly suffered during the Commune, and began to give away their tracts among the crowds of working people that were thronging the streets.

While Mrs. McAll was giving the tracts around, inside of a café on the Boulevard de Belleville, Mr. McAll was accosted by an intelligent working-man, who could speak a little English, and who came forward saying to him, "Are you not a Christian minister, sir? I have something to tell you. Throughout this whole district, containing tens of thousands of workmen, we cannot accept an imposed religion. But if anyone would come to teach us religion of another kind, a religion of freedom and reality, many of us are ready for it."

Could it be that this was a call from God for them to go over and try the experiment and take the Gospel to the people of Paris? After much thought and prayer, and after consulting friends at home and in France, especially Pastor Georges Fisch and Pastor Theodore Monod, the important decision was made, and in October Mr. McAll resigned the pastorate of the church at Hadleigh, and December found him in Paris, with a small sum in hand for current expenses, and his slender patrimony on which to subsist.

On the 18th of January, 1872, the first "McAll Mission Hall" was opened on the rue Julian Lacrozé, Belleville, the first of a long list. Friends raised for it, and Pastor Georges Fisch, Monod, Bersier, de Pressensé, Appia, Viallette, Recolin, Dhombrès, Holland, and many others were his warmest supporters. The importance of the work accomplished, from a purely philanthropic point of view, was recognized by two societies conferring medals on the founder, the "Société Nationale d'Encouragement au Bien," and the "Société Libre d'Instruction et d'Education Populaire." The government of the Republic provided funds to build a church and asked the Government to send them a Protestant pastor.

McALL, Rev. Robert Whittaker: The founder of the McAll Mission, Paris, began his ministry in 1848 at Sunderland, and had successive pastorate in Leicester, Birmingham, Manchester, and Hadleigh. Mr. McAll was known as a keen student of natural history, being an accomplished botanist, and becoming a Fellow of the Linnean Society. The three subjects, architecture, botany, and geography, were specially interesting to him, and he turned them all to good account in his pastoral work, and later on in his mission work in France.

In the summer of 1872 Mr. and Mrs. McAll crossed the Channel for the first time for a short visit to France. Taking with them a supply of French tracts, they made a point of distributing them wherever they went, and on the last evening of their stay in Paris, August 17, 1871, they found their way to the populous quarter of Belleville, where the people had so terribly suffered during the Commune, and began to give away their tracts among the crowds of working people that were thronging the streets.

While Mrs. McAll was giving the tracts around, inside of a café on the Boulevard de Belleville, Mr. McAll was accosted by an intelligent working-man, who could speak a little English, and who came forward saying to him, "Are you not a Christian minister, sir? I have something to tell you. Throughout this whole district, containing tens of thousands of workmen, we cannot accept an imposed religion. But if anyone would come to teach us religion of another kind, a religion of freedom and reality, many of us are ready for it."

Could it be that this was a call from God for them to go over and try the experiment and take the Gospel to the people of Paris? After much thought and prayer, and after consulting friends at home and in France, especially Pastor Georges Fisch and Pastor Theodore Monod, the important decision was made, and in October Mr. McAll resigned the pastorate of the church at Hadleigh, and December found him in Paris, with a small sum in hand for current expenses, and his slender patrimony on which to subsist.

On the 18th of January, 1872, the first "McAll Mission Hall" was opened on the rue Julian Lacrozé, Belleville, the first of a long list. Friends raised for it, and Pastor Georges Fisch, Monod, Bersier, de Pressensé, Appia, Viallette, Recolin, Dhombrès, Holland, and many others were his warmest supporters. The importance of the work accomplished, from a purely philanthropic point of view, was recognized by two societies conferring medals on the founder, the "Société Nationale d'Encouragement au Bien," and the "Société Libre d'Instruction et d'Education Populaire." The government of the Republic made Mr. McAll a knight of the Legion of Honor in July.

In 1892 Dr. McAll's health failed, and he resolved to go to England for a change, but after a winter of severe suffering he returned to Paris, where, in his 72d year, on Ascension Day, the 5th of May, 1893, he peacefully passed away.

McMULLIN, Robert: Born at Philadelphia, Pa., November 30, 1852; graduated at the University of Pennsylvania 1870, and at Princeton Theological Seminary 1874; ordained July 27, 1856, and sailed for India September 11, the same year, as a missionary of the PN. He was stationed at Fatehgarh, in the state of Darabad, India, and was in the sepoys' quarters, 5,000 feet. Population, 18,000. Station of the PN (1889), with (1903) 1 missionary and his wife, 1 woman missionary, 1 Sunday school, 1 day school and 255 professed Christians.
health for England, and died two days after reaching London, January 24, 1857. A remarkable linguist, he was a proficient in Malay, well versed in the Classics, Hebrew and Javanese and other Eastern languages, besides Dutch and French, in all of which he wrote.

MEDICAL MISSIONS: "The history of Medical Missions is the justification of Medical Missions."

One of the oldest Buddhist writings recognizes the connection between body and soul, and that the doctor should also be a missionary. We find the following expression: "No physician is worthy of waiting on the sick unless he has five qualifications for his office: 1. The skill to prescribe the proper remedy; 2. The judgment to order the proper diet; 3. The motive must be life and not greed; 4. He must be content and willing to do the most repulsive office for the sake of those whom he is waiting upon; and 5. The sick are often left to die in the streets and deprived even, as has happened repeatedly, 250 to 800 miles. Let missionaries possess medical education, to enable them (1) to look after their own health; (2) to relieve the physical suffering around them; (3) to obtain ready entrance for the Gospel; and (4) to enable them to support themselves as far as possible. At Melange, in Africa, 400 miles from the coast, Mr. Heli Chatelain, a few days after his arrival, was offered by a trader a home in his house and $1,200 a year to look after his family alone, and he was assured that others in the town would increase the sum to $5,000 per annum if he would consent to remain.

Advantages and Benefits: The benefits of medical missions may be well nigh placed beyond computation in value. "It will not strike you with surprise," said Dr. J. L. Maxwell of Formosa, "when I tell you that again and again the lives of valued missionaries in China have escaped destruction at the hands of evil and fanatic mobs just because they were providentially recognized to be the associates of the mission doctor or that missionary hospital. During the Afghan war the tribe of the Wazaris destroyed the town of Tank, and even the government hospital, but spared the mission hospital of the Church Missionary Society, because of their esteem and affection for the medical missionaries. In the Chinese village of Nahan, 100 miles to the north of Swatow, a most remarkable work has been carried on without the agency of a resident missionary. It is the dwelling-place of a leper, and gathered about him a congregation of men and women whom he instructed in the Word and in the worship of the living God. In South Formosa I could point to four different congregations which lie far removed from each other, and at a distance from the mission headquarters, each of which sprang from men who had received their first religious impressions in the mission hospital, and these congregations have established flourishing schools."

We may sum up these benefits as follows:

1. Medical missionaries, as far as possible, become self-supporting, and go out on an unassistent basis.
2. This plan does not conflict with the work of the regular mission boards, but, on the con-
of the simplest principles of physiology is mar‐
unscrupulous in playing upon the credulity and­
superstition of these people. While nearly all
the population of China. The need of medical
care is the largest medical mission in the world. In
of the people who have but little _of British super­
terary, its purpose is to supplement their efforts
and pioneer where they may follow.
3. Where a dispensary has been located a
church has soon been formed.
4. Medical mission work destroys caste. In
the provinces of the empire there may be seen, day after
day, sitting side by side, the Brahman, Sudra and
Shanar, the Pulayar and Pariah, the devil-wor­
shipper, the worshiper of Siva, the Mohammed­
man, the Roman Catholic, and Protestant;
men, women, and children, while waiting
their turn to be examined, listening atten­
tively to the reading of God's Word, and the
preaching of the Gospel, thousands of whom,
otherwise, would never have an opportunity of
hearing the tidings of salvation.
5. Medical mission work secures protection
and provision. Dr. Summers, with thirty-six
 carriers, penetrated Africa 1,500 miles in a direct
line, securing from his grateful patients all the
means and material which they needed upon the
long and difficult tour, and during his whole
career of three and a half years he did not receive
one dollar from the Home Society.
6. Medical missions are far-reaching in their
results. As many as 1,200 to 1,400 towns and
villages have been represented in a single year
among the in-patients of one hospital, who, returning
to their homes, carry with them some of the
truth received.
7. Medical mission work is lessening the anti­
forgotten feeling, is diminishing the power of super­
stition which connects disease with evil spirits,
and is giving constant proof of the unsheath char­
acter of the Christian religion.
8. "One thing is perfectly certain," said Dr.
Post of Syria, "namely, that medical mission
work never fails. Other work may fail, but this
affording of relief for physical suffering goes on
on the debit side of Christianity in all cases, and
opens the way for other work to follow.
As it is impracticable to notice in detail the
growing work of medical missions in foreign
lands, it may be well to give some account of the
service performed by these missions on one or
Two fields, thus illustrating the power and possi­
bilities of this factor in Foreign Missions.
The published reports of 1902 show that China
has the largest number of medical missionaries,
missionary hospitals and dispensaries. In that
country there were, in 1801, 128 hospitals, 245 dis­
penaries, which during the year treated 1,674,571
patients; and more than 150 foreign physicians
were in service. In 1895 the men doctors
were fourteen per cent. of all the missionaries,
the women doctors were four per cent., and for
each doctor there were more than 4,000,000 of
the population of China. The need of medical
missions in this vast field is appalling. The Chi­
nese doctors are quacks of the worst type; their
medicines are mostly decoctions of herbs, mixed
with certain vile substances; their _materia medica_
is, perhaps, the worst on earth; their ignorance
of oil, disinfectants, and the use of antiseptics is mar­
vellous; and the "medicine man" is deceitful and
unscrupulous in playing upon the credulity and
superstition of these people. While nearly all
diseases are common in this thickly settled
country, smallpox is the most common. Vac­
cination was discovered during the last decade
of the 18th century; and, soon after its discovery,
Dr. Alexander Pearson, surgeon to the East India
Company, introduced it into China. It has been
said of him that he "opened China to the Gospel
at the point of the lancet." But Dr. Peter Parker
is known as the first medical missionary of China,
and, commencing his work under the American
Board in 1835 in Canton, he brought physical
blessings to at least 63,000 patients, and, many hundreds of thousands have been blessed indirectly by him. Dr. Parker
said: "I have no hesitation in expressing it as
my solemn conviction that, as yet, so medium of
bringing the people under the saving influence of the Gos­
pel, and within the influence of other means of
grace can compare with the facilities afforded
by medical missionary operations." Dr.
Parker's hospital at Canton still continues to exert
a wide influence throughout Southern China,
and until 1899 it was under the care of Dr. J. G.
Kerr. It belongs to the Canton Medical Missionary Society, and, while the largest hospital work
in China is at Swatow (English Presbyterian),
this Canton hospital comes first in importance,
for it is the first institution which combined the
alleviation of human suffering and the extension
of Christianity, and was, indeed, the pioneer
of modern medical missions. In this hospital,
during 1898, more than 26,000 patients were
receiving, and over 1,000 operations took place.
By Dr. Kerr and under his supervision some
100,000 patients have been treated, and about
45,000 operations performed; and in addition to
this active practise, he published thirty-two
books on surgery and medicine. The writer of
these words concluded, after visiting the foreign
mission fields in 1895 and 1896, that no institu­
tion in China was accomplishing more good than
the hospital at Canton. It was largely through the influence of a physician that India was opened to English trade.
As far back as 1636 Dr. Gabriel Boughron, an
Englishman, while practising at the court of
the Great Mogul, cured a princess who was badly
burned, and, as his only reward, requested that
his countrymen might have the privilege of trade
with India. The Daves established a medical
missionary work at Tranquebar and Madras in
1730-32. Through the skill of Dr. Thomas, who
went out with Carey as a medical missionary,
Krishna Pal was cured of serious hurt, was con­
verted and was the first Hindu baptized. The
first woman medical missionary from any land
was Dr. Clara A. Swain, sent by the American
Methodists to Bareilly, India; and they also
began the first medical class for women at Naini
Tal in 1869. In 1900 there were 111 missionary
hospitals and 255 dispensaries in India. The
native practises are barbarous; the death rate
in British-India is almost twice that of the United
States; cholera and small-pox are more or less
prevalent among all classes of the native; the
millions of demon-worshippers retard by their
ignorance and superstition the work of the physi­
cian; and it is estimated that of the 67,000,000
of the people who have but little of British super­
visors and European doctors.
At Neyoor, under the London Missionary Society,
is the largest medical mission in the world.
In 1901 there was there a hospital with fifteen
dispensaries, and eighteen native medical evan­
gelists; and in 1899 there were last time the
opening of a new dispensary at Sangli, a writer says: "The patients
began to arrive as daybreak, continuing to come
still ten o'clock, the hour for dispensing. A native Christian assistant was secured as interpreter and medical helper. He, aided by other native preachers, taught and preached to the people, while they gathered and waited for treatment. Scripture texts were pasted on their medicine bottles, and tracts distributed.  

In all foreign lands medical missions are becoming more popular and more powerful. It is an interesting question whether any missionary should be sent out without some knowledge, at least, of the healing art. The Christian physician is honored and welcomed always and anywhere in foreign fields; national and religious prejudices vanish before him, and in one year he can do what it would take another missionary many years to accomplish. It is stated that Dr. Asahel Grant had twenty times more interest in him than in any missionary who was sent out expressly to labor among them. Many who are studying the foreign field are most important elements of success in the foreign field.

"God had only one son and He gave Him to be a medical missionary," exclaimed Dr. Livingstone; and we recall the impressive fact that this Great Physician sent forth His first disciples to heal as well as to preach. Only a few hundred Christian physicians has America sent forth to the billion of suffering people across the seas; the Great Physician sent forth His first disciples to a medical missionary," exclaimed Dr. Livingstone.

</table>

of his Irish masters, he became the Apostle of the North. The Mercians likewise gave up the old gods with one consent, and England was now Christian from the Firth to the Channel, being bounded by the Christian Scots on the north and the Christian Welsh on the west, which latter, however, in their implacable animosity against their conquerors, had refused to take the slightest share in the work of conversion.

As this Roman civilizing influence was, so far as direct influence was concerned, and yet her merits in the conversion of England are not small: (1) sheinitiated evangelization after the earlier Christianity was almost extinct; (2) she mainly converted the Saxons, as distinguished from the Anglians; (3) she introduced the Gospel among the Anglians; (4) she undertook and carried through, with general consent of the English, that to which the Irish were everywhere utterly incompetent, namely, the organisation and practice of the English Church, which she thus held in unity with the general body of Christendom, and preserved it from erratic developments and from final disintegration and anarchy, such as befell the Irish Church, and finally induced even her to submit herself to the organisation of the Continent.

The Irish Church was, during the early Middle Ages, equally zealous and equally effective in the work of conversion on the Continent. She was, indeed, the great Missionary Church of this era. The reception of the Gospel in Ireland, although it did not destroy the intertribal anarchy and to remove the moral rudeness of the people generally, evoked unbounded enthusiasm in thousands of elect spirits, who gathered around their abbots in multitudes of monasteries, surrounded by pious families, and gave themselves up to an extravagant asceticism, but also to noble intellectual pursuits, and a deep study of the Scriptures. While Irish piety had a very imperfect control over the passions of anger and wrath; was deficient in that moral dignity which was congenial to Roman, and still more to the higher English piety; on the other hand, it was ethereal, full of tender and delicate sentiment and pervaded with the glow of a fiery enthusiasm, which, finding insurmountable obstacles at home in an anarchy which it knew not how to reduce into order, poured itself in an irresistible flood upon Western and Middle Europe. The Irish at this time were incomparably superior to the Romans in point of knowledge, while the Irish temperament and the Irish mind had an extraordinary power of communicating its convictions to the Irish monks, caring little for the secular clergy, allowed them to marry. They honored an abbot vastly more than a bishop. But they themselves, in their unsparking asceticism, presented to the wretched Continental populations of that era, succeeding the fearful devastations of barbarian war, the impressive spectacle of men living, by their own free will, a more wretched life than the wretched peasants, and yet making not the least account of this destitution of earthly comforts. They were listened to with profoundest reverence, and mightily organized their fellow-Celts (of the Cymric branch), the rural populations of Gaul, and to the rooting of the Gospel in Switzerland and in various parts of Germany, especially the south.

The great Irish missionary on the Continent was Columban (not to be confounded with the earlier Columba, of Iona), who established his monastery in 590 among the Vosges Mountains in Eastern Gaul. His rule was severe but practical, combining ascetic self-discipline, manual labor in various forms and study, especially of the Scriptures. He laid great stress on the inward state, and subordinated all observances to this. But his courageous opposition to the wickedness of Queen Brunehild caused his expulsion from Frankish Gaul into what is now Switzerland. His enemies, however, following him up, expelled him after three years from his missionary labors here also. He withdrew into Italy, where he died in 613, in the monastery which he had founded at Bobbio, near Pavia.

He left behind, however (detained by sickness, like St. Paul, among the Galatians), a beloved pupil, a young Irishman of good family, named Gallus. Gallus sought out a retreat in the deep woods of Eastern Switzerland, where he founded the monastery famous for so many centuries as St. Gall, the nucleus of the present canton of that name. It became a great center of population, civilization, learning and Christianity for Eastern Switzerland, the Tyrol and Southern Germany. Somewhat later came the Irish Fridolin, laboring in Suabia, and the Irish Thudpert (whom the Germans call St. Hubert), laboring in the Black Forest. The Irish Cilian, after 650, labored in West Thuringia, toward the middle of Germany. And these are only shining examples of an endless succession of missionary monks that poured out for two or three centuries from Ireland into Gaul, Switzerland, Southern and Middle Germany. Before Boniface began his labors, about 720, Southern Germany seems to have been mainly, and Middle Germany largely, Christianized. The Saxons, who filled the great northern plain of Germany, gave not the slightest heed to the Gospel, the acceptance of which they regarded as the mark of subjection to their rivals, the Catholic Franks.

From of old, along the Rhine and the Danube, and even farther in the heart of Germany, there had been Christian congregations. And though these had been ravaged and trodden down in the tumultuous movements of the migration of the nations which overthrew the Roman Empire, they still offered a good many points of attachment for the Irish missionaries. The most illustrious of these were, on the Danube, Severinus, whom some held to be a North African and some a Syrian, and, near the Rhine, Eligius, of an old Christian family of the Franks, originally a goldsmith, afterward a bishop. Both these men distinguished themselves by boundless compassion and works of mercy, sometimes redeeming captives, sometimes interceding successfully for the wretched people with their barbarian conquerors, and thus laying foundations the traces of which still subsist when the Irish missionaries subsequently began their labors. Eligius, indeed, was later than the earliest of these missionaries.

There was, however, the same difficulty with Irish missionary work on the Continent that there had been in England, and namely, a want of unity and of organizing power. In Ireland itself, beyond a general deference paid to the abbey and bishopric of Armagh, there was no ecclesiastical unity. The priests had no defined parishes, the bishops no defined dioceses. The abbots were the real ecclesiastical rulers, but every
abbot only of his own monastic sept. And this confusion and jarring individualism was reflected in the ex-English heathenism from the rest of Western Europe, had diverged in various particulars, not so much of doctrine (for both parties stood on the foundation of the great councils, including the Council of Tours) as of ecclesiastical usages, discipline, worship and polity, points which necessarily occasioned a perpetual friction. Especially was it intolerable that while the Romans had adopted a corrected Easter cycle, the Irish still adhered to the earlier, unreformed cycle. Thus, before Oswiu of Northumbria had wisely decided to accept the Roman discipline, the Northumbrian kings had sometimes been holding the Easter rejoicings while their Kentish or Saxon queens were still in the sadness of the Passion-week.

Germany, therefore, compelled like England to commit her Christian future either to the erratic uncertainty of Irish impulse or to the steady, tho certainly much harder, hand of Roman discipline, decided, and doubtless on the whole decided wisely, for the latter. Many fresh and independent Churches, and aspirations were, it is true, compelled to give way for a time. But in reality the Irish national spirit was as distinctly alien from Germany as the Roman. And, except in some casual particulars, the spiritual depth and evangelical freedom of the future Protestantism were no more anticipated in Celtic than in Latin Christianity. Protestantism was, as to its human source, an entirely original creation of the Teutonic genius, which first really apprehended the full significance of the apostolate of Paul. That Rome prevailed, and Ireland gave way, in the final settlement of the German Church, cannot, therefore, be regarded on the whole otherwise than as a providential good. The more we learn of the Middle Ages, the more fully we become aware that there were never absent from these seething forces of spiritual and social anarchy which Rome could hardly control, and which Ireland, herself anarchical, could not have controlled at all. There were, moreover, still latent in the Saxons of Northern Germany, and yet more terrible in the breeding clouds of Scandinavian piracy that was one day to burst forth over Europe, aggressive forces of heathenism, which could not have been withstood by any fabric less firm than that great organism which we call Rome as its center, which finally extended to the very Orkneys, and at last took in Ireland herself, and grappled with the most formidable enemy by incorporating the Scandinavian North. Neander, regretfully as he recounts the ultimate prevalence of Rome, acknowledges that the rude nations needed a vigorous discipline of centuries in which the Church would be ripe work spiritual and national independence.

The conference at York, in the year 664, before King Oswiu, between Bishop Colman, of the Irish use, and the Presbyter Wilfrid, of the Roman use, decided the latter. The battle was won with the Saxons and Jutes of Southern England in accepting Rome, rather than Iona, as their future spiritual metropolis. It decided no less the ecclesiastical destiny of Germany. For it was an Englishman that was finally to bring Germany into conformity with Rome, and away from conformity with Ireland.

Winfrid, as he was properly called, was born in Kirton, Devonshire, in the year 680. His father, a man of wealth, destined him for some secular profession, but, humbled by a reverse of fortune, yielded at length to his son's ardent desire for a monastic life. In this Winfrid developed the same qualities of earnestness, deep disinterestedness, unquailing courage, practical skill, monkish narrowness of mind, and intolerant orthodoxy which distinguished him subsequently when acting, under the name of Boniface, as the papally invested missionary archbishop of Germany. As a Saxon he had, of course, an affinity of race with the Germans, which doubtless came into play in his long contest with the Irish missionaries of the Continent. To him the Roman discipline and the Roman supremacy were of the very essence of the Gospel. He was incapable of making the slightest concession to the Irish monks, altho they had converted so much of Germany, for in his eyes the Irish hardly deserved to be called Christians at all, and he suffered grievous troubles of conscience that he could not altogether avoid an intercourse of social civility with them.

He began his missionary labors in 715, among the Frisians of the German coast. His elder countryman, Willibrord, after twelve years of study in Ireland, had begun a mission in Frisia, aided by various other Englishmen. Willibrord, altho of full Irish origin, was an Englishman, conformed to the Roman discipline and visited Rome to solicit the papal sanction on his new mission. He was there ordained by the pope himself bishop of Utrecht, where he died after thirty years of not ineffective work. Winfrid first went to Frisia during one of the many intervals of adversity in the mission. He afterward, however, returned and labored for three years under Willibrord with encouraging results. Declining the aged bishop's offer to consecrate him as his successor, he journeyed to Thuringia, in Middle Germany, where he brought two princesses and in various visits admitted at least 100,000 persons to the Church. In Hesse, his boldness in telling the sacred oak of Donar (whom the Scandinavians called Thor) so appalled the heathen that large numbers forsook the worship of gods who seemed unable to defend their own honor. He had already twice visited Rome, and at his second visit, in 723, had been ordained regular bishop by the pope, with what we might call a roving commission, taking an oath of obedience and conformity to the Apostolic See, which became the keynote of his whole subsequent policy. Turning away from his nearest German kinsmen, the Saxons (who were, indeed, at this time wholly insensible to Christianity), he spent most of the rest of his life in incessant, intense, and yet, as he thought, successful efforts to bring Middle and Southern Germany under the Roman obedience. His double controversy with Virgil, the learned Irish abbot, subsequently bishop of Salzburg, was, it is true, unsuccessful. Rome, tho a great admirer of her servant Boniface, decided both times against him, not without some gentle quizzing of his hyperbolical orthodoxy. But Virgil was willing to come under the new system, and after his death was impartially canonized by the Apostolic See.
In 738 Boniface visited Rome a third time, and received the fullest legatine powers, as archbishop of Germany. He held numerous synods, supported at length by Pepin, who, having been authorized by Pope Zachary to set aside the outworn Merovingian line, and seeking with him the royal dignity for himself, was then, in the pope's name, anointed by Boniface, and thus stood committed to the closest union with Rome. Henceforth Boniface had good assurance of complete success in his effort to transform the German Christianity of Protestantism found its home, Christianity of all the German tribes. And when Luther himself, it is true, tho called a Saxon, was given much attention to his course that the Great. His spiritual adviser, the English missionary, but by the crowned soldier, Charles the Great, (Charlemagne), having forcibly converted the Saxons, wished to instruct them in their new religion, and removed a colony of monks from Corbie to the Weser, calling the daughter-abbey Convey, Angsar was one of the colonists. He was a Roman rather than a German Frank; in other words, that he was a Frenchman proper. He early became a monk in the neighboring Corbie, under the abbot Adalhard and the learned teacher, Paschasius Radbert. But when Charles the Great (Charlemagne), having forcibly converted the Saxons, wished to instruct them in their new religion, and removed a colony of monks from Corbie to the Weser, calling the daughter-abbey Corvey, Angsar was one of the colonists. He had early been possessed of a vocation to the missionary life, and his whole life showed that he "was not disobedient to the heavenly vision." The pious and statesmanlike Ebbo, archbishop of Rheims, having gained over to Christianity King Harold of Denmark, on a visit to the Emperor Lewis, deputed Angsar to accompany the king on his return to his fierce heathen subjects, a journey then so much dreaded that Angsar could only find a single monk, Authbert, to go with him, who, soon dying, left him alone. After two years' absence, and some initial successes, he and King Harold were both expelled. But now better prospects began to open in Sweden. Seeds of Christianity had already begun to germinate there. Angsar, therefore, during some two years' residence found much encouragement. His favorable report, on his return from Sweden, induced the Emperor Lewis to establish the archbishopric of Bremen-Hamburg as the basis of the Northern mission, and to dispatch Angsar to Rome, where he received episcopal consecration and was invested with the archiepiscopal pallium. Having many years, from the basis of his metropolitan see, with a flexible patience that knew no discouragement, that availed itself of every opportunity, and recovered itself after every shock of heathen aggression, as soon as proper use was made of his new powers, Angsar steadily pursued his great purpose. He was aided by suffragan bishops in Denmark and Sweden, whom he supported as occasion required by personal visits. At last, the heathen having already become accustomed by many instances of deliverance after invoking the name of Christ, to regard Him as a mighty deity, Angsar visited the national assembly of Gothland, in the south of the peninsula, and that of Sweden proper, in the middle, and obtained from each a decree that the preaching of Christianity was to be freely obtained from each a decree that the preaching of Christian religion should be freely accepted in the Gospel should be freely accepted in the Gospel. Angsar, having made arrangements for the more effective prosecution of the missions, returned to Bremen. There were many subsequent vicissitudes, especially in Denmark; for the Gospel seemed to cohere with the nature of the milder and perhaps more thoughtful Swedes, who, moreover, are of a deeply devotional turn. But the foundations laid by Angsar remained. Danish conquest in England, moreover, reacted for the evangelization of Denmark, especially through the influence of
of the mighty Canute. The process of conversion was slow but steady. By the year 1100 it is doubtful whether any traces of avowed heathenism remained in either Denmark or Sweden.

After more than thirty-four years of labor for the salvation of the heathen nations of the north, when past the age of sixty-four he was attacked by a severe fit of sickness, from which he died.

His character seems to have the effectiveness of Boniface without his hardness, and the zeal of the Irish missionaries without the wrathful impatience adhering to some of them—a most winning embodiment, certainly, of missionary excellence.

The Christianization of the Mongolian Finns resulted in part from the conquest of Finland by St. Eric, the first Swedish king of that name, but still more from the evangelical labors of St. Henry, the first bishop of Abo. St. Henry's Day is still a conspicuous festival of the Lutheran Church of Finland.

The introduction of Norway within the Christian pale resembles in its earlier stage a chapter of Muslim and, in its later stage, of Buddhist, propaganda: more than any chapter of genuine missionary enterprise. It seems that Norway have had very little root in the religious instincts of the people, altho genuine Christian influences are by no means absent. But the kings who finally subdued the whole of Norway under them, and rooted out the power of the petty local monarchoes, being convinced that effective government could only rest on the foundation of a wider and richer civilization, and that this could only be supported by Christianity, really forced Christianity on their subjects at the point of the sword. Methodius (for Cyril soon became a monk in Rome), with his more flexible Greek character, boldly introduced Slavonic worship. The German bishops murmured; but the pope, who had already consecrated Methodius Archbishop of Moravia, stood forth as his defender. Bohemia, then dependent on Moravia, was Christianized from it. The Germans still wrangled with Methodius over his dependent jurisdiction and over his Slavonic liturgy, so that at last he went to Rome, and seems to have followed his brother Cyril into retirement. But the Christianizing impulse had now become so strong among the Slavonians that, by some what obscure stages, the whole Slavonic race from Bohemia to the Adriatic is found to be Christian.

It is interesting to note that, after long interruption, the use of the Slavonic liturgy has lately been conceded again, by Pope Leo XIX., to the Slavonic Ulyrians.

The propagation of Christianity among the Slavonic Wends, between Bohemia and the Baltic, is a confused history of genuine missionary successes, of armed proselytism by over-seas princes, and of violent and persecuting reactions. Yet ultimately Christianity prevailed here also, by an historical necessity. Poland, like its great Slavonian sister and rival, Russia, was Christianized mainly from above, not far from the year 1000. But while Russia took Constantinople for her spiritual capital, Poland, as might have been expected from her rivalry, chose Rome. The Teutonic order of military monks had much to do with the suppression of paganism along the Baltic.

The Magyars, of Mongolian race, who wrought fearful devastations in Germany in the earlier Middle Ages, but were finally shut up to their new kingdom of Hungary, of which they still form the dominant race, were found after this check not altogether inaccessible to German missionaries. St. Adalbert, Archbishop of Prague, who afterward died a missionary martyr among the Slavonic Prussians (near Poland), spent some time in Hungary. Prince Geisa and his wife were baptized, but remained about as much pagan as before. Their son Stephen, however, (St. Stephen) was a thorough and zealous Christian. He married a German princess, received the rank of king from the Christian Emperor Otto, and succeeded in impressing on the kingdom of Hungary that deep character of medieval
yet kindly Catholicism which it still retains. Protestantism is there powerful, and honorably considered; but nowhere else in Europe does the statistical magnificence of the Middle Ages remain so little disturbed. The Archbishop of Gran, the Primate of Hungary, is the only primate of actual jurisdiction in the Latin Church. And at a coronation the lines of splendid horsemen, Southern and Middle Germany and abbeys show that in Hungary the illustrious Benedictine order still retains its ancient preeminence. The Hungarian Christianity, which glories in the monarch’s title of Apostolical King, has been the anvil that has worn out the Muslim hammer of the kindred Turks. But this Mongolian Christianity has shown its zeal rather in the field of war than of spiritual achievement, in which the Mongolian race has seldom been preeminent.

The latest surrender of a whole European nation to the profession of Christianity took place in 1384, when Ladislaus Jagiello, Grand Duke of the then very extensive and powerful principality of Lithuania, obtained the hand of Hedwig, Queen of Poland, and went over, with all his people, from paganism to the Church. In order to the missionary spirit in the desire to overcome Islam and nations to the Gospel of Christ.

While these movements were winning Northern Europe to Christianity, on the south there arose the conflict with Islam. The crusades were scarcely missions, and yet there was a distinctly missionary spirit in the desire to overcome Islam by Christianity as well as to rescue the Holy Sepulchre. So, too, the motive was inadequate.

In considering the character of this period it becomes apparent that it is but the development of the close of its predecessor. The Church as a whole had no idea of whatever is the proper place of Christianity. A comparatively small number of individuals, by superb devotion, saved Europe and laid the foundations of the development in the centuries that followed, in the educational institutions to which Germany and England owe their preeminence, in political and intellectual as well as spiritual life. It was the missionaries of the Middle Ages to whom the modern European owes much of the best life that he enjoys. In the degree that Southern Europe failed to share their influence, it fell below their standard.

So far as methods were concerned, there was little of what may be called popular influence through these missions. The missionaries sought the leaders, relying upon them to bring with them their people. Even in their educational enterprises it was the possible leaders that they gave attention. The era of the common people had not yet come.

So, too; the motive was inadequate. It was very largely the Church, its aggrandizement, its victory. Even with Raymond Lull, the great ambition was not so much the salvation of Muslims as the defeat of Islam. It remained for the Reformation to find for the individual soul his proper place in the scheme of a world’s salvation.

MENDINGEN: A village in the Zoutspansberg District of Transvaal, Africa. Station of the Missionary Society (1881), with 1 missionary, 19 native workers, 8 outstations, 6 day schools, and 1,121 professed Christians, of whom 619 are communicants.

MEERUT: A town in the Punjab, India, capital of the district of Meerut, situated 39 miles N. E. of Delhi. It is the headquarters of a British military division, with extensive camps. The mutiny of 1857 began here. Altitude, 737 feet. Population (1891), 75,600, about evenly divided between Muslims and Hindus. Station of the CMS (1815), with (1903) 2 missionaries and their wives, 2 women missionaries, 30 native workers, 7 outstations, 1 place of worship, 17 day schools, 2 boarding schools, and 1,401 professed Christians, of whom 116 are communicants. Station also of the ME, with (1903) 1 missionary and his wife, 2 women missionaries, 36 native workers, 38 Sunday schools, 1 college, 10 day schools, 1 boarding school, and 1,275 professed Christians, of whom 495 are communicants. Station also of the RPS, with 2 native workers, 1 outstation, 1 college, 1 Sunday school, and 55 professed Christians.

MEESTER CORNELIS: A village in the island of Java, situated 10 miles S. E. of Batavia. Station of the Netherlands Missionary Society (1880), with (1903) 1 missionary of overcoming Islam. In this work he sought the aid of the King of Majorca, of the pope, of the Council of Vienne, of England. Every effort to arouse the Church having failed, he went himself once and again to Cyprus, Asiatic Turkey and Tunis, where at last his life was a sacrifice to his zeal.
MISSIONS, Benjamin Clark: Born at Bethlehem, Conn., August 8, 1789; graduated, 1809; spent two years and a half at Andover Theological Seminary. While there he determined to devote himself to a missionary life. He was ordained June 21, 1815, and sailed October 23 following as one of the original founders of the ABCFM in India, Ceylon. There he labored forty years. Failure of health in 1858 compelled him to relinquish the mission work. He died in New York City, May 12, 1862, aged sixty-three.

MELITITA: A growing town, military and railroad station in Burma, British India, situated 80 miles S. by W. of Mandalay. Population, 7,200 (1902). Station of the ABMU (1890), with (1903) 1 missionary. 3 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 outstation, and 14 professes Christians.

MELANESIA: The name given to that part of the islands of the Western Pacific Ocean which lie south of the Equator and between the Fiji Islands on the east and New Guinea on the west. The people are a branch of the Papuan race, and much darker than the true Polynesians. They are also more savage and have less advancement in culture. The languages of the various groups of islands are one, with great variation into dialects in the different groups. The islands are mostly of volcanic origin, but many are surrounded with coral reefs. The principal groups included in this division are the Bismarck archipelago, Solomon Islands, the Louisiade archipelago, and the New Hebrides. New Caledonia, New Guinea, and the Fiji Islands are ethnologically connected with the same division of Oceania.

Mission work was begun in the New Hebrides by the visit of the Rev. John Williams of the LMS to Erromanga in 1839 at the expense of the United Presbyterian Church of Scotland. John Williams was tried by the islanders, and the effort to evangelize the islands was continued by the LMS through native workers from Samoa, until 1843. In that year the Rev. John Geddie, sent out by the Presbyterian Synod of Nova Scotia, established himself on Anelield, and after terrible hardships succeeded in his work, so that over his grave is written "When he came to the island in 1848, there was not a single Christian; when he left in 1872, there was not a single heathen."

From that beginning the work has spread through more than 20 islands. It is now carried on by a society composed of a sort of federation of Presbyterian bodies, known as The New Hebrides Mission. The organization now has 50 missionaries in the islands. The total of professed Christian adherents is about 17,000. The northern part of the New Hebrides and the Solomon and Santa Cruz Islands are occupied by the Melanesian Mission, founded by Bishop Selwyn in 1849, and made fruitful by the blood of martyrs. The LMS has also been able to begin evangelistic work through native workers in New Caledonia, from which its missionaries are excluded by the French Government.

The whole number of professed Christian adherents under the LMS and the Paris Society in this group is about 10,000, and the aggregate native Christian population of Melanesia is probably over 40,000. What this means, as a testimony to the power of the Gospel, can be realized by those only who know the condition from which these converts have risen.

MELANESIAN MISSION: Headquarters, Norfolk Island.

The diocese of the first Anglican bishop of New Zealand embraced a large number of the islands of the South Pacific, and a suggestion was made to Bishop Selwyn, on his consecration in 1841, that he should establish an Island Mission, separate from that of New Zealand. He took up the idea with the thought of making these island regions a missionary field that would call out missionary spirit in the colonies. From 1847 to 1849 Bishop Selwyn made several voyages to neighboring regions. From year to year as his acquaintance with the islands and the people increased, he extended his voyages toward the north, and most of the islands between New Zealand and the Santa Cruz group were visited, and little by little the confidence of chiefs and leading men was gained. Thus, the islands of Melanesia were opened to missionary effort, and at a meeting of the bishops of Australasia, held in Sydney in 1850, this part of the island world was adopted by them as the mission work of their churches.

By contributions from Australia, the "Border Maid," a schooner of 100 tons, was furnished for the mission; and in 1851 Dr. Tyrrell, the Bishop of Newcastle, New South Wales, who had been Bishop Selwyn's comrade in the Cambridge University boat, accompanied him on a voyage, seeing for himself the missionary way in which Bishop Selwyn dealt with the savages.

In 1855 the Rev. John Codrington Patteson joined the mission at his own charges, in 1862 was consecrated Bishop of Melanesia and was named the Codrington. The chief sphere of Bishop Patteson's labors was in the Northern New Hebrides, the Banks, and Solomon groups. Between the latter are the Santa Cruz and Swallow Isles, where he eagerly sought openings; and it was in the Swallow group that he, with Rev. J. Atkin and a native teacher, was murdered in 1871.

Dr. Codrington, while declining the bishopric, continued the mission, which now owes more than can be said to his labors in every field of the work, but especially to his management of the school at Norfolk Island and to his unwaried researches into the philology of the island languages and his application of them to the practical work of translation. In 1873, Rev. J. R. Selwyn, a son of the pioneer bishop, and Rev. John Still volunteered for the work, and the former, joining in 1877, consecrated Bishop of Melanesia. The present field of the Melanesian Mission embraces groups of islands from the northern part of the New Hebrides to the Solomon Islands.

From the earliest days of the mission the Bishop of New Zealand hoped to work these islands by means of native teachers and a native ministry. To use his own phrase, "The white
corks were only to float the black net.” To carry out this purpose, the islands are divided into districts, each headed by a member of the staff, and from these districts boys are brought every year to Norfolk Island, where they are trained. The school work breaks up in April, when the island voyages begin, and is not taken up again till they are over, in November. These winter voyages are the most arduous part of the work connected with the mission, and are prosecuted under circumstances of continual hardship and danger over seven months of the year and 18,000 miles of sea; but without them and the ill-fated vessel, the “Southern Cross,” the mission could not be maintained.

The income of the mission is derived from subscriptions from England, Australia and New Zealand, and from an endowment fund, a large portion of which was bequeathed by Bishop Patteson, and which does now about £1,500 a year.

In New Zealand the mission is adopted as a work of the Church, and collections are made for it in every parish. In Australia the help is less definite, and comes largely from Sunday schools, which support scholars at the mission.

mission fields: 1. New Hebrides: As the Presbyterian New Hebrides Mission increased in strength and enlarged its borders among these islands, the Melanesian Mission confined its labors to the most northern islands, while extending its efforts toward the Santa Cruz and the Solomon Islands. Its present stations in the New Hebrides are on Maewo, or Aorea, Opa or Lepeis Ise, and Aroaga or Pentecost Island. All were visited by Bougainville, who took possession of them in the name of the King of France, and by Cook. All had a bad reputation, but the reception accorded to Bishops Selwyn and Patteson was, in the main, friendly, and where there was opposition or apparent enmity, it could be traced to treachery or abuse by Europeans.

2. The group of islands, discovered by Mendana in 1568, and called by him the Solomon Isles, because he supposed them to be the source of King Solomon’s “gold, ivory, apes, peacocks,” lie about 200 miles to the northwest of the New Hebrides group. They were first visited by Bishop Selwyn, and Patteson in 1857, and from that time until his death, in 1871, Bishop Patteson put forth every effort for them, with the result that stations and schools are now established upon most of the islands of the group. At Isabel, the most northerly of the Solomon Isles, there are three schools, and Christianity has gained a great hold on the people. Other islands upon which many schools and churches have been established are San Christobal, Ulawa, and Malayta.

3. The Banks Islands, lying to the north of the New Hebrides, have been the most successful field. Motu is a Christian island, under the charge of a native pastor, as are also Mohlav and Ra. Schools well attended and well taught fairly encircle the islands, so that the people almost everywhere have an opportunity of attending one or other of them within reasonable distance. The Santa Cruz Islands have for three centuries borne a tragic relation to European life. Mendana in 1569, Capt. Carteret’s expedition in 1797, La Perouse in 1788, and D’Entrecasteaux in 1788 all suffered at the hands of the islanders, and it was near them, while planning for them, that Bishop Patteson was murdered in 1871. Rev. J. Alkin and a native teacher, and later Commodore Goodenough, also died by their hands.

The report of the Mission shows, in 1900, 28 missionaries, about 400 native workers, 14 stations, 1,700 communicants, about 170 day schools with 15,000 pupils, 2 higher schools with 280 pupils.

MELOLO: A settlement on the E. coast of Sumba Island, Dutch East Indies, Station of the Netherlands Reformed Church (1880), with 1 missionary and wife, 1 native worker, 1 outstation, 402 professed Christians.

MELSETTER: A town and county seat in S. E. Rhodesia, Africa, situated 25 miles N. by W. of Mt. Silindo, and 150 miles W. by S. of Beira. Station of the ABCFM (1902), with 1 woman missionary and 1 day school.

MELUR: A village in Madras, India, situated 20 miles N. E. of Madura. Station of the ABCFM (1857) with 1 missionary and wife, 31 native workers, 10 outstations, 8 places of worship, 10 Sunday schools, 8 day schools, 1 boarding school, 1 Young Men’s Christian Association, and 19 professes Christians.

MEMIKAN: A village west of Urmia, Persia, on the border of Turkey. At various times missionaries from Urmia have been stationed there for work among the mountain Nestorians, but the work is usually conducted by the native church and pastor.

MENADO: A town in Minahassa, the northeastern peninsula of Celebes, Dutch East Indies, noted as a great coffee emporium. From 1830 to 1874 it was the chief seat of the Netherlands Missionary Society, which worked with great success among the heathen Alifures. Difficulties arising from the different languages spoken by the Alifures were overcome by the introduction of the Malay language in church and school, and in the peninsula there are now 147,000 Christian Alifures as the result of this mission. Lack of money compelled the missionaries to enter the service of the state church in 1870, and the Society supports a printing house and a few schools only, the support of pastors, as well as their appointment, resting with the Colonial Government. The Batavia Committee for the evangelization of the Sangir and Talaut islands use Menado as a supply station for their mission.

MENDI LANGUAGE: An African language of the Negro, as distinguished from the Bantu group. It is spoken by a small part of the population of Sierra Leone in West Africa, and has been reduced to writing by missionaries with the use of Roman letters.

MENDOZA: A town in Argentina, South America, capital of the state of Mendoza, situated 95 miles S. of San Juan and 620 miles W. by N. of Buenos Aires. Its altitude is 2,559 feet. Its climate is dry and temperate. All its finest buildings were destroyed by earthquake in 1881. Population of 15,000. Station of the ME, with (1903) 1 missionary and wife, 1 place of worship, 1 Sunday school, and 73 professes Christians, of whom 72 are communicants.

MENGANANPURAM: A town in Madras, India, situated in Tinneveli about 25 miles S. of Tuticorin. Station of the CMS, with (1903) 2 women missionaries for 1 Sunday school, 1 day school, 2 boarding schools, and 23 native workers. The church is entirely self-supporting and independent, and its statistics are no longer given by the Society.
MENGÓ: A village in Uganda, Africa, capital of the native kingdom, which is a province of the British Uganda. It is situated to the N. of Lake Victoria Nyanza. Station of the CMS (1887), with (1903) 8 missionaries, 3 of them with their wives; 5 women missionaries, 223 native workers, 1 Sunday school, 1 theological class, 1 female helper's training school, 1 dispensary, 1 hospital, 1 medical class, and 12,058 professed Christians, of whom 3,310 are communicants.

MEQUINEZ: A town in Morocco, situated 36 miles W. by S. of Fez. It stands on the side of a high mountain in a fertile valley, and is the summer residence of the Sultan. Altitude, 1,755 feet. Population, 30,000. Station of the Gospel Mission Union (1890), with (1901) 1 missionary and his wife. Station of the PIB, with (1901) 1 missionary and his wife.

MERCEDES: A town in Argentina, South America, situated 60 miles W. by N. of Buenos Aires. Population, 9,500. Station of the ME, with (1903) 2 missionaries and their wives, 8 native workers, 3 places of worship, 2 Sunday schools, 1 day school, 1 theological school, and 164 professed Christians, of whom 100 are communicants.

MERGAREDJA: A town on the N. coast of Java, Dutch East Indies, situated about 140 miles W. by N. of Surabaya. Station of the Netherlands Mennonite Mission Society (1849), with (1903) 3 missionaries (two of them with their wives), 12 native workers, 4 outstations, 3 places of worship, 4 day schools, 1 boarding school, 1 dispensary, and 181 professed Christians.

MERIAM, William B.: Born Princeton, Mass., U. S. A., September 15, 1830; graduated at Harvard University, 1855; Andover Theological Seminary, 1858; ordained November 29 of that year; sailed as a missionary of the ABCFM January 17, 1859, for Turkey. After spending a few months at Adrianople in studying Turkish, he went with Mr. Clark to the new station of Philippopolis, where he remained till his death. Returning from Constantinople with his wife in July, 1862, he was met by five mounted brigands, who seized his wife and carried her off. He was shot from his horse. His death was almost instantaneous.

MERCARA: A town in the native State of Coorg, India, of which it is the capital; situated 64 miles E. S. E. of Mangalore. Altitude, 3,605 feet. The climate is very damp. Population, 7,000, of whom 5,000 are Hindus. Station of the Basel Mission Society (1870), with (1903) 3 missionaries (two of them with their wives), 6 native workers, 4 outstations, 1 day school, and 156 professed Christians, of whom 90 are communicants.

MERSINE: A town and seaport in the province of Adana, Asiatic Turkey, situated 36 miles by rail S. E. of the city of Adana. Population, 9,000, of whom 5,000 are Muslims and 3,500 Christians. Station of the RP (1889), with 1 missionary and wife, 2 women missionaries, 11 native workers, 3 outstations, 1 place of worship, 2 Sunday schools, 3 day schools, 2 boarding schools, 1 dispensary, and 72 professed Christians. Outstation also of the ABCFM. Statistics included in Adana.

MESOPOTAMIA: Originally the country "between the rivers," i. e., the Tigris and the Euphrates. It is not now a political division, and the term is used differently by different writers, but in general it may be said to include the whole plain of the valley of the Tigris from Mardin in the north to Bagdad, or even Bussoras, on the south, and from the Euphrates on the west to the Zagros Mountains of the Persian border on the east. The land is extraordinarily fertile, and even now, if properly cultivated, would yield a wonderful increase. The population is chiefly Mohammedans and Christians of the Jacobite and Chaldean sects. Nomad Kurds, living on the mountains, come into the plains for their winter pasturage.

METHODIST CHURCH IN CANADA; Missionary Society of the: The Missionary Society of the Methodist Church was organized 1821. At that time, in addition to work among the white settlers, some efforts were being made to reach the scattered bands of Indians in Ontario with the Gospel message, and it was with a view of extending the work that the Society was formed. There are now six departments: Home Indian, French, Chinese and Japanese in British Columbia, and Foreign. The home work (called Domestic Missions) embraces all the dependent fields of the Church among the English-speaking people throughout the Dominion, in the Canadian Provinces, in B.C., and Bermuda. These fields are 450 in number, with 350 missionaries, 69 assistants and 34,826 communicants. The Indian missions are in Ontario, the Northwest, and British Columbia. They are 68 in number, with 39 missionaries, 14 native assistants, 15 teachers, and 7 interpreters, or a total missionary force of 75. The number of communicants is 5,505.

The results of mission work among the Indians have been of the most encouraging kind. Whole tribes have been reclaimed from barbarism and superstition, and many of them walk worthy of their high calling as followers of the Lamb. A significant illustration of the value of these missions is found in the fact that not one member or adherent of the Methodist Church among the Indians, nor, so far as is known, of any Protestant mission, was implicated in the revolt that occurred a number of years ago.

The French missions are entirely in the province of Quebec. They are 89 in number, with 6 missionaries, 6 teachers, and several colporteurs.

The Foreign work of the Society is in Japan and China. The former was begun in 1873, the latter in 1891.

The work in Japan is in the districts of Tokio, Shizuoka, Tamanashi, Kanazawa and Nagano. There are 27 stations, 44 missionaries, 1 assistant, and 1 teacher. The number of communicants is 2,750. The Japan mission of this Society has been an earnest advocate of a union of Methodist Missions in Japan, corresponding to that of the Presbyterian and Reformed churches. The mission in China is located in the province of Shëchëwan, two stations being occupied, Chentu and Kiating. While there was temporary suspension during the Boxer troubles, there was little actual loss, and the hospitals in the two places were not disturbed. The Press of the mission has also done excellent work. Ten missionaries (men) are devoted laboring in the two stations, but the Society does not see fit to publish statistics of their work and its results. By careful searching of the reports one may gather the information that there are 2 hospitals, a printing establishment, some Sunday schools, and at least 60 or 70 professed Christians.

ORGAN: The Missionary Outlook, monthly.
METHODOIST EPISCOPAL CHURCH IN U. S.; Missionary Society of the (1819): The conversion of a colored man by the name of Stewart, and his subsequent work among the Indians, profoundly stirred the Methodist Episcopal Church, and was the first step toward the formation of a missionary society for the whole Church. Local organizations had previously existed in Philadelphia, Boston, and possibly other places, when at a meeting of the preachers of the Methodist Episcopal Church in New York City, held in 1818 the Rev. Laban Clark proposed the organization of a Bible and Missionary Society in the church of which they were members. The subject having been fully discussed, the formation of such a society was resolved upon, and Messrs. Clark, Nathan Bangs, and Freeborn Garrettson were appointed a committee to draft a constitution, which was approved by the Preachers' Meeting, and subsequently submitted to a public meeting of the members of the church and friends of the missionary cause convened by the Prelates, and held in the Forsyth-street Church, on the evening of April 5, 1819. As organized, the Society had the double character of a Bible and Missionary Society. This met with some opposition, and the new organization lad but a precarious existence for the first year. In May, 1820 the meeting of the General Conference, the Society was heartily endorsed, and the constitution was amended so as to make its a purely missionary society. Until 1844 the Society represented all the different Methodist churches of the denomination. In that year, however, a division was made, and the Methodist Episcopal Church (South) was formed, and established its own Missionary Society. The Missionary Society of the Methodist Episcopal Church (in the U. S.) is really the Church itself provided for any unforeseen emergency that may arise in any of the missions, and the right of attending the meetings of the Board of Managers, or well qualified teachers on the field. The Board of Managers is composed of the bishops as ex officio members, one representative from each of fourteen districts, and the secretaries and treasurers; also fourteen members of the Board of Managers.

The Board of Managers is composed of the bishops as ex officio members, thirty-two traveling ministers of the church, elected by the General Conference. The General Conference meets once in four years, the General Missionary Committee once every year, and the Board of Managers monthly, or oftener, as may be required. Honorary managers and patrons, by virtue of donations, have the right of attending the meetings of the Board of Managers, but do not vote. The appropriation of money and the sale of the sale of fields rests entirely with the General Missionary Committee, except that the Board of Managers may provide for an unforeseen emergency that may arise in any of the missions, and meet any demands to an amount not exceeding $25,000. Wherever a foreign mission is organized into a conference, it receives notice of appropriations directly from the General Missionary Committee. Wherever missions are not thus organized as a conference, they receive their information of appropriations through the Board of Managers. For those missions that are organized as a conference, the Board of Managers acts simply as the executive body of the Missionary Committee. All funds, however, for all missions pass through the hands of the Board of Managers, who account to the General Missionary Committee, and that body to the General Conference.

Each mission, whether it be organized as a conference or not, is divided into districts, over which certain ministers are appointed by the bishop as presiding elders, who superintend the work of that district and are in a sense sub-diocesan bishops.

In 1838 the Board of Managers, to celebrate the centenary of the Methodist Society in London, collected a fund for a mission house, and the first building in New York City was dedicated in January, 1848. At the centenary of American Methodism in 1866, and the Missionary Jubilee in 1869, the fund was greatly increased, a new building secured, and in 1887 the present building on Fifth avenue and 20th street, New York, was erected, the Society owning one-third, free of encumbrance.

Development of Work: The first field entered by the Society was Africa, in 1833. Three years later came the opening of the mission in South America (1836), followed by China (1847), India (1856), Bulgaria (1857), Japan (1872), Mexico (1873), Korea (1885), Malaysia (1885). During the same period work was undertaken in a number of European countries, Germany (1849), Norway (1852), Sweden (1865), Switzerland (1856), Denmark (1857), Italy (1871), Finland (1884).

The Missions. I. Africa: (1) Liberia: In 1824 the General Conference decided as soon as the funds permitted to send missionaries to the colony established by the American Colonization Society in Africa. In 1831 the Rev. Melville Cox was appointed to Liberia, his support being guaranteed by the Young Men's Missionary Society. He sailed in 1832 and reached Sierra Leone in 1833, welcomed cordially by the West African Missionaries and also by the Governor. Soon after reaching Liberia he succumbed to the fever; but others followed; the next year a more healthy location was found, and by 1836 the different Methodist churches were recognized as the Liberia Annual Conference. Three years later the Conference seminary was opened, and the work extended to several outstations. Industrial work was encouraged from the very start. In 1851 there was reorganization, both of the Conference and the seminary, and from 1857, for 20 years, no white missionary was sent out. To meet the difficulty of ordination, Francis Burns was elected bishop and ordained in the U. S. in 1859. He pressed for extension of the work into the interior, as did his successor. In 1876 the visit of a deputation, including Bishop Haven and Dr. J. T. Gracey, resulted in the appointment of Rev. Joel Ogden to press the interior work. The obstacles, however, were such that little was accomplished, and at the opening of 1884 there were no foreign missionaries or well qualified teachers on the field. The school buildings were dilapidated, ministers unordained, and a conference in need of superintendence.

In May, 1884, Bishop William Taylor was elected Missionary Bishop of all Africa. Bishop Taylor arrived at Monrovia in January, 1885, and, having general jurisdiction, was able to harmonize the different enterprises while carrying on his own...
work, already begun in Angola. He made extensive journeys with special view to the development of self-supporting missions and by the end of 1888 there were stations along the banks of the Cavally River for 100 miles. The scheme of self-supporting missions proved impracticable, however, and as soon as this became evident, it was given up. As now organized the Liberia Conference embraces the western coast of Africa north of the equator, and is divided into three districts: Cape Palmas and Sinoe, Monrovia and Bassa, and the St. Paul River District. In Monrovia there is a strong self-supporting church, and the Methodist College of West Africa is located here. The mission press is established in the capital, from which is issued The New Africa, a thirty-two-page monthly, and Sunday-school literature, tracts, and other publications. There are (1903) 52 stations, 25 American missionaries, 87 church members, 14 day schools, with 295 students, and 25 other schools with 431 pupils.

(2) West Central Africa: On the 20th of March, 1885, a company of missionaries, which numbered an orphan boy and five children, arrived at St. Paul de Loanda, the capital of the Portuguese colony of Angola, under the care of Bishop Taylor. Their objective point was the Tushalange country, some twelve hundred miles inland. It was decided to proceed slowly, by founding a chain of stations, beginning with St. Paul de Loanda. Here a site was purchased, and a building erected for church, school, and residence. Other stations occupied were Ndondo, 200 miles distant, at the head of steamboat navigation on the Congo River; N'langue, 51 miles over the mountains; Puto, 30 miles farther on, and Malange, 60 miles beyond. In 1886 a new plan was adopted by the bishop, who decided to attempt to reach the Tushalange country by way of the Congo and the Kassai, going by the latter river to the interior. He secured a small steamer, but it being found impracticable at the time to obtain portage around the falls, the steamer was used on the Lower Congo. To reach the Congo District from Malange, the last station in Angola, involved a march of a thousand miles to Luilabub. Other stations occupied are Kimpoko, at Stanley Pool; Isangila, on the Lower Congo; Vivi, Natombi, Kapinda and Massubi.

With the retirement and death of Bishop Taylor and the appointment of Bishop Hartzell in 1896, a change was made in the principle of support, and the burden of gaining a living in a savage country was lifted from the missionaries. The other burden of building has been materially lightened, also, by regular appropriations and special gifts for this purpose.

In 1900 the Congo Conference was divided. The West Central Africa Mission Conference lies on the west, from St. Paul de Loanda about 350 miles inland; with it are included the Madeira Islands. Organized in 1902 it reports 11 stations or circuits, 22 American missionaries, 25 native workers, 87 church members, 14 day schools, with 295 students, and 25 other schools with 431 pupils.

(3) East Central Africa: This Mission Conference includes the stations in East Africa south of the equator, and was formally organized by Bishop Hartzell in November, 1901, at Umtali, Rhodesia. There are two principal centers of work in Portuguese East Africa, one at Inhambane and another at Beira. At Umtali a third center is developed, working among the white population. Here is a self-supporting academy with five departments. An industrial mission is proving helpful in the work. There are (1902) 7 stations or circuits, 14 American missionaries, 15 native workers, 62 church members, 1 high school with 96 students, and 1 day school with 10 pupils.

II. South America (1836): The Rev. Fountain E. Pitts sailed July, 1835, to South America with the view of examining fields, and the establishment of missions at Rio de Janeiro and Buenos Aires, where the American and English residents had especially encouraged the work. At Rio de Janeiro Mr. Pitts formed a small society of religious people, with a promise that a pastor should be sent at no distant day. Rev. Justin Spaulding, by appointment, went to Rio, sailing in March, 1836, and Rev. John Dempster, appointed to Buenos Aires, sailed in October.

There were indications of an improvement in the general conditions. A large English-speaking population welcomed the missionaries; the Bible could be distributed, and the American, and British and Portuguese Societies supplied Spanish and Portuguese Bibles and Testaments, the people eagerly receiving a book which, until recently, had been intercepted.

Mr. Spaulding was joined by Rev. Daniel P. Kidder and R. M. McMurdy, who entered upon extensive itinerations, preaching and scattering Bibles and tracts. In Rio the work grew, a Sunday-school was begun, and larger accommodations were needed. The hostility of the Roman priests was awakened, and the missionaries subjected to every possible annoyance and hindrance. But these efforts were short-lived and served to advertise the mission. The missionaries claimed their rights under the toleration act of the constitution. So eager were the people for the Scriptures that it was at first feared there was a general plan to secure copies to destroy them, but it was found that nearly every copy was appropriately used. Work for seamen and tours through the country showed good results, but through financial embarrassment the Board abandoned Brazil at the close of 1841, and the work was discontinued until 1850, when the Society again entered the field, occupying Para and later Maranhao, Pernambuco, Bahia and Rio de Janeiro. The Rev. (afterward Bishop) William Taylor endeavored to inaugurate self-supporting stations, but with no great success. Still, the work advanced and the Brazil Conference was organized in 1889.

In 1836 Mr. Pitts took up the work in Buenos Aires, which the Presbyterians had left, and was joined by the Rev. John Dempster. They could only secure permission from the governor to preach to the foreign population, and this restriction lasted till 1852. Meanwhile, work had begun in Montevideo, and was prospering when political disturbances caused orders to be issued to discontinue the mission. An earnest protest from the foreign residents and a pledge of financial help resulted in the withdrawal of the order, and there followed a most interesting period when all religious restrictions were removed, and the work took a new start at Montevideo and extended to Esperanza, Rosario, and Cordova. In 1880 the General Committee changed the name of the mission in the Rio Plata region to...
"Southeast South American Mission." The name "Western South America" was used on their lists for the stations established by William Taylor in Peru, at Callao, Lima, Mollendo, Arica, and Tacna. Isique, Pabellon de Rico, and Huallillas; in Bolivia at Antofagasta, and in Chile, at Calendara Copiapo, Coquimbo, Valparaiso, Talcahuano, and Concepcion. The stations in the basin of the Amazon and adjacent regions at Para, Pernambuco, and Manaoa; and at Colon on the Isthmus of Panama, were known as the "Northeastern South America." The name "South America Mission" was, however, restored two years later. Missionaries made explorations over an immense territory extending 300 miles up the Parana River and from the Uruguay River to the sea, and in 1882 Bishop Foster passed along the coasts of the continent studying the work at Buenos Aires, Montevideo, and Rosario, in its far-reaching relation to the northeastern part of the continent. With the withdrawal of Bishop Taylor from the supervision of the self-supporting stations established by him, in 1884, they passed under the control of the Transit and Building Fund Society. Bishop Taylor's Self-supporting Missions.

In 1893 the Transit and Building Fund Society offered their entire property in Chile to the Missionary Society, on condition that the work be still conducted on the self-supporting basis. The offer was accepted and these stations passed into the care of the Society. The same year, after full discussion had taken place, all the stations of the Society in South America were organized into an annual conference. This event marked the close of the first period in the history of Methodist Episcopal Methodism in South America bordering on the Pacific Ocean. This conference has two divisions: the Peru Mission, including Peru, Bolivia, and Ecuador, and the Chile Mission, including the Republic of Chile. The South America Conference has (1892) 26 stations or circuits, 29 American missionaries, and 139 native workers, 3,713 church members, 26 day schools with 412 pupils.

The South America Conference has (1902) 26 stations or circuits, 29 American missionaries, and 139 native workers, 3,713 church members, 5 high schools with 387 pupils, and 14 day schools with 1,182 pupils.

The South America Conference has 18 stations or circuits, 43 American missionaries, and 139 native workers, 3,713 church members, 5 high schools with 387 pupils, and 14 day schools with 1,182 pupils.

III. China (1847): As early as 1835 the Missionary Lyceum of the Wesleyan University at Middletown, Conn., warmly advocated a mission to the Chinese Empire, and $1,450 was raised as the beginning of a fund for such a mission. The matter was held in abeyance, however, until 1846. In that year at the annual meeting of the Society the Reverend J. D. Collins was appointed, about fifteen miles northwest of Fuchau, began with a class of thirteen members; this year, also, native workers were licensed and employed. In February more reinforcements joined the mission a separate conference being formed. The Rev. and Mrs. Stephen L. Baldwin. In November a school for girls was established on a broader and more permanent basis than had theretofore been attempted. Other places were entered, among them Kiu-kiang (1887), Peking (1889), Tientsin (1874). In 1881 the Anglo-Chinese College at Fuchau was organized, followed a few years later by the printing press, with its publication, the Hokkién Christian Advocate; medical work at Fuchau (1892), and a theological school at Hing-hwa, which had been made a station in 1885. In 1901 a Home Missionary Society was organized.

1. The Fuchau Conference is divided into eight districts. There are (1902) 45 American missionaries, 268 native workers, 10,572 church members, 1 theological school at Hing-hwa, which had been established on a broader and more permanent basis than had theretofore been attempted. Other places were entered, among them Kiu-kiang (1887), Peking (1889), Tientsin (1874). In 1881 the Anglo-Chinese College at Fuchau was organized, followed a few years later by the printing press, with its publication, the Hokkién Christian Advocate; medical work at Fuchau (1892), and a theological school at Hing-hwa, which had been made a station in 1885. In 1901 a Home Missionary Society was organized.

2. The Hing-hwa Mission Conference (1896): This includes the prefectures of Hing-hwa and Ing-chung, in Fo-kien Province, and continued a part of the Fuchau mission till 1896, when it was organized as a separate conference. The theological school, boys' and girls' boarding schools, and graded schools are well attended. The Hing-hwa Conference is divided into five districts, with 12 American missionaries, 268 native workers, 3,922 church members, and 8 day schools with 299 students.

3. Central China Mission (1869): Missionaries connected with the Fuchau Mission began work in Central China in 1867, and two years later it was set apart as a separate mission. In 1879 Mr. Hart at Kiu-kiang was reinforced; others followed, circuits were organized, including Hwei-nan, Nan-kang, and Shin-chang; the Fowler Institute, at Kiu-kiang, was opened (1881); Wu-hu, Nan-king, Chin-kiang, and Nan-chang were occupied. In 1891 the anti-foreign riots caused some disturbance, but resulted in the work being established on a firmer basis than ever before. The special feature of 1892 was the opening of a press building on the Kiu-kiang Institute premises, and the mission closed the first quarter of a century of its history in 1893 with large encouragement.

The mission suffered in common with others in the Boxer movement of 1900, and this was followed by floods in the Yangtse Valley. The central station of the Central China Mission is now (1902) Nan-king. There are 30 stations or circuits, 38 American missionaries, 1,420 native helpers, 1,420 church members, 4 high schools with 299 students, 26 day schools with 412 pupils.

4. North China Mission (1869): This Conference includes the Provinces of Shan-tung and Ho-nan, and all China north of them. Work was begun by missionaries of the ABCFM who had been rented for one of their own missionaries. Thus, Methodism was last planted in China. Schools were opened the next year and a church erected in 1835. The foreign population in China increased in the movement, and by 1888 the entire organization of a Methodist Episcopal Church was completed, with its class meetings, quarterly meetings, and collections.

The work of the mission in 1859 began to extend westward. This year the transit appointment, about fifteen miles northwest of Fuchau, began with a class of thirteen members; this year, also, native workers were licensed and employed. In February more reinforcements joined the mission a separate conference being formed. The Rev. and Mrs. Stephen L. Baldwin. In November a school for girls was established on a broader and more permanent basis than had theretofore been attempted. Other places were entered, among them Kiu-kiang (1887), Peking (1889), Tientsin (1874). In 1881 the Anglo-Chinese College at Fuchau was organized, followed a few years later by the printing press, with its publication, the Hokkién Christian Advocate; medical work at Fuchau (1892), and a theological school at Hing-hwa, which had been made a station in 1885. In 1901 a Home Missionary Society was organized.
both cities was well organized, and extended both north and south. The famine of 1878, followed by pestilence, destroyed many doors, and the illness of the wife of Li Hung Chang led to the firm establishment of medical work at Tientsin, and the opening of the Isabella Fisher Hospital for Women in 1881. Then followed Peking University (1885), at first known as the Wiley Institute, D. D., and Lan-chau, and day schools were formed wherever possible. In spite of floods and famines the work progressed. Yet appropriations were cut down until in 1902 they were twenty-five per cent. less than ten years before.

The Boxer movement paralyzed the work, the fortunately no missionaries of the society lost their lives, and the work has been taken up again with renewed energy. The report (1902) shows 6 districts, 49 stations, 28 American missionaries, 91 native helpers, 2,784 members, 1 college, 7 high schools, and 19 day schools, with 801 pupils in all.

5. West China Mission (1881): This is confined almost wholly to the Sze-chwan Province. When the General Committee met in 1880 they appropriated $5,000 to inaugurate this work, contingent on a like amount being given. This was pledged by the Rev. John J. Goucher, D. D., of Baltimore. The Rev. L. U. Wheeler, D. D., accompanied by the Rev. Spenser Lewis, arrived in Chung-kung in December, 1882. There was no difficulty in organizing schools for boys, while numerous applicants appeared for entrance to a prospective girls' school. Public preaching was commenced in February, 1883; in October of the same year a girls' school was opened, and a similar one for boys in 1884. In consequence of an anti-foreign riot, which destroyed the buildings in 1885, the mission was discontinued for a year, but in 1887 the Rev. Olin Cady resumed work, which increased rapidly. In 1890 Chen-tu was occupied, and the cholera was followed by the political disturbances culminating in the Boxer movement, the growth being phenomenal. The report (1902) 11 circuits or stations, 25 American missionaries, 56 native workers, 1,252 church members, and 17 day schools with 396 pupils.

IV. India (1856): As early as 1852 the General Committee resolved that "a fund be created and placed at the discretion of the Board and bishops for commencing a mission in India," and $7,500 were appropriated for this purpose. It was not, however, till 1856 that the work was begun, the Rev. William Butler arriving at Calcutta with his family in September. After careful investigation, Mr. Butler located in the Northwest Provinces, with the Rohilkhand and Oudh as his particular field. The territory which comprised the mission field of the M. E. Church extended from the Himalayas on the north, on the west and south to the Ganges, to a point between Cawnpur and Benares, and on the east to the boundaries of Oudh. To man this district Mr. Butler asked for eight men for Lucknow, four for Bareilly and Moradabad, respectively, three for Faliszabad, and two for Shahjehanpur, Budaon, and Lahuli. These were all missionaries, in ten were opened at Bareilly, but before much could be accomplished the Sepoy rebellion broke out, and the work was interrupted. The headquarters at Bareilly were destroyed, and when the work was resumed in 1858 Naini Tal and Lucknow were visited and the buildings occupied. Services were held in English and Hindustani, a school for boys was started in the Naini Tal Bazar and another for girls in the mission house. In January, 1859, work was begun in Moradabad, and the following month Bareilly and Pilibhit were occupied. In July of that year the first convert was baptized. Reinforcements were sent out, who proceeded at once to Lucknow, where a general gathering of the missionaries took place. Among the newcomers were Revs. James M. Thoburn, J. W. Waugh, E. W. Parker, J. R. Downey, and their wives. It was decided to occupy Shahjehanpur and Bijnour. In 1860 a printing office was established at Bareilly and publication began—the foundation of the Book Concern at Lucknow, to which city it was removed in 1866. Schools and orphanages were commenced, and girls were established, and during the next decade the work was carried on from nine centers, manned by native preachers, from which it spread to the surrounding villages. The Rev. W. T. Gracey and wife arrived from Shanghai in 1861, a region not formally occupied by any missionary society. In 1869 some land lying on the edge of Oudh was purchased for a Christian settlement, and by 1875 the little village had reached a period of insured success. The necessity of trained native preachers had long been felt, and in 1872 a gift of $20,000 was received for the endowment of a theological seminary at Bareilly. In January, 1873, the India Mission Conference became an Annual Conference, and in 1877 the Northwest Province east of the Ganges and the province of Oudh were organized into the

1. North India Conference: This includes the districts of Bareilly-Kumaon, Bijnour, Garhwal, Gonda, Hardoi, Moradabad, Oudh (with Lucknow), Pilibhit and Sambhal, Reid Christian College at Lucknow, with 479 students; the publishing house at the same place, which sent out in one year 74,600,000 pages; the Isabella Thoburn College and High School, deaconess' home, and the theological seminary at Bareilly, which has steadily progressed. At present the mission work are the Anglo-vernacular Girls' school for boys was started in the

2. Northwest India: This includes the districts of Ajmere, Aligarh, Allahabad, Cawnpur, Kasganj, Meerut, Muttra, and the Punjab. It was in this conference that the great evangelistic movement (1888-1893) brought into the Church such great numbers of the sweeper caste—a movement which has steadily progressed. At present the special outlook is toward the Punjab, and northward into Central Asia. The report (1902) shows 38 missionaries, 1,054 native workers, 40,804 communicants, 448 schools with 10,692 pupils.

3. South India: This conference includes the districts of Godavari, Haidarabad, Madras, and Raichur. It was originally a part of the Bombay, Bengal, and Madras Mission and was organized in 1876. The work commenced with the visit to India of William Taylor in 1870, which resulted, in connection with the labors of other missionaries, in the opening of the mission offices in the following years. Among the special features of the mission work are the Anglo-vernacular Girls' Boarding School at Haidarabad, and the pub-
lishing house at Madras. Zenana work under the special care of the Woman's Foreign Missionary Society has had good fruit. The report (1902) shows 37 missionaries, 218 native workers, and 2,206 members.

4. Bombay: This Conference, including the districts of Bombay and Gujarat, and the Central Provinces, was set apart from the Bombay and Bengal Conference in 1891. Then, as in South India, the work received its impulse from the visit of Mr. Taylor in 1870, and enjoyed much support from the Rev. George Bowen. As the work progressed the extent of territory covered and the exigencies of superintendence compelled the division, so that what was at first one general conference of South India became three conferences. The special features of the work in the Bombay district are: the publishing house at Bombay, seamen's rest at Bombay and Kimari, a Mission Institute at Nariad, medical work at Poona, and general educational work. The report (1902) shows 42 missionaries, 459 native workers, 12,576 members, 240 schools, with 7,466 pupils.

5. Burma: This Conference, including the districts of Calcutta, Calcutta Bengali, Assanand and Tihoot, was set off from the South India Conference and organized in 1888. At first it included Burma and the Straits Settlements, but these were afterward separately organized. A special feature of the mission is the Methodist weekly paper, the Indian Witness, which ranks as the foremost religious paper in India. A training school for girls, orphanages, a seamen's rest, boarding and day schools, as well as general educational and evangelistic work, make up the record of missionary effort. The report (1902) shows 27 missionaries, 121 native workers, 2,339 members, 45 schools, with 2,916 pupils.

6. Bulgaria: This Conference, organized in 1901, to include the Burma district of the Bengal-Burma Conference, carries on its work chiefly in the city of Sofia, and the three districts of Pegu and Thandaung. In Rangoon the work is among the Burmese, English, Tamilus, and Telugus. An English girls' high school and an Industrial training school at Thandaung are doing good work. The report (1902) shows 13 missionaries, 238 native workers, 583 members, 5 schools, with 184 pupils.

V. Bulgaria: In 1854 Rev. Elias Riggs, of the ABCFM at Constantinople, wrote a letter to the Society, urging it to take up work in Bulgaria, since there was an opportunity which his own Society felt unable to use. Accordingly in 1857 Rev. Albert L. Long and Rev. Wesley Prettkianne, M.D., were sent out and opened stations at Varna and Shumla. Subsequently Tirnova and Tulitscha were occupied, work in the latter city reaching the Molokans, a body of Russian dissenters. The work met with both success and discouragement, and in 1864 Dr. Long removed to Constantinople and commenced the publication of a weekly paper, the Zornite, which afterward passed into the hands of the ABCFM, and exerted a great influence among the people. In 1871 Dr. Long joined the mission in the city of Ruse, now a part of Roumenia, where he remained until his death, always interested in and identifying himself with work for evangelizing and elevating Bulgarians. For a time the difficulties were so great and success apparently so little that (1871-1873) the mission was practically suspended. In 1873, however, it was taken up again and extended so as to include all the section north of the Balkans. Several Bulgarians, educated in the U. S., were added to the missionary force, and prospects were brighter, when the Russo-Turkish war, following on the Bulgarian massacres, darkened the sky. The establishment of the principality of Bulgaria brought a measure of religious liberty, but worked adversely, in that the Bulgarians looked upon those who left the Bulgarian Church as traitors to the nation. Still the work has continued, and in 1892 a mission conference was organized. Several years since then there has been question of discontinuing the mission, but the Society has held on, and in 1902 reports 4 missionaries, 42 native workers, 314 members, 2 schools, with 25 pupils. Especially encouraging is the girls' school at Loftcha.

VI. Japan: The heavy demands made by other missions delayed the General Conference in entering on work in Japan, but in 1873 a party, including Messrs. R. S. Maclay, John C. Davison, Julius Soper, and M. C. Harris, arrived in Yokohama. They were followed by others and in August the mission was organized in Yokohama. The stations at first occupied were Yokohama, Tokio, Hakodate, Matsumai and Nagasaki. From the first there were most cordial relations with other missions, especially with that of the Canada Methodist Church, and arrangements were made to cooperate so far as possible. This has developed until plans are maturing for a union of all the Methodist missions in Japan. In 1882 a fine girls' school was opened at Nagasaki, and in 1886 the Philander Smith Bible Institute was completed at Yokohama. In 1884 the Mission was organized as a conference, and in 1898 divided into two, the Japan and South Japan conferences.

1. The Japan Conference includes the districts of Tokio, Yokohama, Hakodate, Hiroasaki, Nagoya, Sendai, Sapporo, and Shinano. The mission has shared in the various experiences attending the work in Japan—the advance, the period of depression, and the more recent forward movement. The report (1902) shows 47 missionaries, 236 native workers, 5,272 communicants, 11 schools, with 1,427 pupils. The total enrollment in the Bible Institute (August 1902) was 250. The press work shows 9,357,800 pages printed during the year, including 19,114 volumes, 242,000 tracts, 363,000 S. S. periodicals.

2. The South Japan Conference includes the districts of Fukuoka and Nagasaki. The naval station at Sasebo and the government works at Mitsubishi furnish peculiar opportunities for work among sailors and laborers, and the Chingei Seminary at Nagasaki is a finely equipped school. The report (1902) shows 20 missionaries, 31 native workers, and 1,289 communicants.

VII. Mexico: In 1873 the General Conference sent Dr. William Butler, who had served in India and as secretary of the American and Foreign Christian Union, to Mexico. In company with Bishop Haven he visited Vera Cruz, Puebla and Mexico City, and finally located in the capital, securing a site originally occupied by a palace of the Aztec sovereign Montezuma, and later by a Roman Catholic monastery, which had been seized by the Mexican Government. Dr. Butler was joined by others, some of whom, knowing Spanish, were able to begin work immediately.
The success attending their efforts aroused the bitter opposition of the Roman Catholic priests, resulting in several outbursts, the murder of Mr. Stephens of the ABCFM, and of a number of Mexican Protestants, and the destruction of several of the Methodist buildings. Still the work prospered and was extended so that in 1884 the mission was organized as a conference. The report (1902) shows 5 districts: Central (Mexico City), Oaxaca, Orizaba, Hidalgo, and Mountain. Among the special features are the Methodist Institute and the publishing house at Mexico, the medical work and the schools.

VIII. Korea: In 1888, the year after the treaty between Korea and the U. S. was made, Dr. John F. Goucher offered to the Missionary Society $2,000 for the purpose of starting a mission in Korea, and $5,000 toward the purchase of a site. The Missionary Committee accepted it, made an additional appropriation, and in 1884, Dr. H. E. Maclay, who had already been identified with pioneer work in China and Japan, arrived at Chemulpo, secured a favorable reception from the King, and, with Dr. W. B. Scranton and Rev. H. G. Appenzeller, commenced the work at Seoul. Dr. Scranton’s medical skill proved most advantageous, and Mr. Appenzeller secured some pupils for his school, which soon received official recognition. Later, the work was extended to Wonsan, Pyeng-yang and Kongju. Wonsan, however, was afterward handed over to the M. E. Church.

IX. Malaysia: The work in the Philippines has been undertaken at Manila, Malols, San Fernando and Geona. There is a small but complete publishing plant and the Philippine Christian Advocate has commenced publication. The report (1902) shows 26 missionaries, 22 native workers, 3,403 communicants, and 8 schools, with 1,166 pupils.

X. European Missions: The work of the Society in the Protestant lands of Europe had its origin in the conversion in America of some who had come from Europe as emigrants, and who desired to return and give to their own people the new conception of spiritual life that had come to them. Thus the work in Norway and Sweden was begun by Olof Gustaf Hedstrom in 1845, and that in Germany by Rev. Ludwig S. Jacoby, who landed at Bremen in 1849. From these, missionary effort has extended over the whole of Northern Europe. The Society employs no American missionaries, but gives some assistance to the native churches. The report (1902) shows in North Germany 63 ordained and 39 unordained preachers, 6,690 communicants; in South Germany, 75 ordained and 151 unordained preachers, 10,412 communicants; Switzerland, 47 ordained, 5 unordained preachers, 8,803 communicants; Norway, 41 ordained, 68 unordained preachers, 5,894 communicants; Sweden 93 ordained and 30 unordained preachers, 17,077 communicants; Denmark, 19 ordained, 21 unordained preachers, 5,466 communicants; Finland, and St. Peters burg, 13 unordained preachers, 1,012 communicants. In Sweden are reported a considerable number of other helpers, including teachers.

In 1832 Dr. Charles Elliott commenced to press upon the Methodist churches the feasibility of a mission in Italy. For some years this plan was scarcely treated seriously, but in 1850 it was taken up with some earnestness. It required, however, 20 years more of consideration before the mission was fairly inaugurated, and in 1871 Dr. Leroy M. Vernon arrived in Genoa. A careful survey of the field he recommended Rome for the headquarters of the mission, with other stations at Naples and Genoa. Then followed an earnest protest from Father Gavazzi, of the Free Italian Church, against the introduction of Methodism into Italy, but in 1872 it was decided to proceed, but to make Bologna the headquarters. Subsequently Rome was again chosen, and has been the center of work ever since. In 1874 an exceptionally fine site for a church was offered for sale and promptly purchased, and St. Paul’s M. E. Church was erected and consecrated on Christmas Day, 1875. In 1881, the Italy Annual Conference was organized, and the work steadily progressed, not a few representatives of prominent families joining the churches. In the Rome district is included work in Northern Italy and Switzerland. The report (1902) shows 10 missionaries, 40 Italian workers, 2,716 communicants, and 11 schools.

Women’s Foreign Missionary Society of the Methodist Episcopal Church: About ninety days after the organization of the Miss. Soc. of the M. E. Church (July, 1819), a woman’s auxiliary was formed, in New York City. It was not very active, however, and by 1855 had largely been crowded out by other organizations. Meanwhile (1847) a ladies’ China Missionary Society had been formed in Baltimore, but on the organization of the Women’s Union Mission Society, in New York in 1860, a number of Methodist women joined in that Society. There arose, however, a feeling that there should be a church society, and in 1869 the present organization was completed. The conduct of the Society is in the hands of an Executive Committee, which meets annually, but it really has no headquarters, except an office at 150
Fifth ave., New York City, where literature is distributed. The secretary is Mrs. J. T. Gracey of Rochester. The funds, receipts, and appropriations, with the names of the contributors, are kept in the Missionary Society, and the missionaries are listed separately. Thus, while there is complete and cordial cooperation, the two societies are distinct. According to the report (1902) the woman's society has 204 missionaries and 964 native workers; the men's society has an equal number. Very few in Africa; very few in America. They are included in the statistics given above under each conference. The total appropriations for the year were $431,111, while the total for Foreign Missions by the Missionary Society was $988,942. It appears, thus, that the WFMS represents about two-fifths of the foreign mission work of the church.

The work of the young people for missions has, in the M. E. Church, been very fully developed under the Epworth League organization. Missions have been organized at home and on the field, with a view to training up a force of mission workers as well as givers. On the field, too, this organization has been most effective. The work of the young people for missions has, in the M. E. Church, been very fully developed under the Epworth League organization. Missions have been organized at home and on the field, with a view to training up a force of mission workers as well as givers. On the field, too, this organization has been most effective.

ORGAN: World Wide Missions, monthly; Reid (J. M.), Missions and Missionary Society of the Methodist Episcopal Church, New York, 1846.

METHODIST EPISCOPAL CHURCH, SOUTH (U. S. A.); Board of Missions: At the first General Conference of the Methodist Episcopal Church, South, held in 1846, a Home and Foreign Missionary Society was organized. Its operations were committed to a Board of Managers, who, in conjunction with the Bishops, determined the fields that were to be occupied, selected the missionaries, and apportioned the amount to be collected among the annual conferences. The home and the foreign fields were under the management of the same board.

In 1856 the General Conference placed the work of the Missionary Society under two boards, one having charge of the foreign and one of the home field. In 1870 the missions of the church were again placed under one board, and in 1874 the Constitution was again changed, bringing the work in foreign lands under the Board of Missions and the work in the home field under the Annual Conference Boards of Missions. The General Board has charge of the foreign missions and all others not provided for by the Annual Conferences. It consists of a president, vice-president, two secretaries, and twenty-five managers. The bishops and treasurers are ex officio members of the board. The Board meets annually to determine what fields shall be occupied, and the number of persons to be employed in each; to estimate the amount that may be necessary for its missions; and to divide the same among the annual conferences.

The first work of the Board was among the colored people and Indians of the United States, and then it launched out into a larger field, opening work in the Chinese Empire.

1. China. The offer made by Charles Taylor, of the South Carolina Conference, in 1842, to go to China as a missionary, was the origin of the action of the first General Conference held in Petersburg, Va., in May, 1846, when it was decided to make a mission to China. Mr. Taylor was appointed, studied medicine, and in April, 1848, with his colleague, Mr. Benjamin Jenkins, sailed for China with their families. Shanghai was selected as the best location for the mission. On arriving at Hongkong, after a four months' voyage, the illness of Mrs. Jenkins prevented her from going any further, and Dr. Taylor began work from there. The Christian book was published in Chinese at that time and the work was largely that of talking to the people by the wayside and preaching to them in front of temples and as they were gathered in street chapels; but as the language was acquired more perfectly, converts were made and a nucleus of a church was formed. The first convert was providentially a man from the upper middle class—Liew Sien Sang. His name was familiar to Southern Methodists ever since. He was an eloquent and useful native preacher, possessing a generous mind, quick apprehension, ready and fluent utterance and noble piety. He made him universally beloved and heeded.

The mission was strengthened in 1852 by the arrival of Rev. W. G. E. Cunningham and his wife; but the work and the climate began to tell on the pioneers, and Drs. Taylor and Jenkins, with their families, were soon oblig ed to return home. The Tai-ping rebellion was in progress, and in that year Shanghai was captured and remained in the hands of the insurgents for eighteen months. Little work could be done. Fire and the ravages of the contending armies arrested evangelistic work; misfortunes culminated in the burning of the only chapel and the two mission houses.

The mission was reinforced in 1854 by three married missionaries, Revs. D. C. Kelley, J. W. Lambuth, and J. L. Belton; but the war continued, and the constant nervous strain and unsanitary conditions brought on sickness, and the withdrawal of two missionaries. Despite difficulties, however, inquiries increased, and several were received into the church.

In 1859 two more missionaries were sent out, and others followed later, but several were compelled to withdraw. In 1869 the record of the mission during the twenty-one years of its existence showed that eight missionaries with their families had been sent out; death had removed one missionary and two missionaries' wives; one had withdrawn from the work, four had returned to the United States, and two were left in the field, Messrs. Allen and Lambuth. About sixty natives had been baptized, and among the converts were two native preachers of great gifts and usefulness. In 1870 three stations had been opened—a mission to Shanghai, Soochow, and Nantziang, of which Shanghai remained the principal station, having substantial mission houses and two chapels. Faithful work was beginning to have its effect and the mission was becoming strong and aggressive. The full significance of this work appears in the fact that for ten years, or from 1860 until 1870, the missionaries were not supported by their Board—the Civil War in the United States having destroyed the resources of the South. Messrs. Lambuth, Allen and Wood sustained themselves and an unnamed missionary returning home during the decade, having lost his wife.

J. W. Lambuth, ably seconded by his wife, in
addition to efforts at self-support by interpreting and teaching, bent his energies to the strengthening of the native church. Native helpers and Bible women—men of wide and varied information they sought his counsel and gave him their confidence. He conceived the idea of a periodical that should give the Chinese in their own language the salient facts of a Western religion, philosophy, science, and politics, and such general information as should, in a measure, prepare them for the constantly increasing contact with Western civilization. From this grew the Wan Koo Kung-Pao (World's Magazine). It immediately became popular, and it now circulates over the Straits Settlements, Japan, Korea, and the Pacific Coast, as well as throughout China. In addition a number of volumes have come from Dr. Allen's pen. His *History of the Chinese-Japanese War* received the acknowledgment of three emperors. Kang-yu-wel, chief adviser of the Emperor of China in the reforms of 1898, and the leading Chinese patriot, while a refugee from the Empress Dowager, said, "I owe my conversion to reform, and my knowledge of reform, to two missionaries—Rev. Timothy Richard and Dr. Young J. Allen."

The pressuring demand for trained native preachers was more and more making itself felt in the mission. Moreover, the children of the converts were growing up and the missionaries were face to face with the necessity of providing for them the means of a Christian education. In the autumn of 1875 Dr. A. P. Parker, now President of the Anglo-Chinese College in Shanghai, joined the mission. He was appointed to Soochow, a newly opened station, and placed in charge of a few boys who had already been gathered by J. W. Lambuth in a school in Shanghai.

Soochow, the second station of the mission, was one of the most important and one of the most difficult fields of the Empire. The large number of Confucian scholars, literary chancellors, vice-royals, and other high officials that have gone forth from its walls have won it first rank as a literary center. Under the conditions of life which prevailed there, and with the deep-seated prejudice encountered and fighting its way out to work, it is necessary that the preaching of the Gospel should have associated with it some phase of Christian work which should incarnate the spirit and ministry of Christ. It was with this purpose that the Board of Missions decided to open medical work under Dr. R. Lambuth in connection having associated with him Dr. W. H. Park, who successfully carried on the medical mission after his colleague was appointed to Japan in 1886.

During 1878 the Woman's Foreign Missionary Society entered the field, sending out Miss Lochie Rankin as its first missionary. At a later date a hospital was opened in Soochow under its auspices. Slowly a foothold has been gained and prejudice overcome. No agency in the mission has been of more value than the work of the women, especially in the educational and medical departments.

The work of the M. E. Church, South, in Mexico, owing to its location in Central China, suffered little from the storm of 1900. The cloud in the north growing out of the Boxer movement threatened destruction, but it passed over, and renewed impetus seems to have come upon the work. The most fact is worthy of note: While the Legations were besieged in Peking the Chinese friends of the medical and educational work in Soochow—and among them were some of the highest officials—were paying their subscriptions pledged for the establishment of the Soochow University under the able presidency of Dr. D. L. Anderson.

The statistics of the mission for 1902 are as follows: Missionaries, including their wives, 35; missionary women, 17; native preachers, 16; Bible women, 66; communicants, 1,914; Sunday schools, 34; scholars, 1,809; Epworth Leagues, 22; members, 725; organized churches, 52; boarding schools, 8; pupils, 476; day schools, 41; pupils, 1,170; hospitals, 3; patients treated, 23,700; total value of mission property, $231,409.

2. *Mexico: The work of the M. E. Church, South, in Mexico is conducted in three sections:*

(1) Central Mexican Mission Conference: The conversion of an educated Mexican soldier, Alejo Hernandez, was the providential beginning of the work in Mexico. Bishop Marvin, in 1871, appointed Hernandez to the territory bordering on the Rio Grande River between Laredo and its mouth. He was reappointed to the same field for 1872. Bishop Keener visited the City of Mexico in 1873, purchased property, organized mission, and sent Hernandez to the new field. Later the Bishop appointed Rev. Joel T. Davies, of the Louisiana Conference, Superintendent of the mission. In 1879 the work had extended from the City of Mexico to the cities of Leon, Cuernavaca, Cuautla, Toluca and Orizaba. Guadalajara was included in 1883, and the work was carried well down the western coast.

(2) Mexican Border Conference: This mission was also the outcome of the work of Hernandez in the valley of the Rio Grande. In 1874 there were two stations, the one at Brownsville, Texas, and the other in Rio Grande City. Two schools were opened in 1882 under the charge of missionaries of the Woman's Board, one at Concepcion and the other at Laredo. The latter has become as large an educational plant as is found in any
mission. Including its day school feeders, there were last year over one thousand children under instruction. By 1883 the evangelistic work had extended two hundred miles south into Mexico, and ten missionaries were in Texas, four were on both sides of the Rio Grande, and ten were on the south of it. In 1886 the mission was formed into an Annual Conference.

(3) Northwest Mexican Mission Conference: This was organized in 1883 and covers an area extending two hundred miles south into Mexico, including the mission was formed into an Annual Conference. It also includes the important cities of Chihuahua, Torreon, and Durango. In the first and last two cities the Woman’s Board has two flourishing schools. The missionaries engaged in this field have had the difficulty of vast distances to travel, the inveterate prejudice of Roman Catholics to encounter, and the climatic influences of life in high altitude. But they have been followed by a number of young men, sailing satisfactorily. The statistics indicate: Missionaries, including wives, 36; missionary women, 21; native traveling preachers, 45; communicants, 5,807; Sunday schools, 113; scholars, 3,921; Epworth Leagues, 42; members, 1,462; organized churches, 149; boarding and day schools, 12; pupils, 1,020; Bible women, 19; hospitals, 1; patients treated, 1,417; total collections, $5,871. In addition to the foregoing, special mention should be made of the hospital work in Monterey under Dr. U. H. Nixon, and the Instituto Laurens, supported by the “Rosebud” of the Board.

(3) Brazil: In 1875 the Board of Missions constituted Rev. J. E. Newman, for some years a resident in Brazil, its first missionary, and early in the following year Rev. J. J. Ransom joined him. The province of São Paulo was first occupied, but in 1877 work was begun in Rio de Janeiro. In 1881 two missionaries went out under the Woman’s Board, and in 1887 an annual conference was organized, under the Presidency of Bishop John C. Granbery.

The Brazil Mission is perhaps the most aggressive, active, and successful one of our churches. Notwithstanding its great area, its small force of trained workers, and meager appropriations, very great results have been secured. In the extension of circuits, in creating and circulating Christian literature, in placing the educational work upon a secure basis, and in unceasing labors to reach the people with the Gospel, no body of men and women have accomplished more than these workers in Brazil.

The statistics for 1902 show that this mission has the largest increase in membership, the largest collections on the field, and more self-supporting churches than any other mission of the church. The new building for Granbery College at Juiz de Fora is approaching completion and when thoroughly equipped will prove an invaluable auxiliary. Already it has gained an enviable position in the state. Missionaries, including their wives, 29; missionary women, 16; native traveling preachers, 19; communicants, 3,895; Sunday schools, 74; scholars, 2,555; Epworth Leagues, 12; members, 548; organized churches, 12; pupils, 358; Bible women, 9; total collections, $8,382.00.

4. Japan: In 1886 Bishop H. M. McIntyre, then in charge of the China Mission, appointed J. W. Lambuth, W. R. Lambuth, and O. A. Dukes, who were engaged in missionary work in China, to open a mission in Japan. On the 25th of July, Dr. J. W. Lambuth and wife landed in Kobe and found a field of most inviting character around the great Inland Sea open to their efforts. Joined later on by Dr. W. R. Lambuth, the inauguration meeting of the Japan Mission was held on the 17th of September, 1886, and the thirty-two years a resident in Brazil, its first missionary, and early in the following year Rev. J. J. Ransom joined him. The province of São Paulo was first occupied, but in 1877 work was begun in Rio de Janeiro. In 1881 two missionaries went out under the Woman’s Board, and in 1887 an annual conference was organized, under the Presidency of Bishop John C. Granbery.

The Brazil Mission is perhaps the most aggressive, active, and successful one of our churches. Notwithstanding its great area, its small force of trained workers, and meager appropriations, very great results have been secured. In the extension of circuits, in creating and circulating Christian literature, in placing the educational work upon a secure basis, and in unceasing labors to reach the people with the Gospel, no body of men and women have accomplished more than these workers in Brazil.

The statistics for 1902 show that this mission has the largest increase in membership, the largest collections on the field, and more self-supporting churches than any other mission of the church. The new building for Granbery College at Juiz de Fora is approaching completion and when thoroughly equipped will prove an invaluable auxiliary. Already it has gained an enviable position in the state. Missionaries, including their wives, 29; missionary women, 16; native traveling preachers, 19; communicants, 3,895; Sunday schools, 74; scholars, 2,555; Epworth Leagues, 12; members, 548; organized churches, 12; pupils, 358; Bible women, 9; total collections, $8,382.00.

4. Japan: In 1886 Bishop H. M. McIntyre, then
In its six foreign fields, China, Japan, Korea, Mexico, Brazil, and Cuba, it has now, including 66 of the Woman's Board, 2,441 missionaries, 96 native traveling preachers, 104 Bible women, 12,906 church members, 295 Sunday schools, with 11,570 scholars; 94 Epworth Leagues, with 3,009 members; 312 organized churches, of which 17 are entirely self-supporting; 101 boarding and day schools, with 4,862 pupils; 8 hospitals and dispensaries, which have treated 27,342 patients, and $21,716 has been collected in the field for all purposes.

The receipts of the General Board from all sources were $506,180, and of the Woman's Board $112,458, making the total receipts of both Boards $478,638.

METHODIST NEW CONNEXION MISSIONARY SOCIETY: The Methodist New Connexion, the earliest offshoot from the stem of the parent Wesleyan body in 1797, took its first steps in missionary enterprise in 1824. Attention was first directed to Ireland, and in 1826 a mission was established in Belfast and contiguous towns. In 1835 Canada was suggested as a sphere for missionary operations, and in 1837 the Rev. John Addyman went as the first agent of the Connexion to the Dominion. The mission expanded until in 1875 it united with the other Methodist bodies in Canada, and became the Methodist Church of that country. When the union took place the Mission comprised 396 churches, 7,661 church members, 167 Sunday schools, and 9,259 scholars.

In 1859 a long-cherished wish of the Connexion was realized by the formation of a mission to the heathen. China was selected as the field of labor, and Revs. John Innocent and William N. Hall were the first agents of the Society sent there. They worked at Shanghai for a time, and eventually settled in Tientsin.

In 1862 a mission to Australia was commenced and churches were raised in Adelaide and Melbourne. In 1887, these churches not having developed resources to make them independent, and the energies of the Society being demanded by the increasing claims of the other fields, were given up. The church in Adelaide united with the Bible Christians, and that in Melbourne with the Wesleyans.

The Society is managed by a committee, consisting of a president, a treasurer, and a secretary, with 16 ministers and 16 laymen, appointed annually by the Conference.

The mission in China has three circuits. The first and earliest, in Tientsin, has a fine establishment in the British compound, consisting of a college for the training of young men for the native ministry, also a female college for the education and training of native girls and women for Christian work. There are two chapels in the city where daily preaching of the Word is carried on, and the English Church, in which united services are held and congregations are organized by the Society. In addition to these, there are a chapel and native church in Taku, and the same in Hsing-chi, a city to the west of Tientsin. This society was the first to enter this great city, but it has been joined since by the agents of several other societies.

The second circuit, in the Shantung Province, resulted from the visit to the mission of a farmer from the village of Chu-chia-tsai, 140 miles south...
of Tientsin. Under the influence of a marvelous dream he had traveled to the great city to listen to the foreign teachers of religion. He became an earnest believer in Jesus, and went to his home near the old wall. Other organizations are developed in good and reading to them the Bible. A great awakening took place in the village, which spread by degrees over the district, with the result that a preacher in the local was sent to Tientsin for a missionary to come down and take charge of the great work.

In recent years a third sphere of labor has been occupied in the neighborhood of Kai-ping, north of Tientsin. Near this city extensive mines are worked by a syndicate of Chinese mandarins, who applied to the Society for a medical missionary, offering to afford facilities for the teaching of Christian doctrine among the workmen. An extensive circuit is worked round the neighborhood of the Tang-san collieries, extending to Yung-ping-fu, an ancient and important city near the old wall.

The mission suffered heavily at the time of the Boxer outbreak. Aside from the one chapel in the compound at Tientsin, there was not a single property left in the Tientsin circuit in which the Christians could gather for worship, while in the Shantung and Kai-ping circuits the situation was about the same. In Tientsin the Provisional Government granted the mission the use of a Buddhist temple, and afterward of a military Yamen in the heart of the city. In Tang-shan the mission suffered not a little inconvenience at the hands of the German troops who occupied the premises, and seemed indisposed to vacate until appeal was made to Count von Waldersee. The question of indemnity proved a difficult one, but with a fair way of settlement, and the one look for this Society, as for others, was most encouraging. The faithfulness of the native workers, and the devotion of the great majority of the Christians, was an indication of the substantial character of the work done, and an earnest of future success.

The mission reports emphasize the necessity of more attention to education than has been given in past years, as also to medical work. The statistics of members and probationers are also spoken of as probably within the truth, in view of the number who have not yet had the courage to return to their homes. There were reported in 1902, for the three circuits, 8 missionaries, 93 native helpers (with Sunday school workers common to both evangelistic and pastoral work, 15 pastors, 4 foreign and 11 native; 8 churches, 619 members. The Nagoya Anglo-Japanese College reports 90 students, more than half of whom are Christian, while none can be called anti-Christian. At the meeting of the Conference in 1902 action was taken accepting the basis of union proposed for the Methodist missions in Japan.

The Woman's Foreign Missionary Society has 5 missionaries in Japan, engaged chiefly in educational work. The school at Yokohama numbers 70 and there is a kindergarten with about 40. Sewing circles, mothers' meetings, YPSCC and other organizations are developed in good degree. The Society has also established work in Hu-nan, China, at Chang-te, and has 2 missionaries working in alliance with the mission of the Cumberland Presbyterians.

The headquarters of the Society are in Pittsburg, Pa.

METHODS OF MISSIONARY WORK: Methods adopted in missionary work may be considered as, 1st, Evangelistic; 2d, Pastoral. The first has primary reference to the conversion of men, the second to their development into a likeness to Christ.

To use the language of a secretary of the CMS, we have: “1. The preaching of the Gospel to the unconverted; 2. The building up of the native church as it is pictured to us in the concluding chapter of St. John’s Gospel, where Christ’s servants are represented in figure, first as fishers casting the Gospel net, and then as shepherds feeding and tending the flock. Education is a part of each. For the heathen and the Mohammedan it is undertaken solely as a means of evangelization. For the Christian population, whether elementary for the children, or professional for the future pastor or teacher or evangelist, it is a department of pastoral work. So, too, publication is a department of each. Medical work is primarily evangelistic; its benefit to converts is rather incidental.”

METHODIST PROTESTANT CHURCH; Board of Foreign Missions of the: For many years the missionary interest of this denomination was directed to assisting the work of other churches. Some of the funds collected went into the treasury of the Woman’s Union Missionary Society of New York and were applied to the support of Miss L. M. Guthrie in Japan. Miss Guthrie, on a subsequent visit to America, went to Pittsburg, Pa., and met some of the ladies who had become interested in her work. The result was the formation of the Woman’s Foreign Missionary Society of the Methodist Protestant Church, in 1879. Three years later the General Conference organized the Board of Foreign Missions, and the two societies have continued to work together.

The interest first aroused in regard to Japan made it natural to establish the mission there, and Yokohama was occupied. Subsequently, Nagoya and Shizuoka were also made stations, and the work was fully organized.

The report for 1902 shows 19 charges, served by 15 pastors, 4 foreign and 11 native; 8 churches, 619 members. The Nagoya Anglo-Japanese College reports 90 students, more than half of whom are Christian, while none can be called anti-Christian. At the meeting of the Conference in 1902 action was taken accepting the basis of union proposed for the Methodist missions in Japan.

The Woman's Foreign Missionary Society has 5 missionaries in Japan, engaged chiefly in educational work. The school at Yokohama numbers 70 and there is a kindergarten with about 40. Sewing circles, mothers' meetings, YPSCC and other organizations are developed in good degree. The Society has also established work in Hu-nan, China, at Chang-te, and has 2 missionaries working in alliance with the mission of the Cumberland Presbyterians.

The headquarters of the Society are in Pittsburg, Pa.
magnetic soul, and despite itself was drawn away into a higher life; where the cold, indifferent soul felt the heat of a soul on fire with the love of God, and expanded into a nature purer far than it had dreamed of.

It is no easy thing for an Occidental to come in contact with Oriental ideas, prejudices and habits; and to exert such influence as shall bring about change without doing harm. It is easier to repel than attract, to harden than to soften, especially in public. Men are swayed by the power of the mass of their fellow-men. A single soul is a multitude may be overwhelmed; in private conversation it may be developed.

Thus the fundamental method of missionary work in every land is intercourse with persons. Not only is this true of the inception of any work, but also of its continuance. It is just as important and universal to-day as when mission work was commenced. It is employed by every different agency, foreign and native, missionary, pastor, catechist; especially by Zenana workers, and almost exclusively by Bible readers; it is adapted to every class, and is almost the only means of teaching something.

In the pastoral division of missionary work the element of personal influence is, if anything, stronger than in the evangelistic—certainly so far as the missionary himself is concerned; and it is here that personal genius makes itself felt most markedly. It not infrequently happens that to a passing traveler the missionary appears to be doing little missionary work. He seldom preaches; he may not be an educator or a translator. Hour after hour and day after day he is in his study, or among the people, talking, talking, talking; forever preaches; he may not be an educator or a translator. Hour after hour and day after day he is in his study, or among the people, talking, talking, talking.

Passing to the pastoral division, we find the preaching assuming more the character of that in our home churches. It is less conversational, more rhetorical; less hortatory, more educational. Its range of topics, covering every department of human life and every phase of religious doctrine. Shall titles be given? How shall a church be organised? What is a Christian's duty toward his unjust, tyrannical government? The traveler went from city to another, and in Stamboul, Scutari, Galata, Haskkeyu, showed him gathering after gathering, where preaching to audiences numbering from 75 to 300, was going on in Turkish, Armenian, Greek, Spanish and English. The traveler went away, satisfied that missions had not made a new departure in that line. The same thing is true of every mission station in the world. Comparatively few of the missionary societies report the number of preaching places, partly for the reason that accurate statistics are almost impossible, partly because there is such a wide divergence of usage. If we take the term preaching place to mean a place where divine service is held regularly, whether conducted by a pastor, preacher, evangelist or catechist, the number will considerably exceed the number of missions and stations. For there are a large number of places where preaching services are held with regularity in connection with evangelistic tours, and in many sections of India and China there is not a little of public street preaching. The fact, too, that there are full 4,000 to 5,000 ordained evangelists, catechists, etc., who have not been an infidel? Must he not first challenge, then establish, before he can be a believer? Any missionary can give instance after instance where he has had to call up every line of study that he has ever pursued, to meet the difficulties that occur to the minds of those he seeks to help. But not only does he have to meet personal questions, but he must also meet the customs and prejudices of his people; and the pastor, to do his work properly, must have a knowledge of Oriental habits.

Public Preaching: This is the development of personal conversation—is, in fact, personal conversation on a somewhat extended scale. It is not oratorical, but conversational; not instructive, so much as hortatory. And it is universal. Not a few have the idea that preaching is taking a secondary place in the importance of modern mission work. In the large cities, schools, colleges, Bible houses, printing presses, are often more prominent than the preaching places, and that the chief work is preaching, shows that preaching is relied upon as a chief means of bringing the knowledge of the Gospel within the reach of men.
The nurture of the Christian community that the value of education in missionary enterprise is a second part of missionary work. When it becomes evident that the only salvation for the convert himself lies in his opportunity and ability to grow, and that this opportunity could not and would not be given or the ability developed unless the society lent a helping hand, then the high schools and colleges sprang up on every side. The tendency now is, also, to make these higher schools more nearly self-supporting.

We now note some of the advantages gained through the higher educational institutions in missions. 1. The furnishing of an educated ministry, which not only takes the place of the missionary, leaving him free for the work of superintendence, but enables the churches to be placed upon a more substantial basis of development for aggressive work. 2. The supply of support to the ministry in the form of an educated laity, able to hold its own in matters of faith, resist any undue desire for ministerial authority and exert influence in the community at large. 3. Solution of questions of social customs by bringing the community in contact with the best results of social development in other lands. This has its dangers as well as its advantages, yet it is a positive necessity. Customs of one land are discarded, something must be provided to take their place. It is chiefly through the higher education that the best Christian social usages reach the people of non-Christian lands. 4. The establishment of womanhood in proper relations in the home, the church and the community. The occasion for the development of the American College for Girls at Constantinople was the feeling expressed by parents of the wealthier classes, that they wanted a Christian education for their daughters, which should fit them not only for teaching, but for presiding in their homes. Any one who would accurately judge the value of the work of the institution should follow those young ladies, not only to the village life of Asia Minor and Bulgaria, but to the more pretentious homes of the cities. 5. Proving intelligibly to the great mass of the indifferent in mission lands, that the Gospel takes in the whole man and develops the best that there is in him. In these days of the telegraph and easy communication, Christianity is judged by its ability to develop as well as to impart. Islam and Buddhism are losing their hold upon men largely by reason of their failure in this very regard, and Christianity is being watched most closely to see whether it meets the need.

5. *Publication:* As an evangelizing agency the preparation and dissemination of Christian literature have always held a foremost place. The place of the publication work in the mission scheme has been sufficiently discussed in the articles *Bible Distribution* and *Literary Work in Missions.* For evangelistic work, tracts, leaflets, helps to Bible study, hold a first place next to the Bible itself. The weekly papers and other periodicals also have a high value. They have more of secular matter, but are always not merely evangelical, but evangelistic in tone and reach multitudes who hold aloof from direct missionary influences in any degree.

In pastoral work, missionary publications include theological and other text books and general literature. There is not as much of this as there ought to be, chiefly because, in the great strain upon the time and strength of missionaries, only that is published which at the moment is most essential. As, however, higher education
provides mature minds among the natives, this was long supplied more fully.

II. Turning now to those missionary methods which are distinctly evangelistic or pastoral, we notice, as belonging to the former class: Attention to physical and social needs, including especially medical work. The relief of physical suffering, the supplying of material wants, is a department of missionary work, where, except in the single item of medical work, classification is impossible. Acting upon the general principle that the state of the body affects most vitally the condition of the mind, missionaries in every land have adopted the various means now used so freely and successfully in the large cities of Europe and America. "The gospel of a clean shirt," or even of any shirt at all, has proved in many cases a most powerful one in lands where social customs were of the lowest. But, even in countries where that particular form of evangelization was not called for, there has almost invariably been need of more or less attention to these wants, in order to secure entrance to, and appreciation of, divine truth.

In the earlier history of missions, far more than the preaching of the gospel, persecution took a form that left the convert without even the means of subsistence. An excommunication that forbade the baker to sell him bread, meant more than trial; it meant starvation to the man who was bold enough to accept the new faith. In such circumstances the missionary was compelled to meet the emergency in such way as he best could. Of recent times that has not been so true; but the need has come in the form of widespread distress from deluge, famine and pestilence. India, Turkey, Persia, and a host of other lands, have repeatedly found instances where the supplying of material food has prepared the way for the reception of the spiritual, and hunger, cold and nakedness have unbarred many a door hitherto held tight closed by prejudice and hostility.

Two of those who are often in danger in this, and none are so quick to recognize it as the missionaries. How to give help without pauperizing, how to avoid the appearance of a bribe to accept Christ. This is true in almost every land, but is especially marked in purely heathen countries. The relations and mutual duties of husbands and wives, parents and children, form not only the theme of most earnest thought on the part of the missionary, but of much careful council. To raise the wife from the position of a slave to that of an associate; to develop in the husband and father the sense of responsibility for something more than the supply of the physical needs of those dependent upon him; to educate the children to a genuine reverence rather than the obedience of fear; to give the home character as a center of pure and godly life—these are some of the problems which can only be solved by recognizing that the fostering of a right family life is a true agency of pastoral work for the community at large.

Social life, or the relations of families with each other, may, perhaps, be considered as one of the problems rather than a method of missionary influence. It is, however, gaining increased importance from the latter point of view in the development of Protestant Christianity in foreign lands. A man leaves his old faith and accepts the new one. He cannot, however, break away entirely from his old associations, which may include those dependent upon him—certainly those to whom he has duties. He meets them, and he cannot always, in business, in the social circle; is bound together with them in many ways. He cannot if he would isolate himself from them. It is the old question of the times of the Apostles, and creates as much perplexity now as then. To meet it wisely, and place the settlement on a firm, enduring basis, requires that the missionary make a specialty of its study in all its bearings, and be able, not merely to show where the old is wrong or weak, but to present something that shall commend itself to all as clearly preferable. That this is being done increasingly is evident to all who watch carefully the discussions of missionary methods.

Community and national life are but the development of the social. There are fields, however, where they involve questions of greater perplexity. Whence the Church and State are united, and political privileges depend upon ceremonial observances, such questions arise. In some cases practically new states have been formed, with their entire paraphernalia of offices and officers. When this has not been the case, still the new Christian community has invariably had a dis-
MEXICO: In form Mexico is shaped like a cornucopia, whose mouth opens toward the United States. It anticipated the United States as a European colony by about a century. Yet eighty years ago it had to cope completely and permanently. Here the missionary meets the questions of submission to unjust laws and the demands of unchristian governments. Each case cannot be settled merely upon its own merits; the foundations of a Christian's relation to the "powers that be" must be thoroughly thought out and clearly stated. Most marked instances of the influence of missionaries in this have been given in the article on the International Service of Missions.

The Christian state, not so much as an accomplished fact, but as an ideal, is a most practical and important element in the methods by which Christianity is to be ultimately established.

Many things will occur to those intimately acquainted with the methods of missionary work which might have been mentioned. If, however, the impression shall have been given that Christian propaganda should be no mere haphazard carrying out of a vague, altho noble, impulse, but a calm, determined, well-considered effort on the part of the churches through their representatives to establish Christianity, worship, and life on a permanent and natural foundation in every section of the globe, the chief end of the writer will have been attained.

METLAKAHTLA: A village on the W. coast of British Columbia, occupied by Christianized Tsimsian Indians. Station of the CMS (1856), with 1 missionary and wife, 4 women missionaries, 4 native workers, 2 day schools, 1 boarding school, 1 dispensary, and 244 professing Christians, of whom 47 are communicants.

MEXICO: Capital of the republic of Mexico. It is beautifully situated on a plateau 7,600 feet above the level of the sea, in the Tenochtitlan valley, not far from lake Tezcuco. In the midst of lofty mountains, the climate is temperate and healthy. The older parts of the city, however, being on marshy ground, are subject to malaria. The streets are well paved, broad, and well lighted, and raised paved roads, called *paseos*, which lead out into the country, and are shaded on either side by fine trees, add much to the natural beauties of the place. The Roman Catholic religion is the state religion, but other religions are tolerated. In addition to the many churches, monasteries, convents, and other religious or benevolent institutions are plentiful. Schools and colleges, theaters and the buildings for the government offices give the city an attractive appearance.

This city was founded by Cortez in 1522 and stands on the site of a sacred Aztec high place. Population (1900), 344,721. Protestant missionary work was begun in the city by the PE in 1870, its aim being care for the spiritual needs of Protestant residents quite as much as for the native Mexicans. The PN followed in 1872, the ME and MES in 1873, the Baptist Home Missionary Society in 1883 and the SDA in 1894. These societies together have now (1903) in the city 35 missionaries, men and women; 101 native workers and 60 women; 16 places of worship; 21 elementary schools, 7 higher or special training schools, 1 hospital and dispensary, 3 printing houses and 2,172 professing evangelical Christians.

Mexico, as it now stands, is a country with nearly 6,000 miles of coastline, more than two-thirds of which are on the Pacific and the great Gulf of California. It has no navigable rivers. The east coast is peculiarly lacking in good harbors. It is, moreover, low-lying, and as a rule insalubrious. Mexico can boast but few islands, and those are insignificant in character or extent. The mountain ranges, which seem to form a sort of vertebral column throughout this hemisphere from Alaska to Patagonia, are prominent in Mexico, the cut off from the South American chain by the low-lying Isthmus of Darien. The high tableland intervening between the eastern and western branches of this great mountain range constitutes an admirable highway for development of our agricultural and international traffic—a fact which did not escape the eye of the great explorer and philosopher Humboldt. There is a vast portion of land in the country that can never become arable, but for this deficiency there are partial compensations: first, in the prevalence of mineral resources, and, second, in the fact that the coast is everywhere easily reached. With the establishment of artificial harbors and breakwaters, access can be found for maritime commerce, both on the Pacific and on the Gulf of Mexico. Yet the whole situation indicates that the chief commerce of the country must be carried on with the United States.

In the northern portions of the republic there are great barren expanses, which, the sufficiently level for tillage, are so lacking in fertility as to promise but little reward to man labor. Farther south, and along the east coast, however, there is an abundance of fertility; and altho the climate is often unhealthful, the fruitfulness of the country is such as to supply a large population, if need be, and a lucrative commerce. In Michoacan and other still more southern States there are extensive forests of all the most valuable timber-trees.

The country is in many places volcanic, and from an elevated position in the City of Mexico one can behold several greater or smaller cones which are manifestly volcanic origin, and near them extended plains of flinty lava. About the middle of the last century the mountain known as Jorullo, in the State of Michoacan, was thrown up about 1,000 feet above the plain by volcanic action.

The mines of Mexico, especially those of silver, have long been regarded as the richest in the world. It is said that for two or three centuries Mexico has produced at least one-half of the entire yield of silver possessed by mankind. From 1537 to 1830 the total yield of this metal is said to have been nearly three thousand millions. The yield of gold in the same time has been nearly one thousand millions of dollars.

The entire area of the country is 763,804 square miles. The population (in 1900) is nearly 14,000,000, of whom 19 per cent. are of pure or nearly distinct if not a corporate existence, which has come to be recognized as having an important influence in maintaining the position of the Church complete and permanent. Here the missionary meets the
pure white blood, 43 per cent. of mixed race, and
38 per cent. of Indian race.

In speaking of the Indian population, an able
writer said: "the wide difference exists between
the Indians of the United States and
British America and the so-called Indians of Mex-
ico. They are a different race. The Mexican
Indians are docile and industrious; they engage
in agriculture, in mining, and in such rude arts
as are practised in countries which do not enjoy
the advantages of modern transportation. In all
the wars in which Mexico has been engaged the
Indians have constituted largely the rank and
file of her armies. They are now enfranchised
citizens under the laws of their country, and to
the extent to which they are taxed they enjoy
equal political rights with those of the Spanish
race. While the Indians and the inhabitants of
mixed blood comprise the mental class, yet from
the ranks of the aborigines have sprung men of
mark—men who have risen to distinction in science,
arts, in letters, in educational employ­
ments, in the church, in military life, and in the
conduct of state affairs."

The Ancient Inhabitants: The Toltecs, who
preceeded the Aztecs in the valley of Mexico,
are supposed to have migrated from the north.
Like other race of the Western Hemi-
sphere, they probably passed over the narrow
channel known as Bering's Straits from northern
Asia, and were attracted southward by more
friendly climates and more abundant supplies of
food. History has given good reasons for sup­
posing that other migrations also occurred—per­
haps in some instances by accident—from Japan
across the Pacific, and from Europe and Africa
across the Atlantic. The Aztec civilization and
that of the Mayas of Yucatan have many things
in common with Eastern cults, and particularly
with the hieroglyphic inscriptions of ancient
Egypt.

The Toltecs were in some respects more highly
civilized than the Aztecs, who finally conquered
them. Their strength lay in the arts of peace,
as that of the Aztecs was developed by war.
The terrible system of bloody sacrifice was estab­
lished in connection with the warlike spirit of the
Aztec conquerors. The Tezcucans, who
entered into a triple league with the Aholcuans
and the Aztecs, and were finally betrayed and
conquered by the latter, presented the highest
perfection of the ancient Mexican civilization.
One of their kings was one of the grandest figures
in history.

The Aztecs were characteristically a warlike
race; and, like the Lombards in the Roman
Empire, they took on the culture of the van­
quished—Venetians, who, driven by northern barbarians into the Adriatic,
built upon the very lagoons and marshes a
mighty dominion—more invincible because built
upon the marshes—so the Aztecs, harassed at
first by other tribes, took refuge upon a small
island in the shallow lake of Tezcuco. This,
gradually enlarged by driven piles and the
dredging of their canals, became the impreg­
nable stronghold from which they at length
dictated terms to all their neighbors, till they
had established a great empire, extending from
sea to sea.

No chapter of history is more pathetic than that
which describes the invasion of this empire by
Cortes and his followers in the early part of the
16th century. The combination of prowess and
treachery, and the heartless cruelty inflicted in
the alleged service of the Cross, have left an
indelible blot upon the Christian name, and the
Aztecs, in spite of their bloody religion, have the
sympathy of mankind.

The three centuries which followed the con­
quest are historically a barren waste.

The Dawn of Political Liberty: This condition
of arrested development continued until the
spirit of liberty and independence was awakened in
a comparatively recent period. It seems won­
derful that Napoleon I. should have been the man
to strike at last the keynote of liberty among all
Spaniards on both hemispheres; but so it was.
There had been in all the colonies a sort of chival­
ric loyalty to the sovereigns of Castile, however
severe their oppression. But when in 1808
Napoleon sent his armies into Spain and de­
chrestoned Ferdinand VII., placing the scepter in
the hands of a Bonaparte, the spell of loyalty was
forever broken. In 1810 the standard of inde­
pendence was raised, a patriotic priest leading
the movement. By the year 1821 the inde­
pendence of Mexico and several other Spanish-
American States had been won, and by the year
1828 all the Indian colonies on the Western
Hemisphere had become free republics. But the
work of reform was as yet only partial—religious
liberty had not been achieved. We come now
to another series of provinced in relation to
Mexico, and those, too, which have to do with
our own history.

In the year 1835 Santa Anna, then President of
Mexico, brought about a coup d'état, by which
the governments of the different States were
abolished, and all the power was concentrated in
the central government under his dictatorship.

Yucatan on the south and Texas on the north
at once rebelled, and so grave was the Texan
rebellion that Santa Anna himself was compelled
to take the field. His armies attacked and dis­
persed the Texan Legislature, and prisoners of
war whom they captured were mercilessly shot by
his orders, thus denying the recommendation of
the people of Texas forever impossible.

At the battle of San Jacinto, Santa Anna was
vanquished and taken prisoner by General
Houston, and for nine years Texas maintained
her independence. In 1846 Texas applied for
admission to our union and was admitted, and
Mexico thereupon declared war upon the United
States. The oppressive acts of the Mexican
dictator were considered a first-rate pretext.
And, besides, the fashion of our English cousins
in making conquered nations pay the expense
of conquering them was also thought to be the
right thing to do; and so we concluded to defend
Texas all the way from the Gulf of Mexico to the
Pacific.

General Taylor appeared on the battlefields
of Matamoras and Monterey. General Scott
marched triumphantly from Vera Cruz to Mexico
City. General Kearney was heard from in Ari­
zona, and Fremont in California.

The Advent of Religious Freedom: Up to the
year 1867 there was no religious liberty in Mexico.
It is true that the Liberal party had in 1857
drafted a constitution demanding liberty,
abolishing conventual establishments, and con­
fiscating church properties in mortmain; but
this condition is historically a barren waste.

As Napoleon I. had unconsciously promoted
the political independence of all the Spanish-American states a half-century before, so Napoléon III. threw the empire into the hands of Archduke Maximilian, who nearly overthrew the constitutional government. The establishment of the republic of Mexico, and the religious liberty which had been proclaimed in 1857, was fully realized, and, in a large extent the masses dispensed with the sacred prerogatives of the papacy, silenced the clangor of convent-bells, which the public patience had so long endured, limited the long robes and shovel-hats and other insignia of the priesthood and other sacred orders to the clerical party, and suppressed all public processions and various childish pageants. The Jesuits were banished from the country, as they had been at various times from so many nations of Europe. It is difficult for any who desire to be entirely candid to decide whether the papacy, as it existed in Mexico fifty years ago, was on the whole a blessing or a curse.

It can hardly be doubted that, although the Virgin Mary was almost made to take the place of Deity, yet enough of Christ was communicated to the people by special franchises, she by indefatigable charities.

In 1862 the united fleets appeared at Vera Cruz with their contingents of men. But England and Spain soon withdrew from the enterprise. The French army under Generals Forey and Bazaine fought their way over the Cordillerias to the capital, where they established a provisional government known as the "Regency of the Empire." This virtually French Assembly submitted the choice of a ruler to the patronizing Archduke Maximilian, who was politico in English and Mexico to the house of Austria. The French emperor, who was politic enough to give the crown of Mexico to the house of Austria. The French army under Generals Forey and Bazaine fought their way over the Cordillerias to the capital, where they established a provisional government known as the "Regency of the Empire." This virtually French Assembly submitted the choice of a ruler to the patronizing Archduke Maximilian, who was politico in English and Mexia, was sentenced to be shot. Meanwhile the public patience had so long endured, ordered the long robes and shovel-hats and other insignia of the priesthood and other sacred orders to be laid aside when appearing upon the public streets, and suppressed all public processions and various childish pageants. The Jesuits were banished from the country, as they had been at various times from so many nations of Europe. It is difficult for any who desire to be entirely candid to decide whether the papacy, as it existed in Mexico fifty years ago, was on the whole a blessing or a curse.

The spring of 1867 brought the beginning of the end. Maximilian's chief forces, with himself among them, were at Querétaro under siege. In a general movement for religious freedom and political consolidation. He also attempted the dispensing of crowns and scepters. The War of the Rebellion in the United States had furnished the opportunity. A Swiss banker had an exaggerated claim against France, which by the adoption of the banker as a citizen of France furnished the emperor with a pretext. England and Spain also had claims, and an alliance was formed for an armed intervention.

In 1862 the united fleets appeared at Vera Cruz with their contingents of men. But England and Spain soon withdrew from the enterprise. The French army under Generals Forey and Bazaine fought their way over the Cordillerias to the capital, where they established a provisional government known as the "Regency of the Empire." This virtually French Assembly submitted the choice of a ruler to the patronizing Archduke Maximilian, who was politico in English and Mexia, was sentenced to be shot. Meanwhile the public patience had so long endured, ordered the long robes and shovel-hats and other insignia of the priesthood and other sacred orders to be laid aside when appearing upon the public streets, and suppressed all public processions and various childish pageants. The Jesuits were banished from the country, as they had been at various times from so many nations of Europe. It is difficult for any who desire to be entirely candid to decide whether the papacy, as it existed in Mexico fifty years ago, was on the whole a blessing or a curse.

In an attempt to escape he was betrayed by one of his generals, placed under arrest, tried by a military tribunal, and, with Generals Miramon and Mexia, was sentenced to be shot. Meanwhile the republic which for ten years had existed, we might almost say in the person of a single man—Benito Juarez—was returned from its exile and took the place of the mushroom emperor.

With the establishment of the republic under Juarez in 1867 that religious liberty which had been proclaimed in 1857 was fully realized, and, notwithstanding the efforts and the bitter persecutions of the Roman Catholic clergy, it has been maintained till the present time.
ous Torquemada did not fail to stamp itself upon the new continent, as upon the old.

When the Northern Methodist Mission purchased a monastery in Puebla in 1872, and proceeded to adapt it to its missionary uses, they found in the substructure skeletons of Christian martyrs who had been walled into their cells to perish from the sight and memory of men. Juárez was from the first in favor of the more enlightened influence of Protestantism, and every president since 1887 has exerted his influence for freedom of opinion. Among those of liberal sentiments there have been two classes—some undoubtedly mere freethinkers, who cared for no religious faith, but were staunch supporters of freedom. Others, even the Catholics, have advocated liberty of thought, and welcomed Protestantism, not only because such freedom is the dictate of wise government, but because they believe that the disintegration of the one dominant mass of the papacy is more favorable to Protestant missions. Of this mass was Don Jerónimo Esquibeló, who in 1879 was heard to express his satisfaction at the introduction of Protestantism, because he believed that its influence, even its rivalries, would prove a benefit to the Mexican Catholic Church, and make it more like the Catholic Church in the United States.

The Present Status of the Republic: A great advance in industrial and commercial resources has been made since the more complete establishment of the republican government in 1867, at the close of the Maximilian empire. The cause of public education has also greatly advanced since the separation of Church and State. It certainly is not creditable to the Roman Catholic Church, which for more than three centuries had held dominion over the country, that the breaking of its dominion was the signal for a great advance in the education of the people. In the year 1857 the University of Mexico was abolished, and was replaced by special schools of law, medicine, letters, agriculture, mines, science and a military college.

The country has so long been exempt from serious political disturbances that the consequence of capitalists has been fully established, and the wealth which springs up with stable government has of itself become a strong conservative factor, and a new warrant for future prosperity.

The capitalists of the country cannot afford the luxury of the old-time pronunciamento, and they are now a more influential class than the impecunious adventurers who follow political revolution as a profession.

The Catholic party have not ceased to reecho the old cry of “patriotism” as a means of opposition to Protestant missions. Of this class was Don Jerónimo Esquibeló, who in 1879 was heard to express his satisfaction at the introduction of Protestantism, because he believed that its influence, even its rivalries, would prove a benefit to the Mexican Catholic Church, and make it more like the Catholic Church in the United States.

The American Bible Society had from an early period cherished a deep interest in Mexico, but almost nothing could then be done for the spread of the truth. But after the Mexican war direct effort was made to introduce the Word of God.

Rev. Mr. Thompson was employed as a Bible agent in Brownsville, Tex., in 1866. Bible distribution was carried on in connection with the missionary work of Miss Melinda Rankin in Brownsville, in 1854. In 1866 she established a school in Monterey, Mexico. As an example of the way in which the word found its way and began to work like leaven, we may cite Vila de Cos, a mining community in the State of Zacatecas.

An “ecclesia” like those of New Testament times was formed in a private house where people met to read the Word of God in secret. The proclamation of liberty of thought in 1857 gave them courage, and the little company grew in numbers and in knowledge. Sending to Monterey for a clergyman, they received the rite of baptism, and organized themselves into a church.

They appointed one of their own number to conduct services and administer the sacraments. They were instructed and variously assisted from time to time by Dr. G. W. Provost, an American physician of Zacatecas. By the year 1872 they had erected a church, and the number of communicants had risen to over a hundred. In 1861, Rev. James Hickey, a Baptist minister residing in Texas, being adverse to slavery and unwilling to be drawn into the impending conflict, crossed the Rio Grande to Matamoros, where he acquired some knowledge of Spanish, and began to preach to the Mexicans. From there he went to Monterey in November, 1862, where, in January, 1864, the first Baptist church was organized, which to-day is one of the strongest evangelical bodies in Mexico. He died in 1866. For about three years the work was maintained by the little body of believers until 1869, when the American Baptist Home Missionary Society appointed a missionary to that field. Since that time the Society has prosecuted its work successfully in the republic, as stated in the article on Home Missions.

Another example of the leaven of Bible-distribution was found years later in Zitacuaro, in the State of Michoacan. A Presbyterian native preacher, Rev. Mr. Forcada, on commencing missionary work at that point in 1877, learned that a Bible depository had been opened there by a Mexican six years before, and that four hundred Bibles and many religious tracts had been sold. Thus the way had been prepared for an unexpected welcome to the missionary, and a most gratifying success. At present, within a radius of forty miles, there are sixteen congregations of Protestant Christians.

Undenominational Missionary Work: Through the influence of Miss Rankin at Monterey, the
attention of Rev. Henry A. Riley was called to Mexico as a promising missionary field, and in 1869 he began his labors, where he found the harvest ripe beyond his expectations. He began his labors under the auspices of the American and Foreign Christian Union, and he succeeded in purchasing at a low price a valuable consolidated church property. Meanwhile an important event had already begun in the city of Mexico, where a few prominent priests openly avowed their renunciation of the Roman Catholic dogmas and corruptions.

The first was Francisco Aguas, a man of great fervor and eloquence. Alarmed at his boldness and success, a fellow-priest, Manuel Aguas, set out to prepare himself to refute the teachings of Aguas, who had already been joined and encouraged by Mr. Riley. While Aguas pursued his investigations in search of arguments, he himself became a convert, and a most successful preacher of the Gospel. Unfortunately for the cause which they had espoused, both of these eloquent men died after a brief career. The converts who were gathered by Father Aguas were organized into a church based upon the doctrines and order of American Episcopacy, and known as the Church of Jesus.

The Protestant influences that have been introduced into Mexico have come largely from North America, and the following societies have accomplished most effective results: The Northern and Southern Presbyterian Boards; the Associate Reformed (South); the Cumberland Presbyterian; the Northern and Southern Methodist Boards; the American Baptist Home Mission Society; Independent Baptist of the South; the Foreign Mission Board of the Southern Baptist Convention; the Protestant Episcopal Board; the American Board (Congregational); the Christian Woman's Board of Missions; the Friends' Work; the American Bible Society; the Seventh Day Adventists and their medical work; and the Woman's Christian Temperance Union. The Protestant influences that have been introduced into Mexico have come largely from North America, and the following societies have accomplished most effective results: The Northern and Southern Presbyterian Boards; the Associate Reformed (South); the Cumberland Presbyterian; the Northern and Southern Methodist Boards; the American Baptist Home Mission Society; Independent Baptist of the South; the Foreign Mission Board of the Southern Baptist Convention; the Protestant Episcopal Board; the American Board (Congregational); the Christian Woman's Board of Missions; the Friends' Work; the American Bible Society; the Seventh Day Adventists and their medical work; and the Woman's Christian Temperance Union.

MEXICO: The peninsula of Mexico, with its 50,000 square miles, is surrounded by the Caribbean Sea on the N., the Gulf of Mexico on the E., the Pacific Ocean on the S., and the Sea of Cortez on the W.

In 1640 the capital was founded, not far from Shiloh, in a lagoon watered by the River Engotine. In 1869 he received an invitation to teach a Kafir tribe 240 miles from Engotine. War had scattered the tribe. Mr. Meyer and his family were left alone. But he followed the Kafirs to preach to them in their mountain fastnesses. After peace was restored the people began to come to the station to hear the Gospel, and soon church and school were built; and a church was organized. Mr. Meyer was permitted to found one more mission, but his health failed, and he was obliged to return to Europe.

MHOW: A town in Central India, situated 13 miles S. W. by S. of Indore. There is a military post 1 mile distant. Population 8,500, of whom three-fourths are Hindus. Station of the PCC (1877), with (1903) 2 women missionaries, 37 native workers, 3 outstations, 1 place of worship, 3 Sunday schools, 4 day schools, 1 industrial school, 1 dispensary, 1 orphanage, and 43 professing Christians. Station also of the WMS, with (1903) 1 missionary, 5 outstations, 1 place of worship, and 35 professing Christians. Name also written Mahow.

MICRONESIA: Certain groups of small islands in the Pacific Ocean mostly north of the equator, and between the meridian of 150° and 180°. This part of the Ocean includes the Philippine, (Kingsmill), Marshall (Mulgrave, the radack and ralick chains), and Caroline Islands, the Marianas (or Ladrones), and Bonin Island, and many other small atolls and groups. With few exceptions the islands are low atolls of coral formation. The groups vary in extent—from the single islet half a mile long to the extensive archipelago enclosed by a coral reef 200 miles or more in circumference. The depth of the island-studded lagoon thus enclosed varies from 5 to 100 fathoms. Some islands are accessible to the largest ships, having good channels through breaks in the reef, and furnishing commodious harbors, while some have channels which cannot be entered with the prevailing winds, and others are entirely enclosed by reefs and have no anchorage. Ocean currents, with frequent calms, render navigation very uncertain and often dangerous. The area of land in any of these atolls is insignificant compared with the size of the lagoon or the extent of the supporting reef. The land, ranging in elevation from 5 to 20 feet above high-water mark, is composed of coral rocks and sand washed up by the waves, and forms a series of islets resting at varying distances from one another upon the reef. At high tide the waves roll over the reef at a depth of 4 to 10 feet and between the islets into the lagoon, while at ebb tide the reef is bare, and furnishes a connecting pathway from islet to islet, except where it is broken by a channel. The average area of land in the atolls is probably from 5 to 10 square miles.

The high islands are of volcanic origin, have the physical peculiarities of the atolls, only that the lagoon is replaced by elevated land. The people resemble the brown Polynesian race, but they are evidently of mixed blood; and their language is not the true Polynesian, but distinct and split up into the different groups. They are simple in construction, easily acquired, yet quite difficult to reduce to writing because of the shading of sounds, and also on account of the presence of close consonants at the end of words. Five of these languages have been reduced to writing. Portions of the Bible, hymn-books, and various school-books have been printed. Some of the dialects are very expressive, and the not having extended vocabularies, are rendered flexible by the use of proemial and suffixal, verbal directives, and terminations to indicate place and position.

Therefore, Rev. Henry A. Riley was called to Mexico as a promising missionary field, and in 1869 he began his labors, where he found the harvest ripe beyond his expectations. He began his labors under the auspices of the American and Foreign Christian Union, and he succeeded in purchasing at a low price a valuable consolidated church property. Meanwhile an important event had already begun in the city of Mexico, where a few prominent priests openly avowed their renunciation of the Roman Catholic dogmas and corruptions.

The changes which have been wrought through the efforts of the missionaries are truly wonderful. The transforming power of the Word of God has never been more manifest than in this field. There has been a marked development of stability in the character of the natives. Formerly the habits of different groups show great variety. In the Gilbert Islands men had no covering of any kind; the women wore a fringed skirt 10 or 12 inches long, the children being nude. In the Marshall Islands men wore a fringe skirt 25 to 30 inches long, and the women two mats, about a yard square each, belted about the waist. Upon the Caroline Islands some covering was used. The dwelling-houses were mere shelters of simple construction, the council-houses were large.

The forms of government varied, but were all founded on the idea of the aggrandizement of the chief rather than the good of the subject. Human life was slightly regarded, and even petty chiefs sent many a victim to the executioner.

Missionary work was begun on Ponape and Kusaie (Caroline group) in 1852 by three American missionaries (L. H. Gulick, A. A. Sturges, and B. G. Snow) with their wives. They were accompanied by two Hawaiian missionary helpers with their wives. The first five years were discouraging. Many times the enterprise seemed ready to fail. Opposition of foreigners (self-exiled and more degraded than the natives), small-pox on Ponape, insurrection on Kusaie, disastrous results of contact with the whaling fleets, and the dense paganism of the natives themselves had all to be overcome by the faith ofearnest men. The year 1857 saw Apaing (Gilbert Islands) and Ebon (Marshall Islands) occupied.

During the next five years (1857 to 1862) the harvest began. During the last twenty years there has been a constant increase of both hearers and converts.

The religion of the islanders used to be not greatly unlike modern spiritism, and their social usages imposed no family ties. Polygamy was tolerated, and even the chiefs were dishonest and untruthful. There was a constant increase of both hearers and converts.

The changes which have been wrought through the efforts of the missionaries are truly wonderful. The transforming power of the Word of God has never been more manifest than in this field. There has been a marked development of stability in the character of the natives. Formerly they were dishonest and untruthful. There was a belief among them that the Great Spirit used deceitful means for the accomplishment of His plans or for maintaining His authority, and the people accordingly cultivated deceit. Ships were often pillaged and the crews murdered. But the Gospel has in many islands effected a complete revolution. Social ideas have been changed. The family has been built up, and the ceremony of marriage is becoming more and more common. The practice of family-worship has done much to purify and crystallize social ideas, and a strong sentiment of his duty to guard the household and defend his family from the lust of even the chiefs is rising in the mind of the head of the household.

Better dwellings, greater personal cleanliness and tidiness have also followed the moral reformation. Intellectual progress is quite marked. The schools are well attended. Native teachers have done very efficient work. The mother-tongue has become the vehicle of blessing. From the first a missionary spirit has been cultivated, and the young convert has been taught to keep in view the prospect of becoming a teacher of the new doctrine on his own island, or, if need be, on other islands. When the work was to be pushed westward from Ponape it was done by native missionaries, furnishing one of the most interesting chapters in the annals of missionary work.

Going forth to a people of diverse tongue, these men and women prepared themselves for the work, and soon gathered in large numbers of converts.

The American Board has training schools at Kusaie and at Ruk. There are 51 churches, with over 6,000 communicants. The LMS has a flourishing work in the southern islands of the Gilbert group.

MIDDLEDrift: A settlement in the Transvaal, S. Africa, situated on the S. side of Limpopo River, about 130 miles N. by E. of Pietersburg. Station of the NBC (1897), with (1900) 1 missionary and his wife, 5 native workers, 9 outstations, 4 places of worship, 9 Sunday schools, 3 day schools, 1 temperance society, and 340 professed Christians.

MIDNAPUR: A town in Bengal, India, situated 65 miles W. by S. of Calcutta, with which it is connected by canal. It is the center of a silk and indigo industry and has a population (1891) of 32,500, of whom 24,700 are Hindus and 6,800 Muslims. Station of the Free Baptist Missionary Society (1863), with (1903) 2 missionaries and their wives, 3 women missionaries, 54 native workers, 6 outstations, 1 place of worship, 6 Sunday schools, 2 boarding schools, 16 day schools, 1 theological class, 1 dispensary, and 213 professed Christians, of whom 125 are communicants. The Society spells the name Midnapore.

MIDONGY: A village in Madagascar, situated 70 miles N. W. of Fianarantsoa. Station of the Norwegian Mission Society (1894).

MIEN-CHAU: A town in the Province of Szechwan, China, situated on the Fu-chiang, 62 miles N. E. by N. of Cheng-tu-fu. Population, 70,000. Station of the CMS (1894), with (1900) 2 missionaries, 2 with their wives; 2 women missionaries, 1 native worker, 1 place of worship, 1 dispensary, 1 day school, and 8 professed Christians. A general reorganization after the Boxer outbreak is now under way. The Society spells the name Mien-Choe.

MIEN-CHU-HSIEN: A town in the Province of Szechwan, China, situated 45 miles N. of Cheng-tu-fu. Population, 50,000. Station of the CMS (1894), with (1902) 2 missionaries, 1 with his wife; 1 woman missionary, and 5 Christians. The Society spells the name Mien-Obh.

MIHIMAM. See MAIJAM.

MILDMAY INSTITUTIONS AND MISSIONS: The Mildmay Conferences were inaugurated in 1856 by the Rev. William Pennefather, Vicar of St. Jude's, Mildmay Park, at Bermondsey. The chief purpose, to persuade members of various Christian Churches openly to acknowledge their spiritual union in Christ, seemed to many fraught with danger of an actual exhibition of dissension and confusion. In fact, they were so successful that in 1869 the corner-stone of a large Conference Hall was laid at Mildmay, and the institution became a center of union for Christians of all
Mildmay Modern Protestant

476

denominations, and has facilitated the prosecution of a variety of evangelistic and missionary enterprises.

The Conference Hall is used not merely for the annual conferences, but for weekly evangelistic services, and there are special rooms for Bible classes, mothers' meetings, tea meetings, etc. Closely connected with it is a deaconess house, a training home for lady workers for home and foreign missionary work, called "The Willows," a nurses' house, Memorial Cottage Hospital and orphanage, while a mission hospital at Bethnal Green, and a convalescent home at Ossulston are under the same management. Special interest attaches to the Pennefather Memorial Home for Mildmay workers who are disabled by sickness or age, and to the mulberry tree in a corner of the Park, which it has been the custom to gather afternoon meetings during the conferences.

The three departments especially connected with foreign mission work are the Bible class for men in Conference Hall, which has sent out a large number of workers, ordained and lay; the Deaconess House, and the Willows Training School. The Bible class is represented in the Church of England, Free Church pastorates, on the foreign fields in China, India, Persia, South America, and Africa, and in work for the Jews. The Deaconess House is the administrative headquarters for the three branches of its work: medical, home and foreign missions. The graduates are found in every part of city work as well as on the foreign field, including some of the most difficult sections, as Arabia, Kashmir and Central Africa. For the most part Mildmay workers go in connection with the regular missionary societies, and in the training institute there is a special class in preparation for the CMS. The organization is more closely in charge of work among the Jews, particularly in London and Eastern Europe, and the Jaffa Medical Mission and Hospital is closely affiliated with it. The City Mission work includes rescue work, house-to-house visitation by the deaconesses, and any other benevolent enterprises. The whole organization is under the care of a board of trustees and council, including representatives of the Church of England and the Free Churches.

MILLER: A village in Cape Colony, S. Africa, situated in the Transkei district, 35 miles S. E. of Clarkebury. Station of the UFS (1887), with a mission hospital at Bethnal Green, and a convalescent home at Ossulston are under the same management. Special interest attaches to the Pennefather Memorial Home for Mildmay workers who are disabled by sickness or age, and to the mulberry tree in a corner of the Park, which it has been the custom to gather afternoon meetings during the conferences.

MILLS, Samuel John: Born at Torrington, Conn., April 21, 1783, the son of a minister. He entered Williams College in 1806 and graduated in 1809. After entering college he was accustomed to meet with a few students in a grove for prayer and religious conference, and on a memorable afternoon, when driven by a thunderstorm to continue their conference under a haystack, he first suggested the idea of personal responsibility for sending the Gospel to the heathen missionaries. He first suggested the idea of personal responsibility for sending the Gospel to the heathen. In 1810 Mills entered Andover Theological Seminary, where he found Hall, Newell, Judson, and Nott deeply interested in the same subject, and he proposed that they unite in an appeal to the General Association of Massachusetts, soon to meet at Bradford. This memorial led to the formation of the American Board. Mills, after his graduation, was active in organizing Bible and other benevolent societies in different parts of the United States, and was sent to Africa by the American Colonization Society to choose a site for a colony of negroes from America. There he contracted a fever from which he died on board ship June 16, 1818. The not permitted to engage personally in a foreign mission he accomplished much for the conversion of the world. From the mind of Mills arose plans for the American Board of Commissioners for Foreign Missions, the American Bible Society, the United Foreign Missionary Society, and the African School under the care of the Synod of New York and New Jersey, beside impetus given to Domestic Missions, to the Colonization Society, and to the general cause of benevolence in both hemispheres.

MILLS, William: Born in Aberdeenshire, Scotland, in 1785. His fixed purpose to engage in missionary work was formed in 1805, at the age of twenty. After this he spent five years in securing a support for his mother and sisters. His early opportunities for education were meager. Entering the missionary college at Cosport, he went through the regular course of study, under the direction of the Rev. David Bogue. He was ordained in July, 1812; received his appointment to China, under the LMS, arriving at Macao July 4, 1813, where he was welcomed by Dr. Morrison. China being closed against missionaries, and the Portuguese, who controlled the neighboring islands and points on the mainland, being hostile, he was ordered in ten days to leave Macao.

Leaving Mrs. Milne with Mrs. Morrison, he went to Canton, almost the only place in China where he could live in safety. Here he remained six months, engaged in the study of the language. The next eight months he spent in a tour through the East Indian Archipelago, distributing among Chinese residents copies of the New Testament and other books. Rejoining Dr. Morrison at Canton, Milne was sent to open a mission to the Chinese in Malacca, arriving at Penang in 1815. He opened a free school and gave much time to planning for an Anglo-Chinese College at Malacca, which he opened in 1820, the idea and much of the early support coming from Dr. Robert Morrison of Canton. His main work from 1815 to the close of his life was the preparation of religious literature. He aided Morrison in the work of translating the Bible into Chinese, the Books of Deuteronomy and onward to Job being translated by him. He prepared a Commentary on the Epistle to the Ephesians, an "Essay on the Soul," in two volumes, and fifteen tracts, all acceptable to the Chinese. He had great skill and readiness in the use of the language, and in addition to his literary labors performed much evangelistic work. His first convert, Leang-Afa, whom he baptized, was the first ordained Chinese evangelist, remained in the service of the LMS for many years, and was the teacher from whom the leader of the Taiping rebellion derived his respect for Christianity. Dr. Milne's health failing, he took a sea voyage, but returned weaker, and died in 1822, at the early age of thirty-seven, and when but ten years in the missionary work.
Besides the works mentioned, he published *Retrospect of the Protestant Mission in China.*

**Philip (R.), William Milne, New York, 1840.**

**MILLPORT HARBOR:** A settlement in British New Guinea, situated on the S. coast, about 80 miles W. of Kwato. It is a lovely situation on a hill with a bay on each side. Station of the LMS (1896), with 1 missionary.

**MING-CHIANG.** See MIN-TING-HSIEN.

**MINGRELIA:** A district of Asiatic Russia, in the Caucasus, lying between Tiflis and the Black Sea. Area, 2,600 square miles. Surface generally mountainous, sloping toward the south. Climate warm and damp; fevers are prevalent; soil exceedingly fertile, and vegetation rapid. The mountains are covered with magnificent forests, and much good land lies waste. The district is without external improvement, and has a savage and deserted appearance. Population, 240,000, most of whom belong to the Georgian race, but are generally inferior in appearance to the mountaineers of the Caucasus. The dominant religion is that of the Greek Church. Mingrelia corresponds with ancient Colchis. It was the birthplace of the kingdom of Georgia, was afterward independent under a long line of native princes, and became subject to Russia in 1804, but its prince remained nominally sovereign till 1867, when he sold all his rights to the emperor of Russia for 1,000,000 roubles. There is no distinctive mission work carried on among the Mingrelians, the colporteurs of the British and Foreign Bible Society go through the country occasionally.

**MIN-TING-HSIEN:** A village in the province of Fo-kien, China, situated on the Min River 28 miles N. W. of Fu-chau. Station of the ME, with (1903) 3 women missionaries, 25 native workers, 7 outstations, 19 places of worship, 19,000 professed Christians, of whom 784 are communicants. The Society spells the name Ming-chiang.

**MIRAJ:** A town in Bombay, India, situated 70 miles W. of Bijaun and 32 miles E. N. E. of Kolhapur, near Kistna River. Population (1891) 26,100. Station of the PN (1892), with (1903) 5 missionaries, four of them with their wives; 2 women missionaries, 7 native workers, 1 place of worship, 2 Sunday schools, 3 day schools, 2 boarding schools, 1 dispensary, 1 hospital, 1 medical class, 1 orphanage, and 37 professed Christians. The Mission to Leopers in India and the East supports a leper asylum here, in connection with the Presbyterian Mission.

**MIRAT.** See MEERUT.

**MIRZAPUR:** A town in the United Provinces, India, situated on the right bank of the Ganges, 30 miles W. S. W. of Benares. Population of (1901) 79,862, of whom five-sixths are Hindus. Station of the LMS (1837), with (1903) 2 missionaries, 1 with his wife; 2 women missionaries, 16 native workers, 1 outstation, 6 Sunday schools, 9 day schools, 1 boarding school, 1 orphanage, and 137 professed Christians, of whom 46 are communicants.

**MITO:** A town in Japan, situated 65 miles N. E. by N. of Tokio. Has a large fish export trade. Population, 19,000. Station of the ABMU (1899), with (1900) 1 missionary and wife, 1 women's missionary, 5 native workers, 6 outstations, 3 places of worship, 5 Sunday schools, and 93 professed Christians. Station also of the AFFM (1888), with 1 missionary and wife, 2 native workers, 1 Sunday school. 1 industrial school, and 30 professed Christians. Station also of the PE (1901), with 1 missionary, 1 native worker, 2 places of worship, 1 day school, and 1 hospital.

**MITSIDI:** A settlement in the Shiré district of British Central Africa, situated 30 miles W. by N. of Blantyre. Station and plantation of the Zambesi Industrial Mission (1900), with 5 missionaries, two of them with their wives; 1 woman missionary, 1 outstation, 1 place of worship, 2 Sunday schools, 2 day schools, 1 industrial farm, 1 dispensary, 1 hospital, and 30 professed Christians.

**MITYANI:** A village in Uganda, Africa, situated in the district of Singo, 40 miles W. of Mungo. Station of the CMS (1893), with 2 missionaries, one with his wife; 76 native workers, 1 printing press, 1 theological college, 1 dispensary, and 2,380 professed Christians, of whom 598 are communicants. Society spells the name Mityana.

**MIYAZAKI:** A town in Kiushiu, Japan, situated near the E. coast, about 100 miles E. S. E. of Nagasaki. Population, 5,000. Station of the ABCFM (1894), with (1902) 1 missionary, 1 woman missionary, 8 native workers, 25 outstations, 3 places of worship, 7 Sunday schools, 1 Young People's Society.

**MJOZI:** A settlement in Pondoland, Cape Colony, S. Africa, situated near Mount Ayliff and about 45 miles S. E. of Kokstad. Station of the South Africa Baptist Mission Society, with 1 missionary and his wife, 1 outstation, 1 place of worship, and 3 professed Christians.

**MKUNAZINI:** A village on the W. coast of the Island of Zanzibar, Africa, and one of the suburbs of Zanzibar town. The UM has its headquarters here. Statistics given under Zanzibar.

**MLANJE:** A village in British Central Africa, situated on a range of hills 25 miles S. of Lake Shirwa. Altitude, 8,000 feet. Station of the CSFM (1887), with (1900) 2 missionaries, one with his wife; 7 native workers, 1 place of worship, 1 Sunday school, 4 day schools, 1 boarding school, 1 industrial school, and 19 professed Christians.

**MLENGANA:** A parish in the W. of Pondoland, Cape Colony, Africa. Station of the Episcopal Church of Scotland (1892), with (1902) 2 missionaries, 3 native workers, 8 outstations, 5 day schools, 1 place of worship, and 307 professed Christians, of whom 112 are communicants. The Society calls the parish St. Barnabas.

**MODERN PROTESTANT MISSIONS:** For two centuries after the Reformation there was practically no missionary activity in the Protestant churches. Erasmus taught the duty of world-wide evangelisation, but as something for the future rather than the present. Luther seemed careless of everything but the preparation of his own community for the "last days," and the settlement of the violent controversies that were the inevitable attendant upon the sudden enfranchisement of individual opinion. There were, however, a number of enterprises, individual or political: the Calvin-Coligny colonies in Brazil and Florida (1555-64), more political than religious in character, and all failures; a mission to Lapland (1560) under the auspices of Gustavus Vasa; an
effort by the Dutch to introduce Christianity among the natives of Java (1619), following the establishment of a college for the training of missionaries at Leyden (1612), and extending to the efforts for the Indians of North America by Eliot, the Mayhews and others, resulting in the grant of a charter by the Long Parliament of the first charter to a missionary society "for the promoting and propagating the Gospel of Christ in New England," a society still in existence under the name, "The New England Company.

With the middle of the 17th century commenced a new movement, inaugurated, not by the clergy, but by the laity, and including some prominent jurists of Lubeck. One, Peter Heiling, reached his field, Abyssinia. In 1664 an Austrian baron, Von Welz, issued an earnest appeal for the conversion of the heathen, to which Ursinus of Ratisbon responded that Greeks were responsible for the Turks; the Danes and Swedes for the Greenlanders and the Lapps, and that it was absurd, even wicked, to cast the pearls of the Gospel before the dogs of cannibals.

Two years before this, however, Spencer had been made pastor at Frankfort, and with his friend Francke, led the Germans to a distinctly missionary character to the new University of Halle, while in 1700 the philosopher Leibnitz urged upon the Berlin Academy the duty of propagating "the true faith and Christian virtue among the remote and unconverted nations," especially China. The first action under the new impulse was the founding of the Danish Tamil Mission by King Frederich IV., of Denmark, in response to the representations by Court Chaplain Dr. Lutkens, and the sending of Ziegenbalg and Plutschau to Tranquebar in 1705, as the Danish Mission.

The Danish, gave rise to the Moravian movement. Count Zinzendorf, who had given the persecuted Bohemian Unitas Fratrum a home on his estate at Berthelsdorf, visited Copenhagen in 1729, and there heard about Danish Missions. The result was that, in 1732, two Moravians went to St. Thomas, W. I., in 1733, two more to Greenland, and within four years other Moravian missionaries went to Dutch Guiana, to South Africa, to the Indians of Pennsylvania and Georgia. The result of these activities became the link connecting with Germany still another chain of missionary endeavor.

In 1729 the Oxford Club, of which the Wesleys were prominent members, was founded, and six years later the two brothers went with General Ogilthorpe to Georgia, and came in contact with a Moravian missionary. This led to a visit by John Wesley to Herrnhut in 1738, and acquaintance with Zinzendorf and Francke, whose influence in Methodism has been great. It was not, however, till some time later that the distinctly missionary feature of the movement became apparent.

During this period, with the exception, in a degree, of the Moravians, the dominant idea was the colonial. England, Holland and Denmark had reached out to enlarge their commercial relations. The meads of the Gospel were uppermost in the thought of the home churches, and the conversion of natives in the colonies seems to have been considered more from the political than from the spiritual standpoint. Under the influence, however, of the revival spirit which spread through England and the United States, and which brought to the front the Wesleys, Whitefield, Wilberforce, the Countess of Huntington, Henry Venn, Thomas Scott, Philip Doddridge, John Watts, Hannah More, Jonathan Edwards, the Tennents, and a host of others, a sterner sense developed of Christian duty toward a world lying in sin. In 1746 a prayer concert was continued during seven weeks, in which Jonathan Edwards had a share. But no practical application of this new conception came to the work of missions until Carey's famous "Inquiry," and his two sermons, "Expect Great Things from God," and "Attempt Great Things for God," in 1792. From these resulted the Baptist Missionary Society, which inaugurated the era of aggressive and missionary missions.

From this time on development of the missionary idea was rapid and multiformal. Chronological statement becomes confusing, and the topical presentation of progress on the whole gives a clearer view. Three divisions stand out prominently: 1. The development of the missionary idea in the church; 2. The occupation of the field; 3. The results achieved.

1. Development of the Missionary Idea: It is an interesting fact that the first influence of the missionary spirit has been to break down differences of creed or polity. The entire evangelical element in England felt the power of the initiative of the Baptists, and three years later a number of representatives from the Independent (Congregational), Wesleyan, Presbyterian and Episcopal bodies met and organized "The Missionary Society," now known as The London Missionary Society. That afterward they separated was due to no lack of sympathy with each other, but to the simple fact that they felt they could accomplish more for the great work by developing their own particular fields. Thus, in 1799, the Evangelical churchmen formed the Church Missionary Society, in 1814 the Wesleys established their own organization, and later the Presbyterians did the same. But the influence of these societies was by no means confined to their own circles. Two Church of England organizations, the Society for Promoting Christian Knowledge, founded as early as 1698, and the society for the Propagation of the Gospel (1701), which had hitherto confined their attention almost entirely to the home mission needs, broadened their outlook and their efforts, and became, in their own spheres, distinctively missionary societies. So, also, the General Baptists (Arminian or Free Will) followed the lead of their particular (Calvinistic) Brethren, and in 1816 established their own society. The other Methodist societies did not come into existence until later, with the exception of the Bible Christians' organization, which dates from 1821.

Parallel with this movement in England was a similar one in Scotland. There, too, as early as 1700, a society for Promoting Christian Knowledge had been formed, which established a board of correspondents in New York in 1741, and assisted in supporting workers among the Indians, among them David Brainerd. Following on the organization of the Missionary Society in London, similar societies were formed in Edinburgh and Glasgow, from which later grew the great enterprises of the Established, Free, and United Churches.

It was characteristic of the broad view of the leaders in the evangelical and missionary move-
ment that great emphasis was laid from the beginning on the necessity for the fullest of information, and a spirit of direct thought and study. Besides the two Societies for Promoting Christian knowledge already mentioned, there were formed (1793) the Religious Book and Tract Society of Scotland, (1799) the Religious Tract Society in London, (1804) the British and Foreign Bible Society, followed by similar organizations in Scotland, afterward united in the National Bible Society of Scotland.

In America, up to the time of Carey, the evangelical thoughts and action of the churches had been directed almost entirely to the Indians, and the missionary interest in England. This resulted in 1815 in the establishment of the Basel Missionary Institute. In Germany the Berlin Missionary Society (1824) was organized. Berlin, too, a similar movement was inaugurated by Pastor Janicke, in 1800, and as a result the Halle Missionary Society, at first as an auxiliary in Holland and in Germany. In Holland the Synod of New York for assistance in sending missionaries to Africa. The sailing of Carey and the formation of the LMS aroused great interest, and a number of societies were formed in New York and New England, in 1796-97, primarily for work among the Indians, but in some cases with special mention of the needs of foreign lands. Several magazines were founded and funds were raised to assist the enterprises started in England. The foundation of Andover Seminary (1806) had special reference to the preparation of preachers for mission work. As in England, individual enterprise had a great influence, and the munificent gifts of Robert Ralston and others, of Philadelphia, helped to assure the interest of the church in mission work.

The special initiative for active work was furnished by three students in Williams College, Samuel J. Mills, Gordon Hall, and James Richards. At the famous haystack prayer meeting in 1806, they pledged themselves to the work, and before the Revolution Semi-nary in 1812 pressed the matter upon public attention so earnestly that the General Association of Congregational Churches, at a meeting in Bradford, Mass., considered the question of a society. As a result, in June of that year the American Board of Commissioners for Foreign Missions was organized. As in the case of the LMS, different denominations, chiefly Presbyterian and Reformed, united with the Congregationalists. The Baptists continued to send their gifts to Serampore, until the news of the change of views on the part of Judson and Rice aroused them to the opportunity for a work of their own, and the American Baptist Missionary Union was formed in 1814. The Methodists established their work in 1819, and the American Bible Society (1816) was followed or attended by various tract societies united in the American Tract Society in 1823.

On the continent of Europe, the influence of the movement in England was felt at once both in Holland and in Germany. In Holland the sending out of Van der Kemp by the LMS occasioned the organization (1797) of the Netherlands Missionary Society, at first as an auxiliary to the English work, but later independent in its labor. In Germany the missionary interest in Halle had practically died out; a new movement at Basel, Switzerland, took its place. As early as 1758 a society had been formed for the development of evangelical life, and its members were in close touch with the movements in England. This resulted in 1815 in the establishment of the Basel Missionary Institute. In Berlin, too, a similar movement was inaugurated by Pastor Jänichen, in 1800, and as a result the Berlin Missionary Society (1824) was organized.

The Foreign Missionary enterprise inaugurated by Carey, and undertaken in the United States, Holland and Germany, passed through a period of severe trial. Early years of such enterprises are years of seed-sowing rather than of reaping, and the new organizations had all they could do to hold their own. After a period, however, there seemed to come a new impulse to the work. One after another of the churches that had contented to act the part of assistants assumed the position of principals. Thus, in England, the Dutch Calvinistic Methodists (1846), the Presbyterians (1847), Primitive Methodists (1842), United Methodist Free Churches (1857), Methodist New Connexion (1859), and Friends (1856), established their own work; while in the Church of England, the South American Missionary Society (1844), Universities Mission to Central Africa (1856), led the impulse toward special work which developed in missions of the various general church societies. In 1865 the China Inland Mission marked almost an epoch in missionary enthusiasm, and in 1872 was formed the East London Institute, since reorganized with some others as the Regions Beyond Missionary Union. The same development occurred in Europe; and Germany, Holland, Denmark, Norway, Sweden, Switzerland and France joined the ranks of Christian missions. (See articles on these countries for details.)

It is to be noted, however, that the activity of the Church was by no means confined to what may be called its regular organizations. Innumerable associate movements were started. There were missions to the Jews, missions for seamen, missions in aid of special branches of work or fields of labor, medical missions, missions for lepers, to the blind, for recovered slaves, a Turkish Mission Aid Society, an Association in Aid of Moravian Missions, organizations for the conduct of schools, orphanages, asylums of one kind and another. The mere catalogue of the societies of the Regions Beyond Missionary Union would outrun the limits of this article.

Three movements, however, have been so prominent and so extended as to call for special attention: 1. Work for women by women; 2. Work for young people by young people; 3. Work independent of the regular organizations, based upon a belief or feeling that there was too much of machinery in them.

1. Women's Work for Women: The first distinctively woman's society was formed in 1825, in England, for promoting education in the West Indies. Nine years later, in response to an earnest appeal by the Rev. David Abeel, an American missionary in China, the Society for Promoting Female Education in the East was established. The next step was the organization of societies in connection with those already representing the different churches, and there are also independent societies, either for specific departments of work, or for denominations, or for the various general church societies. In the United States women were directly interested in the
work of the Boards, and it was not until 1861 that the Woman's Union Missionary Society was organized, representing six denominations. In 1858 the Congregational Woman's Board connected with the ABCFM was formed, and since then the movement has spread until there is scarcely a denomination that has not some form of organization in which the women of the church combine either for independent work or for assistance to the Board of their own denomination.

The formation of the Deaconess Society was organized for local and home work in 1836, but did not commence foreign work until 1851. A woman's society for Christian Female Education in Eastern countries, in Berlin, dates back to 1822, and a similar society for work in China to 1850, but this covers the list of special organizations of this kind. France and Sweden report women's organizations, but in the other countries of Continental Europe this department of missionary activity has not as yet been developed.

2. Young People's Work: The earlier organizations of young people, including in the term students, clerks, etc., were for the most part distinctly local in character. An exception was found in the different societies of inquiry, and similar organizations in the seminaries and colleges of the United States, which resulted from the one started in Williams College in 1806, and transferred to Andover Seminary. These all had special reference to the study of missions, and the class of the foreign field. The first YMCA was established in America in 1854, following that in London (1844), and almost immediately there developed the idea of confederation. A central committee (1854) brought together the first world's conference (1855). The central committee later became the International Committee, which has grown into one of the largest and most efficient organizations for Christian work in the world. The college department (1876) prepared the way for an Interseminary Missionary Alliance (1880), and the Student Volunteer Movement (1886), which has developed a world-wide influence for serious study of the mission fields of the northern continent include: Alaska: 11 societies, 118 missionaries, 33 stations and outstations. United States: 36 societies, 102 missionaries, 116 stations. West Indies: 36 societies, 444 missionaries, 514 stations. South America: 17 societies, 233 missionaries, 293 stations. Mexico: 21 societies, 210 missionaries, 532 stations. Central America: 11 societies, 102 missionaries, 116 stations. West Indies: 44 societies, 444 missionaries, 814 stations. South America: 35 societies, 672 missionaries, 575 stations.

Important as are these indirect results, they are far less significant than those manifest in the life of the churches.

Of those, perhaps, the most prominent is the organization of mission work. (See also articles on Finances, on Study classes, etc.) There is to-day no more thoroughly organized enterprise in the world than the work of foreign missions, and not a year passes but some detail is perfected in the effort to bring not merely every church, but every member, and even every attendant, into touch with the work that links America and Europe to every part of the world.

To some, these are commitments, officers, branches, and cradle rolls, periodicals, study classes, campaigns, systematic and proportionate giving, cent-a-day mite societies, and so on, savor of too much machinery, yet not a single factor but has come into existence because of some evident need. It was a comparatively recent matter for the Baptist ministers to hand over to William Carey their £13 2s. 6d. It is a very different thing to gather from thousands of churches and hundreds of thousands of individual givers millions of dollars, and to send them in all sorts of currencies by every conceivable means to the farthest corner of the world, and to have record of the use made of every cent. Yet this is but one of the many departments of the home organization.

Turning to other departments of church life, it is noticeable that everywhere the work at home has grown in proportion to the work abroad. Home missions, in their various phases, are the result of foreign missions. This is, of course, a general statement, to which exception may be taken in details, but it remains unquestionably true that the foreign missionary work of the Church has led the way, and marked the path for its activities in very nearly every direction.

Other results are manifest in the number of books, not to speak of periodicals, leaflets, etc., published each year, that have a direct relation to missions, either descriptive of them, or suggested by them, all of which indicate what a hold missions have upon the public interest. The early tract societies were organized to supply, through benevolence, books which the ordinary publisher could not afford to print. To-day the most enterprising publishers are glad to get good books on missions, or by missionaries, on various questions of international importance. Through this and through travel, largely under the lead of missions, the Church has come into a sane and wholesome relation and sympathy with the people it seeks to reach with the Gospel. The word "heathen" is fast following the word "barbarian" into oblivion, not because the sin and evils of heathenism are any less real, but because the individual heathen is coming to be looked upon as a man and not as little more than a beast. (See International Service of Missions.)

Even more marked, however, have been the results of the foreign mission enterprise upon the character and life of the Church at home. The individual Christian has been quickened and lifted into a higher spiritual life by the influence of those who have gone as their representatives to the foreign field. Brainerd, Carey, Judson, Livingstone, Moffat, Selwyn, Paton, Goodell, Hannington, among the pioneers, and prominent in recent years, the noble army of martyrs in China have been a power for individual consecration. The development of such leaders as Henry
Modern Protestant foreign missions, too, is very largely due expansion in the benevolences of the Church. It is not merely that they practically originated organized systematic giving for work outside the local community, but they still lead the way in broadened sympathies that seek to mitigate the horrors of famine and pestilence in all parts of the world.

The one line of growth, however, which is more distinctly the result of foreign missions than any other in this field, is that which abates the rigors of rivalry between different branches of the Church, promoting harmonious and cooperative action. Differences in church organization and government, and even differences in creed, inevitably diminish in importance in the foreign field before the tremendous problem of making men feel the need of Christ and learn the beauty of truth and love. For contact with sincere, unselfish workers breeds mutual respect and fellowship, and walls of partition cannot remain barriers when mutual helpfulness has opened breaches in them. Not that missionaries have been or are disorderly to their own, but they realize the essentials of unity in Christ. (See Comity.)

In fact, wherever we look in the life and activity of the Church, we find the work of foreign missions in its various departments always identified with progress and growth, until the whole Church is becoming what it has been from its inception—an organization for Christian missions, using the term in its broadest sense, to denote the whole enterprise of building up the kingdom of God at home and abroad.

Abroad, the most common representation of the results of mission effort in foreign lands is in the form of tables of statistics. These statistics are found in detail in reports of societies, and an abstract of their essentials will be found in the appendix to this work. Their most important meaning, however, is not always visible to a casual reader.

As at home, so abroad, mission work is thoroughly organized. The mission organization is not a mere aggregation of missionaries and converts—it is a mechanism, sufficiently closely reticulated to give it efficiency, and yet so elastic as to give it unlimited power of adaptation. In this mechanism is now seen a most important result of years of labor. The native church is becoming less a mere company of converts, led by the missionary; more a responsible agency for aggressive work and a center for an independent community, a national life which shall be Christian. (See Church on the Mission Field.)

Another result is that with this broader conception of the purpose and function of missions has come in foreign lands, as at home, the adoption of varying methods, with this significant difference: that, whereas in Christian lands very much of the general training for citizenship is secular, in mission fields it is, for the most part, distinctly Christian. The schools, industrial enterprises, hospitals, asylums, etc., are not merely for the purpose of mental and physical development and the relief of suffering, but for all these purposes, but, in the establishment of the kingdom of God. Other departments of labor are described in detail in other articles, Medical Missions, Education, Literature in the mission field, work for the Blind, for Lepers, and Relief Work in times of calamity. It is significant of the far-reaching and statesmanlike views of the pioneers of missions that searching investigations of modern evangelistic work in the foreign field escaped their notice or failed of their approval. The various phases of work have simply been improved and developed into their proper relations to the general science of missions. There are not to be viewed as a whole. All are but parts of the whole: the wheels, cogs, arms, pulleys, bands of a vast mechanism, which is a result of missions, and which is increasing in power and effectiveness every year.

The efficiency of these various departments of missionary work becomes apparent to the most casual observer on observing any of their lines of influence upon the peoples outside of the Christian community in the mission field. It is not too much to say that the existing educational movement in India, Africa, the Pacific islands, Turkey, India and Japan was initiated and is fostered by Christian missions. The establishment of mission schools has been in some cases the first glimmer gained by the people of such a thing as culture and growth. In other cases where education was neglected in practice, the opening of mission schools has compelled the non-Protestant communities to establish schools of their own rather than let their children be taught by strangers. Even where, as in India, Japan and elsewhere, governments have placed the education on a secular basis, the original impulse, and not a little of the subsequent direction, has been provided by missionaries. It is impossible to measure the results in this direction of the labors of Verbeck of Japan, Miller of India, Hamlin of Turkey, or Stewart of South Africa.

It is another inestimable result of missions that to-day scarcely a people in the wide world has not either in its own vernacular or in some kindred dialect a portion, at least, of the Bible. The Bible has led the way for other Christian literature, and books, papers and leaflets have been scattered broadly where Christian teachers could not go. To do such a work, missionaries have reduced to written and grammatical form the illiterate tongues, and have mastered the languages which were long lost to the world. The first glimmer gained by the people of such a thing as culture and growth. In other cases where education was neglected in practice, the opening of mission schools has compelled the non-Protestant communities to establish schools of their own rather than let their children be taught by strangers. Even where, as in India, Japan and elsewhere, governments have placed the education on a secular basis, the original impulse, and not a little of the subsequent direction, has been provided by missionaries. It is impossible to measure the results in this direction of the labors of Verbeck of Japan, Miller of India, Hamlin of Turkey, or Stewart of South Africa.

As at home, so in intellectual life outside of the schools. Islam, Buddhism, Hinduism have been stirred to their depths and compelled to meet treatise with treatise. The intellectual seething of modern times in Asia is to be traced directly to the influence of Christian missions.

Another result of missions is their general influence for genuine spiritual life in the surrounding communities. Church rolls and community lists do not include all those who are truly Christians. Especially is this true in lands like the Levant, South America, Mexico, and Spain. The original purpose there was not so much to organize a Protestant church, as to assist those in the Oriental and Roman Catholic Churches to a more spiritual life. This first plan proved impracticable, owing chiefly to the hierarchies, who resisted the growth of individual and independent thought. But in all these lands, and in each
church, there has been, in consequence of the missions, a growth in spiritual life which gives good hope for the future. In the Oriental churches of the Levant there is found to-day much genuine Christian preaching, teaching and living. The same thing is true, in some degree, in countries where Protestant missions have been estab- lished among Roman Catholics. Not merely do many laymen of the Roman Church, but many in the priesthood, accept the essence of evangelical teaching, and are grateful for the influence it has exercised for a higher spiritual life; but they remain in their own communion, that they may use their best endeavors to spread the same truth there. The same thing is undoubtedly true, tho in a less degree, in non-Christian communities. There are not a few Muslims, Hindus, Buddhists and others who at heart accept the Christian faith and seek to live its life, but for one reason or another do not make public profession. It is not well to judge such too harshly, as lacking in courage. It is difficult for us to realize what it means, not merely to themselves, but to those they love and who are dependent upon them, to break openly with their ancient religious ideas and to adhere to a matter-of-fact religion extant among the people extending back to the earliest periods of history.

The existence of such intellectually convinced men in the ranks of Hinduism and Mohammedanism recalls to mind the vast numbers of others who have partly adopted Christian ideas. In Hindustan the Brahma Somaj, the Arya Somaj and other groups who are trying to adapt Christian ideas to their conceptions of what their own religion ought to teach, or who have adopted the doctrine of one only God and are seeking to make their ancient religious writings support the teachings of monotheism, point to another result of missions. In Mohammedanism the doctrines of the Babis and of the liberal Muslim party in India, which proposes to modify Mohammedan worship, ritual, fasts, etc., so as to "agree with the modern civilisation," point to the same result. The long years of missionary effort have brought us at last to some of the identical fruits of Christian teaching which result of the teaching of the Gospel must ever be the same. The long years of missionary effort have brought us at last to some of the identical fruits of Christian teaching which result of the teaching of the Gospel must ever be the same.
received Africaner with great kindness, and expressed his pleasure at seeing one who had been the "sorcerer of the country quarter." In another of the border colonies." He was also much struck with this result of missionary enterprise. The colonists, too, were much astonished at Africaner's mild demeanor and his knowledge of the Scriptures. In 1821 Moffat, having married, commenced a mission at Kuruman, where for many years he labored, preaching and teaching, without seeing the people converted. In 1829 he visited the Matabele tribes living south of the Zambesi. Although politically Mohammedanism has always tended toward despotism, there is running through it all a democratic spirit which recognizes the brotherhood of man, and which places all believers on a common level. Its doctrinal code is lofty and pure as contrasted with all extra-Biblical religions, being based on the Biblical standards. The ethical theory, too, is often put into practice with quite as much success as is found in many degraded forms of Judaism and Christianity. It develops strong individuality, and yet binds the faithful together as few religions have been able to do effectively. In the earliest days Islam was a political as well as a religious unit. In the days of the Prophet, when he fashioned the nation into an engine for conquest, Islam was a success for centuries; but under the new conditions, when nations are being more and more fashioned on the industrial principle, it can never succeed politically. Muslim powers are steadily weakening as civilization advances. In the endeavor to imitate the vitality of the progressing nations, Muslim rulers have been driven to poverty. The same is true of the idea of making Muslims a chosen people, and of the further idea of the

and peace for over a thousand years, and to-day controls the religious life of two hundred million believers. It has a common religious language (Arabic), which is rich and expressive and which is the medium of a literature of wide range and enduring power. It is the language of commerce throughout two-thirds of the continent of Africa, and is preparing the way for the extension of a Muslim civilization which is nothing less than the return of a Muslim civilization which is nothing less than the reappearance of the faith of Islam which easily adapts itself to its environment wherever it has gone. The ethical theory, too, is often put into practice with quite as much success as is found in many degraded forms of Judaism and Christianity. It develops strong individuality, and yet binds the faithful together as few religions have been able to do effectively. In the earliest days Islam was a political as well as a religious unit. In the days of the Prophet, when he fashioned the nation into an engine for conquest, Islam was a success for centuries; but under the new conditions, when nations are being more and more fashioned on the industrial principle, it can never succeed politically. Muslim powers are steadily weakening as civilization advances. In the endeavor to imitate the vitality of the progressing nations, Muslim rulers have been driven to poverty. The same is true of the idea of making Muslims a chosen people, and of the further idea of the
relation of conqueror to conquered as the ideal relation between God's chosen people and all other nations. The Jewish expectancy of a Messiah in the last days made it reasonable that Mohammed should claim to be the successor of Jesus who failed, and to prove by his triumphs that he himself was the prophet foretold from the beginning. In short, the genius of Mohammed coined the precious and other metals at his hand and set up his own image and superscription upon the mixed remains.

In 627 a. d. Mohammed sent from Medina the following letter to Heraclius, Emperor at Constantinople. It was his first strictly foreign missionary effort:

In the name of God the Compassionate, the Merciful. Mohammed, who is the servant of God, and in His apostle, to Heraclius, the Qaiser of Rum; peace be on whoever has gone on the straight road. After this I say, verily, I call you to Islam (submission to God). Embrace Islam, and God will reward you twofold. If you turn away from the offer of Islam then on you be the sins of your forefathers. O people of the Book, come toward a creed which is fit both for us and for you. It is this—to worship none but God, not to associate any with God, nor to worship others besides God. O ye people of the Book, if ye refuse, beware! But we shall acknowledge, and our religion is Islam [Arab].

MOHAMMED, The Apostle of God.

This letter reveals the thought in the mind of any Muslim sovereign to-day as he looks over into the Christian lands of wealth and power. It is not unlike the letter sent by the Mahdi of Khartum to Emin Pasha. It is a thought of peace—an offer of peace—on condition of submission, or adoption of Islam. This letter's thought is coupled with a grim suggestion to beware of Islam's sword, which those understand who have felt its edge.

Happily in this day none but the isolated fanatics of Africa are ignorant enough to imagine an expedition to indulge in such language toward Christian governments.

Mohammed's admissions respecting Jesus as the "Word of God" and in regard to the Scriptures in the hands of the Jews and Christians form the open door for the intolerant theologian. Our two hundred thousand, 000,000 vocabulary of Islam that we do "worship none but God," and that we do not "associate any with God" nor "call others God." It was a misconception from the first (natural enough when we consider the prejudice of Islam), and it is a misconception emphasized by a thousand years of contact with half idolatrous Christian sects in a state of decadence. The problem before the Christian Church is to take away this misconception, to present the Gospel in its simplicity and to lead this great unitarian disaffection back to the truth. The doctrine of the Trinity is vitally involved, and the Arian controversy must be fought all over again.

Recent controversy over the usefulness and power of Islam has called attention away from the truth. Islam can never be won over to Christianity by a series of wholesale demolitions, nor by a weak yielding of the vital facts of a true faith. The truths contained in the Koran should be readily acknowledged, since they are derived from the Bible; but it must be understood by way of caution that truths may be so connected that the result may be a great falsehood. Good bricks may be used in putting together useless structures. Islam has happily been characterized as a broken "cistern"—so badly broken that it must be all torn down, and many new bricks added before it may hold water; but it is a cistern still. There cannot be a question but that Mohammed and his early followers looked upon the Abyssinian Christians as their religious neighbors and kinmen. From the first that peculiar relationship between them must be regarded, also, on the Christian side. Dean Stailey calls special attention to this when he says: "Springing out of the same Oriental soil and climate, if not out of the bosom of the Oriental church itself, in part under its influence, in part by way of reaction against it, Mohammedanism may be regarded as an eccentric heretical form of Eastern Christianity. This, in fact, was the ancient mode of regarding Mohammed. He was considered not in the light of the founder of a new religion, but rather as one of the chief heresiarchs of the church." Dollinger agrees with this, and says: "Islam must be considered at bottom a Christian heresy, the bastard offspring of a Christian father and a Jewish mother, and is indeed more closely allied to Christianity than Manicheism, which is reckoned a Christian sect." Ewald calls it "the last and most powerful offshoot of Gnosticism." John of Damascus, who did his work early in the 8th century, at the very seat of the Ommeiad dynasty, did not consider Islam a new religion, but only a Christian heresy.

The same was true of Samonas of Gaza, Bartholomew of Edessa, Peter, Abbot of Clugny, Thomas Aquinas, Savonarola, and most of the medieval writers. Radulfus de Columna, who wrote about 1300 A. D., says: "The tyranny of Mohammed provokes a revolt of the Eastern nations. They could not be reduced, because the Greeks at the same time began to disobe the Roman Pontiff, receding, like Jeroboam, from the true faith. Others among these schismatics (apparently with the view of strengthening their political revolt) carried this heresy further, and founded Mohammedanism." The very errors in this statement are instructive. Dante consigned Mohammed to the company of heresiarchs in the "Inferno." Turning to the early Protestant confessions we find similar statements that regard Mohammedanism as a mere offshoot from the Church. The Augsburg Confession condemns as heresies Manicheism, Valentinianism, Arianism, Eunomianism, Mohammedanism, and all similar to these.

The second Helvetic confesiion condemns Jews, Mohammedans, and all those heresies teaching that the Son and the Spirit are not God.

Doubtless there has been a tendency to carry this idea of the identity between Islam and Christianity too far, and we are in a reactionary period just now. But without a certain sympathy and an open acknowledgment of the truth in Mohammedanism, the missionary can never hope to win Muslims. When once the principles of higher criticism are understood in the Mohammedan world, Mohammed's admissions respecting Jesus as the Word of God and in regard to the Scriptures in the hands of the Jews and Christians will be acknowledged, since they are derived from the Bible; but it must be understood by way of caution that truths may be so connected that the result may be a great falsehood. Good bricks may be used in putting together useless structures. Islam has happily been characterized as a broken "cistern"—so badly broken that it must be all torn down, and many new bricks added before it may hold water;
Mohammedanism

by making belief in Mohammed a condition absolute of the brotherhood of man. For its permanent object it holds up the supplanting of Judaism and Christianity; justifying the most extreme views on this point by claiming divine appointment and obligation to extinguate all other religions, if need be by force, that it may alone be in the world. In its view fanaticism is an essential ground of divine apprehension, whereas Christianity can have its own way, not only is it death for a Muslim to accept Christianity, but for a Christian to present a Muslim proofs of the true nature of the Koran. It is death for a Christian even to set foot on the sacred soil of Mecca.

II. Pre-Islamic Arabia: Arabia, cut off from the rest of the world by deserts and seas, unconquered by Assyrian, Babylonian, Persian, Egyptian, Greek, or Roman, was the last place to which a prophet would have looked for the rise of such a phenomenon as Islam. It was not always thus isolated, for the latest research gives evidence of a very ancient civilization, which was the connecting link between Egypt and Babylon in the earliest periods. But up to the time of Mohammed the Arabs had remained free. The peninsula, together with adjacent regions inhabited by Arabs, covered about 800,000 square miles, or an area as large as the United States east of the Mississippi River. The early centuries its inhabitants probably averaged from 9,000,000 to 10,000,000 people, divided up into tribes, some of which were nomadic, while the large majority were settled. The southern portion of the peninsula was well cultivated, and furnished many valuable articles of commerce. Cathedral at Sana, whereupon Abraha set out on an expedition, about 570, to destroy the Kaaba. His army was destroyed, and the episode has come down in Mohammedan story as the affair of "The Elephant." Mohammed was born a few months after. By the aid of the Persians the Abyssinians were finally expelled in 603, and Southern Arabia became thereafter loosely dependent upon that eastern rival of the Byzantine empire, until it was absorbed, in 634, by Muslim conquest.

Along the Persian frontier was another considerable political power—the kingdom of Hira, founded in the 2d century of our era, and having political autonomy until the spread of Islam. It looked to Persia for help in its various wars, and tended more and more toward a dependent condition. Along the Syrian border, and more or less under Byzantine influence, was the kingdom of the Ghassanides, which early came under the influence of the Western civilization. Christianity had a strong following in this region from the first, and the whole kingdom was under Christian influence. The kingdom of the Kindi, in Central Arabia, was another political unit, but much weaker than the other three. At Mecca we find the powerful Koreish tribe, which had control of the Kaaba, the religious center of native Arabian religion.

The religion of Pre-Islamic Arabia may be called heathen, with constant tendencies in the
noble minds toward a conception of one supreme God. Mohammed speaks of the era before him as "the times of ignorance," which he came to do away with. At the Kaaba there were said to have been three hundred and sixty-five images of the gods, who were looked upon as the children of Allah, the creator of all worlds. These were all cast out, and the Kaaba was made up of a large part of religious life and worship. There was a considerable stir of literary life, and renowned poets contested at the annual fairs for preeminence. The successful poems were displayed on the walls of the Kaaba. These poems, some of which have come down to us, show the lowest grade of morals. Drunkenness, gambling, gross love intrigues, vengeance, theft, the lowest possible family ties, the degrading of woman to a mere animal existence—all these things run through the Koran, bare proof of the utter inadequacy of the prevailing faith to elevate the life. Add to this the widespread tendency toward atheism and indifference.

Such a state could not last long. Serious minds turned in every direction for help. There arose a movement for the return to the simple faith of Abraham, whom they styled the first Hanif. They proclaimed themselves as seekers after truth, and adopted the life which had been set before them for centuries by Christian hermits, whose rigid vigilance impressed the Oriental mind. Among these Hanifs were Obeidullah, own cousin of Mohammed; Waraqah and Othman, cousins of Khadijah, all three of whom found their way to Christianity. Zaid ibn Amr, an aged Hanif, was seen leaning against the Kaaba, and sadly stretching his hands upward, and praying: "O God, if I knew what form of worship is most pleasing to Thee, so would I serve Thee; but I know it not." Mohammed was touched when this was reported to him, and said: "It will pass away until it finds a home; in the religion he, too, will be a community." It cannot be said that these Hanifs were Jews or Christians, yet they could not have arisen without these two religions as forerunners. They anticipated the central idea contained in the word "Islam" (resignation), and their conception of God was summed up in the word "Judgment." We shall see later how Mohammed became a Hanif, and gave shape, proportion and continuity to a half faith which was floating about for centuries, and how he originated a church polity in closest union with a political organization, the combination of which was destined to make him the moral ruler over more human beings than have ever been controlled by any other man.

The question of Christianity in Arabia is very obscure. Christians fled for refuge from the Roman persecutions to the fastnesses of the Syrian desert in the early days of Christianity. Paul himself spent three years among Arabs, whether on the Sinaitic peninsula or along the border of the desert south of Damascus. A local church council at Bostra shows a large growth of Christianity east of the Jordan before the close of the 3d century. The Ghassanides were first reached, and bishops were appointed to follow the wandering tribes in their migrations. The faith penetrated the desert south and east along caravan routes, and we may be sure that by the middle of the 3d century Christianity was well known in many parts of Arabia. We have seen how the Himyarites were reached before the success of the Persians. Here, too, was a battle ground between the Persian frontier, about the same time, learned of Christianity through Nestorian missionaries. A king of Hira was converted in the 6th century. Other tribes, such as the Beni Taghib of Meccanistan, the Beni Haris of Najran, the Beni Taym, and various other tribes, were nominally Christian. Ali Saad sneeringly said: "The Beni Taghib are not Christians; they have borrowed from Christianity only the custom of drinking wine." In the first was between the Persians and the rising Muslim power the Christian Arabs of the northeastern frontier joined the Persians. But in spite of this spread of Christian knowledge throughout the peninsula, it did not seem to take a vital hold. It was swept away at the first onset of Islam, the simple faith of Abraham, whom they styled the "Virgin Mary."
be planted; here was a wide field, already conceded by the inquirer, at least in close connection with the truth, inviting scrutiny and improvement. . . . material for a great change was here. But it required to be wrought, and Mohammed was the workman.”

Jews had made their homes in the Arabian peninsula in the earliest times. From the days of Solomon the Red Sea was the avenue of a thousand commerce, and Medina had probably located at the trading ports. Later the conquests of Palestine by Assyrians, Babylonians, Persians, Egyptians, Greeks and Romans had sent waves of Jewish immigration into the desert. The fall of Jerusalem and the rebellion of Bar Cochab had driven thousands of Jews in the footsteps of their brethren. A number of native Arab tribes embraced Judaism, and in the time of Mohammed we find this people scattered all over the peninsula, in small, compact colonies. There were a large number of colonies near Medina, and their teachers Mohammed drew much of the material found in the Koran. At first he hoped to win them to Islam, and contemplated making Jerusalem the Kibla. Their obduracy changed his temper, and in the conflicts that ensued thousands died, were butchered, and most of the others submitted to Islam. Communities of Jews are still to be found in Southern Arabia who have clung to their faith all these centuries.

III. The Life of Mohammed: into this world of conflicting dogmas Mohammed was born in the year 570, at Mecca. This city, situated on the caravan route between Yemen and Syria, had for centuries been famous for the Kaaba, which contained the sacred Black Stone and formed the religious center of the Arabian peninsula. The leading tribe had for years been the Koreish, and Mohammed sprang from the Beni Hashim, a noble the somewhat waning branch of this tribe. His father's name was Abdallah. Returning from a mercantile trip to Syria, Abdallah was taken sick at Medina, and died some months before the birth of Mohammed. His mother, Amina, according to the prevailing custom, put the infant out to nurse with Hallima, a woman of the Beni Sad, one of the Bedawin tribes, where he remained four or five years, acquiring the free manners and the pure tongue of the nomads. His name was brought, and most of the others submitted to Islam. Mohammed was the workman. From the days of Solomon the Red Sea was the avenue of a thousand commerce, and Medina had probably located at the trading ports. Later the conquests of Palestine by Assyrians, Babylonians, Persians, Egyptians, Greeks and Romans had sent waves of Jewish immigration into the desert. A number of native Arab tribes embraced Judaism, and in the time of Mohammed we find this people scattered all over the peninsula, in small, compact colonies. There were a large number of colonies near Medina, and their teachers Mohammed drew much of the material found in the Koran. At first he hoped to win them to Islam, and contemplated making Jerusalem the Kibla. Their obduracy changed his temper, and in the conflicts that ensued thousands died, were butchered, and most of the others submitted to Islam. Communities of Jews are still to be found in Southern Arabia who have clung to their faith all these centuries.

The Arabian tribe of the Koreish, who had for centuries been the ruling family of Mecca, for several years was the object of severe persecution from the Meccans, who had been converted to Judaism. In the year 610, however, Mohammed, who had been brought up in the religion of his mother, Amina, and who had been taught the stricter teachings of the Jewish faith by a Jewess named Khadija, came to believe that he was called to be the reformation of the Arabian people. He began to preach the doctrine of one God, and to warn his fellow Arabs against the idolatry of the Kaaba, which contained the sacred Black Stone. Mohammed was now about thirty years of age, and he was the first of the converts to be made. Khadija, who was the wife of a rich merchant, was greatly pleased with the young man, and she became his wife. She bore him four daughters and two sons. Both sons died. The youngest daughter, Fatima, married Ali, and this became the ancestress of all the Muslim nobility.

When approaching his fortieth year Mohammed began to retire from his family for the purpose of meditation. The gross idolatry of Arabia oppressed his mind. He was aroused but not satisfied by his slight knowledge of Judaism and Christianity. For days at a time he would continue in a lonely cave, on Mount Hira, Ecstatic reveries accompanied his meditations, and he finally came to believe himself called to be the reformation of his people. After a period of silence known as the Idrab, these revelations continued with more or less frequency till the end of his life.

Khadjiya was his first convert. The first three years of his preaching resulted in the conversion of some forty of his relatives and friends, among whom were Ali, Zaid, Abu Bekr, and Othman. His teaching against idolatry developed fierce opposition, in which Mohammed was safe under the protection of Abu Talib, but others suffered persecution, and in 615 eleven men fled to Abyssinia. In 620 Abu Talib and Khadija died. Mohammed afterward married other wives, one of whom survived him. Proceeding to Taif, he was unsuccessful in his appeal to the people there, but returned strengthened by a dream of a journey to heaven. In 621 his cause was greatly advanced by the addition of twelve pilgrims the following year, and he was increased to seventy, who were pledged to receive and defend the prophet in Medina. Mohammed was now about forty years of age. He had 150 followers in little bands fled to Medina. This date marks the era of the Hegira (migration), 622.

At Medina Mohammed built a mosque, instituted rites of worship, and declared war against unbelievers. The Jews rejecting his claims, he became their bitter foe. In 623 the battle of Badr resulted in a signal victory for the Muslims over the Meccans. A year later he was defeated at the battle of Uhud, but returned strengthened by a dream of a journey to heaven. In 624 his cause was greatly advanced by the addition of twelve pilgrims the following year, and he was increased to seventy, who were pledged to receive and defend the prophet in Medina. Mohammed was now about forty years of age. He had 150 followers in little bands fled to Medina. This date marks the era of the Hegira (migration), 622.

Mohammed turned the letter and Muta killed the envoy. To revenge this insult Mohammed fought what proved to be a losing battle at Muta, on the Syrian border, where his friend Zaid was beheaded by his order. In the sixth year of the Hegira, Mohammed, with 1,500 followers, made a pilgrimage to Mecca, but was refused admittance. A truce was signed at Hodeibia, near the city, suspending hostilities for ten years, and granting the permission for a pilgrimage the following year. Discontent was alloyed among the Muslim converts by an expedition against the Jews of Khaimir, yielding rich booty.

His plans now widened, and the same year he sent written demands to the Persian king, Chosroes II., Emperor Heraclius, the Governor of Egypt, the Abyssinian king, and several Arab tribes.

Chosroes tore up the letter and Muta killed the envoy. To revenge this insult Mohammed fought what proved to be a losing battle at Muta, on the Syrian border, where his friend Zaid was killed. A breach of the truce at this time by the Koreish gave grounds for attack, and Mohammed at the head of 10,000 men entered Mecca in triumph in 630.

In the course of that year Talib submitted, and this ended opposition in the peninsula. In 632 Mohammed with his wives and 40,000 adherents performed the “Farewell Pilgrimage” to Mecca. The rites of this pilgrimage are still scrupulously followed. Three months later Mohammed fell sick and died in the house of his favorite wife,
Ayasha, after having liberated his slaves and distributed alms to the poor. He was buried in the room where he died, which is now included within the Great Mosque.

The person of Mohammed was attractive. Tho little above the ordinary height, his presence was stately and commanding. His expression was always pensive and contemplative. His eyes and hair were black, and a beard reached to his breast. His gait was quick, and is said to have resembled a man descending a hill.

As to his character, up to the end of his life in Mecca his sincerity cannot be doubted, and his conduct seems beyond reproach. He believed himself to be the divinely appointed messenger for the overturning of idolatry, and he suffered for years the taunts of a nation with apparently no inferior move but the reformation of his people. Secular history can furnish no more striking example of moral courage than Mohammed bearing patiently the scorn and insults of the Koreish. From the beginning of life in Medina temporal power and the acquisition of wealth and glory went with the Prophet’s mission. Cruelty, greed, and gross licentiousness were justified by special “revelations.” His conduct during the last ten years of his life seems to bear out this estimate of his character, “that he was devoted to the Judicial blindness of a self-deceived heart.”

IV. The Koran: Like Christianity, Islam centers about a book. This book is the Koran (“reading” or “that which is to be read”). The Koran is the foundation of Islam. The orthodox believe that the original text exists in the highest heaven and that it is inscribed in the Koran, which is the sacred book of Islam. The Koran consists of two parts: the first contains the recitation of the Koran as it was revealed, and the second contains the collection of the hadiths, or traditions of the Prophet. The first part is divided into 60 chapters, called suras, each of which is further divided into verses. The suras are arranged in order of length, with the longest chapters first.

The Koran was revealed over a period of 23 years, from 610 to 632. It was revealed in instalments, and the Prophet himself did not write anything down. The first verse of the Koran is “Bismillah,” which means “In the name of God.”

The Koran contains 286 suras, each of which is further divided into verses. The suras are arranged in order of length, with the longest chapters first. The first part of the Koran contains the revelations of the Prophet’s early life, while the second part contains the revelations of his later years.

measured as the Prophet of God he cannot be accepted by God. The believer is bound to do good works, as it is to say, to observe the ordinances with strict fidelity. Large portions of the Koran deal with the narratives of the Jewish and Christian Scriptures, showing that Mohammed had come in contact with the corrupt forms of those religious traditions. The Old Testament characters, especially the Patriarchs and Prophets, and Our Lord Himself, are regarded with the greatest reverence. The narratives given in the Koran are drawn from the Talmudic traditions, which Mohammed perhaps supposed to be the O. T. Scripture, and from the Christian apocryphal Gospels. It is often said that the Koran is the most widely-read book in existence. In one sense this is true, since the mere reading of the book, without understanding, is commonly held to exert a magical influence for good. But it should be remembered that the Koran is not understood by readers outside of Arabia (even where Arabic is vernacular), excepting in the limited circle of well educated men.

**V. The Hadith, or Traditions:** The Koran prescribes an ethical code which is obligatory on Muslims, since all regard it as the only revelation of the Divine will. But along with the Koran, Mohammedians receive well-authenticated sayings of the Prophet as authoritative comments on religious, ethical and ceremonial subjects. These traditions are in fact considered as inspired sayings, handed down by men liable to error. They inform us not only what Mohammed said and did, but what he allowed others to say and do unrebutted. Mohammed was much afraid that he would be misrepresented, and commanded his adherents as follows: "Convey to other persons none of my words except those ye know of a surety. Verily he who represents my words wrongly shall find a place for himself in the fire." How poorly this injunction was followed is evident from the fact that Abu Daud received only 4,800 traditions out of 500,000. Thuc appears why there is such a diversity of opinion among Mohammedians. Various canons of criticism have been laid down by learned Mohammedians, with which the sayings may be sifted—such as the integrity of the persons transmitting the saying, the number of links in the chain of narrators, the style of composition, etc. The first attempts to collect these traditions were made in the 8th century. The work of Imam Malik is held in the greatest esteem. The six standard collections (out of 1,465 in all) are (1) Mohammed ibn Ishaq, A.H. 256; (2) Muslim ibn Ul Hajjaj, A.H. 261; (3) Abu 'Isa Mohammed-at-Tirmizi, A.H. 275; (4) Abu Da'ud bin-Sijistan, A.H. 275; (5) Abu 'Abdi'r-Rahman ibn Masun, A.H. 303; and (6) Abu 'Abdi'l-lah ibn Majah, A.H. 275.

All the Muslim sects receive the traditions sniffing as disagreeing as to number and their content. The following are a few characteristics of Mohammedians: "I am no more than a man, but when I enjoined anything respecting religion, receive it, and when I order anything about the affairs of the world, then I am nothing more than a man."—"I have left you two things, and you will not stay as you hold them fast. The one is the book of God, and the other is the example (Sunna) of his prophet."—"Some of my injunctions abrogate others."—"My sayings do not abrogate the Word of God, but the Word of God can abrogate my sayings."

The following is a specimen of the way a tradition was handed down in the collection of Abu Da'ud:

"Abu Kurab said to us that Ibrahim ibn Yasaif ibn Abi Ishaq said to us from his father, from Abi Ishaq from Tulata ibn Musafir, that he said, I have heard from Abu'di'r-Rahman ibn Ausaia that he said I have from Bara ibn Azib that he said I have heard that the prophet said, 'Whoever shall give in charity a milch-cow, or silver, or a leathern bottle of water it shall be equal to the freeing of a slave.'"

**VI. Muslim Worship:** The forms of worship have so much importance in Islam, both as a means of acquiring merit before God and as shaping the religious ideas of the Muslim, that it may be well to illustrate what this worship is. Five times a day every Mohammedian man or woman must recite the prescribed litany in Arabic in a specified manner. Each of the five services or exercises consists of a certain number of "rounds" or repetitions of the same service, differing from each other in the number of "rounds" rather than in variety of the words used. The example here given is the service of morning worship, either in the congregation at mosque or alone in the house.

We condense the directions from one of the books of instruction in use among the Sunnite Mohammedians:

**The morning worship consists of four rounds (rakat), two of which are obligatory and two are of usage (following the custom of Mohammedi).**

The worshipper, having performed ablution, stands facing in the direction of Mecca.

1. He must declare his purpose (insubibly), saying, I purpose to perform the first obligatory (or usage) round of morning worship.
2. He then lifts both hands, palm to the front, until the thumbs touch the lobes of the ears; then he says, "God is most great!"
3. Folding the hands across the stomach, the right hand over and clasping the left, he says, "Glory to God! Praised be the name of God, the Everliving, the Most Sublime! He begetteth not, nor is He begotten, and there is none like unto Him."
4. The worshipper now says "Glory to the Lord on High!", and, placing his hands upon his knees, taking care to keep the line of his head and back upright.
5. Remaining in that position he says: "Praise God the Lord, the Great One," three times. (If he is able to say it five or seven times the merit is greater.)
6. Saying "May God attend unto his praise," the worshipper regains the upright position.
7. He now drops upon his knees, sitting upon his heels, and, then, saying, "God is most great!" he touches his forehead to the ground; one hand being on each side of his head, palm downward upon the ground.
8. In this prostrate position the worshipper says three times, "Glory to the Lord on High!"
9. Saying "God is most great!" he recovers position on his knees.
10. Saying "God is most great!" he touches his forehead to the ground again.
11. In this prostrate position he repeats three times, "Glory to the Lord on High!"
12. Saying, "God is most great!" the worshipper now recovers position upon his knees again.

This completes one round of worship, and the worshipper rises to his feet and begins the second round, which consists of a repetition of the first.

After the four rounds are completed, and indeed at the end of every service, no matter of how many rounds the worshipper, standing and repeating, "Glory to God," thirty-three times, and, "Praise be to God," thirty-three times, and, "God is most great," thirty-three times. He
may then, if he chooses, abandon the Arabic language, and in his own tongue, as best he knows how, he may ask of God anything that his heart desires. In such cases, the service is (whether morning, noon, mid-afternoon, sunset, or evening) must be definitely expressed at the beginning, as well as whether the round is to be obligatory or of usage. If the worshiper does not do this, his worship is no worship. Whatever the service is, whether a particular posture or any particular "round" of worship must be exactly said. If too much or too little is said, the worship is defective. In such cases the "round" must be done over from the beginning, or a special form for the correction of defects must be gone through.

It is hardly necessary to remark that these rules of worship go for much in that severance of religion from morals which one sometimes notices in Mohammedans. The effect of fixing the litany in the Arabic language, which is not understood by a vast number of Muslims, and of having the services of worship consist of a greater or less number of repetitions of the sentences above recorded, is, to settle in the worshiper's mind the idea that religion is an outward act. The result of counting the number of repetitions of the alleviation of the service is that the thought during worship must be exactly said. If too much or too little is said, the worship is defective. In such cases, the service is (whether morning, noon, mid-afternoon, sunset, or evening) must be definitely expressed at the beginning, as well as whether the round is to be obligatory or of usage. If the worshiper does not do this, his worship is no worship. Whatever the service is, whether a particular posture or any particular "round" of worship must be exactly said. If too much or too little is said, the worship is defective. In such cases the "round" must be done over from the beginning, or a special form for the correction of defects must be gone through.

It is hardly necessary to remark that these rules of worship go for much in that severance of religion from morals which one sometimes notices in Mohammedans. The effect of fixing the litany in the Arabic language, which is not understood by a vast number of Muslims, and of having the services of worship consist of a greater or less number of repetitions of the sentences above recorded, is, to settle in the worshiper's mind the idea that religion is an outward act. The result of counting the number of repetitions of these sentences gives to the worshiper who can repeat them to a greater self-complacency than is found among the adherents of any other religion.

VII. Islam and the Bible: Mohammedans profess to regard the Old and New Testament Scriptures as old as the Koran, as the revealed Word of God. Mohammed and his immediate followers seem to have considered the Koran as being in perfect harmony with the Bible. When the antagonism between the two was pointed out somewhat later, the learned Muslim doctors claimed that the current Scriptures had been corrupted since Mohammed's time. They claimed that the Koran was in perfect accord with the original Scriptures to which their prophet had access. The existence of texts of the Testament older than Mohammed's time has seriously weakened that argument. When once Mohammedans are compelled to admit the genuineness and antiquity of these manuscripts, they will be compelled to show reason for the discrepancies.

The Koran was a large part of the Old Testament history in a garbled and legendary form as the from hearsey. Adam, created out of earth, the "chosen one of God," was the first man. Eve, his wife, was created by God from a rib of Adam's left side. Lilith (Satan) tempted them; they fell and were cast out of Paradise. The story of Abel and Cain is embellished with rabbinical additions. Noah, "the Prophet of God," is a prominent person in the Koran, and the narrative of the flood is told with many amusing details. Abraham, "the Friend of God," is mentioned very freely, together with Ishmael and Isaac. The story of the conversion of Abraham is of a high order. "When the night overset the sun, he saw a star and he said, This is my Lord. But when it set he said, I like not those that set. And when he saw the sun rising he said, This is my Lord; but when he set he said, Verily, if my Lord direct me not I shall assuredly be of the erring people. And when he saw the sun rising, he said, This is my Lord. This is greater. But when it set he said, O my people, I am a plain reproof to the world. Verily I turn my face unto Him who hath created the heavens and the earth; following the right religion I am not of the polytheists." The story of his sojourn in Babylon is given elaborately. His journey to Palestine, his dealings with the half-miraculous birth of Isaac, the destruction of the cities of the plain, the attempted sacrifice of Isaac, together with apocryphal incidents, are sedulously set forth. Abraham gives direction to his children to follow the true religion, and is accounted the first "Hanif," the founder of the Muslim faith in its present form. The stories of Isaac, Ishmael, Joseph, the life and bondage of the Hebrews in Egypt, Moses and the wanderings in the desert, Joshua (slightly mentioned), Samuel, Saul, David, Solomon, God, Elijah, Elisha, Isaiah, Jonath, Ezra, are given in a prolix fashion. Turning to the New Testament we find mention of Zacharias, with John the Baptist, his son, and Gabriel. There is no evidence in the Koran that Mohammed ever saw a copy of the New Testament but he constantly mentions it as the "Injil which was given to Jesus." The Koran says (lvi. 27): "We caused our Apostles to follow in their (i.e., Noah's and Abraham's) footsteps, and We caused Jesus the son of Mary to follow them, and We gave him the Injil, and We put into the hearts of those who followed him kindness and compassion, but as to the monastic life, they invented it themselves." Again (iii. 2): "He has sent thee a book (Koran) confirming what was sent before it, and has revealed the Law and the Gospel before, for the guidance of men." (See also vii. 156; iii. 43; iii. 58; xliv. 29; ix. 112; v. 50, 51, 70, 72, and 110; xix. 31.)

Very full statements are made concerning Jesus Christ. He is called Jesus (i.e., Jesus the Son of Mary, the Messiah, the Word of God, the Word of Truth, a Spirit from God, the Messenger of God, the Servant of God, the Prophet of God and illustrious in this world and the next. Mohammed taught that Jesus was miraculously born of the Virgin Mary, a part of Godhead, the baptism of John, and the resurrection of his body 43; xix. 16-21), who was the sister of Aaron. The infant vindicated the chastity of her mother miraculously by speaking in its cradle (xix. 22-34; xxiii. 52). Jesus performed miracles in his youth (Apocryphal Gospels) and in his maturity (iii. 44-46; x. 112-116). He was commissioned as a Prophet of God to confirm the Law and reveal the Gospel (lvi. 26, 27; v. 50, 51; ii. 81, 254; lxi. 6; vi. 85; iv. 157; iii. 44). The Koran affirms that Jesus did not die, but ascended to heaven miraculously, and another victim was, unknowingly to the Roman soldiers, substituted for Jesus on the cross (iii. 47-50; xv. 155, 156). After he left the earth his disciples disputed as to whether he was a prophet, like Moses or Isaiah, or a part of the Godhead, making up the Trinity, "The Father, the Mother, and the Son." (xix. 35, 36; iii. 51; 52; xlix. 57-65; ix. 30; iii. 72, 73; v. 19; v. 76-79; iv. 169; v. 116, 117). The Traditions teach that Jesus will come a second time, and that he will be the Judge at the last great day, and that even Mohammed will be judged by him. It is claimed that he predicted one that should
Mohammedanism

THE ENCYCLOPEDIA OF MISSIONS

492

come after him who should carry out his mission, and Muslim theologians affirm that Mohammed was 'Swat ped' (i.e., the whole of the Arabian peninsula had embraced Islam), the "Praised," to adapt his name to the title used by Christ which Muslims claim had been perverted from "Paraclete" to "Paracletos," because the former, meaning "the Praised," clearly designates Mohammed ("The Praised").

Sir William Muir says: "After a careful and repeated examination of the whole Koran I have been able to discover no grounds for believing that Mohammed himself ever expressed the smallest doubt at any period of his life in regard either to the authority or the genuineness of the Old and New Testaments as extant at the time. He was profuse in his assurances that his system entirely corresponded with both, and that he had been foretold by former prophets; and as perverted Jews and Christians were at hand to contradict his words, and as the Bible was little known among the generality of his followers, those assurances were implicitly believed."

VII. Mohammedan Conquests: At the time of Mohammed's death (June 8, 632, in the 11th year of the Hijra) the whole of the Arabian peninsula had embraced Islam, with the exception of a few southern tribes which preferred Moseylema, the "false prophet" of the Najd. The few hours that succeeded the death of Mohammed were critical ones for Islam. Ali, the nephew and son-in-law of the prophet, a young man, and Abu Bekr, the old, stanch follower of Mohammed, and the father of Ayesha, the prophet's favorite wife, were the natural candidates for the leadership. Abu Bekr was at last proclaimed caliph (Khalifa, successor) of the Prophet, a young man, and Abu Bekr, the old, stanch follower of Mohammed, and the father of Ayesha, the prophet's favorite wife, were the natural candidates for the leadership. Abu Bekr was at last proclaimed caliph (Khalifa, successor) of the Prophet. Under Khaled the armies crossed the Syrian frontier, occupied Bosrah, overran the Hauran, defeated the Byzantine army on the plains of Eznadin, and invested Damascus. After a seventy days' siege this capital of Southern Syria fell August 3, 634 (13 A.H.). Sweeping eastward and northward, Khaled defeated a second Byzantine army at Yamook. In the meanwhile Omar succeeded to the caliphate, August 22, 634. Jerusalem was conquered, and all Syria was in the hands of Muslims. In the meantime an army was pushing across the Persian frontier. At the battle of Kadiisya the initial failure of the Arabs was retrieved, Ctesiphon and Susa fell, Mesopotamia was gained, and on the field of Mahavend (641) the Sassanid dynasty of Persia received a death blow. The whole of Persia, Khorasan, Kerman, Meckran, Seistan, and Balkh were conquered and assimilated. The century had not passed before the Oxus was the eastern boundary of the caliph's empire.

In 641 Amr invaded Egypt, which fell with hardy a struggle, the Monophysite Christians threw lot with the Kababs as against the Orthodox Byzantines. Othman succeeded to the caliphate in 644. The armies steadily pushed westward. Libya, Tripoli, Tunis, Algeria, and Morocco fell successively. A Christian civilization made a firm stand on the Iberian peninsula, but in the battle of Utica (698) the power of African Christianity was broken, and Musa rode to his saddle-girths into the Atlantic, and with raised sword took possession of the regions beyond in the name of Islam.

Othman had been assassinated in 656, and Ali, Mohammed's nephew, was at last raised to the caliphate. A rebellion was put down at the battle of the Camel, fought at Basra, November, 656. The murder of Othman aroused the Koreshite faction. Ali's faction was recognized by the Syrian governor, did not recognize Ali as caliph, and Ali saw it was a hopeless task to subdue him. The strength of Ali was in Kufa. The Syrians gained the battle of Siffin by fastening copies of the Koran to their lances (657). Disaffection arose among the caliph's foes. Some caliph's foes were murdered in January, 661, becoming a martyr in the eyes of a large part of the Muslim world, and occasioning that great split in the faith which has ever since divided Shi'i (Ali's faction) from Sunnite (traditionists). Mo'awiya was proclaimed caliph by his soldiers. Muslim Persia proclaimed Hassan, a son of Ali, as caliph; but on being defeated in battle, Hassan retired from the struggle. Hussein, another son of Ali, was not so tractable. The Syrian caliph showed great statesmanship in the management of his empire, which was expanding in every direction. Armenia, Cyprus, Cos, and Crete were conquered, and even Constantinople was invested. Mo'awiya died at Damascus, which he made the capital of the Ommeiad dynasty, of which he was the founder. 680, Othman II., grandson of Hussein, the founder, 680, and was succeeded by his son, Yazid I. This voluptuous caliph ordered the prefect of Medina to strike off the head of Hussein, a son of Ali, if he would not yield. Hussein fled toward Kufa with all his family. The Ommeiad army met him in the plain of Kerbela, near Kufa, and surrounded his little company. Hussein declared himself ready to renounce all pretension to the caliphate, but on October 9, 680 (9th of Moharram, A.H. 61), on his refusal to surrender his person to the enemy, he and all his followers were cut to pieces. The Arabs observe the 10th of Moharram as a day of public mourning. The news of this bloody ending of the son of Ali spread consternation far and wide. Revolts were with difficulty put down. Ali, son of Hussein, wisely refused to put himself at the head of the opposition. Medina was plundered, and Mecca was in a state of siege, when news came of the death of the caliph at Damascus (November 11, 683). Mo'awiya II., Merwan I., Abd al Melik, al Walid, and the other caliphs in the Ommeiad dynasty saw Islam extend in every direction. Tarik crossed the strait, even after called from him Jebel Tarik (Gibraltar), into Spain in 711; Roderick, the last of the Visigothic kings, lost his crown and life in the battle of Xeres; Malaga, Granada, Cordova, Seville, Toledo, Saragossa, Barcelona, and the whole Spanish peninsula, except a few mountain retreats, were rapidly conquered. In 731 Abder-Rahman crossed the Pyrenees and swept up as far as Tours, where his host was defeated by Charles Martel in 732.

In the meanwhile the Ommeiad dynasty at Damascus began to decline. Ibrahim, great-grandson of Abbas, the uncle of the Prophet, of the house of Hashem, put himself at the head of a revolt, which under his son, Abd Allah Abu-Abbas, the "Blood-shedder," was successful. The Ommeiad dynasty gave place to the Abbasid, and the newly built city of Baghdad became the capital of Islam.
The year 750 was the turning-point in Muslim history. There were still further conquests to be made in Central Asia, India, and Central Africa, but the unity of the Muslim world was broken for ever. The Abbassides by 1035, conquered Persia and pushed the Tatars were converted. The Seljuk Turks in the extreme. Saladin put an end to this dynasty in Egypt by Obeidallah, a supposed descendant of Ali and Fatima. Cairo was founded and made the capital. The story of the rule of the fanatical Arab type. Founded in 750, this dynasty existed until 1258. For a hundred years it ran a brilliant career. Baghdad was the resort of learned men from every region. Greek letters and philosophy were cultivated. The story of Islam in India is one of constant revolts, or uninterrupted invasions and steady aggrandizement. There were a large number of independent Mohammedan states when the "Mogul" dynasty (1526-1761) made its appearance. Babar, the Turk, (1482-1530), having gathered headway on the Afghan side of the Indian passes, pushed through in 1526 and conquered right and left, until at his death his empire stretched from the river Amu in Central Asia to the delta of the Ganges. This vast power began to decline as early as 1707. Independent Muslim kingdoms were detached from the main body. The Mahrattas grew in power until they were able to break the "Mogul" Empire into pieces. The English East India Company was already at work in India, backed by the British army. The first governor, Lord Clive, took the helm in 1758. The Company grew until nothing less than a sea power could properly care for the immense territory and the millions under its control. Since 1858 the Mohammedans of India have been directly under English rule. The spread of Islam in China, Australasia and Central Africa cannot here be traced in detail. Having conquered the Mediterranean coast of Africa in the year 698, Mohammedanism pushed up the Nile valley and across the Sahara. Abyssinia alone has been able to withstand the Muslim onsets, and remains like all island in a sea of Islam. The native terminology of the geography of all Northern Africa as far south as the equator is Arabic. Misr (Egypt), Sahara, Sudan, Bahr el Abyad (White Nile), Bahr el Asrak (Blue Nile), Bahr el Ghasel, are specimen names. The Arabic has penetrated south beyond the Zambesi River, as is shown in "Kafir" (Caffre), which means infidel or unbeliever. In Zanzibar and throughout Central Africa the Swahili dialect of the Arabic is the language of commerce. Islam has spread in Africa by three agencies—the sword, commerce, and the mission. south and west to the Mediterranean. They then set up a powerful kingdom in Central Asia Minor, threatening destruction to the Byzantine empire. Their abuse and murder or enslavement of Christian pilgrims at the holy places above Jerusalem excited the Crusades, which held the attention of Europe from 1095 to 1291, and which resulted in checking the power of the Seljuk Turk, but left Syria a prey to discord. A little later the Ottoman Turk appeared, and by 1300 had a footing on the frontier of the Byzantine empire. After absorbing the Seljuk domains and all the Greek territory in Asia, the Ottoman armies entered Europe in 1354; Constantinople fell a century later (1453), and the whole Balkan peninsula was under the conquener. The armies of the sultans pressed northward into Poland and westward as far as Vienna, their footing in Europe not becoming precarious until well on into the 18th century. Islam obtained a firm foothold in India as early as 1000. An attempt to capture Sindh in the 5th century had failed. It was not until the Turk adopted Mohammedanism that Islam made headway. Seventeen invasions and twenty-five years of fighting under the leadership of Mahmut of Ghazni (1001-1030) had reduced only the portions of the Moslem world. Bengal was conquered in 1203. By 1306, as a result of the barbarous conquests of three centuries, there was a powerful Mohammedan rule in Northern India. The story of Islam in India is one of constant revolts, or uninterrupted invasions and steady aggrandisement. There were a large number of independent Mohammedan states when the "Mogul" dynasty (1526-1761) made its appearance. Babar, the Turk, (1482-1530), having gathered headway on the Afghan side of the Indian passes, pushed through in 1526 and conquered right and left, until at his death his empire stretched from the river Amu in Central Asia to the delta of the Ganges. Mohammedanism

**The Extent of Islam To-day:** It is impossible to make accurately the numerical strength of the Mohammedan world. For many years it was reckoned at 160,000,000, but the latest investigation pushes it up nearly to 200,000,000. The following table is drawn from the most recent data:

<table>

Let us examine more in detail the various countries. Rumania, Servia, Montenegro, and Greece have nearly rid themselves of the Turks. Those who remain are scattered about as land-owners and merchants. It is said that they are moving toward Asia Minor slowly, and before long will not be an appreciable part of the population. In Bosnia, Herzegovina, and Bulgaria, over a million Muslims still remain. Turkey in Europe has two million Mohammedans, scattered from the Adriatic to the Bosporus. These are more stationary, altho there is a constant movement toward Asia, as European civilization more and more gives equal civil rights to unbelievers in the Balkan peninsula. It should be remembered, however, that by far the greater number of the Muslims of European Turkey, etc., are not Turks, but natives of the land who accepted Islam. What course they will take is by no means certain.

Mohammedanism in European Russia is largely confined to Southern and Eastern Russia— territory which for centuries has been occupied by "Tatars," etc., who are neither more nor less than Turks of near kin to the Ottomans. There are said to be 20,000,000 muflis, mollas, and other teachers in European Russia. A majority of the population of the Transcaucasus district are Muslims, as might have been expected. As Russia has pushed down toward the Persian and Afghan borders she has taken in more and more tribes of Mohammedans. Professor Arminius Vambery, an intelligent and unprejudiced witness, in writing of these Muslim portions of the Russian Empire, has said:

In the cities of Central Asia, where Islam has taken much firmer root than in the Caucasus or the other parts of the Mohammedan world, there can be no probability of the old and knotty trunk of religious education being soon shaken. On the whole, Islam stands everywhere firm on its feet, nor can Christianity succeed in weakening it. Indeed, when subjected to Christian rule, it seems to become stronger and more stubborn, and to gain in expanse. This we see in India, where, in spite of the zeal of the Christian missionaries and the millions spent in their support, the conversions to Islam become daily more frequent. We see this, too, in Russia, where statistics prove that the number of mosques has considerably increased in the course of this century, and that the heathen among the Ural-Altaic people are more easily converted by the mollah than by the pope.

Bokhara will still long continue to boast of being the brightest spot in Islam, and her colleges will not soon lose their attraction for the studious youth among the Muslims of Inner Asia.

The British Empire is the greatest Mohammedan power in the world, in that it rules over more followers of the Prophet than does any other one sovereignty. The statistics for India are elaborately worked out. The figures given in the table are those for 1901. It is often said that Mohammedanism is making rapid growth. But the census does not bear out this theory. In speaking of the growth of Islam in India, Sir William Hunter says: "Islam is progressing in India neither more quickly nor more slowly than the rest of the population. If you take a hasty view of India and add up totals, you will find that Islam now has a great many more followers than it had ten years ago. But you will find that the whole population has increased." This statement had reference to 1881. The increase of Mohammedans in India during the decade 1891-1901 has been a little less than 9 per cent., which is also about the rate of increase of the population of India as a whole.

The extent of Islam in China must remain conjectural for many years, but it is probable that 30,000,000 of Muslims is a conservative estimate for China.

The wide spread of Mohammedanism in Malaysia is becoming more and more evident. It is spreading among the whole Malay race, and assumes a peculiar type. It established itself in the Malay Peninsula, in the 14th century, and crossed into Sumatra, Java, and adjacent islands in the 15th century, thus anticipating the Portuguese by only a few years. There are large numbers of Malay Muslims on the Malay Peninsula, in the native states, and under the English flag. Sumatra has a population of whom 70 per cent. are strict Mohammedans. Java before 1478 was Hindu in religion. In that year Islam overthrew the chief Hindu princely power of Majapahit, and in the course of a few years the whole island to Mohammedanism followed within the century. The Celebes, with a population of over 800,000, is largely Mohammedan in religion. Islam had just been introduced when the Portuguese landed in 1525. It spread in a hundred years over all the districts, and the south peninsula is divided into nine native Muslim states, which form a kind of Bugis confederacy. They are in alliance with the Dutch. North of this is a smaller Mandar confederacy of states, only partly Mohammedan. There are Muslims also along the north coast of Celebes,
altho we have a Christian majority in the Minahassa peninsula. Concerning Islam in the Dutch possessions, the Rev. Dr. Schreiber of the Rhenish Missionary Society says:

Wherever Mohammedans and heathen are in contact Islam is winning ground, sometimes swiftly, sometimes more slowly. Only a small portion of the whole population remains heathen, and those only small and insignificant does resist in the forests of Sumatra and Borneo. There are some strong and unmistakable signs of the increasing vigor of Islam in Dutch India. According to the official statements there is a steady increase in the number of Mohammedans. . . . Only a small portion of the whole population remains heathen, and those only small and insignificant. Another hardly less ominous sign is the astonishing growth of Mohammedan schools. In 1882 there were in Java 10,913 of those schools, numbering 104,687 pupils; in 1899 we are told there were 16,760 schools, with not less than 223,148 pupils; thus, within three years, an increase of not less than 55 per cent. Even in the residency of Tapanoeli in Sumatra, where the whole of Mohammedanism is of comparative recent date, we find 210 such schools and 2,479 pupils.

Turning eastward from the Dutch possessions, we find Mohammedanism constantly pushing forward. The large islands of Butu and Muna are inhabited by Muslims. The coast villages of Buru, west of Ceram, are inhabited by semi-civilized Mohammedans. In Ceram we have villages nominally Mohammedan. In Amboyna, Ternate, Gorontalo, Manowolke, Ka, Mysol and Sumbawa there are considerable numbers of Muslims. Bali and Lombok are the only islands in the Malay Archipelago which maintain their old Hindu religion. The Sulu Archipelago, belonging to the Philippines Islands, comprises 150 islands, inhabited by Mohammedans of the Malay race, speaking a peculiar language, which they write with the Arabic character. Taking all these facts into consideration, the figures set down in the table for Islam in Malaysia may be too small.

Turning to Africa, we find ourselves in still greater difficulty. The data for Egypt, Zanzibar, Algeria, Tunis, and Tripoli are correct enough. For the interior we are obliged to use the guesses of officers engaged in pressing forward the interests of the various European governments. The figures in the table are no more than estimates. It should be said, however, that the more the Niger region is explored the more clear does it become that we have been overestimating the number of Mohammedans among the tribes, many of whom are Mohammedan subjects, but have not even been invited to accept the Mohammedan religion. Crossing the Atlantic to South America, we find the Protestant missionaries asking for Arabic Bibles to use with Muslims who have immigrated for purposes of trade.

X. Sects in Islam: It is related that Mohammed said: "Verily it will happen to my people as it did to the children of Israel. The children of Israel were divided into seventy-two sects, and my people will be divided into seventy-three. Every one of these will go to hell except one sect." If the number was put too low for the Christian sects (probably confused with the Jews), the corresponding number is far too low for the Muslim world, and the bitterness of feeling indicated by the traditional utterance of the prophet holds true to-day in the fanatical world of Islam. Sheikh Abdu'l-Kadir says there are 150 sects in Islam; but there are infinite shades between them which make them practically innumerable. The two grand divisions of the Muslim world are Sunnites and Shi'ites. Upon the death of Mo'awiya (A. H. 60), Yezid obtained the position of Imam or caliph without the form of election, and hence arose the great schism, which is as strong to-day as ever, between the Sunni and the Shi'ite Muslims; they too have been observers of the traditions as to the example of Mohammad, and the Shi'ites considering many of the traditions too uncertain to be binding. The Sunni Muslims account Abu Bekr, Omar and Othman as legitimate caliphs, the Shi'ites embrace by far the larger part of the Muslim world, and this article is written rather from their standpoint. They are divided into four parties or sects: (1) Hanafiyeh, in Turkey, Central Asia, and Northern India; (2) Shafi'yeh, in Southern India and Egypt; (3) Malakiyyeh in Morocco and North Africa, and (4) Hambaliyyeh in Eastern Arabia and Eastern Africa. These four divergencies of practise, however, are not considered as forming any break in the unity of Islam, since they have discussed and agreed that the divergence is permissible.

The division between Sunni and Shi'ite is of a different nature, involving a bitterness that is quite unappeasable, since the Shi'ite reject the first three caliphs and exalt Ali, the nephew and son-in-law of the prophet, as the only legitimate caliph, and as nearly the equal of Mohammad in the sanctity of his calling. The peculiarities of the Shi'ite Muslims must, however, be discussed in a separate article.

Other sects of Islam are the Dervish orders, who have introduced into Islam everywhere foreign elements from India, Greece, and Persia under the name of Sufism (Tesawu'if or Theosophy); and the Babiah of Persia, who have carried to an extreme some of the Sufi doctrines, and used them to exalt the doctrine of the Mahdi.

In Arabia we find the Wahhabis, founded in 1691, by Mohammed, son of Abdu'l Wahhab. This sect grew out of the Hambaliyyeh sect. Its founder was the Luther of Mohammedanism, calling Muslims back to the original scriptures of Islam. He proposed to do away with saint-worship, which permeated the Muslim world. The Wahhabis call themselves "unitarians," and claim that any man who can read the Koran and accept the doctrines of the Mahdi can be a Wahhabi. They forbid prayers to any prophet, wali, pir, or saint. They hold that at the judgment-day Mohammed will obtain permission of God to intercede for his people. They forbid the illumination of shrines, or prayers, and ceremonies in or about them, not excepting Mohammed's shrine. Women must not visit graves, because they weep so violently. This sect has always been fanatical. The sword was appealed to. Abdu'l Aziz, the leader after 1765, pushed his conquest to the limits of Arabia. He was assassinated in 1803. His son Sa'ud carried the victorious banner beyond the peninsula, and threatened the Turkish empire. Mecca was conquered in 1803. All sorts of ornaments and pipes were burned. Tobacco was prohibited on pain of death. Sa'ud sent commands to Mohammedan sovereigns in every direction that pilgrims to Mecca must conform to these puritan regulations. Missionaries were sent out. Disturbances were occasioned in Northern India. A little later, Mohammed Ali of Egypt sent a strong force into Arabia' under Ibrahim Pasha. The Wahhabis were thoroughly subdued, and Mecca released from the strict rule of this Protestant
phase of Islam. The sect since that day has made little if any progress, altho its tenets have found adherents among the Dervishes of the Sudan.

In India some call Sikhism a sect of Mohammedanism. This is hardly correct, altho it is a mixture of Hindu and Mohammedan ideas, and has its chief strongholds in the Punjab. There are, however, in India several new sects of Mohammedans which claim to be seeking to improve the religion by adapting it to modern requirements, like the Aligarh movement. In Africa the great Mohammedan movement is in fact a new sect in Islam. To what it may grow is not as yet clear, but it represents force, and fanaticism, and such appeal to the consciences of Mohammedans that it has swept through the Barbary states with tremendous vigor of popularity.

XI. The effect of Missions on Islam: Such being the state of the Muslim world, what success has up to this time attended the efforts of the Christian Church to win Mohammedans? We must believe that God has some beneficent aim in this, when He allows Islam to arise and spread from the Pacific to the Atlantic. Could we fully understand, we should probably see some underlying scheme of Providence which is being worked out before our eyes, even tho the conversion of idolaters and fetish-worshippers to Islam seems to fill them with a perennial satisfaction in themselves which resists Christianity far more successfully than does heathendom itself. Mohammedanism undoubtedly some elevating influence upon the heathen it wins. It develops a strong individuality, it theoretically and most frequently practically frees from drunkenness, cannibalism, and other degrading heathen practises. It elevates womanhood and the family to a certain degree. It gives a regular order of life, and has introduced letters to some extent wherever it has gone. It leaves the people stranded in its own low level, and its use of the word to bring them to that level recalls to some the method by which Christianity made its largest territorial conquests in Germany, Spain, South and Central America, Siberia, etc. The answer to this suggestion is that such conquests were never universally approved in the Christian Church, nor were they continued century after century, nor with the widespread and wilful devastation of territory that has been a usual accompaniment of Mohammedan propaganda. We have only to look at the English government reports from the Hausa and Fulani regions in Nigeria to discover that so lately as 1902 the Mohammedan advance, in that part of Africa, loudly proclaimed as most peaceful, is accompanied by the use of arms sweeping the land to carry off herds of slaves for the uses of the Mohammedan territory, and to force the survivors into submission and tribute-paying. Because of this contrast in methods the fact is startling that, altho Christian missions have been in contact with Islam for so many years, so little real progress has been made in winning individual Mohammedans to Christ. The task has appeared so formidable, even in lands like India, under Christian control, that no great missionary society has been organized with the special object of reaching them, altho we have several societies for the conversion of the Jews, whose number at most eight millions as contrasted with two hundred million Muslims. The number of Mohammedans who have been won to Christ is comparatively very small. In the Turkish empire the government uses its whole power to prevent Muslims from embracing Christianity. Nevertheless, some have done so and have proved their sincerity by useful and unspotted lives. A few in Africa have become Christians, but a larger number of nominal converts to Christianity have fallen away to Islam. In Persia, Mohammedanism seems to be disintegrating through internal forces. That country stands midway in the Mohammedan world, and a hundred conflicting Muslim sects are found among the seven or eight millions of Aryan race dwelling between the Caspian Sea and the Persian Gulf. Persia is a strategic point in Islam. If it could be won to Christ, Asiatic Islam would be cut in two. The naturally speculative Persian mind is open to new influences, and a few Persian Mohammedans have become Christians. In India, converts from Islam have been more numerous, and in some cases men of great weight in the community have been converted and have become preachers of Christ, with power. But the most interesting successes have been achieved in the Dutch East Indies, where some 40,000 Muslims have become Christians, nearly half of that number in Java alone.

It should be noted, however, that in all Mohammedan lands thousands of copies of Scriptures are sold to Muslims every year, and it is rare that the sale is due to mere curiosity. Nevertheless, some have done so.

XII. Obstacles and the means used to overcome them: (1) The Mohammedan religion contains truth that has come from God. The heart which desires to find God recognizes this truth, and clings to the error that goes with it with all the power of a faith that is hungry to be fed. (2) The Mohammedan is taught that God's decree has made him one of the elect from the foundation of the world. If he can cherish the thought of a fighting against such a decree, his pride in being one of the chosen people holds him back from listening to Christians who are not given this high favor by God.

(3) In every Mohammed land the law makes belief in Islam with fidelity to it a condition of civil rights, of liberty, and even of life. The man who turns from Islam after once having believed in it is an outlaw, dead in the eye of the law, and without a right that any one is bound to respect.

(4) Access to Mohammedans is obstructed because the Koran forbids intimate relations between Mohammedans and Christians. In Muslim lands the government will prevent social relations with Christians by police interference; and in lands where the police cannot be used for this purpose those of a man's own household, as well as the whole Mohammedan community will use every means to prevent the formation of any such intimate relation of friendship as would imply opportunity for quiet conversation in private.

(5) The Mohammedan religion as a whole allies itself with the natural and less noble impulses of man. Its essence is an outward
form; it has a glittering theory of lofty ethical aims, and at the same time it regards God as too much with a political end in view never to allow the battle must be squarely joined. Civilization is slowly but surely opening the way. The followers of Christ never had a more the task at whatever cost. Christian truth is the long array of Christian those noble missionaries sent forth without the Book ready to hand. The second great agency for reaching Mohammedans with Christian truth is the long array of Christian colleges and schools of less importance, which are now scattered over the larger part of the Mohammedan world. Without considering the permanent effect of ideas implanted in the minds of the young, we must give such educational institutions credit for a power of polemic that is gauged by the difference of level between the science of the time of Mohammed and that of the 7th century. Mohammedanism is hopelessly entangled with the science of the 7th century. A third agency for reaching Mohammedans is the establishment of Christian homes, and to some extent bodies of truly Christian people, where Mohammedans are forced to see them and to draw comparisons and conclusions. Of the whole number of Mohammedans converts to Christianity it is probable that nine-tenths have been convinced by the powerful example of some native Christian neighbor.

With attempting to exhaust the catalog of agencies in use in reaching Mohammedans, we will mention lastly Protestantism or evangelical Christianity as the only phase of Christianity likely to be successful in this great work. Pictures and images used in the service of the Greek Orthodox, Roman Catholic, Coptic, Nestorian, Abyssinian, and other decayed forms of Christianity are utterly revolting to followers of Mohammed, and churches using these can never hope to make headway among Mohammedans. The simple Gospel simply proclaimed must be the effective weapon.

On the whole, there is everything to urge the Western Christian Church to move forward upon this its greatest organized enemy. In the near future the battle must be squarely joined. Civilization is slowly but surely opening the way. Before joining all political opposition to the propagation of Christianity in Muslim lands will be over. The followers of Christ never had a more serious undertaking on hand when looked at from the theological, social, ethical, or political standpoint. It calls for the keenest minds and the most consecrated hearts. We must undertake the task at whatever cost. "Deus vult."

Hughes (T. P.), Dictionary of Islam, London, 1885; Wherry (E. M.), Commentary on the Koran (with the text), London, 1883; Smith (R. B.), Mohammed and Mohammedanism, New York, 1882; Smolke (G.), Mohammed and Mohammedanism, London, 1889. (This book and that of R. B. Smith are both excellent; but they are diametrically opposed to each other. Neither one should be read without reading the other.) Dwight (H. O.), Constantinople and Its Environs, London, 1881; Burton (Y. R. E.), A Pilgrimage to Medina and Mecca, London, (n. e.), 1880 (admirable for its translations of Muslim prayers and liturgy); Geiger (A.), Judaism and Islam, London (Society for the Promotion of Christian Knowledge); Tisdall (W. St. Clair), Manual of Mohammedan Objections, London (SPCK).

MOHULPAHARI: A village in Bengal, India, situated in the Santal Parganas, about 135 miles N. W. of Calcutta. Station of the Indian Home Mission to the Santals, with (1901) 1 missionary and 2 native workers.

MOLIN: A village in China, situated 86 miles W. N. W. of Swallow. Station of the Basel Missionary Society (1889), with (1903) 2 missionaries and their wives, 17 native workers, 8 outstations, 7 day schools, and 583 professed Christians, of whom 437 are communicants. The Society spells the name Lulin.

MO-KAN-SHAN: A town in the E. part of the province of Che-kiang, China, not far from Wen-chau. Station of the CMS (1900), with 1 missionary and his wife.

MOKNEA: A village in Algeria, Africa, about 50 miles S. E. of Algiers. Station of the Committee of the Mayor Mission (1852), with 1 missionary and his wife, 1 day school, and 1 Sunday school.

MOK-PÖ: A town and treaty port in the S. W. part of Korea on the Krumsan River, about 8 miles from the mouth. Station of the PS (1898), with (1903) 3 missionaries, two of them with their wives; 1 woman missionary, 2 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 dispensary, and 33 professed Christians.

MOLETSCHÉ. See MALITZI.

MOLOPOLE: A village in the N. E. of British Bechuanaland, Africa. It is the chief town of the Bakwena tribe and residence of Chief Sebele, who is a Christian. Altitude, 4,020 feet. Climate, temperate. Station of the LMS (1866), with (1903) 1 missionary and his wife, 1 woman missionary, 10 native workers, 4 Sunday schools, 3 day schools, and 800 professed Christians.

MOLOTE: A village in the Transvaal, Africa, situated 22 miles S. W. of Johannesburg. Station of the Hermannsburg Missionary Society (1895), with (1901) 1 missionary and his wife, 4 native workers, 4 outstations, 1 place of worship, 4 day schools, and 688 professed Christians.

MOLUCCA ISLANDS (also called Spice Islands): A group of islands scattered over the sea from Celebes on the east to Papua on the west, and lying S. E. of the Philippines. Area, 42,946 square miles. The number of these islands is said to be several hundreds. Many of them are small and uninhabited. The large islands are Ceram, Jilolo or Halmaheira, and Buru. Nearly all are mountainous. The climate is hot, but not excessively so. Population is about 450,000 natives and 2,600 Europeans. The native population consists of the Malays and the Papuans. The Malay is the common language, and the Arabic character is employed in writing it. Mohammedanism is the prevailing religion, but some few profess Christianity. The laws
are chiefly founded on the precepts of the Koran. The chief prophet is in the hands of the Dutch. Missionary work was carried on until 1865 by the Netherlands Missionary Society. The 45,000 Christians in Ceram, Ambon, Banda, and other islands are now treated as part of the established Church of Holland, and the Government appoints and supports their pastors. The Government also supports a theological school which was founded in 1835. The Utrecht Missionary Society has stations on the islands of Halmahera (Jilolo) and Buru, with about 1,700 professing Christians.

Pfluger (A.), Sammarudijsen der Suedsee, Bonn, 1901; Lieb (Dr. P. A. van der), Encyclopaedia von Nederl.-Indie, Leiden, 1897.

**MOMBASA**: A town and seaport, and capital of British East Africa, situated on the N. side of a small island, 3 miles long and 2 miles from the mainland. The island is mentioned as early as 1331 and was visited by Vasco da Gama in 1497. It was occupied by the Portuguese in 1529. It has a considerable trade in ivory, gums, and produce. Population, 15,000. Station of the CMS (1844), with (1903) 4 missionaries, 2 of them Dr. Latham: "False broad and flat; the cheekbones stand out laterally and the nasal bones are depressed. The eyes are oblique; the distance between them is great, and the carunculae are concealed. The iris is dark, the cornea yellow. The eyebrows form a low and imperfect arch, black and scanty. The complexes is tawny, the stature low. The ears are large, standing out from the head; the lips thick and fleshy, forehead low and flat, and the hair lank and thin." In the more civilized nations of Mongolia, origin these original characteristics have been modified. In the Western Poles, for example, one seeks Mongol features in vain.

**MONASTIR**: A town in Turkey in Europe, situated near the ruins of ancient Heraklia, 87 miles W. N. W. of Salonica. It is capital of the province of the same name and railway terminus. The name is derived by the Turks from a neighboring monastery. The Bulgarians call the place Bitoli and it is sometimes mentioned by English writers as Bitolit. Altitude, 1,700 feet. Population, 50,000, of whom 20,000 are Muslims and 30,000 Christians of various creeds, and Jews. Station of the ABCFM (1873), with (1903) 1 missionary and his wife, 2 women missionaries, 9 native workers, 3 outstations, 3 places of worship, 3 Sunday schools, 3 day schools, 1 boarding school, and 79 professed Christians.

**MONE**: See Mongolia.

**MONGHYR**: A town in Bengal, India, situated on the S. bank of the Ganges, 34 miles W. N. W. of Bhagalpur. It is capital of the province of the same name and railway terminus. The name is written Mongul. The British called it Monghyr. It was the capital of the region before the invasion of the Mongols. The town now consists of a castle and a fort, with a garrison of 300 British soldiers.

**MONGOLIA**: The land of the Mongols is a vast part of the empire of China, lying in the interior of Asia, comprising 1,300,000 square miles of territory between latitude 37° and 54° north and longitude 105° and 125° east. On the north it is bounded by Siberia, on the east by Manchuria, on the south by China proper, and on the west by East Turkistan and Jungaria. Its population is estimated at 2,500,000, one-fifth of which are Chinese. A high plateau, 3,000 feet above sea-level, occupies the greater part of the region. In the center is the Desert of Gobi, where sand and stones, dust in summer and snow in winter, render habitation unbearable. The northern part is occupied by ranges of mountains forming part of the Altai chain. On its slopes rise the Selenga, the Kerlow, and Onon, which form the Amur. In the south are rich meadowlands, which afford food for cattle. Chinese have introduced agriculture to some extent. Mountain ranges are again found on the west. On the east is a strip of fertile land. On the southeastern desert of Gobi is the mountain range of Alaskan, which reaches in some places the height of 15,000 feet above the sea. Along its hills pasture-land is found. The climate is in general cold, subject to sudden changes, and in summer intolerably hot. With the exception of the work of the early representatives of the LMS, who labored in the north, the central portion of Mongolia has been for a long time occupied by Protestant missionaries. The ABCFM is the most prominent force on the field.

Gilmour (J.), Among the Mongols. New York, 1883; More About the Mongols. New York, 1895.
MONGOLIAN LANGUAGES: A family of languages of a low order of development spoken by various peoples and tribes in the northern parts of Asia. Mongol and Turkish languages are distinguished until the relation certainly existing between them has been more accurately defined. In general literature great confusion has been produced by the use of the term Mongol for any of the languages spoken by nomads in Siberia and Mongolia. There is a little Mongol denuded of many sufficiently peculiar to itself, of which the Manchu characters are the most fully developed form. These Mongol characters are placed in perpendicular lines, under the powerful Chinese influence. But nevertheless they are a monument which has endured more than a thousand years to the Christian missionary spirit, being based on the Syriac alphabet taught by ancient Nestorian missionaries to these wanderers of northeastern Asia.

MANKULU: A settlement on the mainland N. of Massaua, Eritrea, Africa. Station of the Swedish National Evangelical Mission Society (1877), with (1900) 1 missionary, 1 native worker, 1 outstation, 1 place of worship, 1 day school, and 215 professed Christians. Station also of the ME (1883), with (1903) 4 missionaries, 2 of them with their wives; 1 woman missionary, 21 native workers, 12 outstations, 4 Sunday schools, 1 printing house, 1 boarding school, 1 college, and 1,337 professed Christians. Station also of the PE (1853), with (1903) 4 native workers, 2 outstations, 3 places of worship, 2 Sunday schools, 1 day school, 1 boarding school, and 178 professed Christians.

MONROVIA: A town, capital of Liberia, Africa, situated on the Mesurado River near the coast. Pop. 4,000. Station of the African Methodist Episcopal Mission Society. Pop. of the ME (1833), with (1903) 6 missionaries, 4 of them with their wives; 1 woman missionary, 21 native workers, 12 outstations, 13 Sunday schools, 1 printing house, 1 boarding school, 1 college, and 1,337 professed Christians. Station also of the PS (1900), with (1903) 1 woman missionary and 1 native worker.

MONEGEO: An independent principality in the W. of the Balkan Peninsula. It is bordered on the east, south, and southeast by Turkey, on the north by Herzegovina. A narrow strip of Austrian territory separates it from the Adriatic on the west, excepting a seaboard of 28 miles in length on the Adriatic. The entire area is estimated at 3,630 square miles, with an extreme length of 100 miles and a width of 80. The population is estimated at 236,000.

The government is a limited monarchy, according to the constitution dating from 1852. The prince holds the executive authority, and practically the will of the prince is law.

The religion of the kingdom is that of the Greek Church, under the direct influence of the prince, who appoints the bishops. Nominally, Church and State are independent, but virtually not so. The number of adherents is 222,000; the Mohammedans number 10,000 and the Roman Catholics 4,000. Elementary education is compulsory and free, the government supporting the schools. In 1901, 4,000 male and 500 female pupils attended 96 elementary schools.

The Montenegrins are Slavs of the Servian stock, and have many noble characteristics. A dialect of the Servo-Illlyrian Slavonic is the language spoken. Agriculture is the leading occupation of the people, and live-stock of all kinds are reared. There are no missionary societies at work in Montenegro.

MONTGOMERY: A town, the capital of the State of Nueva Leon, Mexico, situated 240 miles N. E. by N. of Zacatecas, on the San Juan River. It is surrounded by mountains and is the center of a silver mining district. It was founded in 1596. Altitude, 1,690 feet. Population, 50,000. Station of the American Baptist Home Missionary Society, with 3 women missionaries, 4 native workers, 3 outstations, 1 day school, 5 Sunday schools, and 215 pupils. Station also of the MHS (1892), with (1903) 1 missionary and his wife, 2 women missionaries, 1 outstation, 15 professed Christians, 1 day school. Station also of the MES (1883), with (1903) 3 missionaries and their wives, 2 native workers, 6 outstations, 1 place of worship, 8 Sunday schools, 1 day school, 1 theological class, 1 hospital, 1 dispensary.

MONTGOMERY: A town on the N. W. part of

MONTEREY: Population, 10,000. Station of the American Baptist Home Missionary Society, with (1900) 1 missionary and his wife, 1 chapel, 2 Sunday schools, 1 day school, and 1 dispensary. Station of the BMS (1891), with (1903) 1 woman missionary and 1 native worker.
Tobago Island, West Indies. Station of the Moravian Society (1827), with (1900) 1 missionary and his wife, 30 native workers, 1 place of worship, 3 Sunday schools, 4 day schools, and 610 professed Christians.

MONTGOMERY, Giles Foster: Born at Walden, Vermont, U. S. A., November 8, 1835; graduated at Middlebury College 1860; Lane Theological Seminary 1863; sailed as a missionary of the ABCFM, and reached Aintab, Turkey, December 23, 1863. He was sent to open a station at Marash. Three times he was driven away with fierce violence by the Armenians, and in 1895 he was almost killed. He was a good business man, a powerful preacher and unusually successful in influencing men. After fifteen years of labor at Marash he left it for Adana, two strong, self-supporting evangelical churches having been formed from the very men who had once sought his life in their blind outburst of furious bigotry. At Adana Mr. Montgomery's high qualities again made themselves felt in healing a breach in the church and stirring up the church members to Christian work. In 1857 a terrible famine threatened to destroy his family, and from that time the need of the Adana population and the region round about. Mr. Montgomery appealed for aid to Europe and America and devoted himself to its distribution, largely by means of relief works which were often able to earn their bread. The tremendous strain of work in the hot season was too much for him, and after a period of illness he died December 4, 1888. He had literally given up his life for the people of Adana, and all sects and denominations mourned by his grave.

MONTSERRAT: One of the Leeward Islands, West Indies, 10,063 inhabitants. Mission station of the Baptist Missionary Society (England); 3 missionaries, 2 native teachers, and 67 church members.

MONTGOMERY: A town in Burma, on the left bank of the Chindwin River, 53 miles W. by N. of Mandalay. Population, 6,300. Station of the WMS, with (1903) 1 missionary, 21 native workers, 3 outstations, 1 place of worship, 2 Sunday schools, 6 day schools, and 37 professed Christians, of whom 28 are communicants.

MOOSE FACTORY: A post of the Hudson Bay Company, in Ontario, Canada, situated on the W. side of an estuary of the Moose River, Hudson Bay. It is the seat of the Bishopric of Moosonee. Station of the CMS (1851), with (1903) 1 missionary and his wife, 7 native workers, 3 outstations, 1 day school, and 350 professed Christians, of whom 35 are communicants.

MOOSEHIDE: A settlement in the Yukon Territory of Canada, close to Dawson City, in the Klondyke region. Station of the CMS (1897), with (1903) 1 missionary and his wife, 1 place of worship, 1 day school, and 81 professed Christians.

MORADABAD: A town in the United Provinces of India, and capital of the Moradabad District, situated 50 miles N. W. of Bareilly, on a ridge on the right bank of the Ganges River. It is a large and busy metropolis. Population (1901), 75,000, of whom 39,000 are Muslims and 31,000 are Hindus. Station of the ME, with (1903) 3 missionaries with their wives, 3 women missionaries, 294 native workers, 21 chapels, 175 Sunday schools, 106 day schools, 2 boarding schools, and 14,866 professed Christians, of whom 6,031 are communicants.

MORAR: A town in the State of Gwalior, Central India, situated on the Morar River, in an alluvial plain, 34 miles E. of Gwalior. Population (1891), 24,500, of whom 18,000 are Hindus. Station of the BN (1914), with (1900) 1 missionary and his wife and 1 native worker and 350 professed Christians. MORAVIAN HILL: A station of the Moravians in Cape Town, Cape Colony, South Africa, established in order to watch over the spiritual welfare of native Christians attracted to the city by hope of employment.

MORAVIAN MISSIONS (Missions of The Unitas Fratrum, or the Unity of Brethren, 1732): In 1722, Augustin and Jacob Neisse and their families, descendants of John Huss, followed Christian David to Saxony, where they founded the town of Herrnhut on the estate of Count Zinzendorf, who had offered them an asylum. Other descendants of the Brethren emigrated from Bohemia and Moravia to Russia, and joined the Herrnhut settlement. Count Zinzendorf became the leading Bishop of the resuscitated Moravian Church, and gradually came to devote his means as well as his time to the spread of the kingdom of Christ through the agency of the Brethren. He established on the continent of Europe, in Britain and America exclusively Moravian settlements, from which the "world" was shut out, and in which was fostered the highest form of spiritual life. At the same time members of the Moravian body undertook extensive missions in heathen lands, established many schools for young people not of their communion, and began the so-called "Diaporia" Missions among members of the State churches of Europe. The exclusive system still continues in Germany in a modified form; in England, also, there are a few Moravian settlements, but the last vestige of it in America disappeared in 1856. The following year at a general synod held at Herrnhut, the constitution of the Unitas Fratrum was remodeled, the new development being completed at the General Synod of 1867. The Moravian Church now consists of four provinces, the German, the British, and the American, North and South, which are united as one body in regard to doctrine, ritual, discipline, and the work of foreign missions. Each province of the Moravian Church has a synod as its legislative body, composed of ministers and laymen, and an executive board elected by and responsible to it. The executive boards of the four provinces form the Directing Board of the Brethren's Unity. A General Synod, composed of elected delegates from the several provinces, and certain ex officio members, meets every ten years. In this synod the missions are also represented. It supervises the life, doctrines and activities of the entire Moravian Church, which forms one organic ecclesiastical body throughout the world. A Mission Board, composed of five members, three of whom are chosen from the German, British and American divisions of the Church, is elected by the General Synod, and is responsible to that body for its administration. This Mission Board appoints and directs missionaries and superintendents and has full charge of the finances. Subordinate officers are the treasurer of missions, at Herrnhut, Saxony; the secretaries of missions, in London, and America, and the various agents of missions in Germany, Eng-
land and America, all of whom are appointed by the central body.

The President with this Mission Board is the Financial Committee of the Missions, composed of four business men elected by the General Synod, one of whom is the Manager of the Financial Office of the Missions. All important financial measures, investments, etc., must go before the Mission Board, which must be guided by them.

Finally, the General Synod, constituted of representatives of the entire Church and acting by commission of all its provinces, institutes a searching inquiry into the financial management and the entire administration of the affairs of the missions. It formulates and amends the regulations, determining the relations of the missionaries to the Church; reviews and revises the constitutions of the several mission provinces, determines the principles governing salaries, furloughs, retirements, pensions, and the education of missionaries' children, and indicates the general spirit in which the mission work shall be conducted. In the last resort, the missions stand exclusively under control of the General Synod and therefore also of the entire Moravian Church, which may really be looked upon as an ecclesiastical missionary society. There are also several auxiliary organizations: e. g., the Brethren's Society for the Furtherance of the Gospel, founded in 1741, in London, and constituted wholly of members of the Moravian Church, the British Provincial Elders being ex officio directors, provides for the current expenses of the mission in Labrador, in part by trade. The Society of the United Brethren for Propagating the Gospel among the Heathen was reorganized at Bethlehem, Pennsylvania, in 1787, the original association having been founded at Lancaster, Pennsylvania, in 1745. Chartered in 1788, its directors are the trustees of a fund bequeathed by members of the Church. The Provincial Elders of the American Moravian Church, North, are ex officio directors, and this society, with the aid of the American congregations, has assumed the financial support of the mission in America; besides, they have been called to the missions among the Indians of North America. The Brethren's Missionary Society of Zest was established in 1793, and devotes its energies especially to the support of the enterprise in Surinam. The London Association in Aid of the Missions of the United Brethren occupies the unique position of a missionary evangelical alliance which devotes its entire income to the support of Moravian Missions. Established in 1817 by friends who sympathized with the Church in its embarrassments caused by losses sustained during the Napoleonic wars, it consists exclusively of members of other churches than the Moravian. During the decade preceding the General Synod of 1890, this association contributed $475,000. The Missionary Union of North Schleswig, founded in 1843, has rendered aid especially to missions in Danish colonies. Besides these, there are a number of Women's, Young Men's, and Juvenile societies, generally local in their membership.

Of these, two executive administrative powers in accordance with agreements with the Mission Board, the Society for the Furtherance of the Gospel in London, having charge of the Labrador work, and the Society for Propagating the Gospel in Bethlehem having charge of the Alaskan and Indian missions in North America.

Development of Missions Work: A memorable day of prayer and conference was held at Herrnhut on February 10, 1728, when Zinzendorf and his brethren discussed the possibility of a forward movement. Distant lands were to be won for Christ—Turkey, and Africa, Greenland, and Lapland. "But it is impossible to find a way thither," it was objected. "The Lord can and will give grace and strength for this," was the reply of Zinzendorf. On the following morning twenty-six unmarried men came together, and solemnly declared they were ready to go, at the call of the Lord. The missionary purpose was there, and already the Lord was preparing to use it. In July of the same year Zinzendorf returned from a visit to Copenhagen, accompanied by a negro from the West Indies, who described the great need of the slaves in the islands to such purpose that two young men, Messrs. Dober and Leopold, offered to go to them as missionaries. At the same time the needs of assistance for the work of Hans Egede, a Danish Lutheran missionary in Greenland, were known by two Eskimos, and two other young men, Messrs. Stach and Boechnisch, offered to go to his relief.

But Zinzendorf deemed it best to delay their departure that their fitness for these undertakings might be thoroughly tested. In August, 1728, Dober set out on foot from Herrnhut, accompanied by David Nitschman. With two ducats and three thaler as their capital they made the journey of several thousand miles to Copenhagen, whence they sailed on October 8, 1728, arriving at St. Thomas on December 25 of the same year. On April 10, 1729, Matthew and Christian Stach, cousins, and Christian David sailed from Copenhagen for Greenland, where they were warmly welcomed by Egede. About a mile distant from his colony they established their mission, which they called New Herrnhut. The following year the new mission was reinforced by the arrival of Frederick Beehnisch and John Beck.

Coincident with the preparation of the mission in Greenland, the next undertaking was a mission in Surinam. The Brethren had been called to the Lapps, but their missionaries on setting out learned that a Danish mission had been begun among this people in Norway. Accordingly Andrew Grassmann, Daniel Schneider, and John Nitschman, Jr., spent the winter of 1734 in Stockholm, and in the spring went to Tornea, and thence inland, but finding the people under the nominal supervision of the State Church, they at once withdrew.

That same year arrangements were made with the Dutch Surinam Company, by which the Brethren were allowed to settle in Surinam, and Messrs. Fiesch, Berwig and Larish left Herrnhut March 7, 1735, their primary purpose being a preliminary tour with a view to a later settlement. This led to the founding of a mission which was accordingly removed on a permanent basis in 1748. During the years 1735 and 1738 work was begun among the Indians and negroes in the American colonies, a work directly linked with the founding of the Moravian Church in America. The call to the next undertaking came in 1736, for missionaries to work among the Hottentots in Cape Colony. As soon as the call reached Herrnhut, George Schmidt volunteered to go. Within a week he started for Holland to study Dutch before sailing.
He left for Cape Town on March 17, arriving on the 9th of July, 1737, and settled among the Hottentots on the Zondereiland River, about 10 miles west of what is now Genadendal.

In 1737-38 Messrs. Graesmann, Schneider and Mikesch attempted work among the Samoyedas and other heathen tribes on the Russian shores of the Arctic Ocean, but were arrested as Swedish spies, and after an imprisonment in solitary confinement, were sent back to Germany with word that their services were not needed.

In 1739 Abraham Richter learned of the need of the slaves in Algeria, and was sent to them by the Church, arriving in Algiers in 1740, but in less than six months he died of the plague. At this time prospective missions in Ethiopia, on the Madras coast of India, in China, in Persia, in Constantiople, and in Wallachia were discussed. A severe check was received when Russia's welcome to Lange, Hirschel and Kond, on their way to Persia and China, was turned back. That September the event of two of the form of imprisonment. In 1747, almost coincident with the removal of their fetters, Messrs. Hocker and Ruffer went as missionaries to the Guebres in Eastern Persia, but found it impossible to penetrate beyond Ispahan; they learned, however, that the Brethren, working as traders, were not molested or exiled, and so started on their return journey. Ruffer died on the way, but Hocker reached the home church in 1750, and, undeterred by what he had encountered, in 1752 he returned to Egypt with the intention of proceeding to the Copts of Abyssinia, but political disturbances prevented his going beyond Cairo. He made another effort in 1758, taking passage with one associate on an Arab vessel on the Red Sea. Wrecked on the Island of Hassani, the missionaries lost all their valuable medical supplies, and again the enterprise failed. Eight years later Hocker again sought Egypt, accompanied by Messrs. Danke and Antes. It was impossible to proceed to Abyssinia, but Danke pushed on to the Copts of what is now called Genadendal. In 1770 that mission was finally established on a permanent basis.

In 1760 Messrs. Volker and Butler, with eleven artisans, inaugurated the Moravian Tranquebar Mission, with the approval of the Danish Government. They purchased a tract of land in the vicinity of the town, and named the little settlement Bruderhagen. Scarcely had the little mission in Greenland begun to approach success than the Brethren turned their attention to Labrador, a redoubt of the Danes and Chinese, and in 1768, six Brethren were sent to establish a mission on the Nicobar Islands, more colonists joining them the following year, but owing to the treachery of the natives the project was abandoned. In 1777 the work was extended to Serampur on the Ganges, by invitation of the Danish Company, and seven years later a new station was opened at Patna. The whole mission proved so discouraging that in 1786 the Unity Elders' Conference sent a deputation to investigate its prospects, with the result that the mission at Patna was at once given up, the Nicobar Islands and Serampur were abandoned in 1788-1791, and four years later, in 1795, the Conference decided to withdraw entirely from the East Indies. A Moravian Mission in Cape Colony, which had been abandoned fifty years before, and in 1792 Messrs. Marsveld, Schwinin and Kuhnelt were sent out to reestablish the old station at Baviaans Kloof, now called Genadendal. In 1804, a mission was established four hundred miles east of Cape Town, on the White River, for work among the Kaffirs, and in 1828 the first station in Kaffraria proper was established.

In 1847 Messrs. Pitzer and Reineke were sent on an exploring tour to the Mosquito coast of Central America, and reported so favorably that a mission was established in 1849, at Bluefields. In 1850 the pioneer Moravian missionaries arrived in Australia, and a station was opened in the Lake Boga District.

From almost the beginning of its missionary operations, the Moravian Church, under the leadership of Count Zinzendorf, had looked toward Mongolia and the Chinese Empire, and on the suggestion of Dr. Guthke it was decided to attempt an entrance from the west. In 1853 the pioneers reached the CMS station of Kotgarh, in the Punjab, and from that place as a base, in 1856, land was purchased near Kallang, in the valley of the Bhagar, in Lahul, where the headquarters of the Himalayan Mission to Tibet was established.

In 1865 a leper asylum was established at Jerusalem, by a German lady, and in 1867 the Moravians undertook its supervision. In 1878 the emigration of West Indian negroes to British Guiana, South America, led to the establishment of a mission in that colony. In 1885 a mission was permanently established in Western Alaska for the aborigines of the American continent. In 1887 the Moravian Church received an unexpected legacy, and about the same time an appeal from Mackay of Uganda for a Moravian Mission in Central Africa, resulted, in 1891, in the sending out of four missionaries, who began work in the Konde Highlands of German East Africa, northwest of Lake Nyasa. In 1896 the Moravian Church took over the Urambo mission, which had been established by the LMS, thus becoming responsible for the evangelization of the western half of German East Africa, south of Lake Victoria Nyanza, and extending to Lake Tanganyika.

In 1889, in accordance with the desire of the Danish Government, the Moravian stations in Greenland were transferred to the care of the Danish Church, since the people being Chris-
tianized, actual missionary work there was a
ting part of the past.

The Missions: 1. West Indies (1732): The
first two missionaries of the Moravian Church,
Messrs. Rittmannsberger and Nitschmann, landed
in St. Thomas, West Indies, December 13, 1732, after
a long and perilous voyage from Copenhagen.
For the first four months Nitschmann supported
his companion and himself by carpentering, but
in April he returned to Europe, and Dobert was left,
as he was unprepared to give any support while attempting to work among the slaves.
While on the one hand a letter from Anthony,
the West Indian whom Zinzendorf had met
in Copenhagen, had given him a ready wel-
come among the blacks, on the other hand he
met with great opposition from the planters.
In June, 1734, Tobias Leopold and seventeen others
arrived, some of whom were to take up the work
he had commenced, while others were to go to St.
Croix to begin a second station on the estates of
other planters, at his request. By the end of the
following January eight of their number had died.
In February eleven persons were sent to their
aid, but the mortality continued, and by December
1, 1736, the last survivor from St. Croix returned
to St. Thomas. The bitter opposition of the
planters was increased, with the assistance of a friendly planter, an estate was
purchased for the mission known as Poaunen-
berg, later New Herrnhut. In 1739 Count
Zinzendorf visited the mission, and his personal
representations, with petitions from influential
friends, on his return home, practically secured
religious liberty from the Danish crown. In
1740 the St. Croix Mission was reopened and the
following year the work was extended to St.
John Nisky, in St. Thomas, Friedensthal in St.
Croix, and Betlhany. In February of 1854 a
station was opened in Jamaica at the request of
Messrs. Foster and Bahram, two wealthy planters,
who gave a plot of ground for the new mission,
which was called Carmel. Mr. Caries and his
two companions, pioneers, were reinforced by
other workers and colonized the Bogue, Island, and Mesopotamia, three other
plantations. In 1756 the missionaries on St.
Thomas commissioned Samuel Isles to investi-
gate Antigua as a prospective mission field. He
was well received by the governor and planters,
and his first convert was baptized the following
year.

In 1765 Messrs. Wood and Rittmansberger
were sent to open a mission in Barbados. Within
a month of their landing at Bridgetown, Ritt-
mansberger died of fever, and Wood, after strug-
gling on alone for a year, abandoned the enter-
tprise.
The next year another missionary was sent
out, only to die within a week of landing. In
1767 the work was undertaken by Mr. Brookshaw,
who succeeded in enduring the climate and laying
the corner stone of the mission. Everywhere
the negroes were ready to listen, and the work
progressed rapidly in spite of some opposition on
the part of the whites.

Tidings of the happy results of the mission in
Antigua reached the neighboring island of St.
Kitts, and the planters desired missionaries to
teach their slaves. At the request of Mr.
Gardiner, Messrs. Gottwalt and Birkby were
sent to St. Kitts in 1777, and were kindly wel-
come. In 1782 the gift of land on the island of
St. John made possible the founding of a second
station, which was called Emmaus.

The missionary work of the Moravians at
Tobago dates from 1787, when Mr. and Mrs.
Montgomery, after a visit to a planter named
Hamilton, reported an open field, and commenced
work in 1790. The work was interrupted by a
fierce outbreak of soldiers against the British
Government and by a disastrous hurricane a
month or two later. Before the end of the year
Mrs. Montgomery died, and soon after Mr.
Montgomery returned to Barbados, only to die.
For eight years no attempt was made to reopen
the mission, chiefly on account of uncertain
political conditions.

During the ensuing years the Moravian Mission
in the West Indies was intimately connected
with the movement for the abolition of slavery.
In May, 1792, the Danish King fixed a date for
the slave trade to cease in the Danish possessions.
At the same time repeated requests came from
land owners on St. Thomas to the Unity Elders' Conference that the Brethren should assume
the religious and civil education of the children of
slaves. The work was extended by a friendly
planter, an estate was purchased, and the mission
premises at St. Thomas and St. John were devas-
tated by a tornado in 1793. But in spite of
these adverse circumstances the work every-
where prospered. In 1801 St. Thomas surren-
dered to the British and the others plantations
speedily did likewise. During the next years
new stations were occupied and a widening of
educational activities characterized the work.
On the Danish Islands, on December 24, 1830,
the work of theBrethren was put on an equal
footing with that of the State Church. At the
close of 1834, after a little more than a hundred
years of labor, the missions on the Danish Islands
numbered 19,321 members; St. Thomas 1,998,
St. Croix 6,682, St. John 1,641. That same year,
by act of Parliament, slavery was prohibited
throughout the British colonies. The connec-
tion of the missions with trade for the support of
the work was gradually dropped. A system of
education was established by the Government,
and in 1822 Governor-General Van Schooten,
at the instance of the King of Denmark, visited
New Herrnhut and laid before the authorities of
the church his plan for elementary schools, proposing
that a beginning be made at St. Croix, and that
the mission supply the teachers, while the Govern-
ment erect the buildings and aid financially. In
1841 the first school was opened on Great Princess
Plantation; others were established on the island
of St. John, and in 1847 the system was extended
to St. Thomas. The same year a normal school
was established in Antigua, similar one being
already in operation at Fairfield, Jamaica. In
1854 a training institution for women teachers
was established at St. Johns, in Antigua. In
1866 the ordination of John Buckley as a deacon
at St. Johns marked an important step in West
Indian development, for with him began the line
of Moravian ministers of African blood.
In 1863 a General Conference was convened
at St. Thomas, when self-support, a native
agency, local management, and education were
discussed. Jamaica fell into line except for the
outlay for buildings and the other gradual duties
of missionaries. The Danish Islands, with St.
Kitts and Tobago, were to have a gradually
decreasing grant for a decade, in the hope that in
the interval local resources might attain a suf-
ficient development. Antigua and Barbados
were unable at once to make the change.
But such happy anticipations were interrupted. Cholera, yellow fever and a hurricane compelled the missionaries to turn their houses into hospitals. In spite of these reverses, however, the work went steadily on, and in 1869 steps were taken for the gradual emergence of the Western Indian congregations from the status of missions, so that they might be made a fourth federated province of the Brethren's Unity. Earthquakes and tornados of repeated occurrence threatened the extinction of the Indian missions. In 1761 three executive members were appointed to carry out the legislation of the General Synod, and which should prepare the way for provincial autonomy. At this time it was decided to divide the work into two provinces. General mission conferences were appointed in both missionary provinces for every five years, at which time three executive members were to be chosen. In each case the election of these executive members must be approved by the Board of Missions. At this time a second theological seminary was opened in St. Thomas.

In 1873 the Board of Missions was reorganised as a body corporate, title to the mission property being vested in the Provincial Conference of the island together with the President of the British Provincial Elders' Conference and the Mission Secretary in London. This year the one hundred and fiftieth anniversary of Moravian missions in the Eastern islands was commemorated by the erection of a memorial church at St. Thomas. In 1899 the two provinces were granted practical independence with certain restrictions. A fixed annual grant, normally of $3,500, was to be allowed each province for ten years, together with certain specific donations.

The cost of maintaining one theological seminary on the islands, and the expenses of the foreign Brethren then in the field, were to be borne by the Missionary Board. Foreign missionaries thereafter appointed were to receive one-half their expenses from the Board and the other half from the province. Since then Jamaica has averaged contributions amounting to $41,184, and has drawn from the general treasury $2,456; the Eastern division averaged $40,107 each year, and required aid amounting to $3,552. There are (1903) 45 stations and 23 outstations, 86 European and American missionaries, 813 native helpers, 40,107 church members, 108 day schools with 22,388 pupils, 3 other schools with 24 students.

2. Dutch Guiana (1735): Arrangements having been made with the Dutch Surinam Company for the Brethren to settle in that country, a preliminary tour was made in 1735 by Messrs. Piesch, Berwig and Larisch. Arrawak, Warrau, and other Indian tribes, free Bush negroes, and negro slaves made up the bulk of the population, while the country was as unpromising as its inhabitants. After the exploring party returned in 1738 Messrs. Dachne and Gultner were sent out by invitation of a planter on the Berbice River. They established Pilgerhut, about one hundred miles inland; the following year work was begun at Paramaribo, but such was the hostility that the missionaries removed to a small plantation on the Cottica, where they remained till 1745, when they returned to Paramaribo, and continued their work until the outbreak of the War of Austrian Succession, when they were again transferred to the capital. Their new church was consecrated in 1754. In the good will of the authorities at Paramaribo was secured, and permission was given for the founding of mission colonies. In 1756 Sharon on the Saramacca, and Ephraim on the Corentyne, were peacefully established for work among the Indians. Repeated wars, the nomadic tendency of the tribes and their proneness to intoxication caused the work to progress but slowly. In 1761 and 1763 the Bush negroes rose in rebellion and threatened the existence of the missions. In 1766 work was begun among these Bush negroes. Slowly a congregation was gathered, and in 1773 a settlement was established at Bambey, in the interior. In 1776 the first convert was made at Paramaribo, and in 1778 the first church was built. In 1785 the Government offered the mission a tract of land, and permanent establishment was established. In 1803 permanency was given to the mission by the formation in Zeist, Holland, of the Zendingenenaatschap der Broedergemeente, for the special support of the Brethren's work in the Dutch Colonies. The same year the mission at Hope, on the Corentyne, was removed to a more fertile spot on Aulibissi Creek; industrial work was vigorously inaugurated, and before long a mission boat was regularly used to carry produce to Berbice from Hope on its return from a disastrous fire, and later the indifference of the Indians led the missionaries to turn to the slaves on the plantations. The opposition of the planters closed two stations. But new estates began to be thrown open—by 1826 six, thirteen during the following year, and ninety within a decade. In 1828 the Dutch Society for the Promotion of Christian Knowledge among the Negroes of Surinam was founded. The spiritual care of prisoners and slaves in the forts of New Amsterdam, at Paramaribo, and the church at Combe was transferred to the Brethren. The mission made marvelously rapid strides. Station was added to station—Wosteling Jacobs in 1838, Salem in 1840, Beekhuizen in 1843, Rust-en-Werk in 1844. Lilliendal became an independent station in 1846, St. Martha's in 1847, Waterloo and Olevia in 1848; Annassorg was made a center for work among the plantations on the Warappa and Mattapica creeks in 1853. In 1855 Catharina Sophia on the Saramacca; Heerendyk in 1856. The first attempt at a negro church was made in 1844, and in 1851 a normal school was successfully established at Beekhuizen. In 1856 the Government placed in the care of the Brethren the non-Catholic inmates of the leper hospital at Batavia. Then followed Beersheba, Waterloo and Clevis. In 1861 John King was baptised at Paramaribo, and returned to Mariapostoon to do evangelistic work among his own people, and from this beginning he made long evangelistic tours in all parts of Surinam. In 1863 the slaves of Surinam were emancipated, each ex-slave being required to declare himself either a Jew or a Christian to obtain the royal favor.

Education now became a marked feature of the Moravian missions; in 1866 the normal school was transferred to the capital, and supplied with qualified teachers. In 1875 a primary school was also established in the capital. In 1882 Rust-en-Vrede was established, and Wanika in 1886. At this period the "native helpers" began a movement for a higher standard of discipline, and in 1893 the establishment of the new mission aided the mission by altering the laws which had impeded true marriages of the negroes. The
work spread among the Bush negroes of the interior, tho it was impossible for a white man to permanently endure the climate. In 1891 the first Chinese helper was appointed for work among the Chinese, who had come that year from the Kaga Bay. In 1897 a missionary and two deaconesses were appointed to work among the Protestants in the leper hospital at Groot Chatillon.

In June, 1902, the first native pastor was ordained, and in November of the same year the foundation stone of the native institution for native workers was laid at Paramaribo. There are (1903) 18 stations and 25 outstations, 93 European and American missionaries, and 364 native helpers, 29,200 church members, 27 day schools with 2,896 pupils, 1 training school with 6 students.

4. South Africa (1737): The first Moravian missionary, George Schmidt, arrived in Cape Town in July, 1737, and located among the Hottentots on the Zondereind River; but the following year the mission was transferred to Baviaans-kloof (Genadendal), where in 1742 the first convert was baptized. The following year Schmidt was summoned to Holland to report as to the validity of his proceedings, and was not allowed to return. In 1748 John Martin Schmidt was ·summoned to Hqlland to report as to the validity of his proceedings, and was not allowed to return. In 1748 John Martin Schmidt was summoned to Holland to report as to the validity of his proceedings, and was not allowed to return. In 1748 John Martin Schmidt was summoned to Holland to report as to the validity of his proceedings, and was not allowed to return. In 1748 John Martin Schmidt was summoned to Holland to report as to the validity of his proceedings, and was not allowed to return. stations and 26 outstations, 86 European and American missionaries, with 483 native helpers, 16,645 church members, 54 day schools with 3,867 pupils, 2 training schools with 30 students.

5. Labrador (1770): In the fall of 1751 Messrs. Stach and Drachart, of the Moravian Mission in Brunswick, undertook a similar mission in Labrador, and suggested that trade be combined with evangelization. Zinzendorf did not favor the proposition, but members of the London congregation took it up, and in 1752 fitted out a ship for trade and "Jensile colonization of Labrador," and sent two missionaries, but the attempt failed. In 1766 a new attempt was made by Jens Haven, and the following year, accompanied by Drachart, they made a tour of exploration, going some distance inland. In the autumn of 1767 turmoil in Labrador itself hastened the founding of the mission, and in May, 1769, an order of Privy Council with royal approval sanctioned the undertaking and granted to the resuscitated Society for the Furtherance of the Gospel, which had been founded in London in 1741 by Spangenberg, one hundred thousand acres of land on the coast of Labrador. In March, 1770, a small brig, the "Jersey Packet," was purchased, and on May 5 of the same year the missionary party sailed for Labrador, arriving the 10th of August, and locating about 180 miles north of Hopedale. Friendly relations with the natives were soon established and the new station was called Nain. In 1773 the founding of two additional stations was sanctioned by the Unity Elders' Conference. The following year a tour of exploration was made northward, which resulted in the occupation of Okkak, 150 miles north of Nain, in 1775. In 1782 Hopedale was reestablished. At first the outcome was discouraging owing to the influence of European traders, but in 1804 an awakening began and by 1818 six hundred people were gathered around the mission stations. During 1836-1837 a famine raged at Nain, Okkak, and the newly organized station of Hebron, and the missionaries strained every nerve to help their people. During the next twenty years occasional tours were made and preaching services held in various parts of Labrador, but the main efforts of the missionaries were spent in strengthening the existing missions. In 1864 the station of Zoor was founded, to the south of Nain. In 1865 an orphanage was established at Okkak. Two years later another attempt was made to explore the country, and attempts were made to establish stations at Saeglek, Nadine, and Nullatatok Bay, but the Hudson Bay Company interfered and the missionaries withdrew. In 1871 a second and successful attempt was made at Nullatatok Bay, the new station being called Ramah. From the beginning the Labrador mission had carried on trading with the natives in connection with the regular missionary work, but the difficulties inevitable to a mingling of the two led to a complete separation between the spiritual and temporal administration in 1866, and this separation was continued till 1876, when a partial return to the old basis was made, but the perplexities it entailed seriously handicapped the missions. In 1893 Zoor was abandoned, and in 1896 Makkovik was founded, south of Hopedale, and arrangements were made for another station at Rigolette, still further south. There are (1903) 6 stations, 38 European and American missionaries, 38 native helpers, 1,273 church members and 6 day schools with 242 pupils.

6. Mosquito Coast (1847): At the request of Prince Schonberg-Waldenburg of Labrador, Church commissioned Messrs. Pfeiffer and Reinke of the Jamaica Mission to make a tour of exploration in Central America. Proceeding via Grey-town they reached Bluefields in May, 1847. The "king" urged them to establish a mission, offering land for it in Bluefields. The Germans restricted stated services in their language and the British Consul promised hearty cooperation. The new mission was inaugurated in March, 1849, and in 1853 the first convert was baptized. In 1855 a new station was established at Pearl Key lagoon, which was called Magdala, later renamed in honor of the first convert. A church was built at Rama Key. In 1858 the work was greatly helped by the gift of a small schooner from friends at Zest. Two years later Ephrata was founded at Wauntu Hallorn. In addition to this new undertaking, Joppa was established in Corn Island among the negro population. In 1864 Bethania, at Tasbapani, was made an independent station. The following year a terrific hurricane devastated the Mosquito coast; everywhere the missions suffered, but deep sympathy led to larger gifts from the homeland, and the missionaries were enabled, to some extent, to rebuild and start afresh. In 1871 it became necessary to abandon Joppa, on Corn Island, chiefly because of the lack of men. In 1875 a gift was received for the establishing of Labraca, on the Wawa River, and another outstation was established at Kukallaya, some distance inland. In 1876 the missions again suffered from the violence of a hurricane, Bluefields, Rama, Magdala and Bethany suffering severely. In May, 1881, an awakening began in Magdala, which spread to all the surrounding villages, as well as to the other stations of the mission. Indians, Negroes, Creoles and Spaniards were alike aroused; several hundred heathen asked for instruction and baptism; chapels were erected in buildings not regularly occupied, and three outstations were added. In 1888 the translation of the New Testament into the Mosquito-Indian tongue was completed and printed at the expense of the Herrnhut Bible Society. The year 1894 was critical in the extreme for the Mosquito Mission, when the Reserve was wholly incorporated into the Nicaragua Republic. Business was unsettled, the regulations altered, and the expenses of the mission materially increased. Nevertheless, there was a steady advance, the number of stations and outstations being increased by each of two, and the membership by near two thousand.

There are (1903) 16 stations and 11 outstations, 34 European and American missionaries, 99 native helpers, 5,433 church members, and 9 day schools with 519 pupils.

7. Australia (1849): The aborigines of Australia claimed the attention of the church in the years following the synod of 1848. In Herrnhut, Nieky and other German congregations, Australian associations had been formed, looking
toward a future mission. Messrs. Täger and Spieske were sent out as pioneers, arriving in Melbourne February 25, 1850, where they were cordially welcomed by the Lieutenant-Governor. To his influence mainly was due the favorable negotiations for land, and the establishment of the missionaries in their new home in the "Mallee" or scrub.

Permanent work was begun in October, 1851, on a reserve in the Lake Boga District. In 1856 the missionary superintendent abandoned the hasty action, and two years later the Moravian missionaries were again in the field, and decided to locate in the Wimmera District, near Antwerp, a station belonging to Mr. Ellemann, who gave land for the new mission and sided in every possible manner. The new site was called Ebeneser. In 1860 the first convert was baptized, and from that time the progress was rapid. This success led the Presbyterian Assembly of Australia to offer to supply funds for another station, if the Moravians would undertake the work. It was agreed; a reserve near Ebeneser, and on the banks of the Avon, the new post was founded in 1863, and called Ramahyuk. Here the first convert was baptized in 1866. A vigorous school soon came into existence. A third station was attempted near Cooper's Creek, in the western border of Tibet, permission being granted in 1850, Dr. Gutzlaff, of China, prevailed on the authorities at home, without consulting the missionaries in their new home in the "Mallee" or scrub, to send the missionaries to the Reliance Plantation, near the Essequibo, in British Guiana, where a second station was established at Ramahyuk, in charge of native Christians.

There are (1903) 4 stations, 12 European and American missionaries, 106 church members, 3 day schools with 172 pupils.

8. West Himalaya (1853): When on a visit to Beterverwachtung asked to be taken into the Moravian Mission, in 1850, Dr. Täger, of China, persuaded the Moravians to try and enter the Chinese Empire from the west. Messrs. Pagell and Heyde were selected for the new undertaking, arriving in Calcutta in November, 1853; their first destination was Khotan, where some time was spent in linguistic study under a Tibetan lama. In April, 1855, they made an investigating tour; at Leh, in Ladak, they were most unwelcome, nor was the prospect brighter in Chinese territory. The following winter was spent in Khotan, and the first station was founded among the Tibetan-speaking Buddhists of Lahul, as near as possible to the frontier of Chinese Tibet. Land was secured in 1858 in the valley of Bhagar, sixty miles from the border, near Kailang. Before winter the mission house was completed—a solitary outpost of Christianity among the Western Himalayas, over against the fortress of the Dalai Lama. Early in 1857 the future leader of the new mission, Mr. H. A. Jaeschke, arrived, and a new stage of work began. In 1859 a printing press was established, and Jaeschke succeeded Pagell in the direction of the Harmony of the Gospels. In 1866 a second station was established at Poo, in Kunawar, nearer to the border which they wished to cross. That year the first convert was baptized. Meantime, an unexpected opening came. Smallpox was making fearful ravage in Chinese Tibet. In their extremity the people of Tso-teso sent to Pagell to stay the scourge by vaccination; but, his work being accomplished, he was forced to return to Poo, where a second convert was baptized in 1868. At Kailang the first convert was also added to the little church, and indifferent tolerance on the part of the natives changed to bitter hostility. In 1872 an ex-lama from Lhasa was baptized, and in 1876 the conversion of a Mohammedan teacher in the school at Kailang followed by the conversion of five pupils. Mission tours were frequently made, and large numbers of tracts and parts of the New Testament were distributed.

In hope against hope the mission was continued. In 1886 a station was established at Leb, the capital of Ladak, an important town near the western border of Tibet, permission being granted when a medical missionary was sent to care for the hospital and dispensary in the city. Two years later, in 1888, a church was dedicated. In the meantime the entire New Testament had been printed in Tibetan, and the Old Testament was well under way. During the closing years of the century occasional gleams of hope were manifest; new outposts were established at Chit and Gui, near Kailang, and at Scheh, near Leh. In the schools conducted by the missionaries were taking theological studies, the work of the native assistants holding hope for the future.

There are (1903) 6 stations and 1 outstation, 22 European and American missionaries, 9 native helpers, 110 church members, 10 day schools with 266 pupils, 1 training school.

9. British Guiana (1878): The migration of West Indians to Demerara caused an extension of the work to this South American colony. The proprietor of the Bel Air estate offered to provide the salaries of a missionary and an assistant, who should teach school, for five years. The offer was accepted, and in November of 1878 work was begun at Cummings Lodge. The following year, Mr. Quintin Hogg, the proprietor, asked that a missionary be sent to the Reliance Plantation, near the Essequibo, and Pagell was invited to open the work in April, 1879. In 1882 a further extension followed, when fifty-seven people who had left the Congregational Church at Beterverwachtung asked to be taken into the brethren's Church, and regarded as constituting an outstation of Graham's Hall. Both these stations grew rapidly in numbers, while Reliance was abandoned, the work not proving successful. At the end of 1884 the proprietor gave notice that he would be unable as largely to sustain the work in Demerara as heretofore. In 1896 a new beginning was made at Georgetown and an attempt was made to work among the coolies and Chinese, who were pressing into the colony. In 1902 land was purchased and a church and parsonage erected in the Queenstown ward of the City of Georgetown.

There are (1906) 2 stations and 1 outstation, 29 native missionaries, 912 church members, 2 day schools with 203 pupils.

10. German East Africa (1890): This mission originated in the receipt of a large legacy, and an appeal from Mackenzie, of Uganda, jointly with Bishop Parker of Equatorial Africa. The directors of the East Africa Colonial Company in Berlin promised cooperation. Accordingly, in the spring of 1890, Messrs. Meyer, Richard, Martin, and Hafner set out north of Lake Nyasa. Martin's grave paved the way for the advance at Karanamu, but Rungwa
was founded among the Konde people in August. Rutenganio and Ipiana were established in 1894, and Utengula, among the Safuas and Sangos, in 1895.

There were (1893) 3 stations and 1 outstation, 4 European and American missionaries, 63 native helpers, 9 day schools with 562 pupils.

11. Southern California (1890): The destitute condition of the mission Indians, former proteges of the Roman Catholics, appealed to the Woman's National Association, which applied to the Moravian Church, and Mr. Weinland was sent to open work among them. He established at Potero the "Ramona Mission," and in 1896 Martinez, in the desert, was occupied. Other stations have since been established at Rincon and La Jolla, and an outstation at Yuma, in Arizona.

12. Alaska (1885): At the annual meeting of the Society for Propagating the Gospel Among the Heathen, held at Bethlehem, Pa., in 1888, an appeal came from Dr. Sheldon Jackson that the Moravians establish a mission among the Indians and Eskimos in Alaska. Messrs. Weinland and Hortmann were commissioned to make an exploring tour, arriving in Unalaska in May, 1884, and thence proceeded across Bering Sea to the mouth of the Nushagak. Passing on to the Kuskokvim, they traveled up this river beyond Kolmakovsky. On returning to Bethle­heim they recommended that a mission be established on the Kuskokvim River, about eighty miles from its mouth. In the spring of 1888 a station consisting of Messrs. Weinland and Kilbuck and their wives, and Hans Torgersen, a carpenter, were en route to Bethel, as the new station was to be named. On June 19 they reached the Kuskokvim, but before their goods had all reached the mission Torgersen was drowned, and the two young and inexperienced couples were left alone to face the rigors of an Arctic winter; but they persevered and by October 10 had their house built and ready for habitation. In the summer of 1888 a second station was founded on the Nushagak River, near Fort Alexander, and named Carmel. During the ensuing two winters the stations were beset with hardships on every hand. But dawn was at hand. During Passion Week, 1888, the Moravians, in common with the Brethren through­out the world, held daily services. An awakening resulted, and in September the first converts, eight Eskimos, were baptized. The same year Mr. Weber was sent to the assistance of Mr. Kilbuck, Mr. Weinland having been compelled to retire because of ill health. On the arrival of Weber, Kilbuck started for Carmel, to consult with the missionaries about the work, but after an absence of seventy-three days he returned home, more dead than alive, suffering from the extreme cold. During his absence his wife became seriously ill from overwork, and it seemed as though she would give up the work. Both stations needed reinforcements, and a call was sent out for volunteers. Fully nineteen persons responded. In 1889 Mr. Schoechert was sent to Carmel, and Miss Delterer to Mrs. Kilbuck's assistance at Bethel, while Mrs. Bachman, with her young son, went to the latter station for a year. By 1899 the membership numbered 987. Ougavigamute was founded, eighty miles up the Kuskokvim from Bethel. The latter station had 6 outstations, Carmel 3, and Ougavi-
also the number and size of the rivers, none of which, however, is capable of floating any but very light crafts. The flora is that of Southern Europe, most resembling that of Spain. The same may be said of the animals, except the lion, the panther, and the ostrich, not yet extinct in Morocco. The climate is mild, equable and very salubrious. The government is an Oriental despotism, cruel and barbarous, and the country is infested by lawless bands. There are no proper means of transportation in the interior, which is largely unknown to Europeans; agriculture is of the most primitive kind, and the rich resources of the country remain undeveloped. In Tangier, the capital, 15,000, or more, Christian residents, engaged in trade for the most part, and, outside of Tangier, not 1,000 can be found in all of the rest of the empire.

The Berbers, original inhabitants of the country, form two-thirds of the population, and, divided in clans, as the Kabyles of the north, the Shellahas of the southern slopes of the Upper Atlas range, the Haratins of the south. The Shella language is that most extensively spoken. Arabic is also largely diffused, especially in the more civilized portion of the population. The Jews, still calling themselves "exiles from Castile," number over 100,000. They speak Spanish and to some extent Arabic. The negro population, pure and half-caste, are constantly recruited by the slave trade with the Sudan. Mohammedanism is the religion of the empire. Morocco ranks next to Arabia in the Muslim mind as an orthodox and noble country; and the Sultan-Sheriff is to the Western Mohammedans what the Turkish Sultan is to those of the East. There is great and conscientious intolerance toward all who are not of the state religion, and travel in the interior of the land is impossible for this reason.

Missions in Morocco have been addressed to the Jews in the main. The North Africa Mission, the German Missionary Union, the Southern Morocco Mission, and the PB, however, are endeavoring to reach the Berbers and other classes of the population. Medical work is here found an especially effective means of access to the people. In the face of these difficulties, little has been accomplished beyond what one missionary calls "gathering up the stones" preparatory to seeding the ground.

MORRISON, John Hunter: Born at Morpeth, Northumberland, England, January 15, 1782, of humble Scotch parentage. He was an apprentice learning to make farts and he studied while at work. At the age of fifteen he joined the Scotch Church. As early as 1801 he began the study of Latin, Hebrew and theology with the minister of Newcastle, and after fourteen months' study entered the Independent Theological Academy at Hoxton, to prepare for the ministry. Soon after his admission he decided to become a missionary to the heathen. In May, 1804, he was appointed the first missionary of the LMS to China, and he thus became the founder of Protestant missions in China. Entering the Mission College at Goseport, he spent two years not only in special preparatory studies, but also in acquiring Chinese. He sailed for China January 31, 1807, but the Chinese being hostile to the English on account of the opium difficulties, he was obliged to go via New York instead of going direct from London. Reaching Canton September 7, he adopted the Chinese dress, clothes and habits: but soon resumed his usual mode of life. An edict being issued about this time by the Chinese Government prohibiting the printing of religious books and the preaching of the Gospel, Mr. Morrison set himself at once to study the language and translate the Bible. His work, having suffered from incessant study and too rigid economy, he left Canton for Macao, where he remained a year in consequence of political troubles which made residence in Canton unsafe. In 1809 he was offered the position of translator to the East India Company's factory at Canton. This at last secured for him a permanent residence in China, ready access to some of the people, and time for the translation of the Scriptures and preparation of his Chinese dictionary. He held this office to the day of his death—twenty-five years. To the end he had the confidence of the East India Company, and they advanced large sums at different times for the publication of his various works. Tho much occupied with office work, he found time for Bible translation and the preparation of religious books. In 1810 a revised and amended version of the Acts of the Apostles, based on his copy of the manuscript in the British Museum, was printed—the first portion of the Scriptures in Chinese printed by any Protestant missionary. In 1812 the Gospel of Luke was printed. Early in 1814 the whole of the New Testament was ready, and the East India Company furnished a press and materials, also a printer, to superintend its printing. In this year, seven years after his arrival in China, he baptized Tsai-A-Ko, the first Chinese convert to Protestant Christianity, a sincere believer, who continued steadfast in his faith till his death in 1818. In 1815 a Chinese grammar of 300 quarto pages, prepared in 1809, was printed at the Serampur press. In 1817 he published A View of China for Philosophical Purposes. In this year the University of Glasgow conferred upon him the degree of doctor of divinity. In 1818 the translation of the entire Bible was completed, in part with the aid of Dr. Milne, and was printed in
1821. This version is said to be too literal, and not idiomatic. But it was the first attempt, and the difficulties were enormous. He was convinced of the necessity of a thorough revision, and hoped to be able to revise the work. The Old Testament formed 21 volumes 12mo. His most laborious literary work was the Chinese dictionary, published in 1821 by the East India Company at an expense of £15,000. Neither the value and importance of this work nor its stupendous difficulty in that stage of the missionary enterprise can be overstated. In 1824, for the purpose of recruiting his health and awakening an interest in the mission, he visited England, where he spent two years. Everywhere he was received with distinction by civil and religious bodies. He had an audience with George IV., to whom he presented a copy of the Sacred Scriptures in Chinese. In 1826 he returned to China. Too not vigorous, he continued his public labors for nine years more, devoting himself more than ever to the missionary work, preaching, translating and distributing publications among the Chinese. He conducted religious services on the Sabbath, both in English and Chinese. In 1832 he writes: "I have been 25 years in China, and am now beginning to see the work prosper. By the press we have been able to scatter knowledge far and wide." He accompanied Lord Napier to Canton as interpreter in negotiating a treaty with the Chinese Government, and died there August 1, 1834. Among the good works of his life was his work with Dr. Milne in founding the Anglo-Chinese College at Malacca (now at Hongkong). For building of this college he subscribed £1,000 and for its maintenance £100 each year.

Besides the works mentioned, he published "Hore Sinica," being translations from the popular literature of the Chinese, and Chinese Miscellany.

MORSI: A town in Berar, India, situated 31 miles N. E. by N. of Amsot. Population, 7,000, of whom 5,700 are Hindus. Station of the Kurku Indian Hill Mission (1895), with (1902) 1 missionary and his wife.

MORTLOCK ISLANDS: A group of Micronesian coral islands included in the Carolines. They have been partly Christianized and the work is under the supervision of the ABCFM station at Ruk, and the workers are in the main supported by the Hawaiian Evangelical Association. The largest island in the Mortlock group is Lukanor, where there are about 900 Christians. The Bible was translated into the Mortlock language in 1884 by missionaries of the ABCFM.

MOSCHI: A village in German East Africa, situated in Majagga region on the S. slopes of Mt. Kilima Njaro. Station of the Leipzig Mission Society (1896), with (1903) 4 missionaries, one with his wife; 4 places of worship, 1 boarding school, 2 day schools, 1 printing press, and 59 professed Christians.

MOSHTLA: A village in the Transvaal, South Africa, situated in the Bushveld about 30 miles N. of Pretoria. Station of the Hermannsburg Mission Society (1867), with (1901) 1 missionary, 2 native workers, 4 outstations, 2 places of worship, 3 day schools, and 758 professed Christians.

MOSUL: A town in Mesopotamia, Asiatic Turkey, capital of the province of Mosul, situated on the right bank of the Tigris River, 220 miles N. W. of Baghdad. The site of ancient Nineveh is on the opposite side of the river. The climate is hot and trying to Europeans, Population, 61,000. It was occupied as a station first by the ABCFM, then transferred to the PN, and by it transferred to the CMS, who now have (1903) 1 missionary and his wife, 2 women missionaries, 6 native workers, 3 day schools, 1 dispensary, and 76 professed Christians, of whom 26 are communicants.

MOSQUITIA, or MOSQUITO COAST: A department of Nicaragua, Central America, bordering on the Caribbean Sea, and inhabited by Mosquitoes, a mixed race with both African and Indian blood. For a long time it was known as the Mosquito Reservation under the government of the United States of Great Britain. It was ceded to Nicaragua in 1860, but maintains the native form of government under supervision of that country. Population about 15,000. Missionary operations are carried on by the Moravians at 14 stations.

MOTIHARI: A town in Bengal, India, capital of the Champaran district of Behar, situated on the Ganges River about 48 miles N. W. of Muzaffarpur. Population, 8,000, Hindus and Muslims. Station of the RBMU (1901), with (1903) 2 missionaries and their wives.

MOTIVE OF THE MISSIONARY ENTERPRISE: That the motives which prompt to missionary effort are powerful is evident. No weak motives would lead thousands of earnest men and women to spend their lives among uncivilized people, far from the associations and the opportunities of home and country, nor would weak motives induce the Christians of Europe and America to give millions of dollars annually for the maintenance of the missionary enterprise. In fact, various motives are involved. Some operate upon one class of minds and some upon another, and all of them do not appeal with equal force to the same person. For convenience, they may be divided into two main classes, primary and secondary, the classification is arbitrary, and there may be differences of opinion as to the class to which certain motives properly belong. Something depends upon the viewpoint.

1. The following motives, which are influential with many Christian people, may be classed as secondary:

(a) The philanthropic motive: This is stirred by the consciousness of human brotherhood, and the natural desire to relieve the appalling suffering and ignorance which prevail throughout the heathen world. Christ is the Great Physician, now as of old. As we see the prevalence of disease and misery, the untended ulcers, the sightless eyes to which the surgeon's skill could bring light, the pain-racked limbs pierced with hot needles to kill the alleged demon which causes the sufferings, and the fevered bodies which are made ten times worse by the superstitious and bungling methods of treatment, our sympathies are profoundly moved, and we freely give and
labor that such agony may be alleviated. Medical missions, with their hospitals and dispensaries, strongly appeal to this motive, as do also educational missions, with their teaching of the principles of better living. The Gospel itself is sometimes preached and supported from this motive, for it is plain that the sufferings of men are diminished, and the dignity and the worth of life increased, by the application of the principles of Christianity to human society.

(b) The intellectual motive: Missionaries have vastly increased the world's store of useful knowledge. They have opened to view hitherto vaguely known lands. They have probably done more than any other class of men to extend the store of useful knowledge of the earth's surface and its inhabitants. Geography and ethnology, entomology and zoology, botany and kindred sciences, gratefully enroll the names of missionaries among their most successful explorers, and many thoughtful men appreciate this and give their sympathy to the cause which the missionaries represent.

(c) The commercial motive: Some business men frankly assign this as the reason for their gifts. They see in the typical heathen land a representative of a higher civilization. His teaching and manner of living incidentally, but none the less really, create wants and introduce goods. He lights his house with a lamp and straightway thousands of the natives become dissatisfied with a bit of rag burning in a dish of vegetable oil. So foreign lamps are being used by millions of Chinese, Japanese, Siamese, and East Indians. The missionary marks time with a clock, and German, English, and American firms suddenly find a new and apparently limitless market for their products. He rides a bicycle on his country tours, and the result is that to-day the bicycle is as common in the cities and many of the villages of Siam and Japan as it is in the United States. His wife makes her own and her children's dresses on a sewing machine, and men thousand, curious Chinese, Japanese, and Laos are not satisfied till they have sewing machines. And so the missionary opens new markets and extends trade. He has been one of the most effective agents of modern commerce, not because the proceeds to be had lead to any personal profit from the goods which he introduced, but because of the inevitable tendencies which were set in motion by the residence of an enlightened family among unenlightened people. And this appeals to some minds as a motive of missionary interest. It begets hundreds of addresses on the reflex influence of foreign missions, and it undoubtedly secures some support for the cause from those who might not be responsive to the other arguments.

(d) The civilizing motive: This is closely allied to the preceding motives. In the ways that have been indicated, and in others that might be specified, the missionary is "the advance agent of civilization." As the product of centuries of Christian civilization, with all its customs and ideas that inculcate and exemplify the social and political ideals, he opposes slavery, polygamy, cannibalism, and infanticide. He teaches the boys to be honest, sober and thrifty, the girls to be pure, intelligent and industrious. He induces the natives to cover their nakedness, to build houses, to till the soil, to cultivate and eat wholesome food, and to practice the civic virtues. His own home and his treatment of his wife and daughters are an object lesson in a community which had always treated woman as a slave. The inertia of long-established heathenism is hard to overcome, but slowly it yields to the new power, and the beginning of civilized society gradually appears. Volumes might be filled with the testimonials of statesmen, travelers, military and naval officers to the value of missionary work from this viewpoint. Ask almost any public man to speak at a great missionary meeting, and he will probably respond with an address in which he enlarges upon this aspect of missionary effort. The British officials in India have been outspoken in their praise of the civilizing influence of missionaries. In that country, Darwin's testimony to the usefulness of missionary work in the South Seas is another classic illustration, and hundreds of others might be cited.

Dr. James S. Dennis has collected a vast mass of facts bearing on this subject in his noble volumes on Christian Missions and Social Progress, and the cumulative power of this class of evidence is doubtless a large factor in the growing respect for missions in the public mind.

(e) The historical motive: With many people the typical utilitarian appeal is not unimportant. With them the idea of saving men for the next world is the most decisive. They want to see that their money accomplishes something, to know that their investment is yielding some tangible return. They eagerly scan missionary reports to ascertain how many converts have been made, how many pupils are being taught, how many patients have been treated. To tell them of successes achieved is the surest method of inducing them to increase their gifts. Mission Boards often find it difficult to sustain interest in apparently unproductive fields, but comparatively easy to arouse enthusiasm for fields in which converts are quickly made. The churches are eager and even impatient for results. Fortunately, in many lands results have been achieved on such a magnificent scale as to satisfy this demand. But in other lands, not less important, weary years have had to be spent in preparing the soil and sowing the seed, and hard-working missionaries have been half disheartened by the insistent popular demand for accounts of baptisms before the harvest time has fairly come.

There is, apparently, no cause for the missionaries to exalt this whole class of motives. The basis of missionary appeal has noticeably changed within the last generation. Our humanitarian, commercial, and practical age is more impressed by the physical and temporal, the actual and the utilitarian. The idea of saving men for the present world appeals more strongly than the idea of saving them for the next world, and missionary writings and addresses give large emphasis to these motives. We need not and should not undervalue them. They are real. It is legitimate and Christian to seek the temporal welfare of our fellow-men, to alleviate their distresses, to exalt woman and to purify society. It is, moreover, true and to the credit of the missionary enterprise that it widens the area of the world's useful influence, introduces the conveniences and necessities of Christian civilization, and promotes wealth and power; while it is certainly reasonable that those who give should desire to see some results from their gifts and be encouraged and incited to renew the effort by the inspiring record of achievement. But these motives are, nevertheless, distinctly secondary. They are effects of the missionary enterprise.
rather than causes of it, and the true Christian would still be obliged to give and pray and work for the evangelization of the world, even if not one of the motives existed.

What, then, are the primary motives of the missionary enterprise? The following may be briefly enumerated.

(a) The soul's experience in Christ: In proportion as this is genuine and deep will we desire to convey the New Testament to others. For it was the man who felt that Christ is precious to his own heart and that He has brought strength and blessing into his own life, is immediately conscious of an impulse to give these joys to those to whom He do not have them.

Expansion is a law of the spiritual life. The inherent tendency of Christianity is to propagate itself. A living organism must grow or die. The church that is not missionary will become atrophied. All virile faith prompts its possessor to seek others. That was an exquisite touch of regenerative nature and of the powerfully illustrative of the promptings of a normal Christian experience which led Andrew, after he rose from Jesus' feet, "to find first his own brother, Simon, and say unto him, 'We have found the Messiah.'"

No external authority, however commanding, can take the place of this internal motive. It is not a request. It is not, "We pray you in Christ's stead, be ye reconciled to God." Because this is one of the primary motives of missions, the cause chiefly depends, humanly speaking, upon the piety of the Church. Other motives may and often do help for longer or shorter periods. But the real and permanent dependence must be upon a spiritual experience with Christ so rich and joyous that it makes missionary effort the natural and necessary expression of its life.

(b) The world's evident need of Christ: The fact that the heathen are naturally and spiritually debased is not, indeed, of itself sufficient to beget an overmastering and enduring desire to help them. But the fact that they need Christ, and that we have Christ, does beget such a desire in a rightly constituted mind. If we have any knowledge that at least is essential to it. In short, while we are under solemn obligation to convey that knowledge to him. It makes no difference who that man is, or where he lives, or whether he is conscious of his need, or how much inconvenience or expense we may incur in reaching him. If we can help him, we must get to him.

That is an essential part of the foreign missionary impulse. We have the revelation of God that is potential of a civilization which benefits man, an inherent and independent force. Whether men are civilized or not, whether they trade with us or not, whether present results are few or many, the Christian Church must continue its missionary work. The results of a hundred years of missionary effort are most encouraging, but if they were not, it would make little difference. The man who knows that he is working with God, for God, and in obedience to God, is not controlled by worldly ideas of success. He is content to leave results with God, knowing that His Word will not return unto Him void. After Judson had been toiling for years in Burma without making a single convert, some one wrote to him asking what the prospects were, and he flashed back, "As bright as the promises of God!" When ten years of labor in Bechuana had failed to accomplish any visible result, Mrs. Greaves, of Sheffield, wrote to Mary Moffat asking what she needed, and that heroic woman answered: "Send us a communion service." Temporary defeat has no power over the true missionary. With Lincoln, when taunted with the defeat of his plans, he exclaimed, "Defeat! if it were not one but one hundred defeats, I should still pursue the same unchanging course." To his own generation, Christ's life was a failure. So was Paul's, and Peter's, and Stephen's. But later generations saw the rich fruitage. Like them, the true missionary toils from motives which are independent of present appearances. If Jehovah is the only true God, the whole world ought to be told about Him. If Jesus Christ is our salvation, He can be the salvation of others, and it is our imperative duty to carry or send the good news. There may be questions as to method, but no objection lies against the foreign missionary activity and zeal. We do not hear so much as our fathers heard of the motive of salvation of the heathen. That consideration appears to be gradually drifting into the background. Agatho refers to dwell upon the blessings of faith rather than upon the consequences of unbelief. And yet, if we believe that Christ is our life, it is difficult to avoid the conclusion that without Christ is death. Various statements and figures are used in the Gospels to express the condition of those who know not Christ, but whether they are interpreted literally or figuratively, their fundamental meaning is as plain as it is awful. Jesus came "to save," and salvation is from something. Nothing is gained but much is lost by ignoring facts, and the appalling fact that men are lost without Christ is a motive of the first magnitude for trying to save them.

(c) The command of Christ: "Go ye into all the world and preach the Gospel to every creature." If this were the only motive, foreign missionary work would be a mechanical performance of stern duty, the missionary merely an obedient soldier. But taken in connection with the preceding motives, it adds to them the impressive sanctions of divine authority. For Christ's word is not a request, it is not a suggestion of this sort, it is not a duty to be assigned. Paul to proclaim: "Woe is me if I preach not the Gospel." It made him plead "with tears" that men would turn to God; to become "all things to all men, that he might by all means save some;" to speed from city to city, the burden of his preaching. Moreover, "We pray you in Christ's stead, be ye reconciled to God." Because this is one of the primary motives of missions, the cause chiefly depends, humanly speaking, upon the piety of the Church. Other motives may and often do help for longer or shorter periods. But the real and permanent dependence must be upon a spiritual experience with Christ so rich and joyous that it makes missionary effort the natural and necessary expression of its life.

THE ENCYCLOPEDIA OF MISSIONS
812
enterprise which does not lie with equal force against the fundamental truths of the Christian religion.

The foreign mission cause is at some disadvantage as compared with the other enterprises in which the church is engaged in that it cannot make so strong an appeal to patriotism or self-interest. The foreign missionary impulse is really the Christ impulse. It is prompted by no selfish motive. It summons us to toil and sacrifice for races which are beyond our sight and touch naturally feel but little concern, especially as they ordinarily cling to their old faiths and sometimes resent our well-meant efforts. In these circumstances, foreign missions can effectively appeal only to those motives of spiritual experience and unselfish love and glad obedience which prompted Christ to seek a lost race. Indeed, the Master plainly declared to His disciples: "As the Father hath sent me into the world, so send I you into the world." But to these motives it does appeal as the wretchedness and guilt of old appealed to the heart of infinite love. The missionary advocate makes a grave mistake when he bases his appeal solely on financial needs. The fact that an enterprise wants money is not a sufficient reason why it should receive it, nor is the begging argument apt to secure anything deeper than the beggar's temporary dole. Our appeal should be based on those high motives which center in our relation to the Savior's love and presence and command. Paul said, "We preach not ourselves, but Christ Jesus the Lord; and ourselves your servants for Jesus' sake." "For Jesus' sake!" That is the spring of all holy living, of all noble endeavor, of all large achievement. "For Jesus' sake!" the missionary goes into distant lands. "For Jesus' sake!" he toils and prays for the salvation of his fellow-men. And "for Jesus' sake!" Christians at home ought to sustain those who go. The searching and tender words of Christ to Peter comprehend the whole matter, "Lovest thou me?" then "feed my sheep."
Africa, situated in the Transkei district on the Indwe River, 28 miles S. E. of Queenstown. Station of the South African Baptist Mission Society, with 1 missionary and his wife and 1 woman missionary. Name sometimes written Mputola.

MFWAPWA. See Mpapwa.

MSALABANI: Station of the UM in German East Africa, situated in the Usambara region, about 30 miles W. S. W. of Tanga. It was established in 1875 and has been called Magila. The name Magila having now been applied to the whole district, the station has been renamed Msalabani, which means “at the Cross.” It now (1903) has 4 missionaries, 12 elementary and 2 higher schools, and 1,071 professed Christians.

MUAKERERI: A settlement in German East Africa, in the Konde District, N. of Lake Nyasa, about 25 miles N. W. of the northern end of the lake. Station of the Berlin Missionary Society (1859), with (1903) 1 missionary, 4 native workers, 1 day school, and 49 professed Christians, of whom 26 are communicants. Name sometimes written Musakalela.

MUANG NAN: A town in Siam in the Laos district, situated on the Me Nan, about 125 miles E. of Cheung Mai. Station of the PN (1894), with (1903) 3 missionaries and their wives, 3 native workers, 1 Sunday school, 1 dispensary, 1 day school, and 57 professed Christians. Name sometimes written Nan.

MUANG PRAA: A town in Siam, in the Laos district, situated on the Me Yong, about 65 miles S. E. of Lakawn. Station of the PN (1893), with (1903) 1 missionary and his wife, 2 native workers, 16 outstations, 2 places of worship, 2 Sunday schools, 1 day school, 1 boarding school, 1 dispensary, 1 hospital, and 220 professed Christians, of whom 120 are communicants. Name sometimes written Pre.

MUDEN: A village in Natal, South Africa, situated in the Weenen district on the Mooi River, about 12 miles N. W. of Greytown. Station of the Hermannsburg Missionary Society (1859), with (1903) 2 missionaries, one with his wife; 9 native workers, 3 places of worship, 3 day schools, 2 outstations, and 593 professed Christians, of whom 175 are communicants.

MUFINDI: A settlement in German East Africa, in the Hethland district, situated on the Ngolo River, about 120 miles N. E. of the northern end of Lake Nyasa and about 420 miles S. W. of Dar es Salam on the shore of the Indian Ocean. Station of the Berlin Mission Society (1899), with (1903) 2 missionaries, one with his wife, and 15 professed Christians. The station will be removed soon to a more populous district.

MUHANGA: A settlement in German East Africa, situated on the Lukosse River, about 50 miles N. E. of Mufindi. Station of the Berlin Mission Society (1899), with (1903) 1 missionary and 4 outstations.

MUHLENBERG: A settlement in Liberia, West Africa, situated on the St. Paul’s River, about 46 miles N. E. of Monrovia. Station of the ELGS (1860), with (1903) 5 missionaries, two of them with their wives; 2 women missionaries, 6 outstations, 6 day schools, 2 boarding schools, 1 dispensary, 1 industrial school, and 110 professed Christians.

MUKDEN: A town, the capital of Manchuria, China, situated in the province of Liao-tung, on the Hur-ho, 110 miles N. E. of New-chwang. It was the former residence of the present reigning dynasty of China, dating from 1625. The streets are broad and straight. Population, 250,000.

MUKIMVIKA: A village in Angola, Africa, situated on the left bank of the Congo River at its mouth. Station of the Swedish National Evangelical Miss. Association (1892), with (1901) 1 missionary and his wife, 2 women missionaries, 9 native workers, 4 outstations, 1 Sunday school, 2 day schools, 1 dispensary, 1 hospital, and 1 dispensary.

MUKIMBUNGU: A settlement in Congo Free State, Africa, situated on the right bank of the Congo River. Station of the Swedish National Evangelical Miss. Association (1892), with (1901) 1 missionary and his wife; 2 native missionaries, 17 native workers, 15 outstations, 1 place of worship, 1 Sunday school, 1 boarding school, 1 college, 1 dispensary, and 392 professed Christians.

MULANGO: A settlement in British East Africa, not far from Mt. Kenia. Station of the Leipzig Mission Society (1899), with (1903) 2 missionaries, one with his wife; 9 outstations, 1 place of worship, 1 day school.

MULKI: A town in Madras, India, situated in the district of South Kanara on the W. coast, 13 miles N. by W. of Mangalore. Population, 5,000. Station of the Berlin Mission Society (1845), with (1903) 2 missionaries and their wives, 6 native workers, 6 outstations, 7 day schools, 1 boarding school, and 800 professed Christians, of whom 436 are communicants.

MULLENS, Joseph: Born in London, England, 1820; entered Coward College, 1837; graduated, 1841, at the London University; ordained, 1843, and embarked the same year for Calcutta as a missionary of the LMS. In 1865, after visiting the missions in India and Ceylon, he sailed for England to be assistant secretary with Dr. Tidman. On Dr. Tidman's death he became foreign secretary of the LMS. In 1870 he visited the United States as delegate of the London Society to the American Board. In 1877, when he had been in the service of the LMS for 17 years, he visited Madagascar in the interest of the missionary work. In 1875 Dr. Mullens accompanied several missionaries to assist in the organization of a mission on Lake Tanganyika, Central Africa. But at Mpwapwa he was overcome by exposure and fatigue and died of tertianis July 10. The degree of doctor of divinity was conferred upon him in 1851 by Williams College, Mass., and in 1888 by the University of Edinburgh. He published Twelve Months in Madagascar, A Brief Review of Ten Years Missionary Labor in India between 1862 and 1863, London and Calcutta Compared in their Heathenism, Privileges and Prospects.

MULTAN: A city in the Punjab, India, situated...
factures. A very ancient town existing at the north of Alexander the Great. Altitude, 420 feet. Climate warm and rainfall light. Population (1901), 87,394, of whom 43,090 are Muslims and 34,000 are Hindus. Station of the CMS (1856), with (1903) 2 missionaries, 4 women missionaries, 9 native workers, 1 place of worship, 1 day school, 2 boarding schools, and 115 professed Christians, of whom 37 are communicants.

MULTANI LANGUAGE: An Aryan language of the Indo branch, used by the people of Multan and Deranar, of Muzafergarh, and of the state of Bhawalpur. It is also spoken by the Khetran tribe in the territory behind the Suleimani Mountains. Altogether about two and a half millions of the people of Northwestern India speak Multani. They themselves call it Jagduli or Jatki, the name Multani being given to it by neighboring peoples. The language is allied to the Punjabi and to the Sindhi. The Arabic character is used in writing it.

MULVI BAZAAR: A village in Assam, India, situated in Sylhet district, about 30 miles S. W. of Sylhet. Station of the WCM, with (1903) 1 missionary and his wife, 15 native workers, 1 boarding school, and 15 professed Christians. Name sometimes written Mauvi Bazaar.

MURGGI: A town in the Central Provinces, India, situated 135 miles S. E. by E. of Bilaspur. Population, 5,000. Station of the FCMS (1887), with (1901) 1 missionary and his wife, 10 native workers, 1 outstation, 10 Sunday schools, 1 place of worship, 1 female training school, 1 dispensary, 1 hospital, 1 medical class, 1 lepers' institute, and 90 professed Christians. Station also of the Mission to Lepers in India and the East (1897), with 1 place of worship and 1 lepers' home for untainted children of lepers.

MUNSON, Samuel: Born at New Sharon, Me., March 23, 1804; graduated at Bowdoin College 1829, Andover Theological Seminary 1832; ordained October 10; sailed June 10, 1833, as a missionary of the ABCFM, with Rev. Henry Lyman, under instructions to explore the East Indian Archipelago, and reached Batavia September 30. In April, 1834, they undertook to visit the Batak country and were both killed. For an account of their expedition and death, see the article on Mr. Henry Lyman.

MURHU: A village in Bengal, India, situated in Chota Nagpur, 30 miles S. by W. of Ranchi. Station of the SPG, with (1903) 22 native workers, 1 place of worship, 6 day schools, 1 boarding school, and 2,071 professed Christians, of whom 1,028 are communicants.

MURRAYTOWN: A village in Sierra Leone, Africa, situated about 5 miles W. of Freetown. Station of the UMFC (1891), with (1901) 1 missionary and his wife, 12 native workers, 1 outstation, 2 places of worship, 2 Sunday schools, and 311 professed Christians.

MUSCAT. See MASCAT.

MUSH: A city of Eastern Turkey, 83 miles southeast of Erzurum, in a large plain, one of the most populous of the whole section. The population is Kurdish and Armenian. The Kurds are very fierce, and treat the Christians most oppressively. The district of Sasun, notorious as the scene of horrible massacres of Armenians in 1893, and again in 1904, lies S. W. of Mush in the same administrative division. The name is also written Moosh and Musch.

MUSIC AND MISSIONS: Missions touch music at two points: 1. The missionary as a man of culture studies the poetry and songs of the people among whom he labors. 2. After a mission has become successful the newly formed churches are helped in their worship, especially in the department of Praise, and this demands a thorough knowledge of the foundation principles of music. As to the study of the music of missionaries we may cite some examples. Rev. A. L. Riggs has made a very interesting study of Dakota music, publishing specimens of songs of love and war, songs of sacred mysteries and social songs. They are extremely simple, and abound with the repetitions so natural to untutored minds. A widow's lament expresses the deepest heartweariness and despair.

Their music is also very simple. It consists of melody alone, with rude accompaniment, mainly for marking time. The men sing, while the women sound single falsetto notes, ai, at, a, keeping time with drums. They do not appreciate harmony. The minor key is their favorite, tho the major key occurs in their war songs. Their instruments are the drum, rattle, and pipe. The drum is made of segments of deer hoofs tied to a tapering rod of wood. The conger uses a gourd shell with a few pebbles inside. The usual pipe is a sumac flagged, nineteen inches long, with a diameter of five-eighths of an inch. A peculiar partition forms the whistle. Six notes are burnt on the upper side, and a brass thimble forms the mouthpiece. The pitch is A Prime, changed to G Prime by a seventh hole. Sometimes the pipe is made of the long wing or thigh-bone of a crane or swan. Dakota music is rude, but its power is measured by the adaptation of its wild melody to savage life in the wilderness, where in the misty moonlight the night air bears the plaintive sounds, with the hollow base of the drum-beat, along the waste, full of possible war whoops, and where each bush may hide an enemy.

Dr. S. Wells Williams has given in his Middle Kingdom a graphic description of Chinese music and musical instruments. However small their attainments in both theory and practice, no nation gives to music a higher place. Confucius taught that it was essential to good government, harmonizing the different ranks in society, and causing them all to move on in unison. The Chinese have sought to develop instrumental rather than vocal music.

The names of the notes, ascending regularly from the first line of the staff to the third space above it, are as follows: first line, he; first space, se; then i, chang, che, kung, fen, liu, ou; first space above, t, then chang, che, kung, fen, the last note being on the third space above.

The real tone cannot be represented by our staff. The second octave is denoted by affixing the sign jin, a man, to the simple notes. No chromatic scale exists—at least no instrument is made to express flat and sharp notes.

There are two kinds of music in China—the northern and the southern. The octave in the former seems to have had only six notes, while the eight-tone scale prevails in more cultivated circles. Music is written for only a few in-
Music and Missions

Instruments, and the notation good for one is useless for another, because marks meaning to push, fillip, hook, etc., are added to denote the mode of playing; indeed, the combinations are so complex that the Chinese usually play by ear. All music is in common time; no triple measures are used. Of harmony and counterpoint they know nothing. Marks to regulate the expression are unknown, nor are tunes set to any key.

No description can do justice to their vocal music, and composers can design notes seem to issue from the larynx and nose; tongue, teeth, and lips having little to do with them. Singing is usually in a falsetto key, somewhere between a squeal and a scream, and yet it is plaintive and soft, and not without a certain sweetness.

Chinese musical literature is voluminous. A work on beating the drum dates from A.D. 860, and contains a list of 129 symphonies. Among 12 instruments described in the chrestomathy are 17 drums of various sizes, then gongs, cymbals, tambourines, and musical vases in considerable sweetness.

The interval is tuned to one-fifth from that. The interval is increased to two pegs at the smaller end. The sound of the hand in playing. The instrument itself is ancient, and is named kín, "to prohibit," because it restrains evil passions. It is tuned, four feet long and eighteen inches wide, convex above and flat below, where two holes open into hollows. Seven strings of silk pass over a bridge through the board at the wide end, and are fastened by nuts beneath. They are fastened to two pegs at the smaller end. The sounding-board is divided by thirteen studs, so placed that the strings are divided into halves, thirds, quarters, fifths, sixths, and eighths, but no sevenths. The seven strings enclose the compass of a ninth, or two-fifths, the middle one being treated like A on the violin, and the outer ones tuned to one-fifth from that. The interval is tuned to one-fifth from that. The outer strings are divided into halves, thirds, and a major tone in the fifth. The Chinese leave the narrow end of the hole in the half tone, and all the notes on the board. The sounds are very attenuated. The proper intervals, and fastened on a sounding board. The harsh grating of this wretched machine is very popular among the natives.

The hú (gourd) is made of bamboo, and pierced with ten holes. The two-stringed fiddle is merely a bamboo split stuck into a bamboo cylinder, with two strings fastened on pegs at one end of the stick and passing over a bridge on the cylinder to the other end. They are tuned at intervals of a fifth. As the bow passes between the two strings much playing is done on the wrong string. The harsh grating of this wretched machine is very popular among the natives.

The ti kin (crowning lute) has a coconut shell for its body, and is even more dissonant than the last. The sángh kín is an embryo piano, consisting of brass wires or different lengths, fastened at proper intervals, and fastened on a sounding board. The sounds are very attenuated. The sángh, in like manner, is an embryo organ, a cone-shaped box, with a mouthpiece to blow in, and thirteen reeds of different lengths, inserted in the top, the valves of some opening upward and others downward. They are provided with holes also that may be opened or closed by the player. It is very ancient. Some think it the organ invented by Jubal (Gen. iv: 21). The Chinese think it more curious than useful.

Their wind instruments are numerous. The huäng tîh (flute) is twice the length of our pipe, made of bamboo, and pierced with ten holes. The two near the end are not used. The mouth hole is one-third of the way from the top. The chu tîh (clarinet) takes the lead in musical performances. It has seven holes, but no keys. Its tones are shrill and deafening, and therefore popular. A street musician fits a flageolet, or small clarinet, to his nose, slings a small drum under one shoulder, hangs a frame of four cymbals on his breast, and with a couple of monkeys sallies forth, a peripatetic choir and orchestra.

The stem of the horn is retractable, like a trombone. There are other varieties, however. The lo (gong) is the standard type of Chinese music. A crashing harmony of rapid blows on this, with a rattling accompaniment of drums, and a crackling symphony of shrillness from clarinet and cymbal, is their beau ideal of music. They have heard good Portuguese music for ages, but have never adopted either an instrument or a tune.

A Chinese band makes the European think of Hogarth's "Enraged Musician." Each performer seems to have his own tune, and bent on drowning the noise of all the rest; yet they keep good time, only no two of them are tuned on the same key.

The Rev. Dr. Eli Smith, of the American Syria Mission, found that hymns composed in Arabic measures could seldom be sung in our tunes, and our musicians were puzzled by the intervals in Arab music. On the other hand, Arabs could not repeat our scale. A treatise on Arab music by Michael Mishakah of Damascus explained the difficulty; and from that, with Rosegarten's edition of Isphahany's Book of Odes, and Faraby on Ancient Arab Music, Dr. Smith wrote a valuable paper which was published in the American Oriental Society. The principles are quite near to those of Persian and Turkish music also. He says that sounds are naturally divided into groups of seven, rising one above the other, each the response to the one below, and the bass of the one above. The group is called an octave. The first is called yeğdā, then bēhrān, īrak, rest, dugāh, sigāh, and yeğdāgh. This is the first octave. The second is nāwā, houseyn, āuj, māhār, mukhayyar, būrṣā, and me­ṣākhrān. The last is the response to yeğdāgh.
The first of the third octave is remel iity, the response to maa. The next octave is the response to the response of maau, and so on ad infinitum. So in the first series below yeqah they say the base to jehar, to sigah, and so through the list, then the base to the base of jehar, etc. The intervals between these notes are musical intervals, and Chapter IV. to musical instruments, describing stringed instruments like et ud (literally the wood, whence our word “lute”) the Arab guitar, the kemerej, or Arab fiddle, with a coconut shell for its body, like the Chinese tie kii, the tumbur, a kind of drum, and the kanun, corresponding to the yang kin of the Chinese orchestra, only, it would seem, a better instrument. Then of wind instruments, the nay or flute, kerif, mazzar, suned, urghan (organ), see Chinese sang), and jewah.

In India, music has been nearly much more scientific than at present. There idolatry has degraded music, and the martial music of the country has changed with its government. Its religion now has little to do with music, except in the prayers of the temples. Operas are unknown, and theatrical music is of a low order. Marriages furnish the chief occasions for musical display. There are many kinds of musical instruments, as drums, trumpets, horns, cymbals, hautboys, and violins, but the performers have little skill and less taste. The wedding orchestra varies from six to twenty performers. Singing is an accomplishment of women of doubtful morality, who are much employed for this purpose by the wealthy.

Christianity is changing all this, not generally, it is true, but gradually and permanently, for the native convert must give vent to his new joy in songs of praise, and they do this not only in the church, but also in their families and when alone. Even before conversion, music does much to prepare the way.

A favorite and most successful mode of introducing the Gospel in western India is the kiritan, i.e., solo singing by native evangelists with orchestral accompaniment. In September, 1880, Rev. Mr. Bruce of Satara visited Wai with his kiritan choir. The people flocked to hear, especially as the leader had been a Muslim. Hundreds stood outside of the building in the rain, and listened for the first time to the way of salvation through a Redeemer. The whole city was moved, and Christ was the great topic of conversation for many days.

Rev. H. Ballantine, called the Dr. Watts of the Mahratta Mission, prepared a hymnal for the churches, and another for the children, which met with great acceptance among the people.

Rev. E. Webb was an enthusiast in his researches into the hymns of Tamil poetry. It is extremely elaborate in its rhetorical construction. In 1853 he published a Tamil hymn-book, containing hymns in our meter, children’s hymns, and chants with music, but the largest part of the volume was made up of hymns in native meters. Many copies were taken at once by the English missions in Tanjore and Tinnevelly, and singing was introduced in congregations of the American missions in places where it had been unknown before. An edition of 2,000 copies was soon exhausted, and a new one was issued in 1855. The people heard listlessly the most important truth in prose, they give eager attention to the same truth when versified and sung. In October, 1860, Mr. Webb gave an account of Tamil versification to the American Oriental Society, defining the two kinds of syllables, then the feet and the stanzas in which they were combined. Those the natives could see no measure in our verses, or melody in our music, yet hymns written in their own meters, and set to their own melodies, are extremely popular. He read some of them in Tamil with elaborate rhymes in the prosody and alliteration. He described also the music of the Hindus, known all over India under the same Sanskrit titles, and indicated its relation to our own scale. Ancient India excelled Greece in her cultivation of music, and some of the tunes have appeared for centuries, those of the best periods still exist, and for these the hymns were composed.

The other missions there may not have been the same zeal for native music, yet in them all, as soon as men received “the light of the knowledge of the glory of God in the face of Jesus Christ,” they feel impelled to praise the name of the Lord, and missionaries are glad to assist the effort to praise as soon as the spirit of praise appears.

It is interesting to look over the record of the beginnings of work on this line in the various missions. In Turkey, they at that time had few hymns ready for use, yet they could not wait to prepare more, but in 1850 issued an Armenian hymn-book of only 55 pages. This was followed in 1853 by one in Armano-Turkish, i.e., Turkish in Armenian letters, of 112 pages, and the next year saw an Armenian Hymn and Tune Book of 300 pages, so rapidly grew their hymnology. That same year (1854) the Greek hymn-book appeared, of 100 pages, the 16 pages of hymns had been printed as early as 1833. All these were 16mo, but in 1855 appeared a work on church music, in Armenian, of 44 pages, 8vo. Then in the same language a hymn and tune book for children was published in 1860, 46 pages 8vo. This was followed by 24 8vo pages of additional hymns and music in 1863. It seemed as if the good men kept on composing hymns, and, as fast as they did so, the churches could not wait, but had them printed for use at once. Next year (1864) appeared a hymnal of 36 pages in Arabic-Turkish, i.e., Turkish in Arabic type. The following year four hymns were printed on one 8vo sheet, and in 1866 a supplement to the Armano-Turkish hymn-book, of 88

pages 16mo, made its appearance. Next came an Armenian Sunday-school hymn-book of 134 16mo pages, followed next year by a Sunday-school hymn and tune book in the same language, of 128 8vo pages. The year 1869 saw a volume of Armenian hymns and prayers of 192 pages 16mo. The same year welcomed a Greco-Turkish hymn-book of 264 16mo pages, and a second edition came out in 1871. In 1873 the Armenian hymn-book had grown to 426 pages, and four years later a fresh edition contained 430 pages. This was followed by a supplement of 56 8vo pages to the Armenian hymn and tune book in 1881, the year following a hymn-book of 24 12mo pages, and in 1885 a hymn and tune book of 64 8vo pages. The hymn-book in 1872 had grown to 154 16mo pages. In 1874, while the mission was still in the hands of the American Board, 200 pages of the Psalms were printed about 1868. The same year gave 200 pages of children’s hymns to the Sunday schools, and before the mission passed into the hands of the Presbyterians a hymn-book appeared, first of 200 pages, and after that of 500. About 1874 a hymn and tune book was printed, containing an introduction teaching how to read our musical notation. This was afterward printed separately, 30 pages 8vo. Since then hymns have been prepared to suit the Arab tunes, and are now published with the tunes. A curious feature of these hymns and tune books is that the music has to be reversed to suit the Arabic system of writing from right to left. In 1882 the Psalms in verse were printed for the use of the United and Reformed Missions, hymns alone, 400 18mo pages; and with musical notation, 600 12mo pages. In 1885 a new 8vo hymn and tune book, containing 327 hymns and 280 tunes, was prepared by Rev. Samuel Jessup and Rev. George Ford, and a second edition was called for in 1889. A hymn-book without tunes appeared in 1885, with 418 pages 18mo. This advanced to a second edition in 1887, and a third in 1889, showing a very encouraging demand for such a work.

In the Persian Mission the hymn-books have gone through several editions. The last, issued in 1886, has about 300 hymns, mostly translations, but adapted to the expression of Christian feeling in Persia, and also to the wants of the young in their Oriental homes.

Music has been taught by the missionaries. The popular tunes are those used in congregations in the United States. The chants of the ancient Syriac and ancient Armenian are used in their religious worship, and are very popular. The words, of course, are in the vernacular, and so the congregations can join. They are used especially in chanting the Psalms, and also some other portions of the Scripture, such as are found in books for responsive reading at home.

MUSKOGI LANGUAGE. See Creek.

MUSSOOREE: A town and sanitarium in the United Provinces, India, situated on the right bank of the Jumna River, 23 miles N. N. E. of Bhartpur. This place was mentioned by Ptolemy as Modoura of the gods. Population (1901), 60,042, of whom 48,000 are Hindus and 10,500 are Muslims. Station of the BMS (1893), with (1903) 1 missionary and his wife, 10 native workers, 1 outbreak, 3 Sunday schools, 2 day schools, and 35 professed Christians, of whom 18 are communicants. Station also of the CMS (1878), with (1903) 1 missionary, 2 women missionaries, 20 native workers, 1 place of worship, 2 schools, and 64 professed Christians, of whom 30 are communicants. Station also of the ME, with (1903) 1 missionary and wife, 2 women missionaries, 28 native workers, 3 places of worship, 2 Sunday schools, 8 day schools and 731 professed Christians, of whom 454 are communicants.

MUTUNGU: A village of Ugana, Africa, situated near Mengo, Uganda. Station of the CMS (1902), with 2 missionaries and 1 industrial institute.

MUTYALAPAD: A town in Madras, situated 30 miles N. E. of Jemuslandadugu, on a branch of the Penner River. Station of the SPG (1855), with (1902) 1 missionary, 80 native workers, 43 places of worship, 33 day schools, and 2,893 professed Christians, of whom 951 are communicants.

MUZAFFARNAGAR: A town of Muzaffarnagar district, United Provinces, India, situated 30 miles N. of Meerut. Population, 18,200. Hindus, Mohammedans, Jains, and a few Christians. Climate formerly very unhealthy and malarious, but lately, owing to modern sanitary improvements, it has been made much more salubrious. Station of the ME, with (1903) 28 native workers, 1 place of worship, 2 Sunday schools, 16 Sunday schools, and 1,656 professed Christians, of whom 319 are communicants. Station of the Reformed Presbyterian Church of Scotland, with (1901) 1 missionary, 3 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 1 lepers’ asylum, and 195 professed Christians.

MUZAFFARPUR: A town in Bengal, India, 35 miles north-northeast of Patna. Population, 49,000, of whom 35,000 are Hindus. It is well built and clean, with good schools, temples, courthouses, and other public buildings. Has a large trade. Station of the Gomser Mission Society, with (1904) 1 native missionary, 1 native worker, 1 full-day school, 1 day school, 1 orphanage, and 90 professed Christians. Society spells the name Muzaffarpur. Station also of the ME, with (1903) 16 native workers, 3 places of worship, 7 Sunday schools, 2 day schools, and 328 professed Christians, of whom 283 are communicants.

MYENYANE: A settlement in Cape Colony, South Africa, situated 12 miles S. of Graaff Reinet, 23 miles W. of Kokstad. Station of the Moravian Missions (1888), with (1903) 3 missionaries, of whom 286 are communicants.
MVUMI: A settlement in German East Africa, situated in the Chigo District, about 20 miles W. by N. of Mopsowa. Station of the CMS (1885), with (1903) 1 missionary and his wife, 1 native worker, 2 outstations, 5 day schools, and 2 professed Christians.

MWENA: A settlement in the Congo Free State, Africa, situated near the headwaters of the Cuialaha, about 25 miles S. W. of Lake Mweru. Station of the PBS, with 2 missionaries, one with his wife.

MWENZO: A settlement in British Central Africa, situated on the Stevenson Road, about 100 miles W. by N. of Karonga, on the W. shore of Lake Nyasa. Station of the UFS, with (1908) 1 missionary and his wife, 2 native workers, 4 outstations, 5 day schools, 1 dispensary, and 14 professed Christians.

MYINGYAN: A town in Burma, British India, situated on the left bank of the Irawadi River, 60 miles N. W. of Meiktila, with which it is connected by railroad. Population, 19,000, of whom 17,000 are Buddhists. Station of the ABMU (1887), with (1903) 2 missionaries and their wives, 8 native workers, 1 Sunday school, 1 day school, 1 dispensary, 1 hospital, and 27 professed Christians.

MYITKYINA: A town in Burma, British India, situated in the Kachin region at the extremity of the railway, 75 miles N. by E. of Bhamo. Station of the ABMU (1894), with (1903) 1 missionary with his wife, 5 native workers, 2 outstations, 2 places of worship, 1 Sunday school, 1 boarding school, 1 day school, and 150 professed Christians, of whom 50 are communicants.

MYMENSINGH. See MAIMENSING.

MYNPURI. See MAINPURI.

MYSORE: A large and important native state in India. Its territory is entirely surrounded by the British dominions belonging to the presidency of Madras. It lies at the point where the ranges of the Western and Eastern Ghats come together, and most of its territory is on the elevated plateau lying between these ranges. Its limits of north latitude are 11° 40' and 15°, and of east longitude 74° 40' and 78° 30'. The area is 29,444 square miles, and the population, 5,539,399, according to the census of 1901. Its surface is much broken by rocky hills and ravines; the drainage of the country is almost wholly to the east; in the northwest one river falls in a fine cascade over the precipitous wall of the Western Ghats, and seeks the Indian Ocean. Otherwise the streams all reach the Bay of Bengal through the Tungabhadra on the north, the Kaveri on the south, and several smaller rivers between these two more important streams. These rivers, like almost all those of India, while useless for navigation, support large systems of artificial irrigation. Mysore was included in the territories ruled from time immemorial by old prehistoric Hindu dynasties of South India, whose existence can dimly be traced in the uncertain light of early Indian times. The last of these dynasties was overthrown by the Mohammedans in 1565. As the latter in turn began to lose their power a Hindu chief seized the fort of Serengapatam in 1610, and became the founder of the present Mysore principality. The Hindu rulers were displaced by Mohammedans under Haider Ali in the latter part of the 18th century. But after the English finally defeated his son, Tipu Seihb, in 1799, they replaced the old Hindu family on the throne of Mysore. Of the entire population the Hindus amount to nearly 95 per cent., Mohammedans to a little less than 5 per cent. The total number of Christians is given as 34,403. Of these, 25,600 are native converts. About one-fourth of the Christians are Protestants, the others Roman Catholics. The language almost universally used is Kannarese. The cultivation of the Karnarese is greatly indebted to the missionaries; grammars and dictionaries, a translation of the Bible and the beginnings of a worthy native literature are due to missionary labor.

The first Protestant mission in Mysore was that of the Society for the Propagation of the Gospel, established at Bangalore in 1817. In 1820 the London Missionary Society planted a station at the same city. The Hindu government seems to have been unfriendly to the work of the missionaries, and opportunities for preaching in Kannarese—the vernacular of the people—were at first greatly curtailed by this fact. The first few years of the mission were not prosperous, but since its earlier difficulties have been overcome, it has had a career of much success. The Wesleyans also entered Mysore, planting their principal station in the city of that name; shortly after the London Society entered Bangalore. Both these missions have now many stations throughout the state.

MYSORE: A town, capital of the native state of Mysore, India, situated 10 miles S. W. of Serengapatam. In 1642 a fort was built here. Population (1901), 68,111. Station of the CEZ (1892), now temporarily vacant. Station also of the WMS, with (1903) 4 missionaries, three of them, and opportunities for preaching in Kannarese—the vernacular of the people—were at first greatly curtailed by this fact. The first few years of the mission were not prosperous, but since its earlier difficulties have been overcome, it has had a career of much success. The Wesleyans also entered Mysore, planting their principal station in the city of that name; shortly after the London Society entered Bangalore. Both these missions have now many stations throughout the state.

MYSORE: A town, capital of the native state of Mysore, India, situated 10 miles S. W. of Serengapatam. In 1642 a fort was built here. Population (1901), 68,111. Station of the CEZ (1892), now temporarily vacant. Station also of the WMS, with (1903) 4 missionaries, three of them, with their wives; 12 native workers, 8 outstations, 12 places of worship, 7 Sunday schools, 27 day schools, 2 boarding schools, 1 theological class, and 270 professed Christians, of whom 211 are communicants.
municants. Some write the name Nabus. Station also of the BMS (1888), with (1903) 1 missionary and his wife, 8 native workers, 4 outstations, 1 day school, and 129 professed Christians.

NADIAH. See NARIAH.

NAGANO: A town in Central Provinces, India, situated on the railroad midway between Tokio and Kioto. It is in the midst of a broad, fertile plain, surrounded by thriving towns and villages, and is connected with Gifu by an almost continuous street of 20 miles. Population (1898), 244,145. It is the central point of the Nagano district, and its importance as a base of operations is fully recognized. Such a strategic position for missions was early availed of by the Reformed (Dutch) Church (U. S. A.), but there is no representative of that mission there at present. Station of the PS (1887), with (1903) 2 missionaries and their wives, 2 women missionaries, 13 native workers, 28 places of worship, 11 Sunday schools, 1 boarding school, and 800 professed Christians, of whom 375 are communicants. Station also of the Methodist Protestant Church (1885), with (1903) 3 missionaries with their wives, 2 women missionaries, 8 native workers, 9 outstations, 1 place of worship, 12 Sunday schools, 1 theological school, and 60 professed Christians. Station of the UFS (1845), with (1901) 1 missionary and his wife, 3 women missionaries, 6 native workers, 2 outstations, 1 place of worship, 1 Sunday school, and 77 outstations, 1 place of worship, 12 Sunday schools, and 2,990 professed Christians. Name also written Nagarei.

NAGARECOI: A Christian village in Travancore, India, situated 40 miles S. S. W. of Tinnenwell and about 1 mile from Kotar. Station of the LMS (1890), with (1903) 3 missionaries and their wives, 2 women missionaries, 163 native workers, 77 outstations, 1 printing house, 89 day schools, 1 boarding school, 1 college, 1 orphanage, 11,833 professed Christians, of whom 2,055 are communicants. Post of the Salvation Army also. The name is also written Nagercoil.

NAGASAKI: A town on the island of Kiui-shiu, Japan, the principal seaport of the western coast. It is picturesquely situated at the head of a small inlet four miles long and a mile wide. It has thus one of the finest harbors in the world. The surrounding hills, 1,500 feet high, and the numerous small islands with which the harbor is dotted add greatly to its beauty. The city is laid out with great regularity, in rectangles. A stream of water flows through it. There is a foreign concession separated from the main city by an arm of the bay. For more than 200 years this is the only port where foreigners were allowed to land. A hospital was established here in 1861—the oldest now in Japan, and there is a fine government school, in which hundreds of young Japanese are instructed in European languages and sciences. The city is noted for its temples and the magnificence of its festivals. It is also an important coaling station. The climate is salubrious, and the city is a pleasant one in which to live. Population (1898) 107,422. Station of the CMS (1869), with (1903) 1 missionary and his wife, 3 women missionaries, 3 native workers, 1 outstation, 1 place of worship, 1 Sunday school, 1 boarding school, and 163 professed Christians. Station also of the ME (1890), with (1903) 2 missionaries and their wives, 4 women missionaries, 12 native workers, 3 outstations, 2 places of worship, 2 Sunday schools, 2 boarding schools, 1 theological class, and 570 professed Christians, of whom 366 are communicants. Station also of the RCA (1859), with (1903) 2 missionaries, 2 women missionaries, 18 native workers, 5 outstations, and 125 professed Christians, 1 place of worship, 3 Sunday schools, 2 boarding schools, and 1 college. Station also of the SBC (1896), with (1903) 1 missionary and his wife, 1 native worker, 2 outstations, 1 Sunday school, and 12 professed Christians.

NAGPUR: City in Central Provinces, India, 42 miles east-northeast of Bombay. It is a large city, but not a very fine one, altho there are many relics of its former greatness still to be seen, and the handsome tanks and gardens outside the city and the pretty scenery give the place a very attractive appearance. Climate, healthy. Population (1901), 127,734, of whom 99,000 are Hindus and 21,000 Muslims. Station of the UPS (1845), with (1903) 4 missionaries, 3 of them with their wives; 50 native workers, 5 outstations, 1 place of worship, 10 day schools, 2 higher institutions, 1 orphanage, and 240 professed Christians. Name also written Nagpoore.

NAHORUOP: A village in Sumatra, Dutch East Indies, to which has been removed the Rhenish Mission station of Sigompulon. It lies in the Batang Toru Valley, about 20 miles E. N. E. of Siboga. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 47 native workers, 7 outstations, 7 Sunday schools, 9 day schools, and 2,990 professed Christians, of whom 1,403 are communicants.

NAIDUPET: A town in Madras, India, situated on the Suvaramuuki River, about 15 miles S. of Gudur. Station of the Hermannsburg Mission Society (1867), with (1903) 3 missionaries, 2 of them with their wives; 21 native workers, 9 outstations, 1 place of worship, 10 day schools, 1 theological school, 1 industrial school, and 950 professed Christians. Some write the name Nayudupeta.

NAIHAHAT: A municipality in Bengal, India, situated on the Hugli River, about 25 miles N.
of Calcutta. Population (1891), 29,700, of whom 24,500 are Hindus. Station of the CEZ (1891), with (1903) 1 woman missionary, 11 native workers, and 4 day schools.

NAIN: A town in Labrador, situated on the E. coast. Has a good harbor. Station of the Moravian Missions (1771), being the first place occupied by them in Labrador. It now (1901) has 4 missionaries with their wives, 16 native workers, men and women; 1 day school, 1 place of worship, and 110 communicants.

NAINGOLAN: A settlement in Sumatra, Dutch East Indies, Malaysia, situated on the S. coast of Toba Island in Toba Lake. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 2 native workers, 2 day schools, 1 outstation, 1 Sunday school, and 43 professed Christians.

NAINI TAL: A town in Kumaon district, United Provinces, India, picturesquely situated on the banks of a lovely little lake which nestles among 1,000 mountains of the Ganges. It has a white sanitarium and summer resort of Europeans from the plains. Altitude, 6,400 feet. Population (1891), 7,900, chiefly Hindus. Station of the ME, with 3 missionaries and their wives, 11 native workers, 1 place of worship, 2 Sunday schools, 3 day schools, 2 boarding schools, 1 society for young people, 1 Young Women’s Christian Association, and 119 professed Christians.

NAKANONYI: A village in Uganda, Central Africa, situated 30 miles N. E. of Mengo. Station of the CMS (1895), with (1903) 1 missionary, 1 native worker, 1 day school, 2 Sunday schools, 2 day schools, 2 boarding schools, and 2,890 professed Christians, of whom 1,068 are communicants.

NAKAWN: A village in the Malay Peninsula, Siam, situated near the E. coast about 500 miles S. of Bangkok. Population, 10,000. Station of the FN (1900), with (1903) 2 missionaries, 1 with his wife; 3 native workers, 3 outstations, 93 professed Christians, 1 place of worship, 1 dispensary, and 1 day school.

NACKO: A small group of islands belonging to Nias Island, Malaysia, W. of Sumatra, Dutch East Indies. Station of the Rhenish Mission, with 1 missionary and his wife and 300 professed Christians, of whom 62 are communicants.

NALGONDA: A town in the native State of Haidarabad, India, situated 57 miles E. S. E. of Haidarabad City. Station of the ABMU (1890), with (1903) 1 missionary and his wife, 1 woman missionary, 34 native workers, 1 day school, 1 place of worship, 1 Sunday school, 1 hospital, and 964 professed Christians.

NAMATACHA: A sanitarium and settlement in Portuguese E. Africa, situated in the Lebombo Mountains and serving for the missionaries occupying stations near the coast, as at Inhambane, etc. Station of the SPG, with 4 missionaries, 3 of them with their wives; 1 native worker, 1 boarding school, 1 day school, and 50 professed Christians, of whom 12 are communicants.

NAMAQUA LANGUAGE: A very difficult language of the Afrikaner and the Hottentot group, spoken in the German Southwestern Africa, north of the Orange River. The difficulty of the language is largely due to its containing four curious smacking sounds which Europeans do not readily understand or imitate. The language has been reduced to writing by German missionaries with use of the Roman letters. Many call this language the Nama, rather than the Namaqua language.

NAMKHAM: A town in Burma, British India, situated among the Shan, 56 miles E. S. E. of Bhamo. Altitude 2,030 feet. Station of the ASMU (1893), with (1903) 2 missionaries, 1 with his wife; 15 native workers, 3 outstations, 3 places of worship, 2 Sunday schools, 1 day school, 1 boarding school, 2 dispensaries, 1 hospital, and 160 professed Christians, of whom 62 are communicants.

NAN: See MYANGNAN.

NAN-CHANG-FU: A town in the Province of Kiangsi, China, on the right bank of the Kiang-kiang, 178 miles S. E. by S. of Hanchow, the emporium of the porcelain manufacture E. of Lake Poyang. Station of the CIM (1898), with (1903) 1 missionary and his wife and 1 place of worship. Station also of the ME, with 2 missionaries and their wives, 9 native workers, 6 outstations, 6 day schools, 7 Sunday schools, 26 places of worship, and 1,316 professed Christians. Station also of the PB.

NANDGAON: A town in the Central Provinces of India, situated in the native state of the same name, of which it is the capital, and 42 miles W. by S. of Raipur. Station of the Pentecost Band of the World (1898), with (1903) 3 missionaries, 2 of them with their wives; 2 women missionaries, 2 native workers, 1 place of worship, 1 Sunday school, 1 book-room, 1 industrial school, 1 orphanage. Society writes the name Raj Nandgaon.

NANDIAL: A prosperous town in Madras, India, situated in the district of Kurnool, 108 miles E. by N. of Bellary. Population, 10,700; Hindus, 5,000; Muslims, 3,500. Station of the SPG (1854), with (1903) 3 missionaries, 110 native workers, 11 places of worship, 1 boarding school, 1 theological school, and 2,251 professes Christians, of whom 544 are communicants. Some write the name Nandial.

NANG-WA: A town in Fo-kien, China, situated 20 miles N. E. of Yen-ping-fu. Station of the CEZ (1891), with (1903) 2 women missionaries, 2 native workers, and 1 day school.

NAN-KANG-FU: A town in the Province of Kiang-si, China, situated 12 miles S. by W. of Kiu-Kiang. Station of the CIM (1887), with (1903) 1 missionary and his wife and 1 native worker. Some write the name Nan-k’ang.

NANKING: The “southern capital” of China; so called from its having been the seat of government during the Ming dynasty (1368-1644). It is situated in the Province of Kiang-su, on the south bank of the Yangtze, which makes a right angle, and borders the city on the north and west, 223 miles west of Shanghai, and almost midway between Canton and Peking. It formerly possessed one of the finest walls known, 20 miles in circuit, 70 feet high, 30 feet wide, and pierced with 13 gates. The interior of the city has much unoccupied ground. The famous Porcelain Tower, built by the Emperor Yung Loh (1403-25), was an object of the wonder and admiration of Europeans, until it was destroyed by the Tai-ping rebels during their occupancy of the city in 1853-6, at which time most of the public buildings were ruthlessly destroyed. It
was formerly a literary center, and was noted also for its industries. Cotton cloth, called nankeen, from the name of the city; satin, crépe, and pottery were all manufactured. An arsenal is located at Nanking under European superintendence, where firearms and vessels of war are manufactured. Sir Henry Pottinger signed here the famous Nanping treaty in 1842.

Not far from the city are the tombs of the emperors of the Ming dynasty, with an avenue leading to them guarded by gigantic stone figures of men and animals.

By a treaty made with France in 1858, this port was thrown open, but practically no commerce is carried on with foreigners. The climate is warm and dry, and not unhealthy. Population (1901), 225,000. The importance of the city as a center for educational work has been appreciated by the Methodist Episcopal Church, who have established here a university with an endowment of $200,000. The Disciples of Christ are also about to erect a college. The medical work in connection with the Methodist Episcopal Hospital, said to be the largest in China, is most important. The missionary societies at work in Nanking and vicinity are the following: The American Adventists, AFMM (1890), FOMS (1887), MMS (1874), and PN (1876). These societies now have 46 missionaries, men and women; 57 native workers, 12 places of worship, 16 day schools, 16 higher institutions, 3 hospitals and dispensaries, 1 printing house, and 711 professed Christians. The YMCA has a representative here. NAN-PU-HSIEN: A town in the Province of Szechwan, China, situated on the river, about 12 miles S. by E. of Pao-ning-fu. Station of the CIM (1902), with 2 women missionaries and 1 place of worship.

NANUOYA: A village in the Central Provinces of Ceylon, situated about 20 miles S. of Kandy. Station of the CMS Tamil Oolick Mission, with (1903) 1 missionary, 87 native workers, 44 day schools, and 1,140 professed Christians.

NANZELA: A settlement in Northwest Rhodesia, Africa, situated in Barotseland, about 60 miles E. S. E. of Ndala and 160 miles N. of Victoria Falls. Station of the Primitive Methodist Missionary Society, with (1905) 1 missionary, 100 and his wife, 2 native workers, 1 outstation, 1 Sunday school, 1 dispensary, 1 day school, and 14 professed Christians.

NAORANGPUR: A town in Madras, India, situated on the Indravati River, about 18 miles N. E. of Kotpad. Station of the Brethren Missionary Society (1899), with (1903) 3 missionaries, 1 with his wife; 5 native workers, 3 outstations, 1 place of worship, 1 Sunday school, 2 day schools, 1 orphanage, and 728 professed Christians, of whom 428 are communicants. Name also written Nawrangpur.

NAPIAD: A town in Bombay, India, situated in the District of Kaira, 30 miles N. E. by N. of Cambay. It is the center of an extensive trade in textiles. Population (1891), 29,006. Station of the ME, with (1903) 1 missionary and his wife, 103 native workers, 33 Sunday schools, 92 day schools, and 5,809 professed Christians. Some write the name Nadad.

NARAINGANJ: A town in Bengal, India, situated on the Lachmich River, 10 miles S. S. E. of Dacca. Population, 17,700, of whom 9,700 are Hindus and 7,000 Muslims. Station of the BMS (1898), with (1903) 1 missionary and his wife, 5 native workers, and 18 professed Christians. Society writes the name Narayangunge.

NARASARAPUT: A town in Madras, India, situated in the Kistna District, about 290 miles north of the City of Madras. Station of the ABMU (1883), with (1903) 2 missionaries, 1 with his wife; 41 native workers, 121 outstations, 12 places of worship, 30 Sunday schools, 17 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 4,356 professed Christians. Station of the ELGS also. Name is also written Nursarava petta.

NAROWAL: Town in the Punjab, India, situated in the District of Sialkot, 35 miles N. of Amritsar. It is famous for its leather-work. Population, 5,000. Station of the CEZ (1885), with (1903) 2 women missionaries, 9 native workers, 1 boarding school, 2 day schools, 1 dispensary, 1 hospital. Station also of the CMS (1859), with (1903) 1 missionary and his wife, 14 native workers, 1 place of worship, 1 day school, 2 boarding schools, and 1,366 professed Christians, of whom 50 are communicants.

NARRINIERI LANGUAGE: A language of the Papuan group, which is found among the surviving aborigines of South Australia. It has been reduced to writing with use of the Roman letters.

NARSAPUR: A town in Madras, India, in the District of Godavari, on the right bank of the river Godavari, 30 miles E. by N. of Masapatam. Population, 7,500, of whom 6,600 are Hindus. Station of the PB, with (1900) 4 missionaries, 1 with his wife, and 5 women missionaries.

NARSINGHPUR: A town in the Central Provinces, India, situated in the District of N., of which it is the capital, 50 miles W. S. W. of Jabalpur. It is an important trade center for the Narbada Valley. Population, 10,200 (Hindus, 7,600). Station of the ME, with (1903) 1 missionary, 22 native workers, 1 place of worship, 22 Sunday schools, 1 day school, and 253 professed Christians.

NASA: A village in German East Africa, situated on the east coast of Lake Victoria Nyanga, near its S. extremity. Station of the CMS (1883), with (1903) 2 missionaries, 1 of them with his wife; 6 native workers, 1 place of worship, 4 day schools, and 78 professed Christians, of whom 36 are communicants.

NASARAPUR: A town in Bombay, India, situated in the native State of Bhor, S. W. of Poona. Station of the Poona Indian Village Mission, with (1900) 12 missionaries, 5 women missionaries, 1 native worker, 1 Sunday school, 1 industrial school, 1 dispensary, 1 hospital, 2 orphanages.

NASIK: An important town in Bombay, India, situated on the Godavari River, 80 miles N. W. of Ahmadnagar. It is a famous resort of Hindu pilgrims, and has considerable manufactures of metal wares. Population, 21,700. The Christian village of Sharapur is one of its outskirts. Station of the CMS (1832), with (1903) 1 missionary and his wife, 38 native workers, 1 place of worship, 13 day schools, 1 boarding school, 1 industrial school, 2 orphanages, 1 widows' home, and 519 professed Christians, of whom 190 are communicants. Station also of
the ZBM, with (1903) 3 women missionaries, 18 native workers, 1 day school, 6 day schools.

NASIRABAD: A town and cantonment in Ajmere, India, situated about 18 miles from the town of Ajmere, on a bleak, open plain, which slopes eastward from the Aravalli Hills. Station of the UFS (1861), with (1903) 2 missionaries, 1 with his wife; 3 women missionaries, 1 outstation, 69 native workers, 7 Sunday schools, 20 day schools, 2 high schools, 1 dispensary, 1 hospital, 1 orphanage, and 99 professed Christians.

NASS: A settlement in British Columbia, situated at the mouth of the Nass River, 50 miles N. E. of Port Simpson. Station of the MCC (1877), with (1903) 1 missionary and his wife, 1 Sunday school, and 96 professed Christians. Society calls the station Nass River.

NASSAU: The capital of the Bahama Islands, situated on the N. coast of the island of New Providence. Population, 11,000. Station of the WMS, with (1903) 3 missionaries, 11 native workers, 3 outstations, 6 places of worship, 7 Sunday schools, 5 day schools, and 814 professed Christians, of whom 740 are communicants.

NATAL: A crown colony of Great Britain in South Africa. It has an area of 42,000 square miles, now including the Province of Zululand, annexed in 1897, and about 7,000 square miles taken from the Transvaal and annexed in 1903. The population, including the annexed areas (1901), is 985,000, that of Natal, including Zululand, being 925,118. The colony lies to the south of the Transvaal and Portuguese East Africa, has a coast line on the Indian Ocean of about 350 miles, and is bounded south and west by Basutoland and the Griqualand dependencies of Cape Colony. Utrecht and Vryheid, taken from the Transvaal, carry the northern boundary to the Pongola River.

The Drakensberg Mountains, from 9,000 to 10,000 feet high, separate it from Basutoland and the Orange River Colony. Pietermaritzburg, one of the most delightful cities in Africa, is the capital. Durban, the port, is 1,000 miles from Cape Town. The climate is delightful and healthy. The temperature ranges from 55° to 82° Fahrenheit. The coast region is semi-tropical, and produces the sugar-cane, pine-apple, banana, and coffee. Wool, corn, and sugar are the staple products. In the northern districts magnificent coal deposits are found. All the European cereals are cultivated. Hippopotami, monkeys, baboons, and crocodiles are to be seen. Antelopes abound. There are many poisonous snakes. The population consists of whites (English, Dutch, and Germans), Zulus, and Asiatic coolies.

The crown is represented by a governor and legislative council of 12 members, including one for Zululand. There are (1901) 626 miles of railway, including a main line from Durban, which connects with the lines to Johannesburg and Pongola River.

Natal may be called civilized, tho there are sections where the old heathenism may still be seen. The WMS, the UFS, Wesleyan Mission, the Free Church of Scotland, the Norwegian and the Berlin Missionary societies, the Hermanusburg, the SPG, the ABCFM, and the Roman Catholic Missions are each and all doing a good work in Natal. The ABCFM Mission began in 1835, and was the first among the Zulus, who were then a savage people, with a language as yet unwritten and unknown. The above named societies have 23 stations in Natal, with about 15,000 children in their schools.

Brooks (H.), Natal (descriptive), London, 1887; Ingram (G. F.), Natalia (historical), London, 1897; Robinson (Sir J.), & Lifetime in South Africa, London, 1890; Bussell (J.), Natal, 6th edition, London, 1900; Tyler (J.), Forty Years in Zululand, Boston, 1881.

NATAL: A town and seaport on the E. coast of Brazil, capital of the State of Rio Grande do Norte, 160 miles N. of Pernambuco. The harbor has a water area of 2 square miles. Population, 6,000. Station of the PS (1895), with (1903) 1 missionary and his wife, 225 professed Christians, 1 Sunday school, 1 day school, 4 places of worship.

NATIVE AGENCY: 

The Native Agency in mission work is considered in this article in contrast with the Foreign Agency necessary to the beginnings of the Gospel in heathen lands. The complete evangelization of any country by foreign agency alone is historically unknown and, humanly speaking, impossible. When the Apostle Paul went on his mission from Asia to Europe his method was not to carry with him the sufficient force of Asiatic missionaries to supply all the points he desired to reach with Gospel preaching. He went to the strategic centers, where, after he had gathered bands of converts, he organised churches over which he placed native pastors and teachers, and from which were ultimately sent out native evangelists.

When the Church is once planted in any country these native workers are the proper agents for its propagation, because they only possess the identity of speech and modes of thought which are necessary to bring them into touch with the people, in such a way as fits them to become channels for the communication of spiritual light and power.

The term Native Agency in its widest sense means the Native Church. The aim of missions in every land is to establish churches that will be so filled with the life-giving spirit of God that it will be impossible for them to be anything else than agencies. Such was the Apostle Church, established in New Testament days and now continued in new mission fields. But the more of this aggressive spirit the churches have, the more they will need various kinds of leaders to direct it. The term Native Agency in the technical sense is usually applied to these native leaders.

The first form of native agency employed by the foreign missionary is always that of a personal teacher or interpreter; but inasmuch as the function of such native helpers is purely mechanical, the simple mention of them is sufficient for the purposes of this article. The forms of native agency specially to be considered are those included in the term Native Ministry, in its two branches of evangelists and pastors. Among the ascension gifts of Christ prominent mention is made of these two. Therefore, wherever Christ gives to missionary labor the material for a church, he may expect to find included in it the material for evangelists and pastors.

1. Evangelists: Every foreign missionary, whether preacher, teacher, doctor, translator or writer of books, is essentially an evangelist, the success of whose work depends upon his ability to multiply himself by the native evangelists he finds, trains, and guides.

In the earlier stages of mission work all native
agents employed by missionaries are naturally called "native helpers." This descriptive term has persisted in missionary literature beyond the point where it is properly descriptive of the actual situation. In the later stages of mission work, when the native agency becomes the main force of the work and the missionary becomes the "helper." The timely recognition of this change in the relative position of the workers will always greatly contribute to the harmonious and successful prosecution of their cooperative work.

Without to finding evangelists, it may be said that, being given of Christ, the missionary can always find as many of them as Christ wishes him to have at any given time. This implies, however, that he seek the kind of evangelists that Christ wants, and in the way that Christ would approve. To this end it is essential always to keep in mind the real character of the end in view, which is the planting and extension of the kingdom of God on earth. The mode of propagating the kingdom must depend on the nature of the land and the evangelists must be those that fit him for that specific work. If the end in view were the propagation of Western civilization or Western ideas of government, a certain character of native agency would of course be required for that purpose. In China, for example, Li Hung Chang, not converted, but thoroughly Westernized, would make the best possible evangelist. But the kingdom of God is "not of this world," and the mission is to save the world; to send out ameliorating and regenerating forces into every department of the world's life. But to do this effectively it must be kept and given to the world as the pure, spiritual and divine thing that it is. This view of the nature of the kingdom gives us our first suggestion as to the necessary qualifications of the native evangelist. He must be, first of all, a child of the kingdom, a man spiritually alive, called out of the world, and yet, because of the Christ spirit in him, loving the world somewhat as Christ did, and ready, as He was, to live and die for its salvation. He should, of course, be a man properly taught, for otherwise he cannot be a teacher of others. "If the blind lead the blind, both will fall into the ditch." He should have the gift of utterance necessary in all teachers to the imparting of the knowledge they possess. He should be a man of strong personality and force of character. Men who, before their conversion, by reason of possessing this quality are natural leaders in their communities, are sure to be, after their conversion, the most efficient ones in leading men to Christ. Social position and literary culture will be conducive to the evangelist's power and usefulness, provided they are not associated, as is too often the case in Oriental lands, with intellectual pride, lack of sympathy with the common people, and aversion to work. The literati of China are of a class disqualifying them for making successful evangelists, even when they are converted to Christianity; for it usually requires not only regeneration but quite a long period of progressive sanctification also to eradicate these traits, characteristic of their class, from their characters. The evangelists drawn from the Samurai class in Japan were very effective in reaching those of the same social grade to which they belonged. But for the evangelization of the common people in Japan there is now a felt need for a supplementary body of evangelists, drawn from the masses, so as to be in full sympathy with them, and so as to be free from the class spirit, and trained to hard work. The next great step of progress in evangelizing Japan will probably be made when a supply of this kind of evangelists has been provided. It is probably for these reasons that of the original twelve chosen by Christ at least ten were previously laboring men. On the other hand, the great evangelist in every country is likely to be a man who, like the Apostle Paul, adds to high social position and intellectual quality, a natural enthusiasm which pharisaic formalism could not kill in him as it did in the common run of Scribes and Pharisees. So it is that almost "not many wise men after the flesh, not many mighty, not many noble are called" to this work, the few of this kind who are called are the ones who make the greatest and most successful leaders in the propagation of the Gospel.

Owing to the seclusion of women in the Orient it is necessary to send out the qualifications of the evangelists who need native female help for the prosecution of their work. These female native workers are usually called Bible Women. They are evangelists for the heathen women who could not otherwise be reached with the Gospel. They need the same qualifications as are needed by the male evangelists. Their work differs from that of the male evangelists in that it is done almost exclusively in the home, and by the wayside, rather than in public assemblies.

2. Native Pastors: The Native Church is organized by the ordinance in it of one or more Native Pastors. The qualifications of native pastors are given in the Scriptures with a minuteness and detail that seem to indicate Christ's estimate of the great importance of not getting the wrong men into that office. It is to be remembered that these qualifications were laid down at a time when the churches to be supplied with pastors were in their youth. The presence in most of them of Jews of the Dispersion, who had received their training in the Old Testament church, made it easier to find men possessing these qualifications than is now the case in young churches organized in heathen lands of the present day. A very important question is: What modification should be made in the requirements for ordination to the pastoral office in our modern mission churches because of the scarcity of those who can fulfil them even in a tolerable degree? Some great and wise missionaries think that great allowance should be made for the condition prevailing in any given place, and that the church should be organized as soon as possible with the best material for pastors to be found in it. Others hold that it is better to ordain no natives to the office of pastor until they have the men that are fitted for it, even tho they have to wait for the second generation of Christians to obtain them. This article is perhaps not the proper place for the discussion of this question. It does not admit of question that so soon as properly qualified men for native pastors can be found, the church should be organized and placed under their pastoral care. It must be well, also, under any circumstances, to remember the Scriptural admonition to lay hands on no man suddenly for responsible office in the church. It will always be true that novices clothed with authority are in danger of being lifted up with
pride and thereby falling into the condemnation of the devil.

3. Training: The training of native pastors, evangelists and other helpers is one of the things of chief importance in the work of the foreign missionary. When the institution of the Christian home has been long enough established in any field to furnish the native supply of Timothys and Tituses, the problem of their training becomes practically the same as that of our home ministry. Mission schools should be established at an early stage of the work and their development made to keep pace with the development of the native church, so that when the time comes that the native church has need of them, the regularly organized Christian College and Theological Seminary may be on hand to do their necessary work. In the earlier stages of the work the missionary home should be made a center around which young men and young women may be gathered for Bible study. Much effective use has been made of summer schools and institutes, where those who have had previous training with the missionary have the benefit of lectures and other forms of oral instruction. An essential feature of any good method of training will always be the work done with the help of the missionary's personal influence. Jesus ordained the twelve, first, "that they should be with him," and then, "that he might send them forth to preach." Hence the supreme importance of the missionary himself being the right man rightly trained for his work; for the men he trains are likely to be spiritually the reproduction of himself. As he is or is not, so will the native ministry he trains be or be not, sound in the faith, mighty in the Scriptures, humble, meek, endued of self and full of the power of the spirit of Christ.

NATIVE STATES: The collective term applied to those portions of India which are not under the direct control of the British Government, being still ruled by native princes and chiefs. These states are scattered over the whole of India. Some of them are large and important districts, covering thousands of square miles, with millions of inhabitants, with departments of administration, with mints, postal establishments, educational systems, courts, and all the machinery of modern government; some of them are hardly large enough to be noted upon an ordinary map, and consist simply of a village or so with a handful of inhabitants, under the control of some petty descendant of the chief of an aboriginal clan. Between these two extremes the native states range themselves in all degrees of importance. They vary greatly with reference to their populations. Some of them consist almost wholly of Hindus, under a Hindu prince. In others, the ruling family will be Mussulman, tho the population will consist of persons of all the races usually found in the districts of Hindustan. Others again are made up almost wholly of aboriginal tribes, still owning the headship of the hereditary chieftain. The manner in which it has come about that, in the midst of territory under the authority of the British Government, these islands of native rule should be briefly and generally explained as follows: The English acquired territory in India little by little. As they were brought into contact and relations with the native chiefs and princes, conflicts more or less bitter were natural. The result of these conflicts often was that the territory of the native prince passed wholly into the hands of the British. Some of these wars were waged by the English in self-defense; some of them, it is to be feared, had less of justification. Sometimes the territories of a prince joining English districts would be so ill-governed that the territory of the native, of itself, became a ground for annexation. Nevertheless, among the native rulers with whom the British power has been brought in contact, there have been those whose authority over hereditary dominions they enjoyed a degree of subject to the paramount power. Some such reigning families have been allied by treaty to the growing British power for a century or two, and have always been faithful friends and allies. Some princes and chiefs have been confirmed in their possessions simply because in the absence of glaring incompetency or removal would provoke hostility inconvenient to face. Thus it has happened that while, as the result of conquest, almost all India has now passed under British rule, many purely native governments still continue in enjoyment of their ancient powers. In general, the territory of the native states varies in different cases, but all are bound by treaty to the "paramount power," which undertakes to guarantee to them protection against foreign enemies. No one of them is permitted to enter into relations with any other power or with each other, save through the English Government, or to maintain military establishments above a specified limit. In order to protect the populations of these states from misgovernment, as well as to insure a due degree of subjection to the paramount power, they are all closely supervised by the British Government, acting through a class of officials designated to that duty. These officials are known as "residents," or "political agents," or "political superintendents." A resident is one appointed to reside permanently at the court of a native prince, and to be the medium of communication and influence between the prince and the paramount power. Political agents and superintendents usually have supervision over groups of smaller states, and important enough to require each the services of a resident. There are many such groups of inferior states or chieftainships connected with all the provinces and commissionerships. The political superintendent will often be the nearest British magistrate, who discharges the duties of supervision in connection with the general duties of his official station in British territory. Under the supervision of these officers the internal affairs of the several states are usually left to be managed by their own princes. Continuous and incorrigible incompetence will generally result in the deposition of a prince by the English Government; in this case the government of his state will often be administered by the English until his successor, if a minor, be of age; or some successor will be at once placed upon the throne. The most important native states—some of which have been made the subject of separate treatment in this work—are Kashmir, in the far north; Baroda, in the northern part of the Bombay Presidency; the territory of the Nair and of Sind, in Central India; of the Nizam of Haidarabad, in the Central Deccan; of Mysore,
in the Madras Presidency, and of Travancore and Cochin, at the extreme south of the peninsula. In some of these states missionary operations are carried on successfully. This is notably the case with Travancore and Cochin; also with Mysore. In others the degree of independent action which the chieflain or prince is suffered to exercise, united with the fact that these princes are usually Hindus or Mohammedans who consider themselves set, as it were, for the defense of their respective faiths, is sufficient to prevent any large and effective evangelistic agencies. Of late years, however, the more important native states have become more and more tolerant. Often some of the smaller states will be found the most backward, the most difficult to enter, and the most impervious to all new influences of enlightenment.

NAVULA: Settlement in the Fiji Islands, Polynesia, situated on the S. E. coast of the island of Viti Levu. Station of the Australian Wesleyan Mission, with (1900) 1 missionary, 297 native workers, 2 outstations, 32 places of worship, 41 Sunday schools, 68 day schools, and 1,256 professed Christians.

NAYUDUPET. See NAIDUPET.

NAZARETH: Town in Palestine, 65 miles north of Jerusalem, with a history linked with that of the Christian Church from the time of Jesus Christ. It is beautifully situated in a valley surrounded by hills on all sides. The houses are mostly well built of stone. The population has a more prosperous appearance than in most parts of the country, and the women of Nazareth are famous for their beauty. Population, 7,000, the Roman Catholic element being influential. Station of the CMS (1852), with (1903) 1 missionary and his wife, 6 women missionaries, 27 native workers, 17 day schools, 1 outstation, and 434 professed Christians, of whom 161 are communicants. Station also of the Edinburgh Medical Mission Society (1861), with (1903) 1 missionary and his wife, 3 native workers, and 1 dispensary. The Turkish name of the town in Naasra.

NAZARETH: A town in Madras, India, situated in Tinnevelly, about 25 miles S. by E. of Madras. Station of the CMS (1826), with (1903) 1 missionary, 91 native workers, 39 places of worship, 19 day schools, 8 boarding schools, 1 theological school, and 6,615 professed Christians, of whom 2,424 are communicants.

NAZARETH: A town in Natal, Africa, situated in the valley of the Tugela River, about 90 miles N. by W. of Durban. Station of the Hermannsburg Missionary Society (1879), with (1901) 2 missionaries, 1 of them with his wife; 3 native workers, 1 outstation, 2 places of worship, 1 day school, and 175 professed Christians.

NDEJE: A settlement in Uganda, Central Africa, situated in the Bunyoro District, 20 miles W. of Gyaaza and 32 miles N. W. of Moyo. Station of the CMS (1895), with (1903) 1 missionary and his wife, 2 women missionaries, 517 native workers, 2 day schools, 1 dispensary, 1 theological class, and 4,457 professed Christians, of whom 1,448 are communicants.

NEEMUCH. See NIMACH.

NEESIMA, Joseph Hardy: Born in Japan, February, 1844—ten years before Commodore Perry's fleet awaited in the Bay of Yeddo the opening of Japan to the world. At five years of age he was taken to the Shinto temple to give thanks for his life. When the child Neesima has never seen a Christian nor heard of the Gospel, Neesima had some conviction of His presence who is not far from any one, and of the vanity of idols. When he met in a Chinese book the words, "In the beginning God created the heaven and the earth," he said: "this is the true God," and secretly determined to know more of that God, even if he left all to find him. These words from the Bible as he understood were brought by an American, and to America he must go. To leave his country was unlawful, and punishable with death. But this he risked, concealed himself among some produce in a boat, and reached Shanghai and ultimately America, working his way as a sailor. The owner of the vessel in which he sailed was the late Hon. Alpheus Hulbert of Boston, who, on his reaching America, received him into his family, and provided for his education, giving him nine years in Phillips Academy, Amherst College, and Andover Theological Seminary. The elevation of his countrymen became his absorbing purpose.

While in his course of study, the Japanese Embassy that visited this country and Europe in 1871, to observe the condition of education in Western countries, summoned Mr. Neesima to act as its interpreter. He replied that he was an outlaw from his country, and was subject to no ruler save the King of Kings. He thereupon received formal pardon for leaving his country. He visited with the embassy the principal colleges and universities of the United States, Canada, and Europe. Not only was he thus brought into close and friendly relations with Japanese officials of high character and position and of enlarged views, but his wish to devote his life to the Christian education of his countrymen was greatly strengthened. He was appointed a corresponding member of the Japanese Mission of the ABCFM and was ordained in 1874 in Mount Vernon Church, Boston. In response to his modest but moving plea at the meeting of the American Board in Rutland, nearly $4,000 were pledged for the school which he proposed to establish in Japan. After ten years' absence, he arrived in his native land, in November, 1874, "cherishing," as he says, "in my bosom this one great purpose, i.e., the founding of an institution in which the Christian principles of faith in God, love of truth, and benevolence toward one's fellowmen" should "train up not only men of science and learning, but men of conscientiousness and sincerity."

In November, 1875, he opened the Doshisha College at Osaka. A remarkable revival occurred in the Doshisha in 1884, during which the strain upon his health was such as obliged him to leave the country for a while. He revisited the United States in 1885. On returning to Japan in 1886, he formed a plan for the enlargement of the Doshisha, so that it might have the rank of a university. Not in any way was it his purpose to make it a Christian institution, he yet appealed for aid to the non-Christian statesmen and influential men of Japan. He so won their confidence that he secured contributions from those in high social and official position amounting to nearly $60,000, and also the gift of $100,000 from an American gentleman for the
NEGAPATAM: A town in Madras, India, chief port of the Negapatanam District, situated 49 miles E. by S. of Tanjore, on the Bay of Bengal. It was one of the earliest Portuguese settlements on the Coromandel coast. Population (1901) 57,190, of whom 39,000 are Hindus and 14,000 Muslims. Station of the Leipzig Mission Society (1864), with (1903) 1 missionary and his wife, 16 native workers, 21 outstations, 2 places of worship, 6 day schools, 1 boarding school, and 419 professed Christians. Station also of the SPG (1825), with (1903) 8 native workers, 1 place of worship, 3 day schools, and 447 professed Christians, of whom 233 are communicants. Station also of the WMS, with (1903) 3 missionaries, 100 native workers, 9 outstations, 11 places of worship, 21 Sunday schools, 25 day schools, and 265 professed Christians, of whom 171 are communicants. NEGEMBO: A town on the west coast of Ceylon, 20 miles north of Colombo. Population, 19,400. Station of the WMS, with (1903) 2 missionaries, 72 native workers, 8 outstations, 25 places of worship, 20 Sunday schools, 22 day schools, and 902 professed Christians, of whom 631 are communicants.

NEGRO RACE: Much ignorance and confusion attend the use of the word Negro, and there is much trouble in properly classifying the race. In its widest sense the term is applied to those sections of the human race who have black, or distinctly dark, skins as opposed to those who have yellow or brown complexions. In this somewhat ill-defined use it designates the inhabitants (1) of Africa south of the Sahara, (2) of the peninsula of India south of the Indo-Gangetic plains, (3) of Malaysia and the greater part of Australasia. In this wide dispersion the peculiar characteristics of the pure Negro have been modified by contact with the Mongol races on one side and the Caucasian on the other. But marriage ties the Negro race includes two classes: the true Negro of African type, and the Papuan, or Melanesian, type.

I. African Negro: While it is true that all Negroes of this class are Africans, it is not true that all Africans are Negroes, and the two terms should not be used synonymously. The geographical distribution of the true Negro race includes all of the west coast lying along the Niger, the Senegal, and Gambia rivers, and the country between them, together with parts of the Sudan. This area is thus a thin belt of territory along the west coast of Africa, which is inhabited solely by Negroes, and which forms but a very small part of the whole continent. Here and there, scattered through other sections, especially to the south, occasional tribes of true Negroes may be met, but the limits above given are in the main correct. The home of the race in its purity is in the district between the Volta and Niger, the Xong Mountains and the coast, where are found remains of the Negro kingdoms of Benin, Dahomey, and Yoruba, having just west of the Volta is Ashantí. Different tribes are found throughout this whole territory, such as the Jolofs and Mandingoes in Senegambia, the Susu on the Rio Pongas, the Tamne, inland from Lagos, the Ibo on the Lower Niger, the Hausa-speaking tribes north of the Niger confederation, besides the tribes about Lake Tchad and in the parts about Darfur.

It is the generally accepted opinion that the Negroes were the aborigines, or, at least, the first settlers, in the region they occupy. If, as seems plausible, they belong to some branch of the Hamitic family, then it is probable that they were among the first to come from Asia into Africa. The Bantu race followed, crowding the Negro to the south and west, and pushing the Foutabout Bushmen ahead until the three divisions of the African races occupied their respective localities as now defined. Within these limits, however, the Negroes have been subject to much unrest and change. The slave trade diminished their numbers, and in later years the return of the descendants of former slaves perhaps modified in a slight degree their racial characteristics.

II. Racial Characteristics: The true Negro is marked by an unusual length of arm; projecting jaws; small brain; black eye; flat, short nose; thick, red, protruding lips; thickly hairy, scantly clad body; weak legs, pigeon-toed great toe, and projecting heel; black or brown skin, thick and velvety, with a strong odor.

In their native home the race is regarded as naturally inferior in mental development to many of the races of the world. Theories of development are affirmed and denied by writers of equal weight. In the aboriginal state the Negro is a mere savage. His nature is sunny and childlike. Inordinately susceptible to flattery, he can easily be influenced. While rendered cruel by the lust for gold, he is naturally gentle. He appreciates the beautiful, and is fond of songs and mirth. The victim of gross superstition, he retains belief in a supreme being. He is indolent, slothful and improvident. If his animal wants are satisfied, he is content. He knows how to conceal his real feelings, and can be an enigma hard to solve if he so chooses.

He responds quickly to kindness, and will prove his gratitude by great devotion. Morally, his standard is very low. Polygamy is practiced. Although the women are the slaves of the men. Cannibalism is sometimes indulged in, and human sacrifices have been offered to the fetish objects of their worship, some of which are most hideous. Some of the tribes have a great Degree of social order. The arts and manufactures. Buildings, metal-work, clothes of skins, all show a degree of civiliza-
tion which is proof of the capabilities of the race. Mungo Park found Sego, the capital of Bambassa, a city of 30,000 people, with two-story houses, containing 3,000. The Niger is a very queer, winding river, navigable for the Niger for men and beasts. To sum up, in the words of Dr. Cust: "Many great races in ancient times have had their day of greatness, exhausted the power that was in them, and have been completely broken up, trodden out, and utterly effaced by younger and more powerful races. But this cannot be said of the Negro race; they are not broken, fewer in number, or poorer in resources; tho pressed upon from without, they have proved to be the only race suitable to the climate. Their soil is wonderfully fertile, their minerals abundant, their power of reproduction exceeding calculation.

We know now from the instances of men who have had the advantages of culture that they are not deficient in intelligence, probity, and even genius, yet they have left absolutely not a monument to tell of the material greatness of any particular tribe, or of any ancient civilization, as in Central America and Asia; not a written or sculptured document; they have but a scant store of proverbs and traditions."

The zone occupied by the Negro race: they are not broken, fewer in number, or poorer in resources; tho pressed upon from without, they have proved to be the only race suitable to the climate. Their soil is wonderfully fertile, their minerals abundant, their power of reproduction exceeding calculation.

We know now from the instances of men who have had the advantages of culture that they are not deficient in intelligence, probity, and even genius, yet they have left absolutely not a monument to tell of the material greatness of any particular tribe, or of any ancient civilization, as in Central America and Asia; not a written or sculptured document; they have but a scant store of proverbs and traditions."

In their temperament and customs the Papuan Negro: the Papuans, while others class them with the Malay or Mongoloid race. In the words of Mr. Wallace: "The Papuans are well-made, have regular features, intelligent black eyes, small white teeth, curly hair, thick lips, and large mouth; the nose is sharp but flat beneath, the nostrils large, and the skin dark brown." The Papuan language on the coast of northern New Guinea is monosyllabic, and is spoken with great rapidity. The Mandingo language, spoken in Senegal and Gambia, is a smooth tongue, with a predominance of vowels, and a remarkable minuteness in defining the time of an action.

The Papuan Negro: the Papuan term meaning "frizzled," and points at once to the mark which distinguishes the frizzly-haired Negro from the straight-haired Malay. The purest type of the Papuan is found on the west coast of New Guinea, or the Atlantic, Niger, Central, and Nile; in the entire group 195 languages are recognized and 49 dialects. They belong to the agglutinating type, and are often characterized by intricacy of structure and delicate alliterativeness. The Creole language on the coast of northern New Guinea is monosyllabic, and is spoken with great rapidity. The Mandingo language, spoken in Senegal and Gambia, is a smooth tongue, with a predominance of vowels, and a remarkable minuteness in defining the time of an action.

In their temperament and customs the Papuans show many traits similar to those of the African Negro. Their belief in sorcery, their easy-going, listless manners, all point to similarity of origin. In their architecture, rude as it is, they follow the Malay fashion of building on piles. They show a great degree of skill in agriculture. The men build the houses, hunt, and fish, leaving the heavier work to be done by the women. The latter are more modest than the rest of the Polynesian races. The Polynesian languages form a class by themselves, differing widely from the Malayo-Polynesian languages, and split into dialects by so small an obstacle to intercourse as a brook.

The American Negro: 1. In the United States. From the time of the first arrival of Negroes as slaves in the colony of Virginia in 1619 till the Emancipation Act in 1865, Negro slavery has been identified with and has greatly influenced the history of the nation. The final solution of the great question of slavery left the country a class by themselves, differing widely from the rest of the races lying between India and New Guinea, and in parts of America, in Melanesia, or Caucasus. In the Cust-Müller classification of African languages the Negro is one of six divisions, and in it are included four sub-classes, such as the Malayo-Polynesian languages, and split into parts of America, in Melanesia, or Caucasus.

modified by his environment in the United States, presents a mixture of good and evil, of childlike simplicity and cunning secretiveness, of deep feeling and weak character, of hopelessness and of possibility, which may well stagger the faith and try the patience of those who are trying to educate and Christianize him. Notable instances of full-blooded Negroes there are who have shown an intelligence, a strength of mind and executive ability, a steadfast faith and upright life, equal to that of the Caucasian; and there are instances also among the lighter-skinned Negroes of men who have as yet meager opportunities, may fairly be placed in comparison with the great majority which seem to give weight to the opinion that the Negro is mentally and morally inferior to, and can never be on an equality with, the white race which surrounds him.

It has been suggested that the Negro is not so much immoral as non-moral, for there seems to be such a lack of the perception of right and wrong that a Negro will stop on his way to or from a prayer-meeting at which he takes a fervid part, to lift a chicken from a neighbor's hen-roost. The Rev. Dr. Tucker, at the American Church Congress in 1883, brought out this side of the American Negro character when he spoke of Negro missionaries who were earnest and successful, unconscious of hypocrisy, but who were guilty of lives of the grossest immorality, were addicted to lying and thieving, and yet were respected and heeded by their flocks.

The Negro question is looked at in two distinct ways, not only by the politicians but by the Christian, and the difference is due mainly to presence or absence of perspective. By those who live away from the daily contact with the Negro, who look at him idealized, as a man entitled to the rights of men, to all the privileges of citizenship, and to all the yearning love which a fallen image of God should excite in the Christian heart, the practical difficulties in the way of civilizing, Christianizing, and elevating the Negro to the lauded plane of equality are often times overlooked, and theory takes the place of practical attainment. missionaries, 2 of them with their wives; 5 women missionaries, 35 native workers, 2 outstations, 3 places of worship, 5 Sunday schools, 5 day schools, 3 boarding schools, 1 dispensary, 1 hospital, and 2,500 professed Christians, of whom 843 are communicants.

NELSON HOUSE: A trading post in the Dominion of Canada, situated in Keewatin Territory, about 450 miles N. W. of Winnipeg, Station of the MCC (1871), with (1903) 1 missionary and his wife, 2 outstations, and 93 professed Christians.

NEMURO: A town in Japan, situated on the E. extremity of Hokkaido, Station of the ABMU (1887), with (1903) 1 woman missionary, 4 native workers, 5 outstations, 1 place of worship, 2 Sunday schools, and 86 professed Christians.

NEPAL: An independent kingdom lying along the southern slopes of the Himalayas, in North India, and to there are treaty stipulations between its government and that of British India, it is outside of the immediate circle of British influence. To the north its territory extends up the sides of the Himalayan range until it meets that of Tibet, along an unsurveyed and mountainous frontier. Its southern boundary is usually about 30 miles from the foot of the Himalayas. On the west a small stream separates it from the sub-Himalayan British province of Kumaon; and its eastern limit is the small mountain state of Sikim, north of Calcutta. Its greatest length northwest and southeast is 512 miles; its breadth varies from 70 to 150 miles. The total area has been computed at about 54,000 square miles. No census of population has ever been taken. The Nepalese estimate is about 5,000,000; the soberer, and probably more correct, opinion of Anglo-Indian officials places the population at 4,000,000. There are many aboriginal tribes in Nepal, most of whom seem to be of Tatar origin. But the regnant tribe is that of the Gurkhas, who are descended from the Rajputs of Northwestern India, and who migrated in the 12th century from the original home of their people during the early ascendency of one of the invading Musulman dynasties. Most of these aboriginal tribes are Buddhists, but Buddhism is gradually disappearing before the stronger Hinduism of the ruling race, which is the staple food of the people. The highest known mountain in the world,—Mt. Everest, 29,002 feet high,—as well as many Himalayan peaks inferior only to that, lie within the limits of Nepalese territory. Since the subjugation of the country by the Gurkha dynasty, several bloody revolutions, marked by the true Oriental features of assassination and usurpation, have occurred. The last was in 1858, when the prime minister and two other prominent men were murdered by the head of a rival faction. The murderer at once made himself prime minister. Violent as the revolution was, it was considered a probable step toward much-needed reforms within the kingdom. Nepal has never been open to the entrance of Europeans, tho the Indian Government has usually maintained a resident there. No missionary stations have yet been permitted. The capital is Kathmandu. Population supposed to be about 50,000.

NEPALESE LANGUAGE: An Aryan language spoken in the kingdom of Nepal, north of India, and written with the Nagari characters. The extent to which it is in use has not yet been learned.

NESTORIAN CHURCH: The name is derived from that of Nestorius, who was patriarch of Constantinople for three years previous to his excommunication by the Council of Ephesus, A. D. 431; but the Nestorians repudiate the name, and call themselves the Church of the East. Their separation from the great body of Eastern Christians was due mainly to political and national forces. Christianly spread eastward very early. The Syriac-speaking Christians of the great Mesopotamian plains, with a smaller number of Persian and Arab Christians, were the subjects of the Parthian, and then the Sassanian kingdom. Syriac was the ecclesiastical language of all. The persecuting zeal of the Persian kings was increased by the feeling that their Christian subjects were secret allies of the Roman enemy. The school of Edessa, the theological center of these Christians, was closely associated with that of Antioch; and Theodore of Mopsuestia, the true father of Nestorian theology, was revered. Hence, it was natural for the Persian Christians to desire the separation of Nestorius against Cyril, of Antioch against Alexandria, and at the same time to gain greater security by dissociating themselves from the Christians of the Roman Empire, in repudiating the creed of Ephesus, and erecting the See of Seleucia into a patriarchate. On their part, the emperors hastened the schism by persecution. In 489 the Persian school was expelled from Edessa, in Roman territory, and established beyond the Persian border at Nisibis. The great organizer of the Nestorian Church was John, Bishop of Nisibis. A similar cooperation of political and theological forces led, in the next century, to the organization of the other Syrian National Church, the Jacobite. The centers of Nestorian population were about Nisibis, Mosul, and Seleucia, and in Khuzistan in other regards, the Nestorian Church differed from other Oriental churches by way of arrested development. Its liturgy is brief, and less explicit in some doctrines, but it contains the invocation of the saints and prayers for the dead. The cross is revered, but neither pictures nor images are used. The real presence and the sacrosanct character of the clergy are taught, but not transubstantiation or confession to priests. The parish clergy marry, but mon-
During the 8th Christian century active propaganda was carried on among the pagan tribes on the borders of the Caspian, and about 630 A.D. Nestorian monks entered China. Christian cemeteries, medieval travelers, and Syriac historians testify to the existence for several centuries of Chinese Christians in Central Asia, and in Northwest China, especially along the northern bend of the Yellow River. When the Mongol hordes overran Western Asia, not a few Christians were numbered in their ranks and some were placed in office. This opened as if the opportunity for Christian triumph had come, but in reality its downfall was near. The large Christian population had been decimated by the anarchy, famine, pestilence, and war that had cursed Western Asia; and finally the Nestorian Church was well nigh exterminated in the terrible Mongol forays ending with the massacres of Tamerlane. Since A.D. 1400 its history is only that of a few shattered dioceses of the mighty line that once spanned Asia.

At present the number of Nestorians, including those who have seceded to other Christian churches, is little more than one hundred thousand. They live in three distinct regions, the plains of ancient Assyria, the rugged valleys of the Zagros Mountains in Turkey, west of the Tigris, and the mountains and the lake. The large majority are engaged in agricultural or pastoral pursuits. Those in the mountains, like the Kurds among whom they live, have maintained a precarious independence, but the Sultan is steadily subduing them to taxation, without however maintaining peace and security in those wild regions. Those in the plains of the Tigris, and a few elsewhere, are Roman Catholic. The majority of those in Persia are enrolled as members of the Greek Church. A smaller but very influential body, mainly in Persia, are Protestant. Probably less than half of the whole number still acknowledge the authority of the Nestorian patriarch.

The part of Persia in which the Nestorians live is closely united to Russia in an industrial way. The rapid development of Transcaucasia has given work to thousands of Nestorians, while many more have gone farther into Russia. Almost every adult male has at some time spent several years in Russia. This fact has given a sense of Russia's power and a conviction of its future supremacy, while the absence from home has had a disintegrating religious and moral effect. The increasing misgovernment of Persia has made the people long for a change, a temper induced also by the various missionary operations. All these influences prepared for the Russian Mission of 1898, that received in Urmia an extraordinary welcome. Without any religious persuasion almost all the adherents of the Nestorian Church in the region of Urmia renounced their teaching and professed acceptance of the Orthodox faith. Subsequent events disappointed the political aims of the new converts, but it is safe to count the mass of them as permanent additions to the Russian Church.

Time must reveal the future of this ancient church, but the political predominance of Russia makes very probable the absorption of most of the Nestorians, in Turkey as well as in Persia, into the Russian Church. The old church has not the strength to stand. The only body that seems to have the promise of a separate destiny is the small but vigorous body of Protestant Nestorians.

NETHERLANDS MISSIONARY SOCIETIES: The first missionary work by the Dutch was connected with their colonial extension, and dates back as far as the beginning of the 17th century, when the Dutch East India Company was formed (1602). This commercial society was bound by its interests to care for the religious persuasion almost all the adherents of the Orthodox faith. Subsequent events disappointed the political aims of the new converts, but it is safe to count the mass of them as permanent additions to the Russian Church.

Time must reveal the future of this ancient church, but the political predominance of Russia makes very probable the absorption of most of the Nestorians, in Turkey as well as in Persia, into the Russian Church. The old church has not the strength to stand. The only body that seems to have the promise of a separate destiny is the small but vigorous body of Protestant Nestorians.

the with no practical result, but laid the foundation for the Dutch Church in the American Colonies.

During the 16th century all these undertakings gradually fell into decay, and at the revival of missionary interest in the last decade of the century, there was almost no missionary spirit in the churches of Holland. An appeal from the LMS soon after its organization stirred the hearts of some clergy and laymen and resulted in the formation of the Netherlands Missionary Society in 1797. For some time they worked through the LMS, but later established missions of their own. For half a century this remained the only Dutch society, but beginning with 1847 a number of societies were formed by those who felt unable to accept the somewhat rationalistic and formal management of the old society. These included: The Mennonite Union (1847), The Christian Reformed Missionary Society (1854), the Ermelo Comité (1855), the Ermenes Association (1858), Netherlands Mission Union (1858), Utrecht Mission Union (1859). Of these, the Christian Reformed Missionary Society and the Netherlands Reformed Mission Union in 1892 formed the Mission of the Reformed Churches in the Netherlands. There is also a society auxiliary to the Moravian Missions (formed in 1793), and there are several aid societies.

1. Netherlands Missionary Society, 1797: (Nederlandsch Zendelingsgenootschap) The oldest of the Dutch societies owes its origin to the influence of Dr. Van der Kemp, who went to South Africa in the service of the LMS. It represents chiefly the Established Church, tho from the beginning it has had relations with the Reformed Church, and the General Synod has no immediate control over its conduct. The first missionaries of the Society under its own direction, Vos, Erhardt, and Palm, were sent to Ceylon, but they were unable to accomplish very much in that field, owing perhaps to the hostility of the Dutch Consistory of the island. In 1812 three missionaries, Kam, Slupper, and Bruckner, were sent to Java. Mr. Kam established himself at Amboina, in the Moluccas Islands, Mr. Bruckner at Samarang, and Mr. Slupper at Batavia. Two years later, Holland, having regained its independence from France, sent out five missionaries to work with Mr. Kam. These established themselves at Celebes, Ceram, Ternat, Banda, and Timor, and found abundant opportunities for labor. In 1833 Mr. Kam, who had endured much exposure in his efforts to travel from island to island, and had been often employed, even by the government, as a peace-maker among the tribes, died from the effects of overwork. In 1826 the same Society sent out Mr. Gutzlaff to China. A mission was also established at the Dutch colony of Surinam in Guiana, and Alphonse F. Lacroix was sent to the Dutch territory in India. When in 1825 the Dutch settlements on the continent of India were ceded to the British Government, their four missions connected themselves with the different English societies, thinking it better not to render their time and labor and knowledge of the languages of the people of no avail. The fields at present (1900) occupied are Java, Celebes, Sumatra, and Savu, near Timor. In 1890 it had 24 missionaries, 62 native helpers in 11 stations and 49 outstations, 1,722 communicants, 42 schools with 2,707 pupils, 1 physician, and 1 hospital, with 4,000 patients.

2. Mennonite Missionary Union, 1847 (Doopsgezinde Vereeniging): The Anabaptists of Holland had worked through the BMS of England, but in 1847 formed their own organization as above, and commenced work in Java and Sumatra. The report (1900) shows 11 missionaries, 29 native workers, 4 stations, with 488 communicants, 9 schools, with 306 pupils, 1 hospital treating 2,280 patients.

3. Java Committee (1855), (Java Comité te Amsterdam): The first of the societies organized in protest against the Netherlands Society in 1848. It carried on work in Java, in the service of the LMS of England but in 1890 formed their own organization as above and commenced work in Java and Sumatra. The report (1900) shows 11 missionaries, 11 native workers in 6 stations and 8 outstations; 500 communicants, 8 schools, 225 pupils.

4. Mission of the Reformed Churches in the Netherlands, 1802 (Zending van de Gereformeerde kerken in Nederland): The Dutch Reformed Missionary Society was founded at Amsterdam in 1859 by the Rev. Dr. Schwartz, missionary of the Free Church of Scotland to the Jews in that city. The original intention was to form a society for the propagation of the Gospel among the Jews living among the heathen and Mohammedans in the Dutch (Indian) colonies, and through them to reach the heathen and Mohammedans. The government, however, out of deference to the Jews in Holland, refused to recognize the proposed society, and it was resolved to commence work among the heathen and Mohammedans in the island of Java. Additional cause for this resolve was in dissatisfaction with the old Netherlands Missionary Society, on account of its rationalism. Already there had been formed the "Utrecht Mission Society" and the "Netherlands Mission Union," neither of which, however, founded on orthodox principles, accepted the confession of the Dutch Reformed churches, and the new society was therefore formed to act in conformity with the recognized standards of these churches, in general following the Presbyterian polity. In 1892 this Society united with the Christian Reformed Union, under the title as above. The work is in Java, and the report (1900) shows 16 missionaries, 12 native helpers, 6 stations, 9 outstations, and 718 communicants.

5. Netherlands Mission Union, 1888 (Nederlandse Zendingsvereeniging): This Society, organized in 1858, began its work in Western Java among the Sundanese. It had (1890) 11 missionaries, 22 native helpers, 9 stations and 10 outstations, 871 communicants, 24 schools with 861 pupils.

The Utrecht Missionary Society, 1859 (Utrechtse Zendingsvereeniging): It employs (1900) 14 missionaries, 41 native workers in 7 stations and 43 outstations, with 243 communicants, 41 schools with 1,070 pupils.

The Committee for the Mission to the Sangir and Talaut Islands (1886): This Committee collects aid for various needs of the work of the 13 missionaries and 210 native workers. The missionaries are supported by the Dutch Government. The number of communicants reported in the islands is 10,459, a very much larger number than is shown by any other Dutch Society working in that region. There are also 26 schools with 4,184 pupils.

NEU BETHEL. See Bethel, German East Africa.
NEUENDETTELSAUM Missionary Society.
See Germany; Missionary Societies in.

NEUENKIRCHEN: A station of the Hermannsburg Missionary Society in Natal, South Africa, situated in the Tugela valley. It has (1901) 1 missionary and his wife, 6 native workers, 2 places of worship, 1 day school, and 68 professed Christians, of whom 37 are communicants.

NEU HALLE: A village in the Transvaal, South Africa, situated about 80 miles N. E. of Pretoria. Station of the Berlin Missionary Society (1873), with (1903) 1 missionary, 13 native workers, 4 outstations, and 1,086 professed Christians. The village was formerly called Marapjane in the Society reports.

NEU HANNOVER. See New Hanover.

NEUKIRCHEN Missionary Institute.
See Germany; Missionary Societies in.

NEW AMSTERDAM: A town in British Guiana on the right bank of the Berbice river, near its mouth, 63 miles S. E. of Georgetown, with which it is connected by railway. Station of the Moravian Missions, with (1900) 1 missionary and his wife, 2 native workers, 3 outstations, 4 places of worship, 2 day schools, and 293 professed Christians. Station also of the SDA, with 2 missionaries, 1 physician; church statistics in Georgetown. Station also of the SFG, with 1 missionary, 2 native workers, 1 day school, and 130 professed Christians. Station of the West Indies Wesleyan Methodist Conference, with 1 missionary and his wife, 5 outstations, 4 places of worship, 5 Sunday schools, 5 day schools, and 409 professed Christians.

NEW CALEDONIA: An island in Melanesia which, together with its dependency, the Loyalty Islands, is a French colony, lying about 720 miles northeast of Australia, in latitude 20°-22° 30' south and longitude 164°-167° east. It is 200 miles long, 30 broad, with an area of 6,000 square miles, and a population (1901) of 51,000: 29,000 natives, the remainder colonists, soldiers, and convicts. The Roman Catholics have established missions at various points on the island, but so far little Protestant work has been undertaken beyond that which Christian natives of the Loyalty Islands are able to do. It was occupied by the French in 1843, and has been a penal settlement since 1872.

NEW CARMEL: A village in Jamaica, W. I., situated in the W. part of the island, S. E. of Savanna la Mar. Station of the Moravian Missions (1827), with (1901) 1 missionary and his wife, 28 native workers, 1 outstation, 1 place of worship, 2 Sunday schools, 1 Society for Young People, and 69 professed Christians.

NEWCHWANG: One of the treaty ports of China in the Manchurian province, Shing-king; situated on a branch of the Liao-ho, 35 miles from the Gulf of Liao-tung, in a vast alluvial plain, extending seaward. The real port is Ying-tze, farther down the river, to which the name of Newchwang is also applied. The port is closed by ice for four or five months in the year. The product of pulse and beans is the principal export. Population about 50,000. Station of the Presbyterian Church in Ireland (1869), with (1901) 1 missionary and his wife, 21 native workers, 8 outstations, 16 places of worship, 1 theological class, and 110 professed Christians. Station also of the SFG (1892), with a chaplain for English residents.

NEWELL, Samuel: Born at Durham, Me., U. S. A., July 24, 1784; graduated at Harvard College and Andover Seminary. He was one of that band of young students whose devotion and earnest ministrations to the natives of Massachusetts called the American Board into existence. He married Harriet Atwood, and sailed February 19, 1812, as a missionary of the American Board for Calcutta. Forbidden by the East India Company to remain in its territory, he sailed with his wife for Mauritius to establish a mission for that island and Madagascar. Mrs. Newell died soon after their arrival, and Mr. Newell went to Ceylon, the opening there for a mission being favorable; but in January, 1814, he joined his former fellow students and his associates under the ABCFM, Hall and Nott, at Bombay. Seven years later a terrible epidemic of cholera swept through the country. Mr. Newell devoted himself to the sick until he himself took the disease from the natives and died May 30, 1821. His grave is in the English cemetery at Bombay.

NEW ENGLAND COMPANY: Headquarters, 1 Hatton Garden, London, E. C., England. In the early part of the 17th century English colonists of New England, headed by the renowned John Eliot, "the Apostle to the North American Red Men," began the work among the Indians which laid the foundations for the New England Company and the work of the American Board of Commissioners for Foreign Missions. The account of the work among the Red Men, circulated through London in writings called "tracts," aroused so much interest in the great city that the needs of the Indians were brought before Parliament, and, on July 27, 1649, an act was passed with this title: "A Corporation for the Promoting and Propagating the Gospel of Jesus Christ in New England." In this act was recognized the necessity of work among the Indians for the purposes of evangelization and civilisation, and provision was made for the expenditure involved in the furtherance of such work. The ordinance enacted that there should be a corporation in England consisting of a president, treasurer, and fourteen assistants, and invested the corporation with power to acquire lands, goods, and money.

History: Soon after the action of Parliament and the appointment of the members of the Corporation, a general subscription was directed by Cromwell, the Lord Protector, and nearly £12,000 was raised for the purposes of the corporation. Commissioners and a treasurer were appointed in New England, and work was carried on by itinerant missionaries and school-teachers, chiefly near Boston. On the restoration of Charles II., in 1660, the corporation created by the Long Parliament became defunct, but through the efforts of the Hon. Robert Boyle a charter was granted by the king. This charter was completed in 1662. By it the company was limited to forty-five members; the first forty-five named; the object defined; the name decided as "The Company for Propagation of the Gospel in New England and the parts adjacent in America;" the duties and powers of the officers defined; and, in fact, the complete constitution was made and adopted. In 1899 a supplemental charter was granted by Queen Victoria, authorizing the expenditure of the whole of the company's funds in any part of British North America.

The work progressed in the New England
states until the outbreak of the War of American Independence, when the company was obliged to cease its labors there. The field was, therefore, transferred to New Brunswick, but after a fair attempt was found unprofitable, and once removed to Ontario, where since 1822 the work has been permanently maintained. Between the years 1823 and 1840 large sums were contributed toward aiding the missions in the West Indies, but the increase of the work in North America in the last ten years has necessitated the withdrawal of funds from that quarter, and all have been devoted to the missions of the company.

Present Work: The funds of the company are derived from three sources, the original charter fund and two legacies. The money coming from these sources may be used only for work among the American Indians and work in American dependencies of the British crown, while that from the third may be used for spreading the Gospel in any British colonies. The work carried on now by the company is evangelistic and educational among the Indian tribes of British North America. The company's stations at the present time are:

1. The Grand River Indian Reserves, among the Mohawks, Oneidas, Onondagas, Cayugas, Senecas, and Tuscaroras, settled on the banks of the Grand River between Brantford and Lake Erie.
2. Mohawk Institution, Brantford, Ont., an industrial boarding school for Indian children of both sexes.
3. St. George's School, near Lytton, British Columbia, an industrial boarding school for Indian boys.

NEW GUINEA. See Papua.

NEW HANOVER: A town in Natal, South Africa, situated in the N. Hanover district, 22 miles N. W. of Pietermaritzburg. Station of the Hermannsburg Missionary Society (1862), with (1900) 1 missionary and his wife, 2 native workers, 2 outstations, 1 place of worship, 3 day schools, and 227 professed Christians.

NEW HEBRIDES ISLANDS: A group included in Melanesia, Pacific Ocean, lying between latitude 21° and 15° south, and longitude 171° and 166° east, about 1,000 miles north of New Zealand. They were discovered and described by Cook in 1773. There are about 30 islands of volcanic origin, mountainous, with wooded ridges and fertile valleys, nearly all of them inhabited. Coconut and other magnificent trees grow in profusion, and the soil, like that of most volcanic islands, is very fertile, and fruits and vegetables are raised in abundance. The population numbers perhaps 80,000, and belongs in general to the Papuan race. The general type is rather ugly, below the middle height, fairer than the typical Papuan, with low, receding foreheads, broad faces, and flat noses. Bracelet, earrings, and nose rings made out of salt shells very often used to be their only clothing, the oil red clay smeared over the body in some of the islands. The characteristics and habits of the people differ greatly in the various islands, several islands having become Christianized, while on some of the other islands cannibalism is still possible. The languages of the islands are about twenty in number, and sometimes two or three are used on the same island, so that the missionaries laboring at opposite sides of the islands are unable to use each other's books for their respective congregations. These languages are alike in grammatical construction, and belong to the Melanesian family. Many of them have been reduced to writing by the missionaries.

The history of these islands furnishes many illustrations of the short-sightedness of the theory that savage tribes ought to be given civilization "through commercial intercourse" rather than through religion. It also offers abundant proof of the power of the Gospel of Jesus Christ to make the heathen nations more degraded races, and to develop stable and noble character in converts from heathenism.

Traders were the first Europeans to deal with the inhabitants of the most of the islands. The aim, of course, of these men was the benefit of the trader, not of the people whom commercial intercourse was to civilize and elevate. Just at this point—of aim, and interest, and motive—is where the expectation breaks down that savages will be civilized through commerce. Religion only controls beneficently the dealings of men with those who are ignorant and uncivilized, while the powers which civilization confers, the articles of barter of the European traders were largely weapons and liquors, both of which fed the flames of war among the tribes. But these "civilizers" urged on by the desire of profit, drove the islanders to frenzy. If the savages were cruel and treacherous, the traders made them more savage and treacherous and cruel, while the leathem diseases these strangers introduced decimated the population of the trading islands, and made it certain to all that white men can cause disease and death. Thus the New Hebrides became one of the most dangerous and discouraging of mission fields.

Beginning at the southern end of the group the following are the most important of the islands: Anetan is a very picturesque, and even imposing, island, with a climate in general good, and not unhealthful to those who understand how to avoid the malaria of the lowlands. It was visited in the first quarter of the 19th century by European traders seeking sandalwood. In 1841 the LMS sent native converts from Samoa there to teach the people. They had to flee for their lives, and, returning later, were always in jeopardy. They were followed in 1848 by the Rev. John Geddie, sent out by the Presbyterians of Nova Scotia, and he, after long and perilous efforts, won a hearing. The inhabitants are all Christians now, and it is a station of the New Hebrides Mission, with a missionary physician and his wife and about 50 native workers occupied in different parts of this and neighboring islands. Tanna contains an active volcano which shines in cloud by day, and in fire by night—"the lighthouse of the South Pacific, lit by the finger of God." This island was occupied in 1839 by native teachers from Samoa, sent by the LMS. Two missionaries of the LMS barely escaped from it with their lives in 1848, and the story of savagery and hostility was repeated during ten years. At last a permanent missionary settlement was effected in 1858. There are now 3 missionaries of the New Hebrides Mission at Tanna, with
several native workers, a printing house, and about 30 communicants. At Futuna, the first missionaries were Samoan converts, sent by the LMS in 1841. They were at once killed and eaten by the inhabitants. In 1851 a convert from Aneitium was sent there who succeeded in gaining the hearts of some of the people. It is still treated as an outstation of Aneitium, and for several neighboring islands, with a reef of coral upon which the surf is ever breaking. The LMS sent Samoan teachers there in 1840, one of whom was killed. Other teachers were sent from Aneitium, but little progress was made until Rev. J. G. Paton arrived there in 1866. This was the island of scanty water supply, where the back of heathenism was broken by the tact of the missionary in digging a well which supplied the people with water. It is now a station of the New Hebrides Mission, with 1 missionary and his wife, 1 missionary woman, 5 schools, and 80 church members. Erromango was visited by Rev. John Williams, of the LMS, in 1838. The people were at first afraid to open their gate to the white missionary, as the natives were holding a feast. They had seized the food from such feasts in years gone by, and the natives, supposing that Mr. Williams and his companions were about to do the same, killed him in self-defense. The LMS sent native converts from Futuna there in 1845, but they were driven away. Others were sent in 1852, some converts were made, taken away, and educated by the LMS and sent back to teach their own people; and in 1857 the Rev. G. Gordon and his wife were sent there by the Nova Scotia Church in Canada. They were 6th murdered. Mr. Gordon's brother went out to take up the martyr's work, and he, too, was murdered. The same year the New Hebrides Mission sent another missionary and his wife to Erromanga, and this temerity has been justified, for in 1900 there were 230 church members. It is a volcanic island, being about 3 miles long, 1 mile wide, and with a mountain 1,500 feet high. A small port is inhabited by cannibals. In 1851 a convert was visited by a missionary and his wife to Erromanga, and this was the commencement of a successful mission. In Mota the inhabitants are all Christians, and in Mera and Motalava there are strong Christian churches with some hundreds of members.

Taking the New Hebrides as a whole, probably few mission fields have so brought into prominence the splendid courage and devotion of both missionaries and native workers, and the depth and permanence of the change produced in a barbarous and heathen people by acceptance of the leadership of Jesus Christ.

NEW HEBRIDES MISSION: This is a synodical union of missionaries of several different Presbyterian Boards carrying on mission work in the New Hebrides Islands. The eight churches supporting this mission are the Presbyterian Church in Canada; the United Free Church of Scotland, and the Presbyterian Churches of Victoria, New Zealand, Otago, Tasmania, South Australia, and New South Wales. The Established Church of Scotland also renders some support in connection with the Church in Canada.

The representatives of these various branches of the Presbyterian Church have formed themselves into one Synod, called the "New Hebrides Mission Synod." The which general union of missionaries of several different Presbyterian Boards carrying on mission work in the New Hebrides Islands. The eight churches supporting this mission are the Presbyterian Church in Canada; the United Free Church of Scotland, and the Presbyterian Churches of Victoria, New Zealand, Otago, Tasmania, South Australia, and New South Wales. The Established Church of Scotland also renders some support in connection with the Church in Canada.

The representatives of these various branches of the Presbyterian Church have formed themselves into one Synod, called the "New Hebrides Mission Synod," the which annual Synod in a general way, and the supreme authority in the mission in all general matters, each missionary being under the Synod in a general way, while personally responsible only to the church by which he is supported.

The New Hebrides Mission was founded by the Rev. John Geddie, sent out in 1848 by the Secession Church in Nova Scotia. He was joined later by the Rev. John Ingle, of the Reformed Presbyterian Church in Scotland, originally appointed to the Maori of New Zealand, and followed in 1857 by Rev. John G. Paton and Rev. Josiah Caper. Then one by one the other churches came into the union, some sending workers, some contributing to the general support of the mission. The field of the mission is found in the islands of the New Hebrides, excepting those farthest to the north, which fall within the field of the Melanesian Mission.

NEW NICKERIE. See Nickerie.

NEW ROTTERDAM. The same as Nickerie.

NEWTON, Rev. C. C.; Missionary of the Southern Baptist Missionary Convention to the Yoruba, Africa. Born 1844, died July 20, 1894.
His body was buried in the ocean about 240 miles from Lagos. He was a laborious, deeply pious, and successful missionary. His wife preceded him to her heavenly home only by a few months. Both died from exposure to the terrible African climate. These two have a special claim to remembrance by the church to which they belonged, in that they helped greatly in the reestablishment of Southern Baptist Missions in Africa after the interruption caused by the Civil War in America.

NEWTON, John: Born about 1811; appointed missionary to India, 1835; died Muree, India, July 21, 1891. Dr. Newton went to India as a missionary of the PN in 1835, arriving at Calcutta in June of that year, accompanied by Rev. James Wilson and his wife. Setting out from Calcutta in a native boat on the Ganges they began their long journey of 1,200 miles to their chosen field at Ludhiana.

His labors were most various. Always foremost with him was the direct preaching of the Word, and that hand-to-hand effort by conversation with individuals which he felt to be one of the missionary's most effective methods. He was a powerful and attractive preacher, both in English and in the vernaculars.

Dr. Newton took with him when he first went to India an old-fashioned wooden printing press, which he set up in a little house secured for that purpose, and thus laid the foundation for that publishing establishment which, during the next fifty years, was destined to issue about two hundred and sixty-seven million pages in ten different languages. In this literary work, Dr. Newton throughout his missionary career was eminent. The Punjabi language is indebted to him for the foundation of its religious literature. Besides the translation of the New Testament into Punjabi and numerous tracts in that language, his literary labors, with those of his associate, Rev. L. Janvier, included a Punjabi grammar and dictionary, a commentary on Ephesians in Urdu, and important tracts in both Urdu and Hindi.

From the Ludhiana Mission, of which Dr. Newton was then the senior missionary, was issued in 1858 that call to the observance of the week of prayer, which has since become so widespread and so fixed a custom throughout the Christian world.

NEW ZEALAND: The colony of New Zealand consists of three islands, viz., North, Middle, and South, or Stewart's Island, together with certain small islets. The North Island is 44,000 square miles, the Middle Island 55,000, and Stewart's Island 1,000 square miles. Thus the area of the three islands in round numbers is about 100,000 square miles. The principal islands are separated by Cook's Straits, and Foveaux Straits separate Stewart's from Middle Island. The entire length of the colony is 1,100 miles, and resembles Italy in form, while in size it is somewhat less than Great Britain and Ireland.

In the North Island the mountains occupy one-tenth of the surface, and vary from 1,500 to 6,000 feet in height. There are a few volcanic mountains, as Tongariro (9,000 feet), which is occasionally active; Ruapehu (9,100 feet) and Mount Egmont are extinct volcanoes above the snow-line. In the Middle Island Mount Cook rises to about 13,000 feet in height. New Zealand is situated in the South Pacific Ocean, 1,200 miles south of the Australian continent, and about 8,000 miles from San Francisco. The entire group lies between 34° and 48° S. latitude and 166° and 179° E. longitude.

The climate is unquestionably one of the finest in the world. The mean annual temperature of the different seasons for the whole colony is, in spring 58°, in summer 63°, in autumn 57°, and in winter 48°. In future it will become the favorite resort of persons seeking health from all parts of the world, possessing, as it does, within a limited area, the most charming scenery and most desirable climate. The death rate is only 10.29 per 1,000.

The natives (called Maoris) are of Malay origin, and superior to other inhabitants of the Pacific intellectually and physically. The Maori is the average size of a European, viz., 5 ft. 6 in., but not so well developed. Mentally the natives are capable of very considerable development, and may hereafter fulfill Lord Macaulay's prediction of them.

The government is administered by a Governor appointed by the crown, and a Ministry, a Legislative Council nominated by the crown, and a House of Representatives elected by the people. The population is about 800,000; of these, 40,000 are Maoris.

New Zealand was first discovered by Tasman in 1642, and surveyed by Captain Cook in 1770. Thereafter it was frequently visited by whalers, and Maoris from New Zealand were frequently taken to Australia. It was not until 1807 that the beginning of missionary work in New Zealand is due. The apostle to the Maoris is the Rev. Samuel Marsden, of the Church of England, who was chaplain of the penal settlement at Port Jackson in Australia. He was struck by the superiority of the Maoris whom he saw, and in 1807 he persuaded the CMS to undertake a mission in New Zealand. Matters did not move quickly, and it was not until 1814 that Marsden set out with three lay missionaries in a brig that he had bought for the purpose. He had with him several Maoris, with whom he had become acquainted; two of them chiefs. He landed his party at the home of one of these men, and on Christmas Day, 1814, inaugurated the mission by an open-air service, the first Christian service ever held in New Zealand; one of the Maoris translating to the people what Mr. Marsden said in his sermon.

The work went on in a marvelous manner until, the European settlers in the islands having greatly increased in numbers, Bishop Selwyn was consecrated as Bishop of New Zealand in 1841. He was amazed at what he found. Everywhere he found the natives eager for instruction, meeting for daily prayers, keeping Sunday, learning to read the portions of Scripture that had been translated into their language. "In short," he wrote home, "I seem to see a nation born in a day." But not long after this war broke out in the islands, largely due to indignation at land-grabbing by English settlers; the "Hau-hau" superstition invaded the churches, and within twenty years the whole missionary enterprise suffered a rapid diminution of numbers of the natives.

Meanwhile, the Church of England was consolidating and increasing its forces among the European settlers. It sought from the beginning to make the adjacent islands of the Pacific
the field of its own efforts at evangelization, and
has nobly fulfilled its duty. It was Bishop Selwyn who began that work in the New Hebrides which is now the Melanesian Mission, and as early as 1855 the martyr Bishop Patteson was appointed over the islands, which now form a diocese of New Zealand, while New Zealand itself is hardly to be called a foreign mission field.

The WMS was the first society to follow in the footsteps of the CMS. It sent its first missionaries to New Zealand in 1822. But disaster followed the effort. In five years no impression had been made; the mission station at Kaeo, in what is now the district of Auckland, was destroyed by hostile Maoris, and the missionaries, barely escaping with their lives, retired to Australia early in 1827. But they returned and opened a new station in New Zealand the same year. After five years more of seemingly fruitless work light began to appear, and in 1834 eighty-one converts were baptized in one day. In 1855, when the Australian Wesleyan Conference was formed and took the control of the mission, there were 500 circuits or stations, 500 European and 2,500 Maori members, 2,500 European and 7,500 Maori adherents, 40 churches or other places of worship for Europeans, and nearly 200 for Maoris. Then the same experience befell the Wesleyans that seemed to overthrow the Church of England missions. War and the revival of superstitions paralyzed growth. The Maoris shot Whiteley in 1869, a missionary who had given his life to their welfare. The whole enterprise seemed to be coming to an end. But, as in the case of the CMS, the Wesleyans were sustained and the work of evangelization still continued. In 1874 the Wesleyan Conference of New Zealand was formed and the local church has since then done its share in the work of evangelizing the Maori people.

New Zealand as a Christian country has also its Presbyterian Church organization. The Presbyterian missions to the Maoris began in 1841. While the Presbyterians of New Zealand have done their share of the work of evangelization, their special field has been the New Hebrides mission, well known to the world through the thrilling descriptions of the saintly Paton. The Congregationalists also have local churches in New Zealand and give their funds for missionary work to the LMS, with which they cooperate. The Baptists came late into the field, but they have a vigorous missionary organization and besides work for the Maoris they maintain missionaries of their own in India.

Work of missions for the Maoris is thus seen to be a work of the churches in a Christian land, aided also by volunteers like the Salvation Army, who have come into the islands and attracted the attention of the Maoris in their own way. New Zealand is no longer an outpost of evangelization, but a new center whence the blessed influences go forth.

Meanwhile contact with the great outside world has brought to the natives a variety of adverse influences. One notable example of this is a comparatively recent invasion of Mormons, who, it is reported, have won 3,000 native converts. Those who have carefully studied the subject speak of the Maoris' future as not promising. Christianity has striven to elevate the natives; but so-called civilization, introducing alongside the Gospel message many forms of vice, has done much to degrade and destroy.

NEYOR: A town in Travancore, India, 22 miles N. of Cape Comorin. Station of the LMS (1828), with (1903) 3 missionaries and their wives, 2 women missionaries, 229 native workers, 71 outstations, 59 day schools, 61 Sunday schools, 1 boarding school, 7 dispensaries, 8 hospitals, 1 leper asylum and 13,259 professed Christians, of whom 1,699 are communicants. Station also of Mission to Lepers (1887), with (1903) a home for untainted children of lepers.

NGANDA: A settlement in the French Congo Territory, Africa, not far from the Congo River. Station of the Swedish Missionary Society (1890), with (1901) 3 missionaries, 2 of them with their wives; 2 women missionaries, 15 native workers, 15 outstations, 1 place of worship, 1 Sunday school, 1 boarding school, 1 dispensary, 1 industrial school, and 248 native members and 5,285 professed Christians.

NGAN-HSIEH: A village in the Province of Sze-chwan, China, situated 25 miles N. W. of Mien-chau. Station of the CMS (1894), with (1903) 2 missionaries and their wives, 1 woman missionary, and 8 professed Christians. The name is also written An-hsien.

NGAN-JEN-HSIEH: A town in the Province of Kien-si, China, situated about 45 miles N. E. of Fu-chau-fu. Station of the CIM (1889), with (1903) 3 women missionaries, 4 native workers, 3 outstations, 4 places of worship, 1 Sunday school, 1 day school, and 66 professed Christians. Some write the name Gan-ren.

NGAN-KING-FU: A town in the province of Ngan-hwei, China, on the left bank of the Yangtsze-kiang, 100 miles S. W. by W. of Wu-hu. Station of the CIM (1896), with (1903) 2 missionaries, 1 with his wife; 3 outstations, 1 Sunday school, 1 day school. Station also of the PE (1894), with 3 missionaries, 4 native workers, 1 place of worship, 2 day schools, 1 dispensary, and 1,015 professed Christians, of whom 26 are communicants. Some write the name An-k'ing.

NGAN-LU-FU: A town in the province of Hu-peih, China, situated on the left bank of the Han-kiang, 65 miles N. E. of I-chang. Population, 50,900. Station of the WMS, with (1903) 1 missionary, 7 native workers, 1 outstation, 5 places of worship, 1 Sunday school, 2 day schools, and 154 professed Christians, of whom 74 are communicants.

NGAN-SUN-FU: A town in the province of Kwai-chau, China, situated about 30 miles S. W. of Kwai-yang-fu. Station of the CIM (1888), with (1903) 2 missionaries, 1 of them with his wife; 4 native workers, 2 outstations, 3 places of worship, 1 Sunday school, 1 day school, and 63 professed Christians. Some write the name Gan-shun.

NGANDA: A German mission station in British
East Africa, on the Tana River, about 12 miles N. by W. of Golbanti. Station of the Newkirchen Mission Institute (1887), with (1903) 2 missionaries and their wives, 2 outstations, 1 place of worship, 3 day schools, 3 day schools, 5 day school, 3 day schools.

NGAZI. See Vuga.

NGOOGWE: A village in Uganda, Africa, situated in South Kyagwe region, N. of the Victoria Nyanza and about 26 miles E. by S. of Mengo. Station of the CMS (1893), with (1903) 1 missionary and his wife, 2 women missionaries, 235 native workers, 4 day schools, 1 dispensary, and 5,975 professed Christians, of whom 1,453 are communicants.

NGOMBE: A town in the Congo Free State, West Africa, situated about 60 miles S. W. of Leopoldville and about 6 miles from the left bank of the Congo River. Station of the CMS (1884), with (1903) 5 missionaries, 5 of them with the missionary, 166 native workers, 6 outstations, and 467 professed Christians, 1 day school, 1 dispensary, and 2 hospitals. Wathen is the name given to the place by Europeans.

NGU-CHENG: A village in Fo-kien Province, China, situated 22 miles S. W. of Fu-chau-fu. Station of the ME, with (1903) 3 women missionaries, 24 native workers, 2 outstations, 5 places of worship, 19 Sunday schools, 2 boarding schools, 11 day schools, and 2,192 professed Christians.

NGUNA: An island in the New Hebrides group. Station of the New Hebrides Mission Society, with (1900) 2 missionaries, 1 with his wife; 32 native workers, 1 Sunday school, 1 day school, 1 dispensary, and 820 professed Christians.

NIAMKOL0: A settlement in British Central Africa, situated at the S. end of Lake Tanganyika. Station of the LMS (1889), with (1903) 1 woman missionary, 166 native workers, 6 outstations, and 467 professed Christians, 1 day school, 1 dispensary, and 2 hospitals. Wathen is the name given to the place by Europeans.

NIAS: An island lying to the west of Sumatra, in latitude 1° north. Area, 2,523 square miles. The Rhenish Missionary Society has 16 stations on the island. The population is estimated at 250,000. They are a lively, active people, fond of dancing and of cutting off heads; and they are said to have so far resisted the invitation of Mohammedan missionaries. These islanders are in race allied to the Battaks of Sumatra, but their language is a dialect peculiar to the locality. The number of Christians in the island (1900) is 4,900, with some 2,000 more who are candidates for baptism.

NICARAGUA: A republic of Central America, bounded north by Honduras, east by the Caribbean Sea, south by Costa Rica, and west by the Pacific Ocean. Area, about 49,500 square miles. The principal mountains are in a range from 10 to 20 miles back of the west coast, and running parallel to it, sometimes rising in high volcanic cones, sometimes subsiding into low plains or places of slight elevation; it seems to have been the principal line of volcanic action, and Nicaragua is marked by some very high volcanoes. The Coco River, which rises in the Segovias Mountains, is the longest in Central America, its course being about 350 miles. The San Juan River, 120 miles in length, is the only outlet of the beautiful lakes Managua and Nicaragua, and plays an important part in the plan for an interoceanic canal by the Nicaraguan route. Climate, except in the very highest portions, is essentially tropical; the northeast part is very damp; rainfall is moderate. The soil is very rich, particularly on the Pacific slope, where tropical fruits and plants flourish constantly. Population is about 500,000, consisting of aborigines, mulattoes, negroes, and mixed races. The full-blooded Indians, who are civilized, are a sober and industrious race, but the half-breeds are lazy, vicious, and ignorant. The executive power is in the hands of a President, elected for four years. The legislature has but one house. Education is at a low ebb. The state religion is Roman Catholic, and other religions are not publicly tolerated. The chief industry is cattle-raising. The capital, Managua, has 30,000 inhabitants.

Mission work in Nicaragua is carried on by the Moravians on the Mosquito Coast. In 1890 permission was given the Moravians by the Nicaraguan Government to follow their converts into the interior, from which the missionaries have been jealously excluded.

NICKERIE: A village in Dutch Guiana, South America, situated on the estuary of the Corentyne River. Station of the Moravian Mission (1888), with (1901) 1 missionary and his wife, 9 native workers, 1 place of worship, 2 Sunday schools, 1 day school, and 113 communicant Christians.

NICOBAR ISLANDS: A small group of islands attached to British India, lying in the Bay of Bengal, northeast of Sumatra, and south of the Andaman Islands. There are 8 large islands and 12 small ones. Great Nicobar is 30 miles long and from 12 to 15 miles wide. The islands are well wooded and fertile. Coconuts are raised in great abundance. The inhabitants, numbering (1901) 6,510, are of the Malay race, and speak a form of the Malay language. They have been known to history for at least 1,500 years. The Nicobar swallow is the builder of the edible birds’ nests, so highly prized by the Chinese, and these nests are the principal exports, together with bêche-de-mer, tortoise-shell, and ambergris.

Mission work is carried on in these islands chiefly by the Danish Mission Society.

NICOMEDIA: A town and seaport in Asiat. Turkey, situated 53 miles E. S. E. from Constantinople, at the head of the gulf of the same name. It was the ancient capital of Bithynia, being built by Nicomedes I. in 264 B.C., and during the Roman Empire it was frequently used as an imperial residence. Under Turkish rule it decreased very much in importance, but has grown again since the extension of the railway from Constantinople to the interior of Asia Minor. It has a Turkish navy yard. Population about 15,000. Station of the ABCFM (1847), but now (1903) an outstation with 6 native workers, 2 places of worship, 4 Sunday schools, 2 girls' schools, and 283 professed Christians. The Turkish name of the place is Ismid.

NIEN-HANG-LI: A town in Kwangtung, China, situated about 90 miles N. E. of Swatow. Station of the Basel Missionary Society (1866), with (1903) 3 missionaries, one of them with his wife; 18 native workers, 3 outstations, 9 day schools, and 893 professed Christians, of whom 498 are communicants.

NIGERIA: A British possession and sphere of
THE ENCYCLOPEDIA OF MISSIONS

Ngin-pu-fu

A seaport and the place of greatest commercial importance on the west coast of the main island of Japan; situated on a low strip of land at the mouth of the Shinano River, 137 miles N. W. of Tokio. The city is nearly laid out, the streets leveled, paved with gravel, well drained, cleaned, and lighted with coal-oil obtained in the neighborhood. Many streets have a canal in the center. It has a flourishing inland trade, and contains national and private banks, a government hospital, and a school of foreign languages. Climate extreme both in summer and winter. Population (1898), 53,566. Station of the ABCFM (1883), with (1902) 2 missionaries with their wives, 1 woman missionary, 1 native worker, 13 outstations, 5 places of worship, 8 Sunday schools, and 190 professed Christians.

NIGER LANGUAGE (Ki-naka): Belongs to the Bantu family and is spoken by some tribes in the vicinity of Ribe, British East Africa. It has been reduced to writing by missionaries of the CMS, and missionaries of the United Free Methodists (of Britain) have also made literary use of it. It has been written with Roman letters.

NIMACH: A town of Central India, situated in Gwalior state, 134 miles N. W. by N. of Indore. Altitude, 1,613 feet. Population (1891), 6,300, of whom 3,800 are Hindus and 1,300 are Mohammedans. Station of the PCC (1884), with (1903) 4 missionaries, two of them with their wives; 15 native workers, 2 outstations, 1 place of worship, 3 Sunday schools, 7 day schools, 2 dispensaries, 1 hospital, 1 orphanage, and 27 professed Christians. Society writes the name Nenmouch.

NIMBE: A village in West Africa, situated about 25 miles from the mouth of Brass River in the Delta of the Niger. Station of the CMS (1868), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 2 day schools, 1 boarding school, 1 industrial school, 1 dispensary, and 595 professed Christians, of whom 59 are communicants. These statistics include also Brass Fuyou, at the mouth of the river. Society writes the name Brass Nenbe.

NIMPAHI: A town in the Central Provinces of India, situated in the Nerbada division, 18 miles S. of Hoshangabad. Station of the Swedish Evangelical National Society (1880), with (1902) 2 missionaries and their wives, 4 native workers, 2 outstations, 1 place of worship, 1 day school, and 115 professed Christians, of whom 61 are communicants.

NING-HAI-CHAU: A town in the province of Shantung, China, situated on the coast 18 miles E. of Chi-fu. Station of the CIM (1895), with (1903) 1 missionary and his wife, 1 woman missionary, 3 native workers, 1 place of worship, 2 day schools, 1 dispensary, and 22 professed Christians.

NING-HAI-HSIEN: A town in the province of Che-kiang, China, situated 35 miles S. S. W. of Ning-po-fu. Station of the CIM (1888), with (1903) 1 missionary and his wife, 1 woman missionary, 6 native workers, 1 outstation, 2 places of worship, 1 day school, and 57 professed Christians.

NING-KWO-FU: A prefectural city in the province of Ningpo-fu, China, 92 miles northwest of Hang-chau. Station of the CIM (1874), with (1903) 2 missionaries and their wives, 1 woman missionary, 7 native workers, 1 Sunday school, 1 day school, and 131 professed Christians, of whom 83 are communicants.

NING-PO-FU: One of the five treaty ports of China opened to foreigners by the treaty of 1842. Situated in the province of Che-kiang, east of the mountains, in a plain on the left bank of the Ningpo River, 16 miles from its mouth. The old wall surrounding it, 25 feet high and 16 feet broad, is in a good state of preservation. There are the usual gates of all Chinese walled cities, north, east, south and west, and two others, besides two passageways for boats, in the 5 miles circuit. The principal striking buildings are the large ice-houses, the pagoda, 169 feet high, and the Drum-tower, built earlier than the 15th cen-

NINTE-KE: A small town of the central province of China, situated 30 miles S. of Shansi. Station of the CMS (1862), with (1903) 1 missionary and his wife, 2 native workers, 1 place of worship, 2 day schools, 1 dispensary, and 23 professed Christians.

NITRA: A seaport in the eastern coast of British Guiana, 323 miles E. of New Amsterdam. Population (1881), 700. Station of the ACFM (1857), with (1903) 1 missionary and his wife, 1 woman missionary, 1 native worker, 2 outstations, 1 place of worship, 1 day school, and 100 professed Christians.

NITZHEN: A town in the province of Shantung, China, situated on the coast 18 miles S. S. E. of Tsinan. Station of the American Home Mission Society (1879), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, and 135 professed Christians, of whom 92 are communicants.

NITZHEN: A town in the province of Shantung, China, situated on the coast 18 miles S. S. E. of Tsinan. Station of the American Home Mission Society (1879), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, and 135 professed Christians, of whom 92 are communicants.

NITZHEN: A town in the province of Shantung, China, situated on the coast 18 miles S. S. E. of Tsinan. Station of the American Home Mission Society (1879), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, and 135 professed Christians, of whom 92 are communicants.

NITZHEN: A town in the province of Shantung, China, situated on the coast 18 miles S. S. E. of Tsinan. Station of the American Home Mission Society (1879), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, and 135 professed Christians, of whom 92 are communicants.

NITZHEN: A town in the province of Shantung, China, situated on the coast 18 miles S. S. E. of Tsinan. Station of the American Home Mission Society (1879), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, and 135 professed Christians, of whom 92 are communicants.

NITZHEN: A town in the province of Shantung, China, situated on the coast 18 miles S. S. E. of Tsinan. Station of the American Home Mission Society (1879), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, and 135 professed Christians, of whom 92 are communicants.

NITZHEN: A town in the province of Shantung, China, situated on the coast 18 miles S. S. E. of Tsinan. Station of the American Home Mission Society (1879), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, and 135 professed Christians, of whom 92 are communicants.

NITZHEN: A town in the province of Shantung, China, situated on the coast 18 miles S. S. E. of Tsinan. Station of the American Home Mission Society (1879), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, and 135 professed Christians, of whom 92 are communicants.

NITZHEN: A town in the province of Shantung, China, situated on the coast 18 miles S. S. E. of Tsinan. Station of the American Home Mission Society (1879), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, and 135 professed Christians, of whom 92 are communicants.

Station of the American Home Mission Society (1879), with (1903) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, and 135 professed Christians, of whom 92 are communicants.
Ning-te-hsien  N.  American  Indians  THE  ENCYCLOPEDIA  OF  MISSIONS  540

tury.  Temples  and  monasteries  are  numerous  and  very  handsome.  The  houses  are  mostly  built  of  brick,  and  are  usually  of  but  one  story.  The  city  suffered  from  the  ravages  of  the  insurgents  during  the  Taiping  rebellion,  when  it  was  occupied  for  six  months  (1854).  It  has  a  library  of  50,000  volumes.

The  foreign  trade  of  Ningpo  is  quite  considerable.  Silks,  cottons,  and  white-wood  carvings  are  the  principal  products.  It  was  occupied  by  the  English  forces  on  the  12th  of  October,  1841,  after  the  fort  at  the  mouth  of  the  river  Chinhae  was  successfully  stormed.

The  climate  of  Ningpo  is  variable;  the  usual  range  of  temperature  is  from  20°-100°  F.  The  rainfall  is  excessive,  and  foreigners  are  subject  to  malaria.

The  following  missionary  societies  carry  on  various  enterprises  in  the  city  and  adjacent  region:  The  ABMU  (1843),  CMS  (1848),  PN  (1854),  CIM  (1859),  and  the  UMFC  (1864).  These  societies,  together,  now  have  (1900)  45 missionaries,  43 women  workers,  175  native  workers,  32  day  schools,  7  boarding  schools  or  higher  educational  institutions, 7  hospitals  and  dispensaries,  and  4,801  professed  Christians.

NIU-CHWANG.  See  New-chwang.

NIUE  or  SAVAGE  ISLAND:  An  island  lying  between  the  Hervey  and  Samoan  Isles,  and  administratively  connected  with  the  former.  Climate  hot;  temperature  75°-98°  Fahr.  Population, 4,726  stationary  and  363  away  in  ships,  etc.  Race,  light  copper-colored  Malays,  Polynesi­ans.  Language,  a  combination  of  Tonganese  and  Samoan.  Missionary  work  was  commenced  here  in  1849  by  the  LMS.  Out  of  a  population  of  4,850  about  4,000  are  Christians,  1,650  of  them  members  of  the  church.  The  natives  of  this  place  have  lately  maintained  a  certain  number  of  evangelists  in  New  Guineas,  who  come  home  at  intervals  to  tell  of  the  blessing  of  God  on  their  work.

NKALA:  A  settlement  in  northwest  Rhodesia,  Central  Africa,  situated  in  Barotseland  about  125  miles  E.  of  Lealui.  Station  of  the  Primitive  Methodist  Missionary  Society,  with  (1903)  1  missionary  and  his  wife,  1  native  worker,  2  places  of  worship,  1  Sunday  school,  and  4  professed  Christians.

NOAKHALI:  A  town  in  Bengal,  India,  situated  in  the  Noakhali  district,  180  miles  E.  of  Calcutta.  Population, 5,500,  of  whom  2,800  are  Hindus  and  2,600  are  Mohammedans.  Station  of  the  Queensland  Australian  Baptist  Mission  Society  (1889),  with  (1903)  2  missionaries,  1  woman  missionary,  9  native  workers,  1  outstation,  1  day  school,  and  10  professed  Christians.

NODIA:  A  town  on  the  island  of  Hai-nan,  Chinese  Empire,  situated  about  90  miles  S.  W.  of  Ho-li-hau.  It  lies  in  a  wide  plain  almost  entirely  surrounded  by  mountains,  and  has  very  pleasing  environs.  The  people  are  of  several  distinct  races,  many  of  them  being  Hak-kas  from  the  province  of  Kwang-tung.  The  different  dialects  found  here  constitute  a  serious  obstacle  to  mis­

NONGSAWILIA.  See  Cherra  Punji.

NONGOMA:  A  settlement  in  Zululand,  Natal,  Africa,  situated  about  12  miles  N.  E.  of  Bethel.  Station  of  the  Zululand  Missionary  Diocese  (1892),  with  1  missionary  and  his  wife,  5  native  workers,  3  outstations,  2  day  schools,  and  1  dispensary.

NORFOLK  ISLAND:  An  island  situated  in  the  Pacific  Ocean,  between  New  Zealand  and  New  Caledonia,  about  1,200  miles  E.  N.  E.  of  Sydney;  a  dependency  of  New  South  Wales.  Population, 800.  Headquarters  of  the  Melanesia  diocese  and  of  the  Melanesia  Mission.  The  training  school  for  all  the  native  workers  for  the  Solomon  Islands,  Banks  Islands,  and  the  northern  New  Hebrides  is  at  Norfolk  Island.  The  other  inhabitants  of  the  island  are  descendants  of  the  "Bounty"  mutineers  from  Pitcairn  Island.  The  SPG  maintains  a  chaplain  at  Norfolk  Island  for  their  benefit.  The  Melanesia  Mission  has  (1903)  3  missionaries,  1  with  his  wife;  1  theological  class,  1  printing  house,  and  a  steamer.

NORTH  AFRICA  MISSION:  With  the  fall  of  the  French  Empire  and  the  establishment  in  its  place  of  the  French  Republic,  religious  liberty  was  granted  not  only  to  France,  but  also  to  Algeria,  which  was  subjugated  by  her  in  1830.  The  French  in  North  Africa  opened  for  the  introduction  of  the  Gospel.  Mr.  George  Pearce,  who  visited  Algeria  in  1876,  revisited  it  in  1880,  and  returning  to  Eng­

North  Africa  opened  for  the  introduction  of  the  Gospel.  Mr.  George  Pearce,  who  visited  Algeria  in  1876,  revisited  it  in  1880,  and  returning  to  England  aroused  considerable  interest  in  the  Kabyles,  or  the  Berber  tribes  inhabiting  the  mountains  a
The Jerusalem News, who paid a brief visit to Algeria, and Mr. Edward Glenny, who had independently been making investigations as to the condition of Morocco and Algeria, united in forming a committee for its management. In November of 1881 Mr. Pearce, accompanied by Mr. Glenny, who then proceeded to Tangier, the council having determined its sphere of operation. Several stations were established. A mission was reorganized in 1883. Several other friends joined in forming a council, and a fresh band of workers was taken out by Mr. Glenny, who then returned to Tangier, along with an additional group of missionaries. This great preponderance of women was due to the fact that the mission was originally intended to be a women's mission, with the specific goal of evangelizing among the women of Algeria. The mission was reorganized in 1883, and the work expanded rapidly, with stations being established in various places in Morocco, Algeria, Tunisia, and Tripoli, and a branch mission to the Bedouins in Northern Arabia. There were seven fields into which the work was divided, each with its own distinct focus, and these were under the control of different missionaries.

**Stations in Algeria:**
- DJemmaa Sahrij: 7 missionaries; Tangier: 10 missionaries; Tripoli: 6 missionaries; Fez: 5 missionaries; Casablanca: 5 missionaries; El Araish: 2 missionaries; Fez: 5 missionaries; Tetuan: 4 missionaries; Tunis: 9 missionaries; Susa: 5 missionaries; Shershell: 2 missionaries; DJemmaa Sahrij: 7 missionaries; Tetuan: 4 missionaries; Kairwan: 4 missionaries; DJemmaa Sahrij: 7 missionaries; Tangier: 10 missionaries; Tripoli: 6 missionaries; Fez: 5 missionaries; Casablanca: 5 missionaries; El Araish: 2 missionaries; Fez: 5 missionaries; Tetuan: 4 missionaries; Tunis: 9 missionaries; Susa: 5 missionaries; Shershell: 2 missionaries.

**NORTH AMERICAN INDIANS:** The name Indian as applied to the aborigines of America perpetuates the mistaken supposition of Columbus that he had landed upon the eastern shores of India. While the use of this misnomer has continued, the people are now generally designated as American Indians or Red Indians, to distinguish them from the inhabitants of the islands of the Atlantic, on the one side, and those of the Pacific on the other. There is no proof that this intercourse left here any dominant influence, or was potent in bringing about the civilizations developed on the uplands of Peru, or in the valleys and plateaus of Central America and Mexico. Whatever had been achieved in North or in South America was the same race that was here discovered by Columbus.

**Culture:** The aboriginals of America suffered a serious drawback because of the absence, upon this Western continent, of animals capable of domestication. The llama had been tamed, but its habitat was limited, and it could serve man as did the sheep, ox, and horse of the eastern continent. These latter animals had given stability to man's food supply, and, by supplementing his strength in work, had secured to him both time and energy for the exercise of his reason and the devising of means for his individual and social advancement. The nature of America was without such animal assistants. He had to hunt and fish and depend upon his unaided efforts for whatever he possessed. His development of the maize from a tropical plant of slender capacity to a productive staple, capable of being grown over a wide geographic range, a range which even our race has not been able to greatly extend, was a remarkable agricultural achievement, requiring time, careful observation, and persistent labor. He had mastered the art of irrigation, which was extensively used in the semi-arid regions, and hundreds of miles of ditches can-to-day be traced upon the abandoned plains of the Southwest. Fruits and vegetables were cultivated for food; cotton was grown and woven into cloth; wool from the buffalo and mountain sheep was spun for clothing; different vegetable fibers and the inner bark of trees were woven into articles of use; dyes were manufactured and employed for ornamentation; the carving of stone, wood, and bone; pottery-making, basketry, and the making of implements and weapons were among the widespread industries of the peoples. Skill in workmanship and beauty of design were particularly noteworthy in the native baskets and vases. Village life was the rule. Habitations were of stone, adobe, wattle, and woven skins. The legends and folk-tales recounted about the fireside were dramatic in character and contained wise and witty sayings, while the myths and rituals connected with the ceremonies were replete with lofty ideas and poetic fervor. Song accompanied all religious and social gatherings, as well as the daily avocations of the people; they pled for the lover, inspired the warrior, and spied the departed to
the spirit land. That the culture of the tribes was unequal was, in part, owing to their varying environments and to the isolation and enmities caused by the great diversity of languages upon the continent. Altogether, some languages have disappeared during the last one hundred and fifty years, there are to-day within the limits of the United States about forty linguistic stocks, each of which contains several languages and dialects.

Organization: The political organization of the people was tribal. Most of the tribes were composed of a number of clans, but the last kinship group was fundamental, and to it the rights of the individual were subordinate. The ruling power was vested in a council of chiefs and leaders, but the duty of enforcing the traditional rules or laws devolved upon the chiefs. Marriage was generally exogamous, that is, a man or woman could not marry within his or her kinship group or clan, and in a large number of the tribes descent was traced through the mother only. In many instances the tribal structure was elaborate in its details, and among all of the tribes the religious ideas and symbols of the people were closely interwoven with their political organization.

Religion: Among peoples so diverse as to language, avocations, and general culture, it is almost impossible to generalize their religious beliefs and practices. Broadly speaking, all regarded the vital and formative force of the universe as akin to that peculiar quality or power of which man is conscious within himself as directing his own acts—willing a course to bring about certain results—as a word, as a word of a deified will power. This mysterious, invisible, animating force manifested itself in all forms, each of which it had endowed with some special gift or capacity. The stars, sun, moon, winds, thunder, the earth, water, and all living creatures, were manifestations of this power and served as intermediaries through which man could seek help of the mysterious one. The priestly class—men “whose minds were open to the teaching of the gods”—had charge of the rites by which these intermediaries could be addressed. Fasting, prayer, acts of purification, and occasionally sacrifice, were observed in all religious ceremonies. While the underlying thoughts of the native religion were high and reverent in character, the overlying rites were sometimes distorted by practices arising from the abuse of priestly privilege. The belief in a future life was universal, and the character of a man’s life here was considered as affecting his life hereafter. Truthfulness, honesty, justice, and hospitality were persistently inculcated by priests, chiefs, and leaders.

Missionary work in the 17th and 18th centuries: Protestant missionary work began soon after the founding of the colonies. In 1621 the “East India School” was organized and endowed at Charlie City, Va. The uprising in the following year would have been far more disastrous to the settlers had not the Christian and friendly Indians both warned and protected the colonists. This unfortunate event checked all systematic missionary efforts by this colony until near the close of the century, when, in 1691, a legacy from the Hon. Robert Boyle was used to form the Brasserstown school, “that the Christian faith may be propagated amongst the western Indians.” This school was connected with the newly chartered college of William and Mary.

In New England the natives were early instructed in the Christian religion, but no mission work exclusively Indian was undertaken until John Eliot, in eastern Massachusetts, and Thomas Mayhew, in Martha’s Vineyard, began their labors. In 1641 Thomas Mayhew obtained a grant of Martha’s Vineyard and the adjoining islands, and became both patentee and governor. His son, Thomas Mayhew, Jr., was minister to the settlers and extended his work to the Indians living thereabouts, who numbered several thousands. He mastered the native language, and soon had a success. Soon after his death in 1670, the first native Indian church was organized, with 282 members; the covenant was prepared by Mr. Mayhew in the Indian language. In 1657, when on his way to England to solicit aid for his work, Mr. Mayhew was lost at sea. His son, the governor, about seventy years old, began at once the study of the native language, and carried on the mission, preaching at least once a week at some of the plantations, “walking sometimes twenty miles through the woods to the Indians,” and continued these labors in his home in London. In 1670 the first Indian church with a native pastor was organized, the adult Christians on the island numbering about three thousand.

John Eliot was born in Essex, England, 1604. He came to New England in 1631, and the next year was settled over the First Church at Roxbury, and continued in this charge until his death in 1690. Soon after his arrival he began the study of the native tongue and taught all the Indians who visited him from two catechisms he had framed in the East Indian language. In 1657, when on his way to England to solicit aid for his work, Mr. Mayhew was lost at sea. His son, the governor, about seventy years old, began at once the study of the native language, and carried on the mission, preaching at least once a week at some of the plantations, “walking sometimes twenty miles through the woods to the Indians,” and continued these labors in his home in London. In 1670 the first Indian church with a native pastor was organized, the adult Christians on the island numbering about three thousand.

John Eliot was born in Essex, England, 1604. He came to New England in 1631, and the next year was settled over the First Church at Roxbury, and continued in this charge until his death in 1690. Soon after his arrival he began the study of the native tongue and taught all the Indians who visited him from two catechisms he had framed in the East Indian language. In 1657, when on his way to England to solicit aid for his work, Mr. Mayhew was lost at sea. His son, the governor, about seventy years old, began at once the study of the native language, and carried on the mission, preaching at least once a week at some of the plantations, “walking sometimes twenty miles through the woods to the Indians,” and continued these labors in his home in London. In 1670 the first Indian church with a native pastor was organized, the adult Christians on the island numbering about three thousand.

In 1670 the first Indian church with a native pastor was organized, the adult Christians on the island numbering about three thousand.
is extant. In 1661 the New Testament was printed and two years later the entire Bible. This was the first Bible ever printed on the continent. A new edition was called for and printed in 1680.

In 1734 the Rev. John Sargent, of Yale College, opened a school among the Oneidas in New York, and in two years had a church with fifty-two members, which increased to two hundred and fifty. In 1751 the Rev. Jonathan Edwards took a double charge at Stockbridge, of both whites and Indians. When a child he had picked up the language of the natives, and this knowledge proved of service to him in his work among the Indians in western Massachusetts.

When, in 1657, John Eliot attended a council held at Hartford, Conn., he preached to the Pequots, but they utterly refused to receive a missionary, because the English having “taken their lands sought to make them servants.” Rev. James Pitch, pastor of the church at Norwich, Conn., being acquainted with the language of the Mohicans, succeeded in establishing a church among these Indians, with some forty members.

The Moravians began work at Sharon, western Connecticut, in 1712. In the following year Rev. Eleazer Wheelock, of Lebanon, Conn., took into his family a young Mohegan, Samson Occum, as a pupil. The rapid advance made by the Indian youth in English, Latin, Greek, and Hebrew enabled him to become a teacher at New London, Conn., in 1748, and to be ordained to the ministry in 1756. Mr. Wheelock’s success with Samson Occum led to the establishment, by the aid of Mr. Joshua Moor, of the Moor Indian school at New Lebanon. In 1765 the Rev. Samson Occum went to England to raise funds for this school, and succeeded in securing some ten thousand pounds from friends of the cause in England and Scotland. On his return, Dr. Wheelock, who became the president of Dartmouth College, to maintain the Indian youth under his tuition. On July 31, 1781, Congress authorized the payment of one hundred and thirty-seven thousand pounds, “currency of New Jersey, in specie, for the support and tuition of three Indian boys of the Delaware nation, now at Princeton College.”

In Georgia the Moravian Church started a mission on the Savannah river, but difficulties between the Spaniards and the English resulted in the breaking up of the school, and the return of the missionaries to Bethlehem, Penn. No further work was undertaken until the 19th century.

While few if any of the mission stations established during the 17th or 18th centuries remain at the present day, this fact does not indicate failure of the Christianizing work of the missionaries, but is due to the great changes that have rapidly followed the displacing of the native population by the white race in the settlement of the country.

In New England the missionaries were not lost; they have borne double fruit, as, on the one hand, in the improved condition of the descendants of those Indian tribes who were the subject of so much care and solicitude, and, on the other hand, they tended to foster in the white race the growth of a broader view of human relations, and a philanthropy that has since found practical expression in beneficent laws and generous government acts toward the natives of this country.

In the West, governmental relations: Among the problems that confronted the leaders of the American Revolution, none was more pressing than that of the Indian. On June 17, 1775, the Continental Congress appointed a Committee on Indian Affairs, with Gen. Schuyler as chairman. At the suggestion of this committee, Congress divided the colonies into three departments, northern, middle, and southern, and appointed commissioners to superintend each department. By this plan the tribes were to be brought directly in contact with accredited officials within their own territory, and efforts made to reduce to a minimum the dangers of Indian hostility to the colonies. Care was also exercised to institute measures looking to the betterment of the natives. The first direct connection between the general government and mission work occurred April 10, 1776, when the Continental Congress directed the commissioners of the Middle Department to employ a minister, a schoolmaster, and a blacksmith for the Delaware Indians. In September of the same year, as a means of conciliating the tribes of New York, New Jersey, and others which grew up around the missions, the Articles of Confederation, or Articles of Confederation, of the “Articles of Confederation,” by Article IX, directed that $500 be paid to Dr. Wheelock, president of Dartmouth College, to maintain the Indian youth under his tuition. On July 31, 1781, Congress authorized the payment of one hundred and thirty-seven pounds, “currency of New Jersey, in specie, for the support and tuition of three Indian boys of the Delaware nation, now at Princeton College.”

The history of the Moravian missions in Pennsylvania and Ohio is a dark page in our annals, and presents a fearful record of suffering, heroism, and martyrdom on the part of these friendly Christian Indians. (Heckewelder’s Narrative of the Mission to the American Indians. Schweinitz: Life of David Zeisberger. Loskiel: History of the Mission to the Indians.)

In Georgia the Moravian Church started a mission on the Savannah river, but difficulties between the Spaniards and the English resulted in the breaking up of the school, and the return of the missionaries to Bethlehem, Penn. No further work was undertaken until the 19th century.

While few if any of the mission stations established during the 17th or 18th centuries remain at the present day, this fact does not indicate failure of the Christianizing work of the missionaries, but is due to the great changes that have rapidly followed the displacing of the native population by the white race in the settlement of the country. The unselfish labors of the early missionaries were not lost; they have borne double fruit, as, on the one hand, in the improved condition of the descendants of those Indian tribes who were the subject of so much care and solicitude, and, on the other hand, they tended to foster in the white race the growth of a broader view of human relations, and a philanthropy that has since found practical expression in beneficent laws and generous government acts toward the natives of this country.

In the West, governmental relations: Among the problems that confronted the leaders of the American Revolution, none was more pressing than that of the Indian. On June 17, 1775, the Continental Congress appointed a Committee on Indian Affairs, with Gen. Schuyler as chairman. At the suggestion of this committee, Congress divided the colonies into three departments, northern, middle, and southern, and appointed commissioners to superintend each department. By this plan the tribes were to be brought directly in contact with accredited officials within their own territory, and efforts made to reduce to a minimum the dangers of Indian hostility to the colonies. Care was also exercised to institute measures looking to the betterment of the natives. The first direct connection between the general government and mission work occurred April 10, 1776, when the Continental Congress directed the commissioners of the Middle Department to employ a minister, a schoolmaster, and a blacksmith for the Delaware Indians. In September of the same year, as a means of conciliating the tribes of New York, New Jersey, and others which grew up around the missions, the Articles of Confederation, or Articles of Confederation, of the “Articles of Confederation,” by Article IX, directed that $500 be paid to Dr. Wheelock, president of Dartmouth College, to maintain the Indian youth under his tuition. On July 31, 1781, Congress authorized the payment of one hundred and thirty-seven pounds, “currency of New Jersey, in specie, for the support and tuition of three Indian boys of the Delaware nation, now at Princeton College.”

By Article IX of the “Articles of Confederation—
tion.” “the United States in Congress assembled” were charged with the sole and exclusive right and power of managing all affairs with the Indians. In 1784 “the Secretary of the War Office” was directed to cooperate with the commissioners when making treaties. Two years later the Indian “departments” were reduced to two, the Ohio River being the dividing line, and a superintendent placed over each and made subject to the Secretary of War. After the adoption of the Constitution, and the creation of a War Department, August 7, 1789, the Indians continued to be under the charge of the Secretary of War. The first of these “agreements” was with the Indians of the Western Reserve, August 17, 1797. The last with the Nez Perce, August, 1868. The Act of March 3, 1871; prohibited the making of any future treaty with Indians, and license traders.

Indian Land Tenure: In the proclamation of George III., dated October 7, 1763, four principles of government in Indian affairs were laid down which have ever since been in force: 1st. The recognition of the Indian’s right of occupancy; 2d. The right of the Government to expel white intruders on Indian lands. 3d. The sole right to purchase Indian lands vested in the Government, and, 4th, The right to regulate trade and license traders.

In 1783 the “Congress of the Confederation” issued a proclamation forbidding private purchase or gift of lands from Indians, or any settlements to be made upon unceded Indian territory. Upon the adoption of the Constitution in 1789 the right of eminent domain was vested in the United States. At first this extended from the lower of the Great Lakes to Florida, and beyond this line the United States claimed no control, so that the citizen who ventured to pass over into the Indian country could claim no protection from the Government. Gradually trading and military posts were established, and the land adjoining them secured from the Indians; then roadways between these stations were obtained, until finally the land was hedged in by their cessions, and were restricted to defined tracts known as “reservations.” These were established either by treaty or by order of the President.

The reservations held by treaty, Act of Congress, patent, or acknowledged Spanish grants, number about 110, and cannot be alienated except by consent of Congress. They are located in Arizona, California, Colorado, Idaho, Indian Territory, Iowa, Kansas, Michigan, Minnesota, Montana, Nebraska, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, South Dakota, Washington, Wisconsin and Wyoming.

At the request of the Indian Department, the President is authorized to set apart public lands as Indian reservations. (The Public Domain, 1883, p. 243.) There are between sixty and seventy “Executive Order” reservations. This class can be restored to the public domain by the President without the Act of Congress. Three hundred and seventy treaties have been made with Indian tribes. The first was with the Delaware, September 7, 1778, and the last with the Nez Percé, August, 1868. The Act of March 3, 1871, prohibited the making of any future treaty with Indians; since then “agreements” have been made with the tribes, subject to the approval of Congress. The first of these “agreements” was with bands of the Sioux, September 20, 1871; the last, with the Chocktaw and Choctaw, March 21, 1902. (Report of Com’r Ind. Afs., 1903.)

All these treaties and agreements had reference to land. The payments to the tribes for the cessions made were sometimes cash, but generally in the form of annuities. The bulk of these annuities were in the form of goods and services, and in some instances included annuities in the form of a small payment of money. This form was more acceptable to the white merchants than to the Indians, and the interests of trade have predominated in determining the kind of payment that should be given the Indian for his lands.

The land within a reservation was regarded as belonging to the tribe, and not subject to indi-
vidual ownership. This condition tended to perpetuate tribal relations and to retard the progress of the people along the lines of the civilization of the white race. As early as the middle of the last century, a number of treaties made at that time contained provisions for the allotment of individual holdings to Indians, but this policy did not become general until the passage of the Severalty Act of February 8, 1887. The provisions of this act are applicable to lands that are agricultural and grazing, but not to lands that are fitted only for grazing, or which require irrigation. This law gives 80 acres of agricultural land to each member of the tribe, regardless of sex or age. Where the land is classed as grazing, the amount is doubled.

Section 5 states: "That upon the approval of the allotments provided for in this act by the Secretary of the Interior, he shall cause patents to issue therefor in the name of the allottees, which patents shall be of the legal effect, and declare that the United States does and will hold the land thus allotted, for the period of twenty-five years, in trust for the sole use and benefit of the Indians, to whom such allotments have been made, or, in case of his decease, of his heirs according to the laws of the State or Territory where such land is located, and that at the expiration of said period the United States will convey the same by patent to said Indian, or his heirs, as aforesaid, in fee, discharged of said trust and free of all charge and encumbrance whatsoever; Provided, That the President of the United States may, in any case in his discretion, extend the period."

Under this act a number of reservations have been allotted to the tribes living thereon, and the remainder of the lands purchased by the Government and thrown open to white settlement. The work of allotment is still going on, and the time is not far distant when the Indians' tenure of land will have come to be merely the right of occupancy, and will be the same as that of white land-holders.

Population: According to the report of the Commissioner of Indian Affairs for 1903, the Indians within the limits of the United States, exclusive of Alaska, numbered 285,665. These people are sparsely scattered within the States or Territories in which their reservations lie, with the exception of the Indian Territory, where their numbers and location are such as may enable these tribes to become a political power.

Citizenship: Section 6 of the Severalty Act of 1887 provides as follows: "That upon the completion of said allotments and the patenting of the lands to said allottees, each and every member of the respective bands or tribes of Indians to whom allotments have been made shall have the benefit of and be subject to the laws, both civil and criminal, of the State or Territory in which they may reside; and no Territory shall pass or enforce any law denying any such Indian within its jurisdiction the equal protection of the laws. That no Indian born within the territorial limits of the United States shall have been made under the provisions of this act, or under any law or treaty, and every Indian born within the territorial limits of the United States, who has voluntarily taken up, within said limits, his residence separate and apart from any tribe of Indians therein, and has adopted the habits of civilized life, is hereby declared to be a citizen of the United States, and is entitled to all the rights, privileges, and immunities of such citizens, whether such Indian has been or not, by birth or otherwise, a member of any tribe of Indians within the territorial limits of the United States, without in any manner impairing or otherwise affecting the rights of any such Indian to tribal or other property."

About 47 per cent of the Indian population are now citizens of the United States, by virtue of the Act of 1887. This percentage will be largely increased in the near future when the "Five Civilized Tribes" of Indian Territory have relinquished their separate form of government, while the number is constantly increasing as allotments are made.

Self-support: Self-support is becoming more and more the rule and dependence upon the Government the exception. When the rapidity with which enforced changes have come upon the tribes in regard to their food supply are considered, together with the bewildermment and difficulties which attend the extinction of old customs and habits, the progress that has been made is a credit to the race, and promises well for the future of the Indians.

Education: One of the earliest authentic expressions from the United States Government, in reference to Indian education, occurs in the instructions given to Brig.-Gen. Rufus Putnam, who, in May, 1792, was sent to negotiate with the late hostile Indians near Lake Erie:

"That the United States are desirous of imparting to all the Indian tribes the blessings of civilization, as the only means of perpetuating them on the earth. That we are willing to be at the expense of teaching them to read and write, to plow and sow, in order to raise their own bread and meat, with certainty, as the white people do." (Amer. State Papers, Ind. Affs., Vol. I, p. 235.)

The first treaty provision was made December 2, 1794, with the Oneida, Tuscarora, and Stockbridge Indians, who had been faithful to the colonists.

The first general appropriation for Indian education was made March 3, 1819, for $10,000. The policy to be pursued is indicated in the following extract from the circular issued September 3, 1819:

". . . The plan of education, in addition to reading, writing, and arithmetic, should, in the instruction of boys, extend to the practical knowledge of the mode of agriculture, and of such of the mechanical arts as are suited to the condition of the Indians; and in that of the girls, to spinning, weaving, and sewing. It is also indispensable that the establishment (of schools) should be fixed within the limits of those Indian nations who border our settlements. Such associations or individuals who are already actually engaged in educating the Indians, and who may desire to cooperate with the Government, will report to the Department of war." (Amer. State Papers, Ind. Affs., Vol. II, p. 201.)

In 1825 there were 56 schools under the charge of various missionary organizations. Toward their support the Government contributed that year $13,920.41, and the Indians gave from their annuities and by their treaty provisions, $11,750. (Ibid., pp. 567, 606.)

In 1848, 16 manual labor schools and 87 boarding and other schools were in operation. The following year the Indian Commissioner reported that "nearly the whole of the large amount
required for the support and maintenance of the schools now in operation is furnished by the Indians themselves out of their national funds."

And he urged that the annual appropriation of $85,000, in accordance with the Act of 1819, be raised to $50,000.

In 1865 the Secretary of the Interior recommended:

"That Congress provide a civilization and educational fund, to be disbursed in such mode as, in cooperation and assistance of benevolent organizations."

By a treaty made with the Osage Indians, September 29, 1865, Article 2 provided that the proceeds from the sales of certain ceded lands should, under the direction of the Secretary of the Interior, be applied to the education and civilization of Indian tribes residing within the limits of the United States. This fund amounted to $770,179.42, and was exhausted by 1882.

Up to 1873 Indian schools had been maintained either wholly by missionary funds or jointly with the aid of the Government, except of those schools supported entirely from tribal funds and under the charge of United States teachers. At this time Government day schools were established, and later boarding schools, the number increasing with each year. During the last decade of the past century all Government financial support to mission schools ceased, and at the present time most of the Indian schools are under the classified service of the Government. Where mission schools exist, they are entirely independent of the Government and supported by missionary organizations.

During the year 1903 the Government maintained 26 boarding schools off the reservations. These are large industrials and manual training schools located in the midst of thrifty communities, and their capacities range from 20 to 1,000 pupils. A valuable adjunct to these schools is the "Outing System." This "System" was instituted and has reached its highest development in connection with the Training School at Caribou, Maine.

"This system consists in placing Indian boys and girls out in the families of surrounding farmers, the boys for general farm work, and the girls for various household duties. They usually attend public schools and are paid a stipulated sum for their labor, thus learning the value of labor in dollars and cents, and the resultant benefits of thrift." (Rep. Ind. Com'r, 1903.)

The average attendance at these schools for 1903 was 7,793; 91 boarding schools were in operation on the different reservations, with an average attendance of 11,206; 140 day schools were in operation on the reservations, and their average attendance was 4,497.

These figures do not include Indians attending the public schools in different parts of the country, or those pursuing higher branches in various institutions and colleges, or under missionary training.

The appropriation made for Indian education by Congress for the year ending June 30, 1904, was $3,522,950 dollars. This sum does not include the full amount expended upon Indian schools by the Government, for there are several schools on reservations which are either wholly or in large part maintained by tribal funds.

As a result of education, Indians are to-day to be found in all vocations—farmers, mechanics, laborers, clerks, merchants; in the professions, as clergymen, physicians, lawyers, teachers; as authors and artists, and also in the army and navy of the United States.

While the favored have advanced and are well on their upward course, the transition period is still pressing heavily upon a large proportion of the people. Their faith in the ancient ideas of their fathers is shaken or gone, while faith in the new is not yet established. The old tribal laws and restraints no longer exist; old avocations are closed; old social bonds and pleasures disappeared; the people thus bereft and dis­taught stand to-day in greater need of the wise missionary than ever before. While his work is difficult and more onerous than in the past, it is more hopeful and less isolated; its problems have become akin to those which confront his fellow-workers in our cities and rural districts, and demand a similar treatment.

NORTH GERMAN MISSIONARY SOCIETY. See Germany; Missionary Societies in.

NORTH LAKHIMPUR. See Lakhimpur (North).

NORTH AND SOUTH SHEEPSTONE: Towns in Natal, South Africa, situated on opposite sides of the Usamkulu River at its mouth. Station of the Swedish Holiness Band (1889), with (1900) 2 missionaries and their wives. Station also of the PB, with (1900) 1 missionary and his wife. Societies write the name Port Sheepstone.

NORWEGIAN MISSIONS: The missionary activity of the Norwegian people began with Hans Egede. But as Norway at that time was united to Denmark, and as Egede was supported and controlled by the royal government in Copenhagen, he has been identified with Danish Missions. Entirely national and independent of the Government are the three Norwegian Mission societies now at work—the Norwegian Mission to the Finns, the Norwegian Mission Society, and the Mission of the Norwegian Church by Schreuder.

The Norwegian Mission to the Finns: Head-
quarters, Stavanger, Norway. On February 28, 1888, Bishop Skaar of Tromsø, to whose diocese the Heaven, of whom the majority of the Finns mostly belong, sent out an appeal to the Norwegian people that missionaries or itinerant preachers who could speak the Finnish language should be sent out among them. This appeal was promptly taken up, and by means of a free offering, of which a considerable sum has already been possible to set two Finnish-speaking Norwegian preachers to work among them.

The Norwegian Mission Society (Den Norske Kirkes Mission ved Schreuder): Headquarters, Stavanger, Norway. In the third decade of the 19th century, after Norway had become an independent state by the separation from Denmark in 1814, there were formed all over the country, but more especially among the followers of the great revivalist, Hauge, a number of minor mission associations, the first and the largest among which was that of Stavanger, 1826. These associations sent their money and their missionaries, if any they had, to Basel. The Stavanger Association, however, placed its first missionary in Christiania, in 1817. To this the Norwegian Mission Society was founded, in 1827. The “Norsk Missionsblad” was founded, and in 1845 followed “Norsk Missionstidende,” which is the organ of the mission to the heathen. Then, in 1841, Jon Hougvaldstad, a small tradesman and fervent Christian, founded the Zulu Mission under tremendous difficulties, and it is indebted for its success to the Zulu girl, was baptized at Umpumulo. Bishop Skaar of Tromsø, to whose diocese the Heaven, of whom a number of missionaries, including wives, 1,705 native workers, 23 stations and 839 outstations, 34,649 communicants and 51,371 adherents, 950 day schools and 4 of higher grade, with 57,475 scholars, 3 physicians, and 2 hospitals.

The Norwegian Church Mission by Schreuder (Den Norske Kirkes Mission ved Schreuder): Headquarters, Christiania, Norway. Hans Palludan Smith Schreuder, born at Sogndal, Norway, June 18, 1817; died at Untumjambili, Natal, Africa, January 27, 1882, consecrated bishop of the Cathedral of Bergen 1866, was the father of the Norwegian Mission. His “A Few Words to the Church of Norway,” 1842, had a great effect throughout the whole country. He started the Zulu Mission under tremendous difficulties, and it is indebted for its success to his powerful personality. During the war between the English and the Zulus most of the English and German mission stations were disturbed or fully destroyed. But Entumeni was not touched, owing to the deep respect of King Cetewayo for Schreuder. The Madagascar Mission he also directed and superintended at its beginning. Nevertheless, all the the service to the Mission of the Norwegian Church, he carried with him a part of the field already under cultivation; but the Society continued its labor with great energy and considerable success. In 1900 there were reported 27 missionaries, 41 native workers, 15 station schools, and 73 outstations, 3,016 communicants and 2,000 adherents, 32 day schools with 714 scholars, and 1 of higher grade with 182 pupils.

The Society is engaged in two different fields: (1) Zululand and (2) Madagascar.

(1) The Zulu Mission was begun in 1844 by Schreuder. To the Norwegians, as to other missionaries, Zululand proved very attractive; but after the first hindrances were overcome, a very promising field. The first station was founded at Umpumulo, in 1850, and in 1868 the first convert, a Zulu girl, was baptized at Umpumulo. When Bishop Schreuder in 1876 transferred his services to the Mission of the Norwegian Church, he carried with him a part of the field already under cultivation; but the Society continued its labor with great energy and considerable success. In 1900 there were reported 27 missionaries (including wives), 41 native workers, 15 station schools, and 73 outstations, 3,016 communicants and 2,000 adherents, 32 day schools with 714 scholars, and 1 of higher grade with 182 pupils.

(2) The Madagascar Mission was begun in 1860, and soon assumed large proportions, including not only the Hovas in the island of Madagascar, but also, since 1874, the Sakalavas, on the western coast, and since 1888 some points on the southern coast never before visited by Europeans. In 1900 there were reported 88 missionaries (including wives), 1,705 native workers, 23 stations and 839 outstations, 34,649 communicants and 51,371 adherents, 950 day schools and 4 of higher grade, with 57,475 scholars, 3 physicians, and 2 hospitals.
In addition to these there are several minor societies: The Norwegian Committees, in aid of the Indian Home Mission to the Santals; the Bethany China Mission in Tromsø, assisting the China Inland Mission, and the Norwegian Lutheran China Mission Association. These are closely allied to the State Church, but there are several that have sprung from the spirit manifest in the China Inland Mission and Christian Missionary Alliance, such as the Norwegian Board of Missions, organized in 1889 as the Free East Africa Mission, which carries on work in China as well as Africa; the Norwegian China Mission, in alliance with the CIM, and the Missionary Union of the Norwegian YWCA, also in alliance with the CIM. There is also a Committee for the Norwegian Medical Mission in Madagascar, and the student movement has had great influence and accomplished much for the general interest in missions.

NOTT, Henry: Born in 1774; sailed in 1796 under the LMS for the South Seas. He was not an ordained missionary, but a plain, godly bricklayer, sent out to instruct the islanders in the trade of which he was master. On arrival he was stationed at Tahiti. He at once showed superior traits of character. When a panic seized the missionaries, and eleven of their number abandoned the island, Nott was a leader of those who insisted on enduring yet longer. When it was important to explore the island Nott was one of the two who made that dangerous missionary tour. Ever preaching to the natives, at least, after five years of study, Nott was one of the two men who had mastered the language. And when in 1809 a rebellion broke out against King Pomaré, and the mission houses were burned, the types from the printing office melted into bullets, and twelve years of heroic effort seemed to have ended in utter failure. It was Nott who remained alone at Eimeo, while all his associates, excepting Hayward, at the neighboring island of Hushine, fled to Australia. It was the admission of the Société of Mr. Nott’s associates, that this bricklayer was the salvation of that mission. It was he who saw, as others did not, that little could be done by preaching unless the people read the Bible in their own tongue. He worked twenty-seven years upon the translation he had begun; he left the work and upon the work itself, sending home in the meantime for books to enable him to learn Hebrew and Greek. When the translation was complete he broke down in health, carried his manuscript to England in 1836 that he might find a final revision, induced the BPBS to publish the book, and in 1838 loaded 3,000 of the new Bibles on a ship and sped away to his beloved island home. The great work of his life was done. He died at Tahiti, May 2, 1844.

NOWGONG: A town in Assam, British India, situated in the district of Nowgong, 56 miles E. by N. of Gauhati. Population, 5,000. Station of the ABMU (1841), with (1901) 3 women missionaries, 4 native workers, 1 outstation, 3 Sunday schools, 2 day schools.

NOWRANGAPUR. See NAORANGPUR.

NSABA: A settlement in the Gold Coast Colony, West Africa, situated 45 miles N. E. of Cape Coast Castle. Station of the Basel Missionary Society (1891), with (1903) 3 missionaries, 2 of them with their wives; 28 native workers, 51 outstations, 17 day schools, and 1,582 professed Christians, of whom 724 are communicants.

ONTONGA: A plantation of 1,000 acres in Angoniiland, British Central Africa, situated south of Lake Nyasa, about 100 miles N. W. of Blantyre. Station of the Zanzibar Industrial Mission, with (1902) 2 missionaries, 1 with his wife; 6 outstations, 1 place of worship, 9 Sunday schools, 9 day schools, 1 boarding school, 1 industrial farm, and 150 professed Christians.

NUBA LANGUAGE: A language spoken in the Sudan, Dongola and surrounding regions of Africa, belonging to the Nuba-Fulah group of African tongues, and written with Arabic letters in the favor of the people. The language is used by about a million people and has great vitality.

NUBA-FULAH RACE: A very considerable number of tribes, some in Egyptian Sudan, and some over against them on the west coast of North Central Africa, are found to differ so much, both linguistically and ethnographically, from the several races into which the Africans have been heretofore divided, that some of the ablest recent writers on these subjects, such as F. Müller and Dr. R. N. Oust, have invented a new class or group, with two sub-groups, which they call Nuba and Fulah. This twofold race, Nuba-Fulah, is evidently very ancient—doubtless aboriginal in the lower basin of the Nile, which still continues to be the headquarters of the Nuba portion of the general group. It finally came to have its headquarters in the lower basin of the Senegal, and there came to be known as the Fula, Fuldou, Pulah, or Fulah people, being so called because they were of a light brown, and thus all their brown contrast with the Negroes, a purer black among them. The present scattered or fragmentary condition of the Nuba-Fulah race, a portion of it being found on the coast of Victoria Nyanza, as the Kwan, and Masaal, other portions on the shores of each of the two Niles, and yet other portions in different parts of the Sudan, all the way from Darfur to the Senegal, or in groups here and there among the mid-African tribes, all goes to support the idea that the original Nuba-Fulah race was broken and scattered, as already indicated, by the divisive and propelling force of another powerful race, like the Sarto, at an early age of African history.

One important branch of the Nuba stock still has its home in the original abode of the race—the basin of the Nile now, like all their neighbors, profess the Muslim faith, and speak, some the Arabic, and some their own vernacular language.
Some live as nomads in tents, and some as a settled, industrious, thriving people, in well-built houses. There is also a tribe or group of tribes, evidently related to the Nuba family in both blood and language, in Korofan and Darfur. They differ from the Negroes around them, both in color and in language, and speak, some of them, what is called the Koldagi dialect, some of them the Tumale, and some the Konjara. Other tribes of this class, as the Kwaf and Masaai, who call themselves Loikob, and designate their language as the Enguduk, are found on the sources of the White Nile and the Blue Nile, north of the Galles and west of Abyssinia. In the sources of the Nile are included also the Nuba-Nyanza, together with the Golo and the Monbutto on the sources of the White Nile and the Shary.

Turning now and going westward between the 16th and 15th of north latitude, we come upon several families of the out-Pulaah group, scattered here and there all along from Darfur through the Hausa and Mardingo countries, till we come to where they abound in Bundu, Futa Jalo, and Futa Toro, south of Lower Senegal. They are represented as the most savage of all East African tribes. Still another group of tribes, such as the Berta and Kamail, belonging to the Nuba-Pulaah race, has its home on the Blue Nile, north of the Galles and west of Abyssinia. In the sources of the Nile are included also the Nuba-Nyanza, together with the Golo and the Monbutto on the sources of the White Nile and the Shary.

The origin of the Nusairiyeh people seems lost in the obscurity of antiquity. In asking one of their chiefs concerning their origin the most he could say was that it was very ancient. Another says that they descended from the Persians; others from the Philistines or from the tribes that Joshua drove out of Palestine. They have dwelt for hundreds of years in the mountains of northern Syria, and the regions along the Mediterranean coast as far as the plains of Cilicia. It is probable that the ethnologists and historians have taken little notice of them because of their political insignificance and low state of civilization. However, their religious practices sustain the theory that they are descended from some of the ancient heathen tribes of Palestine. At present they are a mixed race, as are the most of the races bordering on the Mediterranean, owing, in this case no doubt, to the Crusades, when many thousands of Europeans were lost and became mingled with the inhabitants of the country. This circumstance probably accounts for the existence of many blends among these swarthy tribesmen. They receive their name from Nusair, who, with his son Abu Shai, was a renowned leader and teacher among them some centuries ago. They inhabit Northern Syria and Cilicia, and number about three hundred thousand souls.

As to their religion, they are a branch of the Shi'ites, who separated under the leadership of Nusair; and their religious system was brought to perfection by one of his descendants named Khusair. Nevertheless, while claiming to be followers of Mohammed, in private they are practically pagans. They reject the caliphate of Abu Bekr and his successors. As to the succession, the men would resent this interference and would fall upon Ali and kill him. The result was as anticipated, and the deadly feud was begun which continues to this day.
This branch of the followers of Ali devised a religion of their own, and, being in the minority and fearing persecution, they bound themselves by the most horrid oaths to keep it secret. None are initiated into its mysteries under 18 years of age. The applicant for initiation to the secrets of the Nusairiyeh religion must bring two men as security, and these must be vouched for by two others. Such is their distrust of mankind, however, that the situation is not secure even after this, and the candidate is required to swear by the sun, moon, and stars that he will never reveal the mysteries about to be made known to him, and that if he violates his promise, he will accept the penalty of having his head, hands, and feet cut off; the same penalty being his due if he fails to complete the course of study now begun. For this reason the Nusairiyeh are extremely reticent in the subject of their religion. To reveal it is an unpardonable sin. Some years ago one of their number, a certain Suleiman Effendi of Adana, made some revelations respecting their mysteries, in a book which he published in Arabic, and which was printed in this article. After the publication of the book, Suleiman Effendi suddenly disappeared and was never heard of again. Doubtless he suffered the penalty. Women are not taught religion, excepting a single prayer, which is supposed to have effect in promoting purity. In fact, women are held to have a different origin from men. When mankind sinned, Ali created womankind was created. He performed the prostrations and genuflexions like a reverent heart and an humble spirit, to deliver him from his wickedness."

They teach that Ali created Mohammed, and that Mohammed created Suleiman, and that Suleimen created five great angels, and that the angels created the universe, and that each angel is entrusted with the management of some particular part thereof, viz.: One has charge of the sun, lightning and earthquakes; another of the heavenly bodies; another, of the winds, and receives the spirits of men at death; another has charge of the health and sickness of human beings, and another furnishes souls for the bodies of men at birth. Fatima, daughter of Mohammed, and wife of Ali, is given a place very much like that assigned by Roman Catholics to the Virgin Mary. They consider that the moon is Ali's throne, and that the man in the moon is Ali with a veil over his form, but in the hereafter the veil will be removed and all true believers will see him as he is. Hence they worship the moon. They believe that the sun is Mohammed, and pay divine honors to it. They worship fire, the wind, the waves of the sea—anything that manifests power—the shades of ancestors, and even living men of influence and renown. These last they consider to be possessed of the spirits of the prophets, it may be of Ali himself. They believe in the transmigration of souls, teaching that Muslim religious teachers after death will enter the bodies of clean beasts. The teachers of Christians will enter the bodies of swine, and those of the Jews, the bodies of apes. Wicked Nusairiyeh are destined to enter the bodies of clean beasts. Those who are part evil and part good enter the bodies of those who belong to sects other than the Nusairiyeh. While all good Nusairiyeh enter the bodies of Nusairiyeh, each one according to his grade and station. If one of another belief should unite with them, they claim that in past generations he was of them, but for some sin he was compelled to enter a strange sect and remain a stated time as a punishment, when he was allowed to transmigrate to his own religion. Should one of the Nusairiyeh apostatize they declare that his mother committed adultery with one of the sect with which he has united, and that he has returned to his source.

The chief moral duty of the Nusairiyeh is to make a perpetual effort for the good of their religion. This sacred effort is divided into two parts. The first part is to revile and curse Abu Bekr, Omar, Othman, the first three caliphs, and it matters not what a man wears; it does not change his name, his theory in such a case is that the Nusairiyeh religion is the body, while all other religions are clothing to be worn and thrown aside at pleasure; and it matters not what a man wears; it does not injure him; and he who does not dissemble thus lacks good sense, for no sensible person will walk through the streets naked. The Nusairiyeh are revengeful, and practise blood atonement in righting wrongs among themselves. They are thievish, and consider stealing, especially from infidels, a virtue. Nevertheless they are cowardly and will not attempt either to recover their stolen theft unless assured of personal safety. In social relations they are semi-barbarous, and there are many feuds among them, tribe against tribe. They often have bloody encounters, and leave the bodies of the slain to the hyenas and jackals. Their morality is low. All classes practise polygamy. Social purity is disregarded among the upper classes—as when one chief becomes the guest of another of like rank the host sends a wife to share the room of his guest.
This abomination is not practised among the common people. Politically they are under the absolute sway of the Turk, and are therefore much oppressed. A wall of dense prejudice met the pioneer missionaries at the outset; but as the continued dropping of water will wear away the adamantine rock, so persistent effort, personal contact, uniform kindness, and patient forbearance for Christ's sake wore away the prejudices of the people, and if the mission were blotted out of existence to-day it would be considered a public calamity. By healing the sick, by sympathising with the sorrowing, a way was made for the Gospel of peace, and notwithstanding the dogged, determined, persistent opposition of the authorities, in closing the schools and otherwise hindering the work, the mission has enjoyed encouraging success. Converts to Christianity have been won. But such converts have been cruelly maltreated by the Turkish Government. Some were imprisoned and others drafted into the army, the authorities thus hoping to destroy the germs of Christianity that had taken root among the Nussiriyyeh; and in this they were aided andabetted by the chiefs of the people themselves, who began to fear the consequences. One of the converts, David Mathloof, was very sorely tried. He was in the army during the Turco-Russian War. His Bible was taken from him. He was flogged and imprisoned in a dungeon with the design of forcing him to deny Christ; but with all the fortitude of the early Christian martyrs, he stood firm, holding fast to the profession of his faith without wavering. He was wonderfully preserved, having several horses shot under him while in action. He was in the siege of Plevna, but was providentially spared to return to his family, and he is now a burning and shining light in his own native mountains.

The Church has always contained and contains to-day people who are in no sympathy with missions, it is natural that there should be objections to, and criticisms of missions in as well as outside the Church. Much of the criticism is due to the failure to apprehend what Christianity is. Men who do not believe in Christ as their Savior, and who have no personal understanding or experience of His religion, cannot be expected to sympathize with the effort to spread it over the world, unless they do so on merely ethical or philanthropic grounds. And within the Church, merely nominal Christians who for one reason or another accept the form, while ignorant of the power of Christianity, are not likely to value highly an effort to extend what has no vital meaning to themselves to the people of other lands.

Objections and Criticisms: If the Church has always contained and contains to-day people who are in no sympathy with missions, it is natural that there should be objections to, and criticisms of missions in as well as outside the Church.
It is contended that all religions are but elements in the evolutionary process, that Christianity itself is a development, and the one suited to our Western minds; while the non-Christian religions are the religious influences developed in the growth of these peoples as best suited to them. Even if this were true, it is true also that since these other nations develop, as they are fast developing, into a life which adopts the principles of Western civilization, the evolutionary theory itself would allow for a religious development also, and the acceptance of a religious opinion and life conformable to the new stage of progress. As Mr. Griffith John again has remarked:

The nations called Christian are everywhere pressing hard upon all other nations. Western civilization in all directions is disintegrating both the customs of savage nations and the more stable civilization of the East, and it is everywhere being shown that in this general break-up of old and offete orders there is an imminent peril to our civilization penetrates without our religion it is invariably disastrous in its effects. It is but the failure to destroy the confidence of subject races in their own creeds and customs without furnishing anything in place of their sanctions and

Christianity which is not found in any other religion, as indicated in the modern larceny of Christian doctrine and moral ideals by all other religions—Hinduism, for instance, having undergone, under missionary influence, a complete transformation. (2) Christianity is the only religion of the non-Christian religions is full of evils from which Christianity is free. (4) The worst evils of heathen lands are the products of or are sanctioned by the non-Christian religions. All the evils of Christian lands are under the ban of the Christian religion. (5) The best virtues of heathen people are, in the main, their racial qualities, unaffected by their religion. The best virtues of Christian peoples are the direct product of Christianity. (6) Christianity is the only purely moral religion. It alone identifies religion and ethics, demanding that personal religion be expressed in personal ethical behavior. In all other religions, ceremonial behavior will suffice. (7) The sacred Book of Christianity is different from other sacred books, not in degree, but in kind. (8) The non-Christian religions grow out of these sources. Such objections may be classified in four groups:

I. Criticism of the missionary idea or principle.
II. Criticism of the methods of missions.
III. Criticism of the agents of missions.
IV. Criticism of the results of missions.

1. Criticism of the Missionary Idea: 1. It is objected that Christianity is not the only true religion, that the other religions of the world are good enough for the people professing them, that Christianity can only claim to be one of the world's religions, and not necessarily the best for all, and that there is salvation in other names than Christ's. Of course, this involves eliminating or interpreting away the words of Christ, "I am the way, the truth, and the life. No man cometh unto the Father but by Me." "No man knoweth the Son but the Father, and no man knoweth the Father save the Son, and he to whomsoever the Son willeth to reveal Him;" and the words of Peter, "Neither is there any other name under heaven, that is given among men, wherein we must be saved."

It is replied to-day that the truth of these words is not denied, but that it is the Christian God and the essential Christ who are found in the non-Christian religions. But this is to raise a simple question of fact: "Do the non-Christian religions embrace the fruits of Christianity?" In reply, and as covering the entire question of comparative religion, it may be said: (1) There are good things in the non-Christian religions, but (a) these are concealed and overlaid, (b) they are held in distortion, unbalanced by necessary counter truths, as the Muslim idea of the divine sovereignty, and the Hindu idea of immanent deity, and (c) the good of all these religions is found in Christianity also, there rightly related and perfectly fulfilled. (2) There is good in

mental differences of view, there is, of course, a mass of unintelligent objection springing from ignorance or utter misconception of the facts of the work, of the operations of the human mind, or of the course of history. The common criticism of the missionary propaganda illustrates the first. Travelers are constantly expressing amazement at the vast sums expended on foreign missions, and the good that this could do at home. The total amount spent by all nations annually would not pay the maintenance of the German army for two months. A different type of ignorance is illustrated in criticisms like General Chaffee's, to the effect that he did not meet in Peking "a single intelligent Chinaman who expressed a desire to embrace the Christian religion," as if this were a fact that had any bearing on the matter at all except a sorrowful reflex implication. A great mass of current criticism rests on such sheer ignorance of the idea of the propagation of religion on the facts in the case of Christianity, as when a Hindu writer in an American magazine: "Notwithstanding their (the missionaries') great efforts, not a single true Aryan has been converted in these three or four hundred years." Such critics must choose between the alternatives of either ignoring the facts, of losing their source. Such objections may be classified in four groups:

I. Criticism of the missionary idea or principle.
II. Criticism of the methods of missions.
III. Criticism of the agents of missions.
IV. Criticism of the results of missions.

1. Criticism of the Missionary Idea: 1. It is objected that Christianity is not the only true religion, that the other religions of the world are good enough for the people professing them, that Christianity can only claim to be one of the world's religions, and not necessarily the best for all, and that there is salvation in other names than Christ's. Of course, this involves eliminating or interpreting away the words of Christ, "I am the way, the truth, and the life. No man cometh unto the Father but by Me." "No man knoweth the Son but the Father, and no man knoweth the Father save the Son, and he to whomsoever the Son willeth to reveal Him;" and the words of Peter, "Neither is there any other name under heaven, that is given among men, wherein we must be saved."

It is replied to-day that the truth of these words is not denied, but that it is the Christian God and the essential Christ who are found in the non-Christian religions. But this is to raise a simple question of fact: "Do the non-Christian religions embrace the fruits of Christianity?" In reply, and as covering the entire question of comparative religion, it may be said: (1) There are good things in the non-Christian religions, but (a) these are concealed and overlaid, (b) they are held in distortion, unbalanced by necessary counter truths, as the Muslim idea of the divine sovereignty, and the Hindu idea of immanent deity, and (c) the good of all these religions is found in Christianity also, there rightly related and perfectly fulfilled. (2) There is good in
restraints. The result is everywhere to be seen in the way in which heathen nations neglect our virtues and emulate our vices; and as a consequence, to leave the people to whom he ministers to their own devices. It was a well-known fact that large firms in England are engaged in the swindle them in trade; seen hostile savages supplied with necessary a difficult and unappreciated effort to
gold dust from foreign gold coin before it is put in circula­
foreign commerce vying with native merchants in corrupting

need at home? Phillips Brooks' reply is unanswerable: "There are heathen enough at home; let us convert them first, before we go to China." That is a fair question, and I think it sounds more cheap every year. What can be more shameful than to make the imperfection of our Christianity at home an excuse for not doing our work abroad? It pleads for exemption and indulgence on the ground of its own neglect and sin. It is like a man using his own sin as an excuse to tell others to do their duty to him to have pity on his orphanhood."

2. The acceptance of this plea nineteen hundred years ago would have condemned Europe to perpetual heathenism. The agreement proposed here is tantamount to an abolition of missions. There will always be need at home. The tares will be in the wheat until the harvest. 3. The only way to meet the need at home is to increase the spirit which sends missionaries abroad to the heathen.

4. The simple fact is that the missionary spirit is the Christian spirit; that the possession of good is an obligation for its transmission. The best spirit of the modern world is now permeated with this conception, and we must either give up our Christianity as of no use even to ourselves, or share it with the world. We are debtors. We must be ready to pay.

II. Criticisms of the Methods of Missions: It is impossible to sympathize with criticisms of the missionary idea. That is the essence of Christianity—e'en of common honesty and courtesy, and fair and kindly dealing among men. To deny this is to display some radical lack of character, and an utter failure to appreciate the finer side of life, and the nature of the Christian religion. But criticism of the methods of missions is a different matter. So long as a man is earnestly supporting missions, he may be allowed liberty to criticise methods he disapproves. But the man who is doing nothing for missions at all, who has no genuine sympathy with the idea, has no right to rest his disapproval of missions on the methods pursued.

One is more anxious than the missionaries to discover the best methods, or more ready, accordingly, to listen to sincere criticism. Canon Isaac Taylor justified his assault upon missions in the Fortnightly Review in 1888 by the words of Bishop Steere, "Let me say that all missionaries overlook the grave mistake those who call at mission to the mistakes and failures of missions;" and Canon Taylor said, in closing, that Mackay of Uganda had encouraged him to make his criticism public.

1. A common criticism is that the cost of administration is extravagant, that "it costs a dollar to send a dollar." There never was any ground for this criticism, nor is there any. In the absence of any even partial justification, its origin and continuance can only be called malicious. The cost of administration of the great foreign mission agencies ranges from 4 to 10 per cent. The higher amount is due largely to the cost of collection, publication, deputation work, and other measures for arousing interest. Roughly, it is accurate to say that the cost of sending a dollar to begin missions is the price of a foreign postage stamp.

2. It is said that the business methods of missions are inefficient. It is not possible to make any better answer than to say that every missionary we know and I think it sounds more cheap every year. What can be more shameful than to make the imperfection of our Christianity at home an excuse for not doing our work abroad? It pleads for exemption and indulgence on the ground of its own neglect and sin. It is like a man using his own sin as an excuse to tell others to do their duty to him to have pity on his orphanhood."

3. The missionaries are accused of living on too expensive a scale, instead of imitating the lives of the fakirs or dervishes or holy men of the non-Christian lands. Mr. Wanamaker reported his judgment on this point also:

It is an unjust assumption on the Church and its heroic men and women for any fair person to say that, because the customs of the country oblige missionaries, if they are to maintain influence with the people, to employ servants and live in houses common to hot climates, such as are used by other private families, therefore they live in luxury, idleness or extravagance. While I saw homes of Christian workers in large cities, bought from thirty to fifty years ago, for small sums, now worth much more than they cost—which is to the credit of the wisdom of the fathers and brethren of the Missionary Board—I failed to find any house in use by missionaries or others in the services of the Board.

As to the servants, they board themselves, coming in the morning and going off at night, for the pay of $3 to $12 rupees a month, which, on an average, is $3.65 a month for house servants. It is impossible to find anywhere in the world simpler and more consistent home living than at the homes and tables of the mission houses.

4. The idea that by adopting the ascetic ideal and living as the natives do, the missionary would increase his influence is often advanced by those who are under precisely as much obligation to pursue this course as may rest on the missionary. The conception that the ascetic method will be more fruitful than the general method has often been tested. George Bowen gave it a fair trial in Bombay. His life was one of great value and of large influence, but not more so than the lives of scores of other missionaries who never followed his plan, and who were far more successful in winning converts and in establishing self-supporting churches. There is room for the ascetic ideal, but it is not the only ideal.

5. A great many criticisms on the methods of missions are mutually contradictory. One urges that the native churches should be sooner trusted and left to themselves. General Armstrong complained that this was done too soon in Hawaii.

One that educational and medical work should be diminished, and the direct preaching of the Gospel absorb all the time and strength of the missionaries. The newspapers, the diplomats and the wandering publicists see in those forms of work the most valuable results from the missionary enterprise. One complains that the missionaries are timid and cautious. Others that they are reckless and aggressive, and should be confined to fixed stations. One regards the attitude of solicitude for native customs as wicked; others think that even polygamy and ancestor-worship should be tolerated. And so opinions vary on a hundred points and correct one another.

6. Criticism, both just and unjust, has been directed at the confusion of missions with politics. The Boxer uprising brought the subject forcibly before the world. While there were
other and far more responsible causes for the outbreak than any connected with missions, the interference of Chinese Christians under cover of missionary, and ultimately consular, protection, and to some degree the interference of missionaries themselves in Chinese law courts, did help to increase the anti-foreign feeling of the people, and to confuse in their minds the missionary propaganda with the political movement of the West upon China. Whatever errors individual missionaries may make, the interposition of missionaries has not offended the ascendency of Protestant missionaries has not offended the burden of guilt resting on the Roman Catholics.

The whole discussion has been profitable as defining more clearly the spiritual character of the missionary enterprise and also as illustrating how easily missions are criticised for adopting, however slightly, the principles of those who praise the benevolence of the movement but dislike its religious character. If missions are valuable and justifiable, as the critics allege, solely because of their philanthropic spirit, interference in behalf of the wronged in law suits would be eminently proper.

III. Criticism of the Agents of Missions: Some such critics are foolish extremists. Mr. Sydney Brooks represented this class during the discussion of the relation of missionaries to the Boxer uprising. He declared that the missionaries in China were "not well educated," were untaut, careless of local prejudice, spoke a bastard Chinese," were guilty of "blundering provocation," and ignorant of the philosophy they are "infinite in their ignorance of the language which must be their chief weapon," bigoted and sectarian, and many of them "enthusiastic girls, who scampers up and down the country." Such criticism, of course, answers itself. It is enough to ask the critics the names of the missionaries they know. This judgement rests on no personal knowledge, but on the gossip and talk of steamer saloons or clubs in the ports, whose resentment is often due to the fact that their spirit and conduct are condemned by the spirit and conduct of other men.

Some critics are more cautious than Mr. Brooks. Mr. Henry Norman says:

So far as education goes, both men and women among the Protestant missionaries are often quite unfit to teach at home, where there would be little danger of misunderstanding; in their present sphere of work they are often not too hardly described by the phrase which has been applied to them, "ignorant declaimers in bad Chinese." I am well aware, of course, that to some missionaries the world is deeply indebted for its knowledge of the Chinese language and character, and that the foreign missions of the present day have some of the highest character and devotion, upon whose careers no criticism can be passed. These, however, are a small minority.

The profound scholars are, of course, a minority, but the statement that the men of highest character and devotion, upon whose careers no criticism can be passed, are also a minority, is a simplification due to the writer's ignorance of the men of whose work he is writing. The difference of standard prevailing between him and them, as illustrated in his interest in what the missionaries have always ignored or deplored (e.g., the Yoshinara in Toho), and finally to his readiness to accept his judgments second-hand from men as ignorant as himself. In any large body like the missionary body there will be men of all grades. But in general it is true to say of them that they love and understand their people; that they have accomplished something; that they have accomplished more than any other foreigner in Asia. They have accomplished something.

Foreign missionaries have accomplished something.

IV. Criticism of the Results of Missions: It is said that foreign missionaries have accomplished nothing, or that they have accomplished nothing justifying the great expense in money and life, or that they have accomplished too much and the missionary body there will be men of all grades. But in general it is true to say of them that they love and understand their people; that they have accomplished something; that they have accomplished more than any other foreigner in Asia. They have accomplished something.

The whole discussion has been profitable as defining more clearly the spiritual character of the missionary enterprise and also as illustrating how easily missions are criticised for adopting, however slightly, the principles of those who praise the benevolence of the movement but dislike its religious character. If missions are valuable and justifiable, as the critics allege, solely because of their philanthropic spirit, interference in behalf of the wronged in law suits would be eminently proper.
martyrs, which is easy, and who lead 'helpful and honest' lives, which is as hard as the ascent from Avernus, crown the labors of missionaries, and have done so from the beginning. The mass of testimony to the beneficent religious, moral, and social influence of missions has become too great to deny any longer. Dr. Dennis' great argument, in *Christian Missions and Social Progress*, is unanswerable. It would be easy to enlarge this evidence. Two testimonies must suffice:

"Christian missionaries, says Sir H. H. Johnston, "who in many cases have first taught the natives carpentry, joinery, masonry, tailoring, cobbling, engineering, bookkeeping, printing, and European cookery; to say nothing of reading, writing, arithmetic, and a smattering of general knowledge. Almost invariably, it has been to missionaries that the natives of interior Africa have owed their first acquaintance with a printing-press, the turning-lathe, the mangle, the flat-iron, the sawmill, and the brick mould. Instrinsic teaching is coming more and more in favor, and immediate results in British Central Africa have been most encouraging. Instead of importing painters, carpenters, store clerks, cooks, telegraphists, gardeners, natural history collectors from England or India, we are gradually becoming able to obtain them amongst the natives of the country, who are trained in the missionaries' schools, and who have been given some local education, have not had their heads turned, and are not above their station in life."

"Whatever you may be told to the contrary," said Sir Bartle Frere, former Governor of Bombay, "the teaching of Christianity among 150,000,000 of civilized, industrious Hindus and Mohammedans in India is effecting changes, moral, social, and political, which for extent and rapidity of effect are far more extraordinary than anything that you or your fathers have witnessed in modern Europe."

If any other testimony to the efficacy of missions is needed, this is its evidence of their general influence, and the undeniable fact of the independent and self-supporting Christian churches which have been built up, it can be found in the absolute transformation in Hinduism and Buddhism produced by the influence of Christian missions. The history of the Brahmo Somaj is an illustration. Fifty years ago, men who wanted to come as far as this toward Christian, who wanted to hold Christian opinions and still live Hindu lives to remain in their old faith. Outside of the limits of their converts, missions are transforming the world. Other forces are working with them, but none with more power.

2. "They have accomplished nothing justifying the expense": That depends on the critic's standard of value. The Congo River railway in Africa is 225 miles long. It cost 4,000 lives. The cause of missions has cost but a fraction of this. Is that railroad more valuable than the results summarized in Dr. Dennis' great volumes? The annual cost of Europe per annum is $1,046,320. All the Protestant churches combined give per annum $19,598,823 to foreign missions. Which expenditure accomplishes most for the world? The annual cost of the government of India is $360,000,000 (1901-1902). The annual cost of India is a significant fraction of this. Which is the more beneficent expenditure? Let Sir W. Mackworth Young, K.C.S.I., late Lieutenant-Governor of the Punjab, answer:

As a business man, speaking to business men, I am prepared to work which the missionaries have done by making any agency in India exceeds in importance all that has been done (and much has been done) by the British Government in one moment. I venture to take the Province which I know best. I ask myself what has been the most potent influence which has been working among the people since annexation fifty-four years ago, and to that question I feel that there is but one answer—Christianity, as set forth in the lives and teaching of the Christ of history. We have underestimated the forces which have been brought to bear. In the races in the Punjab by our missionaries, and our judgment and enlightenment; but I am convinced that the effect on native character produced by the self-denying labors of missionaries is far greater. It has done this, and if they could speak to us from the great unseen, there is not one of them who would not tell us, that that is done by men like French, Clark, Newton and Forman, who went in and out among the people for a whole generation or more, who preached to their children, and the lesson of love to God and man, is a higher and nobler work, and more far-reaching in its consequences.

3. "They have done more harm than good": This is the current form of criticism. The critics used to call missionaries ineffective and their work futile. Now they have swung over to the opposite extreme. The missionaries are pestilential and active and effective, and are turning the world upside down. "For my own part," says Mr. Norman, "I am convinced that if the subscribers to Chinese missions could only see for themselves the minute results of good and the considerable results of harm that their money produces, they would find in the vast opportunities for reformatory work at home a more attractive field for their charity. At any rate, in considering the future of China the missionary influence cannot be counted upon for any good." The omission of a bill of particulars is often a convenient oversight for critics. "The minute results of good" is a judgment which time will reveal in its true ludicrousness. What are "the considerable results of harm"? Mr. Sydney Brooks took up this tale. He held that the influence of the missionary is subversive, and that his propaganda will have revolutionary effects. In a sense this is not true. The missionary's work is not destructive. It follows the lines of nation, character and qualification. Christianity has adapted itself to more peoples, and more diverse peoples, than any other religion, and it is compatible with any orderly and righteous government, of whatever form. It does not attack the political system or social life. Yet, in a sense, the charge is true. Christianity is a power of upheaval and renovation. It turns the world upside down. It begets wrath against injustice, eagerness for liberty, impatience with ignorance and sloth, and passion for progress in this in China. It will continue to do this in China, whether in war or in peace; whether with the sympathy of the Christian nations or with petty criticism and futile opposition of newspaper publicists. That is its mission in the world.

A larger and nobler and truer view of the influence of missions was expressed in the speech of President McKinley at the Ecumenical Conference in New York City in 1900:

I am glad of the opportunity to offer without stint my tribute of praise and respect to the missionaries who have won such wondrous triumphs for civilization. The story of the Christian Missions is one of thrilling interest and marvelous results. The services and the sacrifices of missionaries for their fellow men constitute one of the most glorious pages of the world's history. The missionary, of whatever church or ecclesiastical body, who devotes his life to the service of the Master and of men, carrying the torch of truth and enlightenment, preserved in the holy, the support, and the homage of mankind. The noble, self-effacing, suffering ministers of peace and goodwill should be classed with the world's heroes. They have done by mission what has been done by war and arms, and have done it with far greater success, far greater value. "Away with the world in such a view and with such a sacrifice," says David Livingstone, "it is emphatically no sacrifice; any other." Those are the examples of forbearance, fortitude, of patience and unyielding purpose, and of spirit which triumphs, not by the force
negroes were set on fire, and sometimes entirely succeeded in establishing himself on this island. They endure many persecutions from the pagans by and 152 professed Christians, of Croix in April, 1751. The Christian negroes, 2 day schools, 1 theological class, 1 dispensary, stations, 2 places of worship, 2 Sunday schools, and 86 professed Christians. Station also of the SBC (1856), with (1903) 2 missionaries and his wife, 2 native workers, 2 outstations, 1 place of worship, 2 Sunday schools, and 65 professed Christians. Station also of the PE (1896), with (1903) 1 native worker.

OAHANDYA: A mission station of German Southwest Africa, 90 miles E. N. E. of Swakopmund. Station of the Rhenish Mission Society, with (1903) 2 missionaries and their wives, 11 native workers, 3 outstations, 4 day schools, and 1,159 professed Christians, of whom 497 are communicants. Some write the name Oka-handija.

OKAK. See OEKKAK.

OKAT: A settlement in the Oil River region of South Nigeria, Africa, situated near Kwa Ibo River, 25 miles from its mouth. Station of the Qua Ibo Mission (1893), with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, 6 outstations, 1 place of worship, 1 Sunday school, 5 day schools, 1 theological school, 1 dispensary, and 43 professed Christians.

OKAYAMA: A town in South Japan, 100 miles west of Kobe, on the highway thence to Hiroshima, 5 miles from Inland Sea. Climate mild, humid. Population (1898), 58,025. Station of the AMCM (1879), with (1903) 1 missionary and his wife, 2 women missionaries, 6 native workers, 18 outstations, 6 places of worship, 12 Sunday schools, 1 industrial school, 1 orphanage. Station also of the AMFM (1897), with (1903) 1 missionary, 4 native workers, 1 place of worship, and 47 professed Christians, of whom 25 are communicants. Station also of the Salvation Army. The Okayama Orphanage is an independent enterprise of value, founded by Mr. Ishii and placed under a board of trustees, composed partly of missionaries.

OKAZAKI: A town in Hondo Island, Japan, situated 85 miles E. of Kioto. Population,
OKAZEVA: A village in German Southwest Africa, situated about 180 miles E. by N. of Swakopmund. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 8 native workers, 2 outstations, 3 Sunday schools, and 568 professed Christians.

OKKAK: A settlement in Labrador, situated on the E. coast, 80 miles N. W. of Nain. Station of the Moravian Mission Society (1776), with (1900) 3 missionaries and their wives, 20 native workers, 1 day school, 1 place of worship, and 156 professed Christians.

OKOMBAI: A mission station of the Rhenish Mission Society, in German Southwest Africa, about 120 miles N. N. E. of Swakopmund, with (1903) 1 missionary and his wife, 8 native workers, 2 outstations, 3 day schools, and 568 professed Christians, of whom 166 are communicants.

OLD CAIRO: A mission station of the CMS (1899), and a suburb of Cairo, Egypt, with (1903) 1 missionary and his wife, 2 women missionaries, 5 native workers, 2 day schools, 1 dispensary, 1 hospital, and 60 professed Christians, of whom 34 are communicants.

OLUMBU: A village in German Southwest Africa, situated in Damaraland, about 150 miles N. E. of Swakopmund. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 7 native workers, 3 outstations, 5 day schools, and 565 professed Christians, of whom 150 are communicants.

OMBURU: A village in German Southwest Africa, situated in Damaraland, about 150 miles N. E. of Swakopmund. Station of the Rhenish Mission Society (1893), with (1900) 3 missionaries, 2 of them with their wives; 1 woman missionary, 9 native workers, 4 outstations, 1 place of worship, 1 kindergarten, and 142 professed Christians.

OMAR: A village in German Southwest Africa, situated in the territory of the Ambo tribe, about 30 miles N. of Olukonda. Station of the Finnish Mission Society (1871), with (1903) 1 woman missionary, 9 native workers, 4 outstations, 1 place of worship, 1 kindergarten, and 142 professed Christians.

OMARURU: A village in German Southwest Africa, situated in Damaraland, about 150 miles N. E. of Swakopmund. Station of the Rhenish Mission Society (1893), with (1900) 1 missionary, 4 native workers, 3 outstations, 4 day schools, and 149 professed Christians, of whom 54 are communicants.

OMBOLATA: A settlement on Nias Island, and 101 professed Christians. Some write the name Onitsha.

ONIIPA: See ONYIPA.

ONYIPE: See ONYIPA.

ONOCHE: A town in Japan, situated in Hiroshima district, 135 miles W. by S. of Kobe; a prosperous town on the Inland Sea, noted for its manufacture of ornamental mats. Population, 18,700. Station of the MES.

ONIPA: A village and mission station in South Nigeria, W. Africa, on the left bank of the Niger opposite Asaba. Station of the CMS (1857), with (1903) 2 missionaries, 6 women missionaries, 3 native workers, 1 orphanage, 1 college, 1 industrial class, and 19,421 professed Christians. Some write the name Onitsha.

ONICHA: A village and mission station in South Nigeria, W. Africa, on the left bank of the Niger opposite Asaba. Station of the CMS (1857), with (1903) 2 missionaries, 6 women missionaries, 3 native workers, 4 outstations, 1 place of worship, 2 day schools, 1 boarding school, 1 industrial school, 1 hospital, and 427 professed Christians, of whom 125 are communicants.
ORANGE RIVER COLONY: A territory of South Africa, formerly the Orange Free State. It was annexed to Great Britain May 24, 1900, as a consequence of the Boer War. There is a governor over the Transvaal, and the Orange River Colony is governed by a lieutenant-governor under him. The colony has an area of 48,326 square miles. The population (1900) was 207,503, of whom 129,787 were natives. It is believed that the white population has been reduced in consequence of the war. The colony lies between the Transvaal on the north and Bechuanaland and Cape Colony on the south, extending east and west from Natal to Bechuanaland. The arable area is small, pasturage for grazing furnishing much of its resources.

Since the British accession English has become the official language and must be taught in all schools. The principal religious bodies are the Dutch Reformed Church, with (1890) 68,040 adherents, the Wesleyans with 753, the Church of England with 1,553. There are also Lutherans, Roman Catholics, and a few Jews. The natives are of the Bantu and Bechuana branches of the Bantu race, nearly allied to the Kafirs. The Berlin Missionary Society has 4 stations in this colony, the SPG 2, and the South African Wesleyan Missionary Society has 8 stations, with a considerable body of native adherents.

ORGANIZATION OF MISSIONARY WORK:

The purpose of this article is to furnish a statement of the different forms of organization used in mission work, and the agencies of administration, employed both at home and on the foreign field.

1. At Home: Into the question of the degree of corporation needed, it is not necessary to enter here. It is sufficient to say that the present forms have been the direct outgrowth of the pressing needs of the situation. 1. Missionaries in foreign lands must be supported (the instances of self-support being so few and so exceptional as to be practically ruled out of the question), and money must be raised and forwarded to them. 2. It is not every man or woman who, however willing, can advantageously work in foreign lands; there must be some means for selecting those who are best qualified. 3. In the conduct of foreign work two things are essential: first, that expenditures be proportioned to receipts; second, that different sections of the great work shall not assume relatively undue importance. It thus becomes necessary that there be some central authority to keep, so far as practicable, an even hand over the whole enterprise. 4. Those who give for the support of missions have a natural and righteous desire to know what is accomplished by them, and they desire to be the means of collecting and imparting information. 5. As mission work in most instances involves the holding of property, there must be some form of corporation, having a recognized existence before the law.

The necessity of meeting these demands has resulted in the formation of missionary societies or boards, so organized as to provide for these varied departments. These societies or boards may, for convenience sake, be classified into groups.

I. Societies which are engaged directly in general foreign missionary work by sending out missionaries, and which are not confined by their constitutions to any particular phase of that work or to any special country. They are either interdenominational, i.e., drawing their support from different churches, or represent some one of the different denominations.

II. Woman's Boards organized by women, with special reference to work among women, and either independent, i.e., sending out their own missionaries, or acting in connection with some general society.

III. Societies which are limited by their constitutions to specific branches of work or to distinct territories. These include: (a) Aid societies, which merely collect funds to assist other societies, especially from people who are interested in their work, but which are not naturally included in their constituency. (b) Bible and tract societies, which engage directly in foreign work by the employment of colporteurs and distributing agents. (c) Medical missionary societies, whose object is to train and furnish physicians, men or women, who shall enter the foreign work, either independently or in connection with some general society.

IV. Individual efforts and miscellaneous organizations. We are concerned in this article chiefly with the general statement of the organization and its agencies of administration.

V. Organized Missionary Societies or Boards:

These may be classed under three general heads: 1. Those directly controlled by some ecclesiastical organization. 2. Those ecclesiastically connected with some denomination, but not controlled by it. 3. Those independent of any ecclesiastical connection.

1. Those directly controlled by some ecclesiastical organization include the Presbyterian Boards; the Missionary Society of the Methodist Episcopal Church, U. S. A.; the Division of Foreign Missionary Society of the Protestant Episcopal Church in the United States; the Missionary Society of the Moravian Church; and most of the Lutheran Boards of America and Europe. In them the society or board or committee appointed by and responsible to the general governing body of the church or denomination. These are: the General Assemblies of the various Presbyterian Churches; the General Conference of the Methodist Episcopal Church; the General Convention of the Protestant Episcopal Church in the United States; and the General Synod of the Moravian Church. Whenever there are so-called members, directors, etc., the term is merely honorary, indicating that such persons have by virtue of certain grants of money been allowed certain privileges, e.g., of receiving regularly the Society's publications, or attending certain regular meetings. They do not indicate any right to vote upon any action of the Society or Board. Officials are required to belong to the denomination, and missionaries shall have received ordination from authorities recognized by the Church. In case of difference between the missions and the board there is an appeal to the General Assembly, etc.

2. Those ecclesiastically connected with some denomination, but not directly controlled by
it, comprise such societies as the Church Missionary Society, the Society for the Propagation of the Gospel, and various Baptist, Methodist, and Wesleyan Societies of England, the United States, and Canada. In these the societies or boards are composed of members of the denomination which they represent, either by virtue of grants of money or by appointment to represent certain churches. Their officials and missions are members of the denomination, and are required to conform to its customs and discipline. So far as the direction of the affairs of the society or mission is concerned, the authority of the board itself is final—there is no appeal.

3. Those independent of ecclesiastical relations include the American Board of Commissioners for Foreign Missions, the London Missionary Society, the Paris Evangelical Society, the Basel and Berlin Missionary societies, the Bible societies, and most of the special societies. Here, however, we find again two classes: (1) Those which are general in their membership, and (2) those that are self-perpetuating, or close corporations.

The first class includes the London Missionary Society, the Bible Societies, and most of the special societies. In them the membership is absolutely unlimited in number, and any person can become a member by acceding to certain conditions. He then has the right to vote in the annual or general meetings of the Society where the special committees or boards are elected.

The second class includes the ABCFM, the Paris Evangelical Society, and the Basel, and the Berlin, and other German independent societies. In them the membership is restricted in number, and the right to vote at any meeting of the society is confined to the actual members of the society, who alone have the right to elect other members.

In neither class is there any restriction of denominational connections or of special ordination and discipline, tho, as a matter of fact, both the ABCFM and the London Missionary Society have become Congregational societies. The decision of the general society in every case is final—there is no appeal.

1. The Prudential Committee: These in general are mission enterprises, in which the missionaries go to the foreign field without the assurance of any definite or continued support from the home land. They usually claim to put forth no efforts to secure such support, beyond the offering of prayer to God. In some cases they seek to support themselves by some occupation on the ground; but as a rule they give themselves entirely to their work, relying solely upon whatever gifts may come to them from friends at home, or may be given by travelers and others who visit them. For the most part such missions are carried on by individuals, but occasionally they have a more or less elaborate organization. The most prominent instance of the last named type is the China Inland Mission. There is no formal organization, but a committee or council receives and forwards funds, publishes reports, and renders accounts. The same thing is practically done by individual friends for all the smaller Faith Missions. Public appeals are seldom made, as in the case of the organized societies, and the missionaries are absolutely independent (in most cases) of any ecclesiastical direction, tho they are always connected with some religious body.

The agencies employed by the organized societies for the administration of the mission-taking in its different departments, viz., collection and forwarding of funds, selection of missionaries, direction of the foreign work, furnishing reports, and holding of property, are, 1. A committee; 2. Executive officers.

1. The Committee: In the case of the societies of the first class enumerated above, viz., those directly under the control of an ecclesiastical organization, the committee and the board are identical. In other cases they are generally appointed by the general society, tho in some cases, as in the American Baptist Missionary Union, the society appoints a Board of Managers, which in its turn appoints an Executive Committee. However appointed or however named,—Board of Managers, Executive Committee, Prudential Committee, Advisory Committee, etc.—its duties are to conduct the affairs of the society under the general direction of the society or the church. All matters pertaining to the particular policy or active operations both at home and abroad are discussed and decided in its meetings, and it is rarely the case that an appeal is taken to the general society or church, or, if taken, sustained. In fact, these committees are, for all practical purposes, the societies, the latter doing, as a rule, little more than mark out general lines of policy. Each committee appoints sub-committees for the special departments. These vary greatly in their form, according to the differing customs of each society.

2. The Executive Officers: These are the secretaries, treasurers, agents, etc. Scarcely any two societies apportion their duties in the same way, but those duties are so familiar that they need no special mention. They are never voting members of the committee, but merely executive officers. The definition of a few of the terms in general use among such of the societies as make a distinction between the different officers will suffice.

A foreign secretary has charge of the correspondence with the missions, presents to the committee all questions relating to the conduct or interests of the foreign work, and the estimates for the missions. A home secretary has general charge of the home department, with special reference to the raising of funds, and the relations of the committee or board to the churches. In some cases all applications for appointment to the foreign field pass through his hands; in other cases they go to the foreign secretaries. An editorial secretary has general charge of the publications of the society, edits the periodicals and the annual reports, and superintends, when he does not prepare, the various leaflets, tracts, etc., by which the knowledge of the society's operations is disseminated. A field secretary is one whose special work it is to visit the churches, attend meetings of ministers, and arrange plans for public presentations of the needs of the society. This work of visiting is shared by all the secretaries, according to their time and ability. In some cases there is a recording secretary, as a permanent official, whose special duty it is to keep the record of all the transactions of the committee. In other cases that work is divided up among the other secretaries. Some societies also employ district secretaries, who have special charge of certain
sections of country, gather the subscriptions, arrange for visits and addresses, and report to the committee, generally through the home or the recording secretary. The treasurer has charge of all moneys and accounts. He receives all remittances, makes all payments, keeps all accounts, and disposes of the appropriations after the estimates have been passed upon in committee. He furnishes to the monthly periodicals full statements of moneys received, and his accounts are submitted to auditors for careful examination. In some instances the office of treasurer is honorary, the regular work being conducted by an assistant treasurer or a financial secretary. Usually there is also a general or business agent, who has charge of the publishing department, and the purchase and forwarding of outfits, supplies, etc., for missionaries.

The term honorary secretary, etc., is applied in British societies to persons who serve without receiving any remuneration. The executive officers are the only persons connected with the society who receive salaries. Members of committees or of boards invariably serve gratuitously.

In the case of some of the smaller societies, where the duties are not numerous or heavy, they are performed, commonly without salary, by some minister or layman, but in all the large societies, where the duties require time, salaries are paid.

The work of administration of a missionary society commonly comprises:

1. The Collection and Application of Funds:

The income of a missionary society includes:

(a) donations, collections, subscriptions, whether by individuals, churches, Sunday schools, auxiliaries, bands, etc. These are sent either direct to the treasurer or through some local or church societies, and are, as a rule, applied to the general work of the board.

(b) Legacies. These are usually payable in full by the executors of a will, but are in some instances subject to conditions of annuity or application to some specific purpose.

(c) The income of invested funds. In some instances the fund of invested funds has been dedicated to special objects by their donors; e.g., the payment of the salaries of the executive officers, or the support of certain departments of mission work. It has become increasingly the custom for the large societies to own the premises where their offices are located. The original erection or purchase of these has been, in almost every case, from moneys contributed for that special purpose, and entirely apart from the ordinary donations to the missionary work of the society.

The remittance of money to the field is generally through some well-known banking-house of New York or London which has commercial dealings with the country where the mission is located, and is in the form of bills of exchange or letters of credit such as are issued to travelers.

2. The Selection of Missionaries:

This is one of the most difficult duties that devolves on a mission board. The peculiar elements that enter into foreign life, the strain of changed climate, habits of life, the new language, the necessity of intimate relations with associates, the demands of sudden emergencies, etc., all enter into the consideration. Then, again, the strange misconceptions as to nature of the missionary work, the idea that personal conser-

The examinations being satisfactory, the appointment is given, and preparations are made for the departure. In the case of an increasing number of societies, especially in England and Germany, there comes then a period of special training and preparation with a view to fitting the missionary for his work. In America the whole question of the preparation of missionary candidates is still under discussion. (See Training.)

3. The Conduct of the Foreign Work:

The Missionary Society, as indicated in the article on the work of the missionary, is:

(1) A great evangelistic agency, employing hundreds of men and women whose chief duty is to preach the Gospel.

(2) A bureau of education supplying every grade of instruction to thousands who would otherwise be absolutely ignorant.

(3) A publishing society with different departments of translation, editing, publication, and distribution.

(4) A building society for the erection of churches, colleges, hospitals, etc.

(5) A charitable society for the assistance of the suffering poor, the diseased, the widowed and orphaned. All these are combined in different ways in Europe and America and are constantly arising which can only be decided by the home authority. Such are:

The question of expenses to be incurred in different departments, and the accounting for payments
made. 2. The beginning of new work. 3. Relations between different missions and different societies in the same field. 4. General questions of policy. These are all perplexing questions, and questions in regard to which there is much of opinion even among those best informed on the field. Perhaps the most difficult one is the first, which is more fully treated in the article Finances of Missions. To enter into detail more fully is beyond the limits of this article. Enough has already been said to show that the men who meet weekly or oftener to consider and decide such complicated questions are no less earnest and consecrated in their labor than those who go to the foreign field.

4. Reporting to the Churches: This is becoming more and more an important branch of the home work of the societies. There is a marked difference between societies in this particular. Some societies publish very full reports, like the CMS (which has the services of skilled editors and contributors), and some very meager. Some most carefully arrange and index everything; others give interesting general statements, but are not explicit in details.

5. The Holding and Securing of Real Estate: This has great importance in the prosecution of missionary work. The laws relating to the holding and securing of property are very different in different lands; but whatever be the form of title, the actual ownership rests with the committee at home.

II. On the Foreign Field: Turning now to the organization of mission work abroad and the administrative agencies employed, we find that the organization is: 1st, Territorial; 2d, Ecclesiastical. The agencies are: 1. Missionaries; 2. Native Pastors or local Ecclesiastical Bodies.

Missions: The word “mission” is used in a great variety of senses, denoting sometimes a single undertaking; but, as found in the majority of the reports of the missionary societies, it indicates an organized (or simply associated) body of missionaries occupying a certain territory, e. g., the North Africa, the Mid-China, the Japan Mission. It includes a number of stations, with their outstations and fields, and its extent is usually regulated by the ease of communication between the different parts. In the usage of the Methodist Episcopal Churches of the United States the mission, upon the formation of a regular local ecclesiastical organization, becomes a conference. The Wesleyan Methodists of England limit the use of the word so that it is practically synonymous with district; having (e. g.) four missions in the island of Ceylon. The Society for the Propagation of the Gospel uses the term in the most restricted sense, combining its individual missions in dioceses. The CMS passes over parts of the supervisory work of a mission to local bodies, and reports such work in a separate category.

Speaking now of missions in the general sense, as organizations or associations of missionaries occupying a certain territory or working for a special issue, we find them, in the majority of cases, including the Baptist, Congregational, Presbyterian, Methodist, and most of the Episcopal societies, having a more or less complete form of organization. They have regular meetings, conferences, or councils annually or semi-annually, with permanent officers, treasurer, secretary, or presiding elder. Action affecting the mission as a whole is transacted in these meetings, and transmitted to the home department through the appropriate office. Thus the estimates arranged at the annual meeting are transmitted by the secretary of the mission to the foreign secretary of the board; the appropriations made by the board return to the treasurer of the mission, who keeps all the accounts.

Stations: This word also has varied meanings. Usually it denotes some city or large town occupied by one or more missionaries, from which the work extends to the surrounding territory. Sometimes it includes the whole field worked from that place as a center, but the restricted use is the more common, and is that usually adopted in this Encyclopedia. In the stations, too, there is, as a rule, some organization, especially when there are a number of missionaries, an extended field, and many departments.

Outstations or Sub-stations: These are places—sometimes an important city, more often a town or village—where mission work is carried on by native workers alone. Usually there is a church or congregation ministered to by native preachers, and the schools are under native teachers. It is seldom the case that an outstation is the residence of a missionary. In the usage of the Methodist and some Baptist boards, however, there is really no distinction between stations and outstations, except as the most important centers of work are called principal stations and the remainder stations; the missionaries frequently reside at the different stations in turn. They also use the term circuit in the foreign field as at home, to indicate what other societies mean by station field.

2. Ecclesiastical Organization: This varies greatly with the different societies, is governed by the rules of the denominations at home, and follows the lines of the three classes mentioned above. Wherever the missionary societies are organically connected with the church, the missionsidebar members, Conference, etc., are organic parts of the church. They are thus entitled to representation in the governing body of the church, and as a matter of fact are usually so represented.

In the second class, where the relation of the board to the church is not organic, the mission­aries are under the ecclesiastical discipline of the church or churches at home, by the laws of the Society. In the third class individual missionaries are free to arrange their own ecclesiastical relations, entirely independent of the board.

With regard to the native churches, there is a wide difference of custom. As a rule they follow the lead of the missionaries, too, except in the Episcopal Churches, there is no law governing them; and there is a large liberty left by almost all the societies to their representatives in the field in regard to the details of formal organization.

B. Administration:

1. Foreign Missionaries are the first of the administrative agencies. These are ordained—lay, female, and medical.

The great majority of foreign missionaries are, and except in special instances always have been, ministers regularly ordained according to the laws of the churches to which they belonged.
Specific instances in the history of the early missions of the London Missionary Society and the Moravians of the sending out of entirely or comparatively uneducated parsons, to encounter the perplexities, trials, and hardships of missionary life, made it all the more evident that the rule must be that a man to be a successful foreign missionary must be a man of education and special training. This was for many years synchronous with preparation for the ministry; and probably it was due as much to this as to the special work of preparation it seemed decided a rule that all missionaries should be ordained preachers. There were instances where laymen went out as printers, but that was considered exceptional, and in some instances they afterward received ordination. Another element in the case was the fact that the people of many foreign lands could not understand how a man who was not a "priest" could administer spiritual help and counsel, and they were somewhat unwilling to apply to any one whose ministerial status was not of the highest. As, however, the work has been divided into different departments, as education in the home lands has become more general and in foreign lands more exacting, as medical work opened up, as the general work has extended to include publication, treasury work, etc., the lay element in mission service became more prominent.

At the present time, in all the organized societies, lay missionaries are employed chiefly as business agents, printers, instructors in the higher schools and colleges, and in medical work. It is in the medical work that the layman in charge of the treasury, the accounts, and the publication work of the different missions. In medical work it is becoming increasingly evident that a physician who is to excel in his profession cannot also be a theologian, and in his practice he needs less and less of it: indeed it is in many cases a positive hindrance to be known as a preacher or priest.

Women missionaries take an increasingly important position, both in numbers and in work done. Whether as wives or as single women, they have done and are doing some of the best work, both pioneer and constructive, that is found. They are not always mentioned separately in the tables of statistics, except in the reports of the European societies.

(c) Location: It has been the custom in most countries to send and locate two or more missionaries and their families together. The reasons for this are so obvious that they only need to be mentioned: Mutual consultation in cases of perplexity, sympathy in trial, support in anxiety, social relief from the strain of work, division of labor. In much the same way as it has been found to be wise for missionaries, as a rule, to be married, so it is wise for families to be associated. When female missionaries, whether as teachers or Zerana workers, are sent out, they also need the custom of the family and to establish a home of their own, or else join with the families of the stations. Thus a mission station almost invariably forms a social circle of educated, refined Christian people, whose individual laborers are scarcely more important than their combined power as a Christian community. Since the increase in numbers and importance of lay workers, there has risen a "community" method of life which is somewhat peculiar. Without being in any sense monastic, it seeks to reap the advantage of association. This is primarily economy, both of funds and of men. Under the community method a number of lay workers can be supported for the same sum that it costs to maintain a single missionary family. Another advantage lies in the possibility it offers of utilizing agencies that otherwise would hardly be available. The China Inland Mission and the Salvation Army have largely adopted it and other societies are considering it.

(d) Manner of Life: It is the universal custom in foreign missions to provide for their missionaries, so that their manner of life shall differ as little as possible from their home life. The limitations of surrounding customs, etc., are of course considered, and great expense is avoided; but so far as it is practicable it is the policy of the societies to enable their missionaries to have such comforts as a family in moderate circumstances is accustomed to have at home. These are: a substantial, healthy, dwelling comfortably furnished; clothing and food adapted to the climate and their habits of life; service sufficient to enable them to earn their own or to do their own individual work, so much of adornment of the home as shall make it home-like. It is primarily a question of economy. To send a man or a man and wife to Africa, India, or Japan, and compel them to live as the natives do, would, in the immense majority of cases, doom them to early death, or at least to permanent disability. It pays for a mission board to keep its missionaries in good health. But there is an additional reason. With rare exceptions, a missionary has influence in proportion as he preserves his own individuality. In pioneer work it may be wise to conform to the customs of the land, and sink the foreigner in the native; but after his position is once established, the rule is that his own national and racial individuality should assert itself. This is matter of experience, as well as of theory; and notwithstanding the constant reappearance of the other idea, it has a stronger hold to-day than ever before.

(e) Method of Support: This is usually by a fixed allowance, arranged either by or in consultation with the missionaries themselves, and graded according to circumstances of location or of family. The basis is an adequate support for year to year for the missionary and his family, without accumulating property.

(f) Education of Native Workers: This constitutes naturally the great body of the working force. Not only is it impossible, but it is undesirable, for the missionary to undertake to do all the work of his field. His chief aim, next to the conversion of individual souls, is the establishment of the Christian Church on its own distinct basis, with all its different departments. As soon as there are converts they are utilized as workers, each with some responsible share in the work of the missionary,—at first as Bible-readers; then
as catechists, teachers, preachers; and at last as pastors, in full charge of the general work of an organization, of whatever missionary character, the organizer and superintendent, and thus, in a degree, director; yet those who in a sense work under him still work with him, and follow him as leader, rather than obey him as master. It has been the custom of many missionary societies to keep it to themselves, and of others to distribute the native force entirely distinct. This has been due not to any lack of appreciation of the value of native work, or to any desire to exalt the missionary, but rather to the feeling that it was not advantageous from the point of view of the best development of the native churches to a position of independence of all missionary direction and assistance. In those societies where the work is but the extension of the home church this becomes less noticeable, and in them it is frequently the case that native clergy are placed on the same official basis as missionaries. Any such instance of the success of this is the great work done by Bishop Crothery of the Church Missionary Society in Africa. In every case there is the fullest mutual consultation not only in regard to plans, but estimates; and it is only a step is taken by the mission without the full concurrence of the native workers.

The question of their support is one of varying difficulty in different fields. At first it is usually assumed by the mission, but as the churches grow up it is urged to take the entire support of their preachers and teachers, and also of those who do the aggressive work. In some missions the custom is adopted of requiring that a certain proportion of the pastor's salary be met by the people before they can have a distinct organization. In every case there is the fullest mutual consultation not only in regard to plans, but estimates; and it is only in respect of the custom adopted of requiring that a certain proportion of the pastor's salary be met by the people before they can have a distinct organization. Among the aboriginal tribes different languages are used, as catechists, teachers, preachers; and at last as pastors, in full charge of the general work of an organization, of whatever missionary character, the organizer and superintendent, and thus, in a degree, director; yet those who in a sense work under him still work with him, and follow him as leader, rather than obey him as master. It has been the custom of many missionary societies to keep it to themselves, and of others to distribute the native force entirely distinct. Any such instance of the success of this is the great work done by Bishop Crothery of the Church Missionary Society in Africa.
Little reliance can be put upon these dates, but this much they make clear, that for many centuries before Christ Orissa was governed by Hindu rulers. Doubtless it was under these kings that the Kols, Gonds, Santals, and Kandhs were pushed back from the plains to the mountains. Then from about 500 B.C. to the Christian era is the period of Buddhist development and domination. Buddhist caves, dug out during this period, probably (the same date as low as 1000) still exist at Ratnagiri. Then followed the period of Yavana eras, the god of the sea, which aggravates the disaster by swelling the rivers, will devastate several hundred square miles of low-lying territory, and cause enormous destruction of life and property.

The Baptist missionaries at Serampore undertook, previous to the year 1820, evangelistic work in Orissa, but they withdrew in favor of the General Baptist Society (formed in England in 1816), which began work in this province in 1822. Cuttack, the chief city, was first occupied, and later Puri, the seat of Jagannath's temple and worship. The BMS now carries on work in these and three other stations. The American Free Baptist Missionary Society entered the northern part of Orissa in 1835, and now (1900) has seven stations in that part of Bengal. The two Baptist societies, together, have in Orissa about 8,000 professed Christian adherents, including church members.

ORIZABA: A town in Mexico, situated in the state of Vera Cruz, 78 miles E. by S. of Puebla. Altitude, 4,200 feet. Population (1900), 31,512. Station of the ME, with (1903) 1 woman missionary, 19 native workers, 358 professed Christians, of whom 233 are communicants; 9 places of worship, 8 Sunday schools, and 7 day schools. Station of the PB, with (1900) 3 missionaries and their wives and 1 printing house.

OROKOLO: A settlement in the Elema district of British New Guinea. Station of the LMS (1893), with 1 missionary and 8 native workers.

ORURO: A town in Bolivia, capital of the district of Oruro; formerly capital of the republic; situated 155 miles by rail S. E. of La Paz. It is in the center of a tin and silver mining district. Population, 8,500. Altitude, 12,117 feet. Station of the BOQ (1898), with (1903) 2 missionaries, one with his wife; 1 woman missionary, and 1 day school. The first Protestant church in Bolivia was organized here in 1902.

OSAKA: One of the large cities of Japan, situated on the main island, 28 miles southwest of Kioto. It is one of the three imperial cities; is well built and clean, and is the center of large tea districts. A government college and academy are located here. The climate is mild. Population (1899), 821,235. Its importance as a center of influence has been fully recognized by the missionary societies, of which eight are represented in the city. Station of the ABCFM (1872), with (1903) 2 missionaries, 3 women missionaries, 3 native workers, 10 outstations, 14 places of worship, 20 Sunday schools, 1 boarding school, 1 dispensary, and 1 printing house. Station also of the CMS (1874), with (1908) 5 missionaries, four of them with their wives; 6 women missionaries, 17 native workers, 4 places of worship, 3 day schools, 2 boarding schools, and 745 professed Christians, of whom 305 are communicants. Station also of the Cumberland Presbyterians (1880), with (1903) 2 missionaries with their wives, 2 women missionaries, 16 native workers, 2 outstations, 14 places of worship, 4 Sunday schools, 1 boarding school, and 214 professed Christians. Station also of the PN (1881), with (1903) 1 missionary and his wife, 3 women missionaries, 9 native workers, 2 outstations, 3 places of worship, 1 day school, 1 boarding school, 1 kindergarten. Station also of the MES (1890), with (1903) 1 missionary and his wife, 3 native workers, 2 outstations, 3 places of worship, 4 Sunday schools, 1 boarding school, and 214 professed Christians. Station also of the FN (1851), with (1903) 1 missionary and his wife, 3 women missionaries, 9 native workers, 2 outstations, 3 places of worship, 1 day school, 1 boarding school, 1 kindergarten. Station also of the ABMU (1892), with (1903) 2 missionaries and their wives, 2 women missionaries, 3 native workers, 10 outstations, 14 places.
alphabet of its own, but h3:s been .w~itten with Georgian and also with Russian (Cyrilhan)letters. It has _no... of worship, 2 Sunday schools, 2 day schools, 1... of the Aryan family of languages. ;rt has _no "Help for Brazil" Mission. The name is sometimes written Ugavigamiut. written with the Arabic letters from the same

Osborn: A station of the South Africa Wesleyan Methodist Mission Society, situated in Griqualand East, Cape Colony, about 8 miles S. E. of Mount Frere. It has (1900) 1 missionary, 68 native workers, 13 places of worship, 11 Sunday school, 14 day schools, 1 industrial school, and 942 professed Christians.

Oscarberg: A settlement in Natal, Africa, situated 42 miles E. by N. of Ladysmith. Station of the Church of Sweden Mission (1878), with (1900) 2 missionaries, one with his wife; 2 women missionaries, 7 native workers, 6 outstations, 2 places of worship, 3 day schools, and 149 professed Christians.

Osgood, Dauphin William: Born at Nelson, N. H., November 5, 1845; studied medicine at Brunswick, Me., and Lowell, Mass., graduating at the University of New York in 1869; sailed as a medical missionary of the ABCFM for Fuchau, China, December, 1869. He soon mastered the intricacies of the Chinese language, acquiring a knowledge of both the Mandarin and local dialects. One of his earliest efforts was the establishment of the Fuchau Medical Missionary Hospital. During the ten years of its existence medical aid was given gratuitously to 51,535 patients among the poorer classes. He established also in connection with the mission an asylum for the victims of opium, and in two years 1,500 patients received treatment, a large number of whom were cured. He was frequently called as a consulting physician by his medical conferees. Ever spare from the active duties of his profession for the last four years of his life was devoted to the translation into Chinese of a standard work on anatomy. The finishing touches were put to it only on the day before his death. The work has been published in 5 volumes, illustrated by numerous plates. It is the first of its kind in the Chinese language, and has been much used in China.

He died at the sanitarium near Fuchau August 17, 1880.

Oshima: A town in Japan, situated on Kiushu Island, about 10 miles E. of Nagasaki. Station of the Scandinavian Alliance Mission, with (1900) 1 woman missionary.

Osmanli Turkish: The Western dialect of the Turkish language as distinguished from the Eastern. It is used in Turkey, and the Eastern dialects, of which the Jagatai is the type, are used by Turks of the main stock in Central Asia. The term Osmanli Turkish is needlessly used by some also to distinguish the Turkish language when written with the Arabic letters from the same written with other letters. See Turkish Language.

Ossetian Language: The language of some of the tribes inhabiting the Caucasus region of the Russian Empire. It belongs to the Iranian group of the Aryan family of languages. It has no alphabet of its own, but has been written with Georgian and also with Russian (Cyrillic) letters. There are three recognized dialects, and probably more than three.

Ostyaek Language: The language of a people found in Western Siberia in the provinces of Tomsk, adjoining the Altai Mountains, and Toboisk, lying E. of the Ural range. It belongs to the Finnic or Ugrian branch of the Ural-Altaic family of languages and has been written with Russian (Cyrillic) letters.

Otaki District: A post in New Zealand, on the W. coast of North Island, about 45 miles N. N. E. of Wellington. Population, 1,500. Here the CMS has (1900) 1 missionary, 14 native workers, 1 day school and 1,297 professed Christians, of whom 235 are communicants.

Otjihenaena: See Otjihenaena.

Otjimbune: See Otjihenaena.

Otjoseazu: See Otjoseazu.

Otjosebunja: See Otjoseazu.

Otyhaenena: A village in German Southwest Africa, situated in the Herero country, about 200 miles E. by N. of Swakopmund. Station of the Rhenish Missionary Society, with (1903) 2 missionaries and their wives, 12 native workers, 6 outstations, 6 day schools and 481 professed Christians, of whom 113 are communicants. Some write the name Otjihenaena.

Otyimbune: A mission station of the Rhenish Missionary Society in German Southwest Africa, situated on the railway about 119 miles E. N. E. of Swakopmund, with (1903) 1 missionary and his wife, 6 native workers, 1 outstation, 1 day school, 1 Sunday school and 764 professed Christians, of whom 276 are communicants. Some write the name Otjimbune.

Otyondunya: A settlement in German Southwest Africa, situated in the Herero district, about 230 miles N. E. of Swakopmund. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 7 native workers, 6 outstations, 7 day schools, and 319 professed Christians, of whom 131 are communicants. Some write the name Otjondunya.

Otyoseazu: A village in German Southwest Africa, situated in the territory of the Herero tribes, about 180 miles E. by N. of Swakopmund. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, one with his wife; 9 native workers, 3 outstations, 4 day schools, and 537 professed Christians of whom 168 are communicants. The Society writes the name Otjoseazu.

Oudi: Formerly an independent native kingdom, annexed by England in 1855. Now a part of the United Provinces.

Ougavigumute: A settlement in the S. W. part of Alaska, situated on the Kuskokwim River, about 125 miles from its mouth. Station of the Moravian Mission (1892), with (1901) 1 missionary and his wife, 2 outstations, 1 place of worship, 1 Sunday school, and 60 professed Christians. The name is sometimes written Uvavigumute.

Ouro Preto: A town and railway station of Brazil, capital of the state of Minas Geraes, situated 180 miles N. by W. of Rio de Janeiro. The city is overlooked by the beautiful 1084-foot Pico do Caracol. It owes its origin to gold deposits discovered in 1698. Population, 20,000. Station of the "Help for Brazil" Mission.

Owen, Joseph: Born at Bedford, New York,
June 14, 1814; graduated at Princeton College, 1835, and theological seminary 1839; ordained as an evangelist by the Presbytery of Westchester October 2, 1839; sailed as a missionary of the PN for India, August 5, 1840. Most of his life was spent at Allahabad (1840-68). His labors, like those of most missionaries in India, were various—preaching, teaching, translating, and revising former translations of the Scriptures, and preparing commentaries on different books of the Bible. He was president of the Allahabad Missionary College, and professor in the Allahabad Theological Seminary. After 28 years of continuous labor he left in ill health for America via Scotland, intending, after spending a few days in Edinburgh, to visit his native land, and then return to India, but died in Edinburgh December 4, 1870. He took high rank as a scholar. When he left India he had just completed a second revision and edition of the Old Testament in Hindi and a commentary on Isaiah in Hindustani for the American Tract Society. He wrote a new translation of the Psalms in Hindustani and several commentaries in the same language.

OXFORD MISSION TO CALCUTTA: Headquarters in Calcutta, India. The mission was founded in 1880 in answer to an appeal from the Bishop of Calcutta to the University of Oxford to "send out men to work among the natives of that city who have received or are receiving the advantages of the system of education provided by the English Government." The form selected for the mission was that which was suggested by the late Bishop Douglas of Bombay—that of a "missionary brotherhood." It was decided, therefore, that the Oxford Mission should form a community under a superior, altho its members would not be bound by any vows for life, but would be allowed to withdraw at pleasure. The rules of the mission were tested by two years' work in Calcutta, after which the bishop incorporated the first members of "The Oxford Brotherhood of the Epiphany."

The mission consists of 5 ordained and 2 unordained members, all Oxford University men, who carry on work in Calcutta and Patna, in three lines:

1. Interviews with the natives, lectures, and discussions. 2. The conduct of a school for native Christian boys. 3. The editing of a weekly paper called The Epiphany, in which free discussion of all religious questions is carried on between members of the mission and inquirers. The brotherhood also undertakes special work in India, for which funds are provided by the SPG. There is also a Ladies' Association, organized in 1887, in aid of the Oxford Mission.

OYO: A town in West Africa, situated 150 miles N. N. E. of Lagos, in the Yoruba country. Population about 50,000. Station of the CMS, with (1903) 2 missionaries, one of them with his wife; 2 women missionaries, 3 native workers, 2 day schools, 1 theological class, and 142 professed Christians, of whom 50 are communicants. Station also of the SBC, with (1903) 2 missionaries and their wives, 4 native workers, 2 places of worship, 1 Sunday school, 1 day school, and 43 professed Christians. Station also of the WMS, with (1903) 10 native workers, 6 Sunday schools, 5 day schools, and 176 professed Christians, of whom 150 are communicants. Some write the name Awyaw.

PABALONG: A town in Cape Colony, Africa, situated in Griqualand East, near the border of Basutoland, and about 15 miles S. of Matatela. Station of the Paris Evangelical Mission Society (1870), with (1902) 1 missionary and his wife, 12 native workers, 7 outstations, 1 place of worship, 1 Sunday school, 5 day schools, and 265 professed Christians.

PABNA: A town in Bengal, India, situated 75 miles W. N. W. of Dacca. It has a large indigo factory. Population, 16,500, of whom 8,100 are Hindus and 9,000 Mohammedans. Station of the Furreedpore Mission (1890), with (1901) 2 missionaries, one with his wife; 2 women missionaries, 7 native workers, 4 day schools, and 1 place of worship.

PA-CHIAU: A town in the province of Sze-chwan, China, situated 130 miles N. by E. of Chung-king. Station of the CIM (1887), with (1903) 1 missionary and his wife, 3 women missionaries, 2 native workers, 1 place of worship, 1 day school, 1 Sunday school, and 47 professed Christians.

PACHUCA: A mining town in the State of Hidalgo, Mexico, about 50 miles N. E. by N. of Mexico City. Silver mines were worked here before the Spanish conquest, and silver has been extracted almost continuously ever since. The mines of Pachuca and the neighboring Real del Monte produce one-sixth of the aggregate silver mined in the year in the whole country. Station of the ME, with (1903) 1 missionary and his wife, 130 native workers, 30 native workers' outstations, 8 places of worship, 9 Sunday schools, 9 day schools, 1 boarding school, and 1,494 professed Christians, of whom 608 are communicants.

PADANG: A town in Sumatra, Dutch East Indies, situated on the W. coast. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife; 2 women missionaries, 60 native workers, 30 outstations, 9 Sunday schools, 3 day schools, and 1 boarding school. Station also of the Seventh Day Adventists (1900), with (1900) 1 missionary and his wife and 1 boarding school.

PAGODA ANCHORAGE: A seaport in the province of Fu-kiien, China, situated on the S. side of the mouth of the estuary of the Min River, about 18 miles E. of Fu-chau. Station of the ABCFM (1890), with (1903) 3 missionaries and their wives, 60 native workers, 30 outstations, 30 places of worship, 30 Sunday schools, 26 day schools, 3 boarding schools, 1 dispensary, 1 hospital, and 501 professed Christians.

PAHANDUT: A village in Southern Borneo, Dutch East Indies, situated about 95 miles N. W. of Banjermassin. Station of the Rhenish Mission Society, with (1906) 1 missionary and
his wife, 3 native workers, 2 outstations, 1 day school, and 75 professed Christians, of whom 54 are communicants.

PAHARI. See SANTALS.

PAHOA: A town at the head of the Gulf of Tong, Kauai, Hawaii; is a treaty port, with a population of 25,000. Station of the CMS (1886), with (1903) 3 missionaries and their wives, 4 women missionaries, 12 native workers, 2 day schools, 2 boarding schools, 1 dispensary, 1 hospital, 1 lepers' asylum, and 173 professed Christians. Some write the name Pakur.

PAKOKKU: A town in Upper Burma, India, capital of the district of Pakokku, on the right bank of the Irawadi, 20 miles N. E. of Pagan. Population, 20,000, of whom 18,400 are Buddhists. Station of the WMS, with (1903) 1 missionary, 10 native workers, 7 outstations, 7 Sunday schools, 6 day schools, and 60 professed Christians, of whom 51 are communicants.

PAKAU: A town and railway station in Bengal, India, situated in the E. of the Santal Parganas, about 160 miles N. W. of Calcutta. Station of the ME, with (1903) 1 missionary and his wife, 18 native workers, 1 place of worship, 6 Sunday schools, 5 day schools, and 279 professed Christians, of whom 79 are communicants. Some write the name Pakur.

PAKUR. See PAKAUR.

PALABALA: A village in the Congo Free State, West Africa, 110 miles from the mouth of the Congo River, and a few miles from the left bank of the Congo River, near Matadi. Station of the ABMU (1878), with (1903) 3 missionaries, 2 of them with their wives; 12 native workers, 7 outstations, 3 places of worship, 7 day schools, and 890 professed Christians, of whom 324 are communicants.

PALAKONDA: A town of Madras, India, situated 70 miles N. N. E. of Visagapatam. Population, 10,400, of whom 10,100 are Hindus. Station of the Baptist Convention of the Maritime Provinces (1892), with (1900) 1 missionary and 3 native workers.

PALAMKOTTA: A town in Madras, India, situated about 5 miles E. of Tinnevelly. Population, 5,000. Station of the CMS (1820), with (1903) 7 missionaries, 5 of them with their wives; 6 women missionaries, 4 boarding schools, 1 theological class, 1 college, 462 day schools, 861 native workers, and 54,970 professed Christians, of whom 13,439 are communicants (including the district of Tinnevelly Church Council). Station of the CEZ (1881), with (1903) 5 women missionaries, 66 native workers, 3 day schools, 1 boarding school, 1 industrial school, 1 dispensary, and 1,139 Zenana pupils. Some write the name Palamcottta.

PALANI. See PALANI.

PALAYPE. See ROWE.

PALESTINE. See SYRIA.

PALKHAT: A town in the Malabar district, Madras, 30 miles south-southwest of Coimbatore, 68 miles east of Calicut, in a famous pass of the Western Ghats. Has a large trade and active manufactures. Population, 39,500, of whom 39,066 are Hindus. Station of the Basel Missionary Society (1858), with (1903) 3 missionaries, 2 of them with their wives; 27 native workers, 5 outstations, 1 Sunday school, 5 day schools, and 443 professed Christians, of whom 248 are communicants.

PALI LANGUAGE: One of the Indic group of the Aryan family of languages. It is the language of Buddhist sacred literature in Ceylon and farther India, and is written with the old Sanskrit characters. It is classed as an old colloquial Prakrit, as contrasted with the literary or Sanskrit, but it is not now colloquial in the lands where it is cultivated in literature.

PALIPI: A village in the Toba Lake region of Sumatra, Dutch East Indies. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 1 native worker, 1 Sunday school, 1 day school, and 7 professed Christians.

PALKONDA. See PALAKONDA.

PALLAM: A town of Travanore, India, situated about 4 miles S. W. of Kottayam. Station of the CMS (1845), with (1903) 1 missionary and his wife, 43 native workers, 11 day schools, 1 boarding school, and in the district including Kottayam, 185 native workers, 50 day schools, and 20,045 professed Christians, of whom 3,194 are communicants.

PALMANER: Town in North Arcot, Madras, India, near the summit of the Magli Pass, 2,247 feet above the sea and 115 miles W. of Madras. A healthy station, 10° cooler than the rest of the district. Population, 1,031. There is a busy trade. Station of the RCA (1857), with (1903) 1 missionary and his wife, 1 woman missionary, 16 native workers, 1 place of worship, 4 Sunday schools, 2 day schools, 1 theological class, and 145 professed Christians, of whom 61 are communicants.

PALMIESTON: An settlement in the Klipplaat region of Cape Colony, S. Africa, situated about 54 miles S. W. of Graaff Reinet. Station of the Hannover Lutheran Free Church Mission Society (1896), with (1901) 1 missionary and his wife, 4 native workers, 4 outstations, 5 places of worship, 5 day schools, and 1,500 professed Christians.

PALMUR: A town in the native state of Haidarabad, India, situated about 63 miles S. W. of the city of Haidarabad. Climate healthy but hot. Station of the ABMU (1885), with (1903) 1 missionary and his wife, 29 native workers, 5 outstations, 10 places of worship, 14 Sunday schools, 10 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 851 communicant Christians.

PALMI: A municipality in Madras, India, situated about 28 miles W. N. W. of Dindigul. Population, 16,900, of whom 15,600 are Hindus. Station of the ABCFM (1862), with (1903) 1 missionary and his wife, 34 native workers, 12 outstations, 10 places of worship, 11 Sunday schools, 9 day schools, 1 boarding school, and 169 professed Christians. Some write the name Palani.

PALWAL: A municipality in the Punjab, India, in the district of Gurgaon, 33 miles S. by E. of Delhi. It is of great antiquity, and it is said to have been restored by Vikranaditya in 57 a. c. Population, 11,200, of whom 7,400 are Hindus and 3,700 are Mohammedans. Station of the BSM (1891), with (1903) 6 women missionaries, 7 native workers, 4 Sunday schools, 2 day schools, 1 industrial school, 1 dispensary, 1 hospital, and 84 Zenana pupils. Station also of the BMS.
(1895), with (1903) 2 missionaries and their wives, 8 native workers, 3 outstations, 5 Sunday schools, 3 day schools, 3 dispensaries, and 120 professed Christians, of whom 59 are communicants.

PANADURE: A village in the Western Province of Ceylon, India, situated on the W. coast about 15 miles S. of Colombo. Station of the WMS, with (1903) 1 missionary, 20 native workers, 7 places of worship, 5 Sunday schools, 5 day schools, and 146 professed Christians, of whom 126 are communicants.

PANALET: An island of the D'Entreameseaux group in Malaysia, lying about 40 miles S. E. of the extreme eastern point of New Guinea. Station of the Australian Wesleyan Methodist Mission, with (1901) 1 missionary, 5 native workers, 6 places of worship, 5 Sunday schools, 5 day schools, and 47 professed Christians.

PANCHGANJ: A town in Bombay, India, situated 22 miles N. W. of Satara. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 29 native workers, 3 outstations, 1 Sunday school, 4 day schools, and 269 professed Christians, of whom 126 are communicants.

PANCHGUMU: A town in the province of Hu-nan, China. It is a small town between the rivers Cheng-chuan and Beichwen, situated 145 miles N. N. W. of Chung-k'ing. It is the center of a large silk-producing district. Station of the CIM, with (1903) 1 missionary and his wife, 47 native workers, 2 outstations, 4 Sunday schools, 4 day schools, and 2,588 professed Christians, of whom 1,257 are communicants.

PANCHHAREPAK: A town on the island of Java, near the head of Wyndkoon's Bay, on the W. coast and about 50 miles S. of Batavia. Station of the Netherlands Missionary Society (1972), with (1901) 2 missionaries, 12 native workers, 1 outstation, and 166 professed Christians.

PANCHITA: A town in Shan-tung, China, situated 23 miles E. by N. of Siboga. Station of the ABCFM, with (1903) 1 missionary and his wife, 7 native workers, 3 outstations, 1 Sunday school, 8 day schools, and 3,700 professed Christians, of whom 1,665 are communicants.

PANCHITAN: A town in the district of Panchit, Bombay, India, situated 12 miles N. by E. of Kolhapur. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 20 native workers, 7 places of worship, 6 Sunday schools, 7 day schools, 1 dispensary, and 164 professed Christians.

PANCHITA: A town in the province of Hu-nan, China. It is a small town between the rivers Cheng-chuan and Beichwen, situated 145 miles N. N. W. of Chung-k'ing. It is the center of a large silk-producing district. Station of the CIM, with (1903) 1 missionary and his wife, 47 native workers, 2 outstations, 4 Sunday schools, 4 day schools, and 2,588 professed Christians, of whom 1,257 are communicants.

PANHASITE: A town in the province of Hu-nan, China. It is a small town between the rivers Cheng-chuan and Beichwen, situated 145 miles N. N. W. of Chung-k'ing. It is the center of a large silk-producing district. Station of the CIM, with (1903) 1 missionary and his wife, 47 native workers, 2 outstations, 4 Sunday schools, 4 day schools, and 2,588 professed Christians, of whom 1,257 are communicants.

PANHALA KADOLI: A town in the province of Hu-nan, China. It is a small town between the rivers Cheng-chuan and Beichwen, situated 145 miles N. N. W. of Chung-k'ing. It is the center of a large silk-producing district. Station of the CIM, with (1903) 1 missionary and his wife, 47 native workers, 2 outstations, 4 Sunday schools, 4 day schools, and 2,588 professed Christians, of whom 1,257 are communicants.

PANHALA KADOLI: A town in the province of Hu-nan, China. It is a small town between the rivers Cheng-chuan and Beichwen, situated 145 miles N. N. W. of Chung-k'ing. It is the center of a large silk-producing district. Station of the CIM, with (1903) 1 missionary and his wife, 47 native workers, 2 outstations, 4 Sunday schools, 4 day schools, and 2,588 professed Christians, of whom 1,257 are communicants.

PANHALA KADOLI: A town in the province of Hu-nan, China. It is a small town between the rivers Cheng-chuan and Beichwen, situated 145 miles N. N. W. of Chung-k'ing. It is the center of a large silk-producing district. Station of the CIM, with (1903) 1 missionary and his wife, 47 native workers, 2 outstations, 4 Sunday schools, 4 day schools, and 2,588 professed Christians, of whom 1,257 are communicants.

PANHALA KADOLI: A town in the province of Hu-nan, China. It is a small town between the rivers Cheng-chuan and Beichwen, situated 145 miles N. N. W. of Chung-k'ing. It is the center of a large silk-producing district. Station of the CIM, with (1903) 1 missionary and his wife, 47 native workers, 2 outstations, 4 Sunday schools, 4 day schools, and 2,588 professed Christians, of whom 1,257 are communicants.
Station of the Paris Evangelical Missionary Society (1863), with (1903) 4 missionaries and 54 missionaries, 2 of them with their wives; 1 native worker, 3 outstations, 2 places of worship, 2 Sunday schools, 2 day schools, 1 boarding school, and 293 professed Christians. Station also of the Seventh Day Adventists (1891), with (1901) 5 missionaries, 2 of them with their wives; 1 native worker, 3 outstations, 2 places of worship, 5 Sunday schools, 1 printing house, and 80 professed Christians.

PAPETOAI: A town on the N. coast of Eimeo Island, in the Society group. Station of the Paris Evangelical Mission Society (1867), with (1903) 1 missionary and his wife, 1 place of worship, 1 Sunday school, and 100 professed Christians.

PAPUA, or NEW GUINEA: Is the largest island on the globe, except Australia and Greenland. It is very irregular in its outline, but extends for about 1,300 miles between latitude 0° 30' to 10° 40' south, and longitude 131° to 150° 35' west. Its estimated area of 312,329 square miles. It has not been fully explored and surveyed. In general it is a mountainous country in the northern part, while the southern coasts are low and wooded. Vegetation is very luxuriant; tropical fruit trees are found in abundance among the woods of the interior produced forest timber trees. In the cultivated portions sugar-cane, tobacco, and rice are raised. The climate is healthful, the great changes in temperature occur during a very short time. The inhabitants, so far as they have been classified, are kin to those of the highest degree on the Pacific Islands. The Papuan languages belong to a separate class from the Malayo-Polynesian languages. The three great powers exercise authority over the country as follows: British New Guinea, 29 per cent. of the territory, the S. E. quarter of the island; German New Guinea, 23 per cent., its territory north of that of Great Britain, and Dutch New Guinea, constituting 48 per cent., the western half of the island. The missionary first entered the Dutch portion of the island, but the communions by the Dutch churches are few in number. The London Missionary Society next sent missionaries from the Loyalty Islands into British New Guinea, and ever since this Society has accomplished the largest result in New Guinea and has had the strongest force. Austral or Anglicans opened a mission on the north-east shore in 1891. In German New Guinea two German Societies are laboring.

PARAGUAY: A republic in South America, situated between 22° and 27° 35' south latitude, and 54° 35' and 61° 40' west longitude, southwest of Brazil and northeast of the Argentine Republic. Area, 91,970 square miles. The country in general consists of a series of plateaus with wooded slopes and grassy plains. The climate is very fine, tho at times the heat is excessive. The mean temperature for winter is 71°, and for summer 81°.

According to the Constitution of November, 1845, there are 2 chambers, or Houses of Congress, of 2 Houses, a Senate, and a House of Deputies. The senators and deputies are elected directly by the people, and the president holds office for four years.

The population (1899) is 530,103, besides 100,000 partly civilized Indians. There are twice as many females as males. The prevailing language is Spanish, but large numbers speak the Guarani; the mixture of Indian blood is stronger in Paraguay than in other states.

The principal cities are Asuncion (45,000), the capital, rapidly growing in population and importance; Concepcion (15,000), San Pedro (8,000). One-third of the inhabitants live in the central districts, containing the capital; one-third in the districts of Villa Rica and Cuasapa, and the remainder in the cultivated portion of the country. Agriculture and the raising of cattle are the principal occupations of the people, and Italian, Spanish, and German colonists are developing its resources in both these directions.

Railway, telegraph and telephone lines are in operation. The Roman Catholic is the established religion of the state, but other religions are tolerated. Education is free and compulsory. The Protestant Societies located in Paraguay are the South American Missionary Society and the Missionary Society of the Methodist Episcopal Church of the United States. The republic is open to Gospel influences, and the prospect of Christian missions is bright.

PARAMARIBO: Chief town of Surinam, South America, situated near the mouth of the Surinam River. Population, 31,000. In the year 1835 the first Moravian missionaries landed in Berbice, making Paramaribo the headquarters. Here a company of five Brethren worked at their trades in order to support themselves and the mission in Berbice. Their attention was soon directed to the negroes in Paramaribo. At first they had to face a good deal of opposition, but they gradually overcome ill-grounded prejudices, and were permitted to purchase a piece of land in the town.

For a considerable time their missionary work continued very limited, but gradually it expanded, and Paramaribo became endowed with a vigorous negro Christian church, which has five separate places of worship in the city, the branches being Rusten Vrede, Wania, Combe, and Saron. The Moravian Mission Society has here (1903) 21 missionaries, 19 women missionaries, 5 places of worship, 4 Sunday schools, 3 day schools, 1 kindergarten, and 3,098 professed Christians. Station also of the SDA (1887), with 1 missionary, 3 native workers, and 10 professed Christians. The auxiliary International Medical and Benevolent Association also maintains (1901) 4 mission here.

PARIAMTIJ: A town in Bombay, India, situated 31 miles N. N. E. of Ahmadabad. Population, 8,800, of whom 5,800 are Hindus. Station of the Presbyterian Church of Ireland (1897), with (1901) 2 missionaries, 9 native workers, 1 place of worship, 2 Sunday schools, 2 day schools, 1 orphanage, and 15 professed Christians.

PAREYCHALEY: A district in Travancore, India, situated between Neyyar and Trivandrum. It is the meeting-place of the Tamil and Malayalam languages. Population of the district, 130,000. It gives name to a station of the LMS (1845), with (1903) 1 missionary and his wife, 175 native workers, 26 outstations, 2 Sunday schools, 67 day schools, and 22,060 professed Christians, of whom 2,083 are communicants.
Pargarutan: A village in Sumatra, Dutch East Indies, situated about 50 miles S.E. of Siboga. Station of the Java Committee, with (1901) 1 missionary and his wife and 1 day school teacher.

Paris Evangelical Mission Society: The Paris Society for Evangelical Missions among non-Christian Nations (Société des Missions évangéliques chez les Peuples non-Chrétiens, établi à Paris) was formed in November, 1822, as a result of the general religious revival in Western Europe. Before this time several missionary committees had been organized in Alsace, in Southern France, and in Paris, which now joined the Paris Society as auxiliary associations. Among the founders of the Society were some of the most prominent of the French Protestants. Its first president was Admiral Count Verhélèn, and Jean and Frederick Monod, Baron A. de Staël, and other celebrated men were on this first committee. Its first general assembly was held in 1824, and in the same year an institution for training future missionaries was established at Paris.

Until 1840 the work of the Society went steadily forward; from this time its funds began to diminish, and after the Revolution of 1848 the want of money forced the Society to close the training institute. Of the 82 pupils who had joined it, 34 were laboring as missionaries in heathen countries, 17 as pastors in France, and 6 as teachers; the mission work in Basutoland, South Africa, was still carried on in spite of difficulties.

One of the Society's first missionaries, the Rev. E. Casalis, returned to France in 1849. His missionary addresses, delivered in churches all over the country, were crowned with most remarkable success, and a new love for missions seemed to spring up everywhere. The yearly income soon amounted to 180,000 francs. In 1856 the Training Institute was reopened, with M. Casalis at its head, and new spheres of labor were soon added to that in South Africa. Missionaries were sent to China (1859) and to Senegambia (1862). The colonial policy of the French Government being hostile to non-French organizations in the colonies, the Society was called on to take up work that had already been started by others. Thus in 1863 it took over the work of the LMS in Tahiti, which had labored among the American Presbyterians (in part) in the Gabun region. In 1885 additional work was undertaken among the Kabyles or Berber tribes living in North Africa, and in 1886 a long-hoped for mission was begun on the Upper Zambezi. In 1889 mission work was begun in the French territories on the Congo and Lower Zambesi Rivers. Until 1887 the training-school, being dependent on hired rooms, had migrated from one end of Paris to the other; in that year a mission-house admirably adapted to its purpose was erected at 102 Boulevard Arago. In 1896, as a result of the conquest of Madagascar, application was made to the Society to take up at least a portion of the work there. Altho the task seemed Herculean it was met courageously and successfully, with the result that the other societies laboring in Madagascar were also placed on a better foundation.

The Paris Society is undenominational. Its management is in the hands of a council composed of a president, two vice-presidents, two secretaries, two auditors, a treasurer, and twelve assessors. This council makes its own laws, and also the regulations to be followed by auxiliary committees formed outside of Paris. The services of the council are rendered gratuitously. A general assembly of the whole membership of the society is held annually.

1. Basuto Mission: The first three missionaries of the Society, Messrs. Bisieux, Lemme, and Rolland, went, in 1829, to South Africa and settled at Wellington and at Kuruman, in Bechuana-land. The work, however, progressed but slowly, and these enterprises were handed over to the LMS and the German Berlin Society, and the Paris Society concentrated its efforts in a mission in Basutoland, commenced in 1833 at Morija. There were reported (1902) 17 missionaries, 8 teachers, 367 native workers, 22 stations and outstations, 12,676 church members, 176 schools, 11,826 pupils. The mission suffered from the Transvaal war, but has since been rallying strength.

2. Senegal: In 1862 the Society commenced work on the West Coast of Africa, in the French colony of Senegal. For a number of years St. Louis was the only station occupied, but in 1856 work was inaugurated at Korbala, 80 miles inland, up the Senegal River. The climate has been very difficult to endure, but the work, especially among the children of freed slaves, encouraging.

3. Tahiti and French Polynesia: The occupation of Tahiti by the French in 1845 was followed by a request from the LMS to the Paris Society to send missionaries to that field. This was done, and in 1865 the entire work was handed over to it by the English. So thoroughly Christianized are the islands that they belong to the home rather than the foreign field. It has, however, been extended to Raiatea (1893), Atieana, in the Marquesas group (1899), and to the Loyalty Islands, Maré (1891-1900). The number of European missionaries is small (12, including 6 teachers), but there are 35 native pastors and 4,451 church members in 37 parishes. In the Loyalty Islands there is an interesting temperament movement.

4. Zambesi: In 1877 Mr. and Mrs. François Coillard, who for many years had labored among the Basutos in South Africa, endeavored to open among the Banyai tribes, north of the Limpopo River, a mission field for the native churches of Basutoland. They were made prisoners by the king of the Matsabele, and their project failed. Subsequently they traveled to the Upper Zambezi, and found the tribes there had been conquered by the Basutos, and spoke the language of their conquerors. This language being familiar to Mr. and Mrs. Coillard, and their interest in these Zambesian tribes being aroused, they decided to give up home and work in Basutoland, and to open a mission where the people were unspeakably degraded, and where no missionary had ever penetrated. In 1880-81 they visited Europe to plead for this part of Africa. As a result the Evangelical Mission to the Zambesi was founded. A committee was appointed in England and Scotland to receive funds for its support. In 1885, after a very difficult journey of more than 1,000 miles from Basutoland, Sesheke, on the Upper Zambezi, the residence of 15 chiefs, was reached. Here the missionaries took up
seemed as tho its existing work was all that the advantage of terms, were made, and although it seemed that the power of the Jesuits would crush out all evangelical work. Under the plea of the occupation of the island by the French forces, French teachers were employed to teach in the official schools, as well as French. Accordingly three teachers and one industrial assistant were sent out in 1888. In 1889 two young ordained missionaries were sent to the Ogowe River to visit the American stations.

From this developed a work in the French Congo which now includes four stations: Talagouga (1892), Lambarene (1893), Ngoma (1898), Samkita (1900). In this field the Society is making an experiment with industrial training, following the lead of the Basel Mission. The schools are successful. The force of 18 European workers includes 10 missionaries, 3 female teachers, 4 artisans, and 1 assistant.

6. Madagascar: Seldom in the history of missions has a society met such a crisis as faced the Paris Evangelical Society. The occupation of the island by the French forces enabled the Jesuits to continue their work, and the French Government having forbidden the instruction of the natives in any language but French. Accordingly, three teachers and one industrial assistant were sent out in 1888. In 1889, two young ordained missionaries were sent to the Ogowe River to visit the American stations.

From this developed a work in the French Congo which now includes four stations: Talagouga (1892), Lambarene (1893), Ngoma (1898), Samkita (1900). In this field the Society is making an experiment with industrial training, following the lead of the Basel Mission. The schools are successful. The force of 18 European workers includes 10 missionaries, 3 female teachers, 4 artisans, and 1 assistant.

5. French Congo: In 1887 the American Presbyterian Board of Missions asked from the Paris Missionary Society some French teachers to help in their school work on the Gabun and Ogowe Rivers, the French Government having forbidden the instruction of the natives in any language but French. Accordingly, three teachers and one industrial assistant were sent out in 1888. In 1889, two young ordained missionaries were sent to the Ogowe River to visit the American stations.

The plan of holding such a Parliament was violently opposed in many quarters. The Holy Synod of Russia put its ban upon it; and so did the Sultan of Turkey, forbidding Mohammedans from attending it. The Archbishop of Canterbury also used his influence against it. Official representatives were present at the Parliament from the Roman Catholic Church of America; from China; from the Buddhists of South India, from the Brahma Somaj, and one or two other sects. The following European and Parsee adherents of the various religions appeared at the Parliament: 1. To bring together representatives of all historic religions; 2. To show what and how many truths all religions teach in common; 3. To foster sentiments of brotherhood; 4. To set forth accurately the essentials of each religion; 5. To open up the fundamental facts on which rests the acceptance of Theism, and so to unite all religions in opposing materialism; 6. To bring together full statements, from different parts of the world, of the effect of the different religions upon the great problems of life; 7. To see what light each religion affords to other religions. 8. To acquire accurate information of the present condition of each of these religions. 9. To learn what light each of the various religions has to offer upon current social and moral problems of the world. 10. To aid in bringing nations into a more friendly fellowship with each other.

The educational work in which the Society is rendering invaluable assistance to the government is found in the seven districts of Imberina, including the capital. There are 275 schools, with 349 native teachers and 16,000 pupils. The thoroughness of the drill is manifested in the proportion of successful candidates in the official examinations. At Antananarivo the rates were: Paris Society, 78 per cent.; LMS, 64 per cent.; official schools, 65.5 per cent.; Roman Catholic, 55 per cent. At Fianarantsoa the rates were: Paris Society, 80 per cent.; LMS, 50 per cent.; Norwegian Society, 72 per cent.; and Roman Catholic, 69 per cent.

The leading mind occupied in organizing this great Parliament was that of Rev. John H. Barrows, D.D., pastor of one of the churches in Chicago. The aims of the Parliament as they presented themselves to his mind may be stated as follows: 1. To bring together representatives of all historic religions; 2. To show what and how many truths all religions teach in common; 3. To foster sentiments of brotherhood; 4. To set forth accurately the essentials of each religion; 5. To open up the fundamental facts on which rests the acceptance of Theism, and so to unite all religions in opposing materialism; 6. To bring together full statements, from different parts of the world, of the effect of the different religions upon the great problems of life; 7. To see what light each religion affords to other religions. 8. To acquire accurate information of the present condition of each of these religions. 9. To learn what light each of the various religions has to offer upon current social and moral problems of the world. 10. To aid in bringing nations into a more friendly fellowship with each other.

At Fianarantsoa the rates were: Paris Society, 80 per cent.; LMS, 50 per cent.; Norwegian Society, 72 per cent.; and Roman Catholic, 69 per cent.

More than once it seemed as if the limit of ability of the French Evangelical churches was reached, but the churches have always responded to renewed appeals, and the other missions have not suffered.

PARLIMENT OF RELIGION: A gathering of adherents of the various religions throughout the world, which met at Chicago from September 11 to 27, 1893, during the Centennial Exposition, and in one of its buildings. Such an Exposition would bring men together from different parts of the world and would afford an opportunity for telling all nations what place religion holds in the world, and what it has done. In this way it seemed to be possible to have at the World's Fair what might even be called an Exhibit of the World's Religions.

The leading mind occupied in organizing this great Parliament was that of Rev. John H. Barrows, D.D., pastor of one of the churches in Chicago. The aims of the Parliament as they presented themselves to his mind may be stated as follows: 1. To bring together representatives of all historic religions; 2. The following European and Parsee adherents of the various religions appeared at the Parliament: 1. To bring together representatives of all historic religions; 2. To show what and how many truths all religions teach in common; 3. To foster sentiments of brotherhood; 4. To set forth accurately the essentials of each religion; 5. To open up the fundamental facts on which rests the acceptance of Theism, and so to unite all religions in opposing materialism; 6. To bring together full statements, from different parts of the world, of the effect of the different religions upon the great problems of life; 7. To see what light each religion affords to other religions. 8. To acquire accurate information of the present condition of each of these religions. 9. To learn what light each of the various religions has to offer upon current social and moral problems of the world. 10. To aid in bringing nations into a more friendly fellowship with each other.
The sessions of the Parliament were marked by the most cordial feeling on the part of the Christians present, and it sometimes appeared that foreign attacks upon Christianity put a heavy strain upon the patience of the audience. Once only in the whole seventeen days of the Parliament did there appear any unseemly conduct on the part of the assembly. This was when Mr. Mohammed Webb undertook to justify polygamy, his voice being drowned in a storm of cries and hisses. The Parliament, in short, thoroughly satisfied the expectations of its promoters; and when it adjourned it did so with the Halalukah Chorus,' in circumstances in which it had never been sung before, to the excited minds of many it seemed like a prophecy of the triumph of Christianity over all who now hesitate to accept it.

The Parliament undoubtedly did a good work in showing what of truth there is in some of the Oriental faiths which are so little known among the masses of people in the Western lands. It probably served a good purpose also in leading the various Christian denominations to realize once more how near they are to each other. It did not, however, draw from the representatives of non-Christian religions the cordial goodwill which had been hoped for.

One curious result of the gathering was to convince many thinking men in Eastern countries that the Parliament betokened a lack of faith in Christianity among Christians who attended the meetings. Another somewhat unexpected result was to introduce to American audiences eloquent philosophers, like Swami Vivekananda, who did not fail to make the utmost possible use of the opportunity which was given him by the Parliament to leave to them as a sequel to its meetings. On the whole, one is inclined to judge that, so far as Orientals are concerned, the alluring scheme of holding such a Parliament of Religions was somewhat in advance of their present stage of development.

PARKER, H. P.: Died March 26, 1888, at the Victoria Nyanza. As Secretary of the CMS mission at Calcutta he accomplished great good, but he left this important post, at the suggestion of the Society, and entered upon work at Mandia, among the Gonds. Among this people, in the midst of the most trying difficulties, he labored faithfully and effectively until he was called to be the second bishop of Eastern Equatorial Africa. His six years' service as the Society's secretary at Calcutta, and his experience in the jungles of Central India, prepared him for his new position. He landed at Frere Town on November 27, 1886, and for six months, like his predecessor, Bishop Hannington, he gave all his energies to the East Africa Missions proper, setting things in order at Frere Town and Kabai, and visiting Wray at Taita, Pitch in Chagga, and the native teachers at other outlying stations. In June, 1887, he, accompanied by Mr. Blackburn, started for the interior, and, taking an entirely new route, they went direct from Kabai to Mambois; thence, passing westward, they reached the south end of Nyanza, by the way of Mwapwa and Uyu, where they found Mackay in the Masalia district. Here the first Missionary Conference was held in the interior, and, largely through the advice of Parker, wise conclusions were reached in the Society's future policy toward the savage natives. Bishop Parker urged the importance of women missionaries for East Africa, and in April 5, 1887, a committee of the Society took the initiative in this important matter.

PARKER, Peter: Born at Framingham, Mass., June 18, 1804. He graduated at Yale College in 1831, spent two years in Yale Divinity School, and took a course of medical study, receiving the degree of M.D. at Columbia College in 1834. He was a local missionary to China by the ABCFM, was ordained at Philadelphia, May 26, 1834, and sailed the next month for Canton. He opened a hospital at Canton for diseases of the eye, which contributed greatly to disarm prejudice, and furnished opportunities for making known religious truth. In 1836 his eye infirmity had received 1,912 patients at a cost of $1,200, all of which was given by resident foreigners. In this hospital he was forced to receive patients suffering from other than eye diseases, and became famous for wonderful surgical cures. He, using the influence thus gained to secure a hearing, preached to his hospital patients regularly. He also educated Chinese young men in the practice of medicine, one of whom became an expert surgeon. The outbreak of war with the English in 1840 made it necessary to close the dispensary, Dr. Parker visited the United States. In 1842 he returned to Canton. In 1844, with the hope thereby of aiding the missionary work, he accepted the appointment of Secretary and Interpreter to the United States Legation to China, and his connection with the American Board was soon after dissolved, tho he did not cease missionary work, and his labors in the hospital continued till he resigned his secretaryship on his return to America in 1853. He acted during these years as chargé d'affaires ad interim. Soon after his return he was appointed United States Commissioner to China, with plenipotentiary powers for the revision of the treaty of 1844. This service being completed in two years, he returned to America, and became an impulsive, owing to the effects of a sunstroke. He resided in Washington, and in 1868 was elected Regent of the Smithsonian Institution. He died in Washington, January 10, 1888, aged 83. He published a Statement respecting Hospitals in China, and an account of his visit to Luchu Islands and Japan.

PARLA-KIMEDI: A municipality of Madras, India, situated 75 miles S. W. by W. of Ganjam. Population, 16,400, of whom 15,900 are Hindus. Station of the Canada Baptist Convention of the Maritime Provinces (1892), with (1903) 1 missionary and his wife, 6 native workers, 1 outstation, 1 place of worship, 2 Sunday schools, 95 professed Christians.

PARPAREAN: A village in Sumatra, Dutch East Indies, situated in the Toba Lake region, near the S. E. extremity of the lake. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 15 native workers, 2 outstations, 3 day schools, and 485 professed Christians, of whom 200 are communicants.

PARRAL: A town in Northern Mexico, 200 miles east-southeast of Chihuahua. Climate even, healthy. Population, 5,000. Station of the ABCFM (1884), with (1903) 1 missionary and his wife, 3 native workers, 10 outstations, 3 places of worship, 6 Sunday schools, 3 day schools, 1 boarding school, and 277 professed Christians.

PARSEES: A people in India, numbering less than 100,000, resident mostly in Bombay,
which, because of its romantic history, unique religion, commercial enterprise and fine character, is of an interest and importance beyond the expectation excited by its numbers. The Parsees, i.e., "Persians," are descendants of the Zoroastrians who flourished in Persia until the 7th century, when the sword of the Mohammedans well nigh exterminated them, less than 10,000 of the sect, now called Guèbres, surviving to-day in Persia. But a portion of the Zoroastrians escaped to India, where they settled in Gujarat as agriculturists until Muslim conquest in India again dislodged them and drove them southward. They reached Bombay between 1650-1700, about the time that this island city was ceded to the English by Portugal. The contact with Europeans, and especially with the English, caused a wonderful transformation, awakening in this hitherto agricultural people a genius for business which has brought them immense wealth and prestige. They early became and have continued to be the chief factors in the English trading houses in Bombay, and supervisors of the railways, as traders, contractors, and engineers on their own account. Up to the middle of the 19th century, when the development of the great steamship companies changed conditions, the Parsees were a main factor in the trade of Bombay and China passed through their hands. Much of the latter was in their own ships, and the business was transacted through their own houses in London and the East. They also established themselves as dealers in European goods in the larger and in many of the smaller cities of the world. A long succession of master builders of the government shipyards in Bombay have been Parsees; some have achieved success as army and railway contractors, Jamshedji Dorraji, the without rudimentary, and much less engineering schooling, being the builder of large sections of the great India Peninsula Railway, and of other public works to the extent of a million sterling; some have established in Bombay extensive cotton and silk mills, while others became bankers; and the Times of India, one of the leading English papers in India, owes its existence to Parsee enterprise. In recent decades they have entered the learned professions and held prominent positions in the Bombay government.

Existing as a community by themselves in the midst of the composite mass of the Indian population, separated from others by their peculiar religion and customs, and with their own social organism, the Parsees are everywhere well-to-do, intelligent, and thrifty. The average degree of wealth is probably higher among them than among any other class in India. A Parsee beggar is never seen; the Parsee community always attends to the wants of its own poor, and suffers no members of its race to become a public burden. Their dress, dwellings, table appointments and social usages are a Hindu-European compound which the Parsees have continued to increase. Their ladies, handsomely dressed, with faces unveiled, are seen driving in well-appointed carriages and at public functions. Family life among them is generally happy. Formerly child marriages were a Parsee custom, but have now been abandoned, largely through the growing appreciation of education for boys and girls.

Zeal for education is a notable characteristic of the Parsees. Up to the time of their contact with the English, education in their common speech, Gujarati, was rare. A smattering of English was at first acquired for business use, but the educational movement dates from the early part of the 19th century, when Parsees chiefly took advantage of the English schools opened by the British. The Bombay Native Educational Society, founded in 1830 under the patronage of Governor Mountstuart Elphinstone, was the open door to higher education for the Parsees especially. Upon the retirement of this most eminent governor of Bombay, the Parsees took a leading part in commemorating his services by raising an endowment for the Elphinstone Institute for the teaching of the higher branches of European sciences and literature, and to this institution the little Parsee community has always supplied the majority of the students and in later years occupants for important chairs. They have also been quick to take advantage of the opportunities offered by the Jesuit, and the Scotch Presbyterian Missionary schools and colleges, and by the English and vernacular schools, established by the government and by private individuals.

But they have not been merely recipients of educational favors. In 1842, upon the knighting of one of their eminent men by the Queen, the Parsees celebrated the event by forming the Sir Jamshedji Jijibhoi Parsee Benevolent Institution, with an endowment of less than 40,000 rupees per annum, devoted to the support of schools and maintenance of poor and aged Parsees. This and other endowments have provided a complete system of schools, which furnishes an English education for practically the whole rising generation of Parsees, and many, continuing their studies in the technical schools of Bombay and in Europe, have attained distinction as teachers and professional men. The Parsee Girls' School Association has made generous provisions for female education. Gifts for education have been a part of a larger benevolence, and the Parsees have not only been eminent as money-makers, but as money-givers as well, and they have set a good example to Western donors in making it their habit to give during their lifetime, rather than by legacy. Bombay is so dotted with roads, bridges, wells and fountains, hospitals, asylums, and colleges given by them that the city itself may be said to be their monument. At the time of his death in 1859, Sir Jamshedji Jijibhoi bore the palm in the history of philanthropy, having given more than $1,000,000 to public charities, and he by no means stands alone as a princely Parsee giver. Their philanthropy has extended beyond their own people, and city, and country, as is evidenced in their assumption of the heavy tax imposed by the British-Government treasuries, and by their gifts to various funds in England and to the Sanitary Commission during the Civil War in the U.S. The Zoroastrian or Parsee religion is a monotheism, recognizing but one God, Ahura Mazda, or Ormuzd, the Creator, Ruler, and Preserver of the universe, without form and invisible, and to him all praise is to be given for all the good in this world and for all the blessings we enjoy. Under him are two spirits, Spento Mainyush (the creator spirit), and Angro Min-
a so much more promising field, little missionary work has been done among them. But their close and intelligent contact with the people and literature of Christendom has already modified their belief. With their readiness to profit by the adoption of foreign usages in the management of their own affairs, the hope is not groundless that they may yet, like their Magi of old, be drawn to Christ and prove a power in establishing His kingdom in the East.

Dosabhai Franji Karaka's History of the Parsees, 2 vols.

PARSONS, Justin Wright: Born at Westhampton, Mass., U. S. A., April 26, 1824; graduated at Williams College 1848; sailed April 24, 1850, as a missionary of the ABCFM, for Turkey. He was stationed at Nicemedia and Bardezag. For thirty years he labored with unflagging zeal, never so well contented as when upon tours among the hills and valleys of the district he traversed so often, that he might preach Christ to the villagers, who learned to love him and heed his teachings. Brave enough and cool enough to lead an army, he carried with him no weapon save the gospel of peace, and when he successfully disarmed, through a long series of years, all the opposition he met. He was on a missionary tour with Dudukian, a native Christian, when one evening in August, 1880, they camped for the night on the mountain side. During the night some nomad Turks chanced that way and shot the sleeping missionary and his companion for the sake of plundering their meager traveling kit. The outpouring of the whole population at the funeral bore witness to the power which the man's simple, devoted life had among the people.

PARSONS, Levi: Born at Goshen, Mass., July 18, 1792; graduated at Middlebury College 1814; sailed November 3, 1819, with Play Fisk as a missionary of the ABCFM. After spending some months in Smyrna and at the Greek College on the island of Scio in order to learn the modern Greek, Mr. Parsons with Mr. Fisk made a tour of exploration through the region of the “Seven Churches of Asia.” This was an experience of considerable danger at that time as well as of great interest. Leaving Mr. Fisk at Smyrna, Mr. Parsons went to Jerusalem in January, 1821, to prepare for its permanent occupation. He was the first Protestant missionary ever resident in Jerusalem with the intention of making it his field of labor. He had letters to prominent Greek ecclesiastics there and was cordially welcomed. But the outbreak of the Greek Revolution placed the Greeks of Syria in jeopardy of their lives, and Mr. Parsons was compelled to return to Smyrna, where in fact the danger from Turkish fanaticism was still greater. After Mr. Parsons and Mr. Fisk met again, the two went together to Egypt, hoping to reach the Gospel to the people living heedless in the land where it was first proclaimed.

PARUR: A town in Madras, British India, situated in the district of S. Arcot, about 32 miles S. W. of Madurantakam. Population, 5,000. Station of the PB, with (1900) 1 missionary and his wife.

PARVATIPUR: A town in Madras, India, situated 75 miles N. of Visagapatam. Popula-
PASHTU LANGUAGE: The language of some 5,000,000 people inhabiting Afghanistan and adjacent territory. It is also called the Afghan language by the Afghans. It belongs to the Iranian group of Aryan languages, and is written with Arabic letters modified by adding dots, as in Persian, and in a few cases in a fashion peculiar to Pashtu.

PASUMALAI: A town in Madras, India, 3 miles southwest of Madras City, on the railway to Tuticorin. Climate healthy; average annual temperature, 86° F.; rainfall, 35 inches. Station of the ABCFM (1845), with (1903) 2 missionaries, one with his wife; 36 native workers, 7 outstations, 1 place of worship, 9 Sunday schools, 6 day schools, 1 theological school, 1 dispensary, and 1,408 professed Christians.

PATPARA: A town in the Central Provinces of India, situated in the district of Mandla, 42 miles S. E. of Jabalpur. Station of the CMS (1887), with (1903) 1 missionary and his wife, 19 native workers, 2 places of worship, 6 day schools, 1 hospital, 1 orphanage, and 576 professed Christians, of whom 103 are communicants (including Marpha). Station also of the MLI (1895), with (1903) 1 leper asylum.

PATTERSON, Alexander: A native of Leith, Scotland; sent out by the Scottish Missionary Society to explore Tartary in 1802, accompanied by Henry Brunton. On arriving at St. Peters­burg he met so many discouragements that he felt inclined to turn back, when he unexpectedly found a friend in the lord of the emperor's bed­chamber, M. Novasilgoff. Passports were given him, and full liberty granted to travel through the empire, and select any place as a residence agreeable to him. The government also gave them a large grant of land, and permission to keep under their care and instruction any Tatar youths they might ransom from slavery until they were twenty-three years of age.

They chose a Mohammedan village called Karass, in the Nogal Steppe, as the place for the commencement of their mission. Both the missionaries studied the Turkish language. As soon as they began circulating some tracts they had written in the language great interest was excited, and discussions arose as to the merits of Christ and Mohammed, and many persons of rank became interested in the teachings of the Gospel.

In 1805 Mr. Patterson had the joy of seeing several of the ransomed youths embrace Chris­tianity and be baptized. They also went with him on his journeys, acting as interpreters. In 1810 the mission was making such progress among the people that the Mohammedan priests became alarmed, and aroused the bitterest oppo­sition. The Mohammedan tribes south of Karass were so zealous that they threatened to kill all who bore the Christian name. The Mohammedan schools were crowded with scholars, who were taught to read that they might defend the faith.

In 1813 the missionaries were obliged to move to the fortified town Georgievsk, about 30 miles from Karass, on account of the constant irruptions of hostile Turks. While here the translation and binding of the New Testament were finished. In 1814 the missionaries again went back to Karass. In 1816 Mr. Patterson took with him one of the ransomed slaves and made a tour through the Crimea, distributing tracts and Turkish Testaments. The journey almost cost him his life, but he felt amply repaid in the reception he met from all classes of people.

PATTERSON, John Coleridge: The missionary bishop and martyr of Melanesia, born London, England, April 2, 1827. His father was Sir John Patterson, a distinguished English judge, and his mother a niece of Samuel Taylor Cole­ridge, the poet. He was educated at Ottery St. Mary, Devonshire, 1835-37; at Exeter College, Oxford, graduating B.A., 1846. In 1840 he obtained a scholarship in Merton College. Through his schooldays he took high rank as a linguist. In 1852 he became a Fellow of Merton College. In 1853 he was curate of Angustain. In 1854 he was ordained. In 1858, March 26, he sailed with Bishop Selwyn to the Melanesian Islands, in the South Pacific. During the voy-
age he acquired the Maori language. For five years he was assistant to the bishop in conducting a training school for native assistants. In 1861 he was made bishop of the Melanesian Islands. He now reduced to writing several of the island languages, which before this had never been written. He also prepared grammars of these languages and translated portions of the New Testament into the Lifu language. His headquarters afterwards being appointed Bishop were at Motu, in the Northern New Hebrides, from which he made frequent excursions and voyages to the other islands of his diocese in the mission ship "Southern Cross," exerting himself in various ways for the good of the people. When the missionary ship, as it cruised among the islands, approached Nakapu Island, some of the islanders, mistaking it for a craft which had kidnapped some of the islanders, determined to avenge themselves. The bishop, unsuspicuous, lowered his boat, and went to meet them coming in their canoes. According to their custom, they asked him to get into one of their boats, which he did, and was taken to the shore. He was never seen alive again. Immediate search was made, and his body found, pierced with five wounds. In early life he was a leader in all athletic sports. The same elastic strength of body and skill in manipulation fitted him to be preacher, teacher, navigator, friend, and exemplar in the useful arts to the Melanesian tribes.

PAUL, Samuel: Born in 1843. Died in 1900. A native Christian of India. Educated at Palamcottam Preparandi Institution. Appointed by the CMS catechist at Ootacamund, and in 1874 he was ordained pastor of the Tamil local mission at the same place. He was the first to organize this mission, and after his faithful service at Ootacamund he was transferred to the Northern Pastorate, in the city of Madras, where he accomplished much for the development of the congregation at Black Town. Subsequently Sachiaparam, in the Tinevelli district, was his headquarters, and he was appointed vice-chairman of the native church council in Tinevelli, and chairman of two important church circles. Mr. Paul did a good work for Tamil Christian literature. He prepared for publication a large number of important works—manuals and translations—which have been widely read by Tamil Christians. The following works from his pen are worthy of special mention: Edited (in Tamil) History of the Church of England; History of the Book of Common Prayer; Geography of the Madras; "Zillah," Geography of the Nilgherries, and several translations from the Madras Tract Society and the Christian Vernacular Education Society. Chiefly for his literary work he was honored by the Government with the title of Rao Sahib ("Rao" is a Hindu title for a chief or prince). Mr. Paul left a deep impression for good upon his native land.

PAURI: A town in the United Provinces, India, situated in the district of Garhwal about 25 miles N. N. W. of Dwarkhat. Station of the ME, with (1903) 1 missionary and his wife, 1 woman missionary, 59 native workers, 7 places of worship, 12 day schools, 2 boarding schools, 1 orphanage, 35 Sunday schools, and 521 professed Christians, of whom 218 are communicants.

PAYNE, John: Born in 1814; appointed in 1836 by the Protestant Episcopal Missionary Society in the United States as missionary to Africa, and sailed May, 1837, reaching Cape Palmas, Liberia, on the 4th of July following. He was consecrated missionary bishop July 11, 1851. During thirty-four years he was a faithful and laborious worker, both as a missionary and bishop, in one of the most unhealthy portions of the globe, until the strain of it left him a mere wreck of a man. He resigned his office in 1871, and died at Oak Grove, Westmoreland Co., Va., October 23, 1874, aged 60.

PEA RADJA: A settlement in Sumatra, Dutch E. Indies, situated in the Siilindung Valley, about 25 miles N. E. of Siboga. It is the central point of the Rhenish mission in the Siilindung region, with (1903) 6 missionaries and their wives, 4 women missionaries, 50 native workers, 8 outstations, 8 Sunday schools, 11 day schools, 1 dispensary, 1 hospital, and 8,046 professed Christians, of whom 3,701 are communicants.

PEDDAPUR: A town of Madras, India, in the district of Godavari, 87 miles W. S. W. of Vizagapatam. Population, 39,708. Speaking the Telugu language, which before this had never been reduced to writing by missionaries, and for this reason invaluable. Station of the BOQ (1891), with 1 missionary and his wife, 1 woman missionary, 24 native workers, 7 outstations, 7 places of worship, 11 Sunday schools, 8 day schools, 7 places of worship, and 320 professed Christians. Some write the name Peddapur.

PEDDIE: A town in Cape Colony, Africa, situated 25 miles S. W. of King William's Town. Station of the SPG, with 1 missionary and 236 professed Christians. Station also of the South Africa Wesleyan Methodists, with 1 missionary, 45 native workers, 20 outstations, 6 places of worship, 6 Sunday schools, 4 day schools, and 391 professed Christians. Station also of the Women's Society of the same church, with 1 woman missionary and 1 boarding school. Some use the name Fort Peddie.

PEDI LANGUAGE: One of the Bantu family of African languages, spoken by a number, not yet known, of tribes inhabiting, for the most part, the Transvaal Colony in South Africa. It has been reduced to writing by missionaries, and for this purpose the Roman alphabet has been used.

PEGU: A town in Burma, British India; the former capital of the kingdom of Pegu, 40 miles northeast of Rangoon, on the railroad to Mandalay. The inhabitants are largely Talings and Peguans. Station of the ABMU (1887), with (1903) 2 women missionaries, 13 native workers, 6 outstations, 5 places of worship, 2 Sunday schools, 3 day schools, and 275 professed Christians. Station also of the ME, with (1903) 1 missionary and his wife, 6 native workers, 5 Sunday schools, 1 day school, and 157 professed Christians, of whom 39 are communicants.

PEI-KAN: A town in the province of Kiang-si, China, situated 56 miles E. of Nan-chang-fu. Station of the CIM (1893), with (1903) 2 women missionaries, 3 native workers, 2 outstations, 4 places of worship, and 25 professed Christians. Some write the name Peh-kan.

PEKING: Capital of the Chinese Empire, situated on a plain about 12 miles southwest of the Pei-ho, in latitude 39° 54' 36" north, longitude 116° 27' east. Its name means Northern Capital, in opposition to Nanking, which was the capital for a time. It became the seat of government under Kublai Khan in 1264, and has continued to be the capital ever since, except during the years when the emperors held their court...
at Nanking. The city is divided into two parts, each surrounded by a wall. The inner or Manchu city, where are the palace, government buildings, and barracks, is surrounded by a wall of an average height of 50 feet and a circumference of 14 miles. Adjoining this at the south is the outer or Chinese city, whose walls are one of the finest in the world, being 15 feet broad at the top and 30 feet at the ground, pierced with 16 gates, each one surrounded with a many-storied tower 100 feet high, with embrasures for cannon. Within both walls is enclosed about 26 square miles, and the great size of Peking, with the numerous public buildings, the palaces, pagodas, temples, broad avenues, lofty gates and massive wall, has challenged the wonder of all visitors since the stories of Marco Polo gave him an unjust reputation as a second Munchausen. Within the Manchu city a smaller excursion of three miles in circuit, surrounds the "Forbidden City," containing the palaces of the emperor and his consort. The age of the city is not definitely known. It has been built and rebuilt many times, and now is not at the zenith of its magnificence, which it attained at the time of the emperor Kanghi. Its triple, dome-shaped roofs towered 100 feet in the air, surrounded the "Forbidden City," containing the palaces of the emperor and his consort. The age of the city is not definitely known. It has been built and rebuilt many times, and now is not at the zenith of its magnificence, which it attained at the time of the emperor Kanghi. with (1903) 1 missionary and his wife, 1 woman missionary, 3 native workers, 1 outstation, 1 place of worship, 2 day schools, 1 boarding school, 1 dispensary, and 41 professed Christians, of whom 24 are communicants.

PENANG, or PRINCE OF WALES ISLAND: An island lying at the north entrance of the Straits of Malacca, and one of the Straits Settlements belonging to England. It contains 106 square miles, reaches an altitude, in the hilly district, of 2,922 feet, and has a rich, fertile soil, where tropical fruits and spices are cultivated. The climate is healthy, and rain falls every month in the year. Georgetown, the capital, is at the northeastern end of the island. Population, including Province Wellesley and the Dindings (1901), 248,207, of whom 140,102 are Chinese, Malays, Malacca, and one of the Straits Settlements Principalities.

PERAK: A protected British state in the Malay Peninsula, lying S. of Siamese Kedah and Province of Wellesley, and N. of Selangor. In 1890 it was ceded to Great Britain, and is now a part of the Federated Malay States.

PERAK ROAD: A railroad station in the Central Provinces of India, situated about 60 miles N. W. of Bilaspur. Station of the CWBM (1901), with 1 missionary and his wife.

PERAK: A protected British state in the Malay Peninsula, lying S. of Siamese Kedah and Province of Wellesley, and N. of Selangor. In Perak is a station of the PB, with 2 missionaries and their wives and 1 woman missionary. There is a station also of the SPG (1871), with 5 native workers, 2 places of worship, 2 day schools, and 143 professed Christians. Station also of the HFBS has an agent residing here.

PENDRA ROAD: A railroad station in the Central Provinces of India, situated about 60 miles N. W. of Bilaspur. Station of the CWBM (1901), with 1 missionary and his wife.

PERAK: A protected British state in the Malay Peninsula, lying S. of Siamese Kedah and Province of Wellesley, and N. of Selangor. In Perak is a station of the PB, with 2 missionaries and their wives and 1 woman missionary. There is a station also of the SPG (1871), with 5 native workers, 2 places of worship, 2 day schools, and 143 professed Christians. Station also of the HFBS has an agent residing here.

PERIAGULAM: A municipality in Madras, India, situated 44 miles W. N. W. of Madura. Population, 16,400, of whom 14,000 are Hindus. Station of the ABCFM (1856), with 1 missionary and his wife, 52 native workers, 42 outstations, 34 places of worship, 29 Sunday schools, 23 day schools, and 996 professed Christians.

PERIE: A village in Cape Colony, South Africa, situated 15 miles N. W. of King William's Town, in a well-timbered region. Station of the PBS, with 1 missionary and his wife, 23 native workers, 9 outstations, 1 place of worship, 9 day schools, and 737 professed Christians. Some write the name Pire.

PERKINS, Justin: Born at West Springfield, Mass., March 12, 1805; graduated at Amherst College, 1829; studied theology at Andover; embarked September 21, 1833, as a missionary of the ABCFM, and one of the founders of the Nestorian Mission at Urmia, Persia. Schools established by Dr. Perkins and Dr. Grant are now flourishing seminaries. Dr. Perkins translated the Scriptures and several religious books into Syriac. He visited the United States in 1842, accompanied by the Nestorian bishop, Mar Yohannan, whose presence and addresses awakened a deep interest in the mission. Returning to Persia in 1843, he labored successfully at his post, and ably defended Protestantism against misrepresentation and persecution. In 1869 impaired health compelled him to relinquish the work, in which he had been engaged for thirty-six years. He died at Chiopee, Mass., in the same year.

PERNAMBUCO: A city and seaport on the N. E. coast of Brazil, S. America, situated at the mouth of the Beberibe and Capibaribe. It is the greatest sugar mart in the country. The business houses of the city are chiefly built on a low, sandy peninsula called Recife, and the city is often spoken of as "Recife" for this reason. The central part of the city stands on the island of S. Antonio, while the finer residential districts are at Bôa Vista, on the mainland. Formerly the city was very dirty and suffered from a lack of water. This has now been changed to a great extent, as prosperity has brought wealth and attracted Europeans as residents. The population (1890) is 111,555, composed of very mixed elements. Station of the FS (1873), with 1 missionary and his wife, 2 places of worship, 1 theological class, 1 dispensary, 18 outstations, and 576 professed Christians.

PERSIA: The modern kingdom of Persia, called by the natives Iran, occupies, roughly speaking, that part of Western Asia lying between the Caspian Sea and Persic Gulf on the south, Afghanistan and Baluchistan on the east and Turkey on the west. Its exact boundaries have not as yet been definitely located, but starting from Mount Ararat at the northwest, the river Aras forms the greater part of its boundary line between that part of Russia lying west of the Caspian Sea, tho there is a small strip of country extending south of the river Aras along the Caspian Sea which does not belong to Persia. East of the Caspian, Russian Turkestan bounds it on the north, tho the exact limits of Persian territory have not been accurately settled, Russian authorities claiming more than is allowed by other European powers. On the east the boundary lines between Afghanistan and Baluchistan have been determined by British commissioners at different times, although some parts of it are still disputed. Its southern and southwestern boundary is the coast-line of the Arabian Sea and the Persian Gulf. Its western boundary from Mount Ararat in a general southwesterly direction to the Persian Gulf is the disputed Persian-Turkish frontier, for the settlement of which a mixed commission, appointed in 1845, labored for 25 years, with the result that the disputed territory has been defined rather than the exact boundaries delimited.

Persia extends for about 700 miles from north to south, and 900 miles from east to west, and includes an area estimated at 628,000 square miles. The greater part of this region is an elevated plateau, almost a perfect tableland in the center and on the east, but cut up by mountain chains on the north, the northeast, and the south. More than three-fourths of its entire surface is desert land, but many of the valleys between the high mountain ranges are wonderfully fertile and exceedingly beautiful. Rare flowers, luscious fruits, valuable timber, and mountain brooks and torrents make the land a
scene of picturesque beauty which is celebrated in history and song, and indissolubly connected with the ideas of Persia. With such a diversity of physical characteristics there is of necessity a diversity of climate. On the plateau the climate varies at the several seasons, but the summer heat is intense, while the winters are mild, and heavy and frequent rainfalls make the low country marshy and unhealthy. In the southern provinces, the heat in autumn is excessive, winter and spring are delightful; and summer, tho hot, is not unpleasant, since the atmosphere of Persia in general is remarkable for its dryness and purity.

The population of Persia is about 9,000,000. The majority are engaged mainly in agriculture, and the heat in the world, together with other cereals, is raised, and cotton, sugar, rice, and tobacco are produced in the southern provinces. The wandering tribes dwell in tents, and move about with their flocks and herds as the seasons succeed each other, spending the spring and summer on the mountain slopes, the winter on the plains. The two principal races are the Turks and the Persians. There are also Arabs, Kurds, Leks, and Baluchis.

The principal cities of Persia, with their population, are: Teheran, 250,000; Tabriz, 150,000; Isphahan and Meshed, each with 80,000; Kerman and Yezd, each with 60,000. It is estimated that 8,000,000 of the population belong to the Shi'ah faith, 750,000 are Sunnis, 10,500 Parsees, 20,000 Jews, 53,000 Armenians, and 30,000 Nestorians.

The government of Persia is similar to that of Turkey. It is a kingdom whose king is called the Shah. He is the absolute ruler and the master of the lives and goods of all his subjects; but the power is absolute, he must not act contrary to the accepted doctrines of the Mohammedan religion as laid down by the prophet and interpreted by the highpriesthood. The laws are based on the precepts of the Koran, and the Shah is regarded as vicegerent of the prophet. A ministry, divided into several departments, after the European fashion, assists him in the executive department of the government. A governor-general is appointed over each one of the 27 provinces, who is directly responsible to the central government. The nomad tribes are ruled over by their chiefs, who are responsible to the governors.

The only instruction of the bulk of the population is from the teachings of the Koran, but there are a great number of so-called colleges supported by public funds, where students are instructed not only in religion, and Persian and Arabic literature, but also in scientific knowledge.

History: It is not the province of this article to give any sketch of the history of the country of Persia, but the following dates of the principal epochs in its history may be of service. From the earliest records, dating back to about 2,000 B.C., the first rulers of Persia were the Medes, who conquered Babylonia and established a Medo-Persian empire, which lasted, under the rule of famous kings—Cyrus, Cambyses, Darius, Xerxes, and Artaxerxes—until the conquest by Alexander the Great, 331 B.C., when the Greek and Pnthian Empire was established, which ended about the middle of the 2d century. The Sassanian Empire, from the beginning of the 3d century lasted until about the end of the 7th century, when the Moslem domination commenced, and gradually grew in extent and influence. Mohammedanism completely captured the life and permeated the thought of the people to the very core. Persia was at times a province, and the center of the Arabian Empire, under successive rulers of Arab, Turk, or Mongol origin. The sway of the Timurides and Turkmans lasted from 1405 to 1499. From 1499 to 1726 the Sufi or Safavi dynasty ruled the country. Its founder was Ismail Sufi. With the accession of Nadir Shah, 1736, the last native Persian dynasty passed away. At the death of Nadir Shah in 1747 a period of anarchy, followed by short reigns of various despots, ensued, until in 1794 Agha Mohammed ascended the throne—the first of the reigning dynasty of the Kajars. The present Shah, Mozaffar-ed-din, succeeded his father in 1896.

Missions in Persia: When the religion of Christ was accepted by Constantine (312) it was stigmatized by the rival empire of the East as the religion of the Romans. Religious zeal and persecution, with an open door and many adversities continued in Persia for a century after they had ceased in the Roman Empire. The sufferings of Christians under Shapur II., the Sassanian, were as terrible as any experienced under Diocletian.

In the face of these obstacles it is clear that the Christian faith had a harder mission field in Asia than in Europe. The 3d century saw Christian missions there advancing generally in peace. The 4th century was full of conflict and persecution, with an open door and many adversaries. The pious and zealous monks of Egypt and Syria were the leading missionaries, and their labors are still attested by the many churches that bear their names in Mesopotamia and among the Nestorians. The Armenians were largely converted, and the Georgians. In this century also strong heretical sects took shape, that have left relics to the present day.

In the 5th century the bitter controversies within the church resulted in the separation of the Eastern Christians from the West. The Nestorian controversy at the Council of Ephesus (431) resulted in a schism which was carried thence to Edessa, and thence to Persia. The separation of the main body of Christians under the Persian rule was completed in a council held at Seleucia 499. There were political reasons for this separation as well as theological. It gave satisfaction to the Persian Government to have its Christian subjects break their connection entirely with the Romans, and thus it gave rest from persecution. In the 6th and 7th centuries there was much missionary activity by the Persian Church.

Under the Caliphs: 641-1258. The dominant religion of Persia from the primeval days had been the faith of Zoroaster. Christianity failed to overthrow it. To this mighty religion, which once seemed likely to supersede all others and be proclaimed in the edicts of the great king over Europe as well as Asia, the fatal blow came suddenly, and from a quarter least expected. The Persian Emperor received a letter one day
from "the camel-driver of Mecca," bidding him abandon the faith of his ancestors and confess that "there is no God but God, and Mohammed is the prophet of God." The indignant monarch tore the letter to pieces, and drove the camel-drivers who brought it from his presence. But before ten years had passed the Arab hordes had driven the Persians from their homesteads. Persia, defeated in two decisive battles, reluctantly gave up the contest. The whole system fell with a crash, and the only remnants left to perpetuate its rites are some 5,000 souls in Yeard, a city of Persia, and 100,000 Parsees in Bombay.

The faith of Mohammed from that day to this has ruled in Persia. The Persian is the only Aryan race that accepted Islam.

Under the Mogul Tartars: 1258-1430. The Moguls arose in Chinese Tartary. The last of the Persian Christian kings—Christian in name, doubtless, more than in reality—was slain by Genghis Khan about 1202. Genghis had a Christian wife, the daughter of this king, and he was tolerant toward the Christian faith. In fact, the Mogul conquerors were without much religious prejudice toward Christianity. The wave of carnage and conquest swept westward and covered Persia, and overwhelmed the Caliph of Bagdad in 1258. This change was for a time favorable to the Christians, as the rulers openly declared themselves Christians, or were partial to Christianity. The patriarch of the Nestorians was chosen from people of the same speech and race as the conquerors—a native of Western China. He ruled the church through a stormy period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging in the period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging...
other treatises on the controversy with Islam were published in India andPersia; a great deal secretly in Persia to direct the thousands whose faith in their religion is shaken. The same works, perhaps unwisely published in Turkey before Dr. Hager's death, led to severe persecution, and to a strict suppression of all books aimed at the system of Islam. But these books still live, and have their work to do, for they are exhaustive and unanswerable. The latter fact was due to the decision of the ABCFM to send men in 1830 to examine the condition of the Nestorian Church, described by Dr. Wolf. As a result the ABCFM determined to establish a mission to the Nestorians. Rev. Justin Perkins and his wife embarked in the fall of 1833. They reached Tabriz about a year later, and in the summer of 1835 were joined by Dr. and Mrs. Grant. This little company of two missionaries and their wives arrived at Qara-Kum on the river Zeravshan. Their peaceful reception by the Nestorians was followed by their wholehearted cooperation with the missionaries. The work of the mission was so successful that the ABCFM in 1834 sent out the Rev. J. L. Merrick, who had specially prepared himself to explore the Mohammedan field of Persia and Central Asia. He continued a missionary till 1845. He traveled extensively in company with Mr. Haas, and both came near losing their lives in an encounter with the Mollahs in Isphahan. Mr. Merrick's labors resulted only in teaching some Persian youths the English language and science, and in translating the Shi'ite traditional Life of Mohammed. It became evident that evidence had not yet opened the way to labor directly for the Mohammedans.

The roll of this mission counts fifty-two missionaries, men and women, sent out previous to 1877. Time would fail to tell of all these. The pioneers, Messrs. Perkins and Grant, were enthusiastic and apostolic men. One of them, Dr. Grant, finished his career in 1845. Thousands in America and England became familiar with his work through his letters and his book on the Mountain Nestorians, as far as they were known by a colleague in the mountain work, Dr. Laurie. His grave is by the shores of the Tigris, while the account of his labors has passed into the annals of the Church's heroes.

Justin Perkins, D.D., was spared to labor for more than thirty years, dying on the last day of 1869. His eminent services were seen in pioneer work, and in making known the Nestorians. In his later days he was a real patriarch, with all the venerable bearing and deep piety of the best fathers of old.

The force of missionaries was steadily increased from time to time by the arrival of other men. The work of the ABCFM was almost entirely for the Nestorians, numbering about 100,000 souls, partly in Persia and partly in Kurdistan, under the care of missionaries and a band of fifty native pastors and evangelists, a band of over eighty schools and congregations. The results were great in numbers, and greater in their bearing upon the future.

The Presbyterian Board, 1871 to this day: By the union of the two great branches of the Presbyterian Church in 1870, the New School body ceased its support of the ABCFM, and claimed a portion of the system of a mission to the Nestorians. “The Mission to the Nestorians” was transferred to the care of the Presbyterian Board in 1871. The work has since been widely extended into Eastern Persia and to reach Armenians, Kurds, and to some extent Persian Mohammedans. On the other hand, the work among the Nestorians has been profoundly affected by the entrance of Russian missionaries, who have won a large proportion of the Nestorian Church to rejoin the Eastern Church from which their fathers seceded fifteen hundred years ago. A notable event was the celebration of the jubilee of this work in 1886, followed by prevailing revivals in many of the congregations. The hope of the work is in the gift of the Holy Spirit in its convincing and renewing power.

The Mission to the Nestorians (the word Archbishop referring to the Archbishop of Canterbury, in England) is another enterprise of a missionary character. No time need here be spent upon it, however, since it has been sufficiently described in another place. The Mission of the CMS. In 1834 the CMS, with the Rev. R. Bruce, of the CMS, on his way back to India visited Persia. He found the Muslims of Isphahan so friendly, and the Armenians so anxious to learn of the Christianity of the West, that he delayed to leave. His stay was prolonged year after year. Dr. Bruce opened the way. Meanwhile the ABCFM in 1835 decided to assume these enterprises and prosecute the work so incidentally begun. Three other stations have been occupied, and medical missions and Zenana missions have been undertaken. Moreover, God has given His blessing to this new enterprise in Persia. The following societies are now at work in Persia: The Presbyterian Board, North; the Archbishop's Mission to the Assyrian Christians; the London Society for Promoting Christianity amongst the Jews; the Church Missionary Society, and the Bible societies. Educational work has received prominence from the beginning of modern missions in Persia, and the work of medical missionaries has been highly appreciated by the Persians. The great need of Persia was suggested by Lord Curzon in 1892: “Those philosophers are right who argue that moral must precede material and internal reform in Persia. It is useless to graft new shoots on to a stem whose sap is exhausted or poisoned. We may give Persia roads and railroads; we may work her mines and exploit her resources; we may drill her army and clothe her artisans; but we shall not have brought her within the pale of civilized nations until we have got at the core of the people, and given a new and a radical twist to the national charactcers. This need can only be met by divine message, borne to Persia by the missionary of the cross.
PERSIAN LANGUAGE: The Persian is one of the Indo-Germanic family of Aryan languages, of sufficient importance in itself to be sometimes called the Western Aryan. It is called Irani in Persian and in the West of Asia it is known as Parsi. This latter name is identical with the well-known name Parsee for Persia, the people of Western Asia often using "p" where their eastern neighbors use "f." The ancient sources of the Persian as it exists to-day are the Zend, which is very near to the Sanskrit; the Ancient Persian, of which few literary remains exist, some of these being found in the book of Damel, but which is still near to the Sanskrit in many particulars, and the Pehlevi, or Sassanian of the first seven centuries of our era. The latter has a considerable number of Chaldean words, and differs materially from the Zend in having few inflections and terminations in comparison with the older language. A later dialect of the Pehlevi shows a distinct purpose to avoid the use of other than true Persian words and to return to the Ancient Persian forms. The modern Persian is very simple in its grammar. In fact, it is often said to have no grammar worth disturbing oneself about. It has no gender of noun, adjective or pronoun, except by use of a special word to show sex. Its case declensions are few, its plural is regularly formed in every case, one of the two pluralizing terminations being used for animate and the other for inanimate objects. In the verb great use is made of auxiliary combinations. At the same time, and perhaps because of this, the language has a wonderful fulness and flexibility. No other Asiatic language compares with it in elegance and in theondrous sweetness of its tones.

Persian is widely cultivated throughout Asia for its literary qualities and its literature. Whether in the East or the West, in India or in Turkey, the educated man most as a matter of course know Persian. At the same time, since the Mohammedan era it has lost much of its purity through adoption of numbers of Arabic words which are not always naturalized—that is, are not always subjected to Persian rules of inflection and construction. In the earlier periods of Persian writing the cuneiform characters were used as well as letters derived perhaps from the Syriac. At present the Arabic alphabet is universally used for writing Persian. Additional dots supplied to Arabic letters furnish the sound which Arabs do not use, and the Persian taste gives an angle to the letters which neither Arabs nor Turks permit, but aside from these peculiarities the Arabic letters are unchanged.

The Persian has been used to some small degree for missionary purposes. Its territorial expansion suggests the wisdom of making greater use of it for Christian publications. Such use cannot avail, however, unless the writer is a master of Persian in every sense.

PERU: A republic of South America, which lies between the Pacific Ocean on the west and Brazil and Bolivia on the east, Ecuador on the north, and Chile on the south. It contains three distinctive physical divisions—the coast region, the region of the Andes, and the tropical forests within the valley of the Amazon. Its area is 695,753 square miles, divided into eighteen departments and two provinces (Choles and Zambos). Every variety of climate is found in Peru, on account of the difference in elevation in various parts. The population in 1876, when the last census was taken, was 2,660,381. The Geographical Society made an estimate of the population in 1896, which showed the total number of inhabitants as 4,600,000, besides an unknown number of uncivilized Indians. In the census of 1876 the population was composed of 41,631 whites, 1 per cent. American, 59 per cent. mestizos, 58 per cent.; 26 per cent. mixed blood, and 2 per cent. Asians. The chief cities are Lima, the capital (100,000), Callao (16,000), Arequipa (35,000), and Cuzco (20,000). The total working length of railways (1902) is 1,025 miles, with about 45 miles in construction. There is also a steamboat service on Lake Titicaca. Roads are poor and few. The constitution, proclaimed in 1838 and revised 1880, provides that a president and a congress of two houses shall be elected every four years. The constitution prohibits the public exercise of any other religion than the Roman Catholic, tho in reality there is a certain amount of tolerance, since Anglican churches and Jewish synagogues are found in Callao and Lima. Education is compulsory, and is free in the municipal public schools.

The American Bible Society through its colporteurs prosecutes the only Protestant work so far in Peru, by distributing the Bible translated into Spanish. The principal agent of the Bible Society is an Italian minister, who has been holding church services in Callao, where he gathered a congregation of over a hundred, to whom he preached in Spanish. His success in making converts roused the opposition of the priests, who viewed with unconcern the services in English, but saw that preaching in Spanish was likely to prove a potent means of enlightening the people, and on the 25th of June, 1890, Mr. Pennotti, the minister, was arrested and put in prison, charged with violating the law. He having been acquitted, his persecutors appealed, and finally carried the case to the Supreme Court. They thus obtained an interpretation of the law in favor of Mr. Pennotti, and general religious liberty, altho they had hoped for something quite different. Again, in 1895, the Roman Catholic clergy tried to prevent Bible circulation, and the result was a decree from the Government under which the circulation of the Bible is freely allowed. The constitution prohibits the public exercise of any religion but Roman Catholicism. But in fact there is a certain amount of tolerance, and the ME, the RBMU and the Independent Baptist Missionary movement have 6 stations, with both chapels and schools, in Peru.

Markham (C. R.), Peru, London, 1880; Adams (W. H. D.), The Land of the Incas, London and Boston, 1883 and 1885; Squier (E. G.), Peru, New York, 1877.

PESHAWAR: A town and British military post in the Northwestern Frontier Province of India, and capital of a district of the same name which was formerly a part of Afghanistan. It is situated about 88 miles W. N. W. of the great British fortress of Rawal Pindi, and 18 miles from the east entrance to the celebrated Khafiar Pass on the road to Cabul. Under British soil the prosperity of the town is reviving and the appearance of the suburbs is much improved. The town itself has small architectural pretensions, the houses being generally built of mud bricks, held together by a frame of wood. Except the main narrow thoroughfare (Chowk) and two market squares (Chowk and Zambos). Sanitary arrangements are good, and water plenty. The fruit gardens of the environs are a favorite pleasure-ground of the people. Alth-
tude, 1,180 feet. Population (1901) 95,147, of whom 70,000 are Mohammedans, 17,500 Hindus, and 5,500 Sikhs. Station of the CEZ (1882), with (1903) 5 women missionaries, 12 native workers, 3 day schools, 1 boarding school, 2 dispensaries, 1 hospital, and 15 Zenana pupils. Station also of the CMS (1885), with (1903) 4 missionaries, two of them with their wives; 4 native workers, 2 outstations, 2 day schools, 1 boarding school, 4 dispensary, 1 hospital, and 94 professing Christians, of whom 70 are communicants. Station also of the WMS, with (1903) 1 missionary, 3 native workers, 4 places of worship, 1 Sunday school, and 57 professed Christians.

**PETCHABUREE:** A town in Siam, on the west side of the Gulf of Siam, 55 miles southwest of Bangkok, with which it is connected by railroad. Has 10,000 inhabitants. Station of the PN (1861), with (1903) 3 missionaries and their wives, 1 woman missionary, 5 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 1 day school, 1 dispensary, 1 hospital, and 97 professed Christians.

**PETROPOULOS:** A town in Cape Colony, South Africa, 6 miles S. S. W. of King William's Town. Station of the Berlin Missionary Society (1856), with (1903) 2 missionaries, 1 woman missionary, 9 native workers, and 478 professing Christians, of whom 125 are communicants (including Emidigoni in these statistics).

**PETROPOLIS:** A German colony in Brazil; South America, 28 miles N. of Rio de Janeiro. It is the summer residence of the rich inhabitants of the city. Station of the MES (1895), with (1903) 3 women missionaries, 49 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 3 kindergartens, and 106 professed Christians.

**PFANDER, Karl Gottlieb:** Born, 1803; died, 1865. Prepared for his missionary work at the Training Institution, Basel, from 1820 to 1825. Pfander, who had a gift for languages, was desired by the Basel Committees for Asia, and particularly for the translation of the Bible into Asiatic languages. He was first sent with Zarembo, the former Russian count, also a graduate of the Basel Institute, to the Armenians living in the vicinity of Shusha, in the region near the Caspian Sea, which is now known as the Russian province of Transcaucasia. He and his associates were, soon after their arrival, in danger of death by starvation, for the Prince of Persia besieged Shusha for forty days, in 1826. The Shusha Mission was intended to be a work among the Mohammedan population, but its influence was felt among many Eastern Christians. Pfander, only 22 years old, had now to learn three languages: Turkish, Armenian, and Persian. The Turkish had not been provided with grammar and vocabulary till the missionaries used it. The Persian was necessary, that he might be able to cope with learned Muslims. Pfander also studied the tone of the Mohammedan thought, by frequently conversing with the people, and studying their books, especially the Koran. The greatness of the problem of Shusha he wrote three books, which treated of sin, redemption, the divinity of Christ, the Trinity, and the inspiration of the Scriptures. These were designed to remove stumbling blocks from the way of the Mohammedans—and, in India, they proved to be a power for good.

Before leaving Shusha he wrote a little book for distribution among them, and it was blessed mightily by God. In 1829 he decided to go to Baghdad to learn Arabic, and when the danger of his journey were brought to his attention, he wrote:

"I have no care for my life; it will be preserved as long as it is needed for the service of the Almighty." He left Baghdad after heroic work, to visit Persia, and in 1831 we find him in Ispahan. His book, written in German, had been, with the help of the natives, translated in Armenian, Turkish, and Persian, and one of his objects in the present journey was to make the Persian edition more correct. He joined a caravan, wore native dress, and on his journey he spoke to Tatars and Kurds of the Christian religion, and distributed tracts and Persian New Testaments.

He favorably impressed Catholic and Armenian Christians, and the Syrian archbishop asked for and received a number of Syrian and Arabic tracts. He distributed the Scriptures, preached the word, and had the joy of seeing souls saved by the grace of God. From Shusha he visited and labored in the neighboring towns of Shamakhi and Baku, and for eight years, having been a pilgrim in missionary work among many peoples, he visited Europe, where he spent a year. In 1835 he and his companions were bidden by the Russian Government to cease at once and forever from all missionary work in the country, and from March to September, Pfander and Kreiss were engaged in a journey of exploration through Asia Minor to Constantinople. Soon afterward they both received appointments under the CMS, started for India by the way of Persia and the Persian Gulf, and after thirteen months they reached Calcutta.
Peshawar, and during this terrible uprising he showed the firmest faith and the highest courage. The Mutiny over, he visited Europe, and in 1858 he was sent to Constantinople, accompanied by Dr. Koelle. Here, as elsewhere, his tongue and pen were mighty forces in the proclamation of the truth. This gifted missionary, Bible-writer, and linguist left a permanent impression upon each of the peoples among whom he labored, while his books struck Mohammedanism in its weakest point, and still exercise a powerful influence in India, in Persia, and in Turkey and Egypt.

PHALANE: A settlement in the Transvaal, South Africa, situated about 48 miles N. W. of Pretoria. Station of the Hermannsburg Missionary Society (1867), with (1901) 1 missionary and his wife, 4 native workers, 1 station, 2 day schools, and 651 professed Christians.

PHALAPYE. See Serowe.

PHILIP, John: Born in England; studied at Hoxton Academy; was appointed as a deputation missionary. Rev. John Campbell to visit the stations of the LMS in South Africa; sailed December 10, 1818, reaching Cape Town February 26, 1819. Accompanied by Mr. Moffat and Mr. Evans, the deputation visited the stations within the colony, but were prevented by the Kaffir war from proceeding beyond. In 1820 Mr. Philip returned to Cape Town. In 1820 he received from Princeton College, New Jersey, U. S. A., the degree of Doctor of Divinity. The Deputation having completed their work, Dr. Philip was appointed superintendent of the Society's missions in South Africa. He was also pastor of an English congregation at Cape Town. In 1826 he visited England by invitation of the directors, his place as superintendent being supplied by Rev. P. E. Miles. He earnestly championed the rights of the Hottentots as against greedy and unprincipled settlers, and secured certain regulations which ameliorated their civil status. On his return to South Africa he was sued for libel and made to pay a fine of £1,200. Dr. Philip died at Hankey, South Africa, August 27, 1851. His Researches in South Africa were published in 2 vols. in London, 1828.

PHILIPPOPOLIS: A city in Eastern Rumelia, Bulgaria. It is the most important city of the southern province. Population (1900), 42,849. The city stands upon and between three isolated syenitic rocks (the highest 695 feet) on the right bank of the Maritsa, 97 miles N. N. W. of Adrianople. It was founded 340 b.c. by Philip II. of Macedon. Station of the ABCFM (1859), with (1903) 2 missionaries and their wives, 27 native workers, 17 outstations, 12 places of worship, 17 Sunday schools, 8 day schools, 1 printing house, and 472 professed Christians.

PHILLIPS, Jeremiah: Born at Plainfield, N. Y., January 5, 1812; attended Madison (now Colgate) University, but did not complete his course of study, the Committee of the Missionary Society desiring that he should accompany Dr. Sutton on his return to India. He was ordained at Plainfield, and embarked for Calcutta in company with Dr. E. Noyes, September 22, 1836, under the Presbyterian Missionary Society. His field of labor was Orissa, a region of country hitherto wholly untouched by missionary effort, which was occupied in 1836. Balasar was first occupied in 1840 and a boarding school opened, with six native children. The same year Mr. Phillips commenced a new station at Jaleswar with some of the Balasar boarding scholars and native converts. He was the first to discover the Santals, a race of aborigines previously unknown to missionaries. He reduced their wild language to writing, prepared and published a grammar and dictionary, and established schools among them—for the first time in their existence, so far as known. As a result of his correspondence and published articles in the papers of India and America, seven missions have been established, and are successfully working among them. He translated the Gospels and other portions of the Bible into their language, and also prepared school-books. The degree of doctor of divinity was conferred upon him by Bates College, Maine. The India Government officially thanked Dr. Phillips for his great work among the Santals. He died at Hillsdale, Mich., December 9, 1879, having served 43 years in India.

PHILIPPINE ISLANDS: A group of islands lying in the Western Pacific Ocean, and extending almost due N. and S. from Formosa to Borneo and the Moluccas, through 19° 47 of longitude. The group contains nearly 2,000 islands, some of which are mere islets. The largest islands are Luzon, with a population of 3,500,000; Panay, 735,000; Negros, 391,777; Cebu, 504,000; Samar, 260,753; Leyte, 270,491; Mindoro, 200,000; Mindanao, 600,000. The whole area of the group is estimated at 122,000 square miles, and the population is about 8,000,000. The climate of the islands is varied, according to position and altitude. In general it may be described as hot, tempered somewhat by ocean breezes, but very moist and more than ordinarily trying to American residents. One of our people going to the islands in perfect health and remaining two or three years without taking regular change of air in the mountains, will find his general health seriously affected. Vegetation is luxurious and on the whole offers the people an easy support.

The majority of the inhabitants are of the Malay stock, now very much mixed. There are about 25,000 Europeans in the islands, including 10,000 Chinese, in whose hands are the principal industries, and a considerable number, not yet ascertained, of wild tribes, some of whom seem to be Negrito dwarfs. The languages of the people are numerous. Spanish has been the official language and is used by educated Filipinos, but has not at all displaced the native languages in the households of the people. It will now be quickly replaced by English. The chief of the forty or fifty native languages spoken in the islands are the Tagalog, the Pampangan, the Pangasinan, the Visayan, in two main dialects, the Ciganan and the Zambales, besides the Moro dialects of the south, which have taken up a certain number of Arabic words.

The Philippines were discovered and conquered by the Spaniards in the 16th century. Having received a certain amount of advantage from Spanish control and tutelage during 350 years, and having been ceded to the United States by the treaty of peace signed December 10, 1898, the work of converting the American influence will be more beneficent and stimulating than the Spanish. With the exception of the southern portion of Mindanao and the Sulu archipelago, inhabited by Mohammedan Malays,
whom the Spaniards called Moros (Mohammedans or Moors), the islands are under civil government, with practical autonomy in the municipalities, and with 39 provinces, each under a governor elected by the people through their municipal councils. The law-making power rests with a commission at Manila under a Governor appointed and supervised by the President of the United States.

The religion of the Philippines, excepting that of Mohammedan Sulu around Jolo and parts of Mindanao, is overwhelmingly Roman Catholic, atho in the mountain districts of the larger islands paganism in the form of ancestor-worship and spirit-worship also exists. The Roman Catholic Church has divided the islands into nearly 900 parishes, of which some 600 have been administered by foreign friars of the Augustinian, Dominican and Franciscan orders. These friars have had not only the religious, but in actual fact, the civil, control of the islands, and have used their power for the advantage of those rather than of the people. They have acquired ownership, for instance, of more than 400,000 acres of choice land in the islands, besides holding titles to a great number of churches and other public buildings. Through various causes it is needless to enumerate all the benefits of foreign friars, that is, say the Roman Catholic establishment, has alienated the affections of the mass of the Filipinos, and as soon as the Spanish power in the islands was broken all the friars were forcibly expelled from their parishes, saving their lives, only to take refuge in Manila or even in foreign lands. The people have said: "Our people have had 300 years of friars' religion, and now we want a better one." This does not, however, imply a revolt from Roman Catholicism, for most of the people know of no other form of religion. In some provinces the Roman Catholic clergy still sharply control public sentiment, but in others there is a tendency to form a national Roman Catholic Church, which has been commenced by certain of the native clergy who have thrown off allegiance to the Pope of Rome. The whole situation of Roman Catholicism in the islands is one which causes the gravest inquietude among the august prelates at Rome, the change which withdraws national support from that church and establishes schools outside of the control of the bishops, being one to which European Roman Catholics cannot readily adapt themselves.

In the meantime the condition of the common people in the Philippines who are Christians in name has attracted the sympathetic attention of the Protestant missionary societies of the United States. While there are exceptions among the educated classes, the characteristic qualities of the common Roman Catholic Christian Filipino (that is to say, of the mass of the people) are the following: There is a strange lack of either religious or political freedom, there is a mere dialect separating neighbors as widely as the ocean. Like all Asians, they look upon representatives of Western civilization with an instinctive dislike and suspicion, and they hardly know the meaning of lofty ambitions or aspirations. They are immoral, have a rooted conviction that all foreign clergy are immoral, and they allow nothing in the religious teaching of foreigners to restrain them from being idle, dissipate, deceitful, vacillating and essentially worthless. The two interests capable of thoroughly engaging their attention are, first, cock-fighting (with gambling), and second, gorgeous church processions. It is clear that no great future awaits such a people unless through a more profound understanding of the Gospel of Jesus Christ.

The Presbyterian Board of Foreign Missions in the United States (North) was the first Protestant society to establish a mission in the Philippines. It first proposed to the greater denominational societies a conference for such arrangements as to comity and territorial limitations as will prevent any impression of rivalry between the denominations. This has resulted in the formation of "The Evangelical Union of the Philippine Islands," each denomination adding in brackets its distinctive name. Comity being settled upon, the PN established Mr. Rogers its first missionary in Manila in April, 1899. It now has 4 other stations on the islands of Panay (1900), Negros (1901) and Cebu (1902), with 10 organized churches, several schools, one of them Industrial, and hospital the about 500 communicants. The CA has sent out missionaries temporarily working with the PN. The Methodist Episcopal Church in the United States, after Methodist laymen had commenced holding meetings in Manila in 1899 (before the Presbyterian mission was opened), organized a mission station there in May, 1900, taking for its field the northern section of the island of Luzon. It now has work in 27 places, with three central stations, besides its station in Manila. It has about 4,000 professing Christians under its care, 1,000 of them being communicants. The American Baptist Missionary Union opened its first station in 1900 on the island of Panay, and its second in 1901 on the island of Negros. It now has 3 organized churches, 5 places of worship and about 400 communicants. The CA has given much attention to printing and circulating the Scriptures and general evangelistic literature. The Protestant Episcopal Church has a strong mission station at Manila (1902), where the missionary bishop resides, and another in the highlands of Benguet (Luzon), with 10 organized churches, several schools, one of them Industrial, and about 4,000 professing Christians under its care, 1,000 of them being communicants. The ABCFM has a station (1902) in the island of Minamano. All of these missions are working with the hope of benefiting the people. It is not their aim to waste time in fighting the Roman Catholic Church. The B and FBS and the ABS also have agencies in the islands and are pressing forward Bible translation and have circulated about 80,000 copies per annum of the Gospels and other portions already printed.

**PHOKWANE:** A railway station in S. Bechu­­analnd, Africa, situated about 70 miles N. of Kimberly. Station of the SFG, with (1903)
missionary and 905 professed Christians. Some write the name Phokoane.

PYEUNG-YANG: A town in Korea, about 80 miles W. of Wonsan, beautifully situated on the right or N. bank of the Taedong, 50 miles from the sea. The river on which it stands is navigable by vessels of moderate draught to within 15 miles of the city. It is the center of a large silk industry. The Japanese defeated the Chinese at this place in September, 1894. Population, 20,000. Station of the ME, with (1903) 4 missionaries, three of them with their wives; 3 women missionaries, 11 native workers, 17 outstations, 18 places of worship, 2 Sunday schools, 1 day school, 1 dispensary, 1 hospital, and 2,070 professed Christians, of whom 269 are communicants. Station also of the SPG, with (1903) 1 missionary.

PILKINGTON, George Lawrence: Born in Ireland, 1865. Died in Africa, 1898. Educated at Cambridge, and for a short time he was Assistant Master at Harrow and Bedford Schools. Sailed January 23, 1890, under the CMS to join the Uganda, Africa, Mission.

On March 9, less than three months after his arrival, he had already, with the help of Henry Wright, Dutia, translated almost half of the Acts of the Apostles, induced the natives to translate Old Testament stories from Swahili, and began to compile a Luganda grammar. He had completed the grammar and vocabulary, finished the

Acts, and translated about twenty hymns by the end of May in the same year. Of the books of the New Testament, all but I. and II. Corinthians, Hebrews, James, I. and II. Peter were translated by January, 1892. The Gospels had been translated previously. The New Testament was finished, sent home, and printed by the Bible Society by Christmas, 1893. The Old Testament, of which he translated all but some of the minor prophets, was completed in 1896.

Nor was Mr. Pilkington a translator only. The letters of that period show that he took his full share in teaching with the rest, and in all the events of that troublous time. The prominent position he took very early is shown by the fact that when, on December 27, 1891, only a year after Mr. Pilkington's arrival in Uganda, Mwanga, in one of his many changes, announced his intention of becoming a Protestant, it was to Mr. Pilkington that the chiefs first took the news.

Early in the year 1898, while he was engaged in aiding as interpreter the British officers sent to restore order, he was struck down by the Sudanese mutineers. Mr. Pilkington's translations make a long list, and one which for being the work of thirty-three, is amazing. In the forefront of them all, he completed the translation of the whole Bible into Luganda, in itself an enduring monument. He also revised and in part translated the Prayer Book, translated a hymn-book, catechism, and Bible stories; wrote a small work, Anysalaba (“He that seeketh findeth”), in Luganda; compiled a Luganda grammar, a Luganda-English and English-Luganda vocabulary, and other smaller works. While at home he wrote, aided by Mr. Baskerville, a pamphlet called The Gospel in Uganda and made designs for Central Africa for Christ. Published at London, 1899.

PILGRIM MISSION at St. Chrischona. See St. Chrischona.

PIETERSBURG: A town in the Transvaal, South Africa, Zoutpanberg division, about 140 miles N. N.W. of Pretoria. Population, 1,500. Station also of the SBC, with (1903) 1 missionary and his wife, 1 woman missionary, and 905 professed Christians. Some write the name Pyeng-yang.

PIETERSBURG: A town in the Transvaal, South Africa, Zoutpanberg division, about 140 miles N. N.W. of Pretoria. Population, 1,500. Station also of the SBC, with (1903) 1 missionary and his wife, 1 woman missionary, and 905 professed Christians. Some write the name Pyeng-yang.

PIETERMARITZBURG: Capital of Natal, Africa, situated in a fertile plain, 2,000 feet above the sea, surrounded by a circle of hills, and 40 miles N. W. of Durban. It has an excellent climate, especially curative of pulmonary complaints, and the rich vegetation of its gardens and surrounding woods makes it one of the most delightful cities of Africa. Its population, numbering (1901) 30,000, is most cosmopolitan in character, consisting of Zulus, Kafirs, Europeans, Hindus, Chinese and Arabs. Station of the Swedish Holiness Union (1893), with (1901) 1 missionary and his wife, 1 woman missionary, and 1 day school. Station also of the Mission Association for the diocese of Natal (1868), with (1901) 1 missionary, 2 women missionaries, 2 native workers, 1 theological class, 1 industrial school, and 215 professed Christians. Station also of the UFS, with (1903) 2 missionaries and their wives, 1 place of worship, 4 day schools, and 701 professed Christians. Station also of the Missionary Society by Christmas, 1893. The Old Testament was finished, sent home, and printed by the Bible Society by Christmas, 1893. The Old Testament, of which he translated all but some of the minor

PILGRIM MISSION at St. Chrischona. See St. Chrischona.

PILOT-PROVINCE, British: A province of British Central Africa, between Nyasa Lake and the Zambezi, 149 miles N. E. of the city of Blantyre. It contains 1,650 square miles, and is the home of the last foundation for a native church in Central Africa for Christ. The province is divided into two districts, the northern of which is the heart of the Nyasa country. Station of the Central Africa for Christ.

PING-LIANG-FU: A town in the province of Kansu, China, situated in the eastern part of the province, 145 miles E. by S. of Lanchow-fu, and a short distance E. of the Liu-pan pass over the mountains. This is the center for the Scandinavian Alliance Associates of the CIM (1895), with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, 1 place of worship, and 1 Sunday school. Some write the name Ping-liang.

PING-TU-CHAU: A town in Shan-tung, China, situated about 95 miles S. W. of Peking, 105 miles N. W. of Peking, 105 miles E. by S. of Lanchow-fu, and a short distance S. of the Liao-pan pass over the mountains. This is the center for the Scandinavian Alliance Associates of the CIM (1895), with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, 1 place of worship, and 1 Sunday school. Some write the name Ping-tu.

PING-YANG-FU: A town in the province of Shan-si, China, situated on the right bank of the Pen-ho, 380 miles S. W. of Peking, 105 miles N. W. by N. of Ho-nan. This is one of the holiest towns of the empire, and one of the oldest in the world. It is also one of the places which felt the full force of the Boxer fury against foreigners. After peace was restored, the people for some time held aloof from all Europeans. Station of the CIM (1879), with (1903) 2 missionaries, one of them with his wife; 2 women missionaries, 2 native workers, 1 place of worship, and 1 Sunday school. Some write the name Ping-yang.
S. part of the province, and 28 miles S. W. of Wen-chau. Station of the CIM (1874), with (1903) 2 missionaries, one of them with his wife; 27 native workers, 24 outstations, 25 places of worship, 2 day schools, 2 boarding schools, and 475 professed Christians. Some write the name Bif-gar.

PING-YAO-HSIEN: A town in the province of Shan-si, China, situated about 37 miles S. by W. of Tai-yuen-fu. Station of the CIM (1888). The work at this station has been disorganized by the Boxer attacks. It has (1903) 4 missionaries, two of them with their wives; 9 native workers, and 7 outstations.

PIRACICABA: A town in Brazil, South America, 86 miles N. W. of Sao Paulo, on the river Piracicaba. Population, 5,000. Station of the ME8 (1877), with (1903) 1 missionary and his wife, 2 women missionaries, 1 native worker, 2 outstations, 2 places of worship, 2 Sunday schools, 1 theological class, and 375 professed Christians.

PIRIE. See PERIE.

PIROZPUR: A village of Bengal, India, situated in the district of Bakarganj, 100 miles E. of Calcutta. Population, 12,200, of whom 8,100 are Hindus and 4,100 are Mohammedans. Station of the BMS (1890), with (1903) 1 missionary and his wife, 18 native workers, 5 outstations, 8 day schools, 8 Sunday schools, and 304 professed Christians, of whom 113 are communicants. The name is also written Pirojpur.

PITHORAGARH: A village and military post in the United Provinces, India, situated near the Nepal frontier, 32 miles E. of Almora. Station of the ME, with (1903) 1 woman missionary, 48 native workers, 4 day schools, 1 boarding school, and 391 professed Christians.

PITSANULOKE: A town in Siam, situated east of the Po River, about 227 miles N. of Bangkok. Station of the PN (1889), with (1903) 2 missionaries and their wives, 4 native workers, 1 Sunday school, 1 boarding school, and 1 dispensary.

PITZ, Deaconess Charlotte: Born November 19, 1819, at Gemund, in Eifel, Germany. Died July 27, 1903, at Jerusalem. She was a veteran in the German Evangelical work in the East, having labored for a half-century in the Kaiserswerth Deaconess' enterprise at Jerusalem. She began her labors in 1853, supervising a school in which she taught thirty hours weekly. Her work of teaching had many interruptions. During the Mohammedan uprising against Christians in 1860, she was in great danger and had to have an underground refuge made for the 25 children in her school. When the smallpox raged she nursed the sick until she was seized by the disease. When famine followed the locust plague, she visited Germany and Holland, and secured money to feed the sufferers. Notwithstanding such difficulties, the work progressed and consequently her duties increased. The commodious new building just outside of Jerusalem, called "Talitha Kumi," was planned and successfully supplied with money by her, and in January, 1898, it was dedicated, the work of educating girls to be teachers in the Holy Land. In connection with it was a children's school, and a Swedish school for boys and girls was opened, and all were placed under Sister Charlotte's supervision. In 1894 a hospital building was dedicated and given over to her charge. There men, women, and children of all nationalities and religions receive treatment. In 1902 there were 666 Syrians and 112 other patients in the hospital, cared for by the eight nurses, who belonged to the Kaiserswerth order of deaconesses.

Sister Charlotte's work was recognized in Germany as well as in Jerusalem. The Crown Prince of Prussia (later Emperor Frederick of Germany) visited Jerusalem in 1869, and took pains to go to Talitha Kumi and express his pleasure with the work. The Emperor William II. having visited Jerusalem in 1898 for the dedication of the new German Evangelical Church of the Redeemer, also took pains to go to Talitha Kumi and express his pleasure with the work. The Emperor William II. having visited Jerusalem in 1898 for the dedication of the new German Evangelical Church of the Redeemer, also took pains to go to Talitha Kumi and express his pleasure with the work. The Emperor William II. having visited Jerusalem in 1898 for the dedication of the new German Evangelical Church of the Redeemer, also took pains to go to Talitha Kumi and express his pleasure with the work. The Emperor William II. having visited Jerusalem in 1898 for the dedication of the new German Evangelical Church of the Redeemer, also took pains to go to Talitha Kumi and express his pleasure with the work.

The Emperor William II. having visited Jerusalem in 1898 for the dedication of the new German Evangelical Church of the Redeemer, also took pains to go to Talitha Kumi and express his pleasure with the work.

PLAISANCE: A town near the center of the Island of Mauritius, about 45 miles S. E. of Port Louis. Station of the CMS, with (1903) 2 missionaries, 1 with his wife; 23 native workers, 1 orphanage, and 392 professed Christians, of whom 50 are communicants.

PLYMOUTH BRETHREN: Missions of the. See CHRISTIAN MISSIONS.

PNIEL: A village of Cape Colony, South Africa, situated in Griqualand West, about 5 miles N. W. of Kimberly on the left bank of the Vaal River. Station of the Berlin Missionary Society (1845), with (1903) 2 missionaries, 1 woman missionary, 27 native workers, 3 outstations, and 1,964 professed Christians, of whom 1,092 are communicants.

PODILI: A town in Madras, India, situated 27 miles W. by N. of Ongole. Station of the ABMU (1894), with (1903) 1 missionary and his wife, 116 native workers, 44 day schools, 1 Sunday school, 6 places of worship, and 8,083 professed Christians, of whom 3,328 are communicants.

POCEO TELLO: A settlement in the Butu Islands, Dutch East Indies, situated S. E. of Nias Island and W. of Sumatra. Station of the Netherlands Lutheran Missionary Society, with 1 missionary and his wife and 1 day school.

POERBOLINGGO: A town in Java, Dutch East Indies, situated in the central part of the island, about 75 miles S. W. of Samarang. Station of the Neukirchen Missionary Society, with 2 missionaries, 1 of them with his wife; 5 native workers, 5 outstations, and 1 day school.

POERWOREJO: A town in Java, Dutch East Indies, situated in the S. part of the island, about 60 miles S. W. of Samarang. Station of the Reformed Church of the Netherlands (1878), with (1903) 2 missionaries, 3 native workers, 3 outstations, 3 day schools, and 1 theological class.

POINT BARROW: A settlement in Alaska, situated on the coast of the Arctic Ocean and on the most northerly point of U. S. territory. Station
of the Presbyterian Home Missionary Society (1890), with 1 missionary, 1 woman missionary, 1 chapel, 1 Sunday school, 1 day school, and 30 professed Christians.

POINTE PEDRO: A town in Ceylon, India, situated in the Northern Province on the N. coast of Jaffna, about 114 miles N. W. by N. of Trincomali. Station of the WMS, with (1890) 1 missionary, 1 missionary woman, 126 native workers, 20 outstations, 25 Sunday schools, 29 day schools, 22 places of worship, 1 boarding school, and 204 professed Christians, of whom 97 are communicants.

POLADPUR: A town in Bombay, India, situated in the Kolaba district, about 30 miles S. of Bombay. Station of the Mission to Lepers (1894), with 1 home for untainted children of lepers.

POLES: The Poles form the most numerous branch of the Western Slavs. They number about 10,000,000, distributed by the division of Poland in another Polish and a small part in Galicia. They are all Catholics, except 500,000 Protestants, and they use the Latin alphabet, modified so as to express the sounds peculiar to their language. Their language belongs to the western branch of Slavic languages, and is divided into four or five dialects. It has scarcely any relation to any other Slavic language, and is therefore not very different from each other. The Polish language has been influenced more than any other Slavic language by the Latin (which in olden time was the literary and church language of Poland), the German and the French. Its distinctive characteristics are the nasal expression or rhinesmus of a and e, peculiar to the ancient Bulgarian or ancient Slavic, but which has disappeared from common use now among the Slavs, and that it always accents the penultimate syllable of words. The Polish language bears quite a close resemblance to the language of the Bohemians and the Lusatian Serbs.

The history of the ancient settlements of the Poles is uncertain. Their history becomes more trustworthy with the introduction of Christianity and the days of the apostles, long before this date, but were soon supplanted by Latin Christianity. If so, the Eastern form has been so thoroughly exterminated that it has left no traces in Polish literature. Along with the introduction of Latin Christianity through German preachers, the Latin language acquired a firm footing in Poland, and was the language of the learned and higher classes, as well as of the courts. Luther's reformation penetrated into Poland, where it found zealous and ardent defenders and followers; but, in spite of all the earnestness with which it was defended, it was overcome by the Roman Catholic reaction. The political history of Poland is too long to be treated in detail here. We can characterize it in a few words by saying that it was full of political vicissitudes, of glorious deeds, and of internal instability. The shahata, or nobility, had the upper hand, while the common people had very little power. Among the government was the jealousy and the arrogance of the nobles was always a hindrance to regular administration, and on more than one occasion the king's authority was set at naught. So the internal condition of Poland grew worse and worse, internal dissensions and strifes tended to weaken the government, and Poland fell a prey to more powerful neighbors, who resolved upon her partition, and thus put an end to her independent political existence.

POLFONTEIN: Village in the Transvaal, South Africa, situated about 20 miles E. S. E. of Mafeking. Station of the Hermannsburg Missionary Society (1877), with (1903) 1 missionary and his wife, 1 native worker, 3 outstations, 1 place of worship, 3 day schools, and 540 professed Christians.

POLONIA: A village in Transvaal, South Africa, situated 20 miles W. by N. of Pretoria. Station of the Hermannsburg Missionary Society (1888), with (1900) 1 missionary and his wife, 2 native workers, 2 outstations, 1 place of worship, 1 day school, and 389 professed Christians.

PONAPI. See Caroline Islands.

PO-NA-SANG: A station of the ABCFM (1849), in the suburbs of Fu-chau-fu, q. v. for statistics.

PONCE: A station of the American Baptist Home Mission Society (1899) in Porto Rico, West Indies, with (1900) 2 missionaries and their wives, 1 woman missionary, 1 native worker, 2 outstations, 2 Sunday schools, and 80 professed Christians. Station also of the United Brethren (1901), with 2 missionaries, 1 of them with his wife. Station also of the PB, with 1 missionary and his wife. Station also of the Peniel Missionary Society, with 2 women missionaries and 1 outstation. Station also of the UB, with (1903) 3 missionaries and their wives, 1 day school, 1 dispensary, 8 places of worship, 1 printing house and 73 professed Christians.

POO: A town in Kunawar, on the border of Punjab, India, toward Tibet, situated on the Sutlej River, about 100 miles N. E. of Simla. Station of the Moresavian Mission Society (1865), with (1903) 1 missionary and his wife, 1 native worker, 1 outstation, 2 places of worship, 2 Sunday schools, 2 day schools, and 13 professed Christians. The aim of the enterprise is to convey knowledge of Christianity into Tibet by means of Tibetans who come to these border regions for trade. So far, low caste people, almost to be regarded as slaves, are the only ones who have been converted here.

POONA: Capital of a district of the same name in Bombay, India. Situated in a plain, on the Moota River, 119 miles by railway southeast of Bombay. It was formerly the capital of the Maharatta power. The seven quarters of the city are named after the days of the week. Its climate is very pleasant and salubrious, making it a favorite place of resort during the rainy season. Population (1901) 153,320, including the garrison in the cantonment about two miles northeast of the city. Marathi, Gujarati, and Hindustani are the languages of the various races included in its mixed population. Station of the UFS (1831), with (1903) 2 missionaries, 3 women missionaries, 27 native workers, 2 outstations, 1 place of worship, 5 day schools, 1 boarding school, 1 orphanage, 1 printing house, and 186 professed Christians. Station also of the Church of Scotland Women's Board (1841), with (1900) 12 missionaries, 30 native workers, 8 day schools, 1 boarding school, 1 dispensary, 1 hospital and 1 orphanage. Station also of the CMS (1882), with (1903) 2 missionaries, 23 native workers, 1 outstation, 9 day schools, 1 theological class, and 398 professed
Christians, of whom 174 are communicants. Station of the Ramabai Association, with a home for widows which is called Sharada Sadan. Station also of the ME, with (1803) 2 missionaries, 6 native workers, 5 missionaries, 3 orphans. Station also of the WMS, with (1913) 1 missionary, 2 native workers, 2 outstations, 1 place of worship, 1 Sunday school, and 35 professed Christians. Station also of the ZBM, with (1903) 27 native workers, 5 day schools, 1 boarding school, and 1 orphanage. Station also of the Salvation Army.

POOR, Daniel: Born at Danvers, Mass., June 27, 1787; educated at Dartmouth College, 1811; studied theology at Andover Seminary; ordained as a missionary and appointed missionary to Ceylon by the ABCFM, embarking October 23, 1815, with the first party of missionaries sent to that field by the Board. He was stationed as Tillipally until 1822 to charge of Batticotta seminary for boys; transferred temporarily to the Madura mission in 1836; returned to Tillipally, 1841; visited the United States 1848-1851; on his return to Ceylon was stationed at Manepé until his death by cholera in 1855, after 39 years of mission service and in the sixty-sixth year of his age. He received the degree of D.D. from Dartmouth College in 1835.

Dr. Poor was one of the founders of the ABCFM mission in Ceylon and left the impress of his strong personality upon its policy, as well as upon the Madura mission. He was in advance of his age in appreciating the place of higher education. In the Madura mission also he was largely responsible for the establishment of some schools in the first five years of its existence.

He excelled all his associates in the use of the Tamil language, in which he preached his first sermon one year after his arrival in Ceylon. His familiarity with the language and his knowledge of Hindu literature, his clear mind, his self-command and quickness of repartee, coupled with a rare courtesy in debate, enabled him to meet the arguments and expose the sophistries of learned Hindu opponents with telling effect.

During Dr. Poor’s visit to the United States in 1848-49 he was much in demand among the churches for addresses on missions, and the powerful addresses which he gave were cherished memories with many who heard him.

POPO LANGUAGE: A dialect of the Ewe, used as a vernacular by tribesmen in Dahomey and Togoland, living between Lagoos and the Volta River.

PORAYAR. A suburb of Tranquebar, Madras, India, situated in the district of Tanjore, 21 miles N. of Negapatam, and 5 miles N. W. of Karikal. Population, 14,500, of whom 11,000 are Hindus. Station of the Leipzig Mission Society (1842), with (1903) 2 missionaries and their wives, 21 native workers, 7 outstations, 8 places of worship, 25 day schools, 4 boarding schools, 1 industrial school, and 2,003 professed Christians, of whom 921 are communicants. The name is also written Porayar.

FOREIGN. See Porayar.

PORT ARTHUR: A town and military port in Manchuria, China, situated on the N. side of the Strait of Chich. It was leased to Russia in 1898 by the Chinese Government. Connected with the trans-Siberian railway by a branch line through Manchuria, which is to become the main line. Station of the Danish Mission Society (1860), with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, 1 outstation, 1 place of worship, 1 day school, 1 dispensary, and 33 professed Christians.

PORT ELIZABETH: A maritime town of Cape Colony, Africa, situated in the district of Port Elizabeth, 125 miles S. W. of King William’s Town, with an open but safe harbor on Algoa Bay, in which vessels load from and discharge into lighters and steam tugs plying from two jetties. Population, 23,000. This was the earliest landing place of missionaries destined to the Zulu country. Station also of the Moravian Missions (1898), with (1903) 1 missionary and his wife, 5 native workers, 22 professed Christians, and 1 place of worship. Station also of the SPG, with 1 native worker and 206 professed Christians. Station also of the South African Wesleyan Methodists, with 55 native workers, 14 outstations, 5 places of worship, 5 Sunday schools, 2 day schools, and 509 professed Christians.

PORT LIMON. See Limon.

PORT LOKKO: A town in Sierra Leone, west coast of Africa, 35 miles E. N. E. of Freetown. Climate tropical. Station of the CMS (1875), with (1903) 1 missionary, 7 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 1 day school, and 35 professed Christians.

PORT LOUIS: Capital of Mauritius, situated on the northwest coast of the island, at the head of a bay. It is open on one side to the sea and enclosed on the other three by picturesque mountains. Of late years its prosperity has declined, fevers having become so prevalent that many have deserted it for other parts of the island. This has enabled the Chinese to get possession of the greater part of the town. Population (1901), with suburbs, 52,740. Station of the SPG (1850), with (1903) 2 missionaries, 2 native workers, and 369 professed Christians, of whom 125 are communicants. Station also of the CMS, with (1903) 1 native worker and 353 professed Christians, of whom 25 are communicants.

PORT MORESBY: A station on the southern coast of New Guinea, under English authority. It was founded in 1873 by the LMS and has a college in which natives from Tahiti, Rarotonga, Samoa, etc., are educated, and from which 17 stations are provided with teachers. There are (1903) 1 missionary and his wife and 14 native workers.

PORTO ALEGRE: A town and seaport in Brazil, South America, situated in the state of Rio Grande do Sul, of which it is the capital, and is the chief commercial port in S. Brazil. Population, 52,421. Station of the American Church Missionary Society (1890), with (1901) 1 missionary and his wife, 1 woman missionary, 3 native workers, 1 outstation, 3 places of worship;
2 Sunday schools, and 133 professed Christians. Station also of the MES (1890), with (1900) 3 missionaries and his wife, 1 native worker, 6 outstations, 4 Sunday schools, and 60 professed Christians. Station also of the SDA, with 1 missionary and his wife.

PORTO NOVO: A town in Dahomey, West Africa, under French authority, situated about 50 miles E. of Whydah. Station of the WMS, with (1903) 1 missionary, 44 native workers, 12 outstations, 31 places of worship, 9 Sunday schools, 7 day schools, and 417 professed Christians, of whom 25 are communicants.

PORTO RICO: An island of the West Indies, lying east of Haiti. It contains an area of 3,550 square miles and a population (1899) of 953,243, of whom over 350,000 are negroes or of negro blood. It is described as “the healthiest of all the Antilles.” Slavery was abolished by the National Assembly on March 23, 1873. The principal towns, with their population, are: San Juan, 32,000; Ponce, 28,000; San Germán, 38,000.

Port Rico became United States territory by the treaty with Spain December 11, 1898. The adjacent islands of the Virgin group are also possessed by the United States and contain about 6,000 inhabitants.

PORT SAID: A town and seaport in Egypt, situated at the entrance to the Suez Canal, about 160 miles E. of Alexandria. Station of the Pentecost Mission with 3 women missionaries, 1 native worker, and 1 day school. The BFBS also maintains an agent here, with a Bible depository and a colporteur.

PORT SHEPSTONE: See NORTH AND SOUTH SHEPSTONE.

PORT SIMPSON: A town and seaport in British Columbia, N. A., situated on the S. side of the entrance to Portland Channel. Station of the MCC (1874), with (1903) 2 missionaries, one of them with his wife; 6 women missionaries, 1 place of worship, 1 Sunday school, 1 boarding school, 1 dispensary, 1 hospital, 1 industrial school, and 40 children of professing Christians.

PORT OF SPAIN: Capital of Trinidad and Tobago, West Indies. It is one of the handsomest towns of the West Indies, with a good harbor and an active trade. Temperature, 70°-93° Fahrenheit. Population, 34,000, English, English and French creoles, Indian coolies, Chinese, Spaniards, and Portuguese. Each race speaks its own language, and the creole dialects of French, Spanish or English. Social condition, the far from good, is better than in most of the West Indies. Station of the UFS (1836), with (1903) 1 missionary and his wife, 1 outstation, 1 place of worship, and 250 professed Christians. Station also of the Moravian Missions, with (1903) 1 missionary and his wife, 22 native workers, 2 outstations, 3 places of worship, 4 Sunday schools, 2 day schools, and 234 professed Christians. Station also of the SDA (1893), with (1900) 2 missionaries, 1 native missionary, his wife, 16 native workers, 7 outstations, 1 place of worship, 5 Sunday schools, 1 day school, and 220 professed Christians; the auxiliary International Medical and Benevolent Association also has here 1 woman missionary. Station also of the African Methodist Episcopal Church, with 1 native worker.

PORTUGUESE EAST AFRICA: A colony of Portugal, lying along the east coast of Africa for a distance of nearly 1,000 miles, extending from the Rovuma River and the borders of German East Africa on the north to Amatongaland on the south, and reaching back to Lake Nyasa, Matabililand, and the Zambesi. The total area is about 297,750 square miles; the population about 1,500,000. It comprises three districts: Mozambique, Zambesi, and Lourenço Marques, to which, however, must be added the district of Inhambane, formed when the administrative concession to the Inhambane Company failed in 1889, and the Gaza region, which constitutes a military district. Two trading companies, the Nyassa and the Mozambique Companies, administer certain regions under a royal charter that confers sovereignty. Mozambique, Beira, Inhambane, and Lourenço Marques are the most important towns. The Delagoa Bay railway, touching the coast at Lourenço Marques, has a length in the colony of 57 miles, and extends to Pretoria. The Beira railway extends in the colony 222 miles, and is continued in British territory to Bulawayo. Telegraphs, with a mileage of 1,850 miles, connect the principal towns and communicate with the British systems. The country far from the coast and from navigable rivers is still largely unexplored by white men. The climate is subject to sudden changes, but the mean annual temperature is high, and, with moderate care, danger to health is avoided. The whole region is intersected by numerous rivers, and is very fertile, but the maize fly is, in some districts, very destructive. Valuable timbers are found in the forests. The mineral resources (gold, copper, iron and coal) are of exceptional importance. The Chindé River, 45 miles south of Quаqua, is a mouth of the Zambezi, and furnishes a channel three fathoms deep and 500 yards wide, with good anchorage. An ordinary steamer can thus pass directly into the river. Formerly goods, after several days' journey up the Quаqua, had to be carried eight miles over a swampy depression to the Zambesi, where they were transferred to small Zambesi steamers. The Tongas (a name applied in a collective sense to the tribes originally inhabiting the southern part of this territory, are a peaceful and industrious people. Their language has been reduced to writing, and a hymn-book and the whole New Testament have been translated. The Zulu language is spoken by a great majority of the people. There are two other extensively spoken languages—the Isisena, spoken from the Sabi to the Buzi, the Isihlweni south of the Sabi. North of the Buzi the Sena language is spoken by a people who only occasionally use the Zulu. Roman Catholic Missions have long existed in the colony, and of Protestant Missionary Societies the SPG, the Free Methodists of America, and the Swiss Romande Mission have stations in the southern coast regions.

POOR, Daniel.

POTOANE: A village in Transvaal, South Africa, situated on the Apies River, 32 miles N. by E. of Pretoria. Station of the Hermannsburg Missionary Society (1871), with (1901) 1 missionary, 1 native worker, 51 place of worship, 1 native school, and 169 professed Christians.

POTRIBO: A village in Dutch Guiana, South America, situated in the Connewyne district,
about 30 miles E. by S. of Paramaribo. Station of
the Moravian Society (1896), with (1903) 1
missionary and his wife, 22 native workers, 1
place of worship, and 129 professed Christians.

POTCHESTROOM: A town in the Transvaal,
South Africa, about 30 miles south-west of Pretoria.
Population, 2,000. Station of the SPG (1864),
with (1903) 1 missionary. Station also of the
Berlin Missionary Society (1872), with (1903) 1
missionary, 13 native workers, 4 outstations, and
1,296 professed Christians, of whom 343 are com-
municants. Station also of the WMS, with (1903)
81 native workers, 38 outstations, 22
places of worship, 22 Sunday schools, 8 day
schools, and 1,682 professed Christians, of whom
380 are communicants.

POWERS, Philander O.: Born at Phillipston,
Mass., August 19, 1805; graduated at Amherst
College, 1830, and Andover Theological
Seminary, 1834; sailed the same year as a missionary of the
ABCfM, arriving at Smyrna
January 12, 1835; released from the service of the
Board, 1862; reappointed in 1866; he was sta-
tioned at Broosa, Trebizond, Sivas, Antioch, Kes-
sab, Urfa, and Marash. His self-sacrificing
Christian and Muslim readers. He died December
5, 1872. His grammar of the Turkish, partly
from his pen. His remains
rest at the foot of Mount Cassius.

PRASLIN. See SEYCHELLE ISLANDS.

PRATT, Andrew T.: Born at Black Rock, near
Buffalo, N. Y., February 22, 1826; graduated at
Yale College, 1847; studied one year at Union
Theological Seminary, New York, and two in
New Haven; pursued medical studies at the New
York College of Physicians and Surgeons;
ordained August 6, 1852, sailed December 22 the
same year as a missionary of the
ABCfM in Turkey. His first station was Aintab, but he
removed to Aleppo in 1856 and to Marash in
1859. In 1865 he was transferred to the Western
Turkey Mission, and removed to Constantinople,
there to be engaged, especially with Dr. Riggs, in
the work of revising the Turkish Scriptures, in the
hope of securing a uniform version for both
Christian and Muslim readers. He died December
5, 1872. His grammar of the Turkish, partly
a translation of a Turkish work and partly his
own, is proof of his proficiency as a Turkish
scholar. In fact, he was a distinguished scholar,
with extensive general information. He was fond
of music and had a poetical taste. He was, there-
fore, an excellent hymnologist, and wrote original
hymns in Turkish, as well as translating others
from the English. He was a good physician, and
trained several native Armenians as physicians,
who became useful in the medical profession.

PRESBYTERIAN CHURCH IN CANADA;
Home and Foreign Missions of: In June, 1875, the
four Presbyterian churches of Canada—two were
in the Maritime Provinces and two in the Western
Province, both in Montreal, and constituted the
“General Assembly of the Presbyterian Church
in Canada,” to take up and prosecute the home
and foreign missionary operations of the several
churches. Already, in 1848, the Nova Scotia
curch had sent Rev. John Geddie to commence
work in the New Hebrides. For many years this
New Hebrides work absorbed the interest of the
church, but in 1869 another Nova Scotian, Rev.
John Morton, commenced work in the island of
Trinidad, and three years later George Leslie
Mackay, of Toronto, went to the mission field. About the same time some Canadian women had
gone as missionaries to India, and when the
organization was completed these four missions
were in operation. Work in China was com-
menced in 1887, Demerara 1896, Korea 1898.
As early as 1886 special efforts were made for the
North American Indians, and in 1891 the needs
of the Chinese in Canada were recognized.

1. New Hebrides: After the efforts of the LMS
in the New Hebrides, and the martyrdom of John
Williams at Fromanga, work in these islands
was resumed under the name of a missionary of the
ABCfM, arriving at Smyrna
January 12, 1835; released from the service of the
Board, 1862; reappointed in 1866; he was sta-
tioned at Broosa, Trebizond, Sivas, Antioch, Kes-
sab, Urfa, and Marash. His self-sacrificing
Christian and Muslim readers. He died December
5, 1872. His grammar of the Turkish, partly
from his pen. His remains
rest at the foot of Mount Cassius.

2. Trinidad and Demerara: In 1869 the Rev.
John Morton, a minister of the Presbyterian
Church of Nova Scotia, who, having visited
Trinidad for the benefit of his health, noticed the
deplorable condition of the imported laboring
people, and on his return home offered his ser-
vice to go and establish a mission for their bene-
fit. In 1871 he was joined by the Rev. Kenneth
J. Grant, who is now at San Fernando, a con-
siderable town on the island, and from the time
the mission had been re-founded and in 1872
extended to include Demerara. This also
is under the care of the Eastern division, and
reports in the two fields 18 missionaries, 72
native workers, 9 churches with 971 communica-
ts. Special attention is paid to education, and there are 59 schools with 5,045 pupils.

3. Formosa: The Mission in Northern Formosa
has been one of the Church’s most successful
enterprises. It was commenced in 1872 by Rev.
George Leslie Mackay, a native of Oxford
County, Ontario. In 1876 he was joined by Rev.
J. B. Fraser, M.D., and subsequently by Rev.
Kenneth F. Junor, now of New York. At present
the Rev. John Jamieson, of Ontario, is associated
with Dr. Mackay. Dr. Mackay married a Chris-
tian Chinese lady, who was very helpful to him in
training the attention of the women, and in
intending the girls’ school. His efforts to train a
native agency and his custom of taking with him
on his journeys his class of young men proved
most effective, and, while he had most able asso-
ciates, the success of the work, both among the
Chinese and the Papoian, was largely due to him.
The 4 missionaries (1903) and 57 native workers had the care of 27 churches and 61 outstations, with 2,037 communicants. Oxford College, at Tamsui, had over 50 students.

A Mission was sent to Madras, in 1641. After the time of the Indian work some attention is paid to schools, and Western divisions of the Missionary Enterprise. The Presbyterian Church, virtually founded in 1570, was the legal form of doctrine in 1641. After the time of Cromwell it gradually became the mere representative of the divided Presbyterian Church in Scotland, till 1776, when the congregations in England of the Free and United Presbyterian Churches united and formed the Presbyterian Church of England.

The Missionary Society was organized in 1847, and its first work was to send a missionary, Rev. Wm. C. Burns, to China. In 1865 it commenced work in Formosa, in 1875 in Singapore, and three years later in India. As the Scotch churches have aided in the conduct of the China Mission, so, in 1902, it was resolved that the English churches should have a share in the Livingstonea Mission in Africa.

1. China: For the first four years after Mr. Burns' arrival in China, he worked at Hongkong, Canton, and the neighborhood, but in 1851 he visited Amoy on business, and was so much impressed with the needs of this city, and the opening it gave for missionary effort, that he transferred his work to Amoy. The fact that the 9 medical missionaries, with 8 native assistants in the three districts, have treated over 20,000 patients, shows the attention paid to medical work. The report (1903) shows 16 ordained missionaries in the three districts (11 married), 9 medical missionaries (7 married), 4 missionary teachers (3 married), 25 missionaries of the Women's Association (including 3 missionaries). There are 180 congregations, including 29 native pastorates, and 5,666 communicants.

The Mission suffered from the general disturbance in the Boxer rebellion, but has also shared in the renewed interest manifest since.

2. Formosa: This Mission was commenced in 1865. By arrangement with the Canadian Presbyterian Board, that mission occupies the parts of the island north of a line a little above the 24th parallel of latitude, while the English Board cares for the southern sector. The Island has been divided into 6 districts with 79 congregations, of which 34 have trained preachers, 2,325 adult members, and 10,620 candidates preparing for baptism. There are 5 ordained missionaries (3 married), 3 medical missionaries (2 married), 1 missionary teacher (married), and the Women's Association. The College at Taedian, with 53 students, and the pressroom are influential agencies. Since the Japanese occupation of the island the work of the Mission has been made easier. The Japanese officials have manifested interest in the work, and the restric-
tions in regard to opium have been helpful. The Mission in the Pescadores Islands is carried on by the native church, at its own expense, under the general supervision of the Mission.

3. Among the Chinese who came to the Straits Settlements was commenced in 1875, but the first ordained missionary went out in 1881. The work has since developed among the Babas, and there are now under the supervision of the one ordained missionary (missionaries, including 2 pastors, states, with 7 native preachers, 240 communicants.

4. India: Work in Rampur Bealia, in Bengal, was begun by the Rev. D. Morrison in 1875, and has (1885) 6 ordained and 2 medical missionaries (1 married). The chief work is medical, nearly 8,000 patients having been treated.

The Women’s Missionary Association, organized in 1875, cooperates with the Foreign Mission Committee of the Church, and there is also a Students’ Missionary Society, of the Presbyterian Church of England, organized in 1878 for general assistance in the work.

5. Korea: Work in the Pescadores Islands is carried on by the United Church in China, begun in 1879 in the name of the “General Assembly of the Presbyterian Church in Ireland.” Led by Dr. Duff’s eloquence and a missionary survey which Dr. John Wilson, of Bombay (both of the Free Church of Scotland), had made of the states of Kathiawar, they chose India for their first field and sent out as their first missionaries the Revs. A. Kerr and J. Glasgow. These men had not offered themselves for the service, but had been chosen and called upon by the Assembly’s Committee to undertake it. As this mode of obtaining missionaries was deemed by them preferable to the ordinary practise of receiving voluntary offers of service, they recorded it, “that it may serve to be a precedent in all time to come.”

6. In 1890 and 1891 missionaries proceeded to Kathiawar in Gujarat, and located in Rajkot, one of the principal towns. As reenforcements arrived other places were occupied, including Gogo (1844), Surat (1846), Borsid (1856), Ahmadabad (1881), Anand (1877), Broach (1887). In 1900 there were 43 missionaries, 251 native workers, occupying 13 stations and 18 outstations, 674 communicants, 126 schools with 6,929 pupils. The medical department is carried on by 5 physicians, of whom four are women.

China: The work of the Irish Presbyterian Church in China was begun in 1879 in the province of Manchuria, North China. Their earliest station was New-chwang, from which, as a center, itinerant journeys were made over all the province to the far north. The work is carried on with the cooperation of the UFS mission in the same regions. There were, in 1900, 28 missionaries, 195 native workers, occupying 9 stations, and 95 outstations, 1,589 communicants, 33 schools with 375 pupils, 6 physicians (one a woman), 5 hospitals and dispensaries with 12,761 patients.

The Assembly has Jewish missions in Syria and in Germany; Colonial missions in Canada, Australia, and New Zealand, and Continental work in various parts of Europe.

The Women’s Association for Foreign Missions to Women in the East, headquarters 119 University Street, Belfast, Ireland, was organized in 1874 and carries on the women’s work in connection with the Foreign Mission Board of the Presbyterian Church in Ireland.
Society, organized for the purpose of "conveying the Gospel to whatever parts of the heathen and anti-Christian world the providence of God might enable it to extend its evangelical exertions," succeeded in planting missions among the American Indians, in India and Africa, and was contemplating work in China, when in June, 1837, a Board of Foreign Missions was established by the General Assembly, to which the work of the Society was surrendered. At this point (in 1838) the Presbyterian Church was divided, and the "Old School" Assembly carried its "Committee on Foreign Missions" through the "Board of Foreign Missions," while the General Assembly of the "New School" Antiochian Committee, was disbanded by its "Committee on Foreign Missions" through the ABCFM. Upon the reunion of the Old and New School Assemblies in 1870, the Persian, Syrian, Gabun and several Indian missions were transferred from the American Board, and since that time all the missions of the Presbyterian Church, with the exception of those carried on by the Southern churches, have been prosecuted through the "Board of Missions of the Presbyterian Church."

The Board of Foreign Missions is simply a Permanent Committee of the General Assembly. The members, 21 in number, are appointed by the General Assembly, which possesses exclusively the general authority, supervision and control of the work of the missions, the Board being but a form of its executive agency. From 1833 to 1870 the Board was composed of 120 members, from whom an Executive Committee was appointed of persons residing in or near New York City, the Board's headquarters. At the reunion, the membership was reduced to fifteen, and the Executive Committee its missions disposed of, and in 1900 the amended charter provided for the present number.

Development of Work: On its organization in 1837, the Board found one Presbyterian mission already established in India, where the Rev. John C. Lowrie and the Rev. William Hays had commenced work in Ludhiana in 1833. The next fall (1837) two missionaries were commissioned to open work for the Chinese, with headquarters at Singapore. One of these, the Rev. R. W. Orr, spent a month in Bangkok, and sent home an endorsement for a practical printer as early as 1838. The Anglo-Vernacular High School here was the first started in North India.

(1.) Punjab Mission: From the first attention was specially directed to the Punjab, and in 1846, after the first Sikh war, Jullundur was occupied, followed in 1848 by Amritsura. The second Sikh war, and almost on the heels of the British forces Messrs. John Newton and C. W. Forman entered Lahore (1849), and commenced the work with which they were identified for nearly half a century, and one of the fruits of which is the Forman Christian College, with a larger number of students than any college, government or missionary, north of Calcutta. Other stations have since been added: Dehra (1853), with a fine Christian girls' boarding school; Hoshyar (1867), where the work was transferred to the Assembly's Board in 1837, there were four stations, Ludhiana, Allahabad, Saharanpur, and Sabathu. Proceeding northward, the mission has been prosecuted with success, until, when the work was transferred to the Assembly's Board in 1837, there were four stations, Ludhiana, Allahabad, Saharanpur, and Sabathu. The nature of the foundation work is indicated by the establishment of a mission press and the appointment of a practical printer as early as 1838. The Anglo-Vernacular High School here was the first started in North India.

(2.) Furrukhabad, or United Provinces Mission: This was started in 1836, by the Rev. James McEwen, who while on his way to Ludhiana remained for a time at Allahabad to superintend the replacing of some lost parts of a printing press. This remains the chief station of the mission, well provided with educational institutions, a blind asylum, a leper asylum, as well as a printing press. Other stations are: Mainpuri (1843); Fateghar, with its native city, Furrukhabad (1844) the only station where the missionaries lost their lives in the mutiny of 1857; Fatehpur (1853); Etawah (1863); Morar, the capital of Gwalior, and the only station in a native state (1874); Jhansi (1886); Etah (1900) and Cawnpore (1901). Aside from Allahabad and Furrukhabad, the work of this mission is more distinctively evangelistic. The report of the Philippine Islands. The work among the North American Indians undertaken at different times and in different localities has been discontinued, passed over to local presbyteries, and in the Board of Home Missions of the Presbyterian Church in the U. S. A.
The Presbyterian mission for women from 1861, and the Presby­
and the native churches, from 1881. The boys' 
and almost wholly supported by the tuition fees
first co~vert was baptized in 1845, and a church
the first station of the Ce.ntral China mis­sion.
and Ningpo were occupied as stations. Amoy
and as a result a large force of workers was sent
of Macao as a headquarters and Ningpo became
lower work ainoi{al{ of the outcasts, and especially
Lowrie who was in 1847 killed by pirates. The
Material Academy, for the sons of native Christians,
missonaries, among them the Rev. W. M.
was organized later in the same year. ;'he gir~s'
was removed to Hangchau in 1877.
for the Bible and Tract Societies;
with 3,712 patients.
(2.) Canton Mission: This was started at 
Macao, but Canton was occupied in 1845, and
this was for more than thirty years the only station.
In 1879 a chapel was leased at Lien­
chau, and in 1886 Yeung-kong was made a center
work. Kong-chau in the Hakka territory has
long visited by the missionaries and a church
organized in 1890, but it was subsequently
deeemed advisable to withdraw the missionaries
and leave it under the care of a native pastor.
The work in Canton has been successful, a
number of churches having been organized, both in the city and the immediate vicinity. This is the
seat of the Canton Christian College, founded
by Rev. A. P. Happer, D.D., now under a sepa­
rate Board of Trustees, but cooperating with the
mission. It was at Canton also that Dr. Peter
Parker in 1835 gave the first impulse to distinc­tive
medical missions, and there is now a fine hos­
pital owned by the Medical Missionary Society in
China, tho the physicians are supplied by the
Presbyterian Board. Other departments of
educational, philanthropic and evangelistic work
are carried on. The report of the mission (1903)
shows 60 outstations, 31 missionaries, 117 native
workers, 20 churches, with 3,854 members, 32
schools, with 892 pupils, 3 hospitals and 5 dispe­
saries, with 41,947 patients.
(3.) Hai-nan Mission: Mission work in the
island of Hai-nan was begun in 1881 by Mr. C. C.
Jeremiassen as an independent enterprise, but
was taken up by the Canton Mission in 1885 and
organized as a separate mission in 1893. There
are three stations: Kuing Chow and Noda, both
occupied in 1885 and Kuchek (1902). The work
is largely among the Loi tribe, aboriginal inhabi­
ants, and offering some special attractions to
missionary effort. But many Hakkas from the
mainland are also included in this field.
The report (1903) shows 5 outstations, 21 mis­sionaries, 23 native workers, 131 communicants, 5
schools, with 152 scholars, 1 printing press, 2
hospitals and 3 dispensaries, with 14,932 patients.
(4.) Hunan Mission: The Canton Mission for
many years looked toward the province of Hunan
as one offering a fine field for work, but it was not
until 1900 that the Rev. W. H. Boyd and Dr. H. W.
Boyd and Dr. Leila M. Doolittle were authorized to
open a station at Siang-tau. Then came the
Boxer uprising and they were obliged to with­
draw. They have since returned and a new sta­tion has been opened at Heng-chau (1902). The
work, still (1903) in its infancy, reports 10 mis­
sionaries, 2 native workers, 6 communicants, 1 school, with 12 pupils.

(5.) **Peking Mission:** Work in Peking was begun in 1863 by Rev. W. A. P. Martin, who withdrew from the mission in 1869 to take the presidency of the Imperial Lung-wen College, but has always been identified with the mission. As in the case of Canton, the work for many years was confined to the city of Peking, and was developed successfully there. In 1893 a new station was opened at Paotung-fu. The Peking mission suffered severely during the Boxer rebellion. The company of missionaries at Paotung-fu were massacred, including Dr. Taylor, Mr. and Mrs. Simcox and three children, and Dr. and Mrs. Hodge. The buildings in both stations were destroyed. Since the subsidence of the troubles the work has been resumed with energy and the report (1903) shows both stations occupied, 4 outstations, 29 missionaries, 211 communicants. Both school and medical work have suffered and are not yet fully reorganized.

(6.) **East Shantung Mission,** including the stations of Teng-chau, Chi-fu and Tsing-tau, was disorganized by the Boxer uprising, and the report (1903) shows 7 outstations, 29 missionaries, 25 native workers, 9 churches and 4 dispensaries, with 7,035 patients.

The province of Shantung, the home of Confucius, Laotze and other Chinese sages, was first visited by the Rev. J. L. Nevius, who opened the station of Teng-chau in 1861 and that of Chi-fu in 1862. The next place entered was Chi-nan-fu (1868), followed by Wei-hsien (1882), I-chow-fu (1889), Nakawn (1900). In all the stations there has been much earnest labor, with comparatively small visible results. The enervating climate, to which so many workers have succumbed, the mobile, unretentive character of the people, whose unthinking acquiescence is more discouraging than opposition, are obstacles to be overcome only by great faith and endurance. In no mission of the Board has the effort to secure self-support among the native churches met with so much opposition. In Petchaburee, the influence of some strong self-supporting churches is a pledge of future success. The report (1903) shows 7 outstations, 29 missionaries, 25 native workers, 9 churches with 439 members, 6 schools with 437 pupils, a printing press, 3 hospitals, and 4 dispensaries with 7,035 patients.

(2.) **Laos Mission:** The missionaries in Siam were led to consider the claims of the Laos tribes who occupy the hill country in the north of Siam, by encountering a settlement of Laos refugees near Petchaburee. In 1864 a deputation visited Chiang Mai and three years later Rev. Daniel McIlvary and Rev. Jonathan Wilson opened a permanent station there. Success was more rapid than among the Siamese and there were several converts within a few months. Then followed bitter persecution and the work was checked, but received a new impulse until 1876, when in consequence of the bitter opposition of the people to Christian marriage without the usual ceremonies of devil-worship, appeal was made to the king of Siam, which resulted in a proclamation of religious liberty to the Laos. From that time on progress has been rapid. The general policy of the Mission, based on the experience of other missions, has been from the beginning to throw the responsibility of maintaining the work on the people themselves, with the result that the evangelistic work is now virtually supported by Laos Christians. Besides a foreign mission to the Ka Mu tribe across the Me-kong in French territory. There has also been a comprehensive scheme of education, a
mission press established and the medical work has been one of the most effective agencies in disarming opposition and reaching the people. Other stations occupied are Lekawn (1885); Maang Pré (1893), Nan (1894), Chiang Rai (1897). Lampun was occupied in 1891, but on account of its proximity to Chiang Mai it was united to that station.

The Mission is anxiously looking forward to work among the other Lao tribes, particularly those in French territory, but is hampered by the objections of the French Government. The report (1903) shows 23 outstations, 40 missionaries, 28 native workers, 16 outposts with 2,706 communicants, 17 schools with 300 pupils, 4 hospitals and 4 dispensaries with 7,632 patients.

IV. South America: The first mission work of the Presbyterian Church in South America was undertaken in Buenos Aires in 1827, but was soon abandoned; another attempt in 1853 was also without permanent results. In 1856 a missionary was sent to Colombia, reaching Bogota in June. The next step was to Rio de Janeiro in 1860. In 1873 work which had been established in 1850 by the Jesuits in Christian missions was assumed by the Presbyterian Board, and that again was followed in 1897 by the opening of a station in Caracas, Venezuela. The work in Brazil developed so that a division seemed best into Central and Southern Brazil Missions.

(1.) Colombia: The early years of this mission from its commencement in 1856 were times of great difficulty on account of opposition of the Roman Catholic Church. The revolution in 1860, however, threw the government into the hands of the Liberals, and by the new constitution the Jesuits were removed, and the people were found to be civil and friendly. There was, however, constant surveillance, and aggressive work was scarcely possible. Meanwhile, there was opportunity for studying the language, and Dr. Hepburn devoted himself to it, laying the foundation for the states of Bahia, Sergipe and parts of others. The stations are: Bahia (1851), capitulated (1872), Sergipe (1886), Villa Nova da Rainha (1900). Work in this section has presented unusual difficulties, yielding less fruit than any other of the mission fields in Brazil, owing partly to the population, principally made up of blacks and their descendants, and partly to the power of the ecclesiastical element. The hope is to extend the work into the interior provinces, inhabited exclusively by Indians, some independent tribes, others semi-civilized and varying greatly in character. Appropriations were made in 1899 for this work, but Mr. George Withers, who was assigned to it, and an associate, were both smitten by fever, and it was for the time being postponed. The report (1903) shows 39 outstations, 13 missionaries, 4 native workers, 7 organized churches, with 467 communicants, 11 schools with 400 pupils.

In 1888 the missions of the Northern and Southern Presbyterian churches were united in the Synod of Brazil, which meets every three years and is entirely independent of the General Assemblies in the United States. The Synod has a vigorous Home Mission Society, and supports the theological seminary at Sao Paulo. At its triennial meeting in 1900 a membership of 7,000 communicants was reported, a gain of ten per cent. in the three years. In view of the excellent work of this Synod the American societies are reaching out toward the distant regions as yet unevangelized.

(4) Chile: The first American missionary in Valparaiso was the Rev. D. Trumbull, representing the Seamen’s Friends Society, and the American and Christian Foreign Union. He labored chiefly for the English-speaking people; but others came to enter upon Spanish work. A Spanish paper was established, and a school and orphanage conducted. The Presbyterians took charge of it in July, 1873. Other stations are: Santiago, occupied first in 1861; Constitucion (1885), Concepcion (1880), Chillan (1892), Talca (1896), Copiapo (1888). Aside from the educational, publication and general evangelistic work, much has been done in the outlying sections, and in the mining regions. The work in Chile has shared in the change that has come over so many of the South American states in the control of Liberals, and in 1888 the mission received a special charter. The report for 1903 shows 34 outstations, 12 missionaries, 29 native workers, 10 churches, 522 members, 4 schools, 560 pupils.

(5) Japan: While the Christian Church was watching the opening of Japan, the Presbyterian Board requested Dr. McCartee, a missionary in China, to visit that country and make inquiries preparatory to mission work. He was, however, unable to reach Japan, and as the treaty opening the ports of Yokohama and Nagasaki was to take effect in July, 1859, in the previous April, the Board commissioned Dr. J. C. Hepburn and wife, formerly of China, to reach Japan early in October and settled at Kanagawa, a few miles from Tokio. The Buddhist temple was obtained as a residence, the idols were removed, and the people were found to be civil and friendly. There was, however, constant surveillance and aggressive work was scarcely possible. Meanwhile, there was opportunity for studying the language, and Dr. Hepburn devoted himself to it, laying the foundation for
THE ENCYCLOPEDIA OF MISSIONS

by these two missions, together with that of the speaking residents of all denominations in Yokohama, and a Union College in 1883. In 1886, a dispensary and hospital were opened. Other missionaries arrived, and gradually the field of work enlarged. In February, 1869, three converts were baptized. This development accelerated the political revolution which changed the entire policy of Japan toward the outer world, and which brought into prominence as leaders several young men who had come under the influence of Dr. Hepburn, and Dr. Verbeck, of the Reformed Church in America, and others.

In January of 1872 a week of prayer was observed by all of the missionaries and English-speaking residents of all denominations in Yokohama, and the result was a great manifestation of spiritual life. Two years later there were still more marks of divine favor. Churches were organized, and the Presbyterian and Reformed Missions worked together in cordial sympathy. In 1876 a movement was initiated by these two missions, together with that of the United Church of Christ in Japan, an independent self-governing Japanese Church, in which the missionaries were only advisory members. An effort, in 1889, to unite the Congregational churches with this body failed, and soon after the term "United" was dropped from the title.

In 1877 a Union Theological School was organized, and a Union College in 1883. In 1886 these were united, and with the special department then organized became the Meiji Gakuin "College of the Era of Enlightened Principles."

The unprecedented advance of these years was followed by a reaction of intense prejudice against foreigners and foreign teaching, which again was largely overcome by the bearing of the Christians during the war years later, and has been more recently followed by a renewed increase of interest.

(1) **Eastern Japan Mission**: The work commenced at Yokohama has resulted in two self-supporting churches. But the headquarters of these missions were changed in 1869 to Tokyo, capital, where the first church was organized in 1873. The mission work includes open-air evangelistic work, a Training School for Bible Women, a Girls' Boarding School, and a Training School for Nurses. Other lines of work connected with this mission include the work in Hokkaido and the Kurile Islands. The headquarters of this section are at Sapporo (1887), but several other places are occupied. In one, Otaru, the work began as a Sunday school for the fishermen's children. There is now a church and an excellent school, with two kindergartens, and three Sunday schools. The report in 1903 shows 24 outstations, 31 missionaries, 59 native workers, 8 schools with 882 pupils.

(2) **Western Japan**: The first station occupied on the Western coast was by the Reformed Missions, at Otaru (1869), followed by Hiroshima (1887), Kioto (1890), Yamauchsi (1891), Fuku (1891), Matsuyma (1901). In all of these places the mission work includes evangelistic and educational departments, and Hiroshima is peculiarly attractive but the occupation of opportunities for work among the soldiers and sailors. Educational work at Kioto is especially interesting, while from Yamaguchi efforts are being made to reach the neighboring island of Kishiu. The report for 1905 shows in Western Japan, 26 outstations, 30 missionaries, 77 native workers, 8 schools, 463 pupils. The church statistics for both missions are 36 churches, 5,825 communicants.

**VI. Africa.** (1.) **Liberia**: Presbyterian work in Liberia was commenced in 1825 by Rev. J. B. Finney, especially for the establishment of schools. Missions were established along the Kr6o coast near Cape Palms. The climate proved so fatal that the experiment was tried of sending colored ministers, but it was found that these were not exempt from fever, and lacked the ability to organize and superintend. Other white men were sent out, including Rev. D. A. Wilson, and among the colored men Rev. E. W. Byden, and several new stations were occupied. In 1857 there came a great encouragement through a revival. As the Methodists, Dutch, and Presbyterians had no chapels, the Episcopal has been more recently followed by a renewed increase of interest.

(2.) **West Africa**: In 1842 the ABCFM occupied the station of Baraka in the Gabun district, sending out Rev. J. L. Wilson, Rev. Benjamin Griswold, Rev. Albert Bushnell, and Rev. William Walker. Eight years later the Presbyterian Board established a station on the island of Corisco, sending out Rev. J. A. M. Jennings, Rev. C. De Heer, and Rev. Ibta J'tkenge. On the union of the old and new school branches, in 1870, the mission of the ABCFM was transferred to the Presbyterian Board, and the two missions became known as the Gabun and Corisco Mission. Subsequently, on the extension of the work into the interior among the Fang tribe, the name was changed to the West Africa Mission.

The work of the American Board was extended to several stations, and there was good success among the Dikele people, north of the coast by the French brought special restrictions, and the unhealthy climate and the hostility of the people combined to reduce the work so that there remained but the one station at Baraka at the time of the transfer. Similarly the work in Corisco suffered from the Spanish Government (which forbids the teaching of any religion except the Roman Catholic), the unhealthy climate and the tribal quarrels, and there, too, the four stations were reduced to one, tho the native church is a strong one.

In 1866 the Rev. George Paull founded Mbade station on the Benito River, north of Corisco, and on his death, after thirteen months, the work was taken up by Rev. R. H. Nassau, the patriarch of the West Africa Mission. The next field to be occupied was on the Ogowe River south of Corisco; and Mr. Nassau opened a station at Belambia (1874), which was later (1876) removed to Kangwe. In pursuance of a plan to form a line of stations to the Congo, Talaguga was occupied in 1882 and three years later Rev. A. C. Good entered upon his work. Several churches were organized and the mission was progressing favorably when the interference of the French
Government, forbidding any language but French, in the schools, and hampering the evangelistic work, became so serious that the Board decided in 1892 to transfer its work to the Paris Evangelical Mission Society. The removal caused the development on the North. Batanga, at first an outstation of Benito, was made a regular station in 1889, and to this station was transferred the work which had been commenced on the Ogowe River. Under the German Government work has been less difficult, and the most fruitful results have been obtained in the missionary stations near the border lines of the German and French Governments. The extension of the mission from Batanga includes Efula (1899), Elat (1898), MacLean Memorial Station, Lolodorf (1897). This last station is the result of a report by Dr. A. C. Good of a visit to the dwarfs. Miss Margaret MacLean, of Glasgow, Scotland, had become interested in these people through Stanley's letters, and offered to support a mission among them under the auspices of the Board. The work is extremely difficult because of the climate, the diversity of languages, and the timidity of the little people.

The report (1903) shows 39 outstations, 24 missions, 136 native workers, 1,716 communicants, 22 schools with 984 pupils, 2 hospitals, and 2 dispensaries with 1,900 patients. VII. Syria: Mission work in Syria was commenced under the ABCFM, by Pliny Fisk and Levi Parsons, who went to Jerusalem in 1821, but were unable to stay there. In 1823 Messrs. Bird and Goodell arrived at Beirut, and except for a time when (1828-1830) they withdrew to Malta on account of political disturbances, this has been the center of mission work. The other stations occupied were Aboih (1843), Tripoli (1848), Sidon (1851). After the transfer of this mission from the ABCFM to the Presbyterian Board (1870) an extension of work into the Lebanon was planned and the station of Zahleh opened in 1872. This city had paid attention has been for education and publication. Messrs. Bird and Goodell brought with them a printing press and immediately commenced translation and publication. Dr. Eli Smith commenced a translation of the Arabic Bible, completed by Dr. C. V. A. Van Dyck, which is one of the finest in existence. Schools were established in Beirut in 1824, including one for girls. From these grew seminaries in Beirut, Sidon, and Tripoli, while the Syrian Protestant College at Beirut is one of the finest educational institutions in the country. Many and immediately connected with the mission, it has always, nevertheless, been in closest sympathy with evangelistic work. Medical work under the head of Dra. Van Dyck and Post has from the first had a prominent place in the medical department of the mission and has furnished physicians for the entire Arabic-speaking sections of Western Asia and Northern Africa.

Evangelistic work has been always rendered difficult by the peculiar situation of the country, the rivalry of the different communities, the hostility of the Government, and of the Roman Catholics, especially the Jesuits, who have taken advantage of French influence in Syria to hinder, so far as possible, the work of Protestant missions. The churches have suffered also from emigration. Still there has been good progress and the advance in the number of communicants from 294 in 1870 to 2,542 shows good results. The report for 1903 shows 106 outstations, 33 missionaries, 207 native workers, 29 churches, 2,542 communicants, 128 schools, 5,982 pupils, 1 hospital, and 1 dispensary with 6,625 patients, while the press issued 23,395,410 pages. In this last item appears a hint of what is, after all, the greatest work of the Syria Mission. As a center from which the whole Arabic-speaking world may be reached, the fruits of the labor here are found all over Asia and Africa, and in the East Indies. In some cases only other mission in the world do the actual, immediate returns, as given in statistical tables, give some view of the real results.

VII. Persia: The first American missions to Persia grew out of a visit of Messrs. Eli Smith and H. G. O. Dwight of the ABCFM in 1829. On their representations that Society determined to establish a mission in Persia for the Nestorians, and appointed Justin Perkins the first missionary. He sailed in 1833 and reached Tabriz a year later. In 1835 he was joined by Dr. Asahel Grant, and a station was established at Urmia, in November, 1835. One of the most intelligent of the Nestorian bishops, Mar Yohanan, gave Mr. Perkins instruction in the language. For some years there was considerable discouragement, but then came a revival, and for twelve years it continued, the number of converts being very large. At first the effort was to reform the old Church, but a separation became absolutely essential, and in 1852 the first Conference was held, and a confession of faith adopted, as also rules, discipline, etc. In 1870 this mission was transferred from the ABCFM to the Presbyterian Board, and then commenced a policy of extension. Tehran was occupied in 1872, Tabriz in 1873, Hamadan in 1880. Distance between the stations and the diversity of language makes necessary the division into two missions, a Western and an Eastern. Urmia and Tabriz constituting the former, and Tehran and Hamadan the latter.

(1.) Western Persia Mission: The work in Urmia is chiefly among the Nestorians of that city, the surrounding plains and in the Kurdish Mountains. It is the seat of a college, originally established at Mt. Sei, and for which David Tappan Stoddard did much; more lately removed to a fine location in the plain near the city. This college has exercised a great influence throughout the entire section. Fisk Seminary also has become well known throughout that whole region. The missionary press established here has been successful, and the work of Bible translation and the preparation of Christian literature commenced by Dr. Perkins and more lately carried on by Dr. Benjamin Labaree, has been very effective. Medical work has always been prominent. Originally started by Dr. Grant, and carried to a high success with a hospital and a training school by Dr. Cochran, it has been one of the most effective agencies employed. More than once the medical men of the mission have been its protectors in times of stress. The greater number of churches connected with the Nestorian work are in the plain, but there are quite a number through the moun-
tains, extending across the Turkish border into Mesopotamia. For a time the work among the Syrians of Mosul was taken over by the Presbyterian Board from the ABCFM, but was afterward given to the CMS. Considerable distance, the difficulty of access, etc. The work in Tabriz, as also in the outstation of Samas, is largely among the Armenians. Work for the Muslims has been carried on with some success, although the number of converts is not great. The missionaries felt the hostile influence of Russian officials, as Russian political power has developed in North Persia; also the unfortunate effect of the number of independent workers, who have won support from Plymouth Brethren, German Lutherans, and others.

The report (1903) shows 117 outstations, 28 missionaries, 178 native workers, 21 churches with 2,653 communicants, 99 schools with 2,279 pupils, 3 hospitals and 2 dispensaries with 26,312 patients.

IX. Eastern Persia Mission: The city of Teheran was occupied in 1872 by the Rev. Jas. Bassett, after an extended tour, including Tabriz, Teheran, and Hamadan. Educational and medical work has been carried on successfully, and the recognition of the physicians by the Governor of Teheran, the presbyteries of the City of Teheran, and the native churches has been most effective. The number of catechumens and adherents was 146 outstations, 23 stations, 24 missionaries, 44 native workers, 4 churches, 244 communicants, 6 schools, 513 patients, 1 hospital and 4 dispensaries with 8,393 patients.

X. Mexico: In 1872 the General Assembly voted to open work in Mexico, and in September of the same year Messrs. Thomson, Phillips, and Pitkin, with their wives, went to Mexico City. There they found a large body of Mexican believers of anti-prelatical convictions, gathered in nine independent congregations, largely the result of the work of Miss Rankin, Mr. Riley and others. Most of these joined one or another of the different missions that entered the country and furnished the nucleus for their work. The next year Zacatecas and San Luis Potosi were occupied, then Saltillo (1884), Zitacuaro (1893), Chilpancingo (1894), Jalapa (1897). The work in Saltillo is the immediate successor of Miss Rankin's work at Monterey. The story of the mission contains many incidents of great heroism, in bitter persecution, especially in Guerrero and Zitacuaro. Educational and publication work has had a prominent place, and the press at Mexico City has been a most effective evangelistic agency. For a time there were two missions, Northern and Southern. In 1884 these were united, and the native churches have been organized in three presbyteries, Zacatecas, Mexico City, and the Gulf. The Mexican Home Mission Board, organized in 1890 by the Presbytery of the City of Mexico, supports two evangelists in Guerrero and Mexico.

The report (1903) shows 146 outstations, 23 missionaries, 81 native workers, 45 churches, 3,902 communicants, 29 schools, 683 pupils.

X. Guatemala: Work was commenced in Guatemala in 1882 in response to special appeals for Protestant teaching and the assurance by President Barrios of sympathy and full freedom of action. The first work was on account of the great distance, the difficulty of access, etc. The work in Tabriz, as also in the outstation of Salmas, is largely among the Armenians. Work for the Muslims has been carried on with some success, although the number of converts is not great. The work has felt the hostile influence of Russian officials, as Russian political power has developed in North Persia; also the unfortunate effect of the number of independent workers, who have won support from Plymouth Brethren, German Lutherans, and others.

The report (1903) shows 117 outstations, 28 missionaries, 178 native workers, 21 churches with 2,653 communicants, 99 schools with 2,279 pupils, 3 hospitals and 2 dispensaries with 26,312 patients.

XI. Korea: The first mission work in Korea was by Messrs. Ross and McIntyre, of the Scotch Presbyterians, in 1884, and the number of conversions resulted, and it was evident that a good basis for mission enterprise existed. In 1880 a Korean of high rank, representing the Government in Japan, became a Christian and begged earnestly for missionaries for his country. In response to this appeal the Presbyterian Board, in 1884, appointed Dr. H. N. Allen, then a medical missionary in China, to go to Korea. He was appointed physician to the United States Legation at Seoul, and thus was assured safety and favorable reception. His influence soon became very great, and he was received as physician to the royal household and placed in charge of the Government hospital. Some months later Dr. Horon and Rev. H. G. Underwood joined the mission. For several years the work was chiefly medical and educational. The first convert was baptized in 1886, and the first church organized in 1887. After 1890 the advance was marvelously rapid. In the "Presbyterian Council" including the two Presbyterian Missionaries, the one from Canada, and the Woman's Union of Victoria, the number of catechumens and adherents was over 22,000 in 1903. The opportunities for direct preaching have so absorbed the energies of all that schools have been less prominent than in some other missions, yet there is a well-established system of education. Medical work has developed so that there are three hospitals at Seoul, Iusan, and Phing-yang, and all powerful evangelistic agencies. In addition to the work at Seoul, other stations have been opened at Iusan (1891), Phing-yang (1893), Taiku (1898), and Syen-chun (1901).

At the time of the terrible cholera epidemic in 1895, the missionaries of all the Boards turned their attention to hospital work, and were able not merely to save many lives, but to overcome much of the hostility to mission work. The work among the women has from the beginning had phenomenal success, and the general indications for permanent church life are most satisfactory.

The report in 1905 shows 340 outstations, 64 missionaries, 140 native workers, 3 organized...
churches (312 incompletely organized churches), 5,481 communicants, 66 schools, 1,082 pupils, 2 hospitals and 5 dispensaries, with 2,524 patients.

The printing press at Seoul has done most excellent work on over 1,000 pages.

The Presbyterian Church in the United States, like all the denominations, has been a part of the solution of the foreign mission problem. It has contributed to the work of the church abroad in a variety of ways. The Presbyterian Church in America has been active in the mission field through its Board of Foreign Missions, which was established in 1814. The Board has a history of more than 150 years of service, and has played a significant role in the development of the Presbyterian Church's mission work.

The Board has been involved in a number of different missionary societies, and has also been involved in the establishment of a variety of mission boards. The Board has been involved in the establishment of the Presbyterian Board of Foreign Missions, which was established in 1814. The Board has also been involved in the establishment of the Presbyterian Board of Home Missions, which was established in 1864.

The Board has also been involved in the establishment of a number of mission boards, including the Board of Home Missions, the Board of Foreign Missions, and the Board of Education. The Board has also been involved in the establishment of a number of mission societies, including the Board of Home Missions, the Board of Foreign Missions, and the Board of Education.

The Board has also been involved in the establishment of a number of mission boards, including the Board of Home Missions, the Board of Foreign Missions, and the Board of Education. The Board has also been involved in the establishment of a number of mission societies, including the Board of Home Missions, the Board of Foreign Missions, and the Board of Education.

The Board has also been involved in the establishment of a number of mission societies, including the Board of Home Missions, the Board of Foreign Missions, and the Board of Education.
in 1867, and where he was joined the following year by several associates, including Rev. M. H. Houston. Others are Su-chau (1872), Hsin-chang (1892), Kiang-yin (1896), Kia-luang (1895). In common with other missions this one suffered interruptions during the Boxer uprising, but less loss than those in the north. During their enforced absence from the interior stations the missionaries improved the opportunity to study and work among the sailors and natives at Shanghai. Since their return, the various departments of work, including the girls' boarding school at Hang-chau, other schools at the different stations, and the medical work have been resumed with success.

(2.) Northern Kwangtung: This mission includes the stations of Chin-kiang (1883), Su-tsien (Suchien) (1894), Taung-kiang-pu (1887), Huai-ngan-fu (Whai-an-fu) (1897), and Hen-chau-fu (1897). Here also the missionaries were obliged to withdraw during the Boxer troubles, but native workers remained, and except for a few weeks, services were continued. Since the reopening of active work this mission has shared with others the increased interest on the part of the natives and the larger opportunities for each department of work.

The report (1902) shows for the Mid-China Mission 24 outstations, 42 missionaries, 36 native workers, 7 churches with 448 communicants, 10 schools with 204 pupils. North Kwang-si Mission, 6 outstations, 26 missionaries, 10 native workers, 1 church with 95 communicants, 1 school with 12 pupils.

II. Brazil: (1.) Southern Brazil: This includes the stations of Campinas (1869), Lavras (1892), Araguary (1895), São Paulo (1895), São João del Rei (1895). As in so many cases, the early history of the mission was one of patient labor in the face of great difficulties, but of late there has been considerable improvement. The organization of the Synod of Brazil, by the cordial cooperation of the Northern and Southern Presbyterian Churches in the U. S., has been a distinct advantage and the single theological institution at São Paulo for both boards has been very helpful. The development of Mackenzie College also has made possible a concentration of educational work. The 16 missionaries, besides their care of schools and press work, supervise 60 outstations, and report 1,316 communicants.

(2.) Northern Brazil: The work in this mission was commenced in 1873 at Recife (Pernambuco). In 1882 Fortaleza or Gera was occupied, followed by Maranhão (1882), Paraíba (1894), Natal (1898), Caxias (1899). An indication of the difficulties encountered is found in the statement in the report for 1902 that even at Pernambuco it is still rare for services to be conducted in the chapel without stones being thrown at the windows. The prevalence of gambling and intemperance makes work very difficult and the general poverty of the people hampers the sale of Bibles and other books. There are (1902) 14 missionaries, 18 native workers, 17 outstations, 10 organized churches, 1,114 communicants, 3 schools with 127 pupils.

III. Mexico: The work in Mexico was commenced in 1874 at Brownsville, Texas, and the city of Matamoros, just across the Río Grande River. It has since been extended to include Victoria (1880), Linares (1887), and Monte-morelos. The 5 missionaries and 11 native helpers care for the work in 53 outstations, with 10 organized churches and 602 communicants. As the country is sparsely populated there is a large amount of traveling necessitated. As in Brazil, the church work (1902) shows 7 missions.

The Presbyterian Boards (North and South) in Mexico united in 1901 in the Synod of the Presbyterian Church in Mexico. The movement has had the cordial support of the Board and the churches have already felt the advantage from the union.

IV. Cuba: In response to an earnest appeal from Protestant Christians in Havana, the Executive Committee sent Mr. Graybill of the Mexico Mission to Cuba in the summer of 1890. This visit resulted in the organization of two Presbyterian churches, one in Havana and one in Santa Clara, a town in the interior of the island. Mr. Graybill also licensed and ordained to the work of the Gospel ministry Sr. Evaristo Collazo of Havana.

The disturbed condition of the country seems to have interfered with the continuance of the work, but at the close of the Spanish War in 1899 the Board took up the field again and placed a missionary, Rev. J. G. Hall, at Cardenas. Work has also been undertaken at Cabaibre and Remedias. The report (1902) shows for the Board 12 missionaries, 2 native workers, 1 organized church, 63 communicants. Attention is paid to education, and in one instance the missionary gained access to a large private school, with free permission for Bible instruction in return for lessons in English.

V. Japan: The first station founded in Japan by this Board was Kochi (1883). Then followed Nagoya (1887), Tokushima (1889), Kobe and Okazaki (1890), Takarazuka (1893) and Susaki (1898). There are also 80 outstations, and the missionary force of 28, with 35 native helpers, reports (1902) 4 organized churches, with 1,458 communicants. These churches are identified with the Church of Christ in Japan. The strength of the mission is given to evangelistic work, and the 20th century forward movement under the auspices of the Japan Evangelical Alliance has had manifest good results in uniting the churches, giving them greater courage and success, and emphasizing before the community the essential unity of the Japanese Churches.

VI. Africa: For many years the Southern Presbyterian Church had cherished a desire to plant a mission in Africa. During the latter part of his life, the Rev. Dr. J. Leighton Wilson, the father of the mission work of his Church, and who had himself labored nearly twenty years in Africa, earnestly laid this matter before the General Assembly; but various obstacles prevented the accomplishment of his heart's desire until he had passed to his rest. In the mind of the Southern Church there was an abiding conviction that because of the large negro population within her own bounds she was specially called of Providence to undertake this work. Accordingly, at the meeting of the General Assembly in 1889, the Executive Committee of Foreign Missions was directed to take steps looking to the opening of the long-templated mission in the "Dark Continent." Early in 1890 the Rev. Samuel N. Laplaye (white), of the Synod of Alabama, and the Rev. W. H. Sheppard (colored), of Atlanta, Ga., were commissioned and sent forth with instruc-
tions to found a new mission in the Congo Free State. The appointment of Mr. Sheppard (who had already proved himself a most valuable worker) was of special interest, since he was the first fruits of a long-cherished desire on the part of many in the Southern Church to see some of this race bearing the Gospel to the land of their forefathers. He was also the first fruits, in the work, of the Missionary Society, of Tuscaloosa, Alabama, which had been established some years before by the Southern Presbyterian Church exclusively for the purpose of training a colored ministry. Proceeding first to England, and then to Brussels in Belgium, they received every encouragement and assistance in preparation for their work. King Leopold himself granted Mr. Lapsley a personal interview, in which he expressed the deepest interest in his mission. They have gone on as pioneers, with instructions that their station be sufficiently separated from other missions to give it the character of a thoroughly independent work. They were instructed to seek a locality as healthy as possible, on some highlands removed from the coast, and yet not too distant from the basis of supplies. Luebo, near the southwestern border of the Congo State, and the junction of the Luebo and Lubua rivers, was selected and has been the headquarters of the mission. In 1897 Ibauzi, a short distance from Luebo and a point of convergence for the trade of a large section of territory, was occupied. The missionaries are enthusiastic over the outlook, hoping for results as remarkable as those manifest in Uganda, as the tribes already reached seem peculiarly accessible to the Gospel. The report (1902) shows 9 missionaries, 20 native helpers, 8 outstations, 854 communicants, 226 pupils in the 2 schools. A noticeable fact is the addition of 382 members in a single year.

VII. Korea: The first work of the Board in Korea was in 1892, but the present location was not made until 1896, when the station of Chungju was opened, followed by Kunsan (1896) and Mokpo (1898), all on or near the west coast south of Seoul. There are (1902) 18 missionaries, and special attention is paid to medical work, one of the physicians from the Woman's Board reporting 1,250 visits from women patients at towns. There are 5 missionaries and 4 native workers, 6 outstations, and 2,628 professed Christians, of whom 1,292 are communicants. Station also of the SPG (1870), with (1903) 3 missionaries. Station also of the Swiss Romande Mission (1897), with (1903) 2 missionaries, one of them with his wife; 1 woman missionary, 1 place of worship, 1 printing house, 2 day schools, and 36 professed Christians. Station also of the WMS, with (1903) 5 missionaries, 25 native workers, 5 outstations, 7 Sunday schools, 3 day schools, 1 theological class, and 680 professed Christians, of whom 412 are communicants. Station also of the African Methodist Episcopal Missionary Society.

PRIMITIVE METHODIST MISSIONARY SOCIETY: Publishing House, 48 Aldersgate St., E. C., London. The Primitive Methodists are a body which arose in England in 1810. Finding themselves gaining strength, they organized in 1843-44 a foreign missionary society, adopting Canada, New Zealand, and Australia as their fields of labor. These fields were afterward transferred to Methodist bodies in those countries, and the Society, existent from its home department, carries on foreign work in West Africa (Fernando Po), South Africa (Cape Colony), and Central Africa (Upper Zambesi). The work in Fernando Po was commenced in 1870, in response to an appeal by a sea captain and carpenter who visited Santa Isabel and found a small community gathered by an English Baptist missionary who had been driven away by the Spaniards. Spanish law having changed, the Missionary Committee of the Primitive Methodist Connexion sent two missionaries, Revs. R. W. Burnett and H. Roe, with the object of opening a station at Santa Isabel. They met with a hearty welcome. In 1871 Rev. D. T. Maylott joined them, and an attempt was made to open a new station along the west coast. The plan met with some difficulties, but in 1873 George's (or San Carlos) Bay was occupied.

Associated with Mr. Maylott in this mission was the Rev. W. N. Barleycorn, one of the first converts of Santa Isabel, and his work among the Babus was very successful, the first convert of the west mission being baptized in 1874. Since then several new missionaries have been sent out, and stations have been opened at Banni, Bottlenose, Idua, Jamestown, Urua Eye, and Ikot Nteka, and schools have been established in a number of towns. There are 5 missionaries and 4 native teachers.

In 1869 an appeal for help came to the Missionary Committee from Aliwal North, a town in the Transvaal Colony, self-sustaining. In 1874 work was commenced among the Greeks at Athos, extending afterward to Bolo and Salonica. Later it was confined to the last two towns. There are (1902) 18 missionaries, and special attention is paid to medical work, one of the physicians from the Woman's Board reporting 1,250 visits from women patients at towns. There are 3 churches with 124 members, and one of the most interesting features is the employment of a native evangelist by a few of the native Christians.

harn (formerly at Aliwal North) and Mrs. Buchen-
ham, with Rev. A. Baldwin and Mr. J. Ward, 
sailed for Africa and opened the way for the 
establishment of four stations: Nkala, Nanzela, 
Momba, and Walker's Drift, besides several 
outstations. It is still largely pioneer work, 
even in the work of reducing the language of the 
Sajobas to form. Schools are successful and 
medical work has brought many within reach of 
the saving gospel.

There were in the three missions in Africa, in 
1900, 39 missionaries (including wives), 10 sta-
tions and 11 outstations, 1,463 communicants, 
and 2,600 adherents. A Woman's Foreign Mis-
ionary Society, organized in 1897, is auxiliary 
to the general society.

PRINCE ALBERT: The chief settlement of the 
district of Saskatchewan, Canada, on the North 
Saskatchewan River, about 35 miles above its 
confluence with the southern branch. Station of 
the Canada Presbyterian Church (1866), with 
(1903) 1 woman missionary, 1 Sunday school, 
and 1 Sunday School reader. Station of the 
ABMU (1854), with (1903) 1 missionary, 2 native 
workers, 3 outstations, 3 day schools, 1 college, 
and 426 professed Christians, of whom 167 are communicants.

PROTESTANT COMMUNITY: In Turkey the 
system of civil administration requires each tribe 
or race, or other division of the people to have a 
chief to whom the Turkish officials can look for 
its proper control. From the time of the con-
quest of Constantinople the religious heads of the 
various sects found in the Turkish empire have 
been recognized as political chiefs of their respec-
tive flocks, with certain official rights and privi-
elges. In 1843-47 the prelates of the Armenian 
Church withdrew from their friendly attitude 
toward the American missionaries and excommuni-
cated and boycotted those who adopted the idea 
of independent study of the Bible, using their 
position as political chiefs to turn the Turkish 
police force upon the work of extirpating the 
heresy.

To secure the Evangelical Armenians against 
such persecution, the British Ambassador at 
Constantinople obtained from the Sublime Porte 
recognition of the "Protestant Community" as a 
separate political body, having a civil head 
(called in Turkish "Vekil," or representative), and 
liberty of conscience in matters of religion for all 
who might place themselves under protection of 
the new political organization. In 1850 an 
imperial edict confirmed these arrangements, 
placing the Protestant community upon the same 
political footing as the Greek Church or the 
Armenian Church.

This community now numbers about 100,000 
Souls, adherents of the various evangelical 
denominations in different parts of the empire. 
All of these "Protestants," or evangelicals, look 
to their civil head, or Vekil, to represent them and 
their civil and political interests at the palace of 
the Sultan, and to inform them of their sovereign's 
wishes or commands.

Boston, 1879; Dwight (H. G. O.), Christianity 
Revived in the East, New York, 1850.

PROTESTANT EPISCOPAL CHURCH IN THE 
UNITED STATES OF AMERICA: 1. Domestic 
and Foreign Missionary Society. 2. American 
Church Missionary Society. The American 
Protestant Episcopal Church, being, in its early 
history, a mission itself, generations passed 
before it felt strong enough to found missions on 
a large scale, either within or without its own 
boundaries. In the beginning of the 19th century 
interest in missionary work became manifest in 
the American Church, one of the prime movers 
in the cause being Bishop Griswold, who, in cor-
respondence with the Secretary of the Church 
Missionary Society suggested that an American 
d clergyman be sent out by that Society into the 
foreign field. The American Missionary Society 
(1817) urged the formation of an American 
Board and offered pecuniary aid. This advice 
was acted upon, and the Domestic and Foreign 
Missionary Society was instituted in 1820, the 
Rev. J. R. Andros being the first of the American 
clergy to offer himself for the foreign field.

I. Domestic and Foreign Missionary Society: 
Altho organized in 1820 as a society it was not 
until 1835 that it assumed its present character 
and became but another name for the Church 
Itself. Previous to that time the administra-
tion of the Society's work had been committed 
to a Board of Directors, who through its Execu-
tive Committee had made several attempts to 
found missions in heathen lands, but had only 
succeeded so far as to appoint a lay teacher in 
Africa and two clergymen to China. They had, 
however, sent two clergymen to Greece in 1830.
In 1835 a change was made in organization, 
which provided that the Society should be consid-
ered as "comprehending all persons who are 
members of this Church," to whom the Board of 
such persons are members of this Church. This action placing 
general mission work immediately under the 
direction of the Church, was hailed with enthu-
siasm, the newly awakened interest being par-
ticularly manifested in the marked increase in the 
contributions.

The Board of Missions meets triennially and is 
composed of both Houses of the General Conven-
tion and the Board of Managers. The Mission-
ary Council meets annually, except in conven-
tion years, and is composed of all the bishops, 
the Board of Managers, such other clergymen and 
laymen as the convention may select, and one 
presbyter and one layman from each diocese or 
missionary district, to be chosen by its conven-
tion or convention. The Board of Managers, 
selected by General Convention, consists of 16 
bishops, 16 clergymen and 15 laymen. The 
other bishops, and the Secretaries and Treasurers 
of the Domestic and Foreign Mission Society, and of 
the Board of Managers, are members ex officio, 
but have no vote.

The first foreign field chosen by the Society 
immediately on its organization was Africa, but 
it was not until 1836 that work was actually 
begun in Mbronoria, where the American Coloniza-
tion Society had founded a colony of free colored 
people.

In 1830 Greece was chosen as a field where gen-
eral Christian intelligence and education were
sorely needed, and Athens was decided upon as the most favorable point for location.

In 1834 the Society voted to make China a field for missionary labor, and in 1835 Rev. F. R. Hanson and the Rev. H. R. Lockwood were accepted as labors for that field.

In 1839 Rev. Messrs. C. M. Williams and J. Liggins, the first Protestant missionaries to Japan, were sent there by the Society of the Protestant Episcopal Church of America. In 1835 a mission commenced by a clergyman four years before in Haiti was transferred to the Society of the Protestant Episcopal Church, and became one of their fields of active labor.

Africa: The mission work in Africa is confined to the Republic of Liberia. Mr. and Mrs. J. M. Thompson (colored), residing at Monrovia, were appointed as missionary teachers in 1835, and in 1836 Rev. Thomas S. Savage, M.D., the first foreign missionary, landed at Cape Palmas. During the early years of the mission frequent difficulties occurred between the colonists and the native “bushmen,” and the missionaries and mission property were often in danger. In 1846 Rev. John Payne was appointed the missionaries at Cape Palmas to abandon the town and take refuge on a U.S. ship, and the school at Cavalla, an outstation, had to be closed. The next year found the work going on quietly, but in 1845 the disturbances again threatened the mission; still in spite of the political troubles there were substantial proofs of the progress of the mission. In 1849 the corner-stone was laid of the first Episcopal church edifice of Liberia, and in 1850 Rev. John the Rev. J. H. Hill. The principle on which the mission was established was that of not attempting to make proselytes, or to withdraw the people from their own Church, but simply to spread Scriptural truth among them in the expectation that this would lead eventually to the reformation of the Church by the Greeks themselves. The first mission begun by the object of the Mission was afterward extended to the other Eastern Churches. The mission in Greece has been wholly educational, and after the death of Mr. Hill the Society ceased to consider it a part of its field.

China: The China Mission dates from the landing at Canton of the Rev. Messrs. Hanson and Lockwood in 1835. They proceeded, however, to Java, to labor there, at Batavia, among the Chinese. The third missionary, the Rev. W. Boone, M.D., reached Batavia in 1837. In February, 1840, he really began work on Chinese soil by the opening of a station at Amoy. Four years later he was consecrated as the first bishop of the Anglican communion in China. In 1845 the mission moved from Amoy to Shanghai, and in 1846 Mr. Kong Chai Wong, afterward a clergyman, was baptized, the first convert, on Easter Day. In 1868 stations were opened in Wu-chang, capital of the province of Hu-pei, and in Han-kau. The work is now divided into two districts, Shanghai and Han-kau. The former includes, as stations, Kia-ting (Kia-ting) (1882), Shanghai City and Tsing-pu (1902). The latter, besides Han-kau and Wu-chang, Shasi and Ichang (1886), Han-chuan (1892), and Wu-hu (1891), Kin-kiang (1901) and Nga-king.

Aside from the evangelical work which is pushed energetically, St. John’s College, at Shanghai, one of the best in China, and hospitals at Shanghai, Wu-chang and Nga-king are kept up to a high grade of efficiency.

The missionary staff includes (1903) 3 bishops (one, the venerable Dr. Schereschewsky, residing in Japan), 34 Presbyters (19 foreign, 15 Chinese), 13 deacons (2 foreign), 8 physicians (foreign), 21 missionary teachers (foreign), 25 wives of missionaries, and 157 other native workers.

There are 56 places of preaching, 1,494 communicants, 45 day schools, and 9 boarding schools, with about 1,500 pupils. English services are also conducted at several places.

Japan: This mission was established in 1859 by the Rev. Messrs. C. M. Williams and J. Liggins, who were the first Protestant missionaries to settle in the empire. The first baptism was reported in 1866. Until 1874 the Mission was under the jurisdiction of the Bishop of China, but in that year, owing to the increased extent of both fields, it was decided to separate them into two dioceses, Rev. C. M. Whistler, the Bishop of China, was appointed Bishop of Japan, and a new bishop set over China. With the growth of the work Japan was divided into two dioceses: Tokio and Kioto. The former includes the stations of Tokio (1873), Matsuysana, Takasaki, Mayebsahi (1888), Fukushima (1890), Sendai (1894), Hiroaki (1897), besides a number of subordinate stations. The diocese of Kioto includes Kito (1889), Nara (1887), Osaka (1875), Kanazawa (1897), and a number of subordinate stations.

Holy Trinity Cathedral, at Tokio, has a full series of offices in Japanese, and a church house is arranged for near the Imperial University, as a center for work among students. There also are Trinity, Divinity, and Catechetical School, St. Paul’s College, and St. Margaret’s School, all rapidly growing schools. The medical department includes St. Luke’s Hospital, Tokio, and St. Barnabas Hospital, Osaka.

The missionary staff includes (1903) 3 bishops (one, Bishop Williams, retired), 34 Presbyters (14 Japanese), 9 deacons (7 Japanese), 2 physicians, 39 other foreign workers, including wives of missionaries, 135 other native workers. There are 74 places of preaching, 2,033 Japanese communicants, 19 schools, with 1,357 scholars.
nevertheless, regular assistance is given by the war, pestilence, and famine; yet, considering the enrolled as missionaries; there are 22 places of Missions commissioned Bishop Brent to take reorganized as an independent church, but, in regard to Domestic Missions, an agreement for mutual appointment and approval of missionaries has been made. The foreign work of the Society is in Brazil. There are 8 clergy, including the bishop, 7 churches or chapels, 488 communicants. The headquarters of the mission are at Port Alegre, and among other places occupied are Pelotas, Jaguerdo, and Rio Grande. The Society has also taken up work in Cuba, where it occupies Havana and Matanzas with 5 clergy, who take charge of the work by the Society to it as a Church in communion with the Protestant Episcopal Church. Aside from the Bishop, 12 clergymen are enrolled as missionaries; there are 22 places of preaching, 677 French-speaking and 41 English communicants, 9 day schools with 185 pupils. There is also some work among the Spanish-speaking people of Santo Domingo. The work of the Society in Mexico is carried on both among Spanish-speaking and English-speaking people. Among the Church representatives are 10 presbyters and 7 deacons, all Mexicans, who minister to 871 communicants. There are also several schools.

**The Philippines:** In the fall of 1891 the Board of Missions commissioned Bishop Brent to take charge of work in the Philippine Islands, and he arrived at Manila in May, 1902. Already two clergymen were at work there and a lay worker. One of these was assigned to English services and the other took up Spanish work. Later a missionary was appointed to labor among the Chinese population. In 1899 there was a formal agreement in which the Church and its representatives are 10 presbyters and 7 deacons, all Filipinos, who minister to 871 communicants. There are also several schools.

**PROVINCE WELLESLEY:** A strip of territory on the west coast of the Malay peninsula, opposite Penang, 45 miles in length, with an average width of about 8 miles, including a total area of 270 square miles. It forms part of the British Colony of Straits Settlements. Station of the SPG (1879), with (1903) 1 missionary, 8 native workers, 2 places of worship, 5 day schools, 2 boarding schools, and 256 professed Christians, of whom 158 are communicants. Station also of the SPG, with (1903) 28 native workers, 16 places of worship, 9 day schools, 2 boarding schools, and 591 professed Christians, of whom 193 are communicants. Some write the name Pudukotei.

**PUEBLA:** A city in Mexico, 76 miles east-southeast of Mexico City. The sacred city of Mexico, containing many religious and charitable institutions. Population, 15,384, Hindus, Muslims, Christians. Station of the Leipzig Missionary Society (1849), with (1903) 2 missionaries and their wives, 2 native workers, 7 places of worship, 5 day schools, 3 boarding schools, and 256 professed Christians, of whom 158 are communicants. Station also of the SPG, with (1903) 28 native workers, 16 places of worship, 9 day schools, 2 boarding schools, and 591 professed Christians, of whom 193 are communicants. Some write the name Pungo Ndongo.
PUNJAB: One of the great provinces of British India; its highest northern point is in latitude 35°, its most southern, 27° 39'. Its limits of east longitude are 69° 35' and 78° 35'. The area of that portion of it under British administration is 97,209 square miles; population, 20,330,000. But there are 34 native states whose territory is intermingled with that of the British possessions—al! of which are under the political supervision of the Punjab Government, tho each has its own native chief (see article Native States, which the relations are explained more at length), and the area of these swells the total area of the Punjab to 133,741 square miles, and its aggregate population to 21,000,000. The Punjab is governed by a lieutenant-governor, under the general supervision of the governor-general and viceroj of India. It contains one-fifth of the Mohammedan population, but only one-tenth of the Hindu. The name means “Five Waters,” and is derived from the fact that its Ludhiana, where, besides the usual work of preaching, there are 11,000,000 Mohammedans, 8,000,000 Hindus, and 1,500,000 Sikhs. There of the natural area of the Punjab, tho now to disregard, altho there has not been hope of accomplishment, the Punjab missionaries to labor among Mohammedans. The Afghans speak Peshawar. Lahore was the first, and the Punjab, in Sialkot, and adjoining districts. The Punjab was finally made a part of the English dominions. The city of Delhi, which indeed lies outside of the natural area of the Punjab, the now within its political area, stands on the site of Indraprastha, a prehistoric Hindu capital, the foundation of which is said to go back to the 7th century B.C. It was in 1849 that the Punjab was finally made a part of the English dominions.

Classifying the people by religions, nearly 60 per cent. are Mohammedans; about 40 per cent. Hindus; 7 per cent. Sikhs. In round numbers, there are 11,000,000 Mohammedans, 8,000,000 Hindus, and 1,500,000 Sikhs. There are nearly 38,000 Jains, and over 40,000 Christians, of whom less than 5,000 were natives. The preponderance of Mohammedans is explained partly by the fact of early and long Mohammedan possession of the Punjab by rulers of that faith (as just described), and partly by its propinquity to the Mohammedan countries on the northwest, whence immigration is so easily accomplished.

The people of the Punjab are largely agriculturalists. A sixth of the population of British Punjab is thus returned. The commercial and artisan classes number nearly 1,500,000. The rainfall is slight; in some parts of the province artificial irrigation is resorted to with good results. The rivers swell with the melting of the mountain snows, and when they subside leave well-watered strips of alluvial land enriched with the fresh deposits of each season. Education is in a tolerably forward state. It is stimulated somewhat by the existence of the Punjab University, which dates only from 1882, with which a number of colleges are affiliated. The language of the Hindus is Punjabi—allied to Hindi. Hindustani and Persian are used by the Mohammedans. The Afghans speak Pashto. Missionary work in this province began in 1834. The American Presbyterians were first on the ground, and their earliest station was at Ludhiana, where, besides the usual work of preaching, schools were at once begun, and a printing-press established, in which has since issued multitudes of books and tracts, including Biblical translations. Many other places have since been occupied. The Church Missionary Society occupied Amritsar in 1851. In 1870 that Society began a theological school at Lahore for training native preachers, which was the first school of the sort in India, it is said, to include Hebrew and New Testament Greek in the curriculum of study for native Christian students. The United Presbyterianists of America have a mission in the Punjab, in Sialkot, and adjoining districts. The Church of Scotland has a station at Chamba. Several leper asylums have been founded in connection with one another of these missions, but these are now managed by the "Mission Lepers in India."

The Moravians, true to their instincts of selecting the most difficult, laborious, and apparently unpromising fields, started a mission in 1855 at Kailang, far up among the Himalayas, in British territory, among the Tibetan mountaineers. Their work has involved severe hardship and unusual self-denial, but it has not been altogether without its direct results. Circumstances have impelled the Punjab missionaries to labor among Mohammedans probably to a greater extent than has been attempted elsewhere in India. More than half the population being Mohammedans, opportunities have been constantly presented for meeting them, which it has not seemed right to disregard, altho there has not been hope of great success. Several of the missionaries of the Punjab have studied the religion of Mohammed profoundly, and have published scholarly works in elucidation of it, while not neglecting the preparation of other works designed to commend Christianity directly to the Muslims themselves. Their labors have resulted in the conversion of many Mohammedans, some of whom have become able and fearless preachers of the Gospel.

PUNJABI LANGUAGE: A language spoken by Sikhs and others in the Punjab, India. The number using this language is estimated at over 20,000,000. The language belongs to the Indic group of the Aryan family, but it has much profited by borrowing from Arabic as well as Persian. It is written with characters called Gurmukhi and derived from the Sanskrit Devanagar.

PURDIE, Rev. Samuel Alexander: Born in the
QUALIFICATIONS OF THE MISSIONARY: In missions, as in all human enterprises, the man is the central factor. "One Paul did more for the spread of the Gospel than the ten Apostles." That is true and but expresses in the concrete the supreme importance of the selection of men. Livingstone wrote: "The sort of men wanted for missionaries are men of education, standing, enterprise, zeal, and piety. It is a mistake to suppose that any one, so long as he is pious, will do for this office. Pioneers in everything should be the ablest, best qualified men, not those of small ability and education. This is especially applicable to the first teachers of truth in regions which may never before have been blessed with the name and Gospel of Jesus Christ." Qualifications are more important than numbers. "Missionaries must be weighed and not counted." This who is to represent Christ and the Church before heathens, should be Christ-loving and Christlike, should have a passion for the salvation of souls, and should not hesitate to give up luxury and during the great festivals of Jagannath, which are held here, there are 100,000 pilgrims added to the ordinary residents. Station of the BMS, (1825), with (1903) 1 missionary and his wife, 11 native workers, 3 outstations, 3 Sunday schools, 4 day schools, and 645 professed Christians, of whom 300 are communicants.

PURNEAH. See PURNIAH.

PURNIAH: A town in Bengal, India, and capital of the district of Purniah, 56 miles N. E. by N. of Bhagalpur. It has a large jute trade. It is subject to severe epidemics of fever. Population (1891) 14,600, of whom 9,600 are Hindus and 4,800 are Mohammedans. Station of the BMS (1899), with (1903) 1 missionary and his wife and 2 native workers. Some write the name Purneas.

PURULIA: Capital of the Manbhum district, Chota Nagpur, Bengal, India. Population, 5,695. It has good public buildings, a hospital, and considerable trade. An important center for mission work among the Kols. Station of the Gossner Missionary Society, with 4 missionaries, 37 native workers, 7 places of worship, 5 Sunday schools, 1 boarding school, 1 home for untainted children of lepers, and 1,673 professed Christians, of whom 870 are communicants. Station of the Mission to Leperos (1887), aiding the leper work carried on by the Gossner Society.

PUTIKI: A town and port of North Island, New Zealand, situated 79 miles S. E. of New Plymouth, on the Wanganui River, crossed by an iron bridge 600 feet long. It is the principal port on the W. coast and has sawmills, warehouse the town is a Maori college for the education of native youths. Population, 5,000. Station of the CMS, (1899), with (1903) 1 missionary and his wife, 16 native workers, 1 day school, and 320 professed Christians. The district appears in report sometimes as Wanganui.

PYENG-YANG. See PHYENG-YANG.
Qualifications

THE ENCYCLOPEDIA OF MISSIONS 610

clearly to indicate their importance to the future church. The following are some of the characteristics specified as essential to ministerial usefulness:

1. A bishop must be anapliptos (I. Tim. iii: 2) or anepiskopos (Titus i: 7), both of which are translated "blameless." These terms mean, that his character should be such that an enemy can take hold, or against which he can hurl an accusation.

2. He must be "apt to teach," capable, by natural gifts and scholarly attainments, of imparting instruction to others.

3. He must be "sober," a balanced, judicial judgment, that can view everything to good account.

4. "Temperate," having such a control of all powers of body and mind as can utilize them to the best advantage, resulting in that mental poise, that self-reliance which is the mark of a "winner." "Victims" have "eyes and ears open to see and hear," and turn everything to good account.

5. "Zealous," fervent in spirit—that enthusiasm that can concentrate on one thing—under the constraint of love.

6. An affectionate disposition (I. Thess. ii: 7-12) which wins affection in return and secures sympathy for the message he has to give. Such references as these to missionary character are scattered throughout the New Testament, and their careful study and classification will repay any candidate for this sacred calling.

Instead of more minute inquiry in that direction, however, it may prove even more profitable to gaze upon the features of the Master Himself, who was the great missionary and is the model for all missionaries. Certain salient characteristics of His life are regarded as essential and fundamental, and, indeed, inclusive of all others that fill in a complete equipment.

1. Jesus Christ was called to the work. He was sent of the Father. "As the Father sent me, even so send I you." 

2. He called is the result of habitual meditation. They were not mere effort of memory, but a profound anticipation of victory.

3. "Temperate," having such a control of all powers of body and mind as can utilize them to the best advantage, resulting in that mental poise, that self-reliance which is the mark of a "winner." "Victims" have "eyes and ears open to see and hear," and turn everything to good account. 7. "Zealous," fervent in spirit—that enthusiasm that can concentrate on one thing—under the constraint of love.

8. An affectionate disposition (I. Thess. ii: 7-12) which wins affection in return and secures sympathy for the message he has to give. Such references as these to missionary character are scattered throughout the New Testament, and their careful study and classification will repay any candidate for this sacred calling.

Instead of more minute inquiry in that direction, however, it may prove even more profitable to gaze upon the features of the Master Himself, who was the great missionary and is the model for all missionaries. Certain salient characteristics of His life are regarded as essential and fundamental, and, indeed, inclusive of all others that fill in a complete equipment.

1. Jesus Christ was called to the work. He was sent of the Father. "As the Father sent me, even so send I you." How that call is to be recognized and distinguished is one of the complexities of many an earnest life, and an exceedingly important problem. With the call of God assured, to fall back upon, courage will not fail in the darkest hour, but without that certainty, there will often be misgivings lest after all there may have been a mistake. How can the mind of the Master be known in this matter? To Paul the call received on the way to Damascus was in childhood that became apparent. He breathed the atmosphere of the Prophets. In the brief record of His earthly life preserved to us, so many quotations are found as to indicate familiarity with every part of the Old Testament, to which He constantly referred as the Scriptures that can never be broken. Such familiarity, needless to say, was not mere effort of memory, but a profound appreciation of the value and relations of truth, the result of habitual meditation. He was more precious than gold or silver, and His meditation all the day. To Him the Scriptures were divine in origin, and the final appeal, "What saith the Scriptures?" "Search the Scriptures." "The Scriptures cannot be broken." "That the Scriptures might be fulfilled." He staked His all upon their integrity, and instilled the same confidence into the minds of His disciples. They, too, quoted freely in their epistles, and the addresses of Peter at Pentecost, and of Stephen
before the Council were but rehearsals of the Old Testament story. The Scriptures are the sword of the Spirit, the weapon used by the Apostles and by the Church in all the ages. There is no other weapon. The success of any Gospel ministry must depend upon the ability to use the revealed truth of God. The missionary should accept it as axiomatic that his mind must be steeped in the truth, that his whole nature must be charged with a sense of the glory of the Message, and the magnitude of the interests at stake. It ought not to be necessary to say that this does not consist simply in a knowledge of theological books, nor even in an acquaintance with the mechanism of the books of the Bible, all of which may be very important in their way. It is an experience of the heart and life, so that, like the Apostles, he must speak it out. "We cannot but speak the things we have seen and heard."

4. Jesus Christ emptied Himself. He made Himself of no reputation, and took upon Him the form of a servant. By right His place was in the glory wherefrom eternity He dwelt with the Father that He may be exalted. He must empty Himself of His power. What an emptying that was, that He might in His heart and life, so that, like the Apostles, He must speak it out. "We cannot but speak the things we have seen and heard."

This is hard doctrine. Who can receive it? The old nature dies hard. Yet it is the only way. It is the cross of Christ in all its phases. The missionary who will take up his cross and follow Christ in this respect will share with Him the victory, while the other way leads to failure and defeat. Among the supposed sayings of Jesus found in Egypt, is this sentence: "Unless ye fast from the world ye shall not find the Kingdom of Heaven." Whether the saying is authentic or not its testimony is true. Love not the world, neither the things of the world; set your affections upon the things that are above where Christ sitteth. The missionary life is exposed to peculiar temptations in this respect. He labors among a people intellectually and morally beneath him. He naturally shrinks from the closest identification with such people and craves the companionship of those above. He might have commanded twelve legions of angels, could have delivered essays that would have become the literary classics of all the ages, but He emptied Himself of His power. He who knew that all things were given into His hands, and that He was come from God and went to God, girded Himself with a towel and washed the disciples' feet. He who could have commanded twelve legions of angels, allowed Himself to be bound and buffeted and scourged. He emptied Himself of His power. What an emptying that was, that He might in due time be exalted! He became the perfect High Priest through suffering, and now is seated at the right hand of God, a Prince and Savior.

5. Jesus Christ had faith in the future. He had no misgivings as to the ultimate triumph of the Kingdom. His hopes were built upon the eternal promises that could not fail. He saw in vision Satan fall from heaven, and the judgment and destruction of his vast multitudes. He knew that very soon the final results would be wrought out. Sometimes encouragements seem to be at hand, when suddenly they vanish as the early dew. Converts are disappointing, and public sentiment is against them. They are the objects of unkindly criticism, and sometimes of hostile attack. Climatic and physical conditions are depressing, and health is not buoyant. It is natural that under the strain body and mind should lose elasticity and hopes should die. Yet when that happens strength and usefulness are impaired. It should be said that they are only overthrown if their lives are anchored in the unchangeableness of the living and true God. The missionary is but a small part of a mighty movement, and his contribution will not be lost. His works will follow him. Other men may reap what he has sown, but they will rejoice together. It is a winning conflict in which the Church is engaged, and the joy of ultimate victory should thrill and inspire every missionary with ever-increasing energy and hopefulness.

6. Jesus Christ had power in prayer. Prevaling prayer is the partial law of His kingdom. Indeed, if in anything He might seem to be chargeable with rash and extravagant statement, it is in this connection. "If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you" (John xv: 7). "Whatsoever ye desire, when ye pray, believe that ye receive them and ye shall have them" (Mark xi: 24). This is surely giving men an unlimited privilege of drawing upon infinite resources, yet it is the plane on which He himself moved. At the grave of Lazarus He said to the Father, "I know that thou hearest me always." In that confidence His requests were made known. He lived in this as in all other respects up to the standard of His teaching. He understood the secret, and without it, even He would have failed. Praying properly is one of the most important parts of His mission. Pray with perseverance and with the faith of a child. As Andrew Murray quaintly says, He did not teach His disciples to preach but taught them to pray. Is it not true that they who can preach well are more in number than they who can pray well? The greater the gift the greater the sacrifice necessary to acquire it. Never will "the largest results be reached until the Church has a ministry at home and abroad that has been divinely taught how to pray. Some men stand out prominently in history who had, and because
they had, learned this art. The Acts of the Apostles are punctuated with prayer. It is from the “Prayer Watch” that the remarkable record of the Moravian Church sprang. Louis Harns and Gossner and Fiedler and Brainerd and Muller and Hudson Taylor are admonitions as well as encouragement to the Church to take advantage of this power, which she is invited to exercise. The extent of the field, the vastness of the work to be done and the inadequacy of the forces at work, ought to impress every thoughtful man and woman with that absolute dependence of the Church upon the help that comes from above. If men are to be born into new life, it must be done through the creative power of the author of life. He hears and answers prayer; therefore, pray without ceasing.

7. One more qualification must be mentioned, as the most important of all. Jesus Christ acted under the constraint of love. It was love that impelled the Father to give His Son. And it was love that constrained the Son to give His life a ransom for many. Even as His Father loved Him, He loves sinful men. That is the motive that will abide. There are many other considerations, such as the civilizing power of the Gospel, the moral and spiritual condition of the heathen, commercial and political advantage, the success of Missions—all of which have weight, but will not make an足以 sufficient qualification, nor will they make a missionary church.

When Peter the Hermit aroused Europe to attempt the rescue of the Holy Land from the hand of the infidel, his battle cry was, “It is the will of God.” “It is the will of Christ” is our battle cry. The constraint of the love of Christ is alone strong enough to maintain this conflict. Dr. Griffith John says that he often thought of Paul and the Yang-tze together. The great river in its way to the sea encounters many obstacles and flows in varied channels. Now it dashes against the rocks like a mad thing and then rushes through a narrow gorge at a wild race speed. It then emerges into a wider and more even channel, and flows quietly, calmly, and majestically, but it flows on continuously on irresistible. Try to turn it back, and you will find it impossible. Ask it to stop, and it will tell you it cannot. Ask why, and it will tell you, “Almighty law has taken possession of me and I cannot help myself. The law of gravity constrains me.” So with Paul, a mighty law, the law of love, took hold of him and he could not stop. “The love of Christ constraineth me.” The same writer quotes the advice given to a novice by a senior missionary in China. “Try as fast as possible to learn to love the Chinese for Christ’s sake, for you will find it very difficult to love them for their own sake.”

The heathen are His and He loves them and for His sake even the most unlovely can become the object of our affection. A heart overflowing with much love will not find it hard to associate with as encouraging, among the downcast and fallen, and will quickly elicit a response. Love is the world’s need and hope.

In conclusion, let it be said there is work for all; and missionary training should vary with the class of men and the work they are expected to do, yet the qualifications specified above should be common to all. Certain attainments in scholarship may be beyond the reach of some who, nevertheless, would be useful in the foreign field, but all can acquire and none will be useful without the Christ-like spirit.

There are many points of a physical, intellectual, and practical nature that deserve mention, and will claim the attention of earnest candidates, but need not here be detailed. On the other hand, there are points that deserve notice in order that they may be avoided, which, tho in themselves apparently trivial, have been stumbling-blocks, and have brought disaster into many a mission. Good men have sometimes come under the influence of peculiar views as to questions of economy, or salary, or prophecy, that have impaired, if not wrecked, their usefulness. Better judgment might still have entertained these views, while not offensively obtruding them upon others, and thus the loss of influence would have been avoided. A loving, prayerful spirit will ever be on the alert lest the enemy gain an advantage. “Lo, I with you always” is the guarantee of wisdom and guidance in every time of need. The missionary above all men needs to realize the apostle’s prayer: “To be strengthened with might by His spirit in the inner man, that Christ may dwell in your hearts by faith, that ye, being rooted and grounded in love, may be able to comprehend with all saints what is the breadth and length and depth and height, and to know the love of Christ which passeth knowledge, that ye might be filled with all the fulness of God.”

Sonerville (Andrew), Lectures on Missions and Evangelization, Student Volunteer Movement; Call, Qualifications and Preparation of Missionary Candidates, New York, 1901; Ecumenical Conference on Foreign Missions, Vol. I., pp. 301—324, New York, 1900.

QUEENSTOWN. See KOCANARS.

QUEENSTOWN: A town in British Guiana, South America, situated on the W. bank of the estuary of the Essequibo River. Station of the PB, with 1 missionary and his wife and 1 woman missionary.

QUEPE: A river in Chile, South America, which gives the name to the Agricultural and Industrial station of the SAMS at Maquehue Reserve, situated about 30 miles S. E. of Cholchol, and 10 miles S. of Temuco. The people reached by this mission are Mapuche Indians. The station has (1903) 2 missionaries, 1 native worker, 2 day schools, 1 dispensary, 1 hospital, and 1 industrial school.

QUESUA: A settlement in Angola, West Africa, situated about 185 miles E. by S. of S. Paolo de Loanda. Station of the ME, with (1900) 2 missionaries and their wives, 1 boarding school, 2 Sunday schools, 4 native workers, and 44 professed Christians, of whom 25 are communicants.

QUETTA: A town in Baluchistan, India, situated about 190 miles N.W. of Shikarpur, in the Northwest Frontier Province, India, with which it is connected by railway. Station of the CMS (1886), with 4 missionaries, three of them with their wives, 8 native workers, 1 place of worship, 1 hospital, and 42 professed Christians. Station of the CEZ (1895), with (1903) 2 women missionaries, 10 native workers, 3 day schools, 1 boarding school, 1 hospital, and 50 Zenana pupils.

QUEZALTENANGO: A town in Guatemala, Central America, situated about 123 miles N.W. of Guatemala city, nearly destroyed by an earthquake in 1902, and it is not now a missionary residence. Station of the PN (1898), with 1 missionary and his wife and 1 outstation.
QUICHUA LANGUAGE: A South American language spoken by various tribes of Indians in the western and northwestern part of the continent. The name is applied by the Indians of Peru to any mountaineers, and at the time of the Spanish conquest the dominant race in Peru was the Quichua Indians. The Jesuit missionaries gave the name to the Indian language. Quichua is still spoken in parts of Peru distant from the coast. It is found also with variant dialects among the Indians of Ecuador, Colombia, and, perhaps, in Bolivia and Argentina. It is written with Roman letters.

QUIHONGOA: A town in Angola, West Africa, situated about 160 miles S. E. of S. Paulo de Loanda. Station of the ME, with (1903) 3 missionaries, one of them with his wife; 1 place of worship, 1 Sunday school, 1 printing house, 1 industrial school, and 150 professed Christians.

QUILON: An ancient town and seaport in Travancore, South India, situated on the Malabar coast, 40 miles N. of Trivandrum. It had a trade with China as early as 851. Portuguese established a trading post here in 1503, which was afterward seized by the Dutch. Population, 35,000. Station of the CMS (1821), with (1903) 1 missionary and his wife, 78 native workers, 20 outstations, 24 Sunday schools, 1 boarding school, 44 day schools, and 2,515 professed Christians, of whom 472 are communicants.

RABAI: A town in British East Africa, situated about 10 miles N. W. of Mombasa, on the mainland. Station of the CMS (1849), with 1 missionary and his wife, 15 native workers, 1 place of worship, 2 day schools, 1 boarding school, 1 dispensary, and 839 professed Christians, of whom 399 are communicants.

RAGHAVAPURAM: A village in Madras, India, situated between the Kistna and Godavari Rivers, about 50 miles E. of Kumbakonam. Station of the CMS (1872), with (1900) 1 missionary and his wife, 16 native workers, 1 place of worship, 15 day schools, and 2,608 professed Christians, of whom 461 are communicants.

RAIATEA: One of the Society Islands in the South Pacific, situated N. W. of Tahiti. It played an important part in the early history of the LMS mission to Tahiti, having yielded almost the first encouragement in the depressing period of early effort. Station of the Paris Evangelical Mission Society, with 2 missionaries, 4 native workers, 4 places of worship, 1 day school, and 646 professed Christians at four different villages on the island.

RAINY: A settlement in W. Pondoland, Cape Colony, South Africa, situated 40 miles N. W. of Port St. Johns. Station of the UFS (1897), with (1903) 1 missionary and his wife, 21 native workers, 15 outstations, 1 place of worship, 12 day schools, and 183 professed Christians. Some use the old name Eltubeni.

RAIPUR: A town in the Central Provinces, India, situated in Chatisgarh division, about 150 miles W. by S. of Sambalpur. Population, 24,948. Station of the German Evangelical Synod of N. A. (1880), with (1903) 2 missionaries and their wives, 36 native workers, 16 outstations, 11 places of worship, 1 Sunday school, 8 day schools, 1 boarding school, 1 dispensary, 1 orphanage, and 910 professed Christians. Station also of the ME, with (1903) 1 missionary and his wife, 22 native workers, 1 outstation, 2 places of worship, 8 Sunday schools, 4 day schools, 2 orphanages, 1 industrial school and 524 professed Christians, of whom 88 are communicants.

RAJAMAHENDRI: A historic town in Madras, India, on the left bank of the Godavari River, 32 miles W. by N. of Cocanada. Population, 24,555. The surrounding country is rich and the people are prosperous. Station of the General Council, Evangelical Lutheran Church in N. A. (1898), with 1 missionary, 15 native workers, 1 place of worship, 1 Sunday school, 1 printing house, 2 boarding schools, 1 industrial school, 1 dispensary, 1 hospital, and 139 native workers. Some 35,000. Station of the General Council, Evangelical Lutheran Church in N. A. (1898), with 1 missionary, 15 native workers, 1 place of worship, 1 Sunday school, 1 printing house, 2 boarding schools, 1 industrial school, 1 dispensary, 1 hospital, and 139 native workers. Some write the name Rajahmundry.

RAJGANJPUR: A town in Chota Nagpur, India, situated in the Gajjpur district, on the Bengal and Nagpur Railway, about 75 miles S. W. of Chaibasa. Station of the Gossner Mission Society, with (1903) 1 missionary, 39 native workers, 2 day schools, 31 Sunday schools, and 1,912 professed Christians, of whom 194 are communicants.

RAJ NANDGAON. See NANDGAON.

RAJPUTANA: A vast territory in the northwest of India, which derives its name from the Rajput clans who inhabit it. The word "Rajput" means "son of a king," and the Rajputs trace their origin from the princely families among the original Aryan invaders of India. Some of these clans have had their abodes here from time immemorial. The exact boundaries of Rajputana it is difficult to give. In a general way it may be said to lie between Sindh on the west, the Punjab on the northwest, the United Provinces on the northeast and the Mahrratta states of the Galkwar, Sindhis, and Holkar on the south. Its limits of north latitude are 22° and 30°, and of west longitude 69° 30', and 78° 15'. Its area is supposed to be about 127,541 square miles, containing a population (1901) of 9,729,301 people. The population is prevalingly Hindu, only about 10 per cent. being Mohammedan and about half as many Jains. Those of other faiths furnish a mere sprinkling in the total mass. There are many wild jungle tribes—especially Bhils, of which any exact enumeration is well nigh impossible; the Bhils, however, are supposed to number nearly 200,000, included mostly among the Hindus, whose religion they follow. Much of the territory of Rajputana, especially in the western part, is mere desert. The southeastern portion is more fertile. The chief city is Jaipur, capital of the native state of the same name. Population (1901), 160,000. Missionary
work in Rajputana is chiefly that of the United Free Church of Scotland, and dates from 1860. The principal stations are Jaipur, Ajmere, Nasirabad, Deoli, Beawar, Todgarh, Udaipur, Alwar, and Jodhpur. Much attention has been given to medical work, and the diligence of the missionaries in relieving distress during famine has given them a firm hold upon the hearts of the people. There is a mission press at Ajmere.

Education is making fair progress, though female education is neglected. The Rajputs, who have given their name to the country, and who constitute its aristocracy, furnish only about half a million of the population.

RAKAI: A town in Uganda, Central Africa, situated in the province of Koki, on the west shore of Lake Victoria Nyanza and about 135 miles S. W. of Mungo. Station of the CMS (1895), with (1903) 2 women missionaries, 35 native workers, 1 day school and 631 professed Christians, of whom 200 are communicants.

RALUANA: A settlement at the E. end of the Island of New Britain (now called New Pomern) E. of New Guinea. Station of the Australian Wesleyan Methodist Mission Society, with (1901) 1 missionary, 83 native workers, 4 outstations, 29 places of worship, 2 Sunday schools, and 29 day schools, a theological class, and 502 professed Christians.

RAMA CAY: An island on the Mosquito Coast, Nicaragua, situated about 15 miles S. of Bluefields. The name comes from the Rama Indians, who inhabit the island. Station of the Moravian Mission, with (1901) 1 missionary and his wife, 5 native workers, 1 place of worship, 1 day school, 1 Sunday school, and 244 professed Christians.

RAMACHANDRAPURAM: A town in Madras, India, situated in the Godavari district, 18 miles S. W. of Cocomada. Station of the BOQ (1892), with (1901) 27 native missionaries, 15 outstations, 12 day schools, 12 boarding schools, 23 Sunday schools, and 67 Sunday communicants. Station also of the SPG, with (1902) 1 missionary and his wife, 5 native workers, and 3,750 professed Christians.

RAMAILANDRO: A town in Imerina, Madagascar, situated about 55 miles S. W. of Antananarivo. The mission there was sacked and destroyed by rebels in 1895. Station of the SPG (1882), with (1900) 1 missionary, 3 native workers, and 402 professed Christians.

RAMALIANE: A village in the Transvaal, South Africa, situated in Lichtenburg district, 45 miles N. W. of Klerksdorp. Station of the Hermannsburg Missionary Society (1872), with (1902) 1 missionary and his wife, 6 native workers, 3 outstations, 5 places of worship, 6 day schools, and 1,470 professed Christians.

RAMALLAH: A village in Palestine, Turkish Empire, situated about 5 miles N. of Jerusalem. Station of the AFFM (1860), with (1900) 2 missionaries and their wives, 22 native workers, 7 outstations, 1 place of worship, 4 Sunday schools, 4 day schools, 2 boarding schools, 1 dispensary, and 34 professed Christians. Station also of the CMS (1877), with (1903) 1 missionary and his wife, 2 women missionaries, 2 outstations, 1 day school, and 1 dispensary. Church statistics of the station are included in Jerusalem statistics of CMS.

RAMAPATAM: A town on the Bay of Bengal, India, about 43 miles N. of Nellore. Climate not unhealthy, but generally debilitating. Mission station of the ABMU (1869), with (1903) 3 missionaries and their wives, 1 woman missionary, 26 native workers, 5 places of worship, 4 Sunday schools, 5 day schools, 1 boarding school, 1 theological class, and 2,000 professed Christians, of whom 727 are communicants. The name is also written Ramapatam.

RAMAD: A town in Madras, India, situated about 65 miles S. E. of Madura, near the line of the line of islands stretching toward Ceylon, or Sinhala, which are known as "Adam's Bridge." Of this "bridge" the princes of Ramnad used to be the guardians. Station of the SPG (1825), with (1903) 1 missionary, 24 native workers, 6 places of worship, 6 day schools, 3 boarding schools, 1 industrial school, and 666 professed Christians, of whom 217 are communicants.

RAMPART CITY: A settlement in Alaska, within the Arctic circle, situated on Porcupine River at the frontier of British Columbia. Station of the PE, with (1903) 1 missionary, 1 native worker, and 1 place of worship, 1 hospital, and 25 professed Christians.

RANCHI: A town in Chota Nagpur, Bengal, India, capital of Lohardaga division. Population, 13,000. Station of the Gossner Missionary Society, with (1903) 7 women missionaries, 98 native workers, 38 places of worship, 27 Sunday schools, 8 day schools, 2 boarding schools, 1 theological class, 1 dispensary, 1 hospital, and 8,200 professed Christians, of whom 4,446 are communicants. Station also of the SPG, with (1903) 3 missionaries and their wives, 2 women missionaries, 178 native workers, 1 place of worship, 5 day schools, 2 boarding schools, and 13,867 professed Christians, of whom 6,200 are communicants. These statistics include the district with the town.

RANGOON: The capital of Burma, British India, situated on the left bank of the Rangoon River, 26 miles from the sea. It was annexed by Great Britain after the war of 1852. Much internal and foreign commerce is carried on here. The most magnificent and venerable one is the Shoay Dagoba, said to be 2,300 years old. It is heavily decorated with gold, and is the receptacle of relics of the last four Buddhas, including eight hairs of Gautama.

Much internal and foreign commerce is carried on in Rangoon, as it has communication by rail and by water with the upper provinces. An English newspaper is published here. Population (1901), 234,881. Station of the SPG (1882), with (1900) 19 missionaries and their wives, 13 women missionaries, 332 native workers, 29 outstations, 150 places of worship, 67 Sunday schools, 75 day schools, 3 boarding schools, 2 theological classes, 1 printing house, and 9,196 professed Christians. Station also of the SPG (1864), with (1903) 3 missionaries and their wives, 62 native workers, 4 day schools, 4 boarding schools, and 3,750 professed Christians. Station also of the Leipzig Missionary Society (1878), with 13 native workers, 7 outstations, 1 place of worship, 1 day school, 2 boarding schools, and
325 professed Christians, of whom 272 are communicants. Station also of the ME, with (1903) 2 missionaries and their wives, 4 women missionaries, 40 native workers, 5 Sunday schools, 3 day schools, 2 boarding schools, and 496 professed Christians, of whom 218 are communicants. The YMCA has 1 missionary and 1 Young Men's Christian Association here, and the YWCA has 3 women missionaries and 1 Young Woman's Christian Association. The BFBS also has an agent here, with 3 native Bible workers.

RANIGANJ: A town in Bengal, India, situated on the railway 55 miles N. W. of Burdwan. Population, 19,578. Station of the Mission to Leper Sufferers, with 131 communicants. The place is said to be unhealthy, and the leper work of the WMS. Station of the WMS, with (1903) 2 missionaries, 14 native workers, 5 outstations, 9 places of worship, 6 Sunday schools, 7 day schools, 1 orphanage, 1 leper asylum, and 262 professed Christians, of whom 241 are communicants. Some write the name Ranipettai.

RAO-CHAU. See JAO-CHAU-FU.

RAROTONGA. See HERVEY ISLANDS.

RAROTONGAN LANGUAGE: One of the Polynesian languages, and one of several spoken in the Hervey or Cook's Islands. It is the dialect found in those islands, selected by the missionaries for printing, and has been reduced to writing in Roman letters.

RATNAGIRI: A town in Bombay, India, and capital of the district of Ratnagiri, situated 82 miles N. W. of Kolhapur. Population, 12,616. Station of the PN (1873), with (1903) 1 missionary and his wife, 2 women missionaries, 81 native workers, 35 outstations, 30 places of worship, 24 Sunday schools, 1 boarding school, 1 hospital, and 1,565 professed Christians, of whom 406 are communicants. Some write the name Ranipettai.

RAO-CHEE-CHU. See JAO-CHAU-FU.

RAWAL PINDI: A town and military post in Punjab, India, situated about 88 miles E. S. E. of Peshawar. Because of its broad, straight, handsome streets, and its excellent drainage and sanitary arrangements, it is said to present a cleaner appearance than any other town in Northern India. Trees have been freely planted, and give the place a very pleasing appearance. Bishop Milman was buried here. Population (1901), 87,688. Altitude, 1,652 feet. The place is now fortified in a very elaborate manner. Station of the CEZ (1894), 1 British, 1 missionary, 2 native workers, 1 college, 1 hospital. Station also of the CMS, with (1903) 2 missionaries, 2 native workers, 6 outstations, 1 Sunday school, 6 places of worship, and 83 professed Christians.

REBBMANN, John: Born in Germany; was appointed, in 1846, by the CMS to the East African Mission. On his arrival at Mombasa, the remarkable Central African discoveries. They brought to light a new country highly favorable for missionary labor, and three groups of mountains, from 4,000 to 5,000 feet high, enclosing the Taita country. In 1847 Mr. Rebmann made a new journey to Kadiaro in the Taita country, and in 1848 he explored the country beyond the Taita, called Jaggia or Chagga, 300 miles inland, the Switzerland of East Africa, traveling on foot for seven days in a thorny jungle infested by wild beasts. On May 11 he discovered the magnificent mountain, Kilima Njaro. Rebmann and Krapf, tho giving much time to exploration, were above all missionaries. Their grand aim was the spreading of the Kingdom of God. Yet their regular work led to great results for science. Their remarkable journeys and their interior were the basis for many years of both missionary and scientific enterprises in East Africa. In 1856 Rebmann, being alone at Rabai, was driven from the place by an incursion of the Masai, who destroyed the station and dispersed the Wa-Nika people. Retiring to Zanzibar, he continued his linguistic studies for two years, and then, returning to his old station, resumed his labors. Until 1875 he was there alone. He finally became blind. When the mission was reenforced in 1875, he returned home. An attempt to restore his sight was unsuccessful. In 1883 he was again for Madras in January, 1824, to arrange for printing his Kanarese and English dictionary. The same year he sailed for England; reembarked for India in 1827, and was stationed at Bangalore. In 1831 he went to Mysore to superintend the printing of his Kanarese and English dictionary, which, being completed, he returned to Bangalore. In 1834, on account of ill-health, he left
with his family for England. He died at Bristol February 14, 1850.

**Reformed (Dutch) Church in America, Board of Foreign Missions:** As early as 1643 missionary work was carried on by ministers of this body among the Mohawk Indians, and the interest grew with the years. In 1816 the Church united with the Presbyterian and Associate Reformed Churches in forming the United Missionary Society, which sent missionaries to the Indians, until 1826, when it was merged in the ABCFM. In 1832 the General Synod elected "the Board of Foreign Missions of the Reformed Protestant Dutch Church," which, the operating through the American Board, was allowed to conduct its missions according to the ecclesiastical polity of the Church. It continued its connection with the American Board until 1837, when the Synod, for the purpose of advancing its work, took place, due to no dissatisfaction, but to a growing conviction that more would be accomplished if the two Boards acted independently. In the same year the American Board transferred to this Board the mission at Amoy, in China, and the Arcot Mission with the individual missionaries composing them. The contributions, which were in 1857 but $10,076, rose the next year to $25,034; and have since gone on increasing, till in 1902-3 they reached the sum of $158,895.

**Constitution and Organization:** The Board of Foreign Missions of the Reformed Church in America consists of 27 members, ministers and laymen, of whom at least one-half shall be ministers, chosen by the General Synod, and regularly incorporated under the laws of the State of New York. Its members are elected for three years, and are divided into three classes, so that one-third of the membership is elected each year. In addition to the regularly constituted Board, each Classis nominates from its own members a missionary agent, subject to the approval of the General Synod, for the purpose of advancing the interests of foreign missions within the bounds of the Classis. These agents are, by act of General Synod, authorized to attend any or all meetings of the Board, and to participate in its proceedings. They act as a very useful medium of communication between the Board and the churches, and in developing and fostering a greater interest in missions throughout the churches.

In 1875 "The Woman's Board of Foreign Missions of the Reformed Church in America" was organized. In 1880 it assumed the support of the work of the Church Board for women and children in all its mission fields, including the maintenance of several seminaries for girls in China, India, and Japan. Its contributions have steadily increased, and have usually been more than sufficient for the purpose named. In 1875 it received $2,891; in 1905, $50,911, and in the twenty-eight years of its existence, $631,691.

**Development of Foreign Work:** The foreign missions of the Reformed Church have been six in number, of which five are now maintained. The earliest mission was established on the island of Borneo in 1836. Four missionaries, with their wives and an unmarried woman, sailed for Borneo in that year. Two stations were established at Sambas and Pontianak, with schools and preaching services in three languages. The first missionaries were joined at different times by five others, and part of the force began work among the Chinese colonies in Borneo. In 1844 two of the missionaries, Messrs. Pohlmans and Doty, were transferred to the more promising field of Amoy; others were obliged, from ill-health, to return home, and the mission was abandoned.

**China:** The Mission of the Reformed Church in Amoy was the first in that field. It was commenced by Rev. David Abeel. In 1844 Amoy, at the close of the opium war, became an open port, and was reinforced in 1844 by Messrs. Pohlmans and Doty, who had been laboring among the Chinese colonies in Borneo. The district occupied by it is about 60 miles square, and has a population of 3,000,000. In this district are four stations and forty-three outstations and preaching places. There are at present in the mission 6 ordained missionaries and one unordained, and 16 women (eleven unmarried). The first church was organized with eleven members in 1851, and there are now (1903) in the field 12 churches, of which all are practically self-supporting, with a total of 1,389 communicants. The contributions from these churches during the year amounted to $7,051 Mexican. A medical and educational work is carried on. During the year 1889 a hospital was built in the station of Sio-ke. Connected with the hospital force is a native helper, and to all who come for treatment and medicine the Gospel is preached. In 1898, Hope Hospital and the Netherlands Women's Hospital were opened at Amoy, the latter built and supported by friends in the Netherlands, but conducted by the Mission. The educational work of the Mission is represented by 13 day schools with 298 scholars, a Bible school where native women are fitted to become Bible workers, 3 seminaries, one male and two female, and a union theological seminary, which is carried on by the American Reformed and English Presbyterian Missions conjointly.

**India:** The Arcot Mission was organized in 1853 by Revs. Henry M., William W., and John Scudder, three sons of Rev. John Scudder, M.D., one of the pioneers of American missions among the Tamils. The Mission occupies chiefly the Arcot districts of the Madras Presidency, with an area of 8,323 square miles, and a population of about 2,400,000, nearly equally divided between Tamils and Tdugus. The people are divided into three general classes or castes, and the intense caste feeling forms one of the great difficulties of the mission work. The Brahmans, alto but 4 per cent. of the population, are by far the most influential section. The Sudras form 75 per cent. of the population and are virtually the people. They are, like the Brahmans, tenacious caste-holders. The Pariahs, or outcastes, form 29 per cent. of the population, and are in a most pitiable condition, being little more than slaves. Much of the success of mission effort has been among this class.

The mission has 8 stations and 163 outstations. These outstations are placed under the care of native pastors and catechists, who also preach in the surrounding villages. The catechists are unordained helpers, but perform the same labors as a pastor, with the exception of administering the offices of the Church. There are now on the field 9 ordained missionaries, 3 of whom are physicians, and 1 unordained, together with 16 women (6 unmarried). The number of churches is 20, and of communicants, 2,511, of which number 105 were received last year. There are in the Mission 8 boarding schools (4 male and 4 female), 18 caste girls' schools, and 171 day schools.
There is also at Palmanér a theological seminary, opened March, 1888, for which a special endowment fund of about $50,000 was raised by Rev. Jacob Chamberlain, D.D., while in the United States in 1887. The Mission has also a hospital and dispensary at Ranipet, near Arcot, and the Memorial School Hospital for Women, at Vellore. At Vellore is also the Elizabeth R. Voorhees College, with more than 1,000 students.

A mission to Japan was begun in 1859, when Rev. G. F. Verbeck and Rev. S. R. Brown, with Dr. D. B. Simmons, sailed for that Empire. Mr. Verbeck went to Nagasaki, and Dr. Brown to Kanagawa, and later to Yokohama. In 1889 the Mission was divided into the North Japan Mission, having its center at Tokio-Yokohama, and the South Japan Mission, with its headquarters at Nagasaki.

The North Japan Mission has a force of 20 missionaries, six ordained men and one unordained; seven married and six unmarried women. It occupies five principal stations: Yokohama, Tokio, Nagasaki, Hakodate, and Kohoku. It has 24 outstations and preaching-places. Many churches have been gathered and organized, with thousands of communicants, which have no longer any formal connection with the Mission, and of which no record can be made. The churches or congregations at present directly under its care are two, with 498 communicants, whose contributions, in 1901, amounted to $1,059. Its principal institutions are the Ferris Seminary at Yokohama, a boarding school for girls, with 96 pupils, and the Meiji Gakuen at Tokio, the support and conduct of which it shares with the Board of Foreign Missions of the Presbyterian Church.

The South Japan Mission has its field in the large southern island of Kyushiu. Eleven missionaries are connected with it, five ordained men, two married and four unmarried women. It occupies four stations: Nagasaki, Saga, Kagoshima, and Kumamoto. It has 4 churches under its care, with 339 communicants, whose contributions amounted to $900. At Nagasaki are located the Steele College for boys and young men, having 100 students, and the Sturges Seminary for girls, with 54 students.

The Arabian Mission was established as an independent and denominational Mission in 1889 for special work among Mohammedans. It was adopted by the Reformed Church in 1894. Its stations, on the west coast of the Persian Gulf, are three: Busrah, Bahrein, and Muscat, with two outstations at Amara and Nasarlyeh. In all the territory occupied by it there is no other mission. It has access to a population estimated at 1,600,000. Its missionaries are 13, seven married and six unmarried women. It has 3 churches under its care, with 54 students.

The Mission Field, monthly; The Mission Gleaner (Women's Board), monthly; Neglected Arabia (Arabian Mission), quarterly.

Reformed (German) Church in the United States; Foreign Missions of the: The Synod of the United States and the Foreign Missions of the Reformed Church in the United States was organized on September 29, 1838, at Lancaster, Pa. The suggestion came from the Home Missionary Society, and met with a most cordial response.

From 1840 to 1865 the Board had no foreign missionary of its own, but was a regular contributor to the ABCFM toward the support of Rev. Benjamin Schneider, D.D., missionary in Turkey.

Beginning with 1860, the Synod became dissatisfied with this method, and in 1865 it decided to establish its own mission, applying its funds to the support of the India Mission, and to the work among the Winnebago Indians in Wisconsin. In the year 1873 the Board was reorganized, and laid the foundation for its present flourishing mission in Japan.

The first missionaries, the Rev. A. D. Gring and his wife, settled in Yokohama in 1879, but it was thought best to remove to Tokio, and there, in May, 1884, he organized the first church. Other fields of labor in Japan have since been Fukuoka, Sendai, North and South Miyagi, Yama-gata, and Akita. The report (1901) shows 19 missionaries in charge of about 50 places, where work is conducted in the different fields, assisted
by 10 ordained ministers and 25 evangelists. The church membership was 2,142, and there were 40 schools, with 130 teachers and 1,420 pupils. The Mission suffered a serious loss in the burning of the girls' school building at Sendai, but the result has been enlargement rather than retrenchment. The Industrial Home at Sendai is another important feature in the work.

In 1899 the Board commenced work in China, sending out Rev. Mr. Hoy and, later, Rev. Frederick O'Connor to Y-n-chow, in the province of Puck, under the medical missionary and his wife, also a physician, who were recently appointed.

Auxiliary to the Foreign Mission Board is the Woman's Missionary Society, General Synod of the Reformed Church in the U. S., with headquarters at Tiffin, Ohio.

REFORMED PRESBYTERIAN (Covenanter) CHURCH IN NORTH AMERICA; Foreign Missions of the: At a meeting of the Synod of the Reformed Presbyterian Church in North America held in 1818, a committee was appointed to inquire into the expediency of establishing a foreign mission. No action was taken, however, and it was not until 1841 that the question was seriously studied, and plans for foreign work proposed. In 1843 a committee was chosen to select a field for cultivation, and the island of St. Thomas, in the West Indies, was chosen. In 1844 this spot was abandoned in favor of Haiti, and a mission commenced in 1847, which, however, was discontinued in 1849.

At a meeting of Synod, held in 1856, interest in missions was revived, and it was resolved to recommence foreign work. The Rev. R. J. Dodds and Joseph Beattie were chosen missionaries, and with their families sailed for Syria in October, 1856. After spending some time in Damascus and Zahleh, Latakia, on the Mediterranean, was selected in October, 1859, where the mission was permanently established.

In 1867, the United Presbyterian Church of Scotland having abandoned its mission to Aleppo, Dr. R. J. Dodds took charge of it until his death in 1870. The work was extended to Southern River Quarters in 1875, to Tarsus in Cilicia, in 1882, and later to Mersine. The Latakia Mission has also undertaken work on the island of Cyprus. Within recent years a Chinese mission has been in progress in Oakland, Cal., and Indian missions have been established at several points in the United States, and more recently a station has been opened at T'peh-ning-chau (Tak-hing-chau), in the western part of the province of Kwang-tung, China.

The work in Syria has been chiefly among the Nusairiyeh, who, while nominally Muslims, are really pagan people. They are the lineal descendants in race and religion of the Canaanites who fled before Joshua, and are as yet almost absolutely inaccessible to any Christian influence. Holding to their ancient faith with a pertinacity that is wearisome, yet also compelled by a relentless oppression to cover their belief under the forms of a hated religion, they have developed a power of deceit and dissimulation probably not equalled in the history of any race. They have repelled, in their gloomy isolation, all Christian workers, except the sturdy Scotch Covenanters, who, with persistency not less dogged than their own, but with a faith which lays hold on the power of the highest, have commenced their attack.

The missionary force consists (1900) of 20 missionaires, 48 native workers, in 4 stations and 9 outstations, with 310 communicants, and 730 pupils in 14 schools. In China there are (1903) 8 missionaires (2 physicians). The work is yet in its infancy.

REGIONS BEYOND MISSIONARY UNION
(Formerly known as the East London Institute for Home and Foreign Missions): In 1873 the Rev. H. Grattan Guinness, D.D., a Baptist minister in London, organized the East London Institute for Home and Foreign Missions, for the special purpose of training for missionary service those anxious to enter it, but unable to do so for lack of means. An old-fashioned house on Stepney Green was secured, and during the first year 32 students were received. A second house was taken, and as the needs increased a third was added, as also a wing to the original building, known as "Harley House." From the beginning the enterprise has been strictly undenominational, its property vested in a board of trustees representing different Christian bodies, and has had the cordial support and counsel of such men as Rev. F. B. Meyer, G. E. Morgan, Esq., of London, of the Reformed Presbyterian Church in North America, and the Rev. George Hanson, D.D., R. Wright Hay, and others. More than eleven hundred men and women have had a longer or shorter training in this institute, and have gone to the foreign field in connection with about forty missionary societies, or as independent, self-sustaining missionaries. They have represented various nationalities: English, Scotch, Irish, and American, French, German, Italian, Spanish, Swedish, Danish, Russian, Bulgarian, Syrian, Egyptian, Kaffir, Negro, Hindu, Parsee, Kurd, and Hebrew. They have gone out into all parts of the world: to China, India, Syria, Armenia, Egypt; to France, Spain, Portugal, Italy; to the east and west coasts of Africa, Natal and Cape Colony; to Prince Edward's Island, Cape Breton, Canada, and the Western States of America; to the West Indies, Brazil, and the Argentine Republic; Australia and New Zealand.

In addition to this foreign work, a large home-missionary work is carried on in the East London district of Bromley, where students and deaconesses receive practical training in evangelistic and medical mission work, and a large amount of helpful influence is brought to bear upon the neglected masses of the great city.

For some years the attention of Dr. and Mrs. Guinness was confined to the institute, but with the opening up of the Congo there arose an earnest desire to send the Gospel into the interior far beyond the points upon the coast then occupied. Rev. A. Tilly, of Cardif, one of the directors of the BMS, invited the cooperation of the institute in an attempt to send a few evangelists right into the interior. Messrs. Cory, of Cardif, and Irwine, of Liverpool, promised assistance, and the publication of Stanley's letters, in the fall of 1877, it was decided to attempt an entrance into Africa by the new route, the friends above named formed for themselves into a committee for the conduct of the enterprise, to which was given the title, The Livingston Inland Mission. The Mission was to be evangelical, but undenominational, and it was hoped at first that it might be made self-supporting; but this idea was soon relinquished by the committee. Funds to start with having been contributed chiefly by the committee, volunteers were furnished by the Institute. Mr. Tilly acted as Secretary for the first three years, but in 1880...
and the work had so increased as to require more time than he could spare from his pastoral duties, and Dr. and Mrs. Guinness were asked to undertake the sole responsibility of the Mission and its support as a branch of the East London Institute, the committee to resign all share in its management, and act only as an advisory council. Dr. and Mrs. Guinness consented to this plan, and the Mission was thus conducted for several years.

In 1883 the ABMU turned its attention to the Congo, and outposts were made to it by the Institute to take up the work, which was already well established, and leave the English organization free to go to the "regions beyond." The policy of the ABMU was one of concentration and radiation from a center, while the idea upon which the Livingstone Inland Mission was organized was a chain of stations to reach far into the interior. The Union and the Livingstone Mission, with its extreme stations, 800 miles apart, would give them room enough and to spare for several years to come, and they were unwilling to extend operations beyond the equator. The directors, on the other hand, were constantly asking what of the region beyond, with its tens of millions of people yet to be evangelized? And at length, in 1888, they resolved to take up the African work again, extending it farther up the Congo and along the tributary rivers. Thus the Congolese Mission was formed to be in perfect harmony with, but independent of, the ABMU.

The Swedish missionaries, when the mission passed under American management, formed a separate society and continued work on the north bank of the cataract of the Congo, one of their number, Nils Westlind, translating the entire New Testament into the dialect used there. In 1886 Dr. Harry Guinness became associated with his father and mother in the work of the Institute, and in 1891 sailed for the Congo to study the conditions and possibilities of missionary service in Central Africa. Subsequently he turned his attention to Central and South America. Gradually the scope of the Society's work enlarged until in 1899 it assumed the name of The Regions Beyond Mission Union, by which it is now known; the central thought was to reach lands beyond those already within the sphere of missionary labor. Dr. Guinness visited Panama, Ecuador, Peru, Bolivia, and Chile, crossed the Andes and descended the Amazon. The result was the establishment of mission work at Cusco, in Peru, and in Argentina. The last field occupied by the Union is in India, where it commenced work in 1899 in Behar, one of the darkest and most needy sections of the empire.

Livingstone Inland Mission: The pioneer of this mission, Mr. Henry Craven, with a Danish sailor, who was quickly recalled as unworthy, reached Banana, at the mouth of the Congo, in February, 1878. A passage in a trading vessel was secured to Boma, 70 miles up the river, and by canoe to Yele, 20 miles farther. After the Bantu African experience a landing stage was built at Matadi, at the end of the lower river navigation, and a station formed at Pala Vala, 15 miles inland on a plateau 1,800 feet above the sea, where the population were, in the main, friendly. Two associates joined the mission in the summer, and seven more by the end of the year, and a station was formed at Bansa Manteka. The question of transportation became a most difficult problem, and several of the company that preceded them had died; but they pressed on toward Stanley Pool. In 1881 the little steam-launch "Livingstone" was sent out with another band of volunteers. The vicissitudes of the work, the sickness of many, and the loss by death of five, led to doubts as to the wisdom of continuing the attempt. The experience of other societies, however, encouraged them, and new stations were formed until, when in 1884 the mission was transferred to the ABMU, seven stations were in working order: Mukimocka, Palabala, Bansa Manteka, Mukimbunga, Lukunga, Leopoldville, and Equatorville. The "Henry Reed" was afloat on the Upper Congo, and twenty missionaries, four of them married, formed the working staff of the mission. Since the foundation of the work nearly fifty had volunteered for it and had been sent out. A few proved unfit and were recalled, some were broken in health, and eleven had given up their lives on the Congo.

Congo Balolo Mission: Until early in the 19th century, the dwellers on the southern bank of the Upper Congo were peaceful members of the Bantu race. At that time a great nation came traveling westward, and took possession of the lower bank of the stream, turning out the former occupants and bringing in a new language, customs and people. The powerful invaders were significantly called Balolo, Irompeople, or the strong tribe. The country which the invaders conquered, and have since kept and dwelt in, is nearly five times as large as England, and fills the horseshoe bend of the Congo—extending from the Lomami in the east to Lakes Mantumba and Leopold on the west, and from Lopori on the north to the headwaters of the Bosira and Jaupa on the south. In 1888 Mr. John McKittrick, of the Livingstone Mission, returned to England on furlough from the advanced outpost of the mission, Equator Station, with an intense interest in the Balolo, and also a living specimen of the race, a Balolo boy named Bompole. The result of this apparently accidental visit was the organization of the Balolo mission. When the pioneer party for the new field was ready to sail a farewell meeting was held at Exeter Hall, in March, 1889. Many speeches were made—one at least unexpected and unpremeditated. It was spoken by Bompole's dark lips, and in his high, shrill voice. Hundreds of listeners in the great hall were hushed into silence to hear the few and ignorant words framed into broken sentences, for Bompole's vocabulary was very limited, and of grammar he knew nothing. The little lad said: "People "wanted Gospel," and then asked, "Isn't it a shame—shame to keep Gospel to yourself? Not meant for English only! Isn't it a shame? My people wanting gospel! Isn't it—they would have done it all! How different the experience of this party from that of the pioneers of the Livingstone Mission! The hearty cooperation of the missionaries already in the field not only facilitated the journey, but also averted the...
danger from exposure and inexperience to which
the earlier workers in so many cases had suc-
cumbed. No fatal illness occurred on the jour-
ney, and the missionaries have since their arrival
continued in good health. Early in 1890 the
second vessel arrived, and with the Mission's
own steam-launch, the "Pioneer," which had
been built in London, and was to be recon-
structed as the "Henry Reed" had been, at
Stanley Pool. This was followed in 1902 by the
"LIVINGSTONE," a much finer boat than its prece-
dessor. Of the 96 missionaries who, in the
thirteen years, 1889-1902, entered the service of
this mission, 30 have died, 3 remain on the mis-
sion staff, 6 are in the home work, 8 have joined
other missions, 9 broke down in health and re-
tired, and 8 proved unsatisfactory. The results
in the field have not been as apparent as in some
other sections, notably the cataract region, where
the ABMU and the Swedes are working; but
later reports show spiritual awakening, and
there are classes of enquirers numbering 100. In
the cases, we are about 1,500 children, and to
these the missionaries look for the best fruit.

Argentina and Peru: The work of the Regions
Beyond Missionary Union in South America was
the result of the visit to that continent of Dr.
Harry Guinness, after his visit to Africa. There
seems to have been no definite enterprise, as in
the case of the Congo-Balolo Mission, but a num-
ber of those who had graduated at Harley House
went out independently, and afterward were
gathered into two missions in Argentina and
Peru, the without any very complete organiza-
tion. In Argentina, partly evangelistic,
partly educational, is carried on at Buenos Aires,
Las Flores, Coronel Suarez, and Tres Arroyos,
in each case under the care of a missionary and
his wife, with the assistance of native evan-
gelists and teachers. The schools are on the pay
system and the income contributes materially
toward the expense of the mission work, the
RBMU meeting deficiencies. In Buenos Aires
a group of nurses has been established, especially
for maternity work, and access being thus gained
to families, a wider influence is secured. Through-
school, 2 day schools, and 1,209 professed Chris-
tians, of whom 484 are communicants.

Relief Work: The object of Christian Missions
is to extend the spirit and teaching of Christ.

the part of missionaries, officers of boards, and the Christian public, a firm and glad acceptance of the proposition that philanthropy is always a legitimate feature of missions, and that in seasons of need, when wide-spread distress, famine, flood or earthquake, through pestilence or war, relief work may rightly, for the time, absorb the strength of an individual or even of a whole mission, to the apparent detriment of the regular literary, educational or even evangelistic work of service.

II. Principles Governing Mission Relief. 1. Fidelity: It goes without saying that funds placed in the hands of missionaries for relief should be not only sacredly guarded, but also applied in accordance with the exact wishes of the donors. It is a great tribute to the integrity of missionaries the world over that, so far as the writer's knowledge goes, no questions are raised as to their fidelity in handling the vast sums of money that from time to time are thrust into their hands. This is the more striking in view of the fact that relief work is with them a self-imposed task, that they are almost invariably people with no support except a small living salary paid them for other less arduous services, and that they are under no bonds, nor any supervision, as to the management of the trusts committed to them. Because of the confidence reposed in them, and as a justification of its continuance, missionaries should always, from the outset of any relief effort, keep exact accounts of all moneys received and expended, and render them accounts, duly audited, to the boards, committees, periodicals, or individuals through whom the funds have been transmitted. Many such reports are remarkable for detail and accuracy, especially when we consider the many and pressing cares resting on those who prepared them.

2. Selection of Beneficiaries: The first and, in general, the principal consideration should be that of need. In questions of life or death no tests of race or creed should hold. Help should be given to the starving Kurd or Armenian, and to the plague-stricken Christian or Hindu or Chinaman on the same principle that the Father "maketh his sun rise on the evil and the good." Such impartiality is especially imperative where relief funds have been raised by appeals to the general public on purely humanitarian grounds, to which people of all classes have responded. The missionary should resist any temptation to use funds so given in such a way as to directly favor the institutions or the spiritual results which he himself, make special provision for "them who are of the household of faith." and after the crisis of a calamity is over, and the relief problem ceases to be that of saving life, the missionary will be freer to continue the relief on more limited lines, both as to its nature and recipients. Popular funds will then dwindle, and the money that continues to come will be from people who are in full sympathy with the aims of the mission and who will approve of orphanages, industrial schools, etc., which shade into the regular work of the missionary.

3. Methods of Relief: In order to know who are most in need, some sifting process is necessary. This may be done either by actually going to the homes of the people, finding out their exact circumstances, and giving them money and provisions, or, on the other hand, by providing remunerative labor under such conditions that only those most in need will apply for it. The latter method has much in its favor. In the first place, it will save much time and expense. Secondly, by a process of natural selection it will eliminate impostors. Thirdly, it avoids pauperizing, an evil second only to the calamity itself. Fourthly, it can make relief funds go further by being used over and over. For instance, raw cotton, when sent out, may be sold by one set of poor people, the proceeds of which go directly to those who prepared them. This may be attained by setting the people to work digging wells, reservoirs and canals, to insure a better water supply; or making roads for better transportation; or by erecting buildings for orphanages and hospitals; or by teaching new and improved arts and trades, by which the people can earn a livelihood. This is a splendid proof of their wisdom emphasized above need to be exercised in a spirit as sympathetic as it is wise, and to their discretion as to their fidelity in handling the vast sums of money placed in the hands of missionaries for relief work. This end may be attained by setting the people to work digging wells, reservoirs and canals, to ensure a better water supply; or making roads for better transportation; or by erecting buildings for orphanages and hospitals; or by teaching new and improved arts and trades, by which the people can earn a livelihood.

4. Spirit: But the fidelity, impartiality and wisdom emphasized above need to be exercised in a spirit as sympathetic as it is wise, and as patient as it is masterful, if the work is to bear spiritual as well as material fruits. Even in the conduct of well-organized charities and asylums in Christian lands it is necessary to guard against a hard, selfish, and demoralizing tendency among the employees. The poor, faint, and distracted victims of disaster will appreciate what is done for them all the more if done in a gentle and kind way.

III. Wider Results of Missionary Relief Work. 1. On the Missionary: The first and most apparent result may be the exhaustion and possible breakdown of some of the missionaries under the great strain, physical, mental, and moral. This should be foreseen by the Boards and needed rest provided at the earliest moment,
with a complete change of scene if possible. Barring a breakdown, the missionary will find himself equipped for the future. The closer intimacy with the people should give him a better understanding of their conditions of life, sentiments, and moral qualities. Missionaries have frequently developed greater efficiency through the calling out of latent faculties under the stress of apparent responsibility. The need of thoroughly practical and common-sense methods is brought out by these crises, and the lessons they teach should be fruitful in correcting defects of the missionary system. Industrial schools and manual training, now widely maintained with enthusiasm and success, are in many cases the direct outgrowth of relief work. The product of these schools cannot fail to be a more manly and competent type of convert, who will help to solve the problem of self-support.

2. On the Native Christians: There is every reason to believe that the above influences affecting the missionary for good are felt also by the native Christians. A despiritualization of the churches in connection with the relief work has been reported in some cases. This may be true to some degree, especially when, as in Armenia, the relief work necessitated by the massacres was not only so great as very seriously to interfere with the regular work of the churches and schools, but also had to be continued so long as to lose something of the sacred character. Religious societies sometimes arise among church members over the selection of distributors of relief, and the handling of large sums of money proves a temptation to some, as it does in every land. Another unfortunate result is said to be an impression that the missionaries have unlimited means at their command, and hence that they should be less urgent about native contributions.

3. Evangelistic Results: The effect on the unevangelized is generally reported to be highly beneficial. This is the case in proportion as the people understand that missionary relief funds are not supplied by any government treasury, but are free gifts from the people of Christian lands, made and dispensed without any proselytizing, but in the spirit of loving service personified by Christ. So conducted, relief work does not encourage “rice Christians.” That no money sticks to the fingers of the missionaries is an object lesson not lost in lands where official corruption is the rule.

4. Reflex Influence: The effect on the constituencies of the boards is helpful, first, by stimulating sympathy and overcoming the selfishness which is chiefly responsible for the niggardly gifts of many to missions. There is abundant evidence that relief funds are not disadvantageous to the treasuries of the boards. The gifts of regular contributors are not lessened by these special appeals, while many whose first gift is for relief become interested in the missionaries and the support of their regular work. Secondly, these crises are of great educational value through the popular interest aroused in the cause, and connection with races that are the objects of missionary effort. Thirdly, the dark background of a great calamity often serves to show, in strong relief, if only for a moment, the noble and truly great personality of missionaries who by their nature of their calling must be in places where much has to escape the recognition they richly deserve.

The effect on the general public is also most salutary, resulting as it does in the exercise and consequent strengthening of the nobler sentiments. Every relief effort is a practical assertion of the brotherhood of man. There is no doubt that relief from one or many lands to another in distress is productive of international good feeling and hastens the day when the nations shall not learn war any more.

“We hate those whom we have injured,” said a philosopher of heathen Rome. It is equally true that we love those whom we have befriended. Every wisely conducted relief effort may therefore be encouraged both as a cause and an effect of the coming of the Kingdom.

RELIGIOUS TRACT SOCIETY (1799): During the outbreak of missionary enthusiasm that marked the close of the 18th century, a group of practical Christian men, among whom were Rowland Hill and the Rev. G. Burder, met at St. Paul's churchyard and founded a society for the dissemination of Christian literature, which became known as the Religious Tract Society. From the beginning it has been unsectarian in principle, always selecting its committee from churchmen and nonconformists equally. It works through its agents and colporteurs, and by means of special grants to missionary and tract societies throughout the world.

It was not till 1818 that the Society made its first grant for foreign work, to aid the French Protestants, which led to the founding of the Paris Tract Society (1829), and of the Toulouse Book Society (1835). In the beginning of its work most of the foreign publications were prepared at the central office in London, but at an early date the greater part of the work for France was transferred to Paris and Toulouse, while the decision as to what should be published still rested with the London committee.

Assisted by the missionaries of the various evangelical denominations, the Society has printed books and tracts in 250 languages, dialects, and characters; the circulation of this literature being carried on as far as possible without the expense of agents. The sale of publications has been made to cover all expenses of manufacture, and the whole amount of contributions has been applied to the circulation of publications. The Society aids the various organizations engaged in philanthropic and missionary work in the home field, and makes grants to parochial, congregational, and individual workers throughout the country, and especially to Sunday and day school libraries. Work is done also in connection with hospitals, infirmaries, and other institutions, and for soldiers, sailors, fishermen, hop-pickers and navvies.

The Deports are maintained by the Society upon the Continent of Europe, at Lisbon, Madrid, Budapest, Vienna, Gratz, and Warsaw. Publication work at large centers, such as Paris, Toulouse, Baden-Baden, Florence, Rome, Berlin, and Constantinople, has been aided by liberal grants. In the mission fields of the world, where the help given takes the form of large grants of money, printing paper and of publications, wherever possible, such grants are made only to auxiliary book and tract societies, under the control of committees representing the evangelical denominations. Where there is no such organization, the Society aids individual workers.
In France the society makes grants in aid of the Dépôt Central, the Paris Tract Society, the McAll Mission and smaller grants to individual Christian workers. The Geneva Evangelical Society of Switzerland and the Belgian Evangelical Society of Belgium both receive small grants. In Italy the depot at Rome and the Italian Evangelical Publication Society, Florence, have received annual grants. Since 1877 the depot of the Society in Spain has been carried on from Madrid as a center, with subdeports at Barcelona, Saragossa, Seville, and Gibraltar. In 1902 those at Saragossa and Seville were closed. Colporteurs are employed to visit the villages with Bibles and tract literature. A depot is maintained at Lisbon, and a subdepot at Oporto, but in 1902 it was decided to discontinue the latter. Colporteurs are employed, and the publications of the Society are scattered through the country. At St. Miguel (Azores), and St. Vincent (Cape Verde), depots are maintained without expense to the Society.

In Germany grants are made to the German Evangelical Book and Tract Society; the Baden Christian Colportage Union, the Society for the Free Distribution of Holy Scriptures and Religious Literature, the German Book and Tract Society of Hamburg, and the German organization aided in Christian work. In 1902 the committee of the Society became convinced that the time had come to place upon the Protestants of Germany the task of carrying on their evangelical work, and decided to reduce the annual grants to German organizations. Individual grants are made to Christian workers in Holland and Denmark, chiefly for distribution among sailors. In Sweden the Society has made an annual subsidy to the National Evangelical Society of Sweden, one of the most active centers of religious publications in Europe, but in 1903 it was decided to discontinue this grant. In Norway the Society has assisted the Christian Home Mission. In Russia every opportunity for disseminating Christian literature has been seized, and the committee under the superintendence of Dr. Kopeczek, Dresden, has been aided in Christian work. A depot is maintained in Poland at Warsaw, and grants are made to individual workers; assistance has also been given the Bible-Bag Mission of Finland. In Greece the only regular work of the Society for some time has been tract publication work, which has been carried on under the superintendence of Dr. J. G. Kalamara, of Athens. In Austria work is carried on in Vienna in conjunction with the British and Foreign Bible Society, and at Graz and Budapest. Subdeports were for many years established at Lemberg, Trieste, Bucharest, and Belgrade, but were discontinued in 1902. Aid has been given an active evangelical pastor in Prague, Bohemia. For over 35 years the Society has had a depot in Hungary, but not until 1902 was it granted a legal existence by the government, and able to work openly without hindrance.

In Turkey the Society has made grants to the publication work in Constantinople under the American Board, to the Mission Institute in Samokov, Bulgaria, and to individual missionaries in Turkey in Asia, especially at Aintab and Maraş. In 1871 the Society had an important publication work through the American Press at Beirut in Syria, and special grants have been made to individual workers in Syria and Palestine. Since 1813 the Society has made grants for the preparation of a vernacular Christian literature in India, and many large auxiliary tract societies have been formed in various parts of the empire, all of which have been aided by the Society. Perhaps the most important of these organizations is the Christian Literature Society, for India, which cooperates with the RTS. The Calcutta Book and Tract Society has been aided annually since 1831. The North India Christian Tract and Book Society, Allahabad, has received grants of money and printing paper. The Bombay Book and Tract Society, founded in 1831, has received yearly grants from the Society since its formation. The Gujarat Tract and Book Society and the Orissa Tract Society receive annual grants of printing paper. The Madras Religious Tract and Book Society, auxiliary societies, the oldest existing organization of this kind in India, has received grants since its formation in 1818. Other societies in India receiving regular aids of money or printing paper from the RTS are the Banglore Tract and Book Society, the Malayalam Religious Tract Society, the South Travancore Tract Society, the Ceylon Christian Literature and Religious Tract Society, while grants of stock have been made to the depots in Burma, at Rangoon, Maulmain, and Mandalay. Publications connected with the various missions in India have been aided and grants have been made to individuals working in the empire. The Decennial Conference of Indian Missionaries convened at Madras in 1902 sent to the Society an acknowledgment of the services it had rendered in India: "Without the books, tracts, and literature published with the aid of this and kindred societies, mission workers would be seriously crippled." In China the Society cooperates with the Society for the Diffusion of Christian and General Knowledge among the Chinese, and works through the various auxiliary organizations of the empire. The Chinese Tract Society of Shanghai receives grants in aid of the vernacular publication work, and in 1899, with the support and encouragement of the London Committee of the RTS, published an annotated Bible for the Chinese—one of the greatest works ever undertaken by the missionary body in China." For twenty-six years the Central China Religious Tract Society has been at work, with centers at Hankow, Wuchang and Hanyang. It is managed by a committee representing four nationalities and six missions, of which the British and the RTS, of London, yearly grants having been made for its work ever since its formation. Annual grants are made to the Hongkong Religious Tract Society, and to the Bible, Book, and Tract Depot in that city, to the Religious Tract Society of Canton, Amoy, and West China; to the North China Tract Society, and the Manchurian Tract Society. Special grants have been made for the colportage work of the National Bible Society of Scotland, the China Inland Mission, and individual missionaries of other denominations in China. In Japan the Society makes large grants to the Japan Book and Tract Society, located in Osaka, and made a special grant in 1903 to be expended on Christian literature for the visitors of the Osaka exhibition. Few organizations have such a far-reaching scope as the Religious Tract Society. Besides its work in the larger countries of Europe and Asia, it makes grants to workers in the Straits Settlements, in Persia, in North Africa, Algiers and Tunis; Eastern and Central Africa, through the CMS workers. In South Africa the Port Elizabeth Railway Mission is supplied with literature.
at reduced rates, the South African Auxiliary of the Bible Society received grants of tracts for hospital use; books were granted at half price for the Dutch Girls' Home, at Cape Town; and for Sunday school libraries in six or more denominations, as well as grants of pictures, tracts, etc., for individual workers. In West Africa grants of books, tracts, pictures, electrotypes, etc., have been made to missionaries of various creeds and nationalities. In Madagascar a grant of paper aids the LMS Mission Press; tracts and pictures have been sent to Mauritius, and a single grant has been made to a worker on Ascension Island in the South Pacific. In Canada grants are made in aid of the Montreal Auxiliary Religious Tract Society, the Bible Society Auxiliary of Quebec and to individual workers. In Nova Scotia the British American Book and Tract Society of Halifax receives annual grants of tracts and favorable terms on books for Sunday school libraries for colportage work in the coast of Newfoundland and Labrador. Special grants have been made to individual workers in Newfoundland. A single grant of tracts was made in British Columbia, and to the American Seaman's Friend Society, at New York, applied for by the Secretary.

In Mexico the United Tract Committee of Mexico City received aid for Spanish tract printing and workers have been aided in British and Spanish Honduras and in Costa Rica. In South America at British Guiana, Brazil, Argentine Republic, Chile, and Colombia, to individual workers. In the West Indies grants of books for colportage work have been made, for Sunday school and day school libraries, and tracts for general distribution at Jamaica, Antigua, Bahamas, at Bermuda. In Australia the same grants have been made to New South Wales, Victoria, South Australia, Western Australia, and Tasmania. In New Zealand grants have been made of publications at reduced rates to the Scripture Gift Association of Auckland; the New Zealand Bible Tract and Book Society at Dunedin and Woodville for use in the Bush country.

The LMS Mission Press of New Guinea receives grants of printing paper. In Samoa a like grant is made. The Wesleyan Missionary Society has been aided with literature, and in Tahiti a missionary of the Paris Evangelical Society has received grants of French and English publications.

During 1903 the total circulation from the Home Depot, including books, tracts, periodicals, cards, and miscellaneous issues, was 29,481,210, of which 14,034,350 were tracts. The total issues from the foreign depots have been estimated at 20,000,000, making about 49,481,210 issues for the year, a grand total of 3,540,196,440 since the formation of the Society. The receipts of the Society from all missionary sources amounted to £19,501 to the General Fund, and £1,474 to the Centenary Fund. Grants of money, paper, electrotypes, books, tracts, and other publications in Great Britain and Ireland, £11,175; similar foreign grants, £7,084; a total of £18,259.

REW A: A settlement in the Fiji Islands, situated on the E. coast of Viti Levu. Station of the Australian Wesleyan Methodist Missionary Society, with (1900) 1 missionary, 620 native workers, 23 outstations, 220 places of worship, 480 Sunday schools, 627 day schools, 1 theological college, and 6,729 professed Christians.

REW A, Samuel Audley: Born at Blountville, Tenn., January 23, 1827; graduated at Knoxville University, 1847; Union Theological Seminary, New York, 1847; sailed as a missionary of the ABCFM March 4, same year, for the Nestorian Mission. In 1851 Mr. Rhea went to the station at Gawan, among the mountain Nestorians. His health broke down under the strain of that lonely and arduous life, and he was obliged to return to the United States for recuperation in 1859. After his return in 1860 he was stationed at Urnia. He was well versed in Hebrew and Syriac; spoke the modern Syriac with great accuracy and fluency; was able to preach in Azerbaidjan Turkish with acceptance to the Armenians and others. While at Tabriz he pursued investigations in the Eastern Turkish, with the view of translating the Scriptures into that tongue, having already rendered in it the Sermon on the Mount. While in Kurdistan he studied Kurdistan and wrote a valuable synopsis of the grammar. He was treasurer of the mission, and its business agent in general. He also had the charge of evangelistic work in fifteen villages, some of them very large. His travels among the wilds of Kurdistan were often extremely perilous. In 1865 he fell ill as a result of exposure while touring. The next day he appeared convalescent, and started to return to Urnia, but died at the roadside village of Ali Shah, September 2, 1865.

RHEES, Rev. Henry Holcombe: Appointed a missionary of the ABMU July 13, 1878, and went immediately to Tokio, Japan, where he built the first American Baptist Mission house in Japan. In 1882 he moved to Kobe, where the remainder of his missionary life was passed. He visited America in 1889 and 1891, and the latter year he received the degree of Doctor of Divinity from Shurtleff College, Alton, Ill. The writer of these words met him at Kobe in the year 1895, and was deeply impressed by his intelligent views on the mission work in Japan, his indefatigable spirit, and his self-sacrificing service for his Master. For years he was the senior missionary of the Baptist Mission in Japan; and it was this consecrated servant of God in all departments of the work that was potent and permanent. He fell in sleep at Kobe, May 10, 1899.

RHENIUS, Charles Theophilus Ewald: Born November 5, 1790, at the fortress of Gaudens, West Prussia. He was led to become a missionary by reading the writings of the Moravians. He sailed for India as a missionary of the CMS, February 22, reaching Madras July 4, 1814. He soon proceeded to Tranquebar, his appointed station. At the end of five months he was sent to Madras to found a new mission, being the first to labor there under the CMS. During the five years of his residence in Madras he was constantly employed preaching the Gospel in public meetings, conversing with individuals, holding discussions with Brahmins or other learned men, studying the Tamil and Telugu, and making frequent tours to various cities and towns. It was then decided by the committee that Mr. Rheenius should establish a mission in Tinnevelly district, and in June, 1820, he removed to Palamcotta, the chief city of the district. Mr. Hough, the English chaplain, having left Palamcotta in 1821, Mr. Rheenius held an English service on the Sabbath for English residents until the arrival of another...
chaplain. In 1822 a seminary was established for the education of youth, which has furnished catechists and schoolmasters for the mission. A distinguishing feature of this mission, largely due to Mr. Rhenius, was the formation and settlement of Christian villages. In order to withdraw the converts from the influence of heathenism, pieces of land were purchased, those for which idolatry were located on them, and formed into a Christian congregation. A catechist was appointed, a school established, and a small mission erected. But when in 1825, and the following years, the Christian villages had increased in number, to relieve the missionary of the burden of their management an association of natives was formed called "The Native Philanthropic Society," having for its object the settling of native Christians in villages, the building of schoolhouses, the acquisition of grounds, etc., for these purposes, and the rendering of other assistance to the native Christians in their external affairs. In 1832 an unhappy controversy arose between Mr. Rhenius and the CMS on the subject of the form of ordination to be used for native ministers. This led to his dismissal from the service of the Society, and his continuance in the same field as an independent missionary, often at variance with his former associates. He continued this independent mission work until June 5, 1836, when he died of a stroke of apoplexy.

Mr. Rhenius was one of the greatest missionaries working in India in the first half of the 19th century. He had extraordinary power over those natives who came under his personal influence. The happy union of cheerful piety and masculine energy with a bodily constitution capable of great and sustained exertion rarely appears in the missionary field. In addition to this, Mr. Rhenius was an accomplished scholar and a master of the Tamil language. To him it was given to revise and improve Fabricius' version of the Tamil Scriptures. The New Testament was printed in 1828, but the Old Testament was left unfinished at his death. Differences of opinion as to the principles of translation led him to publish in 1826 a valuable essay of 60 pages on the Principles of Translating the Holy Scriptures. He also prepared in Tamil a Harmony of the Gospels, which remains in general use. Other works were The Essence of the True Veda, A Summary of Divinity, and a very useful Tamil Grammar.

RHENISH MISSIONARY SOCIETY. See Germany; Missionary Societies in.

RHODESIA: A British territory and sphere of influence in South Central Africa, comprising the region lying to the north and west of the Transvaal Colony and Bechuanaland, bounded on the east by Portuguese East Africa, on the north by the Congo Free State and on the west by German Southwest Africa. Total area is estimated to be about 600,000 square miles. It is divided by the Zambesi River into Northern and Southern Rhodesia.

Northern Rhodesia was first opened by David Livingstone. It is divided into Northern Rhodesia and Northwestern Rhodesia, both provinces being administered by the British South African Company, the defense of the territory being assumed by the British Central African Protectorate. Northeastern Rhodesia has about 120,000 square miles, and a population of about 339,000. It comprises the region lying between Lake Nyasa and Lake Mweru, with its affluent, the River Luapula, and extends from Lake Tanganyika nearly to the Zambesi.

Northern Rhodesia, or Barotseland, with an indefinite area, somewhat larger than Northeastern Rhodesia, extends from the Congo Free State southward to the German territory and the Zambesi, and is bounded east and west respectively by Northeastern Rhodesia and Portuguese West Africa.

Southern Rhodesia, with an area of 144,000 square miles and a population of about 500,000, embraces the territory from the Zambesi to the Transvaal and Bechuanaland, extending westward from Portuguese East Africa to the German territories. It includes Mashonaland and Bechuanaland. It is especially in the line of the British immigration and mining movements of Central and South Africa, and is fast being explored and exploited. In Mashonaland about 15,000,000 acres of land, and in Mashonaland about 12,000,000 acres, have been surveyed. Townships to the number of 12 have been organized. In 1901 there were about 11,000 Europeans in the territory. Lines of railway, built and projected, connect the chief centers with Cape Colony. There are about 100 miles of telegraph, and the territory has deposits of gold. The vast tableland of the north and northeast has an elevation of about 5,000 feet, and is well watered, with a rich soil and fine climate. The Matabili, so called from an immense shield behind which they were "hidden" in war, were originally a band of Zulu warriors, whose ranks were recruited from the lands they conquered. They are very fierce, daring, and proud. The Makalaka and Mashona were the former masters of the land. The former were nearly exterminated, the latter form the substratum of the northern population, and are very industrious. The Banyai are distinguished by their physical strength, light complexion, cleanly habits, and by the respect paid to women.

In 1896 there was a native revolt in Matabililand, immediately followed by a similar disturbance in Mashonaland. Both these were thoroughly quelled.

The Missionary societies operating in Rhodesia are the LMS with 8 stations, the SPG with 7 stations, the Paris Society in the N. W., the ME and the ABCFM, Total area is estimated to be about 600,000 square miles. It is divided by the Zambesi River into Northern and Southern Rhodesia.

RIBEI: A settlement in British East Africa, situated near the coast about 15 miles N. of Mombasa. It stands on a high tableland, with a fine view over the ocean. Station of the United Free Methodist Churches (1861). The estate belonging to the UMFC Mission is about 750 acres. There are (1903) 2 missionaries, 8 native workers, 2 outstations, 5 places of worship, 2 day schools, 5 Sunday schools, and 359 professed Christians.

RIBEIRAO PRETO: A town in Brazil, South America, situated in the State of Sao Paulo on the railway, about 200 miles N. by W. of Sao Paulo city. Station of the MES (1895), with (1903) 2 missionaries and their wives, 2 women missionaries, 2 native workers, 3 outstations, 2...
places of worship, 3 Sunday schools, 2 boarding schools, and 550 professed Christians.

RICHARDS, William: Born at Plainfield, Mass., U. S. A., August 22, 1792; graduated at Williams College 1819, Andover Theological Seminary 1822; sailed November 29 same year as a missionary of the ABCFM for the Sandwich Islands, accompanied by four natives educated in the United States. He was stationed at Lahaina, on Maui. In 1837 he visited his native land with his wife and six children, arriving in May and returning in November. In 1838 the king and chiefs requested him to become their teacher in the science of government and laws, and also their chaplain and interpreter in their intercourse with foreigners. The code of laws adopted by the nobles and people was translated into Hawaiian by Mr. Richards, occupying 226 pages. From 1842 to 1845 he was absent on a mission to secure the acknowledgment of the independence of the islands by Great Britain, France, and the United States. After this recognition by foreign powers, he was sent as ambassador to England and other courts. On his return he was appointed minister of public instruction, which office he held till his death, November 7, 1847. His influence with the king and government was very great.

RICHMOND: A settlement on one of the small islands of the Fiji group, S. of Viti Levu Island. About 320 miles E. of Angra Pequena. Station of the Australian Wesleyan Missionary Society, with (1900) 1 missionary, 228 native workers, 11 outstations, 76 places of worship, 150 Sunday schools, 150 day schools, and 2,331 professed Christians.

RIETFONTEIN: A settlement in Bechuana-land, Cape Colony, South Africa, situated on the frontier of German Southwest Africa, about 320 miles E. of Angra Pequena. Station of the Rhenish Missionary Society, with (1900) 1 missionary, 228 native workers, 11 outstations, 76 places of worship, 150 Sunday schools, 150 day schools, and 2,331 professed Christians.

RIFFIAN LANGUAGE: The tribes inhabiting the Rif Mountains in the northern part of Morocco, which belongs to the Hamitic group of the African languages. It is probably to be classed as a Berber dialect, although often spoken of as a distinct language. So far as it is written the Arabic alphabet has been used for the purpose.

RIGGS, Elias: Born at New Providence, N. J., November 19, 1810. Died at Constantinople, Turkey, January 17, 1901. During his early years he showed decided linguistic talent, and while at college he applied himself especially to the mastery of Hebrew, Syriac, Arabic, Chaldean and modern Greek, and produced an Arabic grammar and Chaldean manual. While he was completing his last year at Andover Theological Seminary he was invited by the American Board to join its mission in Greece, and on September 20, 1852, he was ordained. With Mrs. Riggs, on October 30, 1852, he sailed from Boston, and the next day forward joined Rev. Jonas King at Athens. For six years he labored at Argos, largely along educational lines, in Greece; and in 1844, because of governmental restrictions, he was transferred to Smyrna, Turkey, where he continued his work among the Greeks in that city. In 1844 he was assigned to the Armenian branch of the mission; and the greater part of his time from 1845 to 1852 was engaged in the work of translating the Scriptures into Armenian. In 1853 he was transferred to Constantinople, and for three years he was in charge of the Greek department and instructor in theology in the Bebek Training School. He visited the United States in 1856, and after filling the position of instructor of Hebrew and Zoroastrian Seminary, he was offered a professorship in that institution. Upon his return to Constantinople he began the translation of the Bible into Bulgarian, another language he had mastered, and the complete edition of this work was issued in 1871. In 1873 the American and British Foreign Bible societies appointed a committee to revise the Turkish translation of the Bible, so as to make it acceptable both to the mass of the people and to the educated. The members of the committee were Dr. W. G. Schaufler, Rev. George F. Herrick, Rev. Robert Weakley, and Dr. Riggs. In 1878 the work, which has become the standard, was issued in both Arabic and Armenian characters. Besides his more important translations, Dr. Riggs wrote numerous tracts, school-books, and devotional books; and he produced during his long missionary life, either as translations or originals, no less than four hundred and seventy-eight hymns in the Bulgarian language alone. To give an idea of the linguistic attainments of Dr. Riggs, it may be stated that he had a working knowledge of twenty languages, and was a master of twelve. There are four nations reading the Word of God as he translated it for them; and as Dr. Herrick says: "The homes, the schools, the churches, where Dr. Riggs' translations of the Word of Life are read, and where the hymns he has translated are sung, are numbered by the tens of thousands, and extend from the Adriatic to the Persian Gulf, from the snows of the Caucasus to the burning sands of Arabia."

RIGGS, Stephen R.: Born Steubenville, Ohio, U. S. A., March 25, 1812; graduated at Jefferson College; studied theology at Alleghany Seminary; ordained April 6, 1837; went at once, with Mrs. Riggs, under appointment of the ABCFM to the mission among the Dakotas. Here he labored with great zeal and success in missionary and literary work at various places till the Sioux outbreak of 1862, when, barely escaping with his life, he fled to St. Paul, returning soon as the outbreak. After a long and painful illness he died, August 24, 1883, aged 71, having spent over 45 years in active and successful work among the Indians. Dr. Riggs reduced the Dakota language to a written form, organizing and adapting it to religious expression, and translated it into nearly the entire Bible. He prepared also a Dakota dictionary of more than 16,000 words, which was published by the Smithsonian Institution. Upward of 50 volumes of religious and literary, partly translated, partly original, were prepared by him for the use of the Dakotas in their language. He lived to see ten churches organized and efficient, under native pastors. Of his eight children, five entered the missionary field, four among the Indians and one in China.

RIO DE JANEIRO: The capital of Brazil and the most important commercial city of South America. It is situated on one of the finest harbors of the world, 75 miles west of Cape Prá. The bay is land-locked and is
entered from the south. It extends inland 17 miles, with a greatest breadth of 12 miles, and is said to be the most spacious and secure bay in the world. The city itself, like Rome, is built on seven hills, and the houses, with their white walls and red roofs, clustering on the valley sides, 12 miles from the sea, and is surrounded by a mountain three miles southwest of the city. The climate is tropical, ranging from 54° in August to 97° in December. The annual rainfall is about 40 inches, one-fifth of the whole amount falling in February. The commerce of Rio de Janeiro is great and steadily increasing. As Brazil is the greatest coffee-producing country in the world, Rio is the largest coffee-exporting city. The population consists largely of Portuguese, with a mixture of negro blood, and is estimated (1900) at 750,000. Station of the MES (1878), with (1903) 3 missionaries, 1 of them with his wife; 2 women missionaries, 2 native workers, 2 outstations, 1 place of worship, 4 Sunday schools, 1 printing house, and 345 professed Christians. Station also of the SBC (1884), with (1903) 1 missionary and his wife, 4 native workers, 3 outstations, 1 place of worship, 1 printing house, and 233 professed Christians. Station also of the SDA (1891), with (1900) 5 missionaries, 4 of them with their wives; 1 woman missionary, 6 native workers, 25 outstations, and 697 professed Christians, 18 Sunday schools, 4 day schools. The YMCA (1892) has a printing house, and 233 professed Christians, of whom 575 are communicants. The name is also written Ruatan.

ROBBINS, Elijah: Born at Thompson, Conn., March 12, 1828; graduated at Yale College 1856, and East Windsor Theological Seminary 1859; ordained August 3; sailed as a missionary of the ABCFM September 29 of the same year for the Zulu Mission, where he labored for nearly thirty years. He was stationed first at Umzumbi, but the latter portion of his life was spent in connection with the Mission Training School at Amanzimtole. He died there June 30, 1889. This seminary for training Zulu men for the Zulu Mission is in a great measure the fruit of Mr. Robbins' zeal and perseverance. The quality of the native laborers in the field testifies to the thoroughness of their teacher.

ROBERT COLLEGE, Constantinople: Robert College is an outgrowth of American missions in Turkey. It was founded in 1863 by Christopher R. Robert, a merchant of New York, in connection with Rev. Cyrus Hamlin, D.D., who became its first president. The aim was to establish at Constantinople something as nearly as possible like a first-class New England college, thoroughly Christian, but not sectarian, and open to young men of all the nationalities and religions of the East, with the English language as the common ground upon which all could meet. The College was opened in an old mission building at Bebek, with four students, all English or Americans. It was transferred in 1871 to its present location on a commanding eminence on the Bosphorus, six miles from Constantinople, where it owns some fifteen acres of land, secured to it by an imperial charter. It now has three large stone buildings, one of which is used for classrooms and dormitories, a second for scientific instruction and public assemblies, and a third for the preparatory department. Besides these a gymnasion is now (1903) in process of erection, and other buildings are projected. The College also owns a president's house and two professors' houses.

Incorporated under the laws of the State of New York, it is governed by a Board of Trustees, residing in or near the City of New York, who have charge of its funds and appoint its president, professors and tutors. Local affairs are administered by the president and faculty, and also all other teachers are appointed. Its endowment fund is now about $250,000, and the value of its real estate at Constantinople is estimated at about the same amount. Of this total sum Mr. Robert contributed somewhat more than $400,000. Its board of instruction consists of 36 persons, of whom 15 are Americans. The students now number over 300 annually, representing from 12 to 15 nationalities, chiefly Portuguese, with a mixture of negro blood, and is estimated (1900) at 750,000. Station of the MES (1878), with (1903) 3 missionaries, 1 of them with his wife; 2 women missionaries, 2 native workers, 2 outstations, 1 place of worship, 4 Sunday schools, 1 printing house, and 345 professed Christians. Station also of the SBC (1884), with (1903) 1 missionary and his wife, 4 native workers, 3 outstations, 1 place of worship, 1 printing house, and 233 professed Christians. Station also of the SDA (1891), with (1900) 5 missionaries, 4 of them with their wives; 1 woman missionary, 6 native workers, 25 outstations, and 697 professed Christians, 18 Sunday schools, 4 day schools. The YMCA (1892) has a printing house, and 233 professed Christians, of whom 575 are communicants. The name is also written Ruatan.

ROBBINS, Elijah: Born at Thompson, Conn., March 12, 1828; graduated at Yale College 1856, and East Windsor Theological Seminary 1859; ordained August 3; sailed as a missionary of the ABCFM September 29 of the same year for the Zulu Mission, where he labored for nearly thirty years. He was stationed first at Umzumbi, but the latter portion of his life was spent in connection with the Mission Training School at Amanzimtole. He died there June 30, 1889. This seminary for training Zulu men for the Zulu Mission is in a great measure the fruit of Mr. Robbins' zeal and perseverance. The quality of the native laborers in the field testifies to the thoroughness of their teacher.

ROBERT COLLEGE, Constantinople: Robert College is an outgrowth of American missions in Turkey. It was founded in 1863 by Christopher R. Robert, a merchant of New York, in connection with Rev. Cyrus Hamlin, D.D., who became its first president. The aim was to establish at Constantinople something as nearly as possible like a first-class New England college, thoroughly Christian, but not sectarian, and open to young men of all the nationalities and religions of the East, with the English language as the common ground upon which all could meet. The College was opened in an old mission building at Bebek, with four students, all English or Americans. It was transferred in 1871 to its present location on a commanding eminence on the Bosphorus, six miles from Constantinople, where it owns some fifteen acres of land, secured to it by an imperial charter. It now has three large stone buildings, one of which is used for classrooms and dormitories, a second for scientific instruction and public assemblies, and a third for the preparatory department. Besides these a gymnasion is now (1903) in process of erection, and other buildings are projected. The College also owns a president's house and two professors' houses.

Incorporated under the laws of the State of New York, it is governed by a Board of Trustees, residing in or near the City of New York, who have charge of its funds and appoint its president, professors and tutors. Local affairs are administered by the president and faculty, and also all other teachers are appointed. Its endowment fund is now about $250,000, and the value of its real estate at Constantinople is estimated at about the same amount. Of this total sum Mr. Robert contributed somewhat more than $400,000. Its board of instruction consists of 36 persons, of whom 15 are Americans. The students now number over 300 annually, representing from 12 to 15 nationalities, chiefly
Armenian, Bulgarian, Greek and Turkish. The number of languages which must be taught in the College is eleven, and more or less instruction is given in half a dozen more. The common language of the College, however, is English, in which all public exercises are conducted and in which the students after the third preparatory year become proficient.

There are two departments in the College, the preparatory, with a three years' course, and the collegiate, with five classes. The collegiate course is modeled on that of the smaller American colleges, according to the student's a certain amount of choice between classical and scientific or commercial studies, and leading up to the degree of A.B. or B.S. About 20 students now graduate each year. The aim of the College is, however, to give to those who are unable to take the full course, thorough general education in accordance with American ideas and Christian principles. As the majority of them expect to become business men a course has recently been organized which, while retaining the more important liberal studies, includes a number of commercial subjects, but omits Latin and the more advanced mathematics. Arrangements have also been made for more thorough instruction in the physical sciences. In the appointment of instructors great care is exercised to obtain men who are in cordial sympathy with the Christian purpose by which the founders of the College were animated. While there is no interference with the religious beliefs of the students, it is the earnest effort of the faculty to develop in them a manly, Christian character. All are required to be present at morning prayers, and all boarders at the Sunday services. They also meet regularly for the study of the Bible, and the different nationalities have their separate YMCAs, while there is one general association whose exercises are conducted in English. It is its moral, quite as much as its intellectual, tone which has given the College such wide renown throughout the East and which attracts to it Mohammedans and Jews, as well as members of the Greek and Armenian churches. It has not only sent out many Christian men, but has exerted an important influence upon these churches, as well as upon the political and social development of the countries from which its students come and to which they return.

About 2,500 young men have spent an average of three years in the College, and it has graduated in all 414, who have become preachers, teachers, government officials, judges, editors, lawyers, physicians, army officers, civil engineers, and business men in all parts of the world. Some 80 of them now fill official positions in Bulgaria.

Since the resignation of Dr. Hamlin in 1877, Rev. George Washburn, D.D., LL.D., who had previously been connected with the College for eight years, has been its president. Its success has been in large measure due to the eminent ability and his thorough knowledge of oriental languages. In 1891 he reached the age of seventy years, he resigned the office, and, on his nomination, Rev. C. Frank Gates, D.D., LL.D., formerly president of Euphrates College at Harpoot, was chosen to succeed him. Dr. Washburn continues to give instruction as before, and it is hoped that the College may long have the benefit of his wisdom and his large experience.

The officers of the Board of Trustees are:

President, John S. Kennedy; Secretary, Rev. Edward B. Coe, D.D.; Treasurer, Frederick A. Booth.

ROBINSON, Rev. John Alfred: Born in 1859 at Kewsham vicarage, Somerset. Died, 1891, at Lokoja. Educated at Liverpool College, and at Christ College, Cambridge, where he took the Carius University. Greek Testament Prize. He received his B.A. degree in 1881, and his M.A. degree in 1884. During 1882-84 he was curate of the parish church at Trowbridge, and from 1884-1887 he was House Master of Neuenheim College, Heidelberg. In 1886, September 13, he was accepted as a missionary under the CMS; on February 5, 1887, he was appointed Secretary of the Niger Mission; and in 1889 he was transferred at his own desire to the new Sudan and Upper Niger Mission. He devoted much of his time to the study of the Hausa language, and left contributions on the subject, with a translation of St. Matthew's Gospel. At the time of his death, he was writing a new Hausa grammar and preparing a revision of Dr. Schön's dictionary. His researches into the dialectic differences of the Hausa language have brought to light much that is quite new, and the results of his studies have been a great aid to other missionaries. In a short while he, by his charm of manner, gained a great influence over the natives, and, as one said, he might have been a Hausa born, so perfectly was he at his ease among them. He was a brief but brilliant career as a missionary of the Cross.

ROCK SOUND: A settlement on the E. of Eleuthera Island in the Bahamas, lying 50 miles E. of Nassau. Station of the WMS, with (1903) 4 native workers, 4 Sunday schools, 1 place of worship, and 182 professed Christians.

ROGBERE: A village in Sierra Leone Colony, situated about 45 miles S. E. of Port Loko. Station of the CMS (1866), with (1903) 1 missionary and his wife, 4 native workers, and 2 outstations.

ROMAN CATHOLIC MISSIONS: Under this head are included those missions which have been undertaken since the Reformation by Roman Catholics as distinct from Protestants. While it is probably true, in a considerable degree, that the Roman Catholic missions among the heathen were undertaken to make good the losses of Rome from the great Protestant defection, the prime motive was the sudden enlargement of opportunity offered by the Spanish and Portuguese discoveries. From the very first the Spanish Church and the Spanish State were zealous to convert the newly discovered natives, and to protect them against the rapacious adventurers who poured out from the Iberian peninsula, and both efforts were unremitting and slowly effective, the not until great multitudes had been swept away.

Rome has never claimed the right to compel unbelievers to receive baptism. Thomas Aquinas distinctly disavows this right for the Church, and even in Spain the bishops at various times rebuked the zeal of the princes for forcible proselytism. But as the rebukes of Alcuin did not deter Charles the Great from his policy of forcing Christianity upon the Saxons, so those of the Spanish bishops were often equally ineffective to prevent the forcible proselytism of Jews and Moors. In the south, as in the north, religious unity was esteemed by the rulers the only certain foundation of civil unity, and the
The Inquisition was soon transplanted and arieties. They came first in 1522 from Ghent. One reluctance to accept the forms of the conquering people possess a peculiar skilfulness, I can truly say that there are among them good copyists, your Majesty's chapel. In a school and Indian and the Peruvian, were treated mildly, or kindness they allured the natives from the cliffs at least with comparative mildness, except in the came Augustinians, Antony de Roa being the most distinguished. In 1572 came Jesuits, who version in motion, was neither extensive nor deep succeeded by the Franciscans and some lesser orders to secure the conversion of the Indians. The Jesuits, judging that the Spaniards needed that in six years they had incorporated 200,000 souls with the Church of Christ; in eight years the Archbishop of Mexico is said to have been metropolitan of a million Christians. This splendid see was refused by Musa, and so by the Emperor Charles the Fifth's near relative, Pedro de Ghent, likewise a simple lay-brother. He writes to his imperial kinsman: "Because the people possess a peculiar skillfulness, I can truly say that there are among them good copyists, perhaps, who have been allured by the common sight of music and sacred songs."

The missionaries, apparently becoming convinced that the reformation among the Spaniards, the sufficient to set the good work of Indian conversion in motion, was neither extensive nor deep enough to make them, or the whole, desirable neighbors for their converts, obtained from the King of Spain the right to govern their 200,000 or 300,000 neophytes with entirely independent authority. Under their mild control the Guarans enjoyed a hundred and sixty years of simple happiness until the Jesuits were expelled in 1767. The withdrawal of personal and minute supervision and leadership, as in other Roman Catholic Missions, resulted here in the loss of all that had been gained, and the Indians relapsed into their idolatry and savagery.
North America: In 1526 Pamphilus de Narvaez, a Spanish explorer, set out to conquer Florida. Accompanied by a number of Franciscan monks, he landed at Pensacola Bay April 16, 1528. Disease caused by exposure, suffering, and death of several monks, forced him to turn back after a few months, they had reached the coast of Florida. He built four sea-going canoes in which he intended to reach Mexico. They reached land, only to perish later on from starvation, sickness, or at the hands of the natives. Little is known of the work of the missionaries who went westward with Narvaez.

In 1565 a mission was established among the Indians known to the French as the Abnakis. In all the early French missions, beginning with that of Father Labour, the French Jesuits, in 1551, and continuing until 1763, and had during this time over six hundred converts.

In 1573 by the Spanish Franciscans. This mission continued until 1763, and had during this time over six thousand converts to Christianity. So rapid had been the progress among these missions that large numbers of the Indians could read and write before the Puritans had begun missionary work in New England.

The first religious body to do missionary work among the Indians of Canada and of the West was the French Jesuits. In the early French explorations the missionary idea was as prominent as that of the extension of territory.

Cartier’s commission authorized him to explore “in order the better to do what was pleasing to God, our Creator, and Redeemer.” De Monts was also required to have the Indians “instructed, invited, and impelled to a knowledge of God, and the light of faith and Christianity.”

In 1608 De Monts planted his first settlement at the mouth of the St. Croix, on Bonn Island. A short time later this mission was transferred to the Nova Scotia shore, where it received the name of Port Royal. This was the first foothold of France and the Catholic Church in the North.

In 1611 two Jesuit missionaries began work among the Micmacs of Nova Scotia, removing a little later to Deer Island, near the mouth of the St. Croix River. In order that the Abnakis might be instructed, invited, and impelled to a knowledge of God, and the light of faith and Christianity.

In 1680 Father Le Caron began labors among them. War with England resulted in the destruction of the mission; the country was devastated; missionaries lost their lives, and after the English finally occupied Quebec in 1763 the Mission was abandoned. In the War of the Revolution the Abnakis sided with the Americans.

In 1641: two French Jesuits, Father Charles Rollin, and Father Isaac Jorgues, were sent to the Nova Scotia shore, where it received the name of Port Royal. This was the first foothold of France and the Catholic Church in the North.

In 1611 two Jesuit missionaries began work among the Micmacs of Nova Scotia, removing a little later to Deer Island, near the mouth of the St. Croix River. In order that the Abnakis might be instructed, invited, and impelled to a knowledge of God, and the light of faith and Christianity.

In 1680 Father Le Caron began labors among them. War with England resulted in the destruction of the mission; the country was devastated; missionaries lost their lives, and after the English finally occupied Quebec in 1763 the Mission was abandoned. In the War of the Revolution the Abnakis sided with the Americans.

Lawrence, seeking a French alliance and asking for French missionaries. Two missionaries started back with the expedition, but were captured by the Iroquois. Father René Menard, although then an aged man, in August, 1680, renewed the attempt, setting up his little cabin one hundred miles west of Sault Ste. Marie, near Keweenaaw. The following summer he was either murdered by hostile Indians or died of exposure. In 1689 Father Sulpice Allouez went to take up the Mission left vacant by the death of Menard. After two years of labor on the shores of Lake Superior, Allouez returned to Quebec, staying there only two days, and returned, taking with him Father Lesueur, Nicholas Dage. During that fall and winter they received into the faith eighty converts. In the spring of 1688 the celebrated Father Marquette left Quebec, in company with Father Le Boesme, to join the Ottawa mission. In 1689 Father Claude Dablon was appointed Superior of the missions, and Allouez proceeded to Green Bay, where he spent the winter and spring in ministering to the needs of the Sac and Fox, the Pottawatamies, and the Winnebagoes. Later, in the early summer, he went to the Monomines, and then to the Winnebagoes. In 1670 two new missionaries were sent to the Ottawa tribes on the islands and shores of Lake Huron, and Sault Ste. Marie. In the meantime, Marquette had opened communication with the Sioux, but war prevented work in that direction. In 1671 Marquette established the Mission of St. Ignatius at Michilimackinac. The Jesuit mission work in the Northwest came to a close in 1781. It had been the fond hope of the Jesuit fathers for many years to extend their work to the Dakota or Sioux tribes. In 1680, while Father Hennepin was ascending the Mississippi on a voyage of exploration, he was captured by a band of roving Sioux, and for several months remained a captive among them, acquiring something of their language, but accomplished little as a missionary. Other attempts were made later, but the Jesuits never succeeded in planting a mission among this people. Following these efforts of the missionaries for half a century, the Indians of the Northwest were engaged in war, and ultimately not only the missions, but many of the results of the mission work were obliterated.

The early history of the French Jesuits who went out from Montreal and Quebec to work among the Iroquois is one of terrible suffering, bloodshed, and death; and yet, after all this, a very hardy missionary bore every hardship for the love of God and men. The heroism, both natural and regenerate; the humbleness and unwaveringness of devotion to the most dreary and unfruitful field of labor, the patience and endurance of the missionaries, and the fruits of their labors, were worthy of all the greatest of the Roman Church, who explored and sought to reclaim these vast and pathless wilds, form one of the noblest chapters of its history. Almost or quite all the original missionaries died as martyrs, commonly under atrocious tortures, which they always forebore, but from which they never shrank. The heroic Brebeuf, before his martyrdom, which he suffered conjointly with Pere Lallemont, had baptized 7,000 Hurons. Even the most friendly historians, however, lament the meager results at which the Jesuits accomplished themselves, never to Indian fierceness or immorality, but too often to the grossness of Indian superstition. But such writers also condemn the blind hatred with which the English followed them up in the inhospitable regions in which they labored, with all the hearts, the highest feelings and ideals being bound up with its teachings.
had, in Paris, been brought over by his fellow-
Spaniard and fellow-Basque, Ignatius Loyola, from visions of earthly glory to a burning zeal
for the cause of Christ and of Rome, which in his
mind were absolutely one, that there is no reason to suppose that even the shadow of a
suspicion of any possible divergence between them
ever fell upon the simple loyalty of his
mind. Of Jesuit astuteness and accommodation to
a worldly standard, as they afterward de-
veloped themselves both abroad and at home, there
does not appear to have been a trace in Xavier.
Sunny frankness was the essence of his char-
acter. Himself one of the original Jesuits, he
followed the wise temperance of its policy, and
neither affected nor shunned privations or austerities.
For the most part, however, he trod the
way of hardship. He watched through the
night with the sick; visited the prisons; trod
half-shod the glowing sands of the Indian coast
to care for the spiritual and the temporal wants of
the oppressed pearl-fishers; met their savage
oppressors with dauntless courage, with only the
cross in his hand, and, in the might of the spirit,
by the simple power of his rebuke, inspired them
with such terror that they fled. No wonder
that, himself, as it were, a visible Christ, he soon
courd more satisfactorily to popular instruction,
while the modern missionaries have become con-
vinced that they can only break up heathen super-
stition by a more thorough education, and are
now behind none in their zeal for it.

The results of these early labors in India were
scarcely satisfactory, even to the friends of the
Jesuits, and the enormous difficulties presented
by Mohammedanism, at that time the imperial
 tho the prevailing creed of India, and the
immoveable prejudices of Brahmanical caste,
finally led the Jesuits into a system of accommo-
dation which lasted for a while with a brilliant out-
ward success, but in the end showed its hollow-
ness by its collapse.

A Jesuit, Robert de Nobili, of one of the most
illustrious families of Tuscany, and who, there-
fore, had all the aristocratic habits which fit-
ted him to play his new part to perfection, gave
himself out for a Brahman of the West allied to
princes (the last assumption being the truth);
perfected himself in Sanskrit, Telugu, and Tamil;
performed the usual Brahmanical ceremonies;
suffered only men of high caste to approach him,
and received these seated on a throne; produced a
Sanskrit book which he declared to be a recovered
fifth Veda, and produced the sworn attestation of
his fellow-Jesuits that this audacious forgery had
been received by them from the god Brahma,
containing a mysterious wisdom which alone
could give life. The result of this unscrupulous
falsehood and accommodation to the ways of
heathenism was that in three years he had gained
over seventy leading Brahmans, who accepted the
Christian doctrine of God, creation, immortality,
and the general teachings of Christian morality,
and abandoned their idols, but who
retained all the haughtiness of caste, and were permitted to sign themselves with the sacred
ashes, interpreted, of course, as having only a so-
cial significance. They were allowed to baptize their children by the old heathen names
does not signify so much, as in the early Church no
one scrupled to use such names as Phebe, De-
metrius, Diotrephes, Apollo, Hermes, and the like.
The accommodations of De Nobili and his
followers did not disguise from the Brahman
at large that the sages of Rome proposed to
them a fundamentally new religion. Angry
oppositions arose, but before long 30,000 con-
verts had been gathered. Separate churches
were built for the higher and lower castes, the
latter being rigorously forbidden to join with
the former in their worship, while the pariahs,
or outcasts, were forbidden even to approach
the priests. Even the last sacraments were
administered to them at the end of a staff, so
that they were not converts.

One of Robert de Nobili's chief associates was
Juan de Brito, son of the viceroy of Brazil. He
brought great numbers to the faith in the
dominion of Marava, and died a martyr in 1693.
Another associate, Veschi, was equally able,
learned, successful, and heroic, and barely escaped
martyrdom. He lived to become a mortal antag-
onist of the more enlightened Danish missionaries,
dying in 1747.
The accommodations of Robert de Nobili and the
Jesuits to heathenism could not fail to arouse
great scandal at home. The rumor even spread
that De Nobili had apostatized. His kinsman,
the great Cardinal Bellarmine, himself a Jesuit,
the better informed than to suppose this,
expressed his grief over such principles of pro-
ceeding, saying: "The Gospel needs no such
coloring; that Brahman스 are not converted is of
much less account than that Christians should not
preach the Gospel with joyful openness. The
preaching of Christ crucified was once to the Jews
a scandal, and to the Greeks foolishness; but St.
Paul did not therefore cease to preach Christ,
and him crucified. I will not," he continues,
"argue as to individual points, but cannot refrain
from declaring that the imitation of Brahmanical
haughtiness is sadly at variance with the humility
of our Lord Jesus Christ, and that the observance
of their usages has something exceedingly dan-
gerous to the faith." Unhappily the pressure
of his order brought this great and good man at
length to something very much like a retraction
of these sound and evangelical principles.
The other orders were naturally scandalized
over the Jesuit policy. While, as yet, it was
represented at Rome that nothing was intended
beyond an allowance of certain harmless national
usages, Gregory XV., in 1623, had issued a bull
not unfavorable to the Jesuits. But these took
occasion, whereby, it is said, to push their com-
pliances farther and farther, until at last, in 1708,
the Pope sent Cardinal Tournon to India, where,
after thorough investigation, he suggested the
decree by which, in 1710, Clement XI. rigorously
forbade all accommodations whatever to heathen
usages.
The Jesuits, however, paid scarcely the least attention to the decree, and soon obtained from a later Pope, Clement XIII., a new determination. But Father Moreto, of the Capuchins, came to Rome, and there opened the matter with so much insight and unsparingness that Benedict XIV., in the bull Omnium sollicitudinum, of October 7, 1744, condemned and forbade the Jesuit practices in India. When these were almost as numerous as the Indian people themselves. Nevertheless, when Catholic missions were resumed over a million converts, it has been claimed, were found to have remained steadfast to the great truths of creation and inerrant redemption, though, of course, their minds had become greatly obscured as to all secondary Christian doctrine, and overspread with many heathenish superstitions. These numbers, however, must be too large, as the official statements of the Church make the number of Roman Catholic Christians (1901) to be only 1,214,415. About 600,000 of these are proselytes from the Syrian Church of India, not of negroes were baptized, so that, as with in Siam, 1662; Tonkin, 1627. These have.

The M'adura diocese comes first with 206,000; the Church make the number of Roman Catholics is little more than a shadow. This closes the first period of the Congo Mission.

In 1294 the Pope sent the Franciscan Fathers, "were something of which they were very willing to hear. But when we began to preach the moral virtues to them—that was another matter." A persecution even unto death, and headed by the newly baptized king, broke out. But the crown prince Alphonso, soon coming to the throne, displayed a steadfast zeal for Christianity. He even became, the noted a zealous preacher. It appears, however, that he did not demand that his subjects should forsake their polygamy, but did demand, on pain of death, that they should forsake their idolatry. That rude mixture of superstition, Gospel and force, as characteristic of Catholic medievalism, was shown here in its perfection.

Portugal, with the profound selfishness which distinguishes all her early dealings abroad, took advantage of this new influence in Congo to secure enormous supplies of slaves. Depend as they were on Portugese protection, the priests made faint opposition to this iniquity, and even became accomplices in it. Soon they declined in zeal, and the princes and the people in Octoro became a wild, bloodthirsty people. It is said they quarreled with their bishop, and went back to Portugal with great substance. Yet baptisms went on, and soon Congo was proclaimed "wholly Catholic!" The court relapsed into the deepest dullness, which remained proof against the efforts of the few Jesuits who came to Congo about 1520, although these did a good deal, temporarily, for religion and education among the people. But after 150 years, Christianity is little more than a shadow. This closes the first period of the Congo Mission.

The second period opens in 1640, when the Capuchin friars arrived, and set about counteracting the heresy of the Dutch, with the help of persecution. They, however, fell into the evil ways of their predecessors in many respects, and neither they nor the Benedictines were able to accomplish anything. In 1816 an English explorer, Captain Tuckey, found "no trace of Catholicism, except some crucifixes and relics, strangely intermingled with the amulets and fetishes of the country. A single man claiming to be a priest, with some sort of a certificate, announced himself as having a wife and five concubines."

Within the last quarter of a century, however, the Roman Catholic Church has been able to redeem the errors and failures of the past. Missions have been established in all parts of the continent, and the report for 1901 shows 53 provinces (mostly vicariates apostolic, and prefectures), with 481,782 members, 1,084 churches and chapels, 1,172 priests, 87 schools, and 287 charitable institutions. The largest communities are: Madagascar, 67,500; Egypt, 56,180; Victoria Nyanza (Uganda), 39,586; Benin, 16,400; the five Congo provinces, 15,081, etc. In this work the White Fathers of Algeria, under the lead of Father Lavigerie, have been the most important factor; and the British, who have been clashing between them and the Protestant missionaries, due to political ambition, there has been much noble work done. In Madagascar especially the record of Roman Catholic work too nearly of kin to the type that caused the failure of the earlier period.

China: In 1294 the Pope sent the Franciscan John de Monte Corvino to Peking, of which Rome
afterward appointed him archbishop. He was a genuine missionary, spared no pains in giving the people the Word of God in their own language, and in encouraging the education of the children, as well as training up missionary priests. He had, during his residence in this place, baptized from five to six thousand; and he believed that, had it not been for the many plots laid against him by the Nestorians, he would have succeeded in baptizing above thirty thousand. Finally, however, the reassertion of the Chinese mission, was received in Peking, and the overthrow of the friendly Mongols, drew after it the destruction of Christianity, of which every trace seems to have disappeared.

In 1517, Europeans, in the persons of the Portuguese, returned to China this time by way of the sea. In 1556, for services rendered against the pirates, who have always been so formidable on the waterways of China, the Portuguese received the islands of Sancian (Chang-chwen) and Macao. It was on Sancian that, in 1552, Francis Xavier closed his heroic life. “Rock, rock, when wilt thou open?” expressed the spirit of his last sighs, the words were those of an earlier missionary, in front of the frowning seclusion of the great heathen empire.

The first Roman Catholic missionary who came to China in this second era was the Provincial of India, Nuñez Barreto, S.J., who, traveling to Japan in 1555, twice spent a short time at Canton. Neither he nor his immediate Jesuit, Franciscan, and Spanish successors, however, were permitted to remain long. At last, in 1582-3, the Jesuit Michael Roger, after some five or six fruitless visits to China, obtained, with Pez and Matteo Ricci, who was afterward so notable in China, leave to remain, and many privileges from the viceroy of Canton. The first public baptism was given in 1584. In 1586 there were 40 Christians, but then persecution broke out. After the Jesuits had adopted the dress of the mandarins they were less annoyed. In 1598 Ricci, already in high repute for his scientific attainments, now the independent Chinese mission, was received in Peking, and established himself permanently there in 1601, dying in 1610. He is accused of having carried the conformity to Chinese usages to such a length as to have dispensed himself from his vow of celibacy, and to have married a Chinese woman, who bore him two sons. But the animosity of the other orders toward the Jesuits had become so great that we are not to be too sure of the justice of any particular accusation against these. This animosity, which seems to have been strongest in the Dominicans, had various grounds. Jesuism had an alertness and flexibility that reached attainments in literature and science, and drew public favor to them, and showed a wise consideration of circumstances which was in marked contrast to Dominican practice. The first actual martyr was the Jesuit Francis Martinez, murdered in 1606. The Dominican Francis de Capillas was beheaded in 1648. In 1665 five Christian mandarins were beheaded. The regent who commanded this persecution was, however, soon after punished by the young emperor with death. During the persecution caused by the decree of Benedict XIV., issued a peremptory and irrevocable decision, forbidding every accommodation that could be interpreted as a concession to paganism. Then the persecutions broke out more violently than ever, and the Christian faith was almost rooted out. This stand of the Pope, however, seems to have been taken with such haughtiness, such a contempt of the imperial representations, and such a determination to carry through the right position by overbearing will, that the emperor, the mandarins, and the people gathered the deep impression that if they would become Christians they must cease to be Chinese.

At various times the devoted Roman Catholic missionaries in China underwent various persecutions—banishment, imprisonment, scourging, and even death. The first actual martyr was the Jesuit Francis Martínez, murdered in 1606. The Dominican Francis de Capillas was beheaded in 1648. In 1665 five Christian mandarins were beheaded. The regent who commanded this persecution was, however, soon after punished by the young emperor with death. During the persecution caused by the decree of Benedict XIV., the Dominicans, Peter Sanz, Ferraro, Roys, Alcober Diaz, and the catechist, Ko (Sanz being a bishop), and the Jesuits Anthéris and Henríquez, suffered death in 1747.

Only obscure accounts are accessible as to the subsequent resuscitation of Roman Catholic missions in China. There were still hundreds of families in which Christianity had become hereditary, and there have doubtless been many conversions in this century. In 1805 there was a cruel persecution; also in 1816 and in 1820. In these later persecutions three or four priests suffered death, one of them being Vicar Apostolic of the Fieux apostolic See, and Bishop in partibus. The first movement toward the conversion of the Chinese people, as far as we can learn, was the attempt of the Jesuit Francis Aquilla, who, in 1614, was permitted to remain at Beijing.

As in Africa, so in China the last few years have seen a great advance. Roman Catholic missions now cover the entire empire, and report (1901) 720,540 members, 4,126 churches and chapels, 904 missionaries, 471 native priests, and 3,584 schools.

In the Boxer outbreak the Roman Catholics
suffered with the Protestants and maintained the early record of faithfulness. To what degree the political ambitions of the leaders have been responsible for the troubles it is difficult to say, but something of the same nature appears to have been manifest. Japan: Japan had scarcely opened to Europeans when St. Francis Xavier, with some companions, hastened thither to plant the standard of the Cross. For a long while the preaching of the Franciscans was successful, and in less than 40 years there were more than 200,000 Japanese Christians, with 250 churches. Even three Daimios were baptized. At last, however, the Shogun Taiko, or Takaoasa, gradually became jealous of the missionaries, suspecting them of being agents of Portugal, and, after the temporary union of the two Iberian crowns, agents of Spain for reducing Japan to dependence. Taiko began to persecute the Christians about 1582. The stedfast chastity of Christian maidens is said to have been one of the causes which inflamed the wrath of the imperial volupturny. The incon siderate zeal of some Franciscans, also, who, persisted in public preaching after the Jesuits had discontinued it, is said to have increased his displeasure. On the 5th of February, 1597, the Franciscans were ordered to leave the country. Of the 17 other Christians were crucified. With the sound of psalms these heroes and followers of Christ breathed out their souls. From 1598 till 1611, under a new Shogun, there was a respite. But then a fearful revolution of sentiment in the Shogun's mind brought him and his three successors to that persevering and concentrated cruelty toward the Christians which finally rooted out their religion. The guilt of this is laid by the Catholics on the Dutch, who revenged the cruelties of Spain toward them by stirring up the slumbering jealousies of the government toward Spain and Portugal, and toward the Jesuits, until its rage was so great that all common forms of torment being too little for the wrath of the rulers, they exhausted their ingenuity in devising new tortures. It has well been said that the Roman amphitheaters never witnessed, in men, women, or children, more resolute heroism of martyrdom. Here again, for a good while, the blood of the martyrs was the seed of the Church. From Taiko's death in 1597 to 1614 the Jesuits baptized 100,000 converts, and for many years afterward they baptized several thousand yearly. Some apostasies took place, but in general all the Christians—princes, nobles, men, women, and children—went joyfully to their doom. "Children endured the most terrible deaths, without giving a sign of suffering." When any were conducted to the crown of martyrdom so greatly desired, they would be accompanied by many thousand Christians, who followed in triumphal procession, praying, praising, and bearing lighted tapers in their hands. But persecution raged incessantly, and finally outstripped the increase of the Church. At last, in desperation, 37,000 Christians seized the fortified place Simbara, succeeded to the Mount of Martyrs, and there, after a long defense, were at length slain almost to the last man. Then were published the edicts forbidding "the God of the Christians, on pain of death, to reenter Japan." Then, too, was introduced the requirement, maintained till within a few years, that all the subjects of the realm should, once a year, trample on the crucifix. When Japan was reopened by the Americans it was discovered that there were hundreds of concealed Roman Catholics in one province. A number of martyrdoms have taken place even since then, but none, of course, that rules and records could be learned. In the absence of Bibles, which unhappily, Rome, as usual, had neglected to provide, these secret Christians had even forgotten the baptismal formula, and used to baptize their children "in the name of the Holy Jerusalem." A Jesuit asked whether such a rite would be valid: "No, the Church must have her rules. But God is very much kinder than the Church." The present number of Roman Catholic Christians in Japan (1901) is 53,400, and there are 115 missionaries, 32 native priests, 28 schools, and 20 charitable institutions. In Korea there are reported (1901) 32,200 members, 39 missionaries, 9 native priests, 60 schools, 5 charities; in Java, 49,800 members, 30 missionaries, 29 schools; in the Pacific Islands, New Zealand, etc., 219,210 members, 742 churches and chapels, 421 missionaries, and 479 schools. In Persia, Turkey, and the Balkan States, the work of Roman Catholic missions is confined to the different branches of the Eastern Church. They have been somewhat successful among the Jacobites by methods which are too distinctly political, but elsewhere they have not won over many. It is difficult, indeed, impossible, to give statistics, as the figures in the "Missiones Catholicae" for those countries include the Roman Catholic communities of Armenians, Maronites, etc. Missionary Organization of the Roman Catholic Church: Rome divides the whole world into two great sections, terra catholica and terra missionis. Within the former her missionary organization has, properly and ordinarily, no application; within the latter it controls all ecclesiastical persons and processes whatever, archbishops and bishops themselves being subject to it. Terra catholica (more properly terra catholicae) is definable as including all those countries whose governments lend the support of the secular arm for the coercion of all baptized persons, whether Catholics, heretics, or simple schismatics, into obedience to the Holy Roman Church; that is, to the Roman Bishopric, which claims a maternal superiority to all other churches, that is, bishoprics, and claims the right to instruct them, and by inference to govern them. All schismatics or heretics, therefore, within the limits of any bishopric, may (it is held by the prevailing opinion) be lawfully compelled to yield obedience to their Catholic bishop, and in him to the Supreme Bishopric of Rome, which possesses throughout the Church both an ordinary and an appellate authority. The latter is chiefly in use, but the former may at any time be exercised. Wherever, then, the civil government, being apprised by the Holy Office of the Inquisition (a commission of Cardinals, of which the Pope himself is the Prefect) that heresy or schism is prevailing within its jurisdiction, lends its authority to crush it, there, and there only, is terra missionis. All the rest of the world—Christian, Muslim, and heathen—is terra missionis. Thus in Europe, Great Britain, Holland, Norway, Sweden, Denmark, Germany, the Balkan States and Greece are mission lands; in America, Canada, the United States, British and Dutch
of the papacy, have raised a question as to the sacraments of Baptism and Matrimony. She states, as well as the loss of the temporal power of all the ordinary means of grace except the sacramental intention is sound, and sufficiently being few, have never been organized into a consideration and abstract possibilities. And every ecclesiastical precept not included in the Roman Catholic Church.
THE ENCYCLOPEDIA OF MISSIONS

Roman Catholic

himself cannot dispense. If the mission flourishes, and there is a call for a superintendent, with power to ordain to the priesthood, the Prefecture Apostolic becomes a Vicariate Apostolic. The cardinal's rank enjoyed by the present Archcouncil, whose decrees, when ratified by the Pope, when ad nutum, have binding force.

If the Church has won or recovered such a following (especially in Protestant countries) as to warrant it, the Pope proceeds to organize a regular hierarchy of diocesan bishops, usually arranged in metropolitan provinces, each under the presidency of an archbishop, who, besides his ordinary diocesan authority, has a certain right of determining appeals from his suffragan bishops, and always presides in the Provincial Council, whose decrees, when ratified by the Pope, have binding force.

The diocesan bishops of England and America are not, like more vicars apostolic, removable ad nutum, but are understood to enjoy fixity of tenure, like those of Catholic lands. The cardinal's rank enjoyed by the present Archbishop of Baltimore greatly increases his influence, but adds nothing to his episcopal or metropolitan authority. As cardinal he has no jurisdiction outside the city of Rome; and as belonging to a missionary jurisdiction, he, and all other American bishops, are still controlled by the Propaganda, due regard, of course, being had to the more developed character of their sees. The bishops enjoy the same powers as vicars apostolic, of dispensing from ordinary canonical restrictions. These powers, granted from Rome, for terms of five years, are known as the Quinquennial Faculties.

Previous to the institution of the Propaganda missions were pursued in a somewhat disorganized way. Each order sent out its missionaries for itself, who rendered account of their activity only to their own provinces and general assemblies. These latter, doubtless, frequently communicating with the Holy See, and obtaining from it such suggestions, exemptions, consecrations, pecuniary aid, and other aids as it might be inclined to grant and to receive. But since 1622 the control of all missions among heretics, schismatics, and pagans has lain in the hands of the Propaganda. Yet the bonds of connection within each monastic order are so strict, the authority of its superior so unbounded, its policy and spirit, and even its doctrinal tenor, so specific, and the character attributed to each of the elder orders so sacred, that the comparatively new Congregatio de Propaganda Fide has, doubtless, to accommodate itself largely to this distinctness of action. In what way, and how far, the missionary operations of the orders, especially the Jesuits, have been actually subordinated to the Propaganda is not clear. It must suffice us to know that even the missionary—Jesuit, Benedictine, Franciscan, Dominican of whatever order or of the secular priesthood—is subject to the supreme and universal episcopate of the Pope as ordinarily exercised through the Propaganda.

The orders, notably the Dominicans and Capuchins over against the Jesuits, have carried on their mission, especially in India and China, with far more bitterness of controversy against each other than has prevailed between Protestant denominations the most widely remote. The Jesuits, indeed, long seemed disposed, both among Catholics and Protestants, almost to claim a monopoly of conversions, and if any one of another order, especially among the heretics, was guilty of a success, their animosity would sometimes go to great lengths. These internecine wars came near to ruining Roman Catholic missions in the Far East, but since the suppression and restoration of the society, which has now an almost uncontested right of control in the Church, and which, in its turn, has doubtless learned wisdom by its tribulations, these dissensions no longer appear. The Jesuits, at least, take whatever fields of activity they wish, and leave the rest to others.

There appear to be among the missionaries but few secular priests; that is, priests who, like the ordinary parish clergy, are subject only to the general authority of the Church, and not to that of any monastic order. The native clergy from among the heathen are probably for the most part seculars.

The Propaganda has been richly endowed, but has lost many of its resources, especially since the loss of the power of the temporal lands. The present (1901) income, about $135,000, is barely sufficient to support its personnel, college, university, and printing establishment. Roman Catholic missionaries on the field are expected, so far as possible, to secure their support among the people they are evangelizing, but where this is impracticable, they are provided for through charitable associations founded for this purpose. Of these there are several, the most important being The Society for the Propagation of the Faith, with headquarters at Lyons, France. There are also: The Association of the Holy Childhood; the Association of Oriental Schools in France; the Society of St. Francis Xavier in Aix-la-Chapelle; The Association of St. Peter Claver, in Salzburg; The Leopoldsverein, in Austria; The Ludwigsmissionsverein, in Bavaria. These all, however, as well as some others, are limited in aim or nationality, the only one which can, in truth, be called a general missionary society being the one at Lyons, and this deserves special mention.

The Society for the Propagation of the Faith: In 1815 Bishop Dubourg, of New Orleans, during a visit to France, interested in his work a widow, Mrs. Petit, and suggested the founding of a charitable association to aid in supplying the spiritual needs of Louisiana, fixing the contribution of members at twenty-five cents a year. The suggestion was enforced by earnest appeals for aid from missionaries in the East, and an effort was made, by the Seminary for Foreign Missions of Paris, to revive a union for prayer, which had been disbanded by the French Revolution. The benevolence of Christians in Lyons, in 1820, was thus turned to several separate objects. Two years later a visit to Lyons of the Vicar-General of Louisiana excited special interest in that field of labor. It then became clear to those interested in missions in Bavaria, that if an aid society would be permanently successful it must undertake to aid all needy Roman Catholic missions, and so combine all interests. On this basis those engaged in helping one and another mission enterprise united, and the "Work of the Propagation of the Faith" was organized at Lyons, May 3, 1822. This name is commonly
translated into English as “Society for the Propagation of the Faith,” and so produces in the minds of Protestant readers confusion with the great Congregatio de Propaganda Fide as it really is. The Americans “Society for the Propagation of the Faith” is at Baltimore, Md. The trustees of the American “Society for the Propagation of the Faith” is at Baltimore, Md. The trustees of the American branch are the Archbishops of Baltimore, Cincinnati, Philadelphia, and St. Paul, and four other clergymen. Members of the Society are called “Associates” in the work. The conditions of membership are two: (1) The recitation daily, for the assistance of Roman Catholic Missionaries, of one Our Father and one Hail Mary, with this invocation: St. Francis Xavier, pray for us; (2) the giving of at least five cents monthly, or sixty cents a year, in alms for the missions. The usual method of collecting these funds is one that Protestant missionary societies might well consider and adapt to their purposes. Corporations are formed into bands; each band, one of whom is authorized to act as promoter, with the double duty of collecting the offerings of the band for the local or central representative of the Society, and the less important duty of circulating among the members of the band the periodical Annals of the Propagation of the Faith. Promoters are provided with membership certificates to be given new members, and with cards on which to record collections. The efficiency of the system and, in fact, the success of the whole work, rests upon the faithful diligence of the promoters. The Society has fixed a day in May and another in December as a time of special prayer and thanksgiving. Various popes have granted benefit of indulgences to associates in this work, and missionaries offer prayers and special masses for the associates. In the merits and prayers of the missionaries, and in masses said by them, both living and dead associates share.

The Society has two councils, chiefly laymen, at Lyons and Paris, respectively, and these, for ordinary purposes, divide the entire field of missionary work, but act on common consent in the distribution of funds. No funds are invested, and at the beginning of each year the entire receipts of the Society for the previous year are distributed.

In 1822 the Society, through its central body at Lyons, collected about $4,000, of which one-third was sent to the Eastern missions and two-thirds to Louisiana and Kentucky. Other diocesan councils, also aided, and up to 1900 the Society had expended nearly $8,000,000 in missionary work in the United States. In 1827 gifts were sent to Africa and the Hawaiian Islands, and today it aids more than 300 dioceses, vicariates, and prefectoral see, in all parts of the world. Its total distribution, from 1822-1900, was $65,090,017. Of this sum $1,120,420 went to the Society for the Propagation of the Faith, bi-monthly. Lyons, France, in French and in English, is the Catholic Missionary monthly, with a strong personality, was a powerful preacher, was especially gifted in opening up new work, and showed marked ability. He passed from his earthly labors at Rangoon, July 5, 1896.

ROSE, Rev. A. T., D.D.: Appointed missionary among the Burmians by the ABMU in 1851, and at the time of his death in 1896 he was one of the oldest missionaries on the staff of this Society. Most of his missionary life was spent at Rangoon; and, besides his influence as a faithful missionary, to him is largely due the development of the Burman Bible Training School, which became the Burman department of the Theological Seminary at Insein. Dr. Rose possessed a strong personality, was a powerful preacher, was especially gifted in opening up new work, and especially wise in his assistance to new missionaries, and in educational matters he showed marked ability. He passed from his earthly labors at Rangoon, July 5, 1896.

ROSE BELLE: A village in the island of Mauritius, situated about 150 miles S. E. of Port Louis, with which it is connected by railway. Station of the CMS (1856), with (1903) 1 missionary, 3 women missionaries, 1 orphanage, 2 day schools, and 162 professed Christians, of whom 45 are communicants.

ROSS: A settlement in Cape Colony, South Africa, situated in Tembuland in Manganzi District, about 25 miles E. of Clarkebury. Station of the UFPS, with (1903) 1 missionary and his wife, 26 native workers, 7 outstations, 14 day schools, and 364 professed Christians.

ROTUMA: An island about 300 miles N. N. W. of the Fiji Islands, to which colony it was annexed in 1880. It is 16 miles long and 4 or 5 miles wide, of volcanic origin and inhabited by about 2,500 people, who export a considerable quantity of copra. Mission work was commenced there in 1841 by the WMS missionaries stationed at the Fiji Islands. The people are now Christians.
with 21 places of worship, 37 schools and 460 church members, and 35 native workers in connection with the Australasian Wesleyan Methodist Missionary Society.

ROUMANIAN LANGUAGE: A language spoken in the island of Rotuma, which lies north of the Fiji islands. It belongs to the Melanesian type of languages and has been reduced to writing by missionaries with the use of the Roman letters.

ROUMANIA: A kingdom formed in 1878 from the united principalities, Wallachia and Moldavia. Its independence from Turkey was proclaimed by its people in 1877, and was confirmed by the congress of Berlin in 1878. Its area is estimated at 48,307 square miles. On the northeast it is separated from Russia by the River Pruth and the Kuban mouth of the Danube, which latter river forms its southern boundary west of Silistria. The Transylvanian Alps and Carpathian Mountains form its western and northwestern boundaries. That portion which lies between the Danube and the Black Sea is called the Dobruja, and differs greatly from the rest of the kingdom. The climate has great extremes of temperature in winter the winter winds are very trying, while in the summer the southwest wind is scorching in its intense heat. The rainfall is not abundant. Agriculture is the principal occupation of the people, and the cultivation of crops is of great importance. The population of Roumania is of very mixed origin. Besides the Roumanians, who have settled in Macedonia speak a closely allied language to Latin. Walachs from Roumania who have settled in Macedonia speak a dialect known as Macedonian Roumanian, which is also a written language.

ROUMELIA: Name applied by some European writers to European Turkey in distinction from Anatolia, or Asiatic Turkey. The name is derived from the usual Turkish appellation of European Turkey: Rum-ti, which means "the Roman People" (or territory).

RUSSIA; Empire of: A vast dominion, next to Great Britain the largest in the world, which includes eastern Europe, the whole northern part of Asia, and a considerable portion of Central Asia. It occupies fully one-sixth of the land surface of the earth, but is peculiar among the great empires of the world in possessing no colonies detached at any distance from the main mass of its territory. Its area is 860,282 square miles and its population (1897) about 128,932,173. The purpose of this work does not require an extended topographical description of the Russian Empire. In population Russia comprises a greater variety of races than any other European state. While the Slavonic stock predominates in European Russia, the Finnish race is strong in the north and east, extending southward throughout the length of the Ural Mountains; many Turkish tribes are found in the valley of the Volga and in Russian Asia; other tribes of Tatar origin are found in the Crimea and the regions bordering the Caspian; Circassians, Georgians, Kurds, and Armenians people the Caucasus and Trans-Caucasia, while Mongols, differing but little from the Tibetan type, roam over vast spaces of territory north and east of the Central Asian provinces.

The government which holds this vast collection of races together is an unlimited monarchy. The Czar of Russia is the autocrat, head of the church and of the legislative, executive, and judicial systems, as well as of the military and naval forces of the empire. The Holy Synod, composed of men selected by the Czar from among the higher clergy of the Russian Church, has control of the interests of religion.
throughout the empire, a procurator, or minister representing the Czar in its deliberations, and reporting its views to the Emperor for assent or otherwise. A council of state, whose members are chosen by the Czar, in a similar manner the political affairs of the State, is a Secretary of State reporting to the Czar its plans and receiving his orders. There is nothing exactly corresponding to a cabinet of ministers, as the term is understood in other European countries. Each minister in charge of a department of affairs prepares all plans for its administration independently of other ministers, and submits them to the Czar for his supreme permission. It often happens that two departments, for lack of joint responsibility, may pursue different and inconsistent, and even opposing, lines of policy. As to legislation, the Czar's approval must precede any elaboration of new laws; and after the council has discussed it, the Czar's decree alone makes a new law binding. This decree approving a new law may effectively issue even tho the council has disapproved it. At the will of the Czar the ordinary procedure of justice may be suspended and a criminal may be punished by "administrative process," which is resorted to especially in political cases. Notwithstanding its undesirable characteristics, a sufficiency of joint responsibility, a sufficient degree of self-government is permitted the different village communes and tribal organizations. The tendency increases, however, to centralize authority by taking away or restricting such local privileges, and also by supplanting languages that have been recognized as a part of local privileges. The Poles, the Jews, the Finns and the Armenians have all suffered intensely from the determined effort of the Russian Government to extinguish their separate speech, and separate historical traditions, if not their separate religious belief and guaranteed liberties.

The religion of Russia is that of the Greek (Eastern) Church. All existing religions, however, are tolerated, and refusal to profess the State religion does not disqualify one for office or enjoyment of civil rights. No Russian subject may become a "Christian." Any missionary propaganda except that of the Russian Church is strictly forbidden; and any attempt by dissenters to teach religion to members of the Russian Church is a misdemeanor punished most severely. Through such laws Protestant missionary operations in Russian territory are made impossible, and the Russian and Mongolian populations of Asiatic Russia are walled in against the Gospel, unless the Russian Church gives it to them. It often does, but not very effectively. At the same time the Russian Government permits and even encourages the circulation of the Scriptures in certain prescribed versions.

Mission work has been attempted at different times in different parts of this empire by the Basel and Moravian Missions, the London Missionary Society, the Scotch Church, etc., but it has never been of long duration, owing to the repressive action of the Russian Government. The American and British and Foreign Bible Societies have accomplished a good deal in the form of Bible distribution.

Russians: The Russians are the most numerous Slavic nation, numbering over 65,000,000. They are divided into three branches: Great Russians, Little Russians, and White Russians. The Ruthenians or Red Russians, living in Austria, are also classed as a branch of the Russians. The distinctions between these various branches are rather historical than national. While the great mass of the Russians belong to the Eastern Church, 3,108,000 are Uniates (members of the Eastern, who have united with the Roman Church), 500,000 Catholics, and the number of dissenters (Russokolitsy) is variously estimated from 3,000,000 to 11,000,000 and even 15,000,000.

The Orthodox Russians use the Slavonic language in their church services; so also do the Uniates and the Dissenters, while the Roman Catholic Russians use the Latin literature. In their literature all the Russians use the alphabet invented by Cyril, the "Apostle to the Slavs." The Russian language belongs to the southeastern branch of Slavic languages, and is related to the Bulgarian and the Servian. It is divided into three dialects: the Great-Russian, the Little-Russian, and the White-Russian. The first of these dialects forms the Russian literary language of the present day; the Little-Russian may be considered as a distinct language, related to the Great-Russian, while the White-Russian occupies a middle place between the Great-Russian and Little-Russian, and contains elements of both these and of the Polish language. The language of the Ruthenians in Austria is Little-Russian.

The origin of the Russians has been traced back to a group of Slavic tribes who inhabited the country around Kieff. They lived in separate communities, and were united into one government when Rurik, with his Varangian companions, came to rule over them. During the reign of Prince Vladimir (976-1015) Christianity was introduced into Russia from Byzantium, and with it the productions of Byzantine literature found their way into the country. Owing to the very close proximity then existing between the Bulgarian and Russian languages, the Russians copied also several of the productions of the ancient Bulgarian literature. The most ancient monument of this literature is "Ostro-mirov's Gospel," of 1563. In 1224 the Mongols invaded Russia and ruled over her for more than two centuries; and although their rule did not denationalize the people, it left its imprint upon the civil administration of the country, upon the social condition of the people, and upon their language. The Mongol dominion retarded the onward progress of Russia, and it was only in the reign of Peter the Great (1689-1725) that Russia began its emancipation from its semi-Asiatic, semi-barbaric condition, and became fit to take rank among the European powers.

The reforms of Peter the Great could not be executed without producing discontent in the land. Before his reign the Patriarch Nikon, one of the greatest men on the patriarchal throne in Russia, roused the indignation of the people by attempting to revise the Bible and the liturgical books, and to purge them from the errors that had crept into them through the ignorance of the transcribers. Nikon was denounced as a
SABÆANS or MANDÆANS: An ancient people of whom remnants are found in the lower Euphrates and Tigris regions of Mesopotamia. There is a group of people calling themselves Sabæans in the Hauran, Syria, but Chwolsen says they have no real relation to the Mesopotamian Sabæans. As to the Sabæans of Mesopotamia, they are also called Nasoræans, Zabians, and Christians of St. John. Some of their peculiarities have been expressed in theories formed as to the origin of their name. Gesenius derives the name Sabæan from Tzaboth (Heavenly Hosts), because they worship stars; Niebuhr and others derive the name from the Syriac Subba (wash, baptize), because they practise baptism with diligence. They seem to be entirely distinct from Jews, Christians, and Mohammedans. They are isolated from other races, not marrying outside of their own body. They are quiet and industrious people, occupied in raising cattle, and some follow trades like boat-building; some of them, too, are good silversmiths. In physical appearance they are tall, well made, with good features and fine black beards; the women go about unveiled and seem to be taller and rather more masculine than Mohammedan women. On feast days they all dress in white. Their language, which is known in Europe as Mandæic, is a dialect of Syrian written with characters peculiar to itself. Priests only read and write the language and they refuse absolutely to teach it to strangers. Some Mandæic manuscripts exist in European libraries which, however, are no more ancient than the 16th century. The Sabæans of lower Mesopotamia were numerous when Mohammedanism came into being in the 7th century, and under the A拔asid Caliphs they had some four hundred places of worship in the regions about Baghdad. The Koran mentions the Sabæans along with Christians and Jews, as people who have a divinely inspired book. They themselves have a tradition that they are descended from the Egyptians of Pharaoh’s host lost in the Red Sea. Sabæans are mentioned in the Bible, but none of the three people there called by this name can...
be certainly connected with those in Mesopotamia. During the brief era of literary and scientific activity among the Mohammans of Baghdad, many of the philosophers and astronomers patronized by the Caliphs were really Sabean, according to Chev Eisen; it having been the practice for the Caliphs to bring together learned men from outside of the Mohammedan fold. The Sabean have a sacred book which they hold in high veneration. The main points of their belief in regard to God are that all things proceeded from Chaos or the Great Abyss. Chaos was the "Spirit of Glory," or the King of Light; he called into being the Hayye kadima, "the primal life," who is the supreme God in Sabean theology. From him proceeded Yushamin, Jehovah, and Manda Hayye, "the Messenger of Life." It is from the latter that they derive the name Mandaeans, and he holds the place in their theology of mediator between man and his Creator, but is generally believed to have been carnate in Abel, Seth and other Biblical characters down to John the Baptist. The Mandaeans also believe in a host of demons or demons in the under-world, which has numerous hells and vestibules and guardians, and from which spring the evil of the world and the various powers that control the sins of men. The polar star is regarded as the central sun of the sky, and when the people meet for prayers they always face the north star. They do not have fixed places of worship, but construct low houses of hurls for each occasion. As to their relations with other religions, they declare that all the prophets of the Bible were false prophets, including Jesus Christ. They have deep reverence for Abel and Seth, and they hold that Abel was incarnate in John the Baptist, and that he baptized Jesus by mistake. They hold that Mohammed was a false prophet. As to religious rites, there is a feast-day and a feast-day and perform the rite of baptism every Sunday, primarily, somewhat as the Mohammedans do, with the idea of preparing for worship. These Sunday baptisms are by immersion. They have several religious feast during the year, the chief one lasting five days, when all of them are baptized, by sprinkling, three times a day. Their most important service has been described as held at midnight, when every one on arriving at the appointed place goes into the hurdle hut provided for the purpose, bathes in water and puts on white clothes before joining the circle of worshipers. The sacred book lies open on the altar, the priest takes one of two pigeons, holds it up to the north star and sets it free, while reciting a prayer of adoration of the "Living one." Then while the assistant reads from the book, the High Priest takes fresh baked cakes, and, cutting the throat of the other pigeon, drops four drops of blood on each cake arranged in the form of a cross; he then puts a cake into the mouth of each worshiper, saying, "The pigeons who have been put to the Living one." The pigeon is then buried with ceremony behind the altar. This curious process appears to be dying out. It is estimated that there are between four and five thousand living near Amara, Suk- es-shiuk, Basra, and Mohamernr.

SACHIAPURAM: A village in Tinnevelly, Madras, India, situated N. by W. of Tinnevelly town. Station of the CEZMS (1851), with (1903) 2 women missionaries, 37 native workers, 11 day schools, and 481 Zenana pupils. The place is called North Tinnevelly by the Society.

SAFED: A town, formerly of considerable note, on a hill overlooking the western coast of the Lake of Tiberias, Asiatic Turkey, 65 miles west of Damascus. Station of the London Jews Society (1843), with (1903) 1 missionary and his wife, 1 day school, 1 dispensary and 1 hospital. Station also of the UPJ Jewish Mission Committee (1899), with 1 missionary and his wife, 2 women missionaries, 10 native workers, 3 day schools, and 1 dispensary. Also station of the CA.

SAFFI: A town and seaport of Morocco, situated on the W. coast, about 70 miles N. E. of Mogador. Population, 9,000. Station of the Southern Morocco Mission (1892), with (1903) 1 missionary and his wife and 1 dispensary.

SAGA: A town on the island of Kiushiu, Japan, situated 45 miles N. E. of Nagasaki. Population, 25,000. Station of the Evangelical Lutheran Church in the South (1883), with 3 missionaries and their wives. Also station of the RCA (1895), with 1 missionary and his wife, 9 native workers, 1 place of worship, 1 Sunday school, 12 out­stations, and 150 professed Christians.

SAHARANPUR: A town in the United Provinces, India, situated in the Meerut division, 130 miles S. E. of Lucknava. A large town, rather substantially built, and steadily improving in appearance and increasing in importance. Owing to its low, moist situation it was very unhealthful, but modern sanitary improvements have somewhat remedied this evil. Station of the PN (1836), with (1903) 2 missionaries and their wives, 1 woman missionary, 13 native workers, 3 outstations, 2 places of worship, 6 day schools, 1 boarding school, 1 theological class, 1 industrial school, 1 dispensary, 2 leper institutes, 1 orphanage, and 101 communicant Christians. Some write the name Saharanpore.

SAINT ANN: A town and seaport in Jamaica, West Indies, situated in the central part on the coast of the island. Station of the YC (1838), with (1903) 1 missionary, 40 native workers, 5 places of worship, 3 Sunday schools, 3 day schools, and 358 professed Christians, of whom 281 are communicants. The name is sometimes written Saint Ann's.

SAINT AUGUSTIN: A village in Madagascar, situated on the S. W. coast, 15 miles S. by E. of Tullear. Station of the United Norwegian Missionary Society, organized first (1840) by Pastor Spittler and the PN (1836), with (1903) 1 missionary, 40 native workers, 3 places of worship, 12 outstations, and 289 Christians, of whom are 3 male, 3 female, 1 man and 1 woman are 288 communicants, 35 of which 33 and 2 are baptized. The name is sometimes written Saint Ann's.

SAINT CHRISTINA PILGRIM MISSION (Pilger Mission von St. Christina bei Basel): This Society, organized first (1840) by Pastor Spittler of St. Chrischona, as a mission school, developed about 1860, a well-known and rather ambitious project for missions in Abyssinia, one feature of which was the "Apostelstrasse" (Road of Abraham), consisting of a series of stations which were to connect Jerusalem and Abyssinia. The selection included Alexandria, Cairo, Assuan, Khartum, and Metemmeh. Only two, however, Cairo and Alexandria, were occupied, and the severity of conditions in Abyssinia, and the
Sudan led to the giving up of the work. The institute continued, but sent its graduates to other societies and interested itself more especially in evangelistic work. Since 1895, however, it has resumed foreign work as a recognised branch of the China Inland Mission. It occupies (1902) 4 stations, with 5 missionaries, and reports statistics through the CIM.

SAINT CUTHBERT'S: See Teolo.

SAINT CROIX: One of the West Indies. It has been a Danish possession since 1716. It has an area of 74 square miles and an estimated population of 18,000. The inhabitants are mostly free negroes, and are engaged in the raising of sugarcane and the manufacture of rum.

The Moravian Brethren commenced their mission to the Danish West Indies at this island in 1754. and now have stations at Friedensthal, Friedensberg, and Friedensfeld. The Danish Lutheran Church has also a mission here.

SAINT EUSTACHE: One of the Dutch West Indies, and forms part of the colony of Curáçao. It contains a population of 3,000 in its area of 7 square miles. Mission station of Wesleyan Methodist West Indian Conference.

SAINT HELENA: An island belonging to Great Britain in the Atlantic Ocean, 1,200 miles west of Africa and 2,000 miles east of South America. Area, 47 square miles. Population, 5,000, negroes and half-breeds. Mission field of the SPG: 3 stations, St. Paul's, Jamestown, Longwood, with 450 communicants. There are also 1 Roman Catholic and 2 Baptist chapels.

SAINT JAN, or SAINT JOHN: One of the Dutch possessions in the West Indies; has an area of 21 square miles and a population of about 1,000, among whom the Moravian Brethren commenced work in 1754, with stations at Bethany and Emmaus (see St. Thomas). Mission field of the Danish Missionary Society.

SAINT JOHN'S: The chief town on the island of Antigua, West Indies, situated on the W. coast. It is the seat of government for the British colony of the Leeward Islands. Population, 10,000, chiefly pure negroes and mulattoes. A station of the Moravian Brethren, opened in 1756 by a missionary from the Danish Islands, who was employed by the miserable spiritual condition of the negro population in Antigua to come to their assistance. He accomplished much, and his work is now (1903) being carried on by 3 missionaries and their wives, 1 woman missionary, 31 native workers, 2 outstations, 3 places of worship, 3 Sunday schools, 2 day schools, 1 theological school, and 87 communicant Christians.

SAINT KITTS, or SAINT CHRISTOPHER: One of the Leeward Group of the British West Indies. Its greatest length is 23 miles, and it contains an area of 85 square miles, with a population of 45,000. The island is of volcanic origin, the scenery is rich and beautiful, and the soil is fertile and well watered. Basseterre, with a population of 7,000, is the capital. Mission field of the Moravian Brethren, with stations at Bethesda, Bethel, and Eastbridge. The Wesleyan Methodists have been for years active on this field.

SAINT LUCIA: One of the Windward Islands, British West Indies, has an area of 122 square miles, with a population about 50,000, principally negroes and half-breeds. Chief town, Castries.

Little success in the Protestant Mission on this island. A number of schools have been established, with many pupils in attendance.

SAINT MARY'S ISLAND: A large island off the coast of Gambia, West Africa, at the mouth of the Gambia River, east of Cape St. Mary. The principal city on the island is Bathurst. Mission station of the Wesleyan Missionary Society, with a force of 6 missionaries, 40 native helpers, 6 chapels, and 5 schools containing about 1,000 pupils.

SAINT PETER'S (Indian Settlement): A village in Canada, situated on the S. end of Lake Winnipeg, about 40 miles N. E. of Winnipeg. Station of the CMS, with (1903) 1 missionary and his wife, 17 native workers, 1,135 professed Christians, of whom 355 are communicants; 6 day schools, and 1 Sunday school.

SAINT PAUL DE LOANDA: Capital of the province of Loanda, in the Portuguese Colony of Angola, on the west coast of Africa. It is situated on a beautiful landlocked harbor, sixty miles by sea north of the mouth of the Quanza. Its population, estimated at about 20,000, consists of a few hundred Portuguese, and the rest are negroes.

SAINT THOMAS: A town on the island of St. T., West Indies. It is picturesquely situated on three hills on the south coast, overlooking a fine harbor. For many years it was the terminus of several steamship lines, a depot for the surrounding islands, and a port of call for vessels of all nations; but the laying of West India submarine telegraph cable greatly changed these conditions, and its commercial importance is rapidly declining. It is the residence of the Danish governor. The inhabitants are largely negroes. In 1843 the Moravian Brethren, who had hitherto confined their labors to the sugar plantations, found it necessary to provide instruction for the many converts who had come to the town to live, and a place of worship was procured near the center of the town, where a school and preaching services were held. In 1860 the building was completed, and was a memorial church of the 150th anniversary of the beginning of Moravian Missions. The Danish Government provided schools and churches for the people at a very early date in their occupancy of the island. The Moravian Mission now (1903) has there 1 missionary and his wife, 14 native workers, 1 place of worship, 1 Sunday school, 1 day school, and 421 communicant Christians. The town is also known as Charlotte Amalie.

SAINT THOMAS: One of the West India Islands belonging to Denmark (1716); has an area of 23 square miles and a population of 14,350, mostly negroes. Sugar, and rum are the products.

SAINT THOMAS' MOUNT: A town in Madras, India, situated in Chengelpat district, 7 miles S. W. of the Government House in Madras. It is also a military station. On the summit is a Portuguese Church, on the spot where in 1547 the "Mount Cross" was found. Population, 13,000, of whom 6,000 are Hindus. Station of the WMS, with (1903) 56 native workers, 12 outstations, 3 places of worship, 19 Sun-
day schools, 20 day schools, and 292 professed Christians.

SAINT VINCENT: One of the Windward Islands, West Indies; is a British colonial possession (1763), under an administrator and colonial secretary. Its area is 122 square miles. Population (1888), 46,872, mainly Negroes and half-breeds. Kingston is the capital; population, 5,393. Mission field of the WMS and SPG.

SAKANJIMBA: A settlement in Portuguese West Africa (Angola), situated in Benguela about 35 miles N. of Bailundu. Station of the ABCFM (1893), with 1 missionary and his wife, 1 woman missionary, 5 native workers, 4 outstations, 2 day schools, 1 dispensary, 1 kindergarten.

SALATIGA: A town and district in Java. Dutch East Indies, situated in the central part of the island, about 35 miles S. by E. of Samarang. Station of the Neukirchen Mission Institute (1893), with (1903) 1 missionary and his wife. Christian missions are included under Samarang.

SALEM: A town in Madras, India, situated in the Salem district, 110 miles W. by S. of Cuddalore. Population (1901), 70,621, nine-tenths of whom are Hindus. The manufactures of Salem are carpets and cutlery, the last-named being famous. Station of the LMS (1827), with (1903) 4 missionaries, three of them with their wives; 2 women missionaries, 71 native workers, 14 outstations, 7 Sunday schools, 18 day schools, 1 boarding school, 1 theological class, and 717 professed Christians, of whom 321 are communicants. Also station of the SPG (1875), with (1903) 3 women missionaries, 3 native workers, 1 place of worship, and 205 professed Christians, of whom 90 are communicants.

SALEM: A settlement in Dutch Guiana, South America, situated on the seacoast, about 90 miles W. of Paramaribo. Station of the Moravian Missions (1840), with (1903) 1 missionary and his wife, 2 native workers, 2 outstations, 3 places of worship, 3 Sunday schools, and 346 professed Christians.

SALMAS: A district in Persia, north of Lake Urmia, half way between Tabriz and Urmia and near the eastern boundary of Turkey. (It is spoken of as a city, tho there is really no city of that name.) Climate unusually pleasant and equable. Population, 35,000, Armenians, Muslims, Nestorians, Jews, and Kurds, each speaking its own language, and generally Turkish also. Station of the PN (1884), with (1903) 1 missionary and his wife, 6 Sunday schools, 6 day schools, 1 boarding school, and 436 communicants. Also station of the SPG (1876), with (1903) 6 missionaries, 3 native workers, 1 place of worship, and 205 professed Christians, of whom 90 are communicants.

SALONICA: A city in Europe, capital of the frontier state of Coahuila, 60 miles W. of Monterrey. Climate, mild, temperate, and healthful. Population (1901), 23,996, mixed Spanish and Indian, speaking Spanish and Indian dialects. Station of the SBC (1880), with (1903) 1 missionary and his wife, 5 native workers, 5 Sunday schools, 5 places of worship, 5 Sunday schools, 2 day schools, and 482 communicant Christians. Also station of the SPG (1884), with 2 missionaries and their wives, 2 women missionaries, 15 native workers, 6 Sunday schools, 6 day schools, 1 boarding school, and 436 communicants. Also station of the MES (1887), with (1903) 3 women missionaries and 1 native worker.

SALUR: A town in Madras, situated in the Vizagapatam district, about 50 miles N. W. of Chicasole. Population, 10,633. Station of the Breklum Missionary Society (1884), with 2 missionaries, 1 of them with his wife; 2 women missionaries, 25 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 4 day schools, 1 dispensary, and 326 professed Christians, of whom 313 are communicants.

SALVADOR: A republic of Central America, bordering on the Pacific coast for 160 miles from the mouth of the Rio de la Paz to the mouth of the Osos; an area of 7,723 square miles, about nine times as dense as the average of the Other Central American countries. The inhabitants are of aboriginal or mixed races; only 12,000 are whites, or descendants of Europeans. The natives are engaged principally in agriculture, tho there is much mineral wealth as yet undeveloped. The climate is mild and pleasant. Roman Catholicism is the state religion, but there is tolerance of other religions. Education, which is under the care of the government, is carried on in free schools, attendance upon which is obligatory. Railway, telegraph and telephone lines are being built, and the resources of the country are being developed. The ABS is doing effective work in Salvador.

SAMARANG: A commercial center of great importance in Java, Dutch East Indies, situated on the N. coast of the island about 150 miles E. by S. of Batavia. Population (1900), 89,286, of whom 4,800 are Europeans, 12,372 are Chinese, 1,688 Arabs and other Orientals, and 70,426 are native Javanese. Station of the ABCFM (1893), with (1903) 1 missionary, 1 place of worship, and 500 professed Christians. Also station of the ABCFM (1893), with 1 missionary and his wife, 105,000: Greeks, Bulgarians, Wallachians, Turks and Spanish Jews. Station of the ABCFM (1894), with (1903) 2 missionaries, 1 of them with his wife; 20 native workers, 22 outstations, 12 places of worship, 10 day schools, 27 Sunday schools, and 490 professed Christians. Also station of the Church of Scotland Jewish Committee, with 1 missionary and his wife and 1 day school.

SANTO DOMINGO: See SAINT DOMINGO.

SANTO DOMINGO: A republic of Central America, bordering on the Pacific coast for 160 miles from the mouth of the Rio de la Paz to the mouth of the Osos; an area of 7,723 square miles, about nine times as dense as the average of the Other Central American countries. The inhabitants are of aboriginal or mixed races; only 12,000 are whites, or descendants of Europeans. The natives are engaged principally in agriculture, tho there is much mineral wealth as yet undeveloped. The climate is mild and pleasant. SAMOA: A group of islands in the South Pacific Ocean, 14 in number. The western islands belong to Germany, and those east of the 174th meridian to the United States of America. The people are of the finest Polynesians to be found in the Pacific. The men are above the average height, with straight, well-rounded limbs and erect bearing. The women are slight, symmetrical and graceful in all of their movements. The natives are all nominally Christians—Protestants and Roman Catholics, with a few Mormons. Nearly all the population over seven years of age can read and write. In short, the islands offer one of the illustrations of the wonderful fruits of missionary enterprise. The chief islands of German Samoa are Upolu, Manono, Apolima, and Savaii. There are some smaller islets. All of these islands are mountainous, very fertile and quite populous. Upolu is the second in size of the islands, with a population (1901) of 18,345. Apia, the seat of government, is a seaport of this island, with a German Imperial Governor, supported by a native high chief and council. The LMS began its missions in Upolu in 1836 and now (1903) has stations at Apia (3 missionaries, 38 native workers, 8 schools, 1 industrial school, and 5,119 professed Christians); Malua (3 missionaries, 9 native workers, 10 schools, 1 boarding school and training institution, 1 printing house, and 2,123 professed Christians); Aana (1 missionary, 41 native workers, 21 schools, and 4,790 professed Christians); Falealili (1 missionary, 55 native workers, 31 schools, and 4,790 professed Christians). Savaii: Lying west of Upolu, has an area of 660 square miles and a population (1901) of 13,291. It was occupied by the LMS in 1830, which now has in the island stations at Fassoleleiaga (1 missionary, 49 native workers, 33 schools, and 4,949 professed Christians), and Matautu (1 missionary, 32 native workers, 33 schools, and 5,145 professed Christians). Manono and Apolima are smaller islands, with a population, together, of barely 1,000.

American Samoa: This consists of the islands of Tutuila, Manua, and some smaller islets. The whole taken together is officially known as the Tutuila naval station. Tutuila is high and mountainous, of volcanic origin, thickly populated, and very fertile. The bay of Pago Pago is the coaling station which made the place desirable to the United States. The area of Tutuila is 54 square miles, and the population about 4,000. Manua is a smaller island, with about 2,000 inhabitants. The LMS has (1903) on Tutuila 3 missionaries, and on Tutuila and Manua together 38 native workers, 42 schools, and 5,366 professed Christians.

SAMOKOV: A town in Bulgaria, European Turkey, Situated on a mountain plateau about 55 miles S. by E. of Sofia. Climate healthful. Station of the ABCEF (1886), with (1903) 4 missionaries, 3 of them with their wives; 4 women missionaries, 25 native workers, 9 outstations, 9 places of worship, 9 Sunday schools, 1 day school, 2 boarding schools, 1 theological class, 1 college, 1 kindergarten, 1 industrial department, and 300 professed Christians.

SAMSOUN: A city on the Black Sea, Asiatic Turkey, 500 miles E. of Constantinople. Population, Turkish, Greek, and Armenian. It is the port through which passes the greater part of the trade between Constantinople and northern and eastern Asia Minor. A carriage road has been built connecting it with the principal cities in Eastern Turkey, except Erzerum, and the missionaries for those cities as a rule lands at Samsoun. It is very malariaous, and continued residence has been impracticable for the missionaries. There is a thriving native church connected with the Marsovan station.

SAMULCOTTA. See Chamalarakota.

SANDOWAY: A very ancient town in Arakan, Burma, on the Sandoway River, 15 miles from its mouth. Climate, except in the town itself, unhealthful, owing to mangrove swamps. Before the Pegu province of Burma was taken by the English, Sandoway was the headquarters of the Bassein Karen Mission, and thousands were baptized there. Population about 2,000. Station of the ABMU (1888), with (1903) 1 missionary and his wife, 2 women missionaries, 42 native workers, 19 outstations, 18 Sunday schools, 8 day schools, 1 boarding school, and 460 communicant Christians.

SANDY LAKE: A settlement in Northwest Canada, situated in the territory of Saskatchewan, about 50 miles N. W. of Prince Albert. It is also called Assiniboia. Station of the CMS (1876), with (1903) 1 missionary, 1 native worker, 2 day schools, and 260 professed Christians, of whom 86 are communicants.

SAN FERNANDO: A town in Trinidad, West Indies, on the W. coast, about 23 miles S. by E. of Port of Spain. Station of the UFS (1850), with (1903) 1 missionary and his wife, 1 native worker, 1 outstation, 2 Sunday schools, and 218 professed Christians, of whom 80 are communicants. Also station of the PCC (1870), with (1900) 2 missionaries and their wives, 1 woman missionary, 13 native workers, 2 outstations, 23 Sunday schools, 17 day schools, 1 industrial board school, 1 theological class, 1 college, and 218 professed Christians. Station also of the AME, with 1 native worker.

SANG-HIA-CHUANG: A town in Shen-si, China, situated about 55 miles W. of Hsi-ngan-fu. Station of the CIM (1894), with (1903) 1 woman missionary, 3 native workers, 1 place of worship, 1 Sunday school, and 2 professed Christians. Some write the name Sang-kia-chuang.

SANGI or SANGIR Islands: A group of islands in the Dutch East Indies, lying between Celebes and Mindanac. The area of the group is about 350 miles, and the population about 45,000. The largest of the islands is called Great Sangit. Its characteristic feature is the volcano of Gunung Abu, which belongs to a terrible history of destruction. This island is also the center of evangelistic effort now supervised by the "Sangir and Talaut Islands Committee," whose seat is in Batavia. Other stations of this committee's Mission are in the islands of Siauw and Talaut, in the group of islands forming the Maluku Islands. Taking the Sangir group and the neighboring Talaut islands together, the number of professed Christian adherents found there (1901) is about 44,000.

SANG-YONG: A village in Fo-kien, China, situated about 55 miles N. of Fu-chau-fu. Station of the CEZ (1894), with (1903) 3 women mission-
boarding school. Societies, both European and American.

Swatow. Station of the PCE (1895), with (1903) 3 missionaries, two of them with their wives; 1 place of worship, and 1 dispensary. Some write the town Simpoa.

SANTALS: A people of British India, a remnant of the pre-Hindu Kolarian population, and numbering (census of 1901) 1,470,000 in Bengal, and 23,000 in Assam. Santaliala, or the land of the Santals, lies on the extreme eastern edge of the tableland of Eastern India, where it slopes down into the Ganges valley of lower Bengal, extending southward from the Ganges at Bhagulpur. In this region two distinct aboriginal tribes reside. The Paharis, of Dravidian origin, live on the hill tops, and were a terror to the whole country until the 18th century, when they were subdued and tamed by the young civil officer, Augustus Cleveland. As, however, the Hindus were still afraid to occupy the valleys below the Pahari, the government in 1852 encouraged the Santals, who lived further south, to occupy them and the adjoining lowlands, marking off for their use the adjacent lowlands, marking off for their use the territory 23° 48' to 25° 19' latitude, and 86° 30' to 87° 88' longitude, called the Santal Parganas, which became the home of the race. Colonization has taken place to Assam and to the Santalpur district, at the foot of the Himalayas, 250 miles northward.

The Santals have very dark skins, round faces, flat noses, large mouths, with protruding lips, and straight black hair. They wear almost no clothing. They are strongly built, simple, tractable, devoid of caste, and, judged by the standards of India, honest and truthful. They are nomadic farmers and are in demand as laborers on the indigo plantations and railways of Bengal, and the tea plantations of Assam. The women are notable, cl not for beauty of form, but for grace of limb, the laden with brass rings. They are on a higher plane socially than most heathen women. It is customary for each family to live by itself within an enclosure of intertwined hedge. Santali is a more developed speech than the other Kolarian dialects, but was first reduced to writing by the missionaries. Bengali is taught in the schools. Their religion is ancestor and nature-worship, human sacrifices being offered until the extinction of the brutal custom by the British Government in 1859.

The earliest mission in Santaliala was that begun in 1859 among the Paharis, by the Church Missionary Society, under Rev. E. Droese, who continued at Bhagulpur for 36 years. Attention was especially drawn to the Santals by their terrible insurrection in 1855 against the extortion of the Hindu money-lenders, which proved a turning-point in their history. Commissioner George Yule, who restored order, encouraged Droese to open schools among them, obtaining grants for this purpose, and he and his successors did much for their material and moral improvement. The CMS opened a mission to the Santals in 1859. The following year, E. L. Puxley, a British officer and Oxford graduate, who had volunteered for India, was interested in the Santals by the missionaries, and visited the Santalpur district, at the foot of the Himalayas, 250 miles northward.

The stations named, all in the N. E. of Santaliala, together with Santalpur, where 880
Christian colonists are settled, constitute the centers of the CMS Mission to the Santals, which in 1901 reported, including Pakhatis, 4,130 Christians.

"The Home Mission to the Santals," founded in 1867, and led for 35 years by Boerresen, the Danish missionary, at Ebenezer, in eastern Santals, reported in 1902 11,345 Christians, who are already trained to a considerable degree of independent activity.

The Free Church of Scotland entered the field in 1871, and has three centers in the S. W. (Panchamba, Tondoo, and Chakal), reporting, in 1901, more than 1,300 Christians. The Bethel Mission, in the southern section, had enrolled, in 1900, 1,500 Christians. According to Warnecke (1902) there are, in connection with these and other small Santal missions, 18,000 Christians.

Santal Language: The Santals inhabit a considerable section of Bengal, India, lying north-west of Calcutta. Their language is not of the Aryan family, and is commonly classified with the Kolarian group of Dravidian languages.

SANTIAGO DE CUBA: A town and seaport on the E. coast of Cuba, W. I., formerly capital of the island. Population (1903), 14,060. Station of the Baptist Home Missionary Society (1899), with (1900) 2 missionaries and their wives, 3 women missionaries, 3 native workers, 4 outstations, 1 place of worship, 5 Sunday schools, 1 industrial school, 1 kindergarten, and 109 professed Christians. Station also of the MES, with (1903) 2 missionaries, 2 women missionaries, 1 native worker, 1 day school.

SANTO DOMINGO: Republic of: A country in the island of Haiti, W. I., also called the Dominican Republic. It has an area of about 18,000 square miles, comprising about two-thirds of the whole island, the republic of Haiti occupying one-third in the western part. It was separated from the republic of Haiti in 1844, after a bloody struggle. Spain held it from 1861 to 1865. In 1869 a treaty was signed with the President of the United States for its annexation to the great republic, but the treaty failed of ratification by the United States Senate. It has suffered from wars and revolutions, and is very backward in its civilization. Its government is after the model of that of the United States, with a President chosen by an electoral college, who holds office for four years. Its population is estimated (1888) at 610,000, chiefly of mixed Spanish and Indian blood, with some pure negroes and mulattoes and a certain number of whites. The language is Spanish. French and English are also spoken in towns. Religion is Roman Catholic, but all religions are tolerated. From the time of the revolt of Haiti against French control until 1864, the Roman Catholic clergy withdrew from the island, which was placed under the ban of the Church. The people reverted in many instances to ancient heathenish superstitions, which have considerable sway in the smaller settlements. Protestant missions in the Dominican Republic are represented by the Protestant Episcopal Church of the U. S., which have one station; in charge of a colored minister from Haiti, and by the Wesleyan Methodists of the West Indies, who have four stations; these latter stations were passed over to the charge of the WMS in 1903.

SANTURCE: A town in Porto Rico, W. I., situated about 20 miles W. of San Juan. Station of the American Missionary Association (1888), with 4 women missionaries, 1 Sunday school, 1 day school.

SÃO JOÃO DEL REI: A town in Brazil, situated in the state of Minas Geraes, about 130 miles N. W. of Rio de Janeiro. Station of the PS (1895), with (1903) 1 missionary and his wife, 2 native workers, 40 professed Christians.

SÃO PAULO: Capital city of a province of the same name in Brazil. It is an important city, and has developed much within recent years, being the most active and enterprising town in the country. It is the center of the railway system of the province, and is distant only 36 miles from Santos, and 220 miles S. W. from Rio de Janeiro. Tho the streets are narrow, they are well paved, and are lighted with gas. Sewers and water mains have been constructed. It stands on a high, but not quite healthful, plain. Altitude, 1,935 feet. Population (1903) 225,000. Station of the MES (1884), with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, 2 outstations, 2 places of worship, 6 Sunday schools, and 953 communicant Christians. Station also of the PS (1863), with (1903) 1 missionary, 1 woman missionary, 4 native workers, 2 outstations, 3 Sunday schools, 1 day school, 1 college. Station of the Southern Baptist Convention (1899), with 2 missionaries and their wives, 3 native workers, 2 outstations, 1 Sunday school, 1 theological class, and 73 communicant Christians.

SÃO PEDRO, OR RIO GRANDE DO SUL: A town in Brazil, situated in the state of Rio Grande do Sul on the sea coast, about 40 miles S. E. of Pelotas. Station of the American Church Missionary Society (1891), with (1900) 1 missionary and his wife, 1 woman missionary, 2 native workers, 1 outstation, 3 places of worship, 1 Sunday school, 1 theological class, and 106 professed Christians. Also station of the Seventh Day Adventist Church, with 1 missionary and his wife. Church statistics included in Rio de Janeiro.

SAPPORO: A town in Japan, situated near the W. coast of Hokkaido Island and about 350 miles N. by E. of Tokio, 95 miles N. E. of Hakodate. It is connected with Otaru, its port, by railway. Its streets are wide. Climate cold. Population, 13,500. Station of the CMS (1893), with (1903) 1 missionary and his wife, 1 woman missionary, 22 native workers, 1 outstation, 1 place of worship, 5 day schools, 1 boarding school, and 1,612 professed Christians, of whom 388 are communicants. Also station of the ME, with (1903) 1 missionary and his wife, 2 women missionaries, 11 native workers, 5 outstations, 7 places of worship, 7 Sunday schools, and 468 professed Christians, of whom 308 are communicants. Station also of the ABCFM (1895), with (1903) 1 missionary and his wife, 1 woman missionary, 10 native workers, 1 outstation, 5 Sunday schools. Station also of the PN, with (1903) 3 women missionaries, 3 outstations, and 1 boarding school.

SARAWAK: A district on the northwestern coast of Borneo, ruled by Rajah Sir Charles Brooke, under protecorate of the British Government. The population is about 350,000, composed of Malays, Dyaks, Kayans, and other
tribes, together with Chinese and other settlers. The SPG has (1902) 5 stations in Sarawak, with about 2,500 baptized Christians.

SARENGA: A village of Bengal, India, situated in the Suri district, N. by E. of Bankura. Station of the WMS (1901), with 1 missionary, 19 native workers, 2 Sunday schools, 4 places of worship, 6 day schools, 1 boarding school, and 76 professed Christians, of whom 66 are communicants.

SAREPTA: A village in Cape Colony, South Africa, situated about 20 miles N. E. of Cape Town. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 6 native workers, 1 outstation, 1 Sunday school, 2 day schools, and 65 professed Christians, of whom 200 are communicants.

SARGENT, John: Born at Newark, N. J., 1710; died July, 1749; graduated at Yale College 1729; was tutor 1731-1734. He was contemporary with David Brainerd, and taught him the Algonquin language. July, 1735, he was settled as a missionary to the Indians on the Housatonic River and the next month ordained at Deerfield in presence of the governor and council and a large number of English and Indians. Mr. Sargent acquired the native language with facility and so well that the people said he spoke it better than themselves. He translated into their language parts of the Old Testament, and all the New except the Book of Revelation. He introduced many of the arts of civilized life, interested them in singing, taught them Biblical history and doctrine, and brought into the mission school many Mohawk and Oneida children from the province of New York. Regarding the education of the youth as essential to his success, he had formed the plan of a manual-labor school, in which the pupils should contribute to their own support. Provision had been made for the education of several boys, land procured, a school-house built, and some boys were collected; but the death of Mr. Sargent prevented the consummation of the plan. Mourning over the Indians, who loved him as a father and friend, he died at the early age of 39. Their improvement through his labors had been great. He found them but 50 in number, living miserably and viciously in wigwams, widely scattered, and roving from place to place. He left them about 800 in number, settled in a thriving town, with twenty families in frame houses, and many having farms cultivated, fenced, and well stocked. He had baptized 182, and 42 were communicants.

SARGENT, Edwin: Born at Paris, France, 1815; died October 10, 1889. Spent the early part of his life at Madras; went in 1835 to Palamcottta, Tinnevelly, as a missionary of the Church Missionary Society; in 1839 he went to England, studied three years in the Church Missionary College at Islington; was ordained in 1842, and the same year returned to his work in Tinnevelly. The first eight years he was located at Suvasekhalipuram, having charge of a missionary district. In 1850 he was transferred to Palamcottta, and two years later appointed principal of the Preparandi Institution, which had a high character for discipline. In 1855 he received the head of 700. More than 500 young men were instructed by him, many of whom are now pastors of native Christian churches in the towns and villages, and many more are catechists and schoolmasters. In 1874 he was nominated a suffragan or coad-jutor bishop to the Bishop of Madras, and on March 11, 1877, consecrated in Calcutta by Bishop Johnson, assisted by the bishops of Madras, Bombay, and Colombo. He had charge of eight of the ten districts into which the Society's Tinnevelly Mission was divided. In these districts were 51,000 Christians, 66 native pastors, and many catechists and schoolmasters, all under his care. During the first fifty years of the bishop's missionary service, the number of villages containing Christians in the Church Missionary Society's portion of Tinnevelly rose from 224 to 1,018, the Christians and catechists from 8,603 to 56,287, and the native clergy from 1 to 68. In the earlier period native Christians did nothing for the support of the Gospel among themselves; at the later period their contributions for church work amounted to over 33,000 rupees annually. The affairs of the church are now managed to a very large extent by the Christians themselves, and no native clergyman draws his stipend from the Missionary Society. The success of church work is due very largely, under God, to the patient, untiring zeal, and loving labor of Bishop Sargent. He had a remarkable knowledge of the vernacular.

SARON (Dutch Guiana): Part of Paramaribo.

SART LANGUAGE: A dialect of the Eastern Turkish, spoken by the dwellers in cities of the parts of Central Asia S. of the Aral Sea. It is but little different from the Uighur, or Turkish of culture, in these Eastern regions.

SATTANAPALLI: A town in Madras, India, situated in the Kistna district, about 63 miles N. by E. of Ongole. Station of the ABMU (1895), with (1903) 1 missionary and his wife, 14 native workers, 1 day school, 1 Sunday school, and 1,879 professed Christians, of whom 876 are communicants.

SATTELBERG: A settlement in German New Guinea, situated on high land near the E. coast and about 10 miles N. W. of Simbang. Station of the Neudettelstern Mission Society (1892), with (1903) 4 missionaries, 1 of them with his wife; 1 woman missionary, 1 day school, and 1 place of worship.

SATTHIANADHAN, William Thomas: A native of India, of the Vishnurtite Sudras. Died at Sinnupunthurai, Tinnevelly, February 24, 1892. Educated at the native English school and Palamcotta Preparandi Institution. He was stationed in North Tinnevelly, and afterward had charge of the Southern pastorate at Madras, and was Chairman of the Madras Native Church Council. In 1881 he formed the Chintadrepetta Christian Association; in 1884 he was elected Fellow of the University of Madras, and in 1885 he received the degree of D.C.L. In 1887 he was elected bishop of Canterbury, on the recommendation of the Bishop of Madras, in recognition of his linguistic and other labors. He was the author of a Church History in English and Tamil, and he edited a Tamil Commentary on the New Testa-
ment. He also ably conducted two periodicals, and the power of his pen was felt among a large circle of readers. Mrs. Satthianadhan had the superintendence of a large school for high-caste women, and carried on Ženana work for many years in connection with the CEZMS and Female Education Society.

SATUPAITEA: A settlement in the Samoan Islands, situated on the S. side of Savaii. Station of the Australia Wesleyan Missionary Society, with (1903) 1 missionary and his wife, 164 native workers, 7 outstations, 24 places of worship, 28 Sunday schools, 28 day schools, 1 boarding school, and 1,050 professed Christians.

SAVAI: The westernmost of the Samoan Islands. Area, 700 square miles. Population, 13,000. Station of the LMS (1830), with (1903) 1 missionary, 44 native workers, 1 outstation, 63 Sunday schools, 63 day schools, 2 boarding schools, and 5,555 professed Christians, of whom 276 are communicants.

SAVAS: An island of the East Indies, southwest of Timor Island, southeast of Java; has estimated population of 16,500, more than half of whom are nominally Christians. They are visited twice a year by the Dutch Government assistant pastor residing at Kupang, Timor.

SAWYERPURAM: A village in Madras, India, situated in Tinnevelly district, a short distance S. of Palamcottta. Founded in 1814 by Mr. Sawyer, an English trader, who bought the land in order to make a refuge for persecuted converts. Station of the SPG (1826), with (1903) 1 missionary, 57 native workers, 21 places of worship, 10 day schools, 1 boarding school, and 2,789 professed Christians, of whom 1,027 are communicants.

SCHAUFFLER, William Gottlieb: Born in Stuttgart, Germany, August 22, 1798. Died January 26, 1883. His early life was spent at Odessa, in Russia, where he worked at his father's trade as a turner. At the age of twenty-two he confessed his faith in Christ. He early became interested in foreign missions; and in 1826, meeting the famous missionary, Dr. Joseph Wolff, his enthusiasm was further kindled. Finding, however, the plans of Dr. Wolff impracticable, he went to Constantinople, and thence to Smyrna, where he met Rev. Jonas King, who induced him to go to America for an education. He entered the Andover Theological Seminary, where he remained five years, studying often fourteen and sixteen hours a day. He says: "Aside from the study of Greek and Hebrew, and general classical reading, I studied the Chaldee, Syriac, Arabic, Samaritan, Rabbinic, Hebrew-German, Persian, Turkish, and Spanish; and, in order to be somewhat prepared for going to Africa, I extracted and wrote out pretty fully the Ethiopic and Coptic grammars. For some years I read the Syriac New Testament and Psalms for my edification, instead of the German or the English text." He also sided the professors in their translations. He was ordained November 14, 1831, a missionary of the ABCFM to the Jews of Turkey. He studied Arabic and Persian with De Sacy, and Turkish with Prof. Kieffer in Paris, and then went to Constantinople. There he preached in German, Spanish, Turkish, and English. In 1838 he visited Odessa, chiefly on Mrs. Schauffler's account, and was much engaged in evangelistic work, resulting in many conversions. He translated the Bible into Hebrew-Spanish, that is, Spanish with a mixture of Hebrew words and written with Hebrew characters, for the Jews in Constantinople, descendants of those who had been driven from Spain. Dr. Schauffler, besides being a translator, was an earnest evangelist preacher, his Sunday services in English and German for local residents being greatly blessed. He delivered in Constantinople a series of discourses, which were published in a volume by the American Tract Society, entitled "Meditations on the Last Days of Christ." In 1840 he became interested in foreign missions; and in the Jewish Mission covering that field. This decision, and the entrance of the Armenian Mission to the field, decided, after the Turkish Government refused liberty of conscience to Muslims, not to belong allowed by the Government to profess Christianity except as a member of the Greek Church, went to Constantinople and was by him baptized. In 1839 he went to Vienna to superintend the printing of the Hebrew-Spanish Old Testament. There he resided three years, and many striking conversions occurred through his labors. He presented to the emperor, in a private interview, his printed Bible, on which his labor. The Jews having pronounced a favorable verdict upon it, a second and larger edition was printed. Journeying from Vienna he spent ten days in Pesth, where many of the better class of Jewish families embraced the Christian faith. The Jewish Mission having been relinquished in 1855, he was requested by the Scotch Free Church, to which it had been transferred, to take charge of the work, but he declined. He declined also the proposal to enter the Armenian field. About this time he was asked by the Prudential Committee, and Dr. Schauffler, with the approval of the mission, decided to enter that field. To fit himself for this new work, he applied himself to the Turkish language anew. In 1857, a paper on the Turkish and Bulgarian work, prepared by Drs. Schauffler and Hamlin, was sent to the Prudential Committee, and Dr. Schauffler was appointed by the mission to present, in America and England, the claims of the new mission to the Turks. After thirty-one years of absence he set sail for home. His appeals met with a generous response. The Prudential Committee, however, decided, after the Turkish Government refused liberty of conscience to Muslims, not to continue the separate mission to Mohammedan Turks, but to have the Armenian Mission cover the whole field. This decision, and the entrance of the SPG into Turkey, led Dr. Schauffler to resign as a missionary of the Board, but he pursued his Bible translation in the employ of the American and British and Foreign Bible Societies. His great work was the translation of the whole Bible into the literary Turkish, the language of the books as distinguished from that of the common people. This occupied him eighteen years. He published an ancient Spanish
version of the Old Testament, revised by himself, with the Hebrew original in parallel columns, a popular translation of the Psalms into Spanish, a grammar of the Hebrew language in Spanish, a Hebrew-Spanish Lexicon of the Bible. He contributed also articles in Spanish to a missionary periodical in Salonica. He was a remarkable linguist, able to speak ten languages and read as many more. His rare scholarship, and especially his translation of the Bible into literary Turkish, led the Universities of Halle and Wittenberg to confer upon him the degrees of D.D. and Ph.D., and Princeton College the degree of Doctor of Laws. For his great services to the German colony of Constantinople the King of Prussia conferred upon him a decoration. He left Constantinople in 1874, and went to New York with his wife to live with his two youngest sons. He was in the active missionary work for nearly fifty years.

SCHEMACHI: A large and important city of Eastern Transcaucasia, Russia. Population about 25,000, of whom a large number are Armenians. As a result of the work of the Basel Missionary Society, a congregation of evangelical Armenians was organized here, which did not lose its power after the missionaries were obliged to leave. Its leader received some education at Basel Seminary, and, by his rare skill and earnest piety, succeeded in keeping his little band together. Notwithstanding the law of Russia, which insists that proselytes shall join the Greek Church, the Protestants grew in numbers and in strength, until they became one of the most influential communities in that section of the Caucasus. From Schemachi the work spread to Shusha, Lenkaran, and Baku, in each of which places congregations were gathered, which now form a recognized body of Christians.

SCHLESWIG-HOLSTEIN Missionary Society in Breklum. See Germany; Missionary Societies.

SCHMELLEN, John Henry: Missionary of the LMS in South Africa. Born in Germany, 1777; died at Komaggas, Little Namaqualand, July 26, 1848. Mr. Schmellen arrived at his field of labor in 1811, and opened the stations at Steinkopf and Pella, south of the Orange River, spending some time exploring the regions about the mouth of the river, and on its north side, toward Damaraland. In 1814, on invitation of the Namaquas, he crossed the Orange River and opened a new station at Bethany, 200 miles north of Steinkopf. Here he laborediously carried on his most difficult work of reducing the Namaqua speech to writing, and translating the Gospels into that language. In one of his long tours he encountered Mr. Barnabas Shaw, of the WMS, who was sent out to establish a mission in the Namaqua country. It was characteristic of the man that he at once put himself at the disposal of the new missionary, took him to the Kamiesberg country, introduced him to the tribesmen there, and then, having seen him properly settled, went on to his own field, distant four weeks' journey. In 1814 he visited Cape Town to see his Namaqua Gospel through the press, and as an accompaniment he spent some time exploring the coast regions of Little Namaqualand, finally establishing a new station at Komaggas. There he completed the translation of the Gospels, and took them to Cape Town to be printed. In the meantime he was growing old, and called in vain for an associate to take up his work. His associate came at last in 1840, a missionary of the Rhenish Missionary Society, the LMS having transferred its Namaqua work to that Society. The closing years of his life were devoted to a mission college of helping with his experience and counsel the missionaries of the new group, who were to press forward the work for his beloved Namaqua people.

SCHEIDER, Benjamin: Born at New Haven, Pa., January 18, 1807. Died September 14, 1877. Graduated at Amherst College, 1829; theological seminary, 1833; ordained as a pastor, October 2; sailed for Turkey as a missionary of the ABCFM December 12, 1833, the supported by Reformed (German) Churches. He was stationed first at Brousse, where he preached the first evangelical sermon ever preached in the Turkish language. In 1849 he removed to Aintab, where he laid the foundation of two flourishing churches. After the death of his wife in 1856 he visited the United States, and on returning to Turkey in 1858, was again stationed in Brousse. His health failing, he made a second visit home in 1865. On call for help in Turkish and Greek work in the missionary seminary at Marsovan induced him, tho advanced in years and in feeble health, to return, reaching Marsovan March, 1874. But from nervous prostration he was compelled to relinquish the work, and in 1875 he left for Switzerland, thence for his native land.

For more than forty years he was connected with the Turkey missions, laboring in almost every department of missionary service—preaching, translating, preparing young men for the ministry. Few have traveled more extensively as pioneers; few have more cheerfully endured the privations of the service; few are the native churches in Turkey where his name is not known and revered. Even amid the intense sufferings of the last two years of his life his eye would brighten and glow with delight at the bare mention of the missionary life. He acquired languages with great facility. He spoke German, Greek, and Turkish, almost as if each were his vernacular, the latter with an ease and fluency seldom equaled by foreigners. Even in his old age he wondered at his marvelous flow of thought in idiomatic phrases, easily understood by all; for he chose simplicity of style, tho at home in the higher and more complicated forms of expression.

He received the degree of D.D. from Franklin and Marshall College, Lancaster, Pa., 1850.

SCHREIBER, August: Born at Bielefeld, Westphalia, August 11, 1839; died at Harman, Germany, May 22, 1903. After graduating at Gutersloh, he studied theology at Halle and Erlangen, returning to Gutersloh for two years' further study, and for theological examinations. Having decided to become a missionary in the foreign field, he spent a year in London and Edinburgh, studying church organization and missionary methods used by the different societies. He also took a short course in medicine. In 1865 he offered himself to the Rhenish Missionary Society and was appointed missionary to Sumatra by that Society, in 1866. Since he had found means, before going out, to study the Batta language he was able to enter the active work almost as soon as he arrived on the field. He was compelled to leave Sumatra and return to Germany by his wife's illness in 1873. During
the seven years of his missionary career in Sumatra he was occupied with organizing a better system of training native helpers, and also with translating the Scriptures into Batta. He completed the translation of almost the whole New Testament before he returned to Germany. On arriving at Banten, Dr. Schreiber was usefully occupied in the Rhenish Mission House, and, in 1884, he became second "Inspector" of the Rhenish Missionary Society. In 1889 he was made first "Inspector" (Foreign Secretary) of the Society. Dr. Schreiber represented his Society at the London Interdenominational Conferences of 1878 and 1888. He made extended visits to the fields of the Society in South Africa and the Dutch East Indies, and China. In 1900 he represented sixteen German Missionary societies at the Ecumenical Conference on Foreign Missions, held in New York. Many who were present at that Conference long carried in their memory the spare figure of Dr. Schreiber, with his bright, genial manner, and the lucid and effective method of his addresses, as he took part in several of the discussions of the Conference. Dr. Schreiber was a man of fine quickness of judgment, and of the broadest sympathies. He believed in missions most heartily as the great practical proof of the vigor and, therefore, of the sincerity of Christendom.

SCHWARTZ, Christian Friedrich: Born in Sonnenburg, Prussia, October 28, 1726. Died February 13, 1789. At the age of twenty he went to the Halle University, where he became established in the faith of Christ, and resolved to devote himself wholly to Him. Dr. Schultz, who had left India from failure of health, was at this time preparing to print the Bible in Tamil, and advised Schwartz to learn that language in order to assist him. Professor Francke, hearing of his great success in acquiring the language, proposed to him to go as a missionary to India. He decided to go, declining an advantageous position in the ministry at home. He was dained at Copenhagen, with the view of joining the Danish Mission at Tranquebar, where he arrived July 30, 1750. In four months he preached his first sermon in Tamil in the church of Ziegenbalg. From the first he devoted much time and attention to the religious instruction of the young.

In twelve years Schwartz had baptized 1,238 in the city. He labored also faithfully for the English garrison, for which no religious instruction was provided. The salary of £100 which he received as chaplain of the garrison, from the Madras Government, he devoted the first year to the building of a mission house and an English Tamil school, and afterward gave a large part of it in charity.

In 1776 he went to Tanjore to found a new mission, and here he spent the remaining twenty years of his life. Even in this favorite abode of the Hindus, where was the most splendid pagoda of India, he had great success, two churches having been established in 1780. He won the high esteem of the English Government, which employed him in important political transactions with the native princes. When the powerful and haughty Hyder Ali of Mysore refused to receive an embassy from the English, whom he distrusted, he told him he would treat with them through Schwartz. "Send me the Christian," meaning Schwartz; "he will not deceive me." Urged by the government, he consented to undertake the mission. Through his intercession Cuddalore was saved from destruction by the savage hordes of the enemy. On his return a present of money was forced upon him by Hyder, which he gave to the English Government, requesting that it be applied to the building of an English orphan asylum in Tanjore. The Mohammedan's regard for Schwartz was so great that he issued orders to his officers, saying: "Let the venerable padre go about everywhere without hindrance, since he is a holy man, and will not injure me." While Hyder was ravaging the Carnatic with an army of a hundred thousand, his humblest ministers were feasting in dismay to Tanjore, Schwartz moved about unmolested. In the famine caused by the war more than 800 starving people came daily to his door. He collected money and distributed provisions to Europeans and Hindus. He also built there a church for the Tamil congregation. The rajah a few hours before his death requested Schwartz to act as guardian to his adopted son Serfogee. The trust was accepted and faithfully discharged.

After a protracted and severe illness, during which he delighted to testify of Christ and to exhort the people, he expired in the arms of two of his native converts. At his funeral the effort to sing a hymn was suppressed by the noise of the wailing of the heathen, who thronged the premises. Serfogee lingered, weeping, at the coffin, covered it with a cloth of gold, and accompanied the body to the grave. The small chapel in which he was interred outside of the fort has been demolished, and a large one erected. The grave is behind the pulpit, covered with a marble slab bearing an English inscription:

To the memory of the

REV. CHRISTIAN FRIEDRICH SCHWARTZ; Born Sonnenburg, of Neumark, in the kingdom of Prussia, The 28th October, 1726, And died at Tanjore the 13th February, 1798, In the 72d year of his age.

Devoted from his early manhood to the office of Missionary in the East; The similarity of his situation to that of The first preachers of the gospel Produced in him a peculiar resemblance to The simple sanctity of the Apostolic character. His natural vivacity won the affection As his unspotted probity and purity of life Alike commanded the reverence of Christians, Mohammedans, and Hindus: For sovereign princes, Hindu and Mohammedan, Selected this humble pastor As the medium of political negotiation with The British Government; And the very marble that here records his virtues Was raised by The liberal affection and esteem of the Rajah of Tanjore, Maha Rajah Serfogee.

Another beautiful monument was erected to his memory by the East India Company in the Church of St. Mary, Madras, part of the inscription on which is as follows:

On a spot of ground granted to him by the Rajah of Tanjore, two miles east of Tanjore, he built a house for his residence, and made it an Orphan Asylum. Here the last twenty years of his life were spent in the education and religious instruction of children, particularly those of indigent parents—whom he generously maintained; and here, on the 15th of February, 1798, surrounded by his infant flock, and in the presence of several of his disconsolate charges, he closed his truly Christian career in the 72d year of his age.

SCHWIFAT. See SHWIFAT.

SCIENCE; Contributions of Missions to: It has been the custom of the old and thoroughly established Mission Boards to send out, for the
most part, only men of the broadest university training. These have gone into regions of the earth where educated Americans or Europeans have but seldom if ever penetrated. The earlier missionaries were in many countries, and in some sections of these countries, the only explorers. Not a few of these regions were entirely unexplored.

Moreover, the missionaries entered these countries for permanent residence. They established their homes. They mastered the vernacular of the country and thus put at their disposal, to aid in their investigations, all the wisdom the people themselves possessed. In this way they became identified with the people and the country. The facilities of the missionaries, therefore, for careful, accurate, and continuous investigation of the scientific phenomena all about them were unsurpassed. Many missionaries have been in regular correspondence with the leading scientists, who have made suggestions which the missionaries have carried out, and in turn the missionaries have reported the results of their observations and investigations to scholars, connected with American and European universities, who have sent back their interpretations.

The missionaries have not given their time and strength to scientific pursuits as an end in themselves. In some cases a particular branch of investigation has been the occupation of a hard-working missionary; in other cases, independent scientific investigation has been a part of the regular work in the training in the missionary colleges abroad, while in a majority of instances perhaps the most valuable scientific results have been collected and transmitted by missionaries connected with American and European universities, who have sent back their interpretations.

In this article space does not permit of citation to any extent of specific cases. Such exhaustive citations would greatly increase the value of the article, but it would also necessarily add to its length many fold. We can but state the facts, leaving the illustrations to be supplied by the reader.

Geography: Probably no other department of science owes more to the missionaries than does geography. The missionaries have been the pioneers in most countries. The interests of their work, as well as the necessity of making intelligent reports to their committees, boards and constituencies, demanded that accurate information be given regarding the physical condition of the countries occupied. The first communications of the exploring missionaries in all countries have been full of geographical data, which have necessarily been the beginning of all the concrete information we to-day possess. about these countries.

Franciscan and Jesuit missionaries, more than six centuries ago, traveled through Central and Eastern Asia, and even into China, and described the topography of the country. They prepared the best maps of those countries then known. Spanish and Portuguese missionaries contributed much of the first knowledge of Africa and America. They wrote the first accounts of the Congo and Abyssinia. The Danish missionaries gave us our first and best accounts of Greenland and Iceland. It is impossible even to catalog the names of the societies and distinguished missionaries who, previous to the beginning of the 19th century, made large and important contributions to the science of Geography.

During the 19th century the missionaries have not been less active in their explorations. The Sandwich or Hawaiian Islands were opened to the world and explored and mapped out by them. The South Sea Islands are known to us largely through the initial work of missionaries who explored for the sake of missionary operations. Africa and Australia were first made known to the scientific world through the report of missionaries published in missionary magazines, in independent books or in the columns of the various geographical societies. The most valuable contributions to the geography of Syria were made by a missionary, and the interiors of Asia Minor, Mesopotamia and Persia were explored for us by resident missionaries. During the first half of the last century the world was introduced to India as a country, apart from its resistance to foreign invasion and its value to commerce, through the extended reports of missionaries regarding the country, its outlines, products and people. China was a missionary country in its first introduction to the world. In 1856, when the British fleet bombarded Canton, its action was directed by a map of the city and suburbs prepared by a missionary. The best work on China, which is still a classic on the Middle Kingdom, was prepared by a missionary.

Undoubtedly the files and libraries of the missionary societies which have been in operation for half a century or more contain a more abundant supply of facts regarding the countries of the world, outside of North America and Europe, than can be found in the non-missionary part of the archives of all the geographical societies taken together. The missionary societies in their regular periodicals have published much of this material, so that the foreign missionary magazines really belong in the libraries of the geographical societies.

Rev. Dr. William Adams, of New York, has said: "I believe more has been done in philology, geography, and ethnology indirectly by our missionaries than by all the Royal and National societies in the world that devote themselves exclusively to these objects." The Princeton Review says (Vol. 38, p. 622): "Our missionaries have rendered more real service to geography than all the geographical societies in the world."

Carl Ritter, the prince of geographers, confessed that he could not have written his magnum opus, "Erdbildung", without the aid and material collected and transmitted by missionaries. Mr. L. H. Morgan in his Preface of the Smithsonian Contributions to Knowledge, Vol. XVII, says: "No class of men have earned a higher reputation as scholars or philanthropists than our missionaries. Their contributions to history, ethnology, philology, geography and religious literature form their enduring monument." Mr. G. M. Powell, of the Oriental Topographical Corps, in a paper read before the American Institute, 1874, says: "Probably no country has contributed so much to the geographical knowledge of this department has been so vast, varied and prolific as the investigations and contributions of missionaries."

Philology: The study of the languages of the people to be evangelized is the first work of the missionary. The successful missionary may have but a slight knowledge of the geography or the history of the country, but he can accomplish little or nothing unless he makes himself master of the spoken vernacular. Language—and that of the people among whom he works—is the
In order to make missionary effort permanent, it has been necessary to reduce to writing all languages not so reduced, and to prepare grammars and lexicons of the same in order to teach the people themselves the proper and scientific use of their own tongue. Upon this basis a literature has been built up. This is the natural and only method of missionary conquest in every uncivilized country of the world.

The cases are few, indeed, where men other than missionaries have ever mastered an unwritten foreign tongue, reducing it to writing and preparing for it grammar and lexicon. The languages so reduced by missionaries would require more space than is allotted to this part of the subject. In the first six volumes of the *Journal of the American Oriental Society* out of a total of 2,927 pages 1,215 are filled by 47 missionaries, and that, too, chiefly as to subjects connected with philology. Prof. Whitney, in his *Language and the Study of Language*, says: "The extraordinary activity of missions in Africa within a few years has directed study towards African dialects. A great mass of material has been collected and examined sufficiently to give a general idea of the distribution of races in this continent."

Next to the value of discovering and crystallizing the language of a people in a scientific classification and arrangement, is the production of a common literature in the spoken tongue. In this way dialectic differences in the language spoken by the same races in different parts of the same country have been broken down and the spoken tongue of the entire race has been unified. The philological unification of races and nations by the production of a general Christian literature in a pure form and in the spoken language of the masses of the people, has been one of the greatest scientific triumphs of the last century of modern missions. It has unified the people, made wider and more general literature possible, and opened the way for the scientific classification of the languages themselves. Comparative philology owes far more to the work of missionaries than to any other class of people. They are the masters of the science.

Ethnology: The missionary has been the discoverer of peoples. For this he was commissioned and sent out into strange lands. The limits of this article would be exceeded if an attempt were made to even enumerate and briefly describe the different races that have been introduced to the world, studied, and classified by foreign missionaries. The very work the missionary is sent to accomplish has compelled him to do this. No one else has ever had such opportunities for observation and study and no one else has been invested with this work by such a permanent incentive. Whenever a missionary hears of a strange or unknown race or people, there is immediately drawn. He cannot cease from his study until he learns all he can of the physical, mental, social, moral and religious characteristics of the people and the history of observation and operation. The chances are that he will take up his residence in the midst of that people and give his life to understanding them, in order that he may adapt to their peculiar conditions and needs the Gospel of Jesus Christ.

If we should eliminate from our English literature all that has been inspired and written by foreign missionaries in the line of descriptions of the peoples of Africa, Asia, South America, parts of Europe, and the islands of the world, we would quickly discover how little remains upon which we can place any dependence. The missionaries have been the collectors of data, patiently recording the facts as they observed them. It has fallen to the lot of others to collect, classify, and compare the data. missionaries have not extended, but within these he stands without a peer. The results of his studies are given to the world and from this date the most of our knowledge of the races of the world has come. Ethnology and Philology are kindred sciences, and both, in a peculiar sense, are missionary sciences, owing almost everything to the discoveries of the missionaries.

Natural History and Geology: The contributions of missionaries to the sciences of Geology, Botany, and Natural History have been considerable. By the aid of native students, collections of specimens have been made, some of which can be found in the best known museums of the world. A missionary prepared the best existing work on the flora of Syria; and the collections of fresh-water mollusks of the Hawaiian Islands, which stands to-day as the most valuable collection of its kind in the world, was made by a missionary. The same is true of a collection of the moths and butterflies of Japan. Another missionary received an honorary degree for distinguished researches in geology in the Balkan Peninsula.

Archaeology: Missionaries not a few have become archaeologists of no little repute. There are few museums in Europe and America that do not possess objects discovered by missionaries, and in many cases these finds have been interpreted by them and given to the world. In the last fifty years a greater part of the archaeological discoveries of Asia Minor have been made by missionaries who have been residents there. As discoverers of rock inscriptions, ancient cities, coins, cylinders, manuscripts, and a variety of other objects, all of which have a distinct archaeological value, the missionaries have a place uniquely their own.

They have had facilities for doing this that is enjoyed by no one else. With their residence in the country, having under their tuition a large number of young men in collegiate training, and compelled in the regular routine of their operations to cross and recross the country by infrequent routes, it is not strange that they should learn of the existence of inscriptions, manuscripts, and ruins, and should take pains to visit the same and make careful record of all they discovered. As soon as the people become acquainted with the fact that the missionaries are interested in these things, they bring all sorts of portable antiquities to them and report to them the location of what cannot be transported. In multitudes of cases antiquities which the natives, for superstitious reasons, conceal from a stranger seeking them, are freely exhibited to the missionary, who is well known and the only trusted. There is no doubt that the contributions of missionaries to the archaeological wealth
and knowledge of the world are large and valuable.

**Medical Science:** The practice of medicine has occupied an important part of the missionary operations of all the regular Mission Boards. This has been especially true in the pioneer work of those societies. For the Medical Department of mission operations the best trained physicians, both men and women, have been sent out. They have opened dispensaries, built, and equipped hospitals, and conducted a general medical practice among the natives of all countries where mission work has been carried on during the last century. The initial development of the modern science of medicine in China, Japan, India, Turkey, Africa, and the Pacific Islands has been accomplished almost entirely by the missionaries.

Medical schools have been opened and conducted according to modern principles of medical and surgical practice, and both South and North countries have been taught the science and are to-day, by the thousands, practising the same among their own people. To accomplish this, text-books have been prepared in the vernacular of the people for the use of students not familiar with the English language. In connection with the mission hospitals, training classes for training native nurses have been opened and they constitute one of the popular departments of medical work.

Medical missionaries, owing to their location among hitherto unknown people and in climate conditions unknown to the medical fraternity of England, Germany, France, and the United States, have made extended and continuous observations upon diseases that are entirely unknown in the modern medical world. Medical work has not infrequently led to scientific conclusions as we witness to-day in the application to English and American infirmities of the modern science of medicine in China, Japan, India, Turkey, Africa, and the Pacific Islands. Medical missionaries have advanced the science and amassed valuable results that have preceded the consul, minister, and ambassador. When later the official representative of the missionary's government has been conciliatory and liberal. They have been eminently successful. It is well known that not a few of the common remedies now in constant use in our most civilized countries were discovered by medical missionaries and given to the world. Medical work has initiated the social-settlement method of representative of the missionary's government.

**Social Science:** The social-settlement method of reaching certain classes of people in our larger cities is the application to English and American life of foreign missionary methods of operation that have been in vogue ever since that work began. The foreign missionary enters upon the work for life, and is usually located in a section of country where he is expected to devote his life to the civilization, education, and Christianization of the native peoples all about him. The missionary establishes his home among these people to whose elevation he has given his life. He does not a few years, but a span of years, the life of the people, with their politics, and their ambitions and trials. They learn to recognize him as one who is interested in whatever interests them and as suffering under conditions that bring afflictions upon them. In famine and plague, in war, pestilence, and massacre, the missionary remains at his post, and not infrequently lays down his life in his endeavor to shield and help the people whom he serves. Civilized countries seldom witness such examples of self-surrender carried to such conclusions as we witness to-day in actual operation in every country of the world where foreign missionaries are operating. They were the pioneers this method of reaching a people, and by them the science has been marvelously developed during the past century. In the face of what missionaries have done and are accomplishing by this means, our American and English operations seem but child's play, and the results obtained almost too meager for record. Missionaries are the masters of this science, and are in a position to demonstrate its value to the world. Because of the circumstances here outlined, questions of class, caste, poverty and wealth, employer and employed and, in fact, all questions that arise in the social life of various peoples, come before the missionaries and compel to some practical solution. They constantly aim to change for the better all social conditions and so to set in operation forces that will remain after the missionaries have preceded the consul, minister, and ambassador.

Dr. James S. Dennis embodies extended observations and research in this line in his masterly work, *Christian Missions and Social Progress.* He says: "It may not be in harmony with the current naturalistic theories of social evolution, yet it is the open secret of missionary experience that the humble work of missions is a factor in the social progress of the world which it would be intellectual dishonesty to ignore and philosophic treason to deny. The entrance of missions into the modern life of ancient peoples is a fact of the highest historic, as well as ethical and religious, significance. They are the heralds of a new era of beneficent progress to the less favored nations of the earth. The social scientist who discounts Christian missions as of no special import is strangely oblivious to a force which has wrought with benign energy and unexampled precision in the production of the best civilization we have yet seen in the history of mankind."

**Diplomacy:** The missionaries' part in shaping the diplomatic relations now existing between the civilized and the non-civilized countries of the world has been large and important. In most cases missionaries have preceded the consul, minister, and ambassador. When later the official representative of the missionary's government appeared, the missionary of long residence, not infrequently well versed in the language and conditions of the country, has been compelled to advise, in no small measure, the official representative of his country and, in fact, shape the diplomatic relations of the two countries. The Protestant missionary influence in the settlement of diplomatic questions, and in the drafting of treaties for the control of future relationship, has always been conciliatory and liberal. They have been from the beginning, in all countries to-day, as trusted advisers of the accredited representatives of the great powers in delicate international questions. As much of the diplomatic influence of the missionary has been in the role of confidential adviser, it would be most undiplomatic to make any public record of the same, but it is safe to state that the work of the missionaries in
aid of wise and conservative diplomatic relations among the nations of the world, civilized and uncivilized, has been emphatic and invaluable.

Philanthropy: The missionary's legitimate profession is, perhaps, that is primarily philanthropic in any limited use of the term. He does not take up his residence in distant, unknown countries for the purpose of distributing charity to the people who seem to be in need of it. And yet, during the last century of modern missionary enterprise, not one class of philanthropic institutions have been called upon to administer larger relief funds than have the foreign missionaries. Famine and pestilence, plague, war, and massacre have, at different times, swept over countries where missionaries have been living, and they were the only trustworthy people upon the ground both able and willing to distribute the funds that were raised abroad for the relief of the suffering people. Consequently, missionaries have so systematized methods of benevolence as to reduce a minimum of the paupering effect of the same upon the people who received the aid. They have undoubtedly demonstrated to the world that relief funds can be distributed to a people desperately in need, while leaving upon the people the impression that the aid received has been earned by their own labors. The science of philanthropy must be studied largely from the standpoint of the experiences of the foreign missionary, in order to be understood in its widest and most important relations to the moral character of the people and the fullest development of industry and thrift.

Comparative Religion: One of the chief studies of missionaries has been the religions of the people among whom they live. As they have been sent out to change the religion of the people, and to induce them to accept Christianity in place of that which they had, it is clear that, in order to accomplish this, the missionaries must understand, as far as possible, their present beliefs and religious practices. All missionaries have not given the same attention to the investigation of the religious beliefs of the people for whom they are to work. But many of the most intelligent and observing of the missionaries of the leading Boards of the world, by a careful study of whatever religious literature the people possessed, by making painstaking observations of their religious customs and habits and by continual inquiries of the most intelligent devotees, have gathered together a mass of thoroughly trustworthy material that has become the basis for the general science of religion.

There are many tribes and races whose religion would not be known now were it not for the information given by missionaries living among them. The fundamental beliefs and practices of the great ethnic religions would be little known today were it not for the mass of information furnished by the missionaries who have given a lifetime, even to the second and third generation, to a thorough and exhaustive study of these religions, upon the ground and amid their daily practices. The results of these studies and observations have been published in missionary, scientific, and popular magazines, and other periodicals. It is not exaggeration to say that missionary literature has done more for general education, in the line of the religious practices and beliefs of the people of the world, than all other sources combined. In fact, it is impossible for this subject to be studied now with any degree of thoroughness and accuracy without the free use of the material furnished by the missionaries. One cannot but glance through missionary articles in the magazines, as well as books they have published, to be convinced of the measureless value of the contributions of foreign missionaries to the science of Comparative Religion.

But space will not permit a citation of individual cases. In short, educated missionaries in all parts of the world during the last century have been active and valued contributors to nearly every scientific subject that has attracted the attention of the scholars of the last century.

General History: In contrast to Luther, John Knox, in the first confession of the Church of Scotland (1560), recognized the message of missions. In 1647 the General Assembly recorded the desire for "a more firm consociation for propagating it (the Gospel) to those who are without, especially the Jews," and on the occasion of the Scotch expedition to Darien (1699) the assembly counseled the ministers who went with it to labor among the heathen. Ten years later, the Society in Scotland for Propagating Christian Knowledge was founded, having chiefly in mind the needs of the Highlands. Later it enlarged its scope somewhat to include work in America, Africa, and India. In 1724 Robert Millar, a Presbyterian minister in Paisley, published a History of the Propagation of Christianity and the Overthrow of Paganism in India, with the prayer as the first word means for the conversion of the heathen world. Then came the first Secession in 1733, followed by that of the Relief Church in 1761, while, in the meantime (1746), there went from Scotland and England to America the plea for united prayer.

The effect of Carey's sermons and the formation of the BMS and the LMS was manifest at once in Scotland, when two societies were organized in 1796, the Scottish (later called the Edinburgh) Society and the Glasgow Society. In both of them the Established and Secession churches were represented, and to the Scottish Society belongs the honor of sending out the first martyr missionary of modern times, Peter Greig, a gardener, and a member of the Secession Church of Donibristle, Inver Keithing, who was murdered in the Fulah country in West Africa. The same society undertook a mission to the Tartars at Karass, in the Caucasus. This was stopped by the Russian Government, and the Society turned its attention to India and the West Indies, afterward, in 1836 and 1847, transferring them to the Established and the United
churches, and passing out of separate existence. The Glasgow Society joined the Scottish Society in Sierra Leone, but not successfully, and in 1821 it withdrew from work in Kaffraria, which developed well. At the time of the Voluntary Controversy (1837) two presbyteries were formed, of which one, in 1844, joined the Free Church, and the other, in 1847, the United Church.

1. Missions of the Established Church of Scotland: When the Scottish (Edinburgh and Glasgow) Societies were carrying on their work, the not very effectively, a strong effort was made, led by Thos. Chalmers and Dr. Inglis, to secure action by the Church. In 1825, Dr. Inglis, then convener, succeeded in persuading the General Assembly to appoint a foreign mission committee of ten men, but little interest was aroused until in 1829, when, largely through the influence of Chalmers, Alexander Duff was sent to Calcutta as head-master of an educational institution of which Dr. Inglis had succeeded in persuading the Assembly to approve. From that time the interest increased. In 1835 the Mission established by the Scottish Society in Western India by John Wilson, J. Murray Mitchell, and others was taken over by the Church Mission, and on the earnest appeal the work was continued in Madras.

In 1843 came the Disruption, and the pure body of missionaries, led by Duff and Wilson, gave in their allegiance to the Free Church. Thus the Established Church found itself with a large amount of property and one missionary—a lady. As soon as possible others were sent out, and before long the institutions in the three presbyteries were running on the same basis as before. In 1874 the Church commenced work in East Africa, and in 1878 in China.

1. Asia: From 1845 until the Mutiny, the work in India was confined chiefly to the three centers in Calcutta, Madras, and Bombay. Then, however, as with other societies, a new impulse was given, and stations were opened in the Punjab, and afterward in Independent Sikkim, on the border of Tibet. This last work has been carried on in close affiliation with a missionary association of the four Scotch universities. The work at Bombay was afterward given up, and the educational work of higher grade developed in Calcutta, Madras, and Sialkot.

In 1863 (1863) showed 17 stations, 623 native workers (aside from teachers), 17 stations, 2,309 communicants, 3 colleges, and 185 schools, with 5,187 scholars.

2. Africa: In response to the earnest appeal from Livingstone the Established Church started a mission at Blantyre, south of Lake Nyasa, in 1874. Other stations near by were also occupied, and in 1854 Domasi and Zomba, while in 1901 work was commenced in the Kikuyu country, British East Africa. In the African mission special emphasis is laid upon medical and industrial work. The report shows 25 missionaries (not including wives) of the Church Board and 38 of the Women's Association, a total of 64; 189 native workers, 857 communicants, 6 schools in Alexandria, Beirut, Constantinople, Smyrna, and Salonica; 10 in all, with 2,337 scholars.

Church of Scotland Women's Association for Foreign Missions: In 1837 a Ladies' Association for Foreign Missions, including Zenana work, was organized. This afterward became "The Scottish Ladies' Association for the Advancement of Female Education in India," then, in 1883, "The Church of Scotland Ladies' Association for Foreign Missions." More recently the above title has been adopted. The Association works in connection with the Church Foreign Mission Committee, employing 49 missionaries, 17 assistants, 134 native teachers, 28 Bible readers, 9 nurses, and 59 other agents. It has 3,316 pupils on the rolls of 51 schools, and carries on medical work in all the fields occupied by the Church Missions.

2. Missions of the United Free Church of Scotland: A. The Free Church: Immediately upon the organization of the new body the missionaries set about reestablishing their work. A merchant in America sent Duff £500, a physician in Calcutta gave him £200, and other large gifts followed, and by January 4, 1845, he had a larger number of school buildings than before, free of debt, and more pupils—1,257. As gifts came to him he sought to share them with the mission stations in Bombay and Madras, but they were not needed. Even before reaching Scotland on his furlough, Wilson wrote: "We must enlarge our work," and a new mission was established at Nagpur, to which a British official in Madras gave £500. Soon after (1844) the Committee took over the South African Mission of the Glasgow Society. At a time when the resources of the Free Churches were strained to the utmost to provide for home needs they gave more liberally to missions than ever before. The very next year the gifts of the Free Church alone exceeded those of the entire church before the Disruption by about £3,000, and there has been a steady advance since.

In India, to the work in Calcutta, Bombay, and Madras was added Nagpur, with Hilsop College, on a par with the institutions in the other cities, and a work among the Santals of Bengal. In Arabia the Society took charge of the Keith Falconer Mission at Aden (Shelby Oldham). In Africa it added to its work in Kaffraria, received from the Glasgow Society, work in Natal and among the tribes of Lake Nyasa. It established a mission in Syria, shared with the Presbyterians of Canada work in the New Hebrides, while not neglecting work at home, on the Continent of Europe, among the English communities, and for the Jews in numerous cities of the Levant. In 1909 the Free Church joined the United Presbyterian Church in the United Free Church of Scotland, and the mission work of the united body was put in the hands of a committee of the General Assembly, representing each branch.

B. United Presbyterian Church of Scotland: In 1847 the Secession and Relief Churches united in the United Presbyterian Church of Scotland, with the exception of a few churches which retained their organization as the United Original Secession Church.

The first mission undertaken was that started by the Scottish Society in Jamaica in 1835, which had already developed so that the colored people inaugurated a work for their fel­lows in Africa, and helped to found the Calabar Mission on the
West Coast; and in Trinidad, where two stations were opened. The division in the Presbytery of South Africa, started by the Glasgow Society, had resulted in one section joining the Free Church in 1844, and the other, on the organization of the United Church in 1847, identified itself with that movement. The events of the Mutiny in India (1857) led the Church to open work in Rajputana and the Northwest (United) Provinces. It prospered from the beginning, and the founding of the first station, Beawar, was followed by that of Nasirabad (1861), Ajmer (1862), Todgarh (1863), Jaipur (1866), and several others. The next step was into China. A medical missionary of the UP Church worked (1862-1870) in Ningpo, and then Dr. Alex. Williamson opened a station at Chi-fu. The great work of the Church in Eastern Asia, however, has been that in Manchuria, commencing by Rev. John Ross and Rev. Joan MacIntyre in 1873. The first stations, New-chwang, Hai-chung, and Liao-yang, were followed by Mukden and several others. The work in China had proper roots given up that this might strengthen Japan also was entered in 1863, but on the organization of the United Church of Christ in Japan, in and view of the presence of so much other societies, the Church withdrew its force and focused its efforts on other fields.

I. India: The United Free Church. The five missions, Bengal (with its Santal branch), Western India, Nagpur, Madras, and Rajputana, reported (1903) 158 missionaries, 257 native workers, 28 organized churches, 114 outstations, 3,676 communicants. The educational work shows 4 colleges, with 1,871 students, and 344 other schools, 899 teachers, 17,485 scholars. The colleges are Duff College, at Calcutta; Wilson College, at Bombay; Hislop College, at Nagpur, and the Madras College. There are 21 medical missionaries, with 66 assistants, 232 hospital beds, and 24 dispensaries. Over 160,000 individual cases were treated, while the number reached by preaching was over 420,000. The mission has fallen heir to a branch of the work founded by Carey in the old Dutch town of Chinsurah, and has always been the attention paid to the preparation and dissemination of Christian literature. The best known work of these missions is the Madras Religious Tract Society, reports the issues of both societies for the year nearly 2,500,000, while £5,608 ($28,000) was realized from the sale of books.

2. Arabia: The Mission in South Arabia, founded by the Hon. Ion Keith Falconer at Sheikh Othman, Aden, in 1855, works especially among the Mohammadians of the vicinities, but has done good work for Galla captives released from the slaves. There are reported 3 missionaries and 5 native workers. The work is still, to a considerable degree, pioneer in the Kaffir, and is attended by the organization of a church. The school, with its 16 pupils, is a nucleus for good; but the great evangelistic work is in the medical department, in which 4,600 patients were treated by the 2 medical missionaries and 2 assistants, while the audiences at the medical services numbered nearly 20,000.

3. China: The Manchuria Mission suffered heavily during the Boxer outbreak, but chiefly in the general disturbance of work. The missionaries in Hai-cheng, Liao-yang, Mukden, Kui-yuen, Lie-ling, and Hai-mai-tai, reached New-chwang in safety, while those in Ashio escaped to Vladivostock. The two native pastors escaped, the several evangelists and a large number of the native Christians lost their lives. Churches, hospitals, mission houses, schools, and a great many private homes were destroyed, and there was much suffering, as well as complete disorganization of work. With the return of peace the missionaries were able to go back to their stations, and, after two years, the work has resumed its normal character. In the fall of 1902 the severe trial of the Church was followed by a special spiritual revival, with a new spirit of consecration.

The report (1903) shows 37 missionaries, 97 native workers, 12 organized churches, 15 stations, 5,994 communicants. The college at Mukden has 106 students, including 16 in the theological department, and in 38 other schools there are 349 pupils. In the medical department the 10 missionaries and 8 assistants treated over 4,000 cases, reaching nearly twice that number by their services.

The future of this mission will be watched with much interest as Russian power in Manchuria grows stronger.

4. Africa: (1) South Africa, including 3 missions: Kafiraria, Transkei, and Natal. The first Scotch missionary to South Africa accompanied a Glasgow colony in 1821, and started work on the Chumie River. In less than two years five Kafirs were baptized, and the work progressed, new stations being occupied, the most important being Lovedale (1830). In 1844 came the transference of the work to the Free Church, and every department received a new impulse. The Kafir war (1846) broke up the mission temporarily, but a new start was made and encouraged. The Transkei Mission is still unorganized. Kafiraria, south of the Kei River, while that on the North was called the Transkei Mission. Still later (1847), in response to a special appeal from Dr. Duff, who visited the field, another mission was established in Natal. Among the important stations are Kafiraria, Lovedale, Burnhill, Fire, Macfarlan, etc.; Transkei, Cunningham, Paterson, Buchaan, etc.; Natal, Pietermaritzburg, Impolomeni, Gordon Memorial, etc.

The best known work of these missions is that of the Lovedale institution, which has furnished the model or the inspiration for a great many efforts in mission lands to develop industrial training in the Christian communities. Its principal, Rev. Robert Stewart, D.D., has been a leader in this department of mission activity. Lovedale, however, is but a mere industrial school. It is a college and a theological seminary as well, and being distinctively non-sectarian, it is a great power in all the mission fields of South Africa. The kindred institution at Clifton, in the Transkei Mission, was established at the earnest request of the natives, who themselves contributed £4,500 for it.

The three missions reported (1903) 96 missionaries, 146 native workers, 28 organized churches, 32 outstations, 14,895 communicants.
12,066 communicants, 64 schools, 7,130 scholars.

In 1839 the Free Church sent some missionaries to Syria, who located at Shweir in the Lebanon, and developed a considerable educational work in the schools under the auspices of the United Presbyterian Church, but especially representing the Scotch Synod. To some extent the hope that the West Indies would conduct this work has been realized, but the control of it came into the hands of the Scotch Synod, and in the union with the Free Church it became a part of the united work. The first missionaries were made welcome by the native chiefs, reduced the language (Efik) to writing, established schools, and despite the fact that the section is one of the hardest for evangelistic work in Africa, there has been good success. There are (1903) 41 missionaries, 38 native workers, 8 organized churches, 13 outstations, 750 communicants, 32 schools, with 611 scholars.

There is a training institution, with 114 pupils, and medical work is represented by 2 physicians, 4 assistants, and 4 dispensers.

The Free Church reports as its share of the work of the Scotch Synod 37 missionaries, 29 native workers, 8 organized churches, 207 schools, with 15,765 scholars. There is a training institution, with 114 pupils, and medical work is represented by 2 physicians, 4 assistants, and 4 dispensers.

The first work of the United Presbyterian Church in 1835 was on the island of Barbados, and in the union of 1847 organized a mission in Jamaica. Later stations were opened at Arouca and San Fernando. There were (1903) 4 missionaries, 1 native pastor, 4 churches, 168 communicants, 30 schools, with 262 pupils. The Lovedale Institute has 830 pupils, and the Blythwood 291. Synod 4 missionaries, 2 native pastors, 3 churches, 20 native workers, 8 organized churches, 13 outstations, 750 communicants, 32 schools, with 611 scholars. There is a training institution, with 114 pupils, and medical work is represented by 2 physicians, 4 assistants, and 4 dispensers.

The work commenced in Jamaica in 1835, and the United Presbyterian Church in 1847 was to take over from the Scottish Missionary Society in Central Africa. Livingstonia Mission: Headquarters, Kondowi, a more eligible site. The mission extended to Bandawe, Karonga, and particularly into Ngoniland, among a tribe of Bantus. Notwithstanding the wild character of the people there has been exceptional success in the work. There were (1903) 32 missionaries, 4 native workers, 7 organized churches, 2,027 communicants, 207 schools, with 15,765 scholars. The medical work is more fully developed than in the other African missions, and with excellent results.

New Hebrides Mission: Here the United Free Church reports as its share of the work of the Synod 4 missionaries, 2 native pastors, 3 churches, 7 outstations, 156 communicants, 30 schools, 348 scholars.

West Indies. (1) Jamaica: The first work of the United Presbyterian Church in 1847 was to take over from the Scottish Missionary Society the work commenced in Jamaica in 1835, and which had already developed until four stations were occupied. The work suffered from pestilence, hurricanes, etc., and for some little time was not pressed, owing to the demands in other fields. With the impulse to work in West Africa, there came new life into the mission, and the report (1903) shows 37 missionaries, 29 native workers, 64 organized churches, 22 outstations, 12,066 communicants, 48 schools, 7,130 scholars. There is a complete church organization, including 6 presbyteries, and the work is scarcely foreign mission work, except in its history.

(2) Trinidad: This island was first occupied in 1835 at Port-of-Spain. Later stations were opened at Penal and San Juan. There were (1903) 4 missionaries, 1 native pastor, 4 churches, 688 communicants.

In 1839 the Free Church sent some missionaries to Syria, who located at Shweir in the Lebanon, and developed a considerable educational work in the schools under the auspices of the United Presbyterian Church, but especially representing the Scotch Synod. To some extent the hope that the West Indies would conduct this work has been realized, but the control of it came into the hands of the Scotch Synod, and in the union with the Free Church it became a part of the united work. Roman Catholic and heathen countries. It was, however, the first Society to appoint a special agent for Japan, Mr. Robert Lilley, who served there for ten years, and it has taken a prominent share in the arrangements by which the three Bible Societies of England, Scotland, and America carry on the work there conjointly.

The circulation for 1902 was:

More than half the entire distribution was in China, 562,609, the great majority being portions. Next to China came India, 112,089; Japan, 48,944, while in Germany, 56,213 were distributed, and in Spain, 33,281.

SCOTTISH EPISCOPAL CHURCH, Foreign Mission Agency: Formerly the Episcopal Church of Scotland, now becomes a joint agency for the Church of England Missionary Societies, but upon the consecration of Bishop Cotterill as Bishop of Edinburgh the contributions of the churches in the seven Scottish dioceses were devoted to missions in India and South Africa through their own Society of Foreign Missions of the Scottish Episcopal Church, the new form of their "Association for Foreign Missions." The SPG even went so far as to hand over to the Scottish Society contributions from Scotland over and above a fixed amount each year. This latter arrangement, however, was annulled in 1900. Bishop Cotterill, having labored as a missionary of the CMS in India for twelve years, and for another twelve in South Africa—Kaffraria—where he had been consecrated bishop, felt a peculiar interest in those two fields of his former efforts, and organized a permanent union with them. This board sends out contributions every year to Kaffraria for the general purposes of the CMS, and to the Board of the Reformed Dutch Church. In 1864 Dr. Scudder returned to America, and was pastor of prominent churches in San Francisco, Brooklyn, and Chicago. In 1887 he joined his son and daughter in Japan and here he rendered excellent service. He died at Winchester, Mass., June 4, 1895. He was a man of great abilities, of fine address, and of commanding power in the pulpit.

SCUDDER, John: Born at Freehold, N. J., September 13, 1798; graduated at the College of New Jersey in 1811, and at the College of Physicians and Surgeons of New York City in 1815. While in professional attendance on a lady in New York he took up the anteroom and read the tract, The Conversion of the World, by which he was led to give his life to the missionary work. He sailed June 8, 1819, under the ABCFM, for Ceylon. He was ordained in 1821 by the brethren of the Mission, Baptist and Wesleyan missionaries taking part in the service. In 1836 he was transferred to Madras to found a new mission with Dr. Winslow. From 1842 to 1846 he was in the United States. In 1854, his health having failed, he went by medical advice to the Cape of Good Hope. When the mission of the CMS over and above a fixed amount each year. This latter arrangement, however, was annulled in 1900. He sailed June 8, 1819, under the ABCFM, for Ceylon. He was ordained in 1821 by the brethren of the Mission, Baptist and Wesleyan missionaries taking part in the service. In 1836 he was transferred to Madras to found a new mission with Dr. Winslow. From 1842 to 1846 he was in the United States. In 1854, his health having failed, he went by medical advice to the Cape of Good Hope. When the mission of the CMS over and above a fixed amount each year. This latter arrangement, however, was annulled in 1900. Bishop Cotterill, having labored as a missionary of the CMS in India for twelve years, and for another twelve in South Africa—Kaffraria—where he had been consecrated bishop, felt a peculiar interest in those two fields of his former efforts, and organized a permanent union with them. This board sends out contributions every year to Kaffraria for the general purposes of the CMS, and to the Board of the Reformed Dutch Church. In 1864 Dr. Scudder returned to America, and was pastor of prominent churches in San Francisco, Brooklyn, and Chicago. In 1887 he joined his son and daughter in Japan and here he rendered excellent service. He died at Winchester, Mass., June 4, 1895. He was a man of great abilities, of fine address, and of commanding power in the pulpit.
Avec, 1865-1876; Vellore, 1876-1877. In 1878, when Mrs. Scudder, he returned to America, after seventeen years of continuous service on the field, and took up his residence for four years in Nebraska. In 1882, returning to India, Mrs. Scudder following a year later, Dr. Scudder was stationed as follows: Arni, 1882-1885; Tindivanam, 1885-1892, building there the commodious mission house and church; Vellore 1892-1894. In this latter year he and Mrs Scudder made their second journey to America, taking up their residence for three years in New Brunswick. In 1897 Dr. and Mrs. Scudder returned to India and were again stationed at Vellore. It was in connection with this portion of the field that Dr. Scudder's last work was done. Dr. Scudder's children have, with a single exception, followed his footsteps into the ministry, and three of them into missionary service.

**SCUDDER, William W.:** Born in 1823. Died March 18, 1894. Son of Dr. John Scudder, who gave seven sons and two daughters to the missionary work in India. Coming to this country in his boyhood, he was converted during a revival in Springfield, Mass., in the winter of 1835-36. In 1839 he united with the Presbyterian church at Lancaster, Pa. Entering the College of New Jersey, at Princeton, he graduated in 1841. Then, entering the Theological Seminary at that place, he pursued the regular course of study for two years. By special permission, he devoted the third year to studies most adapted to fit him for the missionary work. In 1846 he returned to Ceylon, under appointment by the American Board, where he continued until 1851, meantime being stationed at three different places. After a brief visit to America, he sailed for India in 1852, and with two of his brothers, Henry Martyn and Joseph, established the Arcot Mission of the RCA and organized the Classis of Arcot. He remained in India for twenty-two years, diligently doing his work and occupying in turn several stations of the mission. In 1873 family circumstances demanded a return to this country necessary, and in December of that year he accepted a call to the Congregational church at Glastonbury, Conn., which he served for eleven years. In 1885, the over sixty years of age, the way being opened for a return to India, he sailed thither, labored for nine years, first at Madras, and later at Palmares, relieving Dr. Chamberlain; and then at Palkonam, as General Synod's professor of theology in the seminary in the Arcot Mission.

**SEAMEN; Missions to:** As early as the latter part of the 17th century some sermons were preached in England on behalf of work for seamen, but it was not until 1780 that a society was organized, a society called "The Bible Society," whose special field of the work, but which was made to include the navy, and become "The Naval and Military Bible Society." In 1814, prayer meetings for sailors were started in London, and in March, 1817, the first Bethel mission began to function, the first called "The Zephyr" of South Shields. The next year saw the Fort of London Society formed, and 1819 the Bethel Union Society. The Sailor's Magazine was started in 1820, yet still so strong was the prejudice against the work that even in 1828 the King was petitioned to abrogate an order by the Lord High Admiral prohibiting the distribution of tracts in the navy.

Existing seamen's missionary societies in the empire of Great Britain, distinct from local organizations, which limit the prosecution of work to their own ports, are: (1) The British and Foreign Sailors' Society (at Sailors' Institute, Shadwell, London, England), (2) The London Missions to Seamen (Established Church of England), whose operations are, for the most part, carried on aboard. Its chapels are at fifty-two English and eight foreign seaports. Local English societies for seamen are at Liverpool (formed in 1821), Glasgow, and at other ports.

Evangelical Lutheran missions to seamen are prosecuted by societies with headquarters in Scandinavia, was found in 1875, and lain the foundation for the larger number of sailors for the world's mercantile marine.

The Norwegian Society—Foreningen til Evangelie Forkyndelse for Skandinaviske Sømænd i fremmede Havne (or, in English, the Society for the Gospel's preaching to Scandinavian Seamen in Foreign Harbors)—was organized at Bergen, Norway, 1864, and does an extended work.

The Danish Seamen's Mission Society also has stations in different countries, employing ordained pastors; there are missions connected with several of the Swedish and Norwegian societies; and there is a specific Seamen's Society in Finland.

**American Missions:** The first Society for Seamen in the U. S. was formed in Boston in 1812, but did not continue long. A movement was started in New York City in 1816 which resulted in 1817 in The Marine Bible Society. The Society for Promoting the Gospel among Seamen in the Port of New York, commonly known as the New York Port Society, a local organization, was formed in 1818. The work was broadened the scope of such work to include, not merely the spiritual, but moral and physical, well-being of the sailors. Its object, as stated, is to secure this "by promoting in every port boarding-houses of good character, savings-banks, register-offices, libraries, museums, reading-rooms and schools, and also the ministration of the Gospel and other religious blessings." It commenced foreign work very early, sending Rev. David Abel to Canton, China, in 1830. Since then it has extended its work all over the world, having chaplains and Bethesda in various ports of Europe and South America, India and Japan, as well as in the U. S.

There is also a Seamen's Friend Society in Boston, Mass., for a time auxiliary to the New York Society, but in 1888 the Church Missionary Society for Seamen in the city of New York represents the work of the Protestant Episcopal Church. The other societies are undenominational. Mention should be made of the extended work of the WOTC, and of a large number of Seamen's Rests and Bethel's under private management. The various tract societies also assist in furnishing libraries for use on ships. Especially since the war with Spain...
the International Committee of the YMCA has had a most successful work of this kind. The YPSC and similar organizations have also had a share in the work.

**SEBABALA:** A settlement in Basutoland, South Africa, situated at the S. of the Orange River, about 63 miles S. E. of Mafikeng. Station of the Paris Evangelical Missionary Society (1885), with (1903) 1 missionary and his wife, 31 native workers, 19 outstations, 1 place of worship, 1 Sunday school, 22 day schools, and 795 professed Christians.

**SECUHANA LANGUAGE:** Belongs to the Bantu family of African languages. It is used by the Bechuana tribes forming a large portion of the native population of South Central Africa, from the Orange River to the Zambesi. It is written of.

**SECUNDERABAD:** A military cantonment in the native state of Haidarabad, India; situated 6 miles N. N. E. of the city of Haidarabad, and covering 19 square miles of territory. The largest military station in India. Climate during rainy season very unhealthy; at other times hot, but not insalubrious. Altitude, 1,787 feet. Population (1901), including troops, 74,000. Station of the SGP (1842), with (1903) 14 native workers, 1 place of worship, 2 day schools, 2 boarding schools, and 786 professed Christians, of whom 297 are communicants. Station also of the ABMU (1875), with (1903) 2 missionaries and their wives, 3 women missionaries, 18 native workers, 1 outstation, 1 place of worship, 6 Sunday schools, 1 boarding school, 4 day schools, and 210 professed Christians, of whom 196 are communicants. Station also of the LMS (1899), with (1903) 3 missionaries, 1 woman missionary, 36 native workers, 3 outstations, 3 places of worship, 1 Sunday school, 8 day schools, 1 boarding school, and 368 professed Christians, of whom 213 are communicants.

**SECUNDERDA:** A town in the United Provinces, India, situated 5 miles N. of Agra; contains many historical remains, among which is the tomb of the Emperor Akbar (1566), a grandson of Baber, Turkish conqueror of India. Station of the SGP (1842), with (1903) 1 missionary and his wife, 28 native workers, 1 place of worship, 9 day schools, 1 industrial school, 1 orphanage, and 484 professed Christians, of whom 76 are communicants.

**SEFULE:** A village in British Central Africa, situated in the Barotsi region, about 15 miles N. E. of Nalde, on the chain of hills bordering the Barotsi plain. Station of the Paris Evangelical Missionary Society (1886), with (1903) 3 missionaries and 1 dispensary. Some write the name Selufo.

**SELANGOR:** A state in the Malay Peninsula belonging to the group of Federal States under British protectorate. It lies south of Perak, and has an area of about 500 square miles of territory. The capital is Kuala Lumpur. Station of the PB, with (1900) 3 missionaries and their wives and 2 women missionaries. Station of the SGP, with (1903) 2 missionaries.

**SELEPENG:** A settlement in the Bechuanaland Protectorate, South Africa, situated on Fati River, about 22 miles N. W. of Francistown station on the Bulawayo Railroad. The people belong to the Barahote tribe, who are somewhat inclined to move the sites of their villages, to the discomfort of missionaries, whose homes are less portable. Station of the LMS (1899), with (1903) 1 missionary and his wife, 1 Sunday school, 11 native workers, and 487 professed Christians, of whom 115 are communicants.

**SELWYN, George Augustus:** Born at Hampstead, England, in 1809; died, April 11, 1878. Studied at Eaton; graduated at Cambridge University in 1831. He was the fine vigor of his preaching, that made him one of the most successful boat race in 1829. He was ordained deacon in 1833, and took the curacy of Boveney; ordained priest in 1834; became curate of Windsor in 1839; was consecrated Bishop of New Zealand in 1841; received the degree of D.D. the same year, from both Cambridge and Oxford; and on his see December 26, 1841. He early saw a great truth, too often neglected by missionaries, which he later expressed in this form: "The surest way to spread the Gospel to the uttermost parts of the earth is by building up the Colonial churches as missionary centers." His whole heart was in the work to which he was called, and he became at once a tower of strength for the evangelization of New Zealand and all the surrounding regions. When he preached his farewell sermon before leaving England, his words deeply impressed a boy of fourteen who was present, named John C. Patteson. In 1855, when Bishop Selwyn returned to Auckland, after a visit to England, he had with him, as a missionary, the fruit of that early sermon in the person of Mr. Patteson, afterward the martyr Bishop of Melanesia.

Bishop Selwyn arrived at Auckland in 1842, and in 1843 he established there St. John's College for the education of a native ministry. On the voyage out he had spent much of his time in compiling from the Rarotonga, Tshiti, and Maori New Testament a comparative grammar of these three dialects. He was, therefore, somewhat prepared to supervise the work of educating a native ministry. In his farewell sermon before leaving England, he had said: "The surest way to spread the Gospel to the uttermost parts of the earth is by building up the Colonial churches as missionary centers." His whole heart was in the work to which he was called, and he became at once a tower of strength for the evangelization of New Zealand and all the surrounding regions. bishops at the Lambeth Conference, in 1867, which he attended. While from his social position, talents, and accomplish ments he might have commanded the highest ecclesiastical appointments, he chose the obscurity, peril, privation, and drudgery of a missionary life among degraded savages for the sake of his Master. He thus spent 27 years among the heathen, content if by any means he might save some. At last, on the earnest request of the Archbishop, he accepted the bishopric of Lichfield in 1868. He twice visited the United States, and exercised a powerful influence by his impressive addresses.

In 1876 he was taken ill, was soon partially paralyzed, and continued to fall until the 11th of April, when he died, saying, "It is all light."

**SENGA**: A settlement in British Central Africa, situated in the Bwati region on the Zambezi river about 210 miles N. W. of Shesheke. It stands in a picturesque region at the point where the mountains leave the river and open to view the great Barotse plain. A great population is found in scattered villages in the region. Station of the British Evangelical Missionary Society (1898), with (1903) 1 missionary and wife.

**SENDAI**: A town on the main island of Japan, situated on the N. E. coast, 12 miles from its port, Shigasaki, and 200 miles N. of Tokio. It is the chief city of the region. Population (1898), 83,325. Mission station of the ABMT (1882), Asian Church (1887), FCMBS (1891), ME, PE, and RCSUS, with all together (1903) 26 missionaries, men and women; 12 women missionaries, 70 native workers, 55 outstations, 23 places of worship, 51 Sunday schools, 4 boarding schools, and 2,366 professed Christians. The girls' boarding school of the RCUS was destroyed by fire in 1902, but has been rebuilt.

**SENEGAL**: A French colony in W. Africa, lying between the Sahara and the river Gambia. With its adjacent inland protectorate it has an area of about 90,000 square miles, and a population of about 1,600,000. It is a fertile country, rich in natural products. There are 4 communes and 9 "circles," all represented in the French parliament by one deputy. There is a transport service on the Senegal River for 400 miles from Saint Louis. The Negro races, which form the bulk of the population, include the Wolofs, very black, brave, and superstitious, mostly Mohammedans, inhabiting most of the territory bounded by the Senegal, Faléne, Gambia, and the seacoast; the Serers, akin to the Wolofs, and on their southern borders; the Sankoles of the Middle Senegals, akin to the Mandingas, of a wild disposition and an important element in the population. Senegal has 520 miles of railway and 1,400 miles of telegraph lines. The principal language of Senegal is the Wolof, which is the language of commercial intercourse, and has grammars, dictionaries, etc.; the related Gereres, the Mandinga, and the Fulah. The French Protestant Church and the Roman Catholics have mission work in Senegal.

**SENEGAMBIA**: A territory or sphere of influence of France in Western Africa, lying on the upper Senegal River and the Niger. The northern regions were formerly included in French Sudan, a terminology no longer used. A permanent delegate, representing the French home government, resides at Kayes. A railroad is being constructed from Kayes eastward to the Senegal.

**SENGELPAT**: See Chengalpat.

**SEONI**: A town in Central Province, India, situated in the Hoshangabad district, 24 miles S. W. of Hoshangabad. Seoni contains large public gardens, a fine market-place, and a handsome tank. Climate healthful; temperature moderate. Population, 16,000. Station of the United Original Secession Church (1872), with (1903) 1 missionary and his wife, 5 native workers, 1 outstation, 16 places of worship, 2 day schools, 1 boarding school, 1 orphanage. Also station of the FFMA (1890), with (1903) 3 missionaries, one of them with his wife; 1 woman missionary, 9 native workers, 2 outstations, 3 places of worship, 5 Sunday schools, 4 day schools, 1 industrial school, 1 dispensary, and 1 orphanage. Some write the name Sioni Malwa.

**SEOUl** : Capital of Korea, situated about 30 miles E. by N. from its port, Chemulpo, on the right bank of the Han river, in a hollow surrounded by rocky fortifications. The city was founded by the first king and founder of the present ruling dynasty of Korea, who chose the site for the beauty and strength of its situation. The city is shaped like an irregular oblong, and lies lengthwise in a valley whose trend is from northeast to southwest. The dimensions of the city are roughly stated, 3 by 24 miles. On the north is a succession of magnificent granite hills, culminating in granite peaks 3,500 feet high. On the south side is a chain of hills reaching the height of 1,506 feet. The most striking work of art in the landscape is the city wall, which crosses river, plain, and hills, and climbs the mountains on the south, encircling the whole city proper. At intervals are massive and imposing gates, all appropriately named, and through the largest of which the great highways, starting from the royal palace, run to all parts of the kingdom. In the military system of the country this walled city is the center of a group of fortresses which, before the days of rifled cannon, were strong and trustworthy. The scenery from the walls of the city, and indeed from many points in the city, is magnificent, and the natural situation is one of the best for health and safety. An affluent of the Han river, with branches that run into nearly every part of the city, traverses Seoul from east to west, and is utilized as a drain and for washing clothes.

To most travelers the aspect of Seoul is uninteresting, shabby, and squalid. Nevertheless, the gay costumes, full of varied color, clean and brilliant with starch, and the peculiar gloss which the Korean women contrive to confer upon the male garments, make the streets in fair weather wear a very bright and animated appearance. The houses are about 8 or 9 feet high, built of stone and mortar, and mostly roofed with tiles. The windows are under the eaves. A long street, about 200 feet wide, divides the city into nearly two equal portions. In the northern half are the walled enclosure containing the king's palace, and the more important public buildings. The main entrance gates face the south and are three in number. From the bottom of the hill, a principal gate runs a street 60 feet wide into the main square, intersecting it at right angles and dividing the northern section of the city into eastern and
western quarters. This point of meeting of these two streets is regarded as the center of the city. Here stands an imposing pavilion, the Cheng-kah, or belfry, in which is hung a large bell over seven feet in height, which is rung every morning and evening. It is sounded from the bell of the Great South Gate as wide as the main street. It was at the corner of this bell-tower that the regent, in 1886, erected an inscribed stone denouncing as traitors to their country all Koreans who were friendly to European intercourse.

Another feature in this center of the city is the rows of large warehouses, two stories in height, the lower portions of which are divided into small shops opening into a central court, instead of into the streets. These large storehouses are not private property, but are owned by the trading guilds, which enjoy a notable monopoly. Along most of the main streets there are thousands of peddlers’ booths erected, at which most of the retail trade of the city is done. These shabby-looking, temporary structures greatly mar the appearance of the great thoroughfares. Outside of the buildings in the royal enclosure there are three palaces—two belonging to the king and one to his father. The dignity of the several mansions is shown in the relative amount of land and gardens around them. The offices of the foreign ministries, or government departments, are small houses, differing but slightly from the better sort of dwellings. Since the residence of foreigners in Seoul a number of the native dwellings have been altered into good-looking houses, the European influence making itself felt in the Chinese and Japanese quarters.

Along most of the main streets there are thousands of peddlers’ booths erected, at which most of the retail trade of the city is done. These shabby-looking, temporary structures greatly mar the appearance of the great thoroughfares. Outside of the buildings in the royal enclosure there are three palaces—two belonging to the king and one to his father. The dignity of the several mansions is shown in the relative amount of land and gardens around them. The offices of the foreign ministries, or government departments, are small houses, differing but slightly from the better sort of dwellings. Since the residence of foreigners in Seoul a number of the native dwellings have been altered into good-looking houses, the European influence making itself felt in the Chinese and Japanese quarters.

The population within the walls is estimated at 260,000, with about 50,000 living outside the walls; in June, 1892, Seoul was evacuated by the king and court, and the Manchu general. In 1653 Hawel and his fellow-Dutchmen visited Seoul as shipwrecked prisoners, finding other Hollanders there. In 1777 Christianity entered Seoul through some members of the embassy to and from Peking; in 1801; in 1839, shepherded 9,000 believers, and was decapitated September 21 in that year. In March, 1801, nine French priests were executed on the river flats in front of the city, and on March 25 from the French war-vessels, “Désoullées” and “Tardis,” piloted by an escaped French bishop and native Christians, the flag of France floated, causing a cessation of all business for several days. The French invasion took place in October, when two native Christians were beheaded and their blood poured into the river over the place of the anchorage of the French ships. The riot and attack on the Japanese Legation July 28, 1882, the coup d’état and battle of the Chinese and Japanese troops December 4 to 7, 1884, the funeral of the ex-queen, a spectacle of unprecedented magnificence of the Korean sort, on an autumn day of 1899, are among the notable historic events in Seoul. The following missionary societies have establishments in Seoul (1884), with (1900) 10 missionaries and their wives and 4 women missionaries, 20 native workers, men and women; 43 places of worship in the district, 10 day schools, 1 boarding school, 1 dispensary, 1 hospital, 1 printing house, and 1,430 professed Christians; ME (1885), with (1903) 2 missionaries and their wives, 6 women missionaries, 8 native workers, 3 places of worship, 7 outstations, 1 printing house, and 624 professed Christians, of whom 453 are communicants; SPG (1896), with (1905) 3 missionaries, 2 places of worship, and 37 professed Christians, of whom 13 are communicants; MES (1896), with (1901) 2 missionaries and their wives, 2 women missionaries, 2 native workers, 9 outstations, 7 Sunday schools, and 262 professed Christians. The YMCA has established an agency here (1901).

SERAMPUR: A city in Bengal, India, on the banks of the Hugli, some 15 miles above Calcutta, who on the opposite (west) bank of the river. Serampur was a Danish station, but in 1846 all the possessions held by the Danes in India were ceded to the East India Company. It was to Serampur that Carey, Marshman, and Ward, the great Baptist missionaries of the early part of the 19th century, retired; and there, under the Danish flag, they found an asylum from the opposition of the English authorities at Calcutta, who, until the intervention of Parliament in 1814, were unwilling that missionaries should find a foothold in their possessions. The new charter contained a clause legalizing the residence in India of missionaries and their families. The Baptist missionaries not only worked diligently in preaching the Gospel in Serampur and surrounding towns, but established a press, printed books and tracts, assembled their translators from many parts of India, prepared and published versions of the Bible in the principal languages of Hindustan, and even in Chinese. These versions were afterward found to be of comparatively small value, owing to the haste with which they were prepared, and the inadequate facilities enjoyed for correct translation into the idiom of the various Indian tongues; but nothing can better illustrate the diligence, zeal, and energy which have made the Baptist Mission at Serampur famous in the annals of modern missions than the fact that they were made at all. A church, college, schools of higher grade, and a good library were established at Serampur, and the mission is still in active and successful operation. The wide influence of this mission has been well summarized as covering the following points of development.

India owes to the Serampur mission, besides the first translation of the Bible into many of its northern dialects, the first newspaper in Bengali; the first steam-engine, paper-mill, and large printing press; the first efforts at education of native girls and women, the first savings bank, and many other benefits directly or indirectly the
result of the labors of Carey, Marshman, Ward, and their associates.

The Servians: A kingdom in Europe, bounded by Austria on the north, Rumania and Bulgaria on the east, Turkey on the south, and Bosnia on the west. In general, the surface is mountainous and covered with dense forests. The Danube and several other large rivers drain the country. Its maximum area is 18,855 square miles, of which over half is under cultivation. Cereals and grapes are the principal products.

The independence of Servia was secured by the Treaty of Berlin (1878), and since January, 1889, it has been a kingdom. The legislative authority is exercised by the king, together with the national assembly, which is composed of deputies elected by the people, indirectly and by ballot. Personal liberty, liberty of the press and conscience are guaranteed. Population in 1902, 2,600,000.

The Servians, or Serbs, belong to the most spirited of the Slavonic races, and are noted for the love of freedom and bravery. Poverty is rarely seen, for even the poorest have some sort of freehold property. Thus 97 per cent. of the country is under cultivation. The Greek Church is the state religion of Servia, and the alphabet invented by Cyril in the 6th century was adopted. The Church-Slavonic and Servian, with the elements of the Bulgarian, from which it differs, however, considerably in vowel sounds. Many Turkish, Greek, and Albanian words have entered into the formation of the modern Servian language. Under the influence of their ecclesiastics and their ecclesiastical literature, the Servians in the beginning of the 19th century used in their literature a language called Slavonic-Servian, a mixture of Church-Slavonic and Servian, with the elements of the former predominating. Thanks to the genius and efforts of Verk Karadjitch, a self-made man, the Servian alphabet was modified to a certain extent to suit the pronunciation of the spoken language of the people, which was raised to the dignity of a literary language. In this way the Servian orthography became the most phonetic of all Slavic orthographies, and, in spite of the opposition the reforms of Karadjitch met with, they were officially sanctioned by the government in 1868, and accepted by all the Servians who use the Cyrillic alphabet. Karadjitch translated also the New Testament into the common language of the people, while some years later Danitchitch, a well-known Servian philologist and a follower of Karadjitch, did the same thing for the Old Testament, and both these versions have been accepted and are used by the British and Foreign Bible Society.

SERVIAN LANGUAGE: The Servian, which belongs to the Slavonic branch of the Aryan family, is spoken in Servia, Bosnia, Herzegovina, Montenegro, Croatia, Slavonia, Dalmatia, Albania, and is more akin to the Russian and Wend than to the Bohemian and Polish. It is rich in vowels, and free from the accumulation of sound clusters.
of consonants which render the other Slavonic tongues so harsh to the ear of a foreigner. Its sound is very soft, and one of the best Slavonic scholars of our age, Prof. Schafarik, in comparing the different dialects of the Slavonic family, makes the following remark: "Servian song resembles the tone of the violin; Old Slavonic that of the organ; Polish that of the guitar. The Old Slavonic in its psalms sounds like the loud rush of the mountain stream; the Polish like the bubbling and sparkling of a fountain; and the Servian like the quiet murmuring of a streamlet in the valley." The Servian is written with the Slavic (Cyrillic) Alphabet, and is beginning to possess a modern literature of its own.

**Sesheke**: A settlement in British Central Africa, situated in the S. W. part of that region, on the Zambesi River, about 400 miles W. of Salisbury in Rhodesia. The climate is very trying to Europeans because of malaria. Station of the Free Evangelical Missionary Society (1885), with (1903) 2 missionaries, one of them with his wife; 1 woman missionary, 1 place of worship, and 1 boarding school.

**Seychelles**: A group of islands in the Indian Ocean; a dependency of the British colony of Mauritius. Missions are carried on by the SPG (1843), with 2 missionaries; 1 district teacher and 260 Christians in native churches. At Mahé the CMS has a mission station, and works, mainly by its schools, among the negroes.

**Shafesbury**: A settlement in the N. W. of Canada, situated on Peace River, in the S. W. part of Athabasca. Station of the CMS (1888), with (1903) 11 missionaries, 1 native worker, 1 day school, and 26 professed Christians, of whom 10 are communicants.

**Shahjahanpur**: A town in the United Provinces, India, situated in the Rohilkhand division, about 55 miles N. W. of Sitapur. Manufactures much sugar. Population (1901), 76,458, of whom 37,000 are Mohammedans and 36,000 Hindus. Station circuit of the ME, with (1903) 2 missionaries and their wives, 1 woman missionary, 42 native workers, 5 places of worship, 1 boarding school, 1 orphanage, 15 day schools, 29 Sunday schools, and 985 professed Christians.

**Shanghai**: The most important emporium in China, situated on the Hwang-pu rivers, the latter emptying into the Yangtse at Shanghai, give it communication with the rest of the world. The first railroad in China was opened in 1876 between this city and Wu-sung, at the mouth of the river; the Chinese Government bought it the ensuing year, tore it up, and sent the material to Fort-843. It has been rebuilt, nevertheless, and has in use since 1898. From this port is carried on the most important trade in China, the value of it having risen from 65,000,000 taels in 1868 to 240,000,000 taels in 1901. It is the center for the export of tea and silk.

Along the water front are vessels which carry goods to and from the interior. The streets are narrow and paved, the houses, a tit of brick, and sloped, eating-houses, and the usual temples and Buddhist shrines common to all Chinese cities are found here in abundance, but none of the public buildings or temples are peculiar to this city any more than to other cities of the empire. The population is estimated at 420,000, but probably the estimate is low. The climate varies greatly—from an intense heat in summer to freezing cold in winter, and great changes of temperature in 24 hours are common in the spring and autumn. The mean temperature, like that of Rome, is 59° (F.). Heavy rainfalls and floods in the near are limited from September to May the climate is delightful.

(2) The Foreign Settlement is a municipality, and is divided into the English (and American) and French concessions, is governed by municipal officers, and there is a mixed court where cases involving natives and foreigners are tried before both Chinese and English officials. Spacious docks line the river front for three miles. The streets are broad, overhung with trees, lighted with electric light, and nearly all the comforts of modern civilization are to be found. The streets are divided by broad streets and wheelbarrows, provide abundant means of transportation, and horses and equipages of the latest European style are to be seen on the streets, especially along the Bubbling Well Road, the fashionable drive. Hundreds of native boats ply for hire on the river, and with the shipping, the steam-tugs, and small boats, the water presents a most animated appearance. The land of the concessions belongs really to the Emperor of China, to whom a mere nominal rental is paid. The domestic and foreign mails are handled at seven post offices—at the consulates—in connection with the Chinese customs. Clubs, libraries, museums, in addition to the various mission establishments, present attractions to the visitor. Telephone service is provided. The great northern line of telegraph was connected with the settlement in 1871, and the city is now in cable communication with the rest of the world. The first railroad in China was opened in 1876 between this city and Wu-sung, at the mouth of the river; the Chinese Government bought it the ensuing year, tore it up, and sent the material to Fort-843. It has been rebuilt, nevertheless, and has in use since 1898.

From this port is carried on the most important trade in China, the value of it having risen from 65,000,000 taels in 1868 to 240,000,000 taels in 1901. It is the center for the export of tea and silk.

According to the census of 1890, the population of the municipality, exclusive of the French concession, was 168,129; of the French concession, 94,722; the foreigners numbered only 4,985, of whom 444 were in the French quarter. Such a wide range of nationality is seldom found in any Oriental settlement; while the bulk of the foreign population is British, American, French, and German, yet twenty-one other nationalities are represented in varying numbers. Together with the estimated population of the native city, the total population of Shanghai is (1901) 620,000.

Shanghai is the literary center of the foreigners in China. Here is published the best English daily paper, together with a considerable number of the missionary publications in China. At the Presbyterian Mission Press books are printed in
Chinese—not only religious, but scientific; and the Chinese Religious Tract Society issue from here their periodicals in Chinese, and the Chinese Recorder and the Messenger are published in English. On account of its central location, the beauty of its situation, the hospitality of the foreign community, it has been the place of meet ing for the great Missionary Conferences.

It's importance as a center for religious work was early appreciated, and a larger force of missionaries, or representatives of more denominations, probably not met with elsewhere in China. Mission societies now represented at Shanghai, with the last available statistics, are: LMS (1843), CMS (1845), PE (1848), Seventh-Day Baptists (1847), MES (1848), FN (1850), CIM (1854), WU (1858), FCMS (1891), and German General Protestant Missionary Society (1886); altogether these societies now (1903) have 106 missionaries, men and women; 130 native workers, men and women; 46 places of worship, 6 hospitals, with dispensaries; 3 printing houses, and 189 professed Christians. The BFBS and the ABS have each a center for their Bible work. The YMCA (1898) also has an agency here, with (1901) 2 men and their wives and a Young Men's Christian Association.

SHANGPOONG: A village and district in Assam, situated on the Jaintia Hills, Station of the Welsh Calvinistic Missionary Society, with (1902) 1 missionary and his wife, 31 native workers, 57 outstations, 57 places of worship, 52 Sunday schools, 57 day schools, and 2,683 professed Christians, of whom 677 are communicants.

SHANG-TSING: A town in Kiang-si, China, situated 68 miles S. E. of Nan-chang-fu. The Taouist pope resides here. Station of the CIM (1898), with (1902) 1 woman missionary, 5 native workers, 2 places of worship, 1 day school, and 36 professed Christians.

SHAN STATES: A name given to some of the hill provinces which lie on either side of the boundary between Burma and Siam, and are tributary to the one or to the other. They are inhabited by the Shans, Laos, and other tribes.

SHANS: The Shans are now principally found on the mountain plateaux between the Salwen River and the great Burman plain. They are one division of the great Tai family, which extends from Tonquin on the east to the confines of Assam on the west, and from Southwest China on the north to the Gulf of Siam on the south.

The kingdom of Siam is the only independent state, Nan Chao, had arisen, which maintained as the first half of the 7th century a strong Tai dominion over a vast area which included the Shan country, and as far west as the borders of the Chines Empire.

The Shan language, however, maintains itself in the interior mountain regions. In the Shan province of Siam, the language is still spoken. It is the language of the people that mission work must be carried on in the Burmese language. The Shan language, however, maintains itself in the interior mountain regions.

The migration of the Tai into Burma was by the branch which we know under the name of Shans, and probably began about 2,000 years ago, at which time the Chinese commenced to push their conquests south of the Yangtze-kiang. Shan and Burman tradition places the beginning of the migration still earlier, and this tradition may be correct, tho of no political importance, as the restlessness of the Shans has always led them to frequent changes of residence.

But the wars of Chinese aggression must be responsible for the great migration which found its first home in the valley of the Shweli River, and thence spread over plateaux southwest of China, and across the part of the plateau of Burma to Assam, and to the headwaters of the Irawadi. As the oldest branch of the Tai family, the Shans have always been called Tai Long, or Great Shans, by the other branches of the family.

In the 7th century, out of this migration grew a large Shan kingdom, with a capital at Mong Maw Long in the Shweli valley. This kingdom maintained itself for several centuries with varying degrees of prosperity, until Anawratta, the Burman King of Pagan, by a victorious military career, established Burman supremacy for a time over much of the territory of the Shan princes.

After the death of Anawratta, the Shan kingdom regained power, and later, in the times of Sam Kham Hpa and Sam Long Hpa, extensive military campaigns increased the territory of the kingdom to a size that it has never attained before. The prosperity of the Shan kingdom soon began to wane. From the 14th to the 16th century there was a gradual decadence of power. Distant dependencies shook off its suzerainty.

Wars with Burma and China were frequent and weakened the central authority, and in the confusion many of the stronger principalities became semi-independent. In 1694 the Shan royal line ended. From that time Shan principalities became tributary to Burma, and Shan history merges into Burmese history.

It was an evil day for the Shans when Burman suzerainty was established. In the Shan principalities west of the irawadi and the mountains bordering on the eastern side of the Burman plain, successful efforts to Burmanise the people by the destruction of Shan books and the enforcement of study of the Burmese language in the monasteries were put forth by the Burman government for many decades. The Shan lingers as a patois m any country places in these regions, but the Burmese language has become so thoroughly the language of the people that mission work must be carried on in the Burmese language. The Shan language, however, maintains itself in the interior mountain regions.

Another cause of decadence was the frequent desolation of both border and interior principalities by war. The Shans, always restive under Burman rule, engaged in frequent rebellions put down by the Burmese with merciless cruelty, and also in civil wars fostered by Burman policy. These wrought such a great loss of life that the interior principalities became sparsely populated, except in a few important centers. With the decline in population, for a century the wave of Kachin migration has moved from the Himalaya region southeastward as far as Hsien and Mong-Mit, and has driven the Shans from much mountain country between Burma proper and China.

The Shans show their Chinese affinities in their physical characteristics and language. They have the Chinese type of face. Their complexion
Christian literature prepared. The prospect is on the south side of the Bay of Hang-chau, about warm and somewhat malarious. Surrounded by rapid development.

The Shans are a thrifty people. They are good agriculturists, but they excel in trading, for which purpose they visit Burma, Shan, and Western China. In this way they supply themselves with food and merchandise not obtainable in their mountainous country. In time of peace they are cheerful and hospitable, but in time of war they are cruel and vindictive, not only seeking to put to the sword all men of a hostile region, but slaughtering male children who fall into their hands.

The Shans are zealous Buddhists. Current legends about the introduction of Buddhism are manifestly untrustworthy. The looser Buddhism of the Northern Vehicle was doubtless the first form of that religion to be introduced into Upper Burma from Northern India. At the time of Anawratta's succession to the throne of Pagan, if Buddhism was so exceedingly corrupt in doctrine and in practise, it must have been as bad if not worse in the more northern Shan kingdom. Anawratta became a zealous religious reformer and introduced the stricter doctrine and practice of the Southern Vehicle. Wherever Burman influence has predominated in the Shan principalities, the people have become strong Buddhists, proud of their religion and tenacious in adhesion to it.

This strong adherence to their ancestral religion makes mission work among them slow and difficult. Buddhism, as held and practised by them, does not have much unpleasant restraining power over their lives. Every male child must, by religious law and by inflexible custom, be placed for a time in a monastery, where the tenets of Buddhism are diligently instilled into his mind. His mind thus becomes tenacious in adhesion to it.

After his first ten years of service in Persia, Shedd, John H.: Missionary of the American Presbyterian Board (N.). Died, Urmia, Persia, April 12, 1895. The first years of Dr. Shedd's missionary life were spent in pioneer work. His youthful energies seemed to know no limit in the tasks assumed. He shrunk from no hardships. Given some special work to be done requiring vigorous action, self-denial, large resourcefulness, and he was pretty sure to be in it. His tours in the wild, rugged mountains of Kurdistan year after year marked well his character as a missionary, resolute, devoted, wise. Restricted as to times and seasons between the pathless winters and the fever-breeding summers, he would push in at the earliest possible moment of spring, abandoning his mule when he found the roads still closed, and with a Kurd as a porter to carry his quilt and a small change of clothing, he marched upon the snow crust, over the perilous passes and down through the valleys, visiting the little congregations, counseling and strengthening them in the name of the Lord Jesus. And scarcely had he returned home when he was ready to move with his family back again to the outer bounds of the mountains for the summer, drawing the native workers around him for additional instruction and training.

After his first ten years of service in Persia, Dr. Shedd returned to the United States.
furlough. There he received a call to a professorship in Biddle University, which he accepted in view of conditions of health in his family which forbade his returning to the mission field. In a few years he threw all his energies into the freedman's work.

Upon his return to Persia he was put at the head of the college at Urmia, taking a large share, at the same time, in the supervision of the church work. In both these relations his remarkable abilities for organization found ample scope. He came to be looked upon by the native preachers as a leader whom they could safely follow. On one occasion, when taunts were freely flung at the native Protestants because they lacked a bishop or head, one of the foremost pastors hurled back the answer, "Tell them we have in Dr. Shedd priest, bishop, and patriarch." His revised Confession of Faith and Manual of Church Worship and Government are a monument to his thorough study and broad-minded views of the needs of the nascent Church of Christ in Persia.

Dr. Shedd's last year of service will be remembered by his associates as one of the most important in his life in connection with his conspicuous efforts in organizing and carrying through the Missionary Conference in Hamadan. In his comprehensive outlook upon the Persian field, with his bright faith in God's gracious purpose for the redemption of that land to Christ, he conceived it of pressing importance to gather a representative work of the missionary workers to study the divine leadings. The high standard of spiritual interest and power which characterized the deliberations of the conference more than met his expectations. Out of his gratified soul he wrote at the close, "All are full of faith that God is to bless this land. There is an uplift in all our hearts toward a closer union with our Lord."

SHEFAMER: A village in Palestine, Asiatic Turkey, situated about 7 miles S. W. of Acca. Station of the CMS (1899), with (1903) 2 women missionaries, 1 day school, and 1 dispensary.

SHEIKH OTHMAN: A village in the southwest part of Arabia, 16 miles from Aden, and within the British lines. It is on high ground, and is used as a residence for escape from the intense heat of the town of Aden. Station of the UFS, with (1903) 2 missionaries, one with his wife; 8 native workers, 2 places of worship, 1 boarding school, 1 dispensary, 1 hospital, and 7 professed Christians.

SHELLA: A small town of 5,000 people in the Khazia hills, Assam, which gives name to a district of the mission of the Welsh Calvinistic Methodist Society, with (1903) 2 missionaries, one with his wife; 32 native workers, 23 outstations, 37 places of worship, 34 Sunday schools, 34 day schools, and 1,631 professed Christians, of whom 614 are communicants.

SHELMAN: A village in the Lebanon, Palestine, Turkey, situated about 10 miles S. by E. of Beirut. Station of the British Syrian Mission Schools (1858), with (1900) 2 women missionaries, 2 native workers, 2 outstations, 1 day school, and 1 boarding school.

SHEPSTONE. See NORTH AND SOUTH SHEPSTONE.

SHERBORO ISLAND: An island on the W. coast of Sierra Leone, West Africa, about 70 miles S. of Freetown. Station of the CMS (1822).
History and Origin: In earlier times Shi'ite doctrines were by no means confined to Persia. Under the Caliphs we find them again and again asserting themselves in Arabia, Egypt, and Mesopotamia. But whenever this occurred it was on a small scale. It is not too much to say, therefore, that Persia is the original home of Shi'ite belief, and that the enmity subsisting between Sunnites and Shi'ites is the continuation of the ancient hostility between Arab and Persian (Greeks and Arians—which may be compared with Greek and Barbarian) on the one side, and on the other, Persian and Turk (Iran and Turan), who, in the Persian traditions, have always been mortal enemies. These feelings were still more excited on both sides, and especially on that of the Persians, when the Arabian conquest of their country (642-643) compelled them to save their lives by outwardly professing Islam. Furthermore, skepticism and mysticism are natural to the Persian character, but alien to Arabian conservatism and devotion to the literal interpretation of the Koran and Tradition. It is no wonder, therefore, that the two races have developed differences in credo.

Another historical cause of the schism between Sunnites and Shi'ites may be found in the rivalry between the Hashimites and the Ommayites, house of Ommayah and that of Hashim. Husein's descendants, and there gradually grew up the belief that Ali should have succeeded Mohammed. He was the rightful successor, and this does not in the least affect the claim of the Caliphs to have succeeded him. The Sunnites hold that Abu Bekr, Omar and Othman, each in turn, became "Vicegerent of the Apostle of God" (generally abbreviated into Vicegerent-Khalifah—and corrupted in English into Caliph). The Shi'ites, on the other hand, hold that these three men usurped the position which belonged to Ali. The Shi'ites think it a sacred duty, therefore, to curse bitterly the memory of the first three Caliphs, and to refuse to acknowledge any Caliph except Ali himself. After Ali's death, his authority was transmitted, they hold, to his sons: Hasan and Husein, and so on through the line of their descendants. But they style Ali and his eleven successors, not Caliphs, but Imams—"the word Imam denoting a leader in religious worship. The twelve Imams are: 1. Ali-ul-Riza; 2. Hasan; 3. Husein; 4. Ali-ul-Asghar (the less); 5. Mohammed-ul-Baqir; 6. Jafar; 7. Musa; 8. Ali-ul-Riza; 9. Mohammed-ul-Jawwad; 10. Ali-Akbar; 11. Hasan-ul-Khadim; 12. Mohammed-ul-Mahdi."

It may be remarked in passing that rigid Shi'ites regard the government of the Shah of Persia as a usurpation, holding that all temporal and spiritual power should be in the hands of the Imam in this technical sense, and that of the Imam in this technical sense, and that of the Imam in this technical sense. But this development was not clearly evident until some generations after Ali's death.

The more moderate Shi'ite party, which is that now prevailing in Persia, and with which this article deals exclusively, gradually grew in numbers and influence until it became supreme in Persia in the 10th century of the Christian era. The Mongols in the 13th century at first showed no inclination to interfere with the religious views of the conquered Persians. Mohammed Khudabandeh (1303-1316) professed himself a Shi'ite. A period of depression afterward ensued, but Shah Ismail I., the descendant of the seventh Imam, Musa, founded the Safevi dynasty in 1499, and was a warm supporter of Shi'ite views. His war with Selim I. of Turkey was undertaken to avenge the slaughter of some 40,000 persons for rejecting the Sunnite in favor of the Shi'ite creed. The other sovereigns of the Safevi line supported the Shi'ite faith as the established religion of the country. The Afghan conqueror, Mahmud, was a Sunnite, and Nadir Shah, who declared the Shi'ite faith as the established religion of the country. The Afghan conqueror, Mahmud, was a Sunnite, and Nadir Shah, who, in his turn, became "Vicegerent of the Apostle of God" (generally abbreviated into Vicegerent—Khilafah—and corrupted in English into Caliph). The Shi'ites, on the other hand, hold that these three men usurped the position which belonged to Ali. The Shi'ites think it a sacred duty, therefore, to curse bitterly the memory of the first three Caliphs, and to refuse to acknowledge any Caliph except Ali himself. Sunnites, and any one falsely claiming such descent is liable to very severe punishment. The proper dress of the
devotees. More highly honored by the Shi'ites than by the Sunnites is green, or at least their turbans are of that color, whereas in Persia the

The proper dress of the
shades of green differ, according to the sect to which the wearer belongs. The standard color of the Sunnite is black, that of the Shi'ite is green; but both

The Shi'ite movement may, from an intellectual point of view, be regarded as an Aryan revolt against a Semitic faith forced upon the people of Persia at the point of the sword. Islam is utterly destitute of proof, and the Persians are naturally intellectual and skeptical, so that the same time very much inclined to mystical and pantheistic conceptions, like their brethren, the Aryans of India. Mysticism, increasing superstition, credulity, and fanaticism have played an important part in the history of the Shi'ite system. It was largely opposition to the 'orthodox' doctrines upheld by the Ommayad Caliphs that led the Persians to ally themselves with the Hashimite partisans of Ali. It was convenient to protect and to develop the Manichæan, Dualistic, Gnostic, Pantheistic, and other doctrines that still lingered in the East when Islam appeared under the form of an Aryan school of thought. Thus the strong political party, which was gradually formed to maintain the claims of Ali and his house, became committed to alliance with this whole medley of doctrines; and hence we find that the person most revered under the name of Ali is rather a mystical character than the historical person of the name. This will be especially noticeable in examining the views of the extreme Shi'ite sects.

To the ordinary Mohammedan profession of faith, "There is no god, but God, Mohammed is the Apostle of God," the Shi'ites often add the words "and Ali is (God's appointed) governor." Theoretically Mohammed should be accounted superior to Ali, but practically Shi'ites have put Ali in his place. Ali is invoked in Persia twenty times more frequently than Mohammed.

Obliged to make the pilgrimage to Mecca at least once in his life, if at all possible, the pious Shi'ite, when prevented from doing so, visits instead the supposed tomb of Ali at Najaf, or that of Husein at Kerbela, or that of Ali Riza at Mashhad, and their festivals are of great importance to the Manichæans. The Shi'ites observe many other festivals than those celebrated by the Sunnites. Thus the "Feast of Sacrifice" (Id-i-Kurban), the Shi'ites devote the greater part of Moharram, to mourning for the deaths of Hasan and Husein. On the tenth day of that month mournful recitations (Taziyehs) descriptive of that sad scene are given before great crowds of people in all places where the Shi'ites are to be found in any numbers, and the wailing and beating of the breast which then take place are very moving, even to non-Muslim spectators. Religious fanaticism is easily excited on such occasions, and outbursts against Babis, Jews, and Christians are liable to occur. In Bombay the police have to take extreme care to prevent the Sunnites and the Shi'ites, both of whom have processions on that day, from attacking one another.

In recent times, and especially during the last few years, the Mullahs in Persia have endeavored to increase the number of festivals observed by the Shi'ites, with a view to keep up their interest in their faith. Yet none can be said to be generally recognized, except the two already named. There is also the great secular festival of New Year's Day (Nawruz), during which the Mullahs in the new school of thought now enter upon their duties. This is celebrated with pomp in Persia, and attempts have been made to give it a religious significance as the day on which Mohammed is said to have named Ali as his successor. But it is a national Persian festival of great antiquity, and the effort to connect it with Islam cannot be said to have succeeded.

The Sheikh-'l Islam has not nearly the same authority and influence among the Shi'ites that the holder of the same position possesses among the Sunnites. In Persia every large city has such a functionary, but he is in many cases completely overshadowed by some other Mujtehid, not infrequently the Imam of the chief mosque in the city.

Properly speaking, Islam recognizes no atonement for sin. But the instinctive yearnings of the human heart are too strong to permit this great lack to remain entirely unsatisfied. The Shi'ites, therefore, hold that the deaths of Hasan and Husein were an atonement for the sins of true believers. This is a matter of no little importance, as it enables the Christian missionary, when dealing with Shi'ites, to find common ground on which to show the need of an Atone

From the number of Imams the Shi'ites call their religious community that of the Twelve. The term Shi'ah, applied by their enemies to them, means a sect. Shi'ites, nevertheless, do not regard its use as an insult, and sometimes use it themselves as more convenient and more generally understood than the longer term. The Sunnites derive their name from their reverence for the traditional law (Sunnah), yet it is a mistake to fancy that the Shi'ites reject tradition. They reject the six great collections of tradition accepted by the Sunnites, but in their stead acknowledge the following five others: 1. The Kafi of Abu Jafer Mohammed. 2. The Mau la Yastahzirah-ul-Fakih. 3. The Tahzeb of Sheikh Abu Jafer Mohammed. 4. The Istibaar of the same author, and 5, the Nahj-ul-Belaghah of Sayyid Razi. Morality in all Mohammedan lands is low, and
it would be hard to prove that the Shi'ites are in this respect worse than the Sunnites. But the former have two especially demoralizing doctrines which the latter repudiate, at least in words. These are the dogma known as Kitman and the doctrine of the legality of temporary (mut'ah) marriages.

The doctrine of Kitman (concealment of faith) is that a man is justified in concealing and even denying his belief, whenever confession would lead to the loss of his life. In Persia, the term used to denote such a marriage is Sigheh. A great part of the wealth of the highest of the Mohammedan clergy in the places of pilgrimage is obtained by officiating at these marriages. To realize in any degree the moral degradations of Islam in this respect, we must try to force ourselves to imagine the higher clergy of the Church drawing their income in considerable measure from sanctioning such unions, especially with the pilgrims visiting such cities. In Persia, this term is used to denote such a marriage. The doctrine of the legality of temporary (mut'ah) marriages.

Sects: Even in Ali's lifetime a Jewish convert to Islam, named Abdullah Ibn Sauda or Ibn Sabs, coming from Southern Arabia, proclaimed Ali to be an incarnation of the Deity. In 653 this man's followers, in spite of Ali's denunciation of their doctrines, were numerous enough to cause sedition in Bagra, Kufa, and Syria, whence the sect spread to Egypt, as well as to Persia. Ibn Sauda taught that Mohammed, like Christ, would come again, and that, meanwhile, Ali was his representative. An allegorical interpretation began to be given to the Koran, and this is still a common feature with the Shi'ite party. Even in very early times the Shi'ites divided into a number of sects, each holding one or other of Ali's descendants in peculiar reverence, but all agreed in looking forward, with large numbers of Sunnites also, to the coming of a Mahdi. In this sense, the term used to denote such a marriage is Sigheh. A great part of the wealth of the highest of the Mohammedan clergy in the places of pilgrimage is obtained by officiating at these marriages. To realize in any degree the moral degradations of Islam in this respect, we must try to force ourselves to imagine the higher clergy of the Church drawing their income in considerable measure from sanctioning such unions, especially with the pilgrims visiting such cities. Shi'ite religious law. Consequently, very large numbers of women make their living by contracting such unions, especially with the pilgrims visiting such cities. In Persia, this term is used to denote such a marriage. The doctrine of the legality of temporary (mut'ah) marriages.

Sufism can hardly be said to be connected with Islam at all, since the views of those who hold to this mystic and pantheistic system of thought—so far as it can be called a system—are utterly opposed to Mohammedanism. It has had very extensive influence in Persia, so much so that nearly every thoughtful and educated Persian is a more or less Sufi. Such men outwardly profess to be Shi'ites, but, in confidence, acknowledge that they absolutely disbelieve every tenet of Islam.

Less important Shi'ite sects are (1) the Akhbaris, who treat the doctrine of the resurrection and many others as merely allegorical; (2) the Ali-alihas, who deny Ali and worship him as God; (3) the Sheikhis, who hold what is known as the Ekm-e-Rahi (fourth column) doctrine, to the effect that there must ever exist an intermediary between the twelfth Imam (the Mahdi) and his votaries. This Imam is said to have vanished most mysteriously in 874 and the popular belief is that he disappeared down a well, where he still lives. A message sent by him out of the well in 1892 was so universally believed, that, in accordance therewith, the Shah of Persia was obliged to abolish the Tobacco Regie monopoly, which he had granted to foreign companies. But it is believed that after his disappearance in 874 the Imam Mahdi once more appeared in 940, only to vanish again for an indefinite period. During his "lesser disappearance" (874-940) he communicated with the faithful by means of four persons in succession, each of whom bore the title of Bab (Gate). Mirza Ali Mohammed of Shiraz, founder of the modern Babist sect (1844), claimed the title of Bab in this sense. This sect is, therefore, an offshoot of the Sheikhi sect from the then leader of whom (Sayyid Kasim of Resht) Mirza Ali Mohammed at first received instruction. But persecution has rendered the Babis so hostile to the Shi'ites that it is hardly
correct to regard them as any longer Shi'ites themselves.

Missionaries and Shi'ites: It remains for us to inquire what is the attitude of the Shi'ite sect toward Christianity, and what way the Gospel may be most effectively brought to bear upon them.

Like all Mohammedans, a Shi'ite holds that the Gospel was at one time intended to be, as the Koran styles both the Old and New Testament, "a light and a guidance to mankind." But he believes that it has lost its light and become a stumbling-block by the very nature of the Christian doctrine of the Trinity, to show that its foundation is belief in the Three Persons of the Godhead, and to convince the inquirer of sin, the need of an Atonement, and (2) the possibility of an Eternity in the Presence of God. In preaching the Gospel to the Shi'ites, it is necessary to urge Muslims to accept the Bible. It may be shown from the Koran itself that the Bible could not have been corrupted before or during Mohammed's time, while the existence of versions more ancient than that time proves that the Bible we now have is identical with that which the Koran mentions. Strangely enough, the Mohammedans endeavor to adduce in support of Mohammedan claims. It is necessary for the missionary to prove that such passages do not bear the meaning thus attributed to them.

In all controversy, however, it is important to remember Bengal's rule: "Never enter upon controversy without knowledge, without love, without necessity." The truths that are contained in the Mohammedan faith should be frankly and thoroughly acknowledged and taken for a basis of agreement, and, in some sort, a foundation for what has to be proved; but it should be pointed out that these truths are taught in the Bible and borrowed from it by Islam, and that Christianity alone can reveal how much deeper such truths are than the Muslims conceive.

Besides the great truths of the Unity of God, the After-life. Future rewards and punishments, the fact of Revelation and others held by all true Muslims, the Shi'ite faith also recognizes (1) the proof of an Atonement, and (2) the possibility of an Incarnation in some sense. In preaching the Gospel to Shi'ites, therefore, the Christian doctrine should be shown to inculcate both these truths, but in a manner more logical and more in accordance with the moral sense of humanity than their own mystical speculations. The St. Paul longing after union with God can be shown to be provided for in the Gospel, which teaches how man may become, not identical with God, but a child of God, through spiritual union with Jesus Christ. Above all it is necessary to endeavor by prayer and teaching, under the guidance of God's Holy Spirit, to convince the inquirer of sin, the heinousness of which no Muslim realizes from the teachings of his own faith. The missionary should endeavor to remove misconceptions as to the nature of the Christian doctrine of the Trinity, to show that its foundation is belief in the Unity of God. Other misconceptions also must be met by careful reference to Holy Scripture. It must be clearly shown that we abhor idolatry and priestcraft, at least as much as Muslims do, and that we have no sympathy whatever with corruptions of Christianity.

In brief outline this is the method which experience in the Persian field has shown to be the best for the missionary to follow in preaching the Gospel to the Shi'ites. In life and word Christ must be exalted that He may draw men into Himself.

In studying the Shi'ite doctrines all so situated as to be able to do so should consult the original sources, e. g. The Koran in the original, the five collections named above; the History of Ibn ul Athir; Kitab ul Wusikh, and Shi'ite commentaries and controversial works in general. For the Babi sect, one should consult the Ikan, the Bayan, and the Kitabi Alba. General readers will find the following useful: Muir (Sir W.), The Caliphate; Osborne (Major Ducie), Islam under the Khilafat of Baphshad; Sel (E.), The Faith of Islam; Hughes (Rev.), Dictionary of Islam; Tisdall (Dr. W. St. Clair), The Religion of the Peninsula (S. P. C. K.).

SHILLONG: A town in Assam, India, situated in the Khasia Hills, 42 miles E. by S. of Gauhati. It is an administrative center and a charming spot, commanding extensive views of the Brahmaputra valley. Station of the British and Foreign Unitarian Association, with (1900) 1 native worker, 1 place of worship, 1 day school, and 1 Sunday school. Station also of the Welsh Calvinistic Missionary Society, with (1903) 1 missionary and his wife, 2 women missionaries, 441 native workers, 80 outstations, 36 places of worship, 59 Sunday schools, 70 day schools, and 4,192 professed Christians.

SHILOH: A village in the southern portion of Basutoland, South Africa, about 62 miles N. E. of Aliwal North. Station of the Paris Evangelical Missionary Society, with 13 native workers, 3 outstations, 1 place of worship, 1 Sunday school, 4 day schools, 978 professed Christians, of whom 562 are communicants. Some write the name Siloe.

SHIMOGA: A town in Mysore, India, situated on the Tunga River, 87 miles N. E. by N. of Mangalore. Population, 12,000. Station of the WMS, with (1903) 1 missionary, 1 woman missionary, 37 native workers, 6 outstations, 7 Sunday schools, 10 day schools, 1 boarding school, and 90 professed Christians, of whom 81 are communicants.

SHINTOISM: The origin of Shintoism is involved in more or less obscurity, but the translation of the Kojiki, which may be looked upon as the sacred record and exposition of the Brahmaputra valley. Station of the British and Foreign Unitarian Association, with (1900) 1 native worker, 1 place of worship, 1 day school, and 1 Sunday school. Station also of the Welsh Calvinistic Missionary Society, with (1903) 1 missionary and his wife, 2 women missionaries, 441 native workers, 80 outstations, 36 places of worship, 59 Sunday schools, 70 day schools, and 4,192 professed Christians.

Shintoism is a religion in which nature and spirit play an important role. It has been called "the religion of ancestors and spirits." Shintoism developed in Japan and its beliefs are based on the idea that all things in nature have a spiritual presence. The practice of Shintoism is often associated with shrine worship, festivals, and rituals that aim to connect the human spirit with the divine.
The process of creation ascribed to the divine pair was as follows: standing on a bridge of heaven and looking earthward, they stirred the ocean with a long spear. From the end of the spear dropped some fecundating substance, from which sprang up the islands of Japan, and in the islands thus composed was the potency of all things vegetative and animal life. This sun-goddess married at length, spontaneously. Shintoism does not recognize a real creation out of nothing. It claims only a development. The universe is regarded as eternal. God and man and all things are of one essence. The system, therefore, is in a sense Pantheistic.

The development of the sun myth, appears in Japan as in so many other countries. The male and female deities above named produced a daughter of most resplendent beauty, represented by the sun. While this fair maiden was sulkiness to a dark cave, leaving the world in gloom. The legends represent the forlorn inhabitants of the world as having resorted to various expedients to bring her forth from the cave. Three of these appear to have been successful. One was to gather as many cocks together as possible, from all quarters, and place them near the cave’s entrance, that at the proper hour of cock-crowing their clamor might excite her womanly curiosity, and bring her out. A second expedient was to institute a dance of beautiful maidens before the cave. Becoming jealous of the praises which she heard lavished on them, she would certainly come out and reveal her charms.

Another plan, quite as successful, was that of constructing a mirror, which was so placed before the mouth of the cave as to reflect to the goddess her own beautiful form. This threefold appeal to her curiosity, her jealousy, and her vanity succeeded. She came forth, whereupon the world, and filled all nature with delight. This sun-goddess married at length, and became the mother of the whole line of mikados, and from her to the present incumbent of the throne there has never been a break; the succession for thousands of years is claimed to be complete.

There are imposing ceremonies connected with the worship of this goddess, almost wholly of a cheerful tone; and it may be said in general that all races, perhaps the Japanese, before the advent of Buddhism, had the most light-hearted type of faith. In the springtime there are still festivals designed to hail the springing of the fruits and flowers, and in Shintoism planting of sowing are performed. Here is a vocation for the Shinto priests, and one far more grateful than offering bloody sacrifices or in any way striving to appease gloomy deities. This sun-goddess, the ancestor of the mikados, is a being beautiful, and she is symbolized, not by cruelty and death, as in the case of Moloch, the fiery sun-god of the Phoenicians, but by all benign influences, and her only sacrifices are offerings of rice and fish and flowers. It is scarcely necessary to say that the original supreme deity, who never revealed himself, and of whom nothing is known, is removed very remotely from the practical interests of life, and that the great mother of the mikados is the really supreme object of worship.

Shintoism in its essence is ancestor-worship combined with worship of nature as having proceeded from the earliest ancestors of the Japanese. The Emperor is the head of the religious system as a lineal descendant from the sun-goddess. The system is a vast Pantheon of demi-gods. The names of the heroes of Japanese history, fierce warriors and successful generals, are deified by decree. A great general who won renown in the Chinese war of 1895 was given such an apotheosis by decree when he died. Every Shinto temple may thus be regarded as a sort of Westminster Abbey for perpetuating the fame of the great dead.

The literature of Shintoism is not extensive. Such as it is, it found its source in the fables and folk-lore of the earliest and rudest times. These were preserved by minstrels. In the 3d century Chinese legends were introduced, and some of these myths were committed to writing. It was in 712 that the Kojiki, or “ancient record,” was compiled. This is the sacred Bible of Shinto priests. It is also the earliest Japanese history. It is most unique in its style, resembling nothing else that has ever been published in any land. It is remarkable for the agglutination of long compound names and expressions. But although Shintoism cannot compare with Buddhism in its literature, or in its intellectual influence, yet it does not wholly neglect the instruction of the people. There is more or less preaching on ethical subjects, and the ethics thus presented are pure and salutary. Even this custom may have been borrowed from Buddhism. During the long centuries in which Shintoism and Buddhism have coexisted side by side, or rather have been more or less intermingled, the Buddhist influence has done most to promote the intellectual growth of the people, very little effort having been made by the Shinto priests, whereas, such means were immediately taken to prevent her return. The sunlight of her presence again bathed the world, and filled all nature with delight. This sun-goddess married at length, and became the mother of the whole line of mikados, and from her to the present incumbent of the throne there has never been a break; the succession for thousands of years is claimed to be complete.

There are imposing ceremonies connected with the worship of this goddess, almost wholly of a cheerful tone; and it may be said in general that all races, perhaps the Japanese, before the advent of Buddhism, had the most light-hearted type of faith. In the springtime there are still festivals designed to hail the springing of the fruits and flowers, and in Shintoism planting of sowing are performed. Here is a vocation for the Shinto priests, and one far more grateful than offering bloody sacrifices or in any way striving to appease gloomy deities. This sun-goddess, the ancestor of the mikados, is a being beautiful, and she is symbolized, not by cruelty and death, as in the case of Moloch, the fiery sun-god of the Phoenicians, but by all benign influences, and her only sacrifices are offerings of
petitioner and try his heart, is that means whatever it be, which brings a man face to face with himself in the solemn presence of real or supposed deity.

It is declared by some Japanese that Shintoism is not a religion, but simply a means of cultivating a patriotic, nationalistic spirit. The entity and bond of the system is, nevertheless, admitted to be devotion to the Emperor. The will of the sun-goddess and of the Emperor are necessarily the same. The essential requirement of the system is perfect obedience as the essence of moral conduct. But Shintoism is a religion in so far as it recognizes the relations of men to a higher power, as is shown in the fact that prayer is a resource constantly resorted to. It is offered to a supreme something, which is supposed to cherish an interest in all creatures. At funerals and elsewhere prayer is offered for the dead as well as for the living. There is in Shintoism a resemblance to the ancient cult of the Aryans, both in its dread of death and of all that belongs to death. A corpse is looked upon as polluted, and one should have as little as possible to do with it. As a sequel the Zoroastrians carried this matter so far. A corpse is looked upon as polluting, and one should have as little as possible to do with it.

Relations of Shinto to Buddhism: Buddhism entered Japan in the year 552. The Shinto levity and thoughtlessness opened the way for a system which was of a more melancholy tone and spirit, and which took a more earnest hold upon the future life. For a thousand years, according to Koderu, there existed a strange partnership between the two religions. By common consent the Shinto priests officiated at all marriages (with which Buddhist monks were supposed to be little in sympathy), while Buddhist priests took charge of the funerals, from which Shinto priests were only glad to be exempt. At the present time marriage is a civil rite only. So intimately interwoven did these two systems become, that the Government at length began to dread the influence of Buddhism, which had proved the stronger element. And in order that Shintoism, with its traditions of imperial descent and the prestige which it thus afforded, might not lose its supreme place, a decree was passed declaring it to be the religion of the State; and this is still the theory of the Government. Yet so closely had the two systems long been blended, that it is said that nine-tenths of the people consider themselves as belonging to both. Like other Oriental systems, Shintoism is easy-going, and in a negative sense charitable toward Buddhism; both have long been accustomed to represent their position by the maxim: "Men may ascend Fujiama on any side, but when once on the summit the same glorious moon is visible to all. So with the religions."

There can be little doubt that the early mythology of Shintoism exerted a disastrous influence upon the morality of the people. The legend which presents the goddesses as dancing in an almost nude condition before the cave in which the sun-goddess was hidden has presented a poor example to the generations of Japanese peasants, and one cannot greatly wonder that in decency and vice have known less restraint than in almost any other land. Under the influence of Shintoism immorality has scarcely been considered a vice. The late Dr. S. R. Brown, after years of observation, could scarcely find any element of moral restraint in the system, and was slow to accord to it the name of religion.

There can be no doubt that in comparison with this childish system of nature-worship and mere natural impulse Buddhism has been a blessing to Japan. Rev. K. C. Kurahara has summed up the beneficial influences of Buddhism in Japan as follows:

1. It has taught the people a vivid realization of future rewards and punishments—thus ministering both inspiration and restraint, and giving to life a higher dignity and solemnity.
2. It has presented a high conception of our common humanity, without caste or slavery.
3. It has enjoined a higher grade of ethics, and much more of self-restraint.
4. It taught the people temperance, even prohibition.
5. It has emphatically enjoined benevolence and pity to all beings.
6. It has stimulated an intellectual activity not known before. It has introduced philosophy and poetry, and all ornamental arts. Of this the peerless bronzes, lacquers, and the sweet-toned temple-bells are proofs.
7. The introduction of Buddhism has led to increased foreign intercourse, and has brought in its train the literatures not only of China, but of India.
8. Buddhism has given great impulse to architecture, landsaping, gardening, and all ornamental arts. Of this the peerless bronzes, lacquers, and the sweet-toned temple-bells are proofs.
9. By its support of a priestly and yet a thoughtful class, Buddhism furnished many men of leisure, who gave themselves to literature, and were promoters of a higher national culture. Were the Buddhist element eliminated from Japanese literature, there would be but little left.
10. Buddhism weakened the divine autocracy of the Mikado, and thus perhaps facilitated the introduction of the rival power of the Shoguns, yet nevertheless it exerted a powerful restraint upon cruelty and oppression.
11. It taught rulers the duty of respecting the claims of the people, and of promoting their good.
12. Confucianism has been credited with imparting to the Japanese nation a higher degree of moral earnestness than either Shintoism or Buddhism.
13. Confucianism has been credited with imparting to the Japanese nation a higher degree of moral earnestness than either Shintoism or Buddhism. To the ethics of Confucius, it is claimed, is due whatever of loyalty to government and to country has been found in public officials and the higher classes.

As to the special obstacles which Shintoism offers to Christianity, we see at once that a system which openly deifies men, blunts the sensibilities to repentance, and which represents the goddesses as dancing in an almost nude condition before the cave in which the sun-goddess is hid has been presented as a poor example to the generations of Japanese peasants, and one cannot greatly wonder that in decency and vice have known less restraint than in almost any other land. Under the influence of Shintoism immorality has scarcely been considered a vice. The late Dr. S. R. Brown, after years of observation, could scarcely find any element of moral restraint in the system, and was slow to accord to it the name of religion.

There can be no doubt that in comparison with this childish system of nature-worship and mere natural impulse Buddhism has been a blessing to Japan. Rev. K. C. Kurahara has summed up the beneficial influences of Buddhism in Japan as follows:

11. It taught rulers the duty of respecting the claims of the people, and of promoting their good.
long satisfy its adherents. The fruits already seen to result from conversion to faith in Jesus Christ are too full of moral and intellectual advancement, in twenty-five years more than all the other religions have realized in Japan in the centuries of their domination.

Shintoism

SHOHONG: The former capital of the Baman-gwato tribe of Bechuana, situated in Bechuana-land, South Africa, about 90 miles N. W. of the Shoshong Road station on the railroad. Station of the LMS, with (1903) 1 missionary and his wife.

SHUN-KING-FU: A town in Sze-chuan, China, situated about 90 miles N. W. of Chung-king-fu. Station of the CIM (1890), with (1903) 2 missionaries, one of them with his wife; 2 native workers, 2 outstations, 2 places of worship, and 25 professed Christians. Some write the name Shun-king.

SHURMAN, John Adam: Born in Westphalia, Germany, 1810. Died October, 1852. Studied at Berlin; sailed for India, July 9, 1833, as a missionary of the LMS; stationed at Calcutta, February 17, 1834. He devoted himself to the educational department and to Bible translation. With others he labored in preparing the Urdu and Hindustani versions of the Scriptures. In April, 1842, he went to Calcutta to superintend the printing of the Urdu version of the Old Testament. Returned to Benares in June, 1843, and left in October for England. He arrived at Benares February 20, 1846, on his return to his work, remaining there until his death, six years later.

SHWE-GYIN: A town in Burma, on the branch of the Si-taung River, 100 miles N. E. of Rangoon. Climate, tropical. Population, 7,519. Race and language, Burmese. Religion, Buddhism. The Karens, however, predominate in the surrounding regions. Station of the ABMU (1885), with (1903) 1 missionary and his wife, 25 professed Christians, 51 native workers, 50 outstations, 50 places of worship, 10 Sunday schools, 25 day schools, 4 boarding schools, and 5,200 professed Christians, of whom 2,165 are communicants.

SHWIFAT: A village in the Lebanon district, in Syria, Turkey in Asia, situated about 8 miles S. E. of Beirut. Station of the Miss Proctor's Schools (1885), with (1900) 3 women missionaries, 11 native workers, 2 outstations, 1 Sunday school, 4 day schools, 2 boarding schools, 1 dispensary, and 22 professed Christians.

SIAM: The kingdom of Siam lies at the southeast corner of Asia, occupying the central and
This tongue is properly a monosyllabic language, and, like the Chinese, has an elaborate system of tones, by which words otherwise identical are given different meanings. There are six tones in common use. The chief difficulties of the language for the foreigner lie in the recognition and accurate reproduction of the tones.

Religions: Two religions obtain among the Siamese peoples—Buddhism and the worship of evil spirits. The one is a historic religion, with ancient, sacred books, costly temples, a numerous priesthood, and the support of the states; the other is an unorganized worship, without literature, priesthood, or temples, but in many portions of the country, particularly among the Laos tribes, it rivals, if it does not exceed, Buddhism in its hold upon the popular mind and its influence over the affairs of life. Buddhism, as held and practised in Siam, constitutes a formidable barrier to the progress of Christianity. Simply as the ancient religion of the country, it is strongly entrenched in the popular regard. "It is not the custom of our ancestors" is often considered a sufficient reply to the best-conducted argument for Christianity. Buddhism, too, is interwoven with the whole social life of the people—scarcely a family but has or has had a member in its priesthood. Its fêtes furnish the principal opportunity for social pleasures. Vast sums of money have been invested in its temples, pagodas, and monasteries, and in support of its priests. It makes strong appeal to the self-righteous tendencies of the human heart. It operates powerfully to deaden the conscience, and to discredit the possibility of a vicarious atonement for wrongdoing.

Side by side with Buddhism, and to a large degree intermingled with it, is the religion of demon-worship. This is but one form of that Shamanism which prevails so largely in Asia and Africa. What gives it interest is the extent to
which it affects the lives of the people. The spirits or demons, some of which may be said to correspond to the elves and fairies of Western superstition, but the majority of which are believed to be in greater or less degree malevolent, are of several different kinds. Some are local genii—spirits of the forests, the mountains, the streams, the caves. Others preside over certain natural phenomena—as the wind, rain, sickness, death. A vast multitude also are spirits of deceased persons. This burden-some superstition finds its natural climax in the belief which refers misfortune or sickness to witchcraft. Persons adjudged to be witches are driven from their homes, their houses burnt, and their gardens uprooted. There are in the Laos provinces cities where the whole population consists of such persons and their families.

Potent as this demon-worship is in its influence upon the people of Siam, and especially of the Laos provinces, it is less serious than Buddhism as a hindrance to the progress of the Gospel. Disease in its various forms is largely attributed to the influence of demons, medical missionary practice does much to weaken this superstition. So does the mission school, with its rational explanations of natural phenomena. And so heavy is the incumbrance which this belief lays upon its adherents, that they are prepared to hail as good tidings a religion that promises relief.

Early Missionary History: It was as a possible door of entrance to China that Siam first attracted the attention of Protestant Christians. In 1828, Dr. Karl Gutzlaff, who had gone to Singapore under the Netherlands Missionary Society, accompanied by Rev. Mr. Tomlin of the London Missionary Society, visited Bangkok. Convinced that there was an open door for missionary effort, these brethren sent an appeal to the American churches for men to occupy the field. This appeal was brought to America by the same trading vessel which brought the famous "Siamese Twins." In response the American Board instructed the Rev. David Abeel, in 1830, and ended with his break-four months of the future king of the country. This was the Presbyterian Church (North). In 1848 the Presbyterian Board of Foreign Missions sent Rev. J. T. Jones to Siam, and made a translation of one of the Gospels. But the death of his wife compelled him to leave, and Mr. Tomlin shortly went away also.

Besides the appeal to the American churches, Gutzlaff and Tomlin had sent one also to the American Baptist Mission in Burma. It is interesting to note in this connection that the very earliest effort on the part of a Protestant for the evangelization of the Siamese was made by Mrs. Ann Hasseltine Judson, who had, by the help of a Baptist woman of Canton, translated in eight months of the Siamese tongue, and had translated it into the catechism just prepared by Dr. Judson for the Burmans, also a tract and the Gospel of Matthew. The catechism was printed (1819) on the Ark, a vessel with the opening of China proper the laborers engaged among the Chinese were withdrawn. The mission to the Siamese was maintained until 1849, when it was brought to a close by the departure of Rev. Asa Hemenway, the Board's only remaining missionary. As yet but slight results had been obtained, either by the missionaries of the American Board or by their Baptist brethren, in the conversion of the Siamese. But much had been accomplished in other directions. The missionaries, by their blameless and self-denying lives, and especially by their success in healing the sick, had won the esteem of the native community. By preaching and teaching, and by translating, printing, and distributing portions of the Scriptures and Christian tracts, they had brought the truth into contact with a multitude of minds; and especially ought we, in estimating their labors, to be mindful of the influence which one of their number, the Rev. James Caswell, was permitted to exercise when the providence of God threw into his hands the daily instruction during eighteen months of the future king of Siam.

One other of the American churches was to have a share in the work of missions in Siam. This was the Presbyterian Church (North). In 1848 the Presbyterian Board of Foreign Missions sent to Bangkok Rev. William R. Smith, and his wife. After three years of service they were compelled by the ill-health of Mrs. Buell to leave the field. The work was then suspended until 1847, when it was renewed by Rev. Stephen Mattoon and Samuel R. House, M.D. This mission continues until the present, and is now the only Protestant agency for the evangelization of the Siamese. The first convert, Nai Chune, was baptized in 1859—twelve years after the permanent establishment of the mission. In 1892 the number of church members among Siamese and Laos together was over 4,000.

In 1861 the Mission opened a new station in Petchaburee, which has now become a center of Christian influence, not only for the province in which it is situated, but also for the provinces lying to the south along the Gulf of Siam.

Another important step was taken in 1867 in the establishment of a mission to the Laos tribes. Interest in the evangelization of these tribes was first awakened through the presence in the neighborhood of Petchaburee of a large colony of Lao, whose ancestors in a time of political disturbance had put themselves under the protection of the King of Siam, who had assigned them a

laff's appeal. He labored there from 1833 until his death in 1861.

The attempt of the ABCFM to establish a mission in Siam began with the dispatch of Rev. David Abeel, in 1830, and ended with his breaking down in health, and consequent departure in 1832. It was renewed by the sending out of Messrs. Johnson and Robinson, who reached Bangkok in 1834. They were joined a year later by Daniel B. Bradley, M.D., who arrived in the same vessel with Mr. Dean of the Baptist Mission. These two men were destined to enjoy long periods of missionary service. Dr. Dean continued his labors for the Chinese, with sundry interruptions, until 1858. Dr. Bradley was ordained to the ministry in 1838. He was a man of versatile powers, and left an abiding mark on the Siamese nation. Like the Baptists, the missionaries of the American Board at first carried on missions both to the Chinese and the Siamese, but with the opening of China proper the laborers engaged among the Chinese were withdrawn. The mission to the Siamese was maintained until 1849, when it was brought to a close by the departure of Rev. Asa Hemenway, the Board's only remaining missionary. As yet but slight results had been obtained, either by the missionaries of the American Board or by their Baptist brethren, in the conversion of the Siamese. But much had been accomplished in other directions. The missionaries, by their blameless and self-denying lives, and especially by their success in healing the sick, had won the esteem of the native community. By preaching and teaching, and by translating, printing, and distributing portions of the Scriptures and Christian tracts, they had brought the truth into contact with a multitude of minds; and especially ought we, in estimating their labors, to be mindful of the influence which one of their number, the Rev. James Caswell, was permitted to exercise when the providence of God threw into his hands the daily instruction during eighteen months of the future king of Siam.
residence in the province of Pegchaburee. In 1863 Messrs. McGilvary and Wilson of the Pegchaburee Mission, on a tour of exploration to Chiang Mai, the capital of the most powerful Laos province. This important city is situated on the river Me Ping, about 500 miles north of Bangkok. In 1867 Mr. McGilvary removed thither with his family, and Mr. Wilson and his wife followed him a year later. The labor of the missionaries was soon rewarded by the baptism of their first convert, Nan Inta, a man of more than usual ability, and learned in the Buddhist religion. His faith in Buddhism was first seriously shaken by the verification of the prediction made by the missionaries of the expiry of his life on the 18th, 1869. His conversion was followed within a few months by that of six others.

The Laos converts at first suffered persecution, but since the issue, in 1878, of a proclamation of religious liberty for the Laos, the persecuting spirit has been held in check. The edict of toleration was issued in response to an appeal from the missionaries in Chiang Mai on behalf of two native Christians who wished to be married in Christian fashion, without making the offering to spirits customary on such occasions. Their heathen relatives attempted to prevent the marriage, and were supported in their attempt by the authorities; so there was nothing left for the missionaries but to appeal to Bangkok.

Medical missionary work was begun in Chiang Mai in 1878, with the opening of a dispensary, since developed into a hospital. A boarding school for girls was opened in 1878, and one for boys in 1888.

In the Laos states the people have shown great readiness to accept the Gospel, and here we find seven times as many Christians as in Siam, tho the field has been occupied only a little more than half as long. The PN has sole care of the work among the Laosi. The press and medical missions are agencies of great usefulness in this field, and the training of the native Christians and the encouragement of the churches toward self-support are among the leading features of the Laos Mission.

**SIANG-CH'ENG.** See HSIANG-CH'ENG-HSIEN.

**SI ANTAR:** A village in Sumatra, Dutch East Indies, situated near the S. E. extremity of Toba Lake. Station of the Rhenish Mission Society, with (1902) 2 missionaries, one of them with his wife; 25 native workers, 4 outstations, 1 Sunday school, 6 day schools, and 705 professed Christians, of whom 217 are communicants.

**SI-AO-MEI.** See HSIAO-MEI.

**SIAR:** A village in German New Guinea, situated on the coast near Prinz Heinrich Hafen. Station of the Rhenish Mission Society, with (1902) 2 missionaries and his wife and 1 day school.

**SIBOGA:** A town of Sumatra, Dutch East Indies, situated on the W. coast, about 210 miles N. W. of Padang. Station of the Rhenish Mission Society, with (1903) 2 missionaries and their wives, 37 native workers, 14 outstations, 4 Sunday schools, 15 day schools, and 1,804 professed Christians, of whom 647 are communicants.

**SIBSAGAR:** A town in Assam, India, situated about 500 miles S. E. of Dibrugarh, at an altitude of 333 feet on the Dikhu River; nine miles from the Brahmaputra; the seat of the river trade; once a very important place, as proved by the ruins of a magnificent tank, with temples and palaces along its border, and still interesting on account of its ten thousand inhabitants, of whom 3,000 are Hindus and 1,600 Muslims. Station of the ABMU (1841), with (1903) 2 missionaries and their wives, 11 native workers, 11 outstations, 5 places of worship, 5 Sunday schools, 4 day schools, 1 boarding school, and 1,200 professed Christians, of whom 639 are communicants.

**SIDAMBARAM.** See CHILAMBARAM.

**SIDON:** A town and seaport mentioned in the Bible as a port of Phoenicia, and now called Saida in the local languages. It is situated on the coast of Syria, Asiatic Turkey, about 30 miles S. of Beirut, standing in a plain encircled by mountains. The population is about 11,900. Station of the PN (1851), with (1903) 4 missionaries, one of them with his wife; 2 women missionaries, 52 native workers, 27 outstations, 16 places of worship, 20 Sunday schools, 26 day schools, 2 boarding schools, 1 industrial school, 1 orphanage, and 805 professed Christians.

**SIENG-TU, or SIENG IU.** See HSIAIEN-YU-HSIEN.

**SIERRA LEONE:** A colony and protectorate of Great Britain, on the west coast of Africa, lying between French Guinea on the north and Liberia on the south and east. The area of the colony proper, which extends from the coast inwards from 7 to 20 miles, is about 4,000 square miles, with a population of 79,665, of whom 40,790 were reported as Protestants (1901). The protectorate has an area of about 30,000 square miles, and a population estimated at 1,000,000.

The peninsula of Sierra Leone, which is completely surrounded by water in the rainy season by the junction of Waterloo and Calmont creeks, covers an area of about 290 square miles. It is mostly occupied by a range of gently rounded hills rising in places to a height of 5,000 feet. The rainfall in the whole territory is heavy; copious streams, rising in the Niger watershed, flow south and west. The climate is equable, ranging from 78° to 86°. The rainy season commences in April or May and declines in October, November, and December. January, February, and March are almost rainless. The total rainfall is 134 inches. The marshy exhalations during the rainy season render the climate insalubrious. The death rate is high. Vegetation is luxuriant. Freetown, on Cape Sierra Leone, is the capital.

The dominant race is the Timne (about 200,000), the Timne Mission. ranging from 78° to 86°. The rainy season commences in April or May and declines in October, November, and December. January, February, and March are almost rainless. The total rainfall is 134 inches. The marshy exhalations during the rainy season render the climate insalubrious. The death rate is high. Vegetation is luxuriant. Freetown, on Cape Sierra Leone, is the capital.
denominational, conducted by the missionary societies. There are also Mohammedan schools subsidized by the Government.

SIHKS: A sect of British India, numbering (in 1901) 2,195,288, of whom 2,102,896 were resident in the Punjab, which constitutes about 8 per cent. of the population, and where six tributary states are under Sikh rulers. Their founder, Baba Nanak (1469-1529), born near Lahore, was a contemporary of Luther, and, like him, a religious reformer. As a youth he was of a pious, contemplative disposition, and devoted himself early to a study of the rival creeds prevailing in India: the Hindu and Mohammedan. Not finding satisfaction, he became a pilgrim in search of truth, but returned to his own country in the conviction that he had failed to find God in any of the creeds. Laying aside the character of an ascetic, he led an ordinary life, reared a family, and preached the one invisible God, the Creator, calling upon people of all religions to seek knowledge of God, to worship Him, to find salvation in living righteously, and in doing good works, as God desires, and to be tolerant of the failings of others. By what he deemed important concessions, he endeavored to reconcile the essentially diverse Monotheistic and Pantheistic creeds of Muslim and Hindu, thus showing that he has never really ceased to believe. He left behind him an unsullied reputation, and a company of zealous followers, whom he called Sikhs, i.e., Disciples, mostly of Jat origin, like himself, but with an admixture of Hindus and Mohammedans. He was succeeded by nine other Gurus, or teachers, the first of whom, Angad, was of Nanak's own choosing, and was the author of the first of the sacred books of the Sikhs, the Adi Grunth, made up of the life and sayings of Nanak, with additions by Angad. The fourth Guru, Ram Das, gave permanent expression to Sikhism by establishing Amritsar as its central seat, and building there its Golden Temple in the midst of the Tank or Pool of Immortality. So far the counsel of Nanak, to avoid political complications, had been followed, but Arjun, the fifth Guru, systematized the empire, collected taxes, and assumed something of the state of a secular ruler. The unity of the Sikhs was further cemented and strengthened by the growing enmity with the Muslim power, which persecuted them bitterly. Finally, their tenth and last Guru, Govind, at the close of the 17th century, organized the Sikhs into a military brotherhood, the Khalsa, and said his followers should no longer be called Sikhs, but Singh, i.e., lions, or fighters. He relaxed the restrictions regarding food, permitting them to eat meat, instituted an initiatory rite of baptism, forbade the cutting of hair or beard, gambling and smoking, taught disregard of Hindu and Mohammedan Scriptures, priests, and ceremonies, and instilled into the people a spirit of hostility which made the Punjab, during the next hundred years, a bed of bloodshed. The fortunes of the Sikhs were various until the decline of the Mogul dynasty, and the rise, at the beginning of the 19th century, of their great leader, Ranjeet Singh, who brought all the region from the Sutlej to the Himalayas under his sway. He abandoned the fierce intolerance for indifference to religion, except in so far as religious zeal was useful to his political ends. Every male Sikh was enrolled as a soldier. He was ever true to his alliance with the English, and the Sikh regiments were an invaluable aid in putting down the Sepoy rebellion. At Ranjeet Singh's death, the Sikhs entered upon war with the English, and, being defeated, Sikh dominion disappeared in English sovereignty over the Punjab. The Sikh regiments, true to their history, moved in front of the armies of the Anglo-Indian army, but the majority of the Sikhs have returned to agriculture and other peaceful pursuits, and are the most industrious race in the Punjab, where, despite their relatively small numbers and their lagging behind other races in taking advantage of educational opportunities, they exercise a leading influence. They are a people marked by their symmetry, comeliness, and courage, simple, sincere, and warm-hearted; lovable, receptive to kindness, and they render loyal service to those whom they trust. They are on a par with the rest of the population in morality, and are free from caste prejudices. Drunkenness is a prevalent vice, especially among the upper class. The subjugation and pacification of the Punjab, which ended the Sikh dominion, was accomplished by that company of great Christian soldiers and civilians, Hardyng, Edwardes, Cust, William Martin, and the brothers John and Henry Lawrence. It presents the one conspicuous instance in Indian history of a body of British rulers going to work for the refinement of men, cordially confessing a Christ before the world, and not shrinking from energetic action for the evangelization of the people, the never false to those great principles of religious tolerance which the government professes. It was they who first established the Church Missionary Society in the Punjab, the officers raising a subscription as a thank-offering for victory, and supporting, with large contributions, their appeal to the CMS to enter the field. Amritsar was occupied as a station in 1852, and other points were opened, the officers building church school, and mission house, and two converted Sikhs being employed as evangelists. At the time of the mutiny, Lawrence sent to the siege of Delhi a regiment made up of Sikhs of the sweeter castes, much despised by their coreligionists, and usually of a turbulent, degraded character. When the city was taken, some of them found Christian books among the spoils, and, on reading them, asked the English officers for Christian instruction. They were referred to the CMS missionaries at Amritsar, and as a result several received baptism. It looked at one time as tho a whole regiment, and perhaps two, would become Christians, but the opportunity was lost through the interference of the Calcutta authorities, who forbade the officers to further the conversion of
the Presbyterian Church (North) in the U.S. advanced from its Cis-Sutlej station at Ludhiana to Jullundur and Lahore in the Punjab, and other societies followed. There are, however, no missions specifically to the Sikhs, and cannot be, since they are thinly scattered among the other populations, especially in the country districts, and are indefinitely divided among themselves into various kinds of Sikhs. They are often, however, not separated by a very sharp line from other Hindus. The breaking of their national unity and their wide dispersion, the diminishing grants by the government for the support of their temples, their reverence for the Brahman priests, who are employed to officiate at birth, marriage, and death, coupled with the fact that Sikhism is not a hereditary but an elective religion, being entered by a rite of baptism, seldom taken till adult years, are influences tending steadily to lessen the number of Sikhs, and bring about a general reverie to dominant Hinduism. In districts remote from Amritsar there is not to be distinguished Sikh from Hindu. This transition period is an opportunity that should be made the most of in the effort for their evangelization. Baptisms among them have not been frequent, tho probably as large in proportion to their numbers as among other classes. They average well as Christians in comparison with other converts, and have produced some fine specimens of Christian manhood.

Cunningham, History of Sikhs, 1849; Hughes (T. P.), Dictiona ry of Islam (article on Sikh), London, 1885.

Sikkim: One of the Indian feudatory states, lying in the Himalayas, on the north of the British district of Darjiling. It is bounded on the E. by Bhutan, on the W. by Nepal, and on the N. by the Chumbi district of Tibet. The estimated area is 2,818 square miles, and the population (1901) is 65,401. The Bhutias are the masters of the land. They are of Mongol race, and have come into the country from Tibet. The Lepchas are of quite another type, and have a language of their own. They seem to be the aborigines of the country, and call themselves "Rong," the name Lepcha being given to them by their neighbors. The Church of Scotland Foreign Missions Committee established a mission in Sikkim in 1886, of which the working force consisted in 1900 of 2 missionaries, with 22 native workers, 14 day schools, and 94 professed Christians.

Simon, Asbel Green: Born at West Hanover, Pa., January 20, 1833. Died December 9, 1867. Graduated at Princeton College, 1852; taught two years, and graduated at Princeton Theological Seminary 1858; ordained by the Presbytery of Carlisle; appointed the first missionary of the PN to Brasil, and reached Rio de Janeiro August 12, 1859. While acquiring the language he preached in English to Americans and other foreigners. He was an effective preacher in Portuguese, and his ministry was remarkably blessed. At almost every communion additions were made to the church, mostly from the Church of Rome. He knew how to use the press as an important auxiliary. He translated the Shorter Catechism and other works into Portuguese. He edited also the "Imprensa Evangélica," a religious monthly, in which his own articles, which were often of rare value, attracted the attention of readers among the educated classes. As he had been pioneer in this mission, so to the end he was one of its leading members. Master of the language, and possessing unusual prudence in planning and tact in executing, he was relied upon by his associates. Necessity alone could lead them to take any important step without first hearing his counsel.

Simorangkir: A village in Sumatra, Dutch East Indies, situated about 80 miles E. of Syeluwt. Connected by road with Chittagong. Station of the Welsh Calvinistic Methodist Missionary Society, with 2 missionaries and their wives, 2 women missionaries, 7 native workers, 1 place of worship, 4 Sunday schools, 5 day schools, 1 dispensary, and 108 professed Christians, of whom 58 are communicants.

Sin. See Tirukokvilur.

SiIoe. See Shiloh (Basutoland).

Si Manosor: A village in Sumatra, Dutch East Indies, situated near the W. coast 23 miles S. E. of Siboga. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 11 native workers, 8 outstations, 3 day schools, and 155 professed Christians, of whom 40 are communicants.

Si Matorkis: A village in Sumatra, Dutch East Indies, situated near Padang Sidempuan, about 23 miles S. E. of Siboga. Station of the Java Committee (Netherlands), with 1 missionary and his wife and 1 day school.

Simla: A town in the Punjab, India, 170 miles north of Delhi, situated in the Ambala division, among the foot-hills of the Himalayas. Chief sanitarium and summer capital of India. A very pleasant place, except for its inadequate water supply. Climate cool, exhilarating, healthful, tho for several reasons the difficulties of drainage are considerable. Population averages 12,000, changing with the season. Station of the CMS (1899), with (1903) 1 missionary and his wife, 3 native workers, and 87 professed Christians, of whom 29 are communicants. Station also of the Moravian Missions (1900), with (1903) 1 missionary and his wife and 1 day school. Also station of the SPG, with (1903) 3 women missionaries, 3 native workers, 2 day schools. Station also of the YWCA, with 2 women agents of the Society.

Simmonton, Ashbel Green: Born at West Hanover, Pa., January 20, 1833. Died December 9, 1867. Graduated at Princeton College, 1852; taught two years, and graduated at Princeton Theological Seminary 1858; ordained by the Presbytery of Carlisle; appointed the first missionary of the PN to Brasil, and reached Rio de Janeiro August 12, 1859. While acquiring the language he preached in English to Americans and other foreigners. He was an effective preacher in Portuguese, and his ministry was remarkably blessed. At almost every communion additions were made to the church, mostly from the Church of Rome. He knew how to use the press as an important auxiliary. He translated the Shorter Catechism and other works into Portuguese. He edited also the "Imprensa Evangélica," a religious monthly, in which his own articles, which were often of rare value, attracted the attention of readers among the educated classes. As he had been pioneer in this mission, so to the end he was one of its leading members. Master of the language, and possessing unusual prudence in planning and tact in executing, he was relied upon by his associates. SIND: A part of the Northwest Frontier Province of India. It occupies the lower part of the Indus valley, including the delta of that river. West of it lies Baluchistan, east Rajputana, and south the Arabian Sea and the Rann of Kachchh. It has an average density of population of only about 50 to the square mile. The country is largely destitute of trees, flat and uninteresting in appearance. Its soil is, in many places, strongly impregnated with salt. Mohammedans preponderate, over three-quarters of the population being of that faith. Hindus constitute only an eighth, Sikhs about 5 per cent., aboriginal tribes about 3 per cent., Christians over 7,000, Jains and Parsees a thousand or more each. The Sindis represent the original Hindu population, but are now Mohammedans, having been converted under the reign of early Mohammedan rulers. The history of the province is complicated, and not of special interest. For many centuries it was ruled alternately by Hindu and by Muslim dynasties. As English power on the coast became stronger, entanglements with outlying native rulers were inevitable. At times the use of armed force against them was necessary for self-defense or for retaliation; and at other times treaties for trade and commerce would be made, and very likely broken, which again was supposed to render necessary military measures. As a result of such relationships, Sind was conquered in 1843 by an army under Sir Charles Napier, and formally annexed to British dominions. Karachi is the chief town; it lies at the northern end of the Indus delta, and by the erection of elaborate harbor works it has been made one of the most important seaports in Western India.

The Church Missionary Society occupied Karachi in 1850 and Haidarsbad in 1857. The success has been small. The American Methodists began work in Karachi, largely among unevangelised Europeans, in 1872 or 1873. Education has made rapid progress since the advent of British power. In 1859-60 there were only 20 government schools, which in 1883-84 there were 340, with 20,681 pupils. There are also private schools, not included in the government figures. The last census shows a gratifying number of men and women who can read and write. The language in principal use is Sindhi, one of the Sanskrit family.

SINDHIA'S DOMINIONS: A name sometimes applied to the state of Gwalior, India; ruled under British protection by one of the old Mahraja families known as that of the Maharaja of Sindhia.

SIN-FENG. See Hsien-feng-hsiien.

SINGAN, or SI-NGAN-FU. See Hsien-ngan-fu.

SINGAPORE: An island about 27 miles long by 14 wide, containing an area of 206 square miles; situated at the southern extremity of the Malay peninsula, from which it is separated by a strait about three-quarters of a mile wide. It is a part of the crown colony of Great Britain named the Straits Settlements. A number of small islands adjacent to it are also included in its territory. The population is composed of Europeans, Malays, Chinese, and natives of India. Singapore town, at the southeastern part of the island, is the seat of government for the Settlements, has a well-defended harbor, and has 12½ miles of tramway. The climate is warm, but not unhealthy.

SINGAPORE: A town in the Straits Settlements, Malaysia, situated on the S. side of Singapore Island. It is a depot for commerce E. and W., and is the most southern point of Asia. The streets are wide, except in the Chinese and Malay quarters. Population, 186,800, of whom 1,200 are Europeans. Station of the SPG (1861), with (1903) 2 missionaries, 15 native workers, 2 places of worship, 1 day school, and 400 professed Christians. Also station of the PCE, with (1900) 2 missionaries, one of them with his wife; 10 native workers, 10 places of worship, and 419 professed Christians, of whom 240 are communicants. Station of the P5, with 2 missionaries and their wives, 2 women missionaries. Also station of the ME, with (1903) 8 missionaries, five of them with their wives; 4 women missionaries, 49 native workers, 2 places of worship, 4 day schools, 2 boarding schools, 1 college, and 233 professed Christians. Station also of the CEZ (1900), with (1903) 2 women missionaries, 1 native worker, and 1 boarding school. Also agency of the BFBS, with 2 men and 4 women engaged in Bible work.

SING- IU. See Hsien-yu-hsiien.

SINKUNIA: A village in Sierra Leone, West Africa, situated near the N. border of the Protectorate, in the region of the Yalunka tribes. Station of the CMS (1897), which is temporarily without a resident missionary, with (1903) 6 native workers, 2 outstations, 2 day schools.

SI-NING. See Hsien-nin-fu.

SI-TIEN-TSI. See Hsien-tien-tze.

SIPOHOLON: A village in Sumatra, Dutch East Indies, situated in the Toba Lake region. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 31 native workers, 8 outstations, 9 day schools, 1 Sunday school, and 691 professed Christians. Also station of the CEZ (1900), with (1903) 2 women missionaries, 1 native worker, and 1 boarding school. Also agency of the BFBS, with 2 men and 4 women engaged in Bible work.

SIPOHOLON: A village in Sumatra, Dutch

SIPAHUTAR: A village in Sumatra, Dutch East Indies, situated in the Toba Lake region. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 31 native workers, 8 outstations, 9 day schools, 1 Sunday school, and 691 professed Christians. Also station of the CEZ (1900), with (1903) 2 women missionaries, 1 native worker, and 1 boarding school. Also agency of the BFBS, with 2 men and 4 women engaged in Bible work.

SIPONGOT: A village in Sumatra, Dutch East Indies, situated in the Batang Toru district, about 62 miles E. by N. of Siboga. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 31 native workers, 8 outstations, 9 day schools, 1 Sunday school, and 691 professed Christians. Also station of the CEZ (1900), with (1903) 2 women missionaries, 1 native worker, and 1 boarding school. Also agency of the BFBS, with 2 men and 4 women engaged in Bible work.

SIPOHOLON: A village in Sumatra, Dutch

SIPON: A town in the Straits Settlements, Malaysia, situated on the S. side of Singapore Island. It is a depot for commerce E. and W., and is the most southern point of Asia. The streets are wide, except in the Chinese and Malay quarters. Population, 186,800, of whom 1,200 are Europeans. Station of the SPG (1861), with (1903) 2 missionaries, 15 native workers, 2 places of worship, 1 day school, and 400 professed Christians. Also station of the PCE, with (1900) 2 missionaries, one of them with his wife; 10 native workers, 10 places of worship, and 419 professed Christians, of whom 240 are communicants. Station of the P5, with 2 missionaries and their wives, 2 women missionaries. Also station of the ME, with (1903) 8 missionaries, five of them with their wives; 4 women missionaries, 49 native workers, 2 places of worship, 4 day schools, 2 boarding schools, 1 college, and 233 professed Christians. Station also of the CEZ (1900), with (1903) 2 women missionaries, 1 native worker, and 1 boarding school. Also agency of the BFBS, with 2 men and 4 women engaged in Bible work.
Sirombu Slaves

East Indies, situated in the Silindung region S. of Toba Lake, and about 5 miles N. W. of Pea Radja. Station of the Rhenish Missionary Society, with 1 missionary and his wife, 2 women missionaries, 68 native workers, 9 outstations, 10 day schools, and 4,269 professed Christians, of whom 1,723 are communicants.

Sirombu: A village on Nias Island, Dutch East Indies, situated on the S. W. coast, about 25 miles S. by W. of Gunong Stoi. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 7 native workers, 1 outstation, 1 day school, 1 Sunday school, and 636 professed Christians, of whom 350 are communicants.

Sitapur: A town in the United Provinces, India, situated in Oudh, about 55 miles N. by W. of Lucknow. Station of the ME, with (1900) 1 missionary and his wife, 2 women missionaries, 39 native workers, 3 places of worship, 35 Sunday schools, 2 day schools, 2 boarding schools, and 449 professed Christians. Some write the name Sitapore.

Sitka: A town and seaport in Alaska, situated on the W. coast of Baranoff Island. Capital of Alaska Territory. Population, 1,200. Station of the Presbyterian Home Missionary Society (1877), with (1900) 6 missionaries and their wives, 6 native workers, 1 place of worship, 1 day school, 1 boarding school, and 349 professed Christians. Station also of the PE, with (1900) 1 missionary, 2 women missionaries, 3 places of worship, 35 Sunday school, and 60 professed Christians.

Situy. See Astury.

Sivas: A town in Asiatic Turkey, capital of the province of Sivas; situated on the Kizil Irmak (anc. Halys) River, at an altitude of about 4,000 feet, and 500 miles E. by S. of Constantinople. Population about 43,000, of whom 30,000 are Muslims. Station of the ABCFM (1851), with (1903) 3 missionaries and their wives, 2 women missionaries, 39 native workers, 11 outstations, 5 places of worship, 10 Sunday schools, 26 day schools, 2 boarding schools, 2 orphanages, 1 dispensary, 1 industrial school, and 320 communicant Christians.

Skagway: A town in Alaska, situated at the head of Lynn channel. Terminus of a railroad over the mountains to Whitehorse. Station of the Peniel Missionary Society, with (1900) 3 women missionaries. Also station of the PE, with (1903) 1 missionary, 2 women missionaries, 1 place of worship, 1 hospital, and 41 professed Christians.

Skidegate: A settlement on Graham Island, British Columbia, N. W. America, situated on the southern coast of the island, on the inlet separating it from Queen Charlotte's Island. Station of the MOC (1883), with (1900) 1 missionary and his wife, 1 place of worship, 1 Sunday school, and 141 professed Christians.

Slave Trade and Missions: One would fail forget the unceasing horrors of the 'middle passage,' where, in the stifling hold of a small vessel, men were packed like dead freight, that neither eat, nor drinks, nor breathe. Yet it is worth while to recall that missionaries have exerted no small influence in bringing to an end the traffic in human flesh in its last strongholds of Africa. The system is not dead, but great expanses of territory have been forever closed to the Muslim slave-raider. The voice of the missionary has ever been powerful to arouse the public to the duty of holding the slaver in check, because, as a pioneer of a religion of love, he notes and reports the horrors practised where pure selfishness rules.

Livingstone, in his Last Journals, gives some account of brutalities which he saw on the road. June 19, 1866, he passed a woman tied by the neck to a tree and dead; she could not keep up with the rest, and in order that she should not be a burden, the property of another she was thus despatched. Dr. Livingstone saw others tied up in the same way, and one lying in the path in a pool of blood. June 26 he passed another woman lying dead in the road. Bystanders told how an Arab had killed her early that morning, in anger that he must lose the money paid for her, because she was too exhausted to walk any further. His Last Journals gives an account of a merciless and unprovoked massacre of hundreds of native women and others.

We learn something from the pages of other modern travelers of the slave trade as carried on by Muslim Arabs. November 24, 1883, H. M. Stanley was steaming up the Congo on his way to Stanley Falls, not far from the mouth of the Werre, as it comes in from the north, and stated that the town of Maveme, which he had passed for the town of Sironbu, five days after he had passed the Banala trees, was burnt and the inhabitants massacred. The leaves of the banana trees were scorched and their stems blackened, showing the effects of the fire that had wiped out the town a few days before. Three days later he saw a boat to ascertain what slave-colored object was floating down the stream, and found the bodies of two women bound together with cords. This tragedy had taken place only twelve hours before. Soon after he came in sight of the horde of banditti, 300 strong, with a like number of domestic slaves and women. Sixteen months had they been engaged in their work of slaughter. They had desolated a region of 34,570 square miles, 2,000 square miles larger than Ireland; 118 villages in 43 districts had been destroyed, containing at least 118,000 people, and all they had to show as the result of these sixteen months of slaughter over so extensive a region was a wretched, ragged, bedraggled crowd of 2,300 women and children, with not one grown-up man among them. Five expeditions in all had already carried as many captives away as these possessed. To obtain these 2,300 they must have shot 2,500 men, while 1,300 more had perished by the way from hunger and despair. On an average, six persons had been killed to obtain each puny child in the encampment. The slaves were fettered in groups of twenty chained together; such fruits as could be found were burned to dry, and tasted of the flesh of many stared through the skin, that hung in flabby wrinkles. He adds, "How small a number of them who sees the end of their journey, God only knows! The condition of these was as horrid as their condition, when Mr. Stanley saw them, was full of misery. The Arab staked up stealthily at midnight through the darkness to the doomed town: no sound save the chirping of insects disturb the sleepers, till suddenly the torch was applied on all sides, and in the light of the flames of the grass roofs of the
houses the deadly musket shot down the men as fast as they appeared. Many might succeed in reaching the shelter of the woods, but the women and children were seized and carried off. Mr. Stanley, indeed, said that the gain of the Arabs from the slaughter was only 2 per cent. of the previous population, and that even that was reduced to 1 per cent. before the raiders reached their destination.

This account of the great explorer is supported by personal testimony from the missionaries of the Nyasa region, who had many terrible experiences with the slave dealers. Rev. J. A. Bain, at Maindu, 35 miles northwest of Lake Nyasa, on the Kiwira River, wrote as follows in 1889: "At daybreak, March 15, we were awoke by a number of shots fired in rapid succession; we were told it was Mereri with two bands of Arabs. The surprise was complete. More than thirty women with babes and several girls were captured. The men, only half awake, tried to defend their wives and children, but were driven back by the murderous firing. The Arabs entrenched themselves in a bamboo stockade, then glutted their lust on their captives. Two children, whose weeping over the dead bodies of their mothers disturbed the orgies, were flung into the flames of a burning hut. The following day we found the few who had escaped were spending their strength plundering and destroying the villages. The cattle are Mereri's. The women are claimed by the Arabs, who will sell them when they tire of them. They left, after burning everything that could be burned."

Another English missionary at Kibanga, on Lake Tanganyika, wrote in 1888: "At night we could see the villages everywhere in flames, the people fleeing for refuge to the lake, and the brigands leading away the women and children in long files. A poor old woman as she was led away caught hold of the clothing of the missionary and begged him to save her, but she was hauled away by the rope that was round her neck; another received a wound from the butt end of a pistol. Where yesterday we sought to impart instruction and comfort, now reigns the silence of a desert."

The Rev. (afterward Bishop) Chauncey Maples, of the Universities Mission, during a residence of six or seven years never went 70 miles from Masa6 without meeting a caravan of slaves. One of them numbered 2,000, and, according to Mr. Stanley, that number must represent an amount of butchery and an extent of territory turned from populous villages into a desert that is appalling to think of.

Dr. Kerr Cross wrote from Karonga in April, 1889: "For five weeks the Arabs have harassed us constantly. They hide in the woods and murder men as they pass to and from their gardens. A few days since a party of Wankonde were thus attacked; one was killed and another wounded. The Arabs cut off the head of their victim and left him on the ground. Another was in the woods cutting trees for a house, when Arabs fired on him, piercing his shoulder. Again a band of our men were fired on by Arabs hidden in the long grass; only one was shot, and he was brought in and soon died. A week ago we were awoke at midnight by a volley fired quite near our house. In a few minutes every man was at his post on the stockade, but only one old woman was killed; three bullets had gone through her body. What would be the fate of these poor villagers should the missionaries be driven off?"

The turmoil in Uganda before British control was established, and the insurrection of the Sudan, in which Pilkington lost his life, may be traced directly to the Arab slave-raiders, whose business was hampered by the presence of Christians and missionaries. The same is in some degree true of the career of Mahdis in the Sudan. Each was a clash of the system that now stands alone in fostering slavery with the system which proclaims the brotherhood of man as taught in the Gospel. Because of the loss of their trade, the Arabs attempted to crush out the rising Christian power in the upper Nile region.

As to the guilt of Mohammedans in connection with the slave trade, Cardinal Lavigerie was very outspoken, and for years he was in constant intercourse with them. He once remarked: 1. "I do not know in Africa a Muslim state whose ruler does not permit, and often himself practise on his own subjects, and in ways barbarously atrocious, the hunting and sale of slaves."

2. "It is only Muslims who ravage Africa by slave raids and slave-trading.

3. "Where the slave trade is prohibited by Christian powers, I do not know a Mohammedan who does not advocate slavery and declare himself a negro slave." (Pilgrim's Progress, 1889.)

4. "I know personally in Asiatic Turkey and in that part of Africa under the Ottoman Sultan, many places where the slave-trade and the passage of the sad caravans take place with the complicity of Turkish authorities.

5. "Never to my knowledge has any mufti or teacher of the Koran protested against this infamous traffic. On the contrary, in their conversation they recognize it as authorized by the Koran for true believers as regards infidels.

6. "Never to my knowledge has any cadi or Muslim judge pronounced a judgment which implied the condemnation of slavery, but all have sided with the teachers and expounders of the Koran."

In conclusion, we cannot more than barely allude to the unutterable beastliness, as well as cruelty, of these Muslim slave-traders, in connection with the mutilation of boys, for the vast majority die after the operation, yet, as the market value of the survivors is greater on account of it than would have been the price of the whole, the horrid work goes on wherever the Muslim power is still uncheckd.

The great center of the slave-trade is now in the regions of the Niger, in the Fulani territories, and the Sokoto Empire. British power is slowly advancing and enforcing its prohibition of slave-raiding in those regions, and this infamous commerce must soon come to an end, never to be revived while Christianity lives.

SLAVS: The Slavs belong to the Aryan or Indo-European family, and the group in which they are classed is commonly called the Slavo-Germano-Lithuanian group.

The primitive history of the Slavs and date of their immigrations into Europe are covered with the veil of darkness, like those of many other nations. It is generally supposed that they appeared in Europe after the Germans, and that their original settlements extended between the sources of the rivers Don and Dnieper, and beyond the Dnieper toward the eastern shores of the Baltic Sea and the river Vistula, and toward the south, not farther than the River Priebet. But in the 3d and 4th centuries they are found...
occupying a district the approximate boundaries of which were: from the river Niemen, as far as the mouth of the river Duna; from the Gulf of Riga; and his rights as far as the mouth of the Oka; on the east, a line stretching from the Oka to Kief, and from there to the River Boug, while on the west the line extended to the Carpathian Mountains and the upper Vistula. Toward the end of the 5th century the Slavs occupied the northern banks of the Danube; they soon crossed over and took possession of its southern banks, whence they spread themselves as far down as Albania, Thessaly, Epirus, and even the Peloponnesus.

The introduction of Christianity among the Slavs is the epoch from which their history takes a more definite form. This momentous event was brought about by the combined efforts of two brothers, Cyril and Methodius, natives of Salonica, whom all the Slavs venerate as their apostles and "illuminators," and whom they worship as saints. Cyril, the younger brother, was a man well versed in all the learning that Byzantium, at that time, could impart, and on account of his erudition he was honored with the title of "philosopher." Giving up all the honors and emoluments to which they might have easily attained, the two brothers went to Pannonia at the request of Prince Rostislav, to preach Christianity among the Slavs of Pannonia.

Here they devoted themselves to the spreading of the Gospel and the translation of the Scriptures, and the most essential liturgical books. Cyril devised a Slavonic alphabet, constructed on the basis and model of the Greek, which is still known by the name of "Kyrillitza" (Cyrillic alphabet). It consisted of 28 letters of which were the 22 letters of the Greek alphabet, while 14 others were devised by Cyril to express sounds peculiar to the Slavic speech, and for which there were no corresponding Greek letters. In spite of the opposition of the German clergy, Cyril and Methodius succeeded in obtaining the approbation of the Pope, and he allowed them to use the Slavonic language in the church services. During a visit to Rome, in 869, Cyril died, aged 43 years; while Methodius returned to Moravia, having been appointed its bishop by the Pope. But he soon found his position shaken by the virulent opposition of the German clergy, was dispossessed of his bishopric, and died, it is said, in prison, in 885.

The total number of the Slavs is estimated at about 60,000,000, distributed in round numbers as follows: Russians, over 60,000,000; Bulgarians, 4,000,000; Serbo-Croats and Slovenes, about 7,000,000; Czecho-Moravians and Slovaks, 7,000,000; Poles, about 10,000,000; and Serbo-Lansatians, about 150,000. According to their religious denominations, about 68,000,000 Slavs belong to the Eastern Church, 20,000,000 to the Roman Catholic, 1,500,000 to the Protestant, and about 800,000 are Mohammedans. To the Eastern Church belong the Russians, the Bulgarians, and the Servians; to the Catholic Church belong the Poles, the Czecho-Moravians and Slovaks, the Croats, and the Slovenes. The Protestant Slavs are distributed as follows: Slovaks, 640,000; Poles, 500,000; Czecho-Moravians, 150,000; Serbo-Lansatians, 150,000; Slovians, 15,000; Servians, 13,000; Bulgarians, 5,000. The Mohammedan Slavs are found chiefly in Bosnia and Herzegovina (500,000), and Bulgarians (about 250,000), who, however, have retained and speak their respective Slavic dialects. The Slavic languages are divided into two branches: (1) Southeastern, including the Russian, the Bulgarian, the Servian, the Croat, and the Slovene, with all their local dialects. (2) Western, including the Bohemian, the Polish, and the Serbo-Lansatian, with all their local dialects. The Rites of the Eastern Church use the Kyrillitza, with some partial modifications, in their writing, and the Church-Slavonic in their churches. This "Church-Slavonic" language, being the translation of the Scriptures, modified according to Russian orthography and grammatical construction. The most ancient manuscript of the Kyrillitza which bears any certain date is the "Ostrostrov Gospels," written in 963, for a Russian princely named Ostrornir. Other manuscripts, written in another alphabet, known as the "Glagolitza," however, probably date as far back as this, or perhaps are even older.

There can be no doubt that even in the 9th and the 10th centuries various Slavic dialects existed, just as we find them now; but these dialects were nearer to each other than at present. This explains how the work accomplished by Cyril and Methodius was accessible to all the Slavs in the 9th century, and how the literary production of one Slavic tribe could be very easily transcribed and appropriated by another. But in the course of time these various Slavic dialects have tended to diverge more and more from each other, until at the present time they form quite distinct languages. The language in Bulgaria or Servian of to-day can hardly understand the spoken or literary language of the Pole or the Bohemian, nor can the Slovak or the Slovene comprehend the Russian. In grammatical forms and construction all the modern Slavic dialects, with the exception of the Bulgarian, have retained a close resemblance to the paleo-Slavonic language, and one well acquainted with the latter will not find much difficulty in mastering and understanding the various Slavic dialects.

In conclusion, we may say that many fanciful derivations and examples of the word "Slav" have been given. The most probable one is that the word is derived from Slow, which means "word" or "speech," and the name in its ancient orthography is Slovyanin. Slovyanin means "man of speech," while the Germans, the nearest neighbors of the Slavs in olden time, were and are still called by the Slavs, Nyentzi, from "nyem," meaning "dumb."

SLOVAKS: The Slovaks are, strictly speaking, only a branch of the Bohemian race, and their language may be considered as a dialect of the Bohemian language. But of late years a separatist movement has arisen among them, and they are trying to form a literature of their own and to be treated as a nation apart from the Bohemians.

The Slovaks inhabit the northwest of Hungary, and number over two millions. The greater mass of them (1,583,000) belong to the Roman Catholic, and 640,000 to the Protestant Church. They settled in the territory they now occupy toward the end of the 5th century, and shared the fate of the Bohemians and Moravians in many historical catastrophes. Christianity was introduced among them before the first half
The Slovaks.

The Slovaks, like the Croats and Serbs, were Slavic tribes that lived in the region of what is now eastern Europe. They were converted to Christianity by Cyril and Methodius, two Byzantine monks who were sent to Moravia by the Byzantine emperor to spread Christianity among the Slavs. Cyril and Methodius used a Slavic language, derived from the Roman alphabet, to write the liturgy and teach the Christian faith to the Slovaks. This was the first time a Slavic language was used in a church service.

In the 10th century, the great Moravian kingdom, which had united under the leadership of Spytihněvek, was divided into smaller states. The Slovaks were one of these states, and they continued to use their Slavic language and liturgy. However, in the 11th century, the Slovaks were conquered by the Poles, and they lost their independence.

In the 13th century, the Slovaks were converted to Roman Catholicism by missionary work from Hungary and the Latin West. However, the Slovaks retained their Slavic identity and language, and they continued to use a Slavic liturgy. This was a unique feature among the Slavic peoples, who generally adopted the Latin liturgy.

The Slovaks continued to use their Slavic language and culture until the 18th century, when they were largely assimilated into the Austrian empire. However, they maintained their national identity and language, and they continued to develop a national literature in their own language, the Slovakian language. This literature was based on the Old Slavonic language, and it developed a national style and grammar. The Slovaks also developed a national literature in their own language, which included poetry, prose, and drama.

to Malta. He traveled through Greece in 1829, with Rev. Dr. Anderson. In 1830, with Rev. H. G. O. Dwight, he set out from Constantinople for an extended exploring tour of Asiatic Turkey, Western Persia, and the Caucasus. The tour occupied a whole year, and secured the information on which was based the establishment of the Board's missions to the Armenians and the Nestorians. Returning to the U. S. in 1832, he published the report of these explorations under the title "Researches in Armenia" (2 vols., Boston, 1833), also a small volume of Missionary Sermons and Addresses. In 1833 he embarked for Syria, accompanied by Mrs. Smith, formerly Sarah Lanman Huntington, whose brief but brilliant missionary career of only three years was terminated by her death at Smyrna, September 30, 1836. In 1837-38 and 1852 he was the companion and coadjutor of Prof. E. Robinson in his extensive explorations of Palestine. By his experience as an Oriental traveler, his tact in eliciting information, and his intimate knowledge of Arabic he contributed largely to the accuracy, variety, and value of the discoveries of Biblical geography recorded in Dr. Robinson's celebrated Researches. At the same time these travels, in close relations with the people of the country, added to his own information, and prepared him for the literary work in Arabic which was the great and enduring fruit of his missionary career. He visited the United States again in 1838 and 1845, for reasons of health. During these visits he traveled extensively in the United States, speaking on "Missions" and preaching with great acceptence. He also took the opportunity while passing through Europe to study the methods of Arabic typography there in use, and gathered information which enabled him to make his printing house as complete as possible. For he was all this time pressing on the work of publication of books and tracts. Among his qualifications as translator as well as editor was his ripe scholarship. His learning was extensive and accurate. To the ancient classics he added, in an acquaintance with French, Italian, German, and Turkish. With the Hebrew he was very familiar, and the Arabic, the most difficult of all, was to him a second vernacular. Not only did his learning fit him for the difficult office of editor, but his practice and close attention to the business of printing in all its branches, he acquired an unusual skill in managing the minutest details. He not only wrote himself in Arabic, but devoted much time and labor to correcting and editing works written or translated by others. For many years he carefully read the proofsheets of nearly everything that went through the mission press. He spent also much time and intense labor in superintending the cutting, casting, and perfecting of various fonts of new type made from models which he had himself drawn with the utmost accuracy. This work was done at Leipzig in the celebrated establishment of Taucnitz. It was in 1847 that Dr. Smith devoted himself to the translation of the Bible into Arabic. To this task all his studies and all his previous work had been made to serve as preparation. After eight years of incessant toil he completed the translation of the New Testament, the Pentateuch, the minor Prophets from Hosea to Nahum, and the greater part of Isaiah.

In 1856 failure of health compelled Dr. Smith (he had received the degree of Doctor of Divinity from Williams College) to suspend his labors for a time. He prayed often and earnestly that he might recover and be permitted to complete his work of translating the Scriptures. But it was not to be. He died at Beirut January 11, 1857. During all his labor in the literary branch of the mission, Dr. Smith never forgot that he was a messenger of Jesus Christ, and he entered with all his heart into every plan for the spread of divine truth. Being a fluent speaker of colloquial Arabic, it was ever his delight to preach the Gospel in the family, by the wayside, and in public assemblies.

His work of Bible translation was taken up by his associate, Rev. C. V. A. Van Dyck, D.D., and carried to a full and admirable completion.

SMYRNA: A city in Asiatic Turkey, at the head of the Gulf of Smyrna, about 200 miles southwest of Constantinople. Population about 150,000, of whom a little more than half are Mohammedans and the remainder Greeks (40,000), Armenians (10,000), Jews (15,000), and Europeans. The climate is hot and trying, the summer being very oppressive. The general appearance of the city from the sea and also from the Aeropolis is very attractive, many of the houses, especially in the Christian quarters and along the quay, being of stone and well built. As a business center Smyrna has grown rapidly in importance, especially since the establishment of two lines of steamers connecting it with the interior of Asia Minor. European customs and influence have also been largely predominant, and the intimate connection of the large Greek population with Greece and the islands of the Egean has helped to make it a center of far greater commercial activity even than Constantinople. It has also derived considerable importance from the fact that it is the only Turkish city which the fleets of Europe and America can visit, and during the cooler months there is seldom a time when one or more warships are not anchored in the roadstead. The colloquial Turkish name of the city is Giaour Ismiri (Infidel Smyrna).

As a center for missionary work Smyrna has been prominent from the earliest times. The interest of its name as the home of Polycarp, and as one of the Seven Churches addressed by the Apostle John, naturally drew attention to it; but even more was probably due to the fact that at the commencement of the 10th century it was the only city of Turkey that was really open to missionaries, and with which there was direct communication from European and American seaports. The British and Foreign Bible Society early established an agent here, and the first missionaries of the ABCFM to the Levant were located here. At present the missionary societies working in Smyrna are as follows: ABCFM (1820), with (1903) 3 missionaries, two with their wives; 6 women missionaries, 46 native workers, men and women; 5 outstations, 7 day schools, 1 kindergarten, 2 boarding schools, 1 college, and 203 professed Christians; London Jews Society (1829), with (1903) 1 missionary and his wife and 4 native workers; Church of Scotland Jewish Mission, with (1906) 6 missionaries, men and women; 2 schools, a dispensary, and a hospital; Kaiserswerth Deaconesses' Institute (1856), with (1903) 14 deaconesses and assistants, 1 boarding school, 1 orphanage, and 1 sanitarium for deaconesses; FCMS (1891), with (1901) 1 missionary and his wife, 1 woman missionary, 1 place of worship, 1 day school, and 14 professed Christians. There
One of the most interesting developments of missionary work has been the formation and the growth of the Greek Evangelical Alliance. It originated in the effort of Rev. Geo. Constantine, D.D., a native Greek educated in America, to place the work among the Greeks on a firm basis of self-support. Dr. Constantine commenced a series of sermons in the hall connected with the ‘Sailors’ Rest,’ and by his eloquence drew large crowds.

A profound impression was made, and the hierarchy saw that they were in danger of losing their power. The volatile nature of the Greeks rendered it easy to stir a tumult. Threats were uttered, stones were thrown at the windows of the hall, and on one Sunday a mob attacked the place, seeking especially for Dr. Constantine. Not finding him, they turned and went to his house, which they assaulted.

The priests soon saw that the proceedings chiefly injured their own church. The result was a greater interest in Christian life than at any time before. The Alliance grew until it has become a most potent influence, not only in Smyrna, but in many other Greek communities of Asia Minor.

SMYTHIES, Charles Alan: Bishop of Zanzibar and Missionary Bishop in East Central Africa. Born August 6, 1841. Died, 1894. He was consecrated in St. Paul’s Cathedral in 1883, and left England the first of the following year for his work in Africa, arriving in Zanzibar on February 25, 1884. In 1885 he paid his first visit to Lake Nyasa, and during this visit he secured a site on the island of Likoma, a convenient and comparatively healthful center for the Universities Mission work on the lake. This mission settlement on the lake showed a steady increase; in four years the staff had more than doubled; and the little steel vessel, built in England and sent out in four hundred packages, enabled the missionaries to found station after station on the lake shore. Under the supervision of the bishop, the work at Zanzibar steadily grew in power. At Kiangari, where Bishop Smythies resided, a theological college was formed, which was the heart of the mission. In 1889, and again in 1891, the bishop visited every station under his jurisdiction; and in 1890, on his trip home, he conferred with the German Chancellor, in order, if possible, to remove the possibility of friction with the German agents on the East Coast of Africa, since by a recent treaty the Magila stations remained within the sphere of German influence. The interview was entirely successful, and the effect of this visit was most beneficial to the cause of missions in and around Zanzibar. In the completion, equipment, and opening of the hospital at Zanzibar, Bishop Smythies saw the fruit of years of earnest labor, and it has proven to be an institution of increasing usefulness. Bishop Smythies was buried at sea, May 7, 1894.

SOCIETY FOR PROMOTING CHRISTIAN KNOWLEDGE: This Society is the oldest mission agency in the world. It was founded in 1698, and has since carried on its work in every-widening spheres of activity, and with ever-increasing expenditure of funds. Its history has not been furnished us, and the meager outline which can be gained from its report must suffice instead of the lengthy notice which is its due, both on account of its age and its wide-spread usefulness.

The Society is composed of persons who must, of necessity, be members of the Church of England, or some church in full communion with it. New members are received on recommendation of the existing members, after which they are elected, and on payment of a certain annual sum are entitled to full privileges. Persons who make subscriptions are entitled to some privileges in the form of receiving books and tracts. The Society is a close, self-perpetuating organization, with intimate connection with the Church of England, the apparently responsible to no one except its own elected authorities.

His Majesty the King of England is the patron of the Society. The Archbishop of Canterbury is the president, and there are numerous vice-presidents, comprising mainly the other archbishops and bishops of the Church of England, together with like dignitaries of any church in full communion with the Church of England, who may be members of the Society. There are four treasurers, two general secretaries, and two who are designated organizing secretaries. A general committee of administration called the Standing Committee is assisted by special committees, such as the Committee of Foreign Missions, the Foreign Translation, of General Literature, the Tract Committee, etc.

Under one broad comprehensive title, the Society combines the work of many departments, each of which might well be the work of a single society. Its endeavor to aid Christian work of any kind throughout the world it is:

1. The Bible and Prayerbook Society of the Church of England: In this branch of the work is included the producing and circulating of these books or portions of them not only in England but throughout the world. The publication is in seventy-five or more different languages. By grants of money or books; by supplying these publications at cost or less; by assisting translation and publication committees in various foreign lands, the work is carried on, and during the year 1900 about 60,000 books and tracts were circulated in non-Christian lands.

2. A Tract and Pure Literature Society: It produces and circulates distinctively religious works, whether with works by able writers, on science, history, and topics of general interest and utility, including fiction of an elevating character. In connection with this branch of the work, grants of books are made to churches, reading-rooms, missions of every kind, missionaries, soldiers, etc.

3. A Home Church Mission and Education Society: In addition to the general Home Missionary work carried on along the lines already mentioned, there are the following distinctive objects of its care:

(a) A college (St. Katherine’s) at Tottenham, England, where school-mistresses are trained.
(b) A training college for lay-workers maintained in the east of London. (c) Money is given toward the building and fitting up of church institutes, and the building and renting of Sunday schools; together with other purposes connected with church education, such as the providing of lecturers on church history, the preparation of lectures, and magic-lantern slides, to be rented out at low rates to churches or districts desiring such means of educating the masses, and many other plans along the same general lines.

This work is accomplished in various particular ways:
(a) Churches, chapels, and mission-rooms are built or aided in dioceses of the Church the world over.
(b) Native clergy and lay mission agents are trained for the work.
(c) Medical missions are maintained or established, and medical missionaries, both men and women, are trained.
(d) Funds are provided for the support of clergymen called to work in destitute regions.
(e) As mentioned above, 'Bible translation and other work of similar character has been aided, and books of many varieties have been donated, or the work of publication assisted. In connection with this work, the Translation Committee is assisted by veracious sub-committees in Madras (Tamil and Telugu), Punjab, Sind, Bombay, and Calcutta. Depots for the Society's publications have been established at many places on the Continent of Europe.

5. Emigrants' Spiritual Aid Society: An important and, in some respects, unique feature of the work of the Society is the care which it exercises over the many emigrants who annually leave the shores of Great Britain for other lands. These emigrants are watched over both spiritually and temporally: chaplains attend on them on their departure, and letters are given to the Society's representatives in foreign lands, who meet the emigrants on their arrival, give them aid in locating in their new homes, besides protecting them from the wiles of those who are ready to take advantage of their ignorance and strangeness. In many cases chaplains are deputed to accompany a shipload of emigrants, and a matron is sent to look after the single women. During the voyage—a long one when Australia, New Zealand, or South America is the objective point—the Gospel is preached, church ordinances are administered, and the weary days whiled away by lectures which deal with the country of their destination, in regard to which many of the emigrants are sadly ignorant. At the principal ports of the United States, Canada, Tasmania, Australia, South Africa, South America, and New Zealand representatives of the Society meet emigrants on arrival to render any needed service.

These, briefly stated, are the various branches of the important work of the Society. Two facts should be borne in mind by all interested in Foreign Missions: Ist. This Society aided, and at last entirely supported, during nearly one hundred years, the Mission (Danish-Halle) in South India, founded by the King of Denmark at the beginning of the 18th century. 2d. The Society has furnished translations of Holy Scripture and other religious literature—particularly the Prayer Book—in many insignificant or transitory dialects of obscure tribes. The number of volumes or copies of tracts issued at home and abroad by the Society, each year, is about 14,000,000.

SOCIETY FOR THE PROPAGATION OF THE GOSPEL IN FOREIGN PARTS: From the time of Cranmer (1534) the different movements for English colonization recognized, more or less clearly in principle, the necessity of Christian work, but the purpose of the settlement was never that of evangelization. The case was altered in 1885 by the establishment of the Mission Association for the Propagation of Female Education in the Missions of the SPG. The original title was "Ladies' Association for Promoting the Education of Females in India and other Heathen Countries in Connection with the Missions of the Society for the Propagation of the Gospel." This was altered in 1885 to "Women's Mission Association for the Promotion of Female Education in the Missions of the SPG," and its objects defined: "(1) To provide missionary teachers for the Christian instruction of native women and girls in such countries by supporting and sending to the same country Church women well qualified for the work; (2) to assist female schools; (3) to employ other methods for promoting Christian education; (4) to assist generally in keeping up an interest in the work of the Society." The independent of the Society as regards its funds, its methods of work in the Lower House of the Convocation of the Province of Canterbury to inquire "into ways and means for Promoting Christian Religion in our Foreign Plantations." The result was a petition to the King, granted by William III., on which a charter was drawn up, and, in its turn, granted by the King. The first meeting was held at Lambeth Palace, June 27, 1701, the "letters patent" presented, officers elected, and steps taken for full organization of the Society for the Propagation of the Gospel in Foreign Parts.

The organization of the Society, as completed by supplemental charter in 1882, includes: 1. Incorporated members (1900), about 6,000 in number, elected by the corporation, in virtue of donations to the Society's funds, or special service rendered. 2. A Standing Committee, including certain members ex officio (the President, Vice-President, Treasurer, and Secretary), 24 members elected by the Society out of the incorporated members (six retiring annually), and Diocesan Representatives (two for each diocese in England and Wales, and four each for Armagh and Dublin, in Ireland) also elected from resident incorporated members.

The President is the Archbishop of Canterbury, and the Archbishop of York and the Bishops of the Church of England holding sees in England and Wales are Vice-Presidents. The Lord Almoner and Dean of Westminster, the Dean of St. Paul's and Archdeacon of London, and the two Regius and two Margaret Professors of Divinity of Oxford and Cambridge are members ex officio.

Aside from certain special duties reserved for the Society, the entire management rests with the Standing Committee, ten members forming a quorum. The Society meets once a month, but, aside from some routine business, these meetings are distinctly missionary in their character. At the annual meeting of the Society for the election of members, officers, etc., all incorporated members are entitled to vote, absentees being allowed the use of voting papers. Only once has a poll of the entire Society been taken in this manner (1894).

The Society depends for most of its support upon the regular diocesan and parish organizations of the Church of England; but, to keep pace with modern development by the formation of children's associations, and has also junior clergy missionary associations. The most efficient agency, however, is the Women's Mission Association. This was first suggested in 1866, approved by the Society, and the complete organization effected on May 11 of that year.

The original title was "Ladies' Association for Promoting the Education of Females in India and other Heathen Countries in Connection with the Missions of the Society for the Propagation of the Gospel." This was altered in 1885 to "Women's Mission Association for the Promotion of Female Education in the Missions of the SPG," and its objects defined: "(1) To provide missionary teachers for the Christian instruction of native women and girls in such countries by supporting and sending to the same country Church women well qualified for the work; (2) to assist female schools; (3) to employ other methods for promoting Christian education; (4) to assist generally in keeping up an interest in the work of the Society." The independent of the Society as regards its funds, its methods of work in the Lower House of the Convocation of the Province of Canterbury to inquire "into ways and means for Promoting Christian Religion in our Foreign Plantations." The result was a petition to the King, granted by William III., on which a charter was drawn up, and, in its turn, granted by the King. The first meeting was held at Lambeth Palace, June 27, 1701, the "letters patent" presented, officers elected, and steps taken for full organization of the Society for the Propagation of the Gospel in Foreign Parts.
were in entire harmony with the plans of the Society, and it entered no fields without its approval. The development, however, was so rapid, and parochial associations so parallel with that of the Society, that it was deemed best, in 1903, to secure a still closer arrangement. This went into effect January 1, 1904. (1) The WMA Committee became the Committee of Women’s Work (SPG); (2) WMA workers became local associations of SPG; (3) WMA workers became SPG workers; (4) the WMA general fund was amalgamated with the SPG general fund; (5) where a special interest is preferred contributions may be so designated. Provision was also made for increased representation of subscribers, and each diocese has the right to send a representative to the committee, also every woman subscriber to SPG may vote at the election of new members to succeed those retiring, under the by-laws, at the annual meeting of the Society.

By the terms of the charter the object of the Society was (1) to provide maintenance for an orthodox clergy in the plantations, colonies, and factories of Great Britain beyond the seas, for the instruction of the King’s loving subjects in the Christian religion; (2) to make such other provision as may be necessary for the propagation of the Gospel in those parts; (3) to receive, manage, and dispose of the charity of His Majesty’s subjects for those purposes. The first action was an inquiry as to the religious state of the colonies; the second the raising of a fund. As to the scope of the Society’s work, it was interpreted at first as being primarily the interests of “our own people,” then the “conversion of the natives;” but in 1710 it was laid down by the Society that that branch of its design which related to the “conversion of heathens and infidels ought to be prosecuted preferably to all others.” While this exclusive policy was not pursued, the Society has never, even from the beginning, lost sight of this part of its missionary character and duty.

North America: For the greater part of the 18th century the colonies of Great Britain in America, together with the negroes and Indians, constituted the principal field of the Society. Its first missionaries were the Revs. Geo. Keith, originally a Presbyterian, afterward a Friend, and then a member of the Church of England, landed in Boston June 11, 1702. The next move was to South Carolina, where Rev. S. Thomas landed at Charleston, December 25, 1702. Other sections were occupied, and considerable work was done among the Indians, as well as for the colonists. In the political disturbances, in 1776, the Society’s missionaries, numbering 77 in all, were loyal to the Crown, and were nearly all forced to retire from their missions, although a few eventually took the oath of allegiance to the republic. The result of the war, “while it almost destroyed the Church in the ‘United States,’ set her free to obtain that gift of the Episcopate so long denied.” In 1785 the Society formally withdrew from the missionary field in the United States, in which it had employed 309 missionaries among 6 European-Colonial races, negroes, and 14 Indian tribes, conducting its work in 8 languages. Other fields were taken up in North America as follows: Newfoundland, 1703-5; again in 1726-7; Quebec, 1759-64; New Brunswick, 1783; Ontario, 1784; Cape Breton, 1785; Prince Edward Island, 1819; Manitoba and Northwest Territories, 1850; British Columbia, 1859.

In all of these, 921 central stations have been occupied, and 1,597 ordained missionaries (European and Colonial) employed among the 12 European-Colonial races, 81 Indian tribes, as well as negroes, Chinese, Japanese, and mixed races, using 12 languages. At the time of the organization of the Society there were 300 (then 0) church members and 2 clergy. In 1900 there were 666,175 members of the Church of England, and 1,310 clergy, including 169 in the employ of the SPG.

In 1902 the General Synod of a Missionary Society, consisting of members of the Church of England in Canada, was formed for the special prosecution of missionary work among the Indians, Eskimos, etc.

West Indies: The SPG made grants of books and passage money to clergymen going to the West Indies as early as 1703, but did not take special work in that field until 1712, when it came into possession of the Codrington estates in Barbadoes, willed to the Society for the special purpose of maintaining “Monks and Missionaries to be employed in the Conversion of Negroes and Indians.” Plans were immediately made for a college, but the building was not completed until 1745. On the abolition of slavery the compensation money was invested by the Society for the benefit of the college. The income of late years has considerably fallen off, but there are still several scholarships, and there is also connected with it a Mission House for training workers for Africa. It has been affiliated with the University of Durham. The hurricanes that have devastated the islands, and more recently the terrible eruption at St. Vincent, have heavily taxed the Society’s ability to help the weak churches.

The Bahamas were occupied by a representative of the Society in 1738, but the work was chiefly among the settlers, and it was not until the abolition of slavery in 1835 that energetic forward movement was made. In that year work was commenced, with special reference to the negroes in Tobago, the Leeward Islands, and Jamaica, and the next year in Trinidad. The Society has been specially interested in the Jamaica Church Theological College, founded in 1883.

Central America: In 1742 the Society’s attention was drawn to the needs of the Indians of the Mosquito Coast, and six years later a missionary was sent, but comparatively little was done there or in British Honduras, occupied temporarily in 1844, and again in 1877, and 1892. In 1883 the Society sent a chaplain to Panama to care for the laborers who went in companies from Jamaica and other islands, and in 1896 it sent a chaplain to Costa Rica.

South America: The Society’s labors in South America have been chiefly in British Guiana, tho a missionary was maintained for a few years (1860-7) in the Falkland Islands. In Guiana the work has been chiefly among the aboriginal Indian tribes, Arawaks, Waranos, etc., and among the Chinese and East Indian coolies. Especially successful has been the work in the Pomeroon River, where there are good schools, churches, and parsonages. The Church of England chaplaincies in South America are under the general supervision of the South American Missionary Society.
Africa: The Society entered the African field on the West Coast in 1752; South Africa, 1820; the Seychelles, 1832; Mauritius, 1836; St. Helena, 1847; Madagascar, 1894. In all these sections the Society is directly concerned with the welfare of the English colonists, as well as with European races. In North Africa it has had some chaplaincies among the English communities.

West Africa: The Royal African Company, in 1729, made application to the Society to recommend the establishment of a mission in Africa, but it was not till 30 years later that an accredited representative went as a missionary. Rev. Thomas Thompson, a graduate of Cambridge, who had served in New Jersey, resolved to devote himself to work in Guinea, and, receiving appointment, arrived at the river Gambie in January, 1752. He went to Sierra Leone, passed into the interior and met with not a little success, sending three boys to London for training, one of whom, Philip Quaque, returned to work among his people, being the first of a non-European race to receive Anglican ordination (1760). There were no great results of the work, and he remained the sole missionary for a considerable part of the time, serving as chaplain. After his death (1810) for eight years two chaplains were commissioned to superintend the free schools, but from 1824 the work has been very successful. Special attention was paid to education, the institutions having been chiefly for colonists and for coolies-East Indians, Chinese, etc.—but for another reason, none was sent until 1841. The British Government wished to work for the Malagasy and creoles, who do not neglect the foreign population. St. Paul's College at Ambatojarana is a flourishing institution.

Australasia: The work of the SPG in this section of the world commenced in 1793 with the appointment of four schoolmasters to New South Wales, two for Sydney, and two for Norfolk Island, where a penal colony had been established. Application was made for a clergyman, and two more dioceses, Grahamstown and Natal, were created, the scattered, individual efforts became united, and work among the natives was extended, until it assumed the first place in the Eastern section, the colonists being able to provide for themselves. Thus, while in Cape Town the SPG clergy are all working among colonists in the dioceses of St. John’s and Zululand (47) are missionaries, working among the natives; in Grahamstown, 14 out of 21; in Natal, 11 out of 21; in Masontaland, 7 out of 9; in Bloemfontein, 9 out of 16 are missionaries to the heathen. This work has been very successful. Special attention has been paid to education, the institutions of the Society including a college at Zonnelbloom, an institution at Grahamstown, a normal college at Keiskama Hoek, a training college at Markburg, a college for boys at Bulowana, Natal, St. John’s College, Umtata; McKennie Memorial College at Isandhlwana, St. Mary’s Training College in Basutoland, and others at Pretoria and Bloemfontein.

The policy of the Society in educating and ordaining natives and placing them on a par with the white clergy has given it a certain advantage, and has drawn to the Church of England a considerable number who have felt that the other denominations, particularly the Dutch Church, did not recognize their place among European races.
and West Australia (1836). In Tasmania (1835) the Society's work has been entirely colonial. Moore College, Sydney; Christ's College, Tasmania, and St. John's Theological College, N. S. W., have been assisted. In New Zealand the SPG sent chaplains in 1840 to take up work among the colonists, some of which was the direct result of the labors of the Rev. Samuel Marsden and of the CMS. As the Maori Christian community developed, the Society gave assistance in the legal and missionary work until 1880, since which time it has limited its aid to grants in favor of the theological college and a few churches. The connection between the SPG and the Melanesian Mission (q. v.) was very close from the time of the appointment of Bishop Selwyn in 1841, but its special work is dated from 1849 and continued until 1885, when the Australasian church assumed responsibility, except so far as the Melanesian Mission itself carried on the work. Closely associated with this was the care, for a few years (1849-65), of the Pitcairn Islanders.

Asia: The great work of the SPG in Asia has been in India, dating from 1820. It has also, however, maintained missions in Borneo (1848), Straits Settlements (1856), China (1863), Korea (1889), Japan (1875), and at various times and for limited periods in Western Asia.

India: While the first direct work of the Society in India commenced in 1820, the influence exerted by its organization largely influenced the starting of the Danish-Tamil Mission of Ziegenbalg and Plutschau in 1705. When grants in aid of that mission were later made by the SPCK, the SPG shared in making them, subsequently, as in America, assuming the place of principal. Until early in the 19th century, however, little interest seems to have been felt in England for missions in that land. Commencing with 1819, emphasis began to be laid at the Society's anniversaries on the need of work in India, and as the first step it was urged that a bishopric be established. Finally, through the urgent representations of the SPCK, and of Mr. Wilberforce, the Rev. T. F. Middleton was consecrated the first bishop of Calcutta in the chapel of Lambeth Palace on May 8, 1814. It is significant of the power of the opposition to Christian work in the East that, although the change in the charter of the East India Company had been made the previous year, and missionaries of other organizations were already in the field, this consecration was private, and the sermon was suppressed. It was four years later that the SPG decided to take up work in India, and it was not until 1820 that Bishop's College was founded at Calcutta. The Bible Society, SPCK, CMS, and SPG united in securing scholarships, and the development of the college in the direction of Bible translation, the preparation of Christian literature, and the education of students for Christian work. The mission proper dates from 1825, when, in response to a special appeal by Bishop Heber, it took up the work which the Danish Mission had commenced, but which had been suffered to languish. Here, as in Calcutta, the first efforts were educational. "Bishop Heber's Seminary" was not long-lived, but subsequent efforts were more successful. The first appointment of a missionary to Bombay was in 1830, but it was several years later that work was really inaugurated. The Northwest Provinces were entered at Cawnpore (1833) in response to a special request from the English residents, and Debogurh, in Assam, was occupied by a missionary in 1851, as the result of the appointment of a government chaplain to Assam in 1842. The work of the Society in the Punjab, commenced at Delhi in 1854, was in response to the urgent request of residents, supported by the influences of the lieutenant-governor.

The general work of the Society in India, as in Africa, combines the interest of the foreign resident and native missionaries, the conversion of natives, the establishment of the ecclesiastical organization of the Church of England, and of education for all classes in various directions. The diversity of these enterprises makes it practically impossible to do more than give summaries. These, again, in the absence of certain statistics, lose much of their value.

In Bengal (1820-1900) the Society was represented by 75 European and 44 native ordained missionaries in 32 stations; in Madras (1835-1900), by 112 European and 127 native missionaries, in 73 stations; in Bombay (1830-1900), by 43 European and 7 native missionaries in 15 stations; in the United (NW) Provinces (1833-1900), by 28 European and 6 native missionaries, in 5 stations; in the Central Provinces (1846-1902) by 2 European missionaries in 5 stations; in Assam (1851-1900), by 9 European and 2 native missionaries in 4 stations; in Punjab by 32 European and 4 native missionaries in 5 stations; in Kashmir (1866-7, 1893-1900) by 1 European and 1 native missionary at 1 station; in Burma (1859-1900) by 35 European and 21 native missionaries in 17 stations; in Ceylon (1840-1900) by 39 European and 31 native missionaries in 31 stations.

Among the more important educational institutions are: Bishop's College, Calcutta; Sir Stephen's College, Delhi; St. John's College, Rangoon; Trichinopoly College; St. Peter's College, Tanjore; Christ Church College, Cawnpore; St. Thomas' College, Colombo, besides a number of training institutions, seminaries, etc.

The statistics from the different dioceses not being prepared with reference to any comparison of the tables, it is difficult to summarize them. There appear to be not far from 50,000 communicants and about 100,000 baptized persons connected with the missions of the SPG in British India.

Borneo: Mr. James Brooke, a naval cadet, who, while traveling for health became interested in the suppression of piracy in the Malay Archipelago, fitted out a ship, and in 1838 landed at Kuching in Sarawak, in Borneo, and made himself master (or Rajah) of the province. As soon as he had established his rule, he invited the Church of England to establish a mission. The SPG felt unable to assume the work, but contributed to a committee which was organized for the purpose in 1846. The first missionaries went out in 1851, and two years later the SPG took charge of the mission. The mission suffered severely at different times, from rebellions and wars, but on the whole its work among the Dyaks prospered, and subsequently (1861) it extended its efforts to the Straits Settlements. In 41 European and 7 native missionaries have worked in 28 stations. Among the stations occupied in the Straits Settlements are Singapur, Penang, and Perak; in Sarawak, Kuching, Quop, Skerang, and Undup, and in North Borneo, Labuan, Kudat, and Sandakan. In 1902, 15 clergymen
conducted work in 78 villages; there were 12 churches and 32 chapels; 1,781 communicants and 4,850 baptized persons, 21 schools, with 35 teachers and 913 scholars.

China: In 1843 the Society appealed for funds for a mission for the English residents in Hongkong, but it was not until 1869 that its first missionary, specially commissioned for work among the Chinese, reached Peking. Other stations have been occupied as follows: Chefu, 1874; Tai-yuen-fu and Ping Yin, 1879; Yung-ching (original 1857, transferred to CMS in 1878), Lung-hou-lien, 1880; Tien-tsin, 1880; Pei-tai-he and Wei-hai-wei, 1900. In all, 24 European and 1 native missionaries have been employed in 9 stations, their work being distinctive for the Chinese.

Japan: As early as 1839, when Japan was first opened to missions, the Society reserved a sum of money for work there, but placed its first missionaries in Tokio in 1873. Other stations occupied were Kobe (1870), Awaji (1873), and Yokohama (1889). There is also some work on the Bonin Islands. There have been in all 21 European and 1 native mission stations. In 1902 there were 12 clergy, 11 churches, 606 communicants, and 1,170 baptized persons.

Korea: One of the founders of the SPG Mission in Japan urged, in 1850, that work be taken up in Korea. At that time it was deemed premature, but some years later Bishop Scott of North China and Bishop Bickersteth of Japan pressed the matter, and in 1859, Rev. C. J. Corfe was consecrated the first missionary bishop of Korea. He reached Seoul in 1890 with several associates. The plan of work contemplated several years of preparation before direct evangelistic work should be undertaken; but in 1896 aggressive work was indicated by the enrollment of a class of catechumens. Other places occupied are: Chemulpo (1891), Mapo and Kanghoe (1893). In 1902 the reports showed 5 clergy, 4 churches, 117 communicants, and 204 baptized persons.

Western Asia: The Society's work has been chiefly confined to occasional assistance to the Anglican Bishop of Jerusalem, the English communities in Smyrna and Cyprus, and to work among the Assyrian Christians (see Archbishop's Mission).

Europe: In its early history the Society assisted in the building of churches in various places, and in providing service for English communities, but to no great extent until 1841, when the see of Gibraltar, including the English congregations of Southern Europe, was founded, a grant in aid being made from the Society's fund. After the Crimean War (1854-56) it assisted in erecting the Crimean Memorial Church in Constantinople, and maintained a chaplain in charge of it. Since then it has added a number of chaplaincies in different parts of Europe.

The Society has always paid special attention to the preparation and dissemination of literature, including not only Bibles and prayer-books, but general religious literature. It has assisted to establish libraries in the different colleges in which it has been interested, and among its gifts is noted one to Harvard College, Boston, Mass., in 1764, on the occasion of a disastrous fire. Its list of publications includes the entire number of languages which its missionaries have used in their labors.

One of the Mission Field, monthly; The East and the West, quarterly. Pascoe (C. F.), Two Hundred Years of the SPG, London, 1901.
Christians, of whom 231 are communicants. 698 natives are. Galas ?r Danakil. The capital and native pastor, all under the supervision of European and the pagan religions still wholly prevail.

From the coast is mountainous, and largely unexplored. The Mohammedan faith has been under the care of the Paris Evangelical and the traffic in liquors and the Romish propaganda. Bora-Bora and Maupiti have each one native ordained pastor under the LMS.

Station of the Java Committee's Mission, with 1 missionary and his wife and 1 day school. S. E. of Surabaya. Station of the Rhenish Missionary Society, with 1 missionary and his wife and 1 day school.

Somalia: An African possession of France, including the colony of Obock, lying between Abyssinia and the Strait of Bab-el Mandeb, bounded north by Eritrea and south by Italian Somaliland, touching also British Somaliland on the east. It has 46,000 square miles and 200,000 inhabitants (estimated). The capital has been under the care of native pastors, and in the latter there are eight stations, each with a native pastor, all under the supervision of European missionaries. Bora-Bora and Maupiti have each one native ordained pastor under the LMS.

Somaliland: An African possession of France, including the colony of Obock, lying between Abyssinia and the Strait of Bab-el Mandeb, bounded north by Eritrea and south by Italian Somaliland, touching also British Somaliland on the east. It has 46,000 square miles and 200,000 inhabitants (estimated). The natives are Gallas or Danakil. The capital and chief port is Jibuti, where two French mission schools, one for boys and one for girls, were opened in 1892, under government grants.

Somaliland (Italian): A protectorate of Italy in Africa, lying on the Indian Ocean and bounded landward by Abyssinia, French Somaliland and British Somaliland on the north, by British East Africa on the southwest, and by the Egyptian Sudan on the west. The area is about 30,000 square miles, the population about 600,000, chiefly Somalis. The country away from the coast is mountainous and largely unexplored by Europeans. As a mission field it is thus far unoccupied. The Mohammedan faith and the pagan religions still wholly prevail.

Somerville: A town in Cape Colony, S. Africa, situated in the Transkei region, 18 miles E. by S. of Maclear. Station of the UFS, with (1903) 1 missionary and his wife, 28 native workers, 17 outstations, 1 place of worship, 14 day schools, and 695 communicant Christians.
SONG-CHIN: A town in Korea, in the district of Phyeng-yang, about 50 miles W. of Wen-san. Station of the FOC (1901), with 2 missionaries and their wives, 3 native workers, 1 dispensary, 1 hospital and 60 professed Christians, of whom 14 are communicants.

SONGDO: A town in Korea, also called Kaiseng, situated 40 miles N. W. of Seoul. Population, 60,000. Station of the MES (1897), with 150 members, and 600 communicants. It consists of 2 resident missionaries, 3 native workers, 9 outstations, 2 Sunday schools, and 279 professed Christians, of whom 79 are communicants.

SONG-YANG. See Sungsyang-hsien.

SOOCHOW. See Sh-Chau-fu.

SO-PING-FU: A town in Shan-si, China, situated about 220 miles W. of Peking. Station of the CIM (1865), but the work has not been reorganized since the Boxer rising, when all the missionaries were killed. Some write the name Soh-p'ing.

SOPO: A mission station of the German Baptists of Berlin, situated in Kamerun, Africa, about 10 miles S. E. of Buea, with (1900) 1 missionary and his wife, 1 woman missionary, 1 native woman, 1 place of worship, 1 day school, 1 boarding school, and 67 professed Christians.

SORABJI KHRASEDI: Died August 14, 1894. A Parsee of Bombay. Amid the bitterness of persecutions he confessed his faith boldly and clearly at the police-office, where he was under police protection; before the magistrates and a great company of Hindus, Parsees, and Mohammedans. To escape from the abuse to which he was exposed in Bombay, he accepted service under the SPG at Ahmedabad in the summer of 1842. Later he entered the CMS divinity class at Nasik, Poona, serving as an honorary missionary. He was familiar with the two great Zoroastrian languages, the Zend and Pehlevi, to the mysteries of which only Parsee high priests are admitted. And he published his book on The Comparison of Zoroastrianism and Christianity a valuable addition to Parsee literature. His works, entitled Zoroaster and Zoroastrianism, and Life of Christ, were left by him unfinished. He was a member of the Gujarati Bible Revision Committee; and the New Testament portion of his work, and all of his work on the Old Testament, except one book, were finished just before his labors ceased. His heroic death, as well as his consecrated life, was the means of the spiritual awakening of many Parsees and Hindus of Poona. The booklet (CMS), How a Native Clergyman Died, written by his daughter, is an impressive work.

SOUTH AFRICA DUTCH REFORMED CHURCH MISSION TO BRITISH CENTRAL AFRICA: Headquarters: Sea Point, Cape Town, Cape Colony.

In 1884 the ministers of the Dutch Reformed Church of the Cape Colony decided to form a Ministers’ Mission Union, with a view to supporting their own ordained representative in the foreign mission field. They undertook to contribute each from $25 to $50 per annum, out of their private salary, for this purpose. While looking out for a field in which to work, they were generously invited by the Livingstonia Mission of the Free Church of Scotland to come to the region west of Lake Nyasa and share their extensive field there. In 1888 the Rev. A. C. Murray, an ordained minister of their church, after an eighteen months’ course of medical training in Scotland, left South Africa as their first representative in that field. The following year he was joined by another missionary and they selected the district to the S. W. of Lake Nyasa as their sphere of labor.

The first station was Mvera, in what is now the British Central Africa Protectorate. Gradually the work extended, until in 1890 the station consisted of sixteen workers (including three missionaries), working at three main stations—Mvera, Kongwe, and Mkoma.

In 1897 the Synod of the Dutch Reformed Church of the Orange Free State decided to start their own mission work in Central Africa, and sent out two men, who proceeded from Mvera farther to the west, and planted their first station at Magwero, in the district of N. E. Rhodesia, near Fort Jameson. This work, also carried on uninterruptedly all the time, could not be extended owing to the South African war, but within a year after peace was made the Orange River Colony Synod decided to send out three more men (one being an agriculturist), and a new station was started at Madzimoyo. In 1899 the chairman of the Cape Colony Mission, Andrew Murray, urged upon the committee definitely to pray for a doubling of the stations and workers in Nyasaland within five years. To many friends of the Mission this seemed too much to ask for, the more as within six months the devastating war broke out. But within four years there were thirty-four workers instead of sixteen, and six stations instead of three. The first two converts were baptized in 1894, but no others were admitted into the Church till 1897, when thirty adults were baptised. Since then the number has steadily increased, till in 1903 there were in all close upon three hundred church members, and at the end of 1905 over seven hundred. The district occupied by the above Mission in Nyasaland (not counting N. E. Rhodesia) contains about 600,000 natives. With two more stations it will be sufficiently occupied and can then be worked by means of native evangelists and catechists. There are over one hundred outschools under native teachers, with an attendance of 7,000 children, while about 10,000 natives are continually under religious influence and instruction. The conditions of baptism are rather strict, as the candidate must have been at least one year in the catechumen class, and have manifested a thorough breaking with all heathen customs during that time. Consequently cases of discipline are rare.

There are seven unmarried women workers in this field, who are supported by the Women's Mission Union (Vrouwen Zending Bond) of the same church. This union also supports women workers in other mission stations in the Cape Colony, Transvaal, Bechuanaland, and Mashonaland. Headquarters: Huguenot College, Wellington, Cape Colony.

SOUTH AMERICAN MISSIONARY SOCIETY: Captain Allen Gardiner, the founder of the South American Missionary Society, first visited South America with a view of establishing a mission in 1838. For years the idea of his mission was looked upon with favor, and as the pioneer of a Christian mission to
the most abandoned heathen." With this object steadily in view, he went through a series of travels and adventures for some years, taking his wife and children with him on long, perilous journeys. After repeated disappointments in other countries, he was led to direct all his efforts toward the natives of South America. His attempts to reach the mountain tribes were defeated by the jealousy of the Roman Catholic priests. At last he thought Spanish priests would consider it worth while to interfere with anything he might attempt among the poor savages at the desolate southern corner of the great continent, and by beginning with them he hoped to reach in time the nobler tribes. In 1830 Captain (afterward Admiral) Fitzroy had been sent by the British Government to survey the coasts of Tierra del Fuego. On his return to England he took with him, for a visit, three native lads and a girl of nine years. They were kindly treated, and Captain capable of learning a good deal. When, a year later, Captain Fitzroy took them back to their own land, he was accompanied by a Mr. Williams, who hoped to remain in Tierra del Fuego as a missionary. A very few days sufficed to show the danger of this attempt; he returned to the vessel, and all thought of missionary work in this region was abandoned until Captain Gardiner took it up. His hope was that the natives who had visited England might be still alive, and that one of them,—called "Jemmy Button"—if he had not forgotten all his English, might act as interpreter and friend. But he found great difficulties in the way. England, while warmly supporting missions to other parts of the world, seemed utterly indifferent to the fate of South America. After much effort he succeeded, in 1844, in forming a society called the Patagonian Missionary Society; soon after, he, with a few companions, attempted to establish a mission in Tierra del Fuego. Owing to the hostility of the natives it was a complete failure. The Society in England was much discouraged; the journal contains many farewell messages to beloved friends at home. One by one the little band passed away; it is probable that the brave Gardiner himself was the last survivor. The last entry in his diary is September 5; a little note was also found, dated September 6. The long-looked-for vessel, owing to strange mistakes and delays, did not reach the attempt until the end of October. Following the directions written on the rock, the boat was found, with one dead body on board, and another on the shore, while books, papers, etc., lay scattered around. "The captain and sailors cried like children at the sight." A violent gale arising, they dared not remain longer, but put out to sea at once, carrying the sad news to Montevideo. By this time friends in England, greatly alarmed, had applied to the government for aid, and the frigate "Dido" was sent to search for the lost missionaries, reaching the coast in January. Guided by the writings on the rocks, the officers soon completed the sorrowful discoveries. In Spaniard Harbor they saw on a rock the verses from Psalm lxii: 5-8, "My soul, hope thou in God, for my expectation is from Him," etc., with the drawing of a hand pointing to the spot where the wandering parties of "Pioneers" perished. The bodies of Maidment and Gardiner were found. All the remains of the martyrs were reverently collected, and, after the reading of the burial service of the Church of England, were buried in the grave beside the "Pioneer" on the previous day. The "Dido" were lowered, and three volleys fired, as in honor of an officer's funeral. The heroic death of Gardiner and his companions accomplished what in life they had failed to do. The Christian public of England soon resolved that the dying wishes and prayers of the martyrs should not have ascended to heaven in vain. The last directions of Captain Gardiner, so wonderfully preserved, were acted upon; the Society was re-formed according to his plan, and a Christian mission firmly established in Tierra del Fuego, and the South American Missionary Society is rapidly extending its agencies over many regions of the great continent.

According to the plan of Captain Gardiner, the South American Missionary Society should have the threefold object of supplying the spiritual wants of his own fellow-countrymen," the Roman Catholics, and the heathen in South America. On this general basis, the work of the Society has now four departments: 1. Missions to the heathen. 2. Evangelistic (including educational) work. 3. Chaplaincies. 4. Work among seamen.
I. Missions to the Heathen. (1) Southern Mission: This is the direct successor of Capt. Gardner's work, and is especially for the Yahgans of Tierra del Fuego. It was commenced in 1854, when the missionary schooner “Allen Gardner” sailed for the Falkland Islands. The place chosen for a base of operations was Keppel Island, a small uninhabited island lying north of the west island of the Falklands. From there, in 1856, a cautious intercourse was commenced with the Fuegians, and they were encouraged to visit the mission station at Keppel in small parties. After much toil of preparation a Fuegian family from one of the larger islands near Cape Horn was brought to Keppel by Mr. Allen Gardner, son of Capt. Gardner, in 1858. The man was Jemmy Button; he was still able to speak broken English, and from him, at this early date, the missionaries learned something of the Yahgan language. Much pains were taken to gain the confidence of these natives, and to impart to them some religious knowledge. So friendly did they seem that in 1859 the missionaries, Teketika, on Hoste Island, Ushuaia, on the mainland, and Keppel Island, each under a missionary. 

(2) The Paraguayan Chaco: The mission to this, in the western part of Paraguay, was commenced in 1888. There are (1902) 2 central and 4 outstations, 19 missionaries (including wives). The work is carried on by itinerating and by schools for the Indians. The report of Bishop Every (1902) speaks of the spiritual results among the Indians as most encouraging, as also the progress in the schools. A significant event was the establishment of a native church council in 1894 as a Jubilee Memorial. The first station, with 6 teachers, a girls’ school, with 4 teachers, an infant school, with 4 teachers, and an industrial and trades’ institute, with 3 teachers. Connected with this station, at Maldonado, are two schools, one for boys and one for girls, and at General Urquiza, a mission hall and schools, the latter not directly under the superintendence of the missionaries. Two girls’ schools, excluding these outstations, are crowded. Medical work, as elsewhere, is an invaluable adjunct in winning the confidence of these natives, and to impart to them some religious knowledge. So friendly did they seem that in 1859 the missionaries, Teketika, on Hoste Island, Ushuaia, on the mainland, and Keppel Island, each under a missionary.

(3) The Araucanian Mission: This was begun in 1894 as a Jubilee Memorial. The first station occupied was Cholchol, and the second, Quepe. The staff (1902) consisted of one clergyman, 7 laymen, 8 women and 1 Mapuche chief. The work is chiefly among the Mapuche tribe of Indians, who have not as yet, except some of the younger men, come under the influence of the Roman Catholic Church. They seem anxious to learn, and the schools, particularly the industrial school at Quepe, are crowded. Medical work, as elsewhere, is an invaluable adjunct in winning the sympathy of the people.

II. Evangelistic Work: This is carried on at Palermo, Buenos Aires (1898), and Alberdi, Rosario (1896). At Palermo there are a boys’ school, with 6 teachers, a girls’ school, with 7 teachers, an infant school, with 4 teachers, an older girls’ school, with 3 teachers, and an industrial and trades’ institute, with 3 teachers. Connected with this station, at Maldonado, are two schools, one for boys and one for girls, and at General Urquiza, a mission hall and schools, the latter not directly under the superintendence of the missionaries. At Alberdi, Rosario, there is a home and school. The whole number of employed workers is 54, besides 9 honorary helpers and several physicians, who render gratuitous service.

III. Chaplaincies: These are located at São Paulo and Santos, Brazil; Fray Bentos, Uruguay; Welsh Colony, Chubut, Patagonia; Sandy Point (Punta Arenas), Straits of Magellan; Villa Rica, Paraguay; Quino and Coquimbo, Chile. In connection with several of these there are schools, and not a little general evangelistic work is done.

IV. Work for Seamen: This includes a Sailors’ Home, Rio de Janeiro; a Seamen’s Mission, Fray Bentos, Uruguay; Welsh Colony, Chubut, Patagonia; Sandy Point (Punta Arenas), Straits of Magellan; Villa Rica, Paraguay; Quino and Coquimbo, Chile. In connection with several of these there are schools, and not a little general evangelistic work is done.
sympathizing with them as to the appointment of slave-holders.

At the call of the Board of Managers of the Virginia Foreign Mission Society, there assembled in Augusta, May 8, 1845, 310 delegates from the States of Maryland, Virginia, North and South Carolina, Georgia, Alabama, Louisiana, Kentucky, and the District of Columbia. Owing to the short notice of the meeting, other States were represented only by letter. The committee appointed for the purpose presented a resolution, "That for peace and harmony, and in order to accomplish the greatest amount of good, and for the maintenance of those Scriptural principles on which the General Missionary Convention of the Baptist Denomination of the United States was formed, it is proper that this convention at once proceed to organize a society for the propagation of the Gospel." Then followed the adoption of a constitution which was "precisely that of the original union; that in connection with which, throughout his missionary life, Adoniram Judson lived, under which Ann Judson and Boardman died. We recede from no step. We use the very terms, and we uphold the true spirit and great object of the late General Convention."

Thus the Southern Baptist Convention claims to be the real and proper successor and continuator of that body which "at a special meeting held in New York, November 19, 1845, was 'dissolved,' and the American Baptist Missionary Union, with an entirely new constitution and a different basis of membership, was organized in its stead."

A Board of Foreign Missions was appointed, to be held in Richmond, Virginia, and one for Domestic Missions, to be located in Marion, Alabama. In 1882 the location of this Board was changed to Atlanta, Georgia, and its name was changed to the Home Mission Board. It has had a career of great usefulness. A Sunday-school Board was organized in 1891, with the Rev. J. M. Frost, D.D., as corresponding secretary. The work of this Board, or publishing house, located at Nashville, Tenn., has steadily grown.

Thus the Southern Baptist Convention has gathered around itself the enthusiastic support of the Baptist churches of the South; and the wisdom of its formation is evidenced by the fact that while Southern Baptists contributed to the Triennial Convention in 31 years, from 1814-1845, $212,000, during the 34 years, from 1845-1879 (covering the period of the war), their contributions for Foreign Missions alone were $939,377. From 1880 to 1890 the contributions were $812,662, and from 1890 to and including a part of 1903, contributions to the Foreign Mission Board were $1,775,853; for the single year 1902-3, $218,752.62, or more than the contributions of the entireSouthern States to the "Triennial Convention" prior to its dissolution.

Development of Work: Immediately after the organization of the Board, the officers were instructed to correspond with the Boston Board to make any equitable and prudent arrangement with that Board, to take a portion of its missions under the patronage of the Convention. At the suggestion of the Boston Board, through Dr. Francis Wayland, it was agreed that "the property and liabilities of the General Convention should remain with that body," and that "the mission-aries should have the choice of the associations with which they would be connected."

Under this arrangement Rev. J. L. Shuck, the first American Baptist missionary to China, and Rev. I. J. Roberts, who had followed Mr. Shuck in 1836, gave in their adherence to the Southern Convention. Rev. S. C. Clepton and the Rev. George Pearcy were commissioned to join them, and the missions of the new Board were fairly inaugurated.

Coincident with the establishment of the China mission, it was determined to commence work on the coast of Africa, where missions of the Northern Board were already in operation, and in 1847 stations were formed in Liberia and in Sierra Leone, and in 1850 in Central Africa. As early as 1850 the attention of the Board was directed to South America as an important field, but it was not until 1859 that the opportunity was afforded for carrying out the plans of the Board. The Rev. T. J. Bowen, who had been obliged to leave Africa on account of ill-health, volunteered for the South American field; he was given a station, and a station was founded at Rio de Janeiro from which point the work has rapidly spread.

In 1859 the needs of Japan attracted the attention of the Board, and in 1860 four missionaries, two ministers and their wives, were sent. All were lost at sea before reaching their field of labor. The enterprise was deferred, but was never abandoned. In 1889 four missionaries were sent out, who founded the present mission.

The duty of Baptists to send the pure Gospel into the Catholic countries of Europe was felt by the Board from the very beginning, and France was chosen as a field for missionary labor; but the occupation of Rome by Victor Emmanuel in 1870 opened Italy to missionary work, and drew attention thither, and in 1871 Rome became a center of operations, which have spread throughout the peninsula, Sicily, Sardinia, and a portion of Austria. In 1903 the Board began a new mission in Buenos Aires, Argentine Republic, sending thither several missionaries.

Statement of the Missions, China: The work of the Southern Convention in China is carried on under three missions, South China, with Canton as a center, but extending to the interior; Central China, with Shanghai as a center, and the Shan-tung province. In 1846 the work was begun in Canton by the Rev. George Pearcy and Rev. Samuel Clepton. The work has progressed since that time with little or no interruption, and Canton has been the largest center of the work in China. The Mission now includes 13 churches and 46 stations, in which labor 20 foreign missionaries and 80 native helpers; the church membership is 2,404.

Shanghai was chosen as a station at the same time as Canton, being situated in a central position on the coast. It is a city of great importance for missionary operations, since the Chinese come here from all parts of the empire, the number of transient inhabitants being generally at above 100,000. During the Tai-ping rebellion in 1854 the mission property was destroyed, but on the seizure of the city by the Imperialists, full restitution was made, and the work renewed. The Tai-ping movement was strictly religious and iconoclastic in its origin, and proved to end a benefit to the mission, for it roused the moral sense of the people and offered a blow at
THE ENCYCLOPEDIA OF MISSIONS

SOUTHERN BAPTIST

South: The mission in South America was begun in 1860 at Rio de Janeiro by the Rev. T. J. Bowen and his wife. The health of the former, which had caused his transfer from Central Africa, compelled him to again give up his work, and with his return the mission in South America was suspended. For twelve years nothing was done, at the end of which time, at the urgent request of a church of settlers in Brazil from the Southern United States, the Board again renewed its operations. The Board has many stations in Brazil, including Rio de Janeiro; the coast; and Manacapuru, on the coast, in the northeast; Bahia, midway between Rio de Janeiro and Pernambuco; Maceio, on the coast; and Para, near the mouth of the Amazons, and Manacapuru, more than a thousand miles interior. There are 21 foreign missionaries at work, 18 native preachers, 16 native assistants, 48 churches, and 75 stations; church membership over 3,000.

As previously stated, the Board has recently operations in the Argentine Republic. At the time of this writing (January, 1904) four missionaries have been appointed, but only one has reached his field of labor. Indications point to a prosperous mission.

ITALY: In 1850 the Board began deliberations with regard to work in the Catholic countries of Europe, but no mission was begun until 1870, when Rev. Wm. N. Cote, M.D., who was secretary of the YMCA of France, was appointed missionary of the Southern Convention. On the opening of Italy for evangelistic work, by the victory of Victor Emmanuel, operations were immediately begun in that city, and from there have spread throughout Italy. There are now 25 churches and 37 stations of the Southern Convention on the peninsula, including Rome, Milan, Venice, Modena, Carpi, Bari, Naples, and, besides others, as Cagliari and Iglesias—on the island of Sardinia; and a station in Trieste, Austria, and Cannes, France, operated in connection with the Italian Mission. There are 4 foreign missionaries, 4 native workers, and a total membership of 661.

MEXICO: The missions of the Southern Baptist Convention in Mexico are divided into two groups, North Mexico and South Mexico. North Mexico takes in the cities of Saltillo, Torreon, Durango, and Chihuahua, besides outstations, and the South Mexican Mission includes the cities of Guadalajara, Morelia, Toluca, and Leon, besides outstations. There are in all Mexico 17 missionaries, 12 ordained and 7 unordained native helpers, 43 churches, and over 1,300 members, 32 stations, 13 houses of worship, 18 schools, including both Sunday schools and day schools, with 623 pupils. A number of the Mexican churches are self-supporting in whole or in part.

JAPAN: In 1860 the Board appointed three missionaries to Japan; two of them were preachers, and the third a native helper. Their field of labor was confined for the most part to the island of Kiushiu, but include such cities as Fukuoka, Nagasaki, Kokura, Kumamoto, and Kagoshima.

The work of the Foreign Mission Board has steadily advanced, through all the years since its birth in 1845, and that, too, in spite of the desolations of the Civil War in this country and the disheartening years that followed. During more than fifty years, J. B. Taylor, D.D., and H. A. Tupper, D.D., were the able secretaries. In all the great countries where its missionaries are laboring the work is going forward with quickening pace, and in the homeland the spirit and liberality of Southern Baptists give evidence of a day of even greater things.

SOUTH SYLHET. See SYLHET.

SOUTH VILLAGES: Name applied by the BZM to a group of a score or more villages in Bengal, India, lying south of Calcutta, in the district occupied by the BMS between Port Canning (Mutlah) and Diamond Harbor, and
including the 24 Pargannas. Lakikantopur is the village where the 2 women missionaries of the BZM reside (1903), giving regular religious instruction in 11 other villages. They have 31 native workers and 9 day schools under their care.

**SPALDING, Henry H.:** Born at Bath, N. Y., 1804; graduated at Western Reserve College, 1833, and Lane Theological Seminary, 1836; ordained Aug., the same year appointed by the ABCFM in 1836 missionary to the Nez Perces Indians, with his wife, Dr. and Mrs. Whitman, and William B. Gray. In a company of fur-traders they traveled on horseback nearly 2,200 miles beyond the Missouri River, to Fort Walla-Walla, a trading post of the Hudson Bay Company, which they reached September 3, 1836, being four months and six days on the journey from Liberty, Mo., to that place. The mission was broken up by the massacre of 75 Whiteman and other men in 1847. In 1862 he resumed his work, but remained only a few years. In 1871 he renewed his labors under the Presbyterian Board of Foreign Missions, in which he continued till his death, which occurred at Lapnor, Idaho, August 3, 1874. The his labors were interrupted, he accomplished a great work among the Indians. Over 900 of the Nez Perces and Spankens were added to the church through his instrumentality. He prepared a translation of the Gospel of Matthew and a collection of Nez Perces hymns. At the time of his death he had an translation of the Acts well advanced.

**SPALDING, Levi:** Born at Jaffrey, N. H., August 22, 1791. Died June 18, 1874. Graduated at Dartmouth College, 1815, and Andover Theological Seminary, 1818; sailed for Ceylon, August 22, 1791, Died June 18, 1874. Graduated at Dartmouth College, 1815, and Andover Theological Seminary, 1818; sailed for Ceylon, August 22, 1791, under the ABCFM. He labored at Maney for several years. In 1833 he removed to Calcutta, and with Mrs. Spaulding took charge of the girls' boarding school, which was under their care for nearly forty years. He was one of the most accurate Tamil scholars in Southern India, having so mastered the language as to use it with great facility and power. More than twenty Tamil tracts were prepared by him, and many of the best lyrics in the vernacular hymnbook were from his pen. He prepared two dictionaries, one Tamil, the other English and Tamil, and took a prominent part in the revision of the Scriptures. He furnished an excellent translation of the Virginia Progress, and other parts of the Scriptures, History, which is used in the schools. Schoolbooks, hymnbooks, tracts, and Gospels passed through his hands for revision and proofreading. But he was far from being chiefly occupied with these tasks. In season and out of season, to merchants on their verandas, or seated with wayfarers under the hedge, to the poor and the maimed, in lanes and highways, and to the children in the school or the street, wherever he met a native, he ceased not to preach and to teach Jesus Christ. His fluency in the colloquial language, his apt quotations from Hindu books, his original illustrations, and ready and racy sayings, combined with his genial humor, gave him great influence with the natives.

Mrs. Mary Chrysis Spaulding, his wife, rendered equally conspicuous services to the mission in another line. The care of the girls' boarding school was her special duty for almost forty years. Her sympathetic services to natives and to missionaries alike, when there was suffering to be alleviated or sorrow to be borne, gave her the affectionate title of "Mother Spaulding." She died at Batticotta one year after her husband finished his labors.

**SPRINGFONTEIN:** A village about 40 miles N. W. of Bethulie, in Orange River Colony, S. Africa. Station of the Berlin Missionary Society (1894), with (1903) 1 missionary, 13 native workers, and 639 professed Christians.

**SRINAGAR:** Capital of Kashmir, India, situated in the beautiful valley of the Jhelum River, about 175 miles due N. of Amritsar in the Punjab. It lies on both sides of the river, boats on which are a principal means of conveyance between different parts of the town. Canals extend this with great facility and power. More than 900 of the Nez Perces hymns. At the time of his death he had a translation of the Acts well advanced.

Mrs. Bishop (better known as a traveler and writer by her maiden name of Isabella Bird) has given money to build a woman's hospital here, as a memorial to her late husband, Dr. John Bishop. The Maharajah gave an excellent site.

**SRIPERUMBUDUR:** A village in Madras, India, situated in the N. Arcot region, about 22 miles S. E. of Chittur. Station of the Leipzig Missionary Society (1898), with (1903) 2 native workers, 8 outstations, 8 places of worship, and 10 day schools. Station also of the UFS, with (1903) 1 missionary, 20 native workers, 8 outstations, 1 place of worship, 11 day schools, and 105 professed Christians.

**STACK, Matthew:** Born at Mauendorf, Moravia, March 4, 1711. Died, December 21, 1757. In his early youth he had deep religious impressions, and, leaving Moravia, he went to Herrnhut, in Saxony. Soon after his conversion he received from Count Zinzendorf an impression of the condition of the Greenlanders which led him to devote himself to work among the heathen. He set out with his cousin, Christian Stack, and Christian David for Copenhagen, January 19, 1733. On their arrival the town found the mission proposed by Egede was about to be abandoned, communication with Greenland closed, and their project was regarded as romantic and ill-timed. They applied to Count Von Pless, the king's chamberlain, who fully stated the difficulties. "How will you live?" he asked. "We will cultivate the soil, and look for the Lord's blessing." "There is no soil to cultivate—nothing but ice and snow." "Then we must try to live as the natives do." "But in what will you live?" We will build ourselves a house." "But there is no wood in that country." Then they will dig holes in the ground and live there." "No," said the Count, seeing their faith, "you shall not do that. Here are $50 to help you: take wood with you."
Other persons aided them. The king decided to reopen communication with Greenland, and gave them a letter to Egede, commending them to his kind attention.

Matthew Stack embarked with his two friends, April, 1783, and after a six weeks' voyage reached Ball's River, where he selected a place for a mission and called it New Herrnhut. In commencing his work Matthew Stack encountered great obstacles; the natives were difficult of acquisition; the natives not only refused to listen to him but were positively hostile, in various ways, annoying and persecuting him. They mimicked his reading, praying, and singing; interrupted his devotions by hideous howling and beating of drums. They stoned him, destroyed his goods, attempted to send his boat out to sea, and even from time to time they attempted to take his boat out to sea, and even 14 native workers, 2 outstations, 1 day school, and 277 professed Christians, of whom 190 are communicants.

STEINKOPF: A town in Cape Colony, Africa, a little south of the Orange River, 56 miles E. of Port Nolloth. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 14 native workers, 2 outstations, 2 day schools, 1 Sunday school, and 1,171 professed Christians, of whom 375 are communicants.

STELLENBOSCH: A town in Cape Colony, South Africa, 25 miles by rail east of Cape Town. Population, 3,173. Station of the Rhenish Missionary Society, with (1903) 2 missionaries and their wives, 1 woman missionary, 18 native workers, 1 Sunday school, 1 day school, and 2,915 professed Christians, of whom 1,260 are communicants.

STERN, Rev. Henry Aaron, D.D.: Born in 1820 at Unterreichenbach. Died in 1885. His parents were zealous and orthodox in the Jewish creed. It was their hope that he might become a doctor, and to that end they sent him to a school at Frankfort. While there he developed a taste for commerce. When seventeen years old he got a situation in Hamburg. While there he used to pass the house of Mr. Moritz, one of the missionaries of the London Society for the Jews, who had a glass case by his door in which were open Hebrew and German books. Through reading these from time to time he became convinced that Christianity was more rational than Judaism.

In 1828 he went to London, and one Sunday a young friend suggested they should go to the Mission to the Jews in the Unterreichenbach. On the way back they agreed to go to the mission and call for him, he raised his clasped hands and said, with deep emotion, "Yes, dearest Savior, come soon, come soon." He died December 21, 1877, in the 77th year of his age.

STALLYBRASS, Edward: A missionary of the LMS to Siberia from 1817 to 1839. His first station was Tykyst. In 1819 he commenced a station at Selenginek. The early time of his residence here was spent in exploring the southeast of Lake Baikal with Mr. Rhumm, and later with Mr. Swan among the Chorinsky Buriats. On his return from a visit to England he made his home at St. Petersburg, and for some time was engaged in the revision of the Mongolian Scriptures. In 1840 the Siberian Mission was suppressed by the Russian Government, and he returned to England. He died at Shooter's Hill, Kent, July 25, 1884, aged 91.

STANLEY: A settlement in the N. W. of Canada, situated at the expansion of the Congo, just above the rapids. Altitude, 920 feet. Station of the BMS (1882), with 1 missionary and his wife, 1 native worker, 1 Sunday school, 1 day school, and 5 professed Christians. Some use the name Arrington for this station.

STANLEY POOL: A settlement in the Congo Free State, Africa, situated at the expansion of the Congo, just above the rapids. Altitude, 920 feet. Station of the BMS (1882), with 1 missionary and his wife, 1 native worker, 1 Sunday school, 1 day school, and 5 professed Christians. Some use the name Arrington for this station.

STEINHOF: A town in Cape Colony, Africa, a little south of the Orange River, 56 miles E. of Port Nolloth. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 14 native workers, 2 outstations, 2 day schools, 1 Sunday school, and 1,171 professed Christians, of whom 375 are communicants.
for four years and a half kept him and his fellow-workers in prison and in chains. Nothing but the most faithful and devoted piety, his energy and devoted piety, his winning, genial manner, made Mr. Stoddard a man of mark, respected by all and loved by those who knew him. In 1856 the Persian authorities undertook to hamper the liberties of the mission, and Mr. Stoddard was the one naturally chosen to go to Tabriz to secure redress. On his return from this successful errand he was attacked by typhus fever and died January 22, 1857.

STONE, Seth Bradley: Born at Madison, Conn., April 30, 1817. Died June 27, 1877. Graduated at Yale College, 1842, Union Theological Seminary, 1850; embarked as a missionary of the ABCFM for Africa, October 14, 1850; was stationed among the Zulus. His health having failed, he returned to the United States in 1875. He was a faithful, hard-working missionary for twenty-four years among the Zulus. A close student of the Zulu language, he translated portions of the Old and New Testaments. He published an edition of church history in Zulu; also a summary of general history. Thirty-nine of the hymns in the Zulu hymn-book were translated or composed by him.

STRAITS SETTLEMENTS: A crown colony of Great Britain, comprising Singapore, Penang, and Malacca, all of which are treated of in separate articles. In 1886 the Keeling or Cocos Islands, a small group 1,200 miles southwest of Singapore, owned by an English family, were placed under the government of the Straits Settlements, and in 1886 an uninhabited island, 200 miles southwest of Java, named Christmas Island, was also added to the Straits Settlements.

STRONACH, John: Born at Edinburgh, Scotland, March 7, 1810; studied at Edinburgh University and Theological Academy, Glasgow; was ordained August 10, 1837, with his elder brother Alexander, and sailed as a missionary of the LMS for China, reaching Malacca March 2, 1838. In May, 1847, Mr. Stronach removed to Shanghai, having been appointed one of the delegates for the revision of the Chinese version of the New Testament. On the completion of that work he returned to Amoy. In 1853, on March 17, 1876, he left Amoy, and, after visiting Japan, proceeded via America to England, arriving January 6, 1877. In 1878 he retired from foreign missionary service. He died in Philadelphia, U. S. A., October 30, 1888, after forty years' uninterrupted labor in China. His powers were of no common order. He stood well in his university, and made a great mark in the translation of the Bible into Chinese, known as the Delegates' Version. He was a most idiomatic master of Chinese, and it was a charm to hear him speak. His literary ability did not cease with Bible translation. One of his tracts called the "Hek bun" (Inquirer) was a masterly setting forth of the difficulties felt by a literary Chinaman, and the answers of the missionary. He assisted in revising Dr. Douglas' dictionary of the Amoy dialect. He was greatly blessed as an evangelist in Amoy, and labored indefatigably in starting stations, appointing native ministers and working with them. With all this he was overflowing with high spirits and had an unfailling fund of humor, which served him well when opposers became annoying during his street preaching.
**STUDENT VOLUNTEER MOVEMENT for Foreign Missions: I. Origin:** The Student Volunteer Movement originated at the first international gathering of Christian colleges, which was held at Mount Hermon, Mass., in 1886. Of the 250 delegates who attended, twenty-one had definitely decided to become foreign missionaries; (2) to enroll a sufficient number of intending missionaries to prepare for their life-work and to enlist their cooperation in the missionary life of the home churches; (3) to lay an equal burden of responsibility on all students who are to remain as ministers and lay workers at home, that they may actively promote the missionary enterprise by their intelligent advocacy, by their gifts and by their prayers.

I. **Organization:** About fifty volunteers attended the student conference at Northfield in the summer of 1888. It was then decided that some organization was necessary in order to conserve the results, and a committee was appointed by the volunteers present to effect such an organization. This committee met in December, 1888, and an organization was effected, taking the name of the Student Volunteer Movement for Foreign Missions. The Executive Committee, consisting of John R. Mott, Robert P. Wilder, and Miss Nettie Dunn, was appointed, each member representing one of the three then existing Christian organizations among students. In January, 1889, the new Committee began its work. In 1896, the work having assumed so much larger proportions, it was found desirable to enlarge the membership of the committee to six members, so that it now consists of John R. Mott, J. Ross Stevenson, W. Harley Smith, H. P. Andersen, Miss Susie Little, and Miss Bertha Clark. Mott is the chairman, J. Ross Stevenson the vice-chairman, and Fennell P. Turner the general secretary and treasurer. In order to transact the ordinary business of such an organization, it is incorporated under the laws of the State of New York. There is a Board of Trustees and an Advisory Committee.

II. **Purpose:** The Student Volunteer Movement is in no sense a missionary board. It never has sent out a missionary, and never will. Those who become student volunteers are expected to go out as missionaries of the Church. The Student Volunteer Movement is simply a recruiting agency. It does not usurp or encroach upon the functions of any other missionary organization. It is unsparingly loyal to the Church, and has for its watchword the entire support of missionary work and of the missionary board on the continent. Its purpose, as stated by the Executive Committee, is as follows: "(1) To awaken and maintain among all Christian students of the United States and Canada intelligent and active interest in foreign missions; (2) to enroll a sufficient number of properly qualified student volunteers to meet the

| **III. Membership:** | The membership is drawn from those who are or have been students in institutions of higher learning in the United States and Canada. Only those are entitled to become student volunteers who sign the "declaration" of the Movement, which is as follows: "It is my purpose, if God permit, to become a foreign missionary." The meaning of this declaration, as interpreted by the Executive Committee, is as follows: "This declaration is not to be interpreted as a 'pledge,' for it in no sense withdraws one from the subsequent guidance of the Holy Spirit. It is, however, more than an expression of mere willingness or desire to become a foreign missionary. It is the statement of a definite purpose formed under the direction of God. The person who signs this declaration fully purposes to spend his life as a foreign missionary. Toward this end he will shape his plans; he will devote his energies to prepare himself for this great work; he will do all in his power to remove the obstacles which may stand in the way of his going; and in due time he will apply to the Boards to be sent out. Only the clear leading of God shall prevent his going to the foreign field. While it is the duty of every Christian to ask this question, no one should decide it without careful thought and earnest prayer. Having confronted the question, no one should leave it until a decision pleasing to God has been reached. 'Understand what the will of the Lord is.'" |

| **IV. Field:** | The field for the cultivation of which the Movement considers itself responsible embraces all colleges, universities, and other institutions of higher learning in the United States and Canada. There are fully 1,000 such institutions, in which are matriculated over 200,000 students. From these institutions come the leaders in all the influential walks of life. No work, therefore, can be more important than that of making the student centers strongholds and propagating centers of missionary intelligence, enthusiasm, and activity. |

| **V. Methods of Cultivation:** | The secretaries of the Movement are a General Secretary, an Assistant Secretary, an Educational Secretary, and the Traveling Secretaries. The position of traveling secretary is usually held for one year by a student volunteer ready to go to the mission field. Returned missionaries also have been employed. In a few cases the secretaries have held the position longer. The size of the staff of traveling secretaries is determined by the funds at the disposal of the Executive Committee, and by the number of available candidates. The traveling secretaries visit the colleges and deliver addresses on missions, meet with missionary committees and volunteer bands, organize mission study classes, and in every way possible promote

---

The text continues with additional details about the functions and goals of the Student Volunteer Movement for Foreign Missions.
the missionary activities of the colleges—but the
chief object of their work is by public address and
personal interview to lead students to give their
lives to missionary service. The student volun-
teer bands, in an institution are organized into a
volunteer band. The objects of the volunteer
band are to deepen the missionary purpose and
spiritual life of the members, to secure other
volunteers, and to promote missions in the college
by the volunteer band. The movement is con-
ected with each Young Men’s or Young Women’s
Christian Association in the college there is a
missionary committee whose duty is to culti-
vate the missionary life of the institution. The
department of the Education Secretary, has to do
with the conduct of the missionary study classes
in the colleges. The Movement in conjunction
with the Student Young Men’s Christian Asso-
ciation publishes during the academic year a
magazine called The Intercollegian, which circu-
lates among the students and is a valuable
agency in keeping the volunteers in touch with
the aims, methods and results of the Movement,
and in keeping the Movement before the Church.
The Movement publishes pamphlets, mission
studies, address books, and supplements litera-
ture which may serve its purpose. The sales of these
publications amount to more than $25,000 copies
per year.

The volunteers in cities which are large student
centers, and in some States, are organized into
unions. The purpose of these Unions is to pro-
mote the missionary interest in the different
colleges represented in them. In the United
States and Canada there are held each year seven
student conferences for men and five for women.
At each one of these conferences special attention
is given to developing the missionary life and
activity among students. At these conferences,
missionary institutes are held to train the leaders
of volunteer bands, of mission study classes, and
other missionary activities of the institutions
represented. Once in four years an international
convention is held. For four such conventions have
been held, the attendance being as follows:

VIII. Results: 1. The work of the Movement,
through visitation, summer conferences, con-
ventions and correspondence, has reached more
than 800 institutions. In more than half of
these institutions nothing was being done in the
interests of missions prior to the effort put forth
by this Movement, or, at its initiative, by the
Student Young Men’s or Young Women’s
Christian Association. In many of the col-
leges, where there has been for years more or less missionary inter-
est, it has been the testimony of professors and
of others who are in a position to know that the
Movement has greatly increased that interest.
Each year the traveling secretaries bring to the
attention of thousands of students the needs of
the non-Christian world and the claims of mis-
sionary service.

2. The Movement has been a principal factor
in the recent remarkable development in the
scientific study of missions, not only in the
colleges and theological seminaries, but also in
churches and young people’s societies. In its
eyears the Movement simply recommended
subjects and books for study; later it outlined
courses of study for students. In 1894 the Educa-
tional Department was organized, and D. Willard Lyon
was appointed Educational Secretary. He was
succeeded by Harlan P. Beach in 1895. When
the department was organized, there were about
a score of mission study classes in all the colleges,
universities, and theological seminaries in North
America. Since then the text-book literature of
the Movement has been created, and the reports
for the year 1902-1903 show that there were 6,700
students enrolled in 544 classes in 319 institu-
tions.

3. Since its inception the Movement has never
cessitated to press upon students the claims of
foreign missionary service as a life work. Up to
the beginning of 1904 the names of over 2,400
student volunteers have been reported as having
reached the mission field, going out in connection
with more than fifty different missionary agencies,
and scattered throughout all parts of the non-
Christian world. A large number of volunteers
who have been hindered from going to the foreign
mission field have taken up mission work in the
home field.

4. As a result of the work of the Movement, the
gifts of students for missions have steadily
increased; in the academic year 1902-03 over
$68,000 was contributed for missions by institu-
tions reporting. The Movement has exercised a
mighty reflex influence on the religious life of the
colleges and theological seminaries. If the vol-
unteers and all that pertains to the work of the
Movement were taken from the institutions of
higher learning they would suffer great loss. The
traveling secretaries, through their addresses
and conversations, exert a great spiritual influ-
ence. The missionary idea has been emphasized
in meetings and in mission study classes, thus
widening the horizon, enlarging the sympathies,
and stimulating the zeal of students. Missionary
intelligence, missionary activity, and the mission-
ary spirit have done far more than the generally
realized to counteract the evil and subtle influ-
ences of pride, selfishness and rationalism, as
manifested in student communities.

5. The Movement has been an increasing factor in missionary
work among the churches, confining its activities chiefly to work
among the young people. The volunteers in all
parts of the continent have taken a leading part
in the work of local societies of young people in
their vicinity. The principal result in this
direction has been in the organization of the
student campaign in connection with different
denominations. The first and most successful
effort of this kind was made by the Methodist
Church of Canada.

Within the past few years the students of
twelve other denominations have inaugurated
similar movements, with varying degrees of
success. The leaders of the Volunteer Movement
have helped by counsel at every stage of this
development. In most cases the leaders of these
movements have been volunteers in the path-
way of the work of student campaigners. Thou-
sands of young people have been stirred, mis-
sionary committees have been organized, mis-
sionary libraries have been established, mission
study classes and reading circles have been
instituted, and the young people have been
influenced to form the habit of systematic giving.
Many churches have been led to support their own missionaries. Intercession on behalf of missions has become more and more common, and the spiritual life of young people's societies has been quickened and strengthened. The recent organization of the Young People's Forward Movement, the purpose of which is to promote missionary activities among the young people of all denominations, is a direct outgrowth of the work of the Student Volunteer Movement among young people.

IX. The Volunteer Movement in Other Countries: The Volunteer Movement has, under different names, become world-wide, largely as a result of the direct influence on the students of other lands. In Great Britain the Student Volunteer Missionary Union commands the confidence of the British missionary societies. They have held three missionary conferences, which have been the largest and most notable student conventions ever held in Europe. The Volunteer Movement in Germany and the one in Scandinavia have made most encouraging progress. They have materially increased the number of missionary candidates, and have done much to animate the spiritual life of the young people. A conference of the German Movement was held at Halle in April, 1901. The Movement in France and French-speaking Switzerland has not made as marked progress as the other European Movements, but it has, nevertheless, accomplished a most useful work. An organization has also been effected in Holland. The Movement in Australasia received a great impetus from the missionary conference held in Australia and in New Zealand in 1903. An organization has been effected in India, and isolated groups has existed for many years. The second volume, Lux Christi, published a year later, treats India; the third takes up China. Among the young people's societies a desire was expressed for something more elementary in character than the text-books of the Student Volunteer Movement, which were written with the college sophomore in view. This has led to the Forward Mission Study Series, the first of which, The Price of Africa, by Mr. S. Earl Taylor, was out in July, 1902. This tendency to adapt to specific needs is a very hopeful sign, but there is still much to be done. We need as many grades in text-books for the study of Foreign Missions as for that of geography or history.

In addition to these courses several of the denominations have prepared or recommended text-books, or have furnished outline studies in magazines.

The methods of the mission study class have varied. The college classes have, for the most part, met weekly, and employed predominantly the question method. Many classes outside the colleges have followed the same plan. Among

*The Encyclopedia of Missions*
the women the tendency is stronger to meet only monthly, and to have the subject presented by paper. The lecture method is, unfortunately, least in vogue, although it has its preparatory uses in sluggish communities. In general, the effort to include an entire church organization in the study class tends toward less frequent sessions and less thorough work. The best quality of work has been obtained in small groups meeting, at least, weekly, which is only what the laws of pedagogy would lead us to expect. It is also obvious, especially where the course is traversed in a few sessions, that the profit of the class depends largely upon the leader. A skilful teacher will discover means of impressing a very few of the most important points permanently, of implanting an interest in the subject, a desire to study it further and an enthusiasm to bring others under its influence. No need is more urgent than that for prayerful trained leaders. For some years the Student Volunteer Movement has corresponded with its class leaders, and furnished them with printed suggestions on methods of leading. In this it has been followed by several of the denominations, so that the helps grow yearly in volume.

As the most effective way of collecting a class has been found to be personal solicitation, so that of propagating classes is the personal contact of traveling secretaries, student campaigners or district workers. The growth resulting in some of the metropolitan centers from well organized efforts along this line has been very marked.

We may confidently look for a great extension in the quantity and improvement in the quality of this work during the next few years, and for a consequent broadening and deepening of missionary interest.

STURGES, Albert A.: Born at Granville, Ohio, November 5, 1819. Died, September 4, 1887. Graduated at Wabash College, 1848; Yale Divinity School, 1851; embarked January 11, 1852, as a missionary of the ABCFM for Micronesia, reaching Ponape the following September. He labored most happily for thirty-three years at his missionary station on Ponape. He showed great tact in his relations with the natives, and skill in drawing out the activities of the church members. Much of his time was given to the translation of the Scriptures, and he had the joy of seeing the New Testament completed and in the hands of the people. In 1885 his health required him to return home, where, tho in much physical weakness, he carried on the work of translation.

SUA-BUE: A town in Kwang-tung, China, situated on the S. coast about 80 miles W. by S. of Swatow. Station of the PCE (1893), with (1903) 2 missionaries and their wives. Other statistics are included with Wu-king-fu.

SUCHAU: A town in Kiang-su, China, regarded by the Chinese as one of the richest and most beautiful in China. It is situated on a cluster of islands in Ta-hu, "Great Lake," 70 miles north-west of Shanghai, with which is connected a network of streams and canals. Its walls are 10 miles in circuit, and the suburbs extend for many miles around, while an immense population lives in boats. The rebels captured it in 1857, when recaptured, in 1865, a ruined city. The beauty and wealth of the scene, and the picturesque quality of its location, with the many fine buildings, cause it to be celebrated in proverb and poetry. Its silk manufactures are of especial note, but all Chinese manufactures are produced in great abundance and of superior quality. Several channels connect it with the Yangtse-kiang, and small steamers at high tide reach the many important villages and towns in the surrounding districts. The population is estimated at 5,000,000, and along the top of one of the high pagodas can be seen an area containing a population of 5,000,000. Station of the Methodist Episcopal Church (South), (1863), with (1900) 7 missionaries, six of them with their wives; 6 women missionaries, 24 native workers, 4 places of worship, 3 Sunday schools, 4 day schools, 1 boarding school, 1 hospital, 1 dispensary, and 68 professed Christians. Station also of the PN (1871), with (1903) 4 missionaries, three of them with their wives; 17 native workers, 2 outstations, 5 places of worship, 3 Sunday schools, 4 day schools, 1 boarding school, 1 hospital, 1 dispensary, and 68 professed Christians. The name is also written Suochow.

SU-CHIEN. See Su-Tsien-Hsien.

SUDAN: A territory in Africa adjacent to the Sahara. Taken in its broader dimensions, or as spoken of by the Arabs and earlier European geographers, together with the additions claimed by Egyptian rulers in later years, Beled-es-Sudan, or the "Country of the Blacks," extends from west to east along the southern border of the Great Desert from the Atlantic and Senegal to the Red Sea and Abyssinia, and southward from the desert to Upper Guinea on the west, and to the equatorial and lake regions on the east, being some 8,500 miles in length, from east to west, and in its broader parts some 1,600 in width, and comprising a population estimated at 50,000,000. It is thus almost a fourth of Africa, both in extent of country and in the number of its inhabitants.

The Western Sudan from Wadai to the Atlantic is now comprised and described as belonging to the more recently created colonies and protectorates and spheres of influence of France, or to Northern Nigeria, which has fallen to Great Britain. The extreme northern part of Kamerun also falls in this general region.

Eastern or Egyptian Sudan, to which the eye of the world has been chiefly turned during recent years, lies along each side of the Nile, from Assouan or the first cataract to Uganda and the Congo Free State, extending some 1,100 miles or more from north to south, while its width, from the Red Sea to the eastern limits of Wadai, is from twelve to fourteen hundred miles.

The extensive additions to his own territory, which the distinguished viceroy of Egypt, Mehemet Ali, made, more than half a century since, included all the country on the Blue and White Niles, for great distances east and west of them, and for several degrees south of the equator; and in after years his grandson, Ismail, the first Khedive of Egypt, claimed that he had a right to extend his borders as far as the Juba or the "Country of the Blacks." The Sudan as now constituted (1903) comprises eight provinces, viz.: Khartum, Gezira, Dongola, Berber, Kassala, Sennar, Kordofan, and Bahr el Ghazal, and three administrative districts, Wadi Halfa, Suakin, and Fashoda. The present area is about 950,000 square miles; the population is estimated roughly at 3,500,000. Khartum, the capital of this vast region, is situated at the junction of the two

45
This section of Africa is chiefly inhabited by two distinct races. From the eleventh degree of latitude northward the people are almost wholly Arab in their origin. They are chiefly nomads, and are professionally Mohammedans. Being extremely emotional and superstitious, they have the greatest regard for their sheikhs or spiritual guides, ascribe to them a kind of supernatural power, and venerate them almost more than they do the Prophet himself. The country south of the 11th degree of latitude is populated by negroes, chiefly of a sedentary and agricultural mode of life, who, while classed as Mohammedans, are in reality but slightly changed pagans. The mingling of Arab and negro blood has produced a third, hybrid, Arab-speaking class, who are found in the more fertile parts of the Sudan, especially in Darfur. A small yet very all then race, said to have descended from the ancient Nubians, is found in the northern province of Dongola; and between the Nile and the Red Sea, not far from Suakin, there is still another distinct and almost tributary tribe, who speak a language of their own.

The history of the Sudan, since the expulsion of the French from Egypt by the English in 1801, has been turbulent and more or less dramatic. Meneli Ali, a poor fisherman of Greek descent, a shrewd and active leader, who, with a band of followers, had aided the English and Turks in expelling the French, succeeded in securing the appointment from the Porte, in 1806, as viceroy of Egypt. He proved himself to be a general, a statesman, and man of affairs, and met with gratitude for many years, by the Mamelukes, whom he had used as a stepping-stone to power, a hindrance to his rule, and a plague to the country, he massacred a great part of them in 1811; others escaped and fled to New Dongola, but they were followed and finally completely exterminated in 1820. Mehemet Ali then made himself master of Upper Egypt, and by him the Egyptian government established in 1821 was virtually founded. His rule extended from the Mediterranean to the equator, and hereditary succession was established forever, according to Mohammedan law, in the eldest of his blood. Ismail, the fifth viceroy, and a grandson of Meneli Ali, enlarged his army, extended his sway southward over regions which Meneli Ali had nominally taken; so as to recover and include the Upper and White Nile, together with the equatorial and lake provinces, and pushed his victories into the Darfur regions. But in levying enormous taxes upon the people he laid the train for revolt. The revolt took definite form in the summer of 1881. It was led by Ahmed Mohammed, an Arab of African birth. An air of mystery surrounded Mohammed, and he styled himself the Mahdi, claiming to be that prophet or reformer of Islam whose coming had been awaited for many centuries. Emerging from seclusion, he and his motley army took several large towns, and in July, 1882, overpowered and massacred a force of about 6,000 Egyptian soldiers, together with the commanders of the army. An English officer, General Hicks, was now sent to take command of the Egyptian forces at Khartum. After some successes, he marched in pursuit of the Mahdi with an Egyptian force of about 10,000 men in the autumn of 1883. Through the treachery of a guide he was led into a defile not far from El Obeid, where the Mahdi fell upon him and left "not a man" of all his army to tell the tale.

The fate of General Hicks’ expedition aroused in England’s deep interest in the Sudan war. The Mahdi’s lieutenants appeared with strong forces before Suakin on the Red Sea. England’s route to India was in danger; a fleet was sent to Suakin, and troops were sent thence to drive off the Sudanese. Defeat of the English enterprise and massacre was the only result. Stung to action by these disasters, the British Government dispatched troops to Suakin, and having now become convinced of the safety of Egypt, proposed to abandon the Sudan. As a first step to carrying out this policy, Gen. Gordon, who had formerly been Governor-General of the Sudan, was sent to Khartum in 1884. He was to tranquilize the hostile tribes and prepare a means by which English and Egyptian officers, civil functionaries, and soldiers might withdraw from that turbulent and unprofitable region. But the Mahdi won over Gordon’s trusted Egyptian troops, found entrance to Khartum, and killed Gen. Gordon, so that the English forces, sent tardily in the latter part of 1884 to his relief, found naught, on arriving near the city, but desolation dominated by the green flag of Islam.

For eleven years after the fall of Khartum the Sudan was ruled by the Mahdi, and after his death, in 1885, by his successor (Khalifa or Caliph), who, with a large number of followers, held the country under a desolating and blood-thirsty despotism, for they considered themselves divinely appointed reformers. Prosperous districts were reduced to barren wastes. The river populations, reduced to small numbers, were little better than slaves.

In 1898, however, the increasing power of the Khalifa led to a serious interposition on the part of Great Britain, and under Lord Kitchener’s direction the combined British and Egyptian forces broke the power of the Khalifa, recovered Khartum and finally destroyed the last vestige of Mahdism, by the death in battle of all its most prominent leaders.

The Sudan is now a condominium of Egypt and Great Britain, an arrangement having been made, in January, 1899, between the two governmants for the appointment of a Governor-General by Egypt, with the assent of Great Britain, who rules under general principles agreed upon by both governments.

The prosperity of the Sudan is slowly reviving. A primary school system is now in operation. Gordon College, an institution proposed by Gen. Kitchener for teaching Western sciences to Mohammedans, by Mohammedans, or, at least, without Christian taint, was opened at Khartum in 1902, with an endowment of about $500,000. Direct missionary work for Mohammedans is under prohibition (1933) in the Sudan, the military authorities fearing its results upon the fanaticism of the people. Medical missions have been authorized, under certain restrictions, and the CMS has a station at Omdurman, and the UP a station at Khartum. The last-named Society has also undertaken missionary work among the pagan population (Shilluk) on the Sobat River, 540 miles south of Khartum. The British Government will probably consent to the opening of schools by missionaries without much more delay.

SUDAN PIONEER MISSION. See Germany; Missionary Societies in.

SUDHARAM: Town in Bengal, India, situated in Noakhali district, in the eastern portion of the Ganges Delta, and about 60 miles N. W. of Chittagong. It has some commercial importance, but is unhealthy and disagreeable as a residence. Population about 5,000. Station of the Queensland Baptist Missions (1889), with (1901) 1 woman missionary, 6 native workers, 1 outstation, 1 day school, and 10 native communicants. Also called Noakhali.

SUFISM: A theosophy or mystical philosophy found among Mohammedans, who branded it as of heretical tendency by the Ulema or regular hierarchy of Muslim theologians. Upon it is based the "secret" or "mystery" of the orders of Dervishes, each order having its own practise and method of applying the philosophy of man's relation with God propounded by Sufism.

The name Sufi is variously derived by Persian and Turkish writers, some holding that it comes from Suf, wool; woven garments being worn by ascetics. Others, more correctly, perhaps, connect the word with the Greek sophos, a sage. The body of doctrine and rules as to practise followed by Sufis is called the science of tesawwuf, a word formed by regular Arabic rules from "Sof." It is perhaps worth noting, however, that this word is spelled with the letters which might be used (with different vowel points) to represent the word "Theosophy.

Sufism has been chiefly taught, and most extravagantly also, in Persia, where the stimulus of its aspirations has fostered imagination, clothed its teachings in beautiful literary garb, and changed every philosopher into a poet.

Sufism first attracted attention in the 9th century. Under the Abbaside Caliphs, at Baghdad, it flourished among the men of genius brought together to grace the Golden Age of Mohammedan intellectual activity. The time was a critical one both for Islam and for the principle of free thought which theologians sought to suppress. The assimilation by Islam of the mass of men of both for Islam and for the principle of free thought which theologians sought to suppress. The assimilation by Islam of the mass of men of its matrix by Sufism in the use which it makes of the舸t of man's unity of essence with the Creator. Sufis hold that man may cease to be himself—that is to say, individual—while the body; and he may thus identify himself with the Absolute and Infinite. This intuition, grasp or vision of the Infinite is not subject to any effort of will. But by an effort of will man can concentrate his mind for the contemplation of God to such an extent that God gives, in return, the inspiration or enthusiasm of vision which is infinitely precious, although transient in consequence of the mortal frame in which the soul of man is chained.

Sir William Jones translates from Ferhad and
Shirin, a passage illustrating various allegories
in nature which invite the soul to desire to approach God: "There is a strong propensity which dances through every atom and attracts the individual particles to some particular object. Search the universe from base to summit, from fire to air, from water to earth, from all below the moon to above the celestial spheres, and you will not find a corpuscle destitute of natural attractability. The very point of the first thread in this apparently tangled skein is no other than the principle of attraction, and all principles beside are devoid of real basis. From such a propensity are called yâhsûn, have established in heavenly or in terrestrial bodies; it is the disposition to be attracted which taught hard steel to rush from its place and rivet itself to the magnet; it is this quality which gives every substance in nature a tendency toward some other, and an inclination forcibly directed to a determinate point."

The Sufis speak in very warm terms of their love for God. "We are not afraid of Hell," says one, "neither do we desire Heaven." Asked Sometimes one gets a glimpse of the methods of devotion to God. "We are not afraid of Hell," The "Sincere Brethren" have likewise gone. "neither do we desire Heaven." Mohammedan theologians. The heretical sects which Sufism was charged with in their teachings of the early centuries of Islam have disappeared. Sometimes one gets a glimpse of the methods of "blasphemous a speech, he replied, "Our devotion alive of a poet or a teacher for some pantheistic devotion to God. The missionary's approach to the Sufi, then, was based on the assumption that God is one and that all things are God. The strength of Islam in this respect is seen in the central point in the contrast between the two systems. Sufism, like all error which has power to enthrall men, is based on a great truth, misunderstand and elaborated by darkened minds. The missionary's approach to the Sufi, then, should be that he has mastered this curious eclectic philosophy, and has prepared in some way to show clearly the truth which he has observed and perverted.

SUHIN STATION: A station of the SAMS in the Grand Chaco of Uruguay, South America, situated near the Pilcomayo River, about 150 miles N. W. of Asuncion. Station established (1899), with (1903) 4 missionaries.

SUI-CHAU: A town in Hu-pei province, China, situated about 110 miles N. W. of Wu-chang-fu. Station of the WMS, with (1903) 2 missionaries, 8 native workers, 7 outstations, 8 places of worship, 2 day schools, and 157 professed Christians, of whom 127 are communicants. Some write the name Sui-chou.

SUI-FU. See Hau-Chau.

SUI-TING-FU: A town in Sze-chwan, China, situated in the N. E. part of the province. Station of the CIM (1899), with (1903) 2 missionaries with their wives, 2 women missionaries, 1 place of worship, 1 dispensary.

SUIYANG. See Sui-Chau.

SULTANPUR: A town in the United Provinces, India, situated about 30 miles S. by W. of Faizabad. Station of the ZBM, with (1903) 5 women missionaries, 5 native workers, 1 day school, and 1 orphanage.

SULU ISLANDS: An archipelago lying between Mindanao, the southern island of the Philippines, and the northeast extremity of British Borneo. By the treaty of peace, December, 1898, these islands were ceded to the United States by Spain, and they are included in statistical reports with the Philippine Islands. There are over fifty islands, the largest of which is thirty-six miles long and twelve broad. The population of the Sulu Islands is entirely Mohammedan in religion, and no missionary work has, as yet (1903), been attempted among them.

SULURPETA: A town in Madras, India, situated near the coast, about 50 miles N. by W. of Madras city. Station of the Hermannsburg Missionary Society (1866), with (1903) 1 missionary and his wife, 8 native workers, 2 outstations, 1 place of worship, 8 day schools, and 206 professed Christians, of whom 197 are communicants.

SUMATRA: One of the largest and richest islands of the Dutch East Indian Archipelago. It extends 1,047 miles from northwest to southeast, lying between latitude 5° 40' north and latitude 5° 59' south. Its area is estimated at 160,000 square miles, and the population (1900) of about 3,000,000. The island belongs to the Dutch Government, tho some of the interior districts have not been brought under complete subjection. Throughout the whole length of the island extends a range of lofty mountains, which are nearer the western coast than the eastern; hence on the eastern slope there are several large rivers, but the watercourses on the western slope are comparatively short. Sugar-cane, coffee, rice, and spices are the principal products, the much fine timber and many tropical fruits being found in abundance. The greater part of the population are Mohammedan in religion and
belong to the Malay race, but it is probable that they have absorbed many aboriginal tribes, a few remnants of which are found in the interior, such as the Kubus, who seem to have a mixture of Negrito blood, and the Battaks. These latter are pagans and differ in many points from the Malay type. They are somewhat under-sized, with broad shoulders and rather muscular limbs. Their eyes are large and black, with heavy brown eyebrows. These people inhabit a region running northward from Padang on the W. coast of the island, to Toba Lake, and beyond, as far as Deli on the E. coast of the island. Their language contains words of Sanskrit origin, and has evidently been affected by Javanese, Malay, Macassar, Sundanese, and Tagal influence. Another peculiar tribe are the Redjangers, who use distinctive characters, which they cut on bamboo with their short kreeses or daggers. The possessions of the Dutch Government in the island of Sumatra are divided into the Residences of the West Coast, the East Coast, Benkulen (the extreme eastern coast), Lampung (southeastern), and central, and Atjeh, the northern extremity. The principal towns are: Padang, on the west coast, about latitude 1° south, the residence of the governor, with a population of 14,000, including a Chinese element; and VI. and XIV. centuries, and several centuries later, the Battaks, especially assisting in the publication of Sunday school work. The first of these was The Sunday School Union, formed in England in 1803, which, however, devoted itself distinctively to home work. In 1817 a similar society was formed in Philadelphia, Pa., which developed in 1824 into the American Sunday School Union. That, however, like many predecessors, failed. Meanwhile, during a visit to England in 1864, Mr. Woodruff pleaded the cause of the Sunday School as a missionary agency so effectively before the Sunday School Union that a separate department was created, called The Sunday School Union's Continental Mission. Of these three organizations, the largest, the American Sunday School Union, still does very little for the foreign field except occasionally by grants to Sunday schools or publishing societies on the foreign field. The Sunday School Union's Continental Mission (headquarters, 56 Old Bailey, London, England) carries on work in Norway, Holland, Belgium, France, Germany, Bohemia, Italy, Spain and Portugal, and even to a limited degree in Russia. In Sweden its missionaries have organized over 2,000 Sunday schools; in Norway one formed 160 new schools in four years; in Germany the 750,000 Sunday school scholars are very largely the fruit of the Society's labor.

The Foreign Sunday School Association (headquarters, 67 Schoenborn St., Brooklyn, N. Y., U. S. A.) is more distinctly a foreign missionary organization. It emphasizes work among the Spanish-speaking peoples, and in connection with the foreign mission societies, especially assisting in the publication of Sunday school papers. A number of Sunday school associations, working in the field, have been established: English; Die Sonntagsmission in German; and El Amigo, in Spanish; O Amigo, in Portuguese; La Feuille du Dimanche, in French; Die Sonntags Schule, in German; and Il Amico, in Italian. Last year 13,000 subscriptions were paid for these papers. Some 70,000 of these papers for children: Glad Tidings, in Japanese; El Amigo, in Spanish; O Amigo, in Portuguese; La Feuille du Dimanche, in French; Die Sonntags Schule, in German; and Il Amico, in Italian. Last year 13,000 subscriptions were paid for these papers. Some 70,000 of these papers were published. One, Christie's Old Organ, will illustrate the diffusion of this work. First published in 1877, it has been translated into sixteen different languages, and more than 30,000 copies were
circulated in Germany, Hungary, Bulgaria, Belgium, Portugal, Greece, Syria, Japan, Bombay, Ceylon, Bohemia, France, Italy, Asia Minor, and China.

SUNG-YANG-RII: A town in Che-kiang, China, situated 16 miles N.W. of Ch'uan-chou. Station of the CIM (1896), with (1903) 2 missionaries, 4 native workers, 3 outstations, 2 places of worship, and 20 professed Christians. Some write the name Song-yang.

SUNTH: A town in Bombay, India, situated in the district of Rewa, Kantha, about 73 miles E. by N. of Ahmedabad. Station of the PCI (1889), with (1903) 1 missionary and his wife and 1 orphanage.

SUPPORT OF MISSIONS: Principles and Methods used: It is proposed in the first place to indicate the total and per capita contributions of the churches for foreign missions; second, to partially account for the smallness of the contributions; third, to suggest an effective financial system and describe the working of the same in a local church; fourth, to discuss the policy of the support of foreign missions during the twenty-five years of the panic, 34c., whereas in 1899, 1900 and 1901, three of the most prosperous years in the country's history, the per capita contributions were respectively 28c., 27c. and again 28c. It would probably be impossible to account for the decrease of 16c. per capita from 1893 to 1900 by the decreased financial ability of the churches. It is evident that however efficient this method may have been in other days when there were very few causes appealing for support, it can no longer compete successfully with the definite, persistent, ingenious methods of financial appeal which are now resorted to by the legion of causes whose advocates make their appeal every week by letter and in person. The weakness of the annual collection consists in its indefiniteness and its unexpectedness. A man who is appealed to only once a year cannot be made to believe that the cause is as important as one whose claims are repeatedly urged. The vague, all-embracing indefiniteness which marks the two minutes' appeal from the pulpit on the day of the annual offering has no chance whatever in competition with the earnest, direct, persistent appeal of the financial representative of an educational or philanthropic institution. Moreover, the annual offering is in very many cases entirely unexpected and therefore unprepared for. Even if it was announced the preceding Sabbath, the announcement was only a half-dozen or more reminders and notices and was probably not carried with the hearer through the church door; so the collection basket found him unprepared the following Sunday and his penmanship had to be made while he was obliged to choose between the stray piece of silver or copper coin in his pocketbook on the other, which happened on that occasion to be $5.00, and his decision had to be made while the collection basket made its way from the front of the church to his pew. A man thus hedged in will settle with the Board upon the silver or copper basis.

It is worthy of special remark that the extraordinary fluctuations which characterize the above annual incomes cannot be accounted for by the financial conditions prevailing in the different years, because it will be noticed that the per capita contributions in 1893, the first year of the panic, were 43c., as compared with 1894, the second year of the panic, 34c., whereas in 1899, 1900 and 1901, three of the most prosperous years in the country's history, the per capita contributions were respectively 28c., 27c. and again 28c. It would probably be impossible to account for the decrease of 16c. per capita from 1893 to 1900 by the decreased financial ability of the churches. It is evident that however efficient this method may have been in other days when there were very few causes appealing for support, it can no longer compete successfully with the definite, persistent, ingenious methods of financial appeal which are now resorted to by the legion of causes whose advocates make their appeal every week by letter and in person. The weakness of the annual collection consists in its indefiniteness and its unexpectedness. A man who is appealed to only once a year cannot be made to believe that the cause is as important as one whose claims are repeatedly urged. The vague, all-embracing indefiniteness which marks the two minutes' appeal from the pulpit on the day of the annual offering has no chance whatever in competition with the earnest, direct, persistent appeal of the financial representative of an educational or philanthropic institution. Moreover, the annual offering is in very many cases entirely unexpected and therefore unprepared for. Even if it was announced the preceding Sabbath, the announcement was only a half-dozen or more reminders and notices and was probably not carried with the hearer through the church door; so the collection basket found him unprepared the following Sunday and he was obliged to choose between the stray piece of silver or copper coin in his pocketbook on the other, which happened on that occasion to be $5.00, and his decision had to be made while the collection basket made its way from the front of the church to his pew. A man thus hedged in will settle with the Board upon the silver or copper basis.

I. The Contributions of the Churches: The most recent, reliable and complete exhibit of the contributions of the churches for foreign missions is the compilation of the Rev. James Dennis, D.D., in his remarkable encyclopedic work entitled Christian Missions and Social Progress. From this exhibit it appears that at the close of the century the annual income from home sources of all American Missionary Societies at the close of the century was $5,199,497. The total membership of the American Baptist missionary societies at the close of the century was 17,837,147, from which it appears that the average income per member was 29c. His is still settling his missionary obligations in small silver or copper coin. This pitiable showing would be contrasted with the total gifts of the rank and file of our church membership.

The annual income from home sources of all American Missionary Societies and their auxiliaries was $17,284,363, a little more than three and one-half million pounds sterling. It is next to impossible to ascertain the per capita gifts represented by this amount, but they are not far from 30c. a year. The largest and most representative Missionary Boards.

II. Explanation of Fluctuations in Contributions: There seems to be a general agreement among those who are engaged in supplying the missionary treasuries that the most widely tested of all financial methods has run its course. Reference is made to the annual church collection. It is evident that however efficient this method may have been in other days when there were very few causes appealing for support, it can no longer compete successfully with the definite, persistent, ingenious methods of financial appeal which are now resorted to by the legion of causes whose advocates make their appeal every week by letter and in person. The weakness of the annual collection consists in its indefiniteness and its unexpectedness. A man who is appealed to only once a year cannot be made to believe that the cause is as important as one whose claims are repeatedly urged. The vague, all-embracing indefiniteness which marks the two minutes' appeal from the pulpit on the day of the annual offering has no chance whatever in competition with the earnest, direct, persistent appeal of the financial representative of an educational or philanthropic institution. Moreover, the annual offering is in very many cases entirely unexpected and therefore unprepared for. Even if it was announced the preceding Sabbath, the announcement was only a half-dozen or more reminders and notices and was probably not carried with the hearer through the church door; so the collection basket found him unprepared the following Sunday and he was obliged to choose between the stray piece of silver or copper coin in his pocketbook on the other, which happened on that occasion to be $5.00, and his decision had to be made while the collection basket made its way from the front of the church to his pew. A man thus hedged in will settle with the Board upon the silver or copper basis.
make their own apportionment, but concedes to each person this privilege.

(6) Every month a special free-will offering is taken over and added to the foregoing contributions. A special envelope handsomely embossed is distributed the preceding Sunday with the object printed thereon. These monthly collections are devoted to the various church boards and a few other important causes. In this way, the person who will not make a pledge but will make an annual contribution has his opportunity. Moreover, many persons who have made pledges, but who, because of increased prosperity or other reasons, wish to make a special thank offering have the opportunity to do so.

(7) Once a year a specific foreign missionary appeal is made for the support of the church’s missionary in the Philippines. The appeal is made the Sunday before the offering and special envelopes are furnished for use on the following Sunday. This offering constitutes the third opportunity given the church to contribute to foreign missions, inasmuch as one of the monthly offerings is devoted to this cause, and 25 per cent. also of the money collected in the weekly envelopes.

(8) Considerable loose cash is contributed every Sunday. On the annual missionary day this is applied to the church’s missionary; on free-will offering day, once a month, it is devoted to that cause; the balance of the Sundays it is added to the fund composed of the weekly instalment contributions.

(9) A collection is never taken for a special cause the day the appeal is made, but on the following Sunday. While an immediate collection may enlist more from those who are easily stirred by an appeal, experience has shown that those who give after reflection and prayer more than offset what is lost from the former class.

Would not the universal adoption of this system fill the mission treasuries, fill our fields with missionaries and overfill our church members with the blessing of giving, which is more blessed than that of receiving?

IV. The Support of Specific Objects: More than fifty years ago President Wayland warned the churches against a peril which to-day assails the foreign mission enterprise, when he declared “the tendency will be more and more for churches: ‘the tendency will be more and more for churches

3. The Church Committee recommends a system of apportionment to those who prefer not to
so as to embrace a definite section of some mission field and support a missionary there who shall sustain to the home pastor the relation of associate or co-pastor; in other words, let the church have its foreign mission and sustain its foreign missionary, just as many churches have their own city mission and sustain their own city missionary. This method has been a distinguishing feature in the splendid work which the women of several leading denominations are doing. Every one of the nearly 200 unmarried women on the Congregational mission field is supported by funds specifically pledged. The same is true of practically every woman, both single and married, connected with the mission fields of the Presbyterian Church of the United States.

This policy has been adopted by several of the leading missionary societies in Great Britain, the Dominion of Canada, and the United States. This method is one of the most notable features which characterize the marvelous advance movement which the Church Missionary Society made during the last decade of the 19th century. Fully four hundred missionaries were specifically provided for by churches, families, individuals, and societies in response to the appeal of that missionary society.

The Board of Missions of the Presbyterian Church in the United States and Canada are supporting a larger proportion of ordained missionaries by specific funds than any other denomination. After testing the method for years in several representative churches the American Board unanimously recommended the adoption of the policy as a permanent educational and financial measure at its annual meeting in Grand Rapids, Mich., in 1898, and appointed a committee which it empowered to elect representatives to exploit the movement throughout the denomination. The reports of the committee have led the Board for four successive years to recommend the continuance of the policy. It is an interesting fact that not a single Congregational Church in which the representative of the Board has had a suitable opportunity to present the method has failed to subscribe money sufficient for the salary of a missionary.

The most notable illustration of this policy is furnished by the Missionary Committee of the Southern Presbyterian Church, under whose direction over 75 salaries were provided by specific churches within a year, and over 100 other churches made pledges for the support of specific phases of work in the different foreign mission fields occupied by the denomination.

The Missionary Society of the Canadian Methodist Church has also endorsed the policy and commended its Young People’s Movement, whose work has largely consisted in enlisting young people’s societies in the support of missionaries.

Among other notable endorsements of the policy may be mentioned that of the American Baptist Missionary Union, as well as the action of certain congregations of the Church of the Disciples, the United Brethren, etc.

Experience has fully shown that the churches which have their own representatives on the foreign fields are better informed than the average church concerning the work of missions, this information being secured from correspondence and also by the fact that they have their own mission and sustain their own missionary. It is perfectly obvious that this policy enlists a church in assuming and maintaining a specific obligation. Long experience and extended inquiry have failed to discover a better method of persuading a church which is giving $100 or $200 a year, and is well able to give $800 or $1,000, to give the large sum and renew it annually.

The financial significance of this policy is forcibly set forth in the last report of the Forward Movement Committee of the American Board. In the report the increased contributions of the 144 churches which the committee had enlisted in assuming the salaries of missionaries or the expenses of other special objects on the one hand, and the increased contributions of all the balance of the contributing churches in proportion on the other. This comparison shows that the Forward Movement churches contributed in 1902 $32,388 more than in 1898, the year before the Movement was launched, whereas the balance of the churches, about 3,400 in number, only contributed $24,372 more in 1902 than in 1898. In other words, the Forward Movement churches, which constitute one-twenty-fourth of all the contributing churches, made an increase of over $7,000 above the average of the remaining twenty-three-twenty-fourths of the churches; the average increase of the 144 Forward Movement churches was $229, whereas the average increase of the balance of the contributing churches was only $8, or one-twenty-seventh of the average increase of the former. This exhibit is considered a final argument in favor of contributions for specific objects. In the light of this report the question may well be raised whether or not every church should not constitute itself a mission station and support its own outstation.

SURAT: A town in Gujarat, Bombay, India, situated on the Tapti River, about 15 miles from its mouth. In the center facing the river is the old castle (1540), now serving as a public office building. An ancient moat encloses the city on the land side. Among its interesting features are old Parsee temples and the tombs of the earliest European settlers. In the 17th and 18th centuries Surat was of more commercial importance than Bombay. Its population in 1707 was 800,000, but it had fallen to 80,000 in 1847. The city has revived again; it received its stimulus to growth from the American Civil War of 1861-65, and it now (1901) has a population of 119,306, of whom about 80,500 are Hindus, 21,000 Muslims and 5,000 Jains. The climate is hot, malarious, and unhealthy. Station of the PCI (1846), with (1903) 1 missionary and his wife; 3 women missionaries, 29 native workers, 2 outstations, 1 place of worship, 3 Sunday schools, 1 printing house, 15 day schools, 1 orphanage, and 86 communicant Christians.

SURINAM: A name sometimes applied to Dutch Guiana, S. America.

SUSA: A town in Tunis, North Africa, situated on the E. coast about 23 miles E. by N. of the sacred city of Kairwan. Station of the North Africa Mission (1890), with (1900) 2 mission-
aries and their wives, 4 women missionaries, 1 native worker, 1 outstation, 1 place of worship, 1 dispensary.

SUSAKI: A town in Japan, situated on Tosa Bay, on the S. side of Shikoku Island, about 20 miles S. W. of Kochi. Station of the PS (1898), with (1900) 1 missionary and his wife.

SUSU LANGUAGE: The Susu is spoken by some of the negroes living near the coast of French Guinea in West Africa. It belongs to the negro family of African languages. It is the language of the Bantu tribes. It is spoken in Basutoland, South Africa, and is also found in adjacent regions in the Transvaal and Orange River Colonies and among some of the tribes northward toward the Zambesi. It has been reduced to writing with use of Roman letters.

SU-TSE-HSIEN: A town in the province of Kiang-su, situated on the Grand Canal, about 40 miles N. W. of Huai-nan-fu. Station of the PS (1890) 2 missionaries and their wives and 1 woman missionary. Some write the name Su-chien.

SUUTON, Amos: Born at Sevenoaks, Kent, England, 1798. Died August 17, 1854, at Cuttack, Orissa. Having studied theology with Rev. J. G. Pike, he was ordained at Derby, and sailed for Orissa, India, as a missionary of the General Baptist Missionary Society. He was stationed most of the time at Cuttack. He preached in Uriye and in English, taught in the mission academy, and was superintendent of the orphan asylums. He translated the whole Bible into Uriye, and made a second revision of the New Testament. He visited England and America. He returned to his mission from America in 1851, in company with Rev. Dr. Phillips, who was sent to the same field by the American Free Baptist Missionary Society. Dr. Sutton, besides translating the Scriptures, published an Uriye dictionary, grammar and lesson-book, wrote three volumes of tracts in that language, and translated many English books for his scholars and converts.

SUVA: A town in the Fiji Islands, Polynesia, situated on the S. coast of Viti Levu Island, of which it is the capital. European population, 1,073; native population uncertain. Station of the SPG (1880), with 1 missionary and a chaplain. Also station of the Seventh Day Adventists (1895), with (1900) 2 missionaries and their wives, 1 native missionary, 2 native workers, 2 outstations, 1 place of worship, 1 printing house, 1 day school, and 23 professed Christians. Also station of the Australian Wesleyan Missionary Society, with (1900) 1 woman missionary, 1 day school, and 1 Sunday school.

SWAHILI LANGUAGE: Among the people inhabiting the parts of East Africa adjoining the Indian Ocean and extending northward to Somaliland, a mixed language has been developed, called the Swahili or coast language. It belongs to the Bantu family of African languages. It is the language of the Basuto tribes. It is spoken in Basutoland, South Africa, and is also found in adjacent regions in the Transvaal and Orange River Colonies and among some of the tribes northward toward the Zambesi. It has been reduced to writing with use of Roman letters.

SWAN, William: Born June 21, 1791, at Balgonie, New Brunswick. Died January 1, 1866. Studied at the Theological Academy of Glasgow; sailed July 1, 1818, for Siberia as a missionary of the LMS. His chief work was among the Burial Tatars found on the frontiers of Siberia and Chinese Tartary, east of Lake Baikal. For eight years he itinerated with Mr. Stallybrass in the Selenginsk region, but in 1828 made his permanent home at Onon. During these years he, in conjunction with Mr. Stallybrass, completed the Mongolian version of the Scriptures. For the printing of this version Mr. Swan succeeded, by personal exertion, in obtaining permission from the Russian Government. After twenty-two years of arduous service in the inhospitable wastes of Transbaikalia Mr. Swan and his companion were summarily informed one day in 1840 that their mission was suppressed by order of the Czar. Mr. Swan therefore returned to Scotland in 1841, and shortly afterward withdrew from the service of the Society.

SWAROE: A town in Java, situated 130 miles S. E. of Samarang. Station of the Netherlands Missionary Society (1869), with 1 missionary and his wife, 4 native workers, 6 outstations, 1 place of worship, 5 day schools, and 2,093 professed Christians, of whom 169 are communicants.

SWATOW (Shan-tau): A seaport town of Kwang-tung province, China, situated on the left bank of the Han River, about 5 miles from the sea. Its houses are mostly built of concrete, which has been rammed between molding boards, the boards being afterward taken away. It is a treaty port and has some foreign trade. The climate is healthful. Population about 30,000. Station of the ABMU (1843), with 13 missionaries, men and women; 62 native workers, men and women; 58 outstations, 32 places of worship, 11 day schools, 2 boarding schools, 1 theological school, and 2,050 professed Christians. Chuan-tien has 128 are communicants. Station also of the Presbyterian Church of England (1856), with (1905) 17 missionaries, men and women; 73 native workers, men and women (in district); 51 day schools, 2 boarding schools, 1 woman's training class, 1 theological class, 1 medical class, 1 printing house, 2 dispensaries, 2 hospitals, and 3,460 professed Christians, of whom 2,250 are communicants.

SWEDISH MISSIONS: The first missionary work undertaken by Protestant Sweden was among the Lapps, or Finns, who in scattered nomadic tribes occupy the whole northern part of the country. That mission has on its records several names, as for instance that of Peer Fjellström (1697-1764), who is still remembered with gratitude; but unorganized and unsystematized as it was, all its exertions and sacrifices were of no avail for a thorough success.

In 1630 a Swedish colony, "Nya Sverarke," afterward called "Vinland," now Pennsylvania, was founded on the Delaware in North America, and the Swede Campanius, who in 1642 began to preach to the Delaware Indians and compiled a dictionary of their language, was the first Protestant missionary to enter the new world.
The colony was afterward transferred to Holland, then to England, and finally to William Penn; but up to 1831 it continued to be served by Swedish pastors.

Meanwhile that powerful impulse which Protestant missions received from England in the beginning of the 19th century made itself felt also in Sweden. In 1818 a mission paper was established, and in 1829 the first small mission society was founded at Göteborg. It was followed by the Church Mission Society in Stockholm, and in 1845 by the Mission Society of Lund. In 1855 the latter was absorbed by the former, and in 1876 the Swedish Mission Society united with the Swedish Church Mission (founded in 1874), tho it was not wholly absorbed by it. Two other large societies were organized—the Evangelical National Institution in 1856 and the Swedish Mission Union in 1878. Besides these four great associations, quite a number of minor ones, still in their infancy, have sprung up.

I. The Swedish Mission Society (Svenska Missionsföreningen): Headquarters, Stockholm, Sweden. Very soon after its foundation, January 6, 1835, the Society was able to send out its first missionary to the Finns, Carl Ludvig Tellström, a painter, whose cordial interest in the people was aroused by his summer visits to their camps. Next year she was joined by two other young men, and they visited the tents, preached, and gave some general instruction. A young Finnish girl, Marie Magdalene Madsdaughter, through the preaching of the missionaries, had come to see and understand the misery in which her race lived. She learned Swedish that she might be able to speak to the king, and in 1864 walked two hundred miles to Stockholm. She picked out in the street the first lady who to her eyes seemed to look trustworthy, and in a short conversation she made that lady her patroness. Next day she had an audience with the king, and after talking with a number of influential men during a stay of a few days, she walked back to her native place with money enough to build a house or an asylum, or, as it is called, a "Children's Home," to which she could invite the children of her race to come and stay for some time and be instructed in that which is necessary, and also in something of that which is useful. The Society provided her "Home" with teachers, and so successfully did the plan work that it has now a number of such institutions among the Finns.

A considerable portion of its annual revenue the Society draws from the so-called Five-cents Circles. It also has invested funds to the amount of about 150,000 kroner. Its missions to the Finns it directs independently, and since its union with the Swedish Church Mission in 1876 pays the surplus to that Society, and partakes proportionally in the direction of its mission to the heathen.

II. The Evangelical National Society (Det Evangeliska Posterlandsföreningen): Headquarters, Stockholm, Sweden. The Evangelical National Institution was founded in 1856 by Pastor H. I. Lundborg, as a consequence of a revival within the Swedish Church, produced by the lay-preacher Rosenius. Propositions of union were made to it in 1875 by the Swedish Church Mission, but declined. It preferred to make itself the organ of all such free and spontaneous mission movements as may arise among the Swedish people. It consists of a great number of minor societies, generally called "Angsar Societies," or "Evangelical Lutheran Societies," having a common head in their annual conference, which assembles in Stockholm.

In 1863 it established a missionary seminary at Johannelund, on Lake Mälar, a little outside of Stockholm, originally intended only for home mission work. In 1861 it extended its activity also to foreign missions, and it now works in two different fields—among the Gallas in East Africa and among the Zulus in South Africa.

The mission to the Gallas in East Africa was begun in 1865, on the advice of Dr. Krapf and Bishop Gabot, but the great sacrifices and enormous exertions it has cost do not seem to have brought proportional results. The difficulties do not arise from the character of the people, for the Gallas have on many occasions showed some sympathy for Christianity, but from difficulty of access. From the north, through Abyssinia, the door is closed. To the east, and along the coast, live the Somalis, and they and the Gallas are constructively enemies. Notwithstanding these obstacles there were reported in 1900, 32 missionaries and 28 native workers, 7 stations, 5 outstations, 206 communicants, 502 adherents, 14 schools, 505 pupils, 1 physician and 1 hospital. The mission to the Gallas, begun in 1877, on the advice of Dr. Kalkar, in the Central Provinces of India, reported (1900) 36 missionaries, 37 native workers, 8 stations, 9 outstations, 257 communicants, 826 adherents, 9 schools, 500 pupils, 1 higher school and considerable medical work.

III. The Swedish Church Mission (Svenska Kyrkans Mission): Headquarters, Stockholm, Sweden. In 1868 the General Assembly of the Swedish Church (Kyrkomötet) laid before the king a petition that the whole missionary activity should be organized by law as a function of the Church, the state institution; and September 11, 1874, the king authorized the establishment of the Swedish Church Mission, under a board of seven directors, with the Archbishop of Upsala as its permanent president. Negotiations for a union with the other mission societies already existing did not succeed, but the Church Mission, nevertheless, immediately began work. It draws its revenue from a general collection taken up on a certain day in all Swedish churches, and maintains a mission among the Zulus in Africa, and a mission among the Tamils in India.

The Zulu Mission was begun in 1876, on the advice of Bishop Schreuder, who had long wished to see the whole energy of all Scandinavian mission societies united into one common effort, made possible by the close relation between the languages and the fundamental unity of the confessions. An estate, "Rorke's Drift," was bought in Natal, just on the boundary of Zululand, and the Mission had in 1900 25 missionaries, 28 native workers, 5 stations, 34 outstations, 631 communicants, 19 schools, 281 pupils, and 1 hospital.

The Tamil Mission, also begun in 1876, in close connection with the Leipzig Mission, in Tranquebar, was located at Madura, but has become practically identified with the Leipzig Mission.

IV. The Swedish Mission Union (Svenska Missionsförbundet): Headquarters, Christianehamn, Sweden. The Swedish Mission Union was formed August 2, 1878, in Stockholm, as the representative of the Waldenström faction, which separated from the Evangelical National Society because the latter clung rigorously to the Augustburg
Confession. The Union consists of over 990 minor associations and is managed by a committee of seven, which has its seat in Stockholm and is elected by the annual assembly of delegates from the associations.

The Union maintains a mission school at Christinahamn and carries on work in Africa (Congo and Algeria), Russia (Ural), Persia, Chinese Turkestan. Work commenced in Alaska has been handed over to the Swedish Mission Union in America.

A mission was begun in 1880 among the Fins, and in the same year in Russia. The latter mission, however, has principally the character of revival work, tho at the station or the southeastern frontier the missionaries come in close contact with heathendom. The Congo Mission was started in 1881 and labored for some time in connection with the Livingstone (see Regions Beyond Missionary Union) Inland Mission. There were reported (1900) 40 missionaries, 22 native workers, 1,573 communicants, 8 stations, 62 outstations, 101 schools, 3,006 pupils, 7 dispensaries, and 20,000 patients. These figures seem to include the work in Algeria among the Jews, which, however, is not large.

So thin the character to this movement are a number of minor societies, most of them affiliated with the China Inland and Christian Alliance Missions. These include the Swedish Mission in China (Svenska Missionen Kino), founded in 1887 by E. Folke; The Holiness Union (Helhetssverband), founded in 1890 by a mill owner in Nerike, and which sends missionaries to China and South Africa; a Scandinavian Alliance Mission, on the same lines as the Christian Alliance, which has sent out a number of untrained workers to China, Japan, the Himalayas, and Swasiland, but with little evident result. There are also the Jönköping Society for Home and Foreign Missions, which aids other societies; Friends of the Lapps Mission; the Female Missionary Workers (Kvinnliga Missionaer Arbetare), organized in 1894, which absorbed a Swedish Woman's North Africa Mission, and is practically the foreign department of the Swedish YWCA. It carries on work, particularly for children, in a great variety of fields, including Lapland, the Caucasus, Tibet, India, China, Mongolia, North Africa, the Congo, and France.

SWITZERLAND (French); Mission of the Free Churches of: (Mission des Églises Libres de la Suisse Romande).

In the year 1874, the Synod of the Free Evangelical Churches of the Swiss Canton of Vaud (Presbyterian) resolved to create a mission of its own among the heathen, and accordingly two young missionaries, Messrs. Ernest Creux and Paul Berthoud, were sent to South Africa. They remained two years, and then proceeded to the mission of the Paris Evangelical Missionary Society in Basutoland, and in 1875 chose a mission field for themselves in the northern part of the Transvaal Republic, among the Tonga negroes. The work has extended to the Ronga tribes living to the north and east, and to the coast of Delagoa Bay. The New Testament and portions of the Old have been translated into the Tonga and Ronga languages, and the work at all the stations has been very successful.

For nine years this mission was under the care of the Free Church in the Canton of Vaud; in 1883 the Free Churches of Neuchâtel and Geneva (both Presbyterian) formed a federation with the Free Church of the Canton of Vaud, and the mission has since been under their joint direction.

The report (1902) shows 53 missionaries, 50 native workers, 9 stations, 30 outstations, 958 communicants, 46 schools, with 1,604 pupils.

SYLBET: A town and capital of a district in Assam, India, situated about 62 miles W. of Silchar. It is the terminus of the railway to Cherrapunji, in the hill country. Station of the Welsh Calvinistic Methodists, with (1893) 2 missionaries and their wives, 2 women missionaries, 5 native workers, 6 outstations, 5 places of worship, 3 Sunday schools, 4 day schools, and 43 professing Christians.

SYRIA: The geographical term "Syria" seems to have originated with the early Greek traders, who designated it the land whose chief commercial city was Tars, Sur, or Tyre. When the Arabs came into the land in the 7th century they called Damascus Dimishk esh-Sham, and named the provinces of which they made it the capital Bar esh-Sham. The Christian inhabitants of the land still call it "Suryeh." The term "Palestine" comes from Palesheth (פָּלֶשֶׁת—"land of wanderers"), and refers probably to the nomadic tendencies of the early inhabitants. No form of the word "Palestine" (Filistia, Palestina, etc.) is at present in common use in the country. The term is historical rather than political, and defines that part of Syria which stretches from Dan (near Mount Hermon) to Beersheba, and from the Mediterranean to the Syrian desert.

Geography: Syria in its widest extent, not now locally recognized, however, extends about 400 miles from the Taurus mountains on the north (latitude 37°) to Egypt (latitude 28°), and from the Mediterranean to the Syrian desert, an average width of less than 200 miles, and contains 70,000 square miles. It is nearly conterminous with the "Promised Land" and the kingdom of David. It is about the size of New England, Palestine east and west of the Jordan being of the size of Vermont and New Hampshire, and very similarly situated. Mountains on the north, the sea on the west, and deserts south and east give the land a somewhat remarkable geographical unity. The mountain ranges and river basins run parallel with the coast, rendering access easy from north to south. The Taurus Mountains send a spur off to the south not far from the coast. This is broken by the deep gorge of the Orontes (El-'Asi) River. The range takes a new start in the beautiful peak of Mount Casius, near Antioch, and stretches down along the coast, receiving various names at different points. Between Antioch and Tripoli it is called from the people who inhabit its sandy plain, "the sandy range," which terminates in Jebel el Hum. A low saddle in the hills comes next, and then the Lebanon range springs suddenly up to the height of over 10,000 feet; and twenty miles across the plain to the coast the almost equally massive Anti-Lebanon starts off to follow its mate down the coast for a hundred miles. Lebanon gradually
The larger cities are Damascus (200,000), Aleppo (120,000), Beirut (100,000), Jerusalem (35,000), Tripoli (with its port, 25,000), Homs (20,000), Hamah (20,000), Zahleh (15,000), Nablous (15,000), Sidon, Nazareth, Acre, Hebron, Jaffa (each 10,000), and Aintoo (6,000). The western slopes of Mount Lebanon are the most densely populated parts of the country outside of cities.

Race: From the earliest times there has been a notable mixture of races in Syria, yet all along the Semitic type has prevailed with a persistence truly remarkable. Floodonts of Egyptians, Greeks, Romans, Kurds, Armenians, Persians, Teutons and Mongols have swept the country repeatedly, only to be as repeatedly driven out. The blood of many nations has soaked into the soil, and reappears in many channels; but the original race type, the Semitic, has absorbed the remnant of many nationalities so effectively that there is a typical Syrian resultant, which differs widely from the surrounding peoples. With the exception of the Bedouin Arab of the southeast, the Kurds of the northeast, the Armenian merchants, and the so-called Franks, or foreign residents, the Syrian type is universal, modified, it is true, by hereditary religious customs and convictions, but holding its own through the centuries. It is characterized by a certain calculating shrewdness covered with an exterior of extreme politeness. The race-type is saturated with the despotic idea, which appears in every grade of society. Manual labor is counted ignoble. Religious differences have bred a mutual suspicion. Credit is almost unknown. Trade is a matter of sharp haggling over prices. The typical Syrian is proud, ambitious, loves display of ornament, cannot be trusted to obey to the letter, has a tenacity of action on the basis of slight information, quickly yields to fear in the face of real calamity, and is thoroughly immersed in a gross materialism. A millennium of Muslim dominion and centuries of Turkish oppression have accentuated these faults, but wherever an opportunity has been given, a native force of character has come to the surface, so that even the precipitous slopes of Lebanon have been terraced thousands of feet above sea-level, and a restless desire to better their condition has sent whole colonies of Syrians across the oceans to Australia, South America and to the United States. Common school and higher education is having a marked effect upon the country, but the seeds of disunion and mutual hatred were planted too long ago to be materially affected during the short period, comparatively, in which Western Christian influences have been brought to bear on Syria.

Languages: With the Arabs in the 7th century came the Arabic tongue, which immediately became the language of trade. It was thus inevitable that it should become universal in the land. The older Syriac, a closely-allied Semitic dialect, slowly succumbed, leaving behind broad marks of influence in the colloquial Arabic, so that a man’s speech betrays the locality from which he comes. In the extreme north of Syria, in the region of Aleppo, the Turkish language begins to be heard among the common people, and Arabic is not generally used north of that city. The official language for the whole country is Turkish, while everywhere Muslims of all nationalities use Arabic as their language of worship. Syriac remains the liturgical language of the
Syria

THE ENCYCLOPEDIA OF MISSIONS

Maronites and the Jacobites. North of Damascus there are several villages in which Syriac is still the vernacular. Hebrew is heard frequently in Jerusalem. Linguistically, then, Syria is a unit and is closely allied in the vernacular with the Euphrates region, Arabia, and Egypt.

Commerce: The centers of commerce in Syria are Damascus (which means “seat of trade”), Aleppo, Alexandretta, Tripoli, Beirut, Homs, and Haifa. Jerusalem might also be mentioned. The Hauran is the granary of the country. Olives, figs, licorice, oranges, grapes, and apricots are important crops. Maize, tobacco, and white potatoes are freely raised—America’s gift to Syria. Soap from olive oil is made in quantities at Haifa and elsewhere. The silk-worm is busy all over. Mt. Lebanon and the villages on the eastern slopes are alive with domestic weaving establishments. Bethlehem is the seat of work in olive-wood and pearl-stribs (souvenirs). Jerusalem is now, as it always has been, a caravansary for pilgrims from every clime.

Political Divisions: Syria (in its widest extent) is divided by the Turkish government into three vilayets—Adana, Aleppo, Syria (proper; called in Turkish Suryeh), and two mutassarifs—Jerusalem and Kuwait. Since 1860 the Lebanon region has been under the protection of foreign powers and is governed by a Christian mutassarif under special foreign oversight. The center of political danger to the Turk in Syria is in the Hauran district, where the Bedouins are settled and nomadic, have never consented to do military service in the Turkish army and are exceedingly jealous of official interference. However, the telegraphic service has been extended everywhere, even to these remote districts, and Turkish soldiers have easily put down incipient revolts. The Porte has ruled Syria by skillfully playing off one religious sect against another, so that there is not the remotest danger of Nasirudeh and Maronite and Druze striking hands. French influence since 1860 has been pervasive in the land. Trade has been opened, schools have been fostered, and religion has been watched by the French officials in the land with a care that betokens a desire at some time to control the country. Russia is jealous of this French propaganda, and under Moscovite auspices Jerusalem is being surrounded by towers, churches and hospices, and at present Russian schools are being founded in all the coast cities. The Turkish system of governing Christian sects is to use the church organization in administering them. Each sect commits its affairs into the hands of the head man of the body, who intermediates between the people and the Turkish officials. Woe to a man who falls out with his church! In effect he becomes an outlaw. Hence, when the missionaries entered the country in 1821, hoping to regenerate the decayed Arabs, they were compelled to start a Protestant Community so that those who accepted evangelical truth could have the protection of the law, such as it was. For when a Maronite was led to accept the Gospel statement of redemption through Christ alone he allowed himself to be cut off from communion. He was driven forth. His neighbors could wantonly take his property and maltreat him without let or hindrance.

Socially: The feudal system has not entirely disappeared from Syria, and princely families have until lately exercised great influence. The prince is patriarchal in his relations to his house, and thus many of the evils of the system are mitigated. But the mass of the people are plebeian. The clergy are often great social leaders, as would be gathered from the preceding paragraph. The marriage of the secular clergy is almost universal among the Oriental Christian sects; and in the cases where these sects have been won over to the Roman Catholic faith the custom has, by special stipulation, been retained. The status of woman has been low.

History: Syria has been from time immemorial the battle-field of nations, and it will be impossible to give in this statement even a chronicle of the great events that have taken place within its boundaries. At the beginning there had been a mission to perform for the civilized world, second to the mission of no other land and people. The Phoenicians and the Hebrew stand for the two important elements in civilization—commerce and religion. As history dawned, the Phoenicians were the traders of the world, and had a strong rule along the coast. Innumerable warring tribes divided up the rest of the land among themselves. The Hebrews appeared as a nation in the 15th century B.C., and in the 11th century under the leadership of David. Since 1860 the Lebanon region has been under the protection of foreign powers and is governed by a Christian mutassarif under special foreign oversight. The center of political danger to the Turk in Syria is in the Hauran district, where the Bedouins are settled and nomadic, have never consented to do military service in the Turkish army and are exceedingly jealous of official interference. However, the telegraphic service has been extended everywhere, even to these remote districts, and Turkish soldiers have easily put down incipient revolts. The Porte has ruled Syria by skillfully playing off one religious sect against another, so that there is not the remotest danger of Nasirudeh and Maronite and Druze striking hands. French influence since 1860 has been pervasive in the land. Trade has been opened, schools have been fostered, and religion has been watched by the French officials in the land with a care that betokens a desire at some time to control the country. Russia is jealous of this French propaganda, and under Moscovite auspices Jerusalem is being surrounded by towers, churches and hospices, and at present Russian schools are being founded in all the coast cities. The Turkish system of governing Christian sects is to use the church organization in administering them. Each sect commits its affairs into the hands of the head man of the body, who intermediates between the people and the Turkish officials. Woe to a man who falls out with his church! In effect he becomes an outlaw. Hence, when the missionaries entered the country in 1821, hoping to regenerate the decayed Arabs, they were compelled to start a Protestant Community so that those who accepted evangelical truth could have the protection of the law, such as it was. For when a Maronite was led to accept the Gospel statement of redemption through Christ alone he allowed himself to be cut off from communion. He was driven forth. His neighbors could wantonly take his property and maltreat him without let or hindrance.

Socially: The feudal system has not entirely disappeared from Syria, and princely families
Syria (1832-1841), has been controlled successfully by the Porte.

The first Christian church was at Jerusalem, and at Antioch the name "Christian" arose. The, Apostles and their followers carried the Gospel to every portion of Syria, and the faith took root everywhere. The scattering of the Jews, as a result of the great rebellions against Roman dominion in 70 and 130, changed the type of Christianity in Syria materially, but the Faith spread successfully and at the time of Constantine we find the land dotted with Christian churches.

Some of the greatest church fathers either were born or lived in Syria,—Ignatius, Justin Martyr, Ephesus, and Jerome—missionary influences went out on every side, the Bedouin Arabs were reached, and Frumentius, a Syrian, was the apostle of the Abyssinians. Constantine and his mother, Helena, were drawn to the land made sacred by so many associations. Jerusalem became attractive to pilgrims. The ascetic spirit, so widespread in those days, took possession of this veneration for the sacred places. Monasteries sprang up all over the land. Hermits swarmed among the wild gorges of the Judean desert, and where Choruses, the Persian conqueror swept over the country he slaughtered Christian monks by the thousands. Then came the Arab, who treated the Christians mildly. The Church of St. John in Damascus, it is true, was converted into a mosque; but Omar at Jerusalem left the Church of the Holy Sepulchre to the Christians as well as the Church of the Nativity at Bethlehem. But Christianity dwindled. Islam attracted many Syrians into its ranks. At the time of the Crusades the whole number of Christians in the land was probably not more than half a million. The Roman pontiff had long been desirous to win the Oriental churches, which for the most part refused to acknowledge the universal supremacy of the Pope. During the Crusades the Maronites threw in their lot with the Western Christians, and formed an alliance with the Church of Rome, which has grown closer every century.

Protestantism: Into this seething little world of fierce religious propaganda—Mohammedan, Oriental, and Papal—the new force of Protestantism came in the third decade of last century. The Turkish Government rather favored it than otherwise—considering it a new tool by which it could work confusion to its enemies. Rev. Pliny Fisk and Rev. Levi Parsons landed at Smyrna in 1819. In 1821 Mr. Parsons went to Jerusalem to make that the headquarters for the work in Syria. In 1823 Mr. Fisk and Dr. Jonas, King summered on Mt. Lebanon, and later made Beirut the center for work. In the same year Rev. Wm. Goodell, Rev. Isaac Bird, and their wives landed at that city. Shortly after both Mr. Parsons and Mr. Fisk died, but the work moved on. In 1828 violent persecution (ending in the death of Asaad Esh Shidiak, "the martyr of Lebanon"), political and warlike agitations, the forcible closure of schools at Beirut, Tripoli, and Acre, led the missionaries to go to Malta and wait until the storm should blow over. In 1830, however, they returned and took up their labors with redoubled energy. A printing press was established at Malta, and later removed to Beirut by Rev. Eli Smith; tracts and books were published, a translation of the Bible undertaken, and the land was more fully explored for favor-
The modern Syriac, a much corrupted form of the ancient language, is the spoken tongue of the whole land partakes of the same spirit. The interesting item about all these Christian sects of the East, and not a few from the fields of a score of different traditions, and from the hands of a score of different scholars until 1826, when versions of some books of Scripture were brought to Europe by Dr. Joseph Wolff.

When the American missionaries began their labors among the Syrian Christians in Urmiya in 1834, no literature was known to exist in this language, and Dr. Perkins, with his colleagues, proceeded to reduce it to writing and to issue from the press religious and educational works. Later on a few manuscripts were discovered, dating a hundred years back, written in the Elkosh dialect spoken in the vicinity of Mosul. These proved to be unscholarly paraphrases of the Gospels, or rude poetical renderings of Gospel history. They possess little interest save as throwing light on the development of the whole Arabic-reading world. The whole number of people now using the modern Syriac is estimated at about 100,000.

SYRIAN PROTESTANT COLLEGE: This college, established at Beirut, Syria, in 1866, is one of a number of important educational institutions in non-Christian lands which are the outgrowth of successful missionary effort. It is chartered under the laws of the State of New York, its corporate name in America being "The Trustees of the Syrian Protestant College." Morris K. Jesup of New York is president of the Board of Trustees. The Board owns the college buildings and the land on which they stand, consisting of about forty acres in the most prominent situation in the city of Beirut.

The work of the College commenced in the autumn of 1866, a preparatory class having been opened in 1867, a preparatory department in 1871, and a commercial in 1900. The number of students in 1866 was 16; in 1903 it was 650. The number of teachers in 1866 was 6; in 1903 it was 40. During the 37 years of its existence the college has had under its instruction 2,763 students; it has graduated 203 bachelors of arts, 189 physicians, 87 pharmacists and 404 preparatory students. Many of these students graduated elsewhere, but remain loyal to their Alma Mater.

The College draws its students from all the Christian sects of the East, and not a few from the Druzes, the Jews, and the Muslims. The geographical area from which the 650 young men now in the College have come extends from the Black Sea to the Sudan and from Greece to Persia—a region as large as the United States east of the Mississippi. The languages spoken by the students are Arabic, Turkish, Persian, Coptic, Hebrew, Yiddish, Armenian, Greek, English, German, and French. Their instructors are, in nationality, American, English, Arab, German, Swiss, and French.

The College is Christian but non-sectarian. It educates young men from numerous denominations, and from the fields of a score of different missionary societies. There is a flourishing YMCA among the students which occupies itself with the culture of the student body, neighborhood teaching, and close study of the Bible.

It is written with Syriac letters and is known as the Karshuni version. It is intended for those Syrians who have lost their own language. The scattered condition of the Syriac-speaking peoples has led to the growth of dialects, some of which present marked peculiarities.

Little was known of the modern Syriac among Western scholars until 1826, when versions of some books of Scripture were brought to Europe by Dr. Joseph Wolff.

Coptic, Hebrew, Yiddish, Armenian, Greek, English, German, and French. Their instructors are, in nationality, American, English, Arab, German, Swiss, and French.

The College draws its students from all the Christian sects of the East, and not a few from the Druzes, the Jews, and the Muslims. The geographical area from which the 650 young men now in the College have come extends from the Black Sea to the Sudan and from Greece to Persia—a region as large as the United States east of the Mississippi. The languages spoken by the students are Arabic, Turkish, Persian, Coptic, Hebrew, Yiddish, Armenian, Greek, English, German, and French. The College is Christian but non-sectarian. It educates young men from numerous denominations, and from the fields of a score of different missionary societies. There is a flourishing YMCA among the students which occupies itself with the culture of the student body, neighborhood teaching, and close study of the Bible.
This Association affords a ground on which members of liturgical and non-liturgical churches can meet and engage together in religious work. The graduates of the College, as well as students who have taken a partial course only, occupy positions of commanding influence as civil functionaries, merchants, ministers, teachers, civil and military physicians, lawyers, judges, editors, and authors. A number of them are in the military and consular service of the United States Government.

The influence of such a body of men, educated according to American methods, on the progress and elevation of the East is obvious. The significance of this great college as an illustration of the existence and zeal of Protestant missions is also worthy of note. The fact that these missions seem to culminate in such institutions of admitted utility has stirred the Roman Catholic and Greek Churches to great activity. France, Italy, and Austria have poured in men and lavished money that they also may found churches and schools, printing presses and publishing houses, primarily, doubtless, for the benefit of those of their own communion, but also for the promotion of their national and ecclesiastical interests. Russia has done the same in the interests of its politics and the religious advancement of the Orthodox Greek Church. All these efforts unite with those of Protestant missions in contributing effectively to the general advancement of a higher civilisation.

The same fact as to the relation of the college to the general missionary movement from which it sprang is seen in the healthy stimulus which it becomes to all native communities. This is seen not only in the praiseworthy efforts of native Protestants in the support of the institutions of the Gospel and the educational work inseparable from these institutions. It can be noted in all the native Christian, and after a little while in the non-Christian sects, taking the form of a general rivalry in matters of humanitarian and pecuniary enterprise. The existence of the college stimulates the increase of Protestant schools. The example of Protestant schools has caused the Greeks and the Maronites to found common schools and, subsequently, colleges. It has led the deserts to found the University of St. Joseph at Beirut, with preparatory, collegiate, commercial and medical departments. It has stirred the Turkish Government to establish and enlarge primary and higher schools for boys, culminating in the Rushdiyeh and Idadiyeh Turkish Colleges of Beirut. But the most surprising result has been the general diffusion of female education.

Each of the Christian sects has its complete series of girls' schools, with a collegiate institution at its head. And, most wonderful of all, this has led to the foundation of a society of Muslim men to promote female education and the establishment of schools for Muslim girls in the principal cities of Syria.

SYU-YIN. See SYN YIN.
the chief city of a most fertile and prosperous region. Station of the PN (1898), with (1903) 4 missionaries, three of them with their wives; 3 native workers, 2 outstations, 1 dispensary, 1 hospital, and 534 professed Christians.

TAI-KU-HSIEN: A town of Shan-si, China, situated 10 miles S. of Tai-yuen-fu. The Christians hereabouts were attacked, and many, together with almost all the native workers, were killed in 1900. Station of the ABCFM (1883), with (1903) 1 missionary and his wife, 3 native workers, 1 Sunday school, 1 day school, 1 dispensary, 1 boarding school, and 40 professed Christians. Some write the name Tai-ku.

TAINAN: A town and seaport in Japan, situated on the island of Formosa, on the S. W. coast. Population, 100,000. Station of the PCE (1865), with (1903) 7 missionaries, four of them with their wives; 3 women missionaries, 1 boarding school, 1 theological class, 2 dispensaries, 1 hospital, 1 medical class, 36 places of worship, 58 native workers, and 4,331 professed Christians. This includes the church statistics of Tai-chu. Some write the name Tainanfu.

TAINANFU. See TAINAN.

TAI-NGAN-FU: A town in Shantung, China, situated 35 miles S. S. E. of Tsi-nan-fu. Station of the North China Mission (SGF auxiliary) (1878), with (1900) 2 missionaries, one of them with his wife, and 1 native worker. Also station of the ME, with (1903) 1 missionary and his wife, 2 women missionaries, 19 native workers, 8 outstations, 10 places of worship, 4 Sunday schools, 3 day schools, 2 boarding schools, 1 dispensary, and 394 professed Christians, of whom 100 are communicants. Station also of the Independent Baptist Mission Movement, with 7 missionaries, five of them with their wives, and 1 woman missionary. Some write the name Tai-an or Tai-an-fu.

TAI-PING-FU: A town in Ngan-hwei, China, situated on the Yangtse River, about 35 miles S. S. W. of Nan-Kiang. Station of the Hauges China Mission (1897), with (1900) 1 missionary and his wife, 4 native workers, 1 place of worship, 1 day school, 1 outstation. Also station of the ME, with 1 native worker, 1 place of worship, 1 Sunday school, and 30 professed Christians. Some write the name Taiping-tien.

TAI-PING-FU: A town in Kwang-si, China, situated in the S. part of the province on the Teo River. Station of the Rhonish Missionary Society, with (1903) 1 missionary and his wife, 3 native workers, 3 outstations, 3 day schools, and 177 professed Christians, of whom 156 are communicants. Some write the name Taiping.

T'AI-PE: See TAI-PING-HSIEN.

T'AI-PING-HSIEN: A town of Che-kiang, China, situated near the E. coast, about 50 miles N. E. of Wen-chau. Station of the CIM (1898), with (1900) 1 missionary and his wife, 4 native workers, 7 outstations, 8 places of worship, 2 day schools, 2 boarding schools, 1 dispensary, and 368 professed Christians. Some write the name Taiping.

T'AI-PING-TIEN: See TAI-PING-FU.

T'AI-YUAN-FU. See TAI-YUEN-FU.

T'AI-YUEN-FU: A town in Shan-si, China, capital of the province and important for manufactures. Situated in the center of the province about 250 miles S. W. of Peking. Station of the BMS (1878), with (1903) 4 missionaries, three of them with their wives; 6 native workers, 6 outstations, 3 day schools and 130 professed Christians. Also station of the BZM (1899), with (1903) no occupant. Agency also of the BFBS, with 1 agent. Some write the name T'ai-yuan-fu or Tai Yuen Fu.

TAKAMATSU: A town on the island of Shikoku, Japan, situated on the inland sea, N. W. of Tokushima. Population, 34,625. Station of the FS (1892), with 2 missionaries and their wives, 1 hospital, and 5,389 professed Christians. Also station of the BZM (1898), with 26 places of worship, 22 Sunday schools, 2 day schools, 1 boarding school, and 5,389 professed Christians, of whom 3,946 are communicants.

TAKASAKI: A town in Japan, situated on the main island, about ten miles S. W. of Mayebashi. Station of the PE (1900), with (1903) 1 native worker and 1 woman missionary.

TAKAYAMA: A town in Japan, situated on the main island, about 40 miles S. of Toyama. Station of the Scandinavian Alliance, with 1 missionary and 1 woman missionary.

TAK-HING-CHAU. See Te-ssing-chau.

TA-KU-TANG: A town in Manchuria, China, situated in the district of Liao-tung, on the coast of Korea Bay, about 35 miles W. of the Yaku River. Station of the Danish Missionary Society (1896), with (1905) 2 missionaries, one of them with his wife; 1 woman missionary, 1 place of worship, 1 dispensary, and 5 professed Christians. Some write the name Da-gu-san.

TA-KU-TANG: A town in Kiang-si, China, situated on the Yangtse River, about 10 miles E. of Kiu-kiang-fu. It is used as a sanitarium for missionaries working in the Yangtse valley. Station of the CIM (1878), with (1903) 1 missionary and his wife, 1 native worker, 1 place of worship, 1 day school, and 8 professed Christians.

TALAOUGA: A village in the French Congo State, West Africa, situated on the Ogowe River, about 175 miles from its mouth. The people in the country about are chiefly Fangs, or Pahouin, as they are called by the French. Station of the Paris Evangelical Mission Society (1892), with (1903) 4 missionaries, three of them with their wives; 2 women missionaries, 21 native workers, 10 outstations, 2 day schools, and 841 professed Christians, of whom 72 are communicants.

TALAUT ISLANDS: A group of small islands belonging to the Dutch East Indies, lying N. E. of Celebes and about 150 miles S. E. of the Philippine Islands. Cabruang and Carkelang are the two largest of the group. The Talaut and the Sangir Islands are being evangelized through a missionary committee formed at Batavia, Java, for the purpose. There are about 45,000 professed Christians on the two groups taken together.

TALATSCHERI. See Tellicheri.

TALCA: A town in Chile, South America, and the capital of the province of the same name, about 180 miles by railroad N. of Concepcion. Population (1901), 29,112. Station of the FN (1876 and 1897), with (1903) 1 missionary and
his wife, 1 woman missionary, 1 native worker, 3 outstations, 1 place of worship, 1 day school, 1 boarding school, 1 dispensary, 1 hospital, and 61 professed Christians.

TA-LE-FU: A prefectural city in the northern part of Yunnan, China, northwest of Yunnan City. Station of the CIM (1881), with (1903) 3 missionaries and 1 place of worship.

TALHARA: A town in Bengal, India, situated in the Rajmahal region, about 45 miles east of Bhabagpur. The people are mostly Santals. Station of the CMS (1861), with 3 missionaries, one of them with his wife; 46 native workers, 1 place of worship, 9 day schools, 1 boarding school, 1 theological class, and 997 professed Christians, of whom 352 are communicants. Some write the name Talhari.

TALLAPUDI: A town in Madras, India, situated in the Godavari District, near the right bank of the Godavari River, W. of Rajahmahendri. Station of the Evangelical Lutheran General Council (U. S.), with 1 missionary, 1 place of worship, 1 day school, 1 Sunday school, and 192 professed Christians.

TAMAR: A village in Chota Nagpur, Bengal, India, situated 30 miles S. E. of Ranchi. Station of the Gerzner Mission Society, with 1 missionary, 27 native workers, 2 day schools, 10 Sunday schools, and 1,546 professed Christians, of whom 1,497 are communicants.

TAMATAVE: The principal port of Madagascar, situated on the east coast, on a point about 350 yards wide. It is quite cosmopolitan in its character, as representatives of some of the principal European and Asiatic nationalities live within its limits. A low estimate of the foreign residents make their number 1,200. Most of them are creoles from Mauritius, and natives of India of various religions and castes. Not more than 50 are pure British and French. French influence prevails, as there is a French Resident, controller of the customs, and Roman Catholic priests, who teach and preach in French. The native population of about 4,000 is composed of Hovas from the interior, Talmore from the south, Tanosy from St. Marie, and Betismisaraka from the surrounding districts. The latter are an exceptionally ignorant, superstitious tribe, who have been further debased by contact with the cargo and crews of the various trading vessels from Mauritius and Réunion which stop at the small ports.

Station of the SPG, with 3 native workers. Church statistics included in Andovoranto, where the missionary resides.

TAMEANGLAJANG: A village in Borneo, Dutch East Indies, situated about 120 miles N. N. E. of Banjermassin. Station of the Rehnsich Missionary Society, with (1903) 1 missionary and his wife, 4 native workers, 3 outstations, 4 day schools, 1 Sunday school, and 192 professed Christians, of whom 104 are communicants.

TAMI: An island off the E. coast of German New Guinea. Station of the Neudettelsau Mission Society (1889), with (1903) 1 missionary and his wife, 2 native workers, 5 day schools, 1 printing house, and 52 professed Christians.

TANAH-ABANG: A settlement in the island of Java, Dutch East Indies, situated about 12 miles W. of Batavia. Station of the Netherlands Missionary Union (1902), with the outstations formerly connected with Tang-garan.

TANAM: A town in British Guiana, situated in the Godavari District, near the right bank of the Godavari River, W. of Rajahmahendri. Station of the CMS (1861), with 3 missionaries, one of them with his wife; 46 native workers, 1 place of worship, 9 day schools, 1 boarding school, 1 day school, 1 industrial school, and 253 professed Christians.

TANABE: A town and treaty port in Japan, situated in the island of Formosa, on the W. coast and in the N. part of the island. Population, 100,000. Station of the PCC (1872), with (1901) 2 missionaries and their wives, 79 native workers, 56 outstations, 5 places of worship, 6 day schools, 1 college, 1 hospital, and 1,691 professed Christians.

TANANA: A town and seaport in German East Africa, situated 30 miles N. of Pangani. It is the terminus of the railroad to Korogwe. It has a German Government School. Population, 5,000. Station of the German East Africa Missionary Society (1890), with (1903) 3 missionaries and their wives, 1 native worker, 2 outstations, 1 place of worship, 1 day school, and 66 professed Christians.

TANGAIL: A town in Bengal, India, situated near the Madhupur jungle and about 50 miles N. W. of Dacca. Station of the Victorian Baptist Foreign Mission Society (1895), with (1903) 1 missionary and his wife, 2 native workers, 3 missionaries and their wives, 1 native worker, 2 outstations, 1 place of worship, 1 day school, 1 theological class, and 8 professed Christians.

TANGIER: A town and seaport of Morocco, situated on the south shore of the Strait of Gibraltar, 38 miles southwest of the Rock. Population, 10,000. Station of the NAM (1883), with (1903) 3 missionaries, one of them with his wife; 5 women missionaries, 4 native workers, 1
THE ENCYCLOPEDIA OF MISSIONS

place of worship, 3 day schools, 2 hospitals, and 12 professed Christians. Station also of the Mildmay Mission to the Jews (1889), with (1900) 2 missionaries and 1 woman missionary. The BFBS also has an agent and book depot here, with 5 colporteurs.

TANG-SHAN. See TONG-SHAN.

TANG-TAU: A town on the island of Ho-tan, China, situated in the N. E. part of the island. Station of the CMS (1902), with 2 women missionaries, 7 native workers, men and women, and 4 schools.

TANG-TAU. See ANG-TAU.

TANG-UN. See TUNG-NOAN-HSIEN.

TA-NING-HSIEN: A town in Shansi, China, situated about 50 miles W. N. W. of P'ing-yang-fu. Station of the CIM (1885), with (1900) 2 women missionaries, 5 native workers, 2 outstations, 3 places of worship, 1 boarding school, and 145 professed Christians.

TANJORE: A town in Madras, South India, and the capital of Tanjore District, situated about 46 miles W. of Negapatam. It contains a pagoda which is rated by some as the finest in India. It is noted for artistic manufactures of repousse work, cooper ware, jewelry and curious models in pith. Population (1901), about 57,870. Station of the SPG (1825), with (1903) 1 missionary, 1 woman missionary, 24 native workers, 5 places of worship, 12 day schools, 2 boarding schools, 1 college, and 883 professed Christians, of whom 583 are communicants. Also station of the Leipzig Missionary Society (1858), with (1903) 2 missionaries, one of them with his wife; 2 women missionaries, 38 native workers, 13 outstations, 12 places of worship, 11 day schools, 7 boarding schools, and 1,929 professed Christians, of whom 559 are communicants.

TANNA. See NEW HEBRIDES.

TANTA: A town and railway junction in lower Egypt, situated 60 miles N. N. W. of Cairo. Population, 33,725. Station of the UP (1893), with (1903) 1 missionary and his wife, 3 women missionaries, 23 native workers, 1 dispensary, 1 hospital, 2 boarding schools, 2 day schools, and 1 Sunday school. The number of professing Christians is commonly omitted from the published station reports of this Society.

TAOISM: Laozte the philosopher is said to have been born in the year 604 B.C., tho there has been some question whether he was or was not a real character. The fact that the names of his village and county and state or province seem to be allegorical, like the names in Pilgrim's Progress, has led to a doubt on this subject. But some allowance should be made, probably, for the tendency among the Chinese to deal in allegorical names from the shops of the chief cities sometimes bear upon their signs names which excite a smile in a foreigner.

Laozte's history, all things considered, seems real. It is said that he left a son, who won distinction in public office.

Laozte's birth occurred about a half century before the birth of Confucius; they were therefore contemporaries. Both are said to have been the sons of very old men.

The condition of China, or of that particular province in which Laozte lived, corresponding to a portion of the present Shantung province, was greatly disturbed by border wars and intestine revolts and intrigues. There was a scarcity of morality, and the political condition of the country was chaotic. Both Laozte and Confucius aimed at reform. Both appear to have been disinherited and high-minded. Both were rather impatient, however, with the stolidity and degradation of the people, and with the vices and corruption of the reigning princes.

Laozte appears to have held for a time an office as keeper of the archives, as the old records express it; but his mind drifted toward philosophy and political reform, and the position he held was far from meeting his ambition: political engagements were irksome to him.

Comparatively little is known of this truly profound thinker or reformer. He is supposed to have been poor, and for that reason perhaps the more keenly conscious that his nation and his age failed to appreciate him. He was, in short, too morbid in spirit to make the best use and secure the greatest results of his rare gifts. He formed no school of followers, and wrote no books. On the contrary, he withdrew himself from men, was too proud to teach or write, disliked display of any kind, and was in fact a recluse.

Confucius, on arriving at manhood and entering upon his career, sought an interview with Laozte, with a hope of profiting by his great ability, his observation and his experience. He was received coldly, however, and with severe criticism instead of sympathy. Much as the two men were alike, they had wide differences of character, and these were increased by the fact that Laozte was already an old man when Confucius appeared before him. He was in no attitude of mind to approve or even tolerate what he considered the gushing enthusiasm and crudity of Confucius. He looked upon him as an ambitious, bustling agitator, sounding brass and a tinkling cymbal, and he predicted the failure of his pretentious efforts at reform.

Confucius, on the other hand, was astonished at the churlishness of the old reformer, was perplexed at his involved and incomprehensible theories and mystical speculations, and he could only compare him to the "incomprehensible dragon."

At last, in old age, Laozte's despair at the condition of the country became overpowering. He had dire forebodings of calamity, revolution, bloodshed, political chaos, and destruction. He had become more and more unpopular as he had grown more poor and more reproachful toward his countrymen.

He dreaded to witness the ruin which he was sure was coming upon the land, and he fled into voluntary exile, passing westward through the Hankow Pass into the province of Ho-tan. He was induced to stop for a time with the keeper of the archives, and instruct him in the principles of his philosophy. This gate-keeper seems to have realized that no ordinary person was before him, and he was unwilling that a man who was too morbid and impracticable to write any book or organize any class of disciples should pass from the knowledge of men without leaving some substantial results of his thinking. He appears to have taken down from dictation the main principles of the reformer's teaching. This record is known as the Tao Teh King. It embraces all that is known of Laozte's doctrines.
After leaving the Hankow Pass for the west, Laotze passed into obscurity, and, so far as is known, nothing was ever heard of him afterward. Many legends sprang up around the history of Laotze like the young shoots at the root of a dying tree. One of these relates that upon leaving the Pass for his voluntary exile he parted with his servant. In the absence of his master, was unwilling to accompany him, and in the settlement charged an exorbitant sum as back wages; but as Laotze had by a spell kept him alive far beyond his appointed time, he withdrew the spell, and the servant became a dry skeleton. However, at the request of the gate-keeper, who interceded for the servant, he restored him to life, and then found him reasonable in his price. Other absurd legends are preserved, one of which is that Laotze was miraculously born at the age of eighty, and that he was known as the "Old Boy." He was gray-haired at birth. Certain legends similar to those which are related of Gautama, and which may have been copied, are also given—as that Laotze leaped into the air as soon as he was born. Some of his followers have claimed that he was a spiritual being, and not an actual, ordinary man.

The Character of Laotze: Laying aside all legends, and contemplating the actual life of Laotze, so far as scantly materials enable us to do, we find him a man above reproach in morals, and able customs as our Savior did in His dealings with the Pharisees, and, like Him, he urged the objectivity of mere formal and immovable customs, and held "the reins so lightly, that the people may forget them as kings, and only think of the good of the people and not for their own selfish ends, which ends the people, like so many dumb beasts, are designed to subserve. "Kings," according to Laotze, "should rule so quietly, and hold the reins so lightly, that the people may forget them as kings, and only think of them as superiors." There should in all government, as he insisted, be a minimum, and not a maximum, of government. Surely these practical and lofty political principles stamped Laotze as a man of prophetic genius.

Confucius said much more than he concerning government: more, certainly, in the number of details; but his book is laden with sublime principles as those of his rival and none of his teachings are more in accord with the truth.

The Philosophy of Laotze: It is as a philosopher that Laotze most inspires our respect and honor. Tao was his ideal of the all-comprehending and eternal essence of things, means Reason, as nearly as it can be translated; but it implies a near approach to the Pantheistic absorption in deity which it secures by saying that "the leopard by its brilliant colors, and the monkey by his frivolous activity, only draw the arrows of the archer," and to the loud-mouthed reformer he would say, "You are like a man who beats a drum while hunting for a truant sheep."

One point in which Laotze was far in advance of his age, and abreast with some of the best political thinking of whatever age, was his maintenance of the theory that kings exist for the good of the people and not for their own selfish ends, which ends the people, like so many dumb beasts, are designed to subserve. "Kings," according to Laotze, "should rule so quietly, and hold the reins so lightly, that the people may forget them as kings, and only think of them as superiors." There should in all government, as he insisted, be a minimum, and not a maximum, of government. Surely these practical and lofty political principles stamped Laotze as a man of prophetic genius.

Confucius said much more than he concerning government: more, certainly, in the number of details; but his book is laden with sublime principles as those of his rival and none of his teachings are more in accord with the truth.
is the Infinite Reason, in such a sense that it embraces all excellence and glory; it corresponds deified by Laotze, tho in no superstitious sense; and yet it was impersonal; it was apprehended by things originate with Tao, conform to Tao, and the Book of Job and the Ecclesiastes. Tao was very nearly to the word Wisdom as it is used in

...it is the origin of heaven and of earth. It is its influence is still and void, and yet it "encircles everything and is not endangered;" it is ever inactive, and yet leaves nothing undone; nameless, it is the origin of heaven and of earth. It is not strange, perhaps, that with so vague a conception of the supreme force in the world the Chinese mind should have lapsed into a mere general conception of Deity, and that the prayers of the emperors have for ages been addressed to heaven.

Professor Douglas, of the London University, has summarized the elements of Tao as follows: (1) "It is the Absolute, the Totality of Being and Things. (2) The Phenomenal world and its order. (3) The ethical nature of the man, and the principle of his action." One is reminded of various philosophic schools of ancient and modern times. The "totality of being and things" is about equivalent to the pantheistic conception of the Indian Vedanta. It does not differ materially from the "absolute substance" of Spinoza or the "absolute intelligence" of Hegel. It must be confessed that Laotze was a profound philosopher. He has rarely been excelled in the history of philosophy, for in view of his comparatively isolated position we must regard him as eminently original. His system was wholly his own; he was the father of Chinese philosophy. In profundity of thought he far exceeded Confucius, tho he was less practical. Confucius was not a philosopher in the strictest sense; he was only a skilful and eminently practical compiler of ancient wisdom. He did not claim to be more than this, and with laconic modesty he spoke of himself as only an editor. But the Tao Teh King of Laotze came from his own brain.

There is a seeming contradiction in the teachings of Laotze in reference to the past. While Confucius carried his reverence for ancient authorities to an extreme which scarcely seemed to admit the possibility of anything new in the world, Laotze took issue with him sharply, and even poured a degree of contempt upon his extreme reverence. At the same time, tho he admitted no age of antiquity as necessarily authoritative, he looked back, in a general way, to a golden age of simplicity and virtue which had passed away, and his whole idea was to return from the complex wisdom and civilization which he regarded as only a curse, to the better days when men had few wants and lived quietly.

He was in accord with Confucius on one point, namely, the uprightness and dignity of man's original nature. They recognized no doctrine of human apostacy which assumed hereditary form. In logical consistency they both maintained that every man is born without evil bias, and is sound at the core. The continued influences of demoralizing example were supposed to account for the evils which these great sages found in the world about them. Like the ancient Druids, Laotze propounded his great principles of life in triads, and the three precious virtues which he cherished were compassion, economy and humility, all of a quiet type. He did not believe in intellectual brilliancy of any kind, much less in any show and pomp of conscious power, and he had little to say of prowess; his ideals were not the great and ambitious and mighty, as men are reckoned to be mighty, but those, rather, who represented the passive virtues, the gentle and retiring graces of human life.

There is a difference of opinion as to Laozé's idea of God. Professor Douglas thinks that he had no conception of a personal divine being, at least that he recognized no such being; but on the other hand, Professor Legge of Oxford seems confident that the supreme "heaven" or God in heaven was involved in his idea of Tao. He maintains that Laozé often spoke of heaven in a non-material sense, and that in one instance he calls the name of God itself.

One thing is certain: whether Laotze regarded Tao as personal or not, he assigned to it providential oversight and care and all forms of beneficent interest. Says Professor Legge: "Tao does more than create. It watches over its offspring with parental interest. It enters into the life of every living thing. It produces, nourishes, feeds, etc."

Laozé's doctrine of creation seems a little vague. He says: "That which is nameless is the beginning of heaven and earth. Tao produced One, the first great cause; One produced Two, the male and female principles of nature; Two produced Three, and Three produced all things, beginning from heaven and earth." This strikingly resembles the Shinto notion of the origin of all things, according to which there are in view of his comparatively isolated position we must regard him as eminently original. His system was wholly his own; he was the father of Chinese philosophy. In profundity of thought he far exceeded Confucius, tho he was less practical. Confucius was not a philosopher in the strictest sense; he was only a skilful and eminently practical compiler of ancient wisdom. He was in accord with Confucius on one point, namely, the uprightness and dignity of man's original nature. They recognized no doctrine of human apostacy which assumed hereditary form. In logical consistency they both maintained that every man is born without evil bias, and is sound at the core. The continued influences of demoralizing example were supposed to account for the evils which these great sages found in the world about them. Like the ancient Druids, Laozé propounded
humility, forbearance, etc. The differences, however, which appear are more striking than the resemblances.

Christ showed a balance of truth. He taught the passive virtues, but also the active ones, which Laotze did not. He commended modesty and secrecy in prayer, and yet the duty of active influence. "Let your light so shine," etc. This was not for self, but for others. Confucianism was active, Taoism passive, Christianity was both. The fatal defect in Taoism was its lack of recognition and divine power. Its ethics were high, but it had no love for God, and therefore none for man.

**The Tao Teh King:** This is a short treatise, already referred to, embracing the sayings of Laotze which were recorded by the keeper of the Hanwo Pass as the great teacher was about to go into exile. It is very brief, only about the length of the Sermon on the Mount. In its general character it is exceedingly intricate, and often obscure. The best scholars feel little confidence in their interpretations of it. Here is a specimen: "There was something chaotic and complete before the birth of heaven and earth. How still it was and formless, standing alone and undergoing no change, proceeding everywhere, and in no danger of being exhausted. It may be said to contain all things." Its real spirit and meaning this passage corresponds remarkably with one found in the Rig Veda, in which the original chaos is described as being brooded over by the infinite Brahm, the "Only Existing One," breathing quietly. The vagueness of the philosopher's conception is well set forth in this passage: "I do not know the name, but designate it the Tao (the way) and forcing myself to frame a name for it, I call it the Great. Great, it passes on in constant flux; so passing on it becomes remote when remoteness has come back."

**Modern Taoism:** There could hardly be a stronger contrast than that which is presented between the ancient and the modern Taoism. Laotze was virtually rationalistic, but the present system is the most irrational of the great existing religions; it is a mass of superstitions of the lowest type. The name Taoism applied to a mixture of Buddhism and the ancient ancestor-worship and other superstitions of China. Speculation seems to have spent itself in the few centuries which followed the life of Laotze. Having first run wild in theories, it degenerated into low superstitions. The principle in Laotze's teachings which seems to have suggested the prevalence of spirits and ghosts in all nature, animate and inanimate, was his declaration that the presence of Tao is universal. He gave it a pantheistic omnipotence and indwelling in all beings and things. He little thought, probably, that this would lead to the notion that every object in nature is haunted, and thus cause the land to swarm with polytheism. A Taoist is afraid of his shadow. In the woods or in dark ravines he imagines he is about to be pounced upon by sprites or demons. The trees have souls, the very air is laden with a mysterious influence. Telegraph wires cannot pass through the open spaces nor steeples be reared without disturbing "fung-shui," nor can the earth be excavated for the purpose of pursuing sensual enjoyments while one can is shown to the best advantage. Yet this man, by his intellect and vigor, won great influence for a time.

Taoism continued to be a philosophy for some time after the death of Laotze, but it was a changed and ever-varying series of speculations. In the opinion of Dr. Legge, it did not become a religion, strictly speaking, until after the introduction of Buddhism in the 1st century. It had a priesthood and abundant superstitions, but it was sorely in need of being reenforced by something higher. So far as history informs us, no successor of Laotze seemed to correctly interpret or propagate his teachings. His standard was too high, his teachings were above the reach of his successors, his ethics and his transcendentalism alike failed to be appreciated. Professor Douglas has a very different estimate of the followers of Laotze from that ascribed to the immediate successors of Confucius. While the latter drew multitudes of the best men of the age about him, Laotze's camp was a Cave of Adullam to which the discontented and erratic resorted. His teachings, therefore, were left in the worst of hands.

Among the most influential Taoists in the next generation was Leitze, who applied Laotze's quietism into a general Epicurean license. "Lay aside aspiration, and live for to-day; live in the freedom of the beast," would express his general view. Laotze had said: "Lay aside pomp and circumstance; live simply and with little pretense." Leitze carried the idea to extremes. He also gave a licentious interpretation to the pantheism of Laotze, assuming that "if Deity lives and acts in us, then we are Deity, and are above restraint; we are as free as the gods."

The development of this extreme logical sequence of pantheism has not been confined to Taoists or to any particular country. The Upanishad pantheism of the Hindus led to the same results by the same logical process; men came to regard the soul as beyond the reach of sin or stain. Even in the extreme fanathism which sometimes attaches to Christian doctrine, notions of liberty and perfection lead to the abandonment of law, and to general laxity of life. Leitze attached great importance to dreams. They constituted one mode of his teaching. He represented the emperor Wang-te as dreaming that he was in a world where men lived in the freedom of perfect indiffrence; nothing troubled them. These wonders led to the art of conjuring, and Leitze wrung from Yin He, the Hankow gate-keeper, his assent to these arts, and his endorsement of them on the alleged authority of Laotze. In all this Leitze wholly misrepresented the great philosopher and his principles. As a result of these frauds there swept in that flood-tide of juggleries which swamped the principles of Taoism, and opened the way for the old national superstitions.

Leitze did not fail to encounter the rising Confucianism. He tried the old tactics of his master Laotze; he endeavored to put down Confucianism with ridicule. He had no better weapons than those of borrowed sarcasm. As it seemed necessary to his prestige that he assume the role of a philosopher, he developed a theory of the universe, but it was puerile and failed to win respect. His favorite method of argument was that of dialogue, in which his view was always made to triumph. He was forever fighting men of study of his own manufacture. In the interest of pursuing sensual enjoyments while one can is shown to the best advantage. Yet this man, by his intellect and vigor, won great influence for a time.
He was followed by Chwangtze. He was inclined to return from Leitzse to a position more like that of Laotze. He discoursed on the vanity of life, and bitterly opposed the superfluous honnuries and showy benevolences of Confucianism. "Sages," he said, "natural and profound; to be benevolent and kick and struggle to become righteous, and the people suspect their very earnestness. They bow and distort themselves in their endeavors to act with propriety, and the empire begins to break up."
The satire which ridicules all this is keen, and has a measure of truth.

There are some resemblances between the theories of Chwangtze and the Vedanta philosophy of India. He treated wakeful and conscious life as an illusion, and doubted the substantial reality of all things. And to this day there is a belief among Taoists that there is an inner and invisible soul in all objects; the unseen appears to be quite as real as the visible. As an illustration of this doubt as between the tangible and the invisible, he related a dream in which he seemed to be a butterfly, flitting about in the air, and he felt no little surprise on waking to find that he was no butterfly, but Chwangtze. "But then," he says, "the thought came to me, on the other hand, was that really a dream, or am I now dreaming that I am Chwangtze and not a butterfly?"

In the 3d century before Christ, Taoism had gained such influence that the reigning emperor ordered a general conflagration of all sacred books except those of the Taoists, but the doctrine as then held was not that of Laotze. It had undergone so many changes that it had become a system of childish superstitions. It was believed that immortality might be gained by charms and spells. The emperor Chwangtze believed this, and also that in the western seas there were happy isles where genii dispensed the elixir of immortality to all who came. This emperor sent expeditions to these imaginary isles to bring back the elixir. The period of his reign was a great harvest-time for all Taoistic frauds. The priests claimed the most astonishing of occult arts.

Taoism was now neither a philosophy nor a religion; it was a system of jugglery. Under the reign of the emperor Wu of the Han dynasty, who also became an implicit believer, the system still flourished, even down to about 100 b.c. This emperor also sent expeditions to the happy islands; alchemy and the quest for the elixir of life were at their height. It will be remembered that in Europe, also, similar fanaticisms have at various times been rife; but the wildest of them never equaled that of the Taoists of China in the reign of Wu. From the emperor down, all classes were seeking this elixir. Business of every kind was a time neglected and the fields were untilled. Only the astrologists and priests were thrifty. The emperor lavished fortunes on their wild schemes.

Under these fanatical emperors Confucianism was bitterly persecuted. Many distinguished Confucian philosophers were burned alive, and all their books were burned. But at the death of Wu a great reaction took place and Confucianism was revived and reinstated.

In the 1st century the first high-priest or pope of the Taoists was appointed, and the office has descended in his clan to this day. He is elected by the priests of the clan; he is not bound by rules of celibacy or any particularly ascetic requirements. Taoism became a religion, strictly speaking, soon after the advent of the Buddhists, some-
During the reign of the emperor Whan, 147-165, greater show was given to this system, and the custom of offering imperial sacrifices to Laozce at Koechoen, his birthplace, was begun. Many attempts were made to save life by charms, and in order to increase their power, legends borrowed from Buddhism were assigned to Laozce. Among these things it was claimed that after he left the Hankow Pass he spent three nights under a mulberry tree under temptation of the Evil One; lovely women, also, were his tempters.

The system again sank into neglect in the reign of Taikeen, 569-583. Orders were issued against both Taoist and Buddhist monasteries, and no doctrine could be taught but Confucianism. Again, under the Wei dynasty, Buddhism and Taoism were reinstated. In the reign of Tai Wute there was a return to the notion of an elixir of life, and the emperor became a Taoist. In opposition to such asceticism began to be copied by Taoists. The emperor Tai Ho, 477-500, built temples and monasteries for this sect.

The emperor Wu, 566-578, abolished Buddhism and Taoism because their jealousies and the morality of the "Book of Rewards," the sacred book of Taoism, known as the "Book of Rewards," inculcates ethics which are generally in negative form, but notwithstanding the precepts are not malicious toward man; also Kublai Khan, in the 13th century. Hung Che, 1488-1506, was very hostile. The present Manchu dynasty has also been hostile, and has passed various edicts against Taoist jugglery.

TARAS: A city of Asia Minor, situated in Caesaria district, Kaffraria, about 40 miles W. of Queenstown. Station of the UFS (1869), with (1903) 1 missionary and his wife, 9 native workers, 1 place of worship, and 539 professed Christians.

TARBUS: A station of the CMS (1885), with (1903) 1 missionary and his wife, 9 native workers, 1 place of worship, and 521 professed Christians, of whom 44 are communicants. Station also of the CEZ (1888), with (1903) 5 women missionaries, 12 native workers, 3 day schools, 1 Sunday school, 1 dispensary and 1 hospital.
word derived, according to some, from the Mongol tribal name, Ta-ta. Turks accept this derivation, merely adding that the tribal name should be followed by a or -ar to make full sense. The word Ta-ta-ar (man of the Ta-ta tribe) would thus be the identical word now in use. The form Tartar is a play on words introduced by those sufferers of the Middle Ages who could imagine no source but Hell or Tartarus for the hordes who stripped them. The term has been loosely applied to any inhabitants of Central Asia, and does not carry with it any ethnological or political significance. Many writers discard it altogether. It seems better, however, to use it in a wide sense, including both Mongol and Turkish tribes, since these are allied, yet not the same. As things now are the term Mongol is made to do double duty, describing the genus as well as the species. Silence were better than loose speech that confuses. The word "Tartar" as applied by popular writers to the Tatars of Western Asia (the Kazan, Astrakan, Kipchak, Nogai and Crimean Tartar) means neither more nor less than "Turks." As applied to the Siberian nomads and those of North Turkestan, it means "Mongols." See Mongols and Turks.

TA TAK MALAJA: A town in Java, Dutch East Indies, situated about 50 miles S. by W. of Cheribon. Station of the Netherlands Missionary Union (1898), with (1903) 1 missionary, 1 native worker, 1 day school, and 24 professed Christians.

TASMANIA: A British colony in Australasia, formerly called Van Diemen's Land, and including the island of that name and several smaller ones lying, for the most part, in Bass Strait. Area, 26,215 square miles. The estimated population, about 150,000, is composed of Tasmanians, English, Australasians, Chinese and Germans.

The island is traversed by mountain ranges with fertile valleys. The climate is mild and not subject to extremes. It was made a penal settlement in 1804, but transportation of criminals ceased in 1853. The aborigines are entirely extinct. Hobart, the capital, had a population of 33,565 in 1881, and 44,008 in 1902.

The people are now nominally Christian, the majority belonging to the Church of England, the remainder being Roman Catholics, Wesleyan Methodists, Presbyterians and others.

The SPG maintains a mission here, and the Wesleyan Methodists have several bunched churches in Victoria and Tasmania together.

TA TSIEN LU: A town in Szechwan, China, situated 86 miles W. of Ya-chau-fu. Station of the CIM (1897), with 3 missionaries and 1 place of worship. Also written Ta-chuen-lu.

TA TUNG FU: A town in Shan-si, China, situated on a branch of the Pai-ho, 170 miles W. of Peking. All the missionaries in this region were killed in 1900 and the work is slowly being taken up again. Station of the CIM (1886), with (1903) 1 missionary and his wife, 2 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 dispensary, and 18 professed Christians. Some write the name Ta-T'ung.

TAUNG NGU: A town in Burma, India, 170 miles from Rangoon by railroad. It has very extensive suburbs and a sheet of water more than a mile long lies within its walls. It was formerly the seat of an independent king. Attitude, 181 feet. Population, 17,500, nearly all being Buddhists.

Station of the ADMU (1853), with (1903) 3 missionaries and their wives, 2 missionaryworkers, 255 native workers, 87 outstations, 161 places of worship, 73 Sunday schools, 68 day schools, 5 boarding schools, 1 dispensary, 1 hospital, and 17,000 professed Christians, of whom 4,849 are communicants. Also station of the SPG (1873), with (1903) 4 missionaries, one of them with his wife; 108 native workers, 6 day schools, 4 boarding schools, and 2,903 professed Christians, of whom 2,868 are communicants. Station also of the ME, with (1903) 1 missionary and his wife. Some write the name Toongoo.

TAUNGS: A town in BechuanaLand protectorate, South Africa, situated on the Hart River, 40 miles S. of Vryburg. Station of the LMS (1668), with (1903) 1 missionary and his wife, 8 native workers, 5 day schools, and 2,000 professed Christians, of whom 130 are communicants. Some write the name Taung.

TAURANGA: A town in New Zealand, situated on North Island on the N. coast, about 90 miles S. E. of Auckland. Station of the CMS, with (1903) 1 missionary and his wife, 5 native workers, and 1,100 professed Christians, of whom 158 are communicants. Grants of the CMS to the New Zealand native congregations ceased in 1902.

TAYETA: A settlement in British East Africa, situated S. E. of Mt. Kilimanjaro about 60 miles S. W. of Tavo on the railroad from Mombasa to Uganda. It is a wild country where a part of the missionary's duties consists of shooting the lions and leopards that attack the people. Station of the CMS (1893), with (1903) 2 missionaries and their wives, 1 woman missionary, 6 native workers, 1 outstation, 121 professed Christians, of whom 41 are communicants; 1 place of worship, 3 day schools, 1 industrial class, 1 dispensary, and 1 printing house.

TAVOY: A town in Burma, India, situated in Tenasserim, on the Tavoy River, 30 miles from its mouth. The town lies low, and its southern portions are flooded at high tide and swampy during the rains. It is laid out in straight streets, and the houses are generally built of timber or bamboo, thatched with palm-leaves. Its trade is of little importance. Population, 13,372, mostly Buddhists.

Station of the ABMU (1828), with (1903) 2 missionaries and their wives, 1 woman missionary, 50 native workers, 23 outstations, 24 places of worship, 24 Sunday schools, 20 day schools, 1 boarding school, and 1,172 professed Christians.

TA YEB: A village in Hu-pei, China, situated about 45 miles S. E. of Wu-chang-fu. Station of the WMS, with (1903) 1 missionary, 11 native workers, 7 outstations, 2 day schools, 11 places of worship, and 130 professed Christians, of whom 105 are communicants.

TE AUTE: A settlement in New Zealand, situated on the North Island in the Hawkes' Bay district, about 24 miles S. W. of Napier. Station of the CMS, with (1903) 2 missionaries, one of them with his wife; 29 native workers, 1 college, and 1,450 professed Christians, of whom 130 are communicants. The native congregations in this region are under the charge of the local church, grants to which ceased in 1902.

TEGWAH: A settlement in Rhodesia, Africa,
sitting about 70 miles S. W. of Bulawayo. Station of the WMS, with (1903) 1 missionary, 5 native workers, 15 outstations, 15 places of worship, 4 day schools, and 130 professed Christians, of whom 22 are communicants.

TEHERAN: The capital of Persia, situated due S. of the Caspian Sea in latitude 35° 40' north, longitude 51° 25' east. It is a walled city, with narrow, ill-paved streets, tho here and there Parisian boulevards and European houses present striking contrasts to the native quarters. The water supply is good and abundant, and public baths are numerous. The population of 250,000 consists of Persians, Turks, Armenians, and a few Jews and Parsees. The government established a polytechnic school here in 1849, with a certain number of European professors. Its students receive a liberal education. There is also a military school and Civil Service school, the latter opened in 1900.

The Imperial Bank of Persia has its chief offices in Teheran. It is an English establishment. Russian capital has also established two banking houses there. There is a railway of six miles length leading out of the city, and two carriage roads of about ninety miles length each.

Station of the London Jews' Society (1888), with (1903) 1 missionary and his wife, 4 native workers, 2 day schools. Also station of the Swiss Romande Mission (1898), with (1903) 4 missionaries, three of them with their wives; 17 native workers, 3 outstations, 1 place of worship, 2 day schools, 2 dispensaries, and 40 professed Christians.

TEKENIKA: A settlement on Hoste Island, about 65 miles N. W. of Cape Horn. This is almost the last existing settlement on the Yahgans, who are becoming extinct. Station of the SAMS (1892), with (1903) 1 missionary and his wife, 1 place of worship, 1 boarding school, 1 orphanage, and 50 professed Christians.

TEKKALI: A town in Madras, India, situated in the district of Vizagapatam, about 30 miles N. E. of Chilacode. Station of the BMP (1898), with (1902) 1 missionary, 16 native workers, 1 outstation, 5 Sunday schools, 5 places of worship, 7 day schools, and 72 professed Christians.

TELLICHERRI: A town and seaport on the Malabar Coast, Madras, India, 43 miles north-northwest of Calicut. A healthful and picturesque town built upon a group of wooded hills running down to the sea, protected by a natural breakwater of rock. It has a good harbor and an excellent trade. Population, 26,410, Hindus, Muslims, Christians.

Station of the Basel Missionary Society (1839), with (1903) 4 missionaries, three of them with their wives; 52 native workers, 6 outstations, 8 day schools, 3 boarding schools, and 591 professed Christians, of whom 324 are communicants. The name is written by Germans Talatscheri.

TELEGUS: A non-Aryan or Dravidian race inhabiting the east coast of the peninsula of Hindustan, India, north of the city of Madras and south of the Godavari River, and extending nearly outward from the coast of the Bay of Bengal. The language of the Telugus is refined and has been called the Italian of Hindustan. The number of Telugus is placed at about 20,000,000 by the census of 1901.

TEMBE: A settlement in Portuguese East Africa, situated on the Tembe River, about 20 miles S. of Lourenço Marques. Station of the Swiss Romande Mission (1898), with (1903) 1 missionary and his wife, 1 woman missionary, 7 native workers, 7 places of worship, 7 Sunday schools, 7 day schools, and 477 professed Christians, of whom 102 are communicants. This place is sometimes spoken of as The Tembe.

TEMOHON: A village in the island of Celebes, Dutch East Indies, situated in the Minahassa district near Menado. Station of the Netherlands Missionary Society (1819), with (1902) 1 missionary and his wife and 1 theological class.

TEMPLE, Daniel: Born December 23, 1789, at Reading, Mass. Died August 9, 1851. The perusal of Dr. Buchanan's Christian Researches in India at his conversion led him to the decision to become a missionary to the heathen. He studied at Phillips Academy, Andover; Dartmouth College, and Andover Theological Seminary. He was ordained October 2, 1821, and embarked January 2, 1822, as a missionary of the ABCFM for Syria, reaching Malta February 22. Here he remained till 1833, the political condition of Turkey and Syria rendering it unsafe for a missionary family to settle there. He proceeded to England and France, and engaged in an agency for the Board two years, returning to Malta in 1830. In addition to the superintendence of the press, he had during almost his whole residence here two services on the Sabbath in English in his own house, a Sabbath school which he taught himself, and also a lecture Friday evening. In 1833, by invitation of the Prudential Committee, he visited the United States, and engaged in an agency for the Board there, and returned to Malta in 1835, where he labored until the time of his removal, were issued 350,000 volumes containing 21,000,000 pages. Nearly the whole had been circulated, and additional supplies of some of the works were urgently demanded. The arrival at Smyrna of a vessel with presses and printing materials, and an ordained missionary, aroused the fanaticism of the Greeks, and Mr. Temple was ordered by the Governor to leave the city in ten days. He was ordered by the direction of the Society, he removed the Greek and Armenian part of the press plant to Smyrna. From 1822, when the press was established in Malta, to the time of its removal, were issued 350,000 volumes containing 21,000,000 pages.

Te-tsung-chau
Tibet

THE ENCYCLOPEDIA OF MISSIONS 732

places of worship, 1 day school, and 160 professed Christians, of whom 120 are communicants. Some write the name Tehangan.

TE-TSING-CHAU: A town in Kwang-tung, China, situated on the Hsi-kiang, about 90 miles W. of Canton. Station of the Reformed Presbyterian Missionary Society (1897), with (1900) 1 missionary and his wife and 2 native workers. Some write the name Tak Hing Chau.

TETUAN: A town belonging to Spain, in Morocco, situated on the N. coast, about 50 miles S. of Gibraltar. Station of the NAM (1889), with (1903) 4 women missionaries, 1 Sunday school, 2 day schools, 1 dispensary, and 10 professed Christians.

TENG-CHAU-FU: A city in Shantung, China, on the coast of the Gulf of Chi-li, 55 miles north-west of Chi-fu. This city is one of the most healthy places for Europeans in China. Station of the PN (1881), with (1903) 8 missionaries, seven of them with their wives; 2 women missionaries, 55 native workers, 19 outstations, 10 places of worship, 20 Sunday schools, 1 printing press, 20 day schools, 2 boarding schools, 1 college, 6 dispensaries, 1 hospital, and 1 medical class, and 657 professed Christians. The college is to be removed to Wei-hsien. Also station of the SBC (1860), with (1903) 3 missionaries with their wives, 2 women missionaries, 6 native workers, 4 outstations, 4 places of worship, 2 Sunday schools, 3 day schools, 1 boarding school, and 220 professed Christians.

TEZPUR: A town of Assam, India, on the Brahmaputra, 75 miles above Gauhati. The town is built on a plain between two low ranges of hills, upon which the houses of the European residents are built. It is an important seat of trade, where the river steamers touch to take on board tea, and to leave stores of various kinds to be distributed among the neighboring tea-gardens. Of late years the character of the houses and sanitary condition of the town have been much improved. Population, 2,910. Station of the SPG (1862), with (1903) 1 missionary, 24 native workers, 6 places of worship, 17 day schools, 1 boarding school, and 783 professed Christians, of whom 110 are communicants. Some write the name Texpore.

THABA BOSIGO: A village in Basutoland, South Africa, situated 18 miles N. E. of Morija. Station of the Paris Evangelical Missionary Society (1857), with (1903) 1 missionary and his wife, 3 women missionaries, 20 native workers, 13 outstations, 14 day schools, 1 boarding school, and 2,029 professed Christians, of whom 1,379 are communicants. Some write the name Thaba-Bossiou.

THABA MORENA: A village in Basutoland, South Africa, situated about 20 miles S. of Morija. Station of the Paris Evangelical Missionary Society (1862), with (1903) 1 missionary and his wife, 21 native workers, 10 outstations, 11 places of worship, 10 day schools, and 1,382 professed Christians, of whom 896 are communicants. Some write the name Thabana-Morena.

THAPA THACU: A settlement in the Orange River Colony, South Africa, situated about 30 miles E. of Bloemfontein. Station of the South African Wesleyan Methodist Missionary Society, with (1901) 1 missionary, 105 native workers, 6 places of worship, 6 Sunday schools, 12 day schools, 57 outstations, and 2,774 professed Christians.

THABOR: A town in Madras, India, situated in the district of Salem, about 15 miles N. of Salem. Station of the Danish Mission Society (1883), with (1901) 1 missionary and his wife, 1 place of worship, 1 Sunday school, 1 outstation, and 35 professed Christians.

THARAWADDY: A town in Burma, situated in the district of Pego, about 26 miles E. of Hanzade. Station of the ABMU (1876), with (1903) 2 women missionaries, 64 native workers, 37 outstations, 27 places of worship, 10 Sunday schools, 15 day schools, 1 boarding school, and 1,224 professed Christians, of whom 962 are communicants. Some write the name Tharrywadi.

THAYETMYO: A town on the Irawadi River, Burma, 25 miles from Prome. In the rains the place looks fresh and green, but during the dry season it presents a dreary appearance. Climate healthful, but excessively hot. Population, 8,379, who are mostly Chins. Station of the ABMU (1887), with (1903) 1 missionary and his wife, 7 native workers, 2 places of worship, 1 Sunday school, 2 day schools, and 170 professed Christians.

THLOTSE HEIGHTS: A settlement in Basutoland, South Africa, in the district of Leribe, near the Orange River, and about 15 miles E. of Ficksburg. Station of the SPG (1876), with (1903) 2 missionaries, 1 college, and 154 professed Christians.

THOBURN, Miss Isabella: The first missionary appointed by the Woman's Foreign Missionary Society of the ME Church after its organization in March, 1869. She was appointed to India and assigned to Lucknow, where she opened a boarding school for girls, beginning with one pupil. Before she died she saw completed and paid for the commodious building which now houses the great college for girls which has grown out of that humble beginning. All who Miss Thoburn's work was largely educational, her energies were not limited to that department. She was a born leader, encouraged and aided Zenana work, Sunday School work, and other forms of city missions, and made her home a place of recourse to the tired worker and the poor, the weak and the fallen She had a mighty influence among all classes, Christian and non-Christian, and through this influence on her scholars she impressed upon them her own spirit in a marked manner.

THONG-THAU-HA: A village in Kwang-tung, China, situated about 50 miles S. E. of Canton. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, 1 day school, and 125 professed Christians, of whom 110 are communicants.

THONZE: A town in Burma, India, situated in the district of Pegu, about 6 miles S. of Thara-wadi. Station of the ABMU (1855), with (1903) 1 missionary, 1 woman missionary, 7 native workers, 3 outstations, 4 places of worship, 1 Sunday school, 1 day school and 379 professed Christians. Some write the name Thонге.

THURSTON, Ada: Born at Fitchburg, Mass., October 12, 1875. Died at Honolulu March 11, 1908. Graduated at Yale College 1896, Andover
The principal river, the Yaru-tsangbu, drains the whole of southern Tibet between the first and second ranges of the Himalayas, and is supposed to empty into the Brahmaputra. The explorations have not yet been extensive enough to determine the actual course of the river, but it is known to flow past the Brahmaputra and other large rivers of Southern and Eastern Asia, and to have its source in the mountains of the northern provinces.

The government is conducted by two high commissioners appointed at Peking, but these confer with and are guided by the two grand officers of the Tibetan hierarchy, the Dalai Lama and the Teshu-Lama: the former, known generally as the Grand Lama, is an incarnation of the soul of the last Grand Lama (supposed to be a reincarnation of the soul of the last Grand Lama) who is not suffered to live more than seven or eight years in his high office; and the latter being a regent who rules during the minority of the little Dalai Lama. The power is practically in the hands of the lamas, whose number is so great as to give Tibet the name of the "kingdom of priests." The southern frontier is strongly fortified, and communication between Tibet and India or the intervening states is forbidden. On the Chinese frontier the same strictness is exercised, for the policy of exclusion is fostered alike by the lamas and the Chinese—the one because they wish to preserve their religious supremacy and fat offices, the other because they wish to retain their political power, faint though it be. The present Dalai Lama, as an exception to the policy of the last hundred years, has been permitted to live to maturity and to rule without a regent. He seems to desire independence of Chinese control, and for this reason to foster political relations with Russia. Both Russia and the British Indian Government have tried to open relations with Tibet for some fifteen years past. In 1901 it became known that Russia had secured from the Grand Lama rather exclusive privileges by a secret treaty. The British then demanded execution of a commercial agreement with India to which China and Tibet had already agreed. The British Commissioner was, however, refused a hearing and was sent back to India. Late in 1903 he went to Tibet again to insist upon a favorable answer. This time he was escorted by troops. The Tibetans refused to negotiate, and finally in March, 1904 attacked the embassy with armed force. Thus began a war with the British which can only result in destroying, at last, the barriers erected by this strange people against the world.拉萨, the capital, has only once been visited by an Englishman—Thomas Manning, in 1811—and its location has but recently been agreed upon to be approximately in latitude 29° 45' N. and longitude 91° 55' E. It stands in a fertile plain, at an altitude of 11,700 feet, encircled by mountains. It is noted for the number of its monasteries, boxoes and lamans, filthy streets and mean buildings. The population is estimated at from 40,000 to 80,000, and the population of the whole of Tibet, while unknown, is estimated at 6,000,000.

The people belong to the Mongol race, and they are intensely religious. Their religion comprises two kinds: the old original religion called the "Bon," of which little or nothing definite is known, and that form of Buddhism called Lamaism. The social customs of the people differ greatly from that of their neighbors on the east and south, particularly in the position which women hold. Here polyandry is the custom instead of polygamy, the wife being usually espoused by brothers; and particularly in the position which women hold. Here polyandry is the custom instead of polygamy, the wife being usually espoused by brothers; and the women, who conduct most of the traffic, are intensely religious. Their religion is of two kinds: the old original religion called the "Bon," of which little or nothing definite is known, and that form of Buddhism called Lamaism. Tibet

influenced to a great degree by China, as well as Tibetan customs, have been noble efforts to enter the forbidden land, and with four additional vowel signs. Tibetan literature, as well as Tibetan customs, have been for a time successful. In 17th century a mission was commenced from India, and the reigning prince was favorable to the new religion; but his apostasy was made the pretext for his overthrow. Various attempts at evangelization have been made since that time. The most noteworthy one was in 1845, when Fathers Gabriel and Huc penetrated to Lhasa after a journey of eighteen months, only to be arrested by the Chinese officials, who sent them prisoners to Canton. From that time the Roman Catholic Church has not attempted to enter Tibet.

The Moravian Brethren occupy three stations in Little Tibet—Liah, Poo and Kailang—where they are waiting for opportunity to enter Tibet. One or two attempts have been made at great risk, but have proved ineffectual. They have studied the Tibetan language, and there are now several works which will aid the future missionaries to Tibet when the country is opened. A Tibetan-English grammar, a Tibetan grammar, and a Tibetan-English vocabulary have all been published. A prayer union has been formed among the Moravians, whose object is to pray for the opening of the land of priests to the preaching of the Gospel. The members of the Tibetan band of the China Inland Mission, working on the eastern frontier, in the province of Sze-chuan; the Christian and Missionary Alliance, located in Kansu, on the northeastern border; the Scandinavian Mission, which is engaged in the work among the Chinese and such Tibetans as are there found.

TIEN-TAI-HSIEN: A town in Chekiang, situated about 18 miles N. by W. of T'ai-chau-fu. Station of the CIM (1898), with 5 native and 3 English missionaries, 4 places of worship, 1 Sunday school, 2 day schools, and 107 professed Christians.

TIENTSIN: One of the most important cities of North China, situated at the junction of the Grand Canal with the Pei Ho, 30 miles from the sea and 80 miles southeast of Peking. It is the port of and “key” to the capital, and is famous as the place where in 1858 the treaties were made, and where in 1900 the allied forces encountered long and fierce resistance on attempting to move for the relief of the Legations in Peking. As a result of the fighting at this place a considerable part of the native city was destroyed. The language of the city was razed to the ground and fine roads constructed in their place. Since the restoration of peace the foreign settlements at Tientsin have been much increased, and the place made into quite a handsome town. Climate healthful and pleasant; maximum temperature 106° Fah. Population, 900,000.

Foreign missions entered the town in 1859, when the Methodists founded their first representatives there. These were followed by the ABCFM (1860); LMS (1861); ME; CIM (1888); Church of England (SPG); North China Mission (1890); the Scandinavian Alliance, and the Christian and Missionary Alliance. These two societies last named do not publish clear statistics. The other societies named above have (1903) in Tientsin and dependencies 27 missionaries, 45 native workers, 25 places of worship, 12 day schools, 7 boarding or special schools, 2 hospitals, 5 dispensaries, and 719 professed Christians. The YMCA has an agency here, and the BFBS and the National Bible Society of Scotland have agents and a large force of colporteurs.
worse, 3 days schools, and 1 Sunday school. The restrictions of Russian law against missionary effort prevent much work outside of the recognised Protestant families who have a healthy, but the place is popular on account of the warm mineral springs in the vicinity.

TIFOE: A village on the island of Buru, Moluccas, Dutch East Indies, situated on the S. coast of the island. Station of the Utrecht Mission Society (1858), with (1903) 1 missionary and his wife, 9 native workers, 11 outstations, 10 day schools, and 1,748 professed Christians.

TINNA: A settlement in Cape Colony, South Africa, situated in Griqualand East, about 12 miles N. W. of Fletcherville. Station of the ABCFM (1831), with (1903) 1 missionary and his wife, 54 native workers, 5 outstations, 29 day schools, 1 boarding school, and 365 professed Christians.

TINANA: A town in Madras, India, situated in the Gaya district, 50 miles S. W. of Patna. Station of the BZM (1886), with (1903) 2 women missionaries, 10 native workers, 2 Sunday schools and 3 day schools.

TILLIPALLY: A large town in Ceylon, East Indies, on the north shore of the peninsula of Jaffna, at the northern extremity of the island. Climate tropical, damp, but very healthful for young children. Population, 21,698. Caste rule is rather relaxed here, so that one is not expelled from his class on becoming a Christian. Station of the ABCFM (1831), with (1903) 1 missionary and his wife, 9 native workers, 5 outstations, 3 places of worship, 2 morning schools, 1,399 professed Christians.

TINDIVANAM: A town in Madras, India, lying about 25 miles N. W. of Pondicherry and 75 miles S. W. of Madras. Station of the RCA (1868), with (1901) 1 missionary and his wife, 20 native workers, 2 outstations, 3 places of worship, 2 Sunday schools, 5 day schools, and 338 professed Christians.

TINNEVELLI: A district in the southern part of the Madras Presidency, in India. It contains an area of 5,381 square miles, at the southeastern point of Hindustan, bounded on the south and east by the sea, on the west by the Ghats, which separate it from Travancore, and on the north by the district of Madura. The history of the district is involved with that of Madura. After centuries of Hindu rule the Mohammedans came, and after them came a half-century of Anarchy, which was ended in 1801 by the cession of the whole region to the English. The population of the district (1891) is about 1,916,000. Christianity has taken firmer root here than in any other district in India. Statistics show that between 1871 and 1881 the Hindus lost 2½ per cent., while the Mohammedans gained nearly 6 and the Christians over 37 per cent. The number of baptized Christians connected with the SPG and CMS missions was 59,203 at this time, of whom 13,265 were communicants. There were also about 40,000 more under instruction for baptism. Ninety-five per cent. of them belong to the Shanar caste, who live by the culture of the Palmrya palm. Protestant missionary work was begun in the town of Tinneveli about 140 years ago, by the Danish missionaries at Trancebar, who, with their native preachers, made occasional tours to the south. But no Christian preacher seems to have resided there permanently before 1771, when a native preacher took up his residence in Palamkotta, three miles from the town of Tinneveli; no European missionary was stationed there until the year 1780 when Rev. J. D. Jaenicke was sent there. He died in 1800. The missionary Schwartz also traveled in the district. The SPCK maintained the mission at Palamkotta until 1816, when it was passed over to the Church Missionary Society, and in 1825 it transferred its work in the town of Tinneveli to the SPG. These two societies have since divided the work in the district between them. Christianity had begun to exert no small degree of influence at the time the work was transferred to the societies that now conduct it, and since then the work of conversion has proceeded with great vigor. About the year 1877 Rev. R. Caldwell, D.D., of the SPG, and Rev. E. Sargent, D.D., of the CMS, were consecrated bishops assistant to the Bishop of Madras, for the purpose of affording better episcopal supervision to the work of their respective societies in that district. In 1896 the Bishopric of Tinneveli and Madura was instituted, and the supervision was thus simplified. The CMS (1816), the SPG (1825) and the CEZ (1874) are working in the Tinneveli district, with (1903) 38 missionaries, men and women; 1,497 native workers, men and women; 697 day schools, 26 boarding schools, 1 orphanage, 1 theological training school, 2 colleges, and 50,813 baptized Christians. Among the special lines of work may be mentioned the schools for the blind carried on by the CMS and the Palamkotta School for the Deaf and Dumb, established by the CEZ.

TINNEVELLI: A town in Madras, India, the capital of Tinneveli district, situated about 40 miles W. S. W. of Tuticorin. Population, 29,221. Station of the CMS (1820), with (1903) 1 missionary and his wife, 20 native workers, 2 outstations, 1 place of worship, 2 day schools, 1 boarding school, and 402 professed Christians. Some give to this place the name Siloam.

TIRUKOVI: A town in Madras, India, situated in the S. Arcot district, 50 miles N. W. of Cuddalore. Station of the Danish Mission Society (1869), with (1903) 2 missionaries and their wives, 1 woman missionary, 5 native workers, 2 places of worship, 2 day schools, 1 boarding school, and 402 professed Christians. Some give to this place the name Siloam.

TIRUMANGALAM: A town in Madras, India, situated about 10 miles S. W. of Madura. Station of the ABCFM (1838), with (1903) 1 missionary, 59 native workers, 59 outstations, 24 places of worship, 29 Sunday schools, 19 day schools, 1 boarding school, and 1,500 professed Christians.

TIRUPATI: A town in Madras, India, situated about 77 miles S. E. of Cuddapah. Station of the Hermannsburg Missionary Society (1877), with (1903) 1 missionary and his wife, 36 native workers, 2 outstations, 1 place of worship, 3 day schools, 1 boarding school, and 160 professed Christians, of whom 144 are communicants.

TIRUPATUR: A town in Madras, India, situated in Salem district, about 65 miles N. E. of Salem. Population, 14,278 (Tamil). Station
of the LMS (1861), with (1903) 1 missionary, 26
native workers, 11 outstations, 5 Sunday schools,
11 day schools, and 197 professed Christians, of
whom 123 are communicants. See the name Tripatoor.

TIRUVALUR: A town in Madras, India, situ­
ated in the North Arcot division, about 24 miles
W. of Madras. Station of the Leipzig Mission­
ary Society, with (1903) 26 native workers, 15
places of worship, 20 day schools, 14 outstations,
and 1,914 professed Christians, of whom 707 are
communicants. Also station of the WMS, with
(1903) 2 missionaries, 2 women missionaries, 118
native workers, 27 outstations, 44 places of wor­
ship, 64 Sunday schools, 72 day schools, 2 board­
ing schools, 79 at hospital, and 920 professed Chris­
tians, of whom 484 are communicants.

TIRUVANNMALAI: A town in Madras, India,
situated in the S. Arcot district, about 50 miles
S. of Vellore. Station of the Danish Missionary
Society (1869), with (1905) 1 missionary, 5
native workers, 1 day school, and 32 professed
Christians.

TIRUWALLUR: See Tiruvalur.

TIRUVELLA: A town in Travancore, India,
situated about 20 miles E. of Alleppey. Station of
the CMS (1849), with (1903) 1 missionary and his
wife, 62 native workers, 40 day schools, 2 board­
ing schools, and 7,000 professed Christians, of
whom 1,997 are communicants. The churches in
this vicinity are joined in a Church Council of
their own.

TJIDERES: A village in Java, Dutch East
Indies, situated about 50 miles S. E. of Cheribon.
Station of the CMS (1877), with (1903) 1 missionary, 3
native workers, 1 outstation, 1 hospital, and 191 professed
Christians, of whom 79 are communicants.

TOBAGO: An island in the West Indies, lying
northeast of Trinidad, of which it is a dependency.
It is a rocky mass rising abruptly to a height of
900 feet. There are several good harbors. It
was settled by the Dutch in 1654, taken by the
French and finally by the English in 1763. Area,
114 square miles. Population (1902) 19,804.
Missions are carried on in the islands by the
Moravians (1790).

TOBELO: A village on the island of Halmah ­
eria (Jiolo), Moluccas, situated in the N. part of
the island. Station of the Utrecht Missionary
Society (1847), with (1901) 1 missionary and his
wife, 14 native workers, 10 day schools, and 21
professed Christians.

TODAS: These people, who live in the Nilgi­
r hills in India, are generally looked upon as a
remnant of the primeval race of Mysore, existing,
like driftwood, on the heights above a changeful
world. They belong to the Dravidian race
which has peopled the land from time immor­
ternal. Their description and characteristics is
given by one of the missionaries as follows: The
Toda is striking in appearance, with well-marked
features, hazel eyes, and an abundant growth of
wavy hair, hanging to its full length in well-oiled
ringlets. The single unbleached cloth which
ever washes his cloth, and rarely himself,
from birth to death. The fine in physique, the
tribe is numerically small; yet not so small as to
preclude the existence of at least five castes,
observing the usual social restrictions. The
form of marriage known as polyandry is still
prevalent, one woman marrying all the brothers of
a family. Only eighty years have passed away
since the barbarous custom of female infanticide
was discontinued, through the moral influence of
the first English who penetrated these benighted
regions.

The odorous abode of the Todas consists of
scattered "mundaS or villages of from three to
five pent-roofed huts, fashioned after a style of
architecture peculiar to the tribe. The hut is
twelve feet square, has a capacity which is truly
marvelous, for the accommodation of relatives of
both sexes and all ages. The only ventilation is
derived from the diminutive doorway, two-and
a-half feet by one-and-a-half, and the man of
ingress and egress can scarcely be called
distinguished.

It has been said, in regard to the religion of
the Todas, that there exists a "partiality to the
regard of light—apart from fire—as par excellence,
the manifestation of deity." The bell worn by a succession of sacred cows is revered as
the "chief god." Only members of the priestly
clan are permitted to tend the sacred buffalos,
and officiate as "pujaris" or priests to the Bell­
god, assuming the title of "sons of the gods." Of
recent years the simple faith of the Toda has
become adulterated with Hinduism and
assumes the form of the worship of spirits which
are feared as capable of evil.

Content if he may know enough to tend his
father's buffalos in the pastures, the Toda reck­
s no cost of personal improvement or social duties. In
ture Eastern placidity he lives, in hope that, at
the end, the "Lord of life" will receive him into
"the other district," as he calls the unseen world.
There he believes he will dwell under conditions
similar to the present, for the buffalos slain at
his decease are supposed to supply him with milk
and ghee in the new life; and the coins burnt
with the body are intended for the keeper of the
thread-bridge, which the soul must pass on its
pilgrimage through the hands of the auro mandane village sweeper.

A curious feature of the Toda social system is
their custom, still preserved in some degree, of
demanding and receiving a whole of grain at har­
vest from the surrounding farmers. The grain
is demanded as tribute for the use of the land.
But it is now given as charity.

The name of this curious people is sometimes
written Todar and Todawar.

TOGOLAND: A German possession in West
Africa, lying on the Gulf of Guinea, and having an
area of 33,160 square miles and a population
estimated at from one to two millions. The
coast line is but 32 miles, the country widening
to several times that dimension in the interior.
It is situated between the French colony of
Dahomey on the east and the British Gold Coast
Colony on the west, and extends back from the
coast some 250 miles. It was declared a German
protectorate in 1884. The coast climate is
unhealthful for Europeans; the interior hilly and
well watered with streams. Good roads con­
lone Lome, now regarded as the capital, with
Misaholo and Atakpame, and there is a narrow
vage railway between Lome and the river Porto.
Telegraphs connect the chief towns and extend into
Dahomey and the Gold Coast Colony, thus
providing cable communication with Europe.
The German Government is represented by the
Hamburg and Bremen traders, settled in the
seaports, who cannot as yet vie with the village
chiefs and fetish priests in influence over the people.

The tribes between the Ogun and Volta Rivers belong to the Ewe family, and from them the region takes the name "Eweme."

The North German Missionary Society has 4 stations in Togoland and the Basel Society 1 and the WMS 1. The whole force of missionaries and native workers is 170, with 69 schools and about 3,500 communicants.

**TOKAT**: A town in the province of Sivas, Asiatic Turkey, situated about 70 miles S. of Samsun. Henry Martyn died and was buried here. Population, 10,000. Outstation of the ABCFM. Statistics given under Sivas. Station of the FCMS (1884), with (1900) 1 missionary, 4 native workers, 5 outstations, 3 places of worship, 4 day schools, 5 Sunday schools, and 233 professed Christians. Some write the name Toat.

**TOKELAU ISLANDS**: A group of small islands in Polynesia, N. of the Samoan Islands, southeast of the Ellice group. These islands, together with the Ellice and Gilbert groups, are visited annually by missionaries of the LMS at Samoa. Native workers are doing excellent work among a church membership of 3,374 (1903) in the three groups, and several thousand pupils are in the Sunday and day schools.

**TOKIO**: Capital of Japan, formerly called Yeddo. It is situated in the center of a great plain, which extends back from the water to the mountains for a distance varying from twenty to sixty miles, and borders the shores of the Bay of Tokio for about a hundred miles. There is thus no want of land over which the city may extend. Already it occupies about 28 square miles, and as far as the extent is concerned, it is second only to London. The city lies at the northwest end of the Bay of Tokio. Through the city runs the O-gawa, or Great River, dividing it into an eastern and a western part. Numerous canals penetrate the city at various points, and on the east is another river, Naka-gawa. The city is divided into various sections for purposes of government and postal delivery. Here are found the numerous palaces and public buildings of the government; the temples of Buddha, Confucius, and various Japanese deities representing the old civilization and the old religion; but side by side with these stand the distinctively Christian buildings, together with the Imperial University, School of Engineers, and the numerous other institutions of learning, whose influence is rapidly lessening the number of worshipers at the ancient shrines, so that a few years from now they will probably be museums of antiquities rather than temples to which worshipers are drawn through fear and superstition. The rapid strides which European civilization is making in Japan can be seen nowhere better than in this city. Alongside the old stone wall, surrounding the palace grounds, with its moat—one tortuous ribbon of variegated colors from the lotus flowers, which bloom there in summer—are架架the electric wires for the telegraph and telephone. The puffing smoke of the railway engine overcomes the pungent odor of the incense in the temples; gas is used for lighting streets and shops, and each year civilization, with its attendant conveniences and luxuries, is thoroughly permeating the life and habits of the citizens. Not only is Tokio within easy reach of Yokohama, 10 miles away by rail, but it is an important railway center. One of the numerous bridges which span the watercourses of the city is considered the topographical center of the empire, from which all distances are reckoned. The population (1898) is 1,440,121.

Missionary societies commenced their work in Tokio almost as soon as the empire was opened to the outside world. At present the societies engaged in work in Tokio and its surroundings are the following, with the date of their entrance upon work in the city: PN (1869); ME (1872); PE (1873); SPG (1875); ABMU (1874); CMS (1874); RCA (1876); Evangelical Association (1877); MCC (1879); RCUS (1880); General Evangelical Church of Germany (1886); AFPM (1886); Christian Church (1888); PB (1888); Universalist, U. S. (1890); ABCFM (1890); FCMS (1891); UB (1895); SDA (1896); Methodist Protestant (1900); ELUS; Scandinavian Alliance; Synod of the Norwegian Evangelical Lutheran Church of N. A. The YMCA also has an agency here, with two men and their wives; the Salvation Army has a post, and the Mission to Lepers in India and the East cares for a leper hospital. Connected with these societies there are (1903) in the aggregate in Tokio and its outstations 2,492 men and women; 361 native workers, men and women; 102 places of worship, 23 day schools, 25 boarding or special schools, 2 hospitals and dispensaries, 4 publishing houses and 7,937 professed Christians, including baptized children.

**TOKUSHIMA**: A town in Shikoku Island, Japan, situated on the E. coast. Population, 59,969. Station of the CMS (1889). 3 women missionaries, 7 native workers, and 205 professed Christians, of whom 103 are communicants. Also station of the PS (1889), with (1903) 2 missionaries and their wives and 2 women missionaries.

**TOKYO**. See Tokio.

**TOLEDO**: A village in British Honduras, situated on a small bay about 60 miles S. by W. of Belize. Station of the WMS, with (1903) 1 missionary, 8 native workers, 2 outstations, 6 places of worship, 4 Sunday schools, 2 day schools, and 72 professed Christians, of whom 69 are communicants.

**TONG-An**. See Tung-ngan-hsiien.

**TONGA ISLANDS** (Friendly Islands): A group in the South Pacific, extending from 18° 5' to 23° 29' south latitude, and from 173° 52' to 176° 10' west longitude, was discovered by Tasman in 1643, and named Friendly Islands by Captain Cook, but is now called Tonga, after the principal island. There are about 150 islands in three separate groups, comprising a total area of 374 square miles. Part of these are of volcanic nature, but a majority of the islands are level and covered with rich productive soil. The principal island is Tonga or Tongatau, 125 square miles in area, on which is situated the capital, Nuku-alaofa. Earthquakes are frequent, and at times volcanic eruptions have taken place. The climate, like that of Fiji, is warm and humid. Southeast trade-winds blow except for a few months in the winter. The islands are now Christianized, and are governed by a Christian king under the protectorate of Great Britain. Formerly Tonga was noted for cannibalism, infanticide and other crimes characteristic of savages. The people are intellectually far in
advances of most of the Polynesian race, and have at one time and another conquered many of the surrounding islands. Nearly every one can read, and they are industrious farmers, as well as skilful sailors. They number (1901) 10,000, of whom 300 are Europeans. The triumphs of the Gospel in Tonga, the devoted zeal of the king, and the proud position which Tonga converts hold, as pioneers of Christianity to Fiji and other Polynesian groups are striking testimonials to the civilizing and regenerating power of Christian missions. In these islands colleges have been established, where young men and women are being trained for Christian service.

The evangelization of the Tonga Islands is one of the fruits of the effort of the WMS. The Tonga churches are now, however, a district in connection with the Australasian Methodist Missionary Society.

TONGAREVA, or PENRHYN ISLAND: A small island in Polynesia, east of the Tokelau Islands, west of the Marquesas, and north of the Society Islands. It is visited from Rarotonga.

TONG-CHI. See T'UNG-CHI-HSIEN.

TONGOA: A settlement in the S. W. part of the island of Espirito Santo, New Hebrides. Station of the New Hebrides Missionary Society; with (1901) 2 missionaries, one of them with his wife; 1 woman missionary, 25 native workers, 3 outstations, 2 places of worship, 1 day school, 1 theological class, and 730 professed Christians. Also station of the PB, with (1901) 2 missionaries, one of them with his wife; 1 woman missionary, 1 boarding school; 7 day schools, 1 dispensary and 1 printing press. The church statistics are included under Santalia.

TONG-SHAN: A town in Chi-Il, China, situated about 70 miles N. N. E. of Tientsin, on the road to Manchuria. Station of the Methodist New Connexion Society (1884), with (1901) 2 missionaries and their wives, 25 native workers, 43 outstations, 44 places of worship, 8 day schools, 1 boarding school, 1 hospital, and 541 professed Christians. Also station of the PB, with (1901) 3 missionaries, two of them with their wives, and 1 woman missionary. Some write the name T'ang-shan.

TONKIN (Tonquin): A French colony in Asia, on the borders of the Gulf of Tonkin, lying between the Chinese provinces of Kwang-tung and Yunnan on the north and Annam on the south. It was annexed by France in 1884, and is divided into fourteen provinces, with an estimated population of 9,000,000. Hanoi, the Chief city, is a union of many villages, with an aggregate population of 150,000. The Roman Catholics are at work in Tonkin, and claim a large membership.

TOONDDEE: A village in Bengal, India, situated about 40 miles S. of Mandhipur. Station of the UFS, with (1903) 1 missionary, 12 native workers, 1 boarding school, 7 day schools, 1 dispensary and 1 printing press. The church statistics are included under Santalia.

TOONGOO. See Taung-nou.

TORREON: A town and railroad junction in Mexico, situated in the State of Coahuila, close to the border of Durango, near Lerdo. Station of the SBC (1890), with (1903) 1 missionary and his wife, 5 native workers, 20 outstations, 2 places of worship, 3 Sunday schools, 1 boarding school, and 62 professed Christians.

TOY, Robert: A missionary of the LMS to Madagascar, from 1862 to 1890, his station at Antananarivo. In 1863 he took charge of the native church at Ambhiposay, in the capital, and of the connected country churches. In November, 1868, the Memorial Church at Ambhiposay was opened, of which he took charge, and besides his other duties was occupied in a revision of the Malagasy version of the Bible and other literary work in the Malagasy language. The theological seminary for native ministers was founded by Mr. Toy in 1869, with the efficient aid of Mr. G. Cousins. His health failing, he went to England in 1870. Returning in 1873, he resumed his work in the theological institution, and in addition assisted in the revision of the Malagasy Bible. In 1877 the church at Faravohitra and its surrounding districts was added to his college work. In 1879, his health having seriously failed, he again sailed for England, and died on the voyage, April 19.

TOYOHASHI: A town on the main island, Japan, situated on a bay of the S. coast and on the railroad between Nagoya and Shizuoka. Station of the CMS (1896), with (1905) 1 missionary and his wife, 1 woman missionary, 2 native workers, and 28 professed Christians, of whom 14 are communicants. Also station of the ME, with (1903) 1 native worker.

TOZER, William George: Universities' Mission; Bishop of Central Africa. Born in Devonshire, 1829. Died, 1899. He was consecrated on February 2, 1863, in Westminster Abbey, and in the summer of that year he arrived in the Shire district. Zanzibar was selected as the most favorable point from which to carry the Gospel to the tribes of Central Africa.

All the principal towns of the East African coast are situated on islands; and Bishop Tozer appreciated the fact that Zanzibar, the chief commercial center of East and Central Africa, would afford special advantages for a settlement of European missionaries. He arrived here in August, 1864, and from the beginning of his work he foresaw the necessity of training up a native ministry in Central Africa. In less than forty years, the mission lost six bishops, twenty-seven members of the clergy and forty-six lay workers. To this work he addressed his best energies. Having somewhat organized the work on the island, Bishop Tozer turned his attention to the mainland, and there he had the privilege of first planting the Church. The country of Usambara, north of Zanzibar, with its ports of Pangani and Tanga, seemed to be the most accessible and favorable district, and here he established flourishing mission stations. The success of the mission at Zanzibar was interrupted in 1868 by cholera, and in 1872 a terrible hurricane "left everything a complete wreck." All the mission party were safe, and, led by the Bishop, order was soon restored, and the mission work resumed. For six months Bishop Tozer was enfeebled in health, made his home in London; in 1879 he attempted episcopal work in the dioceses of Jamaica and Honduras, and in 1888 he became vicar of St. Ferrivy, with the hope of regaining his health. The end came after two strokes of paralysis.

TRACY, William: Born at Norwich, Conn.,
June 2, 1807; studied at Williams College and at Princeton Theological Seminary; was ordained April 12, 1836; sailed November 23, 1836, for India as a missionary of the ABCFM, and, after spending a few months at Madras, reached Madura October 9, 1837. He visited the United States in 1851 and 1867. At Tirumangalam he opened a boarding school for boys. From that day he was largely engaged with the educational work of the district. By 1842 the boarding school had grown to a high-grade seminary. In 1845 it was removed to Panganamal, where twenty-two years of Mr. Tracy's life were spent. More than 250 young men passed through the course of study. Few classes left him in which nearly all were not Christians, a large number of them engaging in evangelistic work and others occupying honorable posts in government service. Mr. Tracy was an efficient member of the Revision Committee of the Tamil Bible. He died at Tirupuvanam, South India, November 28, 1877, aged seventy, and in the forty-first year of his missionary service.

**TRAINING SCHOOLS for Missionaries:** Every young man and woman who is physically fit to be sent to the mission field has, upon a life insurance basis, reason to expect at least twenty-five years of active service. How to make every one of these years most effective is the problem both for the individual and the society which commissions him. His preparatory work must be done partly at home and partly after his arrival at his station. The whole of his equipment cannot be secured before reaching the field. But it is surely advisable to get in the homeland as thorough a training as possible in those subjects and methods which are essential to the best work.

**Adequate Preparation** is a needed watchword in the missionary movement. It is easily conceivable that a year of special training may double the missionary's power in every one of those twenty-five or more years of service; two years may quadruple it. To neglect or belittle this truth is foolish and hurtful. That it has been too lightly esteemed in the past is admitted by those most skilled in the science of missions and most experienced in their operation. Dr. Gustav Warming said in the Ecumenical Conference of 1900: “What we need beside expert missionary training is a needed watchword in the missionary movement. It is easily conceivable that a year of special training may double the missionary's power in every one of those twenty-five or more years of service; two years may quadruple it. To neglect or belittle this truth is foolish and hurtful. That it has been too lightly esteemed in the past is admitted by those most skilled in the science of missions and most experienced in their operation. Dr. Gustav Warming said in the Ecumenical Conference of 1900: “What we need beside expert missionary training is...”

**Quality of the Preparation:** The special training needed by missionaries is indicated by the abnormal conditions of the masses of the people to whom they are sent. Asia and Africa are the great missionary continents; most of the world's people inhabit them. In what respects are they abnormal, differing from the masses of Christendom? (1) They are religiously misguided, debased and lost, i.e., they cannot find the way to their Father and their Home. They cannot find righteousness. (2) They are socially dwarfed and demoralized. Tested by their treatment of the weak—women, children, the aged, the sick—by their domestic, civic and international relations, they are in or near barbarism. (3) They are educationally illiterate. Leaving out Japan, probably not five per cent. of them can read books. Their science is false, their minds warped. (4) Medically they are ignorant. Their treatment of diseases and wounds is distressingly inadequate. (5) Hygienically they are unsanitary. Cholera, plague and smallpox run along avenues of uncleanly living. (6) Industrially and economically they are backward. Famine is a common condition. Poverty is the general state, because land is over-populated; improved methods and machinery are lacking and thrift is very feebly possessed. The true missionary cannot help striving to cure all of these abnormal conditions. In his preparation he should take them definitely into account and fit himself as far as possible to handle them. These conditions indicate generally the following special requirements for the missionary candidate: The candidate should have special training in:

1. **His own religion and non-Christian religions.** (1) Comprehensive Bible study, including introduction. (2) The Christian system of theology and evidences. (3) History and comparison of religions. Is there any sufficient reason why all women, who are as yet skilful physicians and workers should not, as well as ordained men, obtain a good knowledge of these subjects?

2. **Elementary and practical Sociology:** A study of the origin and growth of society with its various institutions; of the perversions of marriage, family life, business, labor, education, government, etc., and of the remedies for these ills.
3. History of Missions and the principles on which they are conducted.

4. Psychology and Pedagogy: Most missionaries teach or supervise schools. Many must train native teachers. There are 100,000 pupils in mission boarding and training schools, most of whom are preparing to be teachers. They should have the best training. All who deal with the abnormally ignorant classes have special need of acquaintance with the laws of mind and of teaching. Kindergarten training is most needed. Rev. J. L. Barton, D.D., Secretary ABCFM, has said: "I heartily believe in a pedagogical course for the most of our missionaries."

5. Elementary medicine, surgery and nursing: There are special schools for regular physicians and nurses. The Missionary Training School should give to all other students such training as will fit them to render intelligent "first aid" to the sick or injured.

6. Principles of Hygiene, or Health Lectures.

7. Technical crafts and business methods: Women should learn domestic economy; men should have training in carpentry, photography and stereopticon management, agriculture or at least gardening, book manufacture, and even in blacksmithing. Both men and women should have drill in bookkeeping and in modern methods of filing correspondence and other documents.

9. Language of the people to be reached: It is not practicable to teach many oriental vernaculars in the home schools. But such comprehensible languages as Arabic, Chinese, Hindustani and Turkish might be given. As showing that such a scheme is not impracticable two actual courses are here given, one for men, the other for women.

1. Church Missionary Training College at Inlingwe. In addition to regular instruction in university and theological, a course is given in (1) Elementary Medicine and Surgery; (2) Principles and Practice of Teaching; (3) Vocal Music; (4) Carpentering, Bookmaking, Printing, Tinsmithing and Blacksmithing; (5) Religious Systems of the pagan world.

II. The Training Institute for Women of the UFS, Edinburgh, gives instruction in (1) The Study of Scripture; (2) Christian Doctrine; (3) Introduction to the Bible; (4) The Hindustani Language; (5) Theory of Education, Kindergarten Principles, Nature Studies, Class Teaching and School Visiting; (6) Voice Culture and Singing; (7) Account Keeping; (8) Drill Exercises; (9) Nursing; (10) Care of Health; (11) History of Missions; (12) Non-Christian Religions; (13) Sociology, from the missionary standpoint; (14) Evangelistic Theology.

"Missionaries must be weighed, not merely counted," says Dr. Warneck. "Thorough training" is his prescription for their need. The vital question is: have the 17,000 missionaries in the foreign mission service the ability through a practicable preparation? The ordained men number more than 6,000. Has the theological school given a training specific enough for their needs? The physicians, men and women, are more than 700. Have they been fitted most effectively to "light the darkened spirits in the sick bodies?" Unordained men, not physicians, to the number of about 3,500 are in the ranks; unmarried women, an equal number; married women, more than 4,000. How many of these are lamenting the lack of "thorough training?" The best preparation is none too good for the missionary; it will not be wasted upon the Master's work for the heathen.

TRANSVAAL COLONY: A colony of Great Britain in S. Africa, conquered from the Boers, who governed it as the South African Republic prior to 1906. At the date of the annexation, the total area was 119,139 square miles, but in 1903 about 7,000 square miles, constituting the provinces of Vryheid and Utrecht and a part of the Wakenshroom district, were annexed to Natal. The State Almanack of the Transvaal for 1898 gives the population at 1,094,156, of which 245,397 are returned as whites. The population has undoubtedly decreased in consequence of the war.

The colony lies between Matabililand on the north and Natal and the Orange River Colony on the south, and extends east and west from Portuguese East Africa to Bechuanaland. It lies about 50 miles from the ocean at Delagoa Bay, and has a mean altitude of over 3,000 feet. The upland region drained by the Vaal River (Hooge Veld), from 4,000 to 6,000 feet high, includes most of the richest mineral districts, and has a healthful climate. The eastern terrace lands (Banken Veld) include Swaziland and the Upper Maputa Valley. These lands are low-lying, some being not more than 2,000 feet high. Bosb Veld, the inner plateau, about 4,000 feet high, is largely steppe land, and suitable for grazing. Along the whole, the climate is invigorating. Along the river valleys and in the low-lying districts fever is endemic. The rainfall is unequally distributed. The land is fertile. The settlers have chiefly busied themselves with stock raising, the tsetse fly proves very destructive in the river tracts and terrace lands. A tsetse belt 40 miles wide along the Limpopo bars the progress of settlement in that direction.

The missionary societies operating in the Transvaal are the Berlin Mission Society, the Mission Romande (French Switzerland), the Hermannsburg Missionary Society, the WMS, the SPG, the African Methodist Episcopal Church, the National Baptist Convention, the South African Baptist Society, and the CMS. These societies occupy 35 stations, of which 24 are stations of the Berlin Society. The aggregate working force is 611 missionaries and native workers, men and women, with 61 schools of various grades and about 5,000 communicants.

TRANQUEBAR: A town in Madras, India, on the shore of the Bay of Bengal, about 150 miles south of Madras. It is situated in the delta of the Caveri River, 22 miles N. of Negapatam. The town, with a small area of country, was obtained by the Danish East India Company in 1616, and held by the Danes until 1845 (with the exception of a few years), when, with Serampur in Bengal, it was sold by them to the English. Under Danish rule it was a place of some political and commercial importance, which in recent years, by the diversion of business to other centers, it has almost wholly lost. The population is about 5,000, chiefly Hindus. The great interest which Tranquebar possesses for us con-
sis in the fact that it is the earliest Protestant Missionary station in India. Here Bartholomew Ziegenbalg and Henry Flutschau, the pioneers of the great army of Protestant evangelists, settled in 1706. The mission passed into the hands of the Leipzig Evangelical Lutheran Mission. Station of the Leipzig Missionary Society (1841), with (1903) 6 missionaries, 4 of them with their wives; 28 native workers, 4 outstations, 4 places of worship, 4 day schools, 1 boarding school, 1 primary house, and 760 professing Christians, of whom 411 are communicants. The name is also written Tranebar.

TRAVANCORE: A native state in India, occupying the extreme southwestern portion of the peninsula. Its limits of north latitude are 8° 4' and 10° 22', and of east longitude 76° 12' and 77° 38'. Its boundaries are, on the north, the British districts of Madura and Tinnevelly, belonging to the Madras presidency, from which districts it is separated by a mountain range; on the south and west, the Indian Ocean. The length of Travancore from north to south is 174 miles, and its greatest breadth 75. It embraces an area of 6,730 square miles, with a population of 2,952,157 in 1901; 73 per cent. were Hindus, about 21 per cent. Christians, and a trifle over 6 per cent. were Mohammedans. The Christian population includes a large number of adherents of the old Syrian Church of Malabar—more than half of the whole; nearly a third are Romanists and the remainder Protestants. As to language, Malayalam—a Dravidian tongue allied to Tamil—is used by about four-fifths of the people, and Tamil by the rest. The chief town and capital is Trivandrum, with a population of 41,173. Travancore has been ruled from time immemorial by Hindu princes of approved orthodoxy. It has never—like all the rest of India—come at any time under the sway of the Mohammedans. In the latter part of the 18th century it was attacked by Tippu, Sultan of Mysore, but, with the aid of the English, it successfully resisted him. Treaties, made early in the 19th century with the English, have firmly cemented this old connection and alliance with the English in India. Within its borders, tho there was armed opposition in 1809. An English resident is maintained at the court of the Maharajah of Travancore, and an annual tribute is paid to the "paramount power." The Government of Travancore, the Hindu, is intelligent, efficient, and progressive. Its native rulers have studied to good advantage the examples set them by the English rulers of adjacent regions. There is a good system of education in vogue, as a result of which the people of Travancore show about as high an average of intelligence and as large a proportion of persons able to read and write as many British provinces in India. The people are chiefly agricultural; rice, the coconut palm, are the principal productions, and the exports are largely derived from the coconut tree, the pepper, ginger, cardamom, timber, and some other articles are included among them.

The forms of Hindu worship usual throughout India are practiced in Travancore, modified, however, to a greater or less extent, with the rites of demon-worship, which prevail extensively in South India and Ceylon, especially among the aboriginal tribes. Missionaries in Travancore have had to encounter among their converts far more of the degrading power of these old habits and associations, rooted in this ancestral demonolatry, than their fellow-laborers among Hindus in other regions.

Mission work was commenced in this state in 1815 by the CMS. The plan was to work in alliance with the old Syrian Church of Malabar, but the plan failed, and twenty-five years later the Society turned its attention to the people at large, with great success.

The London Missionary Society's operations in Travancore began in 1808. Rev. Mr. Ringeltaube, a German, joined one of the first companies which this Society sent to India. He labored in Travancore until 1816, when a Christian community of 900 persons had been formed. Mr. Ringeltaube's health then broke down and he left the country.

In 1818 the Society sent out other missionaries. Col. Munro was then resident, and continued the aid of the mission which his predecessor had begun; without such aid from the representative of British power it is hard to see how the mission could have started in the face of Hindu opposition on the part of the Brahmans and the Hindu Government. The converts rapidly increased—largely from among the low-caste Shanares. From 1827 to 1830 violent persecution was experienced, and the low-caste people in Travancore have never, unless perhaps recently, been admitted to the privileges of the public schools maintained by the government. The progress of the mission in later years has been rapid and its usefulness great. In 1838 it was allowed to begin a station at Trivandrum, the capital; and since 1844 it has drawn many converts from the higher castes. Rev. Samuel Mateer, one of its most distinguished members, published, in 1871, a full account of the country and people of Travancore, with historical sketches of missionary work within its borders, under the title "The Land of Charity."

TREBIZOND: Seaport and capital of a province in Asiatic Turkey, situated on the Black Sea. By reason of its location, it has been an important center for the trade from Persia and Central Asia to Europe. The climate is temperate, and its location is picturesque. The city is divided into the old quarter, inhabited by Mohammedans; the more modern, or Christian, quarter; and the commercial quarter. Behind the city is the rocky height with flattened top which gave place its ancient name of Trapezus. At this point Xenophon reached the Black Sea on his retreat with the famous ten thousand. From 1203 until nearly the end of the 15th century Trebizond was an independent and autonomous power. Population said to be...
about 35,000, of whom 18,000 are Mohammedans and 15,200 Christians. Station of the ABCFM (1835), with (1903) 11 native workers, 1 day school, and 148 professes Christians.

TRICHINOPOLI: A town or municipality in Madras, India, on the Caveri River, 56 miles from the sea, 186 miles southwest of Madras City. It is a place of much historic interest, having been the scene of many sieges. Besides the fort and cantonment it consists of seventeen separate villages. Inside of the fort is the holy rock of Trichinopoly, which rises 273 feet above the sea and is the site of a mosque, which has on its summit a small temple. Numbers of pilgrims always attend the annual festival. It is well known for its cagers, and for its peculiar and beautiful gold jewelry. Heber, the Protestant Bishop of Calcutta, is buried here (1828), and the place is the starting point of caravans for the Sudan. Population (1901), 104,721, of whom about 72,000 are Hindus, 17,000 Christians, and 10,000 Muslims.

TRICHUR: A town in Cochin, India, situated at the head of a chain of canals and inland waterways which give safe navigation for small boats as far as Trivandrum. It is a great stronghold of Brahmanism. Station of the CEZ (1881), with (1903) 1 missionary, 1 woman missionary, 32 native workers, 7 places of worship, 7 day schools, and 240 professed Christians. Station of the Leipzig Missionary Society (1864), with (1903) 1 missionary and his wife, 14 native workers, 6 outstations, 7 places of worship, 6 day schools, 2 boarding schools, and 745 professed Christians. Station also of the WMS, with (1903) 1 missionary, 1 woman missionary, 52 native workers, 5 outstations, 1 place of worship, 15 Sunday schools, 16 day schools, and 267 professed Christians, of whom 168 are communicants.

TRINIDAD: An island belonging to Great Britain in the West Indies, at the mouth of the Gulf of Paria, off the northeast coast of Venezuela, north of the mouth of the Orinoco. Area 1,754 square miles. Population 1,724,000 (1901). Temperature, 70° to 86° Fahrenheit. The country is divided into four provinces. The province of the UF'S, the PCC, the SDA, and the Mora­rians, with 600,000 inhabitants. The province of the Baha'is, 1 woman missionary, 52 native workers, 5 outstations, 1 place of worship, 5 Sunday schools, 16 day schools, and 267 professed Christians, of whom 168 are communicants.

TRINITARIAN BIBLE SOCIETY: Headquarters, 7 St. Paul's Churchyard, London, E.C., England. The Trinitarian Bible Society was organized in 1831, for the circulation of the Word of God, translated from the originals only, to the exclusion of all versions from the Vulgate. No person is admitted to the management of the Society who denies the doctrines of the Trinity and the Atonement. The work of the Society is chiefly in those countries in which the Vulgate or Roman Catholic versions most abound. It has prepared a Spanish Bible in several editions, and a Portuguese Bible with references. The first translation of the Bible into the Breton language for the Breton Evangelical Mission was printed by the Society; also Salkinson's Hebrew translation of the New Testament, of which 100,000 copies have already (within three years) been distributed among Jews in all countries. The Society avoids colportage as far as possible, its work of distribution being mainly carried on by agents of other societies.

TRIPOLI: A province of the Turkish Empire in North Africa. It is bounded on the northwest by Tunis, on the east by the Nubian Desert, which separates it from Egypt, and it includes within its southern border the oases of Kufra, Fezzan, etc. It covers an area of about 400,000 square miles, and has a population variously estimated at from 800,000 to 1,300,000. The dervish order of the Sencussis, whose capital used to be Jarabub, in the Fared Ghah Oasis, in the Libyan Desert, is the dominant power in the whole country. It has 15 stations in Morocco, 25 in Algeria, 10 in Tunis, 66 in Tripoli, and 17 in Egypt. The Sultan of Wadai is one of the most fervent adherents of the sect. It does not confine itself to the White race; the blacks have also been drawn into its numerous schools, founded in the Sudan, which have extended their influence from Senegambia to Timbuktu, Lake Tchad, Bahr-el-Ghazel, and even to the country of the Danakils, the Gallas, and the Somalis. Tripoli is naturally divided for administrative purposes into four provinces. The country is made up of vast sandy plains interrupted by rocky ranges, with a fertile strip adjacent to the sea, and here and there in the desert a depression, where the springs of water are sufficient for a few inhabitants and their groves of date palms. The principal products are corn, barley, olives, saffron, figs, and dates. The climate is variable, resembling that of southern Europe, and generally salubrious. The population consists of Egyptians, Berbers, Negroes (brought from the interior as slaves), Turks, and Jewish and European (Maltese) traders. A few un­influential Coptic groups are found. The North Africa Mission has 1 station in Tripoli.
their wives, 2 women missionaries, and 1 dispensary.

TRIVANDRUM: A town and capital of Travancore, India, situated about 98 miles S. E. of Quilon. It is a stronghold of Brahmanist influence, which centers in the fort where the palaces of the reigning family are found, besides the chief pagodas and the residence of many high-caste people. The English resident and other foreigners live among gardens outside the fort. Pop. (1901), 57,882. Station of the LMS (1838), with (1903) 2 missionaries and their wives, 127 native workers, 64 outstations, 50 Sunday schools, 74 day schools, 2 boarding schools, 1 hostel, 1 dispensary, 1 lepers' asylum, and 14,751 professing Christians, of whom 1,075 are communicants. Also station of the CEZ (1862), with (1903) 2 women missionaries, 28 native workers, 1 dispensary, 1 hospital, and 1 boarding school, which is in an old palace in the fort, the gift of the Maharajah. Some write the name Treivandrum.

TROWBRIDGE, Milton Conklin: Born in Michigan, January 28, 1851. Died at Marsh, Trumbull Co., July 20, 1888. Studied at Rensselaer Polytechnic Institute, Troy, N.Y., and at the University of Michigan, and Union Theological Seminary. Appointed missionary of the ABCFM in 1856, and sailed for Constantinople. After learning the language he engaged in itinerating among the Armenians of Eastern Turkey. Returning to Constantinople in 1861, he married a daughter of Dr. Elias Riggs. He had charge of the city work of Constantinople for six years, and in 1868 was transferred to Marsh to assist in the instruction of the Theological Seminary. In 1872 he visited England and America to raise funds for the Central Turkey College at Antab. In 1876 he was appointed president of the college. From that time to his death, with the exception of a brief visit to England, he devoted himself with energy to promoting its interests, as well as to the material, moral, and religious improvement of the people of Turkey. His well-known good judgment, his quick and contagious sympathy, his unassuming cheerfulness and optimism, his ready pen and persuasive tongue, united to give him influence. Under his administration the Central Turkey College owes to his energetic labor a large share of its present position and power.

TSAKOMA: A settlement in the Transvaal, South Africa, situated in Zoutpansberg District, about 100 miles N. E. of Pietersburg. Station of the Berlin Missionary Society (1874), with (1903) 2 missionaries, 2 native workers, 1 boarding school, and 260 professed Christians, of whom 89 are communicants. Some write the name Tschakoma.

TSAO-SHIH: A town of Hu-pe, China, situated about 50 miles W. of Han-kau on a little lake connected with Han River. Station of the LMS (1880), with (1903) 2 missionaries, 1 of them with his wife, and 1 dispensary. Church statistics are included with Han-kau.

TSCHAOKAMA. See TSOKAMA.

TSCHI-CHIN: A town in Kwang-tung, China, situated about 130 miles N. by E. of Canton. Station of the Berlin Missionary Society (1898), with (1903) 1 missionary, 14 native workers, 11 outstations, 1 day school, 41 Sunday schools, 2 day schools, 2 boarding schools, 1 hospital, and 503 professed Christians, of whom 359 are communicants.

TSCOMBALA. See CHOMBALA.

TSCHONGHANGKANG. See TSONG-HANG-KUNG.

TSCHONGSTSHUN. See TSONG-HUN.

TSCHOU-TONG-AU: A town in Kwang-tung, China, situated about 80 miles E. of Canton. Station of the Berlin Missionary Society (1891), with (1903) 2 missionaries, 18 native workers, 8 outstations, 1 day school, and 352 professed Christians, of whom 356 are communicants.

TSHAHO. See BERLIN, CAPE COLONY.

TSIAFAHY: A town and district of Madagascar, situated in the Imerina province about 15 miles S. of Antananarivo. Station of the Paris Evangelical Mission Society (1897), with (1903) 1 missionary and his wife, 113 native workers, 4 Sunday schools, 55 day schools, 2 boarding schools, and 900 professed Christians.

TSHA-BO: A town in the province of Hu-pe, China. Station of the Central China Mission (1900), with (1903) 1 missionary and his wife, 1 place of worship, 2 day schools. Some write the name Tse-ho.

TSL-NAN-FU: A town in Shan-tung, China, situated about 35 miles W. of Ts’in-lin. It is walled. The trade is in silk and precious stones. Temperate, healthful. Population, 15,000, Mongolian Chinese chiefly. Station of the PN (1872), with 4 missionaries, three of them with their wives; 3 women missionaries, 1 native worker, 2 outstations, 2 places of worship, 12 day schools, 2 boarding schools, 2 hospitals, and 573 professed Christians. Some write the name Chianfu.

TSLIN-CHAU: A prefectural city in the province of Kan-su, China, situated about 62 miles E. of Kung-chung-fu. Station of the CIM (1878), with (1903) 1 missionary and his wife, 2 women missionaries, 4 native workers, 1 place of worship, 2 day schools, 1 dispensary, and 51 professed Christians.

TSING-CHAU-FU: Town in the province of Shantung, China, 160 miles W. S. W. of Chi-fu. It was formerly the capital of the province, and has still a large silk industry. Station of the BMS (1877), with 7 missionaries and their wives, 82 native workers, 98 outstations, 1 dispensary, 1 hospital, 24 day schools, 2 boarding schools, and 1,618 professed Christians. Also station of the BZM (1893), with (1903) 4 women missionaries, 1 boarding school, and 15 day schools. Some write the name Ching-chow.

TSING-KIANG-FU: A town in Kiang-su, China, situated on the Grand Canal about 10 miles N. W. of Hwei-ngan-fu. Station of the CIM (1869), with (1903) 2 women missionaries and 1 place of worship.

TSING-CHANT-FU: A town in Kiang-su, China, situated about 180 miles E. S. E. of Lan-chau-fu. Station of the CIM (1897), with 1 missionary and 1 place of worship.

TSING-NING-CHAU: A town in Kan-su, China, situated about 150 miles S. W. of Tsil-nan-fu. Station of the Independent Baptist Movement Mission, with (1901) 2 missionaries and their wives. Also station of the BZM (1893) 3 missionaries, one of them with his wife; 21 native workers, 2 day schools, 1 dispensary,
1 hospital, and 159 professed Christians. Some write the name Chinung Chow.

TSING-TAO: A town in Shan-tung, China, situated about 45 miles E. by S. of Tschongtshun. Station of the BMS (1889), with (1903) 2 missionaries. It is the terminus of the German Shan-tung Railway. Station of the General Evangelical Protestant Mission Society (German) (1898), with (1903) 3 missionaries, 2 of them with their wives; 1 outstation, 6 native workers, 1 day school, 1 dispensary, 1 hospital, and 1 place of worship. Also station of the Berlin Missionary Society, with (1903) 2 missionaries, 22 native workers, 1 woman missionary, 2 outstations, and 233 professed Christians, of whom 186 are communicants. These statistics include Kiao-chau. Station also of the PN (1898), with (1903) 2 missionaries, 22 native workers, 1 day school, 1 dispensary, 1 hospital, and 1 place of worship. Also station of the Berlin Missionary Society, with (1903) 2 missionaries, 22 native workers, 1 dispensary, 1 hospital, and 1 place of worship. Also station of the PN (1898), with (1903) 2 missionaries, 22 native workers, 1 day school, 1 dispensary, 1 hospital, and 1 place of worship. Also station of the Berlin Missionary Society, with (1903) 2 missionaries, 22 native workers, 1 dispensary, 1 hospital, and 1 place of worship. Also station of the Berlin Missionary Society, with (1903) 2 missionaries, 22 native workers, 1 day school, 1 dispensary, 1 hospital, and 1 place of worship.

TSIN-YUN-HSIEN: A town in Che-kiang, China, situated 55 miles N. W. of Wen-chau. Station of the CIM (1898), with 1 missionary and his wife, 2 native workers, 1 place of worship, 1 Sunday school, and 2 professed Christians. Statistics are included in the SPG also.

TSIVORY: A town in Madagascar, situated in the S. part of the island, about 55 miles N. W. of Port Taapa. Station of the Lutheran Free Church (U. S. 1901), with 1 missionary and his wife, 2 native workers, and 2 outstations. Some write the name Tsivoro.

TSOLO: A town in Cape Colony, South Africa, situated in Pondoland West, 50 miles N. W. of Port St. John's. Station of the Episcopal Church in Scotland (1899), with (1903) 2 missionaries, 2 missionary women, 46 native workers, 27 outstations, 4 places of worship, 23 day schools, and 80 professed Christians. Some write the name Tsolo.

TSONG-HANG-KANG: A town in Kwang-tung, China, situated about 50 miles S. E. of So-ping-fu. Station of the CIM (1895), with (1903) 4 missionaries, 1 of them with his wife; 54 native workers, 208 outstations, 13 Sunday schools, 2 dispensaries, 1 hospital, and 2,117 professed Christians. Also station of the BZM (1894), with (1903) 2 women missionaries, 3 outstations, 3 day schools, and 4 native workers. Some write the name Chow Ping.

TSONG-HANG-KUN: A town in Kwang-tung, China, situated about 5 miles S. E. of Canton. Station of the Basel Missionary Society (1883), with (1903) 2 missionaries, 1 of them with his wife; 9 native workers, 5 outstations, 3 day schools, and 388 professed Christians, of whom 262 are communicants. Some write the name Tschongkang.

TSONG-SHUN: A village in Kwang-tung, China, situated about 100 miles N. W. of Swatow. Station of the Basel Missionary Society (1864), with (1903) 2 missionaries, 1 of them with his wife; 6 native workers, 7 outstations, 8 day schools, and 676 professed Christians, of whom 380 are communicants. Some write the name Tschongtehun.

TSOU-PING-HSIEN: A town in Shan-tung, China, situated about 45 miles E. by S. of Tschongtshun. Station of the BMS (1889), with (1903) 8 missionaries, 7 of them with their wives; 54 native workers, 208 outstations, 13 Sunday schools, 2 dispensaries, 1 hospital, and 2,117 professed Christians. Also station of the BZM (1894), with (1903) 2 women missionaries, 3 outstations, 3 day schools, and 4 native workers. Some write the name Chow Ping.

TSO-YUN-HSIEN: A town in Shan-si, China, situated 18 miles S. S. E. of So-ping-fu. Station of the CIM (1895), with (1903) 4 missionaries, 3 native workers, 1 place of worship, 1 day school, and 380 are communicants. Some write the name Tso-yun.

TSU: A station in Japan, of the Cumberland Presbyterian Board, with (1903) 2 missionaries and their wives, 2 native workers, 3 outstations, 2 places of worship, 2 Sunday schools, 1 boarding school, 1 theological class, and 172 professed Christians. Also station of the PE, with (1901) 2 missionaries, 3 places of worship, 2 Sunday schools, and 22 professed Christians.

TSUEU-CHAU-FU: A town in Fo-kin, China, situated near the coast about 45 miles N. E. of Amoy. Station of the PCE (1866), with (1903) 10 missionaries and their wives, 2 dispensaries, 2 hospitals, and 1 medical class. Some write the name Chinweu.

TSUIN-I-FU: A town of Kwei-chau, China, situated 85 miles N. by E. of Kwei-yang-fu. Station of the CIM (1902), with 2 missionaries, 1 of them with his wife, and 1 dispensary.

TUAMOTU ISLANDS: A cluster of small islands east of the Society Islands, Polynesia. They were acquired by France in 1880, together with the Gambier Islands, and form part of the French establishments in Oceania. The two groups have an area of 390 square miles and a population of 5,946. The people are mainly of them Roman Catholics, and there are a few Moravians at Anaa. The Paris Evangelical Society missionaries tour among the islands in their missionary cruiser, The Southern Cross, and they have stationed a preacher at Anaa.

TUBE: An island of the D'Entrecasteaux group, about 50 miles off the S. E. point of New Guinea. Station of the Australian Wesleyan Methodist Missionary Society, with (1901) 1 missionary and his wife, 6 native workers, 16 outstations, 26 places of worship, 6 Sunday schools, 21 day schools, and 55 professed Christians.

TUCAMAN: A town in the Argentine Republic, South America, situated about 700 miles N. W. of Buenos Aires. Population 50,000. Station of the PB, with 2 missionaries, 1 of them with his wife. Some write the name Tucuman.

TUCKER, Miss Charlotte Maria: Born in 1821. Died at Amritsar, India, December 2, 1893. Miss Tucker (better known as A. L. O. E.) was famous as a writer of captivating stories before 1875, when, at the age of fifty-four, and at her own expense, she went to India as a missionary. She studied Urdu before going out to India, and almost from the first day of her arrival there she turned her thoughts to writing parables and stories for the natives; with wonderful ease adopting their modes of thought and style of.
language, and entering into their prejudices and difficulties. Thousands of her tracts and books were soon circulating in many parts of India. At the special request of the Christian Vernacular Education Society for India, she wrote a volume, explanatory of "Our Lord's Parables entered in Society," and it was published also in separate tracts, to enable the poorest to purchase it. She first entered upon her missionary work at Amritsar, but soon went to Batala, where she labored among the large Mohammedan population. She did much evangelistic work from house to house. She would find her way to a zenana, and, on gaining admittance, would sit on the floor with true Oriental ease and grace, the native occupants of the dwelling gathering round, curious and expectant; and then she would fix their attention by a pleasing story or beautiful pictures, until she drove home some helpful Gospel truth. She took a special interest in the High caste in society—the opposite end of the social scale to the Brahmins; and she made an effort to carry the Gospel to the thousands of convicts in the Andaman Islands, but the plan had to be abandoned, as the Government could not sanction religious proselytism among the political prisoners. One of the last projects in Batala which received Miss Tucker's sympathy and aid was the new CEZMS Dispensary. For eighteen years this consecrated woman, who resolved to spend the "sunset of her life" among the women of the Punjab, labored far from her earthly home until she entered her heavenly home.  

TUCUMAN. See TUCAMAN.  

TUH-SHAN. See Tu-SHAN-CHAU.  

TULBAGH: A town in Cape Colony, S. Africa, 75 miles northeast of Cape Town. Population, 660. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 12 native workers, 1 Sunday school, 2 day schools, and 881 professed Christians, of whom 350 are communicants.  

TULLIAR: A town in Madagasgar, situated on the W. coast, north of St. Augustin Bay. Station of the Norwegian Missionary Society (1874). Some write the name Tulier.  

TUMKUR: A town in Mysore, India, situated about 40 miles N. E. of Bangalore. Population, 11,170. Station of the WMS, with (1903) 1 missionary, 2 women missionaries, 96 native workers, 11 places of worship, 8 Sunday schools, 24 day schools, 1 boarding school, and 253 professed Christians, of whom 232 are communicants.  

TUNAPUNA: A village in Trinidad, situated about 10 miles E. of the Port of Spain in the plantation district where East Indian coolies are found in numbers. Station of the PGC (1881), with (1903) 1 missionary and his wife, 11 native missionaries, 11 native workers, 2 outstations, 16 day schools, 1 boarding school, and 150 professed Christians. Also station of the SPC, with (1903) 1 missionary, 2 native workers, 3 outstations, and 3,500 professed Christians, of whom 637 are communicants.  

TUNG AN. See TUNG-NGAN-HSIEN.  

TUNG-CHAU: A city in Chi-li, China, at the head of navigation on the Peiho, 13 miles east of Peking. Population, 50,000. Station of the ABCFM (1867), with (1903) 7 missionaries, 6 of them with their wives; 2 women missionaries, 2 places of worship, 2 places of education, 1 dispensary, 1 hospital, and 219 professed Christians. Some write the name Tung-cho.  

TUNG-CHAU-FU: A town of Shensi, China, situated about 65 miles N. E. of Hsi-nang-fu. Station of the CIM (1891), with (1903) 1 missionary and his wife, 4 women missionaries, 5 native workers, 1 outstation, 2 places of worship, 1 Sunday school, 1 boarding school, 1 dispensary, and 25 professed Christians.  

TUNG-CHI-HSIEN: A town of Kansu, China, situated in the E. part of the province, about 50 miles south of N. E. of Ping-lung-fu. Station of the CIM (1899), but there has been no resident missionary since the troubles of 1900. Some write the name T'ung-chi.  

TUNG-CHO. See TUNG-CHAU.  

TUNGKUN. See TUNG-KWAN-HSIEN.  

TUNG-KWAN-HSIEN: A town in Kwangtung, China, situated about 35 miles S. E. of Canton. Station of the Rhenish Mission Society, with 4 missionaries, 3 places of worship, 6 native workers, 3 day schools, and 314 professed Christians, of whom 250 are communicants. Some write the name Tungkun.  

TUNG-LU: A town of Chekiang, China, situated about 30 miles S. W. of Yen-chau-fu. Station of the CIM (1902), with 1 missionary.  

TUNG-NGAN-HSIEN: A town in Chi-li, China, situated about 25 miles N. by E. of Amoy. Station of the LMS (1897), with (1901) 1 missionary and his wife, 12 native workers, 2 places of worship, 1 dispensary, and 180 professed Christians. Some write the name Tung-An.  

TUNG-NGAN-HSIEN: A town in Fe-kien, China, situated about 25 miles N. by E. of Amoy. It is a walled town, with a large population in its suburbs outside the walls. Station of the RCA (1895), with (1903) 1 woman missionary, 11 native workers, 9 outstations, 11 places of worship, 2 day schools, and 290 professed Christians. Some write the name Tung-An.  

TUNI: A town in Madagascar, situated in the district of Vizagapatam, about 40 miles N. E. of Cocanada. Station of the BOQ (1878), with (1903) 1 missionary and his wife, 1 woman missionary, 22 native workers, 7 outstations, 3 places of worship, 16 Sunday schools, 7 day schools, 1 boarding school, and 183 professed Christians.  

TUNIS: A protectorate of France in Africa, lying on the Mediterranean, which bounds it north and east, with Algeria on the west and Tripoli on the east. It has an area of about 51,000 square miles and a population of about 1,900,000, mostly Bedouin Arabs and Kabyles. The French population (1901) is 202,915, including soldiers and sailors of the ships and garrisons. There are about 60,000 Jews. The physical and climatic conditions are much the same as in Algeria. Protestant missions are carried on in
Tunis by the North African Mission and the London Society for Promoting Christianity among the Jews, with 4 stations.

TUNIS: Capital of the country of the same name in Africa, is situated on the western side of a very shallow lake which separates it from its port, Goletta. A deep-water canal 7 miles long runs through the lake, allowing sea-going vessels to come up to Tunis. The ancient city of Tunis contains several historically interesting buildings, as the Kasba, a castle formerly used as a prison for Christian captives and now occupied by the French garrison, and the palace of the Bey, etc. This part of the city is separated by the Bab el Bahr (sea gate) from the European quarter, known among foreigners as La Marine. Tunis is commonly called a healthful town, but typhoid fever and diphtheria are very common. Population, 145,000, of whom 45,000 are Jews, 11,000 French, and 8,000 Maltese and other foreigners. Established by the London Jews' Society (1835), with 1 missionary and his wife, 2 women missionaries, 8 native workers, 1 place of worship, 1 Sunday school, and 2 day schools. Also station of the NAM (1886), male missionaries, 2 women missionaries, 92 outstations, 93 places of worship, 63 Sunday schools, 57 day schools, 2 primary schools, 1 dispensary, 1 hospital, 1 printing house, and 5,655 professed Christians, of whom 3,835 are communicants.

TURKISTAN AND TARTARY: These are terms which have been loosely applied to that part of Central Asia which lies east of the Caspian Sea, south of Siberia, west of Manchuria or China, and north of Tibet, India, Afghanistan, and Persia. The same Tartary is a barbarism which is gradually falling into disuse as the formerly unknown plateaus and steppes of Central Asia are being more thoroughly explored, but the term Turkestan can still be retained as applying to that part of Central Asia which includes three divisions: (1) West Turkestan, (2) East Turkestan, and (3) Jungaria.

West Turkestan includes in its territory the highlands of Thian Shan, the plains of the Bal-kash, and the lowlands between the Aral and the Caspian Seas. It comprises Russian Turkestan, the provinces of Samaracand, Fergana, Semirechenek, Sur-Daria, Khiva, Bokhara, and Koko-kand; the Chinese oasis of Kulja, and some parts of Afghan Turkestan. It includes an area of about 1,600,000 square miles, with a population estimated at 8,500,000, of which 793,032 square miles are in the Russian provinces or dependencies, having a population of over 3,500,000. The physical features of this large area vary greatly from mountain peaks covered with snow to deep gorges and valleys, with every variety of climate and vegetation. Prairies and lowlands alternate with deserts, over which the dry winds, at times scorching hot and then again icy cold, blow sand or snow, and blight all vegetation. The population of this territory is very mixed. Aryans and Mongols are both found, the former principally in the cities, while the latter are wandering tribes. To the Turanian group belong the Turcomans, Kirghiz, Uzbecks, and Sarts. The Mongolians include the Kalmucks and Torgoutes. To the Aryan race belong the Tajiks, who are Sunnite Mohammedans, Persians, British Indians, and Russians. The principal cities are Bokhod, Marghan, Tashkend, Khokend, Bokhara, and Khiva. The two latter have each from 30,000 to 100,000 inhabitants.

East Turkestan includes that large depression in the plateau of Eastern Asia which lies between Western Turkestan and those parts of Asia which have received distinctive names, and whose boundaries have been defined. Its boundary on the northwest is the Thian Shan range; on the southwest and south the Kuenlun mountains; on the southeast to Lake Lob-nor, the Allyn-Dagh, and a deep valley leading from the mountains which run east-northeast from the Thian Shan range. It includes a territory of about 465,000 square miles, with a population of 1,000,000, of which 431,800 square miles, with a population of 580,000, is part of the Chinese Empire. The climate is severe; there is no great fertility of the soil, and consequently the whole district is very sparsely populated. The few inhabitants are representatives of both the Aryan and Turanian groups of the human race. The Mongol element predominates toward the northeast, Turkish mixed with Chinese is the prevailing tongue. Yarkand and Kashgar, in Chinese Turkestan, are the chief towns, and here the Swedish Society (Svenska Missionsförbundet) has stations. The first representatives of the Swedish Society came in 1891, work was not regularly organized until 1894. The Bible has been translated into the Kashgarian language, medical work has begun, and the good seed is bringing forth fruit. Jungaria or Sogoria lies to the north of East Turkestan, and is a deep valley leading from the lowlands to the central plateau. It includes 147,956 square miles, with a population of 600,000, and is a dependency of the Chinese Empire. There are no missionary societies at work in West Turkestan. The only Protestant work that is carried on is that by the BFBS. The latter make figures in whole or in part have been translated into several local dialects of Turkish which are very nearly alike but have different names on the Bible Society lists.

TURKEY: The Turkish, or Ottoman, Empire covers extensive territories of Southeastern Europe, Western Asia, Northern Africa, and the islands of the Eastern Mediterranean and Aegean Seas. Certain of the provinces in Europe and Africa, however, are only nominally a part of the Empire, being either autonomous or under the general supervision of European governments. Taking first the Empire in its fullest sense, we notice, Turkey in Europe: This extends from the Adriatic Sea on the west, across the Balkan Peninsula, to the Black Sea on the east, and includes the Albanian countries, responding in general with ancient Macedonia, Adrianople, and the Principality of Bulgaria, with Eastern Rumelia.

Turkey in Asia is bounded on the north by the Black Sea, on the east by Russia (Trans-Caucasia) and those parts of Asia which have received distinctive names, and whose boundaries have been defined. Its boundary on the northwest is the Thian Shan range; on the southwest and south the Kuenlun mountains; on the southeast to Lake Lob-nor, the Allyn-Dagh, and a deep valley leading from the mountains which run east-northeast from the Thian Shan range. It includes a territory of about 465,000 square miles, with a population of 1,000,000, of which 431,800 square miles, with a population of 580,000, is part of the Chinese Empire. The climate is severe; there is no great fertility of the soil, and consequently the whole district is very sparsely populated. The few inhabitants are representatives of both the Aryan and Turanian groups of the human race. The Mongol element predominates toward the northeast, Turkish mixed with Chinese is the prevailing tongue. Yarkand and Kashgar, in Chinese Turkestan, are the chief towns, and here the Swedish Society (Svenska Missionsförbundet) has stations. The first representatives of the Swedish Society came in 1891, work was not regularly organized until 1894. The Bible has been translated into the Kashgarian language, medical work has begun, and the good seed is bringing forth fruit. Jungaria or Sogoria lies to the north of East Turkestan, and is a deep valley leading from the lowlands to the central plateau. It includes 147,956 square miles, with a population of 600,000, and is a dependency of the Chinese Empire. There are no missionary societies at work in West Turkestan. The only Protestant work that is carried on is that by the BFBS. The latter make figures in whole or in part have been translated into several local dialects of Turkish which are very nearly alike but have different names on the Bible Society lists.
of the Dardanelles and Bosphorus. Both eastern and southern boundaries are somewhat vague, the former because the two empires have not succeeded in drawing a satisfactory line through the mountains of Kurdistan, the latter because of the uncertain limits of the Sultan's authority in Arabia outside of the coast provinces of Hejaz and Yemen.

Turkish Possessions in Africa: These consist of Tripoli with the Fezzan, and Egypt, which is Turkish by virtue of paying an annual tribute to the Sultan.

Islands in the Eastern Mediterranean include the islands of the Archipelago, Crete and Cyprus. All the islands of the Archipelago, except Crete and Samos, are included in the tables among the Asiatic possessions. Samos is a tributary principality, with an area of 210 square miles. Cyprus, with 3,670 square miles, is under the British Government, which, however, pays an annual tribute to the Turkish Government. Crete, with an area of 3,326 square miles, is ruled by a prince under supervision of the European powers, although nominally a province of Turkey.

Tabulating the whole we have the following:

### IMMEDIATE POSSESSIONS OF THE EMPIRE:

<table>
<thead>

It should be remembered that estimates as prepared by different authorities differ very widely, owing partly to the diverse views held in regard to the political relations of the various sections, and partly to the absence of absolutely accurate measurements.

Population: Following the same general divisions as above, we find the totals as follows:

Here, too, more estimates are possible. A census in the East is in a great degree an anomaly, and although the Turkish Government has taken two, its efforts have not been crowned with the greatest success. The fact that in some provinces, especially in Asiatic Turkey, the males were reported as 20-50% in excess of the females, indicates the greatest difficulty of the census-taker. For a division of these totals among the different races and religions, see below.

Physical Characteristics: Albania, Arabia, Bulgaria, Egypt, and Syria are described under their several heads.

European Turkey is for the most part a mountainous region belonging to the same physical system as Albania. The province of Adrianople, however, includes the most beautiful plateau extending from the Rhodope to Constantinople.

Asiatic Turkey is largely occupied by the western extremity of the vast belt of mountains and high plateaus which extends from east to west through the whole continent of Asia. South of this region lie the great plains of Mesopotamia with the highlands of Syria shutting them off from the Mediterranean. In the northern Asiatic provinces the country is mostly a high tableland, covered with ranges of mountains. The tableland is highest on its eastern and southern sides, diminishing in altitude as it approaches the Mediterranean on the west and the Black Sea on the north. Egypt is one unbroken plain, and in Tripoli the rocks and desert seem to vie with each other as to which shall possess the land.

Climate: The Turkish Empire has every variety of climate, from the severe cold of the Balkans and the highlands of Armenia to the almost equatorial heat of the Red Sea and Baghdad. In the greater portion, however, it istemperate, not varying very much from that of corresponding sections of the United States. In general, Mesopotamia and the Syrian coast may be called hot, and the sections bordering upon them are affected in a great degree by the winds that blow over their plains. Central Asia Minor is temperate, its great plains being warm in summer and cold in winter, but day and night generally equalizing the temperature. The same is true of European Turkey, where the coast regions about Salonica are the only parts that have a notably warm climate.

The climate is undoubtedly greatly affected by the almost entire absence of trees over the great plains and even most of the mountains. The soil having to a great degree been washed down into the plains and valleys, the hills and mountain sides are barren, and the reflection of the sun from them in summer is intense. Especially is this true in some places, as Aintab, Urfa, Mardin, and Erzerum, where the summers are very hot.

Soil and Productions: The Turkish Empire includes probably some of the most fertile land on the globe. From the plains of Bulgaria to the valleys of the Nile and the Tigris the soil is wonderfully rich. The people of a section of the great central tableland of Asia Minor near Cesarea have a proverb: ‘'If the world is hungry, the Bozok region can satisfy it, but the Bozok is hungry the world is not sufficient.” The wheat of Bulgaria and Rumelia is well known in the markets of Europe, and America is finding rivals in Asia Minor and Mesopotamia, as improvements in means of communication give new regions an outlet. Mesopotamia is especially rich, and any one who goes down the Tigris by raft and watches the line that marks the depth of the rich loam in the river banks will not wonder that empires succeeded each other with such rapidity in that whole section, nor that the rivers of Persia looked with such longing eyes on the fields of Assyria. Aside from wheat there is a large amount of barley raised, and in Eastern Turkey a good deal of millet. Near the coast in Northern Syria, and
Turkey

THE ENCYCLOPEDIA OF MISSIONS.

within Asia Minor, cotton is raised to some extent, and on the plains of Western Asia Minor there are large fields of poppies for the opium trade. The common vegetables are rice, cabbage, onion, turnip, and okra, but the potato is widely introduced. The mountain pastures are cultivated everywhere, the best coming from Northern Syria, the eastern parts of the Black Sea coast and Macedonia.

Turkey is especially rich in fruits, many of which originate in that territory. Grapes, melons, figs, olives, peaches, pears, quinces, pomegranates, dates, etc., are of the finest.

In European Turkey and the western parts of Asiatic Turkey are large vineyards, and a considerable amount of wine is made. This is generally pure, and is very largely exported to Italy, France, and Austria, where it is fortified, and exported again under French and German names.

Olive groves are especially abundant along the shores of the Mediterranean, and the fig orchards of Smyrna, Ormeyia, and the abundance in the islands of the Archipelago and on the coast of Syria. Dates are not found in any quantity north of Egypt.

The only forests in Turkey are on the Rhodope mountains in Europe, the shores of the Black Sea, the Zagros mountains near Bithia and Van, and a portion of the Taurus. In these forests there is still much fine timber—oak, walnut, and sycamore—but elsewhere almost the only trees, aside from the fruit trees, are the cypresses of the Muslim cemeteries, and the poplars and willows that line the streams and watercourses near cities and villages.

By far the greater part of Asiatic Turkey is pasture-land, and wherever one goes he sees immense flocks of sheep and goats.

The mineral wealth of Turkey is great, but has never been developed, so that it remains still an unknown, scarcely even an estimated, quantity. Iron, copper, silver, baryta, coal, etc., are mined to a greater or less degree, but mostly in a crude, imperfect way. Foreign capital would gladly take up the hostility, not only of the government, but of the people, is an almost insurmountable obstacle.

Means of Communication: Previous to the Crimean war, almost the only roads in Turkey were bridle paths, trodden smooth by the caravans of centuries. In a few places remnants could be seen of old Roman causeways, but the huge blocks of stone and the intervening pitfalls were shunned by all, except as the mire by the side was so deep as to be really impassable. In a few instances the Sultan, both Seljuk and Ottoman, made efforts to repair these causeways, but they were seldom successful, and caravans were forced to find their own way over plains and mountain passes as best they might. Everything was carried on horses, mules, or camels, and such a thing as a cart or carriage was unknown. As the country, however, was opened up to foreign enterprise, one of the first things attempted was the building of roads over the great routes of travel. Of these there were five, four connecting the western coast with Baghdad, and one from Trebizond, on the Black Sea, to Pecia. The course they took was:

1. Constantinople, via Nicomedia, Angora, Sivas, Diarbekir, Mardin, and Mosul.
2. Samsoon (on the Black Sea) via Amasia, Sivas, etc. Smyrna, via Konia, Cesarea, Diarbekir.
3. Alexandria, via Aleppo, Urfa, Diarbekir. 5. Trebizond, via Erzerum and Van, to Khoi, and Tabriz. Along all of these lines work was commenced in sections, but the sections seldom connected, owing to the difficulty and expense of carrying the road over the mountain passes, and it was that the paths remained. Then a new element came in. After the overthrow of Schamyl (1859), the great Circassian leader, multitudes of Circassians found their way into Asia Minor, bringing with them the rough carts they had used in the Caucasus. These made roads for themselves, and gradually, as renewed pressure was brought to bear upon the Turkish Government, road building was recommenced, so that now there are fairly good carriage roads from Trebizond to Erzerum, and from Samsoon to Diarbekir and Mardin, with branches to all important cities.

The first railroad in Asiatic Turkey was from Smyrna to Adin that was followed by one from Smyrna to Manus, and from Constantinople to Nicomedia, and one from Methone to Adana. The railroad from Constantinople to Nicomedia has been extended to Angora and Konia (Izmir), with branches connecting with the lines running out of Smyrna. It is shortly to be carried on toward the Euphrates valley and Baghdad. In European Turkey the first railroad connected the Dardanelles with the Black Sea at Kustendji; that was followed by one between Varma and Rustchuk, connecting with one to Bucharest and Vienna; one from Constantinople to Adrianople and Philippopolis, now extended to Sofia, Pirots, Lexington, Belgrade, Pesh, and Vienna; and one from Salonica to Uscup, and so joining the last named line.

Postal and Telegraph Arrangements: These are entirely in the hands of the Turkish Government, so far as the interior is concerned, the mails being carried in wagons, under the escort of an armed guard. Both mail and telegraph are under a rigid censorship, which sometimes violates letters, and always refuses "code" or cipher telegrams.

The foreign postal service is a curious anomaly resulting from the peculiar treaty relations between Turkey and the various powers. So long as there was no regular Turkish service an independent foreign postal service was an absolute essential, and the English, French, Austrian, Russian, Italian, and Greek Governments established post-offices of their own in the various seaports, and sent their own bags of mail matter. As the international postal system came into vogue, each post-office took mail matter for every country in the Postal Union. By that time the Turkish Government also had organized a complete postal system, and, as it had been admitted to the Postal Union, it pressed its claim that the foreign post-offices should retire. This has not been found possible, owing to the Turkish claim of a right to read letters passing through their mails.

Social Conditions: To describe in detail the mode of life of the people of Turkey is scarcely within the province of this work. The city life approaching so nearly in its buildings, its customs, its dress, and food to that of Europe; the country life, with its adobe houses, sometimes with a single room, sometimes more pretentious with its upper chambers; the tent life of the Kurds—have all been described over and over again. A few general statements will suffice here.
Except in the poorest parts of the Kurdish mountains and in some of the villages of northern Syria, Mesopotamia, or Persia, the peasant live in one-roomed huts, and of an incomparably simple comfort. To be sure, what is ample for them seems to the foreigner a very meager supply, but it is still true as a rule that they are in comfort so far as the supply of bodily needs is concerned. Their food is simple, but it is wholesome, and there is ordinarily enough of it.

The uses are rough, the furnishing scanty, the bedding and clothing coarse, but they serve usually to keep the people warm. It is when sickness and old age bring weakness and distress that the discomforts principally appear. Taken as a class, the Turkish peasant, whether Muslim or Christian, probably fares as well as the peasant class of any non-Christian land; in some respects he is better off. There are few, if any, in Turkey, even in the great cities, as wretched as are London.

It is rarely the case that they suffer from hunger, except as drought and poor transportation cause famine. It is very seldom that the traveler fails to find bread, rice, milk, and some meat in even the smallest hamlet or the poorest hut. The houses are often thatched, and there is little or no glass in the windows. The Turks generally have about 16,000,000 Mohammedans and 6,000 Christians. Both Mohammedans and Christians, however, include widely different races. Greeks and Armenians are unknown except as Christian elements—making up the Muslim population the most important races in the interior of Asiatic Turkey, the native unadulterated Ottoman Turk is a very noble characteristics, and presenting great possibilities for Christian influence. Of the other elements making up the Muslim population the most important races in Asia are the Arabs and Kurds, in Europe the Albanians. These races have been described under separate heads.

As a rule quite peacefully inclined, a hard worker, a faithful servant, courteous and dignified in his bearing, rather proud of his assumed superiority to the "meanesses of his Christian fellows," there is still an inherent element of ferocity in his nature, and when religious fanaticism is roused, he is a most dreaded enemy. The Ottoman of the city is, however, quite a different man; with as much Christian as Tatar blood in his veins, influenced by the strife of Western with Eastern civilization, studiously polite, easily adapting himself to the circumstances of his associates, he develops a power of intrigue, a facility for deception, an unblushing delight in bribery that makes him the scorn of his sturdy compatriot of Anatolia; There are notable exceptions, but as a rule, and this is the testimony of those who have traveled most in the interior of Asiatic Turkey, the native unadulterated Ottoman Turk is a very noble characteristics, and presenting great possibilities for Christian influence. Of the other elements making up the Muslim population the most important races in Asia are the Arabs and Kurds, in Europe the Albanians. These races have been described under separate heads.
number of tribes, of somewhat uncertain extent and character, found chiefly in the mountains of the western part. Such are the Yuruks of Bithynia and the region of Stryyna. The Kabyles of Tripoli in Africa, of the Berber race, are scarcely recognized as Turkish subjects.

II. The Christians include the Armenians, Greeks, Syrians, Jacobites, Copts, Bulgarians and Turks. The Armenians are found chiefly in Western Asia Minor and along the shores of the Black Sea. They, too, have kept their race distinction, and retain many of the characteristics of their ancestors who founded the Pontic and Dacian colonies. Sharp, keen in enterprise and speculation, the commerce of Turkey is largely in their hands, while the traders and bankers are chiefly Armenians. The Greeks of the interior are of a higher grade of character than those at the seashore. The term Jacobite is distinctive of the remnants of the Monophysite sects found in northern Syria (Antioch and Mesopotamia). The term Syrian is often a very indefinite one, applied generally to all the Christians of Syria and Mesopotamia. Specifically it refers to those churches in communion with the Roman Catholic Church, such as the Maronites, the United Greeks of Syria, and the Armenians, who are Jacobites that have left their old communion for the Romish Church. The term Turkish is also applied, the incorrectly, to the Assyrians or Nestorians who are found in the mountains and deserts of Asia. The Greeks are found only in Egypt. The Bulgarians are a Slavic people inhabiting European Turkey. They belong to the Orthodox or Greek Church, but are independent of the Patriarch. Of the Christian peoples of Turkey the only ones whose race distinction have been preserved are the Armenians, Greeks, and Bulgarians. The rest are not races, properly speaking, but religio-political divisions of the descendants of those of the original inhabitants who accepted Christianity under the rule of the Byzantine Empire. The religions of the Turks, however, have been preserved as such under the articles Armenian Church, Greek Church, Maronites, Mohammedism, Nusairi, Yezidis. It remains here to add a few words as to the political relations of the Greek, Roman Catholic, and Protestant Churches.

The Greek, or 'Orthodox,' Church is the direct descendant of the Byzantine Church. In general doctrine, as found in the creeds and confessions, it is in sympathy with the Protestant Church, and only separated from the Armenian by a distinction so shadowy that it is claimed by some Armenians that the theological difference was a pretext, rather than an occasion, for the separation, the real reason lying in the effort of the Byzantine church to compel the Armenians to use the Greek liturgy. However that may be, it is certain that the age of theological controversy by which the different Oriental churches has passed. The question now is not of 'one Nature or two,' 'one Will or two,' but of nationality. Under the rule of the Muslim Caliph every Christian sect has become a nationality, and every apostate is also a traitor. The position of the Greek Church in Turkey is thus primarily political. In its religious aspect it is practically on a par with its fellows, and a stranger could hardly tell the difference between the services of any two sects.

Ecclesiastically, the Patriarch of Constantinople is the head of the Church in all its different branches, but the Holy Synods of Russia, Greece, and Servia practically ignore him, while the Exarch of Bulgaria is ignored by him. In fact, the Greek Church is not in reality split up into fragments, each fragment claiming absolute independence, and each characterized by the same formalism and absence of spiritual life.

The Roman Catholics of Turkey, aside from the Maronites, include sections of the Armenians, Greeks (Uniat), and Syrians or Chaldeans, who, chiefly for political reasons, have made their peace with the Papacy. They have succeeded, by special dispensation from the Pope, in preserving their national language in their liturgy, in return for their political allegiance to Rome, and, except in the dress of their priests, are not distinguishable from their fellows of the old faiths. France is the recognized protector of all Roman Catholics in Turkey.

The Protestantism of Turkey needs no special description, as it is limited in its members to the Roman Catholic, the Greek Orthodox, and the Protestant Churches. The Protestants are distinguished from the old churches rather by their conception of sin, its character and heinousness, the absolute necessity of a change of heart, and the idea of individual communion with Christ, as a personal Redeemer and Savior, than by elaborate creeds or confessions. Church services take on the non-liturgical form, partly because that has been the habit of the missionarites, partly because of the natural repulsion of the soul, awakened to a sense of its personal need, to a ritual where personality was lost in forms that had practically lost their meaning.

Government: The Government of Turkey is often called "Theocratic." In the sense that the Sultan as Caliph is the head of the Muslim religion, as well as of the Turkish Empire, and that all civil authority centers in the ecclesiastical, this is correct. Mohammed claimed to derive his power from God by special dispensation through the archangel Gabriel, and committed his authority to the Caliphs. The Sultan, as Caliph or "successor" of the Prophet, has for one of his titles 'the Shadow of God on Earth.' But as for any personal relations between the Sultan and Deity, they are no more than those of the meanest of his subjects. He is the representative of divine authority, but by no means its medium.

Both theoretically and practically the Sultan is the head of the government. He has the usual number of Ministers, but none is independent in responsibility for the minutiae of his special department of Foreign Affairs, the Interior, Finance, Commerce, War, Marine, Public
Instruction, or Evkaf. The Cabinet meetings are presided over by the Grand Vizier; but any question must be referred to the Sultan, and he keeps his eye on all the different lines of governmental policy. So, too, the Sheik ul Islam and the Ulama guide the affairs of the church, but, whether in civil or ecclesiastical affairs, the Palaces is constantly the most potent factor, liable at any moment to interfere with the best-laid plans of subordinates, and assume direct control even of the minutiae of administration. That administration, in its civil department, is in general on much the same plan as that of the European governments, at least in the cities of the seaboard. The interior is divided into provinces, whose boundaries are constantly modified to suit political exigencies of many kinds.

Side by side with the civil administration are the judicial and ecclesiastical, and the three are often so intermingled that it is impossible to distinguish between them. The judicial is based in some respects upon the Code Napoleon, but in others on the Canon Law derived from the Koran. Where one ends and the other begins it often becomes impossible to decide. The Canon Law alone applies in questions affecting real estate. Landed properties in Turkey are divided into three categories, the miri, or royal domain, the mulk, or unlimited, and the vacouf, or dedicated property. Mulk property corresponds very nearly to freehold, but the vacouf, which comprises a very large per cent. of all real estate in cities, is dedicated to some mosque or other "pious foundation" to which it pays a small annual rent, and to which it reverts on the failure of its direct heirs. Vacouf property only on condition of perpetual payment of the annual rent and perpetual obligation to surrender the title on the failure of direct heirs. It will readily be seen that this arrangement prevents the free transfer of such property to corporations, since such a transfer would prevent ultimate reversion of the land to the mosque. It also gives for the same reason opportunity for local officials to hinder or prevent the perfection of church or school building.

The capture of Constantinople by the Turks, and the establishment of the internal regulations of the empire on the basis of an absolute union of church and state, or rather of an absorption of the state by the church, are events of the utmost importance to the student of Christian missions. The Mohammedan conqueror captured Constantinople the question became grave of the attitude which it was most expedient for him to take toward those of the vanquished population who refused to accept his creed. To put them to the sword was quite proper under the Canon Law, if he thought best. But to do this would depopulate the land, and would deprive the Government of much income as well as of the services of those inhabitants who might be converted. The situation could not be filled by Turks. Yet aliens in religion could not be admitted to the privileges of citizenship in a divinely guided nation whose laws are an expression of divine justice.

In this emergency the Sultan adopted the practised of the Roman Empire toward religious dissenters and aliens. The unbelievers were told that in all relations between themselves and in matters of which their ecclesiastical law took cognizance they must get along as best they could under the jurisdiction of their own church authorities. Their religious chiefs thus received recognition as civil functionaries of the empire and responsible representatives of their spiritual flocks. With them the sovereign held communication through the officials charged with the management of foreign affairs. The result was that the Christian subjects of Turkey became nationals distinct from each other and from the Muslim population whose privileges were denied to them. As relations with foreign nations became more frequent, the same rule was applied to the relations of foreign residents in Turkey to the Turkish Government. Such residents were not entitled to the privileges of Mohammedan law, and were left under the control of their own laws, being made amenable to their own consular officials only. This system, which places the persons and property of foreign residents in Turkey beyond the jurisdiction of Turkish officials, was consecrated in agreements and treaties known as "the Capitulations" in the 17th century and later. The condition of "extra-territoriality" protects foreign residents in Turkey in some degree from the inequitable religious partisanship of Mohammedan Canon Law, and especially from the arbitrary and lawless exactions of corrupt officials. It is in fact an essential compensating for business safety and even of personal safety to foreign residents in Turkey. This "extra-territoriality," first applied as a stigma of inferiority to foreigners and to Christian subjects living under the rule of the Sultans, has become a precious privilege which it is the constant effort of recent Turkish rulers gradually to obliterate that all, like the Muslims, may be under control of the Canon Law courts and may be forced to satisfy the greed of Turkish officials.

History: The history of Turkey is of the utmost importance to the student of Christian missions. Only by a careful survey of it from the time when the Byzantine Empire commenced to decay can he understand how the present condition is but the crystallization of conditions that existed many centuries ago. To the time when the Byzantine Empire commenced to decay can he understand how the present condition is but the crystallization of conditions that existed many centuries ago.
chefs of Asia Minor were growing more and more arrogant, and the army was in danger of disorganization, through their refusal to send regular order of the Sultan. They were feeling the impulse of the strife for freedom. Mohammed Ali was laying the foundation of his power in Egypt, while Albania was practically independent under Ali Pasha of Janina. A less vigorous, clear-headed man would have succumbed under the Cossack had he carried on his work to the day. Mahmoud set himself to his task with courage, but the forces against him were too strong. He succeeded in overpowering the Janissaries, reorganized his army, and successfully withstood an attack from Russia; but England and France interfered and assumed upon him the Treaty of London, 1827, and the Treaty of Adrianople, 1829. Greece was declared free, and the Danubian principalities of Moldavia and Wallachia were placed under the protection of Russia. Meanwhile Mohammed Ali was increasing in power. The traditional hostility of England and France manifested itself more and more in the Mediterranean. France espoused the cause of the Pasha, while England supported the Sultan. The rivalry between the two powers and their alliances threatened the very existence of the Turkish Empire. Just at this crisis Mahmoud died (1839), leaving the Cali present in the eldest son, Abdul Medjid, an amiable but weak and irresolute man. England and France observed at once that this danger was removed. Meanwhile the Cossacks were established to instruct Mohammedans in education centers in the Koran. Government schools were established to instruct Mohammedans in Western science out of books translated from Western languages, and to teach the languages of the infidels which gave young Muslims access to the literature of the West. By such iconoclastic results the Crimean War undertaken by Europe in order to bolster up for selfish reasons the failing Mohammedan power, must be regarded in its outcome as the most deadly blow ever given to Mohammedanism.

England and France and Italy now made the mistake of ceasing to try to lead Turkey into the, misuse of the opportunity which they had won for the Sultan at the point of the bayonet. Formal interference with Turkey in its execution of the promised reforms was forbidden by the Treaty of Paris. The Western powers desisted from informal interference, and left the Turkish Government to do as it wished for Russia, whose one policy since that day has been to encourage Turkey in following every path that leads to national suicide.

In 1858 Lord Stratford was replaced by Sir Henry Bulwer, and English influence at the Porte rapidly lessened. Then commenced a time to the new reforms an Oriental shrug when they did not positively refuse obedience. Genuine advance was, however, made. Torture and the death penalty for apostasy from Islam were abolished, and the bastinado was forbidden in the schools and finally in the army. Christian evidence in courts of law was rendered legal, if not always actual, and there appeared possibilities for the future where hitherto there had been absolutely none. The Crimean War and the stirring scenes of 1848 and 1849. Kossuth and some associates took refuge with the Porte, which refused to give them up to the power that had crushed the Magyar Government. Nicholas, flushed with his victory, looked forward to the speedy extinction of Turkey, and in 1858 proposed to the British ambassador at St. Petersburg a plan for the division of "the Sick Man's" inheritance as soon as he should expire, and claimed the right of a protectorate over the Greek Christian subjects of the Sultan. This was naturally objected to by the Porte, and was followed by the entrance of the Russian army into the Danubian principalities. England took up the side of Turkey, and France, angered by the Russian championship of the Greek Church, united their forces, and by the treaty of 1841 confirmed Mohammed Ali in the possession of Egypt, as a vassal to the Sultan, and assumed a European protectorate over the Turkish Empire.
Turkey

of national extravagance. Hitherto Turkey had been an almost unknown factor in the stock markets of Europe, but now investors began to crowd in. The adoption of the Code Napoleon in civil courts, and the introduction of customs revenues, etc., necessitated employment of numbers of Europeans, who looked upon the Turks as legitimate prey. Financial propositions of every sort were made; loans were offered upon Treasury bonds, and the government was launched upon a financial career to the management of which it was an utter stranger. When Abd ul Medjid came to the throne he had reversed the usual custom of his ancestors, and spared the life of his brother, Abd ul Aziz; and he, on the death of Medjid, in 1861, became Sultan. A morose, selfish man, bent upon gratifying every whim of the moment, he lent a ready ear to the adventurers that thronged Constantinople. Palaces and public buildings of various kinds sprang up on every hand. A fleet was necessary and it was furnished, while contractors in every department grew rich at the expense of the government, which, elated by the hitherto unheard of possibility of borrowing unlimited sums of money, went into the wildest extravagancies. Meanwhile the Druse massacres of 1860 had resulted in the French occupation of Syria. Wallachia and Moldavia united in the principality of Roumania, and, like Servia, became autonomous provinces. The Russian Embassy was practically supreme, Sir Henry Bulwer, Sir Henry Austin Layard, and Sir Henry Elliott being entirely unable to cope with Count Ignatieff. The year 1869 saw the completion of the Suez Canal, intensifying England's interest in keeping her connections with India clear, and the collapse of France in the war of 1870 made it possible for Lord Beaconsfield to secure from the treasury bonds, and investors began to crowd in. The adoption of the Code Napoleon in civil courts, and the introduction of customs revenues, etc., necessitated employment of numbers of Europeans, who looked upon the Turks as legitimate prey. Financial propositions of every sort were made; loans were offered upon Treasury bonds, and the government was launched upon a financial career to the management of which it was an utter stranger. When Abd ul Medjid came to the throne he had reversed the usual custom of his ancestors, and spared the life of his brother, Abd ul Aziz; and he, on the death of Medjid, in 1861, became Sultan. A morose, selfish man, bent upon gratifying every whim of the moment, he lent a ready ear to the adventurers that thronged Constantinople. Palaces and public buildings of various kinds sprang up on every hand. A fleet was necessary and it was furnished, while contractors in every department grew rich at the expense of the government, which, elated by the hitherto unheard of possibility of borrowing unlimited sums of money, went into the wildest extravagancies. Meanwhile the Druse massacres of 1860 had resulted in the French occupation of Syria. Wallachia and Moldavia united in the principality of Roumania, and, like Servia, became autonomous provinces. The Russian Embassy was practically supreme, Sir Henry Bulwer, Sir Henry Austin Layard, and Sir Henry Elliott being entirely unable to cope with Count Ignatieff. The year 1869 saw the completion of the Suez Canal, intensifying England's interest in keeping her connections with India clear, and the collapse of France in the war of 1870 made it possible for Lord Beaconsfield to secure from the European powers consultation together in conference at Constantinople as to a means for pacifying the Balkan provinces. The Sultan in vain proclaimed a constitution, and later revoked a parliament. Neither measure satisfied Europe, and both were promptly abolished when the hope of that result was seen to be vain. The objections of Turkey to real reform gave Russia a pretext for declaring war in 1877. England held aloof, stipulating the neutrality of Egypt. Austria and Russia met Turkey alone. The campaign of the Balkans resulted in placing Constantinople at the mercy of the Czar, and the Treaty of San Stefano made Russia supreme in the Balkan peninsula, and gave her a strong hold on Eastern Turkey. This was more than England and Austria could stand. The British fleet entered the Marmora, covering with its guns the Russian camp at San Stefano. Austria gave tokens of hostility, and Russia, ill prepared for a general European war, consented to the Conference of Berlin. This granted the independence of Roumania and Servia, each under a king of its own; made Bulgaria an autonomous principality with a relation of tribute only to the Sultan, handed over Bosnia and Herzegovina to Austria, enlarged the borders of Greece, and guaranteed internal reforms, especially for the Armenians.

Since then there have been no great territorial changes except that Eastern Rumelia was joined to Bulgaria in 1886, and Prince Alexander, who proved not amenable to Russian influence as was desired, was seized, forced to abdicate, and was replaced by Prince Ferdinand. Crete followed the manifest destiny of abused Turkish provinces and was given autonomy under a prince of Greece.

The "Eastern Question," which after all is nothing more than the question of securing some means of living in peace while a Turkish neighbor holds to religious principles that demand war, still exists in all of its disturbing aggressiveness. The present (1907) situation in Turkey may be briefly summed up:

Ruling influences among the Turks represent neither of the parties of a few years ago. Taking as its motto "Muslim Turkey for Muslim Turks," the Sultan, with a persistence, patience, and skill that place him among the greatest of the rulers of Turkey, is endeavoring by every means in his power to strengthen the Mohammedan and weaken the Christian elements of the population. Every concession of political equality or civil rights not contemplated by the Koran for unbelievers living under Muslim rulers has been wrung from Turkey by force. The principle followed by a Muslim ruler in such a case is to serve the interests of Islam by granting the demand when he cannot meet force with force, and then to serve Islam again by withdrawing the concession so soon as circumstances permit. In obedience to this rule many of the concessions granted by the Hatti Humayoune of 1856 (formally recognized by the Treaty of Paris in that year) have been gradually withdrawn. Christian Pashas have been allowed to die out. Christian officials have been weeded out from all positions of administrative responsibility. Since the argument for Christian representation in government office has been the large proportion of Christians in certain sections, a feverish activity

Servia now declared war upon Turkey, and the European powers consulted together in conference at Constantinople as to a means for pacifying the Balkan provinces. The Sultan in vain proclaimed a constitution, and later revoked a parliament. Neither measure satisfied Europe, and both were promptly abolished when the hope of that result was seen to be vain. The objections of Turkey to real reform gave Russia a pretext for declaring war in 1877. England held aloof, stipulating the neutrality of Egypt. Austria and Russia met Turkey alone. The campaign of the Balkans resulted in placing Constantinople at the mercy of the Czar, and the Treaty of San Stefano made Russia supreme in the Balkan peninsula, and gave her a strong hold on Eastern Turkey. This was more than England and Austria could stand. The British fleet entered the Marmora, covering with its guns the Russian camp at San Stefano. Austria gave tokens of hostility, and Russia, ill prepared for a general European war, consented to the Conference of Berlin. This granted the independence of Roumania and Servia, each under a king of its own; made Bulgaria an autonomous principality with a relation of tribute only to the Sultan, handed over Bosnia and Herzegovina to Austria, enlarged the borders of Greece, and guaranteed internal reforms, especially for the Armenians.

Since then there have been no great territorial changes except that Eastern Rumelia was joined to Bulgaria in 1886, and Prince Alexander, who proved not amenable to Russian influence as was desired, was seized, forced to abdicate, and was replaced by Prince Ferdinand. Later, Crete followed the manifest destiny of abused Turkish provinces and was given autonomy under a prince of Greece.

The "Eastern Question," which after all is nothing more than the question of securing some means of living in peace while a Turkish neighbor holds to religious principles that demand war, still exists in all of its disturbing aggressiveness. The present (1907) situation in Turkey may be briefly summed up:

Ruling influences among the Turks represent neither of the parties of a few years ago. Taking as its motto "Muslim Turkey for Muslim Turks," the Sultan, with a persistence, patience, and skill that place him among the greatest of the rulers of Turkey, is endeavoring by every means in his power to strengthen the Mohammedan and weaken the Christian elements of the population. Every concession of political equality or civil rights not contemplated by the Koran for unbelievers living under Muslim rulers has been wrung from Turkey by force. The principle followed by a Muslim ruler in such a case is to serve the interests of Islam by granting the demand when he cannot meet force with force, and then to serve Islam again by withdrawing the concession so soon as circumstances permit. In obedience to this rule many of the concessions granted by the Hatti Humayoune of 1856 (formally recognized by the Treaty of Paris in that year) have been gradually withdrawn. Christian Pashas have been allowed to die out. Christian officials have been weeded out from all positions of administrative responsibility. Since the argument for Christian representation in government office has been the large proportion of Christians in certain sections, a feverish activity
has been shown in introducing Mohammedan colonists into Christian districts in Asiatic Turkey. Circassians from Russia, Poles from Bulgaria, Tatars from Roumania, and Kurds from Persia have been offered inducements to remove to points in Turkey where their presence will affect the balance of power. The right to establish new schools was guaranteed to Christians by the Hatti Humayoun, has been quietly withdrawn, and existing Christian schools are restricted in their course of study and closed on trivial pretexts. At the same time the greatest energy is displayed in increasing the number of fanatically Mohammedan schools whose expenses are largely borne by special taxation of Christians "for education," in which they cannot participate. The number of outrages committed by Muslims upon Christians has been notably increased, and the punishment of such outrages is more than ever difficult. In fact, capital punishment for murder of Christians by Muslims has been done away, an imprisonment for fifteen years having taken its place, with the understanding that at least one-third of such sentences will be remitted by imperial clemency.

It is not a matter of surprise that the Christian populations of Turkey have become restive under such conditions. In 1895 the European powers undertook to interfere in behalf of the six provinces of Asiatic Turkey where Armenians are most numerous. The Sultan granted the demands of Europe. That very week a series of massacres began which destroyed the flower of the Armenian population of every city and of many of the villages in each one of the six provinces. Insurrectionary tendencies were for fifteen years having taken its place, with the understanding that at least one-third of such sentences will be remitted by imperial clemency.

An attempt of Bulgarian patriots to excite insurrection in Macedonia in 1903, for the sake of compelling Turkey to grant reforms long since promised, led to similar demands on the part of European powers, and the granting of these demands was followed by a similar systematic and terrible massacre of Bulgarian inhabitants of Macedonia. Whether this, as in the case of Armenia, will be allowed to terminate the validity of the promise of reforms, it is not our province to prophesy. All that can be said is that the same internal conditions which have kept the Eastern Question alive in the past remain active to-day in Turkey, and are likely to remain so until Mohammedans are willing to admit that their mission in the world is other than the subjugation and plunder of unbelievers. Meanwhile, certain influences are at work among all classes, modifying each, sometimes silently, but not the less surely; often unnoticed, yet which at no distant day may be most potent factors in the political situation. The most prominent, perhaps is education. The presence of Robert College on the Bosphorus, the American College for Girls in Scutari, the Syrian Protestant College at Beirut, and the many American and European colleges through Asia Minor have had a mighty influence in the education of the Mohammedan masses, who live, perhaps to remain so until Mohammedans are willing to remain active to-day in Turkey, and are likely but not the less surely; often unnoticed, yet.

The general history of missions is the Turkish Empire is sufficiently noted in the articles on the missionary societies named below. It is needful here to give merely an outline of the work as a whole, and show its relations to the peculiar problems, political, social, and religious, of this interesting field of foreign missions.

The territory of the Turkish Empire is well covered by the mission societies. The ABCFM, the oldest in the field, also occupies the largest territory—the whole of European Turkey, together with Bulgaria south of the Balkans, Asia Minor, Eastern Turkey, and Mesopotamia. These fields have constituted for many years about one-fourth of the entire territory occupied by this Board throughout the world. The Presbyterian Church (North) occupies Syria and a portion of Eastern Turkey, which Nestories and Bektashis have found in Kurdistan. The Methodist Episcopal Church has its work in Bulgaria, north of the Balkans. The Reformed Presbyterian (Covenanter) Church of America has its stations in Northern Syria and Southern Asia Minor. There are also some congregations under the wing of the Foreign Christian Missionary Society (Disciples) in Asia Minor, and a few Baptist churches,
at one time under the care of the American Baptist Publication Society. The Church Missionary Society has a flourishing work in Palestine, the Friends of England have a mission in Syria, and a single medical missionary among the Armenians of Constantinople. The Reformed Presbyterian Church of Ireland has a station at Damascus and one at Idlib, near Antioch, and the North Africa Mission one at Huma in Syria. There are also a number of schools in Syria supported by the Lebanon Schools Committee, and British and Foreign Bible Society.

The missions to the Jews of the various English and Scotch societies at Constantinople, Smyrna, Adrianople, and in Palestine, are specially noted in the article on the Jews.

The Bible work of the Empire is carried on by the American and British Foreign Bible Societies, and the National Bible Society of Scotland. The American Bible Society occupies the territory covered by the American mission societies, except Bulgaria, while the BFBS works in European Turkey, and in Constantinople and Smyrna are shared by the two societies. The National Bible Society of Scotland has a depot at Salonica in European Turkey. In Asiatic and European Turkey there are thirty-one mission stations. Nine of these are American, nineteen are British and two are German.

If we turn now to the population, we find that the work for the Armenians is carried on chiefly by the ABCFM; for the Greeks by the ABCFM and the Bible Societies; for the Syrians by the Presbyterian Church (North) and the various English and Scotch societies and committees; while the Nusairiyeh are the chosen field of the sturdy Scotch Covenanters. The Turks, Arabs, Kurds, Yezidis, etc., have been the concern of all the societies, the CMS is the only one that has made a special effort to establish mission work distinctively for Muslims.

Not merely is the territory thus provided for as a whole, but it is well covered in its different parts. True to the best policy, the missionaries have from the beginning sought the centers. Not always the largest cities on the basis of a census, but those which for one reason or another furnish most opportunities for reaching the widest circle of people.

There are of course sections where there is comparatively little accomplished, but those are few. In the main, the Turkish Empire is well covered, and it may be truly said that there is scarcely a village, except in the mountains of Kurdistan and some parts of Mesopotamia and Syria bordering on Arabia, that does not have at least occasionally the opportunity to hear the Gospel, while in some cities, notably Aintar, Marash, Harpo, the evangelical element is so strong as to be a very important factor in the general life of the people. In their work in the Turkish Empire thus has passed the exploring, introductory stage and reached that of development. It is no longer experimental; it has settled down to the same problems that meet the Church in other lands, affected yet by the fact that it is still rejected totally by the immense majority of the people, and looked upon with varying degrees of distrust by the greater part of the remainder.

We will look now at the relations that mission work in Turkey holds to the different classes of people whom it seeks to influence.

I. The Jews: When the first missionaries entered the Levant in 1819, their special message was to the Jews. Not many years passed, however, before the branches of the missions were given up by them as manifesting less opportunity for success than others. At present it is chiefly educational. Large schools are supported by the Scotch and English societies, especially in Constantinople, Smyrna, Salonica, and Jerusalem. There are also many preaching services, and there is enough of success manifested in the Christian life of converts to keep the laborers from being discouraged in their work or giving up the hope of a redeemed Israel, apart from their faith in the promises of the Scriptures. Mission work among the Jews is, however, so distinctively sectional, and confined to them as a race, that it enters as a comparatively unimportant factor into the question of the conversion of the Empire as a whole.

II. The Oriental Churches: When missionaries first turned their attention to the Christian churches of Turkey, their one idea was to secure reform within the churches themselves. So close to the creeds and confessions of the Reformation were those of the Armenians, Greeks, Nestorians, that it seemed politically easier to try to establish the unity of Christendom by the irresponsibility of those confessions and the actual practices of the church. Thus every effort was made to come into cordial relations with the people, and all idea of a separate communion was specially disclaimed. This course was favored also by the eagerness with which these churches looked for foreign sympathy and aid in their bitter struggles with their Muslim rulers.

It was not long, however, before the ecclesiastics saw that the new ideas would inevitably result in loosening and ultimately destroying their control over their followers. Then they massed their power against the new doctrines. An excommunicated man had no rights that a Turkish court could recognize. He was nobody; could neither marry nor be buried; could not buy, sell, or employ. He had absolutely no status as a citizen. The result was that the formation of a Protestant civil community became absolutely essential to the very life of Protestants. Then other influences began to come in. The introduction of Europeans into the commercial and governmental affairs of the Empire brought with it the introduction of French and German thought. With increased ease of access to Europe more and more the Armenian and Greek youth sought education in Paris and Vienna. Returning, they brought with them the free-thinking of the day, and the grip of the Church, not only on their belief but their life, began very perceptibly to loosen, and the ecclesiastics began to think that perhaps they had not been absolutely wise in their repulsion of evangelizing foreigners. It was evident that these Protestants were no less national in their feeling than the orthodox: indeed, had an even clearer conception of what a true national life was. Here was clear proof that the study of the Bible did not make a man or woman less capable of good work for his people. The result has been that in very many sections of the Empire there is a constantly growing cordiality between the evangelical and the orthodox communities. Bishops and priests
are preaching Gospel sermons; in some cases Sunday-schools and Bible classes are started, in order to satisfy the growing desire for religious instruction. With infidelity staring them in the face, the leaders of the old churches are content and may be won upon the missions and the native evangelical churches as allies rather than enemies.

The problem of missions in Turkey, in their relations to the old churches, is, on the one hand, so to establish the evangelical churches in public life that wherever union with the others comes they shall not be borne away and swallowed up; on the other, to convince the old churches that their one aim is to establish the kingdom of God, not a temporal organization, and at the same time to set forth in the evangelical churches as clear and accurate an idea as possible of what constitutes a true church life.

III. Mohammedanism: The general relations of evangelical missions to Mohammedanism are fully set forth in the article on that subject. It is needful here to note only such points as are specially brought out in the Turkish Empire.

The first feeling of the Muslims of Turkey toward the new sect was one of amused and rather tolerant indifference. Indeed, in not a few instances Turks who saw the simplicity of the evangelical worship, the absence of ritual, of pictures and priestly rule, the stress laid upon spiritual worship, said: "Why, these are Muslims." The use of the Bible in distinction from the creeds of the Church caused favorably in their eyes with the position they accorded to the Koran, and a Kurbish chief once said: "Why do not the Bible Societies print and bind the two books together? then we should have the complete revelation." For a while this cordial feeling for Protestants as distinct from the Eastern Church rather increased, except when the influence of ecclesiastics secured special hardships for those who had dared to brave the power of the Church. The missionaries had great influence, because the Turkish officials recognized, in many cases, their freedom from political motives by little, however, this changed. Shrewd Mollahs saw, as Armenian and Greek bishops had already seen, that these new people were exerting an influence for stimulating mental processes among the people, and that an intellectual awakening must in time cut the ground entirely from under their whole system of belief and government. Then commenced a most determined and bitter opposition. Not in appearance,—that was in most cases friendly, but in the form of hindrance. Censorship of publications was made increasingly stringent. The necessary permits for buildings, churches, schools, and even private dwellings were refused or delayed as long as possible. Any Turks who manifested a leaning toward or an interest in the Bible were quietly arrested on some fictitious grounds, and sometimes even more severely. Occasionally some Mohammedan more bold than his fellows, or feeling more secure in his position and relations with Porte or Palace, would give expression to his feeling that the work of the missionaries was really a good thing for the Empire, but means were generally found to neutralize the effect of such a statement. In not a few instances laws were promulgated especially directed against the missionaries. Vexations upon vexations were put upon them.

The result has been that there have been very few conversions of Muslims to Protestant Christianity. There have come, however, from every side constantly increasing testimonies to the hold that Christianity is getting upon the people of the land. The number of Scriptures sold to Muslims indicates a profound interest in the Bible, which cannot fail to bring forth fruit in Christian life.

Islam in its historic inception was in a great degree a protest against a devilized polytheism, and the Christianity by which it is supplanting that polytheism, in the form of hindrance. Censorship of publications was made increasingly stringent. The problem of missions in Turkey in their relation to Mohammedanism is that of developing a native church freed from the political quality of the old churches, strong in its belief in the unity of God, manifesting in its daily life an educated Christian faith.

In meeting this problem, missions in Turkey rely upon five special agencies: (1) Evangelical preaching; (2) Bible distribution; (3) Education; (4) Publication; (5) Social influence.

1. The Evangelical preaching of Turkey is very largely, in most cases almost entirely, in the hands of the native pastorate. The pastors, educated in the different seminaries and colleges, are taking a position of steadily increasing importance. Men of large views, earnest Christian spirit, they have done much, not only to build up the native evangelical churches, but to convince others that Protestant Christianity is a genuine power in the world for good. Not only in the larger cities but in the smaller places they are doing a great tho often unheralded work, laying foundations in Christian character for future building.

2. Bible Distribution: There is probably no mission field where this department of mission work is more thoroughly organized so as to reach periodically every portion of it than the Turkish Empire. This has been already spoken of in the articles on the American and the British and Foreign Bible Societies.

3. Education in connection with the missionary work has done a great thankless work. Free primary schools were first started. Schools, called theological, to educate native ministers and teachers soon followed, and were free to the class for which they were designed. Girls' boarding-schools were also established early, the first in 1840.

In 1863 Robert College was opened on the Bosphorus, and, almost simultaneously, the Syrian Protestant College at Beirut. These institutions mark the beginning of serious educational work in Turkey on the basis of requiring pupils to pay reasonably for their instruction, and on a plan of thorough training with an ample and well-prepared curriculum.

They had much to contend against in the as yet feebly developed desire among even the people of the seaboard for a college education. They had also to meet the opposition of many Christian men—missionaries and supporters of missions—who, in their zeal for the largest development of the evangelistic work, were jealous of an elaborate course of collegiate training.

The first years of these colleges were marked by a slow growth. Classes of five, three, two, in one case of only one, were graduated.

In the course of a decade of years the increase was abnormal. There was a plethora of raw
material which had to be in part eliminated that what remained might be assimilated.

The institution at Scutari, Constantinople, now known as the American College for Girls, was started at this time, and struggled, in its inception, through difficulties and limitations similar to those from which the college on the Bosporus had emerged.

Between 1871 and 1875 two colleges in the interior of the country were opened, viz., the Central Turkey College, at Aintab, south of the Taurus Mountains, and the Armenians—now Euphrates—College, at Harput, east of the Euphrates River. These colleges show points of resemblance and of unlikeness to each other and to Robert College. Their course of study is not quite so full as that of the colleges on the seaboard. German and Italian are not needed in the interior, and much better work is done at Robert College in the physical sciences and in chemistry than is yet possible in an interior college. But the colleges of the interior have the advantage of being in closer touch with the races to be reached and molded by them.

This growth of education, especially within the last seven or eight years, has developed the following noteworthy results:

a. The youth of Turkey can pay for their education, where terms are made light, according to location of the college, and such proportion of aid is given, through scholarships and by furnishing work, as is done in the colleges of this country.

b. This securing of the privilege of Christian education through strenuous exertion on the part of pupils and their friends is one of the most essential conditions of realizing that growth in manly, self-reliant, aspiring character and that establishment of a vital, self-propagating Christianity, without which education is nowhere a blessing. The plan of education now adopted has already yielded excellent results in this way. The more mature, or races of mission, are held down by the incubus of poverty, the more urgent is the necessity of rousing the will-power to self-help, by every right device and pressure.

c. It is the stand taken and the work done by these colleges in the recent wars in the matter of education which has won the confidence of the best men of all races in Turkey.

d. It is this influence alone which can fit the several races for their future, and hold in harmonious relation one to another all those whose vital interests are identical.

e. These American colleges furnish in large part the models in education for all the Christian communities in Turkey, and train large numbers of the teachers. It was after Americans gave the signal that Armenians, Greeks, and Bulgarians established for themselves any schools worthy of the name. The Turks have ideal capacity for establishing excellent schools on paper, and ideal incapacity for establishing them in any other way. They also are already reaping the rich harvest this American leadership.

f. All discussion among missionaries and their supporters relative to the utility of education and to the comparative value of educational and evangelistic work has ceased.

4. Publication: There are two centers of missionary publication in the Turkish Empire: Constantinople and Beirut. The work at Beirut is entirely Arabic; that at Constantinople includes Turkish, Armenian, Greek, Bulgarian, Judaeo-Spanish, Kurdish, etc. In each place some of the best of missionary strength puts into the work of providing not only the Bible and religious books, but periodical literature, educational works, and such general literature as a growing Christian community is constantly demanding, and in ever-increasing quantity.

Aside from the work of Bible translation in these different languages, the work done in Turkey is telling all over the Empire in the correction of erroneous views, not by antagonizing their errors, but by presenting the truth.

5. Social Influence: This is an ever-increasing power in Turkey. The steady access gained to all classes of people, the power of personal presence and actual acquaintance, has done and is doing a great deal toward preparing the way for the entrance of the Gospel. Many old-time prejudices against those that “having turned the world upside down, are come hither also,” have quietly but absolutely disappeared before the presence in an Armenian, Greek, Maronite, and Turkish home of a simply dressed, unassuming Christian lady. Many an ecclesiastics has found it impossible to harangue against one whom he knew from personal acquaintance to be a Christian gentleman.

In the Turkish Empire the gates are open. It is only necessary to hold the vantage-ground gained and to make steady advance, in order to solve the def test problem of the Eastern Question, by building up the kingdom of God in the lands where it was first established.

As we dwell upon past achievement and present encouragement, we feel that the future of Christian missions in Turkey is hopeful. The words of Dr. Jessup point to the light in the cloud: “Protestant missions have given the entire population the Bible in their tongue; have trained hundreds of thousands of readers; published thousands of useful books; awakened a spirit of inquiry; set in motion educational institutions in the heart of the Empire, compelling the enemies of education to become its friends, and the most conservative of Orientals to devote mosque and convent property to the founding of schools of learning. Protestantism has made ignorance unfashionable and persecution disgraceful. It has broken the fetters of womanhood, created directly and indirectly the system of female education spreading over the Empire and let light into unnumbered homes where women before had been consigned to ignorance and inferiority. Every evangelical church is a provocation and stimulus to the old sects, a living epistle to the Mohammedans with regard to the true nature of original apostolic Christianity. The Protestant translation of the Bible into Arabic by Drs. Eli Smith and Cornelius Van Dyck forced the Jesuit Father Von Ham to make another translation based on the Vulgate. Encouraged by the spirit of reform and modern progress, even the Mohammedan doctors of Constantinople have issued orders that all editions of old Mohammedan authors which recount the fabulous stories of Muslim saints and Welys are to be expurgated or suppressed and not to be reprinted."
The number of foreign missionary workers in the Ottoman Empire is 637. Proportion of these missionaries to the population is 1.37,416.8.

The statistical summary for 1903 is as follows: Ordained men, 128; unmarried men, 25; married men, 128; other missionary women, 278; native workers, both sexes, 1,805; stations where missionaries reside, 122; outstations or substations, 326; communicants, 15,367; adherents not communicants, 51,244; deaths, 767; pupils in institutions, 51; students in same, 3,251; foreign male physicians, 35; foreign women physicians, 3; hospitals or dispensaries, 63; patients reported during year, 189,737.

S.), The Encyclopedia of Missions, London, 1900.

TURKISH LANGUAGE: This is an important member of the Ural-Altaic family of languages. It is thoroughly typical of the family (1) in tolerating no change or obscuration of the root through inflection; (2) in adding syllables to the root for purposes of inflection, and (3) in giving the leading vowel of the root domination over the vowels and even consonants of such added syllables so as to secure euphony in the whole combination.

In etymology the Turkish is remarkable for the regularity of its declensions and conjugations, and for the abundance of the forms of the verb, especially in the Osmanli Turkish. There is, properly speaking, but one conjugation of verbs. The verb is conjugated in great fullness of moods and persons with abundant particles, and verbal nouns. Moreover, by the incorporation of certain particles the simple verb may give rise to new verbs signifying a reflexive and a reciprocal quality of action. Another particle gives causative significance to the original or the derived verbs. And, finally, by use of the appropriate particle with each of the verbs of the three series, each one is made to produce a new verb with a negative and one with an impossible signification. Each verb may be conjugated in all the moods and tenses and in the active and passive voices exactly on the model of the simple verb, producing some 20,000 tense, number, and person forms from each simple verb. The variety and compactness of expression thus secured is extraordinary.

The language in which they are limited as subjects and having a regular place in the building of the word. The Turkish language lacks the relative pronoun and the article. It has neither gender nor declension of adjectives, and is defective in the comparison of adjectives.

In syntax the characteristic of Turkish is that while the subject occurs at or near the commencement of a paragraph, the sense is held in suspense while qualifying phrases and participles of the most diverse description are brought to the verb of the predicate, which stands at the very end of the paragraph, serving as the key to the whole enigma.

The Eastern Turks of Turkestan and Mongolia once had an alphabet derived, perhaps, from the Syriac taught by early Nestorian missionaries. At present, however, Arabic letters are used for writing Turkish, a dot or two being added to five of them in order to express consonant sounds not found in Arabic. This alphabet, being without vowels, is quite unsuited to writing Turkish. Various attempts have been made without success to introduce Western alphabets. The Bashkir Turks of the Volga have adopted the Russian alphabet to some extent. Christians living in Turkey who have adopted the Turkish language use the alphabets of their ancestors in writing. Hence we meet with Greco-Turkish and Armeno-Turkish, which are merely Turkish written with Greek or with Armenian letters.

The Turkish vocabulary is of limited extent, suggesting the limited range of ideas of pastoral peoples. All the dialects borrow freely from the Persian and Arabic languages. In the Osmanli Turkish, used in the Turkish Empire, this appropriation of Persian and Arabic words has been carried to a greater extent, and in the literary usage has been carried to a greater extent, and in the literary usage has been carried to the extent. Christians living in Turkey who have adopted the Turkish language use the alphabets of their ancestors in writing. Hence we meet with Greco-Turkish and Armeno-Turkish, which are merely Turkish written with Greek or with Armenian letters.

The domain of the Turkish language is remarkable for its extensiveness, and its expression in varying universality of use in a wide belt extending from Chinese Mongolia westward to the Adriatic Sea. Its dialects are numerous, but on the whole may be classed as Eastern and Western, the dividing line being the Caspian Sea. The Eastern Turkish shows the language in its earlier stages of development, still preserving in Chinese Turkestan the words added to roots in lieu of declension of nouns, which have become in the Western Turkish mere case endings. The Ugur of Kashgar and the Uzbek or Yagata of Bokhara and Khiva are dialects closely related to the Osmanli or Ottoman Turkish, but not easily intelligible to the Ottomans because of grammatical differences and a curious substitution of related consonants, as "p" and "b" in the western for "p" and "b" in the Turkic, etc. The Azer-baijan Turkish, found in Persia on the south of the Caspian Sea, and the Nogai Turkish and the Crimea (Crimean) Tartar dialect spoken in Russia between the northern end of the Caspian and the Black Sea, are so closely allied to the Osmanli or western language that Turkish newspapers published in the Crimea have subscribers in Constantinople. The Kumyk dialect, spoken in Daghestan, and the Kazan Turkish, spoken in the plains of the Volga, belong rather to the eastern type. At
Kazan, by the way, is the present center of literary activity in the Eastern Turkish. As we proceed northward we find in the Ural mountain regions the Bashkir Turkish and the Chuvash, which are strongly tinged with Finnish words. In the extreme northeast of Siberia, along the Lena River, the Yakut Turkish is strongly Mongolian in its affinities. The same is true of the Kryghiz dialects used by the nomads of the steppes.

TURNER, Rev. George: Born January 22, 1818. Died May 19, 1891. A prominent missionary of the LMS. His heroic labors in the South Seas, amid the daily peril of life among the people who had recently been the murderers of John Williams, form a thrilling chapter in the annals of missions. In 1882 he left Samoa. The establishment of the Mala Institution for training native evangelists was mainly due to his influential labor; and from this institution have gone forth many well-equipped preachers of the Gospel of Christ. Dr Turner was not only a devoted missionary of the Cross, but from his pen the people of the South Sea Islands received a large supply of Christian literature. After his retirement his literary labors for the benefit of Samoa continued until his last brief illness, when he left a manuscript on the claims of this people, which was printed by the LMS.

TURTON, William: A native of Barbados, who, after serving for a time as a minister in the colonies on the American continent, returned to the West Indies in 1785, and devoted his life to working for the negro slaves, first at St. Bartholomew and afterward at New Providence in the Bahamas. He encountered bitter opposition from planters and from clergy of the Established Church because he was a Methodist. Having collected a congregation in St. Bartholomew he induced the WMS to place it on their list of stations. He then, in 1801, began a similar work in New Providence, and, notwithstanding the influence of those who sought to impede his labors, met with great success until, worn out with exposure andprivation, he was obliged to call on the WMS to send men to his aid. Thus this humble worker was the founder of two of the stations of that society in the West Indies.

TU-SHAN-CHAU: A town of Kwai-chau, China, situated in the extreme S. E. of the province near the borders of Kwang-pei. Station of the CIM (1893), with (1903) 1 missionary and his wife, 1 place of worship, 1 woman missionary, and 10 professed Christians. Name also written Tuh-shan.

TUTUCORIN: Town on the coast of Madras, India, 35 miles E. by N. of Tinnevelly. The appearance of the place and its neighborhood is very unattractive, since in parts the soil is so shallow that no plants or trees will grow, and elsewhere there is nothing but heavy sand, with palmyra palms and a few bushes. During the southwest monsoon the dust is intolerable. In value of its foreign trade Tuticorin is second in Madras and sixth in all India. Its harbor, tho shallow, is secure. Population, 25,100, of whom 15,000 are Hindus. Station of the SPG (1878), with (1903) 22 native workers, 6 places of worship, 6 day schools, 2 boarding schools, and 1,500 professed Christians, of whom 594 are communicants.

TUTULA: An island of the Samoan group belonging to the United States. Station of the LMS (1836), with (1903) 1 missionary and his wife, 2 women missionaries, 38 native workers, 2 boarding schools, 42 Sunday schools, 24 day schools, 1 dispensary, and 3,841 professed Christians, of whom 1,525 are communicants.

TUTURA: A village in Cape Colony, South Africa, situated in the Transkei region S. of Butterworth. Station of the UFS (1885), with (1903) 1 missionary and his wife, 29 native workers, 12 outstations, 5 places of worship, 10 Sunday schools, 1 day school, and 500 professed Christians.

TYLER, Josiah: Born July 9, 1823. Died in 1896. Entered Amherst College in 1841, where he graduated in 1845. While he was taking his theological course at East Windsor Seminary he decided to enter the foreign field. He was ordained in 1849, and soon afterward, with his wife, he sailed from Boston for Cape Town. He was associated with Messrs. Wilder, Lindley, Aldin Groat and Lewis Groat in the Zulu Mission. Dr Tyler labored forty years in Natal, and his "Forty Years Among the Zulus" is a standard and most interesting record of missionary life and labor. He founded the Esidunbini station, the fiftieth anniversary of which was celebrated in 1901.

TYRE, or ES SUR: A town in Syria, situated on the coast of the Mediterranean Sea, 20 miles N. by E. of Acre. Station of the British Syrian Mission Schools (1869), with (1903) 2 women missionaries, 9 native workers, 4 outstations, 1 place of worship, 4 day schools, 1 dispensary.

UDAIPUR: A town and capital of the state of the same name in Rajputana, India, situated about 140 miles S. of Ajmere. Population, 38,148. Station of the UFS (1877), with (1903) 2 missionaries, one of them with his wife; 38 native workers, 1 outstation, 4 day schools, 1 dispensary, 1 hospital, 1 orphanage, and 124 professed Christians.

UDAPI. See Umpi.

UDAYAGIRI: A town in Madras, India, situated in the district of Nellore, about 50
miles W. of Kavalli. Station of the ABMU (1885), with (1903) 1 missionary and his wife, 19 native workers, 11 outstations, 1 place of worship, 2 Sunday schools, 1 day school, 1 boarding school, 1 dispensary, and 334 professed Christians, of whom 325 are communicants.

UDIPI: A town in South Kanara, India, situated near the W. coast, about 35 miles N. of Mangalore. Station of the Basel Missionary Society (1854), with (1903) 6 missionaries, four of them with their wives; 44 native workers, 10 outstations, 10 day schools, and 1,857 professed Christians, of whom 1,040 are communicants. Some write the name Udapi.

UDUPITITY: A settlement in the Jaffna district of Ceylon, about 12 miles N. of Chavak cheri. Station of the ABCF (1847), with (1903) 1 missionary and his wife, 43 native workers, 2 outstations, 18 day schools, 1 boarding school, and 165 professed Christians.

UEN-CHAU. See YUEN-CHAU-FU.

UE-WU. See YU-WU-HAEN.

UGANDA: A British protectorate in Central Africa, lying at the northern end of Lake Victoria Nyanza. It is bounded on the south by German East Africa and by the 1st degree of S. latitude (on the lake); on the east by a line drawn through the middle of Lake Rudolf and by the British East African Protectorate; on the west by the Congo Free State, and on the north by the 6th degree of N. latitude, at the frontier of the Egyptian Sudan. It has an area of about 80,000 square miles, and a population of about 4,000,000 natives, one-fourth of whom belong to the Bantu race, who call themselves Baganda. There are about 300 Europeans in the protectorate. For administrative purposes it is divided into five provinces, of which the kingdom of Uganda forms the southmost. This kingdom is recognized by the British as a native kingdom under a ruler called a Kabaka, and entitled to be addressed as "Highness." The present Kabaka is a grandson of Mtesa, and is a baptized Christian named Daudi Chua. Since he is a minor, a regency rules the land. In all five of the provinces the British encourage the native chiefs to govern their own subjects. Mengo is the capital of the kingdom of Uganda, and Entebbe, about 20 miles from Mengo, is the seat of the British administration. Uganda is connected by railway with Mombasa. Steamers on the Nile ascend from Khartum to Gondokoro, in the northern part of the protectorate, and the Uganda post office has been admitted to the universal Postal Union. The soil is very fertile, for the most part, and the climate agreeable. The altitude of the Lake Victoria Nyanza is 3,800 feet.

The history of Uganda illustrates in some degree the service rendered by missions in pioneer civilization. The country was first visited by Henry M. Stanley, who, in 1875, sent word to England that King Mtesa of Uganda post office has been admitted to the universal Postal Union. The soil is very fertile,

The Uganda Protectorate, with its 400,000 natives, one-fourth of whom belong to the Bantu race, who call themselves Baganda. There are about 300 Europeans in the protectorate. For administrative purposes it is divided into five provinces, of which the kingdom of Uganda forms the southmost. This kingdom is recognized by the British as a native kingdom under a ruler called a Kabaka, and entitled to be addressed as "Highness." The present Kabaka is a grandson of Mtesa, and is a baptized Christian named Daudi Chua. Since he is a minor, a regency rules the land. In all five of the provinces the British encourage the native chiefs to govern their own subjects. Mengo is the capital of the kingdom of Uganda, and Entebbe, about 20 miles from Mengo, is the seat of the British administration. Uganda is connected by railway with Mombasa. Steamers on the Nile ascend from Khartum to Gondokoro, in the northern part of the protectorate, and the Uganda post office has been admitted to the universal Postal Union. The soil is very fertile, for the most part, and the climate agreeable. The altitude of the Lake Victoria Nyanza is 3,800 feet.

The history of Uganda illustrates in some degree the service rendered by missions in pioneer civilization. The country was first visited by Henry M. Stanley, who, in 1875, sent word to England that King Mtesa of Uganda was anxious to have missionaries sent there. The CMS at once sent a party of missionaries, who landed in East Africa in 1876. The leader and one other member of the party were killed almost at once, but the mission was established in Uganda in July of 1877. There was no question that their arrival decided the destiny of the land. In 1879 a party of Roman Catholic missionaries arrived, and the Arab traders and slave-dealers endeavored to thwart both parties by inducing the king to become a Mohammedan. The situation was one suited to rivalries and intrigues, and these did not fail to appear. In 1884 King Mtesa died, and his successor, Mwanga, was soon taught suspicion of the CMS missionaries. He caused Bishop Hannington to be murdered in 1885, and persecuted the Protestant native Christians with great cruelty. The Mohammedans saw an opportunity in these proceedings, and in 1888 they drove Mwanga and the Roman Catholic, as well as the Protestant, missionaries out of the country. The Christians, however, stood firm, and one year later drove off the Mohammedans, and brought Mwanga back by armed force. The missionaries returned with Mwanga, and the power of the Christian party increased, and its peaceful development made steady progress. The British East Africa Trading Company now appeared on the scene, where mission influence had so far been the sole civilizing force. A sort of supervision of the government was established by the trading company in 1890, but failed to prevent intrigues and strife among the three religious denominations, and a condition of anarchy threatened, owing to the time-serving vacillations of the King Mwanga. A British protectorate was declared in 1897 King Mwanga was deposed from his capital with the intention of freeing himself from British control. He was at once declared deposed, and the infant Chua was proclaimed king. In the same year the Sudanese Mohammedan troops in British employ mutinied, and for a time the whole foreign colony was in the greatest danger. After some sharp fighting, in which the Christian Ugandans rendered efficient aid, the mutiny was quelled. The British Government now maintains an armed force in Uganda of Indian troops and native levies under British officers.

During the whole of this period the CMS mission has been making steady growth. It now (1903) has, in Uganda, 24 stations, 76 missionaries, men and women; 2,221 native workers of all grades and of both sexes; 2,221 native workers of all grades and of both sexes; 3,800 feet. The altitude of the Lake Victoria Nyanza is 3,800 feet.

UGANDAN LANGUAGE: Belongs to the Bantu family, and is spoken by the people of Uganda, Central Africa. It has been reduced to writing by missionaries of the CMS, and is written with Roman letters. The beginnings of a literature have already been created. Some writers speak of this language as the "Ganda" or the "Lu-ganda." Since Uganda has become the accepted name of the protectorate, there appears to be no reason for confusing English readers by forcing them to form the name of the language that
country by Bantu, instead of by English, grammatical rules.

**UIN-HO.** See YUN-HO-HIEN.

**UJJAIN:** A town in Central India, situated about 35 miles N. by W. of Indore. A very holy city to the Hindus, who reckon longitude from here. Population, 32,932. Station of the POC (1803), with (1903) 1 missionary and his wife, 2 women missionaries, 7 native workers, 1 place of worship, 5 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 27 professed Christians. Some write the name Ukhurl.

**UKRUL:** A town in Assam, India, situated in the state of Manipur, in a salubrious position about the lower Naga hills about 40 miles S.E. of Kohima. Station of the ABMU (1896), with (1903) 1 missionary and his wife, 1 native worker, 1 day school, 1 place of worship, and 16 professed Christians. Some write the name Ukhrul.

**ULU:** A settlement on Duke of York's Island, in the Bismarck Archipelago. Station of the Australian Wesleyan Methodist Missions, with (1901) 1 missionary, 99 native workers, 7 outstations, 28 places of worship, 40 Sunday schools, 41 day schools, 1 theological class, and 822 professed Christians.

**ULUBARIA:** A town in Bengal, India, situated W. of Calcutta, and in its suburban region. Station of the Churches of God (1889), with (1901) 1 woman missionary, 5 native workers, 5 outstations, 1 day school, and 5 professed Christians.

**UMBALLA.** See Amballa.

**UMHLANGENI:** A settlement in Natal, South Africa, situated in the southern part of the colony, about 8 miles S. W. of S. shepstone. Station of the Hanover Lutheran Free Church (1900), with (1901) 2 missionaries, 1 place of worship, 1 day school, and 100 professed Christians.

**UMSINGA:** A settlement in Natal, South Africa, situated in the N. part of the colony, about 35 miles E. of Ladysmith. Station of the UFS, with 2 missionaries, 49 native workers, 22 outstations, 1 place of worship, 21 day schools, 1 dispensary, 1 hospital, and 642 professed Christians. Some use the name Gordon Memorial for the station.

**UMTALI:** A town in Rhodesia, Africa, situated along the railroad, about 130 miles N. W. of Beira and 170 miles S. E. of Salisbury. The present is the second new Umtali, the town having been twice removed by the Government. Station of the SPG (1891), with (1903) 1 native worker and 54 professed Christians. Also station of the ME, with 6 missionaries, four of them with their wives; 1 woman missionary, 2 native workers, 1 place of worship, 1 industrial school and farm, 1 dispensary, 1 hospital, and 126 professed Christians. Some use the name New Umtali.

**UMZINTO:** A village in Natal, South Africa, situated near the coast about 45 miles S. W. of Durban. Station of the South Africa General Mission (1899), with (1901) 1 missionary and his wife, 3 native workers, 2 outstations, 1 place of worship, 1 day school, 1 dispensary, and 40 professed Christians. Some use the name Dumisa for this station.

**UMZUNBI:** A settlement in Natal, South Africa, situated about 70 miles S. W. of Durban, on the Umzumbi River. Station of the ABCFM (1891), with (1901) 2 women missionaries, 1 mission house, 17 native workers, 1 place of worship, 6 day schools, and 1 boarding school. Some write the name Umzumbe.

**UNALAKLIK:** A settlement in Alaska, situated on the W. coast of Norton Sound, about 170 miles S. E. of Cape Nome. Station of the Swedish Evangelical Mission Covenant (1890) with (1901) 2 missionaries and their wives, 1 woman missionary, 3 native workers, 1 place of worship, 1 day school, and 87 professed Christians.

**UNDUP:** A settlement in Sarawak, Borneo, situated on the Batang Lupar River, about 40 miles from its mouth. Station of the SPG (1863) with (1903) 1 missionary, 5 native workers, 8 places of worship, 1 boarding school, and 164 professed Christians, of whom 481 are communicants.

**UNG KUNG.** See Yang-Kang.

**UNITED BRETHREN IN CHRIST; Home, Frontier, and Foreign Missionary Society of the:** The first missionary work undertaken by the United Brethren in Christ was in the home field, but in 1853 a society was organized for the prosecution of home, frontier, and foreign work. Its first foreign mission field was Shench, on the west coast of Africa, in the colony of Sierra Leone, where work was begun in 1855. Later a temporary mission was commenced in China, and in 1895, after the disastrous revolt in Sierra Leone, work was begun in Japan, which has developed into a most successful mission. In 1900 the Society established a station in Porto Rico.

The Mission in Africa from the first had many trying experiences, as did also the Mendi Mission of the American Missionary Association, also in Sierra Leone. The trying climate, the unsettled political conditions combined to hinder the work, but notwithstanding everything, it prospered. In 1883 the American Missionary Association withdrew from its foreign work and transferred the Mendi Mission to the United Brethren. A revolt on the hut tax question, by the interior tribes, brought heavy loss, and for a time there was question as to the Society's continuing its African work. It decided to do so, and as a result (1903) 4 missionaries and 16 native workers report 8 organized churches, with 321 communicants and 9 stations, each one of which has a circuit subjoined. There are 8 day schools, with 464 scholars, and every department shows decided gain.

In Japan there are 6 missionaries, 11 native workers in Tokio and Kioto, 1 organized church, 130 communicants. A considerable amount of evangelistic work has been carried on in the district about Kioto, special emphasis being laid upon temperance, in connection with representatives of the World's Woman's Temperance Union.

In Porto Rico a commodious church building has been dedicated, and the four missionaries speak very hopefully of the outlook. The Woman's Missionary Association of the United Brethren in Christ has its headquarters at Dayton, Ohio, and is a most efficient organization. The Young People's Union is also a strong auxiliary.
FOREIGN MISSIONS:

The Wesleyan Association, at the time of the union, several missions in New Zealand, East and West Africa and China. Association with certain churches of the Wesleyan Association had before the union. Its constitution was adopted in May, 1859. It was formally organized in Philadelphia, June 15 of that year, and was incorporated by the Legislature of the State of Pennsylvania April 12, 1866, under the title of "The Board of Foreign Missions of the United Presbyterian Church of North America."

For a number of years this Board had under its care missions in Trinidad, Syria, China, Egypt, Abyssinia, and India. Its length of time, and the great success of its work, as represented by Dr. Krapf, and so intermingled with the more rapid progress of other fields—Egypt and India. The work of these two men was of a short duration, but their places in the mission field are not long vacant, and many noble men have been found willing to risk the climate, so unfavorable to Europeans, and have carried on the work with much success. The report (1902) shows 2,414 native workers, and 2,197 church members. There is a theological seminary at Jhelum and a college at Rawal Pindi; also 4 boarding schools, 2 industrial and 134 day schools, with a total of 8,752 church members, 13,810 adherents. There is a sanitarium at Zeriana and other departments are fully equipped.

Egypt: The mission was begun by the arrival in Cairo of the Rev. Thomas McCague and his wife, on November 15, 1854, and in December of the same year they were joined by Rev. James Barnet, who had been laboring in Damascus for several years in connection with the same Church. It was a favorable time for establishing a mission in Egypt, as Said Pasha was well disposed toward European civilization, and seemed not the least afflicted with that jealousy and hatred of Europeans so common among Mohammedan officials. For some years little was accomplished in mission work, except the opening of a school for girls and another for boys, and the conducting of regular divine services on the Sabbath, which, however, very few attended. In 1866 Rev. Julian Lansing and Miss Sarah B. Dales were removed to Damascus from Egypt. Later, the work carried on at Alexandria, under the United Presbyterian Church of Scotland, and Miss Pringle's girls' school, supported by the Ladies' Society of Paisley, Scotland, both passed over to the American United Presbyterian Mission, together with two missionaries, Dr. Philip and Mr. John Hogg. Up to the year 1860 the missionary operations of the United Presbyterian Mission were, for the most part, confined...
to Cairo and Alexandria. A few evangelistic trips for the sale of Scriptures and other religious books, and for preaching the Gospel in an informal way, had been made before and south of the Upper Ganges, and unsuccessful attempts had been tried to open regular mission work at Benisouef, Luxor, and Assiout. At Assiout, Muslim hatred broke out against the mission’s native agent there, and thirteen Muslims were imprisoned a year for beating him and breaking his window. The Coptic hierarchy had begun to traduce and malign the missionaries and decry their labors; while excommunication was threatened against any Copts who were disposed to read Protestant books, and for preaching the Gospel in an informal way. Several trips for the sale of Scriptures and other religious books, as well as partial schools were taught in the Mission School at Assiout, for the little Protestant church, and all who had professed openly their belief in Protestant principles were made the subjects of the church’s anathemas. In 1860, and from that time onward for several years, other recruits from America joined the mission. The work began to prosper, the schools grew in the number of pupils and in efficiency; the attendance at divine service on Sabbath steadily increased, the property at the “mouth” of the Mooski, given by Said Pasha, was repaired and fitted up as mission premises, containing residences for the missionaries and missionaries, and commodious place for religious services. The central position of these premises, separated but not distant from the Coptic quarter, and in the very line of traffic and travel, helped to swell the number of visitors and inquirers; persons from all parts of the country visited the mission book-depot on the Mooski on week-days, and the mission chapel on the Sabbath. Additions by profession of faith were made every few months. A commencement was made in training young natives for mission service. Sabbath-school work was prosecuted with vigor and success, and the organization of the first native Protestant church was effected in Cairo in the year 1865.

Assiout was occupied in 1866; Koos, near Luxor, in 1865; Medinâl-Fayoom, and Mansura, in the Delta, in 1866; Eeneh and Erment, south of Luxor; Kosair, on the Red Sea, in 1876; Manfaloat in 1878; Minch and Tahta, in 1880; Benisouef, in 1882; Zagazig, in 1885; Assouan, at the First Cataract, in 1887. With the capture of Khartoum by the British, the mission sought to enter the Sudan. For a time they were much hindered by the refusal of the Government to allow any mission work in that region. Still Mr. and Mrs. Giffen were located at Omdurman, and found work in caring for their own people who had come for trade, and gradually the restrictions were removed, and in February, 1902, permission was given to occupy a station on the Sobat River, in the Fashoda district of Sudan. Special emphasis is laid upon school work, book distribution, evangelistic work, and parochial work. It has been the policy of the mission to leave to the natives themselves the primary education of their children, and in consequence a large number of parochial or free schools have been established, supported entirely by contributions, and taught by them. The mission restricts the operations of the line of education for the most part to the training of teachers, and to giving instruction in the higher branches. Most of the teachers in the parochial schools were taught in the Mission Training-school or College at Assiout. There are also academies and seminaries for boys and girls at Alexandria, Mansura, Cairo, and Assiout, where instruction and training are given sufficient to enable pupils to prepare for school-teaching, or for taking the government work. In these, as in all the mission schools, an hour every day is devoted to religious instruction, in addition to the opening exercises in the morning. The Training-school or College at Assiout has a good corps of American and native professors, and the theological students are taught in Cairo. The mission has given a good deal of attention to the distribution of religious literature, educational, practical, and controversial, and to this end has opened depots for the sale of books in a number of places, and employs a large number of colporteurs, making special arrangements with the British and American Bible Societies.

The general type of the Mission’s educational work has won from Lord Cromer, the British resident, the heartiest commendation, and was probably the basis of the permission to establish stations in the Sudan.

The report for 1902 shows 74 missionaries, 495 native workers, 52 organized congregations, 171 other preaching places, 6,800 church members, 25,000 adherents, 170 schools, 12,942 scholars, 3 hospitals and dispensaries.

The Women’s General Missionary Society of the United Presbyterian Church of North America is auxiliary to the General Board of the church. It was organized in 1883 and has done notable work in Zemara, educational, and medical missions. It is represented in India by 30 missionaries and in Egypt by 19.

UNITED PROVINCES: One of the great divisions or provinces of the Anglo-Indian Empire. Its ruler is a lieutenant-governor, who is appointed by the viceroy and governor-general of India, to whom he is directly subordinate. The former kingdom of Oudh is included in the United Provinces. The territory extends from north latitude 23° 52’ to 31° 7’, and from east longitude 77° 5’ to 84° 41’. It reaches from Bengal on the southeast to the Jumna River on the northwest. On the northeast the independent kingdom of Nepal forms part of the boundary, while farther west the area extends clear up into the Himalayas themselves, and impinges at last on Tibet. Near the southern edge runs the great Ganges, the homes of the millions of India, which lies south of that river. Thus a vast extent of the upper Ganges valley is included in these provinces, and the great tributaries of that river flow through them. The area of the present province is 107,164 square miles. The population is (1901), 47,691,782. The country is largely flat, sloping gradually toward the southeast. In the extreme northwest, however, it becomes mountainous as it approaches the Himalayan region, and several mighty peaks of that great range lie within the limits of these provinces, the highest being Nandi Devi (25,661 feet). In the United Provinces are located several sanitary and favorite places of European resort and residence. In this same region also, at the locality known as Haridwar, far among Himalayan defiles, the Ganges takes its rise. This is a famous spot of Hindu pilgrimage, as being the source of their most sacred river. On the mountain slopes hereabouts tea is grown in large quantities; this industry is mainly in the hands of Europeans and supported by European capital. The Jumna River has its rise, like the Ganges, in the Himalayas; and, after describing a southerly, take a southeasterly course, nearly
The district enclosed between these two rivers (known as the "Doab," or "Two Waters") is a granary of the Northwest. The rainfall of the whole territory is only twenty-five inches a year, and confined within three or four months. This fact renders artificial irrigation necessary to ensure the fertility of the soil. The government has supplemented the smaller labors of the native husbandmen in this direction by establishing large canal systems fed by the great rivers of the province, and often large enough to be of use for navigation as well as for irrigation. Besides wheat and the other cereals usual to Indian agriculture, large quantities of opium are grown near Benares, and in other parts of the provinces, and in Oudh. Two hundred and fifty thousand acres, or six per cent. of all the land under cultivation, was reported a few years since as devoted to opium. It is a government monopoly here, as elsewhere in India.

The population is largely Hindu. Historically, these provinces present many points of great interest. Of the very earliest inhabitants few remnants now are left; the aboriginal tribes (Kols and others of this and adjacent regions) are almost certainly their representatives. The Aryan invasion, pouring in from the northwest through the Punjab, dispossessed the former dwellers on the soil, founded great cities, of which the ruins of some remain (such as Hastinapur and Kanauj), and established kingdoms and dynasties, whose wars and achievements form the basis of fact for the great Hindu poem of the Mahabharat. At Kapila, in Oudh, Gautama Buddha was born early in the 6th century before Christ, and at Kasia he died half a century later. The territory of this province formed a part of the realms of the great King Asoka, who, in the 3rd century before Christ, gave his political support to Buddhism, and made it the prevailing religion of Hindustan. In the 11th century after Christ, the Mohammedans began to invade the land through the same northwestern door as the Aryans before them. The upper portion of these provinces became a few centuries later the central seat of their power; tho the city of Delhi, their greatest capital, once just within the northwestern boundary of the Northwest Provinces, has more recently been transferred to the Punjab. Late in the last century, when the great Mogul power had sensibly declined, and was disintegrating into weak and petty principalities, the English authority, then firmly established in Bengal under Warren Hastings, began to creep up the Ganges. Benares became theirs in 1775; a part of Oudh was ceded in 1801; other districts followed; but the details we need not here repeat. A British cantonment was established at Cawnpur as early as 1778, which became the chief town of the province thus annexed to the English territory were first governed from Bengal; but in 1833 the plan was formed of erecting them into a fourth presidio; this plan was abandoned two years later in favor of that still in force, by which they constitute a province of similar rank to the province of Bengal, and, like that, governed by a lieutenant-governor, subject to the governor-general. In 1866 the continued misgovernment of the King of Oudh caused that territory to be annexed and placed under the charge of a chief-commissioner.

The great Indian mutiny of 1857 raged more fiercely within the borders of this province than elsewhere in all India. It was at Mirat, in its northwestern part, that a native regiment of cavalry broke into open and violent rebellion on the 10th of May, 1857. After massacring their officers and many others, they started for Delhi. There the native infantry joined them. The city was seized by them, the old Mogul Empire was proclaimed, and the fire of rebellion spread rapidly over the whole province. In September of the same year Delhi was recaptured, and Lucknow was relieved the next March. The rebellion was wholly quelled before the end of 1858. But the siege of Delhi, the defense of Lucknow, under Lawrence and his little band. In its subsequent relief by Havelock, and the massacres at Cawnpur, are destined to perpetual memory.

Hindi is the principal language, subject in different localities to marked dialectic variation. The Mohammedans mostly use Urdu or Hindustani, as they do generally throughout India—a fact which constitutes that form of speech the lingua franca of India.

Christian missionary work dates back to 1807, when Rev. Mr. Corrie, chaplain of the East India Company, was stationed at Chunar, and undertook a little evangelistic work in addition to his regular duties; and to 1809, when Henry Martyn, also a chaplain, residing at Cawnpur, made full proof of his ministry among the natives. But no regular missionary work by any agency specially existing for that purpose was undertaken until 1811, when the Baptist Society undertook to occupy Agra.

The BMS, CMS, American Presbyterian, American Methodist, and the LMS have been actively at work for years; and a German mission has accomplished great good. Education, promoted by government and mission, is making progress.
the mainland northwest of Zanzibar, by a colony of released slaves trained by the mission. With a view to the formation of stations in the interior, a half-way station was made at Masisi, in the Rovuma region far to the south of Magila, in 1876, and in 1879 the Rev. W. F. Johnson settled alone on the south shore of Lake Nyasa, but was expelled in 1881 by the chief of the district. In 1882 a station was opened on the east shore of Lake Nyasa, at Chitiip's, and was maintained for eighteen months under great danger, owing to the hatred of the natives. In 1882 Charles Alan Smythies was appointed bishop. In 1884, owing to the efforts of the Rev. W. F. Johnson, a steamer was purchased for the use of the mission on Lake Nyasa, and in 1885 a station was begun on the island of Likoma, in the lake, where are now the headquarters of the Nyasa Mission.

The work is now carried on in two dioceses—Zanzibar and Likoma—and in the two outlying districts of Usambara and Rovuma, in German East Africa. The two dioceses are in constant relations with those of Mombasa and Uganda, and there is in anticipation the formation of a West African province, which shall more thoroughly unify the work of the Church of England in that section.

Educational work is kept well provided, a new industrial house having been established at Zanzibar, completing the general scheme, with St. Marks Theological College at the highest grade. A new steamer has been added to the lake service, and special attention is paid to evangelistic work on the shores of the lake, in providing for the boys and girls in the schools, so far as practicable, native customs are preserved. Considerable difficulty is experienced from the unfriendliness of the Portuguese officials and their disregard of justice in dealing with the natives. The Mission staff (1902) consists of two bishops, 23 English and 16 African clergy, 22 laitymen, 52 women, and 204 native readers and teachers. In the schools, homes, and workshops there are gathered nearly 5,000 children being taught.

The number of communicants is over 3,700, and of adult catechumens baptised, etc., over 12,000.

UNOCCUPIED FIELDS: This phrase is misleading, since there is, on the one hand, no land in which evangelical religion has not some representatives, while on the other, scarcely a country among those where many missionary societies are found has more than a handful of workers,—so meager a proportion of laborers that not more than the corners of great harvest fields are being touched.

Considering first the lands where work is established but in which few, comparatively, are affected by it, the following countries may be placed, the order being that of populations as yet unreached. Lowest in the list are such countries as Persia, Mexico, Central America, and the islands of Borneo, New Guinea, Sumatra, and Madagascar. For years, or in some cases decades, these countries have been the objects of missionary endeavor, but for various reasons few have heard the Gospel message. Save in New Guinea there is no such excuse for such a state of affairs. South America is truly a "Neglected Continent," yet the portion of its inhabitants that is most neglected is the one which in a sense most needs the Gospel, viz., the more than six millions of Indians, who constitute about sixteen per cent. of the entire population. These are usually open to the missionary, so far as any governmental opposition is concerned. As for the Spanish and Portuguese-speaking populations of South America, they, of course, have been largely evangelised, except for the presence of a few mission stations along the coast; so that the number of missionaries of the Protestant faith are in the proportion of 1 to 34,955 of the entire population.

The Dark Continent comes next in the number of those who are unreached by missionaries. Here the vast expanse of the Sahara, which is so sparsely inhabited that it need not be considered, there are the adjacent stretches of the Sudan, in most sections densely peopled, where a population two-thirds as great as that of the United States cannot reach a Protestant mission station. In other sections of the continent there are extensive regions without a single missionary or native Christian. India, the oldest mission field of the world of any great size, comes next in the numbers that are beyond the influence of the missionary. Here there are about seventy-four thousand to every Protestant worker from foreign lands. While in most cases the nearness of mission stations, especially in South India, and the ease of teaching a Christian creed because of the familiarity of the language, etc., seem to place a larger responsibility on the unevangelised, it should be remembered that poverty and the obstacles due to the caste and to the village system militate against such a quest. As for China, the most populous empire in the world, so within her confines is found the largest number practically beyond the pale of Christian influence. One Protestant missionary to 145,260 Chinese, and the fact that the province where mission stations were nearest together in 1809 gave each station a territory larger than Rhode Island, suggest how largely unoccupied this great empire is, and that, too, when there exists no governmental obstacle, nor any serious difficulty in the way of climate, or in the attitude of religions and the Missionary societies are found has more than a handful of workers,—so meager a proportion of laborers that not more than the corners of great harvest fields are being touched.

II. Turning to those fields where scarcely a beginning of missionary effort has been made, the most extensive area is found in Siberia. In a territory of nearly five million square miles, or about as much as would be contained in forty United Kingdoms, the population is so sparse as to lack nearly a million of equaling that of Greater London. It is true that the Russian Church is nominally active, but its influence is nil on that portion of the population most needing the Gospel. Shamanism is the practical religion of the people in the north, and vices are hurrying the aboriginal peoples to their grave. Such characteristics as the burial alive of widows or motherless children, the exposure of helpless old people, who in exceptional cases betake themselves to the edge of their own offering, and the fearful cruelty of men who slay their enemies in revenge, are by no means universal; but they display a. nature which sadly needs the principles of love and common humanity, not to speak of other virtues. Southward from this Russian territory lies Central Asia, including Turkestan. All this territory is under Russian influence, tho in the eastern portion China is a more prominent factor in the life of the inhabitants. Mohammedianism and a weak form of Confucianism
are the main religious stays of the people. As these races are nomadic and predatory, they constitute a confessedly difficult population to reach. Tibet, the almost inaccessible pinnacle of Asia, is even more isolated because of the exclusive policy which for decades has succeeded in keeping from her territories all save a mere handful of adventurous travelers and equally brave missionaries. Lamaism, which even in Mongolia has proven so great an obstacle to missions, is here found entrenched against all other religions, and the serious problem of living at so great an altitude, added to the isolation which must always be the lot of missionaries in that land, will further work against the missionary occupation of Tibet. The adjacent countries of Afghanistan and Baluchistan are as fanatically Muslim as Tibet itself, and even in that portion of the territory under British influence or control. Hatred of Christianity is the prime article in the creed of the bulk of the people, and this will always be a serious difficulty; the more so, for it was shown that even the Afghans are open to its benevolent and salvatory influences. Arabia is sufficiently cut off by sandy wastes on the north to merit the appellation of the natives, who call it "The Island of the Arab." Its arid, hot, and sandy climate would be unfavorable to missionary enterprise in the lands named are serious, that of the wisdom of expending force in overcoming the difficulties connected with all these lands, except possibly Arabia, when the missionary contingent is so meager and is needed so sorely in countries where there is perfect freedom of action and greater number without the Gospel. Thus the Malay Archipelago, Persia, and China are really far more strategic and actually needy fields than are the practically unoccupied lands where it is so difficult to carry on missionary work. It is not to be forgotten that parts of a great continent having in other regions a goodly number of missionaries may be more truly an unoccupied field than is French Indo-China, or Arabia. Such an instance is found in the Sudan, already spoken of as a very sorely in countries where there is perfect freedom of action and greater number without the Gospel. Thus the Malay Archipelago, Persia, and China are really far more strategic and actually needy fields than are the practically unoccupied lands where it is so difficult to carry on missionary work. It is not to be forgotten that parts of a great continent having in other regions a goodly number of missionaries may be more truly an unoccupied field than is French Indo-China, or Arabia. Such an instance is found in the Sudan, already spoken filling up with settlers are so favorable to the adoption of new customs and the reception of new light that the coming century may see Siberia leading the whole Empire into purer and more spiritual religion? Medicine in Kâshâgâria and Arabia is proving an entering wedge of great value. It leads to medical cases of "double cure," as it does also at the Tibetan outpost of Leh. Tibet is becoming encircled with missions, which are able to send in through natives of the country the Tibetan Scriptures and the still better gift of a few lives charged by the dynamics of the Gospel. Were it not for the recent Russo-Chinese treaty, hope for Tibet’s future would be bright. Its third article, however, is ominous, not merely for this country, but also for all other regions, especially North China, where Russia's influence is felt. The first sentence reads thus: “Entire liberty in what concerns Russian Orthodox, as well as Lamaist, worship will be introduced in Tibet; but all other religious doctrines will be absolutely prohibited. In that portion of the southern Indo-China which joins the Laos country, the work is being taken up by the native church, a fact of considerable significance and hope.

III. Some of the obstacles to missionary enterprise in the lands named are serious, the some of them are not insurmountable. Not considering the countries which contain numerous missionaries but whose territory is far from occupied, the health obstacles in the others are not to be compared with what has been overcome in certain coastal regions of South America and Africa, where fevers have been exceedingly deadly. Even Indo-China is healthful compared with some other sections of the missionary world fully occupied. Sparsity of populations is characteristic of some of the unoccupied fields; but this is not more than has confronted missionaries in Greenland, in some portions of British America and Alaska, in the southern extremity of South America, and elsewhere. The ferocity of the inhabitants of these lands is no more marked than it has been in many parts of Oceania, notably New Guinea and the New Hebrides, where missionaries have brought the work to a happy stage of progress. Religious fanaticism, it is true, is a problem in such countries as Afghanistan, Baluchistan and Arabia, while the attitude of the state religion in Siberia, Indo-China, and Tibet is an obstacle which is most serious. In the last named countries a widespread missionary movement is at present impracticable.

A serious question may be raised here, namely, that of the wisdom of expending force in overcoming the difficulties connected with all these lands, except possibly Arabia, when the missionary contingent is so meager and is needed so sorely in countries where there is perfect freedom of action and greater number without the Gospel. Thus the Malay Archipelago, Persia, and China are really far more strategic and actually needy fields than are the practically unoccupied lands where it is so difficult to carry on missionary work. It is not to be forgotten that parts of a great continent having in other regions a goodly number of missionaries may be more truly an unoccupied field than is French Indo-China, or Arabia. Such an instance is found in the Sudan, already spoken

THE ENCYCLOPEDIA OF MISSIONS
of, which is really the greatest unoccupied field of the present day, and one, too, which has in it nearly all the elements called for in a strategic position of the highest importance. While these counter considerations are not to be forgotten, the world-encompassing commission of Jesus Christ demands that the less important unoccupied fields should not be entirely forgotten. The angel of God still calls upon men to turn away from white harvest fields toward the south, and so goeth down from Jerusalem unto Gaza: the same is desert. To minister, as did Philip, unto a single man, has a place in the Divine purpose which cannot be neglected in the wide scheme of preaching the Gospel to the whole world.

IV. It should not be forgotten, in considering the unoccupied fields, that there are certain portions of the population that are often unreached, the scattered widely in lands where missionaries are laboring in force. Thus the Mohammedans are scarcely thought of in China, where, according to the "Statesman's Year-Book," some 30,000,000 of them are found, mostly in the northeast and southwest. The same is largely true of Mohammedans in Africa. While there may be a valid excuse for neglecting these religionists in the Turkish Empire and Persia, there certainly is even less reason for passing by those resident in China than in British India, where Mohammedan missions are so fruitful. Neglected classes are no less worthy of special consideration than are unoccupied lands.

UNTUNJAMBILI: A settlement in Natal, South Africa, situated N. of Tugela River, about 25 miles N. W. of Eschowe. Station of the Norwegian Church Mission of Schrueder, with (1901) 2 missionaries and their wives, 2 women missionaries, 3 native workers, 1 place of worship, 1 day school, 1 boarding school, and 118 professed Christians.

UNWANA: A settlement in Southern Nigeria, West Africa, situated on Cross River, about 85 miles N. by W. of Creektown. Station of the UFS (1885), with (1903) 2 missionaries, 2 women missionaries, 4 native workers, 1 place of worship, 1 day school, 1 boarding school, and 118 professed Christians.

UPOLU. See SAMOAN ISLANDS.

URAMBO: A district in German East Africa, situated in the Unyamwezi country, about 175 miles E. of Ujiji on Lake Tanganyika. It was formerly a station of the LMS, but was transferred to the Moravians after they opened stations in German East Africa. Station of the Moravian Mission Society (1897), with (1903) 2 missionaries and their wives, and 1 place of worship. Some use the name Kilmani for this station.

URAWA: A town in Japan, situated on the main island, about 10 miles N. of Tokio. Station of the PE (1903), 1 missionary, 1 native worker, 1 Sunday school, and 23 professed Christians.

URDU LANGUAGE: A language which arose from the mingling of races produced by the Mohammedan conquest of India. It is closely allied to the Hindi, but, being used by the Mohammedans, where Hindi is the language of the Hindus, it is very much farther from the Sanskrit than even the Hindi. It has a large number of Arabic and Persian words. It is the official language in Western India, and serves as a medium of general intercourse between different races. It is written with the Arabic letters. The name Urdu means "camp" and is applied to the language as the "language of the camps" of the time of the Mohammedan conquerors of the 11th century and their followers. It is also called Hindustani.

URPIV: A mission station of the New Hebrides Missionary Society, on Mallicolo Island.

URIYA LANGUAGE: The language of about 8,000,000 inhabiting the province of Orissa, India. It belongs to the Indic branch of the Aryan family of languages, and is closely related to the Bengali. Sometimes, in fact, it has been classed as a dialect of Bengali. Reasons exist, however, for regarding it as a distinct language.

URMIA: A town in Persia, situated in the N. W. part of the country near Lake Urmia, 480 miles W. by N. of Teheran. It is the reputed birthplace of Zoroaster. Population, 35,000. Station of the PN (1835), with (1903) 8 missionaries, 4 women missionaries, 164 native workers, 112 outstations, 53 places of worship, 63 Sunday schools, 86 day schools, 2 boarding schools, 1 theological class, 1 college, and 2,719 professed Christians; 1 dispensary, 1 hospital, 1 printing house. This station was founded by the ASCPM in 1835 and transferred in 1871. Also station of the Archbishop's Mission to the Assyrians, with (1903) 1 missionary, 2 native workers, 1 boarding school, and 1 theological class. Some write the name Urumia.

URUGUAY: The smallest republic of South America, is situated on the east coast, and is bounded by Brasil on the northeast, the Atlantic Ocean and the La Plata River on the south, and on the west by the Uruguay River, which separates it from the Argentine Republic. The country is divided into 19 provinces, with a total area of 72,110 square miles and a population of about 750,000. Seven per cent. of the population are native-born, consisting principally of half-breeds; the remainder are Spaniards, Italians, French, Brazilians, and Argentines. Montevideo, the capital, situated at the entrance of the river La Plata, has a good harbor and roadstead, and a population of nearly 150,000. Uruguay, as formerly a part of the vice-royalty of Spain, then became a province of Brazil, but declared its independence in 1825, which was recognized by the treaty of Montevideo (1828). By the terms of the constitution, adopted 1830, a president, elected for four years, and a parliament, composed of two houses, constitute the government of the republic. The territory is one vast pasture-land. On the rolling plains great numbers of cattle and sheep are raised, and the principal wealth and exports of the country consist of live stock and the resulting products. Agriculture is carried on to a limited extent. The climate is in general healthful. In the coast districts there are no great extremes of heat and cold; in the interior the thermometer ranges from 86° in summer to 45° in winds, and in the extreme south, more than a thousand miles of railway, an active commerce, and a good climate are doing much for the advancement of Uruguay.

The state religion is Roman Catholic, but there is complete toleration, and the general condition of education is very satisfactory.

Uruguay is blessed with a prosperous branch.
of the Waldensian Church, and pastors in German and Swiss colonies are caring for the religious needs of their countrymen. The Methodist Board North is doing most of the regular mission work, with its headquarters in Montevideo. In different parts of the city is a group of six churches, and from these there is a chain of interior stations, which are themselves centers of usefulness.

USUANIA: A settlement in Tierra del Fuego, S. America, situated on the S. coast, on Beagle Channel. Station of the SAMS (1869), with (1903) 1 missionary and 1 place of worship.

UTAKAMAND: A village and sanitarium in the Nilgiri Hills, Madras, India, situated about 12 miles N. by W. of Coonoor, its railroad station. It is the resort of the Madras Government during several months of the year. Population, 12,000. Station of the CMS (1870), with (1903) 1 missionary and his wife, 2 native workers, 2 outstations, 13 day schools, 1 boarding school. Also station of the CEZ (1885), with (1903) 4 women missionaries, 24 native workers, 1 outstation, 7 day schools, 1 boarding school. Also station of the WMS, with (1903) 1 missionary, 9 native workers, 1 outstation, 1 place of worship, 1 Sunday school, 1 day school, and 120 professed Christians, of whom 109 are communicants. Some write the name Ootacamund.

UTHUHA: A settlement in Tierra del Fuego, S. America, situated about 80 miles N. of the N. extremity of Lake Nyass. Station of the Moravian Missionary Society (1895), with (1903) 1 missionary and his wife, 1 place of worship, 1 day school, and 4 professed Christians.

UTUROA: A village on the island of Raiatea, Society Islands. Station of the Paris Evangelical Association (1893), with (1903) 1 missionary and his wife, 1 native worker, 1 outstation, 1 place of worship, 1 printing house, 1 day school, 181 professed Christians.

UVEA: One of the Loyalty Islands.

VACAO: A town in Mauritius, situated about 25 miles by railway S. of Port Louis. Station of the CMS, with (1903) 1 woman missionary.

VAKADU: A town in Madras, India, situated in the District of Nellore, about 16 miles E. of Gudur. Station of the Honomansburg Missionary Society (1871), with (1903) 1 missionary and his wife, 5 native workers, 1 place of worship, 3 day schools and 90 professed Christians, of whom 76 are communicants.

VALDEZIA: A settlement in Transvaal, South Africa, situated in the Zoutspansberg District, about 80 miles N. E. of Pretoria. Station of the Swiss Romande Mission (1875), with (1903) 2 missionaries and their wives, 1 woman missionary, 10 native workers, 5 outstations, 6 places of worship, 5 Sunday schools, 6 day schools and 505 professed Christians, of whom 120 are communicants.

VENDIA: A settlement in Transvaal, South Africa, situated in the Zoutspansberg District, about 80 miles N. E. of Pretoria. Station of the Swiss Romande Mission (1875), with (1903) 2 missionaries and their wives, 1 woman missionary, 10 native workers, 5 outstations, 6 places of worship, 5 Sunday schools, 6 day schools and 505 professed Christians, of whom 120 are communicants.

VALPARAISO: An important city of Chile, S. America, situated on a bay of the same name. It is the chief Chilean seaport. It has many institutions of learning; the streets are narrow, but usually well paved, and the houses present a gay appearance with their bright colors and overhanging balconies. A railroad connects it with Santiago. Population (1895) 122,435. Station of the UMAF (1885), with (1903) 2 missionaries and their wives, 2 native workers, 3 outstations, 1 place of worship, 1 Sunday school, 1 printing press, 1 day school and 133 professed Christians. Also station of the MSA (1894), with (1903) 3 missionaries, 3 women missionaries, 5 native workers, 12 outstations, 11 Sunday schools, 1 printing press and 160 professed Christians. Also station of the ME, with (1903) 1 missionary and his wife, 7 native workers, 7 Sunday schools and 517 professed Christians.

VAN: A town in Asiatic Turkey, on the east shore of Lake Van, 145 miles southeast of Erzroom, 350 miles southeast of Trebizond. Climate mild, healthful; elevation 5,500 feet. Population, 30,000, Armenians, Kurds, and Turks. It is now, as it always has been, the center of Armenian influence in Eastern Turkey. On the picturesque rock behind the city are a large number of inscriptions in cuneiform, dating back even earlier than many of the Assyrian inscriptions, and relating to a kingdom that preceded the Armenian occupation. Near Van is the island of Aghtamar, the seat of an Armenian Catholicos, whose spiritual rank is equal to that of the Catholicos of Etchmiadzin. His influence, however, is small. Station of the ABCFM (1872), with (1903) 2 missionaries and their wives, 1 woman missionary, 25 native workers, 2 outstations, 2 places of worship, 2 Sunday schools, 3 day schools, 2 boarding schools, 1 industrial school, 1 hospital, 1 dispensary and 63 professed Evangelical Christians. It has not been the policy of the missionaries to advise Armenians to join the Evangelical Church if they adopt evangelical ideas.

VANDERKEMP, John T.: Born in 1747 at Rotterdam, Holland, where his father was pastor of the Dutch Reformed Church; studied at the University in Leyden; spent 16 years in the army, where he was captain of horse and lieutenant of dragoons. After leaving the army he went to Edinburgh, where he became distinguished for his attainments in the natural sciences and modern languages. He then returned to Holland and practised medicine with great success. He was converted as a result of the death of his wife and child by a shocking accident. He then offered himself to the LMS for service in
South Africa, was ordained, and in 1798 he sailed with three others for Africa, in a convict ship. On the voyage he and his companions ministered to the spiritual as well as the material wants of the convicts. Arriving at Cape Town in March, 1799, Dr. Vanderkemp commenced at once to labor among the natives, while at the same time he awakened a deep interest in missions among the Europeans. In May he left Cape Town for the interior. After sailing on the Great Fish River, where he obtained permission from the native king Geiha to open a school. The king ordered him to leave a year later, and with some 60 followers he retired to Graaf Reinet, arriving there early in 1801. His work was especially among the Hottentots, of whom he soon collected a congregation of over 200. His efforts in behalf of this despised race aroused the enmity of the colonists, but by his wise conciliatory policy they were pacified, and he continued his work un molested. Buildings were erected and Graaf Reinet was made a permanent station, but the privileges afforded to the natives at that station bade fair to stir up another rebellion, and Dr. Vanderkemp saw the necessity of removing the Hottentots to a place of safety, where they would form a colony by themselves. The governor gave the mission a grant of land near Algoa Bay, to which the missionaries removed in 1802. The station of Bethelsdorp was founded in 1803, and in 1810 the number of people who assembled there for worship was fully a thousand. The cruelties which the Hottentots had so often suffered at the hands of their Boer masters excited the deepest pity in the heart of the doctor, and it is said that in the course of three years he paid no less than $5,000 for the redemption of slaves from bondage, and by his exertions, with the help of other missionaries, the Hottentots were finally set free. Almost the last public service which the doctor was able to render that people was in testifying in the courts at the Cape to the wrongs practised upon the Hottentots.

He died on the 15th of December, 1811, in the midst of active preparation to enter upon a new field of work in Madagascar. It is said that as combining natural talents, extensive learning, elevated piety, ardent zeal, disinterested benevolence, unshaken perseverance, unforgotten humility, and primitive simplicity, Dr. Vanderkemp has perhaps never been equaled since the days of the Apostles. As Mr. Moffat wrote about him: "He came from a university to teach the alphabet to the poor, naked Hottentot and Kafir; from the society of nobles to associate with beings of the lowest grade of humanity; from stately mansions to the filthy hovel of the greasy African; from the army to instruct the fierce savage in the tactics of a heavenly warfare under the banner of the Prince of Peace; from the study of medicine to become a guide to the Balm of Gilead and the Physician there; and, finally, from a life of earthly honor and ease to be exposed to perils of waters, of robbers, of his own countrymen, of the heathen, in the city, in the wilderness." His period of service was short. His work was the most difficult sort of pioneer’s work, for its enemies were nominal Christians quite as often as heathen savages. But his work remained. The work later built on the foundations prepared by Vanderkemp were the first in his work. The value of the influence of this devoted man.

VAN DYCK, Cornelius Van Alan: Born in Kinderhook, Columbia County, New York, August 13, 1818. Died November 13, 1895. He secured a medical education at Jefferson Medical College in Philadelphia, and at the age of twenty-one was appointed medical missionary of the ABCFM in Syria. Only one medical missionary, Dr. Asa Dodge, had preceded him in Syria, and Dr. Dodge, who arrived in February, 1833, died in Jerusalem January, 1835, so that for five years, until the arrival reached the Syrians, there was no American physician in this land.

Dr. Van Dyck arrived in Beirut April 2, 1840, and spent the month of May in a tour in Northern Syria with Messrs. Thomson and Beadle, going to Tripoli, Hums, Hamath, Antioch, Latakia and Aleppo.

In July he went to Jerusalem with three of the missionary families, and in his absence Beirut was bombarded by the allied English and Austrian fleets. In January, 1841, he returned to Beirut and spent the summer in Deir el Komr, with Dr. Eli Smith and Dr. Wolcott, opening a school for the sons of the Druze chiefs. In June, 1843, he removed to Abeih, with Dr. Thomson, remaining there for eight years, teaching in the newly-founded Abeih Seminary, making journeys to Southern Lebanon, Merj Aiyun, and Hasheiyas, attending the sick in all parts of the field, translating and writing text-books for the schools in Arabic, and studying the Arabic language with constant assiduity and enthusiasm. In the wars of 1840 and 1845 he was called to attend the wounded and suffering.

On January 14, 1846, he was ordained in Abeih to the Christian ministry. During the year 1847 a committee on behalf of the mission prepared and sent to the United States an appeal in behalf of undertaking the translation of the Bible in the Arabic language, the work to be entrusted to Dr. Eli Smith. The document is long, and now of great historical value.

The work of Bible translation was begun in 1848-49 by Dr. Eli Smith, who continued the preparatory work for eight years, until his death, January 11, 1857, but it was said that he was only willing to be responsible for the translation of the first ten chapters of Genesis, which had been corrected and printed under his own direction.

In 1851 Drs. Thomson and Van Dyck were transferred to the Sidon station, having the care of the Hasheiyas and Tyre districts. Dr. Van Dyck stated that he wished to "give himself now more fully to the ministry of the Word." For the following six years his labors were abundant, and Dr. Thomson stated that their "station was on horseback." A church was organized in Ushnafa, a Bible class was maintained in Sidon, attended by large numbers of the people. At this time his well-known Arabic geography was published.

In 1853 he visited the United States with his family. In July, 1854, he returned to Syria, and on the decease of Dr. Eli Smith, in January, 1857, he was called by the unanimous vote of his mission and the Missionary Board to take up the great work of the Arabic translation of the Scriptures.

God, in His wise providence, had been preparing him for seventeen years for this work. He had read and mastered the books, poetry, grammar, rhetoric, logic, history, geography and medicine; had published Arabic
books on algebra, geometry, higher mathematics, geography, logic and prosody, besides religious
tracts and sermons; and in the colloquial Arabic
he was without an equal. Using Dr. Smith's
work as a basis he began the work de novo; and
after two and a half years of labor the Reference
New Testament was printed, March 29, 1890.

The printing of the Old Testament was finished
on August 22, 1864, and the printing of the whole
Arabic Bible was finished in March, 1865.

The printing was conducted in the old American
Press building, and in the upper room where Dr.
Smith had labored on the translation eight years,
and Dr. Van Dyck eight years more, the assem-
bled missionaries gave thanks to God for the
completion of this arduous work.

The printing of the Arabic Scriptures was now
concluded, but the press could not keep up with
the demand, and Dr. Van Dyck went to New
York in 1865 and spent two years in electro-
typing the royal octavo edition of the Bible, and
during his stay gave instruction in Hebrew in the
Union Theological Seminary.

On his return to Beirut, in the fall of 1867,
he superintended the electrotyping of various
editions of the Arabic Bible, conducted the
weekly Arabic journal, and entered upon his
duties as professor in the medical department of
the Syrian Protestant College, continuing his
connection with it in abundant labors, in teaching
the theory and practice of medicine and chemistry,
found the Astronomical Observatory, and
witnessing the growth and development of the
institutions, and the graduation of 12 medical
classes, until his resignation.

His labors in the St. John's and the Greek
hospitals are too well known to need more than
mere mention here. He labored in Syria over
55 years.

VAN YAMBADI: A town in Madras, India,
situated in the N. Aroe district, about 40 miles
S. E. of Port Moresby. Station of the Brethren
and of the Christian and Missionary
Alliance have accomplished much good by theh:

VAYYURU: A town in Madras, India, situated
in the N. Aroe district, 82 miles W. of Madras.

VAYYURU: A town in Madras, India, situated
in the N. Aroe district, 82 miles W. of Madras.

VALENCE: The most northerly of the
South American republics, lies between British
Guyana and Colombia on the east and west, with
Brazil to the south and the Caribbean sea to the
north. In size it is larger than France and Ger-
many taken together, and is about equal to the
Gulf States plus Kentucky, Arkansas, and
Tennessee, and is divided into eight states, two
national settlements, and eight territories. In
1899 it was decided to restore a former division
into twenty states, and this work is still in prog-
ress (1904). Its estimated population is between
2,000,000 and 3,000,000. The government is
modelled after that of the United States of
America, with more freedom given to the pro-
vincial and local governments. Education is com-
ulsory and gratuitous, and illiteracy is fast
decreasing. The state religion is Roman Cath-
olic, and the other religions are tolerated, they
are not permitted any external manifestations.
The people are engaged in agriculture, cattle and
sheep raising, and mining; there are very rich
deposits of gold and silver, copper and iron.
Cácaras, the capital, has a population of about
75,000. Altho the American Bible Society com-
menced the work of the distribution of Bibles in
Venezuela in 1876, but little progress was made
until 1886, when Miss Bishop and Mr. Penroti ca-
vassed the republic. Emilio Bryant, who came
from Spain to Caracas in 1884, may be called the
pioneer of missions in this land, and whose heroic
life did much for the cause of truth. Workers of
the Brethren and of the Christian and Missionary
Alliance have accomplished much good by their
faithful ministrations. The PN and the Scandinavian Alliance of America also have missionaries in Venezuela.

VENGURLA: A town in Bombay, India, situated in the Konkan region, about 30 miles N. by W. of Goa. Station of the PN (1900), with (1903) 1 missionary and his wife, 4 women missionaries, 1 native worker, 1 day school, 1 dispensary, 1 orphanage, and 15 professed Christians. Some write the name Vengurle.

VENKATAGIRI: A town in Madras, India, situated about 30 miles S. W. of Gudur. Station of the Hermannsburg Missionary Society (1869), with (1903) 1 missionary and his wife, 10 native workers, 3 outstations, 1 place of worship, day schools, and 198 professed Christians, of whom 104 are communicants.

VERBECK, Guido Fridolin: Born January 23, 1830, in the province of Utrecht, Netherlands. Died March 9, 1886. On May 7, 1859, he sailed from New York for Japan as a missionary of the RCA, and on the following November he arrived at Nagasaki. From this time until his death, nearly forty years afterward, his life was identified with the progress of Protestant Missions in Japan. It was while living in Nagasaki that he came in contact with Wakaasa, the Japanese officer who, while commander-in-chief of the forces at Nagasaki, in 1854, picked up a floating copy of the New Testament in English, became interested in the life and teachings of Christ, and, in 1866, was baptized by Dr. Verbeck.

During a part of his residence in Nagasaki he taught two classes of young Samurai, the “twosworded.” These young men afterward became prominent in the new government which succeeded the revolution of 1868. Remembering their instructor, they summoned him from Nagasaki and sought his aid and advice in framing their new institutions, and in 1869 he removed to Tokio, or Yedo, as it was then called. For nine years thereafter he remained in close connection with the government, giving shape to and supervising the government university and the system of education as at first established. He accompanied the first deputation of Japanese to the outside world, on their tour among the nations of Europe. In recognition of his services in this and other directions, he received from the government the decoration, of the third class, of the Rising Sun, which entitled him to appear at all public and court receptions. In 1889-90 Dr. Verbeck visited the United States, and his addresses on the evangelization of Japan made a deep impression. In the translation of the Old Testament he bore a conspicuous part; but he took most pleasure in lectures and evangelistic preaching. He did much toward the planting of Christianity and the development of a new civilization in the “Sunrise Kingdom.”

VICTORIA (Kamerun): A trading station on the coast of the Kamerun Colony, West Africa, situated 35 miles W. of Kamerun River. It has a botanical garden, is connected with the coast of the Kamerun Colony, West Africa, by a system of education as at first established. It was while living in Nagasaki that he came in contact with Wakaasa, the Japanese officer who, while commander-in-chief of the forces at Nagasaki, in 1854, picked up a floating copy of the New Testament in English, became interested in the life and teachings of Christ, and, in 1866, was baptized by Dr. Verbeck.

During a part of his residence in Nagasaki he taught two classes of young Samurai, the “twosworded.” These young men afterward became prominent in the new government which succeeded the revolution of 1868. Remembering their instructor, they summoned him from Nagasaki and sought his aid and advice in framing their new institutions, and in 1869 he removed to Tokio, or Yedo, as it was then called. For nine years thereafter he remained in close connection with the government, giving shape to and supervising the government university and the system of education as at first established. He accompanied the first deputation of Japanese to the outside world, on their tour among the nations of Europe. In recognition of his services in this and other directions, he received from the government the decoration, of the third class, of the Rising Sun, which entitled him to appear at all public and court receptions. In 1889-90 Dr. Verbeck visited the United States, and his addresses on the evangelization of Japan made a deep impression. In the translation of the Old Testament he bore a conspicuous part; but he took most pleasure in lectures and evangelistic preaching. He did much toward the planting of Christianity and the development of a new civilization in the “Sunrise Kingdom.”

VICTORIA FALLS: A settlement in Rhodesia, situated on the Zambezi at Victoria Falls. Station of the Paris Evangelical Missionary Society (1898), with (1903) 1 missionary and his wife. The station, also called Mosi oa Thunya, is merely a place of transit for all the upper river country.

VIKARABAD: A suburb of Haidarabad, the capital of the native state of Haidarabad, India. Station of the ME, with (1903) 1 missionary and his wife, 14 native workers, 5 Sunday schools, 2 day schools, and 158 professed Christians, of whom 79 are communicants.

VIKTORIA: See VICTORIA (Kamerun).

VILLUPURAM: A town and railroad junction in Madras, India, situated in South Arcot, about 35 miles by railway from the French port of Pondicherry. Station of the Leipzig Missionary Society (1875), with (1903) 2 missionaries, one of them with his wife; 17 native workers, 7 outstations, 11 places of worship, 8 day schools, 2 boarding schools, and 669 professed Christians, of whom 322 are communicants. Some write the name Wulupuran.

VINTON, Justus Hatch: Born at Willington, Conn., February 17, 1806. Died at Rangoon, Burma, March 31, 1858. Graduated at Hamilton Literary and Theological Institution, 1828; appointed in 1832 missionary to Burma by the AIMU; studied with Dr. Wade and two native converts, a Burman and a Karen, who were then in the United States; sailed with Mrs. Vinton July 3, 1834, reaching Maulmain in December. Having studied the language at home and on the voyage, they began their work at once. Within a week they left for the jungles, traveling for three months from village to village, making known the Gospel of Christ. Mr. Vinton's labors were not confined to the Karens. He studied Burmese that he might preach to the Burmans. During the rainy season, when travel is impossible, he labored among the English soldiers in garrison, preaching and distributing tracts among the Burmans, and translating the New Testament into Karen, or writing his commentary. In six weeks he distributed 8,000 tracts, and his labors among the troops resulted in the conversion of many, both among the common soldiers and the officers. In May, Mrs. Vinton had in her school pupils who had come 200 miles for the sake of learning to read God's Word in their own language, threading the forests by night, not daring to travel by day.

The failure of Mrs. Vinton's health made a visit to America necessary in 1847. On their return to Burma in 1850 Rangoon was chosen as the center of his operations. War between Burma and England broke out in 1852, and the Burmans wreaked their vengeance for defeat upon the Karen Christians. As soon as the English had captured Rangoon, Mr. Vinton went there and took a leading part in the work of aiding the persecuted Karens, and restoring confidence among them. During this work Mr. and Mrs. Vinton had to provide for the sick in an epidemic of smallpox. All this devotion to the interests of the newly won converts, and the success of the new station established at Kemmendine on the outskirts of Rangoon. In 1854, at Mr. Vinton's suggestion, the Karens of the Rangoon district organized the Karen
Home Missionary Society, the first of the kind ever formed in Burma, designed for aggressive work among the heathen; the natives already supporting their own pastors and schools. In May, 1855, the cornerstone of a church was laid by Mr. Vinton in the presence of a large assembly of native and English friends. A substantial church of brick was erected, with funds contributed in America, England, and Burma, at Kemmendine, on land given to the mission by Lord Dalhousie, Governor-General of India. In the mission premises at Kemmendine Mr. Vinton now had the work of training young men for the ministry. He also toured among the villages in the mountains, and in one of these tours contracted the fever which caused his death. Mr. Vinton is regarded as one of the most zealous and successful missionaries ever sent to heathen lands by the Baptists of the United States.

VINUKONDA: A town in Madras, India, situated in the district of Kistna about 43 miles N. N. W. of Ongole. Station of the ABMU (1893) 2 missionaries and their wives, 1 woman missionary, 56 native workers, 49 outstations, 2 places of worship, 34 day schools, 1 boarding school, and 3,878 professed Christians. Also station of the ELGS.

VIZAGAPATAM: A town and seaport in Madras, India, situated about 100 miles N. of the Godavari delta and about half way between Madras and Calcutta. Population (mainly Telugus), 30,291. Station of the LMS (1806), with (1903) 2 missionaries, one of them with his wife; 2 women missionaries, 22 native workers, 3 outstations, 7 day schools, 3 Sunday schools, and 108 professed Christians, of whom 78 are communicants.

VOGELSTRUISKOP: A settlement in the Transvaal Colony, S. Africa, situated in the district of Lichtenburg. Station of the Hannover Lutheran Free Church Mission, with (1903) 1 missionary and 4 outstations.

VOHEMAR: A town and seaport in the N. part of Madagascar, situated on the E. coast. Station of the Lutheran Free Church (U. S. A.) (1898), with (1903) 1 missionary and his wife, 4 native workers, 4 outstations, 1 place of worship, and 37 professed Christians. Some write the name Vohimary.

VOLUNTEERS OF AMERICA: A philanthropic and religious organization, inaugurated in March, 1896, by Commander and Mrs. Ballington Booth in response to numerous requests on the part of American citizens. It is organized in military style, having as its model the United States Army, but in conjunction with military discipline and methods of work it possesses a thoroughly democratic form of government, having as its ideal the Constitution of the United States of America.

The organization is under the command of Ballington and Mrs. Booth, who are elected by its directors as President, and by its members as Commanders-in-chief. The national headquarters are at No. 38 Cooper Square, nearly opposite Cooper Institute, New York City. The Volunteers have six regiments, under the command of six territorial and regimental officers and their wives. These embrace nine companies or central societies that have met the higher requirements before becoming chartered by the corporation, and nearly 100 self-supporting posts or societies throughout the country, not including outposts.

Some of the statistics gathered at the close of the fiscal year in the month of September, 1903, may furnish some larger idea of the excellent results of the Volunteers' mission to men. It has philanthropic institutions in Chicago, Joliet, Austin, Fort Dodge, Kansas City, Pueblo, Worcester, Boston, Lynn, Malden, Toledo, Erie, Pitsburg, Buffalo, New Castle, Philadelphia, Newark, Flushing, New York City, and other centers. During the year ending September, 1903, over 400 women have been cared for, and over 3,000 beds have been provided for young women in the Homes of Mercy. There have been 479 children received into and cared for in the children's homes, and 3,400 children have been helped with clothing. The Volunteer officers and workers who have visited and aided 29,684 families during the year in and around the poorer sections of the large cities where they labor. No less than 180,555 persons were lodged during the year in the Homes and institutions for working and destitute men and women, not counting the many hundreds sheltered during the floods in St. Louis, Kansas City and other centers. There were 275,428 persons fed with substantial meals at a nominal cost in these institutions, and 81,900 persons were given temporary relief and food. Over 4,000 quarts of fresh milk were donated, principally to sick children.

Over 14,000 prisoners living reformed lives have been enrolled in the Volunteers' Prison League. Mrs. Ballington Booth has the entire oversight of this branch of the work. They are in touch by correspondence and services with 28,000 men within the walls. Tens of thousands of poor people and children were given an outing into the fresh air during the year through the organization. The Volunteers attracted 1,077,965 persons to their Sunday and week-night services inside their halls, and despite the almost unprecedented wet season, 397,349 to their 13,564 open-air services during the year. In addition to the Volunteer Reading Rooms, thousands of copies of Christian literature are circulated in States' prisons, jails, hospitals, soldiers' homes, and children's homes. Not by any means least, as an evidence of the permanence of the work, 397,968.40 were contributed by the poor people, irrespective of the national receipts, in support of their own Volunteer societies and local cause.

If the foregoing figures, taken from the reports of the field commanders, do nothing else, they justify the existence of the Volunteers of America, and are in themselves eloquent testimony to the work accomplished in one year.

VUGA: A settlement in German East Africa, situated in the Usambara region, about 53 miles E. by N. of Tanga. Station of the German East Africa Mission (1895), with (1903) 5 missionaries, three of them with their wives; 1 woman missionary, 1 native worker, 2 outstations, 1 place of worship, 1 day school, and 108 professed Christians. Some write the name Wuga, and call the same place Ngazi.

VUYYURU. See VAYYURU.
WADAI: A native state of Africa under the protection of France, lying between the Egyptian Sina, and the Lake Chad basin, containing 170,000 square miles, and a population of about 2,000,000. The state is semi-civilized. It is a rigidly Mohammedan region, with a strong tendency to destroy any person dissenting from Islam. No missionary has ever visited Wadai unless in disguise or with military force.

WADAL: An ancient city in Bombay, India, 26 miles northeast of Ahmadnagar. It was formerly of some political importance. Station of the ABCFM (1835), with (1903) 1 missionary and his wife, 43 native workers, 15 outstations, 12 places of worship, 16 Sunday schools, 1 boarding school and 237 professed Christians. Some write the name Wadala.

WADE, Jonathan: Born at Otsego, N. Y., December 10, 1798. Died at Rangoon, Burma, June 10, 1872. Graduated at Hamilton Literary and Theological Institution 1822; ordained February, 1823; embarked as a missionary of the ABM for Burma, June 22, 1823; reached Rangoon December 5 following. At the commencement of the first Burmese war, soon after his arrival, he and Mr. Houghton were arrested, imprisoned, and put in irons, then dragged to the place of execution, and compelled to kneel before a Burmese executioner, who had received orders to slit off their heads at the discharge of the first British gun on Rangoon. Panic-stricken at the sound of the cannon, the executioner, alarmed for his own safety, left his prisoners and fled. They were afterward seized by the Burmese officials, but rescued by the advancing British troops. They went to Calcutta, remaining till the close of the war. Mr. Wade occupied himself during this interval in the study of the language, translation of books, and superintending the printing of useful works. He preached also in English in the Circular Roads Baptist Chapel. At the close of the war he returned to Burma, making Amherst his home until the transfer of the mission to Maulmain, where he labored thirteen years. In 1830 he inquired of a pioneer missionary in the Dark Continent to reside there that they might assist the missionaries settled there by Mr. Wakefield, and began the work which he continued by Mr. Comstock and others. He received the degree of D.D. in 1852 from Madison (now Colby) University. In the absence of Dr. Bumey in the United States he had charge of the theological seminary for Karens at Maulmain. In addition to preaching the Gospel, he reduced to writing the two Karen dialects, Sgaw and Pwo, and prepared important theological and educational works—among them a Karen Thesaurus, a work in 5 volumes, the last volume completed in 1850. This he designed to be for the Karen language what Dr. Judson's Dictionary was for the Burmese, and to its revision he devoted his powers as long as he was able to work. He visited the U. S. twice, returned to Maulmain from the second of these visits in 1852, and during twenty years more, too suffering from an incurable malady, he continued his literary labors for the Karens. Only six days before his death did he lay down his pen.

WADHWA: A town in Bombay, India, situated in the Gujarat region, about 65 miles S. W. of Ahmadabad. Station of the PCI (1895), with (1901) 1 missionary and his wife, 6 native workers, 2 Sunday schools, 2 day schools, 1 orphanage and 17 professed Christians.

WAHAIJER: A settlement in Assam, India, situated in the Jaintia Hills, S. E. from Jowai, and giving access to the Mikir and Bhoi hill tribes. Station of the Welsh Calvinistic Methodist Mission, with (1903) 1 missionary, 22 native workers, 17 outstations, 28 places of worship, 18 Sunday schools, 32 day schools and 1,055 professed Christians, of whom 344 are communicants.

WAI: A town in Bombay, India, situated about 20 miles N. N. W. of Satara. Station of the ABCFM (1872), with (1903) 2 women missionaries, 14 native workers, 1 outstation, 3 places of worship, 6 Sunday schools, 1 boarding school and 22 professed Christians.

WAITHLAINGMANGYALWA: A station of the SAMS (1892) in the Chaco, Paraguay, South America, situated about 27 miles W. of the Paraguay River and 140 miles N. W. of Asuncion. It has now (1903) 4 missionaries with their wives, 1 place of worship and 1 day school. It is also called the Central Station of the Chaco Mission.

WAKAYAMA: A town and seaport in Japan, situated on the main island about 40 miles S. W. of Osaka. Station of the Cumberland Presbyterian Mission (1877), with (1903) 1 missionary and his wife, 4 native workers, 1 outstation, 2 places of worship, 2 Sunday schools, 1 dispensary and 142 professed Christians. Also station of the PCI, with (1903) 1 missionary, 1 place of worship, 1 Sunday school, 1 day school and 28 professed Christians.

WAKEFIELD, Thomas: Born at Derby, England, June 23, 1836. Died December, 1901. In the year 1861 he was accepted by the Methodist Free Church for pioneer missionary service in Eastern Africa. The district of Ribé, eighteen miles from Mombasa, was decided upon for the first mission station; and here, for six months, Mr. Wakefield bravely grappled with the difficulties of a pioneer missionary in the Dark Continent entirely alone. Besides acquiring the Kiswahili and Kinyika languages, and preaching the Gospel among the scattered peoples around Ribé amid many discouragements, Mr. Wakefield in 1865 made a most interesting journey across the plains to the Galla country, and his experience on this trip was published in a work entitled Footprints in Eastern Africa. The Galla Mission was established at Golbanti in 1884; but the Masai warriors came down upon the station on May 3, 1886, and besides putting to death Mr. and Mrs. Houghton, the missionaries settled there by Mr. Wakefield, massacred several native Christians, who had volunteered to reside there that they might assist in the establishment of the mission. In 1887, having completed twenty-five years of service for the East African Mission in England, and during the following year he received the highest honor his denomination could confer upon him, being elected to the Presidency of the Assembly at its annual gathering. For many years he was a member of the
Missionary Committees, and he was elected a Fellow of the Royal Geographical Society and of the Royal Historical Society. In the year 1891 he offered himself for Eastern Africa, and he would have returned to his adopted land if his medical advisers had consented for him to do so. The Annual Assembly of his Church in an Appreciation on his life gave utterance to these words: "He not only laid the foundation of our East African Mission; he also lifted the missionary ideal of our churches to a high standard."

WALAJABAD: A town in Madras, India, situated in Chingleput Division, about 6 miles W. S. W. of Conjeevanar. Station of the UFS, with (1903) 1 missionary, 80 native workers, 10 outstations, 72 professed Christians, 1 place of worship, 10 day schools, 1 dispensary and 1 hospital.

WALFISH BAY: A settlement on the coast of German S. W. Africa, which belongs to Great Britain, and which immediately commanding the bay. Population, 31 Europeans and 700 negroes. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, 3 native workers, 2 outstations, 2 day schools, 1 Sunday school and 612 professed Christians, of whom 216 are communicants. Some write the name Wal-office.

WALLINGER, Miss Amelia Anne: Born in England, November 13, 1839. Died in India, March 3, 1894. Miss Wallinger was the only daughter in a home of refinement and wealth, and after the death of her parents, having an abundant home income, she commenced her home charitable work among the orphan daughters of professional men. From 1870 to 1882, entirely at her own expense, she made her house the home and school for a large number of girls of gentle birth, whose means were not sufficient to educate them for the position to which they belonged. Afterward, she entered into active home mission work, and under her supervision were held mothers' meetings, children's sewing classes, and missions for the lowest classes of society. Altho advanced in years, she decided to give up her English home and its ties of friendship, and go to the foreign field. She set out, as a missionary of the CFEZ, for Utakamund, South India, in 1886. Not only did she go at her own charges, but she bore the expense of another missionary who accompanied her. After remaining in Utakamund for a year, she and her colleague, Miss Ling, made a tour in the Wynand, a wild country inhabited largely by Malayalam, Tamil, and Kanarese-speaking people, and having as its principal towns Gudalore and Devila. Plans were formed, not only to do missionary work in the lower plateau of the Wynand but also among a remnant of an ancient race in the heights of the Nilgiri Hills. The chief tribe of this race, the Todas, are believed to have been the Lords of the Hills, and Miss Wallinger and Miss Ling were the first women evangelists to these neglected men of the jungles. She and her companion would creep on hands and knees through the entrance-holes of the houses of these wild tribes; and amid indescribable degradation, they would tell the story of Divine love. During a visit to England, the year before her death, she aroused a low interest in the mission work, and almost all of the developments of this mission were at her instigation and largely assisted by her means. Her last two periods of residence in India were spent in Coonoor, and by the special request of the native Christians, they were allowed to carry her body to its last resting-place in the Coonoor churchyard.

WANGEMANNSHOH: A settlement in German East Africa, situated in the Konde region N. of Lake Nyassa. Station of the Berlin Missionary Society (1891), with (1903) 8 missionaries, of whom 5 are laymen and colonists to be stationed later; 7 native workers, 2 outstations, 1 Sunday school, 1 day school, and 53 professed Christians.

WAHN-HSIEN: A town in Szech-wan, China, situated on the Yangtze River, 65 miles E. S. E. of Sui-ting-fu. Station of the CIM (1888), with (1903) 1 missionary and his wife, 1 woman missionary, 1 native worker, 1 outstation, 1 place of worship, 1 Sunday school, 1 day school, and 23 professed Christians. Some write the name Wan-hien.

WANICA: A station of the Moravian Mission (1886) in Paramaribo, Dutch Guiana, South America. Statistics are included under Paramaribo.

WANIYANKULAM: A town in Madras, India, situated in Malabar, 20 miles W. of Palghat. Station of the Basel Missionary Society (1886), with (1903) 2 missionaries, of them with his wife; 27 native workers, 4 outstations, 1 Sunday school, 3 day schools, and 170 professed Christians, of whom 94 are communicants.

WANNARPONNAI: A station of the WMS Missionary Society in Jaffna, Ceylon.

WARD, William: Born at Derby, England, October 20, 1798; died at Serampur, India, March 7, 1823. Mr. Ward was a printer by trade. Having studied for the ministry, he was appointed missionary to India of the BMS, and sailed in May, 1799, with the second party sent out by that Society. Owing to the opposition of the East India Company, the missionaries established themselves at the Danish settlement of Serampur, on the Hugli River above Calcutta. Here they were joined by Carey and Thomas, who had preceded them to India, and in March, 1800, Mr. Ward printed the first page of a Bengali translation of the New Testament. The work of giving the Bible to the people proceeded with astonishing rapidity. According to Mr. Ward's report in 1809, besides the whole Bengali Bible, parts of the Bible had been printed in Sanskrit, Urdu, Hindustani, Marathi, Sikh, and blocks had been cut for the Gospel of Matthew in Chinese. The printing office was finely equipped with type for Arabic, Persian, Hebrew, Greek, and English, besides the languages named above. The building used for the printing house was 200 feet long.

The tremendous energy of this first of missionary printing offices was shown when, in March, 1812, the whole establishment, with twelve fonts of Indian type, stores of books, printed sheets, paper, etc., was destroyed by fire. Fifty thousand dollars was a low estimate of the loss. The matrices for casting type were saved. Recovering the melted type-metal from the ruins, the missionaries began casting type at once. In two weeks' time Mr. Ward was able to begin printing the Scriptures anew. In one month the fonts of type were so far restored that the printing was resumed on a large scale, with presses going day and night.
This catastrophe was, in fact, a blessing to the mission. It not only won instant sympathy for the men who could derive new energy from misfortune, but it made the mission and its benefactors widely known, and brought help from every quarter.

Mr. Ward was not a mere printer, but a historian of the mission, and a true missionary in the general work. After twenty years of such service his health became impaired, and he returned to England for rest in 1819. In 1821 he was again at his post in Serampur, but his work was done, and two years later he passed away.

WARDIA: A town in the Central Provinces of India, and capital of the district, situated about 50 miles by railway S. W. of Nagpur. Station of the Mission to Lepers (1886), with (1903) 1 lepers' station. Also station of the UFS, with (1903) 1 missionary and his wife, 18 native workers, 4 outstations, 5 day schools, 2 dispensaries, and 1 hospital.

WARMBAD: A village in German S. W. Africa, situated in the S. part about 25 miles N. of the Orange River, and 70 miles N. E. of Steinkopf; terminus of the railway to Port Nolloth. It was first occupied as a mission station by Dutch missionaries in 1806. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 1 native worker, 1 outstation, 1 day school, 1 Sunday school, and 310 professed Christians, of whom 156 are communicants.

WARREN, Charles Frederick: Born at Margate, Kent, 1841. Died at Fukuyma, June 8, 1899. In 1873 was sent to the Osaka Mission, Japan, under the CMS. The first missionary at Osaka, he was principal of the theological college at that place. For a year he was appointed to the ministry of St. John's, Ashbourne, on account of the illness of Mrs. Warren; but after her death he returned to Japan, in 1888, as Secretary of the Mission. He was appointed Archdeacon of Osaka and Central Japan. Mr. Warren exerted a great influence in the Foreign Concession of Osaka, in the municipal council of which he was, for years, the president; and his ability was recognized, more or less, throughout the Japanese Empire, and, especially, to his previous residence and work in China, in the Far East generally. He was a prominent member of several committees for the translation or revision of the Bible, prayer-book, and hymn-book; and as one of the originators of the Christian Conference (on Keswick lines) at Arima, his ripe experience and wise counsel proved most helpful. Under the blessing of God he lived to see the fruit of his twenty-five years' life at Osaka in the organized work of the CMS, in the development of the Osaka Settlement into the model of a Christian civilized community, and in the better understanding of all Christians for the redemption of Japan. He was author of Family Prayers for a Week, in Chinese; Scripture Catalogue of Faith and Duty, in Japanese; Book of Prayers for Family and School Use, in Japanese; and he was one of the translators of the prayer-book into Japanese, and a member of the revising committee for translation of the Old Testament into Japanese.

WALKBURG: A town in Cape Colony, situated in Kaffraria, about 10 miles N. of Stutterheim. Station of the Berlin Missionary Society (1865), with (1903) 1 missionary, 8 native workers, 3 outstations, 1 day school, 1 Sunday school, and 387 professed Christians, of whom 163 are communicants.

WATERBERG: A village near the railway, between Pretoria and Pietersburg, at the foot of the Waterberg Mountains, on the slope of which is Warmbad, with its hot spring. The mountains give name also to a mission of the WMS, of which statistics are given under Makapan. Station of the Berlin Missionary Society (1867), with (1903) 1 missionary, 16 native workers, 7 outstations, and 1,013 professed Christians. Some call the station Modimolle.

WATERLOO: A town in Sierra Leone, West Africa, situated about 15 miles S. E. of Freetown. Station of the CMS (1819), with (1903) 23 native workers, 10 outstations, 1 place of worship, 1 Sunday school, 9 day schools, and 1,374 professed Christians, of whom 600 are communicants. Also station of the UMFC (1879), with (1903) 1 missionary and his wife, 32 native workers, 3 places of worship, and 283 professed Christians, of whom 192 are communicants. Also station of the WMS, with (1903) 1 missionary, 2 native workers, 3 outstations, 8 places of worship, 3 Sunday schools, 3 day schools, and 434 professed Christians, of whom 345 are communicants.

WATTERLOO: A town in Dutch Guiana, South America, situated about 10 miles S. of Nickerie. Station of the Moravian Mission Society (1859), with (1903) 1 missionary and his wife, 22 native workers, 2 places of worship, 1 day school, and 224 professed Christians.

WATHEN: See Noombe.

WAZIRABAD: A town in the Punjab, India, situated about 30 miles S. of Sialkot. The town is comparatively new, and has only recently risen to importance. It is much better and more regularly built than most native towns, all the houses are mostly made of sun-dried or kiln-burned bricks. Population, 16,462. Station of the Church of Scotland Foreign Missions (1863), with (1901) 1 missionary, 15 native workers, 8 outstations, 4 day schools, and 25 professed Christians.

WEASISI: A station in the northern part of Tanna, New Hebrides.

WEI-I-AI-WEI: A seaport and military post in Shan-tung, China, situated at the entrance of the Straits of Chili, and temporarily occupied by Great Britain under lease. Station of the PB, with (1900) 3 missionaries, two of them with their wives.

WEI-HISIEN: A town in Shan-tung, China, situated about 150 miles S. W. of Teng-chau-fu, an important center, which will be a station on the German road from Kiao-chau. Population, 100,000. Station of the PN (1882), with (1903) 4 missionaries and their wives, 4 women missionaries, 88 native workers, 124 outstations, 20 places of worship, 48 day schools, 9 boarding schools, 1 dispensary, 1 hospital, and 3,000 professed Christians. The college from Teng-chau-fu is to be removed to this place. Some write the name Wei Hien.

WEI-HWEI: A town in the province of Ho-ann, China, situated on the Wei River, about 50 miles S. by W. of Chang-te-fu. Station of the FCC (1903), with 3 missionaries, 1 place of worship, 1 dispensary, and 37 professed Christians. This town takes the place of Hsin-cheng in the list of the Society's stations, this latter place is now an outstation of Wei-hwei.
of Missions of the: Welsh Calvinistic Methodists, Foreign Missions of the: Welch Calvinistic Methodists of Wales interest in missionary work began to take an increasing form and at the time when the London Missionary Society was established. They contributed liberally to its funds, and several of the most useful missionaries of that Society had been trained in their churches.

But the growing desire that the connection should have a mission of its own led ultimately to the organisation of the Welsh Calvinistic Methodist Foreign Mission Society in Liverpool in January, 1840. In 1834 the British Government completed a treaty with the chiefs of the Hali Hills in Assam, a road made across the Hali Hills to the British territory in the Brahmaputra valley. When the Welsh Foreign Missions were planned in 1840 the attention of the fact that the Directors was called to the Rev. W. Pryce commenced operations at Jowai, the chief village in the Jaintia Hills, and in subsequent years the work was extended to various other parts of the hill country. In 1849 the Rev. W. Pryce commenced operations at Sylhet, in the plains of the Brahmaputra region. The work was carried on vigorously, and not without some degree of success, circumstances occurred which made it advisable to limit the operations of the mission to the hill country, and until 1887 the large district around Sylhet was left unoccupied, when in that year the mission was again enabled to resume its work. The mission field in India is divided into 15 districts: 10 in the hills, and 5 in the low country to the southward, which was transferred from Bengal to Assam in 1879. Day schools, evangelistic work, publishing, and medical work are all features of the mission.

An indication of the growth of the work is given by the fact that the districts have doubled since 1860. There are now (1902) 439 preaching stations, against 136; 331 Sunday schools and 116, against 141; 2,809 scholars. There are now 5,616 communicants, while the total attendants at churches number 16,659. There are 10 ordained missionaries in the hills and 2 women missionaries, and in the plains, 8 ordained and 5 women missionaries.

Recently work has been commenced in the Lushai Hills, in the extreme southwest of Assam. Two missionaries are located here, but their enterprise is still in its infancy. There are 13 native ministers, and 48 preachers who have been admitted to the presbytery, some of them being pastors and others in charge of schools. There is a theological institution at Cherra, and there are 401 day schools, with 8,241 scholars (2,689 girls), and a medical mission in the Jaintia Hill district.

In 1842 the Society organized mission work among the Bretons in Western France, and still has a small mission work in Brittany. There are 3 stations, each with 1 missionary, 5 churches, 74 converts, and 71 adherents not admitted to membership. The influence of the work, however, extends far beyond the immediate Protestant community.

There is also a woman's branch of this Society, with headquarters at 20 Sherlock Street, Liverpool, which aids in the collection of funds, but does not carry on independent work.

WEN-CHAI-FU: A town and treaty port in Chekiang, China, situated about 160 miles S. E. of Hang-chow, China. Population (1901) 80,000. Station of the CIM (1867), with (1903) 2 missionaries and their wives, 4 women missionaries, 17 native workers, 22 places of worship, 1 day school, 1 boarding school, and 448 professing Christians. Also station of the UMFC (1877), with (1903) 5 missionaries, three of them with their wives; 156 native workers, 6 outstations, 6 day schools, 7 Sunday schools, 1 dispensary, 1 hospital, and 3,294 professing Christians, of whom 1,294 are communicants. Some write the name Wen-chow.

WEN-LI: Name applied to the classical or book language of China, is distinguished from the colloquial. To write in the same natural way as one would talk is contrary to Chinese teaching and practice; and the classical book style so abound in stilted, condensed, epigrammatic phrases, that a man who has not mastered the literary style is unable to understand the sense, even tho he may be able to recognize the characters or ideograms. A variation of the Wen-li is the Easy Wen-li, which is not so severely independent of the spoken dialect.

WEN-SAN, or GEN-SAN: A town and seaport in Korea, situated on the E. coast, about 120 miles N. E. of Seoul. Station of the PCC (1893), with 2 missionaries and their wives, 2 women missionaries, 1 native worker, 1 outstation, 1 place of worship, 2 day schools, 1 Sunday school, and 125 professing Christians, of whom 77 are communicants. Also station of the MES (1900), with 1 missionary and his wife, 2 women missionaries, 1 dispensary, and 205 professing Christians, of whom 55 are communicants. The station of the ME was transferred to the MES in 1902.

WEN-TENG-HSIEN: A town in Shan-tung, China, situated about 12 miles S. of Wei-hai-wei. Station of the PB, with (1900) 1 missionary and his wife.

WESLEYAN METHODIST MISSIONARY SOCIETY: History. The first distinctively foreign missionary of Wesleyan Methodism was Dr. Coke. As early as 1744, through the efforts of Whitefield, special hours of prayer for the outpouring of the spirit of God upon all Christian churches and upon the "whole inhabited earth" were observed, and John Wesley went to North America to preach. From that time onward missions in the British possessions in North America were carried on, and numerous preachers were sent out. These missions, however, were mainly intended for the benefit of British colonists, and missions to the heathen were not undertaken until 1786.
when Thomas Coke, destined by the Methodists in England for Nova Scotia, was driven to the British West Indies, where a mission to the negro slaves was at once commenced. In his hand the conduct of the Wesleyan missions was mainly placed until 1804, when, upon his departure for America, a committee of three was appointed by the Conference to undertake the management of the work. It was Dr. Coke's instruction that a mission to West Africa was undertaken in 1811, and after crossing the Atlantic eighteen times, when he was 76 years old, he again sailed, with six other missionaries, December 31, 1813, to Ceylon to find there the third Methodist mission. His death, early in the following year, made necessary other arrangements for carrying on the work; the Society was accordingly reorganized, and in the course of a few years was placed on its present permanent footing.

The management of the missions and the collection and disbursement of funds are entrusted to a committee appointed annually by the Conference, as are also the general secretaries and two treasurers, a minister and a layman.

Development of Work: Before the death of John Wesley, his teachings had been extended into Ireland, Scotland, the Shetland Isles, and the Channel Islands; and the first years of the new century saw the Methodists at work among the French prisoners in England and in the French prisons. As early as 1757 missions of seventy persons was reported at Arras, France, and Methodism rapidly extended to other parts of the country. Work was begun in Germany in 1815 by Christopher Gottlob Müller, who had been converted through the instrumentality of a Wesleyan minister; in Switzerland in 1839, by the Wesleyan missionaries already at work in the south of France; at Gibraltar in 1809, from whence Spain and Portugal were reached; and in Italy in 1860, after the revolution in the civil government, began to arrange his plans, and missionary the government had been occupied in erecting jails, barracks, and other public buildings necessary for the civil, military, and convict establishments, but very little had been done for the religious and moral improvement of the people. Indeed, the whole aspect of affairs—the state of society, the mode of government, the discipline adopted in the management of convicts, and the temper and spirit of everything and everybody—appeared cold, cruel, and repulsive in the extreme. Nevertheless, Mr. Leigh (1815), having secured the countenance and protection of the colonial government, began to arrange his plans, and mapped out a wide circuit in which to itinerate. From Sydney he extended his labors to Parramatta, where he met the Rev. Samuel Marsden, and, with the consent of the government, was appointed minister to the troops and convicts, and afterword identified with missions to New Zealand. Assistance was given by Methodists in Australia, reinforcements were sent from England and

Among the convicts, and the Rev. Samuel Leigh went for this purpose to Sydney in August, 1815. Missions to New Zealand were established there in 1821, to Victoria in 1838, and to Queensland in 1850. The mission to the cannibals of New Zealand was commenced in 1822; in the same year a missionary was also sent to the Friendly Islands, but it was not until 1826 that a mission was established there. As soon as this work was on a firm basis, the missionaries endeavored to do something for Fiji, but some years elapsed before the mission to Fiji became an actual fact. Work in China was undertaken in 1853.

As a result of this development the Foreign Missions of the Wesleyan Methodist Missionary Society are classed in three departments:

A. Missions originated by the Society but now entirely independent and under the direction of Colonial Conferences: Canada, Australia, New Zealand, and the South Seas Islands.

B. Missions under the immediate direction of local Conferences but aided by the Society: Ireland, France, West Indies, and South Africa (Cape Colony, Natal, Orange River Colony).

C. Missions still under the immediate direction of the British Conference: Europe (Italy, Spain, Portugal, Gibraltar, Malta, Cairo); Ceylon: India (North and South); China; South Africa (Transvaal, Swaziland, Rhodesia); West Africa (Sierra Leone, Gold Coast, Lagos); Western Hemisphere (Bahamas, Honduras and the West Indies).

A. Missions originated by but now independent of the WMMs.

Canada: The work in this country was from the first chiefly colonial, and the organization of the Canadian Methodist Missionary Society in 1824 early took the care of the work among the Indians from the parent Society.

Australia: It is perhaps doubtful whether a mission was ever commenced in any part of the world under more discouraging circumstances than was that of the Wesleyan Society to Australia. New South Wales was chiefly a community of convicts, with bands of savage natives on its borders. The free settlers and squatters, widely scattered and entirely destitute of religious instruction, were only a few degrees above the convict population. Up to the time of the arrival of the first Wesleyan missionary the government had been occupied in erecting jails, barracks, and other public buildings necessary for the civil, military, and convict establishments, but very little had been done for the religious and moral improvement of the people. Indeed, the whole aspect of affairs—the state of society, the mode of government, the discipline adopted in the management of convicts, and the temper and spirit of everything and everybody—appeared cold, cruel, and repulsive in the extreme. Nevertheless, Mr. Leigh (1815), having secured the countenance and protection of the colonial government, began to arrange his plans, and mapped out a wide circuit in which to itinerate. From Sydney he extended his labors to Parramatta, where he met the Rev. Samuel Marsden, and, with the consent of the government, was appointed minister to the troops and convicts, and afterward identified with missions to New Zealand. Assistance was given by Methodists in Australia, reinforcements were sent from England and
the work prospered. In 1864 funds were secured for a Wesleyan College at Sydney, and the formation of the Australasian Methodist Missionary Society (organized in 1822 as an auxiliary and in 1855 as a separate Society) relieved the parent Society of responsibility for work in that section of the world. The fields specially under the care of this Australasian Society are Samoa, Fiji, New Britain, New Guinea, China, the Chinese in Victoria, New South Wales, and Queensland; and the Indian Coolies of Fiji. In 1900 the Bible Christians of Australia united with the Methodist churches, and the combined forces (1898) represented 55 missionaries, 3,903 native workers, in 22 principal and 1,411 outstations, with 100 organized churches and 35,275 communicants.

**New Zealand**: In 1818 the Rev. Samuel Marsden persuaded Mr. Leigh to take a trip to New Zealand, and as a result, at a visit to England he laid before the committee a proposal for the commencement of a mission to the cannibals of New Zealand. The Society was at that time laboring under a heavy debt, but Mr. Leigh, by forceful appeals to the conscience of many parts of England, obtained contributions of goods of various kinds, which in New Zealand would be more valuable than money itself, and the Society undertook to commence the new mission without delay. About this time two Maori chiefs arrived in London with Mr. Kendall of the Church Missionary Society; their appearance gave a new impulse to the plans for New Zealand; the necessary preparations were soon completed, and the party of missionaries—consisting of Mr. and Mrs. Leigh, Mr. and Mrs. Horton, appointed to Tasmania, and Mr. Walker—sailed from England on April 28, 1821. Work was commenced at Wangaroa in 1822. Up to 1830 the mission met with no success, and for a time the work was broken up. Then the growth and the advance was most marked, and when in 1855 the work was passed over to the Australian Conference there was a large community of European and Maori Wesleyans. Subsequently the Maori church was greatly depleted, but after the establishment of the New Zealand Conference (1874) it revived.

**South Seas**: These missions include those in the Friendly Islands, Samos, Fiji, and New Britain (Neu Pommern). In June, 1822, about twenty-two years after the last surviving agent of the LMS had escaped from the Tonga Islands, the Rev. Walter Lawry, with his family, sailed from Sydney, and the following August anchored off Tonga. Among the hundreds of natives who came off the shore in their canoes was one Englishman, named Singleton, who had lived sixteen years on the island, being one of the survivors of the ill-fated "Port-au-Prince," whose crew had been massacred in 1806. He had become a thorough Tonga man in manners and language, but became very useful to Mr. Lawry as an interpreter and in other ways, and were long himself accepted the Gospel. Mr. Lawry was kindly welcomed by chiefs and people, and tho the habitual fickleness of the people manifested itself, there was some success and in 1826 other missionaries were sent out by the Society. Urgent calls come from other islands, and at Vavau, Hapai and Mau the progress was phenomenal. Special attention was paid to education and the preparation of Christian literature, and in 1870, it was affirmed that not a single heathen remained in the Tonga Islands.

One of the results of the revival in the Friendly Islands in 1834 was the commencement of a mission to Fiji, which was undertaken by the missionaries (one of whom, Mr. Watkin, went to England to plead there the cause of "poor Fiji"), seconded by King George and some other zealous disciples from Tonga. The Fijians at that time were atrocious cannibals, even exceeding the people of New Zealand, the New Hebrides, and other islands in this and in war, polygamy, adultery, murder, suicide, deception, fraud, theft, and many other crimes. In October, 1832, Messrs. Cross and Cargill, with their families and several converted Friendly Islanders, and a few Fijians returning to their own country, embarked in a small schooner, the "Blackbird," and, landing at Lukemba, commenced the work destined to be both hard and perilous, but also so blessed. Perhaps there never was a harder struggle between light and darkness, truth and error, than that which took place in the course of the Fiji Mission, but the missionaries persevered and pushed forward, and had their reward in the victory which crowned their efforts at last. Thecession of the islands to Great Britain in 1874 facilitated the work, which has been continued under the auspices of the Australasian Society.

As the mission to Fiji was the outgrowth of the work in the Friendly Islands, so that in New Britain resulted from the work in Fiji. The conclusion of the Convention of 1874, which took place in the course of the Fiji Mission, pronounced their efforts at last. The conclusion of the Convention of 1875 by a company largely made up of native teachers from Fiji, there were the usual experiences of hostility and bloodshed, but the courage of the little band never faltered, the places of those who had fallen were soon filled and the work went on. The results of the mission to Fiji in the neighboring islands. The result was that missionaries were sent out in 1787 and in the course of a few years almost every colony was reached.

---

*West Indies*: In January, 1758, Mr. Wesley preached in the house of Nathaniel Gilbert, Esq., the Governor of the English Colony in Antigua; who was at that time residing in England. Several of Mr. Gilbert's negro servants were also present and appeared much affected by the sermon. Later on, two of these slaves were baptized by Mr. Wesley. Mr. Gilbert, too, became identified with the Methodist people, and upon his return to Antigua commenced at once to hold religious meetings for his own people and those of the surrounding estates, and in every possible way laboring for their good until his death. Two of the slaves kept up the work with a Mr. Baxter, a shipwright and a Methodist local preacher, did what he could. Repeated appeals were made to England, but it was not until 1786 that Dr. Coke, driven out of his course to Nova Scotia by a storm, landed at Antigua, became interested in the situation there and in the neighboring islands. The result was that missionaries were sent out in 1787 and in the course of a few years almost every colony was reached.
In 1885 the British Conference, contrary to the judgment of the Missionary Committee, decided that the time had come to close the Cape Mission, and accordingly the entire work of the Society in that section, excepting Bahamas and Honduras, was so set apart. Two conferences were found, a Western, including Jamaica, Haiti, San Domingo, Panama and Costa Rica, and a Northern, including the Isthmus, St. Vincent, Barbados, Trinidad, and British Guiana. All of these sections have suffered heavily in recent years, and while the churches, notably in Guiana, have been ordinarily prosperous, the general situation is such that (1893) it has been necessary to bring them back under the care of the British Conference.

**South Africa:** In 1815 the Rev. Barnabas Shaw was appointed to commence a Wesleyan Mission in Cape Colony. Permission to preach was refused, but he took matters into his own hands and preached without the governor’s sanction. His congregations, however, were composed principally of soldiers, and his greatest desire being to preach Christ to the heathen, he gladly availed himself of an opportunity which offered, through Mr. Schmelen of the LMS. The River resulted in the establishment of the mission north of Orange River. In September, 1815, Mr. Schmelen and Mr. Shaw, with their families, attendants, and supplies, set out on their long journey. On the 4th of October, after crossing the Elephant River, Mr. Shaw unexpectedly found his sphere of labor in meeting the chief at Little Namaqua, accompanied by four men, on his way to Cape Town to seek for a Christian teacher, so that his tribe, like others, might have the advantages which he had seen follow the introduction of the Gospel. Mr. Shaw agreed to go with the chief to Little Namaqua, accompanied by four men, and to remain with him and his people, while Mr. Schmelen continued his journey to his own station in Great Namaqua. About three weeks later the chief and his party reached Lily Fountain, on Kamiesberg, the principal home of the chief of the tribe of Little Namaqua. The party consisted of natives who had come out to welcome them, and from that introduction the work prospered, and was extended by tours into Great Namaqualand and Damaraland. An attempt to establish a mission north of Orange River resulted in the murder of the company of missionaries and native teachers, but another effort was more successful. Subsequently, on the entrance of German societies, the work beyond the Orange River was transferred to the Rhenish Missionary Society.

In the year 1830 a second attempt was made to start a Wesleyan Mission in Cape Colony, and Mr. Edwards was directed to proceed thither from Little Namaqua. With the cordial permission of the governor to preach to and instruct the slave population of the town and neighborhood, he began his work, which he for some time prosecuted with success, and in which he was succeeded by other missionaries sent out from England. Chapels were built in various parts of Cape Town, with which were connected prospecting parties into Natal. The work had extended also into the Graham’s Town and Queenstown districts. Mission work was commenced in Bechuana in 1822, tho it was some little time before it was successful. In 1841 a Wesleyan missionary accompanied the British troops into Natal, and after a time of service for the English and Dutch inaugurated a work for the natives. The churches in the whole section, English and Kafir, grew rapidly, and in 1882 the South African Conference was organized and assumed the entire, among those of the native South Africa, excepting that in the Transvaal, Swaziland, and Rhodesia, which remained under the direction of the parent Society.

C. Missions under the British Conference.

1. Western Hemisphere.
   1. Honduras: In British Honduras four stations are occupied: Belize, Corozal, Stann Creek, and Toledo. In Spanish Honduras the stations are Rosten and San Pedro Sula. The work is among the foreign population and among the natives, including the mahogany and logwood cutters. There are (1903) 32 chapels, 17 other preaching places, 18 missionaries and assistants, 41 teachers, 25 catechists and local preachers, 1,737 communicants, 26 schools, 1,453 scholars (including S. S. scholars, 2,254), attendants on services, 6,180.
   2. Bahamas: The work here was commenced in 1803 by Rev. William Turton, a native of the West Indies, at New Providence. It has been extended until there are stations at Nassau, Rock Sound, Tarpum Bay, Governor’s Harbor, Harbor Island, Great Abaco, Andros and Bimini, and Key West. The report of (1903) shows 29 chapels, 9 other preaching places, 12 missionaries and assistants, 7 teachers, 111 local preachers, 3,561 communicants. The number of day schools is small—4, but special attention is paid to Sunday schools, which number 30, with 3,795 scholars; attendants on services, 1,156.
   3. West Indies: As mentioned above, the British Conference is now taking charge of this work, for some time cared for by local Conferences.
   2. Ceylon: Notwithstanding repeated appeals, the Society did not feel willing to undertake work in India, until Dr. Coke offered to lead the enterprise and to provide the necessary initial expense, to the amount of £6,000. In 1813 he and six young missionaries started. Dr. Coke died on the voyage, but his colleagues resolved to carry on the undertaking. They reached Colombo, Ceylon, were kindly received by the governor, and several places were named to them as greatly in need of the Gospel and of schools for the training of native children. It was decided to open stations at Colombo, Galle, and Matura in the south, and others north of the Mahawel, with the view of reaching the native population which speak Sinhalese, and at Jaffna and Batticaloa in the north, where the Tamil language is in common use. In a very short time the missionaries were able to preach to the natives, and also to Dutch and Portuguese colonists. Schools were organized, a printing-press was set up at Colombo, a Sinhalese grammar and dictionary were prepared, and the work flourished in all its departments—literary, evangelical, and educational. In addition to those already mentioned, important stations were established in Southern Ceylon, at Negombo, Kandy, Cultura, Bentura, Seedua, Morotto, Wellewatta, and other places; while in North Ceylon, where the Tamil language had been conquered and several native teachers trained for the work, chapels and schools were established, not only in the villages adjacent to Jaffna, but also at places at a considerable distance, which were afterward occupied as separate stations. As at present organized the work is divided into four districts: Colombo, Kandy, Galle, and Jaffna.

There are two colleges, Wesley College, at Colombo, and Richmond College, at Galle.
are also several industrial schools and medical work is developed, while the system of day schools is well arranged. Considerable attention is paid to the needs of the English and Portuguese communities, but the chief work is in the Tamil and Sinhalese languages. The report (1903) shows for the four districts, 82 local preaching places, 86 missionaries and assistants, 242 local preachers, 7,952 communicants, 507 day schools, with 17,003 pupils, and about 15,000 attendants on services.

4. China: In 1852 Mr. Piercy, who had for some time labored in China at his own expense, offered his services to the Wesleyan Society, was accepted by them, and appointed to Canton, where he remained until the war between England and China forced him, with other missionaries, to take refuge in Macao. During the two years spent there he continued the study of the language with unabated zeal, and upon the restoration of peace, in 1858, returned to Canton. In 1860, upon the receipt of a legacy intended expressly for the Indis and China missions, the Committee was enabled to largely extend its work. The staff of workers was increased in numbers, and a new station commenced at Pat-shan. In 1862 a work for the English residents takes an important place. The report shows for the 8 districts 152 chapels, 267 preaching places, 130 missionaries and assistants, 224 local preachers, 8,035 communicants, 570 day schools, with 27,866 scholars, and more than 20,000 attendants on services.

5. South Africa: The missions in South Africa, retained under the care of the British Wesleyan Conference and thus controlled by the Missionary Society, include the Transvaal and Swaziland, and Rhodesia districts. The former is divided into three sections: Johanna'sburg, Pretortia, and Mafeking. The Rhodesia district is divided into the Mashonaland and Matabeleland sections. The report (1903) shows in the two districts 151 chapels, 282 other preaching places, 53 missionaries and assistants, 559 local preachers, 51 catechists, 9,682 communicants, 61 day schools, with 56 teachers and 2,970 scholars. Especially in the Transvaal section it is impossible to distinguish between the work for English and Dutch and that for the natives.

6. West Africa. (1) Sierra Leone and Gambia: Dr. Coke's first mission (1789) for the civilization of the Fulas, in the neighborhood of Sierra Leone, proved a failure. Some of the company sent out died of fever before reaching their destination, others absconded, and the rest returned home. In the year 1811 the Rev. George Warren and three school teachers were sent to Sierra Leone. Upon their arrival in the colony they found about one hundred persons, chiefly free blacks from Nova Scotia, who had received the Gospel at the hands of Wesleyan missionaries there. They had already built a chapel, and had sent repeatedly to England for a missionary. After eight months of labor Mr. Warren died of fever, and for many years there was much loss of life from the climate. Eventually, however, this was to a good degree overcome, the work was developed into surrounding country, including a settlement at the mouth of the Gambia. The principal stations are Freetown, Wellington, Waterloo, Sherbro, etc., in Sierra Leone, and Bathurst in the Gambia section.

(2) Gold Coast: The work of the Society in this section commenced in an effort to provide for some native boys who had learned to read the Bible in the Government school. In 1845 the Rev. Henry Wharton, a native of the West Indies, went out, and, with the help of several native missionaries and some Europeans, the foundations for a successful work were laid. Stations were formed at Cape Coast Castle, Accra, and a number of other places, while the Lagos region, including Abeokuta, Yoruba Interior, Porto Novo, etc., was set apart as a separate mission district. The report (1903) shows in the three districts 212 chapels, 787 other preaching places, 61 missionaries and assistants, 109 catechists, 777 local preachers, 214 teachers in 159 day schools, with 11,748 pupils, and 19,180 communicants.

(3) Portugal: Lisbon and Oporto.

(4) Mediterranean: Gibraltar, Malta, and Cairo.

A considerable amount of the European work is for English residents, and of that at Malta and Gibraltar for the soldiers.

The report for the European Missions (1903) shows 24 chapels, 75 other preaching places, 44 missionaries and assistants, 19 catechists, 62 teachers in 42 day schools, with 2,225 scholars, and 2,199 communicants.

The Wesleyan Society emphasizes Sunday school work, and in most cases the number of Sunday school scholars exceeds the number of those in the day schools.

The Women's Auxiliary of the Wesleyan Methodist Missionary Society, organized in 1858, carries on its work in closest connection with the general society.

The Central China Wesleyan Lay Mission, which for some years represented a number of independent workers along the lines of the CWM,
was, in 1899, merged in the general Society, tho
in some cases the funds remain distinct.

WEST, Henry S.: Born at Binghamton, N. Y.,
January 21, 1827. Died at Sivas, Turkey, April
1, 1876. He studied at Yale College, and the
College of Physicians and Surgeons in New York
City. After practising medicine for some time,
he was appointed by the ABCFM a missionary to
Turkey, and sailed in January, 1859. He was
stationed at Sivas, at the western edge of the
Armenian highlands; but he journeyed far in
every direction to heal the sick. In fact his
missionary career of 17 years was remarkable.
His surgical skill, combined with his willingness
to endure miles to help a desperately sick
man, made him famous. The blind eyes which
he opened were past counting; the deformed,
the crippled, the diseased who were relieved or
cured by him would make a great host if assem-
bled together. His operations in lithotomy
alone were 150 or more, with barely half a dozen
unfavorable results. Wherever he went the
diseased, the halt, the blind thronged him, for
they thought his powers miraculous, like those
of Jesus. Probably no physician in the Turkish
Empire enjoyed an equal reputation among the
whole people. In addition to ceaseless labors of
this sort he trained quite a body of skilled native
physicians, who in the main did credit to their
teacher. While Dr. West treated the poor with
great and sympathetic liberality, he always
insisted on proper payment from Pashas and
others able to pay. But for himself he received
nothing but his missionary salary, paying over
all his professional earnings into the treasury of
the mission. In all of his career he was a warm-
hearted, sincere and earnest Christian and a
faithful missionary. He never showed nervous-
ness in the most difficult operation, and he never
flinched from duty. His devotion to duty cut
short his life. It was while attending one of the
very poor in Sivas that he contracted the byphus
fever which resulted in his death.

WEST, Maria Abigail: Miss West was born in
Palmyra, New York, March 27, 1827. She
entered Bowne Training School for
Turkey December 22, 1852, being appointed to
Constantinople. She had charge of the female
boarding school at Hasskeuy in that city for
about ten years. After a visit to America she
was stationed at Constantinople, at Marsovan,
and at Harpoot, engaged in all of these places in
work for women and girls, and for a time was in
charge of a female seminary at Harpoot. She
was a woman of great energy and rare ability.
Her book on the Romance of Missions; or, Life
and Labor in the Land of Ararat, is based upon her
experiences in various parts of Turkey, and has
great influence in developing missionary
zeal on both sides of the Atlantic. The first
primer in the Armenian language for children in
the mission schools was written by Miss West,
and has been widely used for more than a genera-
tion in many of the schools using Armenian in
different parts of Turkey. After leaving the
service of the ABCFM she organized coffee-houses
in Smyrna and Constantinople for sailors and
others. She was preeminently a pioneer, with
great power of initiative in all of her missionary
life. Miss West died in London June 28, 1894.

WEST INDIES: This group of islands extends
in a rude bow-like form from the coast of Florida,
Haiti became a republic in 1867. It occupies the western portion of the island, with an area of 10,204 square miles. The inhabitants are negroes and mulattoes. The capital, Port au Prince, has a fine harbor. The religion is nominally Roman Catholic.

The British West Indies—The Bahamas: These are twenty inhabited and many uninhabited islands off the southeast coast of Florida. The total area is 5,460 square miles. The principal islands are New Providence, which has been notorious as the home of buccaneers, pirates, and blockade-runners, and San Salvador, supposed to be the island first discovered by Columbus. On the west side of the island are quite a number of intelligent Africans. Eleuthera is over 200 miles long. Great Abaco is the most northerly island. Andros is the largest of the group, with a length of 90 miles and a breadth of 40 miles, its widest part. The remaining islands are: Great Bahama, Harbor Island, Long Island, Mayaguana, Great Inagua, Ragged Island, Rum Cay, Fortune Island, Exuma, Crooked Island, Bimini, Acklin's, and Eleuthery. The population is 64,368. The government is in the hands of a governor assisted by an Executive Council of 9, a Legislative Council of 9, and an Assembly of 29 representatives.

Jamaica: The island of Jamaica is about 150 miles long, with an average width of 50 miles. On account of its mountainous character the scenery is beautiful, and there is abundance of fresh water. The sagacity of Oliver Cromwell saw the future value of this island, and secured it to the British Government. Its area is 4,200 square miles, with a population (1802) of 770,242, of whom 500,000 were blacks. The capital is Kingston (46,542), and some of the other principal towns are Spanish Town, Montego Bay, and Port Maria. Attached to Jamaica for administrative purposes are the following smaller islands: Cave Island, area 9 square miles, population 5,000; Cayman Islands—Grand Cayman, Little Cayman, and Cayman Brea—with a total population of 3,500, the Morant Cays and Pedro Cays.

Barbados lies to the east of the Windward Islands, and has an area of 166 square miles. It is a very beautiful island, and the scenery is very varied and beautiful; almost the entire island is under cultivation. Population (1901) 195,000, of whom 115,000 were blacks. Bridgetown, the capital, has a population of 30,000, and is beautifully situated on the shores of the bay. The English began to exercise authority here in 1645. Since 1885 it has been separated from the Windward Islands, to which administration it formerly belonged, and has now a government of its own.

The Leeward Islands lie to the north of the Windward Group and southeast of Porto Rico. The islands are: Antigua, 170 square miles; Barbuda and Redonda, 62 square miles; Virgin Islands, 58 square miles; Dominica, 291 square miles; St. Kitt's or St. Christopher, 65 square miles; Nevis, 50 square miles; Anguilla, 35 square miles; Montserrat, 32 square miles. Population (1901) 127,434.

Windward Islands: These islands, with their area and population, are: Grenada, 120 square miles, 64,288; St. Vincent (q. v.), 122 square miles, 41,000; and the Grenadines. The principal cities are: Kingston, the capital of St. Vincent; Castres, the chief town of St. Lucia, and St. George, the capital of Grenada.

Trinidad lies immediately north of the mouth of the Orinoco. It is an island of extreme beauty and great fertility. In 1802 it was finally handed over to British rule by the peace of Amiens. Its area is 1,754 square miles, with a population of (1901) 255,148. Port-of-Spain is the capital (54,100). Tobago was annexed to Trinidad on January 1, 1889. It has an area of 114 square miles, with a population of 18,750.

The chain of the Lesser Antilles includes, besides the British Islands already mentioned, St. Thomas and its dependencies, belonging to Denmark, Guadaloupe and Martinique, with several smaller islands, belonging to France. These islands collectively have an area of 1,207 square miles, and a population (1901) of 416,420. Like the other islands of this chain these are of volcanic origin. Martinique was the scene of the terrible eruption of Mt. Pelee in May, 1902.

In addition to the lines of missionary work actively prosecuted by the Moravians and British and American societies among the three races on the islands, those of British birth or descent are not being neglected. The Wesleyans and the Jamaica Church of England Home and Foreign Missionary Society are especially interested in this growing class; and the latter is largely doing this work through the agency of catechists, superintended by about 100 clergy, who are one-third Englishmen-born and two-thirds Jamaica-born. The past and present influence of Romanism among the peoples of these islands is one of the greatest hindrances to the spread of evangelical truth; but as in Protestant Jamaica, we may hope that ere long the Bible may be the book most commonly found throughout the islands.

Whately, Mary L.: Born at Halesworth, Suffolk, England, the second daughter of Archbishop Whately. Died March 9, 1889. After her father's appointment to the See of Dublin the family removed thither. She was given the highest educational training, mental, moral, and religious, by her parents, and from her childhood was distinguished for uncommon activity, energy, and intelligence. She early gave herself to the service of Christ in works of kindness to the needy. After the Irish famine she and her mother and sisters spent most of their time in the ragged schools in Dublin. Subsequently, having acquired Italian, she was much occupied with teaching and visiting the poor Italians, who were numerous in that city. In 1858 she visited Cairo and the Holy Land, and in 1860 was ordered by her physician for her health to a southern climate. In Cairo she opened a school for neglected Muslim girls, the first attempt of the kind in Egypt. Taking with her a Syrian Protestant matron, she went into the streets and lanes near her home, and, persuading the mothers to let their girls come to her, read and taught them. She gathered nine little ones into her school. Later, home duties required her return, and while at home she read to her father the proofsheets of her second volume of Ragged Life in Egypt. Her father having died, she returned to Cairo. She soon opened a boys' school also. In 1889, at the suggestion of the Prince of Wales, Ismail Pasha gave her a site just outside the city walls, and friends in England aided her in the erection of a spacious building. The school increased to six hundred, half the boys and two-
thirds of the girls being Muslims, the rest Copts, Syrians, and Jews. All were taught to read and write Arabic, and all learned the Scriptures and Christian doctrine. In addition the boys received an excellent secular education, and the girls were taught plain and fancy needlework. Two high-class schools have also been established. Pupils of the boys' school are found all over the country, filling important positions in the railway and telegraph offices, mercantile houses, places under government, and in other situations of trust. In 1879 a medical mission was added to the schools, and with her own private means Miss Whately built a dispensary and patients' waiting-room, where several thousands of sick and suffering poor have been treated gratuitously and where she herself daily read and expounded the Scriptures to such as were willing to listen. Miss Whately's schools are now carried on by the CMS.

WHEELER, Crosby Howard: Born September 8, 1823. Died October 11, 1896. Entered Bowdoin College in 1843; graduated in 1847; entered Bangor Theological Seminary in 1849, completing his course in 1852. In 1850 he married Miss Lucy A. Whitman. In 1857, Mr. Wheeler and Mrs. Wheeler, with Mr. and Mrs. O. P. Allen, entered upon their work at Harpoot, and there they labored, with Mr. and Mrs. H. N. Barnum, for thirty-nine years. After the Turkish massacres in 1895 the circle was broken, Mr. and Mrs. Wheeler returning to the homeland. Dr. Wheeler mastered the Armenian language with unusual speed; shortly after entering the Harpoot field he mingled freely among the Turks, Armenians, Syrians, and Kurds, scattering the seeds of truth; and he was early impressed by the need of schools for boys and girls. In the basement of their hired house Dr. and Mrs. Wheeler began a school, and immediately discussions and controversies arose on every side, and much bitter opposition was shown, especially by the Gregorian clergy; but the pupils increased in number. For nearly twoscore years he worked for the multiplication of schools, and the improvement of their grades. When, broken in health, he returned to this country, he was prevailed upon by the British Government to organize the educational works of the Euphrates, which had grown up under his leadership, in which there were over five hundred pupils of all grades, over one hundred of whom were in the collegiate department, and about half of whom were girls. At this time there were in Harpoot alone over eleven hundred pupils, and in the territory covered by the station nearly five thousand. Soon after reaching Armenia, Dr. Wheeler insisted that "native pastors must be ordained over native churches and supported by them, and native churches must be ultimately self-governing and self-perpetuating." He gave the best thought and effort of his long missionary life to this policy; and by his book, Ten Years on the Euphrates, he did much toward impressing this important matter upon the mission boards in all parts of the world. Dr. Wheeler was a man of remarkable versatility. He was a preacher of unexcelled power; he possessed fine executive ability; he was an impressive teacher, and successful organizer of schools; and as a practical man of affairs he proved to be a most useful factor in the pioneer work at Harpoot. He planned and erected some thirty different buildings during his missionary experience; and he did on a small scale a publishing business, preparing himself a variety of text-books in both English and Armenian for the schools. As Dr. Creegan well says of his work for Harpoot: "He found chaos and disorder; he left a fairly well-organized Christian school system for both boys and girls, a group of self-supporting schools, self-governing, self-propagating Christian churches; a strong Home Missionary Society among the native churches for work in Kurdistan, and a college that is deeply entrenched in the confidence and affection of all classes, crowded with students, and yet unable to meet the demands that come from all sides for teachers in the lower schools."

Creegan (C. C.), Pioneer Missionaries, New York, 1903.

WETI: A village on Pemba Island, East Africa. Mission station of the University Mission.

WHAI-AN-FU. See Hwai-ngan-fu.

WHITMAN, Marcus: Born at Rushville (Go­ram), N. Y., September 4, 1802. Died November 29, 1847. Studied with private tutors and at Berkshire Medical College; appointed by the ABCFM as a missionary physician to Oregon. He arrived at St. Louis February, 1835, on an exploring tour with Rev. Samuel Parker, arriving at St. Louis in April, Council Bluffs, May 30; crossed the Rocky Mountains, reaching Green River, a branch of the Western Colorado, a rendezvous of the fur-traders, previous to August 17. The prospect for missionary labor among the Nez Perces and Flathead Indians seemed so favorable that it was deemed expedient for Dr. Whitman to return and procure associates before establishing a mission among them. For this purpose he directed his way homeward August 27. Dr. Whitman established himself at Wailatpu, among the Kayuses, 25 miles from Walla Walla. Having frequent occasion to visit the post of the Hudson's Bay Company at that place, he perceived that it was designed to hold that immense and valuable territory as a British possession. In part to forestall that design, and in compliance with a resolve of the mission, he, in October, 1842, crossed the Rocky Mountains in midwinter on horseback, arriving at St. Louis February, 1843, with fingers, nose, ears, and feet frost-bitten, in spite of furs and buffalo robes. He visited Washington, called on Mr. Webster, Secretary of State, and President Tyler, and by his earnest representations prevailed upon them not to cede Oregon to the British Government. A personal friend of Mr. Webster remarked: "It is safe to say that our country owes it to Dr. Whitman and his associates really to every foot of the territory west of the Rocky Mountains, and as far south as the Columbia River, is not now owned by England, and held by the Hudson's Bay Company." A sharp controversy has arisen over the verity of the incidents which give this importance to Dr. Whitman's foresight. The balance of evidence, nevertheless, favors the substantial correctness of the statements made above. Dr. Whitman wrote from Fort Walla Walla November 1, 1843: "I do not regret having visited the States, for I feel that this country must be either American, or foreign and mostly papal. If I never do more than to establish the fur-trading road to the Columbia River, and prevent the progress and reaction which would have followed the breaking up of the present emigration, I am satisfied." While at the East he published a pamphlet describing the climate and soil of the Western...
region, and its desirableness for American colonies. After a hurried visit to Boston, he was back again on the Missouri in March, and conducted more than a thousand emigrants in wagons over the Rocky Mountains.

At Whitman, Mrs. Whitman, two adopted children, and ten other persons, American emigrants, who had stopped at the station to winter there, were cruelly murdered by the Kayuse Indians, November 29, 1847, and the mission was thus broken up.

WILLIAMS, Rev. S. T.: Born at Tottenham, near London, England, June 29, 1796. Died at Erromanga November 20, 1839. At the age of fourteen, while an apprentice to an ironmonger, he showed great taste for mechanics, and acquired considerable experience in mechanical work. At the age of twenty he offered himself to the London Missionary Society as a missionary, and, after some special training, was ordained, and sent with his wife, November, 1816, to the South Sea Islands. He went to the island of Raiatea, one of the Society Islands, where he soon acquired a knowledge of the native language. Thence he went to Hoshine, where he found the natives had generally renounced idolatry. At the invitation of the King of Raiatea, the largest of the Society group, he went to that island, which became his permanent headquarters. His success here was remarkable, not only in Christianizing the people, but with Christianity introducing the arts and habits of civilization. In 1823 he visited, with six native teachers, the Hervey Islands and its desirableness for American colonists. In 1824, but was deterred by the nearness of the South Sea Islands being Christianized. He helped the people at their own request to draw up a code of laws for civil administration. He made great use of the language of Raiatesa to writing, translated with Pitman and Busacot the New Testament into it, and prepared books for the schools he had established. The vessel, during the next four years, he explored many groups of the South Sea Islands. In 1830 he set out in his vessel to carry the Gospel to the Samoan Islands, which had planned to do in 1824, but was deterred by the great distance. He found the character of the people. In 1832 he made a second visit to the Samoans, and found the people waiting for the Gospel. In less than twenty months an entire change had taken place in the habits and character of the Samoans. Chapels had been built, and everywhere the people seemed waiting to receive instruction.
sailed in 1833 for England, where he remained four years. During this time he had the Rarotongan New Testament printed by the Bible Society, raised $4,000 for the purchase and outfit of a missionary ship for Polynesia, wrote and published a *Narrative of Missionary Enterprises in the South Sea Islands*, and prepared plans for the establishment of a college for the education of native teachers, and for a high school at Tahiti. In 1838 he sent his wife again embarked, accompanied by ten other missionaries. After visiting the stations already established by him, and several new groups, he proceeded with one companion to the New Hebrides with the view of establishing a mission, but was met by hostile natives at Erromanga, by whom he was killed. A portion of his bones was recovered from the cannibals. It is supposed they were provoked to the deed by the ill treatment they had received from the crew of a vessel which a short time before had landed there.

**WILLIAMS, Samuel Wells:** Born at Utica, N. Y., September 22, 1812. Died, February 16, 1884. Graduated at the Rensselaer Institute, Troy, N. Y., in 1832. While there, he was, at the age of twenty, invited by the ABCFM to join a party about to start for China, as superintendent of the mission press, having learned to some extent the art of type-setting in his father's publishing house. He accepted the invitation, and June 19, 1833, sailed in the ship "Morrison" for Canton, China. Drs. Abel and Bridgman were the only Americans to welcome him. He rapidly gained a knowledge of the Chinese language, and became editor of *The Chinese Repository*, begun the year before by Dr. Bridgman, to which many able writers contributed, he himself furnishing 140 distinct articles. The *Celestial Empire*, published in Shanghai, says: "The Repository, extending through 20 volumes, is looked upon as of priceless worth, and the name of the editor will be long and honorably remembered by sinologists in connection with it." In 1835 he completed at Macao Meihurst's *Hokkeen Dictionary*. In 1837 he was one of a party sent to Japan to restore seven shipwrecked seamen to their home. They were landed at the published two ports, and returned with the men to Canton. Taking some of these sailors into his own house, he learned their language, translated for them the Book of Genesis and the Gospel of Matthew, and had the joy of seeing them embrace Christianity. This knowledge of the language thus providentially acquired led to his being appointed interpreter for Commodore Perry, who was sent by the United States Government to Japan fifteen years later. Soon after the press was established at Canton, Chinese interference with his native helpers compelled him to remove it to Macao; thence, later, it was transferred to Hongkong, and established again afterward in Canton, where, in December, 1856, his own dwelling and the entire establishment, comprising three presses and many fonts of type, with 7,000 printed books, were destroyed by fire. In 1866 he returned to the United States. During the three years spent at home he delivered a course of lectures on Chinese subjects, which were afterward enlarged and published under the title of *The Middle Kingdom*. With the proceeds of the lectures he secured from Berlin a font of movable Chinese type. Soon after the publication of *The Middle Kingdom* the trustees of Union College conferred upon him the degree of LL.D.

Restrictions forbidding foreigners to bring their wives to Canton having been removed, he was married, and with his wife sailed in 1848 for Canton, taking with him the new font of type. On arriving at Canton he found to his great joy regular public services in Chinese. His remarkable success as interpreter led to his appointment to the diplomatic service of the United States, with which he was connected from 1858 to his resignation in 1876. In 1857 he was Secretary of the United States Legation in Japan. In 1858 he aided William B. Reed in negotiating the treaty of Tientsin. In 1860-61 he revisited the United States, and delivered lectures before the Smithsonian Institution and elsewhere, returning to China in 1862 as Secretary of the United States Legation at Peking. Besides the *Chinese Repository*, which for twenty years occupied much of his time, he published *New Lessons in Chinese* (1841); *An English and Chinese Vocabulary in the Court Dialect* (1843); *The Chinese Commercial Guide* (1844); *A Tonic Dictionary of the Canton Dialect* (1856); *A Syllabic Dictionary of the Chinese Language* (1874), containing 12,521 characters. On this dictionary, a work of great philological value, he spent eleven years. His *Middle Kingdom*, the best work extant on Chinese government, geography, religion, and social life, reappeared in 1883 in a revised and enlarged edition. Retiring from the service of the government in 1876, he returned to the United States, took up his residence in New Haven, was appointed professor of Chinese at Yale College, and in 1881 was elected president of the American Bible Society. To the end of his life he was, by himself and in his words, a witness of the dignity and inspiration of the missionary calling.

**WILLIAMS, William Frederic:** Born at Utica, N. Y., January 11, 1818. Died at Mardin, Turkey, February 14, 1871. Studied at Yale College, and was subsequently engaged in various employments, mostly in engineering, till 1844, when he entered Auburn Theological Seminary to prepare for the ministry. In November, 1846, he offered himself to the missionary work, in which his elder brother, Samuel Wells Williams, was engaged in China. He was ordained in 1848; sailed January 3, 1849, for the Syria Mission. In the summer of 1850 he was designated to Mosul. There he remained till 1859, when he commenced the station at Mardin. He had a fine knowledge of Arabic. His clear mind had been carefully cultivated and his acquisitions were very exact. However much he distrusted his own judgment, his associates confided in it largely. Few missionaries have secured the affection of the people for whom they labor as he did. He was, in a sense, the mainstay of the mission work among the Arabic-speaking peoples of Northern Mesopotamia during years of trial and perplexity when it seemed often as if the mission would be compelled to withdraw, and to his patient, wise perseverance is very largely due the success that is now attending the labors of the missionaries in that field.

**WILLIAMS, Rev. S. T.:** A missionary of the Southern Baptist Convention; born in Floyd Co., Va., February 12, 1849. Died in Canton, China, April, 1903. His work lay among the Hakka people, where his labors were greatly
Williamson, Alexander: Born in Falkirk, Scotland, December 5, 1829. Died at Shanghai, China, August 28, 1890. Studied at Glasgow; ordained April, 1855; sailed as a medical missionary of the LMS May 21 for China, arriving at Shanghai in January, 1856; was stationed for two years at Shanghai and Ping-hu. His health failing, he returned to England in 1858, and his connection with the Society soon terminated. After some years spent in Scotland, he returned to China as the agent of the Scottish Bible Society, and in connection with the United Presbyterian Mission. He was at first stationed at Chefu, and traveled extensively, making adventurous journeys into unknown and distant regions. Much valuable information was obtained, which in 1879 was published in two volumes. He was afterward settled in Shanghai, where he established the Society for the Diffusion of Christian and General Knowledge among the Chinese. He was a frequent contributor to the North China Daily News.

Williamson, Thomas S.: Born in Union District, S. C., March, 1830. Died at St. Peter, Minn., June 24, 1879. He graduated at Jefferson College, Penn., and at Yale Medical School, and practised medicine for ten years in Brown County, Ohio. After spending one year in Lane Theological Seminary, he was licensed and ordained by the Presbytery of Chilicothe, and in 1855 left Ripley, Ohio, as a missionary of the ABCFM, with his family, reaching Fort Snelling, in the country of the Dakotas, in May. He remained in connection with the ABCFM for thirty-six years, until 1871, when he and his son, Rev. John P. Williamson, transferred themselves to the care of the Presbyterian Board.

He fully believed in the capability of Indians to become civilized and Christianized, and also that God had by special providences called him to this work. His great life-work—that of translating the Bible into the language of the Sioux Nation—was continued through more than twoscore years, and was only completed in 1889. In this, as in most things, he worked slowly and carefully. He lived to read the plate-proofs of all, and to know that the Scriptures of the Old and New Testaments were in the language of the Dakotas.

Wilson, John: Born at Launder in Barbishire, Scotland, December 11, 1804. Died December 1, 1875. At the age of fourteen he went to the Edinburgh University, where he graduated in 1828, taking a high place in the classes of physical science, and in the last two years studying anatomy, surgery, and the practice of physics. The reading of the reports of the Bible Society, he said, first awakened him to the importance of missions, and led him to resolve to devote himself to a foreign field. He was ordained in 1828, and sailed August 20 of the same year for India, under the Scottish Missionary Society, reaching Bombay February, 1829. He gave himself to the acquisition of the vernaculars of a varied population—the Marathi, Gujarati, Hindustani, Hebrew, Portuguese, with Persian, Arabic, and Sanskrit for the learned classes. All these he acquired and fluently used. Almost his earliest work in Bombay was the preparation

of a Hebrew and Marathi grammar for the Jews, known there as Ben Israel. He also spoke the Portuguese with fluency in the very early days in order to influence the Hindu, Mohammeedan, Parsee, Jewish, and Portuguese communities. His advance in Sanskrit was parallel with his acquisition of Marathi, so that he was able to confute the Brahmans out of their own sacred books. He soon commenced a series of discourses on Christianity with Hindus, Mohammeedans, and Parsees. Having mastered the languages, he mingled with the people who spoke them, and made many tours to Nasik, Poona, the caves of Ellora, and other prominent places. He was aware that for some time his till must be that of preparation, he worked for and expected converts from the first. So in February, 1831, he formed in Bombay a native church of eight members. In 1836 was established in Bombay an English college for the Christian education of native youth among Parsees and Hindus, and Dr. Wilson threw the whole weight of his culture and energy into the new institution. Organizing this college was the great work of his life, and its effectiveness caused him to be reckoned one of the great benefactors of India. In 1839 he received the degree of Doctor of Divinity from Edinburgh University. In 1839 he baptized two Parsee youths,—the first proselytes from the faith of Zoroaster,—who afterward became ordained ministers in the Free Church of Scotland and the Baptist Church. In 1842 he resigned the presidency of the Bombay branch of the Royal Asiatic Society, which he had filled for seven years. In 1843, after fourteen years of hard work in India, Dr. Wilson left for his native land.

In the disruption of the Scottish Church Dr. Wilson joined the Free Church and on his arrival he was received with great honor. In September, 1847, he returned to India. In 1857 he was appointed by the government Vice-Chancellor of the University of Bombay, and was examiner in Sanskrit, Parsee, Hebrew, Marathi, Gujarati, and Hindustani. He was twelve years secretary to the different translation committees of the Bombay Bible Society. The fortieth anniversary of his arrival in India was made the occasion of a remarkable demonstration of the respect and gratitude felt for him by all classes of the people. The Governor presided at a great meeting in the Town Hall to present him with a token of regard. The citizens of Bombay in general also presented him with an address, and the Asiatic Society reviewed, with high commendation, his great services for India. The same year he returned to Scotland. While there he was elected Moderator of the General Assembly of the Free Church. In his closing address before the Assembly on the foreign mission work, he said that notwithstanding his forty-one years' connection with India, if he lived to the age of Methuselah he would consider it a privilege to devote his life to its regeneration. He returned to India in 1871. Increasing ill-health compelled him finally to give up work in 1875, and to go for recuperation to a health resort. But it was too late; he died on the way.

Wilson, John Leighton: Born in Sumter Co., S. C., March 28, 1809. Died July 13, 1886. Graduated at Union College 1829, and Theological Seminary of Columbia, S. C., 1833; ordained the same year by Harmony Presbytery, and set apart as a missionary to Africa. In the summer of 1833 he studied Arabic at Andover Seminary,
and in the autumn went to Western Africa to explore the coast, returning in the spring, and on the 24th of March, 1834, was appointed a missionary of the ABCFM for Cape Palmas, Liberia, arriving in December. He was received with demonstrations of joy by the natives, and found the frame house which he had taken out on his first visit erected on the spot he had selected. In 1836 he made three tours in the interior, journeying mostly on foot. He had, while at Cape Palmas, where he remained seven years, a boarding-school numbering fifty, a fourth of whom were females; a church of forty members, 180 youths had been educated, the Grebo language was reduced to writing, a grammar and dictionary of the language published, the Gospels of Matthew and John translated and printed, besides several other small volumes. In 1842 he removed to the Gabun River, 1,200 miles south of Cape Palmas, and commenced a new station among the Mpongwe people. This language also he reduced to writing, and published its grammar and vocabulary; he also translated and published portions of the Bible. In 1853 he returned home on account of failing health, and became Secretary of the Board of Foreign Missions in New York, editing also the foreign department of the Home and Foreign Record. He served as Secretary till the commencement of the civil war, when, returning to his Southern home, he organized for the Southern Church a Board of Foreign Missions, of which he was appointed Secretary, holding the office till 1885. He established and edited The Missionary, a monthly magazine. He organized also the Board of Sustentation. In 1854 he published a volume of 500 pages on Western Africa, its history, condition, and prospects, which was pronounced by Dr. Livingstone the best work on that part of Africa ever written. He published also many articles in the Southern Presbyterian Review. He received the degree of D.D. from Lafayette College in 1854.

WINSLOW, Miron: Born at Williston, Vt., December 11, 1789. Died at Cape Town, S. Africa, September 1, 1864. Studied at Middlebury College, Vermont, and at Yale College; studied theology at Andover Seminary. He was appointed missionary to Ceylon by the ABCFM in 1812, with ordination on November 1818, in the Salem Tabernacle, in company with others. Spaulding, Woodward, and Fisk. Professor Moses Stuart preached the sermon, which was widely circulated among the churches. In the same edifice, February 6, 1812, had been ordained the initial band of American foreign missionaries—Messrs. Judson, Hall, Newell, Nott, and Rice. With Messrs Spaulding, Woodward, and Seudder he sailed for India June 8, 1819, arriving at Oodooville, Ceylon, on July 4. He remained there till 1833, conducting the boarding and day school, laboring and preaching in the neighborhood, and performing a large amount of literary work. He was the pioneer American missionary of his day in championing the idea that education must go hand in hand with preaching in missionary operations. He carried out this idea in the Batlicott Seminary (1823). After the death of Mrs. Winslow in 1833 he returned to the United States, where he remained two years. In August, 1836, he embarked for the ABCFM Mission in Madras, the scene of his labors for the remaining twenty-eight years of his life.

At an early period of his labors in Madras Mr. Winslow was engaged in translating the Bible into Tamil, and was engaged much occupied with improvements and revisions of portions of the translations. When not thus engaged, he was occupied three hours daily on the Tamil and English dictionary. In November, 1850, he announced that the printing of the new version of the translation was completed. He published "occasional reports" of the Madras Mission. He received from Harvard College the degree of D.D., which his Alma Mater supplemented with L.L.D. upon the reception in this country of copies of his Tamil lexicon, which was the great literary work of his life. Its title-page reads thus: "A Comprehensive Tamil and English Dictionary of High and Low Tamil, by the Rev. Miron Winslow, D.D., etc., assisted by competent Native Scholars: in part from manuscript materials of the late Rev. Joseph Knight and others. Madras: Printed and Published by P. R. Hunt, American Mission Press." The splendid quarto of 976 pages, three columns to a page, with 11 additional pages, attested the ability of the mission press to execute the highest grade of printing. With Wilson's Sanskrit lexicon, this work is the most elaborate and complete dictionary of the languages of India, containing 67,423 words with definitions, of which 30,551 for the first time take their place in Tamil lexicography. The publication of the dictionary called forth hearty expressions of commendation and of gratitude from scholars and missionaries, as well as from the government officials of India.

Dr. Winslow sailed for the United States, very much broken in health, in August, 1864, but his strength was not equal to the long voyage, and he was obliged to stop at Cape Town, where he found a grave.

WITTE BERGEN: A district in Orange River Colony, South Africa, situated about 120 miles N. E. of Bloemfontein. Station circuit of the South African Wesleyan Methodist Missionary Society, with 1 missionary, 44 native workers, 14 outstations, 8 places of worship, 5 Sunday schools, 7 day schools and 825 professed Christians.

WODEHOUSE (Forests): A district in Cape Colony, South Africa, situated in the Transkei region between the Great Kei and Tsomo Rivers. Station of the South African Wesleyan Methodist Missionary Society, with (1901) 44 native workers, 28 outstations, 10 places of worship, 10 Sunday schools, 8 day schools and 433 professed Christians.

WOGENTHIN: A village in the Transvaal, S. Africa, situated about 15 miles S. of Heidelberg. Station of the Berlin Missionary Society (1883), with (1902) 1 missionary, 11 native workers, 3 outstations and 919 professed Christians, of whom 395 are communicants. Some write the name Woyentin.

WOGUL LANGUAGE: One of the Finnish group of the Ural-Altaic family of languages, rather closely allied to the Hungarian, and spoken by a small group of the inhabitants of Western Siberia. It is written with the Russian character. The name is also pronounced Vogul.

WOLFF, Joseph: Born in Bavaria, Germany, 1795, of Jewish parentage, the son of a rabbi; early became a Christian; was baptized in 1817 at Prague by a Benedictine monk, taught Hebrew for a time at Frankfort and Halle,
in the parish of Isle Brewers, Somersetshire, parentage in Russia in 1834, he was converted to Christianity in 1856, and educated in the Malta Protestant College. In 1862 he was appointed by the London Society for the Jews to labor at Jassy (in Roumania), and subsequently at Bacau and London. In 1876 he was placed in charge of the Northern division of the Home Mission, which post he continuously held for a quarter of a century up to the time of his death. Mr. Wolkenberg will be remembered as one of the ablest missionaries of the London Society for Promoting Christianity among the Jews in the present age. Bishop Ryan, at one of the anniversaries, gave him a most remarkable public testimonial; and Father de la Roil, in his history of Jewish missions, speaks of him as possessing a more sober and better judgment concerning the needs and the operations of the Jewish mission than many of his contemporaries. He was certainly distinguished for good intellectual powers, sound classical and Hebrew learning, and a masterly ability in preaching special sermons to the Jews and for the Jews. In private conversations or controversies with individual Jews, he had the talent of winning the attention and respect and often the admiration and love of his hearers. Had he enjoyed better health, he would have been considered a great preacher. Mr. Wolkenberg rendered good service to the Missionary Publications' Sub-Committee in their preparation of new tracts and pamphlets; his keen, critical intellect being of the greatest value. His English literary works testify to his learning and ability as an author, especially *The Pentateuch according to the Talmud* (a translation of Hebrew with a very learned introduction). Mr. Wolkenberg wrote also the following tracts: *Alienation of Jews from Judaism,* *General Aspects of Judaism,* *Israel's Mission to the World,* and *When and How Fulfilled:* *Judaism and Christianity on the Threshold of Eternity; Theory and Practice of Judaism and Christianity;* and also contributed excellent papers to the *Conferences on Jewish Missions* held in Southport, 1875, and in London, 1890.

**WOMANHOOD; its debt to Missions:** To Rev. David Abel, D.D., an American missionary to China, must be conceded the honor of suggesting to Christian women the importance of starting a distinctive mission for heathen women. During his missionary career he realized that the greatest hindrance to the spread of the Gospel lay in the fact that heathen homes were the strongholds of Satan. Womanhood itself, synonymous with ignorance and superstition, was trampled under brutal feet. Women throughout the Orient were unwelcomed at birth, unloved and oppressed in life, and unwept at death. Hoary customs precluded the possibility of reaching them through ordained ministers, and only by the undivided efforts of Christian women aglow with gratitude for their elevation through Christ, could they be approached.

Dr. Abel's burning zeal awakened a responsive chord in the hearts of consecrated women in England and America, resulting in 1834 in the organization of the *Societies for Promoting the Abolition of Slavery in the East* in England, and, seconded by the appeals of Mrs. Frances B. Mason of Burma, in the establishment in 1850 of the *Woman's Union Missionary Society of America for Heathen Lands.* Thus these two Societies in England and America were the pioneer womankind's organized distinctive work for women.
Piutiful is the position of all Oriental women, in no land is it so peculiarly painful as in India. Since the Mohammedan dominion in 1001 A.D. the custom of the zenana has prevailed (zenana means woman), whereby millions of women having no contact with the outside world have been kept in any proctor. Missions have these results of wide experience:—"The more I see of woman's lot in India, the more I know that no account of her degradation, darkness and suffering can be exaggerated." "No one realizes the depths of suffering borne by the woman of India, and the longer I am here the more terrible I see it is. As they often tell us, we do not begin to suspect what goes on behind the scenes, even in the shelter of their own homes. We know their only hope is in the Savior's redeeming love, of which they know nothing."

Pundita Ramabai, the foremost Hindu reformer of Indian women, states: "Distrust and a low estimation of woman's character is at the root of the custom that secludes women. I have never read any sacred book in Sanskrit literature without meeting this deplorable sentiment."

Among many questions on this subject transcribed by Manu, the law-giver of the Hindus, these occur: "What is the chief gate to hell? A woman, who is the wisest of the wise? He who has not been deceived by women, only to be compared to malignant fiends."

This low estimate of woman induced the deplorable custom of child marriage, whereby girls of tender years are doomed to responsibilities for which immaturity unfit them. Following in the ascending scale of misery is the condition of child widows. A recent census gives 38,000,000 girls under fifteen, of whom 24,000,000 are widows; nearly 14,000 are four years of age. Rigid custom forces these tiny children to undergo all the penalties of widowhood.

The luxuriant hair, the pride of the Oriental woman, is forever shaved, and one white, coarse garment is the badge of the household drudge, for whom nothing is too severe. Allowed but one meal a day of the simplest character, her teeth are often obliged to observe a fast. Whoever wonders that death is eagerly sought, to end untold misery and often manifold temptations?

In such conditions began what may be called a social and religious revolution in India. Attractive fancy work was the bane which opened the doors sealed for generations. Visiting where the patriarchal system of living pertains, large numbers of women were reached. Children from this same secluded class were gathered into schools, where the vital truths of the Gospel formed the prominent teaching. Native literature without meeting this deplorable custom of the zenana has waited for them. What a burden of responsibility does this lay on the women of Christendom!"

Through girls' schools established by Christian women in Japan, the Empire realized the possibilities of women trained and elevated through education. The establishment of Government schools from which religion is excluded does not diminish the obligation in this direction resting on Christian women. Elevated solely by the Cross of Christ to the enviable position which they as Christian women occupy in the Occident, the Redeemer died for the whole world, and not for a favored few, can they discharge responsibility without an effort to mitigate a doom incident on heathen birth which but for the grace of God might have been theirs.

It is not only individual women in Asia and Africa who have been blessed by Christian Missions: it is Womanhood as a whole which has been lifted up and given a position of dignity and influence. The very first effect of a mission in any Mohammedan or pagan community has ever been to force into the minds of men the fact that Christians consider girls and women capable of absorbing book knowledge although they themselves have classed them with cows. Upon the one enterprise of the mission in India, Mohammedan activity has applied a persistent energy which has amazed, aroused, perplexed and at last won the support of men who are neither Christians nor philanthropists. What it means for womanhood in India, for instance, to have a large section of the population now stand forth as living defenders of the capacities and rights of women, needs not to be detailed. Such a change in the place given womanhood in the thoughts of men is the direct outcome of Christian teaching and practice gradually and insensibly permeating the community.

The same is true of the abolition of debaseing customs and crimes against womanhood in both Asia and Africa. Long after the African slave-trade had been abolished by Europe and America, Mohammedan activity in slave-raids continued. The object of these raids was not to secure laborers, but to capture women. This determined and brutal purpose to degrade and destroy womanhood was revealed to the world, and the passion to end it was aroused by Christian women. This means, by Christians who were missionaries. The abolition of the Suttee in India was but languidly pressed until Carey and his companions and many later missionaries made the halls of Parliament ring with their indignant protests. The successful agitation in Travancore (1827-30 and 1858-59) against degradation of womanhood through caste denials of the right of low-caste women to cover their persons.
is another instance of the debt of womanhood to missions. So, too, is the strong sentiment now seen among progressive Hindus against child-marriages and the oppression of widows. The same is true of the growing sentiment of Chinese against foot-binding. Wherever we look, the effect of Gospel-teaching is to loosen the bands of the captives and to lift up those who stand in the mire that they may sit among the princes of the people.

**WOMAN'S UNION MISSIONARY SOCIETY of America, for Heathen Lands:** Headquarters, 67 Bible House, New York, N. Y., U. S. A. This Society was organized in New York City January 15, 1861, as the result of an address by a missionary from Burma at a parlor meeting the week previous. Its first membership included representatives of six denominations, and it has remained strictly undenominational. Its immediate conduct is in the hands of an executive committee of women representing the different denominations residing in or near New York City. In May, 1861, a Philadelphia branch was organized, and branches and auxiliaries have been established in different parts of the country.

The first missionary, Miss Marston, went in November, 1861, to Burma, and in 1868 Miss Brittan (Episcopal) went to Calcutta. Later work was commenced in Shanghai, China, and Yokohama, Japan. The work in Burma has been dropped.

In India, the great work of the Society has from the first been Zenana work. It is carried on in Calcutta, where it is known as “The American Doremus Mission,” in honor of Mrs. Doremus, the first President and really the founder of the Society. Other stations are Allahabad, Cawnpore and Jhansi. In Calcutta there are 15 missionaries and 57 native workers; in Allahabad, 12 missionaries and 24 native workers; in Cawnpore 9 missionaries and 21 native workers; in Jhansi 4 missionaries and 2 native workers, a total in India of 40 missionaries and 104 native workers. The Broadwell Memorial School at Calcutta, the Woman’s Home at Allahabad, and the Mary A. Merriman Orphanage at Cawnpore, besides other homes and rescue work, supplement the Zenana work.

In Shanghai the work of the Union includes the Margaret Williamson Hospital, with 4 physicians, and the Bridgman Memorial School, besides the evangelistic work, in which there are engaged 2 missionaries and 5 native workers. The school for 1902 shows 472 patients admitted to wards and 34,743 cases at the dispensary, of which 22,570 were new. There were in addition 208 visits to homes, while over 47,000 prescriptions were filled.

At Yokohama the boarding school has 58 pupils, and the 3 missionaries find excellent openings for educational and evangelistic work.

**WOMAN’S WORK FOR WOMEN:** The activity of Christian women in support of early foreign missions is often forgotten. The records of the missionary movement at the beginning of the 19th century show that an astonishing proportion of the necessary money was collected by societies of women. These early societies were separate local bodies differing from the modern woman’s missionary society in lacking permanence, in taking no responsibility for definite work, in assuming an auxiliary position to the general missionary societies as collectors of money only, and especially in undertaking no enterprises of their own in the mission field.

The following list of the operations of Women’s Foreign Missionary Societies in America in the first half of the 19th century shows the character of those early missionary efforts by women. The list was derived, like the most of the material used in this article, from a paper by Miss Ellen C. Parsons, editor of *Woman’s Work* (PN).

1800. "Boston Female Society for Missionary Purposes." (Baptist and Congregational.)

1801. "Boston Female Society for Promoting the Diffusion of Christian Knowledge." (Congregational.)

1808. "Female Mite Society," Beverly, Mass. (Baptist.)

1811. "Salem Female Cent Society," Massachusetts. (Baptist.)

About this time, 1808-1812, “Cent a Week” societies were common among women of different denominations in Eastern Massachusetts.

1812. The “Female Foreign Missionary Society” of New Haven, Conn., contributed to the American Board $177.09.

1813. First legacy to the American Board $345.33 out of an estate of $500, left by Sally Thomas, of Cornish, N. H., a domestic, whose wages had never exceeded fifty cents a week.

1814. April 11, a woman’s missionary society was organized in the Fayette Street Baptist Church in New York City.

1815. Legacy from Mrs. Norris of Salem, Mass., was realized to the American Board—$30,000, the largest received up to that time or for many years thereafter.

1816. “Female Charitable Society” of Tallmadge, Ohio, contributed $20 to the American Board—the first received by the Board from west of the Alleghenies, save one dollar from a pastor’s pocket.

1818. Woman’s Missionary Society formed in Derry, Pa. (Presbyterian.)

1819. July 5, a society was formed in the Wesleyan Seminary, Forsyth Street, New York City, and existed until 1874. (Presbyterian.)

1821. There were 250 societies in existence (formed from 1812-1820), all contributing to the American Board; many of them were composed exclusively of women.

1823. A society “For the Support of Heathen Youth” was organized in Philadelphia, Pa., and existed until 1874. (Presbyterian.)

1835. A society “For the Evangelization of the World” was organized in the First Presbyterian Church, Newark, N. J. (Presbyterian.)

1838. A society was formed in the First Church, Allegheny, Pa. (United Presbyterian),
and has celebrated its jubilee. The original secretary was still holding the

The modern uprising of women in behalf of foreign missions must be emphasized as an epoch
in the history of missions. It had its motive in the social systems of the East. It was primarily the purdah and the latticed window, the zenana and the harem, that roused the women of Chris­tendom to attempt an errand of mercy to their sister-women of the heathen world. Experience proved that no nation can be elevated until its women are regenerated; also that no man, whether clerical missionary or even physician, can carry the Gospel to the jealously-guarded women of Oriental households. When the degradation and sufferings of Asiatic women and the darkness of their future were revealed to the Western world the conscience of Christian women was aroused. The Gospel had developed them and given them honor, security, moral power, and intellectual freedom. They recognized the claim of their less happy sisters to the same blessings. David Abeel, missionary of the American Board, was the first to suggest action for this end. On his way home from China in 1834 Mr. Abeel told the people of England the facts, which had hitherto been imperfectly known, concerning the condition of women in India and China. He showed that the missionaries' wives, who had always done what they could for women and children about them, were neither sufficient in numbers nor sufficiently free to assume the burden of lifting up their sex. Effort so strenu­ous and continuous would be necessary as to demand the entire consecration of many lives,

Second: These auxiliaries are grouped, and thus constitute what are usually called Branches. This relation is sectional. Adjacent auxiliaries, sometimes to the number of not more than 20, sometimes covering a county, sometimes a whole State containing several hundred auxiliaries, combine, with a set of officers elected from the whole territory represented by the Branch. This stands between the Board and the auxiliaries. It voices the wishes of the Board to the auxil­liaries, and expresses the sentiment of the latter to the Board. A Branch assumes the responsibility for some missionary enterprise, and its auxiliaries share it among themselves proportionally.

Third: The Board includes all the Branches, and requires its own officers. A legal charter is requisite for a Board, but not for auxiliaries and Branches. Auxiliaries usually hold their meetings monthly or oftener; and their quarterly or annual, or, at most, two or three times a year. Business of the Board is transacted throughout the year by its officers,
is another instance of the debt of womanhood to missions. So, too, is the strong sentiment now seen among progressive Hindus against child-marriages and the oppression of widows. The same is true of the growing sentiment of Chinese against foot-binding. Wherever we look, the effect of Gospel-teaching is to loosen the bands of the captives and to lift up those who stand in the mire that they may sit among the princes of the people.

**WOMAN'S WORK FOR WOMEN:** The activity of Christian women in support of early foreign missions is a fact often overlooked. The records of the missionary movement at the beginning of the 19th century show that an astonishing proportion of the necessary money was collected by societies of women. These early societies were separate local bodies differing from the modern women's missionary society in lacking provision for permanence, in taking no responsibility for definite work, in assuming an auxiliary position to the general missionary societies as collectors of money only, and especially in undertaking no enterprises of their own in the mission field.

The following list of the operations of Women's Foreign Missionary Societies in America in the first half of the 19th century shows the character of these early missionary efforts by women. The list was derived like the most of the material used in this article, from a paper by Miss Ellen C. Parsons, editor of *Woman's Work* (PN).

1800 "Boston Female Society for Missionary Purposes." (Baptist and Congregational.)

1801 "Boston Female Society for Promoting the Diffusion of Christian Knowledge." (Congregational.)

1808 "Female Mite Society," Beverly, Mass. (Baptist.)

1811 "Salem Female Cent Society," Massachusetts. (Baptist.)

About this time, 1808-1812, "Cent a Week" societies were common among women of different denominations in Eastern Massachusetts.

1812 The "Female Foreign Missionary Society" of New Haven, Conn., contributed to the American Board $177.09.

1813 First legacy to the American Board $345.83 out of an estate of $500, left by Sally Thomas, of Cornish, N. H., a domestic, whose wages had never exceeded fifty cents a week.

1814 April 11, a woman's missionary society was organized in the Fayette Street Baptist Church in New York City.

1815 Legacy from Mrs. Norris of Salem, Mass., was realized to the American Board—$30,000, the largest received up to that time or for many years thereafter.

1816 "Female Charitable Society" of Tallmadge, Ohio, contributed $20 to the American Board—the first received by the Board from west of the Alleghenies, save one dollar from a Pastor's pocket.

1818 Woman's Missionary Society formed in Derry, Pa. (Presbyterian.)

1819 July 5, a society was formed in the Wesleyan Seminary, Forsyth Street, New York City. It issued its last annual report in 1861. During forty years it had contributed to the missionary treasury of the Methodist Episcopal Church the sum of $20,000.

1821 There were 250 societies in existence (formed from 1812-1820), all contributing to the American Board; many of them were composed exclusively of women.

1823 A society "For the Support of Heathen Youth" was organized in Philadelphia, Pa., and existed until 1874. (Presbyterian.)

1835 A society "For the Evangelization of the World" was organized in the First Presbyterian Church, Newark, N. J. During the first ten years it contributed $2,344.76 to the American Board. The Society still lives (having joined the new movement), and celebrated its jubilee in 1885, one of its original members and 20 descendants of members participating on that occasion.

1838 A society was formed in the First Church, Allegheny, Pa. (United Presbyterian),
and has celebrated its jubilee. The original secretary was still heading the position.

More than 680 "Ladies' Associations," having nearly 3,000 local agents of their own membership, were collecting funds for the American Board. One of these associations met in Brookline, Mass., at the house of Mr. Ropes, and made regular contributions for Japan, although that empire was then sealed against foreigners. The amount which they forwarded expressly for Japan was $900, which, with the accruing interest, became $4,104.23 before the American Board opened its mission to Japan, of which the first expenses were paid from the Brookline fund.

On his way home from China in 1834 Mr. Abeel told the people of England the facts, which had been known there for some time. He evoked the Spirit of God winged his words. The modern uprising of women in behalf of foreign missions must be counted as an epoch in the history of missions. It had its motive in the social systems of the East. It was primarily the purdah and the latticed window, the zenana and the harem, that roused the women of Christendom to attempt an errand of mercy to their sister-women of the heathen world. Experience proved that no nation can be elevated until its women are regenerated; also that no man, whether clerical missionary or even physician, can carry the Gospel to the jealously-guarded women of Oriental households. When the degradation and sufferings of Asiatic women and the darkness of their future were revealed to the Western world, the conscience of Christian women was aroused. The Gospel had developed them and given them honor, security, moral power, and intellectual freedom. They recognized the claim of their less fortunate sisters to the same blessings.

David Abeel, missionary of the American Board, was the first to suggest action for this end. On his way home from China in 1834 Mr. Abeel told the people of England the facts, which had hitherto been imperfectly known, concerning the condition of women in India and China. He showed that the missionaries' wives, who had always done what they could for women and children about them, were neither sufficient in numbers nor sufficiently free to assume the burden of lifting up their sisters. Effort so strenuous and continuous would be necessary as to demand the entire consecration of many lives, and he urged unmarried women to volunteer in Christ's name for this new form of service. He declared that women of the Church at home should organize to render their labors permanent. Little did Mr. Abeel know what a force he was evoking. The Spirit of God winged his words. That same year the first society was formed in England, The Society for Promoting Female Education in the East; and upon whatever other plan the burden of leadership may seem to fall, this Society is ever to be had in reverence, as the one that ventured first and led the way. Others followed speedily in Great Britain: those connected with the Free Church and the Established Church of Scotland in 1837, the Indian Female Normal School and Instruction Society in 1852, and the Wesleyan Auxiliary in 1859; the German Society for Christian Education of Women in the East in 1861, but none of these was much known across the Atlantic.

Meanwhile Mr. Abeel had brought his plea to America, but hearts were not ready for it. At last, in 1861, Mrs. Doremus, of New York City, was able to carry out her cherished longing, and the Union Missionary Society was launched. Women of six denominations composed its membership, and it stood alone in America for eight years. This was the period of the Civil War in the republic, and in the absorbing demands of the struggle Christian women had no leisure to undertake new departures in missions, but at the same time they were acquiring a training for it in the future. By combining as they did, on a large scale, for work in soldiers' hospitals and in the Sanitary Commission, they learned the possibilities and the power of organization.

The Woman's Board of Missions (Congregational) of Boston was organized. From that time the process of organization went on until nearly every denomination has its Woman's Home and Foreign Missionary societies, working in cooperation with the general missionary societies of the denomination.

Organization: All the main features of organization necessary in each separate Woman's Board of Missions may be included in three, and in England two are often made to answer.

First: There is the local or parish society, made up of individuals from a single local church, or, as often occurs in America, women of two or more churches of the same denomination in one large town unite to form one Missionary Society. This local society is usually called an Auxiliary. It has its own constitution and officers, and is independent in its management; but when it undertakes to carry out its purpose of sending forth missionaries and funds to sustain various forms of missionary work at a distance, it does not try to act alone, but under the direction of the Woman's Board of Missions (Congregational) of Boston, of which it thus becomes an "auxiliary," or helper. An annual fee is the usual requisite for membership.

Second: These auxiliaries are grouped, and thus constitute what are usually called Branches. This relation is sectional. Adjacent auxiliaries, sometimes to the number of not more than 20, sometimes covering a county, sometimes a whole State containing several hundred auxiliaries, combine, with a set of officers elected from the whole territory represented by the Branch. This Board includes all the Branches, and its auxiliaries share it among themselves proportionally.

Third: The Board includes all the Branches, and requires its own officers. A legal charter is requisite for a Board, but not for auxiliaries and Branches. Auxiliaries usually hold their meetings monthly or oftener; Branches quarterly; but the Board meets annually; and the Board may meet two or three times a year. Business of the Board is transacted throughout the year by its officers,
who are elected by the delegates of annual meeting. The delegates are chosen, not from auxiliaries, but from branches. The board or society (whichever name is given to the inclusive organization) has supervision over an area which varies according to circumstances. If the society is undenominational, like the English society for promoting education in the east, or the woman's union missionary society in america, which has its constituency in any part of the country. If the society cooperates with a board of some denomination, its territory will depend upon the form of organization of that church. The society within the protestant episcopal church in america, for reasons which are apparent, is indivisibly one all over the country. But the geographical spaces are so great in america that in many cases it is found more practicable to have several coordinate boards in one church. The area of each board is geographically determined. The congregational women are massed distinctly under eastern, middle, and western boards, the Baptist women under the east, the west, and the pacific coast boards.

The advantage of one great undivided board is clear in the case of several coordinate boards by the following results:

**a.** A far greater number of responsible, official workers are secured.

**b.** The work of each board does not become unmanagably large for its officers.

**c.** There is no management of the constituency augmented by nearness to headquarters.

**d.** It is possible for a vastly greater number of members to afford the expense of the journey to attend the annual meeting where the board is a local center than where it is a national center.

While organization always begins at the top, with the board the real germ is the auxiliary, and this is the place of growth. Enlargement of an auxiliary by addition of members, one at a time, an auxiliary formed in a local church by gathering a few picked individuals into a little monthly meeting—this is the unobtrusive way in which boards grow. Societies of young ladies and children's bands are regarded as only phases of the auxiliary, but the officers of the branch are responsible for the work undertaken both by the auxiliary, but the officers of the branch are responsible for the work undertaken both by the auxiliary, but the officers of the branch are responsible for the work undertaken both by the auxiliary, but the officers of the branch are responsible for the work undertaken both by the auxiliary, but the officers of the branch are responsible for the work undertaken both by the auxiliary, but the officers of the branch are responsible for the work undertaken both by the auxiliary, but the officers of the branch are responsible for the work undertaken both by the auxiliary, but the officers of the branch are responsible for the work undertaken both by

The existence of more than 30,000 auxiliaries and bands in America, with a membership of several hundreds of thousands, speaks volumes to attend the annual meeting where the board is a local center than where it is a national center. The work of each board does not become unmanagably large for its officers.

**Terms Employed:** In Great Britain the names "ladies' association" or "ladies' society" is employed, while in America "woman's board" or "society" is preferred. Also many societies in Great Britain dispense with the "auxiliary" and appoint "collectors of funds from the churches; others do not use the term "branch," but "district auxiliary" instead. "Presbyterian societies" and "associations" and a variety of other terms take the place of those explained above.

In the presbyterian church in America "presbyterian society" corresponds to the term "branch," the "synodical society" is introduced in some places. The protestant episcopal society is itself called, not a board, but "auxiliary," and its constituent societies, not auxiliaries, but, respectively, diocesan and parish branches.

In Great Britain, societies often have long lists of honorary officers. Such are scarcely known in America, where names heading the official list are those of the actually responsible leaders, and it conduct public meetings and control the affairs of their societies. The committees of gentlemen which some societies in the old country appoint are also unknown in America, the office of auditor of accounts being the only one ordinarily filled by a man.

**Meetings:** Under the auspices of a single one of many of these women’s societies hundreds of meetings are held every year. Meetings for both business and prayer are convened at the headquarters of most boards, at stated times, besides farewell meetings upon the departure of missionaries, and other meetings specially called; and an annual meeting is universal; but in both character and conduct of them great diversity exists.

Breakfast and tea meetings, and working parties for the purpose of making clothing for native children or preparing patterns for classes—all these are much mentioned in English reports, but are comparatively infrequent in America. In Europe a limited number of Christmas boxes are sent to the missions, but the general purpose of meetings in America is either the transaction of business or the imparting of information in order to arouse interest in missions. Whatever its object, the missionary meeting is always partly a devotional service and sometimes strictly such. Many societies have a by-law requiring the opening of all meetings with devotional exercises; and although many printed reports make no allusion to prayer meetings, it is not supposable that societies often exist without them. Where the organization extends to parishes, the number of meetings is vastly multiplied. An "auxiliary" is generally understood in America to mean a company of ladies, who, among other things, hold a meeting every month, in the morning, in cities, for prayer and deliberate study of missions; in the afternoon in the country; and perhaps, on Sunday, in rural districts where people live widely scattered.

A branch, or presbyterian meeting, means a quarterly meeting, often lasting all day, which is held in one or another town by invitation. It is thus brought at some time within the reach of every member of the branch. Those of adjacent towns who can conveniently attend go by carriages or train to the quarterly meeting, and a hearty sight it is on pleasant days, in a country town, to see the ladies driving up from every direction, all their horses’ heads pointed toward the church. Then they spend the day. A little branch business, scripture-reading, and frequent prayer and song, wide awake, practical gardens, inspiring talks, often from missionary ladies on a furlough, with a hospitable lunch between morning and afternoon sessions—their meetings are quarterly meetings. Perhaps their place is most nearly filled in Great Britain by "deputation meetings," where some speaker is sent out to a certain locality by the secretary and holds an appointed meeting, generally in connection with one managed by the parent society.

In the old country, also, annual meetings are
often, but not always, presided over by gentlemen, and sometimes no ladies speak on their own platforms. Such a thing is unknown in America. It is there very exceptional for a gentleman to preside at a meeting of missionaries, they are invited to speak; and while in the early days of the societies they were rigorously excluded from the audience, gentlemen are now absent chiefly because there is no room for them. Annual meetings of the larger Boards now occupy two or three days, and attendance upon them is quite familiar with the sight of a large church packed with women.

Children's Societies: Beyond occasional mention of contributions from "pupils" of some lady, or "from a Bible-class" or "Sunday-school," the reports of women's societies in the old country seldom have anything to say of the children's part in the modern missionary crusade. But in America they are a great factor—both in the United States and Canada. The children are organized into Bands, of which they are themselves officers, altough superintended by some skilful leader; and they read their little reports with quite as much gravity, accumulate their offerings with equal enthusiasm, and, in general, march to the music, if with a somewhat broken step, as happily as their seniors. One of the first meetings of a Band is the attempt to name itself, and the English language has been explored for the purpose. There are the Carrier Doves and Look-out Guards, Snowflakes and Mayflowers, Busy Bees, Steady Streams, Mustard Seeds, King's Cadets, Up and Ready, Little Lights, Pearl Seekers, Acorns, The Drum Corps, Do What You Can Band, and so on, in endless variety. As one has said, "Each dainty or suggestive name looks out from the record like the growing face of a child." And no mean sum in hard cash do these children send to the foreign mission treasury. And what have the children not done to fill their mite-boxes? They have tithed what was committed to have their teeth drawn, and "buttoned so fat;" they have bunched flowers and shoveled in the sun; they have "minded" baby, and substituted for their parents and teachers, and ransacked the library and even butter; they have divided with little brother, so that he might share the glory of giving. One little girl had her music-box, "which plays with a handle, right by my bank, and I play a tune whenever I put some money in, so I like to put the pennies in oftener than before.

Meetings of these Bands are held statedly, and the inventiveness of the most skilful leader is taxed to arrange programs which are at once instructive and entertaining. The children are taught numerous hymns and Scripture passages and many learn to pray in the meetings. They draw maps, recite dialogues, hold African palavering exercises take a different turn, and they make scrapbooks or dress dolls for a missionary school, or pick lint and roll bandages for a hospital. In a great variety of ways their childish energies and sympathies are directed into missionary channels, and they are becoming both grounded in the principles of giving, and through graphic stories and letters, exhibitions of curios, and talks from missionaries, they are invited to speak; and while in the early days of the societies they were rigorously excluded from the audience, gentlemen are now absent chiefly because there is no room for them. Annual meetings of the larger Boards now occupy two or three days, and attendance upon them is quite familiar with the sight of a large church packed with women.

Results of the active entrance of women into Missionary work: What has already been said of the influence of the women in cultivating the missionary spirit among children suggests one important branch of these results. Christian women have taken a leading part in arousing interest in missions and in securing systematic study of this branch of the work of the Church. There is the scheme for united study which has brought forth in America a series of valuable works used by study classes in all denominations. The first three volumes of this series have found sale for 120,000 copies. To the activity of the women, also, must be ascribed a notable increase of funds devoted to the missionary enterprise. Without the women's societies there would always be devout women in the churches desirous of contributing to the support of missions. But the mass of women, without these societies and the methods which they use, would never be sufficiently in touch with missions nor sufficiently informed upon the details of their beneficent influence to make sacrifices for their support. Through the energy of the women's societies it has come to pass, however, that a very large proportion of the funds which they collect must be reckoned as a gain, not otherwise possible, to the resources of foreign missions.

The most far-reaching and weighty result of the entrance of women upon the mission enterprise is found on the mission field. The missionary woman is not a preacher, but she is an evangelist. She is also a teacher, and often she is a physician of the highest ability. She may be also a skilled writer, and a linguist of talent that finds its field even in translation of the Bible. Missionary women not only reinforce other workers in all the great departments of the missionary enterprise, but, being women, they gain effective access to that half of the population which no man can hope to reach in any but the most superficial and unsatisfactory way. It is their entrance among the women of non-Christian lands and their many-sided activity for the culture of true womanliness that has made the period of the uprising of the women of Christendom in behalf of missions the dawn of a new era in missionary history.

**Wong-Buang:** A village in Foo-kien, China, situated 30 miles N. of Fu-chau-fu. Station of the CEZ (1893), with (1903) 3 women missionaries, 6 native workers, and 4 day schools.

**Wonsan.** See Wen-san.

**Wood, George W.:** Born in Haverhill, Mass., February 14, 1814. Died in Geneseo, N. Y., July 17, 1901. He was educated at Dartmouth College and Princeton Seminary; ordained by the Presbytery of Elizabeth, N. J., in 1837; missionary of the American Board, Singapore, 1838; transferred to Constantinople, 1842; returned home, 1850; corresponding secretary of the American Board, resident in New York, 1852-1871; then reentered upon missionary work in Con-
stantinople and continued for fifteen years until his state of health required his return to America, after 48 years of service of the Board. Dr. Wood was a master in the art of dealing with men, and was the author of tracts, periodical articles, and books in Armenian, the latter including commentaries on several of the New Testament epistles and on the Book of Revelation.

WOODSTOCK. See LANDAUR.

WOOSUNG. See WU-SUNG.

WORCESTER: A town in Cape Colony, 60 miles N. E. of Cape Town. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, one of them with his wife; 32 native workers, 2 outstations, 2 day schools, and 4,000 professed Christians, of whom 1,080 are communicants.

WORCESTER, Samuel Austin: Born at Worcester, Mass., January 19, 1798; graduated University of Vermont, 1819; Andover Theological Seminary, 1823; ordained August 25, 1825; left as a missionary of the ABCFM, August 31, for the Cherokees, reaching Brainerd, Ga., October 21, 1825. Through his labors and those of other missionaries, the Indians made great progress in Christian knowledge and the arts of civilized life. They had become largely a nation of farmers and artisans, had organized, with the advice of the United States Government, a regular and creditable government, were to a considerable extent supplied with schools and religious institutions, and were members of Christian churches. In 1831 the missionaries became involved in a controversy with the State of Georgia in consequence of the passage of a law restricting their privileges, and which they deemed unconstitutional. Mr. Worcester and his two companions were arrested. After sixteen and a half months' imprisonment they were released, January 14, 1833, returned to their stations, and resumed their missionary work. Mr. Worcester removed in April, 1835, with the mission press to Dwight, and spent the summer among the Cherokees of Arkansas, mostly in making arrangements for printing. He afterward was stationed at Park Hill, in the Indian Territory, to which the Cherokees had been removed. Here he died April 20, 1859.

WORLD'S WOMAN'S CHRISTIAN TEMPERANCE UNION: The United States Woman's Christian Temperance Union was organized at Cleveland, O., in 1874, as a result of the great Woman's Temperance Crusade of the previous winter. Soon after the completion of the national organization the suggestion was made of an International Union. At the Detroit Convention (1883) Miss Frances E. Willard urged the project, and in 1884 the Union was fully established, with Mrs. Margaret Bright Lucas, of England, as first President. From 1890 to 1898 Miss Willard was President; and since then Lady Henry Somerset has held the office. At the first delegated convention of the World's Union at Boston, 1891, the following Declarations of Principles and Pledge were adopted:

"We believe in the coming of His Kingdom, whose service is the highest liberty, because His laws, written in our nature, as well as in nature and grace, are perfect, converting the soul."

"We believe in the Gospel of the Golden Rule, and that each man's habits of life should be an example safe and beneficent for every other man."

"We therefore formulate, and for ourselves adopt, the following pledge, asking our brothers and sisters of a common danger and a common hope to make common cause with us, in working its reasonable and helpful precept into the practise of every-day life:

"I hereby solemnly promise, God helping me, to abstain from all Alcoholic Liquors as beverages, whether distilled, fermented, or malted; from opium in all its forms, and to employ all proper means to discourage the use of and traffic in the same."

In pursuance of this pledge, the plan includes education of the young, the development of public sentiment, the reform of drunkards, and the general work for the establishment of the Kingdom of Christ.

The conduct of the Union is in the hands of an executive committee, consisting of the officers, Presidents of National Societies, Superintendents of World's Departments, and others who may be selected. There are two secretaries, one in England and one in the U. S. A., and the headquarters of the U. S. Union are practically those of the World's Union.

According to the report (1903) there are auxiliaries in 60 countries (including 6 in Australia), scattered all over the world: 11 in Asia, 15 in Europe, 7 in Africa, etc. There are 37 departments, including a Young Woman's Branch, Scientific Education, Systematic Giving, Anti-Narcotics, Opium—Gambling; Penal, Charitable and Reform work; Purity, Franchise, Peace and International Arbitration, etc.

Statistics of such a work are scarcely possible.

An idea of its extent is given by the fact that official papers are published in the U. S. A., England, Canada, Australia, New South Wales, South Australia, Transvaal, Japan, Tasmania, India, Burma, Cape Colony, and New Zealand. An extensive work is carried on also among soldiers and sailors. Cordial cooperation is given by missionaries and societies in every land, who look upon the organization as an effective agency for advancing the Kingdom.

WOYTAK LANGUAGE: One of the Finnish group of the Ural-Altaic family of languages, spoken west of the Ural Mountains and in the provinces of Viatka and Orenburg, in Eastern Russia. It is written with the Russian alphabet. The name is also pronounced Votyak.

WOYENTIN. See WOGENTHIN.

WRAY, John: Missionary of the LMS to British Guiana, South America, from 1807 to 1837. He was sent to Demerara in 1808, at the request of a wealthy planter, and made his home on the plantation. Here his labors were so much blessed that a great reformation took place among the negroes, not only on this estate, but also on the surrounding ones. They changed their ways of living, and became earnest and attentive listeners to his preaching. The local government of Demerara was not in sympathy with the religious work among the negroes, and it placed so many obstructions in the way of the missionaries that Mr. Wray was sent to England to obtain, if he could, a modification of the laws of the country. He partially succeeded, and returned to Demerara in 1811.

In 1813 he began work among the crown negroes at the stations of Georgetown and
Berbice. The laws which he had secured for the amelioration of the condition of the negroes being misunderstood, or not carried out, he found it necessary to go a second time to England in their behalf. Still negroes were hindered in their religious worship. Their books were taken from them, and overseers accompanied them to the meetings "to judge of the doctrines held forth to the negroes."

Such persecutions irritated them beyond endurance, and a serious insurrection broke out, many of them leaving the plantations and going into the back country. On Mr. Wray's return to Berbice he was requested by the governor to explain to the slaves the new laws, so that there might be no further trouble. He seems to have succeeded, and quiet was restored in his mission, where he remained for 13 years, when, worn out with his work, he with his wife sought rest and health in England. In 1832 he returned to Berbice and continued his work for eight years longer, when he died of yellow-fever at New Amsterdam.

WRIGHT, Austin H.: Born at Hartford, Vt., November 11, 1811. Died January 14, 1865. He studied at Dartmouth College and the Theological Seminary, N. Y., and in the medical department of the University of Virginia, Charlottesville, preaching during his term of study to the destitute population of the "Ragged Mountains"; sailed March 9, 1840, as a missionary for the Nestorians, to take the place in Urmia of Dr. Grant, whose impaired health and large plans for the Mountain Nestorians led him to seek a residence in one of the mountain districts of Kurdistan. His perfect acquaintance with the Turkish, Syriac, and Persian languages, coupled with his knowledge of medicine and his kind, gentle courtesy of manner, gave him much influence among all classes of the people, and the business connected with the authorities, and intercourse with the higher classes, was to a great extent in his hands, or carried on through him. The Persian officials and other gentlemen appreciated very highly the courteous, dignified, yet simple ease and grace with which he met them.

In 1860 he returned to the United States, but, the illness in his labors for the Nestorians. In the early part of 1863 he began the revision of the New Testament in Syriac, preparatory to its being electrotyped and printed by the ABS in pocket form. To this the Psalms were added, and he took back with him on his return in 1864 the first few copies, which were hailed with delight by the people. A short time before this it was determined to undertake the translation of the Bible into Turkish for the Mohammedan population of Azerbaijan. This work was assigned to Dr. Wright in conjunction with Mr. Rhea, and he entered upon it with great enthusiasm. But in three months he was called to a higher service.

WU-CHANG-FU: A town and capital of Hu-pe, China, situated on the Yangtsze, opposite Hsian-kiang and Han-kau. Population about 100,000. With the other two cities together the population is estimated at 1,200,000. It is a great center of Chinese culture, and there are also manufactures. The following societies have mission stations there: LMS (1867); PE (1868); WMS; Swedish National Society (1890); Scandinavian Alliance; CA; with, altogether (1903), 32 missionaries, men and women; 22 native workers, men and women; 12 places of worship, 10 day schools, 2 boarding schools, and 314 professed Christians.

WU-CHAU-FU: A town in Kwang-su, China, situated on the Grand Canal, about 30 miles N. W. of Su-chau-fu. Station of the MES, with 1 missionary. Also station of the PE, with 1 native worker, 1 day school, 1 boarding school, 2 Sunday schools, and 10 professed Christians. Some write the name Wu-si.

WU-HSUEH: A town in Hu-pe, China, situated on the Yangtsze River, about 35 miles N. W. N. of Kiu-Kiang. Station of the WMS, with (1903) 1 missionary, 8 native workers, 4 outstations, 6 places of worship, and 102 professed Christians. Some write the name Wu-sieh.

WU-HSI-HSIEN: A town in Kwang-tung, China, situated about 45 miles W. N. W. of Swatow. Station of the PKS, with (1903) 1 missionary, his wife, 12 native workers, 5 outstations, 2 Sunday schools, and 84 professed Christians. Station also of the PCM (1901), 102,116, Station of the PCE (1890), with (1903) 1 missionary and his wife, 1 woman missionary, 12 native workers, 1 station, 2 places of worship, 1 day school, and 90 professed Christians. Also station of the CIM (1893), with (1905) 2 missionaries and their wives, 3 native workers, 1 outstation, 2 places of worship, 1 day school, and 61 professed Christians. Station also of the ME, with (1903) 3 missionaries, two of them with their wives; 1 woman missionary, 6 native workers, 5 Sunday schools, 5 day schools, and 184 professed Christians, of whom 184 are communicants. Also station of the PE (1894), with (1903) 1 missionary, 5 native workers, 3 outstations, 1 day school, 1 boarding school, 4 places of worship, and 53 professed Christians. Also station of the CA. Some write the name Wu-hueh.

WU-HU-HSIEN: A town and treaty port in Ngan-hwei, China, situated on the Yangtsze River, about 60 miles S. W. of Nan-king. Population (1901), 102,116. Station of the PCM (1890), with (1903) 1 missionary and his wife, 1 woman missionary, 4 native workers, 1 outstation, 2 places of worship, 1 day school, and 90 professed Christians. Also station of the CIM (1893), with (1905) 2 missionaries and their wives, 3 native workers, 1 outstation, 2 places of worship, 1 day school, and 61 professed Christians. Station also of the ME, with (1903) 3 missionaries, two of them with their wives; 1 woman missionary, 6 native workers, 5 Sunday schools, 5 day schools, and 184 professed Christians, of whom 184 are communicants. Also station of the PE (1894), with (1903) 1 missionary, 5 native workers, 3 outstations, 1 day school, 1 boarding school, 4 places of worship, and 53 professed Christians. Also station of the CA. Some write the name Wu-hueh.

WU-KING-FU: A town in Kwang-tung, China, situated about 45 miles W. N. W. of Swatow, among the Hakka people. Station of the PCE (1865), with (1903) 3 missionaries and their wives, 2 women missionaries, 16 native workers, 2 boarding schools, 1 dispensary, 1 hospital, 1 medical class, 1 theological seminary, 1 printing house, and 1,304 professed Christians.

WULUPURAM. See VILLUPURAM.

WUN-CHAU: See WEN-CHAU-FU.

WUPPERTHAL: A village in Cape Colony, South Africa, situated in the Doorn River district, about 70 miles N. of Tulbagh. Station of the Rhenish Missionary Society, with (1903) 1 missionary, 8 native workers, 4 outstations, 3 day schools, and 1,721 professed Christians, of whom 355 are communicants.

WU-SHE. See Wu-Si-HSien.

WUSHEH. See Wu-Hsu.
YA-CHAU-FU: A town in Szechwan, China, situated about 70 miles S. W. of Cheng-tu. Station of the ABMU (1894), with (1903) 3 missionaries, two of them with their wives; 3 outstations, 1 place of worship, 1 day school and 53 professed Christians. Some write the name Yachuan.

YAAF. See JAFFA.

YAKUSA: A village on the upper Congo River, Congo Free State, 70 miles N. W. of Stanley Falls. It has trade relations with five different tribes. Population 1,200. A railroad is now being built thence to Lake Tanganyika. Station of the BMS (1885), with (1903) 4 missionaries, one of them with his wife; 1 outstation, 1 dispensary, 1 industrial school, and 1 day school. The name is sometimes written as Yakusu, or Sargent is used to indicate the same piece.

YANG-CHAU-FU: A town in Kiang-su, China, situated on the Grand Canal, about 15 miles N. of the Yangtze River. Population about 150,000. Station of the CIM (1896), with (1903) 2 missionaries and their wives, 3 women missionaries, 8 native workers, 1 outstation, 2 places of worship, 1 Sunday school, and 36 professed Christians. The main work of the station is the training home for newly appointed missionary women. Also station of the SBC (1891), with (1903) 1 missionary and his wife, 2 outstations, 1 place of worship, 1 Sunday school, 1 dispensary, and 23 professed Christians. Some write the name Yang-chow.

YANG-HSIEN: A town in Shen-si, China, situated in the S. part of the province on the Huang River about 51 miles E. by N. of Hanchung-fu. Station of the CIM (1896), with (1903) 2 women missionaries, 1 outstation, and 15 professed Christians. Some write the name Yang-hien.

YANG-KANG: A town in Kwang-tung, China, situated in the northern environs of Swatow, about 10 miles from the city. Station of the ABMU (1903), with (1903) 2 missionaries and their wives, 2 women missionaries, 31 native workers, 20 outstations, 8 places of worship, and 618 professed Christians. Some write the name Ung-kung.

YANG-KAU-HSIEN: A town in Kiang-si, China, situated a little to the S. E. of Kwanhsin-fu, in the N. E. part of the province. Station of the CIM (1890), with (1903) 3 women missionaries, 3 native workers, 1 place of worship, 1 Sunday school, and 68 professed Christians. Some write the name Yang-k’ao.

YANG-KIANG-HSIEN: A town in Kwang-tung, China, situated on a little bay about 156 miles S. W. of Canton. Station of the PN (1892), with (1903) 3 missionaries, two of them with their wives; 20 native workers, 4 outstations, 11 places of worship, 1 day school, 1 hospital, 1 dispensary, and 279 professed Christians. Some write the name Yang-k’ang.

YAO LANGUAGE: One of the Bantu family of African languages, spoken by a number (not yet ascertained) of tribes inhabiting the Eastern shores of Lake Nyassa, in Portuguese East Africa, and found also in the Shiré region south of the lake. It has been reduced to writing by missionaries with use of the Roman letters.

YARKAND: A town in Chinese Turkestan, situated on the Yarkand River, about 200 miles S. E. of Kashgar. Population about 60,000, mostly Turks, who speak Turkish of the Eastern dialect. They are Mohammedans in religion. Station of the Swedish National Missionary Society (1895), with 1 missionary and his wife, 1 place of worship, and 1 day school. Some write the name Jarkend.

YATES, REV. M. T.: Missionary of the Southern Baptist Convention, born in Wake County, N. C., January 8, 1819; died in Shanghai, China, March 18, 1888. He was born of humble but intelligent and pious parents. Their poverty forbade them to give to the education their son desired him to have, and for which his own soul yearned. He therefore made his own way through school and college with the assistance of his brethren who at various times became interested in his struggles. His remark to his father upon setting out to prepare himself for college has been an inspiration to many lads in the Southern States:—"I will go to school if I have to make bricks by moonlight to pay my way." It was also characteristic of the steady determination and self-reliance of the man.

He graduated from Wake Forest College, N. C., in 1846, was appointed a missionary August, 1846, married Miss Eliza Moring of Chatham Co., N. C., September 27, 1846, sailed for China April, 1847, and arrived in Shanghai Sept. 13, 1847, shortly after it had been made a treaty port by the treaty of 1846. There in Shanghai and its environs he labored for more than forty years, in spite of wars, famines, perils, sickness, and manifold trials. Always he was cheered and supported by his devoted wife and at intervals by other missionaries sent out to reinforce him. A part of the time he supported not only himself, but also other missionaries by his labor as Vice-Consul and his judicious investments of frugal savings and the small patrimony of his wife. Largely in this way the Central China Mission of the Southern Baptist Convention was preserved, during the great Civil War in America and for some years after, when the Board which sent him to China was crippled and all but destroyed. He grew in power and usefulness in spite of overwhelming difficulties, until he became a master missionary.

His work was that of laying good and true foundations. He made himself such a master of the spoken Chinese language and so thoroughly learned the Chinese manners, modes of thought and customs that he was regarded by the Chinese—like Verbeek in Japan—as one of their own number. Besides useful religious works he translated the New Testament into the Shanghai dialect, he organized churches and built houses of worship, established schools, and otherwise built up what has come to be the Central China Mission of the SBC.

His personality was great and inspiring. The man had a tremendous influence both in China...
YATZ, William: Born at Loughborough, Leicestershire, England, December 15, 1792. Died July 3, 1845. Educated for the ministry at Bristol College; ordained August, 1814, and sailed for Calcutta as a missionary of the Baptist Mission Society April 17, 1815. He joined the mission at Serampur, devoting himself to the important center, as the railroad is to pass through it. Station of the CIM (1902), with 1 missionary and his wife and 1 place of worship.

YEN-SHAN-SIEN: A town in Chi-li, China, situated about 60 miles S. of E. of Tien-tein and 35 miles from Tsang-chau. Station of the LMS (1878), with (1903) 2 missionaries and their wives. The station residences have now been transferred to Tsang-chau. Some write the name Yen-san.

YEOTMAL: A town in Berar, Central India, about 55 miles S. E. of Amraoti. Station of the Free Methodist Church in America (1892), with (1900) 2 missionaries and their wives, 2 women missionaries, 5 native workers, 1 place of worship, 2 Sunday schools, 2 day schools, 1 industrial school, and 20 professed Christians.

YEZD: A town in Persia, situated in the central part of the country, about 300 miles S. E. of Teheran. Population about 53,000. There is a small Parsee colony here. Many of the Medesians belong to the Babi sect. Station of the CMS (1898), with (1903) 2 missionaries and their wives, 3 women missionaries, 9 native workers, 2 day schools, 1 hospital, 1 dispensary, and 42 professed Christians.

YEZIDIS: The Arabs who accepted Mohammed called those who did not El shal'om, i.e., the ignorant ones. Among the latter was Yezid ben M'awe, who refused to accompany M'awe, his father, who, as an attendant upon his person, followed the fortunes of Mohammed. Many of the ignorant ones rallied around Yezid, and he became the nucleus of the sect which appropriated his name. The Yezidis possess a lineage tree by means of which they trace their religious origin back to him. They seem to have existed as a very loose organization until about 1106, when there arose among them an elder called Sheikh Hadi, from the region of Damascus. He removed to the district of Hakkari in Kurdistan, and dwelt in Mount Lalish, which is eleven hours from Mosul. He died in 1162, and his tomb, called Sheikh Adi, is hard by the village of Ba'adri, where also is the temple of the Yezidis. This place, as their religious center, is by then esteemed superior to Mecca.

Sheikh Hadi gave more consistency to their religious system—still very confused and illogical—and greater stability to its organization, by committing to writing its tenets and traditions. His work, which is the authority for their belief, is named El Jilweh (the Revelation). The original is the only copy existing, and it is esteemed as most holy, and is guarded at Sheikh Adi, with the most scrupulous care. It is in Arabic, and speaks in this wise of the origin of the Yezidis: "'O angels,' said the great God, 'I am going to create Adam and Eve. They will become man and kind, and from the line of Adam's palm (?) shall proceed Shehr ben Jebr, and of him a separate community will appear upon the earth, that of Avazael, i. e., of Malek Tasous, which is the sect of the Yezidis.' Then he sent Sheikh Hadi ben Musafer from the land of Damascus, and he came and dwelt in Mount Lalish, called Sheikh Adi, and was held in high repute for his piety and devotion. He holds among the Yezidis the same place that is given to Moses by the Jews, and that is claimed by the Muslims for Mohammed.

This degraded yet interesting people number...
probably about 200,000 souls, but they are scattered over a belt of territory 300 miles wide, extending in length from the neighborhood of Aleppo in Northern Syria to the Caucasus in Southern Russia. The mass of them, however, are found in the mountains of Northern and Central Kurdistan, and among the Sinjar hills of Northern Mesopotamia. The mysteries of their religion are in the Arabic language, Kurdish is more generally spoken by the Yezidis than Arabic, both languages being used by those living in the Sinjar hills and in the region of Mosul.

The Yezidis are an agricultural people and live in fixed abodes. As a rule they are nearer and closer to their homes, and in respect to personal and dress, than either Arab or Kurd; while their style of dress follows the fashions of the people by whom they are surrounded, except that the shirt has a square-cut opening in front.

Generally speaking they are quiet and industrious, but in the regions of Redwan and Midyat they are given to house-breaking and highway robbery, and also hire themselves to Muslims and Christians for the commission of deeds of blood, so that they are the terror of those districts. In the Sinjar hills, where they constitute almost the entire population, they maintain band refractory, however. Everywhere they entertain a deep-seated hatred of Muslims, whether Arabs or Kurds, who treat them in return with contempt and oppression. Polygamy is allowed among them to the limit of six wives, but its practise is not so general as with the Muslims. The drinking of rekt (a mild arrack) is enjoined as a religious rite in connection with the worship of Melek Taous, and accordingly intemperance is common.

They are recognized by the Turkish Government as a distinct religious community. Their civil head is an Emir whose title is hereditary, and he is of royal blood, if El Jilweh is to be believed. It says: "Then Melek Taous came down to earth for our sect, i.e., the Yezidis, the disturbed, and appointed me for us, besides the kings of ancient Assyrians, Nisroch, etc. And after that we had two kings—Shaboot (Sapor) First and Second—who reigned 150 years; and our Emirs, until this day, have descended from their seal."

The Emir never marries outside of this royal line. He is lord of the persons and affairs of the Yezidis, and his power over them is absolute. His person is considered holy, and all his acts are regarded as righteous. To him belongs administrative power and dignity, as well as ecclesiastical, and all the dealings of the Turkish Government with the Yezidis are through him. For this reason he resides most of the time in Mosul.

The Yezidis have written laws and statutes which are read and interpreted only by the members of one family that of Melia Haider, surnamed El Bussowi. The secretary of the Emir is always chosen from this family.

**Doctrine:** The Yezidis believe in God as the supreme deity and the first cause of all things; but they have nothing to do with Him either in the way of worship or service. They believe in one Melek Taous (King Peacock), who is eternal, an emanation from God, became incarnate as Lucifer, deceived Adam and Eve as Satan, is one of the seven gods who, in turn, rule the world for 10,000 years, and he, having now governed it for the 6,000 years, has yet 4,000 years in which to reign.

They believe in one Sheikh Hadi, called also in El Jilweh 'Abd Taous (servant of Taous). They say that he is the god of that which is good of day and of life; that he is descended from the divine nature, or, at least, is so honored of God that whatever Sheikh Hadi wills comes to pass; and that he revealed to his disciples revelations, secrets, a knowledge of the unseen and of prophecies. In his book he claimed to be the son of both of God and of Melek Taous. The second assertion of El Jilweh is: "He (Melek Taous) sent 'Abd Taous to this world that he might separate truth from error, and make it known to his people; and the first step to that is by tradition, and afterward by this book El Jilweh, which the uninstructed must neither read nor behold." His claim to have been sent of God is made farther on in the sentence quoted at length when stating the origin of this sect. They also say of him, "The Yezidis' god descended in this era and both taught and established us." Sheikh Hadi associated himself with God in stating farther on in his book that "He afterward came and dwelt in Lalish." Is there in Sheikh Hadi an effort at the reconciliation of God and Melek Taous, or the union of the two principles? According to the Zoroastrian doctrine of good and evil, in order to secure a reconciliation of man with each, and with both together, through worship at the shrine of one who stood for both?

They believe in six other gods. El Jilweh says: "He created gods from both of and from his light; and their creation was as one light from another light." This recalls the Zoroastrian doctrine of Ahura Mazda and his six gifts.

They accept Christ as the "Light of God," and say that He cannot die, also that He is a Savior and will come again. But all these are evidently accommodations to the Christian sects with whom they are brought into contact. In the same way the Yezidis about Redwan have attempted to accommodate their tenets to the Christian doctrine of the Trinity.

They hold to the Transmigration of Souls, but subject to the caprice of Melek Taous, for El Jilweh says: "I (Melek Taous) will not allow one in this wretched world longer than the time determined by me; and if I desire it I send him a second or a third time into this world, or some other, by the transmigration of souls." When righteous souls return they enter into men, but wicked spirits are sent back to reside in the beasts. Yet along with this they hold to a Resurrection, when Sheikh Hadi will carry all the Yezidis to paradise on a tray borne upon his head. They hold to a future judgment and punishment for all—except the Yezidis. El Jilweh says: "I (Melek Taous) punish in other worlds those who do contrary to my laws. They have Islamic notions of paradise as a place of pleasure and drinking, together with the pleasures of physical love. They claim to receive the Old Testament, the New Testament, and the Koran, but reverence the Old Testament more than either of the others. This acceptance is, however, a qualified one, for El Jilweh says: "The books of those who are without I accept in a sense, i.e., those that agree with and conform to my statutes. Whatever is contrary to these they have altered."

The Yezidi ecclesiastical polity has the form of a religious oligarchy, is composed of six orders
besides the Emir, which are chiefly hereditary and confined to as many distinct families. These orders are:

(1) **Sheikh**: He is called Sheikh Mengah, which is the name of a district comprising the regions of Mosul, Amadiyeh, and Zakho. He is the chief ecclesiastic of the sect. He ranks next to the Emir, who is the religious as well as political head, even as the Sheikh ul Islam in Turkey ranks next to the Sultan, who is the Caliph. The Sheikh is the guardian of the tomb of Sheikh Hadi. The insignia of his office are a kind of girdle which is worn about the body and a netting of catgut which is carried in the hand. He is supposed to prophesy, and has paradise in his flowing sleeves, sections of which he is willing to dispose of to purchasers according to the sums received. Whenever the Sheikh appears among the people they submit themselves to him in lowly reverence and humility.

(2) **Sheika**: This order was founded by Sheikh Hadi. Every Sheikh traces his lineage back through a regular succession to a Patriarch who is regarded not only as the bestower of the office of Sheikh, but also as the assistant and advocate of those in his line who exercise the office, and as the control of their enemies over them—such power being supposed to reside in each Sheikh.

From this order comes the Mella, who is the instructor of youth, the guardian of “the book,” of religious mysteries, and of the interests of the sect. He is also the secretary of the Emir, and in his family alone are reading and writing allowed. The office is hereditary.

(3) **Pirs**: They are the Nazarites, who take vows of celibacy and devote themselves and their property to Sheikh Hadi. To them appertains the conduct of hair-dressing and of the fasts and feasts. They are also intercessors, and perform their function upon certain heaps of stones in the neighborhood of Sheikh Adi, where the Yezidis chiefly reside.

(4) **Kuchiks**: The word Kurdish signifies dancer. These attend to the service of the tambourines, praises and songs. They order and conduct the sacred dance upon the feast-days. They praise the gods Hadi and Taous with tambourine and life until they swoon in a trance, when they utter strange sounds and language. They declare what is revealed to them in dream, trance, and vision, and are reckoned as prophets. They are said to have the power of life and death—probably through the influence of magic.

(5) **Kowals**: These are the priests proper, to whom pertain the duties of imparting religious instruction to the people, and of sepulture. All instruction is oral, in which they profess to be guided by an “inner light” to which all, even the Emir, must give heed. Whenever a Yezidi is about to die he is visited by a Kowal, or his agent, who removes the dying man’s sins by transferring them to himself. They divide with the Pirs the functions of intercessors, and to them belongs the privilege, each year, of bidding for the concession of conducting the “Sanjak Taous” among the Yezidi villages. They never use a razor upon their heads.

(6) **Fakirs**: These constitute the lowest order of the priesthood. They are entrusted with the instruction of boys and girls in the tambourine, in dancing, and religious evolutions. They are married, have a salary, live in Sheikh Adi, and are the janitors of that holy place.

The Yezidis worship Melek Taous through his “Sanjak,” or symbol, which is a sacred brazen cock, one eye of which is marked over by a cross. They also adore Sheikh Hadi, who is still a god tho his body be dead, and who receives divine honors at his tomb in Sheikh Adi. Forasmuch as he was also sent of Melek Taous, the sacred cock stands for him also, so that it is worshipped at the same time with Melek Taous, and at his tomb the “Sanjak” of Melek Taous is revered equally with the tomb. The two eternal principles have thus equal honor, and by this arrangement no one can worship the one without equally worshipping the other. Here again there seems to be an attempt to accommodate something to their needs from the Parsee religion. In the Vendidad the cock is a sacred bird—the bird of Smrasha, who is Obedience to the law of Mazda and chief of the Yazata of fire, and the leader of the demon host, Zehna Davas. The Yezidis seem to combine the two principles and so make the cock represent both.

These two gods are the chief objects of their worship, and the tomb of one and the sanjak of the other are the symbols employed to bring them before the worshipers.

The sun is regarded as an exalted spirit without whom there would be no stability to the universe, and, therefore, also worthy of respect and worship. Fire, more especially as lightning and flame, is considered a sacred element, and is worshipped by adoration. They have also a bronze image of an ox which they worship at a festival in November.

The tombs of departed Sheikhs are regarded as holy, and in religious rites conducted at them the assistance of those entombed therein is specially invoked.

The Yezidi worship has a certain fixed ritual difficult to understand. When the “Sanjak Taous” is carried to a village it is accompanied by Kowals, who march before it with drum and pipe. It must remain in the village over night, and the Yezidis must drink “raki” in its presence. Its worshipers approach it upon their knees, kiss it, mutter prayers, deposit their contributions in a box by its side, raise and walk away with their face toward it. Meanwhile a candle burns on either side of the holy bird. They have no liturgy, nor do they pray audibly, believing that all prayer should be with the heart only. They say God does not require them to fast, save during Ramazan, when they fast three days instead of thirty. This fast must be begun and ended in the presence of either Sheikh or Pir. It is ended by a participation in holy wine that is considered to be the Blood of Christ. The cup containing it is held in both hands, after the sacrificial manner of the East, and if a drop should fall it is gathered with religious care.

The Yezidi feasts are the following: 1. On the first Wednesday in April, which is the beginning of their year. 2. August 1, continuing three days, in honor of Melek Pukhur ed-Deen. 3. September 22, continuing eight days, to Sheikh Hadi. This is called “et towafat”—i. e., the
floods. 4. November, called the Naheevi. (This feast is especially observed by the Yezidis of Jebel Toor, at which the sacred ox is worshiped in connection with Babylonian orgies.) 5. January 1, lasting three days, in honor of Shems ed Din At all these feasts there is much singing in connection with the religious dances. They have a hymn-book called "Zemboor," the hymns of which are in Arabic. They have also songs which are in Kurdish, and are sung to Kurdish tunes.

1. lasting three days, in honor of Shems ed Din hyn-book called 'Zemboor," the hymns of connection with the religi 9 ious dances. They have a

YING-CHAU-FU: A town in Ngan-hwei, China, situated in the N. W. part of the province, on the Sha-ho. Station of the CIM (1897), with 3 missionaries, one with his wife; 2 native workers, 1 place of worship, 1 day school, 1 Sunday school and 3 professed Christians. Some write the name Ying-chow-fu.

YING-SHAN-HSIEN: A town in Sze-chuan, China, situated about 40 miles S. E. of Pao-ning-fu. Station of the CIM (1898), with (1903) 3 women missionaries, 1 native worker, 1 place of worship and 15 professed Christians.

YO-CHAU-FU: A town in Hu-nan, China, situated a little S. of the Yangtze River, used by the LMS as a point of entrance to the province. After a short period of observation the station residences were transferred to Heng-chau.

YO-H-YANG. See YO-YANG.

YOKOHAMA. See YO-YANG.

YOKOHAMA: One of the most important of the treaty ports of Japan. It is situated on a plain by the side of the bay of Tokio, on the S. coast of the main island, and is shut in by hills. It occupies an area of a square mile, and has a population of about 120,000. It is a growth of new settlement. The climate is variable, the thermometer ranging from 95° to 43° F., and the rainfall is quite great. The harbor is a wide and commodious one, well protected by a breakwater. Yokohama is a port of call for the lines of steamers between San Francisco and Hong-kong. Other lines connect it with Shanghai, as well as numerous steamers which run from it to points in Japan and China. A line of steamers from Vancouver to Hongkong stops there regularly. A railway connects it with Tokio, and was the first railway opened in Japan (1872). It is also the terminus of a railroad which runs to Kieto.

Population (1898) is 193,762; many Europeans and numerous Chinese are included in the total. The Young Men's Societies here: RCA (1859), PN (1859), WU (1871), ABMU (1872), ME, Methodist Protestant (1879), Salvation Army, Hephizabah Faith Mission, Zion Catholic Christian Church. All together they have 44 missionaries, men and women; 175 native workers, men and women; 22 native workers, 8 day schools, 10 boarding schools and 1,921 professed Christians. The ABS (1876) and the BFBS each have an agency and a book depot in Yokohama.

YORK: A town in Sierra Leone, West Africa, situated on the seacoast at the mouth of the Whale River 16 miles S. by E. of Freetown. Station of the CMS (1822), with (1903) 4 native workers, 3 outstations, 1 place of worship, 1 Sunday school, 2 day schools, and 261 professed Christians, of whom 23 are communicants. Also station of the UMFC (1860), with (1903) 1 missionary and his wife, 29 native workers, 1 outstation, 2 places of worship, 2 Sunday schools, and 430 professed Christians, of whom 217 are communicants. Station of the WMS also, with (1903) 25 native workers, 4 outstations, 7 places of worship, 3 Sunday schools, 3 day schools and 355 professed Christians, of whom 316 are communicants.

YORUBA: Name of a people inhabiting the country inland from Lagos, West Africa.

YORUBAN: A language belonging to the Negro group of African languages. It is found in several dialects among the tribes occupying the Lagos protectorate and the territory from Dahomey to the west bank of the Niger, behind the seacoast belt. The people are intelligent and enterprising and the language is suited to the development of the people. It was reduced to writing by CMS missionaries in the early part of the 19th century, and is written with Roman letters.

YOUNG MEN'S CHRISTIAN ASSOCIATION: Organisations of Christian young men for mutual improvement, and for more or less of religious activity, have probably existed in almost every age of the Church. There is a historical record of such societies in Great Britain and Ireland as early as the reign of Charles I. They maintained a continuous existence for nearly one hundred years, through the revolutions under Cromwell and King William, attaining their highest prosperity in the reign of the latter. The chief object of these societies was the promotion of personal piety among their members, but they gave rise in 1691 to the "Societies for the Reformation of Manners," which had for their aim the suppression of vice through legal means. These were called into being by the low state of public morals, which, notwithstanding the better attitude of the court of William and Mary, had little mended since the absolute reign of Charles II. The early efforts of these reform societies were favored by the civil courts, and they flourished for about forty years. They had become extinct, however, in 1757, and an effort to revive them by members of Wesley's and Whitefield's congregations was defeated through the indifference if not actual hostility of the authorities. In the 19th century, between 1823 and 1838, David Nasmith, of Glasgow, formed about seventy Young Men's Societies in as many cities of the United Kingdom, France, and America. In Germany, as early as 1832, similar associations sprang up, usually called Mayen or the Young Men's Christian Societies, and had for their aim the promotion of the spiritual welfare of young men; develop or train a special class of
executive officers or acquire property in the form of buildings which made them locally prominent. They did not band themselves together in district, national, international and world’s conferences, altho some of them, notably those of Germany, are now part of the brotherhood forming the World’s Council of Churches. The present Glasgow and Cincinnati Associations claim to have originated quite independently of suggestion from London; but it seems beyond dispute that the movement which has resulted in the present world-wide brotherhood can be traced to the parent English-speaking association which was organized in London by George Williams, June 6, 1844.

But while the origin and early growth of the movement took place in Great Britain, the larger development and expansion of the work has been wrought out by the American Associations. A knowledge of the London Association and its work led to the formation of Associations in Montreal, Canada, December 9, 1861, and in Boston the 250th of the same month, the New York Association a special convention was called November 14, 1861, which resulted in the organization of the United States Christian Commission, the work of which largely absorbed the energies of the Northern Associations during the remainder of the war. With the return of peace, however, the Associations took up their old work with renewed zeal, advanced ideas, and better methods. From about this time dates the beginning of that unparalleled growth which has marked the past three decades. The formal adoption of the evangelical test secured the active sympathy of the churches; a clearer conception of the work, as distinctively for and by young men, localized thought and effort, and rapidly developed the active membership test, which called for better facilities, which were readily furnished as the practical character of the work was recognized; the work demanded systematic supervision, and the paid secretaryship was developed; the Associations increased in number, spread over the country, and grew multiplex in their departments of work, and State organization and a comprehensive general supervision became a necessity; broadened methods and appliances in the local work asked for larger, better adapted and permanent quarters and buildings sprang up by the score, till to-day the Associations are a universally acknowledged force in the religious, educational, and social life of the country.

In government the individual Associations are independent, as to the same month in all the active-membership test, each society conducting its business affairs through a board of directors as the corporate management, and with a paid executive officer styled a general secretary; but they are united in a thorough system of general organization, embracing delegated conventions, executive committees, and visiting agents, the decisions and advice of which, tho in the main only advisory, are very generally accepted and followed. With the Associations of the United States and Canada this system began to take form in the following:

1. A Biennial Convention (annual previous to 1878), composed of delegates from all the Associations, representation being based upon the active membership. The ad interim powers of this convention are vested in an executive board, the members of which are elected by classes at the biennial sessions. Since 1866 the headquarters and a working quorum of this body have been located in New York, and in 1888 it was incorporated as the International Convention and its committee; (i) securing, training, and recommending general secretaries; (c) advising and assisting regarding the plans, location, and methods of raising money for State work, for new buildings, to place secretaries in new fields, the management of property; (d) securing funds for its own work and aiding State and local Associations in raising money for State work, for new buildings, to place secretaries in new fields, and in special financial emergencies; (e) arranging for the International Meetings, representing by which it had for years been known. The scope of the committee's work is broad, including (a) supervision and extension—generally of all the work, in full when there is no State organization, and very largely of such special departments as the college, railroad, German, and foreign work; the State organizations owe their existence and early nurture to the act and care of the International Convention and its committee; (i) securing, training, and recommending general secretaries; (c) advising and assisting regarding the plans, location, and methods of raising money for State work, for new buildings, to place secretaries in new fields, and in special financial emergencies; (e) arranging for the International Meetings, and in planning many State and special conventions, and sending official representatives to all; (j) conducting an extensive correspondence; (g) a publication list of tracts and books, several annuals and periodicals, including the "Year-Book;" (h) through the systematic efforts of the committee, the American Associations have observed annually, since 1866, a day and week of prayer in November, and since 1875,
by act of the World's Conference, the Association of other lands have joined in this observance; (2) it is overwhelming of calamity by flood, fever, or disaster, the Associations have often rendered communities effective help through this committee, as their agent, in gathering and distributing such relief.

The organization and work of the typical American Association may be thus described: (a) A dual membership: (1) Active—men who are members of evangelical churches, and who constitute its voting, office-bearing, and working force; (2) Associate—young men of good moral character, who join usually for the secular privileges. The total membership of the 1,736 Associations reporting in 1903 is 350,455. (b) A business organization, with constitution, legal incorporation, officers, board of management, and well-ordered system of committees. (c) A paid secretary, to supervise and direct, under the local board, and to develop workers, rather than to attempt too much detail work himself, leaving for the most part the actual work to the members. The total number of general secretaries, physical directors, and assistants in the various departments of the local work is 1,729. A school devoted chiefly to the training of young men as general secretaries and gymnasm instructors, opened in Springfield, Mass., in 1885, has (1903) an enrollment of about 100, while a school of like character organized in 1891 at Chicago has about 150 students, and there are several well-constituted summer schools, notably those at Lake Geneva, Wis., and at Silver Bay, Lake George, N. Y. (d) A building of its own, usually comprising reading-room, library, parlors, recreation-room, offices for secretaries and directors, large and small lecture-rooms, class-rooms, gymnasium, including bowling-alley, baths, and dressing-rooms; a kitchen and janitors' quarters. There are 460 such buildings, valued at $24,016,415, a good index of the estimate put upon the work by Christian business men, and a strong guarantee of its permanency. (e) An organized work: (1) Religious—consisting of Bible-classes, evangelistic campaigns for young men; weekly training-class; evangelistic devotional; meetings for young men; special work in the interests of personal purity, temperance, etc.; systematic invitation work; the distribution of religious literature; and a directly personal work which is specially emphasized. (2) Educational—reading-rooms; circulating and reference libraries; evening classes in practical and liberal branches, book-keeping, penmanship, stenography, mathematics, drawing, languages, history, literature, political science, music, etc.; literary societies, and educational lecturers. (3) Social—attractive rooms for resort, with companionable supervision, music, recreative games, and a variety of social gatherings and entertainments. (4) Physical—facilities for artificial exercise of every description; organized athletic clubs, both a scientific and practical training, to make physical examinations and prescribe safe and helpful work; baths and open athletic grounds for field-sports, and clubs for boating, swimming, rowing, etc. (5) Economics—employment bureau, boarding-house register, savings-bank, medical club, visitation of the sick, and similar service. (6) Junior department, in which, under special supervision and with separate rooms, a more or less formal kind of work is carried out for boys, and from which they graduate into the senior departments. The International Committee, with headquarters at 3 W. 29th St., New York City, has 45 members aside from the officers, and 15 advisory members, besides 15 of its 15 members. Most of the members live in New York or vicinity, but there are representatives from different parts of the United States and Canada. There are also 52 corresponding members representing different States and foreign countries.

For active work the staff is divided into 14 departments:

The Office, Publication, and Business Department have charge of the general correspondence, literature, and financial management. The Field Department, occupied with the extension of the work, is divided into development, equipment and trained leadership of the Association work in the cities and towns, and also the strengthening of the work of the State and provincial organizations. There are 7 secretaries, 1 in New York, 3 in other parts of the country. The Railroad Department organizes Associations among railroad men, provides rooms, libraries, buildings, and all the usual features of an Association. For a time it was rather frowned upon by railroad authorities, but of late years there have come to recognize its value and have aided materially in its development, contributing liberally in the erection of buildings and assisting in many ways to make it easy for men to attend the meetings, etc.

An illustration is the Missouri Pacific system, where 13 well-equipped Associations were organized within four years. There were in 1903, 198 Associations, with a membership of 63,000, an increase of 50 per cent. in two years. There are 79 buildings, valued at $1,129,050, owned by Associations; 8 under construction valued at $49,000, and 45 others set apart by the companies for their use, valued at $541,000. Work among street employes is being organized and plans are under consideration for extending the system into the countries of Europe. The Industrial Department has been the most recently organized (1905) and resulted from a study of Association work among the 4,500,000 men employed in the various industrial enterprises of the continent. It looks forward to the erection of buildings or the equipment of rooms in connection with the great factories.

The Student's Department has (1903) 635 Associations among students (exclusive of colored and Indian departments); of these, 48 are in the theological seminaries, 72 in the medical and other professional schools, and the remainder in universities, colleges, and normal and preparatory schools. Special emphasis is placed on Bible study, and in 1902 there were 16,042 enrolled in the Student Bible Classes, while the secretary in charge was in correspondence with 1,508 Bible class leaders. Student Conferences for the training of the young workers have been organized at Northfield, Mass.; Lake Geneva, Wis.; Asheville, N. C.; Pacific Grove, Cal.; Gearhart, Oregon, and Lakeside, Ohio. The spiritual effect of the work is seen in the conversion of over 3,000 young men in the year. Ten secretaries are employed by the International Committee, some in office and
superintendence work and others in visiting colleges, etc.

The Army and Navy Department received a special impulse during the war with Spain and has been developed steadily. It has received the special support of the officials, and the membership of enlisted men steadily increases. A Soldiers' Bible and Prayer League and a Temperance Union have added over 1,000 names in a single year. There are 150 traveling libraries in constant circulation, and 75 tons of stationery, reading matter, games, etc., are shipped from the office in New York for the different posts. There are 31 buildings in the U. S., 14 in Cuba, 1 in Porto Rico, 4 in the Philippines, 1 in China, and 4 in Alaska. Bible classes, religious meetings, and entertainments are held at 200 different points.

In the Naval Department branches are open in Brooklyn, N. Y.; Norfolk, Va.; Newport, R. I.; San Juan, Porto Rico, and at Manila, Caviite, and Olongapo, in the Philippines. Over 1,900 sailors and marines are members. A striking feature is the savings department, which in six months handled nearly $150,000 for the men. Over 1,600 men joined the Naval Temperance League during the year (1903).

The Colored Department: Of the 103 Associations in this department 69 are in institutions and 34 in cities, with a membership of over 7,000. Two Conferences at Danville, Va., and Montgomery, Ala., were well attended. Seventeen secretaries give their entire time, 2 in New York and 15 in the Assembly.

Boys' Department: The growth in this department has been very great. The 576 Associations report 45,000 members, or if those holding senior tickets were included, 80,000. There are over 100 boys' work specialists, 1,500 rooms used, 120,000 in attendance on Bible classes, while between 3,000 and 4,000 are admitted to the evening classes.

The Indian Department: This reports 47 Associations, with a membership of over 2,000, in Manitoba, Terr. Kan., Nebraska, North Dakota, Oklahoma, Oregon, Pennsylvania, and South Dakota.

Religious Work Department: In this the special effort has been to secure quality rather than quantity, yet 8,016 volunteer workers have been registered in the year, while 31,300 have attended the 1,711 Bible classes, and the total attendance at religious meetings of all kinds was 3,230,000. In 1903, 18,613 conversions were reported.

The Educational Department: In the different schools, clubs and lectures, 30,600 students were enrolled, while 1,200 more men reached the Physical Department. This, too, has had great success, 634 Associations reporting attention to it, 93,983 men making use of the gymnastic and athletic features. There are 543 gymnasiums, while 464 Associations report outdoor games and sports.

Foreign Department: This organization represents the foreign missionary interests of the American Associations. It arose as a result of investigations begun by Mr. Luther D. Wishard, who, in 1889, began a three years' tour of mission lands with the purpose of studying the conditions of young manhood in non-Christian countries. As a result of that tour and of the subsequent study and experience of Mr. John R. Mott and others, work has been established in India, Japan, China and Hong-kong, Ceylon, Brazil, Argentina, Mexico, and Korea. A total of 31 secretaries, most of them with families, are laboring in the countries named. These Associations were organized and aided in the organization of some 300 Associations in those fields, about one-half of which are known as Student Associations in institutions of higher learning. They have a total membership of 14,000, of whom 3,600 are active.

Eight periodicals are published in their interest abroad, and they have 14 buildings, valued at $400,000.

The reasons which have led to the inauguration and prosecution of this enterprise are as follows: (1) In non-Christian lands, where moral ideals are largely wanting and where temptations are omnipresent, there is no class which so much needs the oversight and religious incentives of Christianity as the young men. (2) In some of these countries, notably Japan and India, young manhood holds a strategic relation to the progress of the Christian cause. (3) Most of the young men reached are educated and the process of education has alienated them from the superstitions of their fathers, thus leaving them a prey to the skepticism of the West and to the materialism of a semi-foreign environment. (4) The achievements of the Association in Christian countries have led missionaries in all the lands where the foreign Associations are doing their work to strongly appeal to the initiation of the enterprise. They have done so because they believe that an Association fosters Christian unity, deals with a difficult class in a most effective way, and trains them for Christian discipleship, as no other agency is able to do. (5) The achievements of the Association, though reducible to any large statistical exhibit, show more than justified the anticipations of the missionaries who have urged the foundation of these asylums for the tempted, and training schools for an active evangelical propaganda. The branches of the World's Student Christian Federation established in India, China, and Japan owe their existence and effectiveness to the foreign Associations. Those in China, India, and Japan are associated as national organizations, under committees consisting of prominent missionaries and Christian workers long resident in those lands.

The following is a general summary of Y. M. C. A. organizations in all lands:

AmerIca: United States and Canada, 1,736; Mexico, 1; West Indies, 3; Bermuda, 2; Argentina, 1; Brazil, 7; Chile, 1; Guiana (Dutch), 2; Uruguay, 3.

Europe: Austria, 87; Belgium, 34; Bulgaria, 3; Denmark, 270; England, Ireland and Wales, 935 (including some church Associations); Finland, 28; France, 123; Germany, 1,784 (including 540 Associated Unions); Greece, 1; Hungary, 27; Iceland, 5; Italy, 58; Luxem­burg, 1; Netherlands, 314; Norway, 30; Portugal, 10; Rumunia, 1; Russia, 11; Scotland, 243; Spain, 5; Sweden, 125; Switzerland, 470; Turkey (European), 6.

Asia: Asia Minor, Syria and Palestine, 13; Ceylon, 14; China, 43; Dutch Archipelago, 1; India, 151; Japan, 54; Persia, 2; Tonkin, 2.

Africa: Madagascar, 1; North, West and Central Africa, 11; South Africa, 8.
The strongest missionary influence that has come to Christian Endeavor societies, however, is a result of their wide spread among all nations and races. Endeavor conventions are cosmopolitan, and Endeavorers have become familiar with the thought that all men are their brothers through the knowledge, brought to them in many ways, that their own society, its prayer-meeting subjects, its committees, its pledge, its constitution, is beloved by Jews and Greeks, Hindus and Hottentots, Brazilians and Norwegians, New Zealanders, Chinese, Armenians and Copts. In many ways this world-wide bond of Christian Endeavor has proved itself a very real tie, and the power it may exercise in coming years is illustrated by the following brief survey of Christian Endeavor around the globe:

In the United States there are now 44,380 societies, and hundreds of these consist wholly of foreigners, including German, Chinese, Indian, Japanese, Greek, Swedish, Bohemian, French, Italian, Armenian, and some of them have served for months, before the arrival of missionaries, as the only religious center for Indians and white miners in wide regions. In Canada there are 4,047 societies, and here also many of the societies are formed of Endeavorers from other lands, especially, in the West, from China and Japan.

Mexico has 111 societies, headed together in a strong national union, and possessing a Spanish Christian Endeavor organ, El Esforzador Mexicano. The Mexicans are very earnest in the work; two of them, for instance, once walked more than 200 miles to attend an Endeavor convention. They have proved themselves in their temper always, and at one session of a Mexican Endeavor convention thirty Catholics were converted.

Many islands of the West Indies have received the Christian Endeavor movement. Porto Rico, where the society was introduced by an American soldier, now has 4 societies; the Bermudas 7, Trinidad 10, the Barbados and Grenada 2 each, Cuba 11. An American soldier founded the first society in Cuba, leading, with two Cubans, the first meeting, which lasted two hours and three-quarters. In Jamaica the society was started through the influence of a copy of The Christian Endeavor World sent by a Boston lady to a sick sailor in a Jamaica hospital, and now there are 236 societies in the island, organized in flourishing unions, and conducting their own paper, The Christian Endeavor Gem.
4 societies, the Tokelau 2, the Carolines 3, the Ellice Islands 6, Samoa 19. The pioneer society in Samoa was a remarkable one, having established sixteen others. It has 250 corresponding members, and has sent out from its own number more than 100 missionaries, more than half of them to the deadly climate of New Guinea. Since the United States has gained possession of the Philippines, Christian Endeavor has been introduced, and already there are 6 societies on the islands. One society has 130 corresponding members among the soldiers. The first native society had 13 members at the start, and they all took part at the very first meeting. Christian Endeavor has also made a beginning in Guam, where the society consists wholly of converted Catholics.

Australia possesses 3,000 Christian Endeavor societies, and has a very active union which supports two papers, The Golden Link and The Roll Call. Its conventions are among the most important religious gatherings held in the southern hemisphere. The Australian Endeavorers are greatly interested in missions. Large numbers of the young people have become Christians, and their money and time are spent with especial liberality on behalf of the aborigines.

The first Christian Endeavor society was formed in Japan in 1891, in the Girls' School at Okayama. Two years later the National Christian Endeavor Union was formed, which now numbers 115 societies, and supports a national magazine and a paid secretary, who gives his whole time to the organizing of societies. The president of the Japanese Union, Rev. Tsuké Harada, renounced his hereditary position. The Hamadan society, Jews, Armenians, and Muslims in Persia have been translated into all the great languages of India. Much evangelistic work is done by the native Endeavorers—outdoor preaching with the magic lantern, personal work on the railroad trains, going from coach to coach, outdoor services for beggars, and similar endeavors.

Persia has 35 societies, most of them springing from a single earnest society in a boarding-school, whose members carried the Christian Endeavor seed as they returned home. In 1902 a national union was formed, which held its first convention three days long. In one Hamadan society, Jews, Armenians, and Muslims are mingled. One Teheran society uses in its meetings English, Persian, Armenian, and Hebrew. During a terrible plague of cholera in 1899, when the Jewish and Muslim doctors fled and 20,000 died in the city, the members of this society bravely aided the American missionaries in their hospital work, serving as nurses.

Turkey has 75 societies, in spite of Turkish oppression, which will not allow conventions to be signed, badges to be worn, or even the word "society" to be used. The Cessarea Society was obliged at one time to burn its records. The members are all Armenians, and they suffered terribly during the Armenian massacres. The young men and young women meet in separate societies, as everywhere throughout the Orient. Some of the most active societies are in Macedonia. In addition to these 75 societies, there are 18 in Syria. Jerusalem itself has an active Christian Endeavor society.

Of Africa's 141 societies, Egypt has only 5, but they are decidedly cosmopolitan. One of them has among its members Italians, Syrians, Armenians, Copts, Hindus, English, and Americans. There are some societies on the west coast of Africa, especially a vigorous one in Yorubaland, which started out with five members and now numbers 200. Most of the African societies are in the south, where there is a strong South African union, publishing a paper, The South African Endeavorer. Andrew Murray is active in the work there. There are many Zulu societies, especially in Cape Colony.
and Natal. The Boers have entered heartily into Christian Endeavor activities. During the war there were 20 societies in the Boer prison camp on St. Helena, with 800 members; 700 Endeavorers in 8 societies in the Caylon camp, 600 in the Bermudas, and others in the Portuguese camp. After their return from prison, 200 Boer Endeavorers took up active service as missionaries.

In 1892, 30 Christian Endeavor societies were reported to Christian Endeavor headquarters from Madagascar, the previous to that time it was not known in America that a single society existed. When last heard from, the Madagascar societies numbered 93. Christian Endeavor has also got a start in the Island of Mauritius.

Passing to Europe, we find Christian Endeavor, at least in its initial stages, in all European countries, while in some of them it is very flourishing. Portugal possesses only 8 societies, for the movement is a new one there. The pioneer society is in Lisbon, the capital. One of its endeavors was the opening of a mission in the slums. In Spain the first society was founded in Barcelona in 1898, conducted by Rev. and Mrs. W. H. Gulick, and as the girls returned home, new societies were started in many places, until now Spain has 47 societies, and more Mothers' Christian Endeavor Societies than any other country. The Spanish Endeavor paper, Esfuerzo Cristiano, is published in Madrid. It has been assailed by Catholic persecution. The first Spanish national convention was held in 1900 in Madrid in spite of persecution. There were 200 delegates.

There are 96 societies in France, most of them in Paris and its vicinity and in Southern France. Paris has a large and flourishing Christian Endeavor union. The French societies are found chiefly in the Reformed churches and the McAll missions.

Sweden has 13 societies, chiefly in the western or French-speaking cantons. These Endeavorers publish an attractive Christian Endeavor paper, L'Activité Chrétienne. Geneva has a Christian Endeavor union.

The beginning of Christian Endeavor interest in Germany was Dr. Clark's visit in 1894. The first societies were refused the churches as meeting places, and compelled to meet in barns and inns. Now there are 252 societies, largely in the national, or Lutheran, churches. There is a national union, which supports two secretaries, each German Endeavorer contributing half a mark (12 cents) a year. There are 6 provincial unions, and admirable conventions are held. There is an able Christian Endeavor organ, Die Jugend-Hilfe. The United Society of Christian Endeavor helped the work by annual grants of money for years, but now the German Endeavorers are independent and contribute to the work in newer countries. They are also supporting German missionary work in the Caroline Islands. The German name for the Christian Endeavor Society, translated, is "The Society for Decided Christianity."

There are seven Italian societies, with a regular Christian Endeavor department in a leading paper, L'Italia Evangelica. There are societies in Rome, Florence, and other famous cities. Bulgaria, with its five societies, has already formed a union. The same step has been taken by Hungary's three societies. In Austria there are six societies, found in Bohemia and Moravia. Sweden has 79 societies, one of them fifty-five miles within the Arctic Circle, with an evening, once a year, fourteen days long in which to hold a meeting. Norway has 5 societies. Denmark and Belgium and Holland each have 3. Russia also has 3, the first society having been formed by a young Scotch drygoods clerk in St. Petersburg who went home on a visit, and on his return brought Christian Endeavor with him. Finland has 7 societies. When Dr. Clark visited that land, expecting to find it virgin soil, to his amazement he learned that 4 societies already existed there.

In Great Britain the first society was formed in August, 1887, being inspired by the account of a young Englishman who had visited Dr. Clark's society in Portland. Now Great Britain has a national union next in strength to that of the United States, and numbering 9,716 branches. Branch unions with vigorous conventions are found in Ireland, Scotland and Wales. Three able Christian Endeavor papers are published—the national organ, The Christian Endeavour Times, the Irish Girl's School paper, The Irish Enquirer (printed patriotically on green paper), and The Church of England Endeavourer, which represents the rapidly growing societies of the Anglican Church. The largest city Christian Endeavor in the world is that of London, with its more than 700 societies. Philadelphia comes next, with 625 societies.

In the majority of the lands thus passed in review, Christian Endeavor is young, the society having been established only four or five years. Everywhere, however, it is full of energy and enthusiasm, and it is certain that this great international brotherhood, laboring together "for Christ and the Church," will prove year after year a constantly growing power for the upbuilding of Christ's Kingdom.

YU-CH'ENG: A town in Shan-si, China, situated 36 miles N. E. of Ping-yang-fu. Station of the CIM (1886), with (1903) 2 missionaries, 4 native workers, 1 outstation, 2 places of worship and 51 professed Christians. Some write the name Yoh-yang.

YUEN-CHAU-FU: A town in Hu-nan, China, situated in the E. part of the province on the Yuen River about 80 miles S. W. of Chen-chau-fu. Station of the CMS (1903), with 1 missionary and 1 place of worship. Some write the name Yuin-cheo.
YUN-HO-HSIEN: A town in Che-k'iang, China, situated in the S. part of the province about 70 miles W. of Wen-chau-fu. Station of the CIM (1895), with 4 women missionaries, 3 native workers, 1 place of worship, 1 Sunday school and 6 professed Christians. Some write the name Uin-ho.

YUNG-CHING. See YUNG-TSING-HSIEN.

YUNG-CHUN-CHAU: A town in Fo-k'ien, China, about 80 miles S. W. of Fu-chau-fu. Station of the PCE (1894), with (1903) 2 missionaries, one of them with his wife; 3 women missionaries, 16 native workers, 12 outstations, 2 dispensaries, 1 hospital and 1 boarding school. Some write the name Engchun.

YUNG-HSIN-HSIEN: A town in Kiang-si, China, situated on a branch of Kan River, 45 miles W. by S. of Ki-ngan-fu. Station of the CIM (1899), with (1903) 3 women missionaries and 1 place of worship. Some write the name Yung-sin.

YUNG-KANG-HSIEN: A town in Che-k'iang, China, situated about 25 miles S. E. of Kin-sha-fu. Station of the CIM (1893), with (1903) 1 missionary and his wife; 3 native workers, 1 place of worship and 40 professed Christians. Some write the name Yung-k'ang.

YUNG-SIN. See YUNG-HSIN-HSIEN.

ZACATECAS: A town in Mexico, capital of the state of the same name. The place is not attractive in its appearance, owing to its wild, arid surroundings, and the streets are uneven and badly paved. Population (1900), 32,856, pure-blood Indians, mixed Indians and Spaniards. Station of the PN (1873), with (1903) 1 missionary and his wife, 1 woman missionary, 5 native workers, 4 Sunday schools, 5 outstations and 854 professed Christians. Also station of the SBC, with (1900) 5 native workers, 3 places of worship, 1 day school and 193 professed Christians.

ZAFARWAL: A town in Punjab, India, situated about 20 miles S. E. of Sialkot. Station of the UP (1866), with (1903) 1 missionary and his wife, 2 women missionaries, 29 Sunday schools, 9 day schools, 8 outstations and 1 boarding school.

ZAGAZIG: A town in lower Egypt, situated 60 miles E. of the Suez Canal at Ismaileiah. Population (1897) 35,715. Station of the UP (1894), with (1903) 1 missionary and his wife and 1 woman missionary. Some write the name Zakazik.

ZAHLEH: A town in Syria and mission station of the PN (1872), with (1903) 2 missionaries and their wives, 2 women missionaries. Church statistics included under Mt. Lebanon. Also station of the British Syrian Schools, with (1901) 2 women missionaries, 8 native workers, 5 outstations, 1 place of worship and 5 day schools.

ZAKAZIK. See ZAGAZIG.

ZANZIBAR: A town on Zanzibar Island, E. coast of Africa. Station of the Universities Mission (1864), with (1903) 7 missionaries, 15 women missionaries, 1 outstation, 2 places of worship, 1 printing house, 2 day schools, 2 dispensaries and 256 professed Christians. Some use for this place the name Mkunazini, which is a suburb where missionaries reside.

ZANZIBAR PROTECTORATE: A British protectorate comprising the island of Zanzibar off the east coast of Africa in the Indian Ocean and about 30 miles from the mainland, having an area of 640 square miles and a population of 150,000, and the island of Pemba, a little further from the coast and to the north of Zanzibar, having an area of 380 square miles and a population of 50,000. The ruler of the islands under British protection is the Sultan Ali bin Hamoud bin Mohammed. The authority of the Sultans formerly extended to the coast of the mainland and indefinitely into the interior, but leases and arrangements with Germany and Great Britain have resulted in the transfer of sovereignty of all the mainland to those powers, and they are now included in German East Africa and British East Africa.

The religion of the country is Mohammedan, the natives being mostly Sunnis of the Shafi school, the many are still pagans. The town of Zanzibar is a station of the Universities Mission, which also has some work on Pemba I. The BFBS and the Anti-Slavery committee of the Friends also have missionary enterprises on the islands.
ZAZEGA: A town in Eritrea, N. E. Africa, situated about 95 miles W. of Massawa. The people are Tigre-speaking Abyssinians. Station of the Swedish Evangelical National Society (1891), with (1900) 1 missionary, 2 native workers, 1 outstation, 1 place of worship, 2 day schools and 58 professed Christians.

ZEHNDER, J. L.: Died at Lundu, Borneo, February 10, 1808. Missionary of the SPG for nearly thirty-three years. In the report of the SPG he is spoken of as an accomplished linguist, writing and conversing in many European and Oriental languages. In translation work his services were specially valuable. At Lundu, where several races meet after the service of the people who had come from a distance would congregate in the veranda of the mission-house for refreshment and conversation; and an eye-witness declares it was a sight to be remembered to see the old missionary going from group to group—Sebuaus, Selaknus, Lao, Chinese and Malay—with words of cheer and inspiration for each in his own tongue. Thus “speaking to every man in his own language,” his influence was wide-spread, and the impressions left by the spoken and written Word were deep and lasting.

ZEISBERGER, David: Born at Zauchenthal, Moravia, April 31, 1721; died November 17, 1808. His progenitors belonged to the ancient Church of the Bohemian Brethren, founded sixty years before the Reformation by the followers of John Huss. When David was five years old, his parents fled to Herrnhut, in Saxony, a colony of Moravian emigrants. In 1736 his parents joined the colony in Georgia, which James Ogletorpe had established three years before, leaving their son at Herrnhut to be educated by the Moravians. From thence he went to Holland and lived in a Moravian settlement called Herrendyk, joining his parents in America in 1738. In 1740 he went North, and with others founded Bethlehem and Nazareth in Pennsylvania. In 1745 he began his work among the Indians, and was soon arrested as a spy of the French by the colonial government of New York, and was imprisoned for seven weeks. Released by Governor Clinton he labored till 1750 among the Delawares at Shamokin (Sunbury, Pa.) and the Iroquois at Onondaga, where the Six Nations made him a sachem, and “keeper of their archives.” In 1750 he visited Europe in behalf of the mission. In 1752 he returned to Onondaga, but was compelled to retire to Bethlehem at the opening of the French and Indian war. Between 1755 and 1762 he visited North Carolina and the New England Provinces, labored among the Indians of Canada, and acted as interpreter for Pennsylvania in the treaty with Teedyseung and his allies. In the time of the Pontiac conspiracy he ministered to the Christian Indians who had found refuge in Philadelphia, and at the close of the war he led the survivors of the converts to Wyalusing, Bradford County, Pa., on the Susquehanna. In 1767 he established a mission among the Monsey Delawares on the Allegheny River, Venango County, and three years later began the station which he called Friedenstein, on Beaver Creek, in what is now Lawrence County. In 1772 he went to central Ohio, and commenced a town called Schoenbrunn, on the Tuscarawas, ten miles from the site of Canal Dover, where he was soon joined by all the Moravian converts from Pennsylvania. He built two more towns, other missionaries came, and many converts were added. Early in the Revolution the Delawares were accused of favoring the American side, and the converts were forced to leave their towns and come within the British lines. In 1781 the settlements were destroyed by a band of Wyandot tote warriors at the instigation of the commandant of the British post at Detroit; the missionaries were tried as spies, and the Christian Indians removed to Sandusky. The next year ninety-six of them returned, some 50 to the Tuscarawas to gather their corn, and were massacred at Gnadenhutten by a party of colonial militia. Disheartened by this catastrophe, Zeisberger in 1782 led a small remnant to what is now Michigan, and built an Indian town on the Clinton River. In 1786 he went back to Ohio, and founded New Salem, one mile from Lake Erie. Thence the hostility of other Indians, after four years’ rest, compelled them to emigrate to Canada, where they founded Fairfield. In 1798 he returned to the Tuscarawas valley, where Congress had restored to his Indians their former lands, and built a town, calling it Goshen. There he labored for ten years, to the close of his life. He was a missionary among the American Indians for sixty years. He established thirteen Christian towns, and the courage of the natives remains, yet he had many converts, and his character, motives, and efforts are “an honor to the Moravian Church, and to our common humanity.” Zeisberger was a thorough scholar. He mastered several native tongues, namely, Delaware and Onondaga. He left in manuscript a German and Onondaga lexicon in seven volumes quarto, a grammar of the Onondaga language in German and English, a Delaware grammar and dictionary, and several vocabularies. All of these are deposited in the Library of Harvard College, and in the Library of the American Philosophical Society in Philadelphia. His Diary, translated by Eugene H. Bliss, was published in two octavo volumes in 1885.

ZENANA BIBLE AND MEDICAL MISSION, or Indian Female Normal School and Instruction Society: Headquarters: 2 Adelphi Terrace, London, W. C., England. This society was first organized under the second name in 1852, as a general missionary society, with the special purpose of cooperating with other societies, particularly the CMS, BFBS, and others. Later there was a distinction made between Zenana and educational work, and the scope of the society was enlarged and its present organization was effected. Its special object is to help the women of India by sending trained missionaries to relieve sickness, promote education, establish hospitals, schools and such other institutions as may be needed. The Executive Committee, of not more than 24 nor less than 18 members, is self-perpetuating. While more closely connected with the Church of England, it cooperates with any orthodox Protestant Missionary Societies; holding that the work which it does need not be denominational. Its work is in India, at 32 stations in the Bombay and Madras Presidencies, the United Provinces, and the Punjab. According to the report (1903) there were 104 European and 53 assistant missionaries, 275 native workers, 94
schools with 3,208 pupils and 226 under training in Normal Schools. The hospital shows 1,902 inpatients and 21,083 out-patients in 5 hospitals and dispensaries, with a total of 72,921 attendances at dispensaries. In the Zenaana work 4,375 houses were visited and 2,728 pupils instructed.

ZENANA MISSIONARY SOCIETY (Church of England). See CHURCH OF ENGLAND.

ZIEGENBALG, Bartholomew: Born June 24, 1638, in Pultsinit, Saxony. Died at Tranquebar, India, in 1719. King Frederick IV. of Denmark, aroused to his duty to give the Gospel to those under his sway in India by his chaplain, Dr. Plutschau, then students at Halle, young men of talent, learning, and Christian zeal, were appointed, and embarked at Copenhagen in 1705. After a long and dangerous voyage they arrived, July, 1706, at Tranquebar, a Danish possession on the Coromandel coast of Hindustan. After several day's delay the governor received them with great harshness. Ziegenbalg obtained a room near the heathen and Portuguese quarters, and began his work of converting Hindus and Mohammedans; a government openly opposed, and a European population absorbed in business, addicted to vice, and determined at all hazards to be rid of these earnest men. Ziegenbalg, having no grammar or dictionary to help him in learning the language, persuaded a native schoolmaster to bring his school to the mission room, and, sitting down with the children, he imitated them in making the letters in the sand till he had become familiar with their form. He then found a Brahman who knew a little English, and with his help he was able in eight months to speak Tamil intelligibly. The teacher, however, was loaded with iron by the rajah and thrown into prison. Some of the Europeans owning slaves, Ziegenbalg obtained their consent that "these poor outcasts might meet for two hours daily for instruction." In less than a year five slaves were baptised. A native built a church at his own expense, and at the dedication Ziegenbalg preached in Tamil and Portuguese to a large congregation of Hindus and Mohammedans. In the second year he made extensive preaching tours. In 1708 he visited Negapatam, and the Dutch magistrate invited the most learned Brahmins to a friendly conference with the missionary on religious subjects. The discussion lasted five days, and much information concerning the origin, history, and doctrines of Christianity was diffused among the native population.

Ziegenbalg had so far mastered the language that in two years after his arrival he began Scripture translation, and in a short time later could speak Tamil with as much facility as his native German. He soon began the preparation of a grammar and two lexicons—one of prose, the other of poetical words. In 1711 he finished the work, and published it in Tamil—the first into any language of India—and a large part of the Old Testament. Not only to Hindus, but to the half-breed Portuguese and to the slaves of Tranquebar he preached the Gospel. He also had a German service weekly, which was largely attended.

In 1714 his translation of the New Testament, the Danish Liturgy, and German hymns, with thirty-three Tamil works, including a dictionary he had prepared, were printed. His health failing, he returned to his native land in 1715. His account of the Hindus and his missionary work created great interest in Germany and England, vast crowds being moved by his glowing appeals, and kings, princes, and prelates giving liberally to the cause. He returned to India in 1719, but died soon after, at the early age of thirty-six, having in the brief period of thirteen years as the pioneer of modern missions in India accomplished a remarkable work. Three hundred and fifty converts and a large body of catechumens mourned his death.

ZINZENDORF, Count Nicolaus Ludwig: Born in Dresden, May 26, 1700. Died May 9, 1760. While a school boy at Halle he heard of the mission established in the East Indies by the King of Denmark, and occasionally he met missionaries returning from the field. His young heart was fired by the missionary spirit, and, moved by the desire of aiding the work of the world's evangelization, he founded the famous "Order of the Grain of Mustard Seed," composed originally of five lads, who pledged themselves to "win all races for Christ. Give the Gospel among heathen alike." In 1715 he joined with his friend, the Baron Frederick von Wattenwille, in a covenant to introduce the Gospel of salvation especially among those heathen to whom no one else would go. Hoping that he would fit himself for a diplomatic career, his relatives matriculated him as a student of law at the University of Wittenberg; and there, amid worldly-minded associates, he made a deep religious impression. His passion for souls became more intense as he grew toward manhood; and despite the efforts made by his family to "take the nonsense out of him," he never swerved from his noble purpose. While on his travels he visited the gallery at Dusseldorf, and as he looked upon the Eoc Homo of Sternberg, under which was the inscription:

"Hoc feci pro te; Quid facis pro me?"

he renewed his consecration vows and determined, without Christians to dedicate himself to the service of his Lord. On September 7, 1722, he was married to the Countess Erdmuthe Dorothea, and on their wedding day they covenanted to put aside all favors of rank, to win souls, and to hold themselves in readiness to go, without delay, wherever the Lord might call them. Soon after he attained his majority, he waived his rights to large estates rather than go to law, and modestly settled at Berthelsdorf, near Gross-Hennersdorf, hoping to make it a model Christian village. In 1723, with Rothe, Schaefer and Peter Nicolaus von Wattenwille, he formed the "League of the Four Brethren," which had as its object the promulgation of the Gospel among all peoples, and soon new channels of service were opened before him. The Moravian Church, founded in 1457 by the proscribed followers of John Huss, seemed nearly extinct at the close of the 17th century, but there remained, scattered through Bohemia and Moravia, little communities of secret disciples known as the "hidden seed." When Zinzendorf and Wattenwille made their memorable covenant (1715), these heroic Christians were entering new life, under the quickening
influence of the Holy Spirit; and soon afterward the great Protestant awakening occurred, followed by bitter persecution. Driven from Moravia and led by Christian David, these refugees found an asylum in Berthelsdorf. Soon after Zinzendorf settled in his estate, he came in sympathetic touch with these heroes of the faith; and under his guidance they adopted certain rules and regulations for their government. Zinzendorf was now impressed that he was called of God to become the leader of this people; and he formed bands and societies, from among them, for effective and systematic Christian work. As the communion grew in spiritual power, unmistakable signs of divine approval were placed upon it; and on August 13, 1727 (regarded as the spiritual birthday of the renewed Moravian Church), while the people were assembled to partake of the communion, the Holy Spirit manifested Himself in a wonderful way, and the power of the revival that followed this awakening is felt until now. Zinzendorf now gave his life entirely to the one work of the development and organization of this Church, fitting it, under God, for its world-wide mission. To quote another: "Under his guidance a firm and stable form of government was established in Herrnhut. Men of loose views and worldly tastes were weeded out, and none but true-hearted Christians allowed to remain with the community. The women gave up the brilliant Bohemian dress and adopted a simple costume, consisting of a plain dress and cap tied with ribbons, the color of which indicated their position in life—widows wearing white, wive's blue and maidens red. And order of worship, with many beautiful customs, including the observance of the Lord's Supper, was introduced, and the constant use of sacred song became one of their marked characteristics. Under the new regime, life at Herrnhut became grave and serious, but happy and prosperous, combining joyous religious experience with the faithful performance of daily tasks." Before Zinzendorf and the brethren God was unfolding plans for the evangelization of peoples in distant lands. In 1731, while Zinzendorf was attending the coronation of Christian VI. at Copenhagen, he met two Eskimos who had been brought to Berlin through the influence of Hans Egede, and he learned that Egede was about to abandon his mission. During the same visit, the attendant of Zinzendorf became acquainted with Anthony, a negro servant of Count de Laurwig, who told them of the slaves in the West Indies, who had no one to tell them of the true God. Count Zinzendorf's appeal to his people at Herrnhut and the visit of the negro Anthony stirred mightily the congregation, and two young men offered themselves as missionaries to the West Indies, and two others decided to carry the Gospel to Greenland. Thus was begun Moravian Missions; and at the time of their first jubilee in 1752, ten years before Carey preached his epoch-making sermon, they occupied 27 stations and had more than 165 missionaries. In the meantime, under the direction of Zinzendorf, the Brethren at home were indefatigable in their work. They visited the countries of Europe, founded new settlements, and began the work of persecution, the object of which was to awaken and foster spiritual life by the formation of societies of prayer. Relentless opposition and persecution followed Zinzendorf as his influence arose and his work increased in power, and in 1756, owing to the misrepresentations of his enemies, he was banished from Saxony. In 1739 he visited the mission at St. Thomas, and in 1741, accompanied by his daughter, the Countess Benigna, he visited the English colonies in North America. For more than a year he labored among the North American Indians and other missions, and established the church at Bethlehem, Pa. Before returning home, he did missionary work in England and Holland; and in all of his travels he sought to quicken the zeal of Christians in the cause of missions. In 1749 Zinzendorf was entirely vindicated of all charges preferred against him, and the Saxon Government repealed the edict of banishment and requested him to form other communities like Herrnhut in Saxony. The last years of his life were spent peacefully as a hermit, but in 1782, ten years before Carey preached his epoch-making sermon, he was buried in the church at Bethlehem, Pa. Before return­ing home, he did missionary work in England and Holland; and in all of his travels he sought to quicken the zeal of Christians in the cause of missions. In 1749 Zinzendorf was entirely vindicated of all charges preferred against him, and the Saxon Government repealed the edict of banishment and requested him to form other communities like Herrnhut in Saxony. The last years of his life were spent peacefully as a hermit, but in 1782, ten years before Carey preached his epoch-making sermon, he was buried in the church at Bethlehem, Pa.
broken forever, and the supremacy of the good established; Ahriman with his defeated followers is to be cast into hell, and to remain there, destitute of enjoyment of the good, who are to be rewarded and to prosper, unvexed by evil, as citizens of the good kingdom.

Modern Zoroastrianism recognizes the existence of vast hierarchies of good and evil spirits, devoting itself to propound fulfillment of Ormuzd and of Ahriman. To what extent these elaborate systems of angelology and demonology influenced Jewish thought, and through them Christian thought, is a question still undetermined. The sacred books of Zoroastrianism are spoken of collectively as the Zend-Avesta. The term is not wholly accurate; the proper designation is Avesta, the word Zend signifying "interpretation," with reference to the commentaries on the original books. The Avesta itself is written in an ancient form of Aryan speech, called Zend, named popularly as the Zend, and possessing no other extant literature. The "interpretation" is in Pahlavi, a more modern (the ancient and now dead) language, which prevailed formerly in Persia. Avesta, at present known, but a fragment, and not a large fragment, of the original sacred literature of Zoroastrianism. Like the Old Testament, it is not a book, but a collection of books—a literature developing in and with the life of the people. Parts of it may date back to Zoroaster, but much of it consists of the accretions of later years. A collection of hymns or "Gathas" is the oldest part of it, and may be said to form the kernel of the whole; these alone claim to be the ipseisima verba of Zoroaster. The remainder consists of liturgical matter, and what is called the "priestly code" (borrowing a phrase from Old Testament scholarship), the "priestly code" of Zoroastrianism.

The light, the sun, the fire, are considered by the Zoroastrians the symbols of Ormuzd. Therefore in their temples the sacred fire is continually burning, night and day, year after year. For this reason at evening, when they recite the prayers of the Avesta, the faces of Zoroastrian worshipers are turned westward, toward the setting sun. Hence they are often spoken of as "sun-worshipers" and "fire-worshipers," the two themselves reject the imputation which is thus involved; they do not pray to the sun or to the fire, they say, but to that good and shining one whose presence and character are symbolized by the light, and the sources of it. The Zoroastrian religion developed and flourished in Persia, through the vicissitudes of declension and revival incident to all religious history, from the time of its origin to the Mohammedan invasion. During that time it saw and survived the political changes and dynastic revolutions to which Persia was subject, but which need not be recounted here. Mohammed died in 632. It was but a few years after his death that Persia was invaded by armies of his followers, who, under the fierce lead of the early caliphs, were just beginning that astonishing career of conquest which within a century carried the crescent over Western Asia, Northern Africa into Spain, across the Pyrenees, and almost to the shores of the British Channel. The Persian army was ignominiously defeated, the king dethroned, and his realms taken possession of in the name of the Prophet. The people embraced the new religion. The fire went out on the Zoroastrian altars, and the Avesta was dropped for the Koran. A handful merely of the Persians converted and sought refuge among the mountains. There for a time they were suffered to remain, but soon after the year 700 they were subjected to such a violence of Muslim persecution that many of them were constrained to abandon Persia and look for a refuge beyond the sea. The story of the wanderings and sufferings of this company of Zoroastrians forms a pathetic episode in the religious history of the race. Through all their wanderings and shipwrecks the sacred fire was studiously kept alive. About the year 720 of the Christian era they landed on the western coast of India near the city of Surat, some 150 miles north of where Bombay now stands, and craved permission from the Hindu prince then ruling in that region to settle among his people, and to practise the religion of their fathers. The permission was granted,—so tradition says,—with a few easily observed conditions, among which was this, that they should adopt the dress and language of the country where they were to make their homes. These conditions were accepted, and ever since the language of this Indian branch of the race has been the Gujarati, the vernacular of the district where they landed, with such dialectical variations as would naturally arise in the use of a new tongue by foreigners whose customs and religion differed so greatly from those of the land where the language had developed. The Parsees— as these Persian dwellers in India came in course of time to be called—do not appear prominently in Indian history until the English era. They faithfully maintained the practice of their religion, jealously guarded the sacred fire, and preserved inviolate the purity of their race. When, under English rule, the city of Bombay grew from a cluster of fishermen's huts into a great commercial mart, the Parsees appear as keen-eyed men of business, and founded great commercial houses. There are said to be about 8,500 Zoroastrians still remaining in Persia.

ZULUS: The Zulus, according to tradition and the testimony of generations that have but lately passed away, came, something more than a century since, from the north and took up their abode, first on the Imfolosi and Umbland rivers, and then farther south as far as the Um­ zimkulu, and farther east in the vicinity of Delagoa Bay. Not to go back beyond a somewhat definite knowledge of them, we find them a small tribe under their chief, Senzangakakana, son of Jama, and father of Chaka. Chaka, born in 1787, was a chief of great enterprise in his way, of great ambition, military prowess, and success. Starting out at the head of a small army, he assailed and subdued tribe after tribe, and incorporated all into his empire, till he had mastered a considerable territory and made himself feared by the Dutch and English at the Cape, the tribes on the west, and other far-distant tribes on the north and east. Finally, in 1828, he was assassinated through the jealousy of two brothers, one of whom,
Dingan, took his place in power. During Dingan's reign, or rather at the close of it, which came through a war with the Boers, as a result of which he was chased out of the country and died of starvations, his kingdom was divided, in 1840, and the southern half of it, called the Natal District, came into the hands of the Dutch, and then, in 1842, into the hands of the English, and so became a British colony; while the northern half, since gone by the Governor of Zululand, came under the rule of Umpande, brother of the two previous kings. Umpande continued nominally at the head of affairs till the day of his death, in October, 1872, when his son Ketchwayo was installed king. He held office till the English-Zulu war in 1879, when he was taken captive and carried to Cape Town and thence to England. The British Government, now professing to have a kind of moral protection and authority over the Zulu realm, divided it into thirteen sections, and over each appointed a kind of petty chief or king, the result of which was confusion, strife, and anarchy. Then Ketchwayo was carried back to Zululand and reinstated king, January 31, 1883, over at least a part of his former realm, but soon died, some say of heart disease, some of grief and disappointment, while others think he was poisoned by his late antagonist.

The division of the country into sections under native chiefs continued for some years in Zululand proper. But in 1897 Zululand was made a part of Natal, with the Governor of Natal in control, and with Zululand represented in the legislative body of the Province. The negro population of Natal, including Zululand and the recently annexed districts of Vryheid and Utrecht, in 1901 amounted to 336,912.

The Zulu is a man of many marked and ready parts, self-respecting, sometimes haughty, of a martial spirit, quick-witted, a studious and keen observer of men and things, and, within all lines of his own observation and experience, a good judge, a good logician, a good reader of character, and a good narrator of facts and events. One of them, having heard his missionary tell of the great power and goodness of God, how He hates sin, and how the race was beguiled by the devil at once and stop all that mischief in the world, came into sharp collision with the English, was taken captive and carried to Cape Town and thence to England. In their untutored condition the woman's dress is a half cow-hide, tanned soft, dyed black, bound about the loins, and coming down about to the knees. And when it is old, and worn, torn and torn, as it will be in time, she goes to the bush and tears off the bark, and to another for a thorn, punches a hole here, another there, puts in the string and sews up the rent. The man's wardrobe is only about a fourth part as much as that of the woman, and the little he has is generally from the fur of wild beasts; while the children are left to go for some years as on the day they were born. But all—men, women, and children, young men and maidens—are fond of ornaments, such as beads and brass bangles or charms, of wood or bark, bones, horns, hoofs, teeth, and claws of birds and beasts. The distinguishing mark of the married man is a head smooth shaved, all but a ring of blackened hair around the crown; while the married woman's head is also smooth shaved, all but a tuft of hair on the crown colored with red ochre. Under native rule the result of which could never marry or build himself a house or kraal till he had served his king as a soldier for a term of years, got his discharge, and with his discharge a piece of ground on which to build. Having a right to build, he selects a dry, oval spot for his kraal, which consists of a circular enclosure for his cattle; and around this a circular row of houses, one for himself and one for each of his wives and her children. The house is hemispherical in shape, seven or eight feet high, with a diameter of fifteen or twenty feet. The frame consists of wattles about the size and length of fishing-rods, over which is laid a thick coating of long thatch grass for covering. On one side is a door two feet high and eighteen inches wide. The floor is made of hardened clay or earth from the ant-leas; near the center is a shallow basin, saucer-like in shape, for the fire. There is no chimney, nor is there any opening for light and air, save the door. A portion of the border of this one room is set apart for a calf or goat for the night, and the rest is used as a place for storing wood, bedding, mill-stone, calabashes, earthen pots, and spears and shields for hunting and fighting. The rest of the hut, or central portion, serves as a place for cooking, eating, sitting, and sleeping.

The house is built chiefly by the women, the enclosures by the man. In times of war the men are engaged in war. In times of peace they are expected to prepare the fields, if need be, for the pick, and either fence them or watch them against cattle and wild beasts. The men till the hides for their wives' dresses; they and the boys herd the cattle and milk the cows; they hunt, smoke, bask in the sun, drink beer, make offerings to their divinities, the shades of the dead, and institute interminable suits at law. In their heathen state the women keep the house, and do all the drudgery, and ten or twenty miles away, they must carry it to England. The British Government, now professing to have a kind of moral protection and authority over the Zulu realm, divided it into thirteen sections, and over each appointed a kind of petty chief or king, the result of which was confusion, strife, and anarchy. Then Ketchwayo was carried back to Zululand and reinstated king, January 31, 1883, over at least a part of his former realm, but soon died, some say of heart disease, some of grief and disappointment, while others think he was poisoned by his late antagonist.

The division of the country into sections under native chiefs continued for some years in Zululand proper. The negro population of Natal, including Zululand and the recently annexed districts of Vryheid and Utrecht, in 1901 amounted to 336,912.

The Zulu is a man of many marked and ready parts, self-respecting, sometimes haughty, of a martial spirit, quick-witted, a studious and keen observer of men and things, and, within all lines of his own observation and experience, a good judge, a good logician, a good reader of character, and a good narrator of facts and events. One of them, having heard his missionary tell of the great power and goodness of God, how He hates sin, and how the race was beguiled by the devil at once and stop all that mischief in the beginning?" Another Zulu, being once asked by his missionary, "What is the best color for man?" replied, "For you Americans no doubt white is the best, but for us Africans there is nothing better than a good, clear, shiny black, with just a little of the red in it." The famous Zulu chief Pakade, who used to come now and then into sharp collision with the English, was once visited by Bishop Colenso, who tried to interest him in his translation of the Lord's Prayer into Zulu; but right in the midst of the Bishop's laborious effort, he was suddenly pulled up by his pupil's breaking in upon him with the remark, "Yes, yes, that is all very good, but how do you make gunpowder?"
Cape Town, that this would be a mistake. In 1847 the mission ground, led by Dr. Adams and supported by official and clerical opinion at Cape Town, that

by the conviction of its missionaries on this point are not at hand.

missionary society in Natal in 1847. The mission afterward opened stations in the northern part of Zululand, but were driven out and changed the line of their expansion to the Orange Free State and the Transvaal. The society now has four stations in Natal, with 2,752 professed Christians and 1,457 communicants. It has in the Transvaal and the Orange River Colony 38 stations, with 28,701 professed Christians, of whom 2,092 are communicants.

The Hermannsburg Missionary Society opened a station at Hermannsburg in Natal in 1854 and afterward extended its work into Zululand and westward to the Transvaal Muzo region, among the Bechuanas. This society now has in Natal and Zululand 15 stations, with 3,709 professed Christians, of whom 2,092 are communicants.

The Free Church of Scotland began its permanent establishment in Natal in 1837, taking up the work at Pietersonsburg and Empolweni commenced by the Rev. Mr. Allison, who had been laboring under the WMS. The UFS has now in Natal 4 stations, with a full complement of workers, both native and foreign, and 2,241 communicant church members.

The Swedish Church Missionary Society has two stations in Natal and Zululand, where it has gathered about 350 communicants.

The Boers have often been charged in mass with hostility to mission work among the negroes. It is a case of judging the mass by the conduct of some. As a body they are working earnestly for the evangelization of the Zulus who live with and around them. They do this not by organized missionary societies, but as individuals, families, committing their missionaries to the task. Quite a number of Zulus have been formed into churches in connection with the Dutch Church, but statistics on this point are not at hand.

Zambesi Industrial Mission (1892); Headquarters: 6 Colonial Avenue, Minories, London, England; Secretary: Mr. Robert Caldwell.

## APPENDIX II

### CHRONOLOGICAL TABLE OF THE EXTENSION OF PROTESTANT MISSIONS FROM THE TIME OF CAREY

**Note.—There is not a little confusion of dates in the records. It is not always practicable to distinguish between the date when a mission was decided upon, and that when the missionaries started, or actually commenced the work. The object of this table is not so much scientific accuracy as the attainment of a bird's-eye perspective of the stages by which the missionary enterprise of the Church has reached out to cover the earth. Extension from one district to another in the same country is not noted unless some special feature seems to call for mention.**

### APPENDIX IV

### MISSIONARIES WHO HAVE MADE TRANSLATIONS OR REVISIONS OF HOLY SCRIPTURE

Non-Christian nations will one day know their peculiar indebtedness to missionaries whose laborious scholarship brought the Holy Scriptures within their reach. It has seemed worth while to gather from the records of the 19th century and to preserve from oblivion the names of such missionaries of all nations. We have now to admit, however, that difficulties of compilation mark the following list as merely tentative. We give it in hope that it may serve as a foundation on which a permanent and accurate record will be built up.

APPENDIX V

STATISTICAL TABLES

INTRODUCTORY NOTE

All Christendom is home to the Christian. To him the non-Christian lands, alone, are foreign lands. The statistics of "foreign missions" given in the following tables, therefore, relate to Missionary work in non-Christian lands. Exceptions to this rule are made, however, in the case of, (1) Protestant Missions in Roman Catholic countries whose statistics are reported by some Societies in the tables of their foreign Mission work; and (2) of Missions in those parts of North America and in South America where pagans still form an important element in the population. Consistency would require the exclusion from these tables of statistics of Christian work in lands that have become Christianized by colonization or otherwise, and maintain their own Missionary Societies. Such are the Protestant missions of the West Indies and parts of South Africa, Australasia, etc., where local Christianity is thoroughly organized and established. But this consistency has not been possible, because some Societies do not separate statistics of Missionary work among East Indian coolies or other pagans from those of the regular ministrations to the local Churches under settled pastors.

The plan of this work has required us to exclude from the tables of statistics work for European soldiers, colonists or seamen. It has also seemed necessary in order to avoid reduplication of statistics to omit mention of purely auxiliary Societies.

The column "Professed Christians" is intended to show the whole number publicly known as Christians, whether communicants, probationers, or children of Christian parents. This intention has been very imperfectly executed because many societies continue to give in reports the number of communicants only, just as was the usage before the rise on the Mission field of families and even communities which have never been pagans.

The statistics given are intended to represent the condition of the Foreign Missions on January 1, 1903, except in the case of Societies whose names are followed by an asterisk (*). The figures in such cases show the status of 1900, and for them we are under obligation to Beach's Atlas of Protestant Missions.

Notwithstanding close application and exhausting labor, we find ourselves forced to crave indulgence for the faults of the tables. Such tables can be no more than relatively exact, and they require so much time in compilation that they are already out of date before publication.

A. THE OPERATIONS OF PROTESTANT MISSIONARY SOCIETIES IN NON-CHRISTIAN LANDS.

# Appendix V

## THE ENCYCLOPEDIA OF MISSIONS

### C. Protestant Missions to the Jews (by Rev. Louis Meyer, Hopkinton, Ia.)

Statistics brought down to March, 1904.

Note.—The CMS, the CA, the FN, the 2BM, the British Syrian Schools, the Swedish Missionary Union, the Swedish Evangelical Rational Society, and some others of the Foreign Missionary Societies come in contact with Jews and labor for them in the course of their general work, of which the statistics are reported in Tables A and B. Table "0" contains work that is not reported in the other tables. The heading "schools" includes Sabbath Schools and all of distinctly Christian influence.

## APPENDIX VI

### ROMAN CATHOLIC FOREIGN MISSIONS

#### A.—THE MISSIONS

The following statistics, borrowed from the “Annals of the Propagation of the Faith,” were compiled from the Directory of Missions issued by the Congregation of the Propagation (Missiones Catholicae: Romae, 1901), supplemented by the publications of the Society for the Propagation of the Faith.

This list includes the greater part of the mission field of the Roman Catholic Church; but it is not claimed that the figures are exact. In some cases they are only approximative.

### APPENDIX VI

The following dioceses, tho not under the jurisdiction of the Propaganda, and therefore not strictly speaking missionary dioceses, have for special reasons been aided by the "Propagation of the Faith" since the year 1905.

- Prophecy
- Brekka, Colegio, Fuji, Hildesheim, Limburg, Mainz, Munster, Paderborn, Feniamendi and Brandenburg.
- Posen and Gnesen, Treves, Warmia (Ermeland).
- Switzerland—Geneva, Zürich, Basle, Konstanz, Canton, Geneva, Sion.

**Africa—Algeria, Carthage, Constantine, Oran, Bourbon Island.**

**Appendix VI Source:**

- Title: THE ENCYCLOPEDIA OF MISSIONS
- Page: 850
- Description: This section lists various Roman Catholic religious orders and societies engaged in mission work with their founding years and mission fields.
Auxiliaries to the Missionary Priests: The chief auxiliaries in mission works are communities of Brothers and Sisters. Not to mention the lay-brothers accompanying Religious Orders of Priests nor the catechists and other missionary helpers, in almost every quarter of the globe where the priest has planted the faith, Brothers and Sisters have followed to help sustain it. These are represented in various countries approximately as follows:

<table>
<thead>
<tr>
<th>Number of Orders,</th>
<th>Number of Orders,</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Brothers.</strong></td>
<td><strong>Sisters.</strong></td>
</tr>
<tr>
<td><strong>AMERICA.</strong></td>

</tr>
</tbody>
</table>

It is impossible to furnish satisfactory figures as to the whole number of missionaries, because of the different views people may take as to what is understood by missionary countries and by missionaries. In the popular sense, those are missionaries who have gone to distant regions, and especially to heathen countries for the purpose of spreading the faith among unbelievers.

Taking these distinctions into consideration we may safely assert that there are at least 15,000 priests and others dedicated to the religious life, 5,000 teaching brothers, and 45,000 sisters laboring as missionaries, not to speak of the priests, brothers and sisters native to the regions where they work, catechists and others who make up the personnel of a mission, and the laborers among the Oriental Rites. Probably the estimate is much too small, but we may conclude that there are in the field about 65,000 missionaries of the Roman Catholic Church.
