    Scripture .................................................... 830
V. Statistical Tables .............................................. 835
VI. Roman Catholic Foreign Missions ........................... 848
THE standpoint of this Encyclopedia is, primarily, that of one who, interested in foreign mission work, seeks to enlarge his vision and increase his knowledge; secondarily, that of one who, looking forward to a personal share in it, seeks to inform himself as to its various phases, that he may the more readily decide where he can probably labor to the best advantage. The basis is the Society in which each individual is more especially interested; its history, organization, development; its missions and stations. Then the view broadens to take in the countries, races, and religions in their relations to the work, not only of his own, but of other denominations. Special topics open up, individual workers stand out in prominence, and as one step after another is taken, it becomes apparent that the work is not divided, but is one; and all these with varied names are but portions of the one great army of the Church.

The plan thus includes two general departments: 1. The organized work—the societies, their origin and growth at home, and their work abroad; 2. The countries in which, the races for which, that work is carried on, and the religious beliefs that are encountered.

Accessory to these are: 1. A gazetteer of Mission Stations; 2. Biographical sketches of Missionaries; 3. Description and enumeration of Bible versions; 4. Articles on special topics closely related to the work of Foreign Missions; 5. Maps, appendices of bibliography and statistics, and indices.

It became early evident that to accomplish so much, minutiae must give place to perspective. However fascinating the details might be, they must be constantly used merely as illustrations. To do more, would not only have so enlarged its extent as to make the book unwieldy, but have blurred the distinctness of the impression that it has been sought to give. Thus in the accounts of the societies and their work personal terms are few. The history of Missions, both at home and abroad, is largely the history of individual men and women. Those who have stood at the helm and guided these great organizations were and are no less missionaries than those who have gone to the foreign field, yet even to mention the names of all within the space allowed would have almost made the work a mere chronicle. So of the countries and stations, the races and religions. The effort has been to give so much geography, history, etc., as would serve as a framework for pictures of missionary work and spiritual need.

With regard to the biographical sketches, it became evident very early that it would be necessary to draw the line sharply to exclude the living, and that to mention all, even of the dead, would be impossible. The sketches, too, must be brief, indicating rather than describing the work each did. So of the Bible versions; brief paragraphs were all that could be attempted.

When the question of special topics came up, the scope seemed unlimited. There were city missions; home missions; missions in their relations to commerce, music, the liquor traffic, the slave-trade; early Christian and medieval missions; the various questions under discussion in regard to methods of missionary work,—the lay element, education, self-support of native churches, etc. To treat even a few of these thoroughly, tho eminently desirable, would be impracticable. As careful a selection as possible has been made, and as much space given as seemed proportionate to the general scope of the work.

The plan led also to the decision to embody statistics and general lists in the form of appendices, which could easily be changed in subsequent editions, as the work developed. These appendices include: (a) A bibliography; (b) Lists of Bible versions, arranged alphabetically and geographically, showing the languages and dialects, the number of people reached by them, the linguistic families to which they belong, the characters
in which they are written, the amount of translation work done, and the society under whose auspices they have been prepared, and in the Index the page of the Encyclopaedia where they are referred to; (c) A list of missionary societies with the addresses of their secretaries, the date of organization, and the page of the Encyclopaedia where they are spoken of; (d) A list of missionary stations, giving their geographical location, the societies carrying on work in them, the number and sections of the maps where they are found, and the page of the Encyclopaedia where they are described; (e) Tables of statistics: (1) By societies and missions; (2) By countries and societies; (3) A summary of the whole. The General Index includes names of persons mentioned, places referred to, and general subjects treated. The maps cover all important mission-fields with as much fulness as is practicable. The effort has been made to locate every mission station of importance, and in some cases the outstations. The importance of political influence in Africa and of the languages of India has led to the furnishing of a map of each country specially designed to bring out those characteristics.

Specific statements as to the appendices will be found in prefatory notes to them.

Many questions came up for consideration. In the alphabetical arrangement of articles a difficulty arose in regard to the location of the societies. To place them under their corporate names would be confusing, and the effort has been made to designate each by the term by which it is most widely known, with cross-references wherever it seems necessary. If there is difficulty in finding any one, a reference to Appendix C will easily give the solution.

Then came the question of spelling. The spelling of foreign names is in hopeless confusion. No two societies agree. Often the same society is not consistent with itself. Governments have laid down rules, which few follow; and no two Governments make the same rules. Should we spell Beirut, Beyrout, or Beyroot; Maulmain or Moulmein; Harpoot, Harput, or Charput; Foochow or Fuhchau; Gurhwal or Garhwal; Punjab or Panjab; Hyderabad or Haidarabad; Assiout, Assyoot, or Siout; San Paulo or Sao Paulo; Otjimbenque or Otjimbingue?

But instances almost innumerable could be added. The reader will find a few of the perplexities noted in Appendix D. To be absolutely logical or consistent was impossible. In India names the spelling of Hunter's Encyclopedia has been adopted. In Africa, the Church Missionary Society and the ABCFM reports have been followed in the main; elsewhere the editor has done the best he could, and if in any instance some mission station eludes the patient search of the reader, let him make a note of his failure for the benefit of future workers in this line.

Numerous requests have come in for an indication of the pronunciation of the names of places. To do this, however, was so manifestly impossible that no effort has been made. Each reader is at perfect liberty to pronounce Kachchh or Njenhangli as he chooses.

Another difficulty arose from the recurrence of the same name. If one is perplexed to distinguish the Washingtoms that occur in every State of the Union he will understand the danger of confusing the various Saloms of Africa, the Bethels of the West Indies and India, or the Bijnours (Bijnours?) of the Northwest Provinces and Oudh.

The question of statistics was also a perplexing one. After much consideration it was decided to give the general statistics in the form of tables in an appendix, introducing into the body of the Encyclopaedia only such as were necessary in order to indicate the general nature and scope of the work in the different stations. So far as practicable, these have been brought up to date of publication.

At the commencement of the work blanks were sent to every mission society and mission station that could be learned of. The societies in almost every case responded, and many of the stations. With these as a basis and the careful study of the reports of the societies, the various Encyclopedias, etc., the great majority of the statements were prepared. In a few instances the society statements came from outside parties. Thus the article on the American Baptist Missionary Union was furnished by Dr. L. P. Brockett; that on the Moravian Missions, by Rev. B. Romig of Herrnhut; and so of a few others. Whenever it was practicable these statements were referred to persons connected with or specially informed regarding the societies, with a view to their being free from inaccuracy. Some countries, etc., were described by writers specially acquainted with them. Thus the India articles were prepared by Rev. C. W. Park, of
PREFACE TO THE FIRST EDITION

Birmingham, Coan., formerly of Bombay; Japan, by Rev. W. E. Griffis, D.D.; Brasil, by Rev. J. Beatty Howells, long a missionary in that country. The subjoined list will indicate most of the writers. The biographical sketches are chiefly the work of Rev. Samuel Hutchings, D.D., whose eighty-three years of age have not dimmed his interest or dulled the keenness of his pen. For the lists of Bible versions we are indebted to the kind courtesy of R. N. Cust, LL.D., of London. The sketches of the versions have mostly been prepared by Dr. Bernhard Pick, of Allegheny, who has made the subject a special study. The Arabic version, however, has been described by its translator, Rev. Dr. C. V. A. Van Dyck, of Beirut; the Turkish version by Rev. H. O. Dwight, of Constantinople.

In seeking for any title look first in the Encyclopedia; also in the Index of Appendix B for Bible versions; in Appendix C for societies or faith missions; in Appendix D for Mission Stations; and in the general Index for all. The page references in the appendices refer only to articles, not to places where mention of any topic is made in other articles; e.g., the station of Allahabad will be found, by Appendix D, on page 41 of Vol. I. It will also be found, by the general Index, on page 250, Vol. II., etc. So of the versions. Any person desiring to look up the whole work of a Society will turn from the account of the Society itself to that of the country where it works, the stations it occupies, and the biographical sketches of its missionaries, as he finds them mentioned in the different articles. In giving accounts of stations only those have been included in the body of the work with regard to which some definite information is given beyond the mere fact of their being occupied by a certain society. The complete list appears in Appendix D.

It is a pleasant duty to acknowledge the kind courtesy of the many who have assisted in the work: of the publishers, who have furnished the means and have left the editor so free to carry out the plan as fully as was practicable; those who have worked in the office with an interest that has shown their task to be no mere perfunctory duty; the contributors, whose patience, consideration, and ability have done so much to make the work not merely instructive, but entertaining; the officers of the Missionary Societies, whose unfailing willingness to answer innumerable questions has been so often put to the test. To name each one would be to give the list of all with whom the editor has come in contact in his work; yet he cannot but make special acknowledgments to Dr. Dalman, of Leipzig, for his article on the Jews; to the Rev. S. M. Jackson, for the Bibliography; to Dr. Cust, of London, for his table of Bible versions; to the officers of the Church Missionary Society, for the free use of their atlases of India and Africa.

That errors and omissions, some apparently inexplicable, will be noticed, must be expected. Any report of such to the publishers will be gladly received.

The work in truth has been a labor of love, and the highest return that can come from it will be the consciousness that it has furnished a link in the chain that is to bind together the great divisions of the one great army of the Church, as they come through its pages to know and understand each other better.

EDWIN MUNSELL BLISS.

NEW YORK CITY, March, 1891.
No long series of reasons need be given why The Encyclopedia of Missions demands revision after twelve years. Political changes have parcelled out among the nations the islands of the Pacific, have brought one at least of the Asiatic nations into parity of influence with Western Powers in shaping the destinies of the Far East, and have marked all Africa with the familiar national colors of Europe and made her mysterious central regions a field for the personally-conducted tourist, and a participant in the privileges of the Universal Postal Union. The body of experience in the mission field has crystallized into what is sometimes called a “Science of missions,” made up of more or less exact principles of labor, which are more and more widely accepted by missionaries of all nations as fundamental. The mere increase of missionary enterprises and the expansion of mission fields are notable facts, while above every other reason the growth of the Christian community in almost every non-Christian land requires the rewriting of every descriptive paragraph in the book. When the editors asked valued advisers in Europe and America what faults of The Encyclopedia of Missions most loudly called for correction in a Revised Edition, the answer, as unanimous as if the question related to some text-book of science written twelve years ago, was “Its antiquity.”

It is with grave misgivings, nevertheless, that this revision is offered to the public. Rigorous compression has been required in order to keep the Revised Edition within limits of bulk and cost which permit a considerable reduction of price.

Articles dealing with the various Missionary Societies have most persistently rebelled against our limitations of space. The history of societies of the first magnitude, the story of their origin, development and expansion under providential leadings; the record of the steadfast faith which has been demanded for their support, together with hints of the reasons why they are now recognized as instruments of a Divine purpose to shape the destinies of the race, would demand several volumes of the size of the one now offered.

The editors have, therefore, had no option but to give mere sketches of the Societies, showing salient points of history and general characteristics of effort rather than details of labors. Even so it has been impossible to mention, except in the Directory, many Societies which are doing noble work with narrow means and with but a handful, perhaps, of missionaries in the field. It is merely an introduction to the study of the missionary movement in the various nations and denominations which can be offered in this work. The great characteristics belonging to all the Societies in common: their motive, aim, difficulties, methods, mutual helpfulness, general relations and influences, direct and indirect, are treated in separate articles, all of which should be read by the student of the work of any one Society who would comprehend the fulness of its might as an agency for Christian civilization and the dignity of its position before those who hope for the elevation of the race.

One important change in the plan of the book, which some may regret, is the omission of maps. None of the old maps could be republished without radical and expensive changes. It is hoped that the wide circulation attained by Dr. Beach’s fine “Geography and Atlas of Protestant Missions” will go far to relieve inconveniences resulting from the absence of the maps in the Encyclopedia. As a further relief, an effort has been made, in describing mission stations, so to define their location that their approximate place can be found in any good atlas.

Descriptive notes of about 5,000 cities, towns, and villages are furnished in this work. Our aim has been to give some data concerning all places in non-Christian lands, which are of present importance in the missionary enterprise. In deciding what places
to omit through lack of space for all, we have tried to limit such omissions to outstations, and to stations which have shown little growth in a number of years, and may be regarded as in a dormant condition. The task of describing places, hundreds of which are found in no existing atlas or gazetteer, invites errors which we cannot hope to have escaped, and for which we must crave the leniency of critics. The spelling of the names of these places has caused much perplexity owing to diversity and even inconsistency of usage among the Missionary Societies. In order to avoid adding to the confusion we have thought best to follow as a general rule the system adopted by Beach in his "Atlas of Protestant Missions."

Success in our undertaking could not be possible without the collaboration of the officers of Missionary Societies all over the world. This has been freely asked, and we gratefully realize that it has been most cordially given. Moreover, many missionaries and others have placed at our disposal their knowledge as experts, or have prepared for the Encyclopedia articles on special subjects. A list of these contributions to the value of the book we give below, indicating at the same time the names of those whose articles in the first edition we were able to use without important modification. We would also make special acknowledgment of our indebtedness to Dr. Beach's "Atlas of Protestant Missions," whenever his laborious research has served to correct or to supplement our own endeavors. The general information found in Dr. J. S. Dennis' "Centennial Survey of Foreign Missions" has also been of great value in preparing for the Appendix the Directory of Missionary Societies and the List of Bible Translators.

In sending out this new edition of The Encyclopedia of Missions we cannot refrain from mentioning the astonishment mingled with awe aroused in our own minds by our close study of the growth of the missionary enterprise since the first edition was issued. It is our belief that if any will study this rapid advance and growth they will find the conviction unavoidable that this enterprise and its present power in the non-Christian world is the fruit of more than a merely human impulse. This book presents again an illustration of the fact that the "stone which the builders rejected is become the head of the corner. It is the Lord's doing and it is marvelous in our eyes!"
LIST OF CONTRIBUTORS OF SPECIAL ARTICLES

*Andrus, Rev. A. N., D.D. Mardin, Turkey.
Barrows, Mrs. J. H. Oberlin, Ohio.
*Barton, Rev. J. L. Boston, Mass.
Beach, Rev. H. F. New York City.
*Brocked, L. P., M.D. Brooklyn, N. Y.
Carroll, Rev. H. K., LL.D. New York City.
*Chambers, Rev. R. Erzroom, Turkey.
*Cobb, Miss M. L. East Orange, N. J.
*Condit, Rev. J. D. San Francisco, Cal.
*Cust, R. N., LL.D. London.
*Ellisworth, Rev. F. J. New York City.
*Fletcher, Miss A. C. New York City.
*Graves, Rev. J. T., D.D. President International Missionary Union.
*Greene, Rev. F. D. New York City.
*Grout, Rev. Lewis (late of South Africa).
*Hand, Chas. W., Esq. New York City.

</table>
AANA: A settlement in Upolu, Samoa; station of the LMS.

ABACO ISLAND. See Great Abaco.

ABADIYEH: A village in Palestine near the southern end of the Sea of Tiberias; mission station of the Friends' Foreign Mission Society, with a school and a dispensary.

ABASA: Village E. of Cape Coast Castle, Gold Coast, W. Africa; outstation of the WMS, with six village schools and about 600 professing Christians.

ABBOTABAD: Town in the district of Peshawar in the northwest frontier province of India; mission station of the CMS, and of the Church of England Zenana Missionary Society, with a dispensary and a number of pupils in the zenanas.

ABDUL MASIH (Servant of Christ): The new name which was adopted by Sheikh Saleh, converted through the influence of Henry Martyn in 1809; and soon afterward admitted to the Church at Calcutta. He was born at Delhi, was Persian and Arabic Moonshi of Lucknow, then became keeper of the King of Oudh's jewels and was for years a most zealous Mussulman. Just after he had been horrified by the atrocities of his coreligionists in the Rajput State of Jodhpur, he became deeply impressed by Martyn's preaching, and accepted Christ as his Savior. The Sheikh Saleh's conversion caused great excitement among his former associates; and he became an able and influential minister of Jesus Christ. He was the first native pastor under the Church Missionary Society in India.

ABEBIFY: Town in the Gold Coast Colony, W. Africa; 4,000 inhabitants using the Ashanti language and worshipping idols or fetishes; station of the Basel Missionary Society, having connected with it 17 outstations, in which are 15 village schools. The Christians of this place number 735. Name also given as Abetifi.

ABEEF: Town in the Gold Coast Colony, W. Africa; 4,000 inhabitants using the Ashanti language and worshipping idols or fetishes; station of the Basel Missionary Society, having connected with it 17 outstations, in which are 15 village schools. The Christians of this place number 735. Name also given as Abetifi.

important commercial center. The growth of the city was greatly stimulated about 1840 by the arrival there from Sierra Leone of freed Christianized slaves, who were natives of the Yoruba country. These men set themselves against the human sacrifices and other cruelties of the fetishism, and the atrocities of the slave-trade of which this city was a center. They also prepared the way for the establishment of missions.

A mission was opened in the city by the CMS in 1846; by the WMS about the same time, and by the SBC (of America) in 1856-1876. Hostility of slave merchants and liquor dealers to the enlightening effect of Christianity has led to several fierce attempts to destroy a reform which opposed both. At last a general uprising against the English took place in 1867, during which all white men were driven from the city, and 2,000 native Christians fled for their lives; the churches were sacked, and Christian influence might have been destroyed for years had not Mr. Johnson, the able negro preacher, held to his post throughout the troubles. At present the four native chiefs who rule the city attend church regularly, and form a regular Council of Government. A Board of Education for the Yoruba region under these chiefs has taken the place of the savage councils of the fetish priests, which terrorized the land in the first half of the 19th century. Intemperance and polygamy are forces which still resist advances of spirituality among the people, and the influx of foreign traders facilitated by the railway is not an unlimited benefit to the city.

Paganism, Mohammedanism and Christianity are the prevailing religions at Abeokuta. There is a Roman Catholic mission there. The Protestant Christian community consists of about 5,000 souls, of whom 1,700 are communicants. There are 11 missionaries, and 73 native workers, men and women, connected with the three missions. A high school and 650 church members. It has 14 village schools, and the SBC reports 2 outstations and 1 village school.

ABETIFI. See ABEHYFI.

ABKHASIANS: A warlike tribe, inhabiting the country between the Black Sea and the Caucasus. Under the Roman Emperor Justinian they became Christians, but subsequently adopted Mohammedanism, to which religion they still nominally belong, though their religion in fact consists of a barbarous mixture of Christian, Mohammedan and heathen notions and usages. The greater part of these people have been induced by the Turkish government to remove to Asia Minor, where they form agricultural and commercial communities, living apart from the rest of the population.

ABO: Town on the Rombi river in the German Colony of Kamerun; station of the German Baptist Missionary Society, opened in 1900. Also written Abo.

ABOKOBI. See AGBOBRA.

ABOMEN: The capital of Dahomey. It was captured by the French in 1892. It is now a mission station, but has been reached by the Wesleyan Missionary Society. It has about 20,000 inhabitants.
The Introduction of Christianity: Abyssinia has been called the first and only mission field of the Coptic Church. It was converted to the Christian faith early in the 4th century, in this wise: Meropius, a philosopher of Tyre, went on a voyage of travel and observation to "India"—a much-abused title, supposed to designate in this case South Arabia. He had with him his two young nephews, Frumentius and Edeius. The ship put into a port on the west coast of the Red Sea and its passengers were promptly slain by the natives. Frumentius and Edeius alone were saved alive as slaves, and taken to Axum, the ancient capital of Abyssinia. Frumentius was instrumental in introducing some knowledge of Christianity among the people and, having asked help in his missionary labors from the Church in Egypt, he himself was consecrated bishop of Abyssinia. He is known in the church of that land as Abu Salama, "the Father of Peace."

The venerable translation of the Bible into Egyptian dates from the 2nd century, and, if not finished by Frumentius, was doubtless set under ecclesiastic influence with the finished by Frumentius, was doubtless set under ecclesiastic influence with the. Bishop Gobat of Axum, the ancient capital of Abyssinia. It was converted to the Christian faith early in the 4th century, and by Bishop Gobat, broke disease and death, and had to leave the country. Mr. Kugler died. Later, Mr. Isenberg and Dr. Krapf took up the work. The Jesuit cloud again appeared on the horizon in the shape of Sapeto, who was sent out by the Propaganda. His intrigues aroused the ignorant and suspicious king Theodore. An English military force relieved the captives in 1868, and the CMS has not renewed its efforts for the Abyssinians. The Swedish Evangelical National Society in 1866 began a mission near Massawa on the Red Sea in what was Abyssinian territory, but is now the Italian colony of Eritrea. Its missionaries have gradually pressed toward the Abyssinian frontier and now they have 5 stations W. of Massawa manned by 18 missionaries and 13 native workers, both men and women, and with a printing house, schools, and about 300 communicants connected with their churches.

The Jesuit Episode: In 1490 A.D., the Abyssinian Christians were rediscovered by the naval officers of John II. of Portugal, who had sailed the whole way around southern Africa. The Christian world thought that at last the famous "Prester John" was found, and that the old legend of the kingdom of the king of the heavens was discovered in the present time.

The Abyssinian Christians are connected especially with the Coptic Church of Egypt, but hold to certain observances of Judaism. The clergy being the only educated people and holding great power in their hands, conservative influences and deep suspicion of foreigners have ruled the thought of the kingdom up to the present time. In the new Africa, Abyssinia is destined to play an important part. That its Christianity should be revived and made to live in the hearts of its adherents is the most pressing duty of the Christian Church.

ADABAZAR: A town of Asiatic Turkey, about 60 miles E. of Nicomedia; a station of the ABCFM. Mission work resulted early in the establishment of a strong church, which supports its own pastor and schools and has become a center of great influence among the villages of that section. The church has taken upon itself responsibility for a girls' boarding school, the Board furnishing three unmarried women missionaries as its teachers.

ADALIA: A seaport on the southern coast of Asia Minor, the ancient Attaleia. The population is about 13,000 Mohammedans, with quite a number of Greeks. It is not occupied as a mission station, but is visited by colporteurs of the BFBS.

ADAMS. See AMANZIMTOZE.

ADAMSHOOP: Town in the Orange River Colony, S. Africa, founded by the son of a slave. Station of the Berlin Mission Society since 1867. One missionary and 20 native workers form the force at this station and 4 outstations and 500 church members.

ADANA: A city of 45,000 inhabitants, the seat of government of the province of the same name, S. of the Taurus Mountains in Asiatic Turkey. The people of the city are mostly Mohammedans, but there are a considerable number of Armenians, some Nusairiyeh and a small Greek community. The people of Adana are noted for their industry and force of character. It is a station of the ABCFM, with a working force of 5 missionaries and 22 native workers, men and women. It has an excellent girls' boarding school, an orphanage, a fine church building with 650 church members. Adana is also an outstation of the RP for work conducted in Arabic. The ABS has a Bible depot and subagency there.

ADDA, or Ada: A town on the Gold Coast, W. Africa; station of the Basel Missionary Society, with several outstations and 6 village schools and a kindergarten. The number of professing Christians is about 250.

ADDYMAN, John: Born in Leeds, county of Yorkshire, England, on October 22, 1808. Converted at sixteen, he at once threw himself earnestly into evangelistic work, first in Leeds and then in London. He was at this time connected with the Wesleyan Methodists, but his views on the subject of church government having undergone some change, he left the Wesleyan community and united himself with the Methodist New Connexion. He was called into the ministry of that body in 1833. Just at this time the subject of commencing a mission in Canada was seriously occupying the members of the New Connexion and Mr. Addyman was chosen to be the pioneer of the movement in the Far West. His labors in Canada were very trying, involving great privations and dangers, and often attended by romantic experiences. During what is known as the Canadian Rebellion he was in great peril, his life being threatened; also, on suspicion of being a spy, he was arrested and kept for some time in prison. At length, through his arduous toils and trials, his health failed, and in 1845 he returned to his native land, having been the main instrument in establishing 177 churches, which contained more than 4,000 members, but which have since expanded into large and flourishing centers, and now form part of the Methodist Church of Canada. He died June 7, 1887.

ADELAIDE: A village of 1,200 inhabitants, on the left bank of the Koonap River, in Cape Colony, S. Africa. Religion, the denominations common in Britain and America; the native fetishism also exists. It is a mission station of the UFS, established in 1861, and has a working force of a missionary and his wife with a native worker. There are 185 church members.

ADEN: A fortified seaport at the southwestern corner of Arabia, belonging to Great Britain, having been bought from the Turks in 1839 by the British East India Company. The climate is hot and very trying to Europeans. The population is almost exclusively Mohammedan, but of several races and tribes who go to Aden for commerce from the interior of Arabia and from Africa. The UFS has a mission station at Shikub Othman in the district of Aden. Three missionaries and 2 native workers, men and women, compose the force which carries on a high school, a hospital, and a dispensary.

ADMIRALTY ISLANDS: A group of islands lying N. E. of New Guineas, belonging to Germany and forming a part of Bismarck Archipelago.

ADOWA: Capital of Tigre, Abyssinia; a town of about 3,000 inhabitants. It has not now any missionary enterprises.

ADRIANOPEL: Capital of the Turkish province of the same name (Turkish Edirne), on the Maritsa (ancient Hebrus), in Thrace, 130 miles northwest of Constantinople. Population, 85,000 Mohammedans, Greeks, Armenians, Jews, with a few Roman Catholics and a small group of Protestants. The scenery of the city is beautiful, the gardens of the wealthy citizens delightful, and the appearance of the 40 mosques most picturesque. The trade, centered in a capacious bazaar, is considerable, and the city possesses strategic importance. Founded by Emperor Hadrian in 125. Mission station of British Society for Propagating the Gospel among the Jews; 1 Jewish missionary; also an outstation of Constantinople (ABCFM); it has a native Evangelical church, and a Bible depot of the ABS.

AFGHANISTAN: A country of Central Asia, N. E. of India, which it separates from Russia and Persia. It is a mountainous country, with lofty tables and deep ravines, few rivers, and a climate that presents a great variety, changing from intense cold to tropical heat. The population is estimated at about 5,000,000 Mohammedans of the Sunnite sect, divided into two classes, Durrans and Ghilzais. They are a fierce, turbulent people, constantly at feud and difficult to govern. No mission work can be attempted at present in Afghanistan, but the British and Foreign Bible Society have published the New Testament, Psalms, and historical books of the Old Testament in Pashtu, or Afghani.

AFRICA: The continent of Africa is equal in area to Europe and North America combined, comprising nearly 12,000,000 square miles. Its greatest length is 5,000 miles, and its greatest breadth, 4,600. Both tropics cross it, and the equator intersects it a little below the center. By far the largest portion of its territory is
The wonderful discoveries of the last 60 years begin with the two missionaries of the Church Missionary Society, Ludwig Krapf and John Rebmann, who were the earliest explorers of Africa, from the eastern side (1844-46). Rebmann’s discovery of Mount Kilima-Njaro, in 1848, was the first great step forward in what has been well called the Recovery of Central Africa. In the following year Livingstone made his first important journey, in the far south, and reached the small lake Ngami. In 1854 Baikie took the second Niger expedition (with which was S. Crowther) up the Benue branch more than 600 miles from the sea; and about the same time Barth was prosecuting his extensive journeys in the Sudan and around Lake Chad. Livingstone was then gaining his great reputation in the south, particularly by his journey across Africa from Loanda to the mouth of Zambezi, by which the course of that river was determined (1854-55). In 1857 Burton and Speke, stimulated by the researches of Krapf and Rebmann, which had for several years pointed to a great inland sea somewhere in the interior, made their great journey from the East Coast, and in the following year discovered Lake Tanganyika and the Victoria Nyanza.
In 1859 Livingstone discovered Nyassa, and, not knowing that the mystery of the inland sea, heard of by Reebmann, had been solved, wrote home: "This (Nyassa) must be what the Church Missionary Society has been thinking of for many years." (The Portuguese, however, knew of Nyassa, and Coehome's capital, in the heart of the lake region, had been reached by Lacerda as far back as 1798, and by Monteiro in 1831.) In 1862 Speke, on his second journey with Grant, discovered Uganda, and the outflow of the Nile from the Victoria Nyanza, and sent home his famous message, the Nile is settled. While several Egyptian officers with Petherick had ascended the White Nile nearly to the Albert Nyanza, which, however, was first seen by Baker in 1864. In 1890 Livingstone, abandoning his southern fields, began his later travels in the lake regions, around Tanganyika, and on what are now known to be the headquartbes of the Congo. The search for him, when his long absence caused anxiety, led to Stanley's first journey (1871), and to that of Cameron. The latter was the first to cross the Congo from east to west (1874-75); but his too southern route missed the course of the Congo, which was determined by Stanley on his second journey in 1876-77. This was the journey in the course of which Stanley explored the Victoria Nyanza, and visited Uganda. Meanwhile, the remarkable explorations in the Sudan of Schweinfurth (1869-71) and Nachtigal (1869-74), particularly those of the former in the territories west of the Upper White Nile, revealed to the world countries and peoples utterly unknown before, notably the Monbuttu and Nyam-Nyam districts and races.

The Congo particularly, within eight years of the discovery of its course, became a comparatively familiar stream. The vast territories bordering it have, by European treaty, been formed (so far as commerce is concerned) into a Congo Free State.

Among the events and ongoings that in more recent years have contributed to the enlargement of our knowledge of Africa, may be mentioned the protean practically assumed over Egypt by Great Britain since 1883, the long continued troubles in the Sudan, and especially events that culminated in the overthrow of the Orange Free State and the South African Republic, and reduced them to British colonies. To these happenings should be added the activity manifested by Great Britain in pushing its African railway enterprises, aided by some other powers, a process that promises to bring into railway connection with the whole world the entire east coast and the eastern portion of the continent.

The more recent explorations have been undertaken less to discover new regions than to increase our knowledge of regions already reached. The best known of the expeditions since 1885 was that of Stanley, undertaken to discover the fate of or whereabouts of Emin Pasha (Snitzer). This went up the Congo, traversed the continent from north to south, investigating the feasibility of a "Cape to Cairo" railroad, and making many valuable discoveries. Donaldson Smith explored Somaliland with good results, Foucault crossed the Sahara to the Congo, and Mar-
to fix, but the best authorities are fairly agreed in arranging them by language, and the linguistic grouping has made such progress of late years that the above may be taken to be a fairly consistent outline grouping of the races of the continent.

IV. Religions of Africa. The missionary to Africa has the task of making himself acquainted with a greater variety of religious customs and superstitions than can be found in any other quarter of the world. These religions are characterized in general by a belief in a supreme being, in many quarters by the worship of ancestors, somewhat as in China, by Fetishism with its priests, sorcerers and groveling rites, and by superstitious fears, incantations, charms and barbaric ceremonies. Idolatry, in the sense of the making and worshipping of images, is not so widely diffused as might be supposed. There is nothing in Africa like the elaborate image-worship of India. Invisible idols are common among the West African Negroes; but in Ceylon, so far as is known, none are to be found. But what is called fetish worship is universal. A fetish is a charm; and almost any object—a tree, a stick, a stone, a shell, a plant, the limb of an animal, a vessel filled with some strange compound—in fact, anything whatever—may have power imparted to it by certain medicine-men—power to preserve the owner or bearer from danger, or power to injure his enemies. Particular fetishes fulfill particular purposes. All these native religions may be comprised under the pagan, the Christian, and the Moslem heads. Of the pagans on the whole globe, six-sevenths are in Africa, which is therefore emphatically the pagan continent. Of the imported religions of Africa the leading representative is Mohammedanism. Carried in the 7th century by Áre and sword over North Africa, this faith has, in the last two centuries, advanced its borders considerably, and now prevails widely in both the Western and Eastern Sudan, in West Africa and along the east coast, and its missionaries are more or less actively spreading their faith among the populations of Central Africa.

The Christian populations of Africa comprise the Copts, descendants of the Monophysites of the 5th century, numbering about 750,000; the Abyssinians, whose ecclesiastical system depends upon the Coptic Church; and many who have had missionaries in Africa continuously since the 16th century, and now aggregate about 2,450,000; and Protestants, numbering about 3,250,000, including the English and Dutch of South Africa. Nearly all dwelling on the east coast of the continent, number about 250,000 in Africa; and according to varying estimates there are from 550,000 to 750,000 Jews, chiefly on the Mediterranean coast.

V. Missionary Work in Africa, General View: The first Protestants to undertake evangelizing work in Africa were the Moravians, who began in 1732. Since that time nearly every Protestant denomination has undertaken missionary work in some part of the dark continent. For details of this work the reader should consult the articles upon the political and territorial divisions of the continent, and particularly the statistical tables found in the Appendix to this work.

Statistics naturally take no account of the great number of Christian men and women in Africa not directly related to missions, but who exercise evangelizing influences in innumerable ways. The established and self-supporting churches are naturally evangelizing agencies, and it is further to be considered that very much work by Christians cannot be identified nor reduced to statistical form.

Obstacles and Difficulties encountered in Missionary Work in Africa: These are many, but not insurmountable. The first is the climate of many parts to which missionaries have undertaken to go. Time spent in acclimatizing African or Americans who spend any time on the coast in the lowlands.

The vast number of languages spoken by the 175,000,000 or more of the inhabitants of Africa is a very serious obstacle to missionary labor. Nowhere is a universal speech more of a desideratum.

Slavery and the appearance of the Arab slave-trader are still real terrors in many regions, and sadly interfere with the progress of the Gospel; but there is reason to hope that this great crime against humanity is permanently under restraint, so that its vitality will steadily fail.

The traffic in liquor is another obstacle, to the missionary enterprise and the spread of the Gospel, particularly on the west coast of Africa. Steps have been taken to limit this evil.

Other difficulties and problems that confront the missionary in Africa can be only mentioned. The brutal animal nature of the natives in many regions makes the instilling of a pure religion seem nearly impossible. The brutal animal nature of the natives in many regions makes the instilling of a pure religion seem nearly impossible. See GERMAN SOUTHWEST AFRICA.

### AFRICAN METHODIST EPISCOPAL CHURCH; Parent Home and Foreign Missionary Society of the, (1847): The foreign mission work of the African Methodist Episcopal Church is found in Africa, South America, West Indies and elsewhere. The first foreign field of the church was Haiti, 1830, where the society now reports 10 stations and 2,000 adherents. It reports 15 missionaries in the Windward Islands, and 3 missionaries in Cuba. Its missions in Africa include stations in Sierra Leone, Liberia, the Lagos Colony (on the west coast of the continent), in Cape Colony in South Africa, extending northward as far as northern Rhodesia. In Africa it reports altogether 300 preachers and a membership of 11,000. The origin of the work of this organization in South Africa was the withdrawal, in 1894-95, of a number of native church members from the WMS churches in the Transvaal. The seceders formed a new body which adopted the name, "Ethiopian Church." The movement was in some measure a protest against a color line in the churches of Africa. In 1896 the Ethiopian church united with the African Methodist Episcopal Church of the United States, and the movement is spreading with some energy among native churches in Africa.

The Woman’s Parent Mite Missionary Society (1872), and the Woman’s Home and Foreign Missionary Society (1892), are auxiliaries, the last named having its chief support in the Southern States. The headquarters of the society are: 61 Bible House, New York City. Organ: Voice of Missions.

### AFRICAN TRAINING INSTITUTE (Colwyn Bay, North Wales): This Institution was founded in 1889 by the Rev. W. Hughes for the purpose of giving a thorough English training to exceptionally gifted Africans. The plan was heartily approved by many of the African Christian clergy and others, and is supported by auxiliary committees established at several points in W. Africa. The Training Institute is located in a delightful part of Wales, at Colwyn Bay, and has already shown its usefulness. It has educated more than 300 Africans now working at about 15 places in W. Africa, mainly in the Congo region, and who, by so much, become the direct channels of the influence of the Institute. The Institute teaches its pupils some of the arts which will find place for application in Africa and it has 5 auxiliary or preparatory schools in Africa, the most intelligent of whose graduates will be taken to complete their training in the mother institution. The number of students now in training is about 75.

### AGARPARA: A village near Calcutta, India; station of the BMS, opened in 1900.

### AGBOBGA, or ABOKOBI: A town N. of Accra in the Gold Coast Colony, W. Africa; station of the Basel Missionary Society, with 21 outstations and 15 village schools. The number of professing Christians is about 500.

### AGNEW, Miss Eliza: Sailed from Boston to Ceylon, under the ABCFM, in 1839, and for forty-three years she labored as a missionary of the Cross, never returning to native land. She was the first unmarried woman sent as a missionary to Ceylon, and for forty years she was the efficient principal of the girls’ school at Oodooville. In June, 1883, Miss Agnew received a paralytic shock, and during the same month she passed into her heavenly rest.

### AGRA: A city of about 170,000 inhabitants, capital of the district of the same name in the United Provinces, British India. It has several magnificent architectural relics of the Mogul Empire, and is venerated by the Hindus as the scene of the incarnation of Vishnu. It is an important center of Mohommedanism. The climate is good except from April to September. It is a station of the BMS, opened in 1811, and now carried on by 5 missionaries, men and women, and 24 native workers. There are 2 outstations and 9 village schools, an orphanage, and 70 church members.

### AGU: Town in the German colony of Togoland, W. Africa; station of the N. German Missionary Society, opened in 1900.

### AGUADILLA: Town on the W. shore of Porto Rico; a flourishing station of the Presbyterian Home Missionary Society, with about 150 adherents.

### AGUASCALIENTES: Capital of the smallest State in the Mexican Republic, 270 miles northwest of Mexico City. It takes its name from the hot springs which abound in the vicinity. It is surrounded by rich gardens abounding in olives, figs, vines, pears, etc. Climate, temperate; population, 32,000 Mexicans; language, Spanish; religion, Roman Catholic. Mission station of Cumberland Presbyterian Church (1888): 1 missionary and wife, 2 unmarried women, 7 native workers, men and women, a printing house, 2 industrial schools, 1 outstation, 3 common schools, and 106 church members.

### AHMADABAD: The capital of the district of the same name, Bombay, British India. It was formerly one of the most magnificent cities of India, and its superb architectural monuments still testify to the fact. It is an important center of the Parsees. It is a mission station of the PCI, established in 1861; with 6 missionaries and 30 native workers, men and women, a theological seminary, 2 orphanages, a high school, and 11 common schools. There are 100 members in the church.

It is also occupied as a mission station by the ME, with 1 missionary and his wife and 5 native workers, and by the Christian and Missionary Alliance, and the Salvation Army, statistics in regard to which are lacking.

### AHMADNAGAR: A city in the presidency of Bombay, British India, standing on the Deccan...
PLATEAU and on a line of rail joining Dhond on the Bombay and Madras line, with Manmad on the Bombay and Cuttack line. It has 35,000 inhabitants, of whom 3,572 are Christians, for the most part connected with the mission of the ABCFM. This mission was commenced in 1851. Up to 1855 the whole number of converts amounted only to 78. But then a movement arose which spread to about 100 villages, and brought over 600 communicants into the church. A convert, Krishnarao, introduced, in 1862, the Kirtan at the meetings—songs on the life of Christ, sung with instrumental accompaniment. The present force of the mission consists of 17 missionaries, men and women, of whom 2 are physicians and 3 industrial instructors. It maintains 1 theological seminary, 1 training school for women workers, 2 high schools, 1 industrial school of great efficiency, 1 industrial school for women, 1 hospital, 1 dispensary. Connected with the mission are 2 churches in the city which pay the expenses of their own Christian inhabitants, of whom 3,572 are Christians, for the Bombay and Calcutta line.

brought over 600 communicants into the church.

The SPG entered Ahmadnagar in 1870, and has its headquarters outside of the city with a somewhat extensive work in the district to the north.

The Christian Literature Society for India has a publishing house in the city and conducts a normal training-school.

The Industrial Missions Aid Society has a rug factory in the city which gives employment to boys trained in the industrial schools of the Mission.

It is a notable fact that while the population of the district decreased by 52,000 in 10 years, 1891-1901, the Christians of the district increased in the same time from 6,734 to 20,864.

AHOUSAHT: Village on the W. coast of Van­

in Canada, with 1 missionary and his wife,

missionary woman, 1 Sunday-school and 1 village

school.

AILDAIN: A city 57 miles southeast of Smyrna, Turkey. Population, 35,000, chiefly Moham­

dans, but with a few Greeks and Armenians.

It is purposely situated on the Missus River, and built out of the ruins of the ancient city of Tralles, once occupying this site. Out­

station of the ABCFM worked by the mission­

aries at Smyrna.

AILSA CRAIG: Village in West Shire, Nyasa­

land, Africa; station of the Zambesi Industrial

Mission, with an industrial school and 2 village

schools.

AIM OF CHRISTIAN MISSIONS: The aim of foreign missions is not to be confused with the aim of the Christian Church in the world, or of the Christian nations of the world. There are many good and Christian things which it is not the foreign missionary enterprise to do. And we must not confuse the aim of foreign missions with the results—an easy confusion—because there is no other force so powerful to accomplish results accessory and indirect. It is misleading also to confuse the ultimate issues with the immediate aims; it is not only misleading, it is fatal. Some things can only be secured by those who do not seek them. Missions are powerful to transform the face of society, because they ignore the face of society, and deal with it at its heart. They yield such powerful political and social results, because they do not immediately concern themselves with them. Again, we must not confuse the aim of missions with the methods of missions. It is an easy thing to select a method with the view to the accomplishment of some given end, and then because the end is difficult of accomplishment, because the method is easy of operation, because its results, apart altogether from the main aim, are good and useful in themselves, it is easy to exalt the method into the place of the end.

Having cleared the ground so far, what is the aim of foreign missions? It is a religious aim. It cannot be stated too strongly in an age when the thought of men is full of things, and when the body has crept up on the throne of the soul, that the work is not immediately and primarily a philanthropic work, a political work, a secular work of any sort whatsoever. It is a spiritual and a religious work. Of course religion must express itself in life, but the missionary does not go into the world primarily as a politician, but as an exponent of a better social life. He goes as the trustee of His life. Who said of Himself, "Except ye eat the flesh of the Son of man, and drink His blood, ye have no life in you." "I came that they may have life, and may have it more abundantly." "The bread which I will give is my body, which I will give for the life of the world" President Seeley's lectures on Christian Missions have the great merit of laying chief emphasis on this predominance of the religious and spiritual character of the aim of missions.

The aim of missions, then, to borrow Dr. George Washburn's phrase, is to make Jesus Christ known to the world. Other phraseology may be used. We can say the aim of missions is the evangelization of the world. Or, we can say the aim of missions is to preach the Gospel to the world. And if we understand these terms in their Scriptural sense, they are synonymous with the phrase just quoted. But many persist in using them at less than their Scriptural value. It makes clear what the aim of missions is, to say: The aim of missions is to make Jesus Christ known to the world.

And almost any method, almost any agency, may be recognized as legitimate which subjects itself with fidelity to this supreme aim. As Alexander Duff said in 1854, in the first Missionary Conference in New York City, "The chief means of divine appointment for the evangelization of the world are the faithful teaching and preaching of the pure Gospel of salvation, by duly qualified ministers and other holy and consistent disciples of the Lord Jesus Christ, accompanied with prayer, and savingly applied by the grace of the Holy Spirit; such means, in the providential application of them by human agency, embracing not merely instruction by the living voice, but the translation and judicious circulation of the whole written Word of God, the preparation and circulation of evangelical tracts and books, as well as any other instrumentalities fitted to bring the Word of God home to men's souls, together with any processes which experience may have sanctioned, as the most efficient in raising up everywhere indigenous ministers and teachers of the living Gospel." This is fair and broad. It sets out opengl a range of mission effort that will throttle and restrict no useful missionary enterprise, and it
The supreme aim of missions is to make Jesus Christ known to the world, with a view to the full salvation of men, and their gathering into true and living churches, which shall be outward evidence of the grace and salvation of God. We are to establish and foster native churches, self-extending, self-directing, which shall carry down into the generations to come that link of loving sympathy which binds us to its death; we cannot sever ourselves from that link of sympathy which binds us to His life. We are meant to be between His life and its death, channels of the grace of the salvation of God. The aim of missions is to make Jesus Christ known to the world with a view to the salvation of men for that eternity which embraces alike the time that is to come and the time that now is. We cannot narrow salvation to but one world, this one or the next. And further we must not state the aim of missions in purely individualistic terms. Our duty lies certainly to our generation, but it does not stop there. We are bound to preach to every person in the world the Gospel of the only Savior; we are bound to make known that there is a body of Christ which is His Church, and to gather up all responsive men into visible churches, which shall be outward evidence of the body of Christ, and shall secure to the Gospel an influence and perpetuity which institutions and not individuals must supply. Henry Venn, Dr. Warneck and Rufus Anderson have given proper emphasis to this element in missionary policy and duty. We are to establish and foster native churches, self-extending, self-maintaining, self-directing, which shall carry out to their own people, whom we may not reach, the message that has come to us, and which shall carry down into the generations to come after them, the blessings which we have given them as their own. This is the aim of missionary missions, to make Jesus Christ known to the world, with a view to the full salvation of men, and their gathering into true and living churches to which the missionary enterprise may commit the larger and enduring Christian duty of 'regions beyond.'

This is the supreme aim. It is a just thing to challenge the world to sympathy with missions, because of the philanthropic and social results that missions achieve, and the heroic spirit which they display. But their supreme aim is neither to establish republics or limited mon·archies throughout the world, nor to lead Chinese or Hindu people to wear our dress, nor to remodel their social institutions, where these are already wholesome and clean. The supreme aim is to make Jesus Christ known. Any true view of the world, not only for other forces than missions, God is King, and assuredly as His hand is upon the work of missions, it is upon all the great forces that are making the world. We cannot acknowledge that the force of political influence has escaped from His control, that He stands impotent before the commerce and civilization of the world. His hand is upon these things. They play at last into His almighty purposes. They are but part of His influence. They and all the forces of life run resistlessly on to the great goals of God. But these forces are only supplementary to the power that the missionary holds in his hands from His pierced hand Who died and rose again, and Who is King of them that reign as kings, and Lord of them that rule as lords.

This aim of missions should have determining authority. We sometimes allow ourselves to drift into methods of work that presuppose a quite contrary aim. When we lift off the shoulders of a new native church, for example, the burdens that it must bear if it is ever to grow, the act seems like kindness, while it is fatal to the Church and regretful of the supreme missionary aim. It is easy to slip into indirect conceptions of duty, or to do what God can do through other agencies. Missions are to do their own work, and not the work of other agencies or other forces. Methods of work, in their proportion and in their perpetuation, should be ruled by the supreme and determining aim of the missionary movement.

And not alone the method of missions, but the spirit of the enterprise should be ruled by that aim. It proposes no promissory and indefinite project. It has its own clean-cut piece of work to do. To be sure it is often confused enough in the actual work among men, but the circumstances which confuse it show also how important its clearness and precision are. If this is the aim of missions, the enterprise is not a miscellaneous and undefined task. It is a clear and practicable project, well justifying the words of Simeon Cathoun, the 'Saint of the Lebanon':

"It is my deep conviction, and I say it again and again, that if the Church of Christ were what she ought to be, twenty years would not pass away till the story of the cross would be uttered in the ears of every living man."

**AIMARA LANGUAGE:** In Bolivia nearly 400,000 people speak this language. It belongs to the South American family, but has been modified by the Spanish. It is written with Roman letters.

**AINUI LANGUAGE:** Ckssed among the aboriginal languages of the Extreme Orient family, the Ainu has no literature and has been written for missionary purposes and in Roman letters only. It is spoken by about 150,000 people found in Japan.

**AINUS:** Tribes inhabiting Sakhalien, Yezo, the Kurile islands and various adjacent regions, partly under Japanese and partly under Russian jurisdiction. As in the case of many aboriginal
races the name of this race means simply men. Tradition says that the Japanese were originally Ainus, and only became a distinct race by intermarrying with the Chinese. The Ainus are different from other Mongolian tribes, and in their more vigorous physical formation resemble the Caucasians type. They are short and planted like savages, they are inoffensive and hospital, but rather shy. They are pagans, and practise polygamy. Groups of 10 or 12 families live together in miserable huts, with a chief for each group. They support themselves by hunting and fishing. Thos of them who have been converted to Christianity have shown sturdyness and enthusiasm.

AJMERE: A city of Asiatic Turkey, about 35 miles west of the Euphrates, in the province of Aleppo. It has 30,000 inhabitants, chiefly Mohammedans and Armenians. One of the most flourishing stations of the ABCFM, with a large female seminary and a college founded in 1874. There are 4 large churches, 2 of them having stone buildings, with accommodation for over 1,000 each. The Protestant community is one of the most influential in Turkey. The effort in 1863, to establish an Episcopal cathedral failed. The common schools are on the graded system, are supported entirely by the people, and are of very marked efficiency. The Central Turkey College at Antab althc independent, is closely connected with the mission. The hospital and dispensary has been most efficient. The work of the station is carried on by 12 missionaries and 132 native workers, men and women. It has 27 outstations, 61 primary schools, 7 high schools and an orphanage. The number of church members in the field is about 3,500.

AIN-ZAHALTA: A village in the Lebanon district of Syria; station of the British Syrian Schools Society, with a dispensary, 6 outstations and 6 village schools.

AITUTAKI ID. See HERVEY ISLANDS.

AIYANSH: A station in the CMS in the diocese of Caledonia, British Columbia, founded in 1883. It is carried on by a missionary and his wife and 5 native workers, men and women. An industrial school and a publishing establishment are carried on, and the number of communicant Christians is 73.

AJERMANDIDI: A mission station of the Netherlands Missionary Society in the Minahassa Peninsula of Celebes.

AJMER: A territory in Rajputana, India, governed by a Chief Commissioner, appointed by the Governor General of India. Its area, including the district of Nerwara, which forms its southern portion, is only 2,711 square miles, and its population (1901), 476,912.

Hinduism is the prevailing religion. Mohammedans are also found and a small number of Christians. The language is Hindustani.

The province adjoins the Rajputana desert, has a limited rainfall and is subject to destructive famines.

Missionary work is carried on in Ajmerez by the CMS, the UFS and the ME. The whole number of places occupied as stations by these societies is four.

AJMERE: Capital of the commissionership of Ajmere in British India. Its population numbers (1901) 72,839. The prevailing religions are Hinduism, Jainism and Mohammedanism. It has a very fine and old Mosque built on the site of a Jain temple. It is a mission station of the UFS (opened in 1862). The ME and the SPG also have native workers here. The UFS has a publishing establishment, a dispensary and a hospital in this place. The aggregate working force is 8 missionaries and 140 native workers of both sexes. The total number of communicants, Christians is about 700.

AJNALA: A town in the district of Amritsar, Punjab, India; station of the CMS, with 21 native workers, and of the CEZMS, with 4 women missionaries, and 8 native women workers, 4 village schools, 1 high school and 1 hospital. There are 33 communicants.

AKADE: A town on the Benue river, Nigeria, W. Africa; station of the CMS, opened in 1897. The people are in the main fetish worshippers, with a few Mohammedans among them.

AKIDU: A village on Lake Kolar, Madras, British India. A flourishing station of the BOQ, established in 1890, and operated by 3 missionaries and 42 native workers, men and women. It has 9 outstations, a dispensary, a high school and 22 common schools, with 1,700 communicants in the field under its supervision.

AKITA: A city in the island of Hondo, Japan, with 50,000 inhabitants. A station of the FCM, with 3 missionaries and 4 native workers, men and women. It has a dispensary, a nurses' training class, 9 outstations and 220 church members. It is also an outstation of the ME in charge of 2 native workers.

AKKAWAY, or Aseaawai: This is a language of the South American family spoken by a limited number of the people of Guiana. For missionary purposes, it has been written with Roman characters.

AKROPONG: A town in the Gold Coast Colony, W. Africa, in the domain of the Ashanti language.

The religion of the people is Fetishism. The Basel Missionary Society opened a station here in 1835, which has been very successful. Ten missionaries and 38 native workers, men and women, form the corps of instructors for the people of the town and of 14 outstations. The total number of communicant Christians is 2,100.

AKWAPIM: A dialect of the Otshi language spoken in parts of the Ashanti country in W. Africa.

ALABA IS.: The northernmost group (commonly known as the Torres Is.), of the New Hebrides Islands. The Melanesian Mission has kept teachers in the Torres Islands since 1878.

ALASKA: The northwestern corner of North America, formerly known as Russian America, and purchased by the United States in 1867 for $7,200,000. It embraces all of the N. American continent W. of the 141st meridian of W. longitude, together with a narrow strip of land between the Pacific ocean and the British dominions, and also all islands near its coast, as well as the Aleutian archipelago. Including islands, its area is 590,883 miles; an area about equal to that of the Northern States east of the Mississippi, with the addition of the Virginia, Kentucky and Tennessee. The exact eastward bounds of the southern coast strip of Alaska are still unsettled. The population (1906) is 63,592, of whom 25,000 are Indians and Eskimos. The white population is rapidly increasing in conse-
quency of the discovery of several very rich deposits of gold in the western and central part of the country. The native tribes of Alaska are pagans, mostly worshipers of departed spirits, cruel in their rites, and superstitiously subservient to their medicine men or religious leaders. The climate of Alaska in its southern coast regions and in its islands is much less severe than in the same latitude on the eastern coast of the continent. On the central plateau, 600 miles long from east to west and 400 miles wide from north to south, the summers are quite hot, while the winters are very cold. Below the border of the hot summers the cereals and many vegetables of the temperate zone can be grown, and Alaska may yet prove to be an agricultural region with a large population. Access to the interior of the country is facilitated during the summer by the Yukon River, which is one of the great rivers of the continent, being navigable for 1,500 miles.

The Russian (Greek orthodox) Church had opened missions among the Aleutian islanders and two points on the mainland before the cession of Alaska to the United States, and had made some converts. Since the country became a dependency of the United States, various Protestant denominations and the Roman Catholic Church have established mission stations in various places. The Protestant missions in Alaska have about 20 stations, occupied by 118 missionaries and 13 native workers, men and women, with places of worship, schools and hospitals. These missions are maintained by the Presbytery Home Mission Board, the Presbyterian Domestic and Foreign Mission Board, the Moravian Church, the Friends, the Methodist Episcopal, the Baptist, the Congregational, and the Lutheran Churches (Swedish and also Norwegian), the American Missionary Association and some smaller societies. Some of the mission stations occupied are within the Arctic circle, where daylight in winter is a sunless sort of twilight of but three hours duration. One station (Point Barrow), on the northernmost point of the territory, is reached by runway. The number of Indians and Eskimos have been drawn under the influence of these missions. In the southern part of the country, men engaged in the liquor traffic seduce and destroy a certain number of the simple-minded natives. But in all the stations, education, especially industrial education, has been made an ally of religion in lifting the ideals and enriching the lives of the people. The total of Protestant Christian natives is (1900) 7,000 souls.

ALBANIA: The region called Albania includes the two provinces of Jannina and Skodra (Scutari), in European Turkey, stretching along the eastern shore of the Adriatic from 39° to 45° north latitude and from 18° to 22° east longitude. Its extreme length is about 300 miles from Montenegro to the Gulf of Arta and the frontiers of Greece, while its breadth varies from 50 to 100 miles, from the Adriatic to an irregular line on the east, generally following lofty mountain ranges. It is a mountainous region throughout, being traversed by two or three elevated ranges which run parallel, in general, to the shore of the Adriatic Sea. It is also well watered, although its rivers are not navigable. Its large lakes of Jannina, Castoria, Ochrida, and Scutari impart a peculiar interest to the country.

The earliest authentic notices of the country occur in connection with the Greek colonies of Epidamnus, or Dyrrachium (now Durazzo), the ancient port of transit from Brundusium (Brindisi) and Epidaurus in Dalmatia, to which we may add the later colony of Jannina, which seems to have grown up almost unnoticed, not far from the ancient Oracle of Dodona, on the western shore of the lake of the same name.

The name Albania, first applied to this country in 1079, originated from Elbasan, the seat of the tribe of Albanii in the center of the land. Anciently the region from Preveza to the mouth of the Voyussa was called Epirus, and was considered more or less as a province of Greece, while all north of Voyussa was known as Illyricum. Hence we may conclude that Paul himself preached the Gospel in Albania, when he tells us (Rom. 15: 19), that "from Jerusalem, and round about unto Illyricum, I have fully preached the Gospel of Christ." Albania is the least civilized of all the provinces of Turkey. Except at rare and short intervals, under honest and energetic Pashas, brigandage, with its cruel murders and atrocities, may be said to be an almost constant feature of the country; so much so, that the districts of Dibra, Jakova, Ipek have long been inaccessible, while the Mirdites, southeast of Scutari, retain even now a barbarous semi-independence, to guard which all strangers are jealously excluded. The soil is fertile, and in several districts is well cultivated; but much of it lies waste, partly from defective methods of agriculture, but also from the insecurity of life and property in consequence of the bands of robbers that so frequently infest the country and commit the most frightful excesses. It is difficult to form any reliable estimate of the population, but probably 2,000,000 may not be far from the truth.

There is no missionary station in Albania. The BFBH has colporteurs and book depots at various points, and the ABCFM has native workers who are Albanians teaching one or two schools in the borderland between Albania and Macedonia.

ALBANIAN LANGUAGE: As the term "barbarian" was applied by the Greeks to all who spoke a different language from their own, we know that the Pelasги in Greece itself, the Epirotes, and the Illyrians, with many of the Macedonians, spoke not Greek, but a different language, which there is every reason to believe is the same as the Albanian, now spoken by their descendants. The original and chiefancestors of the Albanian have been the subject of much discussion, some regarding it as belonging to the Indo-Germanic class, and others pronouncing it a Turanian language. In fact, like the Armenian, it partakes of the characteristic features of both these classes; but from its evident resemblance to its peculiar roots to the Greek, Latin, Sanskrit, Celtic, etc., it is classed by many scholars not as a derivative from any of these, but as a sister of equal antiquity. A great obstacle to the
critical study of Albanian is the absence of any literature except of comparatively recent origin. No Albanian alphabet exists. The Ghege, or northern group, has been written with Roman letters, while the southern or Tosk dialect has been written with Greek letters. A modification of the Roman alphabet will probably prevail as the one mode of writing Albanian.

Not a little care is needed to distinguish the original terms and forms of the language from the many words adopted later from the Greek, Latin, Slavic, Turkish, and other languages. The subject has engaged much attention, and we may notice as prominent in this department Dr. H. Hahn, who compiled an Albanian dictionary and grammar, with many characteristic specimens of the language, and Demetrio Camarda, who studied the language chiefly among the Albanian colonies of Calabria and Sicily, and has written largely on its structure and affinities. To promote these studies care has been taken to commit to writing such historical ballads as have been handed down to the present time, as well as other poems which have been preserved in various forms of writing. The publications also of the British and Foreign Bible Society and a few also by the Religious Tract Society, of London, have greatly aided these studies. Several grammars also have been published, among which we may mention that for the use of Greeks, by Mr. C. Christophorides, a native of Elbasan. It is worthy of note that the prelates of the Greek Church in Albania and the religious teachers of the Mohammedan body alike oppose with some violence every effort to transform the Albanian into a written language. The cause of this opposition seems to be the same in each case — the intolerant principle of independent growth in a subject people.

ALBANIANS: A people chiefly found in European Turkey, whose subordinate political existence, lack of literature, and tendency to wander abroad have arrested their national development and obscured their origin and racial affinities. Groups of Albanians are found in Sicily, Calabria, in Greece, and in some islands of the Greek Archipelago. Traces of the Albanian language or of a tongue closely allied to it are also found in Southern Italy. These and other considerations have led some to conclude that the existence of isolated groups of Albanians points to their being the remnants of a people originally inhabiting Greece and Southern Italy, and retaining to this day their distinct language and racial peculiarities.

According to this view the Albanians are of one stock with the ancient Pelaqoi. However this may be, they cling with an intense nationality to their language and their tribal organization and the wild diversities of physical surrounding which belong to Albania. Their strong clan feeling has prevented anything like cohesion to maintain a national unity. But their modern history offers instances of a temporary union of the clans to resist a common enemy. Such a general union took place in resisting the Bulgarian invasion of Albania in 517-559, and again under Prince George Castriot in resisting the Turkish invasion in 1443-78. The military ability shown by Albanians in these episodes of their history and in such a case as that of Ali Pasha of Australia is a quality by which the Turks still profit. The flower of the Turkish army is composed of Albanians; and of the great Albanians who have risen to distinction in the service of the Sultan, it is only necessary to recall the name of Mehmed Ali Pasha, the renovator of Egypt and founder of the present Turkish type, to see that Turkey does well to seek Albanians for positions requiring initiative and courage.

The Albanians are called "Arnaouts" by the Turks. They call themselves, however, "Skri­ters," the Eagle People, a name given them by the Greeks and others from the eagle emblem of their flag. They are divided into classes so sharply separated as to introduce dialects into the language. Their clan feeling the Turkish Government has used with skill to foment jealousies that shall prevent the Albanians from uniting to throw off the yoke.

Since the conquest of Albania by Turkey in 1478 the Albanians have been alternately harassed and tempted by appeals to their love for a military life, and about one-half of their number have become Mohammedans, still clinging to their own language, however, and not regarded as thoroughly orthodox in belief because still admitting the ties of race. Of the Albanians who have refused to accept Mohammedanism, those living in the southern part of Albania belong to the Greek Church, and those in the northern part, including the semi-independent Mirdites, are Roman Catholics. In each case the ineradicable love of the Albanians for their language has tended to keep the masses of the people in dense ignorance. The Roman Catholics and the Mohammedans, taught to read in Italian or Servian. The Greek Church follows its usual policy, insisting that schools and churches among its Albanian adherents shall use the Greek language. As to the Mohammedan Albanians, their schools are conducted in Turkish, and their religious connection, worship is an unintelligible pantomime, and education, an opportunity for culture in a foreign tongue from which a few may and do profit, but from which the masses derive little benefit because the women are wholly illiterate and the "bookless Albanian" is the sole language of the home-life.

ALBERNI: Town in Vancouver, B.C., British Columbia, station of the Canada Presbyterian Church, which has an industrial school there for the Indians.

ALBINA: A town on the Maroni river in Surin­nam; station of the Moravian Missions, opened in 1884 for East Indian coolies. It has 2 chapels and 2 village schools with about 40 professing Christians.

ALCHUKA-FU (A-sha-ho): Town of some importance on the Transsiberian Railway, in Manchuria; station of the U.S. One of the resident missionaries is a physician. There are about 60 professing Christians there. (Also written Aibut.)

ALEPPO: A city of Asiatic Turkey, on the borders of the Syrian-Ambani Desert, and capital of the province of the same name. The city is encompassed by low, barren hills and irregular mounds, intersected by fertile valleys. It is a city of thoroughly oriental type, with its minarets, mosques, bazaars, numerous mosques, and people remarkable for their elegant bearing. The streets are
unusually good for the East; and the stone houses are very well built. The city, being on the only safe route between Syria and Eastern Asia, is a center for the Damascus and Bagdad caravans. The inhabitants are noted for their shrewdness in trade. There has been a considerable European colony in Aleppo since the middle of the 16th century. It was the principal factory of the English Levant Company until Napoleon’s Mediterranean enterprises broke up their trade. The city has about 120,000 inhabitants, chiefly Malays and Kurds. There is also a strong Roman Catholic element in the population besides Greeks, Armenians and Jews. The ABCFM has occupied Aleppo as a station at various times but has abandoned it on finding no extensive response to effort. The PCE opened a station there in 1895 for work among the Jews. It has 2 missionaries and 4 native workers, with a primary school and a dispensary.

ALERT BAY: A settlement of the Kwagutl tribe on the northern coast of Vancouver Island; station of the CMS, with 2 missionaries and their wives, 2 unmarried women and 2 native workers. There is a school, an infant school and a primary school. The communicants number 22.

ALEUTIAN: This language is spoken by the people of the Aleutian Islands, and belongs to the Arctic Coast branch of the North American family. It has been written with Russian letters.

ALEXANDER, Bishop Michael Solomon: Born in Prussian Poland, 1799. He was brought up in the strictest principles of Rabbinical Judaism. When he was 16 he was a teacher of the Talmud and the German language. At the age of 21 he went to England, having not the slightest acquaintance with Christianity, not even knowing the existence of the New Testament. He settled in a country town as tutor in a Jewish family. Whilst there the sight of a handbill of the London Society for the Conversion of the Jews aroused his curiosity, and he obtained and read the New Testament. Shortly afterwards he accepted the post of Rabbi in Norwich and subsequently at Plymouth. There in the providence of God, he became acquainted with the Rev. B. B. Golding, curate of Stonehouse, to whom he gave lessons in Hebrew, and through whom, after much inward conflict, he came to the truth of Christianity. He used to steal silently down to Stonehouse Church on Sunday evenings, and, under the shadow of its walls, would stand riveted to the spot, while he listened to the songs of Christian praise, in which he dared not as yet take part. His congregation heard of his leanings towards Christianity, and he was suspended from his duties as Rabbi. Further trials awaited him, but the Lord strengthened his faith and on June 2, 1825, in St. Andrew’s Church, Plymouth, he was baptized in the presence of 1,000 people. His wife’s baptism followed six months later. In 1837, Mr. Alexander translated Legendre’s Geometry, and prepared a text-book on surveying and navigation for the Lihmain
luna Seminary. His efforts, in conjunction with Dr. Armstrong, to establish a boarding-school for the missionaries' children, resulted in the founding of the Ponahue School (chartered in 1855 as Oahu College). Failure of health requiring a change to a drier climate, Mr. Alexander left the Waialoi parish, and took charge of the seminary at Lahainaluna, on Maui, in 1843. This was a high-school established for the special purpose of educating teachers. Mr. Alexander's health having suffered from his sedentary employment, he was granted, in 1849, a year of respite from school-teaching. This year he spent in surveying land for the Hawaiian Government on East Maui. During this period the Hawaiian Government was changed from an absolute to a constitutional monarchy, and the poor serfs were granted their homesteads in fee simple. In this movement Mr. Alexander was greatly interested, and gave its leaders his earnest cooperation. Besides his labors in the Lahainaluna Seminary, he published a Pastor's Manual, common school and Sunday school books, two standard books on the Evidences of Christianity and A System of Theology. He died at Oakland, Cal., in 1884.

ALEXANDRETTE: A seaport in the province of Aleppo, Asiatic Turkey, at the extreme north of the Syrian coast. It is the chief port of entry for the trade of Mesopotamia. It is low, marshy, and unhealthy, and most of those who do business there reside in the city of Beylan, on the mountain, about 12 miles distant. It is also called Iskanderun.

ALEXANDRIA: A city of Egypt, on the shore of the Mediterranean. Founded by Alexander the Great, 332 B.C. During the Roman Empire it was the capital of the country and a large and important city. It was the seat of a patriarch, and an important center of learning in early Christian history. During the Middle Ages it declined greatly in importance, and at the time of the Mameluke rule (1300-1800 A.D.) the inhabitants were reduced to about 5,000. Under the Turkish rule, however, and especially during the Mohammed Ali (1811-1849) period, Alexandria grew rapidly, and now the population numbers about 320,000. Of these 250,000 are natives (chiefly Mohammedans), speaking the Arabic language. The remainder are from every country in Europe and almost of the world, so that it is even more of a Babel than is Constantinople. The presence of a large number of European residents there throughout the year has had a great influence in making the city one of the most attractive in appearance on the Mediterranean, with broad streets, fine buildings and pleasant drives. Beng on the sea, the heat is not as intense as at Cairo, and there have grown up a number of suburbs, among which Ramleh is one of the most popular.

The general character of the people is very low, the natives having acquired most of the vices of the Europeans. Some of these foreign residents, however, are men who take an interest in the public welfare, and are liberal in sustaining hospitals and other benevolent and philanthropic undertakings.

The Mohammedans have acquired a very bitter feeling toward the Christians and the Jews, and are ever ready to join in any demonstration or insurrection against them, if they have any reason to suppose that such a movement is agreeable to the rulers of the city. This feeling found expression in a massacre during Arabi Pasha's rebellion, when the city was bombarded by the British fleet, June 11, 1882, and occupied by British troops the next day.

Next to the Mohammedans the Syrian Catholics are quite strong. The Greek Church is wealthy and influential, but the Coptic community is small and feeble.

Mission work is carried on chiefly by the Missions of the United Presbyterian Church of the United States, who maintain 2 schools, one for boys and a very flourishing and efficient one for girls.

The Kaiserwerth Deaconesses also have a fine school here, opened in 1857. The Bible distribution is under the care of the BFBS. The Church of Scotland has a mission to the Jews in the city carried on by 10 missionaries, men and women, who have 4 schools. The North Africa Mission, the Egypt Mission Band, and the WMS also have stations in this city.

ALGERIA: A colony of France in North Africa, lying on the Mediterranean between Morocco on the west and Tunis on the east, indefinitely bounded on the south by the Sahara. It has an area of about 184,474 square miles, and a population of 4,739,931 (1901). Of this the French population numbers 292,464, the Jews 57,132, Tunisians and Moroccans 26,266, Spaniards 155,266, Italians 38,791, and about 25,000 other foreigners. The Algerian Sahara contains about 125,000 square miles and has about 50,000 inhabitants.

The native population is wholly Mohammedan, and consists mainly of Berbers (75 per cent.) and Arabs (15 per cent.). The Roman Catholic Church has 2 bishops and 386 priests. There are in the colony 21 Protestant pastors and 7 Jewish Rabbis. Government grants to the religious establishments are shared by the Protestants in proportion to their numbers. Orcan, Algiers and Constantine are the capitals, respectively, of the three districts of the same names into which the colony is divided.

Laws of the colony protecting Mohammedanism as the prevailing religion restrict Christian missionary effort in Algeria. The Protestant missionary societies laboring there are the French Society for the Evangelization of the Jews, the Penny Collection Fund for Israel, the Algiers Spanish Mission, Miss Trotter's Mission, the Swedish Missionary Society, the NAM and the PB. Four central towns are the field occupied by these Societies.

ALGIERI: Capital of the French colony of Algeria, North Africa. Population (1901), 96,542. French, 20,000, including Jews, 6,000, who own most of the land in the city, and native Arabs. The town is built in the form of an amphitheater, on an elevation of 500 feet, and, seen from a distance, presents a very imposing appearance, heightened by the dazzling whiteness of its houses, which rise in terraces on the side of the hill. The climate is so equable as to make it a health resort. It is a strong Roman Catholic center. It is the seat of an agency of the BFBS with a Bible depot, colporteurs and Bible women. The North Africa Mission also has a station there with 6 mission-
aries, men and women. Several societies especially devoted to Jewish work also have missionaries.

**ALIGARH:** City and railway station in the United Provinces, India, southeast of Delhi. Population of city and suburbs (1901), 70,434. The religions found here are Hinduism, Jainism, Mohammedianism. There are also a very few Christians. The climate is changeable and uncertain in temperature. There is a dispensary here. The general work is under charge of a married missionary and his wife, with 31 native workers, both men and women. There are 3 outstations, 10 village schools and about 100 communicants.

**AL-I-ILLAH:** A sect existing among the Mohammedans of Persia and Turkey. They are known under different names, as Dawudi, Abdolegi, etc. There is great resemblance between their religious beliefs and those of the Nusiriyyeh of Syria, if indeed the sects are not one and the same. They hold their real opinions in secret, while professing before Mohammedians to be Moslems, and in their presence conforming to all the rites of Islam. But to Christians they declare their hatred of the Mohammedan prophet and law, and do not hesitate to violate the Moslem ritual. Nevertheless, even to Christians they will not reveal their secret doctrines or practices with any particularity. They have no books. The Dawudi division profess to have great respect for the Psalms of David. Apparently this strange religion is but a heathenish conglomerate of Pagans, Mohammedians, Jewish, and Christian superstitions. Its adherents number many hundred thousands in Persia. It is understood that many of them are becoming Babis. Considerable attempts have been made to lead them to Christianity, but with little success. Their gross superstitions and ignorance, with their great fear of the Mohammedan rancor of bigotry, hold them fast in their present deplorable condition.

**ALIWAL NORTH:** Town and railway station on the Orange river in Cape Colony, South Africa; mission station of the Primitive Methodist Society, with 4 missionaries of both sexes and 5 native workers. It has an industrial school, 2 theological classes, 2 village schools, and about 1,200 professing Christians.

**ALLAHABAD:** Seat of the Lieutenant Governor of the United Provinces, British India; situated at the confluence of the Ganges, Jumna, and Saraswati rivers; the stronghold of Hinduism, which for centuries has fought successfully in this region against Mohammedianism. The population is (1901) 172,032, Hindus, Mohammedans and Christians, with many less important religious groups. It was the first point in India occupied by the CMS (in 1813). It is now a station of the CMS, the PN, the ME, the Zenana, Bible and Medical Mission, and the Woman's Union Foreign Missionary Society of America. The total force stationed at Allahabad consists of 37 missionaries and 109 native workers, men and women. The various enterprises which they carry on include a Divinity school, a training school for women, 4 high schools, 3 orphanages, 43 village schools, a dispensary and a hospital. The Bible Societies and the YMCA also make this a center for their work in the Province. The total of communicants connected with the various missions is about 550.

**ALLEN, David Oliver:** Born in Barre, Mass., September 14, 1799; graduated at Amherst College, 1825; graduated at Andover Theological Seminary, 1827; ordained and sent out as a missionary of the American Board for India, June 6, 1827. There he was connected with the mission press for many years. In 1847 an edition of the whole Bible in Marathi, translated by the members of the two missions, was revised by Mr. Allen, editorial superintendent of the American Mission Press, and member of the Committee of the Bombay Bible Society. Dr. Allen was a faithful worker and wise counselor. His services, especially in connection with the press and the translation of the Scriptures, were of great value to the missionary cause. Dr. Allen published a valuable work on Indica, Ancient and Modern, and was the author of several articles in periodicals. He resided at Lowell, Mass., from 1860 until his death, from congestion of the lungs, July 27, 1863.

**ALLEPPIE:** A seaport at the foot of the western Ghats, in Travancore, India. Population, 22,000. In 1816 the CMS founded a station there, principally for the purpose of redeeming the Syrian (Jacobite) community, which had been settled there since ancient times, but had utterly degenerated. In the beginning the undertaking seemed destined to succeed. The Syrians even allowed the missionaries to preach in their churches. But in 1836 a new bishop suddenly broke off all relations with the mission, and the missionaries addressed themselves to the heathen. The mission is now carried on by one missionary and his wife with 26 native workers, men and women. It has 8 schools and a special mission to lepers. The Mission to Lepers in India and the East also has a station and leper asylum here. A reform movement originating in the Jacobite Church now promises good results.

**ALGEMEINER EVANGELISCH-PROTESTANISCHER MISSIONSVEREIN.** See Germany, Missionary Societies of.

**ALLUR:** Town in the Nellore district, Madras, India. It was occupied as a station by the ABMU in 1873, and has a missionary and his wife and 10 native workers, men and women. It has 5 outstations, 2 preaching places and about 300 church members.

**ALMORA:** Capital of the Kumai district, United Provinces, India, situated among the Himalayas, 5,337 feet above the sea, near the frontier of Tibet. Climate temperate, making it a resort for invalids during the hot and rainy season. Population of city and suburbs (1901), 185,314, consisting of Hindus, Muslims, Europeans. Language, Hindi (Kumauni dialect). Mission station LMS (1850), with 10 missionaries and 48 native workers, men and women. It has 10 outstations, a college, a hospital, 6 dispensaries, a leper asylum, a high school and 18 common schools.

**ALVAY:** Village near Point Pedro on the N. side of the Jaffna pen. and of Ceylon; occupied as a mission station by the WMS in 1880. It now has 1 missionary and 23 native workers, men and women, with 6 outstations and 8 primary schools.
ALWAR: A city of 53,000 inhabitants in Rajputana, India, and capital of the native state of the same name. A station of the UFS was established here in 1880. It is occupied by a missionary and his wife and 28 native workers, with 6 common schools and 2 outstations. Also called Ullwar.

ALWAYE: Village in Cochin, S. India, S. E. of Trichur. It is a station of the CMS since 1881 and is occupied by a missionary and his wife, and 21 native workers. There are 3 outstations and 4 village schools.

AMALAPURAM: Town in the delta of the Godavari river, Madras, India, occupied by the Plymouth Brethren as a station with a missionary and his wife and 3 unmarried women.

AMALIENSTEIN: A village in Cape Colony, S. Africa. Mission station of the Berlin Missionary Society (1853). The mission premises were originally presented to the mission by a German lady enthusiastically interested in missions, and her name is perpetuated by the name of the station. The work is carried on by 4 missionaries and 23 native workers men and women. There is an outstation and there are more than 600 communicants, mostly Hottentots.

AMANZIMTO: Town in Natal, South Africa, S. W. from Durban; station of the ABCFM, which has founded there important educational institutions, including a girls' boarding school, an industrial school and a theological class. It is also called Adams.

AMARWARA: A village in the Chhindwara district in the Central Provinces, India. The Swedish National Missionary Society has a station there, opened in 1886, and now occupied by 4 missionaries and 4 native workers. There is a hospital there and 2 outstations.

AMASIA: A city of about 30,000 inhabitants in the province of Sivas, Asiatic Turkey. It was the birthplace of Strabo, and the capital of the last kings of Pontus, of whose tombs and defensive fortifications there are remains. It lies on the Yeshil Irmak River, about 60 miles from the Black Sea coast. It is an important trade center. There is a small German colony in the city and a Protestant Armenian community of some vigor connected with the ABCFM. The majority of the inhabitants are Mohammedans.

AMATOLE: A village S. of Stutterheim, Cape Colony, S. Africa, where there are 8 outstations and more than 400 church members under the care of native workers connected with the Wesleyan Missionary Society of South Africa.

AMBALA: City of (1901) 78,638 inhabitants on the Punjab Railway, and capital of the district of the same name in the Punjab, India. It is on the whole a healthy place of residence. The majority of the population are Mohammedans, but a little more than one-third of the inhabitants are Hindus. Both the Punjabi and Urdu languages are in use. The PN Society has a station there occupied by 7 missionaries and 19 native workers. There are a hospital and dispensary, special work for lepers, 2 high schools and 4 village schools. The WMS also has a station here under the care of a missionary and 2 native workers. Also written Umballa.

AMBALANGODA: Town on the S. W. coast of Ceylon; station of the WMS with 1 missionary and 15 native workers, men and women. There are 3 outstations, 2 preaching places, 5 common schools and 25 church members.

AMBARAWA: Town in the western part of Madagascar, near Antananarivo. Has a college founded in 1881 by the SPG and a community of nearly 700 Christians connected with that Society.

AMBATOMAKANGA: A district in the outskirts of Antananarivo, Madagascar; station of the LMS (1881) with 2 missionaries and their wives and 1 unmarried woman and 202 native workers; 1 high school and 48 village schools, and 3,116 church members.

AMBATOMANGA: A village S. E. of Antananarivo, Madagascar; station of the Paris Evangelical Society, with 1 missionary and his wife and 1 unmarried woman and 99 native workers, men and women. It has 40 outstations and 40 village schools, 1 high school, 1 industrial school, 1 dispensary and 900 church members.

AMBHOHIBELOMA: A town in the province of Imerina, west of Antananarivo, Madagascar; Mission station of the Paris Evangelical Society, transferred from the LMS after the French occupation of the island, it has 1 missionary, 5 native workers, men and women, 32 outstations, 25 village schools, 1 high school, a dispensary and about 200 communicant Christians.

AMBOHIDRAZIRIMO: A village in Madagascar, situated about 10 miles N. W. of Antananarivo, formerly capital of a petty kingdom. Station of the LMS (1901) formed by separating a portion of the Amparibe district, including 40 churches. It now has (1903) 1 missionary and his wife, 350 native workers, men and women, 58 day schools and 5,331 professed Christians, of whom 1,899 are church members.

AMBOHIMAHASOA: A town in the eastern part of Madagascar, north of Fianarantsoa; station of the LMS (1890), with a missionary and his wife and 119 native workers, 40 village schools, 1 dispensary and 1,200 church members.

AMBOHIMANDROSO: A town of south central Madagascar. The neighboring districts are thickly populated, the native population being Betsileo. The uneducated people are extremely dull, superstitious, and suspicious. Mission station of the LMS since 1875. There are 8 missionaries and 260 native workers, men and women. There is a dispensary, and a belt of 91 village schools in the surrounding region. The church members number about 1,000.

AMBOHIMANGA: A town N. of Antananarivo, Madagascar, station of the LMS (1862), with 2 missionaries and their wives and 242 native workers, 46 village schools and 2,063 church members. Station also of the SPG, with 1 native worker. Station also of the Norwegian Missionary Society; no statistics.

AMBOHIMADANA: A town in the western part of Madagascar; station of the Friends Foreign Mission Association, with 1 unmarried woman missionary and 187 native workers, men and women, 18 outstations, 1 dispensary, and 475 church members.
AMBONINA. See Molucca Islands.

AMBONIRIANA: A town in the central portion of Madagascar; station of the LMS transferred in 1898 to the Paris Evangel Society. It has 5 missionaries and 150 native workers operating in about 100 outstations, a dispensary, a Bible depot, 4 high schools, a training class for women workers, and 80 village schools. The number of professing Christians is 1,200.

AMBRYM. See New Hebrides.

AMBUR: Town of 10,000 inhabitants in the Eastern Ghats, not far from the border of British India; station of the mission of the German Evangelical Lutheran Synod of Missouri, Ohio, etc.; with a missionary and his wife and 2 native workers and 2 common schools.

AMESCHHOVE: A town in German Togoland, W. Africa; station of the North German Mission Society (1860), with 4 missionaries and 3 married women, and 25 native workers, men and women, 7 outstations, 11 village schools, 1 college and 353 communicants.

AMERICAN AND FOREIGN CHRISTIAN UNION: The Society was formed in the city of New York in the year 1849, for the uniting of all Christian denominations in the work of the world's evangelization. Its early labors were among the so-called alien populations of our own country, especially in the large cities. It also wrought vigorously in foreign lands, with main reference to giving God's Word and the preaching of the Gospel to those who were in the territories of Roman Catholicism, Italy, Bohemia, Austria, France, Spain, the countries of South America, the West Indies and Mexico were included in its wide field.

As the denominations became more numerous and strong, there arose the not unnatural tendency to conduct their missionary labors through their own denominational agencies. Hence the Society found its resources gradually lessened, and was compelled to limit the field of its work. At present it devotes its energies to the evangelization of France.

The Union owns the site and building of the American Church, 21 Rue de Berri, Paris. The maintenance of that most important church is included in the Union's care. It also cooperates with the French missionary societies. At the same time the Union is trustee of the funds raised in this country for the building of an American church in Berlin.

Headquarters: The Chelsea, 222 W. 23d St., New York.

AMERICAN BAPTIST MISSIONARY UNION: The constituency of this society is composed of the Baptist Churches of the Northern and Western States. The Lott Carey Convention (colored), and the German Baptist Churches of North America cooperate with it in several missions.

A. History: The Baptists in America entered heartily into the missionary movement at the beginning of the 19th century. As early as 1812 had afforded substantial assistance to the English Baptist Mission at Serampur, India. Many of the missionaries of that society had been obliged to go to India by way of America, because passage was denied them for the vessels of the East India Company. While their presence and addresses in the United States had aroused such much enthusiasm, no organization to promote foreign missions was formed until, in consequence of their careful study of the Bible on the passage to India, Mr. and Mrs. Adoniram Judson, and Luther Rice, of the newly organized ABCFM, became Baptists and were baptized at Calcutta. Mr. and Mrs. Judson remained to establish a mission wherever Providence might indicate, while Mr. Rice returned to America in the hope of inducing the Baptists there to aid in the enterprise. The first church, then, which was entered upon by the Baptist churches with enthusiasm. A meeting of delegates representing all sections of the country was called to meet at Philadelphia; and there, on May 18, 1814, was formed the "General Convention of the Baptist Denomination in the United States of America for Foreign Missions." This body was incorporated June 15, 1821, when the words "and other important objects relating to the Redeemer's Kingdom" were added to the title.

From its organization, in 1814, until 1845, this Triennial Convention was supported by the churches of the whole denomination in the Southern as well as the Northern States; but the period, 1840-45, had been one of great excitement and agitation on the subject of slavery, and in 1845, upon the appearance of divergences of view as to the eligibility of slaveholders to appointment as missionaries, the churches in all the Southern States withdrew from the Triennial Convention, and a separate association, with the title of the Southern Baptist Convention, was organized. This action necessitated a reorganization of the friends of missions in the Northern States, which was brought about at an extra session of the Triennial Convention, held in New York City in November, 1846, when a new constitution was adopted, and the new Convention went into operation in May, 1846, under the name of the American Baptist Missionary Union. The enthusiasm of both the November and May meetings was greatly increased by the presence of Dr. Judson, their visiting his native land for the first time since he left it, in 1813. Missions about to be abandoned were reinforced, upon Dr. Judson's earnest pleadings, and new work was entered upon. The debt of the Convention, amounting to $40,000, was paid, and contributions were largely increased.

B. Organization and Constitution: "The single object of the American Baptist Missionary Union is to diffuse the knowledge of Jesus Christ, by means of missions, throughout the world." The Union is composed of missionaries in service, life-members and honorary life-members. It meets annually the fourth Tuesday of May, when its officers—president, two vice-presidents, recording secretary, and the Board of Managers—are chosen by ballot. The Board of Managers is
composed of 75 elective members, of whom not more than three-fifths shall be ministers, and not less than one-fifth shall be women. Immediately after the annual meeting, the Board of Managers elects its officers and an executive committee of 15 (not more than 8 ministers), whose duties comprise the management of the entire missionary work of the Union, and the control of the finances at home and abroad. The latter are in accordance with the instructions and approval of the Board of Managers.

All the officers and members of the Board of Managers, the secretaries, and all missionaries employed by the Executive at the request of the Board, shall be members in good standing of regular Baptist churches.

C. Development of Work: 1. Asiatic Missions: Owing to the fact that, when Mr. and Mrs. Judson were compelled by the East India Company to leave Madras, the nearest vessel in which they could secure passage was bound for Rangoon, the missionary work of the Baptist Convention had its commencement in Burma rather than in India, as was the first intention. The mission that started for the Burmese in Rangoon, in 1813, was gradually extended, and it is now in addition to stations among the Burmese, the Sgaw-Karen, Pwo-Karen, Shan, Kachin, and Chin races. In 1831 the mission to Siam was commenced.

In 1835 the Board of Managers were authorized by the Triennial Convention to "establish new missions in every unoccupied field where there was a reasonable prospect of success." Accordingly, that same year the Telugu Mission of India was established, and the following year work was begun in Assam at the request of the English Commissioner in that country. The same year the Bangkok Mission in Siam was removed to Hongkong, the work being chiefly among the Chinese. In 1872 a mission was commenced in Japan, a mission having been previously begun in the Lu Chu Islands. In 1884 the Livingstone Mission in Africa was transferred to the Union, and in 1900 work was begun in the Philippine Islands. The Society also supports or aids Baptist work in France (1882), Germany, Austria and Bohemia (1834), Denmark (1891), Sweden (1855), Finland (1889), Spain (1870), Russia (1887), and Norway (1892).

The Woman's Baptist Foreign Missionary Society, Tremont Temple, Boston, Mass., was organized in 1871 as the result of appeals from the wife of a missionary in Burma for single women to work among the women of that country. In response, a general meeting for women to work among the women of that country. In response, a general meeting for women was convened in Boston, in April, 1871; a constitution was presented and endorsed by the two hundred women present; the object of the Society, as stated in the constitution, was "to furnish support, through the American Baptist Missionary Union, to Christian women employed by said Union as missionaries, native teachers or Bible women, together with the facilities needed for their work, with such Republican teachers as this Society," In December of the same year their first missionary was sent out, and at the end of the first year they had six missionaries in the field, while the home organization numbered 14 auxiliaries, and the receipts were $9,172.

The Home Department consists of a Board of Managers, meeting twice each month for an entire day to transact the business of the Society; this Board is divided into various committees which meet more frequently. State secretaries are appointed by the Board, and they in turn appoint Associate secretaries. The Home Department includes (1902) 1,523 circles with 37,946 members; 419 young ladies' circles with 8,591 members; 452 junior organizations with 12,705 members. Total receipts, $121,771.26. There are 78 missionaries on the foreign field, 453 schools with 16,090 pupils, and 134 Bible women.

The Woman's Baptist Foreign Missionary Society of the West was organized in 1871 on the general lines of the other Woman's Society, working through the A.B.U. The first missionary was sent to Burma in December, 1871, and the receipts for the first year were $4,245. Its Home Department (1902) reports 17,873 contributors in the senior circles; 62 young ladies' circles, and 154 junior organizations. Total receipts, $60,280. It now has 53 missionaries on the foreign field; 220 schools with 6,771 pupils; and 100 Bible women.

The Woman's Baptist Foreign Missionary Society of California was organized in 1875, in San Francisco, and the Woman's Baptist Foreign Missionary Society of Oregon was organized in 1882. In 1902 a joint committee of the Missionary Union and the Woman's Societies was appointed to consider the relation of the latter to the Union. This committee recommended that the Societies of California and Oregon be merged into the Society of the West. This was accordingly done in 1903.

D. The Fields: I. Burma (1813): On being driven from Bengal by the East India Company, Dr. and Mrs. Judson went to Madras intending to found a mission in the Penang Straits. Failing, however, to find a ship for Penang, they embarked for Burma, not wishing to wait at Madras lest the East India Company should compel their return to England. They landed in Rangoon July 13, 1813. In 1816 G. H. Hough and wife joined them, bringing a printing press given by the Serampur Mission. June 27, 1819, the first convert was baptized, and others soon following a church was formed. The Emperor of Burma having died, the brutal conquest of his successor by the East India Company in the War with England (1824-26). On the capture of Rangoon by the English in 1824 Mr. Judson and Dr. Price were arrested and imprisoned by the Burmans, their captivity culminating in the horrors of Oung-pen-la, from which they were released only in January, 1826, when the king needed Mr. Judson's services as interpreter in the negotiations for peace. The mission was reinforced after the restoration of peace, and supplied with a skilled printer and all appliances for issuing books and tracts. In 1838 Dr. and Mrs. Judson went to Madras intending to found a mission in the Penang Straits. Failing, however, to find a ship for Penang, they embarked for Burma, not wishing to wait at Madras lest the East India Company should compel their return to England. They landed in Rangoon July 13, 1813. In 1816 G. H. Hough and wife joined them, bringing a printing press given by the Serampur Mission. June 27, 1819, the first convert was baptized, and others soon following a church was formed. The Emperor of Burma having died, the brutal conquest of his successor by the East India Company in the War with England (1824-26). On the capture of Rangoon by the English in 1824 Mr. Judson and Dr. Price were arrested and imprisoned by the Burmans, their captivity culminating in the horrors of Oung-pen-la, from which they were released only in January, 1826, when the king needed Mr. Judson's services as interpreter in the negotiations for peace. The mission was reinforced after the restoration of peace, and supplied with a skilled printer and all appliances for issuing books and tracts. In 1838 Mr. Judson completed the translation of the Scriptures into the Burmese language, and it as well as the other issues of the Mission Press were eagerly received. The Religious Herald, which is still continued, was founded in 1844. After the death of Dr. Judson in 1852, the extension of the British possessions in Burma gave opportunity for the enlargement of the mission. The station at Rangoon was reoccupied at once, and there the missionaries found a small group of 16 church members who had survived the 16 years of persecution. The expansion of the missions in Burma assembled at Maulmain in 1853, which decided that Burma missions should be at once permanently estab-
lshed in Rangoon, Bassein, Henzada, Prome, Tavoy, Charsaw, and Shwegyin, who are very bigoted Buddhists, was established in 1860 by Dr. Bixby at Tavoy. Ten thousand Shans had settled in the district shortly before Dr. Bixby arrived there, they having fled from civil war in their own land. It being impossible to enter the Shan country, schools were established for them at Tavoy, where a small church was soon organized. In 1871 the Gospel of Matthew and a grammar of the Shan language were published. In 1872 a Karen journal, was commenced. The Karen Theological Seminary was instituted in Maulmiddles in 1846, and in 1848 the Karen pastors in the Bassein district assumed self-support. In 1850 a Home Missionary Society was formed, entirely under the direction of the Karens. The jubilee of the Karen Mission was celebrated at Bassein, in 1878, by the dedication of the Ko-thah-byu Memorial Hall, paid for by the Bassein Sgaw Karens, and set apart for the use of the Karens. Bases in gardens) and the hill men such as the Garos, Naga region; and 51 in elementary schools. The aggregate number of pupils in all these educational institutions is 19,430.

II. Assam (1836): Direct evangelistic work is done among the Assamese, Bengalis, Kols (imported from Nagpur to work in the tea-gardens) and the hill men such as the Garos, Nagas, Mikirs, etc. Rev. Nathan Brown and Rev. O. T. Cutter and their wives commenced the mission in Assam at Sadiya in 1836, being followed in 1837 by Rev. Miles Bronson, D.D., who was stationed at Jaipur. Both of these stations were given up later, in favor of Sibsagar and Nowgong. The Scriptures have been translated into Assamese and printed in Roman letters and schools have been opened. But the Assamese do not seem to have been deeply touched by the Gospel. The Assamese churches at these two stations number about 725 members, while the Garos and other hill men and the immigrants from Bengal are far more ready to receive Christianity with heart and soul. The first two Garo converts were baptized in 1863. They instantly began working among their own people, with such success that when Dr. Bronson visited the Garo country in 1867, a church of 40 members was formed at Rajasima. Since then the missions among Garos have been most successful.

There are (1903) in Assam 12 stations and 147 outstations; 173 American missionaries and 1,756 native workers, men and women; 741 churches with 41,770 communicants; 2 theological schools, 33 boarding and high schools, and 511 elementary schools. The aggregate number of pupils in all these educational institutions is 19,430.

III. India; Telugu Mission: The enterprise of the ABM in India began in 1828 with the work of Dr. Francis Mason at Tavoy, who was baptized by Dr. Francis Mason at Tavoy. After the deposition of King Thibaw and the annexation of Burma by the English in December, 1885, Sharland itself was open to the missionaries. A station was opened at Haipaw, in the Northern Shan states, in 1890; and at Mon, South of Mandalay, in 1892. In both stations medical work has an important part. The Chins are allied to the Karens and are nominally Buddhists. They are found on both sides of the Western Yoma range of mountains, stretching from Arakan to the Naga hills of Assam. Those to the south are divided into 4 tribes using different dialects; those of the north are less known. The first Chin convert was baptized by Dr. Francis Mason at Tavoy, in 1807. The Chin language was reduced to writing twenty years later by a Karen preacher from Bassein, who baptized 40 of these wild people. It was not until 1884 that an American missionary established himself in the Chin country. The Kachins, also allied to the Karens, are found in northeastern Burma, their country extending into China and Assam north to Tibet. They are a wild and savage people. Among these tribes work was opened by Rev. J. U. Cushing, in 1877. Several Karen teachers from Bassein were then sent into the Kachin mountain villages and since then Karens have been laboring among them, wholly supported by the Karens in Bassein. The first Kachin Church was formed in 1882 at Punwai. The Kachin language was reduced to writing by Rev. Ola Hansen, who also translated the Gospel of St. John, a catechism and some smaller works. Since then a system of applying the Roman letters to the Kachin language has been adopted by the missionaries and by the Government. In 1894 Rev. and Mrs. W. F. Armstrong were especially set apart among the half million Telugus and Tamils, who have migrated to Burma. They have a large and self supporting church at Rangoon. Other missionaries are doing more or less work among them. The ABM has in Burma (1905) 27 stations and 640 outstations; 173 American missionaries and 1,756 native workers, men and women; 741 churches with 41,770 communicants; 2 theological schools, 33 boarding and high schools, and 511 elementary schools. The aggregate number of pupils in all these educational institutions is 19,430.
erty, schools, and the little church of seven members, including the two Telugus, was left in the care of a Eurasian preacher, and the question of abandoning the Telugu Mission was seriously considered. Mr. Day, however, recovered his health and, with Rev. Lyman Jewett, returned in 1848. The next five years were full of struggle. In 1853 a deputation sent by the Society to examine the Asiatic Missions by the Rev. Mr. Norre, advised that the mission be either strongly reinforced or relinquished at once. The Board of Managers of the ABM U threw the responsibility on the denomination, as represented in the annual meeting, which decided to reinforce and continue the mission. Other difficulties having arisen, in 1862 the question of abandoning the mission was again raised. The missionary map, always in view at the annual meetings of the Union, had upon it a number of red marks to indicate the stations of the Board in India; and at one of the meetings, when the question of abandoning or reinforcing this mission was under discussion, it was spoken of as the "Lone Star Mission." Dr. S. F. Smith, author of "My Country, 'Tis of Thee," wrote that night a poem picturing in place of the one star, a glorious constellation in that region. The prophecy has been fulfilled.

In 1864 the working force was increased by Rev. J. E. Clough, the "Missionary for Onagol." The following year four Telugus were baptized and from that moment fruit from the long period of seed-sowing began to appear. At the end of another decade there were nearly 4,000 baptized converts in that mission field. Then came a time of trial; famine, flood, cholera, and another and a terrible famine. Sorely were the new converts tried, but neither their faith nor the faith of the missionaries failed. During the period of famine the missionaries deemed it wise to put off all baptisms until the work of distributing relief was over. Then between June 15 and September 17, 1878, 9,147 were baptized, 2,222 in one day. The work went on, and in December, 1890, another revival occurred, when 1,671 persons were baptized in one day and during the following five months nearly 10,000 were baptized at the various stations.

There are (1903) 25 stations, 55,985 pupils, and 388 outstations in the Baptist Telugu Mission, 90 American missionaries and 1,008 native workers; 116 churches with 54,995 communicants; 1 theological school with 149 students; and 549 other schools with 10,664 pupils.

The Central China Mission was commenced in 1893 at Han-yang-fu by Rev. and Mrs. J. S. Adams and Rev. and Mrs. W. F. Gray. In 1895 the First Baptist Church was organized. Medical work was begun in 1897 by Rev. G. A. Huntley, M. D., and each year has witnessed a steady growth. In 1992 a mission hall and dispensary were erected and the new Metropolitan Tabernacle of the Baptists in mid-China was erected and dedicated.

There are (1903) in the southern, eastern, western and central China Missions 15 stations and 202 outstations; 77 American missionaries and 232 native workers; 85 churches with 3,870 communicants; 2 theological schools with 49 students; 6 boarding and high schools with 313 students and 35 other schools with 544 pupils.

V. Missions in Japan: Jonathan Goble was sent to Japan by the American Baptist Free
Mission Society in 1860, where he labored for his own support in part until 1872, when the Free Mission Society in the same year joined with the ABM Society, which had been established in 1821. The joint work was directed by Mr. Gold's support and appointed Rev. Nathan Brown as their first missionary. To him the Japan mission largely owes its early development. The first Baptist Church in Japan was organized at Yokohama in 1873 with eight members, and the following year a station was opened in Tokyo. In 1878 Kobe was occupied, and Sendai in 1882. In 1886 a station was opened in Shimonomori, in Southern Japan, but the mission headquarters were later transferred to Chofu. In 1891 native helpers were sent from Kobe to work among the people of the Luoshu Islands, located in the city of Naha. Osaka was occupied in 1892, Mito in 1899 and Otaru in 1902. The progress in all these stations has from the first been steady and substantial.

There are (1902) 2 stations and 5 outstations; 58 American missionaries and 137 native workers; 30 churches, with 2,157 communicants; 1 theological school with 19 students; 5 boarding and high schools with 332 students; 6 other schools with 313 pupils.

VII. Philippine Islands Mission: The interest of the American Baptists centers in the Visayan group of islands. Rev. Eric Lund, for 20 years a missionary of the ABMU in Spain, was chosen to open the work. Early in 1900 Mr. Lund arrived in Ililo in the island of Panay, a station opened by Rev. Braulio Manikan, a young Visayan who had been sent from the Philippine Islands to Spain to be educated for the priesthood, but had been converted at Barcelona, in the mission under the care of Mr. Lund. By an interdenominational agreement the work in the north of Panay and the western provinces of Negros became the distinctive field of the Baptists, and Jaro, which is an important trade center, was chosen as the headquarters for the work. Reenforcements were sent out, and in June, 1901, a church of 42 members was organized at Jaro.

Tracts and leaflets were distributed by the thousand, a religious newspaper was founded, and the work continued with accelerating movement. In Negros, as in Panay, the work reached the central station into the country. Under Louis Philippe, the American society in the United States, their work to be supplemented, as in Asia, by native preachers; while the missions in Germany (1854), Sweden (1884), and in other Protestant countries were from the first prosecuted by native preachers, the Convention exercising only a general superintendence, and rendering counsel and financial aid when necessary.

The work of the ABMU in France dates from 1832, and was the result of the report of a committee sent by the Union to investigate the need for missions. Among the missionaries who went to Europe, a distinction was soon established between missions to lands where the Greek or Roman Catholic is the State Church, and those where Protestantism prevails. Thus, missions to France (1832), Greece (1836), and, later, Spain (1870), were conducted as foreign missions, and missionaries were sent to them from the United States, their work to be supplemented, as in Asia, by native preachers; while the missions in Germany (1854), Sweden (1884), and in other Protestant countries were from the first prosecuted by native preachers, the Convention exercising only a general superintendence, and rendering counsel and financial aid when necessary.

and 31 preachers, 30 churches, and 2,409 members are reported (1903).

The Baptist work in Germany was inaugurated by the baptism, in 1819, of families found without the Bible far exceeded

31

In 1870 the ABMU adopted a work commenced in Spain a few years earlier by Prof. W. J. Knapp, an independent missionary. The work has not progressed rapidly. There are 4 preachers, 4 churches, and 135 members.

Summary: The Society was organized in 1814 with two missionaries in the foreign field, and with the object of converting from heathenism in 1819, had, in 1840, 97 missionaries, 68 churches, 44 schools, and more than 2,900 baptized believers; and an income of $56,948.42. In 1870 the number of communicants had grown to 478 missionaries of the Union were laboring in 7 heathen countries and preaching the Gospel in more than 25 languages. The converts in heathen lands alone numbered 111,650, organized into 1,038 churches, of which 698 were entirely self-supporting. In heathen lands there were 1,473 schools of all grades with 37,356 pupils, 2 colleges and 7 theological and Bible schools for the training of a native ministry. The receipts from all sources (1902) reached $224,713.79 and the average annual income for the previous five years was $853,777.

AMERICAN BIBLE SOCIETY: Headquarters, Bible House, Astor Place, New York City, U.S.A.

Undenominational, representing all the evangelical communities of the United States. Combines both home and foreign work.

History. Prior to the Declaration of Independence, the American colonist of Great Britain had been dependent on the mother country for all their English Bibles. The hostilities which ensued cut off the supply of books printed in London, and a memorial was addressed to the Continental Congress urging that the government take the publication of an edition of the Scriptures. The committee to which the matter was referred, after consultation with printers in Philadelphia, reported that the cost of an edition of the Bible would exceed £10,000, and that neither the type nor the paper could be procured in this country, but recommended the purchase, at the expense of Congress, of 20,000 copies in Holland, Scotland, or elsewhere. During the next thirty years private enterprise did much to meet the immediate wants of the nation, but failed of course to reach the homes of indifference and poverty.

The British and Foreign Bible Society was organized in 1804 at London, and its first foreign edition of the Scriptures was The Gospel of John (2,000 copies), in Mohawk and English. This was followed by efforts to secure an organization in America which resulted in the formation of the Philadelphia Bible Society in 1809. Similar societies were also formed in Connecticut, Massachusetts, New Jersey and New York, all with the well-defined object of putting the Scriptures into every destitute family within the immediate circle of their direct influence, and through the thinly settled regions on the frontier.

Samuel J. Mills, one of the four who, at the haystack prayer-meeting at Williams College, gave the impulse that resulted in the formation of the ABCFM, after his graduation from Andover Seminary in 1812 made two tours of investigation, and his report that the number of families found without the Bible far exceeded all expectations raised a deep conviction that some more efficient means must be found for meeting the want.

Early in 1816 Elias Boudinot, President of the New Jersey Bible Society made a public communication in favor of a national Bible movement. The New York society was 272 members who followed this with formal action, resulting in the calling of a convention, which met May 8, 1815, in the consistory of the Reformed Dutch Church in Garden Street, and organized the American Bible Society. Thirty-five local organizations united in this action, and eighty-four became auxiliary to it during the first year of its existence.
In the earlier years the offices of the Society were in the lower part of New York, but the great increase of work necessitated better accommodations, and in 1853 it took possession of its present quarters. The outlay involved in this building was provided for by individual subscriptions made for the purpose and by rentals received after its completion, no funds raised for publication and distribution being invested in it.

**Constitution and Organization:** The American Bible Society is incorporated under the laws of the State of New York for the sole purpose of publishing and circulating the Holy Scriptures without note or comment. It is required by its by-laws to put the prices of all its publications as low as possible, and practically sells them at lower prices than would be charged if all the ordinary elements of cost were taken into account.

The business of the Society is conducted by a Board of Managers consisting of thirty-six laymen, residents of New York or its vicinity, one-fourth of whom go out of the State, and may be re-elected. Any minister of the Gospel who has been made a life-member by the contribution of thirty dollars is entitled to be present and vote at the monthly meetings of the Board, with all the power of an elected manager. The executive officers are three corresponding secretaries and a treasurer; district secretaries are appointed in the United States, while the foreign work is chiefly under the care of specially appointed agents. A large number of Auxiliary societies are in close relation with the National Society. These are expected to see that their own districts are well supplied through depositories, colporteurs, or voluntary agents, and to donate any surplus to the National Society for the general work. Until 1874 the Society had only two special agencies, in the Levant and La Plata. That number has been increased, until now it has its own representatives in Brazil, Central America, China, Cuba, Japan and Korea, La Plata, The Levant, Mexico, Philippines, Porto Rico, Siam and Venezuela. These agencies are, some of them, quite large, and have the charge of the translation and manufacture of Bibles, as well as of their distribution, chiefly through colporteurs. It also acts through the various missionary societies that naturally look to it as an American organization in their Bible work, or through other local Bible societies—e.g., the Bible Society of France. This action takes the form of grants of Scriptures when the versions used are published by the Society, and of sums of money for expense of colportage or printing or purchase of Scriptures not published by the Society. In the foreign field the aim is always to work in complete harmony with other organizations of whatever kind that have the same end in view. Whether at home or abroad, it is the conviction of the Society that the best results are reached by sale, the without profit, rather than by free distribution. This does not preclude special grants, but such are discouraged rather than encouraged.

**Versions and Translations of the Bible Circulated:** As early as 1818 plates of the New Testament in Spanish were procured for the Spanish-speaking nations of America, and at the same time provision was made for giving the printed Gospel to some tribes of North American Indians. Others followed, until the whole number comprises more than eighty languages and dialects. Many of these have been printed on the Society's own presses, or immediately at its own expense, while others have been printed or purchased by means of grants to missionary societies.

A large portion of these individual subscriptions have been prepared by missionaries, the expense of publication having been assumed by the Bible Society. Within the first seven years $37,000 was thus expended. The establishment of distinct foreign agencies has lessened the amounts paid directly to the Missionary Boards, but the Society always looks to the missionaries of every name for the hearty cooperation which it has received in the past, and to the Board for the principles upon which the American Bible Society was originally founded; ordinarily no translation is printed and published until a committee of missionaries or other persons skilled in the language have given it their approbation.

Among the more important versions are the Chinese (Mandarin, classical, and a number of colloquials); Japanese; Siamese; Korean; Mongolian; Armenian; Bulgarian; Turkish; Arabic; several of the dialects of the Pacific islands, and a number of Africa. Conspicuous among them all stands the Arabic version, prepared at the sole expense of the American Society, and which is recognized by scholars everywhere as one of the finest versions of the Bible in existence.

**Development of Foreign Work:** It was natural that the attention of the Society should be directed to the Spanish colonies of America. In 1818 plates of the New Testament in Spanish were procured, and a few years later a special report in regard to Mexico led to the sending of supplies of Scriptures to that country. South America also was visited about the same time by an exploring expedition sent out by the American Board, and in 1833 the Bible Society sent a special representative to report on the conditions along the west coast. No continuous work was done, however, beyond the making of grants to the missionary societies, until 1844, when a regular agent, Mr. Andrew W. Milne, was placed in charge of the La Plata field.

The development of missionary work in other parts of the world was not overlooked, and grants in aid of versions and for the distribution of Scriptures were made in many countries. In 1836 the Rev. Simeon H. Calhoun was appointed to represent the Society in Syria, but he served only a few years, and it was not until 1854, when the Rev. C. N. Righter was sent to Constantinople, that the Levant Agency was fairly inaugurated. In 1876 there was a new impulse given to the work by the sending of the Rev. Luther Halsey Gulick, M.D., to China and Japan, and it was rapid. Special agencies were established, and not long before Dr. Gulick realized that the field entrusted to him was too large for any one man, and he devoted himself to China, leaving Japan, with the subsequent addition of Korea, to form a separate agency. From that time the pace of this enterprise was rapid, with special agents appointed in 1878 for Mexico; 1882 for Cuba; 1888 for Venezuela; to which Colombia has been added, 1890 for Siam and Laos; 1892 for Central America. The opportunities opened up by the war with Spain were promptly met; both as regards the
needs of the army and of the newly acquired provinces; and special agents were commissioned to Porto Rico and the Philippines.

In this general development, as was inevitable, the Society's work has frequently come into close relations with that of the British and Foreign Bible Society. In some countries a division of territory; in others, a combination of forces; while in others the two great societies have worked side by side, each realizing that there was work enough for both.

Statement of Foreign Work: South America: The American Bible Society has three agencies in South America: the La Plata, Brazil, and Venezuela and Colombia. The La Plata agency covers all of South America not included in the other two, especially Argentina, Uruguay, Paraguay, Ecuador, Peru, Chile and Bolivia. The Rev. Andrew W. Milne is still in charge (1903) after nearly forty years of service, with his headquarters at Buenos Aires, Argentina. The language used is chiefly Spanish, though there are versions of portions of the Bible in some of the Indian dialects, notably the Quichua and Aimara. This Agency has had from its inception to contend not only with the bitter hostility of the Roman Catholic priesthood, but with the opposition of the new governments to every form of evangelical work, which, however, is changing to a more favorable attitude. The following summary by decades shows how vigorously the work has been prosecuted:

The Brazil Agency is distinct from the rest of South America on account of the use of the Portuguese language. The work of Bible distribution from the headquarters at Rio de Janeiro is rendered easier than in the La Plata agency by the railways recently built and by the river navigation; but the general conditions are much the same: hostility on the part of the ecclesiastics; and absolute indifference on the part of the people. Each year, however, shows advance, and the total (1902) of about 408,000 volumes.

The Agency for Venezuela and Colombia, which has its headquarters at Bucaramanga, Colombia, is probably the most difficult field occupied by the Society. The continued revolutions, with the consequent disturbance of economic and social conditions; the rigid censorship, making it impossible for the agent to report fully and freely, have (1902) hampered severely. Yet, even under such conditions, more than 90,000 Scriptures were circulated in thirteen years; and with the establishment of peace and the opening of the Panama canal, great advance, as well as of the ecclesiastics; and absolute indifference on the part of the people. Each year, however, shows advance, and the total (1902) of 330,772 volumes distributed since 1876 shows the seed sown.

The Agency for Venezuela and Colombia, which has its headquarters at Bucaramanga, Colombia, is probably the most difficult field occupied by the Society. The continued revolutions, with the consequent disturbance of economic and social conditions; the rigid censorship, making it impossible for the agent to report fully and freely, have (1902) hampered severely. Each year, however, shows advance, and the total (1902) of 330,772 volumes distributed since 1876 shows the seed sown.

Central America: This Agency covers all the States of Central America and has its headquarters at Guatemala City, Guatemala. The present agent (Rev. F. G. Penzotti) had a long and most trying experience in Bible work in South America, and the circulation of over 94,000 volumes in nine years, mostly in Spanish, is witness to his activity and success.

Mexico: From his headquarters at Mexico City, the agent of the Bible Society superintends the work both in Mexico and along the frontier in Texas. In no agency has there been more of individual labor, and special reference should be made to the work of Miss Melinda Rankin on the Texan border in 1852 and later. The circulation is chiefly in Spanish, and during the twenty-three years from the founding of the agency, numbered over 408,000 volumes.

Cuba and Porto Rico: The headquarters of these two agencies are at Havana and San Juan. The circulation in both is chiefly in Spanish and amounted in Cuba in nineteen years to 98,000 volumes, and in Porto Rico in three years to about 10,000, while in 1902, as many more were circulated.

The Levant: The prominent part taken by American missionary societies in the Levant has marked it from the first as a special field of the American Bible Society. The agency was at first somewhat undefined in extent, but included in general the entire Turkish Empire, in Europe, Asia, and Africa, with Greece and Persia, while a general superintendence of southern Russia and the Caucasus was ceded to the American Bible Society. At present the agency includes Bulgaria, European Turkey, Asia Minor, Mesopotamia, Syria, Egypt, and the Sudan. The agent's office is at the Bible House, Constantinople, and there are subagents at Beirut and Alexandria.

Few agencies reach so great a number of races and languages. The Scriptures are sold in Arabic, Turkish, (printed in three characters—Arabic, Armenian, and Greek), Armenian (Ancient, Ararat, and Modern), Greek (Ancient and Modern), Kurdish, Persian, Syriac (Ancient and Modern), Hebrew, Judeo-Spanish, Bulgarian, Slavic, Rumanian, Croatian, Russian, besides all the languages of Europe.

One characteristic feature of this agency is that the great majority of the Scriptures distributed in it are manufactured at the Bible House, Constantinople, and the Presbyterian Mission Press at Beirut. The work done at both places compares very favorably with the best work in the United States. Special versions have been prepared, some of them of the whole Bible, as the Arabic, Turkish, Armenian, Bulgarian; others of portions in special dialects. These have been printed in numerous editions to suit the taste of every class of men, from the Turkish or Christian ecclesiastic to the poorest day laborer. The total circulation of nearly 2,000,000 copies has been almost entirely by sale, the prices, however, being placed within the reach of the people, with comparatively little regard to the cost of the book. Thus a Bible in plain binding, which costs the Society $2 for printing and binding alone, is sold for 60 cents.

In Persia the British and Foreign Bible Society occupies the southern portion of the field, and the American Society's work in Northern Persia is conducted through the Presbyterian Mission Press at Tehran. The first regular agent of the American Bible Society to China was Rev. Luther H. Gulick, M.D., who was appointed in 1876. A son of a veteran missionary to the Hawaiian Islands, and himself connected with mission work.
work in Micronesia, and afterward in Italy and Spain, he proved admirably adapted to the work of organization that devolved upon him. Japan was also at first included with China under Dr. Gulick's care, but was, in 1881, made a distinct agency and Siam added, but was itself also made independent in 1889.

The flexibility that has marked the conduct of the Society's work is illustrated in China, where the entire agency is divided into six colporteur districts, each under the care of a foreign superintendent to whom the native colporteurs report, while the general agent has his headquarters at Shanghai.

As was natural, the first efforts of the agency were put forth in the line of Bible translation, and as fast as portions could be prepared they were offered for sale. The number of copies sent out from two of the three presses during the first year was 36,371, of which over 33,000 were portions. This number was nearly doubled the next year, and in 1901 the total circulation was 41,922, 26,076 copies of the Gospels, 12,941 Bibles, 33,534 Testaments and 384,252 portions; and this was a considerable falling off from the previous year owing to the Boxer outbreak.

The work of translation still continues, the different missionary societies uniting with the British and Foreign, Scotch National, and American Bible Societies to secure as great uniformity and accuracy as possible. The manufacture is carried on chiefly at Shanghai, but also at Fuchau and at Yokohama, in Japan. A conception of the work will be gained from the following table of publications in 1901:

An interesting and significant fact in Bible work in China was the interest taken in it by the young Emperor and the preparation and presentation to the Empress Dowager of a magnificent copy of the Scriptures in 1899.

Japan and Korea: On receiving information in 1872 that a Japanese version of some of the Gospels was nearly complete, the Society promptly made a grant to promote its publication. It subsequently assumed the support of Drs. S. R. Brown and D. C. Greene, and bore a considerable part of the expense of translating the New Testament, which appeared in parts and was completed in 1880. The next year Japan was made a separate agency, and the work was conducted until 1890, when the narrowness of the field and the peculiar intermingling of interests led to an arrangement between the American Bible Society, the British and Foreign Bible Society, and the National Bible Society of Scotland to act in union, apportioning the territory between them, and acting under a general Bible Society's Committee consisting of six missionaries appointed by the American Bible Society, four by the British and Foreign Bible Society and two by the National Bible Society of Scotland. The American Society is represented by an agent residing at Yokohama. The work done is indicated by the figures of circulation in 1901: 5,505 Bibles; 27,615 Testa.; 148,372 portions; total, 181,492. It is notable that nearly one-third of the Bibles and Testaments were in English. Of the total, about one-half was assigned to the American Society.

The work in Korea, under the general care of the agent at Yokohama, is as yet not fully organized. The work of translation is still going on and the distribution is for the most part under the care of the missionaries.

Siam and Laos: Bible work in Siam was for many years carried on by the missionaries of the PN under the general direction of Dr. Gulick; but as the work enlarged both in China and Siam, a division became necessary, especially as the advance included the Laos people on the north. The headquarters of the agent are at Bangkok, where most of the printing is done. From the organization in 1890 to 1902 the circulation was 282,264, the last year showing 37,216, an advance of 5,484 over the previous year. Of these, the great majority, 32,231, were Siamese, 3,615 Chinese, 942 Laos, the remainder Tamil, Cambodian, Malay and English.

Philippine Islands: This latest agency of the Society was established in 1899, and covers the entire archipelago. The agent's office is in Manila. The circulation for the first year was, naturally, small, but the second year rose to 52,798, and in 1902 to 91,260. The New Testament in Tagalog has been completed by the PN and distributed in the United States (including Porto Rico and Hawaii), and 1,258,909 copies in foreign lands. The total issues of the Society in 87 years amounted to 72,670,224 copies.

The Bible Society Record, as illustrated monthly, is the Society's official organ.

AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS

1. History: In 1806 Samuel J. Mills, with three other students of Williams College, fled for refuge from a thunder storm to the shelter of a hay-stack, and while waiting there pledged themselves to the work of foreign missions. Later they entered Andover Theological Seminary. In 1810 Samuel J. Mills, Gordon Hall, Adoniram Judson, Samuel Newell and Samuel Nott, students in the Seminary, conferred with the faculty, and a number of prominent ministers, in the home of Professor M. Stuart, and were counseled, "Go in the name of the Lord, and we will send you." The work of these ministers, Drs. S. Spring and S. Worcester, outlined a plan for organizing the American Board of Commissioners for Foreign Missions, which three days later, on the twenty-ninth of June, was adopted by the General Association of Congregational Churches of Massu-
The work thus being fairly inaugurated, the next step was to secure a charter from the Massachusetts Legislature. This met with some opposition, but at length on the 20th of June, the charter was granted, and the American Board anticipated the support of other than Congregational churches, but at its second meeting in 1811, a proposition was made to the General Assembly of the Presbyterian Church for the organization of a denominational society with which the Board might cooperate. The Assembly declined to do this, but recommended the Presbyterian churches to work through the American Board. Accordingly at the next meeting of the Board, in June, eight commissions were added to represent the Presbyterian Church.

In 1814 the number of Commissioners was increased by one number from the Associate Reformed Church, in 1816, by one from the Reformed (Dutch) Church, and later on from the Reformed German Church was added to the Board.

In 1825 a proposition was made by the United Foreign Missionary Society (Presbyterian), formed in 1817 for work among the Indians, to form a union of evangelical denominations. This was cordially endorsed by the General Assembly of the Presbyterian Church, and for twelve years the Board represented officially the Presbyterian Church. In 1837, on the separation between the Old and New Schools, the former withdrew from support of the Board, and every effort was made to arouse interest in the new enterprise. The following year (1811) Judson was sent to India, but the money for his support was not forthcoming, and he returned. In September of the same year Judson was selected as a promising field for the first enterprise of the Board. Owing to financial straits, it seemed unwise to attempt anything beyond what the actual cash on hand would warrant, and at a meeting of the Prudential Committee, January 27, 1812, there was at first but one vote—probably Dr. Worcester's—in favor of pledging the support of the men already appointed, but that one vote carried the day. It was decided to trust God, it was His work, and go forward, believing that the funds would be obtained. From this principle the Board has never departed.

By a special effort six thousand dollars was collected, and on February 6, 1812, Messrs. Judson, Hall, Newell, Nott, and L. Rice were ordained at Salem, Mass., and before the end of the month Messrs. Judson and Newell, with their wives, sailed from Salem, and Messrs. Hall, Rice and Nott, with Mrs. Nott, from Philadelphia, for Calcutta.

The work thus being fairly inaugurated, the next step was to secure a charter from the Massachusetts Legislature. This met with some opposition, but at length on the 20th of June, the charter was granted, and the American Board anticipated the support of other than Congregational churches, but at its second meeting in 1811, a proposition was made to the General Assembly of the Presbyterian Church for the organization of a denominational society with which the Board might cooperate. The Assembly declined to do this, but recommended the Presbyterian churches to work through the American Board. It was decided to trust God, it was His work, and go forward, believing that the funds would be obtained. From this principle the Board has never departed.

By a special effort six thousand dollars was collected, and on February 6, 1812, Messrs. Judson, Hall, Newell, Nott, and L. Rice were ordained at Salem, Mass., and before the end of the month Messrs. Judson and Newell, with their wives, sailed from Salem, and Messrs. Hall, Rice and Nott, with Mrs. Nott, from Philadelphia, for Calcutta.
During the first year the support of 7 missionaries and 11 Bible women was assumed. The field of work has been extended gradually until the support of all single and some married women, of girls' boarding and day schools, of primary schools in part, of kindergarten work and many Bible women laboring in the fields of the ABCFM is now provided by the Woman's Boards, which also sustain an extensive medical work. There are (1902) 34 branches with 1,136 senior and 579 junior auxiliaries and missionary circles, and 2,921 'candle rolls,' a total of 1,936 organizations, which hold, upon an average, as many as 12,000 meetings yearly. Christian Endeavor Societies, King's Daughters and Sunday Schools are affiliated. The Woman's Board of Missions now has 131 missionaries in 18 fields; 23 girls' boarding schools, 300 day schools, 200 Bible women. Its annual receipts are $139,607.22.

The Woman's Board of Missions of the Interior, also organized in 1868, and embracing the sixteen states of the interior and the Northwest, has its headquarters at 153 LaSalle Street, Chicago. It publishes a monthly magazine, Mission Studies, and provides a department in Life and Light for Woman. The whole number of societies contributing last year was 2,920, of which 1,154 were seniors, 102 young ladies, 542 Christian Endeavor societies, and 522 children's societies, including Junior Christian Endeavor, mission bands, Sunday-schools, and weekday schools.

It supports 72 missionaries, 70 native Bible workers, 136 native teachers, 2 colleges, 17 boarding schools, 2 training schools for Bible women, a kindergarten training school, and a large number of village and day schools; also evangelistic and medical work. Receipts, $80,820.01.

The Woman's Board of Missions of the Pacific was organized in 1873, and has five branches—Northern California, Southern California, Oregon, Washington, and Utah. It supports five missionaries, and helps in educational and medical work in India, China, and Japan. Receipts, $6,096.83.

II. Constitution and Organization: The ABCFM is a company incorporated under the laws of the State of Massachusetts, U. S. A., "for the purpose of propagating the Gospel in heathen lands by supporting missionaries and diffusing a knowledge of the Holy Scriptures." It is composed of corporate members, of whom one-third are by law laymen, one-third clergymen, and the remaining third may be chosen from either of these two classes. It is self-perpetuating, having full and sole power to fill all vacancies in its own body, elect officers, and to give final decision on all matters relating to the management of the mission under its charge. It has no ecclesiastical character or relations, nor any connection with any church or body of churches, and is legally amenable to no authority except that of the Legislature of the State of Massachusetts, and to that only if it violates the terms of its charter. There has been, however, of late years an increasing desire on the part of the Congregational churches for closer, if not organic relations with the Board, and this has been recognized and met by the Board itself. The number of corporate members was increased to 350, and again to 500.

Efforts have been made to secure uniform representation from the different parts of the country, based in general on the proportion of annual contributions from each section. Nominations to membership in the Board are made by the various State Conferences or Associations, the Board itself retaining the right of election. The regular meetings of the Board are held in different sections of the country, in the month of October of each year.

The actual business of the Board is entrusted to a Frudential Committee consisting of the President and Vice-president ex officio, and twelve members, six ministers and six laymen. The executive officers are three Secretaries, an Editorial Secretary, and a Treasurer. The offices occupied in the earlier years of the Board's history were generally small rooms in tenement houses, except in 1820-21, when they were in the basement of Lyman Beecher's Church in Hanover Street. For many years they were at 33 Pemberton Sq., the property of the Board. They are now in the Congregational House, 74 Beacon Street, Boston.

III. Development of Foreign Work: The two missionary parties that sailed for Calcutta in 1812 had Burma for their objective point, but the hostility of the East India Company and a change of views on baptism by Messrs. Judson and Rice resulted in the establishment of the Marathi Mission at Bombay in 1813. The next step, in 1816, to Ceylon, where Newell and his wife had visited, was a natural one. Meanwhile the interest grew, and mindful of the need of the heathen nearer home, the Board sent an exploring committee through Georgia and Alabama, whose report resulted in missions to the Cherokees, in 1817, and to the Choctaws, in 1818. In 1825 several missions started by the United Foreign Missionary Society were transferred to the Board, and in 1830-35 several other tribes were brought within the scope of their work.

Attention was then turned to the Levant. In 1819, Pliny Fisk and Levi Parsons landed at Malta, then removed to Smyrna, and from there visited Palestine, Alexandria, Syria and Cyprus. These visits and the translation of the Bible done at Malta and Smyrna laid the foundation for the missions to Syria, Egypt, Asia Minor, Persia, Greece and Bulgaria.

Simultaneously with the sailing of Fisk and Parsons for the Levant, Bingham and Thurston, with several associates, set sail for the Hawaiian Islands.

The ten years from 1819 to 1829 were chiefly spent in strengthening the work already commenced; but then again the impulse forward could not be resisted. Bridgman and Abel sailed for Canton and Eli Smith and Dwight conducted a grand exploring tour through Asiatic Turkey and Persia, which resulted in the commencement, in 1831, of the station at Constantinople, the general enlargement of work among the Armenians, the establishment of the Armenian church in Out Asia Minor, and the establishment, in 1834, of the mission to the Nestorians in Persia. The struggle of the Greeks for national existence had attracted the attention of the Christian world, and in 1831 Jonas King commenced a station at Athens. Abeel's journey from Canton to Singapore and Bangkok resulted in the formal opening of mission work in those places two and three years later. The slavery question and the efforts of the colonization societies had excited much interest in Africa, hardly
yet known even as the Dark Continent, and the
Gaboone mission on the West Coast was started
at Cape Palmas in 1834, and that to the Zulus
in South-eastern Africa in 1835, but it was not
until the bequest of A. O. A., amounting ulti-
mately to over a million dollars, that the ABCFM
felt able to undertake work in other parts of
Africa.

The early growth of the missions was rapid,
new fields ever opening before the Board. In
1834 work was begun in Madura, India; in 1836,
Eastern Turkey; in 1847, Central Turkey and
Persia; in 1851, Mexico. In 1880 it entered West
Central Africa; in 1882 Shan-si, China; in 1883
East Central Africa; and in 1902 the Philippine
Islands.

In 1857 the Amoy Mission in China and the
Amboyna mission in the Indian Archipelago, far
from the care of the Reformed Church in Amer-
ica, and in 1860 the Assyrian Mission was merged
in that.

In 1871 the Hawaiian Islands practi-
cally assumed self-support.

The first church was organized at Bombay in 1826
and the first pastor ordained in 1854. The mis-
sion has suffered from the famines 1876-8 and
1896-7 and from the bubonic plague.

The mission has (1902) 8 stations and 124 out-
stations; 42 American missionaries; 553 native
workers; 54 churches with 5,607 communicants;
268 Sabbath schools; 20 schools for higher educa-
tion; 136 common schools, and the aggregate of
those under Christian instruction is 11,039.

The Arcot Mission was commenced by
Mr. Poor. The most impor-
tant missionary was Mr. Tomlinson, but three
years later he was succeeded by Mr. Poor.

The work grew until, by 1842, 53,180,467 pages
had been printed, and the press was able not only
to

Seminary and Oodooville Female Boarding
School were established, and in 1872 Jaffna Col-
lege, which in 1895 organized the first college
Association in the mission field. The work in
Ceylon has been among the Tamils, and from the
first the spiritual development has been notice-
able.

There are now (1902) in this mission 6 sta-
tions and 31 outstations; 13 American mission-
aries; 412 native workers; 18 churches with
2,100 communicants; 5 schools for higher educa-
tion; 166 common schools, and the aggregate of
those under Christian instruction is 11,093.

Jaffna College with 108 pupils is independent of
the mission, but is in close relations with it. It is
affiliated to Ceylon University. The schools have
a native Evangelical Society for Home Mis-
sions, while a Students' Foreign Mission Society
and a Woman's Society each support a mis-
siary in Madura. The Christian Endeavor and
YMCA also do good work.

3. Madura: In 1834 the Ceylon Mission sent

Levi Spaulding to learn the condition of the
Tamilis of Southern India and the need for estab-
lishment of the American Board's Madura
Mission. The population of over 2,000,000 was
overwhelmingly Hindu and largely of the weaver
caste. The bitter hostility to the missionaries
as the "pariahs" of the white people was met by
the marked courtesy of the English, and largely
overcome by the vigorous educational policy
carried through by Mr. Poor. The most im-
portant educational institution, Pasumalai Col-
lege and Training Institute, was opened in 1842
at Tirumangalam, but three years later it was
removed to Pasumalai, near Madura City. It has
steadily increased in grade and expects to be affiliated to
Madras University. Medical work, industrial
training and publication of literature are carried on
effectively. The Madura Mission has (1902)
21 stations and 305 outstations; 38 American
missionaries; 645 native workers; 38 churches
with 5,036 communicants; 265 Sabbath schools
with 7,943 pupils; 16 schools for higher education;
192 other schools, and the aggregate under Chris-
tian instruction is 8,850. The Christian Endeavor
and YMCA are flourishing institutions. The mission has a printing house at
Pasumalai, from which two periodicals are issued.

4. Madras: In 1836 Messrs. Winslow and Scud-
der established at Madras a printing house for
works in the Tamil language. There was cordial
cooperation with the missionaries of the LMS and
the work grew until, by 1842, 53,180,467 pages
had been printed, and the press was able not only
to

The death of Dr. Scudder in 1855, the

In 1839, in connection with the
Madras Mission of the ABCFM, but in 1858 was
transferred to the care of the Reformed Church in
America.

6. Sumatra: Messrs. Munson and Lyman sailed
in 1833 to explore the East
Indian Archipelago; they reached Batavia in Septem-
ber.

Leaving their wives they proceeded to Tapan-
ul in Sumatra, and from there went to visit the
Battas of the Interior, arriving at the village of
Succa in June, 1834. A petty war was in prog-

and colleges, printing presses and Christian litera-
tion, a revival unexpectedly commenced in
native church was sending mis-
mission in cooperation with the Hawaiian Evangelical Association. They occupied two stations, Kusaie and Ponapi in the Caroline Group. For four years they had no certain communication with the outside world, depending on the none too frequent trading vessels for mail and supplies. In 1856 a missionary ship, the Morning Star, was built by the Board for work in these islands, and Mr. and Mrs. Hiram Bingham were sent to the Gilbert Island Mission, while Messrs. Pierse and Doane, with their wives, were stationed in the Marshall group. Languages were mastered and reduced to writing, simple books were laboriously prepared, schools were started and preaching services held, though the latter were difficult, and more was accomplished in the native schools and house to house visiting. For the work in these islands a “Missionary Navy” is essential. After the Spanish-American war in 1901, work was begun in the Ladrone Islands, with a station in Guam.

There are 4 stations and 63 outstations; 24 American and 1 Hawaiian missionaries; 149 native pastors and teachers; 57 churches, with 5,953 communicants; seven training schools, with 205 students; 85 native schools, with 3,297 pupils.

Owing to political and financial difficulties the transfer of this mission by the ABCFM to some English or German Society seems possible.

12. Palestine and Syria: Pliny Fisk and Levi Parsons, appointed missionaries to Jeru-
alem in 1819, landed at Smyrna, where Mr. Fisk stopped to study the language, while Mr. Parsons went on. A Greek revolt drove Mr. Fisk to Alexandria, and the coming of associates, followed by exploring journeys, resulted in the conviction that Syria offered the best location, and Beirut was selected, in 1824, as a missionary station. A printing establishment, part of whose equipment was afterward removed to Constantiopole and part to Beirut, was set up at Malta out of reach of the Turkish government. After Parsons’ return to Beirut, the station developed into persecution, and war and pestilence again and again broke up the work. The first native church was organized in 1848. In 1870 the Syrian Mission was transferred to the care of the Presbyterian Church in the U. S. A.

13. Asiatic Turkey: Mr. Parsons on his first visit to Jerusalem met some Armenian pilgrims who said they would rejoice if a mission could be sent to their people. An Armenian ecclesiastical visitor was the historian and translator a letter written by Jonas King on leaving Syria in 1827, and it produced a wonderful effect in Constantinopole. Two years later, Messrs. Eli Smith and H. G. O. Dwight made their long journey through Asiatic Turkey, the Caucasus and Northern Persia, which opened up the condition of the Oriental churches to the sending out of Christian workers face to face with the needs in that whole section. The result was the establishment of the station at Constantinopole in 1851 by Mr. Goddell (with Messrs. Dwight and Schaufler), who came north from Beirut, bringing with him some publications issued at Malta. The native pastors and teachers Brousa, Trebizond, and Erzerum were occupied as stations. For a decade the strength of mis-

ress and both fell victims to the rage of the com-
and the adjacent islands. From the nature of the
and from the objections of Dutch officials. The missionaries labored faithfully until 1848, when failure of health compelled those then in
charge to withdraw, and the failure to find
relics caused the mission to be discontinued.

10. Hawaiian Islands: In 1779 these islands were brought into notice through the murder of Capt. Cook, and again, in 1809, when Henry Obookiah came to New Haven with two other Hawaiian boys, who were converted in 1812. In 1819 Hiram Bingham, Asa Thuesen, and others were sent to Hawaii as missionaries of the ABCFM, arriving March 31, 1820. Their arrival was opportune. The people had revolted from the Portuguese Consul, but great hostility still remained for a time, devoting themselves largely to education and the preparation of literature, but with the entrance of other societies the work of the ABCFM was dropped in 1850.

8. Singapore: Work was begun in 1834 as a central point from which to reach southeastern Asia and the adjacent islands, but the decision of the Government of the Dutch East Indies to exclude all but missionaries sent from Holland defeated the plan, and the mission was closed in 1844.

9. Borneo: This mission, organized in 1836, was composed of members of the Reformed (Dutch) Church of America and derived its support through the American Board from that denomination. Efforts were directed specially to the Chinese and Dyaks. Many difficulties were encountered, both from the nature of the field and from the objections of Dutch officials. The missionaries labored faithfully until 1848, when failure of health compelled those then in
charge to withdraw, and the failure to find
relics caused the mission to be discontinued.

11. Micronesia: This name is applied to four groups of coral islands in the Pacific Ocean. In 1852 Messrs. Snow, Gulick and Sturges, with their wives and two Hawaiian helpers, were sent to these islands by the ABCFM in cooperation with the Hawaiian Evangelical Association.
sionary effort was given to consolidation, and then commenced a new era of extension until by 1863 the entire region of Asia Minor, Northern Syria and Mesopotamia was dotted with missionary establishments.

The great extent of territory covered, the poor means of intercommunication, and the variety of problems in different sections led to the division of the work into three missions, Western, Eastern and Central Turkey. Each is a separate unit for administrative purposes, yet there is a bond of union in the fact that Constantinople is the center for the publication work and the financial management, as well as the place to which go all the questions concerning the relations with the government. The work of the Western Turkey mission is chiefly among Armenians and Greeks; of the Eastern mission chiefly among Armenians, the one station, Mardin, reaches the Jacobites, the legacy of the old Assyria Mission; the Central is almost entirely among Armenians who have the peculiarities that their language is Turkish. The Western mission embraces also that portion of European Turkey where Armenians are principally found. There have been efforts to reach other classes. W. G. Schaufler was commissioned first to the Jews and afterward devoted himself specially to the Turks, but the great work of the ABCFM in Turkey has been among Armenians and Greeks.

Education has always held a prominent place. The American College for Girls at Constantinople, Euphrates College at Harput, Anatolia College at Marsovan and Central Turkey College at Antab, as well as the different theological schools and academies, are missionary institutions. There has been excellent literary work done in Bible translation, in general book publications and in the weekly and monthly periodicals. The missions suffered heavily during the massacres of 1894-95, but have to a considerable degree recovered themselves.

The missions of the ABCFM in Asiatic Turkey have 12 stations and 270 outstations; 145 missionaries; 817 native workers; 114 organized churches with 13,125 communicants; 132 high grade and 1,134 lower schools with a total of 60,964 under instruction.

14. Persia: One of the results of the tour of exploration made by Mr. Smith and Dwight was to attract attention to the Nestorians in northwestern Persia and in the mountains of the Turkish border. In 1833 Justin Perkins sailed for that work, and two years later he and Dr. Asahel Grant opened a station at Urmia. They received a warm welcome from the Patriarch, Mar Yohannan, and the work prospered, especially that for girls and women under the care of Fidelia FuKe. In 1870 this mission was transferred to the Presbyterian Church in the U.S.A.

15. European Turkey: Work was commenced among the Bulgarians at Adrianople in 1838, in connection with the Western Turkey mission, but as new stations were formed, the European Turkey Mission was organized; the literary work of this other mission being carried on at Constantinople, however, until after the establishment of the Principality of Bulgaria. Various political disturbances have hampered missionary operations, but have never stopped them.

This mission has (1902) 4 stations and 56 outstations; 23 missionaries; 55 native workers; 16 churches with 1,415 communicants; 3 higher grade and 19 other schools, with a total of 787 under instruction.

16. Greece: The great interest felt in America in the Greek struggle for independence turned attention of Christian benevolence to that country, and Jonas King was sent from Beirut to Athens to disburse the gifts for the sufferers. He remained there as a missionary of the American Board until his death in 1869. A few other missionaries were sent to Greece by the Board, but the work hardly seemed more important and promising, and with his death the mission was discontinued.

17. China, Canton (1830): Elijah C. Bridgman and David Abel, the latter under the American Seaman's Friend Society, sailed from New York October 14, 1829, and arrived in Canton, February 25, 1830. After two years study of the language Mr. Bridgman issued the first number of the Chinese Repository. In 1833 S. Wells Williams and Ira Tracy joined the mission; the next year by Dr. Peter Parker. Owing to the opium of 1840, the work was suspended till 1845, when it was resumed under many restrictions. In 1847 Mr. Bridgman was transferred to Shanghai. A civil war in 1854 and a war with England in 1856 again interrupted the work; the missionaries were expelled and their houses, printing establishment and books destroyed by fire. The treaty of 1858 with the foreign Powers guaranteed the toleration of Christianity in all parts of the Empire, and the work was again resumed and continued till 1860, when other societies coming in, and the working force becoming greatly depleted by death, the mission was discontinued.

18. Amoy (1842): Established by David Abel, who was joined in 1844 by two missionaries, members of the Reformed Church in America, which then cooperated with the American Board. In 1857 the work of Amoy was transferred by the ABCFM to the Board of Missions of that church.

19. Fuchau (1847): Established by Stephen Johnson and Lyman B. Peet, who was transferred from the mission in Siam. Reinforcements were sent out in 1848, 1850 and in 1853, when a small boarding school for boys and girls was opened. In 1863 the church was formed of 4 members. The New Testament was translated into the Fuchau dialect and the first edition published, in 1866, by the American Board and Methodist Episcopal Missions conjointly. Work on the Old Testament was begun, but not completed fully till 1888. The American Female College was dedicated in 1881. The first Christian Endeavor Society of the Mission, as well as of the country, was formed in 1885. In 1893 the female Woman's Missionary Society was formed. Evangelistic, Educational, Medical and Literary work are carried on, and the aim of the mission is self-support in all departments.

In the Fuchau Mission, there are 5 stations, 96 outstations, 38 American Missionaries with 210 native workers; 62 churches with 2,488 communicants; 26 Sunday schools; 20 colleges, 5 boarding schools, 90 common schools, 4 hospitals with 452 patients; 10 dispensaries with 30,857 outpatients; native workers contributed $4,844.59.

20. North China Mission (1860): Elijah C. Bridgman was transferred from Canton to
Shanghai in 1847, to assist in translating the Scriptures. In 1854 he was joined by Messrs. Atchison and Blodgett, thus forming the Shanghai Mission; in 1860 the Mission was transferred to Tientien, the key to the surrounding country, and the name was changed to the North China Mission. A year later the first convert was baptized. In 1864 the famous Bridgman School was opened. In 1869 the only printing press until then at the Mission was destroyed, and the printing work was resumed, with added opportunities for usefulness.

There are (1902) 2 stations, 4 American missionaries, 9 native workers, 2 churches with 134 communicants, 1 orphanage, 1 common school, with 28 pupils.

22. South China Mission (1883): Formerly known as the Hongkong Mission, established by C. R. Hager; the American Board occupies the field at the earnest solicitation of Christian Chinese of California, the greater number of whom came from the Province of Canton. The field of this mission is inhabited by 2,000,000 people. For the first few years the work of the Mission was considered tentative. During 8 years there was but one missionary in the field, but in spite of hindrance the work has been successful. A building answering for church, missionary residence, station head-quarters, etc., has been erected at a cost of $16,000, the larger part of this amount having been given by the natives. The people are as accessible as before the Boxer movement of 1900, but has since been resumed, with added opportunities for usefulness.

There are (1902) 7 stations, 50 outstations, 52 American missionaries and 56 native workers; 8 churches with 1,455 communicants; 1 theological seminary, 1 college, 8 boarding and high schools, 9 common schools; 3 hospitals, 3 dispensaries.

21. Shansi Mission (1882): Established at Tai-yuen-fu by Martin L. Stimson. Eleven millions of people inhabit Shan-si Province, of high natural ability but addicted to opium. Refugees have been established, and evangelistic and medical work is carried on. The first church was organized in 1888. The following year a boys' boarding school was opened. The work was interrupted by the Boxer movement of 1900, but has since been resumed, with added opportunities for usefulness.

There are (1902) 2 stations, 4 American missionaries, 9 native workers, 2 churches with 134 communicants, 1 orphanage, 1 common school, with 28 pupils.

23. Western Africa: In November, 1833, Rev. J. L. Wilson and Mr. S. R. Wyncoop embarked at Baltimore in a vessel sent out by the Maryland Colonization Society, and reached Cape Palmas early in the following year. Having determined to labor amid such adverse conditions, they returned to America. The mission was established in December, 1834, by Mr. Wilson and his wife, greatly to the joy of the natives. The negroes of the Guinea coast were found to be fearfully degraded. Schools were established, missions opened and new stations opened. In 1836 there were 100 pupils in the schools, many of them from the far interior; a printing press was set up; a church with 6 members organized. In 1837 the Board was compelled to lessen its expenditures. It was a serious blow to the mission. Printing ceased, 2 schools were closed, the boarding school reduced, the natives discouraged and confidence was impaired. Then followed the inimical French occupation, and the abominations connected with the relations of foreign traders with Africa. In 1843 the mission was removed to the Gaboon, on account of the attitude of the American Colony from Maryland.

24. The Gaboon Mission: Was organized at Cape Palmas in 1835. The new location brought the mission into contact with nobler races, the Mpongwe and Bakeles. Two dialects were reduced to writing, and many heard the Gospel gladly. Under great difficulties from the climate, the temper of the natives, and adverse foreign influences, it maintained itself and made a good record in school and church work during the thirty-five years of its connection with the Board. In 1870, this mission was transferred to the care of the Presbyterian Board.

25. Zulu Mission (1836): Established by Messrs. Lindsay, Venable, Wilson, Grout, Champion, and Dr. Adams. It was the first organized effort of any society in this region; the people were savage and their language unwritten and unknown. Dingaan, the chief of the Zulus, received the missionaries, and schools were opened and a printing press set up. Repeated conflicts between the Zulus and Dutch Boers hindered the work for the first years, and twice the missionaries were compelled to flee. The Board had decided to discontinue the attempt to labor amid such adverse conditions, when, in 1843, Natal became a British colony. From that time the work has gone steadily forward. The native population increased rapidly; Sabbath congregations and day schools became large and prosperous; churches were formed and schools established: government allotments of land for mission purposes and annual grants-in-aid for schools were secured. In 1846 the first convert, an old woman, was baptized. Her son afterward became pastor of the church of which she was the first member, and her grandson was the first Zulu to receive a full medical education. In 1870 began a decisive conflict between heathenism and Christianity, which resulted in a more intelligent and decided Christian living in the converts. In 1883 the translation and publication of the entire Scriptures was completed, and a hymn book has since been issued. The Umsumbe Home and Inanda Seminary are for the higher education of the girls, while the High and Normal School at Amatzelltote gives the boys a similar opportunity. In 1874 a hospital and dispensary were opened by Dr. Bridgman. A feature of the mission is the Zulu Home and Foreign Mission Society, which supports 5 evangelists. New opportunities have resulted since the close of the Boer War, and a larger field than ever was opened before a larger work is undertaken. There are (1902) 11 stations and 13 outstations; 31 American missionaries; 397 native workers;
23 churches; 3,555 communicants; 1 theological seminary; 3 schools for higher education with 389 students; 50 common schools with 2,500 pupils; 1 hospital and a dispensary.

27. West Central African Mission (1880): Established by Messrs. Bagster, Sanders and Miller, at Bailundu and Bihé. The Portuguese authorities at first treated the missionaries with civility and rendered them important service, and the natives heartily welcomed them; the traders were prejudiced against them, and succeeded, in 1884, by bribes and false reports, in causing their expulsion, but the governor was appealed to, and they were allowed to return. The first church was organized in 1887, with 64 students; 2 common schools with 14 pupils; 2 dispensaries.

28. Japan: About 1827, a company of Christian laymen of Boston and vicinity began to meet regularly to pray for the conversion of the world; their first contributions of $600 were devoted to Japan, which as yet had not been visited by Protestant missionaries. Forty years later, Dr. Neesima, a Japanese, then a student at Amherst, appealed to the American Board to send missionaries to Japan. At this time the original gift of $600 had increased to over $4,000, and it was decided by Mr. D. C. Greene and his wife to open the new work. They landed in Yokohama November 30, 1869. Work was begun that same year in Tokio, but after a careful inspection of the field the mission was removed to Kobe in March, 1870. In February, 1873, E. H. Richards, the former connection, appealed to the American Board to continue the work of exploration and reached the capital of Umzila's kingdom in October, 1881, when permission was given to open the new mission. In 1882 William C. Wilcox explored the region around Inhambarne Bay, and the following year he established the mission. In 1884 he was joined by Mr. and Mrs. Richards and Mr. and Mrs. Ousley, the latter being graduates of Fisk University, and of the schools of the American Missionary Association. In 1887 Miss Nancy Jones joined the Mission, the first single woman of African descent to be commissioned by the American Board. Four Zulu Christian workers were added to the force, and the work went quietly on. The Gospels and Acts were translated and published, and schools were established. The coast region proving unhealthful in 1893, the Mission was moved to Mt. Silinda, in Gazaland. Schools have been opened, including an industrial school, and evangelistic and medical work is carried on. In January, 1897, the first Church of Christ in Gazaland, was formed with 16 members, all on confession of faith. Title deeds to 27,000 acres of land have been secured, including the fine Silinda forest.

There are (1902) 3 stations, 6 outstations; 11 American missionaries; 11 native workers; 1 church with 41 communicants; 1 boarding school with 64 students; 2 common schools with 41 pupils; 2 dispensaries.
In 1833 an exploring expedition was sent out with a view to founding a mission on the western coast of Patagonia. The project was found impracticable and the missionaries returned.

30. Mexico (1872): The Mission to Mexico represents the only work the American Board is now conducting upon this continent. It is one of the Board's three missions in Papal Lands, the other two being in Spain and Austria. The object of these three missions in countries generally known as Roman Catholic is not to attack and disintegrate the dominant church, but to introduce the leaven of the simple Gospel of Christ, and to plant there gospel institutions which shall produce earnest, sincere Christian men and women. Work was begun in 1872 at Guadalajara by J. L. Stephens and D. F. Watkins, and the following year a church was organized with 17 members. In 1873 a work conducted by Miss Melinda Rankin at Monterey was transferred to the Board. In 1874 Mr. Stephens was killed while preaching at Ahualulco. The next years were full of trials and adversities. In 1877 the work at Monterey was transferred to the Presbyterian Board which was already working in that vicinity. Opposition on the part of the Roman Catholics, and a lack of harmony among the missionaries led the Board to reconstruct the mission on a new basis. In 1881 the missionary in charge was instructed to turn the work over to new missionaries on their arrival; instead, however, he transferred the mission to the Methodist Episcopal Church, South, when Messrs. Crawford, Howland, and Bissell arrived, in 1882, they began what was practically a new mission. Two churches were organized, one at Tlajamulco in 1883, and one at Guadalajara in 1884. The same year was commenced the publication of a weekly illustrated paper. In the meantime a new station was opened in 1882 at Chihuahua by Mr. and Mrs. J. D. Eaton. At this time Protestant Christianity was unknown in northwestern Mexico. In November, 1883, the first converts were baptized, and in 1886, six churches at Chihuahua was organized; the same year Hermosillo was occupied as a mission station. In 1890 the Rio Grande Congregational Training School was opened at Ciudad Juarez. In 1891 the various stations were united in one mission, having been given better facilities for communication by the building of railroads. There are (1902) 5 stations and 33 outstations; 5 American missionaries and 24 native workers; 8 churches with 354 communicants; 1 boardingschool with 34 pupils and 15 common schools with 772 pupils. The native contributions were $3,068.

31. Mission to Italy: On the withdrawal of the American and Foreign Christian Union, and at the earnest invitation of the Free Church of Italy, the Board commenced work in Italy in 1872. The purpose was to aid certain churches and evangelistic agencies founded by the Union. In 1874 it was decided to suspend operations in that field because of the limited means and the limited number of men that the Board found itself enabled to employ in nominally Christian lands, and the difficulty of finding a clear field for the Board's methods of labor on account of the presence of so many other evangelical agencies at work in Italy.

32. Mission to Spain: When in June, 1869, Spain adopted a constitution guaranteeing full religious liberty to natives and foreigners alike, various evangelical bodies took advantage of the situation to commence Gospel work in that land. In 1872 the American Board established a mission, with Barcelona and Santander as stations. Two sons of the Hawaiian missionary, Rev. Peter J. Gulick, with Rev. Gustavus Alexy and Miss Blake, were sent out to this mission. A school, previously opened by Mr. Lawrence, connected with the Broadway Tabernacle Church, New York City, was attached to the work in Spain. Aid was given to feeble evangelical churches, literature was distributed, and regular preaching services sustained. In 1873 Barcelona was abandoned, and the first church was dedicated at Santander in the same year. Political disturbances and the reactionary tendencies of a new government interfered with the work during the next few years. In 1875 Zaragoza was occupied and the following year a church was organized with 75 members from an old Protestant body and 12 new converts. A school for girls was established at Santander, which has since developed into the International Institute for Girls, located at San Sebastian. During the Spanish-American war it was removed temporarily to Biarritz, France, and it is now to be located in Madrid.

In 1882 the mission assumed care of the work carried on in the province of Tera by the Evangelical Society of Geneva, so that since 1883 the field of the Board has extended from Santander along the line of railway to the Mediterranean. A monthly Christian Endeavor paper is published, and two National Christian Endeavor Conventions have been held.

There are (1902) 1 station with 17 outstations; 5 American missionaries and 24 native workers; 8 churches with 354 communicants; 1 boarding school with 34 pupils and 15 common schools with 772 pupils. The native contributions were $3,068.

33. Mission to Austria: Established in 1872 by Messrs. H. A. Schaffner, E. A. Adams and A. W. Clark and their wives, in 1874 the mission moved to Vienna for a time seriously crippled the work. In no field has opposition been more persistent, the difficulties greater, or the faithful labors of the missionaries more abundant. The work among Bohemian immigrants in America has been greatly assisted by converts made in this mission. As important feature of the work has been the establishment of Christian Associations, both for young men and for young women. The only Rescue Home in all Bohemia and Austria is carried on by the mission.

There are now 1 station and 53 outstations; 4 American missionaries and 17 native workers; 13 churches with 1,297 communicants; 14 YMCA; 1 YWCA; 1 Rescue Home.

Besides the various missions above described the ABCFM carried on 15 missions among the North American Indians. Of this part of the work of the society the following presents a summary:

THE ENCYCLOPEDIA OF MISSIONS
1. Cherokee (1816-60): 112 missionaries, mostly lay and female; 12 churches, with 248 members in 1860; schools; printing, 14,084,100 pages; mission given up because of the Board's financial difficulties.

2. Choctaws (1818-59): 153 missionaries; 12 churches, with 1,362 members in 1859, when nation was declared a Christian people; schools; printing, 11,555,000 pages; mission given up because of complications arising from existence of slavery; in 1872 1 missionary resumed labor, and withdrew in 1876, leaving 4 churches under the native pastor.

3. Osages (1826-37): Commenced by United Foreign Missionary Society in 1820; transferred to the Board in 1826; 2 churches of 48 members; schools with 364 pupils; their country ceded to the Cherokees.

4. Maumee, or Ottawas (1826-35): Commenced by Western Missionary Society in 1822; transferred that same year to the United Foreign Missionary Society, and to the Board in 1826; 6 missionaries; church with 25 members; given up because of changes in the population.

5. Mackinaws (1826-36): Commenced by the United Foreign Missionary Society, 1823; transferred to the Board. 1826; 17 missionaries; a church with 32 members; given up for the same reason as No. 4.

6. Chickasaws (1827-35): Commenced by Synod of South Carolina and Georgia, 1821, and transferred to the Board in 1827; 10 missionaries; a church with 100 members; schools with 300 pupils; given up for the above-mentioned reason.

7. Stockbridge Indians (1828-48): 8 missionaries; a church of 51 members; given up as above.

8. Creeks (1832-37): 6 missionaries; 80 church members; given up because of peculiar embarrassments.

9. Pawnees (1834-44): 10 missionaries; given up because of the roving character of the Pawnees and the hostile incursions of other tribes.

10. Oregon Indians (1835-47): 13 missionaries; broken up by the massacre of 1847.

11. Senecas (New York State) (1826-70): Commenced by the New York Missionary Society, 1801; transferred to the United Foreign Missionary Society, 1821, and to the Board in 1826; 47 missionaries; from first to last, about 600 church members; transferred to Presbyterian Board, 1870.

12. Tuscaroras (New York State) (1826-60): Commenced as above; 10 missionaries; church members gathered, 200; given up because the Board's work was done.

13. Ojibways (1831-70): 28 missionaries; convicts not definitely known; transferred to Presbyterian Board in 1870.

14. Abenakis (1835-56): 1 Indian missionary; 75 members; given up because of increasing discouragement.

15. Sioux, or Dakotas (1835-83): 40 missionaries; in part transferred to the Presbyterian Board in 1870; transferred to the American Missionary Association in 1833.

A more complete statement it will be seen that two missions and a part of a third were transferred to the Presbyterian Board in 1870; one to the American Missionary Association in 1883; 5 were given up because of peculiar difficulties; 4, because of changes in the population; 1 because of massacre, and the remaining two because the tribes had become practically Christianized. The whole number of missionaries employed was 590; churches, 47; members, 3,800; Indians reached by these missions, about 100,000; 12 languages were reduced to writing, and besides the Scripture, 20 Christian literatures were published and many schools established and conducted during the continuance of the missions.

The periodical publications of the ABCFM are The Missionary Herald, Life and Light for Women (by the Woman's Board), The Mission Dauphin (for children) and Mission Studies. These are all monthly publications. An Almanac is also issued every year. History of the Missions of the ABCFM, Anderson (R.), 5 vols., Boston, 1870-74; The Hawaiian Islands. Anderson (R.), Boston, 1861: Memorial Volume of the First Fifty Years of the ABCFM, Anderson (R.), Boston, 1861.

AMERICAN CHURCH MISSIONARY SOCIETY.
See Protestant Episcopal Domestic and Foreign Missionary Society.

AMERICAN CHRISTIAN CONVENTION. See Christian Church.

AMERICAN FRIENDS' Board of Foreign Missions (1871): There are 14 yearly meeting Foreign Mission Boards and 10 women's organizations in the Society of Friends, each of which carries on a distinct foreign mission work. The other Yearly Meetings have not opened separate missions, thinking it wiser to strengthen the existing missions than to begin weak ones of their own. In most cases they have some definite work in the missions which they assist. In the Quinquennial Conference of 1892 provisions were made for the formation of a central bureau, as a medium of communication between the boards of other denominations and the Friends', and as a bureau of information. This was formally organized in 1894, under the name of "The American Friends' Board of Foreign Missions."

In 1900 it was incorporated under the laws of the State of Indiana, and made preparations to take up work in the foreign field, following the plan laid down in the Uniform Discipline in its further organization for this class of work. Its income is derived from appropriations of the yearly meetings and other Boards, and from donations, legacies, etc.

Upon the organization of the Five-Years' Meeting in 1901, this central body became one of its organizations. It is made up of representatives appointed from the various Yearly Meetings.

The American Friends' Foreign Missions include the work of the Central Board and the Yearly Meetings and are carried on in China, Japan, India, Syria, Africa, Mexico, Alaska, Cuba and the West Indies. The total receipts (1903) were $58,268.00.

Missions: 1. Mexico (1871): The first foreign missionary work of the Friends was begun by the Indiana Yearly Meeting, at Matamoros and Ciudad Victoria, in the State of Tamaulipas, Mexico, in 1871. Schools were begun, and in 1872 a mission press was established at Ciudad Victoria, which issues a religious monthly paper as well as books, tracts, etc., which have a wide circulation throughout the Spanish speaking world.

In 1873 a girl's school was established at Matamoros, later known as the Hussey Institute. The Penn Institute at Ciudad Victoria, a boarding and day school for girls, was established and supported by the New York Yearly Meeting, which also supports two foreign missionaries and three native teachers. In 1902 the Juarez Evan-
gelical Institute, a school of high grade, and a Bible Institute for young men was established at Ciudad Victoria. In 1888 the Western Yearly Meeting opened a station at Matehuala in the State of San Luis Potosi; a second station was established by them in 1892 at Catorce Real, where medical work was begun, and has proved of great value. In 1902 a fourth station was established at La Paz, besides educational and evangelistic work. A paper called "El Catolico Convertido" is published by the mission and circulates widely. There are (1903) 6 stations and 9 outstations; 16 American missionaries and 29 native workers; 11 churches, with 766 members; 3 boarding and high schools, with 133 pupils; 7 other schools, with 382 pupils.

2. West Indies (1883): The Iowa Yearly Meeting began work at Glen Haven, Jamaica, in 1888, among two distinct classes of people—the colored population born on the island and the coolies brought as laborers from the East Indies. These last are generally heathen. There is a well established training home for girls and another for boys, with a large attendance of day scholars. In 1886 another station was established at Sea Side and a third, in 1889, at Amity Hall. All these stations are in good condition and the prospects are encouraging.

There are (1903) 3 stations; 10 outstations; 9 American missionaries and 15 native workers; 3 churches, with 530 members; 2 boarding schools, with 34 students; 4 other schools, with 250 pupils.

3. Japan (1885): The Woman's Foreign Missionary Association of Friends of Philadelphia began work in Tokio, Japan, in 1885. The work is mainly evangelistic and educational. A girls' boarding school has been successfully opened. In 1899 a sub-station was opened at Mito by the Canada Yearly Meeting, Woman's Foreign Missionary Society, and outstations have been established.

At Tsuchiura a Meeting and First Day School are kept up by resident native Christians, with outstations from Japanese members of the Evangelistic Committee. At Ishioka, a Japanese evangelist has charge of the work. Since the disorganization of the Society of Friends in 1894, occasioned by Nationalist criticism of the Quakers during the whole Chinese war, the mission has not reorganized under the name of Friends, but the church work is carried on under the care of a committee of Japanese and missionaries who are Friends.

There are (1903) 2 stations and 2 outstations; 7 American missionaries; 22 native workers; 276 church members; 1 boarding school, with 23 pupils; 1 other school, with 140 pupils.

4. Alaska (1887): The Friends' Mission Board of the Kansas Yearly Meeting founded a mission at Douglas Island, Alaska, in 1887. Church services and First Day schools are held for both whites and natives, and a day school is taught during about seven months of the year. At the outstation of Takou preaching services are held and a school is carried on. A small steamers is used to follow the Indians to their outposts, but their absence from their homes a large part of the year greatly retards the work. The Kansas Board is investigating the question of getting the Indians settled in industrial colonies.

A second station was opened in 1894 on Raak Island, by the Foreign Mission Board of the Oregon Yearly Meeting, on the same general lines as the Mission at Douglas Island. Here too they are confronted with the problem of the long absence of the Indians from their homes; and a home school for the native children is contemplated. The Washington Mission Board of the California Yearly Meeting opened a mission near Kotzebue Sound, looking out toward the Polar Sea, among the dwindling race of Eskimos. The Alaskan is accessible, teachable and responsive, and the outlook is encouraging. There are (1903) 6 stations and 9 outstations; 9 American missionaries, and 15 trained Christian native helpers; 3 churches with 385 members; 3 day schools with 144 pupils.

5. Palestine (1888): This Mission was commenced in 1869 by Eli and Sybil Jones, and continued at their expense till 1874, when it became an independent mission under the name of the Friends' Syrian Mission (England). In 1888 the Ramallah station was transferred to the New England Yearly Meeting, which heretofore had contributed to the work through the English Friends. At the time of the transfer there was a school for boys, an outstation for girls, and a cottage hospital and dispensary. A Training Home for Girls has been established, and in 1902 a much needed Training Home for Boys was opened. Both boys and girls receive industrial training in addition to the school and Bible work. There are (1903) 1 station; 4 American missionaries and 31 native workers; 1 church with 36 members; 2 boarding schools, with 49 students; and 7 other schools, with 225 pupils.

6. China (1890): The Ohio Yearly Meeting Foreign Mission Board dates the founding of its China Mission 1890, tho its pioneer missionary, Esther Butler, had been in the country for three years, learning the language and preparing for the work in the mission of another denomination. A station was established at Nanking, where land was purchased and buildings erected. In 1892 a church was organized; in 1896 a girls' boarding school and a hospital were opened. In 1898 a second station was opened at Liu-ho-hsien, a few miles north of Nanking, where evangelistic, educational and medical work is being pressed forward. There are (1903) 2 stations, and 10 American missionaries; 2 churches; 1 boarding school with 27 students; 4 day schools.

7. India (1896): This Mission was established by the Ohio Yearly Meeting Foreign Mission Board at Nowgong, Central Provinces, in 1886. The work is conducted by four American women missionaries and is mainly evangelistic.

8. Cuba (1900): The American Friends Board of Foreign Missions began work in the northeastern part of Cuba in 1900, sending out four missionaries. A station was established at Jibara. A second station was established in 1902 at Holguin, and early in 1903 Banes, Tamano, and Puerto Padre were occupied. Church schools and colportage work are in successful operation. There are (1903) 5 stations and 2 outstations; 11 American missionaries; 1 native worker; and 1 school, with 20 pupils.

9. Africa Industrial Mission: A board was organized in 1902, composed of two members from each of ten American Yearly Meetings, and incorporated under the laws of the State.
of Ohio, as the Friends' Africa Industrial Mission. Three missionaries were sent out to begin the work and establish themselves among the Kavirondo people in British East Africa, near Kisumu. The location chosen was on the banks of a river, with waterfalls that can be utilized for power, and several springs of the best water for household purposes. The soil proved fertile and the prospects are most encouraging. There is one station and ten American missionaries.

**Woman's Foreign Missionary Union of Friends (1881):** The first foreign missionary organization of women among Friends was formed in 1881 as a Yearly Meeting Society. In 1890 the ten independent societies organized in the yearly meetings were united in the Woman's Foreign Missionary Union of Friends. It has four departments of work: Interest and Organization; Literature; Juvenile and Junior; Proportionate and Systematic Giving, having a general secretary for each department.

In 1903 there were ten yearly meeting organizations in the Union, the greater number working through the AFFM. The missions in China, India and San Luis Potosi in Mexico are entirely supported by three of the women's societies. In the foreign field, the work of the Woman's Foreign Missionary Union of Friends is carried on in Asia, Africa, and South America.
1883, conducts that part of the work of the Association, by direct appeals and through Women's State Missionary Unions.

A summary of the Society's work shows that in the southern States it has 79 schools with 480 teachers and 14,048 pupils, 290 churches, 129 ministers and missionaries, 17,311 Sunday school scholars; among the Indians 20 churches, 1,453 members, 2,661 Sunday school scholars, 6 schools, 342 pupils, 47 white and 41 Indian teachers and missionaries; among the Chinese 33 American and 11 Chinese teachers; in Porto Rico, 2 schools, 10 teachers, 343 pupils.

AMERICAN TRACT SOCIETY: This Society is undenominational, representing all the Evangelical communities of the U.S. It combines both home and foreign work, publishing Evangelical Christian literature in book and leaflet form in 155 languages or dialects. It has depositaries in principal cities, employs colporteurs, and makes grants to religious and benevolent institutions.

The possibilities of the printing press as an evangelistic agency were seen very soon after the invention of printing. At Basel, in Switzerland, there was virtually a Bible Society, a Colportage Association, and a Tract Society for France as early as 1524. The New Testament and, afterward, the Old Testament, in several portions, were very widely circulated. In many places, unreached by the reformers in person, the Reformation was inaugurated by the circulation of the writings of Luther and Melancthon. Indeed the press proved a most effective agency in scattering seeds of reform everywhere.

The influence of this idea was manifested in England by the organization of the Society for the Promotion of Christian Knowledge in 1698, followed after a century by the Religious Tract Society, in 1799, and the movement extended across the Atlantic. In 1812 "The New York Religious Tract Society" was formed, and in 1814 "The New England Tract Society," at Boston. In 1823 this latter society changed its name to the "American Tract Society," and in 1825 it became a branch of a national organization, which was then instituted, bearing the same name, and designed to constitute a great central society for the whole Union, inviting the cooperation of Christians of all denominations, and of other tract associations as auxiliaries, in publishing and circulating whatever would best "diffuse a knowledge of our Lord Jesus Christ as the Redeemer of sinners, and promote the interests of true godliness and sound morality," provided only that such publications should be "calculated to receive the approbation of all evangelical Christians."

Organization: The Society, consisting of persons who have become members and Directors by the payment of at least $30 at one time, elects a Board, consisting of President, Vice-President and 36 Managers. This Board appoints an Executive Committee of 18 Members which in turn appoints the Executive Officers, consisting of a Secretary, a Treasurer, 2 Assistant Treasurers, Publisher, and Auditor. The Board of Managers also has authority to appoint Members, Directors, Honorary Vice-Presidents and to fill vacancies. The Executive Committee is divided into three Sub-committees on Publishing, Distribution and Finance. The Publishing Committee is not permitted to contain two members from the same ecclesiastical connection, and no tract can be published to which any member of the Committee objects. The headquarters of the Society are in the Tract Society Building in New York City. There are also depositaries in Boston, Cincinnati, and Chicago, and District Secretaries at Boston, Rochester, Cincinnati, and Chicago, with Superintendents of Colportage at Rochester and St. Louis.

Two of the organizations that were, for practical purposes, united with the American Tract Society of New York, still maintain a separate corporate existence; the American Tract Society instituted in Boston, and the Western Tract Society, with headquarters at Cincinnati. The former withdrew from the New York Society during the anti-slavery discussion of 1857-60, but again united with it in 1897, so far as active work is concerned, the District Secretary for New England continues as its Secretary, and the General of the Boston depository as its Treasurer. In Cincinnati the Western Tract Society has a separate Secretary.

Development: For two years after the Society's organization, only tracts were issued. In the third year volumes appeared, the first being Dodridge's Rise and Progress, Saints' Rest, Baxter's Call, Pilgrim's Progress, etc. Systematic tract distribution in New York City and elsewhere began in the fourth year. In the sixth year printing was given a fair value of tracts in connection with faithful personal efforts to save souls, Harlan Page becoming eminent in this transcendent duty.

The volume enterprise was inaugurated in the eighth year by attempt to reach every family in the South Atlantic States with one or more volumes. The West was included the next year. The work was so enlarged that in the seventeenth year nearly 100 works had been published, the Evangelical Family Library issued, and some 2,000,000 volumes had been put into circulation, and 60,000,000 of tracts.

In 1841 the Society inaugurated its system of colportage, with special reference to the destitute, isolated settlements, unreached by the churches, and to the great numbers who refuse to enter the churches. The number of colporteurs increased rapidly until by 1860, over 800 were employed for the whole or a part of each year.

Another important feature in the publications of the Society has been its periodicals. The first to be established was The American Messenger, the official organ of the Society, founded in 1843. It is an illustrated religious monthly. There followed in 1847 the Amerikanischer Botschafter, similar in scope and purpose to the Messenger, designed for circulation among the German-speaking population; in 1852 The Child's Paper, now known as Good Cheer, an illustrated monthly paper for young folks; in 1871 a new German weekly, called the Deutscher Volksfreund, and the Illustrated Christian Weekly, which was afterwards divided into two branches. Two new periodicals were added in 1879; Morning Light, for the younger scholars in the Sunday school, and Apples of Gold for the youngest readers. Besides all these, there is Lights and Life, a monthly tract periodical.
consisting of a new eight-page tract each month. The foreign grants to receive these and the attention paid are remarkable, and many times thanks for this purpose, is 5,080, of which 1,018 are gelical Tract Society of Geneva, the Italian South Africa and India; of the ABMU in China, North China, and Chinese Tract Societies, of the RCA in Arabia and India, etc. or in part with funds of the Society appropriated for this purpose, is 5,080, of which 1,918 are volumes and 4,662 tracts.

The regular catalog of the society includes, aside from a large number of books, tracts, hand bills, maps, etc., in English, publications in over 20 foreign languages, including German, French, Spanish, Italian, Welsh, Dutch, Norwegian, Danish, Swedish, Hungarian, Finnish, Bohemian, Polish, German-Hebrew, Lithuanian, Croatian and Chinese. School paper, Apples of Gold, has been issued in Spanish, under the title of Manzanas de Oro; hymnals have been prepared and a general literature as complete as possible, to all of which has been accorded a most enthusiastic reception from the missionaries of various denominations as well as from the pastors, teachers, and others in Cuba, Porto Rico, Mexico, and South America.

The flood of immigration to America has furnished another field for the Society's work. The great mass of these immigrants land at New York City, and the Tract Society employs a colporteur, sometimes with one or more assistants, to meet, encourage and advise them and to supply them with leaflets, papers, etc., in their own languages. The readiness of immigrants, and the attention received from these and the comforts sent are remarkable, and many times thanks are returned to the Society by the new comers after they have reached their homes in various parts of the country. Special colportage work is also carried on among the Mormons, the negroes of the South, in the mining and lumber regions, and libraries are supplied to the army and navy and to merchant ships.

The foreign work of the Society is carried on through grants to the missions of the various denominations or to local Tract Societies. The general method is for a committee, representing the several mission Boards abroad, to request the issue of specific publications, original or translated. The American Tract Society then provides the needed funds or prints the tract or volume on its own presses. Frequently it appropriates a lump sum from year to year to be used by a committee or mission press, according to the principles and methods of the Society. Among the missions thus assisted during 1901-2 were those of the ABCFM in Austria, Turkey, South Africa and India; of the ABMU in Burma; of the SBC in China; of the Free Baptists India; of the PN in Africa, India, Persia, Syria and Siam; of the RCA in Arabia and India, etc. Among the Tract Societies aided were the Religious Tract Society of France, the Evangelical Tract Society of Geneva, the Italian Evangelical Publishing Society, the North India Christian Book and Tract Society, the Central China, North China, and Chinese Tract Societies, the Korean Religious Tract Society, the Japanese Book and Tract Society, etc.

The total number of publications issued from the home office during the seventy-eight years (to 1903), is 32,743,752; of tracts, 449,554,252; and of periodicals, 264,278,668; making a grand total of 746,576,872 copies of publications printed. During 1902 new publications issued at foreign mission stations, by the aid of funds furnished by the Society, were 38, of which 24 were volumes and 14 tracts. The whole number of publications issued up to 1903 at foreign mission stations was 1,918, with the approval of the Society's Publishing Committee, either wholly or in part with funds of the Society appropriated for this purpose, is 5,080, of which 1,918 are volumes and 4,662 tracts.

The foreign cash payments for publication (1902) were $4,928.08, making a total expenditure of $747,140.51. The total receipts (1902) were $383,983.06.

AMHARIC: This language belongs to the Semitic family of languages, is used in Abyssinia, and is related to the ancient Ethiopic or Galla. It is written with the Galla letters increased by some additional characters, and it has adopted words from the Galla and some other neighboring African tribes. The Amharic is modified into many dialects by the isolation of different sections of the country.

AMITY HALL: A town near the eastern extremity of Jamaica, W. I.; station of the American Friends' Foreign Missionary Society (1897) with 1 missionary and his wife, 1 unmarried woman missionary, and 4 native workers, men and women; 3 outstations, 4 Sunday schools, 2 young people's societies, 1 high school and 108 professing Christians.

AMKHUT: A village in the Malwa region, Central India; station of the FCC (1897), with a missionary physician and his wife and 1 native worker, an orphanage and a dispensary.

AMOY: A seaport on the southern coast of an island of the same name, belonging to the province of Fok-kien, China. It has an excellent harbor; the climate is cool in winter, warm in spring, and hot in summer; its inhabitants, in 1901, were 98,000.

Amoy was one of the earliest centers of European trade in China. The stream of emigration thence to Singapore, noticed by missionaries and by the chaplains of foreign seamen, at that point, led to the establishment of the first English and American missions at Amoy.

The RCA (commenced by ABCFM in 1842 and transferred in 1854) now has at Amoy 15 missionaries and 16 native workers, men and women, with 6 outstations. The PCE (opened 1850) has 11 missionaries, men and women, and the two societies together 11 preaching places, 5 village schools, 3 high schools, 1 theological class, 1 training class for women workers, 1 medical class, 1 dispensary, 1 printing house, 1 founding asylum, 1 orphanage, and 426 church members.

The LMS has at Amoy (founded 1844) 14 missionaries and 59 native workers, men and women, with 65 outstations, 46 village schools, 1 high school, 1 theological class, 1 training class for women workers, 1 medical class, 1 dispensary, 1 printing house, 1 founding asylum, 1 orphanage, and 426 church members.

The missionary operations at Amoy show a good example of comity between the three societies engaged.

AMPAMARINA: A town of Central Madagascar, near Antananarivo. Mission station of the LMS, opened in 1856, and carried on by a missionary and his wife, with 229 native workers. There are 26 village schools, and 2,622 communicants.

AMPARIBE: A town of Central Madagascar, a little northwest of Antananarivo. Mission
station of the LMS opened in 1861, and now carried on by one missionary and his wife with 425 native workers. There are 59 village schools and 3,645 communicants.

AMRAOTI: Chief town of a district of the same name in E. Berar, Central Provinces, India. Its population is about 33,000. It is a station of the CMS, founded in 1861, and now carried on by 14 missionaries, and 24 native workers, men and women, with 4 outstations, 1 village school, 1 high school, 1 hospital, 5 dispensaries, and 1 printing house. There are 165 communicants.

It is also a station of the CEZMS with 16 missionaries and 45 native workers, all women, with 13 village schools, 3 high schools, 1 industrial school, 1 training class for women workers, 1 hospital, 2 dispensaries, and 400 pupils in zananas.

The religious importance of the place gave a profound influence to the conversion here of one of the Sikh priests some years ago. A Mohammedan religious teacher converted here in 1866 became the Rev. Imad-ud-din, a Christian pastor of influence and preacher of great power.

AMRITsar: An important city and commercial center of the Punjab, India, and the chief seat of the Sikh worship. Population (1901), 162,429. It has a "pool of Immortality," on an island in which stands the chief temple of the Sikh religion. This holy place attracts to it great numbers of Pilgrims. It is a station of the CMS, founded in 1861, and now carried on by 14 missionaries, and 24 native workers, men and women, with 4 outstations, 1 village school, 1 high school, 1 hospital, 5 dispensaries, and 1 printing house. There are 165 communicants.

AMROSSA: A city of 35,000 inhabitants in the Rohilkhand division of the United Provinces, India. Occupied as an outstation by the ME with 13 native workers, men and women. It has 3 preaching places, 8 village schools, and the number of professing Christians is 570, chiefly Sikhs, but some of them converted Mohammedans.

AMSTERDAM FARM: A village in the Carolina district of the Transvaal Colony, S. Africa. Station of the SPG, with 2 missionaries.

AMURANG: A station of the Netherlands Missionary Society in the Minahassa peninsula of the island of Celebes.

ANAA: See Tuamotu Islands.

ANAKAPALLE: Town of 17,000 inhabitants (and railroad station), west of Vizagapatam, Madras, India; station of the BOQ (1898), with a missionary and his wife, 4 native workers, men and women, and 3 Sunday schools.

ANALAKELY: A town in the Imerina district of Madagascar; outstation of the LMS, founded in 1861; has 148 native workers, with 20 village schools, has 1,400 communicants.

ANAMBOE: A village near Cape Coast Castle in the Gold Coast Colony, W. Africa; station of the WMS, with 1 missionary and 46 native workers, men and women, 33 outstations, 4 village schools and 450 church members.

ANAMIC: A mongrel dialect of Cochin, China so far influenced by the Chinese as to have its nearest affinity with that language.

ANAND: A town in the Gujarat district, Bombay, India. A station of the PCI, opened in 1877. It is now occupied by 4 missionaries and 42 native workers, men and women, with 5 outstations, 15 village schools, a high school and an orphanage. There are 144 communicant Christians.

ANANDPUR: A town in the Punjab, British India; a station of the Basel Missionary Society, opened in 1856. There are now 3 missionaries and 4 native workers, men and women, with 109 communicants.

ANANTAPUR: A town in a district of the same name, Mahrora, India; station of the LMS (1890), with 1 missionary and his wife, 1 missionary woman, and 20 native workers, men and women, 12 outstations, 12 village schools, and 45 church members.

ANCESTOR-WORSHIP: The worship of deceased ancestors has been an important feature of the religious practise among widely separated peoples from remote ages. In modern times, it has chiefly attracted popular attention in China, but it exists in Africa (see Bantu Race); traces of it are found among the American Indians; it is discovered among the Hindus, who have in the book of Vishnu a ritual for its observance; it can be noted in Western Asia in a reverence toward the graves of sages and heroes, which leads Mohammedans and others to pray, with equal fervor at the tomb of Hannibal, or at the mausoleums of forgotten Christian saints, and it appears in the early religious observances of Egyptians, Greeks and Romans.

Its essential features are: (a) unshakable belief in the immortality of the soul (b) trust in the power of the dead to help or harm the living and (c) a sense of personal privilege through the power of the dead to help or harm the living and (c) a sense of personal privilege through the power of the dead to help or harm the living and (c) a sense of personal privilege through the power of the dead to help or harm the living and (c) a sense of personal privilege through the power of the dead to help or harm the living and (c) a sense of personal privilege through the power of the dead to help or harm the living.

The mind of the man who worships his progenitors is in an attitude resembling that of those who appeal for help to patron saints in some branches of the Christian Church.

In China Ancestor-worship is a part of the Confucian system, but is older by centuries than the time of Confucius, and its claims are more binding on a Chinese man than those of any other form of worship. He may sneer at Buddhism, ridicule the outrageous claims of the Taoist exorcists, and may even be brought to see that the teachings of Confucius himself are but moral aphorisms incapable of changing the life and bettering the future of his disciples, but he will not give up the worship of the ancestral tablet, and the paying of that honor and reverence to deceased parents which is the outcome of filial piety, the root of all Chinese institutions, the bulwark of her government, the strong chain which has bound the people together as a nation. The worship of ancestors is the real religion of China, and as long as the incense is smoking on the ancestral altar, so long will Christianity find itself a formidable foe, founded as it is on the best and most natural instincts of the human heart.

When a man dies one of his three souls is supposed to go into the grave with the body, one goes to Hades, and one goes into the tablet which is written the name of the person whom it represents. It is sawn through its thickness into two portions, and on the foot in height and a few inches in breadth, on the front of which is written the name of the person whose it is. This tablet itself is a small block of wood eight inches to a foot.
inner surface thus exposed the inscription of the name is repeated, and usually the date of birth and of death is added. This is prepared soon after death takes place, and the inscription of name is retained during one or two generations in the home of the family. Offerings are made 'o it from time to time. As the tablets of successive generations take their places in the home, those of earlier date are removed to join those of past generations. Thus, an ancestral temple of every clan and even section of a clan has its own ancestral temples, and few villages, however small, are without one at least.

On the new and full of every moon special offerings and worship are paid, and in the spring pilgrimages are made to the tomb, which is swept and its surface repaired. There is a strong interference in this worship; the head of the family is the high-priest, and as the older ones die the younger ones take their places in this as in all other family matters. Ancestor-worship binds family ties, it perpetuates mutual interest, and is the least objectionable and therefore the most dangerous form of pagan worship. While it is founded on high principles—the reverence and love of parents—it is, in fact, a duty rendered from motives of self-protection and self-interest, for if the tablet is not erected, if the worship be not paid, it is believed that the wandering spirit will wreak its wrath on the offending descendant. The fear of this wrath is more real, more vivid than the fear of any of the other gods.

Each succeeding generation in bequeathing property assigns a portion to be used for the permanent maintenance of offerings on behalf of the dead. The practice affects the laws of land tenure; it modifies the laws of inheritance, giving a larger share of the property to the eldest son, because responsibility for keeping up the worship rests upon him. It also makes the birth of numerous daughters a calamity, because sons only can assure maintenance of that worship which is supposed to benefit the departed soul.

Ancestor-worship has been of benefit to China in this respect: it has preserved the reverence of parental authority, which reaching upward has caused national respect for the head of the nation as the father of his people, and it has preserved the position of woman more on an equality with man, and has defined the position of the mother of the family as the wife. Only one 'illustrious consort' can be named on the tablet to father and mother, so there is but one wife, fah, in the family. Concubines there may be, but they are not admitted into the worship of the ancestral hall, and this fact has done much to preserve the legal, social and domestic position of woman. Moreover, the system not only forms a link between the living and the past generations of the clan, but it also unites all contemporary branches descended from a common stock. In fact it has been said that Ancestor-worship is the only point upon which all the Chinese unite.

This peculiarity of the effects of the worship of ancestors is seen wherever it is practiced. In ancient Greece and Rome, as among the wild tribes of Africa to-day, the tie of blood relationship to a common ancestor objecting to keep the clans or tribes together into a close corporation, admission to which was almost impossible. It also tended to cultivate an exclusiveness which regarded all who are not members of the clan as barbarians and to whom enmity is a duty. In Africa this natural enmity is sometimes set aside and a stranger is admitted to security by mingling his blood with that of a tribal chief. In this ceremony, intended to establish a sort of blood relationship between the foreigner and the savage tribe, there is ample reason for believing that its effect in requiring the foreigner to venerate the ancestors of the tribe is presupposed by those who accept him as a friend.

The barrier against Christianity formed by Ancestor-worship is solid and hard to pass. In China the people feel a shock of pain and revulsion on learning that Christians do not worship their deceased parents. When a Chinese becomes converted and abandons the practice he is regarded as having inflicted irreparable injury upon all of his ancestors. He has in fact reduced them all to beggary. The stigma resting upon Christians is the more inexpressible and painful to endure at the spring 'feast of All-souls', every person in the Chinese Empire except the Evangelical Christians takes part in the worship of the dead.

Under these circumstances many wise men have advised against a too rigid rejection of Ancestor-worship, which may after all be nearly akin to filial respect. But the attitude of Christianity to this form of worship can easily be determined when its true character is understood. Dr. E. Faber succinctly stated its position when the question was discussed in the Missionary Conference of 1890. In brief, 'Ancestor worship presupposes disembodied souls to be subject to the same wants as living bodies; it demands real sacrifices to them; it makes the happiness of the living depend upon appeasing the desires of the dead; it is not merely commemorative, but it is a pretended intercourse with the world of spirits; it has developed an extreme view of paternal authority, placing it above the authority of God, and crushes individual liberty and it chains millions of people to the past and prevents sound progress.'

Gibson (J. C.), Mission Problems in S. China, New York, Revell, 1890; Yates (M. T.), Ancestor Worship, Shanghai, 1897; Maine (H.), Early Law and Custom; Seebohm (H. E.), Structure of Greek Tribal Society, London; Religious System of the Amazulu; Ancestor Worship, Callaway (H.), London, 1870.

AN-CHIA-CHWANG: A town in the province of Shan-tung, China; station of the ME, with 6 native workers, 2 mission schools, 2 outstations and 200 church members.

ANDAMAN ISLANDS: A long narrow group of small islands in the eastern part of the Bay of Bengal. Area, 2,000 square miles. They include the North, Middle, South and Little Andaman islands, with a number of islets, and all are densely wooded. They are used as a penal colony. The climate is very unhealthy. The population in 1901 was 17,500 of whom 11,465 were convicts and 1,882 native aborigines.

The natives are a diminutive and barbarous people, who seem to be distinct from all other known races in physical features, language, and customs.

The people of these islands are averse to intercourse with strangers. Their religion is little known but seems to consist of worship of good and evil deities.

Missionary effort has been mainly directed toward the convicts at Port Blair.

ANDOHALO: District E. of Antananarivo, Madagascar; station of the Paris Evangelical Society, with 1 missionary, 45 native workers, men and women, 16 outstations, 16 Sunday schools and 640 communicants.

ANDEVORANTO: A village of 2,000 inhabitants on the eastern coast of Madagascar, and...
The population of Angola is affected by the northward movement of Boers; also by immigration from Brazil, and by the intermingling of Portuguese with the natives. But north of Mossamedes acclimatization for Europeans is a difficult and dangerous process. There are about 6,000 of European descent in Angola.

Preto is the name given to the negroes who have been brought into direct contact with European civilization, and who are found chiefly in the coast towns and their vicinity, and on the lines of travel and trade. Among them are found many well-informed people, merchants, and colonial officials.

The tribes south of Benguela are supposed to belong to the primitive race, Bushmen or Hottentots, and partake of their general characteristics.

The Ganguelas occupy the Upper Kubango basin. A great variety of social condition is found in studying the different tribes. They are represented as savage, but intelligent and enterprising. In some tribes trial by ordeal of the poisoned cup is practised. Their handiwork is wonderful, surpassing that of most African peoples; their dress is scanty.

On the Congo is found the Bafyote or Bacongo group. They were the founders of the ancient kingdom of Congo. That kingdom still exists, though the weak, as most the tribes have seceded. Roman Catholic influence was once apparently strong, but evidently superficial. Fetishism is rampant, nearly every natural object being a fetish. The Bamba magicians have wonderful skill in feats of jugglery.

The principal centers of trade and general influence are San Salvador, capital of the old Congo kingdom, and the center of a flourishing Baptist mission; Ambriz; S. Paolo de Loanda, the capital and largest city for 3,000 miles on the west African seaboard; Dona, at the head of navigation of the Quanza; Pamba, in the Ambaca district, terminus of the railway from Loando; and Bibé, the terminus of the southern trade route, 300 miles long, starting from Benguela.

Bié is properly the name of the extremely fertile plateau about 5,000 feet above the sea level occupied by rude and wholly uncivilized but shrewd people of mixed origin. It is the headquarters of a mission of the ABCFM. On the coast are Benguela, charmingly situated and Mossamedes, a well-sheltered port. Travel has been facilitated in recent years by the opening of new railroads. About 225 miles of railroad have been built, and other railways are projected, connecting the principal towns of the territory. There are also about 800 miles of telegraph in operation.

Apart from Roman Catholic missions under Portuguese protection, the missionary societies established in Angola are the RMS, ME, ABCFM, PB, and the PCMS. The BPBS also has an agency in Angola. The whole number of stations occupied by these societies is 14.

ANGOLA: A city of 36,000 inhabitants; capital of the province of the same name in Asiatic Turkey. It is a place of considerable commercial importance, and is visited at times under the name of Anasyra of Galatia. The majority of the population are Mohammedans. It is a strong center of the Armenian Catholics. There are also Armenians, a few Greeks, and some Protestants. At Istanos, a
village a few miles from Angora, there is a Protestant church of influence and activity which affects all the region.

**ANGRA PEQUEÑA:** A town on a bay of the same name on the coast of German Southwest Africa. It is the seaport of Great Namaqualand, where the Rhenish Missionary Society has several stations and a colony of Europeans is slowly growing.

**ANG-TAU:** A village in the Fo-kien province, China, S. W. of Fuchau; station of the ME with 17 native workers, men and women, 4 outstations, 7 Sunday schools, 5 young people's societies, 5 common schools and 400 church members. Also written Tang-tau.

**ANGULANA:** A town S. of Colombo on the W. Coast of Ceylon; station of the WMS, with one missionary and 16 native workers, men and women, 3 outstations, 4 Sunday schools, 5 village schools and 65 church members.

**ANHALT-SCHMIDT:** A town in Cape Colony, South Africa, Mission station of the Berlin Evangelical Missionary Association; 1890, 2 missionaries, 12 native workers, men and women, 2 outstations, and 500 communicants.

**ANIA:** A small island in the southernmost group of the New Hebrides. Population, 192, all Christians.

**ANTWAN:** This language belongs to the Melanesian family and is used by less than a thousand persons inhabiting Aniw Island. It has been written for missionary purposes with Roman letters.

**ANKLESWAR:** A town of 11,000 inhabitants near Bouch on the Narbada River, Bombay, India; station of the German Baptist Brethren Mission, with a missionary and his wife, an orphanage, and 25 church members.

**AN-KO-CHUANG:** A town in the Chi-li province of China; station of the ME, with 6 native workers, men and women, 1 high school, 1 village school, and 185 church members.

**ANO:** A dialect of the Ewe language, q. v.

**ANNAM:** A kingdom under the protectorate of France, occupying the most eastern portion of the Indo-Chinese peninsula, east of Siam and southeast of Burma. Area, 30,000 square miles. Surface, irregular and mountainous. Rivers numerous, and, albeit too shallow for navigation, most useful for irrigation. The country produces an abundance of rice, sugar, spices, and tropical fruits. The Annamese are somewhat akin to the Chinese in language and in many of their important customs, but they also partake largely of the Malay characteristics, and evidently form a link between the Mongolian and Malay races. They are generally quiet and inoffensive, indolent and fond of gayety. It is the seaport of Great Namaqualand.

**ANNFIELD:** A village in the Dehra Dun district, United Provinces, India; station of the CMS (1859), with 3 missionaries and 7 native workers, men and women, a village school and 206 communicants.

**ANOSIBE:** District S. E. of Antananarivo, Madagascar; station of the Paris Evangelical Society (1889), with 1 missionary, 2 unmarried missionary women, 62 native workers, men and women, 30 outstations, 30 village schools, 1 high school, 1 industrial school, and 25 communicants.

**ANTANANARIVO:** Capital of Madagascar. Climate, temperate. Elevation, 4,500 feet. Population (1901), about 50,000; of Hova, Malagasy, Polynesian and Micronesian stock, each class speaking a separate language. Religion, fetishism; belief in charms and ordeals. Social condition, comparatively civilized. Occupations, metal and straw work, spinning, weaving, etc., in all of which skill is shown.

Station of the LMS and of the Paris Evangelical Society, to which the LMS transferred the most of its work after the French occupation of the island in 1896. Together the Societies have 29 missionaries and 24 native workers, men and women, 9 high schools, 1 college, and a printing house. There are 30,000 church members in the district.

In the 17th century, when Annam was most prosperous, the Jesuits (among them the celebrated Jesuit missionary, Alexander von Rhodes, who came there in 1615) introduced Christianity, and in spite of much persecution propagated it with such energy that at the close of the 18th century French priests had converted the emperor and established a hierarchy of great influence. Later, however, these doctrines were rejected by the emperors, and the priests and converts persecuted. One emperor, Tu-Due, was especially opposed to Christianity, and the murder of several missionaries, between 1854 and 1858, served as pretext for the acquirement of a French colony in the East. In 1858 a French fleet was sent by Napoleon III., which succeeded in capturing several important towns, and, although the Annamese made stout resistance, the French succeeded in dictating terms of peace by which they became possessors of three provinces. These remain in their possession under the name of Indo-China, the only important French colony in the East. By this treaty Christianity was permitted throughout Annam. An insurrection occurred in 1862, which was quelled by the French.

There are no Protestant missions in Annam, the only missionaries being of the Roman Catholic Church. In the entire kingdom of Annam, with a population numbering (1901) 6,124,000, there are 420,000 Catholics, under the care of 125 European and 264 native priests, in 7 apostolic vicariates.

**TONKIN:** A town on the Ho-chi-minh River, Tonkin, or France in the Far East, area, 30,000 square miles. The language spoken in Tonquin was opened, and Christianity was permitted throughout Annam. An insurrection occurred in 1862, which was quelled by the French. There is a Protestant mission in Annam, the only missionaries being of the Roman Catholic Church.
Also station of the Friends Foreign Mission Society, with 6 missionaries and 31 native workers, men and women. It has 2 high schools, a printing house and a dispensary, and 300 professing Christians.

Also station of the SPG with 6 missionaries and 9 native workers, men and women, and 733 communicants.

The Norwegian Missionary Society also has a station here (since 1869), with a hospital.

**ANTIGUA:** An island in the British Colony of the Leeward Islands, W. I. Its population is about 36,000, chiefly negroes who are Christians. The Moravians have seven mission stations in the island.

**ANTIOCH:** A city of 17,500 inhabitants, in the province of Aleppo, Asiatic Turkey. It is situated on the Orontes River, about 20 miles from the Mediterranean Sea. The largest part of the population is Mohammedan. Greeks, Armenians, Roman Catholics, and a few Protestants make up the Christian part of the population. Altho the place has lost the importance of Apostolic days, it is still the seat of a Greek Patriarchate.

The population of the Reformed Presbyterian Churches of Ireland and Scotland, with 3 missionaries and 7 native workers, men and women, a dispensary, 2 village schools and 50 church members.

**ANTIOKA:** Station of the Swiss Romande Missionary Society, situated on the Komati River, N. of Lourenço Marques, Portuguese East Africa. It is occupied by 2 missionaries and their wives, 1 unmarried missionary woman, and 2 native workers: 2 preaching places, 2 village schools, a book depot, and 30 communicants.

**ANTOFAGASTA:** A seaport in Chile, S. America, the terminus of a railway across the Andes into Bolivia. Population about 8,000; station of the ME, with 2 missionaries, 2 Sunday schools, and 80 church members.

**ANTSIRABE:** A district near Betio, Madagascar; station of the Norwegian Missionary Society, with 2 missionaries, and a hospital.

**ANUM:** A town of the Volta, Gold Coast, W. Africa; station of the Castle, Gold Coast Colony, W. Africa; station of the Church of Sweden Mission, with 1 missionary and 2 native workers, men and women. Connected with it are 6 outstations, 4 preaching places and 4 village schools.

**APPENDICETO: A town on the Ganges in the province of Bareilly, United Provinces, India, S. W. of Bareilly; station of the ME with 8 native workers, 4 outstations, 4 common schools and 434 church members.

**APPELSBOOSCH:** Village in Natal, South Africa; station of the Church of Sweden Mission, with 6 missionaries and 6 native workers, men and women. Connected with it are 6 outstations, 4 preaching places and 4 village schools.

**APPELSBOOSCH:** Village in Natal, South Africa; station of the Church of Sweden Mission, with 6 missionaries and 6 native workers, men and women. Connected with it are 6 outstations, 4 preaching places and 4 village schools.

**APPENZELLER, Rev. Henry G.:** Born at Sounderston, Pa., February 6, 1838. Died June 11, 1902. Graduated from Franklin and Marshall College, Lancaster, Pa., in 1858; attended Drew Theological Seminary two years; appointed by Bishop Fowler, in 1888, as one of the first Methodist missionaries to Korea, arriving at Chemulpo with his wife on April 5, 1888.

During seven years he was one of the most faithful and efficient missionaries of the Methodist Episcopal Church and held, with honor, a number of responsible positions. He was president of the Pai Chai College at Seoul, principal of the Theological Department and pastor of three churches. As one of the translators of the Scriptures into the Korean language he made a permanent contribution to the cause of missions, and his linguistic services were highly esteemed by his associates of other denominations. The name of Pai Chai Hak Tang was given to the college by the King of Korea, who paid for the tuition of a number of pupils, and who showed the highest regard for the principal. On July 24, 1887, Mr. Appenzeller had the joy of hearing the testimony of the first convert in the mission; and on Christmas day of that year he preached his first sermon in the Korean language, his text being: "Thou shalt call His name Jesus, for He shall save His people from their sins." In April and May, 1887, Dr. Appenzeller journeyed nearly 200 miles to Pyeng-yang, it being the first missionary journey taken in that direction, and during the following year he went to Wi-ju, the gateway to China, receiving eleven men into the Church on profession of their faith in Christ. In his explor-
Christianity, the religion of the Roman Empire, he
steamer was run into by another steamer near
sail for Mokpo to attend a session of the Board
of Bible Translators, which had been called to
meet there. During the night of that day the
steamer was run into by another steamer near
Guelin Island, and with fourteen Koreans, three
Japanese and eight of the crew, this devoted mis­sionary lost his life.

APSTOLIC AND EARLY CHRISTIAN MISSIONS: If the first three centuries of its life, the
Christian Church was distinctively a missionary
church. Its chief purpose was the spread of
Christianity. It fought heresy bitterly, but for
the great mass of the people, creeds were a sec­ondary consideration. Preaching the Gospel took
always the first place.

From the paucity of record, apart from the
Book of Acts, and some references in the epistles,
some have supposed that aside from Paul, Peter
and John, and their immediate associates, there
were little interest either in the Apostolic com­pany or the great mass of believers, in the carry­ing of the Gospel message to remote sections.
That this is incorrect, is manifest from the ad­vance actually made (see Geography of Missions).
It is impossible that a new faith should so rapidly
have spread over so wide a territory and
against such fearful odds, in comparatively so
short a time without great effort. At the middle
of the 2d century Justin Martyr wrote: "There
is no people, Greek or barbarian or of any other
race, by whatsoever appellation or manners they
may be distinguished, however ignorant of arts or
agriculture, whether they dwell in tents or wan­der about in covered wagons, among whom
prayers and thanksgiving are not offered, in
the name of the crucified Jesus, to the Father and
Creator of all things."

Fifty years later Tertullian in his address to the
heathen said: "We are but of yesterday, and yet
we already fill your cities, its lands, camps, your
palace, senate and forum; we have left you only
your temples."

Already Abgar, claimed by the Armenians as
their first leader in the faith, had been baptized,
and even if St. Thomas himself never visited India,
a Christian teacher from Alexandria visited Mala­bar in 190 and not long after it was reported that
there were 360 strong churches in that land.
Early in the 3d century twenty bishops from
the Nile valley attended a council in Alexandria,
while Tertullian's church at Carthage was but the
leader among several in North Africa. It is to be
remembered also that when Constantine made
Christianity the religion of the Roman Empire, he
accepted it as a separate religion with its own
character. It was no parallel to the conversion of
the heathen to a new cult. It was not a change of
thought or of heart. The one supreme charac­teristic of the Apostolic Church in this respect is
the missionary zeal and activity of the individual
members. Women as well as men—merchants,
masons, sailors, soldiers, craftsmen, voluntarily
made it one of their chief objects, whether at
home or abroad, in private or public life, to
extend to others the Gospel message. Then, as in
no period since, was it true that every individual
Christian was a missionary, and it was to this
individualistic evangelism that was due the mar­velous extension of those three centuries.

Methods: In all this, there was little organi­zation. Bishops gradually acquired control in
their own cities and districts, but all were equal,
and there seems to have been no concerted action.
Each man, whether in the centers or on the out­sides of the Empire, was free to conduct his dio­ceses much as he pleased and this freedom
extended to the specific action of his individual
followers, who were free to teach as they judged
best, so long as they kept clear of heresy and
made manifest in their lives the principles they
professed. It was in the combination and accord of precept and practise that lay the great power of
that early Church.

Yet there was after all a certain method appar­ent in this individualism. The special efforts
were made in the great centers, the cities of the
Roman Empire, and along the lines of active
activity. As fast as the community in one place
began to number enough a leader was found, placed
there and expected to see that his diocese grew in
numbers and influence. Thus Gregory Thau­ma­turgus was made bishop of his native city,
Neo-Cesarea, in Pontus, when there were about
twenty-seven Christians there. At the close of his
ministry there were said to be but twenty­seven
pagans left.

With the growth of the Church there developed
also the aids to work. This is the period of the
early versions—the Peshito and Curetonian
Syriac for Syria and Mesopotamia; the Memphitic,
Thebaic and Bashmuric for Egypt and the
Upper Nile Valley; the North African and Italian
Latin for Carthage and Rome. Alexandria,
always a literary center, became too, the head
of the catechumen's school, practically a missionary
college from which trained workers were sent out
to Africa, Europe and Asia.

Motives: In the earlier years of this period, the
controlling motive in this missionary work
appears to have been the personal hope of the
Savior and a desire that, as He had been re­jected
and crucified, so now He might be accepted and
enthroned. There was indeed recognition of the
need of men, but the impelling impulse was less
than that for Christ and a desire that
He receive full honor. As the work continued the human element became more prominent. The risen Savior out of sight was to a degree replaced by the needy ones in sight. There was a better conception of the object of Christ’s mission, in that both to the individual soul and to the multitudes who were without God and without hope, Human sympathy assumed a larger place, and the salvation of men became more distinctively the object and motive of missionary labor.

With the opening of the 4th century there came a change in every respect. The active missionary propaganda of the Apostolic Church gave place to an effort to assimilate the great mass of heathenism, which, when Constantine made Christianity the dominant faith, accepted its forms without entering into its spirit. At the same time the loose individualism of the preceding period was followed by a closer, more compact organization, due partly to the change in political conditions, partly to the necessity of better supervision to counteract the influences of heathenism, the growth of divergent and heretical creeds, and partly to incursions from the wild natives of the north. The Church had by a sudden bound become a nation, and the simpler forms possible in a community became inadequate to the new duties and responsibilities.

The result, so far as missionary work was concerned, was that the Church as a whole ceased to have any special interest in it, the immediate need filling the vision completely. It was the period of the councils, and, to the leaders and people generally, the conservation of the faith seemed more essential than its extension. There were, however, individuals who still felt the burden of the nations, and the incoming of the hordes of East Goths, Vandals and Huns, presented opportunities as well as needs that taxed to the full the fervor of ecclesiastics at home, and such apostles as Ulfilas, Honoratius and Patrick in Europe, Gregory the Illuminator in Armenia, Frumentius in Africa and the Nestorian missionaries who penetrated to Central Asia, but left so little record that their achievements are clouded in obscurity. In agencies, methods and motive the movement changed entirely. The great mass of the Church gradually came to know nothing and care nothing about the missionary purposes of the leaders for the most part were content with their immediate duties, and individuals commissioned by the Church but scarcely supported by it were the sole agents. With this period began, too, a movement toward national rather than individual conversion. Whole communities and even tribes were brought into the church en masse. So too, in this period, the motive that became so prominent in the next, of loyalty to and ambition for the Church, began to gain its hold. It was no longer Christ, the Savior of the needy soul, that filled the vision, so much as the “body of Christ,” the Church to be, enlarged, solidified, glorified.

In a very real sense, then, the proclamation by Constantine making Christianity the religion of the Roman Empire was the greatest calamity that ever befell the Christian Church. It practically suffocated the already much weakened ecclesiastical machinery of Paphos. That missionary activity did not disappear entirely was due to individuals rather than the Church, as will be evident in the record of the succeeding centuries until the Reformation, described in the article on Medieval Missions.

**ARABIA:** A peninsula at the southwestern extremity of Asia, lying along latitudes 29° and 12° 45’ N., and longitude 32° 30’ and 60° E. Its land boundaries are Egypt on the northwest and Palestine and Syria on the northeast. Commencing at the northeast, the waters which successively surround it are: the Persian Gulf, Gulf of Oman, Indian Ocean, Red Sea and the Red Sea. Its total area is estimated at over 1,000,000 square miles. Arabia was formerly divided and described by foreigners as consisting of Arabia Petraea, the rocky mountainous region in the north; Arabia Deserta, the vast desert lands, and Arabia Felix, the “Happy” land, on the shores of the Red Sea and Indian Ocean. A study of the physical features of the country suggests a more rational division of the surface into equal thirds; one comprising the mountainous lands along the coasts; another, the desert lands, which form almost a complete ring around the central plateau of tableland, which forms the third physical division.

Beginning with the coast district at the northwest, the principal districts are: 1. The Sinaitic peninsula, a triangle with the Red Sea as its apex, Palestine for its base, and the gulf of Suez and Akabah for its sides, corresponds very nearly to Arabia Petraea. 2. Hejaz extends from latitude 28° to 21° N. along the shore, and for a distance inland varying from 60 to 150 miles. It is for the most part sandy and mountainous, with only a few fertile spots around Medina and Kholays, a few days’ journey north of Mecca. Around this holy city of the Mohammedan is the Haram, or Sacred Territory, at the southern extremity of the district. 3. Yemen occupies the remainder of the mountain coast as far south as Aden, and consists of two portions. That part lying along the shore is called Tehamah, and is flat and rocky, while the inland part is stretching sometimes 300 miles to the east, is mountainous, with precipitous hills and fertile valleys. The oasis of the southern Jofw is also included in this district. 4. Aden, a small peninsula on the coast, about 100 miles east of Bab-el-Mandeb, with the island of Perim, at the entrance to the Red Sea, and is the stronghold of the Arab nation. It includes in its district a smaller peninsula, Little Aden, and the settlement and town of Sheikh Ohman, ten miles from Aden, in all 70 square miles. Its population (1901) is 43,974. Aden is simply a coaling station, but its position makes it of great strategic importance. 5. Hadramaut and Mahrah occupy the 1,200 miles of coast between Aden and Cape Ras-el-Hadd. They have the same general features of the other coast districts—a sandy or rocky shore, behind which mountain ranges stretch back into the great desert—and little is known in regard to the interior, its inhabitants or products. 6. Oman and Hasa complete the line of coast districts, extending from Cape Ras-el-Hadd to the head of the Persian Gulf. The mountains in Oman are the highest on the coast, and the strip of coast land in Hasa has extensive fertile tracts. Mascat, the capital of Oman, is the only good harbor.

The central third of Arabia, especially Nejd, is the stronghold of the Arab nation. On the extreme north and northeast lies the desert, with...
the oasis of Jof and Teima, varying the monotony of the stony waste. South of the stony desert lies the Nejd, or sandy desert, with its two parallel mountain ranges running northeast to southwest. The principal provinces of the nine into which Nejd is divided are: Ared, the central province, containing the capital, Riadh; Yemamah, south of Ared, a fertile district, celebrated in native history as the home of brave men and beautiful women; and Woshem, a small but important district west of Ared. Of the desert surrounding Nejd, that portion lying to the southward is called the Dahna, or "Crimson," from the color of the sand, and covers 50,000 square miles. Of it little is known; not even the Bedouins have traveled the full extent, and few travelers shrink from its heat and sterility. Climate: In the Sinaic peninsula the air is dry, clear, and, in the main, healthy, with winter rains. The summer temperature in the valleys is excessively high, but the nights are cool. In general the sandy slopes are hot and unhealthy, with a cooler, more healthy air in the mountains. In the desert the heat is intolerable, and in the Nefud district the deadly "simoom" blows. This is a storm of cyclonic nature, carrying in its center a mass of hot air which is inhaled in small quantity. It lasts from two to ten minutes at any one point, and the only way to escape it is to cover the mouth with a cloth and lie down on the ground, where the heavier pure air is found. Camels instinctively bury their noses in the sand, but horses are often killed by the gas. The dwellers in Arabia are divided into the nomadic Bedouins, and the dwellers in towns.

1. The Bedouins are the shepherds and herdsmen, who wander about the deserts from one encampment to another. They have been called brigands, because they consider themselves the lords of the land, and, in the absence of constituted authority, take summary methods to punish the traveler, whom they regard as a trespasser. In lieu of official fees for passports, they take whatever property they can lay their hands on. By paying a fee to the first sheik whose territory is invaded, an escort is secured to the traveler, giving safety in that district; a similar payment to the successive sheikhs will insure like protection; but the neglect of such an acknowledgment of their rights will lead to loss of property and sometimes of life. The Bedouin is not murderous by nature, but of necessity, when his demands are resisted. There are northern and southern Bedouins. The southern or "pure" Bedouins are fewer in number and more savage in disposition. In all there are about 1,500,000 of the Bedouins. They recognize no authority save that of their chief, the sheik, for they are thoroughly democratic, and consider every man equal. The chief may be evil in the law of heredity, but is efficiently chosen on account of his qualifications for the position. The Bedouin is nominally a Mohammedan, but he scorns the formalities of the Koran, and disregards its ceremonial requirements. To be near the Mecca, he does not mingle with the devout who go there, nor will he always spare the caravan of pilgrims that passes through his territory. Among some of the tribes a lower religious belief exists; all graduations between sun-worship, tree-worship and no worship at all, have been found.

Lying, perjury, sensuality, and theft are their vices, while fidelity and the observance of a promise to the extent which the romancers chronicle are not uncommon. With all their bad traits, they are to be admired for their shrewd common sense, allied with a sarcastic, humorous side of their character. Their dress is simple, and they carry staves provided with crooks, together with short knives and old matchlocks, with which they seldom fail to hit the mark.

2. The sedentary Arabs number about six-sevenths of the entire population of the peninsula of Arabia. The Koreys are the noblest of the race, and claim direct connection with the Prophet. Their clan ties and national feelings are very strong, and they own allegiance to their tribal head, the Sheikh, Imam, or Sultan. Where the doctrines of the Wahabees prevail the Mohammedan religion is followed with all its strictness of ceremonial and observances. Feudalism is found in Mahrah and places on the borders of the great desert. With God and observance of the rules of the Koran as to dealings between man and man, one naturally supposes that the people of Arabia would make no difficulty about tolerating the advances of sincere Christians. The rules of the Koran, however, as to generous dealings with men are commonly understood as limited to Mohammedans, and the degraded type of Christianity known to the Arabs makes them the more inclined to give full scope to their religious principle of non-intercourse with people outside of Islam. Death would certainly smite any Christian discovered in the Sacred territory of Arabia, and the risk of death would attend travel in any part of the interior of the country. It is for this reason that Mohammedanism is the only religion professed in Arabia at any distance from the coast-line.

In person the Arab is tall, well formed, lithe, with dark hair and eyes. Physically and morally, the race compares favorably with any of the races of mankind; mentally, it is superior to most races. Special traits are found in the races of Oman and Hasa which is absent elsewhere. Arabic is spoken in its purity in Nejd and Shomer, more inelegantly in the other provinces, until in the southern provinces it is merged into an African dialect. Education is deficient; the teaching of the young is carried on mainly in the household, where the father teaches his sons to read and write and to practise that politeness which is notable among the Arab children.

The total number of inhabitants of Arabia proper is estimated at about 6,000,000. Of this number the people of Hejaz (300,000) and Yemen (900,000) are admittedly subjects of the Sultan of Turkey. The other districts of Arabia are governed by their own chiefs (Zmir or Imam). Turkey claims the right to rule the whole peninsula but has not yet been able to make good the claim.
Missions have not found entrance to Arabia as yet, owing to the determined attitude of Mohammedanism toward dissent from its teachings wherever it has power to enforce the death penalty. Two noble efforts have been made by loving service to break through the barriers of fanaticism. One of these is the Keith-Falconer Mission at Aden (now carried on by the UFS), with its chief station at Sheikh Othman on the high land back of the seaport.

The other missionary effort for Arabia is that of the Arabian Mission of the RCA operating from Turkish and independent territory on the Persian Gulf, with three stations, of which the most effective and most hopeful form of work is that of the hospital and dispensary.

ARABIAN MISSION. See Reformed Church in America, Board of Foreign Missions.

ARABIC: The Arabic language is closely allied to the Hebrew and Syriac, of the Semitic family, and appears in Bible translation, where the Hebrew may be turned into good classical Arabic with comparative ease. Difficult and ambiguous passages can be translated word for word, often by the same word that is used in the Hebrew, leaving the ambiguity the same in the translation as in the original. It is rich and refined; has an abundant and valuable literature, and is spoken by 50,000,000, and used in worship (generally without knowledge) by more than 200,000,000 of the inhabitants of the globe.

ARABKIR: City of Eastern Turkey, on the caravan road from Aleppo to Trebizond, and 50 miles northwest of Harput. Population, 30,000. Mohammedans, Armenians and Protestants. The prosperity of the town is due to the caravan trade and the cotton industry. The vicinity is rich in fruit trees. It was formerly a station of the ABCFM, but is now an outstation of Harput. Its evangelical church has lost many members through emigration, due to the insecurity of the country.

ARAGUAY: Town in Minas Geraes, Brazil; station of the PS (1895) with a missionary and his wife and an unmarried missionary woman; 14 outstations, and 250 church members.

ARAKAN: For sixty years a British province of Farther India, now a part of the province of Burma, since the war of annexation of 1885-86. It is separated from Burma proper by the western Yoma range of mountains, which have many volcanoes, mostly quiescent, and rise from 4,000 to 10,000 feet above the level of the sea. There is a narrow strip of alluvium, extending from the mountains to the Bay of Bengal. It extends from the westernmost of the delta branches of the Irrawady on the south to Chittagong on the north, and is bounded on the W. by the Bay of Bengal. Above Ramree Island the territory widens, and from 19° to 21° 30' several short ranges of mountains are interposed between the Yoma range and the Bay of Bengal, and are inhabited mostly by the hill tribes. Its area is 16,500 square miles, and its population is 872,000.

The people are of the same Molicloyd stock as the Burmese, excepting the inhabitants of the northern mountainous region who are of the same stock as the Karens. The religion of the people of the towns and the lowlands is Buddhism, while that of the hill tribes is spiritism or nat worship.

Missionary operations were commenced by the BMS about 1826 and by the ABMU in 1835, both missions being abandoned after some years because of the deadly climate. The ABMU re-established its mission in 1888 at Sandoway and has met with good success among the hill tribes and the Tamils and Telugus who go to Arakan for work. Also written Aracan and Arracan.

ARAWAK: This language belongs to the South American group, and is spoken in Dutch Guiana. It is written in Roman letters and is hardly one of the permanent languages since only a few thousand people are known to use it.

ARCHBISHOP'S MISSION to the Assyrian Christians: The interest of the Church of England in the Nestorians was especially aroused by the report of the Royal Geographical Society's expedition to the Euphrates Valley in 1837. This resulted in the sending out of a joint expedition by the Royal Geographical Society and the SPG. Their report supplemented by numerous appeals from the Nestorians occasioned another journey in 1876, and the sending out of a missionary in 1881, tho it was not until 1886 that the work was put on a permanent footing.

The mission has no regular organization or constitution, but is carried on under the auspices of the Archbishop of Canterbury. The mission priests, who are all unmarried, receive no regular stipends beyond £25 annually for personal expenses, but live from a common fund. The work carried on is largely educational. A college has been formed for priests and deacons, besides 5 high schools and 40 village schools, the total number of scholars being roughly estimated at 1,200. Besides the educational work, the mission clergy exercise the function of ecclesiastical and temporal judges in deciding disputes between the native Christians and divorce and other spiritual cases, according to the Canon Law of the ancient Chaldean Church.

The object of the Mission is stated to be "in the first place to train up a body of literate clergy; secondly, to instruct the youth generally in both religious and secular knowledge; and thirdly, to print the very early liturgies and service books, to which the Assyrians are much attached, which have never been printed in the original, and of which the very primitive character is shown by their freedom from doubtful doctrine. The Mission seeks in no way to Anglicanize the Assyrians on the one hand; nor on the other to condone the heresy which separated them from the rest of Christendom or to minimize its importance." A committee connected with the Protestant Episcopal Church of the U.S., aids the mission.

ARECIBO: A seaport on the N. coast of Porto Rico. Population about 8,000; station of the ME (1901) with one missionary and his wife, and Sunday school.

ARGENTINE REPUBLIC: One of the most important of the South American republics. It occupies that portion of the continent south of
Christians.

information as to its extent. The Buenos Aires rivals in salubrity the south of France. A dry cool temperature prevails along the mountain slopes, but along the coast at the north a thoroughly tropical climate is found.

The most remarkable feature of the country is its pampas, which occupy about three-fourths of the surface, stretching 2,000 miles in length and 500 in width. On these plains great herds of cattle are raised, and within late years wheat has been grown. The population has a large percentage of foreigners (Italians, French, Spanish, Germans, English), and the remainder consists of descendants of the Spaniards and Guarani and Quichua Indians. Negro descendants are scarce, as few slaves were brought to this section. Spanish is the prevailing language, tho in Corrientes the Guaraní language is spoken and Quichua in Santiago. The government encourages immigration from the south of Europe.

Altho it has an area twenty times as large as that of the New England States, the Argentine Republic only contains a population of less than 2,000 miles in length and 500 in width. On these plains great herds of cattle are raised, and within late years wheat has been grown. The population has a large percentage of foreigners (Italians, French, Spanish, Germans, English), and the remainder consists of descendants of the Spaniards and Guarani and Quichua Indians. Negro descendants are scarce, as few slaves were brought to this section. Spanish is the prevailing language, tho in Corrientes the Guaraní language is spoken and Quichua in Santiago. The government encourages immigration from the south of Europe.

The Argentine Republic was occupied as a Mission field in 1856 by the ME, which now has 5 stations there; and in stations and outstations about 2,000 communicants connected with its churches. The SAMS, the Seventh Day Adventist Missionary Society, the International Medical and Benevolent Society, the South American Evangelical Missionary Society, and the Missionary Pence Association have establishments at Buenos Aires. The BFBS and the YMCA also have agents in that city. The Christian and Missionary Alliance and the Plymouth Brethren carry on missionary operations in two or three places, but no published statistics give information as to its extent.

ARKONAM: A small town in the Transvaal Colony, South Africa, situated on the Lepalule River, northeast of Pretoria. Mission station of the Berlin Evangelical Lutheran M. S. (1877), with 1 missionary and 18 native workers, men and women, and 2 outstations.

ARMENIAN CATHOLIC CHURCH: Since the Council of Florence, A.D. 1439, a considerable body of Armenians have been connected with the Church of Rome. As is the case with members of other branches of the Eastern Church which have accepted the supremacy of the Roman pontiff, they are allowed to retain their own ancient liturgy and many of their peculiar usages. In Turkey, Armenian Catholics enjoy their own church courts and many institutions in social life. On the whole they are more frequently given office under the Turkish Government than members of the Gregorian Armenian Church. The congregation of the Mechitarists, which was formed by the Abbot Mechi- tar, belongs to them. They possess a famous monastery on the island of San Lazzaro, near Venice, from which center they have successfully labored since 1702 for Armenian literature and education in the interests of the Roman Catholic Church. The Orthodox Armenians are inflexibly opposed to these schismatics, as they call them.

ARMENIAN CHURCH: Its own writers claim that its history goes back to the time of Christ. One Abgar or Abgarus, King of Edessa, is said by Moses of Khorene, the Armenian historian, to have been converted by hearing of the wonderful works of Jesus and to have been baptized by Thaddeus, one of the seventy disciples first sent out as missionaries. This Abgar is held by the Armenians to have been their king, although Tacitus calls him King of the Arabs.

It was not until the fourth century that the Armenian nation, as a whole, accepted Christianity. At the beginning of that century
St. Gregory the Illuminator preached at the Court of Armenia with such effect that from that day to this Christianity has been the national religion of the Armenians. For this reason the Armenian Church is often called “the Gregorian Church.” As they call themselves, however, call it “the Church of the Illuminator (Lusavorchagan).”

Persecution only served to endear the Church to the people, and from that time it has been identified with their nationality. Under Turkish rule every religious body is also a political organism. The Armenian Church is little more than that at present. It is therefore inseparably identified with the race, and is pervaded by much of the corruption of Oriental Christianity.

Church Doctrine:

1. By accident—some say purposely—the Armenians were not represented in the Fourth Ecumenical Church Council which met at Chalcedon in 451 A.D., and which condemned Nestorianism and Eutychianism. When the decisions of the Council were reported to them, owing possibly to poverty of their language at that time, it not having proper words to distinguish the two ideas of the nature of Christ and the person of Christ, the decision was misunderstood. In a synod of Armenian bishops in 491 the decision of the Council of Chalcedon was rejected, and at one of the synods of Tivan, now in Russia, their capital at that time, they declared decidedly for the Monophysite doctrine. This doctrine is not made prominent in their modern creeds.

2. They believe the Spirit proceeds from the Father only.

3. They accept seven sacraments, altho in practice, baptism, confirmation, and unction are intermingled.

4. They baptize infants eight days old or less by threefold immersion, immediately offering them the communion.

5. They accept transubstantiation, and worship the consecrated elements as God.

6. They use unleavened bread, which is dipped in the wine and given to the people, who receive it into the mouth from the hand of the priest.

7. They pray for the dead, but deny Purgatory.

8. They practice auricular confession to the priest, who imposes penance and grants absolution, but gives no indulgences.

9. They pray to the Virgin and to saints, and have great faith in their mediation. With the Greeks, they reject images and accept pictures.

10. They believe in the perpetual virginity of Mary “the Mother of God.”

11. They regard baptism and regeneration as the same thing, and have no practical conception of a new birth. All are saved who partake of all of the sacraments, do proper penance, observe the fasts of the Church, and perform good works.

12. Original sin is removed by baptism, actual sin by confession and penance.

Services are held in the church each morning at sunrise and each evening at sunset throughout the year. The altar is invariably toward the east. The sacrament of the Lord’s Supper is observed twice a week, but the people partake usually only twice a year. Mass is observed as one of the formal rites of the Church. Con-
In ecclesiastical matters the Armenian Church reckons A.D. 551 as the year of the completion of all old manuscripts of the Church.

Fortescue (E. F. K.), The Armenian Church, London, 1879, 8vo; Bianchini (F.), The Armenian Ritual (with European musical notation); Venice, 1872, 4to; Lynch (H. F. B.), Armenia, London, 1901; Anderson (R.), History of Missions to the Oriental Churches, Boston, 1870, 2 vols.

ARMENIAN LANGUAGE: Belongs to the Iranian branch of the Aryan family of languages, and has two marked divisions, the ancient, written language, which is rich in vocabulary and inflection, and the modern, spoken, which has dropped many of the older forms and constructions, and contains Persian and Turkish roots and idioms. The difference between these two branches of Armenian is very marked; it is something the same as that between the Latin and Italian. The ancient language was the product of an age of learning, and was then embodied in literary works. The modern tongue is the result of centuries of ignorance, and is something the same as that between the Latin and Italian. The difference between these two branches of Armenian is now so great that an uneducated person can understand little or nothing of the classical language.

There are two principal spoken Armenian dialects at the present time—the Ararat dialect, which is spoken by many of the Armenians in Russia and Persia, and the western dialect, which is used in Southern Russia, Western Armenia, and Eastern Asia Minor. The Bible has been translated into both these dialects. The difference between these two dialects consists mostly in forms and constructions.

Artho there was a language, there was no Armenian alphabet until the beginning of the 5th century. At that time Mesrop, one of the learned saints of the Church, invented 36 of the 48 characters; the two other were added later. The relation of Armenian to other languages is yet a question of discussion and doubt.

Perhaps one-third of the Armenians in Turkey, especially those in the southern and western provinces, speak a vernacular, and use the vernacular, and speak only Turkish or Kurdish. An effort is being made in Russia to force Russian upon the Armenians in place of their own tongue.

ARMENIANS: It is probable that no country of the size of that anciently called Armenia now has so many separate races preserving their identity among its inhabitants. The early history of these peoples is so mixed with myth and legend that the truth is difficult to find. During the Assyrian and Median periods there was evidently a great organized monarchy, with a strong military power, in the Lake Van basin. The Van inscriptions show a line of kings who were, both in civilization and in military powers, far in advance of any of their contemporaries in neighboring kingdoms. At times they were formidable enemies to the Medes.

This country was well known to the Assyrians as early as the 9th century B.C. At that time three principal races occupied the territory. These were the Nairi, who were spread from the mountains west of Lake Van along both sides of the Tigris to the Euphrates, and even farther; the tribe of Armenia, and intermarriages took place. Later the Armenian King Erik (Triganes) was the friend and ally of Cyrus the Great. His successor was Vahakn, celebrated in song and story for his great victories, and deified after death.

The last of the Haik dynasty was Haik, the son of Gor, the son of Maroz, the son of Noah. This Haik is said to have left Babylon to escape the tyranny of Belus, the King of Assyria. Belus pursued him to the land of Ararat, and there, in a great battle, was slain by Haik. This occurred some twenty-three centuries B.C. At this time the Armenian kingdom was set up. Even to this day the Armenians call themselves Haik, and their country Haiaidan. Several centuries later, they say, Aram, the seventh from Haik, having incurred the hatred of the Queen of Assyria, was slain in a battle with that nation, and his kingdom became an Assyrian province.

It may be mentioned in passing that the name Aram appears among the kings who left inscriptions upon the rocks at Van. But neither his race nor his language shows any affinity to the Armenian.

The Armenian histories narrate that at the time of the captivity of Israel a certain number of the Hebrews escaped to the mountains of Armenia and intermarriages took place. Later the Armenian King Erik (Tiganes) was the friend and ally of Cyrus the Great. His successor was Vahakn, celebrated in song and story for his great victories, and deified after death.

The last of the Haik dynasty was Vahe, who was an ally of Darius III. Against the Macedonians, and was defeated and slain by them. From that time Armenia was invaded by conquerors armies until 500 B.C., when the country was freed by two Armenian nobles, who divided it, one of them ruling over Armenia Major, and
Armenians

THE ENCYCLOPEDIA OF MISSIONS

52

the other over Armenia Minor, which was north and west of the Euphrates. This division continued until 89 a. c., when Dikran II. (Tigranes), of the line of Ardashir (Artaxerxes), conquered Armenia Minor and united the two kingdoms.

In 67 a. c. Armenia became an ally of Rome, but rebelling, their king, Ardashir, was captured by Pompey and beheaded in Alexandria by Cleopatra, 30 a. c., and the country became tributary to Rome. The country was in turmoil and a half century of disorganization followed.

In 261 of the Christian era Armenia became again subject to Persia. All of the royal family were slain except Durtad, the young son of the king. He escaped to Rome, and in 286, by the help of Rome, was established upon the Armenian throne. It was through him that the Armenians as a nation accepted Christianity.

It was the constant effort of Persia to subvert Armenian Christianity and establish Magianism in its stead. To this end, cruel persecutions were undertaken, and frequent incursions were made. From 632 to 869 A. D. Armenia was the scene of almost incessant struggle between the Eastern Empire and the Mohammedans, and it became by turns subject to each.

In 859 the dynasty of the Bagratid family came into power, and was recognized by both the Caliph and the Emperor of Constantinople, but in 1079 the greater part of the country became dependent upon Constantinople.

A small kingdom remained in the Taurus Mountains north of Cilicia, which allied itself with European monarchs during the crusades. It maintained its independence until 1375, when the last Armenian king, Leo VI., was captured by the Egyptians and banished.

From this time Armenia lost its separate national existence. The greater part of the country was annexed to Turkey, while the eastern section remained subject to Persia and the northeast to Russia. Russia took another large section of Armenia in 1878.

Personal Characteristics: Asfar as moral traits are concerned, the Armenian compares favorably with the other races of the East. Ages of subjection have generally disposed them to quiet submission. They have now little hope of political restoration as a nation, although a constant agitation is carried on with that end in view. The Armenians are cultivators of the soil, artisans, merchants, and bankers. They are persevering and shrewd in financial dealings.

In Asiatic Turkey the Greeks alone can compare with them in trades, professions, business ability, and general intelligence. The Greek is more speculative and the Armenian slower and more cautious. In the finances of the Turkish Government some Armenians hold high positions, and in many ways they have rendered themselves indispensable to the prosperity and life of the country. In spite of the general incidence of poverty throughout Turkey, the Armenians, up to the period of the massacres of 1895-96, held their own better than the other races.

The number of Armenians who are now Armenians Minor and the two kingdoms is estimated at from 2,000,000 to 3,000,000. Perhaps two-thirds of the race reside in Turkey. The rest are in Russia, Persia, India, China, Africa, Europe, North and South America, and in nearly every country of the world. Up to the present time the nation has preserved its individuality to a remarkable degree, resembling in this respect, as in others, the Jews. With their disperse throughout the world, however, the Armenians intermarry with other races and a distinct tendency to race disintegration has appeared.

ARMENO-TURKISH LANGUAGE: The Turkish language when written with Armenian letters. See Turkish Language.

ARMSTRONG, Richard: Born at McEwensville, Pa., April 13, 1806; graduated at Dickinson College, Pennsylvania, 1828, and at Princeton Theological Seminary, 1830; ordained by the Presbytery of Baltimore, and sailed as missionary of the American Board for the Hawaiian Islands, November 26, 1831, reaching Honolulu, May 16, 1832, after a six months' voyage. At a meeting of the mission in April, 1833, it was decided to commence a mission at the Marquesas Islands, and he was appointed, with Messrs. Alexander and Parker, to that field. After they had resided several months on Nukahiva Island they were informed that English missionaries were on the way from the LMS to occupy those islands. It was, therefore, decided to relinquish the field and return to the Hawaiian Islands.

Their residence for eight months among savages and cannibals was one of great danger and discomfort. Mr. Armstrong's first station after his return was at Haili, then at Wailuku, on Maui, from 1835-40. Here he had a parish of 25,000, schools with 1,700 children to examine and supply with teachers, churches to build, and in various ways he identified himself with all public interests. In 1840 he was removed to Honolulu to take charge of Mr. Bingham's church, where he remained eight years. The large stone church left unfinished he completed, planning and superintending the work. While at Honolulu Mr. Armstrong was engaged in translating the proceedings incident to the cession to the people of right to the fee of their homes, and even in making actual surveys of the lands subject to the new law. During the four years' absence of Mr. Richards (1842-46) Mr. Armstrong was really the head of the Department of Public Instruction, the whole work being devised and superintended by him. On the death of Mr. Richards, in 1847, the position was offered to Mr. Armstrong, which he finally accepted, remaining in this office until 1856. He then became President of the Board of Education. He died in consequence of injuries received in falling from his horse September 23, 1860.

The king, Liholiho, published in the native paper a sketch of his character and work, which describes Dr. Armstrong as Minister of Public Instruction, President of the Board of Education, member of the House of Nobles and of the King's Privy Council, Secretary of the Board of Trustees of Oahu College, Trustee of the Queen's Hospital, and executive officer of the Bible and Tract Society, and deeply interested in developing the agricultural resources of the kingdom. The king adds that Dr. Armstrong's accurate knowledge of the Hawaiian language, and the facility with which he wielded the pen, naturally imposed upon him an immense amount of toil.
that his immediate and appropriate duties were connected with the cause of education, all the schools of the kingdom coming under his supervision, and that no government officer or mission-ary was brought into such close intimacy with the nation. Tho his week-day duties were so abundant and onerous, Dr. Armstrong never spared himself as a minister of the Gospel. He was an eloquent preacher in the Hawaiian language, and always listened to with deep interest by the people.

ARM: Town in the North Arcot district, Madras, South India. Climate, tropical. Population, Hindu, Muslim, with a few Christians. Language, Tamil, Telugu, and Hindustani. Mission station of the Reformed (Dutch) Church in America, established in 1854. It has 2 missionaries and 64 native workers of both sexes, a publishing house, 17 outstations, an industrial school, and 18 village schools. The professing Christians number 300.

ARNO. See Marshall Islands.

ARNOT'S GARENGAUZE MISSION. See Christian Missions.

ARORAI. See Gilbert Islands.

AROUCA: A town of Central Trinidad, east of Port of Spain and northeast of San Fernando. Mission station of the UPS, with 1 native worker and 185 church members.

ARU ISLANDS: A group of islands in the Dutch East Indies lying W. of New Guinea. The population numbers about 25,900. The Netherlands Missionary Society has a station on Wokan, the largest island of the group.

ARUPPAKOTAI: A town in the Madura district, Madras, India; station of the ABCFM, with a missionary and his wife, 94 native workers, men and women, 85 outstations, a high school, 42 village schools, a YMCA, and 968 church members. Also written Arrupukotai.

ARYALUR: A town of the Trichinopoly district, S. India; station of the SPG, opened in 1856; has 12 native workers, 6 preaching places, 4 village schools, and 320 native communicants.

ARYA SOMAJ: This body is one of several religious and so-called spiritual bodies and sects which admit the spiritual and moral degradation of the people and seek to introduce reform. It originated in Northern India, and while it has made some growth in Central India, its chief strength is in the Punjab. It is far more antagonistic to Christianity than the Brahmo Somaj. Such antagonism is demanded by the appeal which it makes to the patriotism of Hindus, as exemplified in its watchword of "India for the Indians." In its view that man is a traitor to India who accepts Christianity. This political quality in its religious ideas also contains elements of strength. It teaches that God is one God, the Creator of all things, and the kindlly Well-wisher of all His creatures, who, however, has never revealed Himself by incarnation. This monotheistic teaching it claims to find in the four Vedas, which alone, by the way, it accepts out of all the Hindu religious literature.

Religion, according to the Arya Somaj, consists in obedience to God, study of the Vedas, contentment with one's lot, and the practice of truth and justice toward all men. The doctrine of the transmigration of souls is the true eschatology, for it rights all wrongs and at the same time assures, in time, the salvation of all from the condition commonly called Hell.

Some remarks on details will better show the bearings of its curious creed:

(a) Its testimony for the monotheism of the Vedas is clear and explicit. (b) It is inconsistent in adopting the sacred word of prophecy terms, at the same time that it differs from some of them so widely in its positive theism and in its theory of creation. (c) Its humane elements in respect to woman and child-marriage are evidently borrowed from Christianity and the higher sentiment which it has created. (d) Its doctrine in respect to caste is a virtual arrangement of the entire Indian cultus and civilisation. (e) It strikes a blow at the all-prevailing pessimism of India in ascribing benevolence of design to the supreme and personal creator of all things. In respect it approaches very nearly to the Christian view and to that of Plato and Aristotle. (f) It is less grossly anthropomorphic and more spiritual than the old Hindu faith in its conception of heaven and hell, which it looks upon, not as places, but as characters and conditions; on the same principle, caste is character and not an accident of birth. (g) It is elevated in its ethical standards, and it gives to ethics a godward side. Obedience to God is one of its foremost requirements. (h) Its denial of all incarnations of deity is a two-edged sword, which strikes at both Hinduism and Christianity. It is so far in accord with Islam. (i) Tho it approves of Yoga or asceticism in theory, yet its definition of true religion is as practical as that of the apostle James. It embraces the cardinal virtues of life, both active and passive:--such as contentment, the return of good for evil, knowledge of the Vedas, obedience to God, and truthfulness and just dealings toward all men. (j) Its positively missionary character is in sympathy with Buddhism and Christianity, rather than with Hinduism. (k) Its advocacy of female education is a proof that it has caught the spirit of Christian lands. In no one feature does the Arya Somaj strike more deeply at the root of old Hinduism than in its policy with respect to women. (l) It apparently attempts a compromise between true theism and the prevailing pantheism. It inspires the human soul in the infinite soul, and apparently expects its absorption into deity; yet it speaks of the soul as a real entity, and maintains its free will, and therefore its moral responsibility. (m) Its doctrine of transmigration is exceedingly plausible. No better reasons could be given for such a theory of eschatology.

The relation of the Arya Somaj to Christianity and to Western thought is unique and full of interest. It is exceedingly hostile to Christian propagandism, and yet it is a far more efficient handmaid of Christianity than was the Brahmo Somaj in its most palmy days. It is more efficient, because its attitude toward all Hindus is a more conciliatory and therefore more persuasive and influential. It is less radical as to changes in doctrine, and yet not one more step radical with respect to those great social movements which Christianity is striving to promote. Moreover, the Arya Somaj is a real ally of Christianity against the various current phases of Western infidelity. It takes the side of truth against the agnosticism of Huxley and Herbert Spencer. It is strongly theistic. It believes in
an intelligent and omnipotent First Cause, and a
real creation of the world. It maintains benevo-
ence of design in the creation and government
of the world, which Tyndall and Darwin reject.
It is in advance of Max Müller in the doctrine of
a preternatural revelation of God to man. It
brings all virtue and philanthropy within the
domain of religion, and is a rebuke to all those
who would dispense with God in the government
of human affairs. It challenges all forms of
pessimism, ancient or modern, Eastern or West-
ern, and maintains that the one God of the uni-
verse is wise and good, and therefore worthy of
all reverence and love.

Nevertheless, while modern Aryanism is in
some sense an ally of Christian civilization, it
must not be forgotten that it is more or less of the
nature of an entrenchment of essential Hindu-
ism. The more nearly it counterfeits the truth
of God and shuns disgusting rites, the more pleas-
able does it become. It considers that it has
adjusted itself to modern science and progress,
and needs no further change. Christian mis-
ionaries must bear in mind the fact that the
Arya Somaj is an aggressive and bitter ene-
my of Christianity. It hopes to bar the extension
of the teachings of Jesus Christ in India, just as it
hopes to check Islam, or to overthrow the degrad-
ing superstitions of popular Hinduism. In
order better to attack Christianity it is borrowing
from Western scoffers at the Bible a logic and a
vocabulary and from the missionaries, a care-
fully proven theory of the uses of school, pulpit
and press for purposes of propaganda. Its
enmity to Christian teachings is deliberate and
permanent.

This enmity might be a source of dread to the
missionary, were not the Arya Somaj fatally
weak in risking its whole system upon the unten-
able claim that the four Vedas teach a pure mono-
theism. Because of this weakness which must
some time be revealed, this active organization
will serve its day, holding what light it has before
time, while, then, it will fall because it has no
stable foundation.

ASANSOL: Town in Bengal, India; station of
the Methodist Episcopal Church, North, with 3
missionaries and 4 native workers of both sexes,
3 village schools, an orphanage, young people's
society, 159 members, and 295 professing Chris-

ASHANTI LANGUAGE: This language belongs
to the Negro family of African languages, and is
spoken in W. Africa by about 3,000,000 people
along the Gold Coast. For missionary purposes
it has been written with Roman characters. It
is also sometimes called the Otshi language. It
exists in two dialects, the Akwapim and the Fanti.

ASHTON, Rev. W.: Born July 13, 1817. Died
March 29, 1887. He was a missionary of the LMS at Bartly West, South Africa, and
during a service of fifty-four years in the mission
field he, as a self-sacrificing, consecrated mission-
ary of the cross, did much for the enlightenment
of the Dark Continent.

ASIA MINOR: Originally confined to a small
section on the border of the Ægean, the term has
come to include that portion of Asiatic Turkey
lying between the Black Sea on the north and the
Mediterranean on the south, the Marmora and
Ægean seas on the west, and the Euphrates
Valley on the east. This last boundary is vague,
as the Euphrates is tortuous in its course. It is,
however, sufficiently accurate for practical pur-
poses. See Turkey.

ASIATICS IN THE UNITED STATES: The discov-
ery of gold in California in 1848 opened the
way for the immigration of the Chinese to this
country in large numbers. In the year of 1852 there were 20,000 arrivals. Twenty-five
years later, there were no less than 150,000 in the
United States. Of these, 30,000 were in San Fran-
sisco, somewhat more than this number in other
parts of California, and the remainder scattered
elsewhere. In San Francisco, Chinatown embraces the greater part of fifteen blocks, in which
Chinese life as seen in China is quite accurately
reflected. The Chinese being so extremely con-
servative, they cling very tenaciously to their
own modes of life. While learning our language,
and observing our ways, they largely live in a
world of their own; and most of them eventually
to go back home and die among their own people.
They bring their idolatry with them, and in San
Francisco alone have eighteen temples.

The first Christian work was begun among the
Chinese in 1852, by the Presbyterian Board of
Foreign Missions, which sent the Rev. Wm. Speer, D.D., to San Francisco for this purpose.
He labored with great zeal and earnestness until
his health broke down, and for long years was remembered as "The Chinaman's Friend." He
was succeeded in 1859 by the Rev. A. W. Loomis,
D.D., who for thirty-two years was a devoted and
successful laborer. In 1866 a Chinese church of
twelve members was organized. In 1870 Dr. Loomis was joined by Rev. I. M. Condit, D.D.,
who still has charge of the Presbyterian work in
California. The mission house built by Dr. Speer became too strait for the work, and in 1882
the First Presbyterian Church, being situated in
close proximity to the encroaching Chinese quar-
ters, was purchased and occupied as mission head-
quarters.

In 1868 Rev. Otis Gibson, D.D., established a
mission of the M. E. Church. A commodious
building was erected for school and rescue
purposes, in which vigorous work has ever since
been carried on. A Congregational mission was
opened in 1870 by Rev. W. C. Pond, D.D., who
has ever since been its efficient superintendent,
with Rev. Jee Gam as native pastor. In 1898
this mission purchased a large building, which was
fitted up in a manner well adapted for work.
The Rev. John Francis, of the Baptist Church,
established a mission in 1870. Later a building
for church and school purposes was built in a
location well suited for its efficient work.

These missions, besides preaching services in
the Chinese language, Sunday schools and other
church work, have each evening schools, in which
the rudiments of English are taught. They have
also opened stations at many of the principal
towns and cities of the State, where many
Chinese have been instructed and brought to
Christ.

Many Christian people in our American
Churches were awakened to a sense of their
responsibility to these heathens; but, with the
barrier of an unknown tongue, how could they do anything for them? The Chi-
inese were anxious to learn English, and so the plan of Chinese Sunday Schools was adopted.
These were opened in nearly all the prominent
churches of San Francisco, and at other impor-
tant points. As the Chinese went East, mis-
sions and schools were gradually opened, until
now, more than seventy of them are found in the cities and towns of our broad land. In New York, Boston, Philadelphia, Pittsburg, Chicago, and Portland, Oregon, where Chinese are found in the largest numbers, many flourishing Sunday schools exist, connected with the various churches, and also several organized missions. All this has resulted in the conversion of hundreds of souls, among whom are found many devoted Chinese Christians.

In the first years of Chinese mission work there were not many families or children. But as these began to increase in San Francisco, schools were opened. These schools are now found in the principal missions, with an enrollment of 250 scholars. A Chinese public school has been in existence for several years, which has grown until now five American teachers are employed. A goodly number, too, of the native-born Chinese attend our American public schools; 2,800 in San Francisco are under eighteen years of age, and 2,000 of these are of school age. There are 1,700 native-born here, besides many who have gone back to China. 3,000 women are estimated to be in San Francisco, of whom the largest share are of bad character. Slavery is not known among the Chinese, and among the large number of women who are bought and sold like chattels. There is no such thing as slavery known among men, but among females it is sadly prevalent.

Homes for the refuge of these slave girls were established in 1873 in connection with the Presbyterian and Methodist missions. During the thirty years of their existence probably 1,500 girls have been rescued. Each mission has a fine building for a home. Many of these rescued ones have become Christians, married Christian men, and gone out to set up Christian homes for themselves.

In 1870 Chinese branches of the YMCA were formed in different missions. Each has a central society in San Francisco, with branch societies at the various points where Christian work has been established. These societies, to which from the beginning several thousand members have belonged. Enter the association is the first step toward giving up idolatry and learning the religion of Jesus. The Chinese are very social in their nature and this society draws them together and away from the dangers of bad resorts.

Approximate results of Chinese work in our country may be briefly stated in the following summary:

The number of Chinese in the United States, 100,000. Of these, in San Francisco, 20,000; on the Coast outside of San Francisco, 52,000; in other States and Territories, 28,000. The whole number of Christians in the United States from the beginning, divided between Presbyterians, Methodists, Congregationalists, and Baptists, with a few from other denominations, 4,000. The present number of Chinese Christian in the United States, 1,500. Of those in San Francisco, 600; in other parts of the coast, 500, and in other States, 500. The number of Sunday Schools with an attendance during the year of 2,500 scholars; children in schools, 500. The number of lay preachers converted in U. S., who have labored both here and in China, 60. Chinese ordained ministers who were converted in U. S., 11.

The influence of those converted here upon their homes in China as they return is one of the most hopeful phases of the work. All the Chinese who have emigrated, not only to this country, but to nearly all others, are from the one province of Canton, and from the outlying counties of that province. While this is so, still they represent a population of probably ten or fifteen million souls. The reflex influence of the thousands of Christians converted here, and the thousands more who have been instructed in a knowledge of the truth, and seen with new eyes the prosperity of this Christian country, as they return home to dwell among these millions, is very great. It is mightily weakening the power of idolatry, as well as building up the constituency of a Christian community. A score or more of chapels have been built, some entirely and others partly, by these American Chinese Christians. One church in the heart of this region was built entirely by California Christians, costing six thousand Mexican dollars, and in which they support a native pastor. This is only one instance among many. Quite a number of the native preachers of this region were converted in the United States. More and more the hearts of the Chinese Christians among us are turning toward transplanting in China the seed which has been sown among them here. The hope of uniting the Chinese with our Christian civilization is no mean power in helping to bring about the New China.

Mission work among the Japanese in the United States is a hopeful and growing one. On the Pacific Coast they are fast increasing in numbers, as they are free to come, while an exclusion law shuts out the Chinese. Dr. E. A. Sturge, who is the best of authority, says: "There are about 60,000 Japanese on this Coast, 50,000 in California and 4,000 or 5,000 in San Francisco. More than forty steamers are plying between this Coast and Japan, and every steamer arriving adds to the number of Japanese in our country. There are not many of these people in the East, as there is no employment for them there. There are about a hundred in China and a few hundred in New York City. Most of those who come directly from Japan belong to the student class, and are here for the purpose of study, while the majority of those who come from Hawaii belong to the laboring class. The Japanese in this land are mostly young and very few of them expect to remain in America more than five years. As they all wear the American dress, and reside in no special quarter, their presence is scarcely realized.

Mission work among these people was begun in a small way twenty-five years ago, but as they have rapidly increased in the last decade, the work has grown into two flourishing missions of the Methodist and Presbyterian Churches. Both of these missions have commodious buildings and are carrying on a most interesting and encouraging work. The Methodist mission, which is the largest, is under the superintendency of the Rev. M. C. Harris, D.D., and the Presbyterian is under E. A. Sturge, M.D. They both have the aid of native pastors. The Japanese readily accept Christianity, and a thousand Christians are now reckoned to be on the Coast. The work is spreading beyond San Francisco, as the people are scattering throughout the State in the fields and orchards. The Methodist mission has stations to the number of eight or ten, while the Presbyterians are also establishing stations at outlying points.
ASSAM: A province of British India ceded to the East India Company by the king of Burma in 1826. It is bounded on the east by the Brahmaputra, on the west by the Assam plains, on the north by Bhutan, and on the south by the Arakan and Assam hills. It has an area of 49,004 square miles and its population (1891) 5,476,833. The country consists of two extensive river valleys and three ranges of mountains. The north, Biharian, occupies the southern slopes of the Hilsahas Mountains, and the somewhat lower range which overlooks the wide and fertile valley of the Brahmaputra. The valley of this great river extends from Sadiya in the east to the foot of the Garo Hills, where the river turns to the south. The right bank is level, and has broad fertile alluvial lands densely inhabited; the left bank is crowded by a range of hills named from the tribes that occupy them, the Garo, the Khasi, and Jaintia, Nagas, and Singpho Hills. The comparatively level and broad valley extending from the right bank of the Brahmaputra is mostly occupied by Assam tribes, and the ruling race. They have also several cities and towns on the left bank. Southwest of the hills of the left bank lies the valley of the Surma, a large tributary stream flowing into one of the delta branches of the Jumna or Brahmaputra. This valley is broad, well watered, and fertile. The Khasi and Jaintia hills overlook it. It was formerly claimed as a part of the Eastern Bengal plains, but the Indian Government has now transferred this whole valley to the Assam Province, to which it properly belongs.

The People: The ruling class, the Assamese, hold very similar relations to the hill tribes of Assam as the Burmans do to the hill tribes of Burma. The Tribes nearest to the Brahmaputra are primarily Buddhist, and their language is Assamese. They are of different race, habits, and religion. The Assamese are believed to be the descendants of the Shans, a people who, perhaps, remote centuries, entered into Assam from the northwestern part of China. They were formerly Buddhists, but about the middle of the 18th century, having sought the protection of Bengal, they adopted the Brahmanist system—divinities, caste, idol-worship, and all. Their language, the original of the Patali stock, has, by the adoption of Hinduism, and their intimate association with Eastern Bengal, acquired a large infusion of Bengali.

The hill tribes, which in the aggregate outnumber the Assamese, are, beginning with the Chinese, from whom they take their name, the Khamtis, said to be of the Tai or Shan family who are most numerous on the Chinese side of the mountains; the Singphos, who are found in large numbers also on the Burmese side of the mountains; the Aror, the Nagas, the Kacharis, or Kosaris, north of the Brahmaputra; the Mikirs, in the hills near Nowgong; the Gars, of several clans; and on the slopes of the Khasia and Jaintia Hills, looking toward the Surma Valley, the Khasi and Jaintia tribes, and still another tribe of Nagas, are found. To these must be added the Kols, a tribe from Chota Nagpur, in Central India, who have been brought by the Government into Assam to work in the tea gardens. It is said that there are over 250,000 of them now in Assam.

It is believed that some of the largest of these tribes are either closely affiliated to hill tribes in Burma, or, perhaps, identical with them; this is very probable in regard to the Singphos of Assam and Chittagong, and the Kachins of Upper Burma; also the Nagas of Assam and the Chins of Upper Burma. The relationship of these tribes is a matter of some moment to those engaged in Bible translation for them.

Climate: Assam is wholly within the north temperate zone, tho in the subtropical part of it. Its location and the high hills and mountains which cover so large a portion of its surface should make it healthy, but do not. In the valleys there are marshy lands, and the season, moist, and variable temperature, with its terrible cold and its fervid heat, have rendered it particularly fatal to the Europeans and Americans who have spent much time there. It is frequently visited by the cholera, and both acute and chronic diseases of the liver prevail. Of late years the construction of good roads, and the drainage of the marshes for the establishment of tea gardens has somewhat improved the salubrity of the country.

Religions: The Assamese, as we have said, adopted Hinduism about 1760. They are rigid adherents to caste. One or two of the hill tribes on the north of the Brahmaputra, notably the Kacharis and several of the Bhutan hill tribes bordering on Assam at the north, are Mohammedans. The greater part of the hill tribes, including all those south of the great river—the Garos, Nagas, Khasis, Mikirs, Singhpos, etc.—are demon worshippers, making offerings to the Nats, or demons, to induce them not to inflict harm on them. They believe in a living Supreme Being, the Creator, but think He is too much occupied with the vast affairs of the universe to care for human beings, and too merciful to punish them for anything they have done or may do; and so they do not offer Him any worship or reverence. They believe dimly in a future life, but not in a state of rewards or punishments. In general, their religious belief is the same as that of the hill tribes of Burma. The tribes nearest to the Chinese have adopted some ideas of ancestral worship.

Missions in Assam: The first mission commenced here was that of the American Baptist Missionary Union, established in 1836 at the solicitation of Captain Jenkyns, the British deputy commissioner, who offered of his own means a considerable sum toward the expense of such a mission to the heathen under his charge. The first missionaries were Rev. Nathan Brown, an eminent missionary and scholar, who had begun his missionary life in Burma, and Mr. O. T. Cutter, a printer. The first station was at Sadiya, near the northeast frontier of Assam, about 400 miles from the Burman capital, and almost 200 from Yunnan, in China. The tribe to whom they were designated was the Khamtis, a hill tribe occupying both sides of the lofty range which separates Assam from China. The geography and ethnology of this region were not well understood, and the voyage up the tortuous Brahmaputra was exceedingly tedious, occupying over four months in the native boats. The missionaries, however, entered upon their work with a
stout heart, and, finding that there was little to be done among the Khamtis, they turned their attention to the Assamese and Shans in and around Sadiya. In 1839 an insurrection of the Khamtis commenced with great success on Sadiya, which necessitated the removal of the missionaries to Jaipur. Jaipur was abandoned from its unhealthiness and other causes, and Sibasagar, on a southern affluent of the Brahmaputra, was selected. This is now the chief town in Eastern Assam and is still a station of the ABMU. The station at Nowgong was established in 1841. The first Assamese convert was baptized the same year. In 1842 a school was opened there, with 80 pupils, and in 1843 the Nowgong Orphan Institution was established, which for many years was the means of doing much good. It was given up in 1856. The station at Gaubati was commenced in 1843. There were very few converts, and these Assamese only, till 1846. From this time till 1858 there were frequent accessions to the churches in Sibsagar, Nowgong, and Gaubati, mostly Assamese, with a few Kacharis and Nagas. In 1863 the first of the Garos, the fiercest of the hill tribes, was baptized, and soon became a missionary to his tribe. The same year one of the Mikirs was baptized. From these beginnings, the work spread with great rapidity till in the churches of the Garo Association, in 1877, there were 617 members.

The Kois from Chota Nagpur, who are employed in the tea gardens, began to attract attention in 1874. They are mostly in the district of Sibsagar. Some of them had heard of Christ from Lutheran missionaries in their home in Bengal, and in Assam they were ready to accept Him. There are now two or three large churches of these people. There have been some conversions among the Mikirs, who are best reached from Nowgong. There was considerable promise among the Kacharis, north of the Brahmaputra, the accessions from that tribe have not been large. Work was commenced among the Nagas as early as 1840, but without much result, when Rev. E. W. Clark made a tour of the hills. There are at least three distinct tribes of Nagas in these hills.

There are now 21 mission stations in Assam, of which 8 belong to the ABMU and 1 to the SPG, the remaining 12 belonging to the Welsh Calvinistic Methodist Society. The census returns 32,500 Christians in Assam of all denominations.

ASSAMESE: A language spoken in Assam, belongs to the India branch of the Aryan family of languages. It is written with the Bengali character and is used by about 2,000,000 people.

ASSOCIATE REFORMED PRESBYTERIAN SYNOD OF THE SOUTH: The foreign missionary work of this denomination began in 1875, when a missionary was sent to Egypt to work in connection with the United Presbyterian Mission Society. Upon her death this connection ceased and work was begun in Mexico. The field of operations is the State of Tamaulipas, with the central station at Tampico. There are (1902) 17 outstations, 11 missionaries, 7 native workers, 330 communicants, 182 pupils in five schools. Income about $9,000.

ASSUAN: A town in Upper Egypt, situated on the Nile near the first cataract. It is celebrated for its granite, and for the great irrigation dam finished in 1902. A station on the so-called Apostles' route, established by the Macedonian Brethren in Egypt in 1865, but afterward abandoned by them. Visited as an outstation by the United Presbyterian Mission of the United States of America. Station of the Scottish Pioneer Mission of Eisenach, opened in 1900. It is occupied by a missionary and 3 native workers. There are 2 village schools.

ASSYRION CHRISTIANS: A term sometimes used to designate members of the Nestorian Church.

ASYLT, or SIUT: A city on the Nile, 228 miles by rail south of Cairo. Population 30,000, mostly Mohammedans. It was formerly a principal seat of the slave-trade, and an important military station. It is now noted for a great irrigation dam on the Nile, finished under English auspices in 1903, subsidiary to the great dam of Assuan. Ruins and catacombs abound in the neighborhood. It is a mission station of the United Presbyterian Church of the U. S., established in 1865, with 14 missionaries of both sexes, a hospital and dispensary, a high school for girls and a college.

ATAFU ISLAND: Also called Duke of York's Island, is one of the Tokelau group of islands, N. of Samoa.

ATHEBASCA LANDING: Settlement on the Athabasca River in the district of Alberta, Canada; station of the CMS, with a missionary and his wife.

ATI. See Hervey Islands.

ATRAULI: A town of 15,000 inhabitants N. E. of Aligarh, United Provinces, India; station of the ME, with 10 native workers, men and women; 11 Sunday schools, 7 village schools, and 900 church members.

ATTABARI: A town in the Darang district of Assam, India; station of the SPG, with one missionary and 10 native workers, 8 preaching places, 5 common schools and 800 communicants.

ATTANGAL: A town in Travancore, S. India; station of the LMS (1899), with 2 missionaries and their wives, and 34 native workers, men and women; 12 outstations, 14 Sunday schools, 21 common schools and 110 church members. Also written Attinjali.

AUSTRALIA: A city on the Hauraki Gulf, New Zealand. It has, including the suburbs, 57,000 inhabitants, chiefly English, Irish, Scotch, and Germans, engaged in working the gold and coal-mines near the town and in the manufactories whose products form the chief exports. Station of the CMS, with one missionary and 28 native workers, and 80 communicants.
AUER, John Gottlieb: Born at Neubulach, Wurttemberg, Germany, November 18, 1832. He was well trained by an earnest Christian mother. In 1854 he was admitted to the Missionary Training School at Basel, and in 1858 was sent as missionary to Akropong in W. Africa, and became a teacher in the seminary. In 1862 he dissolved his connection with the Basel Missionary Society, offered himself as a candidate for the ministry in the Episcopal Church, and was ordained by Bishop Payne at Cavalla. In 1863 his wife died, and shortly after he sailed for America. Returning to his field in 1867, he devoted himself to two definite objects—a higher education for the African Church and a systematic preparation for giving to the heathen the Gospel in their own tongue. Acceding to Bishop Payne’s request, he became the head of the high school at Cavalla. He was faithful in his work and the people in their vernacular. In addition to the work of teaching, he translated or composed books in the Kroo language and the Grebo. He prepared a Grebo primer and dictionary, and revised the translation of the Prayor-Book. He taught by a method using the Grebo tongue. To this he added a book of chants. The translation of parts of the Scripture and Church Services into Grebo, begun by Bishop Payne, he completed. On November 20, leaving his family, he started for Africa. Three months after arriving at Cape Palmas, December 29, he entered earnestly on his mission work. He died, February 16, 1874, at Cape Palmas.

AUKA NEGROES: Descendants of former runaway slaves in Surinam, who during a century and a half have become a large tribe inhabiting the country southeast of the river Ganges. Moravian missionaries have labored among them since 1765 and have won about 30,000 of them to a profession of Christianity.

AULUA: A village on the island of Mallicolo, New Hebrides group, Polynesia; station of the New Hebrides Missionary Society, with a mission house for 17 native workers, 17 men and women, 9 village schools, and 62 church members.

AURANGABAD: In the Nizam’s Dominions, India, 180 miles northeast of Bombay. Its population is about 34,000. It is a station of the CMS, opened in 1860, and now occupied by 5 missionaries and 54 native workers, men and women. There are 14 village schools, and 800 communicants.

AUSTRAL ISLANDS: A group of small islands lying S. of Tahiti and belonging to France. The Paris Evangelical Mission Society has occupied the islands of this group, of which Rurutia is the largest, taking over the field from the LMS, after the islands passed under French control. There are 8 native workers and about 650 communicants in the group.

AUSTRALIA: When Australia was discovered the aboriginal race inhabiting it were found to be a nomadic people, very low in the scale of human life. Anthropologists have difficulty in classifying them and in tracing their origin. Their languages have also puzzled philologists, as “they have little or no connection with that stock to which the Malay, Polynesian, and Melanesian belong. Dr. Bleek, whose reputation gives weight to his opinion, believes them to be nearly allied to the languages of southeastern Africa.” This article will be limited to some mention of various efforts to evangelize these aborigines, and all those directed to the Asiatic immigrants in different parts of Australia.

The first missionary effort for the aborigines was made at Lake Macquarie in 1825 by the LMS. Many of their agents passed through Sydney, and some of them had found an asylum there during times of peril at Tahiti. After six years of failure from the roving habits of the blacks, the London Missionary Society gave up the work, but the Colonial Government continued it, and in 1847 Dr. Threlkeld persevered amid many trials and discouragements, acquired the language, printed a spelling-book and translations of parts of Scriptures. But little impression was made upon the people and the tribes around Lake Macquarie having become almost extinct, the mission was closed in 1861.

In 1832 a mission was established at Wellington. The same difficulties were encountered there, but the missionaries did their best to acquire the language of the district, to teach the young, and to address the people. They composed a grammar and a vocabulary, and translated portions of Scriptures, chiefly St. Luke’s Gospel, and a part of the Anglica Liturgy. But they had to admit that the supply of food and materials for the mission was what drew the people to them. As the country became settled the influence of vicious whites rendered nugatory all efforts, and in 1847 the mission was broken up.

Through the influence of an eminent clergyman of New South Wales, Pastor Gassner of Berlin sent out several missionaries in 1840 to labor among the aborigines at Moreton Bay and Keppel Bay. But the enterprise came to nothing after eighteen years of continued effort. About 1850 Rev. William Ridley attempted missionary labor among the aborigines of New South Wales. He devoted his means and himself to the work, learned the language of the people among whom he lived on the Namoi River, prepared a grammar of the language and translated portions of the Gospel narrative. His labors were not entirely in vain, but the migratory habits of the people forced him to abandon his mission.

More recent efforts in New South Wales have been on the plan of forming reservations for the residence and work of the aborigines and for educating the children. In this the Government has become the protector of the tribes, and the Moravian Missionary Society and the various Christian denominations in Australia have worked perseveringly to use their enlightenment and elevation. Missionary effort for the aborigines is carried on at 26 stations in the various parts of the Australian continent. But only a limited number of the tribes will submit to the
restrictions of life on a reservation. A certain number of these degraded people have become Christianized, but the general result of all these years of effort is the discouragement resulting from dealing with a dull and unstable people.

The total number of the Aborigines now existing in Australia is about 55,000. Of these about 5,000 are classed as civilized in the census reports.

Attracted by the gold fields and by the encouragements to industry, many thousand Chinese emigrated to Australia. Numbers of them are engaged in merchandise, others in gold mining, many in market gardening and other industrial work. Some of them can read and write, and all are accessible to Christian influence. The existing in Australia is about 55,000. Of Christianized, but the general result of all these demanding for cheap labor, and vessels were sent to the chief centres where they have been located. These about 5,000, are classed as civilized in the 1888 in Australia were about 40,000, and even the restrictive legislation directed against them has not reduced their number below 30,000 (1901).

Attempts have been made by the different churches to establish missions among them in the chief centres where they have been located. The agents have been chiefly Chinese converts, but commonly superintended by European missionaries who know the Chinese language. A gratifying amount of success has attended this effort.

Sugar planting in Queensland led to a great demand for cheap labor, and vessels were sent to recruit among the New Hebrides and Solomon Islands for laborers under an engagement for three years. Many evils sprang up in this deportation, and statutes were passed by the Imperial Parliament and by the Parliament of Queensland to regulate the labor traffic. As a result, a large number of Polynesians have been brought to Queensland during twenty years. Some of these were recruited near mission stations, and had been instructed in Christian truth. Most of them were from heathen and cannibal islands. All of them, however, had heard of the missionary, and had been led to respect his efforts for their good. Unfortunately the languages of these islands are almost all different, and on one sugar plantation the laborers represented so many various tongues that missionary teaching in any one of them could only be very limited. But as there are more than 9,000 in Queensland the necessity for reaching them in some way has led to the use of the English language in missions among them. This they pursue very readily and encouraging results are reported.

AUX CAYES: A seaport town on the south-west coast of the island of Haiti, West Indies. Population, 8,000, chiefly negroes and mulattoes. The climate is unwholesome. The manufacture of rum is one of the principal industries. It is a mission station of the PE, which has a native worker and about 50 communicants. The Western Annual Conference of the West Indies Wesleyan Methodist Missionary Society, and the African Methodist Episcopal Church also have agencies here.

AVÉZA: Village on the island of Raiatea, Society Islands, Polynesia; station of the Paris Evangelical Society, with a native worker and 170 church members.

AWEMBA: A settlement to the S.W. of Lake Tanganyika in British Central Africa; station of the LMS (1900) with a missionary and his wife.

AXIM: A seaport on the coast of the Gold Coast Colony, W. Africa; station of the WMS, with a missionary and 52 native workers, men and women, 65 outstations, 12 Sunday schools, 10 village schools, and 360 church members.

AZAMOR: A town near Mazagan, Morocco; station of the Southern Morocco Mission, with a missionary and his wife, and a dispensary.

AZERBAIJAN TURKISH: See Turkish.

AZIMGARH: A city sixty miles north of Benares, British India; station of the CMS since 1831. The Society has there 5 missionaries and 19 native workers, men and women, with a high school and 8 village schools. The religions of the people among whom they work are in general Hinduism and Mohammedanism. There are about 100 Christians connected with the mission.

B

BA: A town on Viti Levu, Fiji Islands; station of the Australian Wesleyan Methodist Missionary Society, with 1 missionary and 628 native workers, 283 Sunday schools, 330 village schools, and 7,475 professing Christians.

BAAKLEEN: A village of the Lebanon district in Syria; station of the Palestine and Lebanon Nurses’ Mission, with 4 missionary women, 2 native workers, 1 dispensary, and 1 hospital.

BAALBEC: A town of Syria, northeast of Beirut. It is celebrated for its ruins of the Temple of the Sun. It is a station of the British Syriac Schools’ Committee, with 2 missionary women and 3 native women workers, 1 village school, a high school, and a dispensary.

BABIS (pron. Babees): A sect among the Mohammedans of Persia. In 1846 a young mollah of Shiraz, named Mohammed Ali, commenced to preach against the vices of his coreligionists. His bold invective against the corruption of the religious hierarchy won instant response from the common people and gave him great popularity as a preacher. It also aroused fierce anger among the men whose hypocrisy and luxurious living he attacked. He began to claim that he was divinely ordained to reform the religious faith and practise of the country, quoting from the Bible and the words of Christ as well as from the Koran in support of his teachings. As he diverged more and more from the doctrine that the teachings of the Koran have superseded all earlier revelations, he began to defy the mollahs of Shiraz to harm him, declaring himself to be the Bab, that is to say, the “door” or forerunner of the Mahdi who is to come in the last days to reform religion. Threatened with punishment by the chief Mohammedan
Bacheler, Rev. Otis Robinson, M.D.: Born in Antrim, N. H., January 17, 1817. In the spring of 1839 he was accepted as a medical missionary by the Free Baptist Mission Society; and after continuing his studies for another year, he sailed, with his wife, for India. He made Balsor the center of his work until 1851, when he returned to America. On his return to India, in 1863, he settled at Midnapur, where the rest of his missionary life was spent. His dispensary proved to be a great blessing to many, and through its influence hundreds were attracted to the Gospel message. When he returned to India from America he brought a printing press, which was of great use in his work; and in 1886 he became principal of the Midnapur Bible School, which position he held until he retired from the field. After spending 33 years as a missionary he retired in 1893, and passed into his rest at New Hampton, N. H., on New Year's morning, 1901.

Badaga Language: Belongs to the Canarese group of the Dravidian family of languages. It is spoken by the Badaga tribe, living in the Nilgiri hills south of Mysore, India. It is written with the Canarese letters.

Badagri: A city near Lagos, W. Africa, formerly important as a trading center. It is a mission station, opened by the WMS in 1842, and transferred to the CMS in 1845; it has 5 native workers, men and women, with 2 outstations, 3 village schools, and 102 communicants.

Badulla: A town and military post in the southern central part of Ceylon; station of the CMS, founded in 1819. At present the station is occupied by 4 missionaries and 37 native workers, men and women. There are 6 outstations, 19 village schools, 1 high school, 1 industrial school, 1 hospital, 2 orphanages, and a printing house. There are 80 church members.

Baddegama: A village N. of Galle in the southern part of Ceylon; station of the CMS, founded in 1819. At present the station is occupied by 4 missionaries and 22 native workers, men and women. It has 3 outstations, 35 village schools, and 1 high school. There are 220 communants.

Baghara: Town in the north of the Santal Parganas, Bengal, India; station of the CMS (1875), with 2 missionaries and their wives, 18 native workers, men and women, 9 village schools, and a high school, and 75 communicants. Also written Bhagaya.

Bagchejik. See Bardezag.

Bachlad: A city of the northern Mesopotamia, capital of the province of Bagdad, in Asiatic Turkey. It is situated on the Tigris, about 250 miles north of its confluence with the Euphrates. The climate is healthy because of the elevation, which is about 2,000 feet. It is a station of the WMS, with 3 missionaries and 37 native workers, men and women. There are 6 outstations, 19 village schools, 1 high school, 1 industrial school, 1 hospital, 2 orphanages, and a printing house. There are 80 church members.

BAGHARA: Town in the north of the Santal Parganas, Benga, India; station of the CMS (1875), with 2 missionaries and their wives, 18 native workers, men and women, 9 village schools, and a high school, and 75 communicants. Also written Bhagaya.

BAGCHEJIK. See BARDEZAG.

BADAGA LANGUAGE: Belongs to the Canarese group of the Dravidian family of languages. It is spoken by the Badaga tribe, living in the Nilgiri Hills south of Mysore, India. It is written with the Canarese letters.

BADAGRI: A city near Lagos, W. Africa, formerly important as a trading center. It is a mission station, opened by the WMS in 1842, and transferred to the CMS in 1845; it has 5 native workers, men and women, with 2 outstations, 3 village schools, and 102 communicants.

BADULLA: A town and military post in the southern central part of Ceylon; station of the CMS, founded in 1819. At present the station is occupied by 4 missionaries and 37 native workers, men and women. There are 6 outstations, 19 village schools, 1 high school, 1 industrial school, 1 hospital, 2 orphanages, and a printing house. There are 80 church members.

BADDÉGAMA: A village N. of Galle in the southern part of Ceylon; station of the CMS, founded in 1819. At present the station is occupied by 4 missionaries and 22 native workers, men and women. It has 3 outstations, 35 village schools, and 1 high school. There are 220 communants.

BAGHARA: Town in the north of the Santal Parganas, Bengal, India; station of the CMS (1875), with 2 missionaries and their wives, 18 native workers, men and women, 9 village schools, and a high school, and 75 communicants. Also written Bhagaya.

Kurdistan. It was long the seat of a British resident, and it still ranks very high as a diplomatic post of Great Britain, Russia, and France. Baghdad has been the starting point for the various expeditions to explore the ruins of Babylon at Hilleh, on the Euphrates, 100 miles to the south, and of Seleucia and Ctesiphon. Since the University of Pennsylvania has been excavating at Niffer, Baghdad has been made the seat of an American consulate. Missionary work has been attempted at various times by the ABCFM and the CMS. The intense heat of the climate makes it very trying to Europeans. At present it is occupied as a station by the CMS, with 8 missionaries and 7 native workers, men and women, who have charge of 2 village schools and 1 hospital. There are 35 communicants here.

BAHAWA: A village in the Santal Parganas, Bengal, India; station of the CMS. It is occupied by a missionary and his wife and 41 native workers, men and women. There is 1 high school and 1 dispensary, and there are 545 church members.

BAHRAICH: A town in the United Provinces, India; station of the M.E., founded in 1867. It has 35 communicants here in 1871; and has 4 missionaries and 1 native worker, men and women, and 1 common school. It is also a station of the SBC, opened in 1882. There are now 3 missionaries and 15 native workers, men and women, with 27 outstations and 516 church members.

BAHREIN: The largest island of the Bahrein group in the Persian Gulf, off the coast of El Hasa, in Arabia; station of the RCA Arabian Mission (1892), with one missionary and his wife and a dispensary.

BAHREIN: The largest island of the Bahrein group in the Persian Gulf, off the coast of El Hasa, in Arabia; station of the RCA Arabian Mission (1892), with one missionary and his wife and a dispensary.

BAHLUNDA: A region in the district of Benguela, Portuguese West Africa. It lies on the uplands about 200 miles from Benguela, its seaport. The climate is healthy and the temperature, altho hot, is even. A mission station of the ABCFM was opened there in 1881; occupied by 2 missionaries and their wives, 2 missionary women, and 5 native workers. There are 9 outstations, with 1 high school and 2 village schools. There are 25 church members. The station has been much harassed by the bad feeling of European traders which has excited the suspicions of the native tribes.

BALASOR: A seaport of Orissa, Bengal, India, 150 miles southwest of Calcutta. Population about 20,000, Hindus and Mohammedans. Language, Uriya, Santali, Hindustani. First mission station occupied by the American Free Baptist Mission Society in 1838. It has now 2 missionaries and their wives, and 3 missionary women, with 74 native workers, men and women. There are 2 outstations, 8 village schools, 1 high school, 1 kindergarten, 2 orphanages, and 230 church members. Also written Balasore.

BALDWIN, Stephen Livingston: Born at Somerville, N. J., January 17, 1835. His ministerial life covered a period of forty-four years. One half of this time was spent as a missionary in Fuchau, China; eight years he was pastor of churches in the Newark and New England Conferences, and the last fourteen years of his life were devoted to the work pertaining to the office of Recording Secretary of the Missionary Society of the Methodist Episcopal Church. On October 4, 1858, Mr. and Mrs. Baldwin sailed for China. In 1861 he returned to America, on account of the failing health of Mrs. Baldwin, who died at sea; but the next year he was in Fuchau again, remaining there until 1870, when he was granted a year's furlough at home. The Fuchau Conference appointed him a delegate to the General Conference of 1880; and he was a member of the Ecumenical Conference held in London in 1881. While he was pastor of St. John's Methodist Episcopal Church, Boston, he was elected in June, 1888, Recording Secretary of the Missionary Society of the Methodist Episcopal Church, in which he continued until he died in Brooklyn, N. Y., July 28, 1902. Dr. Baldwin rendered important services as General Secretary of the Ecumenical Missionary Conference held in New York City in 1900. Under the strain of the work of organizing this Conference, his health gave way, and that important service to the cause of missions doubtless hastened his death.

BALI: An island situated E. of Java. The people are heathen, but a few Mohammedans and some Christians are found there. The language is allied to the Javanese. The Utrecht Missionary Society has a station upon this island and seems, after many vicissitudes, to have gained a stable foothold.

BALIGE: A village on Lake Toba in the North Central part of Sumatra, East Indies. Station of the Rhenish Missionary Society, founded in 1881. It is occupied by a missionary and his wife, with 10 native workers, men and women. There are 5 outstations, 4 village schools, and 1,400 communicants.

BALL, Dyer, M.D.: Born at West Boylston, Mass., June 3, 1796; graduated at Union College, 1826; studied theology at New Haven and Andover; ordained, 1831; was agent in 1833 for Home Missionary Society in Florida. While at the South he was much engaged in the colored population. In 1835-37 he studied medicine with reference to foreign mission work, and received the degree of M.D. from the medical institution in Charleston. He sailed in 1838, under the ABCFM, for Singapore. Here he was stationed there two years, teaching, preaching, healing the sick, and superintending the printing of Chinese books. In June, 1841, he went to Macao, and then to Hongkong. To him it was given to be the pioneer in opening the city of Canton for residence of missionary families, and
to open the way for excursions into the country around. His medical services were of great assistance in conciliating the good-will of the people. His Almanac was for many years a most acceptable publication. He was most laborious in out-of-door work, mingling with the people on the banks of the river or on the ferries, and then extending his visits to the villages and market. In this way he became widely known and more and more respected as his true character and the nature of his labors were understood. In 1854 he visited the United States, returning in 1857, to Macao. His constitution was much broken, and before his death he was confined to his house four months. During the last seven years of his life, the old man, bowed down by his infirmities, and leaning upon his cane would make his way downstairs and totter out to the little chapel opening on the street, and there, seated in an arm chair, he would peruse the tracts or speak to passers who might drop in to look upon his gray hairs; for the Chinese venerate old age. He died March 27, 1866, after twenty-eight years' mission service.

BALLANTINE, Henry: Born at Schodack Landing, on the Hudson, near Albany, N. Y., May 22, 1808. He graduated at the University of Ohio, Athens, 1829; entered Theological Seminary, Princeton, but left on account of ill health; resumed his studies at Union Theological Seminary, Virginia; finished at Andover, 1834; ordained at Columbus, O., April, 1836; sailed same year as a missionary of the American Board for India. In 1837 he was stationed permanently at Ahmadnagar. His health failing, he left, in 1850, for home, but returned in 1862. He labored with great zeal and without interruption as preacher and pastor, and as editor and translator until 1865. During the last five years of his life he gave much time to the theological education of young men. By medical advice he left India with his family, September 4, 1865. An accidental detention on the ship in the Red Sea aggravated his malady, and he died November 9, off the coast of Portugal, and his body was consigned to the ocean. His connection with the mission covered thirty years. An accurate knowledge of the Marathi, added to an acquaintance with Sanskrit, prepared him to become a translator of the Bible, and he has left the impress of his idiomatic Marathi on many parts of the sacred volume in that language. He translated or composed some of the best hymns in the Marathi hymn book.

BALRAMPUR: Town in the Gonda district of the United Provinces, India; station of the ME, with 18 native workers, men and women, 9 Sunday schools, 1 village school, and 170 church members.

BALUCHI LANGUAGE: Belongs to the Iranian branch of the Aryan family of languages, and is spoken in Baluchistan, by a population of about 3,500,000. It is written with Arabic letters with slight modifications.

BALUCHISTAN: A country of Asia, bounded on the north by Afghanistan, on the east by British India, on the south by the Indian Ocean, and on the west by Persia. Its area is about 130,000 square miles. The population is estimated at about 500,000, divided into two sections, the Baluchis and the Brahuis—which are sub-divided into tribes and again into families. The Baluchis have several points of resemblance to the Tartars and may perhaps have sprung from a confluence of Persian and Tartar stock. The Brahuis seem to have a linguistic affinity with some of the tribes of the Punjab. Mohommedanism is the religion of the general mass of the population.

Baluchistan is ruled by the Khan of Khoil and under the direction of an English resident. For strategic purposes the British authorities have built a railway from India into the country, and an English garrison is maintained at Quettah.

Missionary operations are limited to one station of the CMS at Quettah. There have been a few conversions notwithstanding the fanaticism that would apply the sword to every man who abandons Islam. On the whole, the greatest encouragement is found in the steady circulation of the Scriptures from the Quettah depot.

Baluchistan, Hughes (A. W.), London, 1877.

BANDA: The capital of a district of the same name, United Provinces, India. It is situated on the Ken River and has about 24,900 inhabitants. It is a station of the SPG, opened in 1873, and is now occupied by 1 missionary and 2 native workers, a hospital and a theological class. There are 32 communicants.

It is a station also of the ME with 10 native workers, men and women, and 7 village schools. There are 40 church members.

BANDAWE: A town on Lake Nyasa, Central Africa, in the W. Nyassa Protectorate, station of the UFS, with 7 missionaries and 38 native workers, men and women. It has 22 outstations, 1 high school, 55 village schools, 1 dispensary and 450 church members.

BANDOENG: A town in the west central part of the island of Java, Dutch East Indies; station of the Netherlands Missionary Union, with 2 missionaries and 4 native workers, a hospital and a theological class. There are 50 communicants. Also written Bandung.

BANGALORE: A city of Mysore, India, 175 miles west of Madras. It is on an elevated site, a great resort for invalids; it has considerable trade, and is a military post. Population, 180,000, chiefly Hindus.

It is a station of the LMS (1820) with 7 missionaries and 22 native workers, men and women, 1 theological class, 2 high schools, and 12 village schools. There are 121 church members.

Station of the WMS with 9 missionaries and 174 native workers, men and women. It has a theological seminary, 3 high schools, and 37 village schools. The communicants number 630.

Station of the SPG (1837) with 7 native workers, men and women, 2 village schools and 405 communicants.

Station of the Church of England Zenana Missionary Society, with (1902) 5 women missionaries, 2 of them physicians) and 14 native women workers, a dispensary, a hospital, an orphanage, 3 elementary schools, and 6 zenana pupils.

Station of the Leipzig Missionary Society, with 7 native workers, 3 high schools and 400 communicants.

Station of the ME, with 3 missionaries and 7 native workers, men and women; it has 2 high schools, and 14 church members.
Station of the American Advent Missionary Society, with 1 missionary, 3 native workers and a printing house.

**BANGKOK:** Capital of Siam, on the Menam River, about 20 miles from its mouth. It is the chief commercial center of the country. Climate, intensely hot in summer. Population, 400,000; 40,000 Chinese, Burmans, Malays, Arabs, Hindus; nearly one-half of the entire population is Chinese and practically the whole of the commerce of Bangkok is in their hands. The approach of the city is very beautiful, and some of the temples are very fine specimens of elaborate decoration. A large number of the houses are built on rafts, and the internal traffic of the city is largely carried on by canals, the streets and bridges have been built and electric cars introduced in some quarters.

Bangkok is occupied as a missionary station by the ABMU (1833), with 3 missionaries and 7 native workers, men and women, 4 outstations and 190 church members. It is also a station of the PN (1840) with 10 missionaries, men and women and 2 native workers, 2 high schools, a common school and a printing house. There are also 187 church members.

The AB5 has a Bible depot there in charge of an American agent.

**BANJERMASIN:** Chief town of the Dutch Residency of the same name in S. E. Borneo, situated near the seacoast. It has about 45,000 inhabitants. It is a station of the Rhenish Missionary Society, with a missionary and his wife, 1 unmarried woman and 6 native workers, men and women. There are 2 outstations and 4 village schools. The communicants number 140.

**BANKURA:** Capital of the Bankura district, Bengal, India, 100 miles N. W. of Calcutta. Population, about 19,000. Mission station of the WMS; 4 missionaries and 36 native workers, men and women, 6 outstations, 2 high schools, 18 village schools, 97 church members.

**BANKU:** A town in Bengal, India, a station of Patna. Mission station of the BMS (1818); 2 missionaries and their wives, with 12 native workers, men and women. It has 3 outstations and 5 village schools. The communicants number 26. Also written Bankipore.

**BANKPUR:** A town in the Gonda region, Central Provinces, India; station of the Friends’ Foreign Missionary Association (1896), with 1 missionary and his wife, 2 native workers, 1 village school, 1 dispensary and 10 professing Christians.

**BANNOO:** A town on the island of Fernando Po, in the Bight of Biafra, on the W. coast of Africa; station of the Primitive Methodist Missionary Society (1880), with a missionary and his wife, 1 native worker, a chapel, a Sunday school and 1 dispensary; and 30 communicants. Also called Edwarosabad.

**BANSA MANTEKE:** A town in the Congo Free State, West Africa, 160 miles from the mouth of the river; station of the ABMU (1879), with 7 missionaries and 48 native workers, men and women, 32 outstations, 34 village schools, a high school, a theological seminary, and 1,500 church members. This station is an instance of the pervasive power of the Gospel of Christ. When it was first occupied, the people were entirely unknown to the outside world and were living in gross darkness of paganism. Their language had never been reduced to writing. It was seven years before a single convert came forward for baptism, and he was threatened with death for becoming a Christian. Since that first conversion 2,000 of that Bantu tribe have been baptized; they have the beginnings of a printed literature; the people themselves have taken up the duty of evangelization, and everywhere within a radius of thirty miles of the station the pagans have the Gospel preached to them by their own countrymen.

**BANSKO:** A village in the Razlog district, European Turkey; outstation of the ABGFM; an independent self-supporting church has grown up in connection with the mission, composed of Bulgarians.

**BANTING:** A town in the district of Sarawak, Borneo; station of the SPG, founded in 1851; it has 1 missionary and 7 native workers, 2 outstations, 13 preaching places and a high school.

**BANTU RACE:** The preponderating element of the population of Africa from about the fifth degree of north latitude to Cape Colony (excepting the Hottentots, Bushmen and some smaller groups) is the Bantu race, numbering 60,000,000 or more. The name in almost all the languages of this region (Zulu, Abantu; singular Umantu person) means “the people.” Among the members of the Bantu race may be named the Zulus, the Amazosa or Kafirs the Bechuana, Basuto, and kindred tribes on the south; the Ovaherero, Ovambo, Balunda, Bateke and Mpongwe, on the west; the Congo, Bayansi, Bangala, Babangi, Manyema; the people of Toro and Uganda, the Angoni, and others among the Great Lakes; the Rua, Bemba, Babisa, and other tribes near the Lesser Lakes and on the sources of the Congo; and the Wakamba, Swahili, Wanika, Malawesi, Ngonde, Makua, and other tribes to the number of two hundred or more.

The general kinship of these tribes is seen, to some extent, in their person, their hue, their features, their religious notions, their hereditary type, and their mode of life; but most of all in their language. Taking their language as our guide and proof, we are left with no doubt that these tribes belong to one and the same family, between which and all other known families or races there is a manifest and fixed difference. To be sure, the languages of the tribes differ from each other in many respects, especially in many of their words, or in the forms of their words, but the grammar is essentially the same in all.

The more the comparative philologist comes to know of this Bantu family of languages, the more does he find of beauty, compass, flexibility, and plastic power. All the best known dialects whether on the east, south, or west, or in the interior, are found to be soft, plaint, easy to sing, regular and systematic in form, philosophical in structure and principle, and wonderfully rich in ability to express all the shades of thought and feeling of which the people who speak them have knowledge. And it is specially interesting
to note that this great field of underlying, substantial oneness of speech is the one in which great Christian missions are being extensively planted, and are finding unexpected facilities in the wide expanse of the region where the Bantu languages prevail.

In respect to the origin of the Bantu race, and how, when, or where they came into the part of Africa they now occupy, the people themselves can tell us nothing. Nor does ancient history throw much light on the subject; and we are not, without some good reasons for opinions in relation to it. Some hold, with plausible show of reasons, that the Hottentots of S. Africa are of the same race as the ancient Egyptians, or at least that the two families were one in origin, and if so, then the fact of their being so widely separated points to the probable incoming of another people, as from the east, by which they were divided, and a portion of them pushed on to the southern extremity of the continent.

Inquiring now to which particular branch of the great families of men such an incursive, migrating race belonged, we can hardly doubt that it was Hamitic, having its origin probably in some branch of the Cushites. The descorable that this line means numerous, and some of them settled, for a time at least, in Asia. Others settled in Arabia, and doubtless many went at an early date to Africa. Herodotus speaks of two classes of Ethiopians, one in Asia, the other in Africa. Many of the former served as soldiers under Xerxes, tho their home is not easily determined. The historian, however, tells us that the Asiatic Ethiopians were black, like those of Libya, but differed from them in language, and had straight hair; whereas those of Libya had very curly hair. Now, between the Bantu tribes and the proper negro race, there is, to a certain extent, just this kind of difference at the present time. To be sure, the Bantu race is not white, and yet their hue is not so dark as that of the Nigritian negro, nor is their hair so woolly; and as to their language—that most decisive mark of an affinity between the Bantu languages and those of the real negro of the Sudan. Taking, then, all the suggestive facts together, it does not seem improbable that the immigrants who pushed the Hottentots before them to the southward were from Asia. If this was the case, it is easy to see why the Bantu peoples should be found at this day more robust, taller, of a lighter color, with hair less woolly, with a nose more elevated, of a much greater facial angle, a higher forehead, and altogether of a more intelligent, Caucasian look than their Nigritian neighbors. At the same time we see in the whole Bantu race so much of the true negro that we must come to the conclusion that if the Bantu family originated in any wise other than the negroes of Nigritia, it mingled with these until it was largely fashioned after their type.

The appearance, color, and customs of the Zulu are so like those of the other tribes of the Bantu family that a description of the former will give a good idea of all. The better classes of these tribes, especially of the Zulu and the Kafir, are somewhat slender, erect, of good stature, and well proportioned; it is easy for them on occasion to be graceful, dignified, commanding. They are made to be agile and swift rather than strong; and yet their women often carry heavy burdens on their heads for long distances. Their color varies from a reddish copper or light bronze to a pure black. The latter, with just a little tinge of the red, pleases them best. A few have the regular features of the Caucasian; some, the pure negro; but most of them are of some grade between the two. Their black eyes often twinkle with merry humor, their beautiful white teeth are straight and even, and their expression is pleasant and confiding. Physically considered, the Bantu tribes are a well-built, fine-looking race.

In respect to natural affection, mental traits, and social life, the Bantu race afford an interesting study. Except when provoked to anger by insult or injustice, they are mild, gentle, kind, not wanting in either parental or filial affection; are helpful and sympathetic toward the suffering; and yet, under a sense of being wronged or in the excitement of war, they can be wild and fierce in the extreme. They are hospitable, fond of visiting, fond of society, cannot bear to work alone or be alone. They are proverbial for politeness, have numerous rules of etiquette, which are generally sensible. They are quick to see the difference between right and wrong, ever ready to decry injustice, and to submit gracefully to the suffering of deserved punishment. During the writer’s residence of many years among the Zulus, with whom he had almost no lock and key in use, his grain, tools, cattle—everything they most desired—being open to access, he was not aware that anything was ever stolen from him. He once thought they had taken a hatchet, but after months had elapsed and the annual burning of the grass had occurred he found it in a field just where he had used and left it. And yet the common, social life of the Zulu is far from perfect. As one has said, “He is far from being as honest in word as he is in acts. He is prone to have very large reservations in his own mind and almost no lock and key in use. And yet he can hardly be said to be vindictive in his resentments. If the storm of passion is quick to rise, it is also quick to abate and be forgotten. It would take a volume to describe the superstitions of these people. Of all their superstitions, none have upon them a stronger or more hurtful hold than their belief in what is called witchcraft. They believe certain evil-minded men, whom they call abaka, have it in their power to hurt, kill, or destroy anybody or anything, by the use of poisonous powers, invisibility, or even by the force of mere will or purpose. Of these so-called witches the people have great fear. And so it is that any calamity, sickness, or death is often ascribed to some influence of this kind; whereupon some Iyanga, witch doctor, is called to ‘smell out’ the author. He is not at all And inasmuch as all the possessions, wives,
children and cattle of the man found guilty are to be confiscated and portioned out. The chances are that the sentence will fall upon one of the more wealthy men, especially if he may happen to be unpopular.

The Zulu witch-doctor is a term of wide import and use. It may denote one who has a trade, as a blacksmith, a basket-maker, or one whose business is to help others across a river. Its more proper use is to designate those who are skilled in higher pursuits, such as the learned doctors, a witch-doctor, i.e., one qualified to find out the cause and cure of evil by communicating with the shades of the departed. A Zulu's mode of preparing himself for one of these higher professions is to go through a long-continued course of rigorous training, by means of fasting branches. He makes his appearance in public, all besmeared, perhaps with white clay, his head full of snakes, and so prepared to be recognized as the subject of religious interest and dependence, possessed of the power of knowing the future, and therefore the oracle of the tribe.

The religious views and practices of the Zulus correspond, in a measure, to all the essential elements of the true faith; only on a false basis. They have their divinities, their sense of obligation, a sense of dependence, a belief in the need of help, need of a Savior, need of sacrifices, even unto blood, need of prayer, the duty of worship and service, and a belief that the present life is to be followed by another. In their ignorance of the true God and in their search for some kind of divinity, they turn to the spirits of the departed, the shades of their ancestors, especially the ghosts of the great ones of their race. For here too Ancestor-Worship is practised. They call these shades by various names, as Ilozi, plural amilozi; Xuma, or Xumani. Ask them about the end of man, where he goes when he dies, and they say he becomes an amilozi and goes off to live somewhere underground, to there to build and abide with his ancestral friends. Sometimes they say the dying man becomes an aumulozi (spirit) and reappears from time to time in a smoke; and so it is that they stand in awe of a serpent, and say, when it appears about their houses, that the spirit of their friend has come back to visit them, and see how they fare. Lions and leopards are sometimes looked upon as the embodiment of the spirit of a departed friend. To the shades of the dead, they look for help in time of trouble, confess their sins, pray, and offer sacrifices. Such for substances is the origin, kinship, appearance, and such are the religious ideas and superstition of the many tribes which form the Bantu race of Africa.

BANTU LANGUAGES: Among all branches of the Bantu race in Africa, the existence of kinship seems to be shown by the peculiarities of their language. The resemblances between the speech of widely separated tribes have not as yet been studied and fully interpreted. But enough is known to lead to a supposition that the Zulu and the Kafir-Xosa languages may be the oldest and most fully developed of the whole family. The Zulu would seem, also, to have been least affected by abrasion or other modification through contact with all language groups. Some portion has been developed, fixed, and kept by its own indigenous, automatic principles. Hence the belief that the distinguishing grammatical features of the entire Bantu family are more manifest and clearly defined in the Zulu than in the other of its branches. In Zulu, the incipient element of the noun, the nominal "prefix" or preformative, is more complete than in most of the Bantu dialects. Thus the prefix um, as in umfana, boy, is simply m, mphana, in some branches. Mponwe, the name of a country and tribe in the northwest part of the Bantu field, would be Umponwe in the southeast among the Zulus and Kafirs. The Zulu plural prefix, aba, as in abafuna, boys, becomes ba, as bajona, in some dialects. For person, the Zulus have umuntu; another tribe has mutu; and another, mtu; another, mundu. For the Zulu plural of this word, abantu, people, some other tribes say bantu; some, amtu; some, atu; some, umuntu, and some, umuntu. Mtesa (late king of Uganda) would be Mutshwe, the "Rock Breaker." The Zulu and Kafir tribal names, Amazulu, and Amazosa, would be, in some dialects, Maxulu, Mazosa, just as other tribal names in other parts of the Bantu field, such as Mako, Naravi, Msonya, would begin with a, as Amakusa among the Zulus.

Among the distinguishing grammatical features of the entire Bantu family of languages, one is what may be called a system of pronominal assimilations and repetitions. This mode is sometimes designated as the "alliterative," because of the frequent recurrence of some particular letter or syllable in a given sentence. Especially in the Zulu, nouns may be grouped into eight distinct classes, according to their "prefix" or incipient element. Each class of nouns has its own form of its substantives, agreement, and for this the relative is simply s. Each class and number has its own preformative letter to be used in forming the possessive; as, u, which passes over into its semi-vowel w, for the first class, singular; b for the plural; l and s for the second class; y and s for the third. Thus, for the possessive my or mine, we have, wami, bami; lamu, ami; yami, sami, according to the class and number of the noun, as, umfana wami, my boy; abafuna bami, my boys. For the possessive his or her, if the noun be of the first class, we have, bakwe, bakwe, etc.,
Bantu Languages

THE ENCYCLOPEDIA OF MISSIONS

according to the class of the noun possessed; as, kwefa wake, his boy; kweli lake, his word; kikwesa zake, his cattle. In the possessive, referring to persons, we have: suna, to one possessed, referring to persons; ina, to one possessed, referring to things; abana, boys; abantu, people; we have: wabo, babo, labo, ebo, yabo, etc., as, ilizwe labo, their word; kikwesomato, their cattle. And for the possessive, their, referring to nouns in izin, as ikwemba, we have, in like manner, izezwe, base, labo, etc., as, izezi lalo, their voice; izebayo zazo, their fold; izimpondo zazo, their horns.

One of the most important points in which the Bantu languages differ from the English and many others is found in the fact that, for the most part, the formative letters precede the root; that is, most of the inflections to which a word is subject, are made by changes in the beginning of the word; thus, kwefana, boy; abafana, boys; kikwemba, cow; izinkomo, cows; etc. Yet these, and others, are in the same formative root, a vowel, which really constitutes a vital feature of the language. So in the adjective: kwefana omkula, large boy; abafana abakwila, large boys; kikwemba enkulu, great cow; ilizwe elikulu, great word. So in the possessive pronouns: abafana bami, my boys; izinkomo sani, my cows; ilizwe lalo, my word.

This giving to the nominal incipient so much of molding influence over the pronouns and over the prefixes contributes largely to precision and the power of inversion. It is also thought by some to add to the euphony of the language. Indeed, some who at first failed to see that the principle really constitutes a vital feature of the language, were wont to regard it as nothing more of a kind of "euphonous alliteration."

From all this it will be seen that the Bantu languages allow great scope and variety in the arrangement of words in a sentence, and at the same time preserve clearness and precision.

One of the greatest defects of these languages, as might be supposed, is the paucity of words, as might be supposed, is the paucity of words, so as to form a significant compound. Indeed, some who at first failed to see that the principle really constitutes a vital feature of the language, were wont to regard it as nothing more than the kind of "euphonous alliteration."

From all this it will be seen that the Bantu languages allow great scope and variety in the arrangement of words in a sentence, and at the same time preserve clearness and precision.

Many of the names which the natives give to persons, places, rivers, mountains, are also compound terms, and, whatever simple or compound, the most of them are significant.

Perhaps no language can lay a better claim than the Zulu to an exemption from two great faults—on the one hand, that superabundance of vowels and liquids which produces excessive softness; and on the other, that superabundance of consonants which produces excessive harshness. The happy mean which it has observed in its inter-mixture of mute consonants with vocalic and liquid sounds makes it both pleasing to the ear and easy to speak.

One of the striking peculiarities of several Bantu languages is that sharp, shrill sound called a "click." It constitutes an elementary part of the word in which it occurs, as much so as its vowels or consonants, and is never found in the formative part. Of these clicks there are three kinds, each of which takes its name from the manner in which it is made, as the dental, the palatal, and the lateral. The origin of these peculiar sounds may, doubtless, be found in the onomatopoetic effort to suit the sound of the word to the thing signified.

The indigenous literature of all the Bantu tribes is very scant, since no alphabet exists with which to write out thoughts, folk-lore, songs, royal eulogies, and common law. They have a variety of unwritten, simple songs: evening songs, domestic songs, hunting songs, heroic songs, and religious songs, or songs in which they give expression to a wish or prayer. With the singing of these, accompanied with the gambu, a musical instrument of one string, they pass many an hour of leisure. Their language abounds in bold, figurative epithets and complimentary terms, of which they make great use in singing the praises of their kings. The royal court, upon great festal occasions, offers ample field for the royal rhapsodist or bard to pour forth his poetic imaginings in a most profuse and fervid style, speaking of the king to his face, as black and beautiful, tall and straight, a majestic elephant, a ravenous hyena, the merciless opponent of every conspiracy, the devourer, waster, smasher of all his foes: lovely as a monsieur of resistless might, "like heaven above, raining and shining."

BAPATLA: A town of the Kistna district, Madras, India, 40 miles east of Ongole. Healthful location. Population, chiefly Telugus; station of the ABMU (1883), with 2 missionaries and their wives, 1 missionary woman and 47 native workers, men and women, 29 outstations, 30 Sunday schools and 2,515 church members.

BAPTIST CONVENTION OF CANADA: Foreign Missionary Work of the: The first foreign missionary work of the Baptists of Canada was done in connection with societies in the United States. As early as 1838 a Society for the Maintenance of Foreign Missions was established at Chester, Nova Scotia. Seven years later the first representative of the Canadian Baptists on the foreign field was sent to Burma and later two others, to labor under the ABMU. The interest in foreign missions was not aroused in Ontario and Quebec till 1866, when a student in Woodstock College desired to go out as a missionary. But he seemed no way to send him. Dr. Fyfe, the principal, then wrote to the Secretary of the
ABMU. The result was a meeting of six pastors, with Dr. Fyfe and Dr. Murdoch of the ABMU, at the parsonage in Beamsville, Ontario, in October of that year. Here the Canadian Auxiliary to the ABMU was formed, and in October, 1867, just one year later, their first two missionaries went to the Third Mission of the ABMU. Two years later the Rev. John McLaurin, also a graduate of Woodstock College, and his wife were sent out.

Up to 1873 both sections of the Baptists of Canada worked in connection with the ABMU, supporting missionaries in Burma and among the Telugus of India, as well as a number of native helpers. In that year, however, both the eastern and western provinces established independent and separate foreign mission boards, while remaining in cordial sympathy with the ABMU.

The Foreign Mission Board of the Baptist Convention of the Maritime Provinces in 1873 sent out a party of seven missionaries to explore and, if deemed advisable, to establish a mission among the Karens of Siam; they failed to find Karens in sufficient number to warrant establishing a mission and the project was abandoned. At this juncture an invitation for them to cooperate with the new organization in the western provinces was accepted, and the missionaries were transferred to the Telugu country.

The Foreign Mission Board of the Baptist Convention of Ontario and Quebec, in 1873, was offered a mission of the ABMU, at Cocanada (Madras, India). The offer was accepted, and the Rev. John McLaurin was released from his supporting missionaries in Burma and among the Telugus of India, as well as a number of native helpers. In that year, however, both the eastern and western provinces established independent and separate foreign mission boards, while remaining in cordial sympathy with the ABMU.

Expect great things from God; attempt great things for God.
bers of the Society, and the secretary and treasurer of London auxiliaries are entitled to attend and vote at the meetings of the committee.

Statement of Missions: India: A mission to Tahiti, in the South Seas, was at first thought of by the Society, but this plan was changed by the accounts received from Mr. John Thomas, a surgeon in the employ of the East India Company at Bengal, of the great needs of India. Andrew Fuller, in his account of the meeting held to consider the matter, says, 'We saw plainly that there was a mine in India, but it was as deep as the center of the earth. Who would venture to explore it? I will go down,' said Carey, 'but remember that you must hold the ropes.' We solemnly engaged to him to do so, nor while we live shall we desert him.' In March, 1793, Carey and John Thomas sailed for India in a Danish vessel. They landed in Calcutta, November 10. Carey had told his society that he should require from it money sufficient to pay for his passage only, believing that in the end he could support himself. The years that followed were very trying. He found work in an indigo factory, perfected his knowledge of the Bengal language, wrote a grammar of it, translated the New Testament into it, learned Sanskrit, mastered the botany of the region, corresponded with the German missionaries, Schwartz and Guericke, in the far south, set up a printing-press, and planned new missions—all at his own cost. On his rude press, which, from his great devotion to it, the natives thought an idol, he printed the New Testament as fast as he translated it. In 1797 Mr. John Marshman reached Calcutta. In this year the indigo factory was given up, and on account of the persistent opposition of the East India Company, the little band of missionaries removed to the Danish settlement of Serampur, on the west bank of the Hugli, fourteen miles above Calcutta. Here they purchased house and grounds for church, home, and printing office. And here the mission was speedily commenced. Many of the boarding schools opened for Eurasian boys and girls, and conducted by Mr. and Mrs. Marshman. In December, 1800, Carey baptized the first Hindu convert, Krishnu Pal, a Brahman, who became a noted preacher, and from his own funds built the first house of Christian worship in Bengal.

Carey was appointed by Lord Wellesley, then Governor-General, first Bengali, afterward San­skrit and Marathi, professor in the College of the same table at a cost not much more than £100 a year. The work of translating the Scriptures, teaching, preaching, printing, and establishing schools was actively on. Before Carey's death (1834) the whole Bible had been translated into forty different languages and dialects, and the sacred books of the Hindus translated into Eng­lish. In addition, Dr. Marshman translated the Bible into Chinese, prepared a Chinese grammar and dictionary, and translated Confucius into English.

In 1812 the printing press at Serampur was destroyed by fire. The loss, £10,000, was raised within fifty days and sent to Serampur, where work was speedily resumed. This was the first instance of really large donations of money made by the missions.

The work extended to other parts of India, and many stations were established. In 1810 these stations were organized into five missions: the Bengal Mission, including Serampur, Calcutta, Dinajpur, etc.; the Hindustani Mission (Northern India); the Burman Mission; the Bodo Mission; and the Orissa Missions. In 1813 there were in all 20 stations, with 63 European and native laborers.

In 1827 the missionaries at Serampur and the Society at home became two distinct and independent missionary bodies, because of the refusal of the former, using in mission service a large amount of property which they had accumulated without the aid of friends at home, to render to the parent Society a strict account of their pecu­niary transactions. In 1854 the Serampur Brotherhood had contributed to the mission £90,060. A friendly separation was therefore agreed upon, which continued for ten years. In 1837 the two bodies were reunited.

There are in Bengal, Orissa, and the United Provinces of India 195 stations and out-stations of the BMS, 112 missionaries, 229 native workers, 7,335 communicants, 7,482 pupils in schools. The educational work includes the Serampur College, founded by Carey in 1829; Training Institutions at Cuttack and Delhi, besides elementary schools and orphanages. The Society also carries on special work among English speaking students and has a printing press in Calcutta.

Ceylon: The work of the BMS in this island was commenced in 1812 and has been largely educational. There are (1902) 80 stations and out-stations, 5 missionaries, 26 native workers, 1,033 communicants and 3,196 pupils in schools.

China: Several attempts were made by the BMS to commence mission work in this country, and since 1877 it has been carried on successfully. In 1902 there were 346 stations and out-stations in the provinces of Shantung, Shensi and Shansi, with 43 missionaries, 122 native workers, 4,652 communicants and 1,312 pupils in schools. This mission suffered severely during the Boxer troubles but has rallied well.

The fact that the Rev. Timothy Richard of Shanghai, Secretary of the Society for the Diffusion of Christian Knowledge among the Chinese, is enrolled among the missionaries of this Society is indication of the interest it takes in the supply of Christian literature for that Empire.

Palestine: This mission of the BMS has been carried on since 1880, with headquarters at Nablous. There were in 1902, 1 station and 5 out-stations, 2 missionaries, 7 native workers, 129 communicants and 90 pupils in schools.

Africa: From 1842-82 the Society had a most flourishing and hopeful mission on the West Coast of Africa. The West Indian churches, always desirous of sending the gospel to Africa, began, after their emancipation, to carry out their wishes. Generous contributions were made and the Society in England agreed to second their efforts. Two missionaries from Java chose for the new mission the island of Fernando Po, near the mouth of the Kameruns River, in the Gulf of Guinea. Several missionaries from...
England, with reinforcements from Jamaica, arrived there in 1842; the mission was firmly established, and soon extended to the coast of what is now the Kameruns; books were prepared and large portions of the Bible translated into the Duala language by Mr. M. Baker, from Jamaica, who had reduced it to writing.

The work at Fernando Po had, on account of Roman Catholic opposition, to be given up, and the settlement at Victoria, in the Kameruns, was transferred to the Basel Mission Society when that region became a German colony.

In 1877 Mr. Robert Arthington, of Leeds, England, offered the committee of the Society £1,000 if they would at once undertake a mission to the Congo country, in Africa. This proposal, and succeeding generous gifts, enabled the Society to begin operations, and missionaries were immediately sent out. Settlements were soon formed on the Upper and Lower Congo.

Many deaths have thinned the missionary ranks, but the places of those who fell were quickly filled and the work goes forward. In August, 1886, the mission premises at Stanley Pool were destroyed by fire; the missionaries were in great distress; but, as was the case at Serampur in 1812, the loss was quickly made good by the friends of the mission at home. Mr. W. Holman Bentley, one of the pioneers, has done efficient work in reducing the language to writing, and supplying literature.

In the two missions at the Lower Congo, including Matadi, San Salvador, Wathen and Zombo, and the Upper Congo, including Arthington, Bolobo, Lukoleba, etc., there are 1,902 members, 11 common schools and 35 Zenana pupils. Also written Baranagore.

In the two missions at the Lower Congo, including Matadi, San Salvador, Wathen and Zombo, and the Upper Congo, including Arthington, Bolobo, Lukoleba, etc., there are 1902 stations and outstations, 88 missionaries, 62 native workers, 607 communicants, 3,025 pupils in the schools. Most valuable auxiliaries to the work are the two river steamers, "Peace" and "Goodwill."
of Nicomedia, Asiatic Turkey. Its population, about 5,000, is entirely Armenian. The mission station of the ABCFM, formerly at Nicomedia, was transferred to this place largely on account of its healthfulness. There is a large Protestant community and a flourishing boys' school, where of late years the experiment of manual training has been made with great success. There is also an orphanage for boys whose parents were killed in the massacres of 1895-96. The Turkish name of the place is Baghchejik.

BARDWAN: Chief town of the district of the same name, Bengal, India. Population, 25,000. A station of the CMS with 3 missionaries, 1 with his wife, 5 native workers and 31 communicants, and 1 village school supervised by the Church of England Zenana Missionary Society. Also written Burdwan.

BARELI: A city of the United Provinces, India, on a branch of the Ganges, 122 miles southeast of Delhi. Population (1901), 131,208, chiefly Hindus. Station of the ME (1856) with 5 missionaries, men and women, 3 of them medical, 5 native workers, men and women, 1 hospital, 1 theological school, 1 orphanage, 1 high school, 27 village schools, 70 Sunday schools, Young People's Society, and 516 church members. Also written Bareilly.

BARHA WA. See BAHAWA.

BARINGA: A settlement in the Congo Free State situated on the Maringa River, about 200 miles from the Congo; station of the RBMU (1900), with 3 missionaries and 2 missionary women, 1 of whom is unmarried; 1 preaching place, a village school and a dispensary.

BARISAL: Capital of the district of Bakarganj, Bengal, India. Climate damp, but very healthful, and the coolest in all Bengal. Population, 16,000. Race, Bengali and Mugh. Language, Bengali, Arrakanese, and mixed Hindustani. A station of the CMS with 3 missionaries and 3 married missionary women, 14 native workers, 28 outstations, 52 Sunday schools, 60 village schools, Young People's Societies, 1,000 church members.

Also of the Baptist Zenana Mission (1871), with 14 married missionary women, 12 native workers, 3 Sunday schools, 8 village schools and 1 high school.

Also station of the Oxford Mission to Calcutta (1901), with 4 missionaries and a theological school.

Also station of the SPG (1869), with 19 native workers, 10 village schools and 234 communicants. Written also Burrisal.

BARRIPORE: A town and military station in Bengal, India, situated on the Hugli, 15 miles from Calcutta; station of the Church of England Zenana Missionary Society (1871), with (1902) 3 women missionaries and 22 native women workers, 11 common schools, 1 training home for converts and 43 Zenana pupils.

Station also of the WMS, with 1 missionary, 15 native workers, men and women, 5 outstations, 1 Sunday school, 1 high school, 2 common schools and 63 church members.

BARRANQUILLA: One of the important commercial cities of Colombia, S. America, situated on a cafon of the Magdalena River, about 20 miles from the sea. Population, about 40,000. It is a station of the PN (1888), with 2 missionaries and their wives, 3 unmarried women missionaries, 2 high schools, 1 common school, and 46 church members.

BARRIPORE: A town S. W. of Calcutta, Bengal, India; station of the SPG (1829), with 11 native workers, 15 chapel preaching places and 760 communicants.

BARROW POINT. See POINT BARROW.

BARROWS LECTURESHIP FOR INDIA: Lectureship on the Relations of Christianity to Other Religions founded at the University of Chicago, in 1894, by a donation of $20,000 from Mrs. Caroline E. Haskell of Chicago. The lectures, six or more in number, are required by the terms of the foundation to be delivered in Calcutta, and, if deemed best, in Madras, Bombay, or other important cities of India.

Large numbers of educated Hindus and Muslims are now familiar with the English language. To these scholarly and thoughtful men the lectures are to be directed, setting forth, in a friendly, conciliatory way, the great truths of Christianity, their harmony with truths found in other religions and their claims upon men.

Mrs. Haskell expressed a wish that the Rev. the valley of the Upper Zambesi, a vast and populous plain, 189 miles long by 30 to 35 broad, subject to periodical inundations and resultant fevers. The Barotse Empire was founded by a Basuto conqueror. The Barote Empire, since the foreign yoke, but the kingdom was maintained. It has been described as including 18 large nations subdivided into over 100 tribes. Each tribe speaks its own dialect, but Lesoto, the tongue of the exterminated Basuto (Makololo) conquerors, is the common medium of communication. The region occupied by tribes subject to the Barotse kingdom covers an area of about 100,000 square miles, with a population of perhaps 1,000,000. Europeans were long excluded from the country. Grain, vegetables, and cattle abound. The villages are built on artificial mounds for protection against the inundations of the Zambesi. The people worship the sun and the new moon, and observe feasts at the graves of their ancestors. The missions of the French Protestants have been very successful among the Barotses, and the paramount chief is a professing Christian who has visited France and England.

BAROTSELAND. See RHODESIA.

BARRA: A town N.W. of Rio de Janeiro in Brazil; station of the MES (1894), with a native worker, 1 outstation, 1 village school, 1 Sunday school and 171 church members. Also written Barra Mansa.

BARRACKPUR: A town and military station in Bengal, India, situated on the Hugli, 15 miles from Calcutta; station of the Church of England Zenana Missionary Society (1871), with (1902) 3 women missionaries and 22 native women workers, 11 common schools, 1 training home for converts and 43 Zenana pupils.

Station also of the WMS, with 1 missionary, 14 native workers, men and women, 5 outstations, 1 Sunday school, 1 high school, 2 common schools and 63 church members.

BARRAQUILLA: One of the important commercial cities of Colombia, S. America, situated on a cafon of the Magdalena River, about 20 miles from the sea. Population, about 40,000. It is a station of the PN (1888), with 2 missionaries and their wives, 3 unmarried women missionaries, 2 high schools, 1 common school, and 46 church members.

BARRIPORE: A town S. W. of Calcutta, Bengal, India; station of the SPG (1829), with 11 native workers, 15 chapel preaching places and 760 communicants.

BARROW POINT. See POINT BARROW.

BARROWS LECTURESHIP FOR INDIA: Lectureship on the Relations of Christianity to Other Religions founded at the University of Chicago, in 1894, by a donation of $20,000 from Mrs. Caroline E. Haskell of Chicago. The lectures, six or more in number, are required by the terms of the foundation to be delivered in Calcutta, and, if deemed best, in Madras, Bombay, or other important cities of India.

Large numbers of educated Hindus and Muslims are now familiar with the English language. To these scholarly and thoughtful men the lectures are to be directed, setting forth, in a friendly, conciliatory way, the great truths of Christianity, their harmony with truths found in other religions and their claims upon men.

Mrs. Haskell expressed a wish that the Rev. the valley of the Upper Zambesi, a vast and populous plain, 189 miles long by 30 to 35 broad, subject to periodical inundations and resultant fevers. The Barotse Empire was founded by a Basuto conqueror. The Barote Empire, since the foreign yoke, but the kingdom was maintained. It has been described as including 18 large nations subdivided into over 100 tribes. The people worship the sun and the new moon, and observe feasts at the graves of their ancestors. The missions of the French Protestants have been very successful among the Barotses, and the paramount chief is a professing Christian who has visited France and England.
John Henry Barrows, D.D., the President of the Oberlin Theological Seminary, New York. The third series commanded the same respectful, not to say critical, attention from Hindus and Muslims as the previous lectures. It is the judgment of competent observers that influence of considerable importance and value has been exerted already through this lecturership.

Mrs. Haskell named the lectureship from Dr. Barrows, who at the time of its establishment was her pastor (First Presbyterian Church, Chicago). It is frequently called the "Haskell Lectureship," however, from the giver of the fund which supports it.

BARTHELEMY: One of the Leeward Islands, West Indies. Mission station of the Moravians.

BARBUR: A town in S. Kanara, South India; station of the Basel Missionary Society (1876), with 2 missionaries (one of them married), 15 native workers, 3 outstations, 2 common schools and 45 communicants.

BASEL EVANGELICAL MISSIONARY SOCIETY (Evangelische Miissionsgesellschaft, Basel): On August 30, 1730, the German Christian Society (Der Deutschen Christenthums Gesellschaft) was founded at Basel through the influence of Dr. Ursperger, who had recently visited England. This society undertook, as a kind of union, to collect and impart information far and near respecting the kingdom of God. It corresponded with the London Missionary Society. In 1801 Friedrich Steinkopf, who since 1798 had been secretary of the Basel Society, went to London as preacher to the German Savoy Church, and, in 1802, became a director of the London Missionary Society. In 1804 he took part in founding the British and Foreign Bible Society. He was the connecting link between England and Basel, and largely through his influence the Basel Mission was founded.

C. F. Spittler, who had gone to Basel as successor of Friedrich Steinkopf (lay secretary), became so interested in foreign missions that he proposed to go to Berlin and enter a training mission school founded there, in 1800, by Johann Jänicke. Thereupon the Basel Society attempted to induce Jänicke to remove his school to their city, but this project failed. The more evident that Basel must begin a work of her own. In May, 1815, just as the city was about to be bombarded from Hüningen, the Rev. Nicolaus Von Brunn, at a regular missionary meeting in his church, at which a young man presented himself for missionary service, suggested to Spittler that such young men should be educated at Basel and then be recommended to the English societies who sent out men to the field. Steinkopf arrived at Basel in September, 1815, and induced Spittler to form a special committee for this purpose. On the 25th of the same month this body (Rev. N. Von Brunn, President; Rev. Mr. Wenk, Secretary; and a merchant, Mr. Marian-Kuder, Treasurer) held its first meeting as a mission "collegium" in the parsonage of St. Martin's Church, Basel. Dr. John Henry Barrows, who from 1803 to 1807 had been theological secretary of the German Christian Society at Basel, was invited to take up the work of the new venture. After a little delay, in the spring of 1816, Blumhardt went to Basel as "inspector" or manager of the Evangelical Missionary Society, and on August 26 of the same year opened a training school for missions. Under the management of Blumhardt, who was a very cautious man, the mission school slowly began to gather headway. For the first few years its students, when ready for service, were handed over to foreign missionary societies, especially to the Rotterdam and the Church Missionary Societies. But as early as 1821 it began to send out missionaries under its own direction. In that year Zaremba and Dittrich were designated as the first Basel missionaries for Southern Russia.

From 1816 Blumhardt edited the Evangelical Missionary Magazine, in 1828 founded the Heidenbote, the special organ of the Society; wrote a history of missions in several volumes, and managed the Society so frugally that at his death the annual income of the magazine and the Heidenbote, and an available fund was raised to the amount of 100,000 florins, with a reserve fund of 20,000 florins. The following missions were started during his era: (1) One of his pupils, Joseph Jainty, was declared the first Basel missionary, and the Church Missionary Societies. But as early as 1821 it began to send out missionaries under its own direction. In that year Zaremba and Dittrich were designated as the first Basel missionaries for Southern Russia.

From 1816 Blumhardt edited the Evangelical Missionary Magazine, in 1828 founded the Heidenbote, the special organ of the Society; wrote a history of missions in several volumes, and managed the Society so frugally that at his death the annual income of the magazine and the Heidenbote, and an available fund was raised to the amount of 100,000 florins, with a reserve fund of 20,000 florins. But as early as 1821 it began to send out missionaries under its own direction. In that year Zaremba and Dittrich were designated as the first Basel missionaries for Southern Russia.
Since then Inspector Oehlen, son of the well-known professor, has been a most efficient manager.

Constitution and Organization: The Basel Evangelical Missionary Society is strictly undenominational, being affiliated with no State Church, and having relations with nearly all the Protestant Churches of Central Europe. While essentially German, its location in Switzerland and its general character differentiate it from the German Societies. Its affairs are conducted by a committee of thirteen gentlemen (six clergy men and seven laymen). This committee is self-perpetuating, but it enforces its sense of obligation on the public by the completeness of its reports and the care with which it conducts its business.

The Basel Mission House is far more than a mere headquarters for the Society. It contains a training school, a book department, library, refectory, dormitory, hospital and work-shops. The 80-100 students come chiefly from southern Germany and Switzerland and represent every class in life: agriculturists, artisans, clerks, mechanics, teachers, surgeons, etc. The general tone is that of an entirely good character and sincere Christian purpose can be utilized somewhere, and it is the business of the Society to find out where. The course of training covers six years, is thorough, and embraces all the different departments of value in mission work, including the classics, Bible study, history, science and the trades, but especially the development of character. The graduates from the theological seminary are ordained, through the courtesy of some church, Reformed, Lutheran, or Free, as the case may be, though the ordination is not formal. The commercial communication with Europe is a simple liturgy is used.

Another distinctive feature of the Basel Society is The Industrial and Commercial Commission, first organized by Inspector Josenhans to meet the situation on the Gold Coast. The mission there was absolutely dependent upon direct commercial communication with Europe for all the necessaries of life. The native Christians had no method of earning an independent livelihood. The establishment of a depot of stores and the instruction of the natives in agriculture and in the various crafts was the inevitable outcome of any attempt at missionary work. Vessels were purchased by the Society to navigate the various rivers of the territory occupied, and commercial houses sprang up at convenient points. In India the commercial development has been still more extensive, including weaving establishments at Mangalore and in the region about Cananore, large tile factories at Mangalore and Calicut and the employment of mechanics and joiners under mission auspices. The net income of the commission in 1900, all of which was handed over to the theological seminary, was 203,996 francs ($40,799). This department has been a paying investment from the beginning. The total income of the Society amounted in 1902 to 1,626,116 francs ($325,223). Nearly one-half of this came from southern Germany; Switzerland stands next. Contributions come from all parts of the world, from Asia, Africa, America, and even Australia.

Statement of Missions; Africa: The first effort in Liberia (1827) failed entirely owing to the climate; a second (1829), on the Guinea coast, was almost entirely a failure, but in 1831 a band succeeded in maintaining themselves in the higher ground and established the station at Akropong. There was considerable difficulty with the Danish Governor, but that was overcome and the work placed on a firm foundation. Special attention has been paid to the school system, from the simplest elementary schools up to the theological seminary. The industrial department, too, has been most successful. With the German occupation of the Kameruns, the Basel Society took over the mission work of English and American Societies in that colony. On the Gold Coast there are (1902) 12 stations, 177 outstations, 77 missionaries, 270 native workers, 8,265 communicants, and 5,594 pupils in schools; in Kameruns 9 stations, 143 outstations, 55 missionaries, 142 native workers, 2,874 communicants, and 4,073 pupils in schools.

India: The Basel fields in India lie in Kanara (Coorg), Malabar, and the South Mahrathi region. The first station occupied was Mangalore (1834). The work was extended and especially successful, and was paid to education and industrial work, especially weaving, brick work and joiner's work, giving employment to multitudes of Christians repudiated by their caste or otherwise suffering from want. There are 24 stations, 110 outstations, 148 missionaries, 653 native workers, 8,488 communicants and 11,054 pupils in the schools.

China: The Chinese mission of the Basel Society was commenced under advice from Gützlafl in 1846, and with special instructions to make it an "inland mission." Attention was directed to the Hakka people, extending from Cochin to the borders of Kiang-si and Fokien. The work is divided in two districts, highland and lowland, and is carried on with the same care for education and general industrial training that is characteristic of Basel mission work elsewhere. There were (1902) 15 stations, 75 outstations, 44 missionaries, 151 native workers, 3,622 communicants and 1,640 pupils in the schools.

Periodical: Der Evangelische Heidenbote, Basel: monthly, Evangelische Missionsblatt, illus., monthly; Le Missionnaire, in French, monthly.

BASIM: A town in the province of Berar, India. Population, 13,000. Station of the ME, with one missionary and his wife, 13 native workers, men and women, 2 common schools, 6 Sunday schools, a Young People's Society, and 64 church members.

BASRA: Capital of a province of the same name, adjoining the Persian Gulf at the S. E. extremity of Asiatic Turkey. The city is situated on the Euphrates below its junction with the Tigris, and is quite unhealthy. It is a station of the RCA (Arabian Mission), opened in 1891. It now has 4 missionaries, two of them married and one of them a physician, 2 outstations and 1 dispensary. Otherwise written Busrah and Bussora.

BASSA, See GREAT BASA.

BASSEIN: The southwestern district of Burma, extending from the western Yoma range of mountains on the west to the main stream of the Irawadi and its principal outlet on the east, and from the Bay of Bengal on the south to the point on the north where the Yomas approach nearest to the great river. It includes four or
five of the larger delta branches of the Irawadi. Area, 6,848 square miles. The soil is rich and fertile, subject to floods. The population somewhat exceeds 475,000, of which about 175,000 are Karens (Sgau and Pwo in about equal numbers), over 225,000 Burmans, and the remainder Talains, Telugus, Chinese and a few English. The district has been the scene of very thriving and successful missions since 1837. The ABMU has three missions there: a Burman mission, including also the Telugus; a mission to the Sgau Karens, with about 10,000 communicants and 60,000 adherent population and 85 Christian villages, the largest and most advanced of all the Karen missions in Burma; and a mission to the Pwo Karens, with about 1,375 communicants, and 22 Christian villages, with an adherent population of perhaps 7,000. The Roman Catholics have a flourishing mission among the Pwo Karens in Bassein, but with few converts from the Sgau. The SPG has also a mission in Bassein, which is included in its diocese of Rangoon. Some efforts have been made by other denominations to plant missions here with little success. Education has been carried to a greater extent among the Karens of Bassein than in other district in Burma.

BASSEIN: Chief town of the district of Bassein, Burma. It is situated on the Bassein River, one of the delta branches of the Irawadi, and has an important trade in rice. Population, 30,000; about 20,000 of the people are Buddhists, and the remainder are Hindus, Mohammedans and Christians. It has been a station of the ABMU since 1840. It is now operated by 12 missionaries and 300 native workers, men and women. It has 64 outstations, 157 preaching places, 123 village schools and 21 high schools, and there are 12,050 communicants.

BASSETERRE: Capital of the island of St. Kitts, W. I. Population, 9,900. Station of the Moravians (1777), with 1 missionary and his wife, 32 native workers, men and women, 2 Sunday schools, 3 common schools, and 570 communicants.

BASTA: A village in the Bijnur district, United Provinces, India. Station of the ME, with 13 native workers, men and women, 6 Sunday schools, 3 village schools, a Young People's Society and 475 church members.

BASUTOLAND: A territory belonging to British South Africa, annexed to Cape Colony in 1871, but placed directly under the authority of the crown in 1894; lying between Natal and the Orange River Colony, with Cape Colony on the south. Its area is estimated at 10,293 square miles, with a population estimated in 1901 at 263,500, of whom 647 were Europeans. Founded in 1519 by the Dutch, it is one of the most magnificent possessions of the crown of the Netherlands. In 1722 there were about 109,000 Christians in and about the city, and in 1728 the Bible was translated into the vernacular tongue, the High-Malay. But at present the whole native population of the city, with very insignificant exceptions, is Mohammedan. In 1842 the English missionaries were expelled, and only the Roman Catholics were tolerated. Of late, however, a change has taken place. The Java Comité, founded in Batavia in 1851, but since 1855 directed from Amsterdam, has a missionary and his wife there, with 3 native workers, 1 common school and 21 communicants. The Salvation Army has also a post here.

BATHURST: A town of 9,000 inhabitants on an island at the mouth of the Gambia River, W. Africa. It is the chief town of the Gambia (British) Colony. Station of the WMS, with 3 missionaries, 34 native workers, men and women, 4 outstations, 4 chapels, 4 common schools and 750 church members.

BATHURST: A village in Cape Colony, South Africa, 20 miles S. E. of Grahamstown; population, 1,000; station of the South African Wesleyan Methodist Missionary Society, with 22 native workers, 14 outstations, 6 chapels, 3 common schools, a Young People's Society and 230 church members.

BATHURST: A village south of Freetown, Sierra Leone, W. Africa; station of the CMS (1822), with 6 native workers, men and women, 1 chapel, 1 Sunday school, 2 common schools and 318 communicants.

BATTALA: A town in the Punjab, India, 24 miles from Amritsar. Population, 26,000, Hindu, Muslim, Sikh, etc. Mission station of the CMS (1878), with 3 missionaries (2 missionaries' wives), 22 native workers, 1 high school, 2 common schools and 72 communicants.

Also station of the CEZMS, with (1902) 4 missionary women, one of them being a physician, 7 native women workers, 1 hospital, 1 dispensary, 3 common schools and 76 Zenzana pupils.

BATAVIA: Capital of Java, Dutch East Indies. Population (1900) 115,887, of whom about 9,000 are Europeans. Founded in 1519 by the Dutch, it is one of the most magnificent possessions of the crown of the Netherlands. In 1722 there were about 109,000 Christians in and about the city, and in 1728 the Bible was translated into the vernacular tongue, the High-Malay. But at present the whole native population of the city, with very insignificant exceptions, is Mohammedan. In 1842 the English missionaries were expelled, and only the Roman Catholics were tolerated. Of late, however, a change has taken place. The Java Comité, founded in Batavia in 1851, but since 1855 directed from Amsterdam, has a missionary and his wife there, with 3 native workers, 1 common school and 21 communicants. The Salvation Army has also a post here.

BATTALAGUNDU: A town northwest of Madura, Madras, India. Language, Tamil, Telugu. Station of the ABCFM (1872), with 1 missionary and his wife, 39 native workers, men and women, 16 outstations, 16 preaching places, 22 Sunday-schools, 19 common schools, 1 high school, a YMCA and 362 church members.

BATTALAGUNDU: A town northwest of Madura, Madras, India. Language, Tamil, Telugu. Station of the ABCFM (1872), with 1 missionary and his wife, 39 native workers, men and women, 16 outstations, 16 preaching places, 22 Sunday-schools, 19 common schools, 1 high school, a YMCA and 362 church members.

BATTALAGUNDU: A town northwest of Madura, Madras, India. Language, Tamil, Telugu. Station of the ABCFM (1872), with 1 missionary and his wife, 39 native workers, men and women, 16 outstations, 16 preaching places, 22 Sunday-schools, 19 common schools, 1 high school, a YMCA and 362 church members.

BATTALAGUNDU: A town northwest of Madura, Madras, India. Language, Tamil, Telugu. Station of the ABCFM (1872), with 1 missionary and his wife, 39 native workers, men and women, 16 outstations, 16 preaching places, 22 Sunday-schools, 19 common schools, 1 high school, a YMCA and 362 church members.

BATTALAGUNDU: A town northwest of Madura, Madras, India. Language, Tamil, Telugu. Station of the ABCFM (1872), with 1 missionary and his wife, 39 native workers, men and women, 16 outstations, 16 preaching places, 22 Sunday-schools, 19 common schools, 1 high school, a YMCA and 362 church members.
BATTLE HARBOUR: A settlement on the eastern extremity of the coast of Labrador; station of the Labrador Medical Missionary Society (1892), with 5 missionaries, men and women (3 of them medical), an outstation and 2 hospitals.

BATTLE RIVER: A settlement in the district of Alberta, Canada; station of the Methodist Canada (1881), with 1 missionary and his wife, 2 outstations, 1 high school, 1 Young People's Society and 135 church members.

BATTYCOITA: A district in the west part of the peninsula of Jaffna, Ceylon, coincident with one of the parishes anciently formed by the Portuguese Government. There were also churches built in these parishes, which afterward fell into decay, and when (1817) the ABCFM occupied the place as a mission station the remaining buildings were put into their hands by the British Government for mission purposes.

This station now has 1 missionary and his wife, 23 native workers, men and women, 10 outstations, 8 preaching places, 37 common schools, 1 high school and 450 church members, besides Jaffna College, independently supported but with a missionary at its head.

BAU: A town on the island of Viti Levu, Fiji Islands; station of the Australasian Wesleyan Methodist Missionary Society, with 1 missionary, 476 native workers, 18 outstations, 165 preaching places, 284 Sunday schools, 347 village schools and 5,146 church members.

BĂRO. See SOLOMON ISLANDS.

BANZA MANTEKE. See BANSA MANTEKE.

BAYAMON: A village in the outskirts of San Juan, Porto Rico; station of the Christian Woman's Board of Missions (Disciples), with 1 unmarried woman and an orphanage.

BAZÉIA: A town in the eastern part of Cape Colony, S. Africa, situated in a fertile, well-watered and thickly populated tract of land west of Umtata; station of the Moravians, occupied in 1882 on the invitation of the British Government agency for the Tombo people and the native chief of this especial tribe. The station was destroyed once by whirlwind and again by the Kafir war of 1881-82, yet the work here has been encouraging.

The present establishment consists of 2 missionaries and their wives, 13 native workers, men and women, 2 Sunday schools, 5 village schools and 98 church members. Also written Baziya.

BEACONSFIELD: A town in the diamond fields, Cape Colony, South Africa. Population, 10,500; mission station of the Berlin Missionary Society (1885), with 1 missionary, 1 unmarried woman missionary, 8 native workers, 1 outstation and 2 communicants. Also a station of the South African Wesleyan Methodist Missionary Society, with 41 native workers, 23 outstations, 3 chapels, 3 Sunday schools, 2 village schools, a Young People's Society and 502 church members.

BEAR'S HILL: A settlement in the northern part of Assiniboia, Canada; station of the Canadian Wesleyan Mission (1887), with 1 missionary and 107 communicants.

BEAUFORT: A village E. of Savanna La Mar, Jamaica, W. I.; station of the Moravian Mission (1834), with 13 native workers, men and women, 1 chapel, 1 village school and 370 communicants.

BEAVER LANGUAGE: Belongs to the central group of the North American family of languages and is spoken by Indians living in Athabascan, Canada. It is written with syllabic characters.

BEAWAR: A town in Rajputana, India, 300 miles south of Delhi. A pleasant town, well laid out, with broad streets planted with trees; the houses well built of masonry, with tiled roofs. Climate, unusually dry. Population, 21,000, Hindus, Muslims, Jains, Christians, Parsees, etc.

Station of the UFS (1880), with 3 missionaries and their wives and 5 unmarried missionary women, 2 of them medical, 55 native workers, men and women, 10 village schools, 2 high schools, 1 dispensary, 1 hospital and 176 church members.

BECHUANALAND: A territory of Great Britain in Africa, extending east and west through 9 degrees of longitude, from the Transvaal colony and Matabeleland on the east, to German Southwest Africa on the west, and bounded on the north by Rhodesia and on the south by Cape Colony. It naturally belongs to the general region called British South Africa. The area is about 213,000 square miles, with an estimated population of 200,000. Until November, 1895, Bechuanaland included the Crown Colony of British Bechuana land, and the Bechuanaland Protectorate. At that time the Crown Colony was annexed to Cape Colony and the territory was about to be put under the administration of the British South Africa Company. In consequence of Jameson's raid, however, this was not done, and the Protectorate is governed by a resident commissioner, with headquarters at Mafeking. By these changes the boundaries and local sovereignty of the native tribes were altered, and fixed as at present.

These tribes are the Bamangwato, under chief Khama, the Bakhata, under Lenche, the Bakwena, under Sabele, the Bangwaketse under Butho, the Bakariti, under Ikaneng, and some smaller tribes. Each chief rules his own people under the protection of the King. Licenses for the sale of intoxicants are forbidden. There is a native infantry-police. The railway from Cape Town northward traverses the Protectorate as far as Bulawayo, and the telegraph line to Fort Salisbury, in Mashonaland. Missionary work is carried on by the LMS, the Hermannsburg Missionary Society and the Missions of French Switzerland. The number of stations is seven. The character of the natives near these stations has been greatly modified and they have adopted to a considerable extent European costumes and European style of dwellings.

BEERSHEBA: A town east of Rustenburg, Transvaal Colony, S. Africa; station of the Hermannsburg Missionary Society (1873), with 6 missionaries, men and women, 4 native workers, 4 outstations, 5 chapels, 2 village schools, 1 theological school, and 1,710 communicants. Also written Berechata.

BEGORO: A town of the Gold Coast, West Africa; northwest of Akropong. Population, 4,000. Mission station of the Basel Missionary Society (1876); 3 missionaries, 1 missionary's wife, 47 native workers, men and women, 55 out-
stations, 13 village schools (1902), 621 communicants.

BEHAR: A province of Bengal, British India. It lies in the Ganges Valley, being divided into two nearly equal parts by that great river, which runs through it from west to east. For the most part the country is flat; its highest hill is only above sea-level. Besides the Ganges itself, several large tributaries of that river flow through the province. The area is 44,130 square miles and the population is about 24,000,000. There are small areas near Calcutta 44,130 square miles and the population is about 24,000,000. There are small areas near Calcutta.

In the district of Saran, in the western part of the province, the population is about 24,000,000. The area is square mile of. its territory contains on an average 524 inhabitants; the lowest average being 24,000,000. There are small areas near Calcutta.

BEHIR: A town in the Gond region, Central Provinces, India; station of the Balaghat Mission (1898), with 1 missionary and his wife, 1 unmarried missionary woman, 2 native workers, 1 village school, 1 industrial school, 1 dispensary, a hospital, an orphanage and 10 communicants. Also written Baihir. Also written Baihir.

BEHRENS, Henry William: Born February 13, 1889, in Hermannsburg, Germany; died April 22, 1907, at Bethany, Transvaal, Africa. In early youth, through the influence of the village pastor, Ludwig Harms, he determined to be a foreign missionary. Many obstacles preventing, he did not sail for his field of labor in Africa until November 10, 1857, when he was sent out under the Hermannsburg Society. At Ehenzeni, Natal, Behrens labored six years among the Zulu Kaliris. He himself and six Kafirs built church, school, and home. No baptisms occurred, although he preached regularly to three hundred natives.

In 1863 he was sent to work among the Bechu­

Naans at Linokana (in what is now the Trans­

vaal). After a year of faithful work, he saw no results. He sat weeping one day at his door when a negro inquired the cause of his trouble and begged him to visit his people in Magalis­

berg. Mr. Behrens accepted this as a call, went to the region, and found a people ready to hear. Their hearts had been prepared by one of their number who while imprisoned with the Boers had heard the Gospel from an English missionary. Behrens began work there November 29, 1864.

He soon founded the Christian village, Bethany, where he spent the rest of his life, preaching, composing hymns, and teaching. He was pastor of a congregation of nearly two hundred negroes. He organized a school for the training of native teachers and established nine schools for children. Besides carrying on the work at Bethany, Mr. Behrens supervised the entire work of the Society among the Bechu­

nas. He saw the work grow rapidly. Once every two years he visited every one of the twenty-nine stations and twenty-seven missionaries. This he did faithfully for thirty-six years.

BEIRUT: A city situated on the eastern coast of the Mediterranean, capital of the Turkish province of Syria (Suriye). It is the commercial and literary center of Syria, and in its appearance and in the culture of its inhabitants more nearly resembles a European city than any other city in the land.

It is situated on a plain at the foot of the Leban­

on, and in beauty of scenery rivals Naples, the shore here describing a graceful curve of several miles' radius, in the bosom of which the city lies, built on rising ground. It is adorned with many elegant buildings, public and private, rising one above another in a gentle slope by a near background of mulberry, olive, and pine groves, and a more distant background of the terraced and vine-clad sides of Mount Lebanon, whose peaks, nearly 10,000 feet high, are snow crowned for several months of the year.

The climate is tropical. The rainy season is confined principally to the three winter months, when the thermometer rarely sinks below 50° Fahrenheit. A long summer reigns, with unbroken heat day and night, while the thermometer ranges from 80° to 90°, and occasionally rises to 100°.

The population numbers about 100,000, and is composed of Mohammedans, Druses, Chris­

tians of various sects, and Jews.

An English company has brought water to it from the mountain in an aqueduct six or eight miles long, and has also lighted its streets with gas.

There are carriage roads in the city and its suburbs, extending to the near points in the Lebanon, and one to Damascus (built by a French company). A railroad also connects Beirut and Damascus.

Mission work, vigorously conducted since 1823, first by the ABCFM, and since 1870 by the PN, has borne fruit not only in direct visible results of educational institutions established,
youth educated and sent forth as teachers, physicians and preachers, books printed, a Protestant community gathered, congregations assembled, Sunday schools opened and churches raised, Sunday services held, women and girls taught, and the Bible and Christian literature distributed. The uplift of the whole community to a higher plane of social, intellectual, and moral life.

In self-defense and in rivalry the other religious sects have opened schools and colleges, printing-presses and hospitals. The Mohammedan Syrian president even countered to their tradition and practices as to open schools for girls, lest their Fatimias and Zobeides should learn in Christian schools too many verses of the Bible and too many Gospel hymns; and the Greek Church has been compelled to open Sunday schools, in imitation of the Protestants.

The PN has at Beirut (opened by the ABCFM in 1823) a station of which the working force consists of 4 missionaries and their wives, with 7 unmarried women and 13 native workers, men and women. There are 2 preaching places, 3 outstations, 1 high grade boarding school for girls, 1 theological school, 5 Sunday schools, 1 printing house which sends forth its issues wherever the Arabic language is spoken in three continents. It publishes about 25,000,000 of pages annually, about half of these being pages of Scripture. In "the Press" are steam-presses, with all the apparatus for type-casting, electrotyping, lithographing, and binding. From its doors go forth yearly about 60,000 bound volumes of scientific and religious books.

The Syrian Protestant College is auxiliary to the mission, and in closest sympathy with it. It occupies a splendid position on high ground overlooking the sea. It embraces preparatory, collegiate, medical and commercial departments, and is more fully described in a separate article. It has also a station of the Kaiserswerth Deaconesses at Beirut, established in 1860. It has 26 deaconesses, who conduct a fine hospital, served by the Medical Department of the Syrian Protestant College. It also carries on a high school and 2 village schools.

Miss Taylor's orphanage, opened in 1868, is carried on by 2 unmarried women and 6 native workers, men and women. It has a dispensary. The Church of Scotland has a mission to the Jews, with a missionary and his wife and 2 common converts enrolled, but indirectly by the work of others. There is also a station of the Kaiserswerth Deaconesses at Beirut, established in 1860. It has 26 deaconesses, who conduct a fine hospital, served by the Medical Department of the Syrian Protestant College. It also carries on a high school and 2 village schools.

Miss Taylor's orphanage, opened in 1868, is carried on by 2 unmarried women and 6 native workers, men and women. It has a dispensary. There is also a station of the Kaiserswerth Deaconesses at Beirut, established in 1860. It has 26 deaconesses, who conduct a fine hospital, served by the Medical Department of the Syrian Protestant College. It also carries on a high school and 2 village schools.

The BFBS has a Bible depot here, with 1 agent and 6 native workers.

BEIT MERR: A village in the Lebbon district of Syria; station of the Friends' Foreign Mission Association (1899), with 1 woman missionary, 2 native workers, 1 chapel, 1 Sunday school and 2 village schools.

BELGAUM: A city in the district of Belgaum, Bombay, India, 80 miles northeast of Goa. Population (including suburbs), 32,900, Hindus, Muslims, Jains, Christians, Parsees, etc.; station of the LMS (1820), with 3 missionaries and their wives, 14 native workers, men and women; 6 outstations, 6 Sunday schools, 8 village schools and 61 church members.

BELIZE: A city of British Honduras, Central America, a place of considerable importance, containing several churches, a hospital, etc. Population, 9,116, including many negroes; station of the LMS (1826), with 3 missionaries, 27 native workers, men and women; 6 chapels, 7 Sunday schools, 7 village schools, 1 high school and 700 church members. Also station of the Jamaica Baptist Missionary Society (1887), with 1 missionary, 6 outstations, 6 chapels, 5 Sunday schools and 1 church.

BELLAG: A settlement on an island in Milbank Sound, British Columbia; station of the Canadian Methodist Missionary Society (1881), with 1 missionary physician and his wife, a chapel, a Sunday school, a dispensary, a hospital, and 60 church members.

BELLARY: Chief city of the district of the same name, Madras, India. Climate, hot; very dry. Population, 50,467, Hindus, Muslims, Christians. Language, Canarese, Telugu, Hindustani. Condition, rather poor. Station of the LMS (1810), with 7 missionaries and 49 native workers, men and women, 10 outstations, 10 Sunday schools, 11 village schools, 2 high schools, 1 college, 1 orphanage and 175 church members. Also station of the SPC (1880), with 1 native worker, 1 village school and 162 communicants.

BELLESA: A settlement on a river near Assam, India; station of the Swedish Missionary Society (1890), with 3 missionaries and their wives, 3 missionary women (one a physician), 7 native workers, 6 village schools, 1 dispensary, an orphanage and 71 communicants.

BELLOMO: See Benito.

BELLOCHISTAN. See Baluchistan.

BENARES: Capital of the Benares Division, United Provinces, India, situated on the northern bank of the Ganges River, at the junction of the Ganges and Jumna. Population, 209,331, of whom about 155,000 are Hindus and 50,000 Mohammedans. In point of population Benares ranks sixth in India. It manufactures shawls, cloth embroidered with gold and silver, jewelry, brass work, and lacquered toys—the last two being exported to England in considerable quantities.

That which gives to Benares its interest and importance, however, is the fact that it is to-day, and has been for more than twenty-five centuries, the religious capital of India, and the most sacred of all the sacred places of Hinduism. Its origin dates back to the remotest period of Aryan occupation of India. Its early name was Varanasi, whence the modern Varanasi, or Benares. Another name by which it is often called by the people is Kasi. It had been for many years—probably for some centuries—renowned by Hindus for its sanctity, when, in the 8th century, Gau­tama, then just starting out on his mission of converting India to his new cult of Buddhism, fixed his residence at Sarnath, the site of the ancient Benares, only four miles from the modern city. It remained the headquarters of Buddhism until, after a period of 300 years, the forces of Brahmanism rose against their younger rival, overwhelmed the strongholds of Buddhism, and after
Missionary effort was commenced in Benares by the BMS in 1816. The city is now a station of the LMS (1820), with 8 missionaries and 28 native workers, men and women, with a high school and 12 common schools and 34 church members.

It is a station also of the CMS (1832), with 11 missionaries and 22 native workers, men and women. It has 3 outstations, 2 high schools, an orphanage and 6 village schools and 175 communicants.

The WMS has here 2 missionaries and 16 active workers, men and women, with 6 village schools and 30 church members.

The Baptist Zenana Mission has 3 women missionaries and 3 native woman workers, with 119 Zenana pupils.

The Zenana Bible and Medical Mission has 15 women missionaries and 34 native women workers, with 1 hospital, 1 dispensary, 1 high school, 6 village schools and 225 Zenana pupils.

**BENGAL LANGUAGE:** Belongs to the Bantu family of African languages and is spoken in the region of the Gaboon River, French Congo, W. Africa. It is written with Roman letters.

**BENGAL:** One of the Lieutenant-Governorships of British India, lying north of Madras and the Bay of Bengal. It comprises: (1) the territory often spoken of as Bengal Proper, through which the Ganges and Brahmaputra rivers describe the lower portion of their courses, including the deltas of those great streams; (2) the province of Orissa, which stretches along the coast of the gulf south of the delta; (3) the province of Behar, to the northwest of Bengal Proper, and (4) the district of Chota-Nagpur, south of Behar and west of Orissa. Its total area is 157,543 square miles and its population numbers (1901) 74,744,866. In no other part of British India is the average density of population so great, the average for the whole of Bengal being 470 per square mile, while in some parts of Behar the average is over 800 per square mile.

The population of Bengal exhibits great diversity of race, religion, language and civilization. About one-third of the whole population are Mohammedans, nearly two-thirds Hindus and a residue of about 3,000,000 is composed of the adherents of other religions chiefly those possessed by the half-savage aboriginal hill tribes.

The Christian population of Bengal is (1901) 278,366, having increased 44 per cent. during the decade 1891-1901. The increase of population of Bengal during the same period was but little more than 4 per cent.

The prevailing language is the Bengali. In Behar and Chota Nagpur the Hindi is chiefly used, and in Orissa the Uriya is the language of Hindus and Christians. The aboriginal tribes called Kols, Santals and Gonds found in Chota Nagpur and other districts in the northwest part of Bengal are described in separate articles, to which the reader is referred.

The Mohammedans of Bengal are mostly descendants of converts made from the lower castes of Hindus centuries ago, but they still make many converts every year from Hinduisml. Behar was once a center of Buddhism.

The missionary history of Bengal, as well as its political history, is one of the utmost interest. While this province was not the seat of the earliest Protestant missionary activity in India—an
THE ENCYCLOPEDIA OF MISSIONS

honor which belongs to Madras—it is ever associated in the minds of Christian people with the names of Carey, Marshman and Ward, who made Serampur the starting-point of widely diffused evangelical influences; with that of the eucatonic. The pioneer of the work afterward more effectively prosecuted by the Serampur band, and in more recent times with that of Duff, whose educational work at Calcutta and whose immense energy and missionary zeal were the means of lifting the work of Christian instruction to a prominence which it deserves as a factor of missionary success. At the present time Bengal is well occupied by the agents of many Protestant missionary societies. The English Baptists, still preserving the traditions and continuing the work of Thomas, Carey and their early associates, the SPG, the CMS, the CSFM, the UFS, the LMS, the ME, the ABMU and many other societies and independent agencies, are conducting missionary operations in Bengal. The missionary societies cooperate with the government and with the people in their efforts to extend education, having many schools and colleges in connection with their work at nearly all mission stations. In the year just mentioned there were within the province 31 vernacular newspapers, 13 being sheets of some importance. Several papers, edited wholly in English, are also issued by natives, besides those conducted by European writers.

Bengal is sometimes called "Lower Bengal," since this term was applied to it when it formed a part of the Bengal Presidency.

BENGALI LANGUAGE: The Bengali belongs to the Indo-Aryan branch of the Aryan family of languages. It is said to approach more nearly to the Sanskrit than any other of the modern languages of India. It is spoken by about 40,000,000 inhabitants of Bengal and Central British India. Among its various dialects the Musalmang Bengali is used by some 20,000,000 Mohammedans in lower and eastern Bengal and has been much changed by the introduction of Arabic and Persian words. The Sanskrit letters, with slight modification, are used for writing all or nearly all of these dialects of Bengali.

BENGAL PRESIDENCY: One of the former administrative divisions of British India. It comprised the northwest Provinces, Oudh, Assam, etc., besides the present lieutenant-governorship of Bengal. The name is still used in common language and in army circles, but it is no longer the name of an administrative division. See India.

BENGHAZI: A town of Tripoli, North Africa, on the eastern shore of the Gulf of Sidra. It stands on the verge of a large plain, sandy and barren for nearly a mile from the shore, but beyond that having a fertile but rocky soil to the foot of the Cyrenaic Mountains. Population, 9,000, many of whom are Jews and negro slaves. Chief occupations of the people are agriculture and cattle-raising. No mission work at present.

BENGUEL: A district of Angola, W. Africa, and a town in that district from which a railroad is to be constructed to the E. frontier of the colony, being the seaport for trade with Bihé and the region in which missionary stations are established.

BENT: A town on an island in the San Benito River, in the Spanish Colony of Cape San Juan, W. Africa; station of the PN (1864), with 1 missionary, 3 missionary women, 11 native workers, men and women, 10 outstations, 9 Sunday schools, 3 village schools, 2 high schools and 490 church members. Also mentioned as Belombo.

BENNETT, CEPHAS: Born at Homer, N. Y., March 20, 1804. Dr. Bolles, Secretary of the ABMU, advised him to offer himself to the Society to go out as its missionary printer. He was appointed in 1828 and sailed May 22, 1829, reaching Calcutta October 6, and Maulmain, January 14, 1830, with his printing presses. He commenced at once the printing of tracts, for which the demand in the early history of the mission was very great. In 1852 he began to print the Burmese Scriptures, and as superintendent of the mission press in Burma for more than half a century he was permitted to print the Bible in three languages—the Burmese, translated by Dr. Judson; the Sgau Karen, translated by Dr. Mason, and the Pwo Karen, by Rev. D. L. Brayton, and also the New Testament in the Shan language. From the press under his care were sent forth more than 200,000,000 of Scriptures, tracts, and religious and educational books in all the dialects of Burmese. He was not only a printer, but a preacher of the Gospel, having been ordained to the ministry by the brethren of the mission, and in the intervals of his work as a printer he labored as an evangelist. The year 1834 he spent in Rangoon, then under Burmese rule, preaching and distributing tracts. When in Tavoy, whither he went in 1837 to print the Karen Bible, and where he remained till his return in 1857, he spent much of the cold season in the jungles, among the heathen and the native Christians. In these tours he visited all the Tavoy and Mergui districts. His deep interest in the educational work of missions led him, in the early part of his residence in Maulmain, to take charge of the government school for two and a half years. To him chiefly is due the founding of the Sgau Karen and Tract Societies, and through his influence its operations were enlarged by the recent vernacular schoolbook departments. He was also much engaged in the English church in Rangoon. Mr. Bennett was taken seriously ill in July, 1885, but rallied. Early in November he had a relapse, and on the 16th he passed away, in the eighty-second year of his age, after fifteen-six years of mission service.

BENSONVALE: A town in the Orange River Colony, N. E. of Aliwal North; station of the South African Wesleyan Missionary Society, with 1 missionary, 83 native workers, 33 outstations, 10 village schools, 1 high school, a Young People's Society, and 1,110 church members.

BERAR: A commissionership of Central India, consisting chiefly of a fertile valley lying east and west between the Satpura range on the north and the Ajanta range on the south. Its length from east to west is 150 miles, and its breadth, about 140. It touches the central provinces, the north and east, Bombay Presidency on the west, and the Nizam's dominions on the south. Area, 17,700 square miles. The population numbers 2,897,491 and is mostly composed of Hindus. Mohammedans, Parsees and Christians are also found in Berar in considerable numbers. Among the aboriginal tribes, as the Bhils and Gonds, are also found in this region.

The language of the Hindus of Berar is Marathi.
Berar has been entered by the UFS, and the Kurku and Central India Hill Mission. The Christian and Missionary Alliance also has, there is some reason to suppose, undertaken evangelistic work. The former half the province of Berar has not thus far been the scene of missionary operations to the extent which the density of its population and the opportunities which it affords for persistent and successful work would seem to demand.

**BERBER LANGUAGES.** See Berber Race; also Kabyle.

**BERBER RACE:** The Berbers are sometimes spoken of as descended from the Libyans, or at least as closely related to them. Arab writers represent them as having come from Canaan previous to the days of Joshua. From their language, customs, and physical type they are adjudged by some as affiliated with the Semites; though others prefer to group them as being originally Hamitic. Where they have come in contact with other races or tongues, they have been more or less affected by them; where they have been left in comparative seclusion, as in the oases of the desert, they have remained, in both race and speech, comparatively pure.

The present home of the Berber race has its center in the Barty States, especially around the Atlas Mountains. Indeed, the Barty States derive their name from the appellation used in Europe to designate this race. According to Dr. Cust, "The Berber or Amazigh is still at the present day in various shades and degrees of intermixture, ethnological, linguistic, and religious, more or less affected by the Arab and negro, the staple and parent stock of the whole population of North Africa from the Mediterranean to the extreme southern limit of the Sahara." The race may be divided into eight or ten tribes or groups, chiefly according to the shades of difference in the language or dialects they use; the parent of all these dialects, the old Libyan, as known to the Romans among the Numidians and their cognates, no longer exists. The old Guanche Berber, or Libyan as spoken by the original inhabitants of the Canary Islands, is also extinct.

The Kabyles of Algeria are Berbers. They comprise a confederation of tribes and speak the language or dialects they use; the parent of all these dialects, the old Libyan, as known to the Romans among the Numidians and their cognates, no longer exists. The old Guanche Berber, or Libyan as spoken by the original inhabitants of the Canary Islands, is also extinct. The Kabyles of Algeria are Berbers. They comprise a confederation of tribes and speak the Ghadarnsi dialect of the Berber; but with the Arabs the Arabic, and with the Tuwars, the Tamaekhe, and with their negro slaves, the Hausa.

Another Berber tribe dwells at Siwah, the oasis of Jupiter Ammon, on the confines of Egypt. Their own home dialect should be found to have a clear affinity with the Berber. It helps to show how broad is the territory the Berbers have occupied; also how remarkable has been the resistance offered by the Berber language to the pressure of other tongues for more than three thousand years.

As to the origin and import of the name of this ancient North African race there is some diversity of opinion. It is said to have first been used by the Arab writers of the 2d century to designate the Libyans of Herodotus. Some suppose it to have been derived from Verves, as found in the ancient Roman geography of Morocco. By others, with more reason, it is supposed to be but a modification of Barbari, a term denoting any one who was, to the Aryan or Greek, a foreigner, speaking a language to them unknown. This accords with the fact that the word Berber is not known to the Berbers as a national appellation. They call themselves Amazigh, the Free.

As to the religion of the Berbers, their pagan faith is nearly extinct. Some of them seem to have accepted the Jewish or the Christian religion in the centuries gone by, at least for a time. But at present they generally profess the Mohammedan faith, the many of them know but little of it. And yet they are not lacking in bigotry and fanaticism, as the bitter opposition and persecution to which converts to the Christian faith are subject afford sad proof.

Missionary effort has not neglected these people. The North African Mission, the Swedish Missionary Society, the Gospel Missionary Union and others have used every means to come into contact with the Berber tribes.

**Berea:** A settlement in Basutoland, S. Africa, E. of Masera; station of the Paris Evangelical Mission Society (1843), with 1 missionary and his wife, 17 native workers, 6 outstations, 7 village schools, and 425 communicants. French form of name, Béréa.
BEREA: A settlement southwest of Gnadendal, Cape Colony, S. Africa. A station of the Moravian Mission occupied in 1865, when the overcrowding of Gnadendal made it necessary for some of the people to form a colony. Statistics given in combination with Gnadendal.

BEREN'S RIVER: A settlement on the E. shore of Lake Winnipeg, Manitoba, Canada; station of the Canadian Methodist Church (1871), with 1 missionary and his wife, 2 outstations, a chapel, a Young People's Society and 100 church members.

BERGEN: See BERGEN.

BERGER: See BETTER.

BETEGERI: See BETTER.

BETHABARA: One of the most important of the Moravian mission stations in the Usambara region, German East Africa (1893), with 2 missionaries, 7 native workers, and 140 communicants. Also station of the Canadian Presbyterian Mission (1885), with 2 missionaries and their wives, 7 native workers, men and women, 4 Sunday schools, 3 village schools, and 110 church members. Also called Better Hope.

BETHEL: See BETTER.

BETHEL: 1. A settlement N. of Stutterheim, Cape Colony, S. Africa; station of the Berlin Missionary Society (1837), with 2 missionaries, 7 native workers, and 140 communicants.

BETHEL: A station of the Rhenish Mission in Great Namaqualand, German S. W. Africa. Here the missionary Krönlein translated the New Testament into Nama. It has 1 missionary, 1 native worker, 1 village school, and 224 communicants.

BELEU: One of the Gilbert Is. which has long been occupied by Samoan pastors under the LMS and was made a missionary station by that Society in 1901. There is now (1903) a training institution for evangelists, and a woman's training institution for Christian workers. The church members number 450.

BETTERVERWACHTUNG: A settlement near Graham's Hall, in British Guiana, South America. Station of the SPG, with 1 missionary, 2 native workers, and 24 communicants. Also station of the Canadian Presbyterian Mission (1885), with 2 missionaries and their wives, 7 native workers, men and women, 4 Sunday schools, 3 village schools, and 110 church members. Also called Better Hope.

BERHAMPUR: A town east of King Williams Town, Cape Colony, S. Africa; station of the South African Baptist Missionary Society (1859), with 2 women missionaries, 3 native workers, 2 outstations, chapel, Sunday school, and 24 church members. Also written Berhampore.

BERHAMPUR: A city and military station S. of Murshidabad, Bengal, India. Population (1891) 23,515; climate, unhealthy but improved by military sanitation. Station of the LMS (1824), with 2 missionaries and their wives, 4 women missionaries, 25 native workers, men and women, 9 Sunday schools, 6 village schools, 2 high schools, and 35 church members. Also written Burbampore.

BERLIN: A town east of King Williams Town, Cape Colony, S. Africa; station of the South African Baptist Missionary Society (1859), with 2 women missionaries, 3 native workers, 2 outstations, chapel, Sunday school, and 24 church members. Native name Tahabo.

BERLIN JERUSALEM UNION. See GERMANY, MISSIONS IN.

BERLIN MISSIONARY SOCIETY. See GERMANY, MISSIONARY SOCIETIES IN.

BERLIN WOMEN'S MISSIONARY SOCIETY FOR CHINA. See GERMANY, MISSIONARY SOCIETIES IN.

BERSEBA: A settlement in Surinam, South America, S. of Paramaribo. It is in the center of a district which has always been the darkest corner in Surinam, the stronghold of idolatry and sorcery. Idol temples and places of sacrifice are very numerous. The former are not imposing edifices, such as are found in India, but small structures only a degree above common pigsties, and located in out-of-the-way corners behind the houses of the village. They are not used for worship, but only as repositories for the idols and their belongings, which are needful for heathen dances and the performances of the sorcerers. Station of the Moravian Missions (1858), with a missionary and his wife, 35 native workers, 3 chapels, 2 Sunday schools, 1 village school, and 190 church members.

BERSEBA. See BEERSHEBA, TRANSVAAL.

BERSHEBA: A station of the Rhenish Mission in Great Namaqualand, German S. W. Africa. Here the missionary Krönlein translated the New Testament into Nama. It has 1 missionary, 1 native worker, 1 village school, and 224 communicants.

BERU: One of the Gilbert Is. which has long been occupied by Samoan pastors under the
sionary Society (1886), with 13 missionaries, men and women, 25 native workers, 22 outstations, 25 village schools, and 500 communicants.

A settlement in the Lithenberg district of the Transvaal Colony, S. Africa, about 50 miles S. E. of Mafeking; station of the Herrmannsburg Missionary Society (1872), with a missionary and his wife, 2 native workers, 4 outstations, 1 chapel, 1 village school and 1,250 communicants.

A settlement in Zululand ( Natal) S. Africa, about 40 miles S. E. of Vryheid; station of the Herrmannsburg Mission (1888), with 1 missionary, 4 native workers, 4 chapels, 4 village schools and 230 communicants. Also station of the Swedish Holiness Union (1894), with 1 missionary and his wife, 3 outstations, 1 village school, 1 training school for women workers, and 90 communicants.

BETHEL (Alaska): A station of the Moravian Mission in S. W. Alaska, situated on the River Kuskokwim (1885), with 2 missionaries and their wives (one a physician), 7 native workers, 1 chapel, 1 Sunday school, and 115 communicants.

BETHEL (India): A village in the Santal Parganas, Bengal, India; station of the Bethel Santhal Mission (1875), with 1 missionary and his wife, 8 native workers, 5 village schools, 2 high schools, 2 orphanages, 1 dispensary, 1 hospital, and 800 church members.

BETHEL (West Indies): A town in the N. W. of the island of St. Kitts, W. I.; station of the Moravian Missions (1832), with 15 native workers 1 chapel, 1 Sunday school, 1 village school, and 130 communicants.

BETHEL TOWN: A village 20 miles S. of Montego Bay, Jamaica, W. I.; station of the Christian (Disciples) Woman's Board of Missions, with 1 missionary, 2 chapels, 2 Sunday schools, 1 village school, 2 Young People's Societies, and 120 church members.

BETHEL SANTHAL MISSION (1875): Evangelistic work among the Santals near Jamtara, Bengal, India, was begun in 1875 by Pastor A. Haegert, at his own expense. A mission house which grew up about it was called Bethel. Schools for women workers, and 90 communicants.

BETESDA (Africa): 1. A settlement in the S. W. part of Basutoland, S. Africa; station of the Paris Society for Evangelical Missions (1843), with 1 missionary and his wife, 22 native workers, 12 outstations, 11 village schools, and 620 communicants.

2. A village about 40 miles W. of Kokstad, Griqualand, Cape Colony, S. Africa; station of the Moravian Missions (1877), with 2 missionaries and their wives, 27 native workers, men and women, 2 preaching places, 10 village schools, and 390 communicants.

BETESDA (India): 1. A village S. of Madhupur, Bengal, India; station of the Bethel Santhal Mission (1891), with 1 missionary, 3 native workers, 1 chapel, 1 Sunday school, 1 village school, 1 high school, 1 orphanage, a dispensary, a hospital and 30 communicants.

2. A town in South Arcot, Madras, India. See KALLAKURCHI.

BETHESDA (West Indies): A village on the E. coast of the island of St. Kitts, W. I.; station of the Moravian Missions (1820), with 16 native workers, men and women, 1 chapel, 1 Sunday school, 1 village school and 400 communicants.

BETHEL: 1. A town in Palestine, near Jerusalem. The birthplace of Jesus Christ. Station of the CMS (1899), with 4 missionary women, a village school and a high school. Also station of the Jerusalem Union of Berlin (1861), with 8 missionaries, men and women, 13 native workers, men and women, 3 outstations, 1 chapel, 1 orphanage and 5 village schools.

2. A village in the Santal Parganas, Bengal, India; station of the Bethel Santhal Mission (1884), with 1 missionary woman (physician), 3 native workers, 1 chapel, 1 Sunday school, 1 village school, 1 high school, 1 orphanage, a dispensary, a hospital and 50 communicants.

BETIGERI: A village near Gadag, in the Dharwar district, Bombay, India. Population of Gadag-Betigeri (1891) 23,880. Station of the Basel Missionary Society (1841), with (1902) 2 missionaries and their wives, 20 native workers, men and women, 5 village schools, 1 Sunday school and 279 communicants. Also station of the SFG (1888), with 6 native workers, men and women, 3 village schools and 36 communicants. Also written Betigeri and Betigeri.

BETO: A village in the southern part of Borneo, Malaysia; station of the Rhenish Missionary Society, with 1 missionary and his wife, 2 native workers, 1 Sunday school, 2 village schools, and 70 communicants.

BETTER HOPE. See BETTERVERWACHTUNG.

BETUL: A town in the Central Provinces, India, 50 miles N. E. of Ellichpur. Population, 5,000, chiefly Gonds. Station of the Swedish National Missionary Society, with 1 missionary, men and women, 2 native workers, 1 Sunday school, 1 village school and 16 communicants.

BEUSTER, REV. C.: Missionary of the Berlin MS to Africa. He was the first preacher of the Gospel sent to the Bawendo tribe in North Transvaal, and for twenty-nine years, amidst the greatest difficulties, he labored among these benighted people. He rendered the tongue of this tribe into a written language, translated part of the Scriptures and other literature; taught untutored minds in the primary schools, and pursuing his long and tedious journeys on foot, he preached the Gospel to thousands who had never heard the Word of Life. For years he was the victim of the unhealthful climate of the North Transvaal; but without intermission he continued his labors of love until he passed from earth in the year 1901.

BEYROUT. See BEIRUT.

BEZWADA: A town of 20,000 (1891) inhabitants on the Kistna River, S. W. of Ellore, Madras, India; station of the CMS (1858), with 5 missionaries, men and women, 47 native workers, men and women, 28 village schools, 1 high school and 780 communicants. Also station of the CEZMS (1881), with (1902) 2 missionary and
Bhadrakh

**Bhadrakh**: A town in the Balasor district, Orissa, Bengal, India; station of the Free Baptist General Conference (1890), with 1 woman missionary, 8 native workers, men and women, 1 chapel, 1 Sunday school, 1 village school and 25 church members.

**Bhagalpur**: A city in the Bhagalpur district, Bengal, India, situated on the Ganges, with a population (1901) of 75,760, chiefly Hindus and Mohammedans. Station of the CMS (1850), with (1901) 2 missionaries, 1 with his wife, 8 native workers and 11 outstations, 2 elementary schools, 1 high school, 1 dispensary, 1 hospital, 1 orphanage and 288 zenana pupils. Also station of the CEZMS (1882), with (1902) 4 missionary and 14 native women workers, 12 elementary schools and 178 zenana pupils. Also station of the Mission to Lepers in India and the Central India Mission (1889), with (1902) 2 missionaries and 4 mission schools and 178 zenana pupils. Also station of the Mission to Lepers in India and the Central India Mission (1889), with (1902) 2 missionaries and 4 mission schools and 178 zenana pupils.

**Bhagayya**: See Bagnana.

**Bhaisdehi**: A town in the Central Province, India, N. E. of Ellichpur; station of the Kurku and Central India Mission (1890), with 2 missionaries and their wives, 3 native workers, 1 chapel, 1 Sunday school, 1 village school, 1 orphanage, 4 dispensary and 6 church members.

**Bhamo**: A town and trading center and head of steam navigation on the Irrawaddy River, 180 miles north of Mandalay, Burma. Population about 7,000. It is but 40 miles from the Chinese frontier. It is a station of the ABMU, opened in 1877, and occupied by 8 missionaries and 12 native workers, men and women. It has 9 out-stations, 10 preaching places and 2 common schools. There are 120 church members.

**Bhandara**: A town of 13,009 inhabitants, east of Nagpur in the Central Provinces of India; station of the UFS, with 1 missionary physician, 20 native workers, men and women, 4 village schools, 1 orphanage, a dispensary, a hospital and 30 church members.

**Bhaptapur**: Chief city of the native state of Bhatpur, Rajputana, India. Population (1891) 68,033, chiefly Hindus. Station of the ME, with 21 native workers, 1 chapel, 15 Sunday schools, a Young Peoples’ Society, 8 village schools and 550 church members.

**Bhera**: A town of about 17,000 inhabitants situated on the Jhelum River in the Punjab, India; station of the UP (1884), with 1 missionary and his wife, 2 missionary women and 2 outstations.

**Bhils**: An aboriginal Kolarian race of Central India. One of their typical men is about 5½ feet in stature, with short arms, prominent cheek bones, thick lips, black hair and beard. Together with other Kolarian aborigines they were pushed back by an early Aryan invasion from the plains into the hill country, and are now scattered over Rajputana, the hills of the Vindhyas and Sappura ranges, the outlying portions of the Ganges and Godavery basins. Some, as far south as Poona, and eastward along the Godavari and Wand rivers. Their favorite abode is along the rugged, wooded banks of the Tapti, Mahi and Nerbada Rivers which flow into the Arabian Sea. Their estimated number is 3,000,000. Cruelly treated by the Marathas they have lived apart, with their own chiefs and councils which settle disputes between individuals and communities, the British authorities maintaining a difficult supervision over them. Marauding expeditions into the cultivated country, brigandage, the chase with bow and arrows as weapons, the raising of sheep and goats, some rude agriculture, and some simple manufactures in bamboo have been their means of support. When at home, they dwell in little hamlets, called polis, each headed, tolerably well built of loose stones and interwoven bamboo, located on a separate hillock so that an enemy may not surprise a whole town at once. Their clothing is meager. They have now no separate language. They are addicted to drink, and when intoxicated are quarrelsome. Polygamy is practiced, but more than two wives is unusual. Women are chaste after marriage.

Their religion is spirit worship, with additions from Hinduism. They are firm believers in ghosts and in witches. The latter they swing head downwards until they die or confess; but upon confession the witch is punished with death or banishment. Siya and other Hindu deities are worshipped and local deities are numerous. Gataanj, their patron saint, occupies a niche in most Bhil houses. A Brahman is usually called in to officiate at the naming of the child and at marriage. The dead are buried and the ashes cast into sacred streams, for unless they have such a resting place, their spirits are supposed to trouble surviving relatives.

Missionary work was begun among the Bhils by the Church Missionary Society in 1880. It was at first very difficult to get in touch with this scattered, secluded and suspicious highland folk, but persistent kindness at last won their confidence. The first converts were enrolled in 1890, but in 1900, after twenty years of labor, the mission numbered fourteen baptized and fifteen catechumens. The work of the missionaries in famine relief in 1901-2 proved the turning point in the history of the mission, and since the Gospel has been welcomed, thousands of children have been enrolled, and the Bhils undertook the building of their own church. The Bhil Mission of the Church Missionary Society occupies four stations in Rajputana; Kherwara, Lucasia, where there is a girls’ orphanage; Baulia, and Bilpara, with a boys’ orphanage.

The history of other missions has been similar. The United Free Church of Scotland has an encouraging Bhil Mission in Rajputana with a “Shill Home” at Udaipur. Amkhit is the field of the vigorous Bhil Mission of the Presbyterian Church of Canada, with educational, medical, orphanage, and industrial departments. The Christian Bhils have proved good mechanics. The baptist in 1901 numbered 105. The Bhils are at a crisis in their history, and before long will become either Hindus or Christians. Because of the absence of caste, they do not meet the opposition which the Hindus do from their own people when they try to improve their condition. They are now coming to know their need, and at present they seem peculiarly open to the Gospel.

**Wild Races of S. E. India**, Lawin (T. H.), London, 1879; *Brief History of the Indian Peoples*, Hunter (W. W.), London.

**Bhimpur**: A town lying N. W. of Midnapur, Bengal, India; station of the Free Baptist General
Conference (1874), with 2 missionaries and their wives (physicians), 139 native workers, men and women, 2 outstations, 45 Sunday schools, 45 village schools, 2 orphanages, 1 industrial school, 1 dispensary, 3 Young People's Societies and 270 church members. Also written Bhimpore.

BIHANGA: A village N. E. of Bahraich, in the United Provinces, India; station of the ME, with 11 native workers, men and women, 8 Sunday schools, 1 village school, 4 Young People's Societies and 220 church members.

BIHWANI: A city of the Punjab, India, 60 miles W. of Delhi. Population (1891) 35,487. Station of the Baptist Zenana Mission (1887), with 4 mission women, one a physician, 3 native women workers, 3 Sunday schools, 3 village schools, a dispensary, a hospital and 50 Zenana pupils.

BIHOT: A village in the Almora district, United Provinces, India, situated near Chandag, north of Pithoragarh; station of the ME, with 1 missionary woman (physician), 14 native workers, men and women, 3 chapels, 4 Sunday schools, 23 village schools, 1 Young People's Society, and 25 church members.

BHUTAN: An independent native state on the southern slope of the eastern part of the Himalayan range, E. of Sikkim and separating British India from the frontier of Tibet. It has an area of about 13,000 sq. miles and a population estimated at about 30,000. The religion of the people is Buddhism of a degraded type. Their language is allied to the Tibetan. The people are called Bhutias.

BIBLE CHRISTIAN HOME AND FOREIGN MISSIONARY SOCIETY: This society was organized in 1821 for the purpose of sending missionaries into unchristianized portions of the United Kingdom and into heathen lands. In 1831 it sent two missionaries to North America, one of whom occupied a station in Canada, and the other in Prince Edward's Island. Their work was eminently successful, and in 1883, when the union of all the Methodist churches in Canada was effected, the membership of this mission was about 7,000.

In 1850 Messrs. James Way and James Rowe were sent to South Australia, and later several other missionaries settled in Victoria, Queensland, and New Zealand. The work here being carried on under favorable circumstances, soon grew independent and self-supporting, and now the principal work done in this mission is the planting of new churches in needy districts.

In 1885 the Society sent two missionaries to Yunnan, China, under the auspices of the China Inland Mission, whose repeated appeals for help had aroused much interest. At present the Society has three stations, Yunnan-fu, Chao-tung-fu, and Tung-Chawan-fu, 12 missionaries, 6 native evangelists, 41 church members and 200 scholars. The recent changes have brought large numbers of inquiries.

At home the Society has missionaries working among the lowest classes of people in London and other parts of England. The Woman's Missionary League of the Bible Christian Missionary Society, was organized as an auxiliary to the Society in 1892 with special reference to the work in China.

BIBLE DISTRIBUTION: Its object is to bring knowledge of the Bible within reach of every person. The great Bible societies have adopted the principle that the end which they are to keep in view is not the possession of the Bible, but its distribution which ignores this distinction is liable to do more harm than good. At different times certain persons have given away large numbers of Scriptures to the crowds that gather at such places as Jerusalem, or at fairs and exhibitions and even inspired a feeling of contempt.

In order to meet the requirement that the Bible shall be placed within the reach of every person, however poor, the societies have adopted the general principle of gauging prices by the ability of the people rather than by the cost of the book. In such lands as the United States, Great Britain and the larger part of the Continent the Bible societies as a rule ask something for their publications, reckoning in the cost the expense of printing and binding, but making no account of the outlay for editorial work. To this however, there are exceptions. In order to meet a special need, an edition, usually of the New Testament, is sometimes placed at a figure even less than the cost, as in the case of the editions designed for use in the schools or for distribution among the poorer laborers.

In the mission fields the day's wage of a laborer is often taken as the gauge, and an edition of the whole Bible, in plain but substantial binding, is issued at such a figure as will be within the reach of the ordinary peasant or artisan. Editions of the New Testament, or of different portions of Scripture such as the Gospels, Psalms, Proverbs, the Pentateuch, etc., are made proportionate in price. Scriptures in finer binding are sold at actual cost, since they are of the nature of luxuries.

If the distributor is satisfied that a person is not able to give the price of the book, and that a copy will be well used, ordinarily no charge is made. The plan of trying to secure the attention and interest of a person not especially interested in the Bible by the donation of a copy has not, as a rule, been successful. But no iron rule as to free distribution can be laid down. Much must be left to the judgment of the person engaged in the work.

For many years the Bible societies worked as auxiliary to the mission societies in distributing the Bible; making grants of books, giving money to pay colporteurs, etc. As the different denominations entered the field, and in not a few cases covered much the same ground, the work began to individualize, and at last the necessity for providing the Scriptures for many people whom the missionaries could not attempt to reach, led to the appointment of a class of agents quite distinct from those of the missionaries. Thus grew up the system of agencies much like those of any mercantile house. The Bible Society Agent is located at some central point, such as Berlin, Vienna, Constantinople, etc. He keeps informed as to the needs of the class of agents under him, and seeks to improve every opportunity to increase the circulation of the Scriptures and to add to the popular understanding of their value. In Japan the Bible Society Agent has made a point of selling the Scriptures on railroad trains, with good effect.

As in the case of missionary societies, so with
the Bible societies, disadvantages have arisen from the presence of two or more in the same territory. This has often entailed needless expense, has produced much competition, if not between the Societies or their Agents, at least between their employees. (See Comity).

The subordinate agencies of distribution are:

1. **Bible Depos.** These do not serve merely or even principally as salesrooms or places of storage, as is above all too often the case. The sales from a Depot seldom equal those by a colporteur and it has sometimes been a serious question whether the cost of maintaining them has been wisely incurred; yet where an effort to dispense with them has been made, they have been quickly reestablished as an essential feature of Bible work.

2. **Colporteurs.** The work of these men is the main stay of Bible distribution in the mission fields. By far the larger part of the Scriptures sold on mission ground pass through their hands and colporteurs have done and are doing quietly and unobtrusively a work unsurpassed in importance by that of any class of evangelistic laborers, because it is generally like the work of the pioneer. More than the missionary preacher or teacher, colporteurs come in contact with men. They see the coming, in their hands, their fields, and find access to places which no one else could enter. Having as their aim the placing of the Bible in the hands of all who will read and study it, they have to be wiser than serpents. Their daily life abounds in incidents as thrilling as any in the history of the Church. They are commonly plain men, selected not because of education but for their initiative, their tactful methods of dealing with men, and their knowledge of the Bible as a practical guide to life rather than as a storehouse of doctrines. At present there are few lands where every city and town, or even every village and hamlet is not within the field assigned to some colporteur. This is of course demands careful organization, and no one can read the annual reports of the Bible Societies without realizing how gigantic is the work to which they are bending every effort.

3. **Bible Readers.** The work of the Bible society at the point of distributing the Scriptures is so nearly the same as that of the missionary society, that it is not always possible to draw the line sharply between their respective spheres. They are, of course, in their hands, their fields, and find access to places which no one else could enter. Having as their aim the placing of the Bible in the hands of all who will read and study it, they have to be wiser than serpents. Their daily life abounds in incidents as thrilling as any in the history of the Church. They are commonly plain men, selected not because of education but for their initiative, their tactful methods of dealing with men, and their knowledge of the Bible as a practical guide to life rather than as a storehouse of doctrines. At present there are few lands where every city and town, or even every village and hamlet is not within the field assigned to some colporteur. This of course demands careful organization, and no one can read the annual reports of the Bible Societies without realizing how gigantic is the work to which they are bending every effort.

4. **Bible Distribution.** The work of these men is the main stay of Bible distribution in the mission fields. By far the larger part of the Scriptures sold on mission ground pass through their hands and colporteurs have done and are doing quietly and unobtrusively a work unsurpassed in importance by that of any class of evangelistic laborers, because it is generally like the work of the pioneer. More than the missionary preacher or teacher, colporteurs come in contact with men. They see the coming, in their hands, their fields, and find access to places which no one else could enter. Having as their aim the placing of the Bible in the hands of all who will read and study it, they have to be wiser than serpents. Their daily life abounds in incidents as thrilling as any in the history of the Church. They are commonly plain men, selected not because of education but for their initiative, their tactful methods of dealing with men, and their knowledge of the Bible as a practical guide to life rather than as a storehouse of doctrines. At present there are few lands where every city and town, or even every village and hamlet is not within the field assigned to some colporteur. This of course demands careful organization, and no one can read the annual reports of the Bible Societies without realizing how gigantic is the work to which they are bending every effort.
applied to completing the property and to furnishing a Sunday service for the transient crowd always to be found in such a great city. It was simply as a business investment for the care of the secular part of missionary enterprise, the Bible House has been well worth all that it cost; but it has had another and even greater value, as a proof of the practical character of Protestant missions. It is known all through the city and indeed throughout the Empire as the “American Khan,” and as the center of those influences which have done more than all else to arouse ambition for a better life. Enemies have recognized its influence and shaken their fists at it in impotent rage, and many a poor despised Christian has rejoiced in its simple beauty and strength as the token of the power that is yet to redeem the land. If ever there were sermons in stones they have spoken from the walls of the Bible House.

**Bible Lands Missions Aid Society:**

In 1853-4 Rev. G. G. Young, a minister in the North of England, traveling in the East, came into contact with missionaries of the American Board engaged in work among the Armenians in Constantinople, and was greatly impressed with their devotion and zeal. Returning to England he urged that an endeavor should be made to associate Christians of all the churches in an effort to cooperate with those already in the field. Circumstances contributed to awaken interest in the subject. It was just before the Crimean War and the Eastern question was assuming an acute phase. The Sultan was looking to Britain for support against Russia. Sir Stratford Canning (Lord Redcliffe) the astute and able English ambassador at the Porte, had sought to influence the Sultan in the direction of a policy of toleration in religious matters. For several years Christians in Britain had watched with sympathy the converts among the Armenians, who had been grievously persecuted. After one or two public meetings which increased interest in the scheme of an auxiliary agency in England, on the 3d of July, 1854, the Turkish Missions' Aid Society was organized, the Earl of Shaftesbury being elected president. The Society is entirely undenominational, both in its sponsors and in the distribution of its funds. The first rule of its constitution describes its aim: "The object of this Society is not to originate a new mission, but to aid in the extension of missionary work in Bible lands, especially that carried on by the Americans.”

The Society has been and is a most valuable helper to many branches of missionary work in Turkey, having furnished funds to the amount of $612,000 to various special objects of importance. The name of the Society was changed a few years ago by substituting “Bible Lands” for the “Turkish” of the original name. Also the not so largely supported as formerly, the society continues to work on the same lines, making its special province the assistance of Christian work in Greece, Bulgaria, Turkey, Persia, Syria, and Egypt.

The organ of the Society is “The Star in the East,” published quarterly.

**Bible Translation:** “The Day of Pentecost” cost for fifteen or sixteen peoples, that are the translators of the Bible doing for all the peoples of the world. The end in view is that every man may hear in his own tongue the wonderful works of God. For such a work special gifts, graces, acquirements, and instruments are needed, and of these we proceed to speak in the following sections.

**Qualifications Necessary for a Translator:**

The translator should be deeply conscious of the oracy of his as well as of its Marcus Aurelius. The man who enters on such work in a frivolous spirit will fail, like the general who enters on a great war with a light heart. Perfection in translation is unattainable, but it should be aimed at. Translation at best bears pretty much the same relation to the original that the wrong side of velvet bears to the right side. In the wrong side of the texture you may have all the material of the original: the warp and woof may be skilfully shot, all the weight and color may be in the piece, but the gloss and style is wanting. In translation the artistic touch which each author gives to his work, independent of the substance matter, can never be caught or transferred by another hand. If this be so in ordinary translation, it is still more applicable to Bible translation.

The original language of the Bible constitutes great difficulties. The Semitic Old Testament is full of perplexities. The language is archaic, the idioms are Oriental, the transitions are abrupt, the allusions are uncertain; the words thrown together in juxtaposition give little cue, by form or relation, to their exact meaning. Many passages are vague, and capable of several interpretations, and all passages have alliteration and play upon words which cannot possibly be reproduced in translation.

The original of the New Testament is Aramaic Greek, and the old Hellenic forms are filled with new ideas, like the new wine in the old bottles. The old Hellenic words had to be emptied of their old meanings before being dedicated to the new service, and they are often inadequate expressions of the fresh gospel thought. The translator will have to trace the Hebrew conception in the Greek form.

In both old and New Testaments there are many hands visible. The Holy Ghost, who inspired the men that wrote as they were moved, did not interfere with their individuality or style of expression. Paul does not write like Luke nor John like James. The prophets are distinct from each other in thought and style, and immeasurably removed from the feeling and form of our exact metallic age. Taking into account the composite character of the books, ranging from the simplest narrative to most flowing rhapsody, one cannot but recognize how ill-equipped a modern scholar is for translating right through the Bible. The man who would successfully reproduce this Holy Book would have to have the influence of the Holy Spirit who inspired and guided the various authors. Purvey, in his prologue to Wickliffe's Bible, says: "He hath need to live a clean life, and be full of devout prayers, that the Holy Spirit, Author of wisdom, knowledge, and truth, may be in his work, and suffer him not to err... By this manner, with good living and great travail, men may come
to true and clear translating, and true understand­
ing of Holy Writ.

Faith in the Bible is absolutely essential to the translator. It is not desirable that he should have to take down all his beliefs from the shelf and reexamine them whenever a new hypothesis regarding the Bible makes its appearance. The translator should not only have a reasonable intellectual belief in the Word of God, but he should also have, as he has tried and tested it, and found in it his own strength and joy. Having felt its power himself, he will know why he must be careful that none of its meaning is lost in passing through his hands. Having been blessed by it, he will do all that is in his power to make it the bearer of blessings to others. Every phrase, word, letter, mood, and tense will have due weight with him, and nothing will be slurred over or dealt with in a careless or slovenly manner.

A sound judgment is indispensable to a trans­lator of the Bible. No matter how great his attachment and loyalty to the Bible, if he has an ill-balanced mind he is in danger of getting entangled with Biblical fads; and the Biblical faddie is always discovering things in the text of the Bible that have no existence, giving prominence and importance that are out of proportion to other parts, and unconsciously using the book to support his own whimsical opinions. The translator should know the Bible in the unity of its truth, and be able to see individual passages in the light of surrounding truths. He should be able to divest himself of the prejudices of the religious or philosophical school in which he has been brought up, and to cast aside all prepossessions in favor of even the venerable readings of his own Authorized Version.

Sound scholarship must be based on sound judgment. A liberal education, especially in languages, is a good groundwork for Biblical scholarship. The man who professes to know twenty or thirty or a hundred languages is to be avoided. None of the phenomenal linguists of the latter day are masters of a single tongue, and this rule is not likely to change in the future. The translator should concentrate his chief attention on a few languages, and leave large profession to people who wish to be wondered at. A good knowledge of the original languages of the Bible is not of so much importance as is __ with the Bible. The translator should have a choice specimens of the language daily. By this patient procedure with one Gospel he acquired facility in translation, and he had the joy of giving the New Testament to that great people before being taken home to his reward. The memorable words of the revisers of the Authorized Version should never be for­merly reserved for the best scholars, and this will necessitate patience in having her work perfect.

Bishop Steere of Zanzibar spent five years in completing his version of the Gospel of St. Mark into the Swahili tongue.

By this patient procedure with one Gospel he acquired facility in translation, and he had the joy of giving the New Testament to that great people before being taken home to his reward. The memorable words of the revisers of the Authorized Version should never be for­merly reserved for the best scholars, and this will necessitate patience in having her work perfect.

The English and German translators and revisers were rendering the Scriptures into their mother tongues, but the majority of translators and revisers are called upon to translate into tongues which are foreign to them, and which they are obliged to learn. The wise translator will always work with the assistance of native scholars, and this will necessitate patience in many respects. He will have to bear with the inaccurate and self-satisfied ways of the unme­dical natives. He will not be able to take renderings on trust, but must lead his helper round the idea until the exact point is reached. Sometimes, when engaged on languages which have no literature, and which have never been, he will have to catch the words alive, and fix them as best he can on paper.

There is nothing, perhaps, which tries translator's patience so much as having his work revised by others. It is never pleasant to have one's composition found fault with, and every correction made by an inferior assumes imperfect work on the part of the author. If the translator has the grace of patience when he first sees the
work that has cost him so much pulled to pieces, he will soon come to appreciate the suggestions of men much inferior to himself. For all these things patience and Christian courtesy are absolutely necessary.

The translator should cultivate a simple, easy, and well-versed style. Very often first translations, made into a literary language, are cast in too lofty a style. The native helper is a scholar, generally proud of his native literature, in which he has been educated, and his aim will be to translate the Scriptures in accordance with high classical models. It is not the business of a translator to render a version in a language as the language ought to be, but as the language is. The common plain language of the people as used in commerce and in everyday life will be the victorious form of speech, and into this form, avoiding all vulgarisms and low expressions, the Scriptures should be translated.

When the proper standard has been reached another question of great difficulty will arise. The translator should strive to convey the meaning while remaining as faithful as possible to the literal text. The sense must be given whether the passage be rendered literally or not, but pains should be taken to transfer the sense by giving due weight to every word.

Translators of the Scriptures should, whenever practicable, carry out their work by committees. The general rule of the British and Foreign Bible Society on this subject is as follows: "That whenever it is practicable to obtain a board of competent persons to translate or revise a version of the Scriptures, it is undesirable to accept for publication the work of a single translator or reviser."

The first great version of the Old Testament takes its name, Septuagint, from the supposition of its translation into Greek was the work of seventy scholars. It was certainly the work of a large revision committee, hence its great value and permanence.

The revision of the English Bible which resulted in the Authorized Version of 1611 was the work of many scholars.

The Dutch version was the production of twelve translators and sixteen revisers. The Manx Old Testament was the work of twenty-four translators and two revisers.

The text to be followed is of primary importance in Bible translation. Up to 1881 the work of translation for the British and Foreign Bible Society was carried on in accordance with the following instructions:

"Whenever practicable, a version should be a direct translation from the Hebrew and Greek originals. For the Hebrew Bible, the edition of Van der Hooght is considered the standard; and in the use of this the translator is at liberty to follow either the kethib or the keri; but not to adopt any rendering which is not sanctioned by the Massoretic vowel-points, or the keri, or the English Authorized Version, or the marginal readings of this last. In the Greek Testament the English version of the Textus Receptus of 1633, and reprinted by the British and Foreign Bible Society, is considered the standard; but in cases where the Authorized Version differs from this, either in the text or in the marginal reading, the translator is at liberty to adopt a rendering which may agree with any one of these three; and if a translator or editor think it better to omit the subscriptions of the epistles, the insertion of these is not required."

As far as the Old Testament is concerned these instructions still hold good. Hebrew manuscripts of the Old Testament are of no great antiquity, dating only from A.D. 916. No doubt there are ancient readings preserved in such versions as the Septuagint, the Samaritan Pentateuch, the Syriac, and the Latin Vulgate. And there are doubtless previous readings of the Old Hebrew preserved in quotations in the New Testament. Collations of such readings have been made with much labor and some skill; but nothing has been discovered or done to warrant the Bible Society in adopting a new text.

The case of the New Testament widely differs from that of the Old. Numerous ancient and important Greek manuscripts of the New Testament, in whole or in part, have been discovered in recent years. Enormous learning and pains have been bestowed on the collation and criticism of these manuscripts, and on the investigation of early versions and quotations. Sufficient material has been accumulated for the substantial restoration of the Greek Testament of the fourth century.

Under these circumstances the Committee of the British and Foreign Bible Society in 1881 resolved to authorize missionaries and others engaged on behalf of the Society in the work of translation or revision to adopt such deviations from the "Textus Receptus" as are sanctioned by the text of the Revised English Version of 1881.

The careful attention of translators was at the same time invited to the observations of the Company of Revisers on the revision of the Greek text in their preface, and to the caution suggested by their emphatic words: "Many words which may remain in which for the present it would not be safe to accept one reading to the absolute exclusion of others."

Under these circumstances the Committee of the British and Foreign Bible Society was carried on in accordance with the following instructions:

"Whenever practicable, a version should be a direct translation from the Hebrew and Greek originals. For the Hebrew Bible, the edition of Van der Hooght is considered the standard; and in the use of this the translator is at liberty to follow either the kethib or the keri; but not to adopt any rendering which is not sanctioned by the Massoretic vowel-points, or the keri, or the English Authorized Version, or the marginal readings of this last. In the Greek Testament the English version of the Textus Receptus of 1633, and reprinted by the British and Foreign Bible Society, is considered the standard; but in cases where the Authorized Version differs from this, either in the text or in the marginal reading, the translator is at liberty to adopt a rendering which may agree with any one of these three; and if a translator or editor think it better to omit the subscriptions of the epistles, the insertion of these is not required."
countries the truth about God is gathered not so much from the name as from what is taught concerning Him who bears it. The translator in a heathen tongue must select the best term or name he can find, and he may be obliged to take a name of a false god, he will find that by degrees, through reading the Bible, the false meaning will disappear, and the true meaning assert itself. It might be possible to transfer the original names of God by transliteration, but in that case the names might not be sufficiently known, and in some cases, the false sense might remain. In the sense complete, but which have no equivalent in the margin, the words 'some translate instead of 'read me'; and Frenchmen, for the first time, read the gospel with pleasure. There are many additional considerations, so translators must be left to find out the lines within certain limitations on which they can best accomplish the sacred work entrusted to them; and in the matter of details, common sense and scrupulous conscientiousness will be the best guides.

The list of versions in the Appendix enables one to judge of the immense work already accomplished in Bible translation. The Bible is the greatest of all the classics, and its importance may be judged in contrast with them. There are, at the present time, over a thousand philologists busied with Bible translation and revision, and wherever the living missionary goes he takes with him the living word. Versions of the classic masterpieces of Greece, Rome, and the Far East are few, and are found on the shelves of libraries and in the home of learning. The versions of the Bible are for the people, and no sooner have they fallen from the press than they are taken up in such quantities by the missionaries, by the colporteurs, by the zenana women, and by all who wish the divine message made known, that the average circulation of the British and Foreign Bible Society alone is over four million copies a year. See Bible Distribution.

BIBLE VERSIONS: By far the larger proportion of existing versions of the Bible are used in foreign missionary operations. For the most part, they are the fruit of the patient toil of missionaries in the field. The missionary translator, unseen and almost forgotten in the isolation of his life work as he studies the sounds, the structure and the vocabulary of a strange language, and then uses his knowledge in translating the Scriptures, renders a double service to mankind. He not only sets before savage and illiterate tribes the Book which is to lift them in the scale of humanity, but at the same time he gives to the people the idea of committing speech to paper, and provides them with a written code. More than this, he has placed in a form accessible to students in the home land the essential data for studying and classifying the language in which he is working. He thus materially aids
the extension of knowledge. As Dr. Cust has remarked, "It is a marvelous surprise to a scholar who has never left Europe to have a translation of a Gospel handed to him, of the genuineness, and approximate accuracy of which there can be no doubt, in a language that is unprovided with scientific works or literary helps."

The list of known languages and dialects continually grows longer as the surface of the earth is more fully explored. It has been estimated that the total number of languages now rendering active service exceeds 2,000. Yet it is by no means this number of versions of the Bible which we must aim to provide. The list of languages which are dead, and that of other languages which are extinct, show that no version of the complete Bible should be undertaken without careful study of the place and the rank, as permanent or temporary, which that language holds in which the version is to be made. Such a fate as fell John Eliot's Indian Bible, serving only as a library curiosity because of the extinction of the language in which it is printed, is a warning on this point.

As at present conducted, the process of publishing a version is generally as follows: The opportunity or need of one being apparent, an arrangement is made between some one of the Bible societies and the missionary society occupying a certain field, by which one or more missionaries especially fitted for the work are instructed to devote either the whole or a part of their time to the preparation of the translation, their support and the incidental expense being, in many cases, assumed by the Bible society. When the translation is completed, preparations for its publication are made, either on the field, if good printing presses and binderies are available, or in America, England, or Continental Europe, according to circumstances. It was formerly the custom to do much of the publishing in London or New York, but since the establishment of the numerous foreign agencies it is very largely done at the great centers of those agencies, as Vienna, Constantinople, Shanghai, Tokio, etc.

The translation thus made is the property of the Bible society that incurred the expense, and, although there is no regular copyright taken out, the "perversion" or unauthorized reproduction of the work is forbidden. In some cases, as those of the Japanese, Chinese, and Turkish versions, two or more societies have combined to share the expense, and have equal rights of publication. Whenever one society has need of the publications of another the required copies are purchased, cost price rather than selling price being paid, on the principle that one society should not reap financial benefit from the benevolence of another. In certain cases permission is asked, and usually granted, for the use of plates for the reproductions of a version. In general the rule has been for each society to assist every other to the best of its ability, so far as convenience or cautious regard for mutual interest was involved, the aim being not to secure honor or glory to themselves, but to the work or literature. As to the weak languages which cannot hold their ground, and the dialects which cannot all survive the diffusion of education, in general, portions only of Scriptures have been translated into them.

A list of existing Bible Versions, and a list of missionaries who have translated or revised the Bible for the Bible societies, will be found in the Appendix.

**BIBLE WOMEN**: Mission reports originally employed this term as the simplest expression for Christian service on the part of a native woman. A "Bible Woman" read the Bible to other women, went from neighbor to neighbor, repeating texts and explanations as she had heard them, or, if she could not read, she recited memorized passages of Scripture or sang a hymn. The phrase will always signify those who make the Bible known to others. The Bible woman ingeniously invents opportunity to introduce the Word of God to the heathen. She teaches them Bible verses and stories; she enforces her Bible teaching by the example of her own self-sacrificing, happy Christian life. In the progress of present missions, however, the content of the term has expanded until it covers wide and varied activities. What does not the Bible woman do? She is equally ready to join in a husking-bee or a grape-gathering, to help a tired mother with her sewing or in the care of sick children. Groups of women before whose doors knitting or spinning, they sometimes curse the woman and the Book, more frequently respond to her pleasant greeting with an invitation to stop. In 1901, when people were dying of plague in Bombay at the rate of four hundred a day, the Bible women ingeniously invent opportunity to introduce the Word of God to their fellow passengers on the boat, or to the traveler resting, like themselves, in the tea-house or under a wayside tree. Taking advantage of the relations of kinship of clanship, they penetrate to remote country districts where the foreigner has never gone, and publish the name of Jesus where ear has never heard it. In hot and cold, more often in blinding heat, they thread narrow city lanes and teach the alphabet, perhaps, to the secluded women of India. They are leading spirits in the women's meetings, they explain the bhajans, they are a right hand to the pastor. It is they who arrange for the distribution of the sick to be cared for, who advise mothers about their children, urge their education, discourage early marriage, warn against opium. "These Bible women in many ways prove a blessing. The other day, three of them heard a fierce quarrel going on at a village over distribution of the harvest. When the women, who were farmers and Mahars in caste, had come to blows; with God's blessing the Bible women became peace-
makers and all the belligerents were soon sitting together, listening to the word of Christ's love."

"A class has been formed," (says the report of the American Marathi Mission) of old women, some of them blind and crippled; a Bible reader teaches them four times a week. The Bible women have been very faithful to the Bible Society; many garments have been made for the poor and money gathered for materials." 

"A staff of nineteen women are occupied in our Bible work (LMS in Calcutta). Men, also, welcome these modest Christian workers who often have an opportunity of delivering the Gospel message to men of rank and position."

The Bible woman is the link between missionary and native church. She clears up misunderstandings and interprets each to the other. She supplements the missionary's halting tongue with her fluent prayers. She is her escort to the high class house where rigorous etiquette must be observed, and she deliberately chooses the proper moment in which to introduce her Gospel message. "Our efforts," wrote a missionary in Pravance, "would amount to nothing if such a climate had we not a band of native women to go forth under our direction to labor from day to day." "We must repeat ourselves in our Christian work," said another.

The superior natural equipment of the Bible woman is well expressed by Miss Ricketts at the Shanghai Conference in 1890: "She has been in the exact condition of her hearers. She knows the depth of their ignorance, their habits, temptations, modes of thinking and feeling, and therefore she can appeal to them and carry her appeal down from their common life. She has at her command a store of proverbs which give point to what she says. She knows how much may be expected of them in coming regularly to worship, and can meet objections to keeping the Sabbath. One of our greatest Bible women can almost always gain and keep the ear of her countrywomen. She carries with her a wholesome, sunny atmosphere which the people enjoy. When they ply her with irrelevant questions she replies, "I have only one little mouth and cannot answer so many things. What I am saying is of life and death concern to you."

The ideal Bible woman reflects the missionary's methods, and energy and, to a degree, absorbs her cultivation. Her eyes see what sort of instruction the country class needs and discern the secret of sudden coldness in the church. She is the missionary's indispensable helper, and often two, three, and sometimes even more work under her guidance. Missionary and Bible woman mutually depend upon one another, and shut up together as they often are for weeks of itineration, sharing hardship and persecution, their relation in innumerable cases is that of established trust and friendship. Every reader of missionary literature finds here and there upon such testimony as the following, in a missionary's letter from Marsovan, Asia Minor: "Yeranculi, the choiceest of the Bible women, closed her lovely and most useful earthly life in November, 1901. Her loss seems irreparable, and was felt as keenly by the missionaries as by the poor people to whom she had so long, so wisely, and so tenderly ministered."

While the old type of uneducated Bible woman still obtains in places, there is a growing sentiment in favor of training. At least eleven of the leading British and American Societies report distinctive "Bible Training Schools" with an enrollment of about 1,000 pupils. Thorough courses of Bible instruction characterize these schools, and, in most of them, at least music and physiology are taught, and out-door practice is required. The school of the Women's Union Society at Yokohama has a four years' course. Bible women generally work under missionary inspection and render reports. Conferences are occasionally held for their benefit. The women are often of good social position and gentle appearance, but blindness has not prevented some from great usefulness in this calling.

Location; Numbers: We rarely hear of Bible women in missions to Roman Catholic countries, to the South Seas or on the continent of Africa. They are employed in the Turkish Empire, in Persia, Egypt, Korea, Japan, China and especially all over India. "At least two thousand (in India), trained by American and English mission schools, have access to hundreds of thousands of Hindu homes."

When Miss Ellen Stone of Salonika was captured by brigands she had a band of nine Bulgarian Bible women associated with her. Of these it is said: "The women, distaffs in hand, spinning as they walk, not less a precious minute, Testament and hymn-book tucked in the girdle, often with babies on their backs, gather for the prayer hour. It is a sight to make believers in the work of the Bible woman, to see these hard-handied, labor-bowed mothers of many children able to read and sing, thanks to her patience and encouragement."

Certain cities are centers of extensive labors in this line. Jaffna, Ceylon, is worked by over fifty Bible women. In Madura, Madras Presidency, thirty-five women have access to a thousand non-Christians homes in the city where Bible instruction is gladly received, and seventeen other women visit in seventy-two villages and instruct over a thousand pupils. At Ahmednagar, Bombay Presidency, ten classes, including 250 illiterate women, are taught by a band of Bible women who also have pupils in private houses. Thirty-six women of the Union Society are laboring in and about Yokohama. Foochow, China, is another center, where three missions engage in training women for Bible work.

As to the number of Bible women employed in Protestant missions, only a very partial estimate is possible. In 1899 the British and Foreign Bible Society received returns from 552 women under its direction. The London Missionary Society, in 1902, reported a staff of 273 Bible women, the Church of England Zenana Society 242, the American Baptist Union 250, the Presbyterian Board (North) 225, the Congregational Woman's Board (Boston) over 200. The Zenana, Bible and Medical Society (London) reports 92, and the United Free Church of Scotland 30. The American Marathi Mission employs 109 Bible women as against a total of 84 pastors, preachers and men Bible readers.

Those workers who appear on the pages of reports are usually paid, and by this method, a mission ensures to itself the advantages of conscientiousness and definite hours of labor. The wages of Bible women range from 25 to 50 dollars a year. In addition to this recognized force, there are many voluntary workers, the amount
and value of whose services can never be tabulated. In some of the newer missions, it is aimed to develop this voluntary corps and to reduce the number of paid workers to a minimum. The Mission of the Presbyterian Church (North) in Korea is a marked example of this aim. Hundreds of Korean women are voluntarily doing the work of a Bible woman, as against a handful who are paid. The writer has seen one effectively preaching of her own free will to a miscellaneous crowd on a river bank. These Korean volunteer Bible women were met, night after night, in country meetings, where they found the Scripture passages for the slow, and set the example of quiet and order to the uninitiated.

They were heard of, selling Testaments as they traveled about in the conduct of their own business, or held meetings with beginners in the Christian life. Their cleanliness, their pure language and their Gospel message, all were reinforced by the fact that no pecuniary reward had touched their hands.

**BICKNELL, Henry:** Missionary of the LMS to Tahiti, 1796-1820. In 1819 he baptized King Pomare, and also assisted him in the framing of a code of laws by means of which good government on the island was entirely established. Died at Tahiti, August 7, 1820.

**BICKERSTETH, Edward:** Died August 5, 1897.

M. A. Fellow Pembroke College, Cambridge. Ordained deacon in 1873; ordained priest in 1874. Chief station, Delhi, India, from 1877-81. Transferred to Japan in 1888. Consecrated in St. Paul’s Cathedral, 1886, second English Bishop in Japan. Son of E. H. Bickersteth, Bishop of Exeter, and grandson of a former Secretary of the CMS. He was moved by the missionary Bishop French of Lahore to devote his life to a missionary career; and, influenced by French, he planned a brotherhood of Cambridge men, which should form a strong and concentrated mission at some central station, in affiliation with one of the established societies. Bickersteth’s hereditary associations naturally led him to appeal to the CMS, but difficulties arising, he concluded matters with the SPG, and Delhi was chosen for the new “Cambridge Mission.”

Bishop Bickersteth arrived in Japan April 16, 1886, and at his request he was allowed to make his residence at Tokio. His great achievement is spoken of as the formation of the Nippon Sei-kokkai or “Japan Catholic Church”. He felt that the peculiarly independent spirit of the Japanese and the tendency toward a latitudinarian development of Christianity among them, rendered it important that the ecclesiastical organization, with its doctrines and forms, should be positively recognized. He soon felt the value and importance of woman’s work in Japan; and wrote to the Society these urgent words: “I feel strongly that the policy of working through clergy alone is not without the advantage of lady missionaries, has in the past crippled our Mission.”

And since then, Japan has always claimed and received a good share of SPG women.

In 1887 Bishop Bickersteth, accompanied by Bishop Scott, of North China, visited Korea, and their appeal to the Archbishop of Canterbury resulted in the establishment of the SPG Mission in this important field. In 1892 the Bishop set himself to visit every station and outstation of the Anglican Missions in Japan, and his study of this large diocese, with its extremities 2,000 miles apart, led him to the conviction that Japan now needed more bishops. His suggestions were accepted and acted upon. Bishop Bickersteth did much toward consolidating the Japanese Church under American, English and Canadian Episcopal Missions into the Nippon Sei-kokkai with its complete synodal organization, and his name will also be remembered as the founder of the two community missions of St. Andrew and St. Hilda, the former of which (for men) renewed its connection with the SPC in 1900. The Bickersteth Hall, in Delhi, India (built in 1891) affords a splendid opportunity for preaching the Gospel in the very heart of the Mohammedan quarter, and the Bickersteth Memorial Studentships for the maintenance of students studying for the ministry at St. Andrew’s Divinity School, Tokio, supply a felt need.

**BIHÉ.** See Angola.

**BIJAPUR:** Chief town of the district of the same name in the Bombay Presidency, India. Formerly an imposing city, it now has (1891) about 16,000 inhabitants. Station of the Basel Missionary Society (1885), with (1902) 1 missionary and his wife, 9 native workers, 4 village schools and 83 communicants. Name written by the Germans Bichapsiri.

**BIJNAUR:** A town in the Rohilkhand division, United Provinces, India. Population (1891), 16,236.

Station of the ME, with 1 missionary and his wife, 41 native workers, men and women, 4 chapels, 20 Sunday schools, 17 village schools, 1 high school, 1 Young People’s Society and 960 professing Christians.

**BILASPUR:** A town and railway station in the Central Provinces, India. Population (1891), 11,236. Station of the Christian (Disciples) Woman’s Board of Missions (1893), with 7 missionary women, of whom one is a physician, 1 chapel, 1 Sunday school, 2 village schools, a dispensary, a hospital, an orphanage and 70 professing Christians. Also written Bijnour.

**BILIN:** Name of a tribe inhabiting a part of the northern regions of Abyssinia. About half of the tribe are Roman Catholics, a part are Mohammedans, and the rest belong to the Abyssinian Church. The tribe is also called Bogos.

**BILIN LANGUAGE.** See Bogos.

**BILSI:** A town in the Rohilkhand division, Central Provinces, India; station of the ME, with 23 native workers, men and women, 11 Sunday schools, 7 village schools, a Young People’s Society and 960 professing Christians.

**BIMALATAM:** A town on the coast of the Vizagapatam district, Madras, India; station of the EPC (1876), with 2 missionaries and their wives, 1 missionary woman, 6 native workers, men and women, 2 outstations, 1 chapel, 1 Sunday school, 1 theological seminary and 22 church members.

**BINA:** A town and railway station in Central India, S. W. of Lalkpur; station of the FCMS (1894), with 1 missionary and his wife, 1 missionary woman, 3 native workers, 1 chapel, 1 Sunday school, 1 village school, 1 orphanage and 60 church members.

**BINGHAM, Hiram:** born at Bennington, Vt., October 30, 1789; graduated at Middlebury
BING-YAE. See Ping-yang-hsiien.

BIRD, Rev. William: Died August 30, 1901. On the 17th of August, 1901, Rev. William Bird celebrated the 79th anniversary of his birthday. He had entered on his fiftieth year of service in the mission field.

His first came to Syria in 1823 as an infant. When his parents and their associates were obliged to flee from Syria, this child became treasurer of the Syria Mission, his bed and pillow being the safe deposit vaults for the cash, thus during the capacity of the Turkish officials and the violence of a lawless populace.

Not long after, when he returned a second time, with his parents, to Beirut, the entire Protestant community came in a little boat to meet them. It consisted of two men.

In 1855 Mr. and Mrs. William Bird began their missionary career (under the ABCFM), the last twenty years of which was spent in the service of the Presbyterian Board (North). Having spent his childhood in Syria, the difficult Arabic language was practically his vernacular. His life was full of zeal and earnestness and self-denial. He preached with power and marked effect. He was loved and honored by the people. Wherever he went he was welcomed. He ate with the people and slept as they slept when on his tours, winning their confidence and friendship by identifying himself with them, as few missionaries are able to do. He was particularly attractive in his school work and enthusiastically welcomed by all children. He was loved and honored by all who knew him, and is deeply mourned by all his associates and acquaintances.

BIRI SIRI: A village on the borders of Assam in Eastern Bengal, India, N. E. of Nasirabad; station of the Victorian Baptist Foreign Mission Society (1853), with 31 native workers, 20 outstations, 20 chapels, 18 Sunday schools, 20 village schools, 1 training school for women workers and 512 professing Christians.

BIRTOLE: A town in the western part of Manitoba, Canada; station of the PCC (1883), with 1 missionary and his wife, 2 missionary women, and 1 high school.

BISAULL: A village in the Rohilkhand District, United Provinces, India, N. W. of Budaun; station of the ME, with 20 native workers, men and women, 2 chapels, 16 Sunday schools, 6 village schools, 1 Young People’s Society, and 1,290 professing Christians.

BISHNUPUR: A town in Bengal, India, S. E. of Bankura; station of the WMS. Statistics included in those of Bankura. Name also written Bishenpore.

BISHOP, Artemus: Born at Pompey, N. Y., December 30, 1795; graduated at Union College, 1819, and Princeton Theological Seminary, 1822; sailed as a missionary of the ABCFM in the first reinforcements for the Sandwich Islands, 1822. He was stationed at Kailua, and was associated with Mr. Thurston in the translation of the Bible. After residing twelve years at Kailua, he removed to Ewa, on Oahu, where he labored twenty years with great success. Here he translated Pilgrim’s Progress and many other books.

He never left the islands except once, and that as a delegate to the Marquesas Mission, in 1858. He died at Honolulu, December 18, 1872.

BISRAMPUR: A town in Chota Nagpur, Bengal, India; station of the German Evangelical Synod Missionary Society, U. S. A. (1869), with 2 missionaries, 1 missionary’s wife, 1 missionary woman (physician), 22 native workers, men and women, 9 outstations, 20 chapels, 1 Sunday school, 5 village schools, 1 high school, 1 industrial school, 1 theological seminary, 1 orphanage, a hospital, a dispensary, and 670 communicants.

BISTOPUR: A town E. of Calcutta, Bengal; station of the BMS (1844), with 4 native workers, 12 outstations, 14 village schools, 1 high school, 13 Sunday schools, 7 young people’s societies, and 475 church members.

BITHYNIA: In ancient times a section of Asia Minor, bordering on the Sea of Marmora and the Gulf of Nicomedia. There is no present province of that name, but the term is still applied in general to the same region. It includes especially the cities of Brousa and Nicomedia, with no very well defined limits either to the north or east.

BITLIS: A city of Eastern Turkey, 150 miles southwest of Erzerum. Climate, healthy, dry. Population, 25,000, Mohammedan Kurds and Turks and Christian Armenians. Its situation among the mountains of Kurdistan is peculiarly beautiful, and surrounded as it is by high peaks, it served for a long time as the virtual capital of the Kurds. The rough, turbulent character of the people has often occasioned trouble and even danger; a massacre of Armenians occurred in the city in 1895.

Station of the ABCFM (1859), with 1 missionary and his wife, 3 missionary women, 29 native workers, men and women, 12 outstations, 9 chapels, 3 Sunday schools, 19 village schools, 2 high schools, 1 industrial school, and 250 church members.

BIZERTA: A seaport town and seat of a Roman Catholic bishop, in Tunis, Africa; station of the NAM (1898), with 2 missionary women and 1 Sunday school. Also station of the Swedish Women’s Foreign Mission Work (1898), with 2 missionary women.

BLACKFOOT CROSSING: A station of the CMS (1883) on the S. Saskatchewan River, Alberta, Canada, with 3 missionaries (1 a physician), 1 missionary’s wife, 2 native workers, 1 chapel, 1 high school, 1 dispensary and 94 baptized Christians.

BLACKFOOT LANGUAGE: Belongs to the central group of the North American family of languages. It is spoken by some 7,000 Indians in the Province of Alberta, Canada. It is written with Roman letters.
BLACKLEAD ISLAND: A station of the CMS among the Eskimos, on the W. coast of Cumberland Sound, north of Labrador (1884), with 2 missionaries (1 with his wife), 1 village school, and 5 baptized Christians.

Station of the CSFM (1874), which has had many difficulties to overcome, some due to early inexperienced, some to the intrigues of jealous merchants and some to inevitable collisions with Arab slave dealers. The place is now, however, prosa

BLEBY, Rev. Henry: Born in Winchcombe, England, March 16, 1809. Died May 22, 1882. Missionary under the WMS. He was received into the ministry in 1830 and sent out to the Jamaica district in the West Indies, where he rendered valuable services to the Church of God. He was prominent among a noble band of men who, in the midst of deadly persecution, counted not their lives dear to themselves if they could but mitigate the sufferings of their oppressed fellow creatures. On one occasion the enemies of missions to the slaves seized him, daubed his body with pitch, and tossed him into a life of debauchery. He was only saved by the brave interference of his wife. The experiment of Wesleyan missions in the West Indies owed much of its success to the courage and faithfulness of Mr. Bleby in the discharge of the difficult duties that devolved upon him.

He was the author of the following works: Death Struggles of Slavery (being a narrative of facts in Jamaica during the two years immediately preceding negro emancipation), Scenes in the Caribbean Sea. Reign of Terror (W. Indies). Romance without Fiction; or, Sketches from the Portfolio of an Old Missionary.

BLIND; Missions to

BLIND, German Mission to. See Germany; Missionary Societies in.

BLIND; Missions to the: This is one of the works of general philanthropy for which non-Christian peoples are indebted to Christian missions. Pagan and more especially Mohammedan, peoples give help to the blind as they do to other impotent folk. The emotion of pity is a characteristic of the human race, of which, happily, traces may be found even where self-seeking sometimes seems to have extinguished all other motive of action. But in non-Christian countries that habit of thought for the welfare of others is lacking which Jesus Christ teaches His followers. As a rule, in such countries the helplessness of the blind is regarded as a natural calamity for which they areimagined, and which therefore separates them from any possible connection with the interests of social life. Pity for their condition is superficial and finds sufficient expression in occasional doles of food or pence, and only occasionally in the construction of shelters for them. They are a sightless one, at the best, if he is one of the common people, is that of a plaintive supplicant who suffers in ragged and lonely uncertainty until death releases him. Schemers for easy gain take advantage of the calamity in some of the Asiatic countries. A blind child is taken in hand and cared for, as a business investment by men who clutch as their due the proceeds of the beggar's appeal to the pitiful. In Turkey, men make it their profession to sour the country in search of such impotent folk in order to hire or buy them from their relatives, and then to exploit their miserable condition on the streets of the cities. In China, it was in past years generally, and in some places still is, the custom of similar harpies to gather up blind girls and house and clothe them in order to make money by thrusting them into a life of debauchery. In such lands the best that can happen to a blind person is that of the poorer classes is to be left alone that people may toss him a beggar's dole and pass by on the other side. But let the Gospel bring over such a land and the missionary who is charged to make it known cannot rest until he has devised means of giving the blind the power to read, to earn a living, and to feel, by means of this kindness which appreciates his deeper needs, the love of Jesus Christ for outcasts. The works of missions for the blind cannot here be cataloged in detail. But it is a work which should not be passed by without reference. In China an unusually large per cent. of the population become blind through smallpox, leprosy, and ophthalmia. For neither disease is any sane medical treatment provided by the natives, so filthy and immoral habits, and the brutality of parents who willfully blind their children through greed of gain, are also causes of blindness in China. As far back as 1857 the mission of the Protestant Episcopal Church (U. S.) in China established a school for the blind. In the northern part of the empire efforts to help the blind took a new development when William Murray, then a colporteur of the National Bible Society of Scotland, succeeded in applying the Braille system of raised dots to the Chinese characters. His Christian sympathy for the wretched Chinese blind drew the whole power of his mind to their relief, with the result that he solved the problem of enabling them to read books.

The system which Mr. Murray arranged is so simple that even Chinese who can see have found the Braille alphabet of dots more easy to master and use than the quaint but perplexing characters written by their own ancient scribes. Mr. Mur ready obtained money to open a school for the blind at Peking in 1851, which has now made the children orphaned by illness or war, and to work for their own support, but has transformed some of these hopeless and dependent creatures into active missionary agents, as Scripture readers, singers of sacred songs, and organists in Christian churches. The amazement of the natives on seeing a blind child read with his fingers arouses the deepest interest, and becomes a
means of turning men's minds to study the reasons for the intelligent humanity of the followers of Christ. The Braille system has been adopted by some of the missionary societies, and as the children in the blind schools learn to write it, they also begin preparation of a stock of Bible verses and other useful matter which, once committed to paper, they can read again and again. The Braille system has been adopted by the Moon system the means of publishing, in the Mandarin and three local dialects of Chinese, Gospels or other parts of Scripture for the blind.

What Mr. Murray did for the Chinese of the Peking region was done for the people of a good part of Turkey by the late Rev. Elias Riggs, D.D., aided by Mr. G. W. Moon. Some of the Gospels have been prepared for the blind in Armenian and in Turkish. One or the other of these two systems has been adopted for the uses of the blind in Arabic, in several of the languages of India, in Burmese, in Sinhalese, in the Tagalog language of Sumatra, and in the language of Uganda, in Africa. Thus in many lands numbers whose case had been given up by their nearest friends as beyond human aid, have been taken in hand for Christ's sake by strangers from beyond the seas and have been caused to see the light.

There are now 12 institutions for the blind in China, maintained by the FN, the CMS, the PE, the CIM, the WMS, the PCE, the Berlin Ladies' Missionary Association, and the German Mission to the Chinese Blind, besides the Murray Mission and another independent mission expressly to the blind. In India 6 such institutions are carried on by the CMS, the GMS, the CEZ, the CP, and the ABCFM. In Japan there are 4 missionary institutions for the blind established by the CMS, the MCC, and an independent mission. Another independent organization carries on a school for the blind in Korea. The PCE has an outdoor mission to the blind in Formosa, and cooperates with the Japanese Government in giving permanent asylum to those who need it. The British Syrian Schools Committee has opened three schools for the blind in Syria, one of them on the ruins of Tyre—that ancient queen of the Mediterraean. In nearly all of these institutions there is provision to endow the pupils with simple industries which will give them occupation and support. But the number of asylums and schools for the blind does not represent the work of missions for these wrecked lives. In every mission field where no such schools exist, individual missionaries teach, and elevate, and comfort, and make happy individuals who but for them would never know the meaning of sympathy. Moreover, this humanitarian work has stirred non-Christians to imitate or support so far-reaching a charity. Even in Turkey, Mohammedans have been in recent years to copy this part of the teaching of the Christians.

There is no point of comparison between the non-Christian religions and Christianity which reveals a sharper contrast than their idea of what constitutes kindly care for the feeble and helpless. The man who does not know Christ may probably feel pity, but his religion does not direct his pity to reach its proper goal. So he gives the sufferer a penny and leaves him as he was; but he who has learned from Jesus Christ cannot leave the blind man when he has given him bread. He sees the profounder needs belonging to manhood—the needs of heart and soul and mind. He has to supply these needs by a continual and unfailing sacrifice of himself. But in doing it, he becomes a means of revolutionizing a hopeless and useless life by bringing it within touch of the springs of power in the eternal. This work for the blind of non-Christian lands would not be done if it were not done by Christian missions.

BLISS, Edwin Eliza: Born at Putney, Vt., April 12, 1817; died at Constantinople, Turkey, December 30, 1892. Graduated at Amherst College in 1837, having for his college mates Henry Ward Beecher, Roswell J. Hitchcock, and Richard S. Storrs. Graduated at Andover Theological Seminary in 1842; sailed for Turkey March 1, 1843, as a missionary of the ABCFM assigned to the Nestorian district, where he became a peer. Probably all admitted that "for his private life, the certainty with which his action was controlled by common sense unbiased by passion or prejudice," to use the words of one of his associates, "and the mingled devotion, pathos, and humor which characterized his discussions of important matters," caused it to be remarked that while other missionaries of renowned power were at Constantinople at the same time with him they all recognized in Dr. Bliss a peer. Probably all admitted that uniform soundness of judgment at times of crisis he stood first in the mission. Dr. Bliss preferred to spend time in doing his work rather than in calling attention to it. Hence he was not widely known outside of mission circles, although his services in Turkey continued nearly fifty years.

BLISS, Isaac Groat: Born at Springfield, Mass., July 5, 1822; graduated at Amherst College, 1844, and studied at Andover and New Haven Theological Seminaries. He married Eunice B. Day, of West Springfield, and in 1847 was ordained a missionary of the ABCFM. Stationed at Erzerum, Eastern Turkey, he was a pioneer in opening up the valley of the Araxes for missionary influence. Uninterrupted labor and
continued traveling, at that time far more dangerous and fatiguing than now, broke down a naturally fine constitution, and in 1852 he was obliged to visit America, and later to resign his connection with the Board. Scarcely a day after his resignation an invitation came to him from the American Bible Society to go to Constantinople as agent for the Levant. The work being less confining, in the winter of 1857-58 he entered upon it with enthusiasm.

Assuming the agency without any organization at all. There were almost no rules as to the distribution of Bibles, and the greater part of the funds received from their sale was applied to general missionary work. With great tact and patience, and indomitable will, he set to work to bring order out of confusion. His field was very large, covering the whole Turkish Empire (including Egypt, Syria, and Mesopotamia), Persia and Greece. Located at Constantinople, the port by which most missionaries to those lands entered into their fields, and where for four years the annual meetings of the whole missionary force were held, his house was always open, and there were few of those who passed through that did not enjoy its hospitality. He traveled some, the hot as much as he felt essential, on foot, almost the entire work from the little office that he shared with the treasurer of the mission of the ABCFM at Constantinople.

Their cramped and unhealthy quarters were a constant trial, and at last the resolution was formed to build a Bible House for Constantinople corresponding to that in New York. Called home in 1866 to attend the Jubilee of the Bible Society, he pressed the need of such a building. The Society was unwilling to take it up, but in 1867 he returned with the requisite funds. The Society then, and in 1872 the edifice was complete and open, and there were few of those who passed through that did not enjoy its hospitality. He traveled some, the hot as much as he felt essential, on foot, almost the entire work from the little office that he shared with the treasurer of the ABCFM at Constantinople.

While in the midst of superintending the erection of the Bible House, Dr. Bliss took the time, in 1870, to make a hurried visit to America, and secured the transference to Beirut of the great work of electotyping and printing the Arabic Bible. This had hitherto been done at the Bible House in New York, and the change seemed to many hazardous, yet by dint of most earnest appeals he secured the endorsement by the Society of a step since recognized to be one of the most important in its history.

Then came the question of the Turkish versions. There were at that time three, in the Arabic, the Armenian, and the Greek characters, all made by different men, and with differences of meaning as well as of idiom. This had long been felt to be unfortunate, yet there seemed to be no help for it. Dr. Bliss believed that the difficulty could be overcome, and even at the risk of offending some, he pressed for a union of the forces that were revising each version. At last he carried the day, and the Turkish version of to-day is scarcely less a monument to the men who made it than to him whose clear vision and earnest purpose made it possible for them to make it.

Meanwhile, he pressed colportage unceasingly. From 2,500 copies during the first year, the circulation ran up to 56,628 in the twenty-fifth year of the agency.

The winter of 1888-89 was a trying one, and he sought relief in the warmer climate of Egypt, but on February 16, 1889, he passed away in Assiout, Upper Egypt. He was buried by the side of a lifelong friend and fellow-laborer, Rev. John Hogg, D.D., at the very outpost of his agency, whence it had been his desire to push on the Bible work into the heart of Darkest Africa.

BLOIDGET, Rev. Henry: Born in Bucksport, Me., July 25, 1825. Died in Bridgeport, Conn., May 23, 1903. For forty years a missionary of the ABCFM in China, and for eight years a Corporate Member of the Board. He graduated from Yale College in the class of 1848, and was tutor there from 1850 to 1853. He studied in New Haven and Andover Theological Seminaries, and was ordained as missionary in January, 1854, sailing that same year for China. He arrived at Shanghai in September, 1854, and began to teach in the Chinese language a year later. Dr. Blodget was engaged at Shanghai and at Tientsin ten years, but in 1864 he located at Peking, where he remained until 1894, when, owing to the increasing infirmities of old age, he returned to America. He had a wide influence in Peking, being universally respected by representatives of the Government, missionaries of all societies and the Chinese Christians. For the last thirty years of his life in Peking Dr. Blodget gave his time largely to literary work. He gave his best strength for nearly ten years, with a company of others, to the translation of the New Testament into the Mandarin Colloquial of Peking. He translated 194 hymns and six doxologies, and, besides the New Testament and these hymns, Dr. Blodget translated several lesser works, as Thomas à Kempis, The Reformed Church Catechism, by Philip Schaff; President Edwards' Consecration, and Henry and His Beater. He also carried from Shanghai a Catechism and Trimetrical Classic, which he rendered into Pekingese Colloquial, and which has been widely distributed in North China. But Dr. Blodget, while giving his time largely to literary work, possessed strongly the evangelistic spirit. Every morning he had a Bible class for helpers and inquirers, and he gave time to preaching in the street chapel in the afternoons. Once or twice in the year he made a tour into the country, and for sixty miles south of Peking these visits exerted great influence for good. His life and labors were a permanent contribution to the cause of missions.

BLOEMPONTEIN: Capital of the Orange River Colony, S. Africa. Population (1890), 3,499. Mission station of the Berlin Evangelical Missionary Society (1875), with 2 missionaries, 10 native workers, men and women, and 370 communicants. Also station of the SPG (1850), with 1 missionary woman. Also station of the South African Wesleyan Methodist Missionary Society, with 71 native workers, 2 mission schools, 1 village school, 1 Young People's Society and 1,550 professing Christians.

FLORA: A town E. of Sazarang, Java, Dutch E. Indies; station of the Neukirchen Missionary Society (1891), with 1 missionary and wife, 7 native workers, 1 chapel and 2 village school.

demands of the Law, and instead began to preach Jesus Christ. This change was what awakened the consciences of the benighted people, leading them to become true followers of Jesus.

**BOGADJIM**: A settlement in German New Guinea; station of the Rhenish Missionary Society, with a missionary physician and his wife.

**BOGOS LANGUAGE**: Belongs to the Hamitic family of languages and is spoken in some of the Solomon Islands. It is written with the Amharic letters.

**BOGOTA**: Capital of the republic of Colombia, on a picturesque and fertile plateau 8,000 feet above the sea. Climate, temperate. Population (1801), 100,000. Mission station of the PN (1866), with 3 missionaries and their wives, 1 missionary woman, 1 native woman worker, 1 village school, 1 high school, and 90 church members.

**BOGOTU LANGUAGE**: Belongs to the Melanesian family of languages and is spoken in some of the Solomon Islands. It is written with Roman letters, and is also called the Isabel Island language.

**BOKHARA**: A Russian vassal state in Central Asia, lying between north latitude 41° and 37° and between east longitude 62° and 72°, bounded on the north by the Russian province of Turkestan, on the east by the Pamir, on the south by Afghanistan, and on the west by the Kara Kum Desert.

The modern state was founded by the Usbeqs in the 15th century, after the power of the Golden Horde had been destroyed by Tamerlane. The dynasty of the Manguts, to which the present ruler belongs, dates back to the beginning of the last century. The Emir of Bokhara, in 1866, proclaimed a holy war against the Russians, who thereupon invaded his dominions and forced him to sign a treaty ceding the territory north of the Syr Darya and to permit Russian trade. In 1873 a further treaty was signed, in virtue of which no foreigner was to be admitted without a Russian passport, and the state became practically a Russian dependency.

The Russian Trans-Caspian Railway runs through Bokhara from Chargui on the Oxus to a station within a few miles of the capital, and thence to Samarkhand.

The area of the country is about 92,000 square miles and the population is about 1,250,000, belonging mainly to various Turkish tribes. The religion is Mohammedanism, and missions are strictly forbidden, excepting those of the Russian (Greek Orthodox) Church.

**BOGOS LANGUAGE**: Belongs to the Hamitic family of languages and is spoken in some of the Solomon Islands. It is written with the Amharic letters.

**BOHEMIA**: A country of Central Europe, formerly an independent kingdom, now a part of the Austro-Hungarian Empire. It has a population of nearly 6,000,000, of whom about two-thirds are Bohemians (Czechs), the remainder being chiefly Germans. The capital and chief city is Prague. The language of the majority is Czech, one of the principal dialects of the western branch of the Slavic languages. Its alphabet is the Latin, and it bears a closer resemblance to the Polish than to any other Slavic language. Agitation for the official recognition of this language, with autonomy for the country, has long continued and disturbing. The religion is Roman Catholic, but the number of Protestants is increasing.

Mission work is carried on by the ABCFM among the Roman Catholics, and by the UCFS among the Jews.

**BOHEMIANS**: The Bohemians, or, as they call themselves, Czechs (Tchekhs), form one of the principal tribes of the Slavic race. They occupy the country of Bohemia in Austria, and number about four millions. They are all Christians, the exception of 150,000, who belong to the Protestant Reformed and Lutheran Confession. The first germs of Christianity were planted among them by Cyril and Methodius, missionaries to the Slavs in the 9th century, and the Bohemian Prince Borivoi was baptized by Methodius in 873-74. But Orthodox or Greek Christianity was unable to maintain itself long in Bohemia, and was soon supplanted by Catholicism. With the introduction of Catholic Christianity, Bohemia came under the influence of German civilization and feudalism, and gradually the German element grew stronger and stronger. Beginning with the year 1253 this German influence spread rapidly, so that the Bohemians were in danger of being entirely Germanized. The reign of Charles I., known also as Charles IV., Emperor of the Holy Roman Empire, is considered one of the brightest periods of Bohemian history. He founded the University of Prague in 1348, and thus helped to make the capital of Bohemia the center of a great intellectual and educational movement. The most important period, however, is undoubtedly the time of John Huss and the reformatory movement which he began. Born in 1368 in an obscure village of Bohemia, and educated at the University of Prague, Huss raised his voice against the corruption and depravity of the Roman Church, and demanded a purer form of religion. Almost the whole of Bohemia joined his movement, and the enthusiasm which his sermons and writings evoked was very great. Beguiled into the Council of Constance, where he was called to be heard, Huss was finally burned on the stake in 1415; but his death was the signal for the beginning of the terrible Hussite wars, which lasted for eighteen years, and the effects of which were felt through the succeeding generations, until 1620, when Bohemia lost her political independence and fell under the domination of the Hapsburg dynasty of Austria. The Hussite movement in Bohemia cannot be satisfactorily explained by merely regarding it as a religious movement. To understand its full bearing, one ought to bear in mind that it was also a national movement directed against the encroachments of Germanism that threatened Bohemia. The religious element of Hussism did not give all the fruit that might have been expected from it. After the death of Huss his supporters split into two parties, the Utraquists and the Calixtins. The former, which may be considered as the extreme party, carried the principle of the free interpretation of the Scriptures to extremes. The Utraquists, forming the so-called moderate party, were not inclined to come to terms with the Catholic Church. To the Hussite movement was due the formation of the Society of the Bohemian Brothers, known subsequently by the name of Moravian Brothers, distinguished for its piety, its good works, and the writers it contributed to Bohemian literature.

**BOHTAN**: A district of Eastern Turkey, S. W.
of Lake Van. It is inhabited chiefly by Kurds, Armenians, and Nestorians, and is a wild region, being almost physically separated from the character of the people. Mission work is carried on chiefly by the ABCFM, the sometimes preachers from the Nestorian mission of the Presbyterian Church (North) come among the Syriac-speaking Nestorians.

BOLIVAR, Ciudad: Capital of the State of Bolivar, in Venezuela, situated on the Orinoco. Population (1891), 11,680. Station of the South America Evangelical Mission, with 1 missionary and his wife. Also station of the Venezuela Mission, with 1 missionary and his wife.

BOLIVIA, Republic of: One of the South American republics, lying just north of Chile and the Argentine Republic. Its constitution was adopted August 25, 1836. By the treaty of peace with Chile in 1880, all the coast territory was lost, and there are now eight provinces, with a total area of 567,431 square miles. Including 1,000,000 Indians, the population numbers 2,300,000, of whom 500,000 are Mestizoes, or Roman Catholic, but the mass of the Indians is at a low ebb. The nominal religion is professing Christians.

Station of the BMS (1888), with 6 missionaries, situated on the Congo River about 125 miles above Stanley Pool. Climate, tropical; population is at a low ebb. The nominal religion is Roman Catholic, but the mass of the Indians are pagans. It is the least developed of the Baptist Convention of Ontario and Quebec has established mission stations at Orouro and La Paz (1899), and the Plymouth Brethren have a station at Sucre.

BOLLOHPUR: A village in the Nadiya district, Bengal, India; station of the CMS (1849), with 2 missionaries, one with his wife, 24 native men and women, 1 chapel, 3 village schools and 130 communicants.

BOLOCO: A city in the Congo Free State, situated on the Congo River about 125 miles above Stanley Pool. Climate, tropical; population, 20,000; race, Bantu; language, Kibangi. Moral condition, low, owing to belief in witchcraft and to the practice of human sacrifice. Station of the BMS (1888), with 6 missionaries, 5 of them with their wives, 1 missionary woman, 10 native workers, 1 Sunday school, 1 village school, 1 dispensary, 1 printing house, 31 church members.

BOLONDRON: A town of 2,500 inhabitants in the province of Matanzas, Cuba; station of the American Church Missionary Society (1899), with 1 missionary and his wife, 3 native workers, 1 chapel, 1 Sunday school, 1 village school.

BOLPUR: A town S. E. of Suri, Bengal, India; station of the ME, with 1 missionary and his wife, 6 native workers, men and women, 6 Sunday schools, 9 village schools, 1 orphanage, and 30 professing Christians.

BOMA: Capital of the Congo Free State, Africa, situated on the right bank of the Congo River, about 70 miles from its mouth. Formerly it was the advance post of the Dutch and Portuguese traders in the Congo region; station of the CA, of which no statistics are obtainable.

BOMBAY: The capital of the presidency of the same name, and the chief seaport in India. It is situated on the Indian Ocean, at the southern end of the island of Salsette, which stretches along the shore of the continent for a distance of over twenty miles. At its southern extremity there was formerly a group of quite small islands, separated from each other and from the larger island by narrow channels. Upon these Bombay has been gradually built up; and now, by filling in the channels between the separate islands, these have all been consolidated with one another and with the larger island of Salsette itself. The harbor, which is the safest and most spacious in all India, and one of the finest in the world, lies between the city and the mainland. In 1661, the Portuguese, whose sway was then undisputed all along the western coast of India, ceded the island of Bombay to England as a part of the dowry of the Portuguese princess, Catherine, when she became the queen. The population was then supposed to be 10,000. Soon after, Charles II, gave it over to the East India Company for an annual rental of £10. In 1673 its population was reported as 60,000—"a mixture of most of the neighboring countries, mostly rogues and vagabonds." The mixture of races and languages then presented has continued to be a feature of its life ever since. In 1773 Bombay became subject to the Governor-General of India, whose capital was at Calcutta, where it has continued to be ever since, tho' the local presidency government was still retained. The growth of the city has been rapid and continuous. Its magnificent harbor has attracted the commerce of the world, and merchants and traders from all parts of the East have flocked to its bazaars. A series of wise and far-seeing statesmen have guided its destinies, under whose direction the city has been adorned with fine buildings, connected first by wagon roads, and since 1850 by rail, with all parts of the Indian Empire, furnished with docks, and raised to a position of undisputed preeminence as the chief port of entry and commercial center for all India. Steamers sailing daily bring the city into close connection with Liverpool, London, and the Mediterranean ports. The mails between India and Europe arrive at and depart from Bombay. Steamers sail hence to all parts of the East, and sailing ships seek its harbor from all parts of the world. It presents more of the appearance of a European city to the traveler than almost any other city of the East. Here the proverbial conservatism and leisurely slowness of Orientals seem to have given place to the quicker and more energetic motions of Western nations. In population Bombay ranks first of all Indian cities, and among those belonging to the British Empire is exceeded only by London itself. The census of 1901 gave a population of 779,006 souls—Buddhists and Jains, 17,387; Hindus (of all castes and races) 502,851; Parsees, 48,597; Jews, 3,321; Christians, 42,327. The European population by itself, which is mostly British, numbered nearly 10,500. This classification by religion is comparatively simple, but that by race and language is vastly more complex. It is difficult to say just what Bombay probably contains among its population representatives from a larger number of nationalities than any other city. It is easy to believe that this is so. Nearly every Asiatic race has contributed its quota to the census; the diversification of language among the inhabitants of India alone is very great, and among the dwellers in Bombay...
are individuals from all parts of India, speaking all of the principal tongues which are used anywhere within the limits of India. Africans of many tribes, representatives from nearly every European country, from America, from China, and from widely separated islands of the sea, go to Bombay to employ servants, deal with tradesmen, purchase articles in the bazaars, engage in business, and converse on all subjects with intelligent natives, Hindu, Mohammedan, or Parsee, without knowing a single word of any other language than English.

The government supports in Bombay a college (known as the Elphinstone College), a medical college, a school of art, a high school, and many schools of lower grade. The Bombay University, existing not for the purpose of instruction, but merely for that of examination and the conferring of degrees, is accommodated in two elegant buildings on the esplanade, close to the imposing array of structures which give a home to other departments of governmental activity. Colleges and high schools all over the presidency are affiliated with the university, and send up hosts of students every year to pass the examinations prescribed by it and to receive the academic distinction of its degrees.

Hospitals for Europeans, for native patients, and for incurables have been built either by private munificence or public funds. The sailing of the principal landing dock affords accommodation to mariners. The Young Men's Christian Association pursues the activities usual to organizations of that name, including hostels for students connected with the different colleges. There is also a central office of the YWCA, with 4 young women in charge. The city has a number of European churches connected with the Church of England, the chief of which is St. Thomas' Cathedral, and several owned by the Established Church of Scotland, the Free Church, the American Methodists, and the Baptists. The Jews have several synagogues. The Roman Catholics, besides their churches, have two large schools for native youth in charge of Jesuit missionaries.

The character of Bombay is determined by its geographical and commercial relations. It is first and chiefly a business center. It is not the capital of a native dynasty and the center of the life and energies of a race, as the adjacent city of Poona was long the capital of the Maratha dynasty and people. It is not a great political center, tho it is the capital of the Bombay Presidency and the seat of the government, and for much of the year the residence of the governor.

It is certainly not a center of intellectual life, tho it contains several institutions of learning and many newspapers, English and vernacular, are printed there. In the matter of intellectual activity it is easily outranked by Calcutta; nor is it, like Benares, the chief point of a vast religious development. Its life is commercial, and the intensity of its business energy detracts from the vigor which otherwise its people might throw into religious or intellectual matters.

Bombay has been the scene of Christian missions ever since 1813, in which year Messrs. Gordon Hall and Samuel Nott (joined soon after by Samuel Newell) began the first permanent mission in that city, and also the first mission of the ABCFM. The Church Missionary Society began work in 1820, the Scottish Missionary Society in 1823; but in 1835 the work of this organization was transferred to the Established Church of Scotland. In 1843, after the disruption, the missionaries of the Scotch establishment threw in their lot with the Free Church, leaving the mission property in the hands of the old Church. From that time there have been two Scottish missions in the city. The 8th Station for the propagation of the Gospel began in 1859, and the American Methodists in 1871, tho their work has been chiefly among Europeans and Eurasians (persons of mixed European and Indian parentage), of whom there are many in Bombay. The Bombay auxiliary to the British and Foreign Bible Society was founded in 1813, and the Bombay Tract and Book Society in 1827. Both of these societies have rendered inestimable aid to the cause of evangelism. The two Scottish missions from the first identified their strengths and undertook educational efforts. Each of these missions has long sustained a collegiate institution: hundreds of Hindu, Parsee, and Mohammedan young men have received within the walls of these colleges a good secular education combined with biblical and religious training. The whole force of these various societies now at work in the city, including the Zenana Bible Mission and the B'BS, is 93 missionaries and 201 native workers, men and women, and the aggregate of native communicants reported by the different missions is 1,579.

**BOMBAY PRESIDENCY:** One of the chief administrative divisions of British India, of which the capital is the city of Bombay. Its territory lies in the western part of India, and its boundaries are on the northwest, Baluchistan and Kedat; on the north, the Punjab; on the northeast, the native states of Rajputana; on the east, the native states of Central India, the Central Provinces, West Bengal, and the dominions of the Nizam of Haidarabad; on the south, the Presidency of Madras and the native state of Mysore, and on the west the Indian Ocean. It includes 24 districts in India, besides the little district of Aden, in Arabia, having altogether an area of 124,123 square miles, with a population (1901) of 18,559,561; within the territorial limits of the presidency are a number of native states under the general supervision of the Bombay government. These include an area of 65,761 square miles, with a population of (1901) 8,908,048. The surface of the presidency presents three well marked types of physical appearance. In the northern part the regions of Gujerat and Sind, with the peninsulas of Kathian, and Cutch, are for the most part flat, and in their northern and western portions merge into sandy and arid deserts. South of the Narbada River,
and for the most part about thirty miles from the sea, stretches the range of mountains known as the Western Ghats. Between them and the sea the narrow strip of land is known as the Konkan, and consists largely of detached ranges of hills, with fertile valleys between, through which flow numerous tidal creeks. East of the mountains is the great upland of the Deccan, nearly 2,000 feet above the level of the sea at its western edge, where it is buttressed by the Ghats. The prevailing religions are Hinduism and Mohammedanism. Christians and Parsees and a few Jews make up together hardly more than two per cent. of the population. It is worthy of note, however, that while during the decade 1891-1901 the whole population of the presidency decreased by 318,753 souls through famine and plague, the Christian population increased by 62,000—from 170,000 to 232,000.

The languages in use in the province of Bombay are Marathi, which is used by nearly one-half of the population; Hindustani or Urdu, used by the Mohammedans; Gujarathi, Kanarese, and Sindhi, which taken together are the speech of more than one-third of the population.

The missionary societies carrying on operations within the borders of this presidency are the following, named as far as possible in the order of their entrance into the province: ABCFM (1813); LMS (1826); CMS (1820); CSFM (1825); UFS (1843); Basicl Missionary Society (1837); SPG (1825); PCI (1842); PN (1870); ME (1872); Poona and Village mission; the Kuruku and Central India Hill Mission; the Industrial Missions Aid Society; the Zenana Bible and Medical Mission, the Salvation Army, and some others which do not publish statistics.

BOMBE: A settlement about 20 miles N. of the seat of government of the Kamerun Colony, W. Africa; station of the Basel Missionary Society (1897), with: 3 missionaries, one with his wife, 24 native workers, 15 outstations, 16 village schools, and (1902) 161 communicants.

BONABERI: A settlement near the mouth of the Kamerun River in the German Colony of Kamerun, W. Africa; station of the Basel Missionary Society (1880), with: 1 missionary, 1 with his wife, 5 missionaries, 5 mission workers, 24 native workers, 23 villages, and (1902) 540 communicants.

BONACAI ISLAND: The easternmost of the Bay Islands, lying off the coast of Honduras, Central America; station of the SDA (1886), with: 3 missionaries and their wives, 3 missionary women, 2 native workers, 10 outstations, 4 chapels, 10 Sunday schools, 3 village schools, and 126 church members.

BONAKU: A settlement on the Kamerun River in the German colony of Kamerun, W. Africa; station of the German Baptist Missionary Society (1891), with: 2 missionaries, one with his wife, 1 missionary woman, 5 chapels, 1 village school, 1 industrial school, 1 dispensary and a YMCA. Station also of the Basel Missionary Society, with (1902) 21 outstations, 23 common schools, and 783 communicants.

BOND, Rev. Elias: Born, Hollowell, Maine; graduated at Bowdoin College, 1837; Began Seminary, 1840; arrived at Honolulu, May 21, 1841, and labored unremittingly at Kohala, until his death July 24, 1896. He labored under the Hawaiian Evangelical Associa-

tion. Mr. Bond was distinguished for his successful establishment in Kohala of training schools for Hawaiian boys and girls, and for the personal interest he manifested in the educational, social, commercial, as well as moral and spiritual, life of this people. By a fortunate real estate investment, he was enabled to make magnificent donations to missionary boards, and pursue somewhat independently his missionary and educational work.

BONDE LANGUAGE: Belongs to the Bantu family of African languages, and is spoken by an unknown number of people in the Usambara region in the northern part of German East Africa. It is written with Roman letters.

BONDOWOSO: A village in the eastern part of Java, Dutch East Indies, lying S. E. of Surabaya; station of the Java Committee, with 1 missionary and his wife and 1 common school.

BONGAUNDANGA: A settlement in the Congo Free State, W. Africa, situated on the Lopori River; station of the RBN (1889), with 5 missionaries, 1 with his wife, 1 missionary woman, 2 native workers, 1 chapel, 1 Sunday school, 1 village school, and 1 dispensary.

BONGINDA: A settlement in the Congo Free State, W. Africa, situated on the Lopori River; station of the RBN (1889), with 3 missionaries, 1 with his wife, 1 native worker, 1 chapel, 1 Sunday school and 1 dispensary.

BONGU: A settlement on the coast of German New Guinea; station of the Rhenish Missionary Society, with 1 missionary and his wife, and 1 village school.

BONNY: A town and seaport at one of the mouths of the Niger, in British Nigeria, Africa; station of the CMS (1865), with 3 native workers. Climate, very unhealthy, due to the surrounding country being so flat and swampy. Population, 12,000. Race and language, Ibo, Idao and Kwa.

BONTEE: A town on Sherbro Island, off the coast of Sierra Leone, W. Africa; station of the CMS (1863), with 10 native workers, men and women, 3 outstations, 1 chapel, 1 Sunday school, 4 village schools, and 270 communicants. Also station of the UB (1856), with 3 native workers, 1 chapel, 1 Sunday school, 1 village school and a Young People’s Society.

BOONE, William Jones: Born in South Carolina, July 1, 1805; graduated at the University of South Carolina; studied law under Chancellor de Saussure; pursued a theological course at the Seminary of the Protestant Episcopal Church at Alexandria, Va., and having studied medicine with reference to the missionary field, offered himself to the Board of Missions; was appointed and sailed July 8, 1837, reaching Batavia, October 22. Here he studied the Chinese language, held an English service, distributed tracts, established schools and found his medical knowledge of great use. Consecrated missionary bishop to China, 1844. In 1846 Bishop Boone began the translation of the Prayer-Book, and engaged in the revision of the New Testament. In 1847 he was chosen one of the committee of delegates from the several missions to revise the translation of the Bible. His ability as a scholar
BRAHMA: NBARIA: A town on the borders of Assam, in Bengal, India. Population (1891) 18,006; station of the New Zealand Baptist Missionary Society (1891), with 1 missionary and his wife, 1 missionary woman, 2 native workers, 1 nun and woman, 1 chapel, 1 Sunday school, 1 village school and 7 communicants.

BRAHMO SOMAJ: A modern, reforming, Theistic sect in India, originated by Rammohun Roy, a high caste Brahman of character and scholarship, who from his youth declared that idolatry was contrary to the practice of the

Presbytery, July 4, 1847, and sailed soon after for India, under appointment of the ABCFM. In January, 1848, he arrived in Bombay, which was the scene of his labors, interrupted only by occasional tours of missionary service in other parts of India.

The social gap separating natives from missionaries led him to decline receiving a salary, and he supported himself, living in a simple way among the natives. Living a life of habitual self-abnegation, he was singularly free from asceticism and sitho uncompromising in his view of Christian principle, he was welcomed in the houses of high and low. It was by his personal ministry that he became known, at first despised and ridiculed, and then esteemed among the people of India. He became secretary of the Bombay Tract Society and editor of the Bombay Guardian, acquiring wide influence by the eminent ability and spirituality of his writings, selections from which have been published in America and Great Britain in three volumes severally entitled, Daily Meditations, Love Revealed, and the Aiena of Christ.

After a brief illness, early on Sabbath morning, February 5, 1888, apparently while peacefully sleeping, he was not. For God took him. His death produced a deep sensation in Bombay and Western India. Those most competent to form a judgment concur in the estimate that he exhibited a degree of self-sacrificing devotion to which there is perhaps no existing parallel in the whole field of missionary labor.

BRADLEY, Dan Beach: Born at Marcellus, N. Y., July 18, 1804; graduated from a medical college in the city of New York, 1833; sailed July 2, 1834, as medical missionary of the ABCFM; arrived at Bangkok, Siam, July 2, 1834; was ordained by the members of the mission in Siam, July 2, 1834; was ordained by the members of the mission in Siam, November 5, 1838. In consequence of more hopeful calls elsewhere it was decided by the Board, in 1846, to withdraw its mission in Siam. Dr. Bradley and Rev. Jesse Caswell, unwilling to give up the work in which they had engaged, sought maintenance elsewhere. Dr. Bradley returned to the United States in 1847, and was released from the service of the Board, and went out in 1849 in connection with the A.M.A. He was the first educated physician and surgeon who had visited Siam, and his skill in the healing art seemed to the natives little less than miraculous. His mastery of Siamese was surprisingly accurate, and his translations of the Scriptures were of high value. His published writings, both in English and Siamese, were voluminous. Those relating to Siam and the Siamese, published in the Bangkok Calendar for successive years, form the mine whence much of the material of more recent books and articles upon Siam has been extracted. He died at Bangkok, June 23, 1890.
ancestors and who purposed to bring his people back to the monothestic of the ancient Vedas. He became so far interested in Christianity that he assisted in the educational work of Dr. Duff and in Bible translation. So far as he was a Christian, he was a Unitarian, but divinity truth is to be gratefully received from any portion of the Hindu Scriptures or other good book containing it; God is the Heavenly Father, exercising providence and hearing prayer; repentance is the only way of salvation; good works, charity, knowledge, contemplation and devotion are the only religious rites; penance and pilgrimages are useless; the only sacrifice is that of self; there is no distinction of castes, no transmigration; the mission of the Brahmo Somaj is to purify the old religion, not to destroy it.

The concessions made did not satisfy the more progressive element, who found a new leader in Keshab Chandar Sen (1833-1884). His faith in the Hindu superstition taught him in childhood had been shattered by a thorough English education, and by 1838 he joined the Brahmo Somaj, but ere long outstripped Debendranath in advocacy of radical reform. He urged the abolition of all caste distinctions, including the sacred thread, the distinguishing badge of Brahmans. This Debendranath consented to for himself, but declined to impose upon others. Under his leadership rites for deceased ancestors and cremation were remodeled, and steps were taken toward the education and elevation of women, who were admitted to membership in the Society. Marriage reform, including the abandonment of polygamy, of child marriage, and of the permanence of widowhood, was advocated, and in a measure practised.

But, having broken with Hinduism, he was not content with a society which purposed only to purify the old faith, but a large body of the younger members he seduced and in 1866 organized a new Theistic Society called The Brahmo Somaj of India, the purpose being to affiliate with it all the other somajas,—a plan which was never fulfilled. The creed of this Somaj included belief in God, the first cause, the two-fold Scripture, nature and intuition; rejection of the incarnation of God, but belief in divinity dwelling in every man, and displayed more vividly in some, as in Moses, Jesus, Mohammed, and other great teachers; admission that the worship of Brahma is the essence of all religions. It declares the brotherhood of man, prescribes duties toward God, self, others, and the lower animals, proclaims the retribution of evil deeds in this world and the next, and urges the pursuit of holiness by worship, meditation, and the purification of the passions, repentance, study, good companionship and contemplation, describing salvation as the deliverance from the root of corruption, and unending growth in purity and happiness in Him who is the fountain of infinite holiness and joy. A simple form of service was prepared, consisting of prayer, hymns, reading from Hindu or other Scripture, and a sermon.

For some time the Adi Brahmo Somaj, led by Debendranath and Raj Narain Bose, secretary, and the Brahmo Somaj of India, under Keshab Chandar Sen and his cousin, Pratrap Chandar Mozoomdar, as Secretary, with "The Indian Mirror" as its organ, continued in not unfriendly rivalry. But the latter society was much perturbed by Keshab Chandar Sen's increasing mysticism, his assertion of his own special inspiration and authority, and finally by the marriage of his daughter of fourteen to a youthful Maharaja, contrary to the principles of the marriage reform and the Native Marriage Act of 1872, which he had championed. A considerable portion of the members seceded and in 1878 organized at Calcutta the Sadharana (General) Brahmo Somaj, with Ananda Bose as president. After an effort to lead the Somaj movement Mozoomdar gave over the attempt and went into retirement.

As an organized movement the Brahmo Somaj was at its height about 1880, when 149 Somajes were reported throughout India. Lately it has been much less in evidence. Its result is thus summed up by Gustav Warneck: "The movement originated from an apprehension of religious truth, but it degenerated more and more, either to an ordinary rationalistic liberalism, or to a mysticism rich in phrases and ceremonies, and spending its whole energy in words. Tho in language much inclined to Christianity it has not in the wider meaning of the word, a bridge to Christianity, nor has it exerted any noteworthy reformatory influence in heathenism. Nevertheless it is a characteristic symptom of the religious ferment which the Christian leaves, along with Western education, has begun to stir among the Hindus."
as well as religious people. He himself was inclined from early childhood to take an interest in religious matters, but he considered that he did not really commit the guidance of his life to Jesus Christ until he was 20 years old. This once decided he was wholly and permanently committed to live for his Master. He felt the duty of teaching Christianity to the Indians, and went to Long Island for that purpose. But later (1742) he was appointed, on behalf of the Scottish Society for the Promotion of Christian Knowledge, to work among the Indians between Stockbridge, Mass., and Albany, N. Y. Later he was sent to the tribes on the Delaware River in Pennsylvania, and in New Jersey between the Delaware and the sea coast. During the time of this service he sent his journal regularly to Scotland, and the Society there published it in 1746, the first part under the title Mirabilia Dei inter Indicos, and the second part as Divine Grace Displayed.

It is hard to realize now the brave self-denial involved at that time in this young man's going among savages, many days' journey from any white settlement. As Brainerd wrote, he "had no more to converse with but rude and ignorant Indians," except when he found himself obliged to plead the cause of the Indians against the greedily grasping whites who wished to brutalize and rob them. But he found a reward in seeing some remarkable instances of changed lives produced by the power of the Holy Spirit among his Indian friends. He was more than content with his life, and worked on in increasing faithfulness—often pressed by sickness, but giving up only when his life was worn out. Then he painfully made his way back to New England to die. The end came October 9, 1747, at Northampton, Mass., when Brainerd was 29 years old.

This young missionary was not remarkable for learning; he accomplished no great and widespread results in the field which he had chosen. But his journals are full of life and power to this day. They are a true record of a simple life among savages, many days' journey from any white settlement. As Brainerd wrote, he "had more to converse with but rude and ignorant Indians," except when he found himself obliged to plead the cause of the Indians against the greedily grasping whites who wished to brutalize and rob them. But he found a reward in seeing some remarkable instances of changed lives produced by the power of the Holy Spirit among his Indian friends. He was more than content with his life, and worked on in increasing faithfulness—often pressed by sickness, but giving up only when his life was worn out. Then he painfully made his way back to New England to die. The end came October 9, 1747, at Northampton, Mass., when Brainerd was 29 years old.

This young missionary was not remarkable for learning; he accomplished no great and widespread results in the field which he had chosen. But his journals are full of life and power to this day. Then he painfully made his way back to New England to die. The end came October 9, 1747, at Northampton, Mass., when Brainerd was 29 years old.

The quality of his journals that Brainerd's greatest achievement is the lasting impression made by his character upon the Church in America and Europe. It was Brainerd's character which made Jonathan Edwards a missionary to the Indians of Stockbridge; it was to Brainerd's memoirs to which Henry Martyn traced his decision to become a missionary; to those simple records of his life, too, William Carey was indebted for much of that inspiration which shaped his decision to be a missionary the he had to go alone. Brainerd was a true, noble man and a Christian hero of that small class of heroes whose lives seem to shape history.

**BRASS:** A district in the Niger delta on the coast of W. Africa. The region is flat and touring can be done in the dry season only, the missionaries wearing long water boots and wading through the thick black mud of the mangrove swamps. The people are fetish worshipers, paying chief worship to the great serpents which abound. The CMS has carried on two stations since 1898, called Brass Tuwon and Brass Nimbi. The missionaries are 7 men and women and the native workers 3. There are schools with an industrial department, a dispensary, and about 600 avowed Christians in the district, of whom 51 are communicants.

**BRASS NIMBI.** See Nimbi.

**BRAYTON, Rev. Durlin L., D.D.:** In the year 1837 Mr. Brayton went to Burma under the ABM, and he labored in the Pwo Karen Mission until the year 1900, visiting America but twice during this long period of service. As the oldest missionary in Burma, as the leading missionary among the Pwo Karens for many years, and as the translator of the Bible into the Pwo Karen dialect, he was widely known and greatly honored on the mission field. During his service as a missionary he saw Burma develop from a province of little importance to the most prosperous province in India; and he lived to see the dominion of Great Britain increase from detached possessions to the control of the entire territory of the Hindus, and he heard the Queen of Great Britain and Ireland proclaim the "Empress of India." Twice the degree of Doctor of Divinity was conferred upon him. Shortly before his death the Pwo Karen Association was held in Rangoon, in the compound of which he lived; and to his fellow workers this Father in Israel spoke this touching valedictory: "It has been my highest pleasure to seek first His Kingdom and do His Will. By His grace I have been enabled to fight the good fight and keep the faith. But when it shall please the loving Father He will call me to Himself to be with Christ forever. I know there is a crown of glory laid up for me that faileth not away." He died at Rangoon April 23, 1900.

**BRAZIL:** The United States of Brazil lie between the 4th degree of north and the 33d of south latitude, and the 54th and 72d west longitude, including within their bounds about two-fifths of the whole South American Continent. This youngest born of the American republics measures from north to south 2,000 miles, and from east to west 2,500 miles, thus covering an area of about 3,200,000 square miles, but little less than the whole continent of Europe. It borders upon all the South American countries except Chile and from the vast extent of its territory and the immense value of its undeveloped natural resources is bound to play an important part in the history of the New World. The surface of the republic may be roughly divided into three great basins—one at the north, formed by the Amazon and its tributaries; another at the south, formed by the Paraná which unites the Paraguay and the Paraná, one of the principal branches of the Río de la Plata, and, lying between the two, the section drained by the São Francisco, the third river in size in South America.

**Climate:** In so vast a territory, with such great differences of altitude, there are, of course, many varieties of climate. On the whole, however, with the exception of some of the towns along the seacoast and the valley of the Amazon, the
country in general is salubrious; even in the seaboard towns the mortality is not above, rather below, that of the large cities of Europe. In the greater part of the country the hot season is also the rainy season, which lasts for three or four months, when, although the days of continuous rain are few, the afternoon showers fall with great regularity, lasting from ten minutes to an hour or two. The rapidly changing temperature and refreshing the air, insure cool nights.

The most prevalent diseases are pulmonary consumption, intermittent fevers, and rheumatism. Leprosy and goiter are common. Epidemics of yellow fever occur only at intervals in the large towns, and were soon after taken possession of by the Portuguese and continued to be a colony of Portugal till 1822, when the independence was proclaimed, although it was but fourteen years of age. Dom Pedro II., after having occupied the throne for a little over two years, was deposed in November of 1889, when the republic was proclaimed. As a natural result of its history the language of the country is Portuguese.

The established religion of the empire was that of the Roman Catholic Church. While thePortable parts of religion, like baptism, marriage, and burial, are used in the country, yet no interference with the regular march of business, no mobs or fighting, emphasized certain peculiarities of Brazilian character which merit attention on the part of those who expect to engage in missionary labor among them.

Brazil was discovered about the year 1500, and was soon after taken possession of by the Portuguese and continued to be a colony of Portugal till 1822, when the independence was proclaimed. In 1831 he abdicated in favor of his son, the late Dom Pedro II., who was at that time only five years old. The government was by regents from that date till 1840, when the emperor's majority was proclaimed, although he was but fourteen years of age. Dom Pedro II., after having occupied the throne for a little over two years, was deposed in November of 1889, when the republic was proclaimed. As a natural result of its history the language of the country is Portuguese. It is a beautiful language, compact, expressive, and adapted for oratory and literature. The literature is principally rich in fiction and poetry, the few scientific works being mostly translations from the French. As French is considered a necessary part of liberal education, all the professional men read it, and generally make more of the books and periodicals in that language, while French novels of all sorts form the staple literary diet of the ladies of the wealthier classes.

The established religion of the empire was Roman Catholic. Under the republic, equality between all forms of religion has been declared, but the government continues to provide for the maintenance of existing functionaries of the Roman Catholic Church.

Qualities of the People: The Brazilian people are, in general, hospitable, generous, charitable, gay, courteous, communicative, quick at learning, rather fond of show, somewhat ceremonious and proud, rather inclined to look down upon labor and laborers, but with a remarkable suavity and a native politeness which is as general as is the highest good breeding. The most excitable of the Spanish, there is still a strong element of jealousy in their disposition, and a tendency to vindictiveness which gives rise to many homicides in the course of a year, the crimes against property are much fewer than in most European countries.

The race as it exists to-day is the result of a combination of widely diverse ethnical elements, molded in a great degree by ecclesiastical influences. The typical Brazilian is small of stature, with elegantly diminutive feet and hands. It 1s of the first importance, therefore, that measures be taken at once to turn the rising generation in Brazil, the great importance of educational work there becomes evident. The lower classes have been accustomed for so many centuries to leaving their consciences in the hands of the priests, and yielding them an unreasoning obedience, that the habit of blindly following their leaders has become a second nature to them; so when the republic came they did what was most natural, accepted it, because those whom they had been accustomed to follow accepted it.

Even among the educated classes there is an intellectual apathy which shows itself in all departments of intellectual activity—science, philosophy, politics, and religion—and this is nothing more than the natural result of the policy persistently pursued by the Church of Rome to repress speculation and original thought, and to allow its votaries free exercise of their intellectual powers only along two lines of activity—monasticism and scholarship. In view of these intellectual conditions of the rising generation in Brazil, the great importance of educational work there becomes evident. While confessing an indirect evangelizing agency, it is, perhaps, one of the most important in the present crisis. There is almost no positive opposition to the Gospel; it is simply ignored by many who admit that it is a very good thing, but who are unwilling to make the intellectual effort necessary to investigate its claims, and to think the matter out for themselves.

The change of government, by throwing upon the people the management of their own affairs, will gradually force the people to think for themselves. It is of the first importance, therefore, that measures be taken at once to turn the rising generation in Brazil to the Gospel; it is simply ignored by many who admit that it is a very good thing, but who are unwilling to make the intellectual effort necessary to investigate its claims, and to think the matter out for themselves.

The prominent moral characteristics of the Brazilian people is a very great lack of conscientiousness, an almost complete absence of the feeling that everything must give way to right and duty. The result of this has been referred
to in speaking of their physical characteristics. It has also been prominent in their political history. One of the first measures of republican government was a general decree that all office-holders who gave in their adhesion to the new government within a certain time would be continued in office, while those who refused to do so would be immediately replaced by others.

The result of this measure was a wholesale coat-turning, which would have been amusing had it not been so sad an indication of the utter lack of Brazilians in the part of the best citizens. Altho many had just before been ardent monarchists, and nearly all had voted for the monarchical candidate in the recent elections, not one in a hundred declined to accept the offered conditions, and the State and municipal machinery moved on without the slightest hitch.

The police of Brazil are a military organization, wear soldier's uniform, carry guns, and in their ordinary patrol work use sword bayonets. As soon as these soldier-police, scattered all over the country, received orders from their superior officers to accept the republic, they tore the crowns from their caps and proclaimed a change of government. Outside of the large cities the number of these police agents was utterly insignificant, and they could not have been easily overpowered, but even the most ardent monarchists when they found themselves face to face with the military, and called upon to risk some personal injury for the sake of their political opinions, yielded at once. It was not cowardice, for the Brazilians are not a cowardly people, but simply the feeling that it was not worth while to risk anything for a mere opinion. The priesthood, the whole effect of whose teachings for centuries has been to obliterate the inherent distinction between right and wrong, and to confuse the minds of the people on the fundamental principles of ethics, is without doubt chiefly responsible for this demoralization.

Conditions of Life: The superior wisdom of “The Fathers,” and the necessity of acceding as final their ideas and judgments in all matters of faith and doctrine have been drilled into the people from their earliest infancy for many successive generations, until the habit of looking backward seems to have become ingrained into the Brazilian nature, leading them to hold on with an almost religious perversity to old-fashioned business methods, antiquated modes of transportation and farming (solid-wheeled oxcarts and packmules compete with railroads in some parts of the country, and not one farmer in a thousand has ever seen a plow), and the most unhealthy ways of living and eating. The unparalleled progress of the United States is, doubtless, largely owing to the fact that every man seeks to improve upon the methods of his father, and eagerly experiments with any proposed change which promises to be an improvement. The average Brazilian, however, regards any innovation with suspicion, simply because it is an innovation, and is very apt to receive suggested improvements with a smile of half-scornful superiority, and to say: “Your implements and methods are very good for you and your country, but the ways of our fathers, who have been working here for centuries, are doubtless best for us in this country.” This difference of mental attitude is of itself enough largely to account for the difference between the two countries, and for it the Church of Rome is largely, if not wholly, responsible.

It is suggestive that even the roads through the country are only cared for with the parish churches. Once a year, upon an appointed day, all landholders are required to present themselves at their respective parish churches carrying hoes, brush hooks, or axes. Then all start together for their homes, cleaning and repairing the roads as they go; dividing as they successively reach the turning leading to their houses, thus leaving a wide portion from each house to the parish church. These roads were formerly called sacramental roads, as, in order to invite to the prompt and faithful performance of this task, the priests used to refuse to carry the sacrament to the dying except over a well-prepared road of the regulation width. There are no road inspectors and no provision made for the care of crossroads, even tho leading to a railroad station. So all over the country there has been a constant effort to make every street and road a setting of road honor.

The doing this for the sake of a show is a prominent Brazilian characteristic. “Para Inglês ver,” for the English to see, is an expression applied originally to parliamentary measures which it was known at the time would have a showy effect upon public opinion. The result of this measure was a wholesale coat-turning, which was not cowardice, for the Brazilians are not a cowardly people, but simply the feeling that it was not worth while to risk anything for a mere opinion. The priesthood, the whole effect of whose teachings for centuries has been to obliterate the inherent distinction between right and wrong, and to confuse the minds of the people on the fundamental principles of ethics, is without doubt chiefly responsible for this demoralization.

Education: So-called religious instruction occupies the principal place in the public schools, hours being spent in learning by heart the prayers and liturgies of the Church in an unknown tongue, and another considerable part of the time in memorizing the Catechism, which, being learned parrot-like without explanation, is almost equally unintelligible to the pupils. As a result it is not at all unusual to find Brazilian children who have been at the public schools for two or three years, but can barely spell through a sentence, and are ignorant of the simplest rules of arithmetic. In the rural districts one often comes across children who, having learned out of books copied by the teachers, are quite familiar with handwriting, but cannot read print at all.

Following the system of rote teaching, which is the only one admissible in their religious instruction, the sole aim of the teacher, even in the higher schools, seems to be to store in the child's head such quantities of information that it is beyond the power of the child, or his memory, to recall it. The pupil is taught to memorize with the brain, not the heart, as is the case in this country. The most superficially, while the generally received test of an educated person is the ability to speak a number of languages, like the last emperor. As a consequence, the linguists are common, scientists are very few, indeed. About the only
thing that is tolerably well taught is Latin, and that only because it is an essential part of the priestly education.

Under such circumstances it is not surprising that fully 84 per cent. of the population is reported as illiterate. Yet the land has long under the care of the Church for 250 years, and when William Penn made his treaty with the Indians the Archbishop of Brazil already had a splendid cathedral and all the appurtenances at Rio de Janeiro.

Early Attempts at Evangelization: It is a very deeply interesting fact that the very first effort of the Christian Church after the Reformation to engage in foreign missions was that of the church at Geneva to send the Gospel to the inhabitants of Brazil. Coligny, the great French Huguenot, and other friends of the truth conceived the idea of establishing a Protestant colony in South America as a place of refuge for their persecuted brethren.

In 1565 an expedition, consisting of three small vessels, under the command of one Villegagnon, an officer of the French navy, sailed from Havre de Grace to what is now the harbor of Rio de Janeiro, where they established themselves on an island, called to this day Villegagnon, in honor of the leader, and, as he afterward proved to be, to the everlasting discredit of this expedition. Their joyous reception by the natives, who were at war with the Portuguese, and other circumstances seemed to warrant high hopes of success.

On the return of the vessels to Europe great interest was awakened for the establishment of a colony in the same remote part of the country, where the Jesuits had so long been active. Many of the colonists returned to Europe of those who remained, three were put to death by their infamous persecutor, and others fled to the Indians and Portuguese. Among the latter was one named John Boles, who is noted, even in the annals of the Jesuits, as a man of considerable learning, being well versed in both Greek and Hebrew. Escaping from Villegagnon, John Boles went to St. Vincente, near the present site of the city of Rio de Janeiro, where they established themselves. The ruin of the church at Geneva, under Calvin and his colleagues, sent two ministers and fourteen students to their destination, the real and villainous character of the bold invaders, except the mention by Southey, in his History of Brazil, that he prepared a catechism in the Indian language. The ABS and the BFBS were the first societies to attempt in recent times the evangelization of the Brazilians. Several individuals went to Brazil as missionaries about the same time, but their aim was to benefit seamen and others of their own countrymen. Of such were Messrs. Spalding and Kidder, of the ME Church, who labored in Rio de Janeiro between 1836 and 1842. A missionary of the American and Foreign Christian Union followed these pioneers with the same purpose in view. The first evangelistic mission in Brazil conducted in the Portuguese language seems to have been that carried on from 1855 to 1870 at his own expense by Dr. Kalley, formerly of Madeira.

In 1859 the PN commenced its mission in Rio de Janeiro. There are now in Brazil 28 mission stations maintained by 13 different societies in America and Great Britain, and manned by about 60 missionaries of both sexes. The extent of this missionary effort is less striking when it is realized to be the only evangelistic effort made for fourteen million of people. For the spiritual wants of 140,000 Protestant foreign residents, twice the number of chaplains and pastors have been provided.

South America, Protestant Missions in, Brazil: (H. F.) and others, New York, 1900; Brazil and the Brazilians, Kidder (J. C. and D. P.), New York, 1846.

BREATH, Edward: Born in New York, January 22, 1808. Highly recommended as a Christian and "an accurate, neat, ingenious, and every way competent printer," he was appointed by the ABCFM, and sailed July 21, 1839, for Urnia, Persia. In 1847 he visited the United States, was married, and reembarked, 1849. He cut the matrices and cast for the mission beautiful fonts of Syriac type with a hand before unpractised in that art, but which made a rare and complete success. He thus saved thousands of dollars to the American Board. Through the press under his charge he issued more than 80,000 volumes, including several editions of the Scriptures in modern Syriac, thus giving to the people about 16,000,000 pages in a language never before printed. He died of cholera in 1861 at Seir, near Urnia, Persia.

BREKLUIM MISSIONARY SOCIETY. See GERMANY; MISSIONARY SOCIETIES IN.

BRETHREN, Missions of the. See CHRISTIAN MISSIONS.

BRETHREN'S SOCIETY for the Furtherance of the Gospel among the Heathen. See MORAVIAN MISSIONS.

BRIDGETOWN: Capital of the island of Barbadoes, West Indies, on a large open roadstead, Carlisle Bay. Population (1891), 20,000, among whom are many white people. Station of the
Moravian Missions (1829), with 1 missionary and his wife, 29 native workers, men and women, 2 chapels, 3 Sunday schools, 5 village schools, and 605 professing Christians. Also station of the SDA (1890), with 4 missionaries and their wives, 9 native workers, 2 chapels, 10 Sundays, 1 village school, 1 book depot, and 605 professing Christians. Also station of the Salvation Army.

BRIDGMAN, Elijah Colman: Born at Belchertown, Mass., April 22, 1801, of Puritan ancestry. Was converted in a revival before he was twelve years of age. He graduated at Amherst College, 1826, and at Andover Theological Seminary, 1829. The ABCFM proposed to him while in the seminary to go to China as its missionary. He acceded, was ordained October 6, 1829, sailed on the 14th, and reached Canton, February 25, 1830.

In May, 1832, Mr. Bridgman was chosen editor of the Chinese Repository and continued to edit it for nearly twenty years. In 1839 the measures taken by the Chinese to suppress the opium traffic resulted in war with England, which interrupted the operations of the mission at Canton. In 1842 the war terminated, and by the treaty of Nanking five ports were opened, and Hong-kong ceded to the English. Thither Mr. Bridgman was removed. About this time he prepared the Chinese Chrestomathy, a volume of 730 pages. In 1844 he was secretary of legation to Mr. Cushing, the United States Government, on a special mission to China, and of his services Mr. Cushing spoke in high terms. After the conclusion of this enterprise Dr. Bridgman's time was divided between the repository, the revision of the Scriptures, preaching at the hospital, and the Institution of a Bible class. In 1847 he was removed to Shanghai to aid in the revision of the Scriptures. Early in 1852, after an absence of twenty-three years, he visited the United States for his health. In 1854 through him a new mission was commenced in Shanghai, of which he was the senior member till his death in 1861.

The great work that was of translation, he distributed tracts and religious books, and preached to individuals or companies in streets and villages wherever he could gather them. He was interested also in whatever could in any way promote the welfare of China, and was always ready to perform his part for that object. When the plenipotentiaries of the four great treaty powers—England, France, Russia and the United States—were conducting their negotiations which resulted in the Treaty of Tientsin of 1858, he was consulted by them, and frequently translated official documents for them. In his thirty-two years in China he was more intimately connected with and known by the foreign community at Shanghai and Canton than any other missionary, and by all was highly esteemed.

BRINDABAN: A town situated on the Jumna River near Muttra, in the United Provinces, India; station of the ME, with 2 missionary women, one of them a physician, 29 native workers, 20 Sunday schools, 6 village schools, 1 high school, a Young People's Society and 590 professing Christians.

BRITISH AND FOREIGN BIBLE SOCIETY: About the middle of the 18th century, during the revival that spread over England, interest was aroused in the various means for the promotion of religious knowledge, both at home and abroad, and several societies were formed which made Bible distribution one part of their aim, or their sole object within restricted bounds. Of such were the Society for the Propagation of the Gospel in Wales, established about 1662; the Society for Promoting Christian knowledge, 1698; the Society for the Propagation of the Gospel in Foreign Parts, 1701; the Book Society for Promoting Christian Knowledge among the Poor (London), 1750; the Religious Tract Society (London), 1779; the Bible Society, 1780, restricted to laborers among soldiers and seamen, and afterward called the Naval and Military Society; the Dublin Association, 1792, the French Bible Society (London), 1792, for circulating the Bible among the Catholics of France. The French Revolution cutting off communication between the two countries, the funds were turned to the distribution of the Scriptures among "poor Catholics and others in the United Kingdom of Great Britain and Ireland." None of these societies contemplated universal distribution of the Scriptures, nor indeed contemplated or admitted the cooperation of the different parties and sections of evangelical Christendom.

The Rev. Thomas Charles, of Bala, Wales, aroused by the dearth of Bibles in that section, and the difficulty of securing the needed supply from existing organizations, visited London in 1802 and conferred with Rev. J. Hughes, William Wilberforce, Charles Grant, and others. The result was a conference, on a general plan drawn up by Samuel J. Mills, on March 7, 1804, at the London Tavern. About three hundred persons, representing different denominations, were present, were Granville Sharp elected chairman, and the Rev. Mr. Owen (afterward clerical secretary), deeply stirred by the altogether novel spectacle of different denominations met in union to promote one glorious cause, moved the resolutions embodying the name and general form and constitution of the British and Foreign Bible Society. These were "adopted with unanimous demonstrations of cordiality and joy," and more than £700 was immediately subscribed. The committee appointed at this meeting afterwards proceeded to advance the machinery of the Society. Rev. Josiah Pratt, secretary of the CMS, to represent the Church of England, Rev. J. Hughes, the Dissenters, and Rev. Mr. Steinkopff (afterward replaced by Rev. J. Owen), foreign Christian Churches, were chosen secretaries. A prospectus was then prepared and widely distributed. Lord Tégmouth became the first president. Among the first vice-presidents were the bishops of London, Durham, and Exeter, and William Wilberforce.

The new society was heartily received by the Presbytery of Glasgow, the Synod of Glasgow and Ayr, and other ecclesiastical bodies direct contributions to be received for it from all the churches and chapels within the bounds. Wales, stimulated by Mr. Charles, of Bala, sent a contribution the first year of about £8,500, mostly from the poorer classes. Germany, Switzerland and other European countries hailed the society with delight. Nuremberg was the seat of its first foreign branch. It began its career with such general support as was a prophecy of its world-wide usefulness.

Organization. The conduct of the business of the Society is entrusted to a committee of 36 laymen, of whom six are foreigners, resident in London or vicinity, 15 are members of the Church of England, and 15 belong to other denominations.
of Christians. Thirty of these who shall have most frequently attended the meetings, are eligible for re-election. This committee appoints all officers except the treasurer. The president, vice-presidents and treasurer are members of the committee ex officio, as also the secretaries for the time being, none the less the emolument from the Society having that privilege. Subscribers of various amounts are annual or life members or governors, and every clergyman of the Church of England and every Dissenting minister, who is a member, is entitled to attend and to vote at all meetings of the Committee.

The executive staff of the Society includes two secretaries, four superintendents of the editorial, literary, home and publishing departments, two assistant secretaries, fourteen district secretaries in England and Wales, six secretaries in India and South Africa, and twenty-four foreign agents in different parts of the world.

The first auxiliary was formed in 1809, and in ten years 629 auxiliaries had been formed in Great Britain. The Society now has over 7,900 auxiliaries, branches and associations, of which over 5,860 are in England and Wales. These meet their own expenditures, including in some cases colportage, etc., and remit the balance of their collections to the Society. The Society has also about 250 trade depots in the London metropolitan district, aside from those in other parts of the United Kingdom.

Development of Work: Immediately upon the organization of the Society steps were taken to obtain large supplies of the Welsh Scriptures, and subsequently the Irish, Gaelic, Manx, and, for the Channel islands, the French. Stereotype printing had just come into use, and the committee decided to countenance it, and ordered stereotype plates in several languages. The first New Testament printed expressly for the Society, brought out in September, 1805, was in English, and was printed from stereotype plates, the first instance of the use of that process in the printing of the Scriptures. Editions in Spanish and French were printed for the 30,000 prisoners of war at that time in the Continent.

In 1812 there was not a family without the Scriptures. An auxiliary was formed in Stockholm through which the Scotch Association and the subsequent organization of the National Bible Society of Scotland, although in 1827 such assistance was forbidden. Later an attempt to impose a trinitarian test of membership failing, the Trinitarian Bible Society was formed, and the controversy over the word "baptize" resulted in the Bible Translation Society of the United States.

Of specific interest are the publishing of the first penny Testament in 1834 and of Scriptures in raised letters for the blind in 1837; the lowering of the price of Bibles in 1839 through the cessation of the monopoly of the King's printer in Scotland, the introduction of colportage into Great Britain in 1844, and the acceptance for circulation of the Revised Version of the Bible in 1860.

The establishment of auxiliary societies on the Continent. In 1812 a Bible committee was formed in Paris. Auxiliaries were formed in Zurich (1812), Wurtemberg (1813), Frankfort and other places (1812), Presburg in Hungary (1812). Leander Van Ess, a Catholic priest and professor in the University of Marburg, translated the New Testament, and soon printed 20,000 copies of the Scriptures in the Bohemian and Polish tongues.

In 1807 means were taken to supply the need in Iceland, and in 1823 it was reported that there was not a family without the Scriptures. An auxiliary was founded in Copenhagen in 1814. In Russia an auxiliary for Finland was organized in 1812, with the approval of the Czar, Alexander I., and in 1813 one for Russia at St. Petersburg. Prince Galitzin became its first president, and members of the Russian Greek and the Armenian churches were present at the inauguration of the work. The Czar donated 25,000 roubles, and became an annual subscriber to the amount of 10,000. Auxiliaries were formed, various translations made, and a great impulse given to Bible distribution and study. Nearly one hundred editions in thirty languages were published, and hundreds of thousands of Scriptures distributed. Alexander's successor, Nicholas, suppressed the Society in 1826, but permitted the formation of a Protestant Society for supplying Scriptures in Russia. Special significance has been accorded the establishment of auxiliary societies on the Continent.
then. Efforts made by the pope to check the work in Poland and Russia failed. Austria refused to permit the work in her territories, and the Hungarian Bible Society was suppressed, yet many eminent Roman Catholics heartily assisted the Society in its work.

Up to 1826 it had been the aim of the Society to encourage foreign countries to institute societies of their own, on its principle of circulating the Scriptures without note or comment. This aim was remarkably successful. Holland, Germany, Picard, Russia, Switzerland, France, Hungary, Denmark, Sweden, Norway, Iceland were aroused in a remarkable degree to provide these translations, while among the Roman Catholics, versions of their own, without note or comment, were adopted for distribution by the Society. On account of the position taken in regard to the Apocrypha, most of the continental societies withdrew, and latterly the British and Foreign Bible Society has carried forward its work in Europe by means of agencies under its own immediate control.

The work of the Society's agents during the year ending March 31, 1902, was 175,038,965. The next year showed 77,272 with 40,862 New Testaments, and 35,910 Bibles. From that time on, the number of agencies under its own immediate control, has carried forward its work in Europe by means of agencies under its own immediate control.

The work of the Society in Europe is carried on by colportage, through Bible depots, and by grants to existing local organizations. In France they are supported by the British and Foreign Bible Society, and yet many eminent Roman Catholics heartily assisted the Society in its work.

Agencies in Europe: The work of the Society in Europe is carried on by colportage, through Bible depots, and by grants to existing local organizations. In France they are supported by the British and Foreign Bible Society, and yet many eminent Roman Catholics heartily assisted the Society in its work.

The income of the Society has grown from £691 10s. 2d. in its first year to £241,143 2s. 11d. in 1902.

Bible Women: The Society has, for many years, made a special feature of the employment of Bible women, especially in the East, to reach people in homes with reading and instruction. During 1901, 621 were thus employed in Asia, either by the Society direct or through its auxiliaries or the different missionary societies, and they reached over 35,000 women and taught 2,384 in India, Ceylon and Egypt to read.

Editorial Work: An idea of this branch of the Society's work is furnished by the statement that during the year ending March 31, 1902, the Editorial Committee considered matters bearing on versions of Scripture in 151 languages and dialects of which 33 belong to Europe, to Asia, 43 to Africa, 6 to America and 14 to Oceania. Negotiations have been conducted with the owners of the Revised Version in English, with a view to issuing it in forms suited to schools and families, especially of the poor. Among items of special interest are a German Bible in Latin characters, a pocket Bible in Persian, a Revised Testament in Tibetan, a new whole Bible in the Ningpo dialect of China, plans for a Union version in Nyassa, etc.

The 24 foreign agents of the Society, seven are located in Europe, at Paris, Berlin, Florence, Madrid, St. Petersburg, Ekaterinburg and Constantinople; four are in Africa, at Alexandria, Algiers, Tangier and Sierra Leone; six in Asia, at Baghdad, Singapore, Shanghai, Seoul and Yokohama; one in Brazil, one in New Zealand; three are in South America at Buenos Aires, Rio de Janeiro and Callao; one is in Belgium, British Honduras, and one at Kingston, Jamaica. There are also five secretaries in India, at Madras, Calcutta, Allahabad, and Lahore; and one at Cape Town in South Africa.

Agencies in Asia: The work of the Society in Asia is carried on by colportage, through Bible depots, and by grants to existing local organizations. In India they are supported by the British and Foreign Bible Society, and yet many eminent Roman Catholics heartily assisted the Society in its work.

among the most difficult fields of the Society; illustrating its principle of going into regions that are needy, irrespective of returns in the form of sales. With four colporteurs in Algeria selling 7,218 copies (1902) and three in Morocco selling 5,959 copies, it is easy to understand that the work has many perplexities. The French are scornful, the Mohammedans hostile, and, especially in Morocco, the national spirit is very bitter. The Society works in close relation with the North African Mission, the American Jewish Society and the Geneva Evangelical Society.

West Africa: This agency covers the territory from the Gambia to the Congo. The agent, who resides at Freetown, Sierra Leone, works chiefly through local auxiliaries and the missions of the CMS, the WMS and the Basel Missionary Society.

South Africa, including Cape Colony, Natal, Orange River Colony and the Transvaal, is under the general supervision of the South African Auxiliary (founded in 1840), whose secretary resides at Cape Town. The recent war closed a number of the depots, yet the work has gone on with considerable success, both among the English and the Dutch, as well as the natives, the sales and grants amounting, in 1902, to about 50,000. Madagascar and Mauritius are both provided with auxiliary societies, the sales being about 20,000 in Malagasi and 2,000 in Mauritius.

Persia and Turkish Arabia: The agent at Bushire, on the Persian Gulf, has charge of this section, including all but the part of Persia north of Teheran, which is occupied by the American Bible Society. The sales by 10 colporteurs were (1901) 6,000 copies, while the total circulation was 15,548. The agency is in three divisions: 1. the provinces of the Persian Gulf, with Bushire as center; 2. South Central and Eastern Persia, with center at Julfa, near Isphahan, and sub-divisions at Sukhanroad, Yezd and Shiraz; 3. Turkish Arabia, with center at Baghdad, and including Kermanshah in Western Persia. A considerable portion of the work is among Armenians and Jews.

India: The Society's work here has from the first been under separate auxiliaries, six in number: Calcutta, Bombay, Madras, Bangalore, North India and Punjab. On the respective committees, the various missionary societies are largely represented and their committees fix prices and decide discounts to missions and other purchasers. The Society's colporteurs and depots always work in close harmony with these missions. The 138 colporteurs employed in 1901 sold 181,743 copies of the Scriptures, while the total circulation was 577,035, the highest figures reached in any year. One feature of the work is the employment of 406 native agents.

The three auxiliaries in charge of Bible work in Ceylon, at Colombo, Jaffna and Kandy, report 10 colporteurs, 9,847 copies sold and a total circulation of 43,216.

Formerly a special agent located at Rangoon, who reports eight colporteurs and total sales of 15,179 copies.

Malaysia is divided into North and South, with headquarters at Manila and Singapore. In the Philippines the work is shared with the American Bible Society; the British Society reporting (1901) 35,688 copies sold, of which over 26,000 were in the Philippine dialects and the great majority were portions, none in Spanish and Chinese each amounting to about 3,600 copies. From Singapore the agent superintends work in the Straits Settlements and native states, Sumatra, Java, Borneo, Celebes, Moluccas, and lesser Dutch Islands, 28 colporteurs selling 43,395 copies, very nearly the entire circulation. Here Chinese takes the lead among the languages, next coming Malay, Javanese and Malagasy.

China: This large agency, covering China proper, Manchuria, Mongolia, Sinkiang and Tibet, is superintended by an agent resident at Shanghai, with 11 sub-agents in the different provinces.

There are 15 principal depots and 8 others under the superintendence of missionaries. There were 153 native colporteurs at work during the year, and the sales were 382,936 copies, the total circulation being 431,446 against 604,462 in 1900 and 856,156 in 1899. A significant feature is the large number of complete Bibles called for, the largest in any one year of the agency. The decrease, due to the Boxer troubles, has been chiefly in the colportage, the sales from the depots not having materially lessened. The China agency also includes the work in Formosa, which has shown steady development, the circulation (1901) being 25,763 copies.

Korea has an agent resident at Seoul, who reports a circulation of 16,814 copies, against 38,000 in 1900, 45,121 in 1899 and 34,813 in 1898. This decrease is explained by the severe drought, which has raised prices, and the fact that in 1900 the native church members supplied themselves with the newly issued Testament.

Japan is worked by a joint committee representing the British, American and Scotch societies.

Bible work in Australia is conducted by 43 auxiliaries with 476 branches, and in New Zealand by 61 auxiliaries and branches, which not only care for their own fields, among the Maoris, sailors, etc., but contribute liberally to the parent society.

In Oceania the Society assists the various missionary societies with grants, but has no special organized work.

South America: In this continent are three agencies: the Argentine, including Argentina, Uruguay, Paraguay and Bolivia; Brazil, and a new one called the Republics of the Andes, including Colombia, Ecuador and Peru. The work of the Society in Chile being limited to assisting the Valparaiso Bible Society. In all, 16 colporteurs have sold 24,758 copies. This is somewhat of a falling off compared with the sales of previous years.

The five Republics of Costa Rica, Nicaragua, Salvador, Guatemala and Honduras are worked by an agent resident at Belize, British Honduras. Seven colporteurs in that region sold 9,135 copies, almost the entire circulation.

The West Indian Agency, including Dutch, French and British Guiana, the West Indian Islands and Bermudas, with its center at Kingston, Jamaica, has the credit of a larger proportion of Bibles sold (27,911 out of a total circulation of 53,090) than any other foreign agency of the Society. Some of the 83 auxiliaries and branches are supplied direct from London, so that the above does not represent the entire work done.

British North America is thoroughly organized with 12 auxiliaries and over 1,100 branch societies, the auxiliary for Upper Canada, with its headquarters at Toronto, being the largest and most influential of all those in British Colonies. It covers the entire territory from the Great Lakes to the Pacific Coast.

Periodicals: The Bible Society Reporter, London; Bible Society Gleanings.

History of the Bible Society (from 1804 to 1854), London 2 vols.
BRITISH EAST AFRICA: A large territory bordering on the east coast of Africa and extending into the heart of the continent, comprising the East African Protectorate, the Uganda Protectorate, and the Zanzibar Protectorate. The territory is bounded on the west by the Congo Free State and the Sudan, Abyssinia and Italian Somaliland on the north and Germany and East Africa on the south. The entire area of the part of the British territory in Africa is estimated to exceed 1,000,000 square miles.

The East African Protectorate proper includes the whole of the coast from the Umba to the Juba River, extending inland as far as Uganda and mining to the northward to the Egyptian Sudan, with an area of about 350,000 square miles and a population of about 4,000,000. Arabs and Swahillis inhabit the coast territories, while farther inland are found tribes of Bantus, and in the northern part the Mesai, Somalis and Gallas. The territory is governed by the Foreign Office through a Commissioner and a Consul General with their subordinates. The capital is Mombasa, a town of 27,000 inhabitants, situated on an island of the same name. A railway runs from Mombasa to Uganda at the Victoria Nyanza.

The societies established in this region are the CMS, the United Methodist Free Churches, the Africa Inland Mission, the Scandinavian Alliance, the Leipzig Missionary Society and the Neukirchen Missionary Society. These societies occupy 17 stations altogether, the most of which are under the CMS.

BRITISH SYRIAN MISSION SCHOOLS and Bible Work (1860): In the year 1860 the Druses rose against the Maonites and Greeks in Damascus and the region of the Lebanon and Anti-Lebanon, and fearful massacres resulted. The condition of the 20,000 widows and orphans who were left aroused the sympathy of Mrs. Bowen Thompson of England, who had spent many years in Syria as the wife of a physician, and was thoroughly acquainted with the country and its peoples.

She went to Beirut and opened an industrial refuge, where 200 women and children gathered, the first week. Schools were established and a training institution opened in Beirut. Within a few years the work spread to other towns and villages in Syria, and schools were attended not only by the children of the Christian denominations, but by Jewses, Muslims and Druses. Mrs. Bowen Thompson was soon joined by her sisters, Miss Lloyd, Mrs. Smith and Mr. and Mrs. Mott. With their aid and that of a small staff of native Bible women the work was well organized before Mrs. Thompson’s death in 1869.

The schools of the mission extend from Damascus to Tyre. There is a night school of special benefit to Syrian soldiers, day schools for boys, for girls, for the blind of both sexes, for Muslim girls and for Jewses. In all, instruction is given in the Bible. Special classes are held for women, both on week days and on Sundays, and are largely attended.

In 1889 the corner-stone of a memorial school was laid in Baalbec, and a medical work has been established in the same city. A quarterly paper, Daughters of Syria, is published in England in the interest of the schools. There are 4 stations and 19 outstations, 27 English missionaries and 128 native workers, 51 day schools, 3,743 pupils and 3 dispensaries.

The organ of this Society is a quarterly paper, Daughters of Syria.

BROACH: Capital of the district of Broach, Bombay, India, situated on the Nerbudda, 41 miles from its mouth. Population (1891), 40,165—Hindus, Muslims, Parsees. Language, Gujarathi. Station of the PCI (1887), with 2 missionaries and their wives, 2 missionary women, 2 native workers, men and women, 5 Sunday schools, 5 village schools, 1 orphanage and 21 church members.

BRODHEAD, Augustus: Born at Milford, Pa., May 13, 1831; graduated at Union College, 1855, and Princeton Theological Seminary, 1858; ordained May 4 same year; sailed for India, November 7, as a missionary of the P.M., reaching Calcutta April 4, 1859. At Mainpurie and Pateghar he spent nearly twelve years. In 1872 he was transferred to Allahabad. Dr. Brodhead took a prominent part in the theological training school of the Synod of India, wrote and published valuable treatises in sacred and church history, edited the mission magazine published for the use of the native Christians, and assisted in preparing a hymn book for the church and Sunday school, for which he wrote and translated several hymns; took an active part in the North Indian Bible and Tract Societies, and the Christian Vernacular Education Society. A succession of severe attacks of illness compelled him to return home. Died at Bridgeton, N. J., August, 1887.

BROOKE, Graham Wilmot: Born at Aldershot, England, in 1886. He was preparing to enter the military academy at Woolwich when he became interested in the Mohammedans of North Africa and the seeming impossibility of informing them of the Gospel of Jesus Christ. He gradually reached a deliberate conclusion that it was his duty to try to reach the Mohammedans of the Sudan, then one of the darkest regions of the earth. “But,” as has been said of his determination, “the land was not easy of access. He tried to enter it by way of the Niger and by way of the Niger into the Western Sudan. He was principally at Lokoja. There he acquired the Hausa language and labored with energy in preaching, until he was smitten with feyis and died at Lokoja, March 5, 1892, after a year of his age.

Mr. Brooke was a hero in his calm, steadfast devotion to his mission. He felt called to preach in the Sudan, then one of the darkest regions of the earth. “But,” as has been said of his determined attempt to obey the call of his Master, “the land was not easy of access. He tried to reach it by way of North Africa and failed. He tried to enter it by way of the Congo. Following the course of that great river, far into the interior, beyond where foot of missionary had yet trod, past large and populous towns isolated by the civilized world, among nations whose atrocities equaled those of the South Sea cannibals, he entered the Sudan and, after many hardships, died at Lokoja, March 5, 1892. He was 21 years of age and leaving a wife and 2 children.
bals, through untold risks and dangers, he pushed his way onward. But in vain. The Sudan was still barred to him. Finally he discovered that a door of entrance might be found by way of the Niger, and that he could best avail himself of it by joining the Church Missionary Society.

How, arrayed in the native dress, which proved so congenial, he and his friends who with him started the Upper Niger Mission went about among the people of Lokoja and the country round, how quickly he obtained a mastery of the language, how he won favor among the Mohammedans as well as heathen, and found ready listeners for the Gospel story—all this has been told in detail in his journals and leaflets, and forms a most deeply interesting and instructive narrative. In spite of the many trials which came upon the mission, he was able to record at the end of 1891 that the Word of God had been fully preached over an area equal to that of Hertfordshire, Middlesex, Kent, Surrey, and Hants, and not merely preached, but understood.”

Mr. Brooke, besides preaching, found time to translate several tracts into Hausa. But his life was like that of David Brainerd in the wilderness, and the remembrance of its high qualities is the chief legacy which he left to the Church. His was a case where “the highest mental and moral gifts, the prime of life with its vigor and its opportunities, were laid simply and wholly upon the altar of Christ, and this, not as a sacrifice, but as a matter of course.”

BRUSA: Capital of the province of the same name, Asiatic Turkey, about 60 miles from Constantinople. Population, about 75,000, Mohammedans, Armenians, Greeks, etc. It is finely located at the base of the Bithynian Olympus. Has some mineral springs and is a health resort from Constantinople. It was the capital of the first Sultans of the Ottoman Empire, and the tombs built in their honor are well worthy of a visit.

Station of the ABCFM (1848), with 1 missionary and his wife, 2 missionary women, 15 native workers, 12 chapsels, 12 Sunday schools, 13 common schools, 2 high schools, 1 orphanage and 255 church members.

BROWN, Nathan: Born at New Ipswich, N. H., June 22, 1807; graduated at Williams College, 1827. While in college he composed the beautiful poem, The Missionary’s Call, commencing, “My soul is not at rest.” After studying theology in Newton Seminary he was ordained at Rutland, and embarked for Burmah, December 22, 1832, under appointment by the Baptist Triennial Convention. Having spent two years in Burmah, he was appointed by his brethren to commence with Mr. Cutter a new mission in Assam. After a four months’ perilous journey through the Hulgi, Ganges and Brahmaputra they reached Sadiya, about 45 miles N. E. of the present mission station of Dibrugarh. Here among savage tribes he began to learn the language without grammar or dictionary. He soon commenced the work of translation, tracts and books were distributed, schools were established and zooyals built, where the Gospel was preached by the way-side. In 1839 Sadiya was attacked by the hill tribes and many of the people and soldiers were massacred. Dr. Brown and his wife fled in a canoe in the darkness of the night with their two infant children, and at daybreak found protection in the stockade, still in possession of the British troops. Many natives of Sadiya having been killed or dispersed, the mission was removed to Jeypôr, and in the densely populated district of Sibsagar. Here the missionaries had great success. Reinforcements arriving, new stations were established and churches organized. But Dr. Brown’s great work was the translation of the Scriptures. In 1848 he completed the Assamese version of the New Testament. In 1855, with health greatly impaired by twenty-two years of toil and sufferings, he returned to his native land.

In view of the wonderful openings in Japan and the urgent calls for missionaries, Dr. Brown felt strongly drawn to that empire as a field for his personal labors, and in 1872, under appointment from the American Baptist Missionary Union, he set sail for Japan with his second wife, reaching Yokohama, February, 1873. The sixty-five years of age, he entered upon the study of the language with ardor, and in 1879 his translation of the New Testament in vernacular Japanese was printed. He strongly recommended the adoption of the Roman alphabet in place of the Chinese. In 1881 he published a grammar of the Japanese language, a reform which has since been zealously urged, not only by the missionaries, but by many Japanese. During his six years’ residence in Japan Dr. Brown received 179 to his church at Yokohama, was permitted to welcome other laborers, and to see seven churches established containing between 300 and 400 members.

Dr. Brown was not only a translator of the Scriptures and a preacher, he was also the author and translator of hymns in the languages of Burma, Assam and Japan. His last work was the Japanese hymn-book. When no longer able to use the pen he dictated as he lay on his bed to his native preacher. He closed his useful and industrious life January 1, 1886, in the seventy-ninth year of his age.

Dr. Brown’s published works are: Translation of the New Testament in Assamese: Portions of the Old Testament in Assamese and Shan; Grammar of the Assamese Language; Catechism in the Assamese and Shan Languages; Arithmetic in Burman and Assamese; Hymns in Burman and Assamese; comparative vocabulary of some fifty Indian languages and dialects, and the Orombdoi, an illustrated monthly magazine.

BROWN, Samuel R.: Born at East Windsor, Conn., June 16, 1810: removed to Munson in early childhood; graduated at Yale College, 1832; sailed as a missionary of the ABCFM for China in 1838. His great work was education and translation. He was who first induced Chinese youth to come to the United States for an education, and hundreds of young men from China—some from the highest families of the empire—found through him homes in towns and cities of the United States. On going to Japan in 1859 (under the ICA), he induced the government to send some of its princes to America for education, and he was active in securing Christian homes for them. His last services were in connection with the translation of the New Testament into Japanese, a labor of many years, in which he was associated with a committee of several denominations. This great work was just completed at the time of his death. He returned home in 1879 and died, June 20, 1880, in Munson, Mass.

BRUMANA: A village on Mount Lebanon,
Syria, a few miles east of Beirut. Station of the Friends' Foreign Mission Association (1873), with 4 missionaries and their wives, 0 missionaries women (2 of them medical), 14 native workers men and women, 1 chapel, 3 Sunday schools, 2 village schools, 2 high schools, 1 dispensary, 1 hospital and 15 professing Christians. Brumana has been twice chosen as the place of meeting (the second in 1900) of an important international conference of missionaries and other Christian workers from all parts of the Levant.

BUA: A town on the island of Vanua Levu, Fiji Islands; station of the Australian Wesleyan Methodist Missionary Society, with 1 missionary, 207 native workers, 71 chapels, 92 Sunday schools, 102 village schools, and 2,135 professing Christians.

BUCARAMANGA: A city of 20,000 inhabitants in the district of Santander, Colombia, South America; station of the American Bible Society, with an agent and his wife and a book depot.

BUCHANAN (Liberia). See GREAT BASSA.

BUCHAREST: Capital of the kingdom of Roumania; is of Oriental in external appearance, in other respects is assuming more and more the aspect of a European city. Population (1890), 190,633.

Mission station of the London Society for Propagating the Gospel among the Jews (1848), with 2 missionaries, one with his wife, and 31 native workers, 9 Sunday schools, 1 village school, and 702 church members.

BUCHANAN (Liberia). See GREAT BASSA.

BUCHARIA: Capital of the kingdom of Roumania; is of Oriental in external appearance, in other respects is assuming more and more the aspect of a European city. Population (1890), 190,633.

Mission station of the London Society for Propagating the Gospel among the Jews (1848), with 10 missionaries, 9 native workers, men and women, 1 chapel, 1 Sunday school, and 2 village schools. Also station of the PB (1899), with 2 missionaries, one with his wife, and 1 missionary woman.

BUDAO: A city S. W. of Bareilly, in the Rohilkhand district, United Provinces, India. Population, about 35,000. Station of the ME, with 4 missionaries and 38 native workers, men and women. It has 24 village schools, a high school, and 680 church members.

BUDHISM: In discussing Buddhism it must be borne in mind that many systems known by that name have appeared in different ages and in different lands. No other faith or philosophy has undergone so many and so great changes in the course of its development. The widely differing opinions, therefore, which have been expressed as to its teachings, may each have found a degree of support in some particular phase or stage of the manifold system.

Another point to be settled is its relation to Hinduism. Was it a new and distinct system setting out in the first instance as a protest against the teachings of the Brahmans, or was it a later development in the mind of Gautama occurring after six years of ascetic life—a discovery or conclusion finally reached as he sat under the Bo tree? Professor Beall is undoubtedly correct in the opinion that Buddhism was an afterthought and not an original aim when Gautama left his palace. He broke with Brahmanism on its religious side; most of its philosophy he retained. He protested against the outrageous assumptions of the Brahmanas, their intense sacerdotalism and imposture, their exaggerated doctrine of sacrifice, and their rigorous system of caste. He repudiated the absolute authority of the Vedas and the superstition, or ultra-religiousism, of the whole Brahmical cult. He even flew to the opposite extreme of atheism, or, at least, a pronounced agnosticism.

Yet, at the same time, he cherished a sort of reverence for the high Brahmanas or rishis. He tacitly maintained many of the speculations of the Upanishads. He cherished, with unspeakable ardor, the old Brahmanical theory that the connection of soul with matter is the source of all evil, and that self-mortification, through a series of transmigrations, can alone secure deliverance. Of the nature of the soul he held peculiar views, as will appear further on. These views have been more or less modified in succeeding ages.

A clear distinction must be made at the outset between the credible history of Gautama and the extravagant legends which sprang up in various lands long after his death. It has virtually been settled by the consensus of the best scholars that those accounts which are the oldest, which were authorized by the earliest councils, which have the concurrent testimony of both the Northern and the Southern literatures, and which are credible in themselves should be accepted as the probable history of Gautama.

Briefly, the facts thus recognized are these: Gautama, otherwise known in his youth as Siddartha, was the son of Suddhodana, a rajah of the Aryan tribe of Sakayas, occupying a tract of country north by northwest of Benares.

He was born at Kapilavastu probably about 600 B.C., and was left motherless by the death of the Rani Maya Devi shortly after she had given him birth. The earliest accounts represent him as having been born by natural generation, and without the miraculous incidents of the later legends.

There are apparent evidences of a melancholy and more or less morbid turn of mind even in his youth, and of painstaking efforts on the part of his father to cheer his despondency by the allurements of a voluptuous Oriental court.

In spite of all this, satsitya was an early result, and at the age of twenty-nine, and just after the birth of an only son and heir, he left his palace and his inheritance, and, like many other princes in various lands, he sought rest of soul in asceticism. The idea which has been so skilfully reproduced by Sir Edwin Arnold, that Gautama then and there set out to become a savior of men, has no foundation in fact. It is rendered impossible by the early traditions; he was simply fleeing from sorrow and distress, and seeking some way of peace.

Leaving his palace by night, attended by a faithful servant, he hastened to the open country, whence he sent back his horse, and exchanging garments with a peasant, he proceeded on foot to a forest retreat, where he entered upon a life of self-mortification.

Disappointed with his teachers, he himself became the head of a fraternity, and with five or six followers he sought even greater isolation and greater austerity than he had found in asceticism. He had at length fathomed the emptiness of the Brahmanical religion. He had given it a patient and even heroic trial, and had found it vanity. Self-mortification could go no further without absolute suicide. He was so weak from fasting that he fainted and fell to the ground. The crisis of his life had come. He abandoned his vain struggles and partook of needful food.
This step cost him the loss of all his influence; his disciples forsook him as an apostate and a failure; he was in extreme perplexity and distress. He had abandoned himself to vice and licentiousness, and appeased his wounded pride by proclaiming that all religion was a sham. The temptation was strong, yet neither had his former possessions given him peace.

Very real and very great were his temptations. For thirty-five years he had been a leader of men, in the front of the world, on the one hand, and with conviction and pride on the other, as he sat alone under the shade of the Bo tree. All candid men must acknowledge that the decision which Gautama reached, and the victory over self which he won, were sublime. Greater self-control has seldom if ever been attained by men, and the power of the human will has sometimes found remarkable exemplifications.

John Foster, in his essay on "Decision of Character," says: "It was just here that Buddhism began its great career. It is a missionary religion from the outset; more aggressively so in that early age than in the later centuries, when it had lapsed into the form of belief aphorisms or sutras, and was committed to writing. They had various classifications like the following: (1) The Four Truths, discovered while sitting under the Bo tree—viz.: the fact of sorrow, the cause of sorrow, the removal of sorrow, and the means by which this is to be done. The fourth was ramified into

...
the eightfold path. (2) The Middle Path, as between the dominion of passion, on the one hand, and the bootless extremes of asceticism on the other, the path (a) of Right Understanding; (b) of Right Speech; (c) of Right Action; (d) of Right Livelihood; (e) of Right Effort; (f) of Right Mindfulness; (g) of Right Concentration.

Of the collections of Buddhist literature there are two great divisions, known as the Little Vehicle (Hinayana) of Ceylon and other southern lands, and the Great Vehicle (Mahayana) of Nepal, Kashmir, and Tibet. China and Japan received translations from both, the principal from the Great Vehicle of the North. The Pali text of the Little Vehicle was adopted by the council called by King Ashoka about 250 B.C., and was known as the Tripitaka (Three Baskets). This, as being the oldest and most authentic body of history and doctrine, is justly considered the life of Christ. It was written seven centuries after the adoption of the canon.

The Mahayana, or Great Vehicle, consists of nine books, of which the two most important are the Lotus of the True Law and the Leia of the True Law. The former of these is a life of Gautama down to the time of his enlightenment. It was written partly in poetry and partly in prose, and evidently at different times. As above stated, it is in this poetical and exaggerated biography that those legends are chiefly found which resemble the life of Christ.

In the course of centuries important Buddhist works of greater or less merit appeared in the southern literature, mostly commentaries on the alleged teachings of the "Exalted One." Of these the most important are the Dharmapada, the Sutta Nipata, the Great Decease, etc. The Dharmapada, or "Path of Holiness," was written by Buddhagosa, an Indian monk, who went to Ceylon about 430.

The book is a sort of encyclopedia and commentary combined. It is a compend in Pali of all the commentaries which till his time had been preserved in Sinhalese only. The Dharmapada contains the best things of Buddhism, as the Bhagavad Gita sums up the choicest teachings of Hinduism. How far it represents the veritable words of Gautama and how far it embodies the sentiments of his followers can never be known, as it was written seven centuries after the adoption of the canon.

The Doctrines of Buddhism: These are (1) its peculiar conception of the soul; (2) its doctrine of Trishna and Upadana; (3) its theory of Karma; (4) the doctrine of Nirvana.

The soul is said to consist of five skandas. In their interaction constituting what all others than Buddhists regard as the soul. They are (a) material properties, (b) the senses, (c) abstract ideas, (d) tendencies, (e) mental powers. The soul is the result of the combined action of these, as the flame of a candle proceeds from the combustion of its constituent elements. The flame is never the same for two consecutive moments. It seems to have a perpetuated identity, but that is only an illusion, and the same unreality pertains to the soul; it is only a succession of thoughts, emotions, and conscious experiences. We are not the same that we were an hour ago. In fact, there is no such thing as being, there is only a constant becoming. We are ever passing from one point to another throughout our life, and this is true of all beings and all things in the universe. How it is that the succession of experiences is treasured up in memory is not made clear.

This is a most subtle doctrine, and it has many points of contact with various speculations of modern times. It has also a plausible side when viewed in the light of experience, but its gaps and inconsistencies are fatal, as must be seen when it is thoroughly examined.

Trishna is the second of these cardinal doctrines. Trishna is that inborn element of desire whose tendency is to lead men into evil. So far it is a misfortune, or a form of original sin. Whatever it may have of the nature of guilt hangs upon the issues of a previous life. Upadana is only a further stage in the same development. It is Trishna ripened into intense craving by our own choice and our own action. It then becomes uncontrollable, and is clearly a matter of guilt. Now the momentum of this Upadana is such that it cannot be arrested by death. Like the demons of Gadara, it must again become incarnate, even tho it should enter the body of a brute.

Karma: This transitional something, this restless moral or immoral force which must work out its natural results somehow and somewhere, and that in embodied form, projects into future being a residuum which is known as Karma. Literally it means the "doing." It is a man's record,
involving the consequences and liabilities of his acts. It is a score which must be settled.

A question naturally arises. How the record of a soul can survive when the soul itself has been "put away"? The illustration of the candle does not quite meet the case. If the flame were something which, when blown out, immediately seized upon some other substance in which the work of combustion proceeded, it would come nearer to a parallel. One candle may light another, itself is extinguished, but it does not do it by an inherent necessity. But this flame of the soul, this Karma, must enter some other body of god, or man, or beast, or inanimate thing.

Again the question comes. How can responsibility be transferred from one to another? How can the heavy load of a man's sin be laid upon some newborn infant, while the departing sinner himself has no further concern in his evil Karma, but sinks into non-existence the moment his "conformations" are touched with dissolution? Buddhism acknowledges a mystery here; no real explanation can be given, and none seems to have been attempted by Buddhist writers. To be consistent, Gautama, in denying the existence of God and of the soul as an entity, should have likewise denied the connection between spirit and matter which binds him with the shackles of conscious being. This, however, he could not do in the face of that deep-rooted idea of transmigration which had taken entire possession of the Hindu mind. He was compelled, therefore, to bridge a most logical chasm as best he could. Karma without a soul to cling to is a something in the air. It alights like some winged seed upon a newborn set of skandas with its heckless boon of ill desert, and it involves the fatal inconsistency of investing with permanent character that which is itself permanent.

But the question may be asked, Do we not admit a similar principle when we speak of a man's influence as something that survives him? We answer, "No." Influence is a simple radiation of impressions. A man may leave an influence as best he could, Karma without a soul to cling to is a something in the air. It alights like some winged seed upon a newborn set of skandas with its heckless boon of ill desert, and it involves the fatal inconsistency of investing with permanent character that which is itself permanent.

The injustice involved in the doctrine of Karma is startling. The newborn soul that inherits its unsettled score has no memory or consciousness that connects it with himself; it is not hereditary, it is not the father's character that invests him. This Karma may have crossed the ocean from the deathbed of some unknown man of another race. The doctrine is the more astonishing when we consider that no Supreme Being is recognized as claiming this retribution. There is no God; it is a vague law of eternal justice, a law without a lawyer or a judge. There can therefore be no pardon, no commutation of sentence, no such thing as divine pity or help. The only way in which one can disentangle himself is by breaking the connection between spirit and matter which binds him with the shackles of conscious being.

The Doctrine of Nirvana: No doctrine of Buddhism has been so much in dispute as this. (1) It has been widely maintained that Nirvana means extinction. (2) Prof. T.W. Rhys Davids and others have held that it is the destruction of passion, malice, and delusion, and that it may be attained in this life—that Gautama reached Nirvana forty-five years before his death. They claim, however, that inasmuch as it cuts off Karma and rebirth, it involves extinction upon the dissolution of the body. (3) It is asserted by others that Nirvana is a return to the original and all-pervading Bodhi essence. This theory, which is really a concession to the Brahmanical doctrine of absorption into the infinite Brahm, has a wide following among modern Buddhists in China and Japan. It is a form of Buddhist pantheism.

As to the teachings of Gautama on this subject, Professor Max Müller, while admitting that the metaphysicians who followed the great teacher plainly taught that the entire personal entity of an arahat (an enlightened one) would become extinct upon the death of the body, yet reasons in his lecture on "Buddhistic Nihilism" that the Buddha himself could not have taught a doctrine so disheartening. At the same time he quotes the learned and judicial Bishop Bigandet as declaring, after years of study and observation in Burma, that such is the doctrine ascribed to the great teacher by his own disciples. Gautama himself is quoted as closing one of his sermons in these words: "Mendicants, that which binds the teacher to existence is cut off, but his body still remains. While his body shall remain he shall be seen by gods and men; but after the termination of life, upon the dissolution of the body, neither gods nor men shall see him." Prof. Rhys Davids expresses the doctrine tersely when he says: "Utter death with a new life to follow is then a result of, but it is not, Nirvana."

Professor Oldenberg suggests with much plausibility that the Buddha was more reticent in regard to the doctrine of final extinction in the later periods of his life; that the depressing doctrine had been found a stumbling-block, and he came to assume an agnostic position on the question whether the ego should permanently survive. The question, What is Nirvana? has been the object of a large inquiry than just its importance demands. Practically the millions of Buddhists are not concerned in the question. They find no attraction in either view. They desire neither extinction nor unconscious absorption into the Bodhi essence (or Brahm). What they demand is an improved transmigration, a better birth. The more devout may indulge the hope that their next life will be spent in one of the Buddhist heavens. Others may aspire to be men of high position and influence. A man of low tastes may forecast his next life in accordance with those tastes. The Buddhist holds even more strictly than the Christian that every man shall reap as he has sown, for in his view no interfering grace can change the result. It is wholly erroneous, then, to represent the system as presenting nothing more attractive to men than the prospect of extinction. However metaphysicians and Orientalists may settle the question of the last estate of those who become "enlightened," the multitudes care little for a goal which, according to Buddhist teachers, is not even attained by followers of Gautama have ever reached. "The laymen could attain Nirvana," says Professor Rhys Davids, "we are told of only one or two instances of their having done so; and, the it was more possible for members of the Buddhist order of mendicants, who only hear after the time of Gautama of one or two who did so. No one
now bears of such an occurrence." It is safe, therefore, to suppose that the hope of Nirvana has practically no influence on Buddhist minds. It lies at an infinite distance and is shadowy at best, while real existence lies between. That is the goal of hope and aspiration.

The "Keynote" of the Buddha: It is common to speak of Buddhism as a "missionary religion," and such it was in its earlier career. Gautama from the first and both by precept and example taught the duty of proclaiming the "Law." The fact that a son and a daughter of King Ashoka became missionaries in Ceylon must be accepted as evidence of the earnestness of the missionaries of their time. Other influences helped the movement, however. Ashoka made Buddhism the religion of the state, and, as we have seen, the political treaties formed between the Lamas of Tibet and the Chinese emperors extended the system even to Mongolia. In many instances Chinese travelers in India carried home with them the Buddhist system and became its advocates. But for several centuries real missionaries or volunteer teachers visited other lands for the propagation of the Law. Buddhism was transplanted to Ceylon about 230 B.C. to Keskair at the beginning of the Christian era, to China about 67, to Burma in the 5th century, to Japan in 552, and to Siam and Cambodia in the 7th century.

The Development of Northern Buddhism: In Ceylon, Burma and Siam there has been little change from the time-honored doctrine of the Pitakas, but in Nepal, Tibet, and among all branches of the Mongolian race there have been wide variations.

As compared with the legendary teachings which at length came to be associated with the history of Gautama was the theory that successive Buddhas have visited the world, and at intervals of five thousand years will continue to appear. When Gautama died, those who had learned to look upon him as a sort of worship felt the loss of a divine sympathy and help. The Buddha was dead, and according to his own teachings there was "nothing left of which it could be said I am." But the next Buddha was in course of preparation in some of the heavens, and to his theophany the world prayed. Thus the Bodhisat Maitreyeh (future Buddha of kindness) came to be recognized even in Ceylon as a hopeful resource and a hearer of prayer.

But it was in the Northern Buddhism particularly that the evolution of a sort of semi-theism advanced from generation to generation. Professor Rhys Davids maintains that the "keynote" of the Mahayana (Great Vehicle) was its change from the idea and aim of Arahathship, as taught in the south, to that of Bodhisatship. In other words, a living Buddha to come was thought to be of more practical value to mankind than a dead Buddha of the past, however wise and saintly.

There was that felt demand of humanity, witness, of a divine and eternal Buddha, to be our guide and comfort. By the 4th century there were worshiped in Nepal two Bodisats named Manjusri and Avalokitesvara. The first was the personification of wisdom; the second represented power, and was the merciful protector of the world. These two personages were presented in the image of two deities. They are supplied the name of the Great Vehicle. At a somewhat later period these two had become three, with a somewhat modified distribution of functions.

Vajrapani represented power; Manjusri, the personification of wisdom; while Avalokitesvara was the spirit of the Buddhas everywhere present in the church. This is wonderfully suggestive of a possible borrowing from the Christian Trinity, for it was in the Northern Buddhism that the Trinity first person who was known as a dhyana or celestial Buddha; the second was the spirit of Buddha in the church; and the third was the incarnate Buddha on earth. The Trinity for our world consisted of the dhyana Anitaba, whom we shall notice farther on; Avalokitesvara, who also becomes important, and Gautama, who was our incarnate Buddha.

In the 10th century the Tibetans advanced a step further, and proclaimed the Supreme or Adi-Buddha. From him, the One and Absolute, all the Dhyana Buddhas emanated, while from him sprang the Bodisatas, and from each Bodisat was a kind of cosmic Bodhisat of Buddha in the universe. Thus Buddhism had become essentially polytheistic.

Meanwhile the system had become exceedingly corrupt through a union with the Hindu doctrine of Saktism, or the worship of the female principle of Siva, and even in Tibet the hideous idols representing the gods and goddesses of Hinduism were everywhere present. By a subsequent reformation the Buddhism of Tibet was restored measurably to its original purity.

Lamism or Lamaism: The available functions of Avalokitesvara had rendered him exceedingly popular. To him all real supplications were offered. The chief abbot of Tibet, who was also temporal ruler, solidified and established his power by claiming to be an incarnation of this all-pervading Bodisat. At his death the indwelling one immediately became incarnate in some newly born infant who should succeed to the theocratic throne. To the great advantage of this supposed divinity was added an alliance with Kublai Khan and other Chinese emperors, by which in the political and religious world the Chinese Emperor, the Grand Lasa of Tibet was constituted the high priest of Buddhism over China and Mongolia. Subsequently a disputed title to the Lamaship was settled by the inauguration of two Lamas, and for this purpose another indwelling Bodisat was found, viz.: Amitaba.

The Worship of Quan Yin: In China a different use was made of the ever available and popular Bodisat Avalokitesvara. He became impersonated in Quan Yin, the well-known goddess of mercy. That Quan Yin was regarded as a female finds its explanation in the influence of the Indian Saktism, which had not become quite extinct even in Tibet. Some of the abbes in the Tibetan monasteries were regarded as incarnations of the wives of Siva. Quan Yin on the other hand, was always considered to be a divine being, with a divine body.

The Anthropomorphicizers: In Ceylon and Japan Quan Yin is one of the most popular, because the most merciful, of deities. She is represented as having attained Nirvana, but as having voluntarily sub-
mitten to rebirth in heaven that she might com-
 passionately mankind.

The Alleged Humanity of Buddhism as Com-
pared with Christianity: There has been great

The Buddhism of Mongolia has borrowed
largely from Confucianism. The system now
embraced many of its popular superstitions,
and its geomantic superstitions. The Chinese
are in turn Confucianists, Buddhists,
and Taoists, as exigencies may arise.

The Alleged Coincidence between the Life of
Gautama and that of Christ: We have already
alluded to the incidents of Buddha’s birth
and early life, as set forth in the legends,
particularly in the Lālita Viśāraṇa. Great use
has been made of these by the apologists of
Buddhism. The inference which is generally
drawn from them is that the Gospel narrative
is largely borrowed from the earlier life of Gau-
tama. Abundant refutations of this assumption
have been presented by Zitel, Kuenan, Kellogg,
Rhys Davids, and others.

1. “There is,” says Rhys Davids, “no evidence
whatever of any actual and direct communica-
tion of these ideas common to Buddhism and
Christianity from the East to the West.

2. Many of the coincidences are merely acci-
dental. The events in both cases are those which
might naturally occur independently of any con-
nection; such as the fact that both infants were
welcomed with joy by friends as well as kindred,
or that they were both consecrated in temples,
or that both were tempted to turn aside from
their great missions, or that both were credited
with precocious wisdom.

3. The fact has already been shown that the
Lālita Viśāraṇa, which gives most of these legends
of Gautama’s childhood, cannot be proved to
have existed earlier than the 6th century.
While there is no evidence of communication of
the ideas common to Buddhism and Christianity
from the East to the West, evidence is abundant
that Christianity had been preached and had
achieved a foothold in India and Central Asia long
before that date.

4. It is intrinsically improbable, not to say
impossible, that a circle of disciples which
embraced the mother and brethren of Jesus
should have undertaken to palm off a false or
borrowed history.

5. It is still more improbable that the disci-
plines, whose whole aim was to show that Christ’s
advent was a fulfilment of Jewish prophecy and
vitaly connected with the Old Testament
Church, should have clumsily copied a mass of
heathen legends. Considering the Jewish horror
of heathenism, no policy could have been more
fatal.

6. The disciples of Christ taught a pure theism,
in which supernatural elements appeared in an
intense and special power. Would they base the
story of one claiming to be the Son of God on
the biography of a Gentile atheist?

7. Many of the coincidences are rather con-
trasts. Christ’s preexistence was that of a Divine
Being. Buddha’s was merely a series of trans-
migrations. Christ had shared the equal glory
of the Father; Buddha had been a soldier, a thief,
an elephant, a tiger, a snipe, a frog; Christ’s
baptism was a religious rite, that of Gautama a
bath in a river. Christ’s miracles were sensible
and useful, those of Buddha objectless, childish,
grotesque.

The Alleged Coincidence between the Life of
Gautama and that of Christ: We have already
India or Ceylon and the Norsemen of the Baltic there are physical contrasts which no faith could wholly efface. But considering that Scandinavia, with its terrors of frost and sea, are now the most peaceful of men, we may point to the influences which Christianity has exerted upon them as among the highest triumphs of any religious faith. Moreover, northern races of Buddhists are by no means distinguished for a gentle and peaceful spirit. They are warlike; and their temples are often crowded with the images of bloodthirsty heroes.

It is admitted that Gautama discountenanced the destruction of life, whether of man or of beast. Even insects were spared with punctilious care. But this was no new precept. Brahmagians had long before taught the same, and the sect known as the Jains are most absurdly scrupulous of all. This sacredness of life is based on the doctrine of transmigration, which is common to all nations of Southern Asia. The meanest beast or reptile may be an incarnation of a human spirit. But the real humanities of Buddhism are infinitely inferior to those of Christianity. Ostentatious care of brutes is often seen side by side with utter disregard of human suffering. In Canton one may see a sacred asylum for swine, but he would look in vain for a home for the orphan or the blinded. A missionary board in our day has been asked to provide some place in Bangkok for the insane, because such an asylum had never been imagined, so that all that could be done for a demented foreigner in that city was to lodge him like a criminal in jail.

The alleged instances of benevolence in the history of Gautama are chiefly found, not like the case of Christ, in his earthly life, but in the birth stories of his former existences. Once as a hare he gave himself for a dinner to a hungry tigress. In another of his lives he gave his two children to a demon who desired to eat them, and as their blood streamed from the monster's mouth he said, "By the magic of this deed may rays of light emanate from me." The attitude of Buddhism toward woman has been greatly emphasized in recent years by its special advocates in Christian lands. That it mitigated many of the wrongs which had been visited upon the female sex by the Brahmagians will be conceded. It was a great and important step when the Buddha, not on his own impulse, but by the persuasions of his kinsman and disciple, Ananda, admitted women to the privileges of the Sangha or holy order. The principle involved carried with it many social ameliorations. Yet the position of Gautama and the whole leaven of his influence in this respect was far below the standards of the New Testament. In the outset his example in forsaking his wife and child to become a recluse cannot be commended. Paul and without consent, must be adjudged a crime. But the real humanities of Buddhism are infinitely inferior to those of Christianity.

The baneful influence of this example, like that of Mohammed's immorality, has brought forth evil fruit abundantly. In Burma any man desiring to be rid of his wife has only to enter a monastery and remain a year or even a month, after which he is free to leave his sanctuaries behind him and marry another wife.

Logically, Buddhism is opposed to all marriages, to all love for wife or children. The principle that human relationships are fraught with pain, and that to get rid of pain one must attain an equilibrium which is tantamount to absolute indifference, would break up all society. This tendency was pointed out to Gautama, and he accordingly divided his followers into two classes, the monks and the laity. It was an illogical but necessary concession.

Buddhist missions rest upon a much more radical principle than that of the Roman and Greek churches. These, while maintaining that celibacy is conducive to the highest sanctity, nevertheless honor marriage, and make it a sacrament for the masses of men. Not so with Buddhism. It puts no honor upon the relation; it regards it as an evil. Many utterances are quoted from Buddha which cast reproach upon woman as woman.

Thus in the Dhammika Sutta, "A wise man should avoid marriage; life is as if it were a baleful pit of live coals." Again, "That which is named woman is sin." On another occasion Buddha said: "Any woman whatever, if she have a proper opportunity and can do it in secrecy, and if she be enticed thereto, will do that which is wrong, however ugly the invention may be to the devotees. Such slander in the Laws of Manu can exceed this.

Two general precepts of Buddhism will suffice to show the disfavor which it puts upon woman. First, Gautama taught that, altho she could enter upon a holy life as a nun, she could not attain Nirvana without first being born as a man; and, second, it was held that, altho a Bodhisat in his preexistent lives might be a wolf, a snipe, or a frog, he could never become a woman. Quite in accord with these ideas, the female sex has remained in general degradation in all Buddhist lands.

The fact that a low grade of morality exists in countries wholly under the influence of this system, that profligacy is unbridled in Mongolia, that thousands of children were sold for prostitution in Japan, that the vile custom of polyandry prevails unchecked in Tibet, will doubtless be set down to other causes by Buddhist apologists. But when we turn to the canonical books of the system and find passages so vile that the translators have not dared to translate them, no such excuses can be accepted. The Bishop of Colombo, in the Nineteenth Century of July, 1888, called attention to the fact that the translators and publishers of the Pitakas of Ceylon had omitted some portions which were absolutely vile. He did not complain that the omission had been made, but that no mention was made of the fact that the English readers of the Sacred Books of the East were left to suppose that the culled and expurgated version of the Vinayana there given was a fair and honest representation of Buddhism as it really was and is. Professor Max Muller, in his introduction to the first volume of the Sacred Books, a volume relating to the Upanishads, admits that some things in Hindu literature were considered unfit for the English translation, but such notice is wanting in Professor Oldenberg's translation of the Pitakas, where especially such omissions should be explained, since Buddhism
Contrasts with Christianity: There is not space for an article allusion to the admixtures of Buddhism with lower forms of superstition which it has encountered and absorbed in many lands, such as the wide-spread spirit-worship, serpent-worship, and even fetishism. But a few of the more points of contrast between Buddhism and Christianity may be presented. We have admitted the probable sincerity of Gautama as a reformer and the great victory which he gained over his own evil propensities, also the general tone of benevolence which appeared in his teachings, but the system must be judged as a whole and in the broad perspective of its influence. It is thus that Christianity is judged.

1. Buddhism contrasts with Christianity in respect to God. The one, at least in its original form, is a personal and real, personal, and supreme—the source of all moral cause and effect. The other makes God at least in its original form, a personal and real, the Author of every highest inspiration and help, the Arbiter of the blessing present or future, the Arbiter of the whole nature a system of divine redemption from sin and death.

2. There is a marked contrast with respect to the soul. Buddhism recognizes no permanent entity or ego. There is only a transient intermixture of physical propensities and mental powers. At death only the Karma, or the good or evil desert remains. Christianity recognizes the soul as created in the image of God, as conscious and spiritual, a distinct and permanent being, destined to live hereafter, and capable of loving God and enjoying Him forever.

3. While Christianity represents sin as an offense against God and centers in Him the bond of all moral obligation, Buddhism sees only a personal inconvenience, an accumulation of consequences. The motive even in beneficent action is utterly selfish, as it aims at merit. Thus when the preexistent Buddha gave his children to be devoured by a demon, as stated above, he thought not of their suffering, or of his wrong toward them, but only of his own great moral right and wrong seem distorted by such a conception.

4. Buddhism has no Savior. When Sir Edwin Arnold represents him as coming to save the world, he simply reads into Buddhism his own conceptions borrowed from the New Testament and his Christian training. Buddha relied wholly on himself and he taught all men to do the same. In later ages Buddhists in various lands have expressed a felt want of humanity by adopting various types of quasi theism, and have conceived of supernatural beings as divine helpers, but they have so far departed from real Buddhism. The term salvation is wholly out of place in such a system, while, on the other hand, Christianity is in its whole aim and its whole nature a system of divine redemption from sin and death.

5. Buddhism lays stress on self and self-interest. Its self-denials are for purely selfish ends and it cares nothing for the needs of mankind. In Christianity the ideal man denies himself for the good of the whole body of which he is a member, and subordinates self-will and self-interest to the welfare of mankind.

6. Buddhism has shown itself incapable of regenerating society. It was founded by one who had turned his back on all social life. It was very natural that the system should discount woman and the home, for its author was an ascetic, and the monastic spirit pervades all his teachings. Homelessness, mendicancy, suppression of all social and domestic instincts, destruction of love and desire, even the desire of future life, silence as of “a broken gong,” and solitude as of a rhinoceros’—these were the goal of the true Buddhist.

7. Buddhism is a system of pessimism, Christianity, a revelation of cheerful and immortal hope. Gautama aimed at “the death of deaths.” Christ brought life and immortality to life.

The whole assumption upon which the “Great Renunciation” was made to rest is that the universe is out of order, that all life is a burden, that there is no benevolent creatorship, no kind providence, and no salvation. Whoever may have been responsible for such a world, it is one of universal misery and distress. Man and beast make common cause against it, and Buddha is the one great sympathizer. When he preached at Kapilavatutto before his father’s court the whole animal creation was there,

“Catching the opening of his lips to learn That wisdom which hath made our Asia mild.”

It appears to have been a grand indignation meeting of man and beast, the first and broadest of Communist gatherings, at which Buddha voiced the common protest against the order of nature, and pointed out the way of escape from the sad nexus of existence. All

“took the promise of his piteous speech, So that their lives, imprisoned in the shape of ape, Tiger or deer, snaggled bear, jackal or wolf, Foul feeding kite, pearl-ed dove or peacock gowned, Squat toad or speckled serpent, lizard, bat, Yea, or fish fanning the river waves, Launched meekly at the skirts of brotherhood, With man who hath less innocence than these. And in mute gladness knew their bondage broke, Whilst Buddha spoke these things before the king.”

There was no mention of sin, but only of universal misfortune! As Sir Monier Williams remarks, the problem to which Christianity leads a man is: What shall I do to be saved? But that pressed upon men by Buddhism is: What shall I do to be extinguished?

In contrast with the deep shadows of a brooding and all-embracing pessimism like this, we need only to hint at that glow of hope and joy with which the Sun of Righteousness has flooded the world, silence as of “a broken gong,” and solitude as of a rhinoceros’—these were the goal of the true Buddhist.
the world, the fatherly love and compassion with which the Old Testament and the New are replete, the divine plan of redemption, the great sacrifice, the superabounding grace, the brotherhood of man, and the eternal fellowship with God.

Special difficulties await the Christian missionary who attempts to convince educated Buddhists of the unique quality of the truths taught by Jesus Christ. He meets with men whose intellect is perverted by persistent violations of logic. It is easy for the mind trained by Buddhism to believe mutually exclusive propositions. Such a mind "feels no obstacle in believing that there is white blackness, slow swiftness, square roundness, or crooked uprightness." The real vitality occasionally seen in Buddhism is another difficulty which the missionary has to face. In Japan, for the economic government of the Basel Missionary Society (1896), with 3 missionaries and their wives, 6 native workers, 4 outstations, 7 village schools and (1902) 91 communicants.

BUENOS AIRES: Capital of the Argentine Republic, on the estuary of the Rio de la Plata. The most important city in South America, it differs little in its character from American and European seaboard cities. Population (1895) 633,584. Station of the ME (1838), with 2 missionaries and their wives, 1 missionary woman, 16 native workers, men and women, 5 chapels, 3 village schools, a printing house, and 851 professing Christians. Station also of the SDA (1891), with 5 missionaries, 4 of them with their wives, 1 missionary woman, 8 native workers, 14 outstations and 386 professing Christians. Station also of the South America Missionary Society (1898), with 1 missionary and his wife, 11 native workers, men and women, 1 chapel, 2 village schools. Station also of the PB, with 1 missionary and his wife, 3 missionary women and 1 printing house. Station also of the Missionary Pence Association (1901), with 4 missionaries; also of the International Medical and Benevolent Association, with 1 missionary and his wife; also of the YMCA (1901), with 1 missionary and his wife; also of the BFBS, with 5 native workers and 1 book depot.

BUFF BAY: A town on the northern coast of Jamaica, West Indies; station of the CWBM, with 1 missionary and his wife, 2 chapels, 2 Sunday schools, 2 village schools, 4 young people's societies and 135 professing Christians. Also station of the Western Annual Conference of the Wesleyan Church in the West Indies, with 1 missionary.

BUGHI LANGUAGE: This belongs to the Malayan family and is spoken by above one million of the inhabitants of the island of Celebes. It is written with its own alphabet.

BUITENZORG: A station of the Dutch Missionary Society in Western Java, founded in 1869. It has 1 missionary, 5 native workers, and 165 communicants.

BUKALEBA: A settlement in the Usoga district of Uganda, Central Africa; station of the ME, with 1 missionary and his wife, 57 native workers, men and women and 92 communicants.

BUKABA: A settlement on one of the Sese Islands in the Victoria Nyana, Uganda, Central Africa; station of the CMS (1895), with 1 missionary and his wife, 143 native workers, men and women, 1 Sunday school, 3 village schools and 480 communicants.

BULANDSHAIR: A city in the United Provinces, India, situated S. E. of Delhi; a station of the ME, with 13 native workers, men and women, 7 chapels, 16 Sunday schools, 12 village schools, 2 young people's societies and 331 professing Christians. Also station of the ZBM, with 3 missionary women, 7 native women workers, 3 village schools and 155 Zenana pupils.

BULAWAYO: A town and railroad station in southern Rhodesia, Africa; station of the WMS, with 3 native workers, 2 chapels, 1 Sunday school, 1 village school and 145 professing Christians. Station also of the SPO (1893), with 3 missionaries, 1 native worker and 66 communicants. Station also of the SDA (1895), with 6 missionaries, 4 of them with their wives (1 a physician), 2 Sunday schools, 2 village schools, 1 orphanage, 1 dispensary. Also written Bulawayo.

BULGARIA: A country of the Balkan Peninsula, forming an autonomous principality under the suzerainty of the Sultan of Turkey. It is bounded on the north by Rumania, on the east by the Black Sea, on the south by European Turkey, and on the west by Servia. It is divided by the Balkan Mountains into two parts: Bulgaria proper on the north and South Bulgaria or Eastern Rumelia on the south of that range. Area of the whole, 38,086 square miles. Except along the Balkan Mountains, which traverse the whole principality from east to west, the country is a vast plain. The climate is temperate. The plains are hot in summer, and along the Danube there is much malaria, but the highlands are healthy. The higher mountains have snow on their peaks the greater part of the year.

The census of 1900 gives a total population of 3,733,189. The Bulgarians are descendants of the Slavs who inhabited the Balkan Peninsula in the 7th century. In the second half of the 9th century (890-95) Christianity was introduced in Bulgaria, and with it an alphabet was formed and the Scriptures were translated.

This was due to SS. Cyril and Methodius, who
are honored even to this day as patron saints by the Bulgarian Church.

The Bulgarians belong to the Greek (Orthodox) branch of the Christian Church. Their spiritual head is the Exarch, who resides in Constantinople and has the jurisdiction over the twelve bishoprics into which Bulgaria is divided. In 1893 the muehdom of the (Orthodox) Greek Church numbered 2,606,786, the Mohammedans in the Principality numbered 643,258, the Jews, 28,307; the Roman Catholics, 22,617; the Armenians, 6,643; and the Protestants, 2,584. Of the Mohammedans about 200,000 are Bulgarians in race, language and customs and are known by the distinctive name of Pomske.

The modern Bulgarian language has reeded more than any other Slavic dialect from the ancient Slovene or the ancient Bulgarian. While it is a Slavic dialect and is rich in cases and other grammatical forms, the modern Bulgarian has lost most of these forms and has become an analytic language, expressing the relations of cases by prepositions, as in English. The use of the articles is placed after and not before the word, chiefly distinguishes it from the ancient language and from its cognate Slavic dialects.

Special missionary work for the Bulgarians was first organized by the ME in 1857, which has since conducted missionary operations in that part of Bulgaria lying N. of the Balkans (which was at that time a province of European Turkey). The field was organized into a Mission Conference in 1892. It now has as a working force 1 missionary and his wife, 2 unmarried women, and 11 ordained native preachers. Work is carried on in 12 places and the number of church members reported is 234. It also has a high school with 57 scholars.

The ABCFM about the same time commenced work for the Bulgarians on the S. of the Balkans. It now has in Bulgaria a working force of 18 missionaries, men and women, and 16 ordained native preachers. Its operations extend to 30 places, and the number of church members is reported at 900. A collegiate institute, a theological school, a boarding and high school for girls and a publishing house are maintained at Samokov.

The BFBS and ABS have provided Bibles for this region and employ colporteurs for their dissemination.

BULGARIAN LANGUAGE: This language belongs to the Slavic branch of the Aryan family. It is spoken by more than four million people, chiefly found in Bulgaria and the adjoining districts of European Turkey. The alphabet used is substantially the same as the one invented by the bishop Cyril, in the 9th century, and now commonly called the Russian alphabet.

Old Bulgarian literature is written in the Slavic language and is not understood by the common people. A considerable modern literature in Bulgarian has sprung up since the Crimean War of 1853-56. To this growth of modern Bulgarian literature American missionaries have given a notable stimulus. The modern Bulgarian language, in fact, has been strongly and permanently affected by the translation of the Bible made by Dr. Riggs and Dr. Long and published by the Bible societies.

BULILINA: A settlement in Bechuanaaland, Africa, S. W. of Bulawayo; station of the LMS (1895), with 1 missionary, 1 native worker, 5 Sunday schools and 5 village schools.

BULL BAY: A town on the S. coast of Jamaica, W. I., about 12 miles E. of Kingston; station of the CWBM (1876), with 1 missionary and his wife, 4 chapels, 3 Sunday schools, 2 village schools, 2 young people’s societies and 224 professing Christians.

BULLER: A district of Sierra Leone, W. Africa, lying north of the Sierra Leone River; occupied by the CMS (1861) and now in charge of the Sierra Leone Church Missionary Society, with 10 native workers, men and women, 1 chapel 1 Sunday school, 6 village schools and 296 baptized Christians.

BULLOM LANGUAGE: The Bullom belongs to the negro group of African languages, and is spoken in the region of Sierra Leone, W. Africa, by a limited number of people. It has adopted some English words and is written with Roman letters.

BULONGOA: A settlement near the northern end of Lake Nyasa, in German East Africa; station of the Berlin Missionary Society (1895), with 1 missionary and 9 communicants.

BULRAMPUR: See Balrampur.

BULUWAYO: See Bulawayo.

BUMBULI: A settlement in German East Africa, situated in the Usambara country in the northeastern part of the Colony; station of the German Evangelical Society for Missions in East Africa (1899), with 3 missionaries (one having his wife), 1 chapel, and 1 village school.

BUNGABONDAR: A settlement in the Toba district of Sumatra, Dutch East Indies, situated near Sipirok; station of the Rhenish Missionary Society, with 1 missionary and his wife, 17 native workers, men and women, 1 Sunday school, 13 village schools and 321 communicants, the most of them converted Mohammedans.

BUNGU: A settlement in German East Africa, situated in the Usambara region about 50 miles N. W. of Vuga; station of the German East Africa Missionary Society (1901), with 1 missionary and his wife.

BURRISAL: See Barisal.

BUONA VISTA: See Galile.

BURDWAN: See Bardwan.

BURHANPUR: A town in the northern part of Cape Colony, S. Africa; station of the South African Wesleyan Missionary Society, with 24 native workers, 2 chapels, 2 Sunday schools, 3 village schools and 164 professing Christians.

BURJIA: A district in the Lohardaga section of Chota Nagpur, India; field of the Goasner Missionary Society, with 3 missionaries, 71 native workers, 38 chapels, 38 Sunday schools, 2 village schools, 1 high school, a book depot and 8,886 professing Christians. Also written Burju.

BURMA: Within the past seventy-five years the political map of Southeastern Asia, and especially that part of it lying between Tibet and Yunnan on the north and the Bay of Bengal on the south, eastern Bengal on the west and the Mekong River on the east, has been materially changed three times. At present, and for missionary purposes,
Burma may be considered as composed of Upper and Lower Burma. Upper Burma comprising the late kingdom or empire of Burma, and Lower Burma all that portion of the country below the 20th degree of north latitude, as well as the Tenasserim provinces and the present mission stations in Arakan and Shan-land in the East, and Lower Burma comprising great and increasing commerce, about 1,400 their numerous affluents: the Irawadi, with a from 4,000 to 6,000 feet in height, but as they fertile plains, and the rivers enter the bay or the in the lofty Himalayas, and navigable for 1,000 miles or more by large steamers; and below, and toward Sandoway in Arakan. The largest and best known of these tribes are the Ch'ins and the Kach'ins. The latter are secret and most warlike tribe in Burma. No Burman soldier dares to set foot in one of their villages, which are always situated at the summit of hills. They are said to be identical with the Singphos of Assam. Yet these rough and fierce men are yielding to considerable numbers to the power of the Gospel. It is worth noting here that in all Burman cities there is a considerable Chinese population engaged in trade, which they control.

Protestant Missions: The first attempt to plant a Protestant mission in Burma was made at Rangoon, in 1807, by Messrs. Chater and Mardon, English Baptists. Felix Carey, the eldest son of Dr. William Carey, of Serampur, joined them soon after, but Mr. Mardon left in a few months and Mr. Chater at the end of four years. The London Missionary Society sent two missionaries to Rangoon in 1808, but one died and the other removed in a year. Mr. Chater during his four years' stay translated Matthew's Gospel into Burmese, which was printed at Serampur. Mr. Carey remained till 1814, and then, having received an appointment and title from the Burmese emperor, he went to Ava to reside. Mr. Carey had been a Burman Viceroy during his stay there. He had been appointed to govern the country. His mission work except this translation of Matthew, and no Burman had had heard that there was an eternal God. Mr. Carey's mission house was about two miles out of the city. Rangoon was at that time a miserable, dirty town of 8,000 or 10,000 inhabitants, with houses built of bamboo and teak planks and having thatched roofs. Its only importance lay in the fact that it was the capital of a rich and extensive province, governed by a viceroy, an official of the highest rank, who was a favorite of Bhodau Phra, the most blood-thirsty and brutal tyrant and the most bigoted Buddhist who had yet sat on the Burman throne. The viceroy at Rangoon was almost as brutal, but his chief wife was an amiable woman, well disposed toward foreigners, and possessing great influence over her husband.

On July 13, 1813, Rev. Adoniram Judson and wife arrived at Rangoon to open a Protestant mission there. He was a man who endured all things that he might find access to a people sunk in morasses of evil. It was not until 1818 that he was able to preach and teach religion in his yagat and receive inquirers there. June 27, 1819, he baptized the first Burman convert to Christianity, Meung Nau. In this year Bhodau Phra, the Burmese emperor, died, and was succeeded by his grandson, Phagyi-dau, a ruler thirty tribes, differing in many respects, from each other in language, form, and habits, but all worshipers of Naiz or demons. The Karens of Lower Burma readily received the Gospel, and those of them who were under Burmese rule bore courageously bitter and cruel persecution from the Burmans for its sake. The Sgau and Pyo tribes, which occupied Pegu and the Tenasserim provinces, have been largely converted to Christianity. The highland tribes of Central Burma, the Bgais, Pakus, Gecko, Toungthu, and Red Karens, became converted to a later date. Other tribes having few affinities with the Karens, yet, like them, worshiping demons from motives of fear, are found in Northern Burma and along the Arakan border, and are moving down the Irawadi into the vicinity of Mandalay and below, and toward Sandoway in Arakan.
equally arrogant, brutal and bloodthirsty with his grandfather, but with much less ability. His arrogance and tyranny brought on the first Burman War of 1825-26, and led to the cession to the East India Company of the Tenasserim provinces, Arakan, and Chittagonga. In 1852, the second Burman War took place, and Rangoon, Pegu, and all Southern Burma became British territory. In 1853 Rangoon became again a station of the American Baptist Missionary Union, and from that time onward the Society has had great success in all parts of the land. Rangoon was also the first station (established in 1859) of the Burma mission conducted by the SPG. The educational work of this Society has been of a high order and wide influence. The SPG is also laboring successfully among the Karens.

The ME Society has also carried on a mission in Burma since 1878, laboring especially for European colonists and Eurasians.

The WMS established a station at Mandalay in 1889, and is doing a remarkable educational work for women. It has given attention to the lepers, maintaining an asylum which is not only a refuge but a portal to a new life to these wretched sufferers.

The YMCA and the YWCA have stations in Burma; so the Mission to Lepers, the Missionary Pioneers Association, the Leipzig Missionary Society; and the China Inland Mission has a single station at Bhamo, on the northern border. It should be borne in mind that while many Burmese Buddhists have been converted, the simple, more approachable Hill tribes have furnished the larger part of the Christians now found in Burma.

Shan. Amongst the Colouhn (A. R.), and Hallet (H. S.), London, 1885; Bassan, Self-Support in, Carpenter (G. H.), London, 1883; Golden Chersonese, Bishop (Mrs. I. R.), London, 1883; With the Jungle Folk, Cumming (E. D.), London, 1897.

Burmese Language: The Burmese, which is spoken throughout the Burmese Empire and Arakan-Tibeto-Burman group of the non-Aryan languages of Asia, is used by about six million people, and, being one of the aggressive languages, it is constantly increasing the area of its use. It is written with its own peculiar Burmese character.

BURNS, William C.: Born in the Parish of Dun, Scotland, April 1, 1815. Graduated at Aberdeen in 1834; studied theology at Glasgow, and after a period of successful labor in Ireland and among the French in Canada, was sent out by the E. P. Synod, in 1847, as its first missionary to China. On the voyage he began the study of Chinese with the only book found in London, Williams' English and Chinese vocabulary, and a volume of Matthew's Gospel. After spending a year or two at Hongkong and Canton, in 1851 he removed to Amoy, where and at Swatow he did a great work. Later he spent three years in Peking, and in 1857 he went to Newchwang to prepare the way for a mission in Manchuria. In a small room at an inn at that city, destitute of every comfort, he died on the 4th of April, 1868.

While Mr. Burns never interrupted his work of preaching, he accomplished important literary work. Of this we may mention a translation of the Pilgrim's Progress, and a collection of hymns in the Amoy dialect. With the aid of native preachers he put some of the hymns used at Amoy and Swatow into the spoken dialect of Fu-chau-fu. These he first printed in sheet form, and used them in street and chapel preaching, and then published them in book form.

Later he prepared a volume of fifty hymns in the Mandarin dialect, chiefly translations of home hymns, or hymns used in the south of China. Next he put in the dialect of Peking the Pilgrim's Progress complete in two volumes. Some copies were illustrated with wood-cuts. A translation of the Psalms from Hebrew was published in 1867.

BURNSHILL: A town northwest of King William's Town, Cape Colony, S. Africa. Station of the UFS, with 1 missionary and his wife, 2 missionary women, 29 native workers, 16 outstations, 1 chapel, 16 village schools and 1,429 church members.

BURI: A station of the CMS in Uganda, Central Africa, situated on the Victoria Nyanza, with 63 native workers, men and women, and 184 communicants.

BUSH. See BASHA.

BUTIRATI. See GILBERT ISLANDS.

BUTLER, William: Born in Dublin, Ireland, January 30, 1818. Died August 18, 1899. Soon after his conversion he entered the Hardwick Street Mission Seminary and Training School, in Dublin, and afterward Didsburg College, near Manchester, where he studied theology under the venerable Dr. Hannah. After preaching several years in the Irish Conference, he came to the United States, and labored for some time in the New England Conference. In the spring of 1855 he was deeply impressed by an article published by Dr. Durbin entitled "The Crisis," urging the needs of the India Mission on the heart of the Church, and in the following autumn he offered himself as missionary to this field. He was appointed superintendent of the mission, and he sailed with his wife and two children in April, 1856. The provinces of Bellary, the Deccan, Rajputana and others were brought to the attention of Mr. Butler as especially needy on his arrival in India; but after spending several weeks in Calcutta he went to the northwest to consider the opening in Oudh and Rohilkhand. These provinces, covering an area nearly as long as England and containing a population of 20,000,000 of unevangelized people, presented an attractive field to the heroic missionary; and in Oudh, in the very stronghold of the enemy, the Mission of the Methodist Church was established. The capital of Oudh, Lucknow, had three times the population of Boston; and this city was soon to be the storm center of the dreadful mutiny. Mr. Butler, with his family, settled at Bareilly, a city of 200,000 inhabitants; but soon his work was interrupted by the rumblings of the approaching outbreak. Within ten weeks of the establishment of his work, Mr. Butler was obliged to flee for his life; and ten months passed before it was possible for him to return to his station. Khan Bahadur, who, during the mutiny, assumed the title of the Nawab of Rohilkhand, put a price on the head of each of the refugees, and, as a writer puts it, "Mr. Butler's being listed at five hundred rupees." The first meeting of Mr. Butler's mission was held at Bareilly, August 20, 1858. Three missionaries, one European helper and two natives answered the roll. Yet to this missionary was given the joy of living until he could see...
one hundred thousand of the people of India accepting Christ as Lord, brought into this new life through the agency of the Methodist Missions. Returning to the United States, Mr. Butler took charge of several churches in New England, and afterward he was called to the secretaryship of the American and Foreign Christian Union, an organization devoted to work in Papal lands. About this time Mr. Butler published The Land of the Veda, which had a large circulation.

Seventeen years after Mr. Butler was commissioned by his church to go to India to found a mission, he was called to perform a like service in Mexico. In 1876 he entered the Aztec land, and soon his influence was felt in the City of Mexico and throughout the surrounding country. President Diaz received him personally on several occasions, and the government of Mexico gave him full protection in laying the foundation of a mission that has prospered through the years. It was the pleasure of this venerable missionary, in 1883, to return to India, and after twenty-six years he gave thanks to God at Bareilly for the growth and power of the mission that was founded in the dark days of the mutiny. He spent his last days at Newton Centre, Mass.

BUYERS, William: Born in 1804, at Dundee, Scotland; studied at the Missionary College, Hoxton; sailed June 13, 1831, as a missionary of the LMS, March 13, 1827, for the South Seas; stationed first at Tahiti, where he remained till 1836. On May 30, 1836, he and Mrs. Buzacott accompanied a band of missionaries to Samoa, to aid them in their settlement, returning to Raratonga, May, 1837. Mr. Buzacott was an accomplished linguist, and much of his time was spent, in conjunction with Messrs. Williams and Pitman, in translating the Scriptures into the language of Raratonga. He contributed also largely to the preparation of a native literature. In 1846 he sailed for England, and while there he, at the request of the Bible Society, revised and superintended the printing of the entire Raratongan Scriptures. In 1851 he returned with Mrs. Buzacott to Raratonga. In 1857 failure of health compelled him to retire from active service. Leaving Raratonga in November of that year, he went to Sydney, stopping on the way at Samoa. In July, 1860, he was appointed the agent of the Australian Wesleyan Missionary Society in the colony of New South Wales; sailed Sydney, September 20, 1864.

BYINGTON, Theodore L.: Born at Johnstown, N. J., March 15, 1831; graduated at Princeton College, 1849; spent four years in the study and practice of law; graduated at Union Theological Seminary, 1857; ordained at Bloomfield, N. J., June 4, 1858, and sailed as a missionary of the ABCFM for Turkey; commenced a station at Eski-sahbra, European Turkey, in 1859; returned to the United States in 1867 on account of ill health, and was released from his connection with the Board. He was reappointed as missionary of the Board in 1874 and stationed in Constantinople as editor of the Bulgarian family weekly, Zornidz, and as member of the Mission Committee of Publication. Failing in health, he returned to the U. S. in 1886, and died in Philadelphia, June 18, 1888. He was a preacher of impressive earnestness and excelled as an extemporaneous speaker. His largest volume in Bulgarian was on the Evidence of Christianity, which has had a wide circulation. It is probable that the Zornidz he edited by Dr. Byington contributed as much as any other instrumentalty toward the development of those characteristics that have been so prominent among the Bulgarians in their long struggle for national independence.
Brazil, situated on the Paraguay River, 45 miles W. of Bahia de Todos los Santos. Station of the AN (1860) from Feb. 11, 1853, to St. Felix from the fact that the missionaries lived in a place of that name on the opposite bank of the river. In 1903 the station had 1 missionary, 2 missionary women, 2 native workers, 5 outstations, 4 organized churches, 2 boarding schools, 2 day schools and 10,000 members.

CACONDA. See Kakonda.

CAFFREE. See Kaffir.

CAFARRIA: A part of the eastern section of Cape Colony, S. Africa. Also called Kafriland.

CAIRO: A city of Egypt, situated about nine miles south of the apex of the delta, where the Nile divides into the eastern, or Damietta, branch and the western, or Rosetta, branch. The city extends from the edge of the desert at the base of the Mokattam Hills on the east to the river on the west, and southward until it joins Old Cairo (Misr Atika) on the site of the ancient city Festat. This was the site of New Babylon, said to have been founded by the Babylonians after the conquest of Egypt by Cambyses, about 525 B.C. The city, now called Cairo, was founded in 974 by Johar, the general of the Fatimite Caliph Mu'izz. It was called Misr el Kahira because it is said that at the precise time when the foundation of the walls was being laid, the planet Mars, which by the Arabs is called Kahir, crossed the meridian of the new city, and Mu'izz accordingly named it from this event. The city grew rapidly because of its position and the facility with which building material was found. It has become the largest city on the continent of Africa, and the second in the Turkish Empire, having a population of from 400,000 to 500,000.

Cairo was the capital of Egypt in 973, and has continued to enjoy this preeminence during the many vicissitudes of 917 years. From January 26, 1517, when the Ottoman Sultan Selim I. entered the city in triumph, until June 15, 1798, when after the battle of the Pyramids Napoleon I. entered the city, nothing of sufficient importance seems to have occurred to merit a place in history. And it was not until after Mehmet Ali was established as Viceroy of Egypt that the city began anew to enjoy prosperity. While there had been many important improvements in and around the capital, such as extending the city so as to form the new part called for him Ismailiyeh, improving the Esibekeyeh public gardens, planting trees in and about the city, and uniting Cairo with the western bank of the river by a magnificent iron bridge. Since the British occupation of Egypt, in 1882, the city has been very much improved and many handsome buildings have been erected.

Among the objects of interest to the missionary, besides the Boulaq Museum, is Jama-el-Azhar, which was changed from its original use as a mosque to a "university" by Caliph Aiz Billah on the suggestion of his vizier, Abu'l Farag Ya'kub, in the year 378 of the Hegira, and has become the most important Mohammedan institution of learning in the world.

There is nothing imposing in the appearance of the buildings, which have an old and dilapidated aspect. They occupy a large piece of ground, and consist of an open court with colonnades on the north and south sides, which are set apart for students from West Africa, East Africa, Syria, Lower Egypt, Upper Egypt, the Sudan, and other parts of the Mohammedan world. On the east of the court is the Liwanel Jama, or sanctuary, which covers an area of about 3,500 square yards, and has a low ceiling supported by 380 columns of granite and marble, but not uniformly arranged, as if they were not in their original places. Here the prayers are repeated and instruction given to groups of students who sit on mats before their teachers. This "university" has an enrolment of from 10,000 to 12,000 students, four-fifths of whom are from 12 to 18 years of age and who are taught by 321 Sheikhs or professors. The president is called Sheikh el Azhar, and receives a salary of about $500. The students spend from two to six years in the universities, while some continue longer. No fees are paid by them, as all expenses are met from the endowments of the mosque, which are of great value.

The whole system of education consists of committing facts to memory, without exercises which train the mind to discern the truth and detect error, or lead to the forming of independent opinion. Mathematics and astronomy, which were studied by the ancient Egyptians, are not in the curriculum of this modern university of Islamism. Yet the professors and students are proud of their attainments and look down with feelings akin to disdain upon the scientific and religious attainments of Western Christians. As a close observer has remarked, this education develops "a personality which is useless for any other occupation than that of teaching Arabic phonetics, grammar, and the Koran."

Missionary effort in Cairo is carried on by six Protestant societies. Of these the United Presbyterian Church of North America made it a center and station for their operations in 1854. This Society now (1902) has at that point and its dependencies 14 missionaries, men and women, 23 native workers, men and women, 4 Sunday schools, 5 high schools, 1 theological seminary, 1 book depot, and 690 Harim (Zenana) pupils.

Cairo is a station of the CMS (1882), with 12 missionaries, men and women, 13 native workers, men and women, 1 village school, 1 high school and 1 book depot. Also station of the Kaiserswerth Deaconesses (1884), with 8 deaconesses and a hospital. Also a station of the International Medical Board of London (1897). The Kaiserswerth Deaconesses (1900), with 1 missionary and his wife. There are also two English societies working for the Jews in this city. It has not been possible to secure details of their work.

CAKAUDROVE. See Cacaudrove.

CALA: A town in Cape Colony, S. Africa, situated about 40 miles N. W. of Clarkeburg. Station of the South African Wesleyan Methodist Missionary Society, with 72 native workers, 12 outstations, 15 chapels, 8 Sunday schools, 13 village schools, a Young People's Society and 740 professing Christians. Also station of the Episcopal Church in Scotland (1889), with 1 missionary, 3 missionary women, 10 native workers, 6 outstations, 6 chapels, 8 village schools, 1 high school, 380 professing Christians.

CALCUTTA: Capital of British India. It stands on the east bank of the Hugli River, one
of the channels through which the Ganges reaches the Bay of Bengal, about 80 miles from the mouth of the river. The earliest mention of the name occurs in a revenue document of one of the Mogul emperors, in 1596, where Kalikata (Kali-Ghat, shrine of the goddess Kali) indicated a small Bengali village on the site of the modern metropolis. In 1686 the English merchants connected with the East India Company, owing to difficulties with the Mohammedan authorities, found it necessary to leave their settlement at Hugli and seek another site. Under Job Charnock, then the president of the little settlement or factory, they hied up on this site, Anglicizing the name into Calcutta. The growth of the place has continued almost unchecked to the present day; the hamlet on the eastern bank of the Hugli has thus, under the fostering care of English power, developed into one of the great political and commercial centers of the world. The portion of the city occupied by the English lies along the river front, and is adorned with palatial residences, imposing public buildings, churches of different denominations, and wealthy and well-stocked business houses. Back from the river, near the mouth of the Ganges, stretches the native part of the city, a mass of low, mean, and squalid huts, intersected by narrow and filthy streets, so that the saying has become current that Calcutta is a city of palaces in front and a city of pigsties in the rear.

The population of Calcutta, with its suburbs, is (1901) 1,125,400. Nearly two-thirds of this population are Hindus and nearly one-third Mohammedans, and there is a sprinkling of Buddhists, Jains, Parsees, Jews, etc. The city has been in the control of the English from the moment that Job Charnock and his associates settled there in 1686 until the present time, with the exception of a few months in the year 1756. In June of that year the city was attacked by the Musulman ruler, or Nawab, of Bengal—Suraj-ud Daula—one of the worst specimens ever known of that class of brutal despots which is popularly supposed to thrive in the Orient. It was at that time that the tragedy of the famous "Black Hole" of Calcutta was enacted. The wretched prisoners were thrown into a cell hardly 20 feet square, ventilated only by two small windows. In the morning only 23 persons were found alive. Calcutta was recaptured in January, 1757, by Admiral Watson and Lord (then Colonel) Clive. In the same year, at the battle of Plassey, the Nawab's army was defeated by a little force under Clive, and the question of English supremacy in Bengal and throughout India was virtually settled.

The history of missionary operations in Calcutta goes back to the year 1758, just after the rebuilding of Calcutta and the establishment in Bengal of English power. In that year Rev. Mr. Kiernander, a Danish missionary, whose successful labors south of Madras, at Cuddalore and vicinity, had been interrupted by hostilities but continued in 1754—1755, was placed in charge of a factory at Maida, where he remained five years and where he was able to learn the Bengali language, translate the New Testament, and preach and teach among the natives, besides attending to his duties in connection with the factory of which he was in charge. Between 1797 and 1800 various desultory efforts were made by the Christian Knowledge Society to carry on the mission begun by Kiernander. Much help was given by Rev. D. Brown, Dr. Buchanan, and others, who were serving English residents as chaplains. In 1799 four more English missionaries arrived—this time in an American vessel. They effected a landing in the face of governmental opposition, but were obliged to retreat to Serampur, 15 miles up the river, which was then held by the Danish Government. The Danish governor was in sympathy with their work, and declined to give the missionaries up to the officials of the East India Company. Here they remained, and thus was laid the foundation of the Serampur Baptist Mission. It was after this time that the earliest American missionaries reached Calcutta and encountered the same difficulties as their English brethren. At this time also came Henry Martyn as a chaplain in the East India Company's service.

With the granting of the new charter in 1813, the tone of the government changed. The missionary societies of England were waiting for the opening of the door to enter, and, arrived in 1815, the London Missionary Society came in 1815. The London Missionary Society had sent a missionary out in 1798, but he sought the interior. Their Calcutta Mission was begun in 1816. In 1857 their college was begun, now a large and successful institution. The earliest efforts in the way of promoting female education were attempted in 1821. A society for promoting female education was formed in
1824 and did efficient service. The Society for the Propagation of the Gospel began operations in 1802, establishing Bishop's College, an institution for higher Christian education projected by Dr. Middleton, first bishop of Calcutta. The Established Church of Scotland in 1830 sent Dr. Duff to Calcutta. His energy and devotion gave an impetus to the missionary spirit in the city and suburbs, which soon spread on all mission fields in India, and especially gave point and direction to educational efforts as a legitimate form of missionary work. He started a school which soon grew into a large college. In 1844, following the disruption in the Scotch Church, Dr. Duff's mission was attached to the CMS and devoted itself to the needs of the native poor, creating the Free Church College, an institution for higher Christian education. It was opened in Calcutta in 1820, taking charge in that year of Bishop's College. The London Missionary Society established a press where the Gospel has passed into the hands of the Baptist Mission, and has done excellent service. The latter mission has also been fortunate in securing and wise in retaining the services of several learned and scholarly men who have devoted almost all their time to the translation of the Scriptures, and the revision and printing of successive editions. The duty of vernacular preaching both in the city itself and through the surrounding districts has been faithfully attended to, and among those who have been especially successful in this branch of work may be mentioned Lacroix, one of the ablest and most devoted of the London Society's laborers. The American Methodist Church began work in Calcutta in 1872 under the leadership of Rev. William Taylor, afterward missionary bishop of his church in Asia. Notice of this mission has been largely among Europeans unreached by the labors of other churches, tho, as time has gone on, increasingly among natives also.

The publication of tracts and books in the vernacular languages is cared for by a tract society known as the Religious Tract Society of Madras, while an auxiliary of the British and Foreign Bible Society provides an ample supply of Bibles in the various languages used in the city and surrounding regions.

Calcutta is thus seen to be a center of no small amount of religious and intellectual activity. Under the influence of the several agencies above enumerated, it is natural that a strong and intelligent body of Bengali Christians should have grown up in Calcutta. The influence of the native Christian community of the metropolis has been, as was fitting, metropolitan in its character. Members of this community have been found in all ranks of life—among the lawyers, merchants, writers, editors, scholars, and preachers of the country. They have established and conducted with energy and success a number of native schools and colleges devoted especially to the needs of the native church of Bengal and of India, and in many ways have exerted an influence on the development of Christianity which has been widely felt.

Besides the missionary societies already named 11 others are carrying on enterprises in Calcutta or its suburbs: the WMS, the SDA, the Medical and Benevolent Association affiliated with the SDA, the local Bengal Mission, the Oxford Mission to Calcutta, the British and Foreign Unitarian Association, the YWCA, and, of the various other missionary societies, the Church of Scotland Woman's Missionary Association, the CEZMS, the Baptist Zenana Mission, the CWBM, and the YWCA.

The aggregate number of missionaries of all these societies in the city and suburbs is 184 men and women, with 586 native workers, men and women. The enterprises of these missions include, besides the colleges already mentioned, 86 Sunday schools, 150 common schools, 14 high schools, 5 orphanages, 3 theological schools, 2 training schools for women mission workers, 2 industrial schools and 1 hostel for native students. The BFBS maintains an agent in Calcutta and a book depot. There are 8 young people's societies, besides the YMCA and the YWCA. The professing Christians reported by these missions as connected with their churches form an aggregate of 2,783.

Caldwell, Robert: Born May 7, 1814. Died August 28, 1891. The University of Glasgow conferred upon him the degree of LL.D. and the University of London the degree of D.D. He was missionary of the LMS from 1838-41, arriving in Madras, January 8, 1838. Joined the SPG and ordained deacon in Church of England, 1841, and priest in 1842, at Madras; consecrated Assistant Bishop of Madras March 11, 1877. Over forty years of Mr. Caldwell's missionary life was spent in Idaiyangudi, situated in the extreme south of Tinneveli. In the early years of the 19th century the inhabitants of many villages in this district placed themselves under Christian instruction, and large numbers were received into the church by Gericke and Sattianandan; but Caldwell found only the wreck of these congregations, which soon felt his masterful influence. In less than three years he had formed 21 congregations and 9 schools; he received converts in 31 villages, and altogether these 2,000 persons were brought under regular Christian instruction. A church building society was formed at Idaiyangudi in 1844, and so well was the duty of self-support impressed upon the congregations that in 1846 it was reported that the Idaiyangudi tract society alone surpassed in Christian liberality by the inhabitants of any country in similar worldly circumstances." During the years 1845-7 eleven churches and fourteen schools were built in the district; and at this time Mr. Caldwell reported the proportion of inhabitants of Tinneveli which had embraced Christianity was larger than that of any other province in India. In many places entire villages renounced their idols and the movement in favor of Christianity extended from caste to caste and village to village. This description included the description of the CMS and in 1850 the natives in Tinneveli who, largely under the influence of the SPG and the CMS, led by Caldwell and his associates, had embraced the Christian religion, in number about forty thousand persons, for many years an address in English of Queen Victoria expressing thanks to God for the blessings of his grace. As missionary Mr. Caldwell had to fulfill the various offices of pastor, doctor, magistrate, and general counselor. In 1875, when the Prince of Wales visited India, he was met by nearly 10,000 native Christians and an address was presented to him by Mr. Caldwell.
In 1880 Bishop Caldwell consecrated a church on which he had labored with his own hands from time to time for thirty-three years; in 1883 he removed his headquarters to Tuticorin, the chief seaport in Tinnevelli, and here during this year he confirmed 538 natives in one day; and in 1888 he celebrated the jubilee of his missionary career. In 1890 Bishop Caldwell, on the death of Bishop Sargent, assumed the entire episcopal oversight of Tinnevelli. He was the author of "Companion to the Holy Communion" and of several pamphlets.

CALHOUN, Simeon Howard: Born August 15, 1804, at Boston, Mass.; graduated at Williams College, 1829; studied theology with Dr. Griffin and Dr. Mark Hopkins; ordained in 1836; left the United States the following November for the Levant as an agent of the American Bible Society; received appointment as a missionary of the ABGFM in 1843; joined the Syrian mission in 1844 for the purpose of taking charge of the mission seminary at Aaihet, on Mount Lebanon. To this he devoted his entire life. By him were trained most of the preachers and teachers now employed in the Syrian mission of the PN, besides students engaged by other societies in Syria, Palestine, and Egypt. He was also pastor of the church on Mount Lebanon. He was thoroughly versed in the Arabic and Turkish languages, and assisted Dr. Goddell in his first translations of the Bible into Turkish. He prepared and published text-books in philosophy, astronomy, and theology. He visited the United States in 1847, returning to Syria in 1849; again in 1856, returning the same year. He made his final visit to the United States in impaired health in 1875, but addressed the General Assembly on the subject of missions with great power. Tbo he expressed the hope that he should rest on Mount Lebanon, he died in Buffalo, December 14, 1875. His wife and three children were with him.

Dr. Calhoun's influence in Syria was great among all classes. Natives, whether Moorish or Christian, often went to him for counsel. While in college Dr. Calhoun was a sceptic and an opposer of religious enterprises. After his conversion, in 1831, and up to the end of his life, he was noted for the ardor and the simplicity of his piety. His delight in the Scriptures was exceptional. Hence he was powerful in explaining them to others.

Station of the Base Missionary Society (1842), with 8 missionaries, 5 of whom are accompanied by their wives, 71 native workers, men and women, 6 outstations, 1 Sunday school, 5 village schools, 1 industrial school and 1,073 professing Christians. Also station of the Mission to Lepers in India and the East, with 1 home for the untainted children of lepers.

CALIQUOUB: A suburb of Cairo, Egypt; station of the Netherlands Society for the Extension of the Gospel in Egypt (1874), with 2 missionaries and their wives, 1 chapel, 1 Sunday school and 2 village schools.

CALLAO: A city on the coast of Peru, South America, which is an important seaport, although its population has latterly become reduced to 16,000. Station of the ME, with 1 missionary and his wife, 11 native workers, men and women, 2 Sunday schools, 3 village schools, 1 high school and 180 professing evangelical Christians.

CALMUCKS. See MONGOLS.

CALVERT, James: Born January 3, 1813. Died March 8, 1892. The birthplace of Mr. Calvert was Pickering, York, England; and after his early education at Malton, he was apprenticed for seven years to a printer, bookbinder and stationer. After his appointment by the Wesleyan Missionary Society he went to America in March, 1838, and Mr. and Mrs. Calvert embarked for Fiji, October of the same year, with John Hunt and T. J. Jagger as associates in their courageous work. During the following December they reached Lakemba, and six months later Mr. Calvert was in charge of a wide circuit, including thirteen towns, connected by no roads, besides twenty-four surrounding islands, some of which were over one hundred miles distant, with hardly a seaworthy canoe available by which to reach the savage inhabitants. He and Mrs. Calvert soon mastered the language, and they showed a remarkable tact, perseverance and courage in their work among the Fijians. A printing press was sent out with this missionary party, and Mr. Calvert's thorough knowledge of printing and book-binding was now of great use to him. Soon a vocabulary and a grammar in the Lakenham dialect were ready for use. This press was moved from one island to another, and from it were issued thousands of helpful papers, while in 1847 a complete and well bound New Testament was ready for the natives. On the island of Onoata the work accomplished good work; a church and school were established, and, encouraged by the king of Nayau, many of the inhabitants renounced their heathen worship and embraced Christianity. Some of these endured persecution, exile, torture, and even death rather than compromise their principles. The conversion of the daughter of the king had great influence among the natives. Mr. Calvert did much toward the abolition of killing and eating human beings, and on April 30, 1854, the chief ordered that the death drums he had erected be removed. He opened a bridge, revising the Old Testament translation for the British and Foreign Bible Society; but the death of the ablest worker at Fiji caused him to return to his former post, where his power for good was greater than ever. In 1865 Mr. Calvert was again in England; October, 1872, he went to the South African diamond fields, where he did effective missionary work. Mr. Calvert attended the Jubilee of Christianity in Fiji in 1883. At this time there was not an avowed heathen in all Fiji. He found over 1,300 churches, 10 white missionaries, 65 native missionaries, over 1,000 head teachers, nearly 30,000 church members, over 42,000 pupils in nearly 2,000 schools, and 104,580 church attendants, out of a population of 1,100,000. Through his personal service he saw this people abolish heathen customs and accept the true God.
CAMBODIA: A kingdom of farther Indis, under the protectorate of France, and forming a part of French Indo-China. It lies southeast of Siam, and includes principally the valley and delta of the Cambodia River, one of the most fertile regions of southeastern Asia. Area, 37,400 square miles. Population, 1,103,000, chiefly composed of several indigenous races, with about 40,000 Malays and 250,000 Chinese and Annamites. The chief towns are Phnom-Penh, the capital, and Kampong, the only market.

The early history is obscure. Toward the close of the 17th century the Annamese set apart the southern portion for Chinese who had fled from their own homes for political reasons, and were a source of disturbance to the government. This became Cochin-China. In 1877 the king of Cochin-China was converted to Christianity through French missionaries. With the aid of France he conquered Cambodia and Annam, combining all in the empire of Annam. He favored Christianity, and allowed the French missions many privileges. Under his successor, however, quarrels arose with France, which occupied Cochin-China and in 1863 established a protectorate over Cambodia. Roman Catholic Missions, only, operate in that region.

CAMPINAS: A city of Brazil, situated at an altitude of 2,300 feet, in the sugar growing district, 30 miles north of Sao Paulo. Population, 20,060. The climate is mild and semi-tropical.

Station of the ABCFM, with (1900) 1 missionary and his wife, 2 native workers, 3 outstations, 1 school and 57 church members. Station also of the SBC, with (1902) 1 missionary and his wife, 1 native worker, 1 theological class, and 27 church members.

CAMPOS: A town in the district of Rio de Janeiro, Brazil, about 150 miles northeast of the city. Station of the SBC (1890), with (1902) 1 missionary and his wife, 5 native workers, 10 outstations, 10 preaching places, and 702 professing evangelical Christians.

CANA: A settlement in Basutoland, about 10 miles north of the boundary of the Orange River Colony; station of the Paris Foreign Missions (1873), with (1901) 1 missionary and his wife, 1 native worker, 12 native workers, 9 outstations, 8 schools, and 723 communicants, with 386 candidates for admission.

CANADA: Baptist Missionary Societies of. See BAPTIST CONVENTIONS OF CANADA.

CANADA CONGREGATIONAL FOREIGN MISSIONARY SOCIETY: While the earlier efforts of the Congregational Churches of Canada were directed chiefly to home evangelization, a number of the stronger ones contributed to foreign missions through the LMS and the ABCFM, whose secretaries or agents appeared at the meetings of the Congregational Union, or preached by invitation in Montreal. Interest was also much excited in the foreign work by a visit, in 1870, of Rev. Dr. Mulens, Foreign Secretary of the LMS, and again, in 1874, when the first foreign missionaries, Rev. Charles Brooks and wife, went out, under the auspices of the ABCFM, to Constantinople. But it was not until 1881 that the claims of the heathen world upon the Canadian churches were sufficiently felt to lead to the organization of a separate Foreign Missionary Society. This society, while largely indebted to the ABCFM for advice in regard to the choice of its field, and working mainly through its channels, is yet entirely independent of the older society, holding its annual meeting at the same time and place as the Congregational Union of Ontario and Quebec, and being wholly subject to the control of its own board of directors. For the first three years it contributed through the ABCFM toward the support of the Canadian Foreign missionaries already in the field, viz., Rev. C. H. Brooks and wife, in Constantinople, the Rev. George Allechin, in Japan, and Miss Macallum, in Smyrna. But in 1884 Mr. W. T. Currie, a graduate of the Congregational College of Canada, having applied to the Society for appointment to foreign service, was accepted, and assigned, under advice of the ABCFM, to a new mission station in Bailunda, in West Central Africa, which was henceforth to be recognized as the Canadian Mission. Mr. Currie having been duly ordained and set apart to his work, sailed with his bride for Africa in June, 1886, but they had scarcely reached the station to which he had been appointed before she sickened and died. A memorial of her has since been erected in the form of a mission schoolhouse, known as the "Clara Wilkes Currie School," for which the necessary funds were collected by the Canadian Woman's Board. Mr. Currie afterward commenced a new station at Chisamba, and Mr. Wilberforce Lee, another alumnus of the same college as Mr. Currie, was ordained and sent out to assist him (1889). Others have since joined them and the station is recognized by the ABCFM as the special field of the Canadian Society.

There were (1902) 3 missionaries: with their wives and 3 female missionaries, 9 in all. There are important schools, with an attendance of 274, more than a third of them girls; a hospital, with 4 buildings. The general evangelistic work is very prosperous.

In addition to this work in Africa a number of missionaries have gone from Canada to other fields: Turkey, China, India and Japan.

The Canada Congregational Woman's Board of Missions was organized June 10, 1886, in the house of the pastor of the church in Ottawa, Ont. Its beginnings were not all but in response to circulars sent out by the president, Mrs. Macallum, requesting the churches to form auxiliaries, several existing societies sent in their adhesion, and a number of auxiliaries and mission bands were organized. The lamented death of Mrs. Currie greatly quickened the general interest in the mission to which she had given her life, and nearly one thousand dollars were promptly contributed for the erection of the school to her memory before referred to. Almost every church has now its auxiliary or mission band, many of them having both.

CANADA; Presbyterian Church in. See PRESBYTERIAN CHURCH IN CANADA.

CAWARRESE LANGUAGE: Belongs to the Dravidian family of languages and is spoken by about 9,500,000 people in S.W. India. Its alphabet somewhat resembles the Tamil. It is also called Kamarata.

CANDAVU. See TONGA ISLANDS.

CANDIA. See CRETE.

CANNANORE: A city on the coast of Malabar, S. W. India, situated about 50 miles northwest
of Calicut. It is a military post and it is remarkable for the number of its mosques, two of which are of special fame. Station of the Basel Missionary Society, 1,000 natives, 50 missionary, men and women, and 36 native workers. The work of the station covers evangelistic and educational work, and connected with it are 650 baptized Christians.

CANTON: Capital of Kwang-tung Province, China, on the north bank of the Pearl, or Canton, River. The site is the scene of a so-called uncle of Mohammed, with a Mohammedan burying ground and place of worship. The spring water can be obtained from the hills to the north of the city. The natives never drink water unboiled, and this custom has doubtless sprung from the little slight to the large ornamental hotel boat. These boats furnish to a great extent the means of communication. There are no horses used for that purpose, nor are the streets of the native city wide enough to permit the use of the cart of North China. The sedan chair is the only means of conveyance on land, and the facilities offered by the boats are largely utilized by the missionaries, whose residences, with few exceptions, are on the river front. Opposite the western suburbs, and separated from them by a canal, is a foreign settlement on ground made over a small island by surrounding it with a retaining wall, and filling in the space enclosed. Shamien, as it is called, is laid out in fine streets with overhanging trees, bordered by beautiful lawns, and covered with the fine residences of the European merchants. Shamien is one of the most beautiful European settlements in the East.

The people of Canton are the most highly civilized of China, and the luxury of the city is proverbial. The shrewdness and ability of the Cantonese as merchants has procured for them the nickname of the Yankees of China, and Canton men, or men from the Canton province, compose nearly the entire number of the immigrants to the various parts of the world where the Chinese are found.

The climate is more temperate than that of any other city in a like latitude. The heat in summer averages about 95°, and the minimum in winter is usually 42°. Ice rarely forms, and snow is almost never seen. April, May, and June are the rainy seasons, and July, August, and September are the months for the southwest monsoons, which, with frequent thunder-showers, mitigate the heat. During the fall and winter the northern monsoon blows, and clear weather is continuous.

Canton, according to native annals, has existed four thousand years, and traces of its existence have been found 1200 B.C. Its first intercourse with foreigners was in the 16th century with the Portuguese, and since then the history of Canton has been the history of China, as many important events in modern Chinese history occurred at, or were connected with, this city.

The Protestant missionary enterprises at Canton are many and important. The LMS made the city one of its earliest stations by sending the Rev. Robert Morrison there in 1807. It was followed by the PN in 1844, the SBC in 1845, and the Berlin Missionary Society in 1867. The other societies now operating in the city are the WMS, the ABCFM, the UB Women's Missionary Association, and the Scandinavian American Free Missions. These societies have in Canton and suburbs an aggregate of 58 missionaries, men and women, 196 native workers, men and women, 84 preaching places, 24 Sunday schools, 52 village schools, 4 high schools, 5 theological or other special training schools, 1 hospital, 4 dispensaries, and 1 printing house. The total number of professing Christians at Canton connected with these missions is 4,727.

CAPE COAST CASTLE: A town and fort of the Gold Coast Colony, West Africa. Until 1664 it was a Portuguese military station. Population, 10,000. The town is regularly built in a well-
wooded but poorly watered district, and has a damp, unhealthy climate. Station of the WMS, with 3 missionaries, 34 native workers, 4 common schools, and 1,240 professing Christians.

**CAPE COLONY:** A British possession comprising a strip of territory extending northward to the boundaries of German Southwest Africa, the Bechuanaland Protectorate, the Orange River Colony, Basutoland, and Natal. It has an ocean coast line of about 1,400 miles, and an area with dependencies of 229,000 square miles. The population is 1,527,224. No census was taken in 1901, but the population is estimated at 2,433,060, the European population numbering 376,987 for the whole territory. The dependent provinces are East Griqualand, having 15,197 square mile; Tembuland, 7,594; Transkei, 3,502, and Waibisch Bay, 430.

A mountain range, in general parallel with the coast, dividing the drainage of the streams flowing into the Orange River from that of the coastal streams, is reached from the ocean, about 100 miles distant, by a series of terraces, north of the range the country slopes gradually toward the Orange River. About two-thirds of the colony consists of arid plains (called Karroo) presenting many depressions, containing rich soil, which only requires irrigation to make it productive.

Included in the south temperate zone, the climate presents many varieties, but in its general character is mild and very salubrious; epidemics seldom prevail. The rainfall is unequally distributed. The base of the Lower Orange and Great Karroo plain and the Kalahari Desert receives occasional torrential downpours, but springs are rare. Wells are sunk and a system of irrigation resorted to. The flora is the richest in the world. Vineyards produce abundantly; cereals give a fair return. The forests are confined to the margins of the colony; one-third of the population is said to engage in stock breeding. There are about 10,000,000 sheep in the country. The wild animals have been largely driven north beyond the boundaries of the colony.

**People:** Malys were introduced by the Dutch as slaves, and are found chiefly in the seaports. The Griquas are half-castes, active, vigorous, enterprising and courageous, and superior to the aborigines in strength and stature, and number among them some of the best and some of the most desperate characters. Bushmen inhabit the western section of Cape Colony. They are remnants of the San races, are diminutive in stature, and have light, yellowish brown complexions, and are, perhaps, related to the Hottentots. They have made but little progress in civilization, and have no tribal organization. Scattered in various districts, they number, perhaps, 50,000 in South Africa. Hottentots, numerous in the western part of Cape Colony, amount to about 100,000. They resemble the Bushmen, except in stature and degree of culture. They occupy kraals, wear leather aprons and a sheepskin cloak. Tribal organization is preserved only among those beyond the boundaries of the European possessions.

By the census of 1891 there were in the Colony 732,047 Protestants, of whom 306,320 belonged to the Dutch Reformed communion, 139,058 to the Church of England, 37,102 were Presbyterians, 69,992 Independents, 106,132 Wesleyan, with Methodists, Lutherans, Moravians, Baptists and others. The Roman Catholics number 17,275, the Jews 3,009, Mohammedans 15,099. Fagan religions have still over 750,000 adherents. Government grants for the support of religious worship are being gradually withdrawn. Cape Colony having so many European residents, the missionary enterprise is being carried on by the local churches, as well as by the missionary societies from abroad. Of these missionary societies the following carry on work in the colony: The Moravians, LMS, SPG, PB, Berlin Missionary Society, Rheinish Missionary Society, Hannover Missionary Society, International Medical Association, Mildmay Mission to the Jews, National Baptist Convention (U. S. A.), African Methodist Episcopal Church (U. S. A.), Episcopcal Church of Scotland, Primitive Methodist Missionary Society and the Society of St. John. The whole number of places occupied as stations by these societies is 75.

**CAPE MOUNT:** A station of the American Protestant Episcopal Church in Liberia, West Africa (1877), with 5 missionaries, men and women, 1 native worker, 2 Sunday schools, and 8 communicants.

**CAPE PALMAS:** A district and town on the coast of Liberia, Africa. Seat of a missionary bishop of the PE, with schools and churches at Harper and Hoffman, on the Cape. Missionary circuit of the ME, with 7 missionaries, men and women, 12 native workers, 11 Sunday schools, 1 high school and 645 professing Christians.

**CAPE PRINCE OF WALES:** A settlement in the W. of Alaska, situated on Bering Strait; station of the American Missionary Association (1890), with 1 missionary and his wife, 2 native workers, man and woman, and 1 Sunday school.

**CAPE TOWN:** The capital of Cape Colony, S. Africa, situated at the foot of Table Mountain, on Table Bay. It was founded by the Dutch in 1651. It has a very fine harbor. The climate is moderate in temperature. Population (1891), 51,250. Station of the Moravians (1887), the South African Wesleyan Methodist Missionary Society, the National Baptist Convention, the International Medical Missions and Benevolent Association, the Salvation Army, and the PB, with an aggregate of 10 missionaries, men and women, 57 native workers, men and women, 25 places of worship, 22 Sunday schools, 18 common schools, 1 orphanage, 1 hospital, 1 dispensary, 1 medical training class, 3 young people's societies, and 2,971 professing Christians. The BFBS also has an agency and a Bible depot here.

**CAPE HAITIEN:** A seaport in the northern part of the island of Haiti. It is the second town for size in the Republic, with a population of about 25,000. It has a good harbor hemmed in by hills. Station of the Jamaica Baptist Missionary Society (1878), with 1 missionary and his wife and 48 professing Christians. The Wesleyan Western Annual Conference of the West Indies also has a missionary here. Also called Cape Hayti, or Cape Haytte.

**CARACAS:** The capital of Venezuela, S. Amer-
 Carey's first wish was to work in the interior of Asia Minor, where he has lost the use of their own language. Retaining, however, the Greek in their church service, they have taught the Greek alphabet to their school children, have used it for writing Turkish, and have brought into that language Greek theological and ecclesiastical terms. The effect has been to produce a dialect which is named from the district of Caraman, where it has been most largely used. See Turkish Language.

CAREY, William: Born Paulerspury, Northamptonshire, England, August 17, 1761. In boyhood he worked with his father, who was a weaver, but at the age of sixteen he was apprenticed to a shoemaker at Hackleton, working at the trade for twelve years. At the age of eighteen he was led through the influence of a pious fellow-souls to the faith in Christ, became an earnest Christian, and a preacher of the Gospel. In 1786 he became pastor of the Baptist Church at Moulton, having previously preached at Paulerspury, his early home, and at Barton. His income being too small for the support of his family, he kept school by day, made or cobbled shoes by night, and preached on Sunday. At Moulton he was deeply impressed with the idea of a mission to the heathen, and frequently conversed with ministers on its practicability and importance, and of his willingness to engage in it. Andrew Fuller, professor of Sanskrit, Bengali, and Marathi. This languages. He wrote articles on the natural history and botany of India for the Asiatic Society, consisting of grammars and dictionaries in the Sanskrit, Marathi, Bengali, and Telugu languages. He also prepared also numerous philological works, consisting of grammars and dictionaries in the Sanskrit, Marathi, Bengali, Punjabi and Telugu dialects. His Sanskrit dictionary was destroyed by fire in the printing establishment. He contrib-

THE ENCYCLOPEDIA OF MISSIONS

uted also several papers on grammar and East Indian matters to the Journal of the Geographical Society, in London. Carey had for years sought through Lord Wellesley the abolition of the suttee. In 1829 it was abolished, and the proclamation declaring it punishable as homicide was sent to Dr. Carey to be translated into Bengali. The order reached him as he was preparing for public worship on Sunday. Throwing off his black coat, he exclaimed: "If I delay an hour to translate and publish this, many a widow's life may be sacrificed." Resigning his pulpit to another, he completed with his pundit the translation by sunset.

Dr. Carey's work was now finished. After forty years of toil he passed away at the age of seventy-three, June 9, 1834. He was buried the next morning in the mission burying ground. He, who was ridiculed and satirized by the witty Sydney Smith in the Edinburgh Review of 1808 as the "consecrated ebbler" and "maniac," accomplished a work for which he is held, and will be forever held, in high honor as the true friend and benefactor of India.

CARISBROOK: A station of the Moravians in Jamaica, West Indies (1808), situated in the parish of St. Elizabeth in a somewhat hilly and pleasant part of the island. The station has 13 native workers, men and women, 3 places of worship, 3 Sunday schools, and 151 communicants.

CARISBROOK: A town of 1,700 inhabitants in Cape Colony, S. Africa, situated in a mountainous district about 325 miles N. E. of Cape Town. It is occupied as a station by the Rheinish Missionary Society. The working force consists of 1 missionary and his wife and 3 native workers. These serve as instructors to a body of 666 baptized Christians in the town and neighboring regions. They also maintain a school.

CARISBROOK: A town of 1,700 inhabitants in Cape Colony, S. Africa, situated in a mountainous district about 325 miles N. E. of Cape Town. It is occupied as a station by the Rheinish Missionary Society. The working force consists of 1 missionary and his wife and 3 native workers. These serve as instructors to a body of 666 baptized Christians in the town and neighboring regions. They also maintain a school.

CARLISLE: A station of the Moravian Missions (1887) in Western Alaska, near Fort Alexander. It now has 6 missionaries, men and women, 3 chapels, 1 common school, and 107 communicants.

CARMEL: A station of the Moravian Missions in the Pacific, northeast of New Guinea and west of the Marshall and Gilbert groups. A few of them differ from the great majority of the islands of Micronesia in that they are of basaltic formation, while the rest are coral reefs. Kusaie and Ponapi have mountains two to three thousand feet high. Yap is also one of the high islands. The climate is perpetual summer; the thermometer ranging from 72° to 90°. On the coral islands the chief products are the coconut palm, often growing to a height of 80 feet, the breadfruit tree, the pandanus tree or screw pine, bearing a juicy fruit, and an edible root called taro. On the high islands, especially Kusaie and Ponapi, there is a much larger range of products, including more than a dozen kinds of bananas. Various tropical fruits are introduced, and also some domestic animals, as pigs, chickens, and goats.

The inhabitants are of the brown Polynesian race, having straight hair. As no census has ever been taken, estimates of population vary greatly. Ponapi has a population of 5,000, the Mortlocks and Ruk about 14,000, Mokil and Pngelap about 1,250, Yap about 8,000 to 10,000.

The languages of different parts of the group are quite distinct but with affinities pointing to a common origin. They are not easily reduced to writing because of the shading of vowel sounds. This has been done, however, so that introduction of Christian ideas has meant resurrection to the language no less than new life to the people.

Spirits of ancestors and other spirits were worshiped, but no idols. The people were very superstitious, but had no conception of a Supreme God, and had no idea of sacrifice. Certain places regarded as the abode of spirits were not crossed. Some islands had priests, who in times of sickness and on special occasions practised their incantations, pretending to converse with the dead.

Missionary effort was begun on Ponapi and Kusaie in 1852 by the ABCFM. Twenty years later there were 250 church members on Ponapi and 226 on Kusaie. From the first a missionary spirit was cultivated in the converts, and when the evangelistic effort was to be pushed westward to other islands, native missionaries were the agents used, furnishing one of the most interesting chapters in missionary annals.

Political changes have hindered the progress of evangelization in these islands. Many of the islands have chiefs, whose authority is hereditary. On Ponapi there are several tribes, each having an independent king or chieftain. But in 1885 Spain laid claim to the whole group, as Germany had done to the Marshall Islands, and in the summer of 1888 took possession of Ponapi and later expelled the missionaries. In 1890 Germany purchased the Caroline Islands from Spain. In 1900 the missionaries returned to Ponapi. But these political changes have introduced to the people new types of white men, and the islanders have not been benefited by the acquaintance.

At present the force of workers consists of 24 missionaries, men and women (nine of them unmarried women), and 135 native workers of both sexes. The missionaries live upon Kusaie, Ruk and Ponapi, but their work takes in many other islands of this group. There are 57 stations, with 99 schools, 2 printing houses, 2 dispensaries and 5,500 communicants in the various churches.

CARTUM: See SYRIAC.

CARTAGO: A town of 8-10,000 inhabitants, 13 miles E. of San José, Costa Rica, Central America. It was founded in 1565 and is situated in a fine valley at the base of Mt. Irazu, an active volcano. Station of the Jamaica Baptist Missionary Society (1901), with 1 missionary.

CARTEN, Rev. Thomas H.: Was a Cornishman, born in 1850, and died in November, 1896. His boyhood was spent in the country of Durham, and when a very young man he entered the Christian ministry, pursuing a college course near his native place. In 1893 he united with the Free Methodist Church, and, after a brief stay at Oxford, he was appointed as missionary to Sierra Leone. After four consecutive years in a most unhealthy climate, he returned home in 1897; but soon after his return he learned of the great need of Christian work in East Africa, and without waiting for a formal appointment to this field, he entered it with characteristic zeal and enthusiasm. Here he labored for ten years.
He was a man of strong individuality, and while oftentimes acting independently of the Mission Board at home, he always commended himself by his faithful and untiring efforts. Seemingly in the midst of a useful career he closed his earthly labors in 1896.

**CASABLANCA**: A small seaport on the N. W. coast of Morocco, 56 miles S. W. of Rabat. Station of the NAM (1890), with a hospital in charge of 7 missionaries, men and women. The local name of the place is Dar al Beida.

**CASHEMIR.** See Kashmir.

**CASHERGODE**: A town on the coast of South Kanara, India, 28 miles south of Mangalore. Population, 6,400. Station of the Basel Missionary Society (1886), with (1902) 2 missionaries and their wives, 42 native workers, men and women, 103 communicants and 71 common schools with 727 pupils.

**CASTLETON**: A town in the island of Jamaica, W. I.; station of the CWBM, with 1 missionary and his wife, 1 common school, 1 Young People's Society and 430 baptized Christians.

**CATHERINA SOPHIA**: A village in Surinam, South America. Its climate is damp and rather unwholesome, the rainfall during the year averaging 79 inches. About the year 1849 the missionaries of the Moravian Church obtained permission to visit the plantations on the lower Saramacca. A work of itineracy was at once commenced, and the labors of the brethren were greatly blessed. The managers of the Catharina Sophia Plantation, which at that time belonged to the government, were kindly disposed toward the missionary and assisted him in every way. In 1855 the government offered to hand over to the Moravian Church authorities a chapel and a dwelling house for a missionary, which had been built by the Houg and brought from Houten to Surinam for the use of emigrants, most of whom had left the place. The offer was thankfully accepted, and the chapel was consecrated July 22, 1855. The congregation here consists of negroes, Chinese and East India coolies; there are now 1 missionary and his wife, 27 native workers, and 383 communicants.

**CATORCE**: A mining town in Mexico, situated at an altitude of 8,800 feet, 120 miles north of San Luis Potosi. Station of the AFFM (1898), with 1 missionary physician and his wife, 2 native women workers, 1 common school and 1 Young People's Society.

**CAVARDO**: A settlement in the northern part of Caspian, in Persia. Station of the South African Wesleyan Methodist Missionary Society, with 25 native workers, 6 places of worship, 2 common schools, 1 Young People's Society, and 383 baptized Christians. Also station of the Netherlands Missionary Society, with 2 missionary women and 1 common school.

**CAUCASIA**: A province of southeastern Russia, bounded on the north by the Caspian, on the east by Persia and Turkey, on the west by the Black Sea and the Sea of Azof. It is divided into two sections by the mountain range of the Caucasus, being called Northern Caucasus, and that on the south Trans-Caucasia. Area, North Caucasus, 86,658; Trans-Caucasia, 95,799; total, 182,457 square miles. The population in 1897 was 9,723,523. It is composed of very heterogeneous elements. The languages found in the Caucasus are numerous. The Russian government is making efforts to increase the use of the Russian language. Armenian and Azerbaijan Turkish are extensively used in the southern part of the region. As to religion many dissenters of the Russian (Greek) Church are found in Trans-Caucasia, which has been used as a place of exile for such. The Armenian Church has a large body of adherents there, and there is also a large Mohammedan population. There are small Protestant congregations at several points in the southern province.

**Mission work** has been attempted at various times in Trans-Caucasia by the Basel Missionary Society, the German Baptists and the missionaries of the ABCFM and PN, whose headquarters were in Persia and Trans-Caucasia. A work of itineracy was at once commenced, and the labors of the brethren were greatly blessed. The managers of the Catharina Sophia Plantation, which at that time belonged to the government, were kindly disposed toward the missionary and assisted him in every way. In 1855 the government offered to hand over to the Moravian Church authorities a chapel and a dwelling house for a missionary, which had been built by the Houg and brought from Houten to Surinam for the use of emigrants, most of whom had left the place. The offer was thankfully accepted, and the chapel was consecrated July 22, 1855. The congregation here consists of negroes, Chinese and East India coolies; there are now 1 missionary and his wife, 27 native workers, and 383 communicants.

**CAVANPUR**: A city in the United Provinces, India; entirely a British creation. It lies on the right bank of the Ganges, 130 miles above the junction of that stream with the Jumna. A body of English troops was stationed near this point something more than a hundred years ago, it being then on the frontier of the Indian territory. Around the camp, as its nucleus, a city sprang into being. It is now of great importance both as a railroad center and a manufacturing place; leather and cotton goods—especially the former—are produced here in large quantities. The chief historic interest centers about the memorial gardens, which occupy the site of the entrenchments within which a body of about 1,000 English (only 400 of whom were capable of bearing arms) took refuge from the native troops under Nana Sahib during the mutiny of 1857. The exact spot of the entrenchments is occupied by the memorial church; and the place of the well into which some 200 bodies were thrown, mostly women and children—the victims of Nana Sahib's massacre—is marked by a marble angel.
and a suitable inscription. Population (1901),
107,170, of whom about 125,000 are Hindus.

It is a station of the SPG (1839), with 22 mis-
sionaries, men and women, 46 native workers,
men and women, 10 common schools, 2 high
schools, 1 orphanage, 1 hospital and 2 hotels for
students. Also station of the Woman's Unions
Missionary Society of America (1879), with
3 missionary women, 29 native women workers,
11 common schools, 1 orphanage, and 1 training
school for women. Also station of the ME, with
4 missionaries, men and women, 20 native workers,
men and women, 18 common schools, 2 high
schools, and 430 professing Christians.

CAXIAS: A town in the province of Maranhão,
Brazil; station of the PS (1806), with 1 mis-
sionary and his wife, 2 native workers, a dispensary
and 37 church members.

CAYMAN BRAC: One of the Cayman Islands,
off the N.W. coast of Jamaica, W. I. It has a large
expert trade in coconuts. Station of the Ja-
maica Baptist Missionary Society (1887), with
1 missionary and his wife, 5 places of regular
worship, a Young People's Society, and 170 bap-
tized Christians.

CEBU: A town on the island of the same name
in the Philippine Islands, situated on the east
coast, and having considerable commercial im-
portance, being rated as the third port of the Philip-
ines and a center of the hemp trade. It is
well situated and destined to grow in the future.
Population, 11,000. The people are of the
Visayan stock and use a dialect peculiar to Cebu
and Bohol. Station of the PN (1902), with 2
missionaries and their wives and 1 preaching
place.

CEDARHALL: A station of the Moravian
Missions, in the western part of the island of Anti-
gua, W. I., established in 1822. At present
(1900) under care of 1 missionary and his wife,
with 14 native workers, men and women, 2 ele-
mentary schools, and 358 communicants.

CEDAR LAKE: A settlement in the territory
of Saskatchewan, Dominion of Canada; station of
the CMS, with 1 missionary, an elementary school
and 34 communicants.

CEDRAL: A village near Catorce in the state
of San Luis Potosí, Mexico; station of the Amer-
ican Friends Foreign Mission Association (1895).
The working force is 1 missionary and his wife,
1 missionary woman and 3 native workers, with
1 chapel, 2 Sunday schools, a Young People's
Society and 33 professing Christians.

CELEBES: An island of the Malay Archipelago,
under the control of the Dutch, situated east of
Borneo, and, like it, crossed by the equator.
Area, 71,152 square miles. The interior is elev-
ated and generally mountainous, the coast is
low and exceedingly rugged in its outline. The
island is well watered by small streams, and
contains several lakes. The population is esti-
mated at 1,500,000. They are true Malays for the
most part, Mohammedans in religion, and speak
the Bughi and Macassar languages, for which they
have two different written characters. The
Bughi are wild and savage in appearance, but
of a quiet and peaceable disposition. The abo-
rigines of North Celebes are classed with the sav-
age Malays, altho the civilizing influence of the
Dutch has greatly promoted their advance-
ment. They make obedient servants, are gentle
and industrious, and readily assume the manners
and habits of civilized life. The island was prob-
bably discovered in 1525 by the Portuguese. The
first intercourse with the Dutch was in 1607;
they expelled the Portuguese in 1660, and since
1677 both the tribes have been subject to them,
the Bughi, by far the most cultivated
lander of the archipelago, have frequently
endeavored to throw off the yoke of their masters.

Mission work in this island has been carried on
by the Netherlands Missionary Society for some
70 years. The district of Minahassa, where the
Dutch Government Mission of the 17th century
had made some converts, has been entirely
Christianized. There are about 150,000 Chris-
tians in the island, 35,000 of them being commu-
nicants. This whole district has now been given
up by the missionary Society, its Christian
institutions being supported by the Colonial
State Church as a government charge.

Meyer (A. B.), Die Minahassae und Celebes, Berlin, 1876;
Wallace (A. R.), The Malay Archipelago, London, 1873,
new ed., 1880.

CENTENARY: A station of the LMS (1897) in
Rhodesia, Africa, about 30 miles west of Bulu-
wayo, with (1901) 1 missionary, 2 native workers
and 2 elementary schools.

CENTRAL AFRICA PROTECTORATE. See NYASALAND.

CENTRAL PROVINCES of India: This chief
commissionership lies, as its name implies, at the
very heart of India. Its limits of north latitude
are 17° 50' and 24° 27'; of east longitude, 76°
and 85° 15'. Its greatest length is 600 miles,
from east to west, while its longest north and
south line measures 300 miles.

The population is chiefly (94 per cent.) rural.
Only six towns have a population exceeding
20,000. The most interesting fact regarding the
Central Provinces is that its hill and jungle regions,
especially along the northern frontier, provided
the refuge to which many of the aboriginal tribes
resorted when too severely pressed upon by the
later Aryan immigrants. These aboriginal tribes
were largely of the Gond stock, and before the
present political divisions came into existence
a large part of what is now known as the Central
Provinces was called, after the name of this
great family of tribes, Gondwan. Yet of the
entire population of the Central Provinces, these
aborigines form but a comparatively small
element, including both those who have embraced
Hinduism as well as those still persisting in the
old worship of their people; the last (1901) census
enumerated only 1,744,556. Hindus number
9,745,576, Mohammedans 307,202 and Jains
48,183. It is worthy of note that while in this
province Hindus, Mohammedans, Spirit Wor-
shippers, Jains, and Buddhists all fall off in
number in the decade 1891-1901, the Christians
increased in the same time from 13,305 to 25,591,
or 99 per cent.

The first mission was planted at Nagpur by the
Free Church of Scotland in 1844. The country
was then governed by a dynasty, and the native
rajah claimed to have absolute authority over
his subjects, which in his opinion involved the
right to prevent the baptism of Christian converts.

The supreme government of India was appealed
to by the missionaries, and declined to interfere;
but public opinion became so strong that the
Nagpur prince finally receded from his position.
The Church Missionary Society began work at
Jabalpur in 1854, and it has since occupied
other stations. The German Evangelical Synod (US), the Swedish National Missionary Society, the FFMA, and the ME also have important work in this province. Altogether 12 Protestant missionary societies occupy 28 stations in the Central Provinces, with 142 missionaries, men and women. In 1856 a colporteur, in a journey of 200 miles, entered many large villages and saw but two schools, with hardly 40 pupils. In 1901 the schools conducted in connection with these mission stations alone number 116 of all grades.

CERRITOS: A village near Guadalcazar, in the State of San Luis Potosi, Mexico; station of the Associate Reformed Presbyterian Church of the South (1901), with 2 missionaries (one a physician), 1 missionary's wife, and a dispensary.

CESAREA. See KAIΣARIYEH.

CEYLON. The island of Ceylon lies between 5° 53' and 9° 51' north latitude, and 79° 41' and 81° 55' east longitude. It is somewhat smaller than Ireland, being 270 miles long and 140 wide, and containing 25,353 square miles. The greatest portion of the island consists of great plains, for the most part heavily wooded. They occupy the northern half of the island and reach south on each side of the mountains, completely encircling them with a plain of from 30 to 70 miles width. As the extreme north is a group of small coral built islands commonly called the peninsula of Jaffna, which have an importance as one of the centers of population and of mission work. The southern central part is occupied by a group of mountains rising to the height of over 8,000 feet. Adam's Peak, the most prominent of these, 7,352 feet high, has on its top a mark said by Hindus to be a footprint of Siva; by Buddhists, of Buddha; by Mohammedans, of Adam.

The Climate is very hot on the coast, but cooler in the mountain region. Owing to the surrounding sea, the temperature is extremely uniform, and the climate is not considered unhealthful for Europeans. The seasons are two—a wet and a dry, whose time is governed by the two monsoons. The moist northwest monsoon blows from October to May, the southwest from May to October. The rainfall in the north and south is moderate, but in the mountain region, especially on the southwest slopes, it is large.

Ceylon is an English crown colony, ruled by a governor, aided by executive and legislative councils. Most of the higher officials are English, but the natives who are fitted for it are admitted to office.

The Singhalese are said to have emigrated from Oude in 543 B.C. A kingdom was founded, the Saxon Chronicles, were carefully kept. In 838 the Tamils, who had frequently invaded Ceylon, established a kingdom in Jaffna. In 1005 the Portuguese first visited Ceylon, and in 1518 acquired possession in it. In 1538 their territory was placed, so that the same worship is still practised. In recent years the Buddhist clergy of Ceylon have shown considerable energy in moving the people to resist the progress of evangelization. They have made special meetings and polemic address a feature of their enterprise, aided in this by western enemies of the Gospel doctrine. They have also issued tracts and undertaken to teach the children religious dogma.

Ceylon has been mission ground for nearly 400 years, and has been the victim of some of the most remarkable experiments in Christianization that the world can anywhere show. Its missionary history may be divided into three epochs, corresponding to the governments which held it: the Portuguese, the Dutch, and the English. Soon after the arrival of the Portuguese, Franciscan monks followed, and Colombo was made the seat of a bishopric. In 1544 St. Francis Xavier preached among the Tamil fishermen of Mannar, in the kingdom of Jaffna, and baptized between 500 and 600 of them.

Perhaps the chief means used by the Portuguese in Christianizing the Ceylonese is hinted at by the old historian, who says that many became Christians "for the sake of Portuguese gold." It is certain that bap-
tism was made the gate to preferment, and was regarded by the people as a political rather than a religious ceremony. To this day Catholic processes, which have a strange resemblance to those of Hinduism, are perpetuated in Ceylon.

With the conquest of the Dutch the palmy days of Roman Catholicism ended. The priests were banished, Roman Catholic rites forbidden on pain of death, and the people were commanded to attend religious ceremonies. To this day Catholic processions were made the gate to preferment, and were still held the beliefs practised the rites of their old religions.

In 1641, a religious ceremony was held in order to reach both Tamils and Singhalese. The ABCFM entered Ceylon, concentrating effort at Jaffna, when its missionary, Newell, was excluded from Bombay in 1813. The CMS mission for both Tamils and Singhalese was commenced in 1818 in Jaffna, in Kandy, and in Galle. The SPG took up work in Ceylon in 1838, laboring in connection with the Bishop of Colombo. In 1846 the Salvation Army established a mission in Ceylon, in Kandy, and in Galle. The WMS sent missionaries, 2 missionary women, 1 orphanage and a dispensary.

The conditions on which these Nestorians submitted to Rome included the recognition of the orders of their clergy, and the privilege of using their ancient liturgy. The secession was continued under the title of Patriarch of Coptic, but it soon ceased to be hereditary in the family of Mar Elias. The liturgy has been gradually modified in some respects, and is now in common use. The Chaldean Church is still a matter of wonder.

A good proportion of the churches support their own pastors and teachers. In Christian families there is a beautiful custom of taking a handful of rice from that to be prepared for each meal and setting it aside to be given to the Lord and it is not uncommon for a man to pledge a month's salary for some special object in the church.

In comparison with either Hinduism or Buddhism, Christianity still appears very weak. But its growth cannot be easily detected by the number of baptisms, for the majority of Christians are old converts, and have endured tests not less strong, in the daily influence of those about them. That so many of the Christians have, under these adverse circumstances, held their profession unspotted, is a matter almost of wonder.

The text is a historical account of the life and work of James Chalmers, a missionary in New Guinea. It describes his conversion, education, and missionary efforts, including his work with the natives, the establishment of schools and missions, and his role in the missionary society. The text also includes details about his life in New Guinea, such as his travels and the impact of his work on the native population.
beyond what usually falls to the lot of those who serve Him in mission fields, a man to whom was revealed the secret of touching men’s hearts.

Young Chamberlain first went to Brazil for his health. He had no idea of remaining, but was soon infected by Mr. Simonton’s enthusiasm, and returned home to prepare for his life work there. He entered Union Seminary, but the course was interrupted by the death of Simonton, and he hastened to Brazil. Tho the junior member of the mission, Simonton’s mantle fell naturally upon his shoulders. He gave himself to the work of winning Brazil for Christ with all the enthusiasm of an impetuous, ardent nature. Wife, children, friends, means, all the energy of his nature, were swept into the campaign.

The story of his life, when written, will make an inspiring book and will cover the essentials of the history of the Presbyterian Mission in Brazil. In Rio, São Paulo, Paraná, Bahia, Sergipe and parts of Míras he is the best known of American missionaries, and the indelible evidences of his work are found all over this vast area. He may be justly called the builder of churches and the father of schools.

Of great courage, matchless enthusiasm and tireless energy, he traversed the dangerous regions of the interior, on mule back, before the days of railways, and, tho repeatedly stoned, driven from the towns and threatened with death, he invariably returned and delivered the message, won hearts, and churches grew up in his wake. He was a peerless evangelist, pioneer and pathfinder.

**CHAMBERLAIN, John:** Sailed for India as a missionary of the English Baptist Missionary Society in May, 1802, reaching Serampur January 27, 1803. He had great aptitude for acquiring languages, and his progress in Bengali was so rapid that in a year he could speak it with an accuracy equal to that of any of the older missionaries. In January, 1804, he visited Seagur Island, where thousands were gathered at the annual religious festival. To these people he and his associates preached the Gospel and gave books and tracts. In the spring of this year he was stationed at Cutwa, 75 miles north of Calcutta. In reviewing his labors he says: "It is now five years since Providence fixed my lot here. Much of what he then held in hand he has turned and delivered the message, won hearts, and churches grew up in his wake. He was a peerless evangelist, pioneer and pathfinder.

**CHANDER:** A chief town of the Chanda district, Nagpur division, Central Provinces, India. It is surrounded by charming scenery, but is subject to malarial fever in the autumn. A celebrated fair is held here in April. Population, 16,200, of which number 14,600 are Hindus. Station of the Episcopal Church in Scotland (1898), with 2 missionaries, 5 native workers, an orphanage, and a hospital.

**CHANDA:** A village in the Kumaon district, United Provinces, India, situated among the lower spurs of the Himalayas not far from the boundaries of Kashmir. It has been the scene of the brave and effective work among lepers of Mary Reed, of the Methodist Episcopal Mission. A station of the Mission to Lepers in India and the East was opened here in 1883, and now has a chapel and a leper asylum.

**CHANDAU:** A city in the United Provinces, India, situated in the district of Moradabad, 40 miles W. of Bareilly. Population, 28,000, including 20,000 Hindus and 7,700 Mohammedans. Station of the ME (1881), with 16 native workers, 4 chapels, 16 Sunday schools, 16 elementary schools, a Young People’s Society and 446 professing Christians.

**CHANDBALI:** A town in Orissa, Bengal, India, 9 miles from the sea and 60 miles N. E. of Cuttack. The climate there is hot in summer, being tempered by sea breezes. The population is about 5,000, chiefly Hindus, with some Mohammedans. The Telugu language and the Bengali and Hindustani here come into rivalry with the Urdu. The General Convention of Free Baptists established a station here in 1888, and the present force of workers consists of 1 missionary and his wife, with 26 natives, men and women; 11 elementary schools are conducted in the town and its dependencies and a church of 25 members has been organized.

**CHANDKURI:** Station of the German Evangelical (Synod) Missionary Society (U. S.) in the Central Provinces, India, 25 miles S. W. of Bilaspur. The station has a force of 2 missionaries and their wives, with 24 native workers, men and women. There are 7 elementary schools, an orphanage, a dispensary, a book depot, 8 places of worship in the town and its vicinity, and the number of baptized Christians is 520. The Mission to Lepers in India and the East also has a station here, opened in 1896, and maintains a chapel, leper asylum and a home for the untainted children of lepers.

**CHANDPUR:** A town in the United Provinces, India, 37 miles east of Meerut. Population, 12,300, sixty per cent. being Mohammedans. Station of the New Zealand Baptist Missionary Society (1898), with 1 missionary physician and his wife, a missionary woman, 4 native workers, men and women, 1 elementary school and a hospital.

**CHANG-CHAU-FU:** A city in the province of Fo-kien, China, situated about 25 miles W. of Amoy, and possessing an important trade in silk and some iron works. Population, about 500,000. The LMS opened a station here in 1862, which is now occupied by 7 missionaries, men and women (one of them a physician), and 20 native workers, men and women. Connected with the station are a college, a hospital, 8 elementary schools, and a body of 351 professing Christians. The RCA also has a station here (1895), with 2 missionary women, 17 native workers, men and women, 2 elementary schools, a body of 14 places of worship in the city and surrounding regions. The number of professing Christians connected with the station is 812.

**CHANGOMBE:** One of the villages on the main
of Che-kiang, China, about 30 miles W. S. W. of town and its neighborhood are 5 preaching places, a dispensary, and 16 communicants. 

CHANG-KIA-KAU: A city lying 110 miles N. W. of Peking, China, and commonly called Kalgan. It lies at an altitude of 2,555 feet, and is an important depot of Russian trade. Population, 75,000. Station of the ABCFM (1865), with 5 missionaries, men and women, 15 native workers, 9 physicians, and 29 convinced Christians. 

CHANG-PU-HSIEN: A town in the province of Foo-kien, China, about 100 miles S. W. of Amoy; occupied as a station by the Presbyterian Church of England in 1874, and now having a force of 9 missionaries, men and women (of whom two are physicians), 20 churches, 15 preaching places, and there are 41 professing Christians. 

CHANG-Shan-hsien: A town in the province of Che-kiang, China, about 30 miles W. S. W. of Ku-chau-fu. Station of the CIM (1878), with a missionary and his wife, 1 missionary woman and 6 native workers, men and women. In the town and its neighborhood are 5 preaching places, and there are 41 professing Christians.

CHANG-Shu: 1. A village in the province of Kiang-si, China, situated near the Kan River, and occupied in 1895 as a station by the CIM. The present force is 1 missionary and his wife and 2 native workers. The number of baptized Christians is 10. 

2. A town in the southern part of the province of Kiang-su, China. The MES occupied it as a station in 1890 and now have there 1 missionary and 2 native workers, with 3 preaching places and a book depot. The number of professing Christians is 112.

CHANG-TE-FU: A city in the northern part of the province of China, Honan; occupied in 1896 as a missionary station by the Presbyterian Church in Canada. The force now working there consists of 9 missionaries, men and women (of whom two are physicians), and 5 native workers. Besides a chapel, they maintain a hospital and a dispensary. It is also a station of the Cumberland Presbyterian Missionary Board, with 5 missionaries, men and women, 1 native worker and a dispensary.

CHAO-CHAU-FU: A city of about 200,000 inhabitants in the province of Kwang-tung, China, situated about 20 miles north of Swatow. It is the prefectural city of an agricultural district, containing over ten million inhabitants; occupied as a mission central station by the Presbyterian Church of England in 1890. This mission now has there (1901) 2 missionaries (one a physician), 1 missionary's wife, 1 missionary woman, not married, 5 outstations, 1 hospital, 1 dispensary, 1 medical class. There is also a fine church building. The number of communicants reported from Chao-chau-fu jointly with Swatow is 2,140. Also a station of the ABMU (1894), with a missionary and his wife and 4 native workers, who have 3 places of worship in the district and 80 church members.

CHAO-CHENG: A town in the province of Shan-si, China, situated 30 miles N. N. E. of Ping-yang-fu. Station of the CIM (1901), with 2 missionaries.

CHAO-TUNG-FU: A city in the N. E. part of the province of Yunnan, China, which has important lead and silver mines. Population, about 50,000. Station of the Bible Christian Missionary Society (1888), with 4 missionaries, men and women, a native worker, an elementary school and a dispensary.

CHAO-YANG-HSIEN: A town in the northern part of China beyond the great wall and near the western border of Manchuria, lying about 120 miles N. W. of New-chwang. It was occupied as a station by the LMS in 1871, and was transferred to the PCI, the LMS having decided to withdraw from Mongolia. A school has been opened and the number of church members is 217.

CHARLOTTENBURG: A station of the Moravian Missions (1835) in Surinam, South America, and was the first plantation opened to the Moravians for the preaching of the Gospel, fifty years after the missionaries began their labors in Surinam. It lies on a curve of the river Commewyne, about 50 miles E. of Paramaribo. The banks of the stream are lined with fresh, green woods, among which here and there pretty hamlets may be seen. At present the missionary force consists of 1 missionary and his wife, with 12 native workers, men and women. There is a school and a school and the number of communicants is 255.

CHAU-KIA-KAU: A town in the province of Ho-nan, China, about 30 miles west of Chen-chau-fu. Station of the CIM (1884), with a force of 12 missionaries, men and women (one of whom is a physician), and 14 native workers, men and women. In the town and its neighborhood there are 9 preaching centers and 290 communicants.

CHAVAKACHERI: A town in the southern part of the Jaffna Peninsula, Ceylon, situated 11 miles E. of the town of Jaffna. Station of the ABCFM (1834), temporarily vacant and under care of missionaries at Udupitti. It has (1900) 69 native workers, men and women, 26 elementary schools and a dispensary. The number of church members is 285.

CHEFOO. See Chi-fu.

CHEMULPO: The most important of the treaty ports of Korea. The climate is temperate. It has about 2,000 foreign residents, most of whom are Japanese. Station of the ME, with 1 missionary and his wife, 5 native workers, 15 chapels, 2 elementary schools, 1 theological class, 10 Sunday schools and 1,081 professing Christians. Station also of the SPG (1890), with 2 missionaries, 1 native worker, 1 elementary school and 10 communicants.

CHENCHAUFU: A city and district head-quarters in the eastern part of the province of Ho-nan, China. Station of the CIM (1895), with (1900) 1 missionary and his wife, 3 missionary women (of whom one is a physician), 2 native workers, 1 chapel and 23 professing Christians.

CHENGALPAT: Railway junction and chief town of the district of the same name; situated 25 miles S. W. of Madras, India. Population, 6,200, mostly Hindus. Station of the ME with 1 missionary and his wife, 1 missionary woman, 62 native workers, men and women, 20 elementary schools, 3 high schools, a YMCA and 125 church members. Also station of the Leipzig Missionary Society (1893), with 2 missionaries, 1 missionary's wife, 6 native workers, 4 chapels,
CHENG-KU-HSIEN: A town in the province of Shen-si, China; situated about 15 miles west by northwest of Peking. Station of the CIM (1899) 2 missionaries, one of them married, 7 native workers, 3 preaching places, 1 school, a dispensary and 87 professing Christians.

CHENG-TU-FU: Capital of the province of Szechwan, China. It is one of the finest cities in China, situated in the middle of a fertile and well-watered plain, surrounded by graceful hills. The people are reputed to be among the most polished in the empire. Population (1887) estimated at 800,000. Station of the CIM (1881), with 3 missionaries (two of them married), 9 native workers, men and women, 6 chapels, 3 elementary schools and 251 communicants. Also station of the Methodist Church in Canada (1891), with 5 missionaries (one a physician), 2 chapels, 1 elementary school, 1 high school, a hospital, a dispensary, a printing house, 2 book depots and 17 communicants. Also station of the Woman's Missionary Society of the Methodist Church in Canada (1892), with 8 missionary women (two of them physicians), 1 high school, 1 orphanage, a dispensary and a hospital. Also station of the ME, with 3 missionaries and their wives, 5 native workers, men and women, 2 chapels, 4 elementary schools, 1 high school and 64 professing Christians.

CHENG-YANG-KWAN: A town in the province of Ngan-hwei, China; station of the CIM (1887), with (1900) 3 missionaries, 2 native workers, and 1 chapel.

CHEN-KIANG-FU: A city in the province of Kwang-su, China; situated about 40 miles west of Nang-King on the right bank of the Yangtse River. Population (1901) 140,000. The place is a commercial center of importance. Its climate is damp, subject to sudden changes of temperature, but not unhealthful. Station of the ME, with (1901) 1 missionary and his wife, 4 missionary women (two of them medical), 2 native workers, 2 preaching places, 1 elementary and 1 high school and 79 professing Christians. Also station of the PS (1883), with (1901) 3 missionaries and their wives, 4 preaching places, 2 outstations. Also station of the CIM (1883), with 5 missionaries (two of them physicians), 1 native worker, 1 chapel, a hospital, and 11 communicants. Station also of the SBC, with (1902) 3 missionaries (one of them a physician), 2 wives of missionaries, 2 women missionaries, 3 native workers, 3 chapels, 3 schools and 35 church members. Station of the National Bible Society and also has a station here under care of agent who supervises a depot and 25 native workers. In the missionary and commercial reports the name is written Chinkiang.

CHEN-YUEN-HSIEN: Town in the province of Kan-su, China, about 35 miles N. E. of Pingliang-fu. Station of the CIM (1897), with (1900) 3 wives missionaries, 3 native workers, 1 chapel, 1 high school and 1 refuge for opium eaters.

CHERIBON: A seaport on the north coast of Java, 125 miles east southeast of Batavia. It is the residence of a Dutch governor and a place of considerable trade. Population, 52,000, including about 800 Europeans. Station of the Netherlands Missionary Society (1865), with 1 missionary and 59 communicants.

CHERRA PUNJI: A village in the Khasia Hills, Assam, India, lying 28 miles S. W. of Shillong, at an altitude of 4,455 feet. The rainfall here is the heaviest known, the mean annual amount being 474 inches. The population is somewhat over 5,000. Station of the Welsh Calvinistic Methodist Missionary Society, with 1 missionary and his wife, 25 native workers, men and women, 16 elementary schools, 1 theological seminary, 22 preaching stations, 14 Sunday schools and 492 church members.

CHESTER, Rev. Edward, M.D.: Born in New York City, July 12, 1828; graduated from Union Theological Seminary in 1857 and entered upon his work in the Madura Mission, India, under the ABCFM in the spring of 1859. He spent nearly forty-two years on the foreign field, and in pursuance of the duties of a faithful missionary of the Cross, his influence as an educator and a physician was deeply felt throughout the region of his labors. Altho before leaving America he prepared himself for medical practice in India, he spent a year at Madras studying fever and disease peculiar to the tropics, at the hospital, infirmaries and dispensaries of the presidency capital. When he was put in charge of the Madura hospital and dispensary, he completely transformed the methods of these institutions and the mission, and the patients increased from 3,100 to 51,000 annually. To these thousands the Gospel was daily preached, and a leaflet, which served also as a dispensary ticket, was given, containing the ten commandments, the Lord's Prayer and a brief statement of saving truth. Dr. Chester established the local missionary dispensary and medical service, and through his consecrated energy the district of Madura was better provided with a medical service for combating epidemics and common tropical diseases than any other district of South India. In addition to his extensive medical work, Dr. Chester, during all of these years, had charge of a mission district, with a large number of pastors, preachers, teachers and Bible women under his supervision, and also a number of schools and separate classes received his personal attention. He laid down his burden and entered into rest at Dindigul, March 26, 1892.

CHEUNG MAI: A city in the Laos country of Siam, 300 miles N. by W. of Bangkok. Charmingly situated among hills on the Mah Ping River. Population, 100,000. Station of the PN (1897), with (1901) 16 missionaries, men and women (one of them a physician), 4 native workers, 7 elementary schools, 2 high schools, 1 theological school, a hospital, 2 dispensaries, a printing house and 1,906 church members.

CHEUNG RAI: A city in the Laos country, Siam, about 100 miles N. E. of Cheung Mai. Station of the PN (1897), for some years known in the reports as Cheung Hau. The force occupying it (1901) consists of 2 missionaries (one of them a physician) and their wives, with 1 native worker. There are in this field 1 elementary school, 1 hospital, a dispensary, a Young People's Society and 312 church members. The field is nearly 200 miles long from north to south and nearly as wide from east to west. Within its limits are three organized churches.

CHINHWARA: Chief town of a district in the Nerbudda division, Central Provinces, India. It is situated on a well-watered table land, 64 miles N. E. of Nagpur. The population is about...
9,000, two-thirds of the people being Indian. It was occupied as a station by the Swedish Missionary Society in 1853. The present force there consists of 8 missionaries, men and women (one a physician), and 16 native workers, men and women. The various enterprises of the station are 3 elementary schools, an orphanage, a dispensary and theological school, besides the usual preaching services. There are 83 professing Christians connected with the station. It is also a circuit of the ME, with 3 native workers and 97 professing Christians.

CHIANG-JU: A town in Korea, 55 miles S. E. of Seoul; station of the PS (1896), with 7 missionaries, men and women (one a physician), 3 preaching places and 10 communicants.

CHIANG-HAU: Town on the west coast of the island of Formosa, about 5 miles S. W. of Taichu. Station of the PCE (1889), with (1901) 2 missionaries (one a physician), 1 dispensary, 1 hospital and 23 preaching places (in district). The communicants connected with the central stations of Tainan and Chiang Hoa jointly are 2,190. (The Chiang Hoa field is spoken of by the missionaries as the Taichu field very frequently.)

CHICACOLE: A town in the district of Ganjam, Madras, India; situated on the Navagalli River, 10 miles from the sea. Population (1891) 18,200, almost all Hindus. The BMP opened a station here in 1878, which now has 1 missionary and his wife, 2 women missionaries, 8 native workers, men and women, 1 high school, a hospital, a book depot and 45 church members. The name is also written Cicacole.

CHI-CHAU-FU: A city in the province of Ngan-hwei, China, situated on the right bank of the Yangtse River. Station of the CIM, with a missionary and his wife, 2 missionary women, 4 native workers, an elementary school and 21 professing Christians.

CHICHOLI: Town in the Narbada division, Central Provinces, India; station of the Episcopalian Church in Scotland (1894), with (1900) 2 missionaries and their wives, 1 missionary woman, 4 native workers, an elementary school and 21 communicants.

CHI-CHOW. See KI-CHAU.

CHIENG-TOONG. See KENG-TUNG.

CHI-FU: A city and seaport in the province of Shan-tung, China. It is a commercial center for goods of foreign manufacture. The population is about 120,000. The climate is more agreeable to Europeans than that of any other open port in China, and the place is visited as a sanitarium by foreign residents in the south of the empire. It was occupied as a station by the PN in 1862, which now has a force of 9 missionaries, men and women, 94 native workers, men and women (in the city and in 50 outstations); 7 churches, 40 preaching places, 4 high schools, a dispensary, and 1,445 communicants. It is also a station of the SPG (1874), with 2 missionaries and 1 missionary's wife; also station of the CIM (1879), with 39 missionaries, men and women (one a physician), 4 native workers, 1 chapel, 5 schools, a hospital, a dispensary and 50 professing Christians.

CHIHUAHUA: Capital of the State of Chihuahua, Mexico; situated at the base of the Sierra Madre Mountains, 225 miles south of El Paso, Tex.; founded in 1796. The climate is dry, mild and healthful. It is a center for mining and gold and silver mining, and quite a number of citizens of the United States reside there. It was occupied as a station by the ABCFM in 1882, and the force now there is 1 missionary and his wife, 2 missionary women and 8 native workers, men and women. There are 2 elementary schools, a high school, a book depot, 17 outstations, 2 young people's societies, and 291 communicants. Station also of the Woman's Board of the MES (1890), with 3 missionary women.

CHIKALDA: A village in the district of Ellicipur, Berar, India; situated 43 miles N. W. of Amraoti, in the midst of beautiful scenery, at an altitude of 3,056 feet. Population about 5,000. Station of the Kurku India Missions (1894), with (1901) 3 missionary women, 1 native worker, 1 orphanage, and 1 school, with industrial department.

CHIKAULAFUP: Town in the Kolar district of Mysore, India, situated 36 miles N. E. of Bangalore. Population about 11,500. Station of the ABCFM (1897), with (1901) 1 missionary physician and his wife, 2 native workers, 1 elementary school, 4 preaching places and 1 dispensary.

CHILAMBARAM: Town in South Arcot, Madras, India, situated 21 miles S. by W. of Cuddalore. Its temples to Siva are held in great reverence in S. India and Ceylon. Population, 18,600, of whom 17,000 are Hindus. Station of the Leipzig Missionary Society (1866), with (1900) 1 missionary and his wife, 15 native workers, 10 preaching places, 9 elementary and 1 high school, and 847 baptized Christians.

CHILDREN'S SPECIAL SERVICE MISSION (1868): The aim of this organization is to supplement the work of the Church, Sunday school, and home among children by its various publications, evangelistic services, and the Scripture Union, which was organized in 1879. Open air services are held, and by means of caravan and tent workers go from village to village, holding services and distributing Christian literature among the children. A Foreign Fund is used for the issue of such literature in 51 different languages, which is freely given to missionaries of all denominations, and grants are made to anyone visiting foreign countries who will make use of them. The Scripture Union Fund pays for itself through the sale of its literature. Besides the publication of books, leaflets, etc., an illustrated penny monthly, Our Own Magazine, is issued, with a circulation of 120,000. Our Boys' Magazine is published, with special reference to school boys. The Scripture Union Fund supplies a Scripture Union Almanac and the monthly Letters, which are also translated into French, Dutch, Danish and Swedish, and issued in the Tamil monthly magazine. The greater part of the expenses for administration of the work of the mission is covered by the profits transferred to the General Fund, so that
contributions are used directly for the work. Income (1902), General Fund, £25,205 16s.; Foreign Fund, £799 2s.; Scripture Union Fund, £1,933 18s.

Headquarters, 13a Warwick Lane, Paternoster Row, London.

CHILE, Republic of: Lies on the western coast of the southern portion of South America, between the crest of the Andes and the ocean, from the Cape of Good Hope to the Horn. Its population is about 2,700,000, chiefly of Spanish descent, but including 50,000 Indians. The language is Spanish, and the religion of the state is Roman Catholic. Other religions are tolerated by law. The climate is that of the temperate zone, the temperature being modified, however, by the high mountains and by proximity to the sea.

While the Andes wall in Chile on the east, they are being pierced by a railroad which will soon open communication with the Argentine Republic. Mission work is carried on by the Presbyterian Church (North), the MS, and the SAMS. The last-named Society is gaining a hold upon the Araucanian Indians.

CHILLAN: Capital of the province of Nuble, Chile; situated about 70 miles N. W. of Concepción. Population (1901, estimated), 33,506. Station of the PN (1894), with (1901) 1 missionary and his wife, 1 native worker, 1 elementary school and 130 church members.

CHILPANCINGO: A town in the State of Guerrero, Mexico; situated about 65 miles N. E. of Acapulco, at an altitude of 4,800 feet. Station of the PN (1894), with (1901) 2 missionaries and their wives, 11 native workers, 3 schools, 8 outstations.

CHINA: By the name China is designated the possessions of the Chinese Empire in its widest sense, tho it is used more correctly and narrowly to name the eighteen provinces which constitute China proper. This immense country comprises one-third of Asia, one-tenth of the inhabited globe, and is divided politically into China proper, Manchuria, Mongolia, Chinese Turkestan and Tibet.

The eighteen provinces, and usually one only of the provinces of Manchuria (Sheng Ching) in addition, form that part of the empire which is distinctly known as China. The others are inhabited by Chinese. The area of China is variously estimated from 1,348,870 to 2,000,000 square miles, its western boundary is unsettled. Its greatest length in 1,474 miles and its breadth 1,355 miles. “It contains almost as much territory as is comprised in the states lying east of the Mississippi River, with the addition of Texas, Arkansas, Missouri, and Iowa.”

Physical Features: In the northeast is a great plain, and the remainder of China is divided into three basins, separated by mountain ranges which run from east to west, and drained by three great rivers and their tributaries. In general, all that part of the country lying west of the meridian of 113° is mountainous; from that line down to the coast, south of the Yangtse-kiang (kiang meaning river), is found hilly country alternating with the river valleys.

The Great Plain extends from the Great Wall north of Peking to the junction of the Yangtse River with the Poyang Lake, and is 700 miles in length. It has an average breadth of 200 miles north of latitude 35° north, and covers an area of 70,000 square miles; while in the parallel of the Yellow River it increases in breadth to 300 miles, until it reaches the Yangtse River, where it stretches 400 miles inland, covering 140,000 square miles in this single Province, making a total of 210,000 square miles. This basin supports a population of 177,000,000, and is more densely populated than any other part of the world of equal size.

Rivers: Of the many rivers which flow from west to east across China the principal ones are the Hwang Ho (Yellow River), the Yangtse-kiang (Yangtze River), and the Chu-kiang (Pearl River). The Yellow River is of very little use for navigation, owing to the great difference in its depth during summer and winter. On account of its habit of overflowing it has been justly called “China’s sorrow.” In a direct line its distance from source to mouth is 1,290 miles, but its numerous windings make its length double that distance.

The Yangtse River is deep and affords passage for ocean steamers for 200 miles from its mouth, and with the aid of modern engineering it would be possible for steam vessels to ascend 2,000 miles. Its basin is estimated at 548,000 square miles, and in the amount of water it discharges, the system of tributaries belonging to it, and the means of communication which it affords, it ranks with the great rivers of the world.

The Chu-kiang is formed at Canton by the union of the North, East, and West rivers, of which the latter is by far the largest. They drain the southwestern part of China, an area of 130,000 square miles, and, being intersected by numerous tributaries, form a perfect network of streams which afford the means of communication between the three southwestern provinces.

Lakes: There are few large lakes in China. Tung Ting Lake, in Hunan, is the largest one. In Kiangsi is found the picturesque Poyang Lake, having important fisheries. There are smaller lakes in Chili, Shantung, and Yunnan, which support aquatic populations.

Provinces: In the division of the provinces made a hundred years ago, eighteen provinces were defined. The cities in the different provinces have a suffix added to the name, which denotes the rank of the city and the grade of the district. These suffixes are fu, chou, and hsien, and in general may be rendered “department,” or prefecture, “primary district,” and “secondary district,” respectively.

Climate: The eighteen provinces occupy the same relative position on the continent of Asia as the United States occupy on the continent of North America, and the variations of temperature are similar. The average temperature of China is lower than that of any other country in the same latitude. The humidity, especially in the south, is relatively greater than countries in like latitudes, and, consequently, the heat is harder to bear. The excessive heat causes the prevalence of typhoons during July, August and September.

History: Chinese history may be divided into five periods: the Mythological, the Legendary, the Ancient, the Medieval, and the Modern.

1. The Mythological period comprises all the time antecedent to the accession of Fu Hsi, b.c. 2852, and native writers assign to it myriads of years. Pan Ku is described as having formed the world during this time. With chisel and
mallet he cut out the earth; the sun, moon, and stars are his works; his head became mountains; his breath, wind and clouds; his voice, thunder, from various parts of his body came fields, rivers, and trees, and finally from the insects on his body came man. After this Chinese creator divided the world in all for thousands of years, and to them are ascribed many of the inventions of the ancient time. 2. The Legendary period ends with the accession of Yu in 2205.

Eight monarchs in all reigned during this time, and the tales that are related of their prowess resemble the legends of other ancient nations. It was during this period, about the year 2200 B.C., that the Chinese settled around the bend of the Yellow River, and from this time on the records are more reliable, the legendary in places.

3. Under the division of Ancient History may be included the dynasties of the Chou, commencing with the Hsia and ending with the Eastern Han, in 221, six in all. Of these six dynasties the most important and the longest recorded in history was that of Chou, which commenced with Wu Wang in 1122 B.C. and lasted till 255 B.C. China was then a loose aggregation of feudal states, and the power of the emperor was often merely nominal. The originator of the Chou dynasty, who gave the name to China which it was known to the ancients, was the Napoleon of China. He divided his empire into thirty-six provinces, with governors over each. He also built the Great Wall, which stupendous work was completed in 204 B.C. after ten years of labor. If the wall made this emperor famous, his vanity made him infamous, for he wished to be considered the master of all the earth, and ordered the destruction of all books and records which antedated his reign, and slaughtered 500 of the literati. Many of the writings of Confucius and Mencius were thus destroyed, and many records were lost which might throw more light on the past. During the reign of the Emperor Hien Fung, the minority reign of Tung Chih, ended just as he was taking charge of the government, and he was succeeded by the present emperor, Kwang Hsu, who attained his majority in 1889. On September 22, 1898, however, an imperial edict transferred the direction of affairs to the Empress Dowager, who has since (1904) retained power. The following chronological table is taken from Williams' Middle Kingdom, and gives the accepted dates in Chinese history:

country. When they began to loot villages, burn churches, and destroy homes, the hoodlum element, with the prospect of gain, joined their ranks; and their influence over the superstitious and ignorant masses increased when it was announced that they possessed supernatural power. During the "Boxer Movement," 1899-1900, missionaries of the following societies suffered martyrdom:

To this list of missionary martyrs must be added the 16,000 native converts, very many of whom might have saved their lives and property by denying their Lord and renouncing their faith. The siege of Peking by the great Powers of the Occident and the events preceding and following this historic fact, seem to be blessings in disguise, and God is already making the work of man to praise Him. The following declaration, made by the Chinese Court after its defeat by the Western Powers, and relating to the establishment of a new Council of State, is not without significance:

"Where native methods come short, Western methods are to be used to supplement them. With a view to this the translations of foreign books are to be collected and compared, and our Ministers to Japan and other countries are to be called on for reports on the state and progress of those nations. For us the example of Japan is of special interest—not only as belonging to Asia, and, as a preliminary, sets aside such hampering distinctions as ancient and modern, native and foreign, but for having in a short time risen to a place of power and influence." In his analysis of the theory of the government of China, the emperor takes a name or style by which his reign is known; the present emperor is called Kwang Hsu, "Illustrious succession." He was born August 14, 1871, and began to reign in 1875. The theory of the government of China is the patriarchal; the emperor is the Son of Heaven and the father of his people. Beneath him the superior in age or rank has sway over the inferior ad infinitum. While the will of the Son of Heaven is supreme, and his power is said to be absolute, it is not unlimited, as one would think. He is bound by no constitution, no Magna Charta dictated by powerful barons limits his sway, but the accumulated force of centuries of tradition and law holds him to right and justice with an irresistible grasp. He must follow the behests of Heaven, or else the people will exercise the divine right of rebellion which they cling to, and which Confucius, and especially Mencius, defined with utmost boldness. When floods or famine, fire or pestilence come, the people look upon it as a judgment on the emperor, and he immediately offers sacrifices to heaven to appease its wrath. He is the high-priest of his people, and theoretically has their welfare at heart. Practically the people submit passively to his despotism, and rarely trouble themselves about the government in general, tho they may complain of the exactions of the local officers. Liberty is unknown. In the administration of the affairs of State the emperor is assisted by a Cabinet, a Council of State, and a number of boards. Under these boards are a multitude of officeholders. These officials are selected in accord-
The Chinese People: The people of China have lived for so many centuries in their river basins, separated from the rest of the world, that their origin is shrouded in the mists of tradition and legend. About 2200 B.C. tribes from Central Asia came across the desert and settled around the bend of the Yellow River in what is now Shan-si. Where these settlers came from is still a matter of conjecture. A recent discovery here indicates that they were emigrants from Babylonia. The presumptive proofs of this are in brief: Babylonia was a great agricultural country, and irrigation was everywhere to be seen; so in China; "The Middle Kingdom" was the name applied to it by its inhabitants, and in that language the native appellation of China is divided by native writers into ten periods, and the same is attributed to Babylonia; the Babylonians were great astronomers; so are the Chinese, and the method of computing time is similar in the two nations. More direct proof is adduced by the researches of Mr. C. T. Ball, who has been able to lay down a series of phonetic laws by which he has converted Accadian almost the entire Chinese dictionary. If this is the true origin of the Chinese people, it would explain what has hitherto been a mystery. Their language shows that at some time in the past they were a nomadic race, having their principal possessions in flocks and herds. This is also hinted at in their architecture; but as far back as records go, they are found to have been an agricultural race. The dwellers on the plains of Babylonia were descended from a parent stock who led a pastoral life in the mountainous country on the east. If, then, the Chinese are the descendants of the inhabitants of the plain, the references to a nomadic life in their language contain the remembrance of their earlier ancestors in the mountains.

In stature the majority of the Chinese are somewhat below the average height, especially the women; in the north of China the Manchu race is tall. In fine in appearance they have black hair and eyes, yellow complexions, and obliquely-set eyes. The men are noticeable for an absence of beards, a thin mustache or a peaked goatee being the most hair that is seen on their faces. They have great endurance and are a strong, sturdy race, with unusual physical force. They possess the power of application to work of unvarying monotony for long hours at a time, without wearying or displaying that nervousness which is seen in European races; absence of nerves is one of their principal characteristics. They have a wonderful vitality, which seems to be unaffected by such lack of sanitary conditions as would be sure death to an American. Their skulls are thick, and they do not seem to be affected much by the burning heat of the sun. In spite of their custom of marrying early and their excesses in vice, they are very productive. The women mature rapidly, and are mothers at the early age of thirteen and fourteen. There are no special diseases to which they are subject, but they are subject to consumption, skin diseases, and diseases of the eyes. They endure suffering so well, and recover so quickly from the shock and wounds of surgical operations, as to give credit to the theory that their nervous organization is not so highly developed or so sensitive as that of European races.

Qualities of the People: The Chinese are essentially an agricultural race. They are manual laborers, who possess industry, patience, and dogged determination in a great degree. While they are not as aggressive as the white races, they are not so highly developed or so sensitive as that of European races. · · ·

The Chinese are not aggressive, when aroused they are no mean foes, and when well officered, with men of daring and courage to lead the way, they will follow to the death with great stoicism. They work like automatons, and excel in manufactures which require the use of force. They have no regard for truth for its own sake, and are noted for mendacity, deceit, and indirectness in all things. They are wonderfully polite, but this same politeness leads to a disregard of truth from the desire to avoid unpleasant facts, and is often called "saving face," a word which conceals selfishness and conceit. They have great mental power, especially in memory, but are lacking in the imaginative and artistic tempers. Logic and reasoning they are well skilled in, and they have a sense of humor which is of a quiet kind. They are a slow, methodical, conservative, sad, philogmatic people, and do not show much emotion; this is due as much to education as to nature, for they are taught to repress their feelings. They are more sullen than quick-tempered, more underhand than treacherous. They are great travelers, and reverence their superiors to the extreme, but are arrogant and conceited when learned themselves. When their anger is aroused they are more likely to vent it in words and imprecations than in blows, and street fights offend the ears oftener than they break the bones. In general, they are the finest of the Asiatic races, and their habits of domesticity, reverence of parents, submission to constituted authority, quiet industry, frugality, and temperance make them worthy of respect. In their manufactures they show a lack of inventive skill, but they possess a wonderful amount of imitiveness. Attention to detail and laborious minuteness is characteristic of their works of art. They show very little interest in the condition of any who are without their immediate circle of relations, but within that circle all that concerns the individual is discussed and commented upon by the many ad nauseam. They have little idea of privacy, and lack refinement in matters pertaining to man's physical nature, and its needs and appetites. The laboring men are often (usually in the south) bare to the waist, but the women are modest in dress and behavior, keeping the entire body clothed, except among the poor peasantry, who labor in the field with the men.
Classes of Society: There is no caste in China, but there is a well-defined distinction between the classes—a distinction which is based on literary attainments and official position or on age. The old division of the people defined only four classes—the scholar, the farmer, the artisan, and the trader—and they ranked in the order named. The reverence which is paid to the scholar still exceeds that which is paid to the illiterate rich man. Filial duty is at the root of this division, and look after his family; the artisan is more often required to leave his home; and the necessities of a trading life impel the merchant to go to the city. Officials are distinguished from the common people by the dress which they are entitled to wear. The most noticeable feature of their dress is the button on the top of the hat. These buttons are of nine kinds, corresponding to the nine grades of rank. As the administration of the law is absolutely in the hands of the magistrates, we find no lawyers, in the Western acceptation of the term. The professions which spring from the invention of steam, the use of electricity, and improved machinery have, until recent years, been wanting. The various religious sects have their priests, but these do not have the contact with the common people and the influence on their daily life that the clergy do in Christian countries. Women are not respected. There are a number of the editorial profession. Doctors there are, but the science of medicine is yet in its infancy. The superstitions of China do not permit dissection, and their knowledge of anatomy is vague and ridiculous. The body is thought to be a mass of flesh supported on the framework of the bones, without that intimate connection of the joints and tendons. The circulation of the blood is unknown, so far as its continuous course is concerned. The seat of the breath is supposed to be in the stomach, and its continuous course is supposed to endure throughout the future world. Acupuncture has been practised among them for centuries, and massage and blood letting by cupping or by leeches are well known to them. Within recent years the government has recognized the advantages to be gained from Western medicinal knowledge, and has encouraged the study of it. Doctors taught by foreigners. The occupation of agriculture is considered an honorable profession. The soil of China is owned by those who till it. Manual labor along with the men; they are then small are girls esteemed that in some parts of China infanticide is not uncommon on account of poverty. The fact that the empire has been governed during the life of the present emperor by a woman is proof enough of the high position which woman can hold. The seclusion in which they are kept is not as absolute as in India, while it is a safeguard of the honor of the son, but the women are not lacking in mental power, but only require opportunity to develop it, is shown by the rapid progress made in study by the pupils in the mission schools. As a rule the girls are not exempt from the duties of the household, but the exceptions of literary women are recorded by Chinese writers. Among the poorer classes women work in the fields and do various kinds of manual labor along with the men; they are then on more of an equality with the men, and are not secluded from the world. Social Etiquette: Ceremonial observances in accordance with the strict laws of etiquette are reserved for formal or special occasions.
ordinary intercourse of the Chinese with each other is similar to that of other nations, with the exception of the difference due to the separation of the sexes. Introductions can be made by the parties themselves, one asking the other his "honorific surname," after which ensues a formal exchange of question and answer until the surname, age and condition, and in some cases, of each is brought out. Courtesy demands that refreshment be offered when calls are made, even to the teapot or cup of poor tea. Self-deprecation is characteristic of Chinese polite phrases, and exaggerated importance must be attached to all that concerns others.

Diet: When the seat of learning is assigned to the stomach, and an enlarged abdomen is the sign of a giant intellect, it may easily be understood that the Chinese are epicures. The poor live on rice or millet, with merely a relish of fish or vegetable; but the diet is more generous in direct proportion to the wealth of the person. Pork, poultry, and fish of all kinds abound. Fruit is found in abundance; no one with the money to procure it need suffer from lack of palatable food. Dogs, cats, and rats, while occasionally, in some parts of China, figuring as table dishes, are by no means in ordinary use or regarded with universal favor. Wine-drinking occurs mainly at feasts, and drinking wine apart from eating is not a native custom. Their wine is a liquor distilled from rice, like weak brandy. It is an intoxicating drink, but it is used sparingly, and drunken men are rarely seen. Tobacco is used almost universally, and by the women as well as the men.

Dress: The men wear a tunic and trousers, and for special dress a long gown of bright colors, and short topped boots over the trousers. Their costume is rich and varied in color; and silks, satins, furs, and fine woolen goods are the materials used. The Chinese costume has been adopted by missionaries when it is of advantage to escape conspicuousness, and it is comparatively inexpensive and comfortable. The dress of the women differs little from that of the men. An embroidered skirt is worn over the trousers; the tunic is longer and the gown is absent. Bound feet, caused by the early compression of the feet with long strips of cloth, is a native institution; it is associated with infanticide, but is not encouraged by the empress—a large-footed Manchu—but as a mark of social position it is hard to correct the custom, tho it is discouraged by the missionaries, and Christian sentiment is being educated against it. Within the past few years there has been a very strong effort made by the Chinese themselves to do away with foot-binding. Some of the strongest native writers have issued tracts against the custom, and societies, both established by missionaries and by non-Christians, have done much to discourage the custom.

Religion: There is no one system of religion which is believed in by the Chinese to such an extent as to dignify it exclusively as the religion of the people. They are liberal in matters of belief, but the influence of the three different systems of Confucianism, Taoism, and Buddhism. The proportion belonging to each is hard to estimate, for the prudent Chinese does in religious matters as a shrewd Yankee does in business ventures—takes a share in each—and if the three systems be regarded for single purposes as the counterparts of the life insurance companies of the present day, the motive of the Chinaman in taking out a policy in each and paying the premium will be readily recognized. Whichever of these religious creeds he professes, the worship that most appeals to his heart is Ancestor worship.

At the same time the superstition which most strongly sways him is Fung Shui, This Chinese term signifies "wind and water," and geomancy is its nearest English equivalent. It influenced the science, religion, and customs of the Chinese to a large extent, and is responsible for a majority of their superstitions. The way in which their welfare is influenced is not always understood by themselves, and the laws which govern the so-called science are hard to despise or detect. It was first systematized in the 12th century, and its influence has spread until it involves all the natural events and actions of life. It is founded upon the dual principle which pervades all nature, the male and female, the positive and the negative, the good and the bad. These must be kept in a state of equilibrium or else grave evil will result. The amount, position, and influence of each is determined by the geomancers, and houses must be built in accordance with Fung Shui, cities must be located, and especially roads and graves be so arranged as to favor or obstruct favorable positions, or the wrath of the dead will follow the living even as they return from the tomb. In obedience to its requirements, pagodas have been built to correct the proportion of high and low ground; streets are laid out crooked in deference to superstitions connected with it, and high buildings are few, unless of a public nature. As it now exists it is a gigantic system of extortion carried on by Buddhist and Taoist priests alike, who call to their help all of those means of influence and ingenuity that are found in the public nature. As it now exists it is a gigantic system of extortion carried on by Buddhist and Taoist priests alike, who call to their help all of those means of influence and ingenuity that are found in the public nature. As it now exists it is a gigantic system of extortion carried on by Buddhist and Taoist priests alike, who call to their help all of those means of influence and ingenuity that are found in the public nature.
dynasty. In the last three centuries they have lived solely in Kaifung, the capital of Honan. The Chinese name for them is Tiao-Chin-Chiao, "the sect that takes out the sinew." At present they do not number to a few hundred persons and are too poor to possess a synagogue.

The attitude of government toward Christianity and Christian missions has been, in the past, simple indifference. The Chinese authorities simply tolerate the missionary. At the same time, they are given him a certain time protection, which in Chinese is not supported by the government. Damage to missionary property is simply tolerated. At the same time, the refusal is due to the private whim of some subordinate official, in which he is not supported by the government. Damage to missionary property has been paid for when the matter has been brought to the attention of the high officials. It can easily happen that local feeling against the missionaries may be stirred up by violent men until the local authorities are unable to protect the foreigner, but such conduct is repudiated by the government, and the official is liable to punishment. When the treaties of 1858 were signed, the rights of missionaries were defined. In the American treaty it was stipulated that "those who quietly profess and teach these doctrines shall not be harassed or persecuted on account of their faith. Any person, whether citizen of the United States or Chinese convert, who, according to these tenets, peaceably teaches and practises the principles of Christianity, shall in no case be interfered with or molested." The Russian, the British, and the French treaties contain similar stipulations.

**Early Christian Missions in China:** There is no doubt that Christian truths were taught in China at an early period of the Christian era. The Chinese name for them is Tiao-Chin-Chiao, "the sect that takes out the sinew." At present they do not number to a few hundred persons and are too poor to possess a synagogue.

The attitude of government toward Christianity and Christian missions has been, in the past, simple indifference. The Chinese authorities simply tolerate the missionary. At the same time, they are given him a certain time protection, which in Chinese is not supported by the government. Damage to missionary property is simply tolerated. Any person, whether citizen of the United States or Chinese convert, who, according to these tenets, peaceably teaches and practises the principles of Christianity, shall in no case be interfered with or molested." The Russian, the British, and the French treaties contain similar stipulations.

The first authentic account of early missionary effort is given in the tablet which was discovered in Hsi-uyan-fu in 1625. The Nestorian missionaries who were established, and they numbered their converts by the thousands. At length, the priests mingled with different parties in affairs of State, and the various political intrigues with which they were concerned led to an edict against them in 1665, and Schaal, their principal man, was disgraced and degraded from the high offices he held, and died soon after of grief. The mission of Kang Hsi brought them again in favor, and by their knowledge of astronomy and surveying they were given important positions, and favor and toleration were shown to their missionary efforts. During periods of the 17th century strife arose among the Jesuits and Dominicans in regard to the attitude of the Church toward the worship of Confucius, deceased ancestors, and the worship of heaven. Innocent X. issued a decree in 1645 in which this worship was declared to be idolatrous and not to be tolerated. As the Jesuits had held that it was merely political in its nature, they strove to have this decree vitiated, and in 1656 Alexander VII. approved their course and decided that the rites were civil in their nature, and could be tolerated by the missionaries. The emperor of China at an early period of the Christian era.

**Early Protestant Missions:** The London Missionary Society very soon after its organization, in 1795, had its attention turned to China through the discovery in the British Museum of an ancient Chinese manuscript, but the East India Company, which had at Canton an important commercial center, was antagonistic to all missionary effort, and the Chinese themselves strongly objected to the coming of religious teachers. Twenty-one years later Ricci reached Peking and made a favorable impression on the court. From this time on Roman Catholicism was more or less successful in China. When the Manchus came in power the knowledge of astronomy which the former possessed enabled them to make a large number of the country's leading men, and their labors were aided by noble and influential friends. Churches were built, new missions were established, and they numbered their converts by the thousands. At length the priests mingled with different parties in affairs of State, and the various political intrigues with which they were concerned led to an edict against them in 1665, and Schaal, their principal man, was disgraced and degraded from the high offices he held, and died soon after of grief. The mission of Kang Hsi brought them again in favor, and by their knowledge of astronomy and surveying they were given important positions, and favor and toleration were shown to their missionary efforts. During periods of the 17th century strife arose among the Jesuits and Dominicans in regard to the attitude of the Church toward the worship of Confucius, deceased ancestors, and the worship of heaven. As the Jesuits had held that it was merely political in its nature, they strove to have this decree vitiated, and in 1656 Alexander VII. approved their course and decided that the rites were civil in their nature, and could be tolerated by the missionaries. The emperor of China at an early period of the Christian era.
with other English residents, to retire to Macao, which belonged to the Portuguese Government, and to some extent to make the Portuguese missionaries, and was one of the points of attack upon China, until China itself should be opened to the Gospel. Other places from which the missionaries found access to the strange people whom they wished to reach were Malacca, Batavia, Singapore, Amboyna, and Bangkok, where there were great numbers of Chinese emigrants, and the LMS, the ABMU, the ABCFM, and other societies, established missions among them in anticipation of the time when the door of entrance to the empire should be opened.

The first associate of Morrison, William Milne, arrived in Canton, July, 1813, and in the following year sailed for the Island Archipelago, taking with him a large number of New Testaments and tracts from Morrison’s press. He proceeded to Java and thence to Malacca, returning afterward to Canton, but finding it difficult to prosecute missionary labor there returned to Malacca, where he remained until his death in 1822. William H. Medhurst, the third missionary sent by the LMS to China, was in 1822 sent to reenforce the mission to the Chinese at Batavia, in Java.

In 1829 the American Board of Commissioners for Foreign Missions sent to Canton its first missionary to China, the Rev. E. C. Bridgman. Mr. Bridgman was accompanied by the Rev. David Abeel, who had been sent out by the American Seamen’s Friend Society, but who soon transferred his services to the ABCFM. They were received by Olyphant & Company, and a printing press was sent out for their use by the church in New York of which Mr. Olyphant was a member. In 1833, S. Wells Williams, then in his twentieth year, was sent out to take charge of it, and it remained at Canton until 1835, when it was removed to Macao, where Mr. Williams might have the benefit of the types of the East India Company’s presses.

In 1834 Dr. Peter Parker joined the mission, and his medical skill added a new factor of the highest value in removing prejudice and in winning the hearts of the people. The Medical Missionary Society, formed at Canton by the joint efforts of the missionaries and the large-class to reach, and are the most bitter opponents of Christianity; for they are so puffed up with their knowledge, and so firmly convinced that whatever is Confucian and according to tradition is right, that they will not listen to or heed the religious teachings of the foreigner. The Mohammedans are also hard to reach. — 3. Superstition. When every little event of life is bound up in some way or other with their multiple superstitions, the teachings of the Gospel are choked by these thorns of error. — 4. Ancestor Worship. By opposing the worship of parents, Christians are regarded as unfilial, and the doctrine which refuses the rites of worship to father and mother is viewed with dislike and scorn. — 5. Opium. This is so serious an obstacle to the evangelization of the Chinese people that some detail is necessary to make its gravity apparent. Previous to the 18th century opium was used in China only in small quantities as a medicine. Till 1767 the trade with India was through the Portuguese, who imported annually about 200 chests, each weighing 140 lbs. Even as late as 1830 a large city like Hanchau had no opium dens. Now it has 2,000. The rapid growth of the evil dates from 1773, when the East India Company entered on the business. In 1790, 4,054 chests were imported; in 1799, 5,000; in 1826, 9,969; in 1830, 16,800. In 1834 the East India Company closed its factory, but British officials continued the traffic, bringing 34,000 chests in 1836. After that piculs of 1334 lbs. each were substituted for chests, and in 1850, 52,925 piculs were imported, the number steadily increasing to 75,308 in 1880; in 1887 it reached 96,746 piculs, thus growing from 12 tons in 1767 to 5,312 tons in 1887. The value of the opium imported into China in 1901 was $23,199,500.

Up to 1860 opium was smuggled into China. In 1876 (because they could not take it on shore) it was stored on two vessels anchored near Macao, and hence taken in charge by Chinese smugglers. The Abbe Raynal (Tract 1., p. 424) writes

At the same time Mr. Abeel, of the ABCFM, and Rev. J. N. Boone, of the Protestant Episcopal Church, entered Amoy and the carved buildings for the Chinese on the mainland was fairly inaugurated. From this time on the number of missionary societies laboring in China rapidly increased. The opening of nine additional ports by the treaties of Tientsin increased the opportunities, and the travels of Dr. Gutzlaff aroused new interest, until nearly seventy societies are represented in that great empire.

**Obstacles to Missions:**

1. **Dislike of Foreigners**: The feeling is general that whatever is strange and different from the native is uncanny. For this reason the most common reply to the foreigner is jan kwei, which is usually rendered "foreign devil," but it does not mean devil so much as it does something that is weird, strange, uncanny, and therefore to be feared. The missionary is an object of suspicion on account of his appearance, his actions, and his speech. If he wanders along the hillsides for recreation, he is supposed to be searching into the mineral wealth of the hills with eyes that can see through the rocks. If he picks a flower, it is to be used for medicine or as a charm that he does not know. Everything is susceptible of some wrong interpretation.— 2. **The Conceit of the Literati**. It is a significant fact that, at the utmost very few Siu Ts'ai (B.A.) and Chu-jen (M.A.) have been known to profess Christianity. The literati form the most difficult class to reach, and are the most bitter opponents of Christianity; for they are so puffed up with their knowledge, and so firmly convinced that whatever is Confucian and according to tradition is right, that they will not listen to or heed the religious teachings of the foreigner. The Mohammedans are also hard to reach. — 3. Superstition. When every little event of life is bound up in some way or other with their multiple superstitions, the teachings of the Gospel are choked by these thorns of error. — 4. **Ancestor Worship**. By opposing the worship of parents, Christians are regarded as unfilial, and the doctrine which refuses the rites of worship to father and mother is viewed with dislike and scorn. — 5. **Opium**. This is so serious an obstacle to the evangelization of the Chinese people that some detail is necessary to make its gravity apparent. Previous to the 18th century opium was used in China only in small quantities as a medicine. Till 1767 the trade with India was through the Portuguese, who imported annually about 200 chests, each weighing 140 lbs. Even as late as 1830 a large city like Hanchau had no opium dens. Now it has 2,000. The rapid growth of the evil dates from 1773, when the East India Company entered on the business. In 1790, 4,054 chests were imported; in 1799, 5,000; in 1826, 9,969; in 1830, 16,800. In 1834 the East India Company closed its factory, but British officials continued the traffic, bringing 34,000 chests in 1836. After that piculs of 1334 lbs. each were substituted for chests, and in 1850, 52,925 piculs were imported, the number steadily increasing to 75,308 in 1880; in 1887 it reached 96,746 piculs, thus growing from 12 tons in 1767 to 5,312 tons in 1887. The value of the opium imported into China in 1901 was $23,199,500.

Up to 1860 opium was smuggled into China. In 1876 (because they could not take it on shore) it was stored on two vessels anchored near Macao, and hence taken in charge by Chinese smugglers. The Abbe Raynal (Tract 1., p. 424) writes...
in 1770: "The Chinese emperors have condemned to the flames every vessel that imports it." It was prohibited in 1796, 1799, 1809, 1820, 1835, and 1837, and always on moral grounds. In 1828 the Chinese Government deliberately prepared and armed the lorchas of the smugglers. In 1830 strangling was the penalty for selling the drug, and an offender was thus executed at Macao in 1832, in the presence of a crowd of foreigners. Still Chinese prohibition did not prohibit.

A crisis came in 1839. The imperial commissioner, Lin, wrote to Queen Victoria, imploring her to put an end to the traffic, and in twenty days committed to the flames 20,283 chests of opium, thus destroying $10,000,000 worth of the drug, which was British property. This brought on the war of 1840, and at its close, besides ceding the island of Hongkong, China paid $12,000,000 for the expenses of the war, besides the price of the opium. But when Sir Henry Pottinger demanded the legalization of the trade, the Emperor is said to have replied: "True, I cannot prevent the introduction of the poison, but nothing will induce me to raise a revenue from the vice and misery of my people." It would seem as tho a heathen monarch would have answered God in such words from a heathen monarch, and rallied to his help. This refusal held until, in 1857, a smuggler bearing the British flag was fired on by the Chinese authorities at Canton, and its crew were held as prisoners. The refusal of the Chinese to make any reparation for an act which violated the treaty was punished by the bombardment of Canton. France joined with England in the enterprise of securing respect for solemn treaties. The allies continued their advance toward Peking. The Emperor was forced to grant new facilities to foreign commerce, besides paying $10,800,000 to England and $6,000,000 to France as indemnity. But the effect of the new treaty was to legalize the opium trade by teaching the Chinese that their bungling and technically illegal interference with it could but be mishandled. After 1856 the Government made few efforts to discourage the cultivation of the poppy; for, if opium must be used, the missionary feared he would die, and told him, "Teacher, I have not time for my rice and opium, he chooses the last. If he has not money enough for both, he steals. He even sells his children into slavery, or his daughters to a life of shame, that his accursed appetite may be fed. Often wives are sold that the husband may have his opium. If he cannot get the drug, water flows from his eyes, his throat burns, his extremities are cold, and he dies in agony. One missionary reports that in three years he was called to attend thirty-six attempts at suicide caused by opium.

The opium habit has, furthermore, an indirect result in obstructing missions, because the Chinese who see its evil ascribe its prevalence to the slave-trade. Such testimony might be multiplied. The opium habit, encouraged by those members of a Christian nation who are interested in developing the revenues of India through poppy-culture, is a direct barrier to the progress of Christianity in China. How terribly true this is can be seen by noting the effects produced by the immense amount of opium consumed in China.

The opium smoker can be detected in a crowd by his hollow eyes, sunken cheeks, exaggerated frame, and sallow complexion. He needs three hours a day to inhale the drug, and then he cannot work more than two hours before he must repeat the dose. If he has not time for his rice and opium, he chooses the last. If he has no money enough for both, he steals. He even sells his children into slavery, or his daughters to a life of shame, that his accursed appetite may be fed. Often wives are sold to the husband may have his opium. If he cannot get the drug, water flows from his eyes, his throat burns, his extremities are cold, and he dies in agony. One missionary reports that in three years he was called to attend thirty-six attempts at suicide caused by opium.

The opium habit has, furthermore, an indirect result in obstructing missions, because the Chinese who see its evil ascribe its prevalence to Christendom, holding all foreigners alike responsible for the defeat of the attempts of the authorities to break up the trade. An opium-smoker came to a missionary from a distant city to be cured of the habit. Soon he became so sick that the missionary feared he would die, and told him so. He thought it all over, and said, "Teacher, I take the responsibility: live or die, do for me what you can;" and, by the blessing of God, on the means employed the poor wretch was brought back from the very gates of death. A Chinese is apt to be very obtuse respecting vicious practises. But as to the evil and degrading tendency of the opium habit, he is of one mind with the missionary, who would quite as soon receive to the Church a burglar as an opium smoker. The effect of this feeling upon the attitude of a considerable class of Chinese toward Christendom and its missionaries is illustrated by incidents like the following: A missionary in preaching happened to meet a man. "Yes," replied a respectable elderly man in the audience, "since you foreigners came, China has become hell."

The Protestant Mission now in China: We are indebted largely to Beach's Geography and Atlas of Protestant Missions for the information contained in the following summary statement concerning Protestant Missions in China:

The total number of Protestant missionaries laboring in China at the beginning of 1900 was 2,785. This number includes 610 ordained and
578 unordained men, 772 missionaries' wives and 825 other missionary women; and among these there are 162 male physicians and 79 women physicians. The number of native workers of both sexes was 6,385, and of these at least 1,700 natives were recognized as having learned the rudiments of a Western education, and by means of the Bible, the truths of the Gospel are imparted to them. The pupils are brought into closer association with the missionary work in the religious centers. The number of native teachers of medicine among the natives is not accurately known. The missionary societies laboring in the Empire, including the Societies of Scotland, the British and Foreign Bible Society, the American Bible Society, and the German General Mission Society, have established many medical institutions, including dispensaries and hospitals.

In our sense of the term, the highest education may not yet be imparted by the missionary universities, colleges and other such establishments, but practical education for Christian service through the schools is very important, and the faithful instruction that is being given in the theological schools serve an important purpose in the intellectual uplifting of the people and in the better equipment of the native teachers and preachers.

Literature: The Chinese are preeminently a literary people, and much attention has appropriately been given to literature in the Chinese missions. The preparation of educational works, the translation of the Bible, and the work on revised versions have been almost entirely the labors of missionaries; and through the mighty agency of the pen the coming of the Kingdom in the Middle Kingdom has been hastened.

Evangelism: Chapel services, street preaching, and house to house visitation at 635 stations and 2,476 outstations along the seacoast and through the inland provinces, have, as in apostolic times, proved to be divine means for the conversion of souls. The present outlook for the cause of Christ in China is most hopeful from every point of view.

The testing season of 1899 and 1900 has not been without its blessing both to the missionary and the native Christian. The heroism displayed by Christ's servants, the calm martyrdom suffered by the missionary of the cross and the counterpart from heathendom; the object lessons of unexpected strength and Christlike forgiveness before the enemies of the cross; and the providential care shown many in dire distress—all these evidences of the providence of God have moved many to toward clearing the track for the chariot of our King. China for Christ should be the watchword for this generation. Amen.

Taylor determined that the new undertaking must "aid all and injure none." The result was the adoption of certain principles which rule the CIM: (1) It was foreseen that to meet the vast needs of inland China all the volunteers obtained must work. A guaranteed salary would be required; nor was there felt any insuperable difficulty in working in the mission field with members of various denominations. The new work was therefore made interdenominational and international. (2) The workers have no guaranteed salary, but trust in the Lord for their support. (3) So far as possible, the whole cost of site, building, furnishing and removing having been supplied for this purpose, in answer to prayer, without cost to the mission.

Development: It is worth while here to note instances of the working of the third principle of the CIM. The needs of China were made known in a little book, *China's Spiritual Need and Claims*, as well as by public meetings, and volunteers were called for who should be willing to go to China with no guaranteed salary. In reliance on God to supply their needs in answer to prayer. Not long afterward the first missionary party was selected, and, as the time for their departure drew on, and the funds lacked, a daily prayer-meeting was commenced on February 6, 1866, to pray for from £1,500 to £2,000, as might be needful, to cover the cost of outfits, passages, etc. On March 21, that is after a month and six days, it was found that £1,974 5s. 11d. had been contributed in answer to daily prayer. Later on, a survey of the needs of the mission led its senior members on November 25, 1861, to flee prayer for seventy new workers in the years 1882-3-4. In the years 1882-3-4, seventy-six new members reached the field of the CIM. The proportions, however, of men and women were not those that had been asked for. The Lord of the harvest reversed the proportions, sending only thirty men and more than forty women, thus anticipating the remarkable and unexpected developments of women's work, which will be noted further on.

It need scarcely be said that, together with the prayer for seventy, the necessary funds to send them out were also asked from God. Special prayers were asked for these funds on January 31, or February 1, 1882. On February 2, an anonymous donation of £3,000 was received at the offices of the mission in London for this very object. On September 1, 1884, the same donor sent £1,000 for the same fund. The contributions from the commencement up to May 29, 1876, amounted to £51,918 11s. 2d., a sum which had covered all the needs and left a small balance of general funds with which to commence the second decade, besides £3,700 specially contributed for work in new provinces. These funds were without solicitation, in answer to prayer.

The second decade arrangements were made for the formation of a China Council of Senior missionaries to superintend the work in various provinces. The first session of this council (now meeting quarterly at Shanghai) took place in Ngan-king in November, 1866, and one of the most important issues of that session was the appeal for a hundred new workers for the CIM to come out in the following year. Prayer was made for them. The £10,000 necessary to cover the expenses of this movement were also asked from God, with the particular request that this might be specially given in large sums, and in addition to the ordinary income of the mission. The annual volume of *China's Millions* for 1888 contained as its frontispiece the photos of the hundred who left England in 1887; and the report of the annual meeting at London, England, April 1888, records that the income of the year 1887 had been raised from £22,000 to £33,700, of which £10,000 had been received in eleven contributions, varying from £500 to £2,500 in amount. Once more, in 1890, the newly erected premises at Shanghai, occupied for the CIM since 1890, when the mission council was formed, the whole cost of site, building, furnishing and removing having been supplied for this purpose, in answer to prayer, without cost to the mission.

One of the most noteworthy extensions of the second decade, and one fraught with far-reaching issues, was that of women's work in the interior of China. In January, 1876, when Miss Wilson, of Kendal, sailed at her own expense for China, there was only one unmarried CIM lady in the field. Miss E. Turner. A good many others followed Miss Wilson, and not only were stations opened for women's work in the interior of the nearer provinces, but within the short space of three years, from October, 1878 to December, 1881, women had been able to enter and settle in six of the inland provinces, besides bringing the Gospel to hundreds of women in Ho-nan and Hu-nan, where permanent residence was then unattainable. Only those who know the difficulties and trials of life in the heart of China and the dangers and hardships of long journeys in such a land can fully appreciate all that these facts mean; only those who have experienced continued loneliness, isolation and peril among the heathen, can know what these pioneer women endured; only those who, under such circumstances, have faced sickness, far from any medical aid, acute suffering, and even death itself, can understand what the sacrifice involved that was sealed by the first missionary graves in far-off Shen-si and Yun-nan. A far-reaching issue from the first session of the Mission Council at Shanghai was the formation of training homes for newly arrived missionaries, the preparation of a series of books to aid in the study of the Chinese language, and the drawing up of a course of study in six sections to be pursued until satisfactory examinations had been
superintendents of the work in the different provinces help and guide those who have less experience. Women’s Training Home.

The work whose development has thus been summarized has occupied nearly 40 years, for the embryo mission was organized in England in 1863, tho the first CIM party only reached Hanchau about the end of 1866. Each of the four decades has its own distinctive feature. In the first decade the mission struck its roots in China, and gained experience by opening and beginning to work stations in previously unoccupied districts of nearer provinces. The second decade was the one of widespread itineration and exploration of the more distant provinces, during which the first stations were opened in all the unoccupied provinces except Kiang-si. The third decade was marked by development and consolidation. Widespread itineration was exchanged for methodical visitation of small districts around established centers, in many of which churches were organized, and in others the fruit of the work was seen. During the fourth decade the mission has gone through the severe test of the riotous outbreak against the undertaking.

Organization: During the first six years the headquarters of the CIM was administered by W. T. Berger, Esq., who became the first Honorary Home Director of the Mission. Failing health compelling him to lay down the work, in 1872 the London Council of the CIM was formed, and for two or three years two of its members were as honorary secretaries, but the increasing needs of the work demanding additional help, a resident secretary was appointed, and further additions to the home staff have been made from time to time. This council meets weekly for the transaction of business. Auxiliary societies have been formed in different countries as the work has grown, cooperating with the London Council in the selection and training of candidates and receiving the voluntary offerings for the mission. These funds are remitted to the treasurer of the CIM, and there is promise of permanent and useful work, the probationers accepting as a junior missionary at the end of two years, and assisting one of the senior missionaries in his district. If at the end of five years he has done well, and has passed all his prescribed examinations, he becomes one of the senior missionaries, taking full responsibility for the work committed to him. Proving his capacity and renouncing it, and such of the younger workers as are placed under his supervision. Over a number of these districts a superintendent is appointed; he has probably been in the country from ten to twenty years. The senior missionaries can be called together when necessary to act as a council and confer with the superintendent about the whole work of his provincial district. All the superintendents are members of the general council of the mission in China. From the extent of the country it is not possible for the superintendent to meet together frequently, but a sufficient number of them are able to attend the quarterly meeting of the council to confer with the director and deputy director concerning matters that affect the whole work of the mission in China. The work of the mission being interdenominational, it is found helpful to cluster together workers whose views of church government sufficiently correspond to enable them to work happily together. When a number of natives have been converted, the time comes to organize a church, the senior missionary who is responsible for the conduct of the work is perfectly free and unfettered, and will organize the church according to his own conscientious convictions. When a church has once been formed on any definite lines, those who afterward superintend the work do so on condition of carrying it on as it was commenced. The mission embraces Episcopalians, Presbyterians, Congregationalists, Baptists, Methodists, and a few independent workers, all recognize each other as fellow-servants of the same Master, happily meet when occasion requires at the table of the Lord, and recognize each other’s converts, however or by whomsoever admitted to the privilege of church fellowship, provided they are walking consistently before God and their fellow-countrymen.

Missions: The Lammermuir party, consisting of Mr. Taylor, seventeen adults and four children, arrived in China in the fall of 1866, to find that the inland China was open for travel, it was not for residence. Efforts to obtain quarters in various cities and towns between Shanghai and Hanchau having failed, promises were finally secured in the latter city, and a fourth station was established in the province of Che-kiang; Ning-po, Shao-hsing and Fung-hua having previously been occupied. During 1867, three more

New workers on arrival in the field as probationers usually go to one of the training homes established by the mission. There, for about six months, they receive from European and native teachers careful instruction in the language, and are taught besides much that will be helpful to them as to the geography, government and etiquette of the country, the phases of religious thought, and the best method of communicating the Gospel to the people. Then they commonly proceed to some of the inland stations of the mission and continue their studies, assisting, as able, in the work, under the supervision of senior missionaries. A definite course of study is divided into six sections, and periodical examinations from time to time test the progress of the student. If his progress has been satisfactory, and there is promise of permanent and useful work, the probationer is accepted as a junior missionary at the end of two years, and assists one of the senior missionaries in his district. If at the end of five years he has done well, and has passed all his prescribed examinations, he becomes one of the senior missionaries, taking full responsibility for the work committed to him. Proving his capacity and renouncing it, and such of the younger workers as are placed under his supervision. Over a number of these districts a superintendent is appointed; he has probably been in the country from ten to twenty years. The senior missionaries can be called together when necessary to act as a council and confer with the superintendent about the whole work of his provincial district. All the superintendents are members of the general council of the mission in China. From the extent of the country it is not possible for the superintendent to meet together frequently, but a sufficient number of them are able to attend the quarterly meeting of the council to confer with the director and deputy director concerning matters that affect the whole work of the mission in China. The work of the mission being interdenominational, it is found helpful to cluster together workers whose views of church government sufficiently correspond to enable them to work happily together. When a number of natives have been converted, the time comes to organize a church, the senior missionary who is responsible for the conduct of the work is perfectly free and unfettered, and will organize the church according to his own conscientious convictions. When a church has once been formed on any definite lines, those who afterward superintend the work do so on condition of carrying it on as it was commenced. The mission embraces Episcopalians, Presbyterians, Congregationalists, Baptists, Methodists, and a few independent workers, all recognize each other as fellow-servants of the same Master, happily meet when occasion requires at the table of the Lord, and recognize each other’s converts, however or by whomsoever admitted to the privilege of church fellowship, provided they are walking consistently before God and their fellow-countrymen.

Missions: The Lammermuir party, consisting of Mr. Taylor, seventeen adults and four children, arrived in China in the fall of 1866, to find that the inland China was open for travel, it was not for residence. Efforts to obtain quarters in various cities and towns between Shanghai and Hanchau having failed, promises were finally secured in the latter city, and a fourth station was established in the province of Che-kiang; Ning-po, Shao-hsing and Fung-hua having previously been occupied. During 1867, three more
stations were opened in Che-kiang, and the first CIM station established in Kiang-su. Su-chau and Yang-chau were occupied in 1868 and additional stations gained in Che-kiang. In 1889 Ngn-king, the capital of the Ngn-lwai province, was occupied, and for many years the CIM was the only Protestant society in this field. The same year work was begun in Kiu-kiang, in the northern edge of Kiang-si, from which place over 100 towns and cities in the province of Kiang-si were reached by itinerations. No other province was reached till 1874, when Wu-chang, the capital of the Hu-pei province, was occupied with a view to entering the nine interior provinces, wholly untouched by Protestant missionaries. In 1875 a station was opened at Bhamo in Upper Burma, a site having been granted for this purpose by the King of Burma. The same year itinerating was begun in the province of Ho-nan, and about the same time a visit was made to the anti-foreign province of Hu-nan. By this time the CIM had 38 missionaries and 75 native helpers, occupying more than 50 stations and outstations; 28 of them went forward, and were already baptized Christians and inquirers in many other places, all the work heretofore had been largely pioneering. In 1876, the signing of the Chi-fu Convention enabled the CIM missionaries to visit remote provinces, and in this and the following year Shan-su, Shensi, Kan-su, Sze-chuan and Kwei-chau were occupied and Kwang-si visited. During the next few years a more thorough survey was made of the parts of China unoccupied or less occupied by missionaries. Thus information essential to future work was gained, portions of the Scripture and liturgies were distributed, and the Gospel was preached from the border of Korea to Ji-t'ang and Bat'ang in Eastern Tibet, and from K'en-su to Hai-nan. In 1897 extensive enlargements were made in the mission's schools at Chi-fu for the education of the children of missionaries and other foreign residents, and in 1898 a forward movement began, which was cut short by the Boxer uprising of 1900. In this terrible outbreak of fanaticism the CIM suffered heavier losses than any other society, fifty-eight of its missionaries suffering martyrdom. The mission's policy of refusing indemnity for loss of life and property called forth one of the most remarkable government proclamations ever issued in China, and has done not a little to secure the good will of the officials and people.

**Forces in the Field:** There are now (1903) 509 stations and outstations in 18 provinces, 763 missionaries, men and women; 541 native workers, and 9,000 communicants in the field of the CIM.

**Branches:**
- Australian Council (1830), Melbourne;
- Finland Auxiliary (1890), Helsinki;
- Hamburg Branch (1898), Hamburg, Germany;
- North American Council (1888), Philadelphia;
- Norwegian Branch (1890), Christiania; St. Christopher Branch (1895), Basel, Switzerland;
- Swedish Branch (1887), Stockholm.

**Associate Missions:** A number of independent organizations in various countries work in harmonious comradeship with the CIM, while not organically connected with it. These are:
- Finland: The Free Church Mission, Helsingfors, Finland;
- Norway: The China-Alliance Mission, Christiania, Norway; The Scandinavian Alliance Mission, Stockholm, Sweden;
- States of America: The Scandinavian Alliance Mission, Chicago.

**CHI-NA-N-FU.** See TSII-NAN-FU.

**CHINESE LANGUAGE, Mission to the.** See BLIND, MISSIONS TO.

**CHINESE LANGUAGE:** Belongs to the monosyllabic class of languages, and is considered by some to show affinity with the ancient Accadian of Babylonia. Whatever its origin, it is the oldest spoken language in existence, and, along with the Egyptian and cuneiform, the oldest written language. It is monosyllabic, without inflexion or agglutination; its nouns have no declensions, its verbs are not to be conjugated. A mythical personage, who is said to have flourished about the year 2700 B.C., is the reputed author of the characters. The earliest form of writing was similar to the Egyptian hieroglyphs, but in the main the structure of their characters is that of an ideogram. These characters are divided into six classes: 1. Imitative symbols; 2. Thought symbols; 3. Combined ideas; 4. Inverted significations; 5. Borrowed uses, and 6. Sound symbols, or phonetics. In general the characters are formed by the use of 214 radicals—some of these are simply strokes, but most of them are ideograms—combined with primitives, as they are called, which in reality are no older than the radicals, but denote simply the part of the character which is not a radical, or a combination of radicals. The number of characters given in Kanghi's Dictionary is 44,449, but the total of really different characters is much less, probably about 25,600, and for a good working knowledge of Chinese 10,000 will suffice. In the dictionaries the characters are found by looking up the radical; if there is more than one radical in the character the most prominent one is looked for first; then the number of strokes in the character, exclusive of the radical, is the guide to the place under its given radical where it may be found. The characters are the same throughout the four provinces, and one who can write Chinese can be understood by that means anywhere. In writing the language six forms of characters are met with in common use, the hand and fancy lettering are indulged in by printers and penmen in other countries. Of all these styles, the pattern style and the running style are the ones in most common use, and the foreign student may well be satisfied to master one—the pattern style. The Chinese language has no declensions, no conjugations, neither has it case endings, or a grammatical gender for nouns. This poverty of language is compensated for by the tones. The correct use of tones, and the ability to distinguish them when heard and to utter them correctly, is the hardest task in the acquisition of the language. Not only does the language become unintelligible when a wrong tone is used, but in Fu-chau, Amoy and Canton the misunderstanding may be very serious.

**Grammar:** As there are no case endings, position shows the case of the words. In general the subject stands first, then the verb or subjectifiers precede the word modified. Often the change of tone changes a noun to a verb. There...
are no articles; a man is spoken of as one man, and that takes the place of the. To form the plural of nouns a particle is added, as wo, "I; wo mun, "we;" or the noun is duplicated, yin, man; yin yin, all men. Moods and tenses are denoted by position and by the use of particles. The relation of persons is expressed especially in Chinese. The imperative, optative and potential moods are formed by the addition of the appropriate words. Pronouns are few and their use is avoided. In writing no distinction is made between a common and a proper noun, the often one line drawn alongside the character denotes the name of a person, and two lines that of a place. Capitalisation, which is exceptional, is produced by placing the character above the ordinary line level.

Dialects: There are in China numerous dialects, some of which are so different from the others and are spoken by so many people that they may well be termed languages. The principal dialects are:

1. The Mandarin, or court language. Pekingese is the standard of this tongue, which is spoken with more or less local variation in the north-eastern provinces. It is the Latin of China, as most learned men, and especially office-holders, are versed in it, and in all the provinces some are found who can converse in it.

2. The Cantonese. This is the standard for the province of Canton, tho there are several other dialects spoken in the Canton province. The Cantonese differs from the Pekingese in its idioms, in the multiplicity of its tones and in the number of consonantal endings.

3. The Amoy dialect differs still more from the Pekingese, and is also unintelligible to a Cantonese.

4. The Fu-chau dialect has much the same difficulties as the Amoy tongue, and is also different from the others. In addition to the principal dialects, there are variations of each and local patois in endless variety.

Book Language: A sharp distinction is drawn in Chinese between what is spoken and the same thoughts as written. The Chinese writer would express himself in the everyday language of the people would be considered ignorant of the first principles of composition. We find, therefore, a book style, Wen-li, which is terse, concise, at times obscure, and so lofty in its expression that when read aloud to the uneducated man it is not understood. It is understood by the scholar, whether he be a native of Peking or Canton. There is also a modification of the Wen-li called the Easy Wen-li, which, as its name implies, is not so concise and is more intelligible than the strictly classical Wen-li. The fact that this written language is intelligible throughout the Empire binds the people together and is an efficient aid to the dissemination of Christianity, as books can be distributed, read, and understood where the distributor may be perfectly helpless, owing to the difference in the spoken language. In many cases the Wen-li books have been translated into the different colloquial styles, and while they are sneered at by the literati as being fit only for women, they are read and understood by those who possess only a limited knowledge of characters and no great literary ability. In many cases these attempts have been made by the missionaries to Romanize the various dialects, with such success as to receive the endorsement of the Missionary Conferences.

Methods of study. The degree of difficulty in mastering the Chinese language depends, as in all other languages, upon individual ability. To learn the spoken language the best way is to go right among the people; what seems jargon may not be understood, but the tones are impressed on the ear, while a vocabulary will be acquired at the same time. Unless his destination is definitely settled, it is practically useless for the missionary volunteer to commence the study of the language before reaching his field; but if the destination is known, some of the books in that particular dialect, which have the English and Chinese side by side, will be found of use for the general idea of the structure of the language and the idioms. In studying the written language the best way is to take up the study of the character separately, in order to recognise its form and to distinguish between those which differ in minute details. Writing Chinese is best learned by using the Chinese method of copying the characters, by writing on thin paper over a copy. Chinese is written in perpendicular columns from right to left.

Those who know the Chinese language best, while recognizing its deficiencies, can truthfully say with Dr. Morrison that "Chinese fine writing darts upon the mind with a vivid flash, a force, and a beauty of which alphabetical language is incapable."

CHING-CHOW-FU (Shantung). See Ts'in-chau-fu.

CHI-KIANG. See Chen-Kiang-fu.

CHIOLE: A station of the Zambesi Industrial Mission, in Nyasaland, British Central Africa, situated about 100 miles N. W. of Blantyre. It has (1902) 2 missionaries, 1 missionary's wife, 1 woman missionary, 28 native workers, 10 elementary schools, 1 high school, with industrial department; 1 hospital, 1 dispensary and 169 communicants. By the use of native volunteers there is preaching in 40 neighboring villages every Sunday.

CHIPPWEYAN LANGUAGE: Belongs to the central group of the N. American family of languages. It is spoken by Indians of Athabasca, Canada. It is written with syllabic characters.

CHISAMBA: A station of the ABCFM in Angola, W. Africa, situated about 50 miles N. E. of Baljunda, with (1902) 3 missionaries (one a physician) and their wives, 3 missionary women, 8 native workers, 6 elementary schools, 1 high school, 1 industrial school, 1 dispensary and 50 church members.

CHITAPETTA: A town in the Godavari division, Madras, India, situated about 20 miles W. of Rajamahendri. Station of the PB, with 1 missionary and his wife and 2 missionary women.

CHITTAGONG: A town and seaport in Bengal, India, 212 miles east of Calcutta. It has considerable commercial importance. Climate, wet and unhealthy, diseases arising from impure water and imperfect drainage are very prevalent. Population (1891) 24,100, of whom nearly 75 per cent. are Musulmans. Mission station of the BMS (1881), with 2 missionaries and their wives, 5 native workers, a school and 87 professing Christians.
CHIVILCOY: A town in the Argentine Republic, South America; situated about 109 miles W. of Buenos Aires. Population, about 11,000, of whom many are Italians. It is on a missionary circuit of the ME, with 1 native worker, 1 place of worship and 74 professing Christians.

CHOLCHOL: A town in the province of Arauco, Station of the South American Missionary Society (1895), with (1900) 1 missionary and his wife, a hospital and a dispensary.

CHOMBALA: A town in Malabar, W. India, situated about 25 miles N. W. of Calicut. Station of the Basel Missionary Society (1849), with (1902) 2 missionaries and their wives, 35 native workers, 6 outstations, 5 common schools, 1 high school and 219 Christians.

CHOTA-NAGPUR (little Nagpur): One of the four great districts which make up the province of Bengal. It lies west of Bengal Proper; Behar adjoins it on the north and Orissa on the southeast. Its western boundary is the native State of Rewa, and on the southwest it touches the Central Provinces. Its area is 26,963 square miles, and its population (1901) 4,900,429. Of these a little over 3,850,000 are reckoned as Hindus and about a quarter of a million as Mohammedans. Aboriginal tribes furnish nearly 800,000 of the population, but many of those included religiously under the term “Hindus” are connected by race with these tribes, the members of which are continually adopting more and more of Hindu practise, and merging by degrees into the body of Hinduism. The tribes belong principally to the Kol and Santal families, who had no education and no writing until Christian missions came among them.

Missionary work was commenced in Chota-Nagpur in 1845 by the German Gossner Missionary Society. Its task was to carry light to those dark places of ignorance, to whom even Hinduism was somewhat of an advance beyond their ancient worship of demons. The mission enterprise had great success from the first. The SPG came into the field to take part in the work, and now the Christian movement seems to affect the people in mass, whole villages coming forward for instruction at once. The number of Christian Kols in Chota-Nagpur is about 80,000.

CHRISTIAN CHURCH; Mission Board of the: For many years the Christian denomination in the United States and Canada conducted its missionary operations under two separate organizations, as departments of the American Christian Convention, the ecclesiastical body of the denomination. The Foreign Mission Department was organized in 1886 and commenced work in Japan in 1887. More recently these separated bodies have been reorganized as one and incorporated under the above title.

The affairs of the Board are conducted by a Mission Board of nine (1903) members, elected quadrennially by the American Christian Convention and a Mission Council of five members, the Secretary of the Missionary Department of the Convention acting as President of the Board. There are also two Women’s Boards, one for Home and one for Foreign Missions, both auxiliary to the Mission Board.

The foreign work of the Board is in Japan and Porto Rico (so considered by the Board). In Japan two stations are occupied, Tokio and Sendai, and there are 18 outstations. There are 7 missionaries, 10 native workers, 7 organized churches, with 382 church members and 795 Sunday school scholars. In Porto Rico foreigners are at Ponce, with work at Salinas and 9 outstations; there are (1903) 4 missionaries, 1 native preacher, 1 organized church and 5 Sunday schools. The receipts for foreign work for the year closing October, 1902, were $10,329.40.

CHRISTIAN FAITH, Society for Advancing the: The Hon. Robert Boyle, distinguished for his learning and interest in the extension of Christianity, who was one of the promoters of the “Corporation for the Propagation of the Gospel in New England” (1649), and a prominent director of the East India Company, not only contributed largely to various missionary enterprises, especially in the line of education, but left a considerable sum in his will which formed the basis of a society organized after his death, in 1691, by his executors. This society, at first called the “Christian Faith Society,” afterward the “Society for Advancing the Christian Faith,” was designed for general charitable purposes, but the executors were directed to use the greater part for the “advancement of the Christian religion amongst infidels.” The funds have been well invested and cared for and the grants have been of great value, many undertakings having been fostered which without this aid would never have succeeded. For many years grants were made to William and Mary College, in Virginia, for the education of Indian youth. Then attention was turned to the negro slaves in the West Indies and to Mauritius and other dependencies of the British Government.

CHRISTIAN AND Missionary Alliance: I. History: In the summer of 1887 the Christian Alliance and the International Missionary Alliance were formed at Old Orchard, Me., “for the purpose of uniting in a purely fraternal alliance, members of evangelical churches who believe in the Lord Jesus as Savior, Sanctifier, Healer and coming Lord, and also of uniting their effort in the special aggressive work of world-wide evangelisation.”

The Christian Alliance was formed upon the special basis of this “Fourfold Gospel.” It is not an ecclesiastical body, does not organize distinct churches, but aims at spreading abroad the truths on which it is based. Its chief methods of work are through local conventions and its printed publications. An important branch of its work at home is the formation of Rescue Missions.

The International Missionary Alliance had for its object “the immediate evangelization of the whole world by sending missionaries to unoccupied and neglected fields.” The movement went on quietly and at the end of three years centers of work were established in India, Africa, China and Palestine. These two societies were united into the Christian and Missionary Alliance in 1897.

“The Christian Alliance formed the sustaining constituency of the missionary work, and the Missionary Alliance was the natural outlet of
the faith, love and activity of the Christian Alliance.”

II. Organization: A central board of managers meets regularly for the transaction of business and has the oversight of the entire work. It consists of 24 members, elected triennially, one-third retiring every year.

The officers include a President, General Secretary, Superintendent of the Home Field, Superintendent of Missions, Treasurer, Financial Secretary and "various other executive officers." Auxiliaries and branches are formed under a strong State or District Superintendent in charge of the field, while in each locality there are local branches under the care of a Committee and Superintendent as far as possible. The work is promoted by means of numerous conventions held in all parts of the country, the largest being at Old Orchard, Me.; Nyack, N. Y., and New York City. The work is sustained through voluntary contributions.

III. Institutional Work: The Gospel Tabernacle, New York City, is an independent church, incorporated by special charter under the laws of the State of New York, and directly connected with the Alliance, organized in 1881. The New York Missionary Training Institute, founded in 1882, in connection with the Gospel Tabernacle, removed, in 1897, to South Nyack, N. Y. It is a coeducational school for the training of young men and women, who, with little or no education, consider themselves called of God to missionary work. Special attention is paid to the equipment of foreign missionaries and securing their adaptability to their various fields of labor.

The Beulah Park Summer School is maintained from June to September, the course of study being similar to that of the Nyack Institute.

The Berachah Home, established in 1884 for the purpose of offering a place of rest and instruction with reference to physical and spiritual life, with particular attention to divine healing, which is a principal tenet of the Christian Alliance, is now located at Nyack, N. Y., while the house in New York is continued as the "Alliance Home."

IV. Missions:

(1). Palestine: A station was established at Jeru­sa­lem in 1890 by Miss Lucy Dunn, who for a year carried on evangelistic work among the Jews. Reenforcements were sent out and Jaffa was occupied and the work extended to the Arab tribes near the town. In 1895 the station is at Akola, in the Berar Province, with a State or District Superintendent in charge of the field, while in each locality there are local branches under the care of a Committee and Superintendent as far as possible. The work is promoted by means of numerous conventions held in all parts of the country, the largest being at Old Orchard, Me.; Nyack, N. Y., and New York City. The work is sustained through voluntary contributions.

The Berachah Home, established in 1884 for the purpose of offering a place of rest and instruction with reference to physical and spiritual life, with particular attention to divine healing, which is a principal tenet of the Christian Alliance, is now located at Nyack, N. Y., while the house in New York is continued as the "Alliance Home."

The Berachah Home, established in 1884 for the purpose of offering a place of rest and instruction with reference to physical and spiritual life, with particular attention to divine healing, which is a principal tenet of the Christian Alliance, is now located at Nyack, N. Y., while the house in New York is continued as the "Alliance Home."

(2). India: There are four principal centers of work with headquarters at Bombay. The oldest station is at Akola, in the Berar Province, where the CA took up the "Faith Mission" established in 1886 by the Rev. M. B. Fuller; there are now 8 stations and 25 workers; Khandesh has 4 stations and 8 workers; Gujarat, 5 stations and 20 workers.

The work consists of preaching services, evangelistic tours, and house to house visitation. Schools, orphanages and widows' homes have been established and churches organized. There are (1902) 22 stations and 53 missionaries.

(3). China: The first station was opened at Wu-hu, in Central China, in 1890. Now there are 8 stations in and around Wu-hu, 1 at Wu-chang. In 1897 a station was established in Hunan and in 1899 Nan-lung-h'sien was occupied and a training school for women opened. Western China was occupied in 1896, and has 4 stations, one being within the borders of Tibet. In 1899 the Tibet station was destroyed by a mob, but was again opened. The Swedish China and Mongolia Mission was opened in 1893 at Kwei-h'wa as headquarters. This mission forms a chain of stations near the great Chinese wall from Kalgan in the east, several hundred miles westward in North China, and includes the Mongolian Mission, with headquarters at Kalgan City. The North China Mission has in Peking the strongest part of its work among women. Evangelistic work is carried on, and schools have been established.

At Tientsin work has been begun among the English-speaking Chinese, and a native church of young men has been organized; a missionary society has been formed, which supports native workers in all the provinces of China and in foreign lands. South China was entered in 1892, with Canton as headquarters. Two years later Macao was occupied. In 1895 the first station opened was in a humble village across the river from what is now Tung-tsun station. In 1896 Lo-tung was occupied, and the following year stations were established at Wu-chow and Kwal-peng. In 1898 Nan-wing was occupied and a ladies' station opened at Tung-un. Village and girls' schools have been established and a training school opened.

There are (1902) 18 stations and 41 missionaries.

(4). Africa; Sudan Mission: There are 5 stations: Freetown, the capital of the British Colony of Sierra Leone; Magbele, in the same colony, 55 miles inland; Roe Bethel, in the same colony, 20 miles farther inland; Makomp, also in Sierra Leone, 125 miles inland, and Tubabudugo, 225 miles inland, among the Kuranko tribe on the N. E. border of the colony. The Kuranko people have been evangelized to a great extent from the last station and portions of the Scriptures have been translated into their language. Village and school work is carried on and a systematic itineracy established, which includes about 40 towns.

Congo: There are 4 principal stations and 3 outstations. Boma, the receiving and transport station, has many coast people, and services are held in English, while a school is established for their children. The other three stations are also on the lower Congo. School and station work is carried on by the natives under instruction, and evangelistic and medical work by the missionaries.

There are (1902) 11 stations and 39 missionaries.

(5). South America: The headquarters for the CA work are in Argentina, with its 4,000,000 people. Other stations are in Caracas, Venezuela, where native agents are employed in the outgoing districts. Brazil has 1 station and 1 missionary; Chile, 2 stations and 4 missionaries; 2 stations are in Ecuador, where the Roman Catholic influence is very corrupt. In Bolivia, a single missionary is making evangelistic tours throughout the country. The principal work in all the Alliance missions is evangelistic. Books, papers and tracts are sold and distributed.

There are in South America (1903) 6 stations and 18 missionaries.
The members of the editorial staff are supported by the missionary societies which they represent.

**CHRISTIAN LITERATURE SOCIETY FOR INDIA (formerly Christian Vernacular Education Society for India, 1858):** The need of evangelical literature for the converts in the missions of India, Ceylon and Burma led to the founding of this Society in 1858. Its object is to train native teachers, instruct heathen children and publish Christian literature, the latter being its principal work. The publications of the Society fall under two heads: school books and general Christian literature.

They have in the various languages 264 school books cataloged, some of which are so widely used that there is a steady demand for over 50,000 copies each, annually, these being used in the schools of over forty missionary societies. In supplying these school books the Society not only puts the thin edge of the Christian wedge into the secular schools of India, but receives from sale of the books a considerable profit which helps in the other branches of its work. For many years the Society has published annually, in the various languages of India, more books than all other societies put together. Since its foundation, the Society has issued in eighteen languages 2,601 publications averaging 131 pages, and of these, 26,417,000 copies have been circulated, and for some years the output has steadily increased.

In 1859 the Madras Auxiliary was organized, and no one man has had so much to do with the development of a Christian literature for all classes of people as its veteran secretary, John Murdoch, LL.D. In 1860 a second auxiliary was organized in Ceylon and a woman's auxiliary in 1896. There are (1901) 3 stations and 27 outstations, 5 missionaries and 89 native helpers, 1 high school, with 89 students, 135 day schools, with 8,110 pupils.

**CHRISTIAN MISSIONS, England (1827):** The mission work of the denomination commonly known as Plymouth Brethren, but in its own preference called simply "The Brethren," was begun in 1827, the main object being "to spread the Gospel and build up churches." Missions have been established in Europe as well as in non-Christian mission fields as follows: (1903)

**Europe:** Belgium, 2 stations and 4 missionaries; France, 3 stations and 5 missionaries; Austria, 1 station and 2 missionaries; Rumania, 1 station and 4 missionaries; Spain, 17 stations and 51 missionaries; Italy, 5 stations and 11 missionaries.

**Asia:** India (1836), 21 stations and 74 missionaries; Straits Settlements (1866) and Malayan Peninsula (1890), 6 stations and 57 missionaries; Laos (1868), 1 station and 2 missionaries; Borneo, 1 station and 2 missionaries; China (1889), 14 stations and 55 missionaries; Japan (1888), 1 station and 2 missionaries.

**Africa:** Algeria, 4 stations and 10 missionaries; Morocco, 1 station and 2 missionaries; Central Africa (1881), 7 stations and 39 missionaries; South Africa, 2 stations and 4 missionaries.

**America:** Mexico (1890), 2 stations and 4 missionaries; British Guiana, 3 stations and 15 missionaries; West Indies, 4 stations and 10 missionaries; Guatemala, 1 station and 2 missionaries; Venezuela, 2 stations and 3 missionaries; Equa-
Christiansborg Church Missionary

THE ENCYCLOPEDIA OF MISSIONS

dor, 2 stations and 3 missionaries; Argentina, 4 stations and 16 missionaries; Chinese in U. S. A., 1 station and 2 missionaries.

One of the best known branches of the Christian Missions is the Garenganze Mission in Central Africa, which was established as an independent work by Mr. F. S. Arnot in 1881, and subsequently taken over by the Brethren.

Interested in Africa through the words of Livingston, when very young, a strong desire to go to Africa became a realization in 1851, when he sailed from London with Donald Graham. The latter remained at Natal because of failing health, but Mr. Arnot proceeded to Maritzburg.

After years of hard travel through the Zambesi and Barotse districts, finding locations suitable for Europeans, he established several stations.

Other missionaries went out and an evangelistic work is thoroughly established in the region of the upper Zambezi. There are (1903) 5 mission stations from Bihé in Angola to Lake Nyweri in the Congo Free State, with 15 missionaries.

CHRISTIANBORG: A town in the Gold Coast Colony, W. Africa, 4 miles E. of Accra. The place was formerly a Dutch possession.

In 1843 a Christian negro colony was transplanted thither from the W. Indies. In 1850 the place was sold to the English, and that change gave occasion, in 1852, to some unfortunate disturbances. The climate is unhealthy.

Station of the Basel Missionary Society (1858), with (1902) 12 missionaries, men and women; 22 native workers, men and women; 5 outstations, 3 Sunday schools, 5 elementary schools, 1 high school and 1,221 professing Christians.

CHRISTIANAGARAM: A village in Tinnevelly, S. India, situated about 25 miles S. of Tuticorin. Station of the SPG, with (1901) 31 native workers, 12 places of worship, 10 elementary schools and 1,448 baptized adult Christians.

CHRISTIANENBURG: A settlement in Natal, S. Africa, situated W. of Durban and about 9 miles S. of Botha's Hill station on the railway. Station of the Berlin Missionary Society (1854), with (1900) 3 missionaries, 21 native workers, 3 preaching places in the neighborhood and 466 baptized Christians.

CHRISTIAN VERNACULAR EDUCATION SOCIETY, for India. See CHRISTIAN LITERATURE SOCIETY FOR INDIA.

CHRISTIAN WOMAN'S BOARD OF MISSIONS (Disciples of Christ): Organized in 1874 in Indianapolis, where its headquarters have been located. The connected with the Church of the Disciples of Christ it is quite independent and unconnected with the Foreign Christian Missionary Association.

The work of this Society was the revival of the mission in Jamaica, W. I., which had been practically abandoned. There are now connected with the Jamaica Association 21 churches, with 1,709 communicants and 480 day schools.

India: Work was begun at Bilaspur in 1885, in cooperation with the Christian Missionary Society; in 1886 a station was opened at Deoghar; at Bina in 1894; and Pendra, north of Bilaspur, was occupied in 1900. In the same year work was begun in the city of Calcutta.

Evangelistic, medical and educational work is carried on among zenanas are visited, lepers cared for, and orphanages established. The Board also carried on work throughout the United States.

also of the LMS (1888), with (1900) 3 missionaries (one a physician), 2 missionaries’ wives, 5 native workers, 5 elementary schools, an orphanage, a hospital and 72 church members. Also station of the ME, with 15 missionaries, men and women (and workmen and physicians); 20 native workers, men and women; 9 elementary and 2 high schools, 7 preaching places and 273 professing Christians. The National Bible Society of Scotland also has a book depot here, with an agent and his wife and 17 native workers.

CHUNG-YANG-HSIEN: A town in the province of Hu-pei, China. situated about 70 miles S. W. of Wu-chang. Station of the WMS, with (1901) 2 missionaries, 4 native workers, 1 school, 1 chapel and 30 professing Christians.

CHUPRA: A town in the Nadiya district, Bengal, India, situated about 20 miles N. of Krishnapur. Station of the CMS (1845), with (1902) 1 missionary, 26 native workers, 1 place of worship, 1 school, 1 high school, an industrial enterprise for boys and 137 communicants.

CHURCH OF ENGLAND ZENANA MISSIONARY SOCIETY (1860): Upon the separation of the Zenana workers from the India. Female Normal School and Instruction Society in 1880, the Church of England Zenana Missionary Society was formed to cooperate with the CMS, while retaining its independence of administration. It undertook the existing work in 17 stations with 31 missionaries in India. In 1883, in response to an urgent appeal from China and from the CMS, a missionary was sent to Fuchau, and in consequence of the liberal support given to the special fund for China, the Society has been able to occupy 18 stations in the Fo-kien Province. In 1898, through the efforts of Rev. and Mrs. J. Ireland Jones, late of Kandy, 2 stations were also established in Ceylon.

The Society has a “Home Workers’ Band” of more than 800 women, who are kept in touch with the central workers by about 100 association secretaries and deputations from the home and foreign field. The “Daybreak Workers’ Union” has a membership of about 150 bands, with a total membership of over 3,000 young people. The “Indian Widows’ Union” is formed of British widows who unite with CIZ missionary in work for Indian widows. Other women than widows are associate members.

Branches of the CIZ have been formed in Canada and Australia.

The missionaries of the Society are all women, but the members vary in the age group from those of the mission service. They make evangelistic tours among the Hindu, Mohammedan, Singhalese and Chinese villages; they teach the women in the seclusion of their homes or the girls in school; they practise medicine and conduct hospitals and dispensaries; they train Christian women as assistant missionaries, Bible women, dispensers, nurses and teachers; they provide homes and classes for widows and destitute women in India and China; they provide orphanages for foundlings and famine orphans and give assistance to the deaf and dumb, the blind and the leper.

Missions (1903); 1. North India (1851): 19 stations, 41 missionaries, 250 native workers, 3 boarding and high schools, with 577 students, 5 orphanages, with 136 children, 1 hospital and 2 dispensaries.

2. South India (1876): 18 stations, 42 missionaries, 318 native workers, 5 boarding and high schools, with 177 students, 58 other schools, with 3,017 pupils, 3,856 Zenana pupils, 3 orphanages, with 136 children, 1 hospital and 2 dispensaries.

3. Punjab and Sind (1872): 24 stations, 69 missionaries, 144 native workers, 7 boarding and high schools, with 201 students, 51 elementary schools, with 2,343 pupils, 741 Zenana pupils, 5 orphanages, with 60 children, 9 hospitals and 22 dispensaries.

4. Ceylon (1889): 2 stations, 5 missionaries, 27 native workers, 1 boarding school, with 54 students, 15 other schools, with 461 pupils, and 1 dispensary.

5. Travancore and Cochin (1862): 7 stations, 11 missionaries, 92 native workers, 1 boarding school, with 299 students, 14 other schools, with 717 pupils, 21 Zenana pupils, 1 orphanage, with 44 children, 1 hospital and 2 dispensaries.

6. China (1884): 12 stations, 28 missionaries, 115 native workers, 12 boarding and high schools, with 360 students, 46 other schools, with 597 pupils, 45 Zenana pupils, 1 orphanage, with 41 children, 4 hospitals and 4 dispensaries.

7. Singapore (1900): 1 station, 3 missionaries, 2 native workers, 1 boarding school, with 70 students.

CHURCH MISSIONARY SOCIETY for Africa and the East (1799): In the year 1786 twelve events occurred which led to an awakening of the missionary spirit in Great Britain. Of these twelve events, the principal were the three following: (a) Wilberforce dedicated himself to the abolition of the slave trade; (b) Granville Sharp planned to settle the liberated slaves at Sierra Leone, and (c) the Eclectic Society (founded in 1783 for mutual improvement by a few evangelical clergy and laymen of the Church of England), discussed foreign missions for the first time. In 1789 this Society again discussed foreign missions, but no marked advance was made. In 1791 Charles Simeon again brought the subject before the Eclectic Society. Only two of the seventeen members present (presumably Simeon, Thomas Scott and Basil Wood) were favorable to a definite attempt at foreign missions, but long afterward Wood wrote across his name of that meeting “this conversation proved the foundation of the Church Missionary Society.”

In February, 1799, the matter was again brought before the Eclectic Society by the Rev. John Venn, who at this meeting laid down what afterward became essential and unchanging principles of the CMS. Of these principles, the right of Christian men who sympathize with one another to combine for a common object; “Spiritual work must be done by spiritual men.”
The mission must be founded on the Church principle, but not the high-Church principle.

If clergymen cannot be found, send laymen.

History: At this time the SPCK and the SPG were at the lowest point of energy and efficiency, and evangelicals were not allowed to cooperate with either; hence the necessity for a new missionary society. On the 12th of April, 1799, a public meeting was held at the Castle and Falcon in London, the same hotel in which, four years previously, the LMS was formed. Sixteen clergy and nine laymen met in an "upper room," the Rev. John Venn in the chair. Resolutions were adopted, stating that "as the SPCK and SPG confined their labors to the British plantations in America and to the West Indies, there seems to be still wanting in the establishment of the Church a society for sending missionaries to the continent of Africa and other parts of the heathen world."

Therefore, "the persons present at this meeting do form a Society for that purpose;" and that "a deputation be sent to the Archbishop of Canterbury and York and the Bishop of Durham as Chairman of the Missionary Committee of the SPCK, with a copy of the rules of the Society and a respectful letter."

At this time no name was given the Society, but six weeks later a second meeting was held which chose the name "The Society for Missions to Africa and the East." This name never came into practical use, and the present full name was not formally adopted until 1812.

In the meantime the deputation had difficulty in getting access to the Bishops, and not till July, 1800, was it able to make its report to the Society. The Archbishop was said to "appear favorably disposed, but cautious about committing himself."

During the early years of the CMS the bishops declined to ordain its candidates for service abroad, and it was obliged to look to Germany for its missionaries. The first missionaries, two Berlin students, were sent out in 1802, followed by others during the next few years.

In 1813, fourteen years after the foundation of the Society, did two bishops consent to ordain two of its candidates "for temporary work at home."

In 1819 an Act of Parliament gave the Archbishops of Canterbury and York and the Bishop of London power to ordain men for "His Majesty's Colonies and Foreign Possessions," under certain restrictions, and a technical objection which formed one of the early difficulties of the Society was thus entirely removed.

At 1819 the Archbishops and several Bishops joined the Society. In 1845 a proposition was made to unite the seven principal societies of the Church of England into a Church Union. The CMS committee deemed the action unwise, and it was therefore denounced in some quarters as "an attempt to make the Church one body with the Church of England into a Church Union. The CMS committee deemed the action unwise, and it was therefore denounced in some quarters as "an attempt to make the Church one body with the Church in the corporate capacity." This led to the famous defense of Henry Venn, known in the Church as "His Majesty's Colonies and Foreign Possessions," under certain restrictions, and a technical objection which formed one of the early difficulties of the Society was thus entirely removed.

In 1822, fourteen years after the foundation of the Society, did two bishops consent to ordain two of its candidates "for temporary work at home."

In 1819 an Act of Parliament gave the Archbishops of Canterbury and York and the Bishop of London power to ordain men for "His Majesty's Colonies and Foreign Possessions," under certain restrictions, and a technical objection which formed one of the early difficulties of the Society was thus entirely removed.

This led to the famous defense of Henry Venn, known in the Church as "His Majesty's Colonies and Foreign Possessions," under certain restrictions, and a technical objection which formed one of the early difficulties of the Society was thus entirely removed.

The CMS received by any missionary society. Nearly all missionaries were brought under consideration and an auxiliary committee was appointed to prepare for an extension of work in this direction. The medical department of the CMS was fully organized in 1894, and its influence has been immeasurable in all missionary lands.

The direct employment of women missionaries by the Society began to be canvassed about 1882, although long before single women had rendered it efficient service in educational work. The Women's Department of the Society was fully organized in 1895.

The direct employment of women missionaries by the Society began to be canvassed about 1882, although long before single women had rendered it efficient service in educational work. The Women's Department of the Society was fully organized in 1895.

The year 1841-1842 brought to the Society an alarming financial crisis, while opportunities for increase of work were greater than ever before. At this point the committee appealed to the country for help, on the distinct ground that they "looked for the Divine blessing upon the faithful, plain and full maintenance of the great principles of the truth as it is in Jesus, by all the agents and missionaries of the Society, without compromise and without reserve. It is the sustentation of that Scriptural, Protestant, and Evangelical tone throughout all their ministries, it is the upholding of the Bible and the Bible alone, as the foundation and rule of faith upon which the blessing of God has rested, does rest and ever will rest."

"Upon these principles the committee took their stand in a season of jeopardy, and made their appeal for special assistance. It was that in May, 1842, they were able to report a larger income than up to that time had been received by any missionary society. Nearly all indebtedness was cleared off and a good beginning was made in the formation of a capital fund. At this time a finance committee of four bankers had been appointed to consider the situation, and they laid down the rule that, although the Society is "called upon to occupy diligently with the talents committed to it, it is not to aim at occupying with the provisions of the Act of Parliament, such persons as the Society is willing to support in some foreign station. The Bishop, by the imposition of hands, gives them authority to preach the Gospel, with a view to their foreign location. Hence, to call the acts of the CMS in selecting the station, paying the passage money, and agreeing to provide the salary—to call these acts a sending forth of preachers in an ecclesiastical sense is to confound names with things and to lose sight of all true Church principles."

In 1845 the subject of medical missions was brought under consideration and an auxiliary committee was appointed to provide for an extension of work in this direction. The medical department of the CMS was fully organized in 1894, and its influence has been immeasurable in all missionary lands.

The direct employment of women missionaries by the Society began to be canvassed about 1882, although long before single women had rendered it efficient service in educational work. The Women's Department of the Society was fully organized in 1895.

with more talents than God in His wisdom has been pleased to dispense." On receiving this enunciation from the finance committee the stand was taken by the general committee of the Society that the "talents" which God gives a mission are men and if He sends the men it is reasonable to believe that He will send the money for their support.

In 1853 this "Policy of Faith" of the CMS was clearly enunciated before a general meeting as follows: The committee state in the presence of all the vessels that at the close of the previous mission the whole of their financial resources had just doubled; the whole of their missionary staff had just doubled; the whole of their financial reserves had just doubled; their willingness to accept any number of true missionaries who may appear to be called of God to the work. They will send out any number, trusting to the Lord of the harvest, whose is the silver and the gold, to supply their treasury with the funds for this blessed and glorious undertaking."

In 1871-72 the low water mark was reached in the supply of candidates; a Day of Intercession was for the first time observed with reference to the situation on December 20, 1872, and a circular was issued, asking the constituency of the Society to pray for missionary candidates. Twelve months later, in May, 1874, at the end of the first complete financial year since this call to prayer for men went out, the Society was startled to learn that in the previous year subscriptions exceeded a quarter of a million. The ordinary income had advanced in one year £40,000!

In 1880 the finances again fell below par and a special joint committee of finance and estimates was appointed; their strong conviction was that "no religious society ought to run ahead of Divine Providence; that the Divine will is indicated by the amount of funds committed to the Society's administration, and, that while it is right to use every talent given to us, we are not responsible for talents not given to us."

This was the same position as that taken by the Special Finance Committee of 1841-42, which led to the committee of the CMS to declare that God's will is indicated by the coming forward of men, not by money.

Following this declaration of a policy of retrenchment the report of 1881 showed a clear balance sheet, and men who had been kept at home were promptly sent out. But in 1887 the Estimates Committee warned the Society that the number of candidates was increasing more rapidly than the funds, and argued that expansion of the work should be limited by the funds at the Society's disposal. To this the Society answered that the candidates were unmistakably men sent by God, and it was reasonable to assume that He would provide the means to maintain them.

Ultimately it was determined to refuse no candidate merely on financial grounds. The Society thus unknowingly reverted to the policy of 1852-53. In 1893 the financial outlook was so serious that the President issued a letter headed "Ask the Lord and tell His people." It was proposed to abandon the "Policy of Faith," but on review of the seven years that the policy had been in operation it was found that the missionary staff had just doubled, the whole of their expenses had been paid and in addition to all ordinary expenditure a mortgage of £20,000 on the Children's Home had been paid off. Thus the "Policy of Faith" enunciated in 1853, afterward forgotten; abandoned entirely in 1865, with the result of seven years' famine; partially acted upon in 1874-76, and dropped in 1877, with financial difficulties resulting; adopted as a new thing in 1887, and persevered in for seven years, had been honored of God beyond all anticipation. The resolution reaffirming the policy was carried nem. con. and the policy was adopted and carried into effect. In 1902 the "Policy of Faith" was again reaffirmed. The resolution reaffirming the policy was carried nem. con. and the policy was adopted and carried into effect. In 1902 the "Policy of Faith" was again reaffirmed.

Organization and Constitution: The Society is conducted by a Patron, a Royal Family; a Vice-Patron, the Archbishop of Canterbury; a President, who must be a layman; Vice-Presidents, clerical; Secretaries and such officers as may be deemed necessary—all being members of the Church of England or Ireland. The general body of the Society includes members and governors who have made certain subscriptions to the funds of the Society or have rendered special services in its work. The Committee consists of 24 laymen and of the clergymen who have been for at least one year members of the Society. Of the 24 lay members, 18 are reappointed each year from the existing Committee, the rest being elected from the general body of the Society.

The official staff of the Society is more complete than that of any other missionary organization. Aside from two Honorary Clerical Secretaries there are 20 secretaries and assistant secretaries, divided among seven special departments: Candidates, Foreign, Home organization, Editorial, Lay, Women's, and Medical. There are 19 Association Secretaries in England, 3 in Ireland and 2 in the Scottish Auxiliary, while 5 clergymen are employed in missionary meetings and special deputation work. Aside from these there is a large number of honorary district secretaries. The result is seen in the thoroughness with which the work is fielded, the accuracy and completeness of the reports and the variety and attractiveness of the publications. The Society's annual report is faced with pages of reports, as are its monthly Church Missionary Intelligencer and Gleaner among other missionary periodicals. Similarly its income is larger than that of any other missionary society, in 1902 being, for the general purposes of the Society, £327,000 (51,635,000).

A feature of the organization of the CMS is its use of auxiliary societies. These have been formed among those of all ages and stations in life. Prominent among these agencies for keeping the people informed and interested are the "Missionary Leagues Association," the Gleaners' Union and the Savers' Band. Of a similar nature are the Lay Workers' Union and the Younger Clergy Union. It has been the policy of the Society to form auxiliary committees in all colonies wherever the English community is strong enough to give practical aid to the work of the Society in its midst.

Development of Missions: With William Wilberforce as one of the charter members of the new society, and the prominence given to slavery in Africa through his efforts and those of Granville Sharp, the attention of the CMS was at once directed to West Africa, the center of the slave trade, as a needy field, and especially in view of the fact that neither the Society for the Propagation of Christian Knowledge nor the SPG were working in that country. Its first missionaries were sent to the Susu tribe on the Rio Pongas in 1804, the mission headquarters afterward being at Sierra Leone. On the opening of India to missionary work in 1813, the United Prov-
inches (formerly North West Provinces). Mission was begun at Aga by Abdul Masih, Henry Martin's solitary convert from Mohammedanism, under the direction of Daniel Corrie, one of the famous "five chaplains" of India. The second mission of the Society was to the Maoris of New Zealand in 1814, at the invitation of Samuel Marsden, chaplain in New South Wales. The same year the South India Mission was opened at Madras by the first two dergemny of the Church of England to be sent as missionaries to India. This Bengal Mission was established in 1816, and the same year work was begun in the Travancore and Cochin Native State, at the invitation of the British resident. In 1817 work was begun among the Singhales e and Tamils in Ceylon.

The Western India Mission was inaugurated at Bombay in 1820. Two years later, in 1822, the North West Canada Mission were begun among the scattered Red Indian tribes. The treaty of Nanking in 1842 rendered China accessible, and in 1844 the Mid-China Mission was begun.

The following year the missions in Africa were extended and work was begun in East and West Equatorial Africa. In 1850 the Fokien Mission was established at Fu-chau.

In 1851, on invitation of Bishop Gobat, the Palestine Mission was opened, "beginning at Jerusalem." This year also the Punjab and Sind Mission was begun, soon after the annexation of the province to British India. In 1856 Capt. Prevost, R. N., called the attention of the CMS to the Indians of British Columbia, and a young schoolmaster was sent to them. A mission was also begun the same year on the island of Mauritius. In 1862 work was extended to South China. In 1869 the first CMS missionary began work in Japan, and the Rev. R. Bruce of the CMS visited Persia and began a mission which was formally adopted by the Society in 1875. In 1876 the work in Africa was further extended, and the Uganda Mission organized. In 1882 the Missions to Egypt and Turkish Arabia were begun, and in 1882 the West China Mission was started in the Province of Sue-chwan.

The Missions in Africa. (1) Sierra Leone Mission (1844): The first two missionaries of the CMS were sent in 1804 to the Susu tribes on the Rio Pongas. A few years later a station was opened at Yongro for the Bullem tribe, by Nylander, who labored for 19 years in Africa, dying at his post in 1825, never having returned home. In 1817, at the instigation of the slave dealers, the mission buildings were destroyed by fire, and opposition to their work became so formidable that the missionaries were compelled to take refuge in Sierra Leone, the depot for negroes rescued from slave ships by British cruisers. Here the missionaries remained. Great success attended their labors and in 1822 nearly 2,000 of the freed slaves were in the mission schools, and some hundreds had become sincere Christians. The work continued to prosper, but at good time fifty-three missionaries and missionaries' wives died in this field between 1804 and 1824. This great mortality revealed the necessity for native, and in 1827 the Fourah Bay College was opened. Port Lokkoh in the Timne country was occupied from 1840 to 1860 and reoccupied in 1875. In 1840 the native chiefs voluntarily established a Church Missionary Auxiliary, and undertook the support of the native schools in the various parishes.

In 1852 the Bishopric of Sierra Leone was founded and ten years later the Sierra Leone Church was organized on an independent basis, and undertook the support of its own pastors, churches and schools, aided by a small grant from the CMS. In 1876 the Sierra Leone Church Missionary Society was founded, and since then the work has been continued by the CMS in the outlying missions established by the CMS in the Bulom and Quiti countries.

There are (1902) 21 stations and 22 outstations, 14 European missionaries and 167 native workers, 6,932 native communicants and 64 schools, with 4,830 pupils. More than 100 African clergymen have been ordained on the West Coast of Africa in connection with this and the Yoruba Mission. Several of them are government chaplains.

(2) Western Equatorial Africa Mission (1845): A large portion of the freed slaves gathered at Sierra Leone had been taken from the Yoruba country, a thousand miles to the eastward. About 1840 many of these natives, some of whom had become Christians, returned to their own people, and petitioned that a missionary be sent to them. In 1843 Mr. Henry Townsend paid a preliminary visit to Abeokuta and returned to Sierra Leone and to England with a favorable report. He and Mr. Gollmer with Samuel Crowther, a native of Yoruba and a liberated slave, reached Abeokuta in 1845, where they received a hearty welcome. Gradually the work extended to other towns and villages in the interior, and in 1857 Mr. Crowther accompanied a commercial expedition up the Niger River and laid the foundation of the Niger Mission by establishing stations at Onitsha, Lokoja, and permanent work in the Hausa country.

In 1890 missionaries were sent out to locate at Lokoko, on the Upper Niger, and hence to try to reach the Mohammedan Hausa States. The climate proved fatal to the expedition, however. A subsequent attempt met with better success, and in 1892 the work was extended to other towns and villages in the interior opened the way for subsequent geographical and missionary enterprises in East Africa. In 1874 the Rev. W. S. Price, formerly in charge of the asylum for rescued slaves at Nasik, Western India, was sent out; land was purchased for an industrial colony on the mainland near Mombasa; some 200 African Christians from among the freed slaves formed the nucleus of the colony and the new settlement was named Freretown, in honor of Sir Bartle Frere. To this place other rescued slaves at Nasik, Western India, were sent; land was purchased for an industrial colony on the mainland near Mombasa; some 200 African Christians from among the freed slaves formed the nucleus of the colony and the new settlement was named Freretown, in honor of Sir Bartle Frere. To this place other rescued slaves were sent for care and training. Stations were opened in 1883 in the Taita country to the eastward, and at Taveta under the shadow of the snow-capped Kilima Njaro, and in 1890 in the hlore region, to northward of Mombasa, when in 1876 missionaries were sent by the Zanzibar route to establish the Uganda Mission. Intermediate stations were established at Mpvapwa in 1876, at Mamboma in 1879, and at Naas, at the south end of the Victoria Nyanza, in 1888.
these missions a new bishopric was established in 1884, the Rev. John Hannington being consecrated the first bishop. He was murdered by order of King Mwanga of Uganda in October, 1885.

There are (1902) 18 stations, 77 European missionaries and 91 native workers, 842 communicants and 49 schools, with 2,316 pupils.

(4) Uganda Mission (1876): In November, 1875, Stanley sent word to England that Mfussa, King of Buganda, would welcome missionaries. Shortly after this the CMS received two anonymous gifts of £5,000 each for work in Uganda, and in June, 1876, seven months later, the first missionaries for Uganda were at Zanzibar preparing for the march to the Victoria Nyana, Rubaga, the capital of Uganda, was reached by two of the party, Lieut. Smith and Rev. C. T. Wilson, in June, 1877, who were warmly welcomed by Mfussa. Mr. T. O’Neill afterward joined them, but the temerity of this enterprise became evident in December, 1877, when Messrs. Smith and O’Neill were killed in a quarrel between a native chief and an Arab trader. Mr. Wilson was thus left alone in the middle of Africa. It was only after some months that he was joined by Mr. A. M. Mackay, who had been detained on the coast by illness for more than a year. In 1884 King Mfussa died, and Mwanga, his son, turned against the missionaries, and a period of danger and bloodshed followed the murder of Bishop Hannington and several native Christians. This many times threatened the existence of the mission, until finally in 1894 a British Protectorate was established over Uganda and within three or four years prosperity dawned for the State and for the mission. See Uganda.

There are (1902) 33 stations, 76 European missionaries and 2,435 native workers, 9,565 communicants, 5 schools, with 248 pupils and 12,117 others receiving instruction.

The more notable characteristic of this mission is the advance of the native Christians in intelligence and their acceptance of the duty of evangelizing neighboring regions. Busoga, Toro and Bunyoro have thus been opened to the missionary

(5) Egypt (resumed 1882): As far back as 1802 it was suggested to the CMS that it attempt the revival of evangelical religion in the Greek Church. In 1811 came a letter (which ultimately led to the Society’s enterprises in the Mediterranean) from a Roman Catholic priest in Malta, Dr. Nandi, urging the needs of Mohammedans and Christians in the Levant and the duty of the CMS to relieve such needs.

In 1815 the Rev. William Jowett was sent to Malta “to survey the religious horizon,” and begin work, followed soon afterward by Messrs. Connor and Hartley. In 1825 five men were sent to Egypt, among them Samuel Gobat. The work was carried on for more than 30 years, chiefly by J. R. T. Lieder, who died at Cairo in 1861, and his brethren itinerated in the Nile Delta, into the Fayyum and southward into Nubia. The missionaries could not work directly for Mohammedans and sought to stir up native Christians to life. The Coptic clergy were generally friendly, while those of the Greek Church were hostile. A boys’ boarding school was established at Cairo, which in 1842 was changed into a theological seminary for Coptic clergy. The visible results of the work were small and no new recruits were sent out. In 1862 the mission was dropped. In 1882 the British occupation of the Nile Valley took place. At once thank-offerings began to be sent to the CMS for an Egyptian Mission. This led to a mission to reopen the work among the Mohammedans. Dr. F. A. Klein of the Palestine Mission was sent to Cairo. Later on, medical work was begun at Cairo by Dr. Harpur. Cairo was regarded as a stepping stone to Khartum and the Sudan. But the timidity of the British Government respecting the interfering nature of Christian missions in those regions has interfered with the execution of this design. The most urgent request of the CMS, presented in 1901, for permission to station missionaries at Khartum, received a courteous but firm refusal from the Secretary of State for Foreign Affairs, which concluded with the words: “It appears to me to be at present impossible to indicate any time when the restrictions now in force on the labors of missionaries in the Sudan could be removed, but the matter will receive the most careful attention.” Nevertheless, in 1893 British officials approved missionary labor for pagans in the 8 districts of the Sudan, and permitted the CMS to open a school for Muslims in Khartum.

There are (1902) in Egypt, 4 stations of the CMS, 28 European missionaries, 25 native workers, 54 communicants and 4 schools, with 291 pupils.

II. Palestine (1851): When Samuel Gobat, for many years associated with the work of the CMS in the Levant, was appointed to the bishopric in Jerusalem, he appealed to the committee to begin work among the Mohammedans. One result of this was the opening of the Palestine Mission by the Rev. F. A. Klein and Dr. Sandrecki, at Jerusalem.

The ultimate purpose of the Society in undertaking the work in this, as in their other Levant missions, was the evangelization of the Mohammedans. Several stations were successively occupied and other missionaries were added to the staff. In 1861, however, Jerusalem and Nazareth were the only stations in occupation, and for many years the work was on a reduced scale. Bishop Gobat had established mission stations at Nablus and Hebron. In 1890 the CMS took over the work of the Female Education Society at Jerusalem and Shfaram.

There are now (1902) in the Palestine Mission 19 stations, 71 European missionaries and 127 native workers, 802 communicants and 59 schools with 3,639 pupils.

III. Turkish Arabia (1882): Baghdad was first occupied as an outpost of the Female Mission, with the view of reaching Persian pilgrims who resort to famous Shi shrines near the city. The first missionaries were the Rev. T. R. Hodgson of the Indian Mission and Mr. Malmon, a converted Jew of Trieste. A good deal of their early work was among the Jews, in Persian clothing, not being found very accessible. Medical work was begun in 1886 by Dr. Sutton. In 1898 the work was separated from the Persia Mission and continued as the Turkish Arabia Mission. In 1900 Mosul was occupied by agreement with the PN, which had taken over that station from the ABCFM.

There are (1902) 2 stations, 7 European missionaries, 13 native workers, 61 communicants and 4 schools, with 148 pupils.
IV. Persia (1875): In 1860 the Rev. R. Bruce, of the CMS, visited Persia, when returning from England to India, and began work at Isphahan. In 1875 the Society formally adopted its work as one of its missions. In 1870 medical work was begun there, and in 1877 that time the doors had opened rapidly; the Babis have seemed friendly and the Muslims generally have been attracted through the medical services of the missionaries.

There are (1902) 5 stations, 35 European missionaries, 41 native workers, 106 communicants, and 287,407 pupils.

V. India (1813): (1) United (formerly North West) Provinces: The Society's first agent in India was Abdul Masih, Henry Martyn's solitary convert from Mohammedanism, who was sent to Agra in 1813 under the direction of the missionaries, 41 native workers, 100 communicants, and a chaplain of the forces at that station. In 1815, the CMS, visited Persia, when returning from England to India, and began work at Ispahan. The rapid expansion of the work. The most important event following the meeting was the occupation of Lucknow in 1858, immediately after its reconquest. Some years later a special work was begun among the Gonds (1879) and the Bhils (1880).

There are (1902) 27 stations, 131 European missionaries and 429 native workers, 2,186 communicants, 134 schools, with 10,359 pupils; native contributions, Rs. 7,742.

(2) South India (1814): The first two clergymen of the Church of England to go to India were sent to Madras by the CMS in 1814. A corresponding Committee of the CMS was formed in Bombay and two years later missionary work was formally inaugurated. In 1832 a new station was opened at Nasik, an important center of Brahman influence. At Bombay the Robert Money School, established in 1836, was handed over to the CMS. In 1854 the Rev. W. S. Price founded the agricultural and industrial settlement of Sharanpur, Nasik, which afterward became for a time a refuge for liberated African slaves.

Poona was occupied in 1882, and there was established the CMS Divinity School for West India. Special efforts were made to reach the Mohammedans and Parsees.

There are (1902) 9 stations, 22 European missionaries, 182 native workers, 1,449 communicants and 59 schools, with 2,578 pupils.

(5) Punjab and Sindh (1890): As early as 1840 some English officers and civilians at Simla raised a fund for evangelistic work among the natives and applied to the CMS for a missionary. None being sent, they began an independent work at Kolgur in 1848 which was taken over by the CMS in 1855. In 1850 it began the Sindh Mission at the commercial port of Karachi and the following year work was begun in the Punjab proper by establishing a station at Amritsar, the sacred city of the Sikhs, and extension became the order of the day, but the most important advance was made in 1855, when Peshawar, the military post on the Afghan frontier, was occupied. Lahore, the capital of the Punjab, became a station in 1867, and here the Divinity School was founded three years later. There are in this mission (1902) 32 stations, 106 European missionaries, 180 native workers, 1,209 communicants and 42 schools, with 6,537 scholars.

VI. Ceylon (1817): Work was begun among both Singhalese and Tamils in 1815, the two races having distinct languages. Evangelistic, educational, and pastoral work has been carried on, but the strongest interest in Ceylon are the Kandyan itineracy, which has been exerted through the schools. During the first years the reports from the missionaries were almost uniformly depressing, while favorable impressions of its influence were given by the government officials. Two features of special interest in Ceylon are the Kandyan Itineracy, which was begun in 1853, and the Tamil Coolie Mission, established in 1855.

Much indirect good came from a great Buddhist revival in 1862-4, and from that time both

Church Missionary 
THE ENCYCLOPEDIA OF MISSIONS
the Singhalese and Tamil Missions began to look more promising.

There are (1902) 22 stations, 53 European missionaries, 681 native workers, 3,525 communicants and 283 schools, with 17,914 pupils.

VII. Mauritius (1856): Early in 1854 Mauritius was visited by two CMS missionaries from England, who found a little band of Tamil coolie Christian from India, for whom Mr. A. Taylor of the Madras Auxiliary Bible Society was caring. The need of the field was reported to the CMS, and in 1856 it began work among the coolies. From the first there was much encouragement. An interesting development of the mission occurred in 1860, when the Government established an orphan asylum and industrial school, placing them in the care of the CMS missionaries. In 1875, in connection with Mauritius, work was begun in the Seychelles Islands, among the liberated African slaves, an industrial school settlement being established on the Capucin Mountain.

There are (1902) 10 stations, 10 European missionaries, 67 native workers, 366 communicants and 21 schools with 1,549 pupils.

VI. China Mission: After the treaty of 1842 a friend of the CMS, calling himself "less than the least," gave the Society £6,000, as the nucleus of a China fund. Two clergymen were at once sent out, with instructions to visit the treaty ports and Hongkong, and report upon the best place for locating the new mission. Shanghai and Ningpo were selected and occupied (1845-1848). In 1875 the Ningpo College was founded and has been a valuable agency in the work. The mission was gradually extended to Hangchau and other places. In 1901, a Native Church Missionary Society was formed for further aggressive work.

There are (1902) 12 stations and 59 European missionaries, 195 native workers, 1,240 communicants and 51 schools with 738 pupils.

(4) South China (1862): St. Paul's College in Hongkong had for some time been assisted by the CMS, but regular work was not begun until a mission was organized in 1862. Several outstations were later established in the Kwang-tung Province, with Canton as a central station.

There are (1901) 6 stations, 38 European missionaries, 58 native workers, 360 communicants and 30 schools with 1,490 pupils.

(4) West China (1891): The most important CMS movement in China in recent years was the new mission in the western province of Sze-chwan begun by Rev. J. H. Horshburgh in 1891, who planned the work on very simple lines, the missionaries identifying themselves as much as possible among the people, and spend as little money as possible." They went into the province after correspondence and an understanding with the CMS, whose missionaries already on the field welcomed and assisted them. They at once began to itinerate, this seeming the best method of work. By 1894 five cities were definitely occupied. In 1895 serious riots occurred in the province, but the CMS mission suffered small loss.

There were (in 1900) 10 stations, 41 European missionaries, 33 communicants and 1 school, with 15 pupils.

IX. Japan (1869): In 1867 the CMS received an anonymous gift of £4,000 for a mission in Japan. In 1868 came the restoration which restored the Mikado to the throne and in 1869 the first CMS mission landed at Nagasaki. At first the work was carried on with difficulty, but in 1872 religious liberty was practically proclaimed and by 1875 four important centers were occupied. The new constitution proclaimed in 1889 gave increased religious liberty and made possible further extension of work.

There are (1901) 23 stations, 102 European missionaries, 156 native workers, 2,408 communicants and 15 schools with 559 pupils.

X. New Zealand (1814): The CMS went to the Maoris of New Zealand, the second of the Society's missions in order of time, was undertaken in 1814, when Samuel Marsden, with three laymen, sent out as pioneers, landed on the northern island. Other missionaries followed whose lives were entirely in the power of the ferocious cannibals, and were frequently in imminent danger. For eleven years no results whatever were seen. In 1825 the first conversion took place, and no other natives were baptized for five years. Then began the marvelous movement which resulted in almost the whole Maori nation being brought under Christian instruction and civilizing influences, and which led Bishop Selwyn, on his arrival in his new diocese in 1842, to write: "We see here a whole nation of pagans converted to the faith. Where will you find more signals of the presence of the Spirit, or more living evidences of the kingdom of Christ?"

In 1840 New Zealand was made a British colony, and immigration on a large scale ensued, introducing the vices as well as the benefits of civilization. The inevitable conflicts of race began and the continual disputes about the sale and possession of land led to prolonged and bitter wars, which shook the native church to its foundations and caused serious defections.

In 1883 a local CMS mission board was established to administer the Society's grants, which diminished annually and ceased in 1902.

There are (1902) 48 stations, 18 European missionaries, 346 native workers, 2,508 communicants and 7 schools with 295 pupils.

XI. Northwest Canada (1822): The work of the CMS among the Indian tribes scattered over what was formerly the Hudson Bay territory, was begun by the Rev. John West in 1822 at a little trading station on the Red River.

The first step in extending the mission was made in 1840, when a native teacher was sent to open a station at Deron. Now this district is the colonial province of Manitoba, and a large part of the CMS work has developed into the missions of the Church in the colony, one of its churches having even become the Cathedral of the Diocese of Rupert's Land.

The Ecclesiastical Province of Rupert's Land, the area of which probably exceeds that of the
Chinese Empire, is divided into eight dioceses, viz., Rupert's Land, Mooseon, Mackenzie River, Athabasca, Saskatchewan, Calgary, Qu'Appelle and Keewatin. In all these dioceses, to the south the Bible and Prayer-book exist in Red River Cree, and considerable portions, with hymn-books, etc., in Moose Cree, Ojibbeway, Soto, Slave, Chipewyan and Tukudch.

A plan for the gradual withdrawal of the CMS from these fields, similar to that adopted in New Zealand, is to become effective as soon as practicable.

There are (1901) 60 stations, 73 missionaries, 37 native workers, 2,852 communicants and 76 schools with 3,300 pupils.

XII. British Columbia (1856): In 1856 Captain Prevost, R.N., drew the Society's attention to the savage state of the Tsimshian Indians on the coast of British Columbia, and a young schoolmaster, Mr. W. Duncan, was sent out. A great blessing was vouchsafed to his labors, and in 1862 the Christian settlement of Metlakahtla was founded. In 1881, Mr. Duncan, refusing to work on the lines of the Church of England, ceased to be a missionary of the Church Missionary Society. In 1857 he removed, with some hundreds of Indians, to a new settlement, 100 miles distant, within the territory of Alaska, renouncing allegiance to the Queen of England and coming under the protection of the United States, and the station at Metlakahtla was put in the charge of other missionaries sent out by the Society. Other missionary settlements are at Kiceloith on the Naas River, among the Kitiksheans of the interior, the Hydahs of Queen Charlotte's Islands and the Kwa-guti Indians of Fort Rupert, at all of which zealous work is being carried on.

There are (1901) 10 stations, 25 missionaries, 37 native workers, 407 communicants and 14 schools with 427 pupils.

The Church Missionary Society carried on missions at Antigua, Jamaica, Trinidad and at various points in British Guiana for many years with considerable success.

Church Missionary Intelligence (Official organ of the CMS); The Church Missionary Gleaner; Mercy and Truth (Record of CMS medical work); The Round World (for larger Sunday-school scholars); The Round World (for children). The above are all published monthly. Quarterly papers are: Annual Almanack; Annual Pocketbook and Diary, and Extracts from Annual Letters of Missionaries are also published. Stock (E.), History of the Church Missionary Society, 3 vols., London; Hole (C.), Early History of the Church Missionary Society (to 1814), London; Church Missionary Atlas, London.

CHURCH OF SCOTLAND; Foreign Missions of. See Scotland, Established Church of.

CHURCH IN THE MISSION FIELD: When the missionary or evangelist has felt the joy of leading men to accept Jesus Christ, the fact comes to light that the converts have to be taught the necessity of growth as well as the means of growth. Each individual has to be established in the faith, be taught to recognize and resist temptation, the idea of which is new to him, and to be guided and encouraged as he tries to throw off old evil habits of thought and action. He cannot otherwise become an aggressive worker to others, the allegiance of whom rests on the new converts cannot stand alone. For their own growth they need mutual support, and to maintain their position in an unfriendly and often actively hostile community they need organization. Only through becoming members of an organic body do the converts take their place in the community and the nation where their influence will tell in support of the principles which they profess.

The church, then, must be established early in the mission field as a permanent institution for the work of Christ. It must be organized in all its different departments, placed on a firm foundation of faith, self-support, activity; be provided with the various means essential to its continued existence and growth. The Christian community is to be permeated with Christian ideas, its social life freed from its evil associations, brought into accordance with the spirit of the Gospel, its customs purified, its aims enlightened, its national life made to include a genuine and true patriotism.

And so on in all the endless lines that open up before those who study what is involved in the establishment of the kingdom of God upon earth.

It is a mighty task, more perplexing even than the corresponding undertaking at home. And retrospect only makes its difficulties stand out more prominently. By all can travel on the Levant, ever the roads where Paul led the way in Christian work, recall the story of those first centuries of growth, remember the subsequent centuries of stagnation and decay, and not wonder whether the story is to be repeated in the churches now gathering in every city and town, and almost in every village. Modern Christians are no more sincere or devoted than those of earlier ages; modern missionaries no more earnest or skilled than the apostles and fathers.

The question of the need of new church organizations has come up with some sharpness in connection with work among the Oriental churches in Papal lands. When missions were commenced in the Levant among the Armenians, Nestorians, Greeks, etc., there was no plan for a separate church organization. The old one, it was thought, was good enough, and it was far better to utilize that, introducing whatever of reform was necessary or practicable, but not severing historic associations, especially in view of the fact recognized by all that the creeds of these old churches were essentially in accord with those of the more modern bodies. This, however, was found to be impracticable, and as a matter of fact Protestant church organizations have been formed wherever evangelical missionarics have gone.

The need to organize the Church on the mission field being admitted, the duty of doing this work falls upon the missionary. We expect the missionary to be fully occupied in winning converts. In actual fact, however, in every successful field, it speedily comes to pass that the greater part of the converts are won by the efforts and the explanations and the pure lives of the native Christians. This the native believers can do. But that which they cannot do for a long time is to bear the burden of culture and nourishing those whom they have been the means of winning to Christ. This duty falls upon the missionary.

The problem of the missionary is one of securing growth and permanency. The question he is constantly striving to bear in mind is how to hold the vantage-ground gained, and make it the point of departure for new achievements. Here certain essentials must be kept in mind: 1. The development and growth of the individual church and community must be natural, not forced. The genius of the people must be studied, and that line of development found which will bring out
the best that is in them. South Sea Islanders cannot be transformed into Europeans or Americans, and every effort so to transform them results in harm. At the same time they must be something different from what they have been. Yet, it is inadmissible true that the Asiatic must remain an Asiatic, it is also true that the Christian Asiatic must be as different from the heathen or Mohammedan Asiatic as the modern Englishman is from his Norman-Saxon progenitors. 2. The amount of time is to be estimated, and a spiritually sudden transformation will come; but this is the exception rather than the rule, and he who works best who is not disturbed if he has to admit that the growth of Christian character is a slow process. 3. The methods adopted must be primarily constructive, not destructive. Their object is to build up rather than to tear down. They do not attack systems, but seek to help individuals. It is not that Islam, Hinduism, Shintoism, or Fetishism is to be overthrown, but that individual Muslims, Hindus, Japanese, Africans, are to be guided and assisted into a higher life.

It is not only natural but inevitable that that organization should take the form to which the missionary himself has been accustomed; and thus it happens that the mission church, in most cases, seems to be an extension of the denominational differences of the home lands. It is, however, to be said that those differences are seldom if ever as sharply defined in foreign fields as at home; and, except in case of divisions resulting from unworthy rivalry, the members look upon them as formal rather than substantial. There are some cases where the form of church organization has been left almost entirely to the choice of the native community, with the result of an occasional departure from the denominational usage of the missionary. This is especially true of missions conducted by the Congregational Churches of England and the United States. As a rule, however, the policy preferred by the missionary has prevailed, not because he has felt tied to it, but because in it he can work to better advantage for the best growth of the church.

More perplexing and difficult than any question of form is that of the material to be used in organizing the new church. Men who apply to be received are actuated by different motives, not necessarily from hypocrisy so much as from sheer inability to comprehend the insistence of Christianity upon moral purity. The duty of discovering who are sincerely and steadfastly actuated by such will, perhaps, add to the difficulty of placing the most spiritual men in places where the tide turns in favor of Christianity. Others may be socially prominent through their possessions or position. But men who have had influence in the heathen community because of wealth or rank may not be the best men to carry responsibilities in the Church. The tendency of Asiatics to suffer themselves to be led by such will, and to adhere to the difficulty of placing the most spiritual men in places where their influence will be widely felt. But happily the missionary, by careful study, can hope to reach a clear understanding of the ideas and motives of those who make up the material for the new church. Furthermore, the wise missionary will take counsel with the native evangelist who has had dealings with the people, and who understands the people as the missionary cannot hope to do. By such means selection of men must be made upon whom so much of the growth and the strength of the Church will depend.

The question of securing a right basis for church membership opens up the whole problem of discipline in the new churches. Peculiar perplexities are thrown about this part of the matter of admission of converts from non-Christian peoples by the difference between the missionary and his spiritual children in mere matters of ordinary civilization. In this way missionaries are constantly forced to remind themselves that the ideal African convert, for instance, should not be...
Church in the Mission
City Missions

The difficulties which surround the question of discipline on the mission field cannot be better illustrated than by the ease of those converts who have been brought up to polygamy. It is easy to declare that a polygamist may not be admitted to church-membership unless he first ceases to be such by putting away all but one wife. Yet some missionaries have been led to take the ground that each case must be judged by itself, lest a greater wrong be done in dismissing the widow under a fixed rule which takes no account of their rights and their feelings. In some cases, the widow of an unbelieving and polygamous husband has become an humble and sincere believer in Jesus Christ. To admit her to the church will be to relax the fiber of the whole body in its stand against polygamy. To refuse her admission will be to deprive her of privileges and gracious influences which she has not forfeited by any act of her own. To insist on her leaving her husband, it is a condition of admission to the Church to be to smite her in her tender human affections, as tho in punishment for having followed in ignorance the current of usage, without conscious and wilful wrongdoing. Such a situation is one that demands the highest wisdom in dealing with its complications.

The one principle that has to be followed in teaching the young churches to maintain discipline is to preach—and repeat—and root in the hearts of the Christians who make up the church-members the fact that their witness for Christ is to be a positive witness, and that it cannot have this aggressive quality unless each member of the church is a living epistle, known and read of all men. As the members of the church grow into understanding of the nature of Christian purity, and grasp withal the idea that a church whose reputation among the heathen is marred by spots has no power to witness for Jesus Christ, they themselves will find solutions for many problems of discipline with which the missionary could not cope.

This sense of responsibility to witness for Christ has another bearing so self-evident that it need only be alluded to here. From the very beginning the members of the young church must be made to feel that duty to their Redeemer requires them to do all that they can to help others follow the Lord has done for them. It is easy for the missionary to delay this teaching through sense of the slender knowledge of the best of the new believers. But delay here is fatal. None are so ignorant, who have learned to try to follow Jesus Christ, that they have no light to throw upon his neighbors. In pagan lands a glimmer of light is precious to those who live in darkness profound and eternal. Moreover, the convert who begins with regarding his Christian privileges as given for his own happiness alone will find it hard ever to shake off that heresy. Without recognition of responsibility to take up the very work which Jesus Christ did when upon earth, the Church will lack the first elements of strength and stability. The members of the Church must gladly render others the loving service that reached them and awakened their desire for right living, or the Church will slowly die. The condition of life in the Church everywhere is that it must be constantly winning others to allegiance to its great Head.

The Church must not only learn from the very first to be exemplary in pure and honest living, and in eagerness to give to others the good which itself enjoys, but it must also learn from the first to give generously for the support of its own institutions that it may stand upon its own feet. This is no place to enter upon any discussion of the doctrine of “self-support” as it is technically called on the field. The principle is now universally admitted that the newly constituted church-members must be taught to give for the support of their own pastors and for other expenses of the church life. But missionaries often err in delaying to press this duty home upon the minds of converts at the very beginning. This is partly due to lack of understanding of the fact that the Church, which has learned to expect subsidy, will fall into confusion and confusion the mission and its subsidies are taken away. It is more often due to indolence. The missionary sees that the sums required are very small and feels that it is far easier to give them himself than to extract them from the pockets of people who seem, and who probably are, poverty-stricken. There should never be a day’s delay in teaching the converts their duty to set aside, as the Lord has prospered them, funds for His uses.

The Church on pagan soil which has grown to the point of being what it can be among the forces of reform; able to stand without aid and incentive from foreign lands; to govern itself, to maintain itself, and to use with eager initiative every opportunity to advance the interests of the Kingdom, is thereafter the leaven hid in the mass, performing the part falling to it in its Master’s plan. It has become a center whence Divine influences will radiate with beneficent results while life continues. And there is no earthly joy greater than that of the missionary in a land of thick darkness, who has served as an instrument in the hand of God to lead converts during their early essays at walking in the Way; to organize them into a church and to train them to fruitful activity in carrying on the work of Christ for the world. That missionary has had to efface himself, so to cast himself upon his Leader for guidance in many a perplexing crisis; but he has
had a share in a work of eternal duration, and whose pervasive influence none can measure. For such, a living church is the very body of Jesus Christ, precious in itself, and beyond price in its worth to the nation which is blessed by its presence.

CIENG BAU: A town in the province of Fokien, China, situated about 10 miles S. by E. of Kien-ning. Station of the CEZMS (1897), with (1902) 3 missionary women, 2 native women helpers, 1 elementary school, 1 high school and 8 converts brought in for baptism during the year.

CIUDAD DEL MAIZ: A town in the State of San Luis Potosi, Mexico, about 70 miles E. of the capital of the State. Station of the Associate Reformed Presbyterian Synod of the South, with 1 missionary and his wife, 1 missionary woman, 4 native workers, men and women, 2 places of worship, 2 elementary schools, 1 Sunday school, a Young People's Society and 54 church members.

CITY MISSIONS: This term designates, in current usage, those agencies and methods of work through which the church ministers to the material and spiritual needs of the laboring classes and of the poor in the great towns and cities of Christian lands. They may be (1) the manifestation of Christian love for the ingathering and instruction of neglected children, the evangelization of the masses, the relief of the poor and wretched, or the rescue and reforming of the depraved and the vicious.

Great cities in all circumstances require work of this sort; its spirit and the model may be studied in the attitude held by our Savior toward Jerusalem. A large population inevitably includes a considerable proportion of poor people who are living in a single room, twenty to each dwelling house, or a single roof, with common entries and halls, or the rescue and reforming of the depraved and the vicious. Great cities in all circumstances require work of this sort; its spirit and the model may be studied in the attitude held by our Savior toward Jerusalem. A large population inevitably includes a considerable proportion of poor people who need from their more prosperous neighbors the helping hand. The poor are compelled by the exigencies of their condition to inhabit the tenement system, a city of the same size, the growth, for example, of Chicago, which in 1880 numbered 503,185 souls, in 1890, 1,098,576, and in 1900 had reached 1,698,715.

If the city churches had nothing more to do than to keep pace with the expanding population, their task would be one of no small magnitude; but other elements have entered into the problem which very seriously enhance these difficulties. The steady flow of the human stream into the great towns has crowded them to an oppressive and truly terrible degree. Such overcrowding has had a twofold evil effect upon the artisan; it has prodigiously increased his rent, plunging him into so much the deeper poverty; it has driven him into narrow, and more narrow quarters, until it has stripped him of every semblance of a home. The census of 1880 reported one-third of the families in Glasgow as living in a single room, and another third as occupying but two rooms. Less than one family in ten in the Scottish metropolis enjoyed so many as three rooms, and never more than six or eight, sometimes as many as twenty-five, have been huddled together under a single roof, with common entries and halls, narrow rooms, and dark bedrooms. This plan of housing the working people is the one that generally prevails in American cities, although there are some marked exceptions, like Philadelphia. Fully one-half of New York's population of 3,437,202 souls are at present living in her tenement-houses.

The ordinary city tenement offers to its unfortunate inhabitants the poorest conceivable apology for a home. Its atmosphere is both physically and morally poisonous, notwithstanding the efforts constantly made in London and New York to remedy these conditions. The saloon is at the corner, the drunkard reels up the common stairs; the shouts of countless rude, neglected children fill the air with shrill profanity; the discordant notes of the neighbors' quarrels and the wail of sickly babes pierce the thin partitions. There is no quiet day or night, no privacy, no chance for the development of healthy family life. From the midst of such environments the city missionary must glean his scanty harvest.

The problem of city evangelization is further complicated by the fact that in their growth the great towns have a tendency to remove those portions of society whose influence would naturally be conservative and helpful from those who most need their help. The dwellings of rich and poor are more and more widely separated from one another. The most flourishing and able churches are farthest away from the fields that most urgently require their aid. The suburban movement, like a great eddy, draws off into the beautiful park-like villas about the town great multitudes of the middle-class folk—the bone and sinew of the churches' strength.

In addition to these difficulties, religious effort in the cities of the United States meets with an even more serious obstacle in the complex and...
the yard. At another time I saw two women fighting, when one who had fallen dragged the other down by the long hair of her head, then bit pieces out of her lips and cheeks and spat them out of her mouth. One Sunday, on going out early, I saw a woman, with the blade of a knife sticking out of the chest-bone. She had robbed a sailor of all his money, and he had stabbed her. I also witnessed a murder when a Spaniard killed a girl named Norah with a dagger, and before I could prevent it, he blew half his head off with a pistol. After I had succeeded in opening a room for meetings, and a ragged-school in the center of my district, I was often stopped in the service by cries of murder and by fights.

After many years of unceasing effort I gained entrance into many rooms, and into most of the dens. My care for the sick and the children disarmed opposition; then, in room after room, attention was secured to the reading of the Bible. Friendship on the part of many took the place of hostility, and I have been rescued from a band of roughs by a powerful and savage Irish woman, who on that very evening was arrested for robbery, and was transported for five years.

"The work went on; people listened; the ragged school was crowded, and the meetings were well attended; soul after soul was brought under conviction, and many were gathered into the fold of Christ. The neighborhood was opened up to the clergy and consecrated lay-workers; sanitary and other improvements were made; and so, through the entering in of the Gospel, the district changed its character to that of a far more respectable place."

Another class of these religious agencies may be encountered in some of the cities of Europe, where they have sprung from the kindly interest of a single individual, like the old Belleville mission in Paris. A lady named Miss De Broen was a worker in the Mildmay Mission, London, being in Paris, just after the outbreak of the Commune, visited Père la Chaise. Only the night before 500 communists had been shot there, and the long ditch into which they fell one by one became their common grave. A crowd of ragged women and children surrounded the spot; their grief and despair were terrible to see; and Miss De Broen longed to do something for their relief. Every man engaged in the Commune was shot, transported, or had to flee the country. Thousands of women were thus left destitute and unable to obtain work. Even the priests and Sisters of Mercy shunned them. No one cared for them. Miss De Broen raised money by personal solicitation, engaged a room, and, passing to and fro in the streets of Belleville, which had been the center of the Commune, she spoke to the poor women, saying that she knew of their distress, and that if they would come to her room they would receive five pence for three hours of needlework; at the same time she told them that her chief object was to tell them of the Lord Jesus. The hind boundation sounded strangely in their ears, the greater number hardly understood it, and the first time only three were present. Eight came to the next meeting, and from that time the numbers steadily increased. The ignorance of these poor women was surprising, and at first they were rough and sullen. Many had seen their poor women was surprising, and at first they were rough and sullen. Many had seen their husbands, sons, and brothers—in the war and in those last awful

days of the Commune; all had known the agony of lengthened starvation, buoyed by false hopes and cruel treachery. Goaded on by pangs of hunger, some had concealed weapons in their clothing, and had attacked the soldiers unawares; worse than this, in their frenzy, they had done. But after only a few months in the sewing-classes a great change had come over the poor creatures; no fierceness and no sullenness now, but an earnest, even a softened, expression appeared on many a face. In addition to the sewing-classes and Gospel meetings at La Villette, night-schools were soon opened for the benefit of many men who had been imprisoned, at the time of the Commune, but who, no charge having been found against them, were liberated after a few weeks. They could not read or write, and were glad to be taught. The McAll Mission in France is another instance of similar work.

The Salvation Army has proved a most effective agency for mission work in cities. Its methods and style of presenting religious truth, and the language used by its members, arrest and secure attention. It has been observed that "from the lower classes, to the lower classes". Whether this characterization is just or not, its members never forget that a large part of the masses whom they would reach will not listen to those who have not warm sympathy of feeling for them, and can receive impressions and ideas through the simple, perhaps rough, but picturesque language, only, which the common people use. Besides its regular religious services in its own halls or "barracks," in almost every city, even to the ends of the earth, which permits the practice, it holds street meetings where they are most needed—near the resorts of the vicious. Its groups of "slum sisters" seek out the sick and needy, and comfort or otherwise help the despairing. It also maintains labor bureaus; various simple industries where the unemployed, however unskilled, can earn a living; lodging houses for men; inquiry bureaus; day nurseries for the small children of working women; shelter houses for homeless women; missions for the rescue of women who have gone astray, and he uses for such to use as a means to reform, etc. The Volunteers of America do a similar work in several American cities, and have found a way to lay hands upon criminals in prison in order to lead them to honest ways upon their release. Whatever may be said, justly, in the way of criticism, the Salvation Army and its offshoots or imitators have certainly had great influence in stirring up the churches to an appreciation of the needs of the poor, and especially of the power of direct contact to win and elevate the outcast.

One of the earliest steps taken by Mr. Hogg, the boy-loving merchant of London, when he decided that street Arabs must be saved, was to become a shoe-black himself for six months, that he might know the humdrum life of the poor. The signs were not misunderstood. The good boys notion of sympathy for them, the greater number hardly understood it, and the first time only three were present. Eight came to the next meeting, and from that time the numbers steadily increased. The ignorance of these poor women was surprising, and at first they were rough and sullen. Many had seen their own little ones pine in the cold and hunger of the siege; others had lost all—husbands, sons, and brothers—in the war and in those last awful
are made conspicuous, not alone in work like that of the Salvation Army, but in the work of the Young Men's Christian Association and especially of the University Settlements in the great cities. It is through watching such methods that we seek and realize that no man or ignorant person is ever treated as Jesus would treat him when sent away with a mere gift of money.

The Boys' Club House, not connected with any church but exercising a strong uplift both moral and physical through bringing neglected boys into touch with those who have not been neglected, is an institution already developed into a power in many cities. New York has a number, of which the largest, with a membership counted by thousands, is one built by Mr. Harriman at the corner of 10th Street and Avenue A. The type of this class of institutions can best perhaps be seen in the Polytechnic in London. This institution began when Mr. Quentin Hogg, at the age of 18, one evening in 1883 sat down on a chair way in a London street, with a candle stuck in a bottle for light, to teach two street Arabs to read the Bible. It is now a vast form of priceless value, both in what they prevent and what they secure.

While these religious agencies may be encountered in all cities in England, the United States and Germany, and while they are carried on by all denominations, including Roman Catholics and Hebrews; and while in Roman Catholic countries the various religious orders conduct city-mission work on very similar lines, such religious agencies are not by any means the only ones working for that general uplift of the poor which we have described as a part of the object of city missions.

So far as the purpose is concerned in beneficent work for the poor and their laborers, many municipalities do true city mission work by applying disinfectants to the hotbeds of vice and restoring home and family life destroyed by the congestion of cities. The work of Glasgow in reforming its tenement house districts would require a book in itself; if the full and far-reaching results were to be made clear, of an intelligent and kindly interference of a city government. The introduction by law of decency, some measure of privacy, opportunity to enjoy light and air, and other inspiring improvements in the tenements, and the establishing of little parks and breathing grounds and play-grounds for the poor, tend to lift them out of depths to which the greed of landlord and employer has sunk them. This is true missionary work, as the cities do not concern themselves in this direction, but do not, as the name, of the same class are a host of beneficent enterprises, found in greater or less degree in all cities, which do one part of the work of the city mission. An instance of such an instrumentality for improvement in the City of New York is the Charity Organization Society, founded in 1883, as a sort of link between the different charitable resources of the city, whether religious, denominational, or independent of church connection. It is entirely disassociated from questions of creed, politics, or nationality, and it does not administer alms from its own funds; but it advises, informs, and induces all who would aid in any way in bearing the burdens of the ignorant and helpless.

One of the benevolent independent bodies aiding the poor in New York is the Legion Aid Society, which comes to the aid of the poor in any case where deserving persons are unjustly treated by employer or landlord. Another is the Sanitary Reform Society, which sees to it that the requirements of the Board of Health as to tenement houses are fulfilled. The number of the boys' clubs which are fostered on unsectarian lines is considerable in all the cities. Furthermore, besides the hospitals, there are diet kitchens for the sick poor, burial societies that provide for the needs of the dead, and many other enterprises aimed by kindly sympathy toward the help of those who need help. One of the most touching of such kindly undertakings is what is known as the Little Mothers' Aid Association, which has for its object the securing of needed rest for girls of from 10 to 14 years old, who have the care of younger brothers and sisters during working hours when the mother is away. It takes such girls to its Holiday House for a day's, or a week's rest and entertains them at Christmas or at Easter. Of the same class are the Fresh Air enterprises founded in every city, which give summer outings and country life to mothers and children from the tenement house region.

The money for the regular support of such agencies comes sometimes as thank-offerings, and often in large sums given unsolicited; but the means are never wanting.

As a result of all these evangelizing and humanizing instrumentalities there is less drunkenness, less pauperism, less crime, in the great cities today than ten years ago. The missionary spirit is abroad, and it is one of the modern miracles to see a city growing better while she is daily adding to her innaecity.

CIUDAD VICTORIA: Capital of the State of Tamaulipas, Mexico, situated about 125 miles N. W. of Tampico, at the foot of the Sierra Madre Mountains. Station of the PS (1889), with (1902) 1 missionary woman, 2 native workers, 6 outstations, 1 Sunday school, 1 elementary school and 31 church members. Station also of the American Friends' Foreign Mission Association (1887), with (1900) 1 missionary, 22 mission workers, 15 native workers, 15 men and women, 8 outstations, 2 elementary schools, 1 high school, a printing house and book depot and 540 professing Christians.

CLANWILLIAM: Town in Cape Colony, South Africa, 140 miles N. by E. of Cape Town. Population, about 7,000. Climate, temperate and healthy. Station of the SPG (1898), with (1901) 1 missionary and 175 professing Christians.
CLARENDON: A town in the island of Jamaica, W. I., circuit of the United Methodist Free Churches (1858), with (1901) 1 missionary, 31 native workers, 4 places of worship, 4 Sunday schools, 3 day schools, and 236 professing Christians.

CLARK, Ephraim W.: Born Haverhill, N. H., April 25, 1790; graduated at Dartmouth College, 1824; Andover Theological Seminary, 1827; ordained at Brandon, Vt.; sailed as a missionary of the ABCFM, November 3, 1827, for the Sandwich Islands, reaching Honolulu, March, 1828. In 1852 he went with the first company of American and Hawaiian laborers to assist in commencing the mission in Micronesia. In this duty he represented the Hawaiian Missionary Society. In 1883, having been for fifteen years pastor of the first Church at Honolulu, he resigned the pastorate, partly because of insufficient strength, but chiefly that he might engage more fully in Bible revision. Having spent a year on that work at the islands, he was sent to New York in 1884 by the mission to superintend the printing of the Hawaiian Scriptures by the American Bible Society, preparing proofs, preparing references, etc. This was followed by the translation and printing of the Tract Society's Bible Dictionary, and several other books and tracts. The last work completed was a hymn and tune book. He did not return to the islands. He died July 15, 1878, aged seventy-nine.

CLARK, Robert: Born 1825, at Harmston Vicarage, Lincolnshire. He took his degree as twenty-eighth wrangler at Trinity College, Cambridge, and was at once ordained to be his father's curate. In 1851 he offered himself to the CMS, and was sent to the Punjab Mission. He was one of the first two missionaries of the CMS to the Punjab, being stationed at Amritsar. In 1854 he was one of the first two CMS missionaries to Peshawar, and went there at a time when many believed that preaching the Gospel would be followed by assassination of the preacher. In most of the important stations in these provinces he did pioneer work. The most of his missionary life, however, centered at Amritsar. As secretary of the Punjab Bible and Religious Book Societies, he did much to provide and diffuse Christian vernacular literature. He was a good organizer, knowing how to make the most of his associates. In 1877 he organized the Punjab Native Church Council, and in the following year he established the Alexandra Christian Girls' School at Amritsar. After the publication of his Commentaries on the Gospel of St. Matthew, St. John, and the Acts of the Apostles, he received a Lambeth degree of Doctor of Divinity. Dr. Clark retained the office of Chairman of the Church Council for nearly ten years, the secretariyship of the CMS Mission till 1897, and the honorary secretariyship of the CMS from 1900, the seventy-fifth year of his age and the forty-ninth of his missionary career, he entered his rest at Kasauli, in the Himalayas.

CLARKABAD: A Christian village in the district of Lahore, Punjab, India, situated about 45 miles S. W. of the city of Lahore. Station of the CMS (1859), with (1901) 2 women missionaries, 9 native workers, 1 preaching place, 2 native churches, 221 communicants. Also stationed here is the CEZMS (1882), with (1902) 1 woman missionary, and 1 orphanage with an industrial department.

CLARKEBURY: A town in the northeastern part of Cape Colony, S. Africa, lying about 22 miles S. W. of Umtata. Station of the South Africa Wesleyan Methodist Missionary Society, with (1900) 1 missionary, 37 native workers, 9 preaching places, 8 Sunday schools, 2 high schools, 1 industrial school, and 600 professing Christians.

CLARKSON: Station of the Moravian Mission (1839) on the southern coast of Cape Colony, S. Africa. It is pleasantly situated on a mountain slope, about 80 miles W. of Port Elizabeth. The name of the settlement is that of a philanthropist who contributed largely toward the expense of the station's establishment. The present force at this station consists of 1 missionary and his wife, and 27 native workers, men and women, with 3 places of worship, 2 schools, and 214 communicants.

CLAY ASHLAND: A town in Liberia, West Africa, on the St. Paul's River, northeast of Monrovia. Station of the PE (1853), with (1901) 1 lay missionary and his wife, 2 native workers, 1 place of worship, 1 common school, and 25 communicants. Station also of the ME, with (1902) 1 native worker, 1 preaching place, and 81 professing Christians.

CLAYOQUOT: A settlement on the western shore of Vancouver Island, British Columbia, station of the Methodist Church in Canada (1899), with (1900) 1 missionary physician and his wife, 1 Sunday school, a dispensary, and 8 professing Christians.

CLYDESDALE: A town in Cape Colony, S. Africa (Griqualand East), situated 60 miles S. W. of Pietermaritzburg. Station of the SPG (1871), with (1900) 1 missionary, 18 native workers, 8 places of worship, 6 elementary schools, and 353 communicants.

COAN, Titus: Born at Killingworth, Conn., February 1, 1801; died at Hilo, Hawaii, December 1, 1882. In August, 1833, under the direction of the American Board, Coan sailed on a mission of exploration to Patagonia, and with Rev. Mr. Arms he was the first white man to see the savages of Gregory Bay. For several months Coan and Arms lived among the ferocious nomads of the eastern coast of Patagonia; but the savages becoming suspicious of their motives, they escaped, returning to New London in May, 1834. Mr. and Mrs. Coan arrived at Honolulu, June 6, 1835, and the following month they reached Hilo. Upon his arrival Coan found that some of the natives had already been cast into the lumps of heathenism; missionaries had resided here for brief periods; schools had been established; one-fourth of the natives could read; and there was a church of thirty-six members. In three months' time he began to speak in the native tongue; and before the year closed he had made the circuit of the island by canoe and on foot, a trip of three hundred miles. He was inconstant in his labors. He preached forty-three times in eight days, examined twenty schools and more than 1,200 pupils, conversed personally with multitudes, and ministered to many sick persons during a tour of thirty days through the island. On a trip made in the latter part of 1833, signs could be seen of the coming Pentecost. Multitudes gathered to hear the Word; and so eager were the people to hear the message of salvation that one morning he was constrained...
to preach three times before breakfast, which he took at ten o'clock. In 1837 the great revival commenced. Nearly the whole of the population of Hilo and Puna attended religious services; the sick and the lame were brought in litters and on the backs of men; and at any hour of the day or night a bell was tolled in the church yard, or at the places for prayer and preaching. The great harvest years were 1838 and 1839. Seven or eight thousand natives had professed conversion; but very few had thus far been received into the Church. The utmost care was taken in selecting, examining, witnessing, and teaching the candidates. The first day of July, 1838, occurred the greatest accession to the Church; 1,705 took upon themselves the vows of God that afternoon; and 2,400 communicants sat down together in the Church at Hilo; and these composed about three-fourths of the adult population of the parish. To show the abiding result of this wonderful work of grace, about one in sixty came under discipline; the greater part of these were received, and very few were finally cut off. Under the most careful training the people became more and more settled in faith and morals; and probably to-day the ratio of people in New England who cannot read and write is greater than among the Hawaiians in Hilo and Puna. In 1867 the old church was divided into seven local churches, six of them with native pastors. Mr. Coan's two books, *Adventures in Patagonia* and *Life in Hawaii*, are of great interest.

Coan (Mrs. L. B.) *Titise Coan*, Chicago, 1885.

**COCANADA:** A city in the Godavari district, Madras, India, situated 86 miles S. of Vizagapatam; navigable canals connect it with the Godavari River. Population (1891) 40,600, of whom 90 per cent. are Hindus. Station of the BOQ (1874), with (1902) 9 missionaries, men and women, 3 chapels, 25 Sunday schools, 52 village schools, 1 high school, 1 training class for Bible women, 1 industrial school, a dispensary, a printing-house and 234 communicants.

**COCHIN:** A native state on the W. coast of India, between the Western Ghats and the sea, and north of Travancore. It has an area of 1,362 square miles and a population (1901) of 812,025. The prevailing religion is Hinduism. There are, however, some groups of the ancient Syrian Christians of the Jacobite church still remaining in this region. The CMS commenced mission work in Cochin in 1817, at first in association with the Syrian Church. Since 1847 it has worked separately, alotho the reform party in the Syrian Church aid its ministers in evangelistic effort. The CMS has 2 stations in Cochin with which 143 Christians are connected and with 1,144 pupils in the mission schools.

**COCHIN-CHINA:** A province of French Indo-China, lying along the coast to the south and east of Cambodia. It has an area of about 22,000 miles and a population of (1901) 2,968,529. The population is composed chiefly of Annamites, Cambodians and Chinese, with a certain number of Malays, Indians and Europeans. The religion of the people is for the most part Buddhism, with a considerable number of demon-worshippers, a few Mohammedans and about 75,000 Roman Catholics. The chief production of the country is rice, of which large quantities are exported to China. A considerable portion of the trade of Cochín-China reaches the sea through the ports of Saigon, of which Saigon until 1902 was capital of French Indo-China and the residence of the Governor-General, who now resides at Hanoi in Tonking. Protestant missions do not exist in Cochín-China, but the Roman Catholic missions are pressed with vigor and success.

**COCHRAN, Joseph G.** Born in Springfield, N. Y., 1817; graduated Amherst College, 1842, and Union Theological Seminary, 1847; sailed the same year as a missionary of the ABCFM for the Nestorians. He took the place of Mr. Stoddard as principal of the male seminary at Séir, and with that school his life's work was identified. From 1851 till the death of Dr. Stoddard, in 1857, the two were associated in the conduct of the seminary. Mr. Cochran then became principal and continued such till 1865. During those seventeen years it is said that he did more than any other man to educate and equip teachers and preachers for the Nestorians and for Persia. When he took charge there was no congregation or Sabbath-school; before the close of his life several churches were organized and a presbytery formed, embracing twenty-five congregations. He was a voluminous author and translator in the Syriac. He prepared a very complete Bible Geography and History, and several school-books, as Algebra, Astronomy, Natural Philosophy, and later, a valuable work on Pastoral Theology and Homiletics. He died November 21, 1871, after an illness of thirty days.

**CODACAL.** See Kodacal.

**COIMBATORE:** Capital of the Coimbatore district, Madras, India, situated at an altitude of 1,348 feet in a hilly country, 84 miles S. E. of Calicut. The climate is cool and healthy, the malaria infects the regions at the foot of the hills. Population (1901) 53,050. Station of the LMS (1830), with (1901) 6 missionaries, men and women, 103 native workers, men and women, 29 Sunday schools, 52 village schools, 1 high school, 1 home for boy and 1 for girl pupils and 279 church members. Also station of the Leipzig Missionary Society (1860), with (1900) 1 missionary and his wife, 1 missionary, 14 native workers, men and women, 10 churches, 1 school and 984 professing Christians. Station also of the SPG (1895), with (1901) 13 native workers, 1 chapel, 2 schools and 187 adult baptized Christians. The PB also has 1 missionary and his wife there.

**COKE, Thomas, LL.D.:** A clergyman of the Church of England and a graduate of Oxford. In 1776 he became the intimate friend of John Wesley, and entered heartily into his plans for the spread of the Gospel. He worked with Wesley for 15 years as superintendent of his work. In 1790 he set sail from England on a mission to Nova Scotia under the WMS. Returned to England to raise funds for the WMS mission in the West Indies. In the course of seven years Dr. Coke made four voyages for that mission, and also visited the United States at the formation of
the Methodist Episcopal Church. He superintended the work on the West India Islands, and under his wise guidance the mission prospered exceedingly. He now turned his attention to Ceylon and India. He was so anxious to commence this mission for the WMS that he offered to defray all the expenses himself, amounting to £6,000, and to go with the missionaries. His friends tried to dissuade him from this long voyage, but he said, "If you will not let me go you will break my heart." He sailed from Spithead in company with six others. On the ship he was taken ill; a shock of paralysis followed, and he was found dead in his cabin. He was buried at sea June 1, 1814.

COLAR. See KOLAN.

COLESBERG: A town in Cape Colony, S. Africa, situated 57 miles north of Middelburg, on high land (4,403 ft). Population, 2,000. Station of the South African Wesleyan Methodist Missionary Society, with (1900) 22 native workers, 4 chapels, 5 schools and 266 professing Christians.

COLLEGAL: A town in the Coimbatore district, Madras, India, 34 miles E. S. E. of Mysores. Station of the PB, with (1900) 1 missionary and his wife, 4 missionary women and 1 orphanage. The name is also written Kollegal.

COLOMBO: Capital and chief seaport of the island of Ceylon; situated on a peninsula on the W. coast. It resembles a European town. Population (1901) 158,228, Tamil, Singhalese, Europeans and Eurasians. It is an important missionary center. The BMS established a station there in 1812, which now has 1 missionary and his wife, 1 missionary woman, 1 native worker, and a high school. Also a station of the WMS, with 10 missionaries, men and women, 99 native workers, men and women, 7 outstations, 17 elementary schools, 2 high schools, 1 college and 552 communicants. Also a station of the CMS (1852), with 14 missionaries, men and women, 143 native workers, men and women, 67 elementary schools, 3 high schools and 17 missions. Also a station of the SPG, with 1 missionary, 15 native workers, 1 elementary school, 1 high school and 1 college. The Christian Literature Society for India has a missionary and his wife there with 8 native workers, a printing-house and a book depot. The YMCA (1896) also has a missionary and his wife there; the YWCA has a woman missionary, and the Salvation Army a post, of which the statistics are not published.

COLOMBIA: A republic of South America, occupying the northwestern corner of the continent, adjoining the Isthmus of Panama, and bounded on the east by Venezuela and on the south by Ecuador. The whole of that section gained its independence from Spain in 1819, but soon split up into Venezuela, Ecuador, and the Republic of New Granada. In November, 1821, the state of Panama broke out the Colombian officials and declared itself an independent republic.

The language is Spanish and the religion Roman Catholic, the other religions are permitted so long as their exercise is "not contrary to Christian morals nor to the law."

The ABS has an agency at Bucaramanga and the PN has 3 mission stations with 18 workers, men and women, and 6 schools.

COLON: Town of 4,000 inhabitants in the Republic of Panama, situated on the N. side of the Isthmus of Panama. Station of the Wesleyan Methodist Western Conference of the West Indies. The working force in 1900 was 1 missionary.

COLONIAL AND CONTINENTAL MISSIONS: These are missions established by the different churches of England, Scotland, and Ireland, primarily for work among the English residents of the colonies and on the continent of Europe, and secondarily, to assist various evangelical churches in Europe in their own home work. They carry on their work by sending out special missionaries, appointing chaplains, assisting in the erection of chapels, giving grants in aid to local churches and organizations, assisting in schools, providing for divine service at army and navy stations, etc. One of their most important lines of work is that of supplying services at the various resorts of summer and winter visitors on the continent of Europe. Almost every prominent resort of tourists has one or more chapels, where there is preaching on the Sabbath by a minister, who is on hand also through the week to render assistance such as a pastor can give in case of need. These stations are in some degree, sometimes entirely, supported by the gifts of those who attend. But it is the rule that some one of these societies is the actual supporter of the services, without which the Sabbath of the traveler would give no opportunity for congenial worship. Another line of work scarcely less important than the so-called regular foreign missionary work is that of supporting those evangelical churches that, under great discouragements and amid much opposition, in Belgium, France, Italy, Spain, Bohemia, and Moravia, are seeking to stem the tide of heathenism and preach a pure Gospel. Many of them would be not only weakened, but crippled and even overpowered, but for the timely aid received by them from the Christians of Great Britain, largely through the medium of these societies.

Many of the foreign missionary societies carry on a colonial and continental work of the above description in connection with their work for heathen and Mohammedan lands. Among these are the Society for the Propagation of the Gospel, the South American Missionary Society, the Methodist and Baptist Societies.

COLUMBIA: A settlement in the Transaki district, Cape Colony, S. Africa; situated about 18 miles S. E. of Butterworth. Station of the UFS (1878), with (1900) 1 missionary and his wife, 27 native workers, 18 schools, and 363 communicants.

COMBACONUM: The most sacred town in Madras, India; situated 22 miles N. of Tanjore in the most fertile part of the Cauvery River delta. Population (1901), 59,673, ninety-five per cent. of whom are Hindus. Station of the Leipzig Missionary Society (1856), with (1900) 1 missionary and his wife, 12 native workers, 19 chapels, 7 elementary schools, 1 high school, and 664 professing Christians.

COMBE. See Paramaribo, of which it is part, for joint statistics.

COMITY of Missions: Comity implies courtesy and kindly consideration and sympathy shown.
to others. The comity of nations is defined in the dictionaries as "that friendly and mutual courtesy under which various beneficial acts and recognitions, not obligatory, take place between nations." A certain self-restraint or even self-denial accompanying such kindly courtesy is suggested by this definition. Since Christians do not feel self-denial in doing kind acts for fellow Christians, we must modify the definition slightly in this place. Interdenominational comity of missionaries, or comity of missions, is that friendly and mutual courtesy under which various beneficial acts and recognitions take place between missionary societies or missionary societies of different organizations because they are working for one purpose under the one Master and Lord, Jesus Christ.

In the presence of the principle of love to all men explained and enforced by Jesus Christ, then it is hardly need to point out other reasons why missionaries struggling with a gigantic task in an unsympathetic multitude should be kindly and courteous to one another. Yet other elementary factors enter into the obligation to cultivate comity in the enterprise of missions. These are underlying truths such as God's unswerving purpose that His word shall be as the rain which waters the whole earth, making it to bud and bring forth, and give seed to the sower and bread to the eaiser. Because of that eternal purpose the work of disseminating knowledge of the Gospel is one and indivisible. Again, the effective agency in this work is God's word and not man's deductions from it. Hence the resulting fruitfulness of barren lands shall be to Jehovah—not to the men who are used as God's instruments in the work, but to Jehovah and to His mission. Another of these elementary factors is the aim of missions. This aim is not to publish a human philosophy of the plan of salvation. It is to make Jesus Christ known to those who know Him not, in order that they may yield allegiance to Him and follow Him. To such an end all evangelical missions are united, becoming branches of a single, vast enterprise in which self-will of men must be subordinate to the King. This implies that the heresy must be resisted which would rate different degrees of interpretation and outward practice of the mission. If such denominational differences cannot destroy unity of purpose and action unless the spirit of self-will has taken the place of the Spirit of Christ as the impelling power. Those who are in Christ are one body. The conclusion is irresistible that Warneck has struck a right note in urging upon all evangelical missionaries the point that when evangelical denominations are united, becoming branches of a single, vast enterprise in which self-will of men must be subordinate to the King.

have been more, had not all been won from the church of another denomination—"since it takes twice as much effort to convert one who is already a Christian as it does to convert a heathen." Such peculiarities of missionary literature suggest the direction of the selfish dis­courtesy and unkindness sometimes practised by missionaries toward those of another denomina­tion. Many instances are cited of the entrance of some narrow enthusiast into the mis­sion field of another evangelical denomination to apply the church members with objections to some detail of the teaching by which they have been brought to Christ, and to present with feverish industry enticements to enter a different fold. Then some veteran missionary, aghast at such intrusion, writes home in humiliation, "Men whom I baptized in infancy thirty years ago, and whom I have lovingly nurtured into Christian manhood, are now being invited by these newcomers, who have neither called on me nor seen me, to canvass the question whether or not I am a minister of Christ." Moved by such a spirit of discourteous rivalry, the intruding mis­sionary gathers up native workers who have been dismissed for cause, and church members who are under discipline, and lavishes upon them courtesy and unkindness sometimes practised by missionaries toward those of another denomina­tion. The Society calmly explained to the intruder's superiors the effects of such intru­sions from entering territories so assigned. The missionary societies. Rev. Dr. Alexander Duff, on the principle of putting half a dozen denomini­cal denominations on the mission field. A clear-headed missionary, grieved in soul, asked the Primitive Methodists (England) to send mission­aries. About the same time Bishop Crowther, of the CMS, hearing that there was now toleration in the island, went there with a view to opening mis­sionary work. Residents in the island immediately begged the Bishop to send them preachers, and put into his hands $1,000 toward the expense of building a chapel. But when the Baptists, who had a claim of former occupancy, and the Bishop, who had a claim of present readiness, heard that missionaries of the Primitive Method­ist Society were already on the way, they both withdrew; the $1,000 was given back to its donors, and when the Methodists arrived they found a clear field. Similar cases of territorial lines and of spheres of influence respected by the different societies. Recent action respecting mission fields in Porto Rico and the Philip­pines, taken in conference together by the several American missionary societies, seems to show that this method of settling the front of activity in the United States has been more practical and effective. Dr. J. C. Gibson, of Swatow (in Mission Problems and Mission Methods), has published a diagram showing in a very telling way the waste of legitimate influence by the missionary enterprise through crowding centers of influence too closely together. But, notwithstanding all that can be said in favor of the plan of territorial lines which aim to secure observance of comity by keeping denominations apart, the result is often satisfactory. Where a missionary society is laboring among people of which some clans branch off into a region inhabi­

### Comity

**The Encyclopedia of Missions**

From the beginning of modern missions attempts have been made to secure full practical application on the mission field of the principle of comity of missions. A favorite experiment has been to attempt delimitation of fields or spheres of influence. The natural feeling underlying such efforts led the Baptist (U. S.) Triennial Convention, as long ago as 1835, when contemplating an enlargement of their enterprise of foreign missions, to authorize the board of man­agers to establish new missions in every unoccupied field. The theory of territorial delimitation has generally suggested that in fields already occupied missionaries be instructed to keep out of the districts where others are laboring, and that in new fields missionary societies arrange among themselves bounds within which each will conduct operations. It is then assumed that priority of occupation must bar other denominations from entering territories so assigned. The action of Abraham and Lot in dividing Canaan is often urged as a model to be followed by mis­sionary societies. The veterans, Dr. Alexander Duff, on seeing the envious glances cast by some of his colleagues toward a prosperous field occupied by another society, said: "I would as soon leap into the Ganges as to think of going to Timneveli except as a brother to see the good work that is going on." A striking instance of missionary comity was seen a few years ago in the island of Fernando Po. The island was once occupied by the Baptist Missionary Society (England), until it was expelled by the Spanish Government. After many years people in one part of the island asked the Primitive Methodist Missionary Society to send missionaries. About the same time Bishop Crowther, of the CMS, asked the Primitive Methodists (England) to send missionaries for their instruction. People in another part of the island asked the Baptist Missionary Society to send missionaries. About the same time Bishop Crowther, of the CMS, asked the Primitive Methodists (England) to send missionaries for their instruction. People in another part of the island asked the Baptist Missionary Society to send missionaries. About the same time Bishop Crowther, of the CMS, asked the Primitive Methodists (England) to send missionaries for their instruction.

Happily, comity is not the rule of evan­gelical denominations on the mission field. Brotherly love is the rule. To quote Dr. A. C. Thompson again: "In general, Christian brotherhood is nowhere so warmly felt as among laborers from different sections of the Church, toiling in the same great harvest-fields of heathendom." The veteran expert on mission theory and practice, Warneck, says: The comity is nowhere so warmly felt as among brothers in the Church toiling in the same great harvest-fields. The estee­m shown on all sides is stronger than the distrust, and respect for one another's bounds is more general than infrac­tion of them."

When infringements of comity occur through insufficiency of information or inadvertence or insufficient information, kindly negotiations may often save the day; as, for instance, when a few years ago the Reformed Church in America had its Arcto field in India entered for a sectarian ral by another zealous denomination. The Society calmly explained to the intruder's superiors the effects of such intru­sion, and these wise and Christian men at home promptly ordered the indirect agent to leave the field, and save his energies for enlightening the heathen.

### Additional Notes

- The Encyclopedia of Missions provides a comprehensive overview of missionary efforts and the principles of comity in mission work.
- The example of the Baptist and Primitive Methodist societies in the island of Fernando Po illustrates the challenges and practicalities of establishing mission fields.
- Dr. A. C. Thompson emphasizes the importance of brotherly love among missionaries, especially when working in the same harvest-fields.
- Current practices and challenges in missionary work are highlighted, with a focus on the balance between territorial delimitation and the need for collaboration among missionary societies.
ted by people of another race and language, and already occupied by another society, it claims the right to follow up the people regarding merely territorial divisions. The passing of boundaries is conscientiously defended as necessary in cases like that of the Reformed Presbyterian missionaries to the Nusairiyeh in North Syria and Cilicia, of the missionaries of the Methodist Episcopal Church among low caste people of the Nahraba Valley in India, and of missionaries to the Jews everywhere. Furthermore, with the increase of Anglican communities, both native and foreign, in India, the Church of England has declared (in 1918) that missionary agreements to "spheres of influence" can no longer be observed. The Church of England must work under the usual principles of parish and diocese in territory which is part of the British Empire. Moreover, aside from these cases of objection to the theory of setting off districts and spheres of influence, the plan is not entirely effective in practice. The real end sought through such divisions of territory, besides avoidance of overlapping, and wastefulness, is relief from injury through disregard of the principle of comity. But will not now, the principle of comity certainly not regard territorial limitations that exist on paper only.

A source of many violations of comity on the missionary field is discontent of native workers with the rules of the mission, and especially with those tending to develop self-support in the churches. It sometimes happens that such malcontents offer to transfer their service to missionaries of another denomination. It requires both coolness and common sense to refuse such applicants. And yet to accept them without close scrutiny would be unwise in any case. In 1838 native workers of the Church Missionary Society in India, having been dismissed for cause, offered themselves, together with the field and its equipment, to the London Missionary Society. Of course the offer was refused. At a later period an able native minister in the employ of the ABCFM in Turkey became dissatisfied and appealed to the Church Missionary Society, offering to convey his whole congregation to the Anglican Church if a missionary could only be sent to teach them. The CMS refused to enter into such a contract with the ABCFM, and the party, which had vainly hoped to profit by sectarian feeling, returned to its former connection. Many attempts have been made to secure a general adoption by the missionary societies of rules looking to the erection of barriers which will prevent one denomination from becoming a house of refuge for church members under discipline in another, and salary from becoming a lodestone to draw men from their posts. The case has even arisen where enactments have been sought preventing adherents from applying uncomplimentary names to the adherents of another mission. As a means of settling such grievances, the establishment of "boards of conciliation" by the different missions has often been proposed. The proposal has never met with general favor. For all such troubles of the mission, the tendency of division among the missions is the most potent agency. The mission field is often at a stage of development has been reached that making such things possible, the history of discussing respecting practical applications of the comity of missions seems to be near its close.

There may be advantage, however, in summarizing, before leaving the subject, the points which seem to be now settled as to the practical applications of the principles of comity in the broad field of the missions of Protestant Christendom. There seems to be general agreement that:

1. Careless overlapping of mission forces and needless reduplications of apparatus and plant is not only a sin against comity but against the Lord of all missions. Whose resources are thus wasted.

2. All evangelical denominations have rights which must be respected on the mission field; and these rights are equal.

3. The presentation to pagans or Mohammedans of an impression of division in the missions would be a sufficient remedy, securing the same ends as a cumbersome board of conciliation.

Discussions of these various plans for securing mutual regard among missionaries and missionary societies have proved the value of regular conferences between missionaries of different denominations, claiming as a regular event in India, China, Japan, South Africa, etc., and similar conferences are established between the officers of missionary societies in Germany, Holland, Scandinavia, Great Britain, and the North American Continent. These Interdenominational Conferences have proved potent agencies for fostering comity relations. It is the wisdom that what territorial limitations and detailed rules as to the minutiae of missionary practice have so far failed to secure in the way of mutual confidence and consideration is in a fair way to be secured through acquaintance and face to face conferences. It is now clear that, whereas different societies have proved potent agencies for fostering cooperation between societies as possible, and also advantageous to all. An example of such cooperation may be seen in the Madras Christian College, founded long ago by the Free Church of Scotland, and now subsidized by the Church Missionary Society and the Wesleyan Missionary Society, and patronized by all societies, so that it has become the great representative of Christian higher education in South India. A similar representative institution at Peking, China, seems likely to be the result of the destruction of Methodist, Presbyterian, and Congregationalist colleges there during the Boxer troubles of 1900. In Japan, in Mexico, and in other fields the press of different denominations cooperate in producing literature that all can, and do, use in evangelistic work. In several countries the different branches of the Presbyterian Church have secured a degree of cooperation amounting to organic union between their missions. And in Japan the world has seen the thrilling spectacle of all evangelical Christian churches cooperating in repeated evangelical campaigns through a union of Christian hearts and abilities which did not originate so much with the missionaries as with the native Christians who demanded and would have it. When a stage of development has been reached that makes such things possible, the history of discussions respecting practical applications of the comity of missions seems to be near its close.
Missionaries of different denominations should meet together, at stated times, wherever possible, for prayer and mutual encouragement and stimulus. They should hold general conferences at regular intervals.

4. Financial or other stringency has taught all that cooperation between evangelical missionary societies must be so extended as to make needless the work of publishing houses, hospitals, and institutions for higher education.

5. For the better cultivation of interdenominational comity missionary candidates should receive instruction on the subject, and official organs of missionary societies should give the public, besides information regarding their own work, ample descriptions of important results gained by others.

Realization of the meaning and the basis of comity of missions carries the mind to a fuller grasp of the fact that in the many-sided missionary enterprises of the various denominations we have before us a movement resembling the march of the different columns of a great army, each independent and differently circumstanced, but all moving under the orders of one general, with certainty that at the critical moment all will be there, all ready for action, and all glad harmoniously to apply their whole power to the one object sought by the great Commander. It is the victorious march of the armies of Jesus Christ which we watch as we see this steady development of closer relations between its units, even while they are absorbed in the struggle with antichrist. Or, to adopt the figure and language of Rev. Canon Edmonds, of Exeter, "As we look at the work of missions we are watching the coming down from God, out of heaven, of the city of God." Let there be no trifling at such a supreme moment of history!

COMMERCIAL AND MISSIONS: Commerce is the exchange of goods, commodities or other valuable property between different peoples. It is the commerce in order to give the meaning of the word, so that it shall include the interchange of scientific and ethical and social ideas between nations, since this is an inseparable adjunct of that intercourse whose object is barter and trade. But in this article the relation to missions of commerce in its narrower meaning will be briefly discussed in order to suggest (1) What Missions owe to Commerce, (2) What Missions have suffered from Commerce, and (3) What Missions have done for Commerce.

(1) Missions owe to commerce the means of transportation and of communication. The earliest missionaries were enabled to reach India and China and Turkey and the coasts of Africa by those means of transportation which commerce had already provided. If the London Missionary Society sent its first missionaries to the South Seas in a vessel especially fitted out by the Society, it was still as a commercial venture that the "Duff" undertook the voyage, and it was through trade that its expenses were paid. In our own day missionaries use, as they would use the natural productions of the earth, the great steamships, the railroads, the telegraphs and the postal facilities which commerce has provided for its own uses. Merely to suggest these things is to show the greatness of the debt which the enterprise of commerce under which missions must ever lie in respect to the means of reaching the ends of the earth.

To commerce, again, missions are indebted for security of abode in many lands. It is as the East India Company opposed the entrance of missionaries into the field of its operations, this purely commercial corporation finally became the protector of missionaries in India during many years. Not only in India, but in China, in Turkey and in Persia, missionaries have owed their safety and their opportunity of access to the people, to those laws and treaties which were designed to secure liberty and security for traders. Missionary enterprises in all of these countries have been carried forward with great freedom because missionaries had a right to claim and to enjoy the same privileges of safe-conduct which governments had secured for the benefit of merchants.

Again, commerce has served missions in the line of discovery and exploration of unknown regions and of acquaintance with unvisited races. There was, for example, Captain Cook's report of his explorations which led the first missionaries to Tahiti. And it was Stanley's long determined struggle to solve the puzzles of Central Africa which prepared the way for other missionaries to follow in the footsteps of Livingstone, and finally to present a civilized Uganda and a peaceful Nyassaland to the merchants of the world.

(2) Nevertheless, commerce has often hampered and sometimes vehemently opposed the work of missions. For example, there is nothing contrary to any law of God or man in buying a commodity where it is abundant, in order to sell it at a profit where it is scarce and in demand. But no law, human or divine, can justify a commerce which takes advantage of the ignorant and defenseless or sells for its traffic articles that injure, degrade or destroy. The African slave trade was a notable example of such conscienceless commerce which long blocked the progress of missions on the western coast of Africa. Dr. Patrick Alexander, of the Scottish Missionary Society, went to the islands against the infamies of the liquor traffic in Polynesia, supported by a long series of similar facts from other parts of the world, show how commerce has sometimes set itself to uproot the beginnings of moral training among child-like races who cannot discriminate between the benevolent missionary and the unprincipled trader. One shameful particular of this complaint against commerce may best be set forth in the form of incidents of actual history, which are, unhappily, typical of facts which may be duplicated in many places.

In October, 1826, Rev. W. Richardson and family labored alone on Maui, one of the Hawaiian islands. The crew of the English whaler "Daniel," Captain Buckle, because the native women did not visit the ship as formerly, complained to the missionary. He offered them brandy to drink with them, but they replied with threats of burning his house and butchering his family. The missionary replied, "Come life, come death, we cannot undo the work of God." Next day the captain promised peace on condition that their demands were complied with. He himself kept a native woman on board, for which he paid $160;
The pervasivecivilizing influence of the teachings of Jesus Christ can best be seen by turning back to the beginnings of missionary effort in uncivilized lands.

Rev. J. C. Bryant wrote in 1849:

"Of fourteen young men who have left my employ within two years, one has since been converted, and of course clothes himself; the rest go naked as before, showing how impossible it is to civilize men without first converting them. Wash a pig and shut him up in a parlor, he may stay clean for a while, but as soon as free he will return to wallowing in the mire. To try to civilize heathens by converting them is to try to make lambs of swine by washing them and putting them in a fleece of wool."

Rev. L. Grout says that, with the Christian Zulus a level field is plowed by oxen, but among the heathen in the same tribe woman is both plow and ox, cart and horse. She is sold for oxen, which are never yoked, but only eaten by their lazy owners. On the other hand, Christians buy plows and wagons, build houses and furnish them. In 1865, 500 American plows were sold in Natal with a growing demand for saddles and harnesses, clothes, books and maps, while the heathen were still marked by nakedness and misery.

English missionaries in Canada had skilled workmen to teach the Indians how to labor. But they would not work. They preferred their wigwams and skins, their raw flesh and filth, till inward transformation through the Gospel led them to work for the improvement of their outward condition. The same is true everywhere. Civilization does not reproduce itself. It must first be kindled, and can then be kept alive only by a power genuinely Christian.

The English Journal of the Society of Arts states that in Lagos, Western Africa, a native built himself an elegant house, furnished it in approved style, and embroidered it in approved style, and yet with his family occupied a hovel adjoining it. Would he have done so if he had been converted?

Dr. J. L. Wilson says of Western Africa:

"Something more is needed to civilize heathen than specimens of civilized life. This would imply that ignorance alone hindered their improvement, whereas in heathenism an aversion to those activities which are essential to prosperity. We look in vain for any upward tendency in pagans till their moral natures are changed."

So in Turkey, while those who do not read the Bible live on in their gloomy and comfortless abodes, chairs and tables, books and book cases, Yankee clocks and glass windows, mark the homes of Bible-readers.

A missionary in that land wrote in 1880:

"The Oriental left to himself is entirely satisfied with the customs of his fathers; no contact with western civilization has ever roused him from his slumber, but when his heart is warmed into life by the Gospel, his mind awakes, and he wants a clock, a book, a glass window, and a flour-mill. Almost every steamer from New York brings sewing-machines, watches, tools, cabinet organs, or other appliances of Christian civilization, in response to native orders, that but for the Gospel live on in their gloomy and comfortless abodes, chairs and tables, books and book cases, Yankee clocks and glass windows, mark the homes of Bible-readers."

Sir Bartle Frere, familiar with heathenism in India and South Africa, says, "Civilization cannot precede Christianity. The only successful way of dealing with all races is to teach them the Gospel."
Sewing-machines abounded. Cups and saucers, places and dishes, lamps, knives and forks, and clocks are in nearly all the houses. The islands furnish a good market for European goods. These material benefits follow, they did not precede, the Gospel. As aged Mangani said recently, two to the Gospel all these beautiful clothes in which I stand upright," but the uprightness of the man was more beautiful than his clothes.

The entire cost of the mission of the ABCFM to Hawaii in 1869 was $1,229,000. But none can deny that this money used in civilizing the islands and opening them to intercourse with the world was well spent on seeing that in 1901 the imports of the Hawaiian Islands from the United States alone were valued at $21,780,000. Similar results of missions may be seen throughout Micronesia and Polynesia, for room has been made for commerce by taming and elevating the people through the Gospel.

Rev. Dr. F. F. Edginwood writes of the relation of missions to commerce:

Three things have been found almost universally true:
I. The Gospel has always elevated the character and estate of civilization in whatever land its influence has reached. More than once it has been confessed that England could scarcely have retained her Indian possessions but for the conservative influence of those missionaries which restrained injustice while they promoted intelligence and loyalty. 

II. The first contacts of commerce are for the most part evil. Whether adventurers precede or follow the missionary, they bring society. Whalers in the South Seas, convicts in Tasmania, slave traders in Ceylon, kidnappers in Melanesia, opium dealers in China, and liquor sellers among the Indians and of every tribe—all have proved a curse. 

There was a time in San Francisco when the courts were paralyzed, and true-hearted citizens felt driven to send to home. Even saloon keepers joined in the call, alleging that without Christian institutions no man's life was safe. 

III. Improvement generally follows. Christian homes are established, and the missionary is supported instead of opposed. Dark as Africa now is, civilizing there fifty years hence will be full of life and light. But we should hasten to show what good is done to the humblest native; and the proudest Caucasian might must not make right, land. A case like that of Kekela; the native misconception or profit of the great powers of Europe, and the missionary, ransomed him from the angry father in Micronesia, is a type, with the help which he received, and sent him a valuable present. Kekela when the foreigners came to take possession of the area where he was the strongest. Treaties should not be made merely for the sake of business, but they should not lead to the weakening of the mission, for commerce and Christianity go together, and where the commercial agent gladly follows, but the way is opened for a widening commerce. Intensity of conviction carries them where the commercial agent gladly follows, but would not lead.

Report of Rev. Dr. R. S. Storrs of Brooklyn: "missions always assist commerce. This is not the first work of missions, but it is a work which goes on with the propagation of the Gospel over all the earth. For commerce and the Gospel are in harmony in this, at least, that the aim of each is cosmic, is earth-embracing. There is no tribe so recent or so ancient, no tribe so remote or so degraded that the Gospel does not seek it, or that commerce will not reach out far for access to it. They go together. The home of commerce is on the liquid bands that separate and yet unite and encompass the continents; the horizon of commerce is the rim of the planet and nothing less; and so commerce and Christianity go together, and Christianity helping commerce. Not that our missionaries go out for that purpose—they do not barter life for gold. But wherever their crand is, and wherever their teaching is felt, there the way is opened for a widening commerce. Intensity of conviction carries them where the commercial agent gladly follows, but would not lead.

CONCEPCION: Capital of the province of Concepcion, Chile, S. America. Station of the ME with (1902) 13 missionaries, men and women, 7 native workers, 7 places of worship, 13 Sunday schools, 1 high school, 1 college for girls, 1 orphanage, a Young People's Society, and 417 professing Christians (in the district).

CONCORDIA: A town of the Argentine Republic, S. America, situated on the Uruguay River, in the Argentine Mesopotamia. Population, about 11,500. Station of the ME, with 1 missionary and his wife, 1 native worker, elementary school, and 57 professing Christians.

CONCORDIA MINE: A settlement in the northeastern portion of Cape Colony, S. Africa, situated 7 miles N. E. of the Ookiep railway terminus. Station of the Rhenish Missionary Society, with (1900) 1 missionary and his wife, 2 native workers, 1 school, 1 Sunday school, and 292 baptized Christians.

CONFERENCES ON MISSIONS (Interdenominational): When the revival of missions commenced at the close of the last century, the great effort at home was to find enough of those interested in the work to justify making a beginning, and the great aim abroad was to find a field where missionaries could labor un molested. The whole undertaking was then so novel that those engaged in it had not yet begun to know their ignorance. For to carry on the work of missions with success requires not merely a spirit of obedience to Christ, but some knowledge of the difficulties to be met and the best method of overcoming them, and only an actual advance could indicate the points on which they needed advance. The missionaries found, moreover, that the more they advanced, the more questions multiplied. Even success only furnished new problems to be solved, that had not occurred to them before. For the solution of these they went, first of all, to the Lord Jesus, and then, as in apostolic times, when an unlooked-for emergency arose, the
apostles and elders were gathered together to consider the matter" (Acts xv. 6), so now in the constantly recurring inquiries, "How can we remove this evil, and secure that result?" each group of laborers felt the need of counsel from others who encountered similar obstacles. Hence missionary conferences came into existence naturally and unavoidably. From the first they were often interdenominational in character, and, therefore, precious examples of the Comity of Missions. Such missionary conferences are of two classes: 1st, Conferences of the missionary societies; and 2d, Conferences of missionaries of the various denominations.

1. Conferences of the Missionary Societies: The first union missionary conference between British or American societies was held in the United States May 4, 1854, the various missionary societies; and 2d, Conferences of missionaries of the various denominations. The Conference sought a more complete mutual agree¬ment that as soon as an evangelical society had occupied any field, it should be left in undis¬turbed possession.

The next interdenominational missionary con¬ference met that same year in London, October 12 and 13, and was somewhat limited in the range of its discussions, for only a few secretaries of missionary societies were able to be present.

Next in order came the conference on missions at Liverpool, March 19 to 23, 1860, where twenty-five societies were represented by their officers. Two missionary societies from America were present, and nearly one hundred other members took part in the proceedings. Two sessions of three and a half hours each were held daily, preceded by a meeting for prayer in the morning, and followed by a soiree in the evening. The whole ended in a large public meeting in Phil¬harmonic Hall. Two stenographers reported the discussions, and the whole proceedings were published in an octavo of 428 pages; of these the index alone fills 38.

Eighteen years passed away after the conference at Liverpool before another was held in England, in the large hall of Mildmay Park, on the north side of London, October 21 to 26, 1878. The conference at Liverpool represented only 25 British societies, but this one 37 in all—26 British, 6 American, and 5 from the continent of Europe. This one not only dealt more thor¬oughly with particular fields, but also viewed each in its relations to the whole world, noting what had been accomplished, and searching to see what might be brought to pass in the near future. The meeting was thoroughly interdenominational in character, and could speak from personal observation. The conference closed with a general meeting in Exeter Hall, which seemed to gather into a focus the interest and energy that had been steadily increasing during all its ten sessions.

A similar conference was held in the same place in 1886, and these previous conventions rendered possible the Centenary Conference on Foreign Missions that met in London, June 9 to 19, 1888. During fifty years men had been asking for the results of the vast expenditures made for foreign missions. The Centenary Conference devoted fifty sessions to a searching scrutiny of missionary boards and committees, besides the foreign missionary boards of the United States and Canada. A similar conference between missionary societies in Great Britain and

The Alliance of Reformed Churches holding the Presbyterian system at its meeting in Toronto in 1892, arranged to invite the officers or representa¬tives of the foreign missionary boards of the United States and Canada to come together for conference in New York in 1893. Twenty-one missionary boards and committees, besides the ABS and the YMCA, sent representa¬tives to the meeting held in response to this invitation. While the sessions were not private in any sense, they were attended in the main by secretaries, and members, and missionaries of the various boards. The Conference sought a more complete mutual correspondence among, and nearer agreement in action along all lines of missionary policy. Its deliberations were found so full of mutual advan¬tage by the societies participating that a conference has assembled every year since under the name of the Interdenominational Conference of Foreign Missionary Boards and Societies in the United States and Canada. A similar conference between missionary societies in Great Britain and

The Conference made no attempt to legislate for the churches, nor to stir up tempo¬rary excitement. The kingdom of truth advances by the spread of information concerning the prin¬ciples of that kingdom and the facts connected with its progress in the past.

The great number of men and women that the Centenary Conference drew together from all parts of the world was a testimony to the advance that had taken place in the work. In 1860 about 129 met together; in 1888, 1,376—nearly ten times as many. In 1860 there is not one name of a woman in the entire list, and in 1878 only two appear, the more than that number (five) took part in the proceedings; but in 1888 the names of 429 women appear on the roll—much more than the entire membership of previous conferences. In 1860 none were present from the United States. In 1878 one attended from the United States and one from Canada. In 1888, 183 names appear from the United States and 30 from Canada.

The number of missionary societies represented in the conference was 139; of these, 57 belonged to the United States, 9 to Canada, 18 to the con¬tinent of Europe, and 2 to the colonies, leaving 53 to the kingdom of Great Britain.

Many topics discussed at previous conferences were also discussed at this, but with much greater thoroughness: e. g., Missionary Comity was the subject of two papers, and a prolonged discussion filled fifty-nine pages.

The Alliance of Reformed Churches holding the Presbyterian system at its meeting in Toronto in 1892, arranged to invite the officers or representa¬tives of the foreign missionary boards of the United States and Canada to come together for conference in New York in 1893. Twenty-one missionary boards and committees, besides the ABS and the YMCA, sent representa¬tives to the meeting held in response to this invitation. While the sessions were not private in any sense, they were attended in the main by secretaries, and members, and missionaries of the various boards. The Conference sought a more complete mutual correspondence among, and nearer agreement in action along all lines of missionary policy. Its deliberations were found so full of mutual advan¬tage by the societies participating that a conference has assembled every year since under the name of the Interdenominational Conference of Foreign Missionary Boards and Societies in the United States and Canada. A similar conference between missionary societies in Great Britain and
Ireland has been held in London of late years with very satisfactory results.

On the initiative of the annual Conference of North American Foreign Missionary Boards, the "Ecumenical Missionary Conference" was convened at New York in April, 1900. It met in Carnegie Hall and continued in session during ten days. The late Hon. Benjamin Harrison, ex-President of the United States, presided, and representatives of more than 200 missionary societies were present from Canada and the United States, Great Britain, France, Switzerland, the Netherlands, Sweden, Norway, Finland, Asia, Africa and Australia. Upon the first day of assembly the President of the United States and the Governor of the State of New York made addresses of welcome to the Conference, and from the first day to the last public interest in the meetings was unabated. Meetings were held in neighboring churches for worship which could not find admission to Carnegie Hall, and it is estimated that during the ten days nearly 200,000 persons attended the various sessions.

In greater degree than any of its predecessors the Ecumenical Conference was "a demonstration of the missionary character of Christianity. In that respect it was more truly a Christian council than some of the great ecclesiastical councils ... and at the same time it demonstrated the essential unity of the evangelical churches." In this and in its diffusion of the matured fruits of experience among all engaged in the actual work of missions, this conference was epoch-making in its character.

Upon the continent of Europe the practice of holding conferences of the various missionary bodies in different countries is a part of the history of almost every nation. Such conferences exist in Holland and in Scandinavia. A conference of German and German-Swiss missionary societies is held at Bremen once in four years and at the same time they have a strong influence in promoting harmonious relations between the various denominations and in showing to all the practical unity of all the evangelistic bodies.

2. Conferences of Missionaries on the field which are interdenominational in character, commenced in a tentative way with the Calcutta Conference of 1855. They are now held at regular intervals in India, China, Japan, Mexico, various parts of Africa and South America, and in Syria. These conferences of workers in the field, dealing with practical problems which confront the missionary enterprise, are of immense value in working toward the establishment of what has been called a Science of Missions, while at the same time they have a strong influence in promoting harmonious relations between the various denominations and in showing to all the practical unity of all the evangelistic bodies.

CONFUCIANISM: Confucius was one of a constellation of great names which appeared in the world's history about 500 B.C. (See Taouism.) Of these were his own countryman, Laotze or Lao-Tz'u, Gau-tama of India (See Buddhism), Pythagoras of Greece, and, in the opinion of Sir Monier Williams and some others, Zoroaster of Persia. They were all nearly contemporary with the Hebrew prophet Zechariah. To speak accurately, Confucius, or Kung-futze, was born, according to Chinese records, in the year 551 B.C. Laotze, the contemporary, was born fifty years earlier. They both appeared in a degenerate age of Chinese history, and both aimed at what seemed almost hopeless reform. The ancient religion of China, which is still thought to be represented by the Temple of Heaven in Peking, had greatly declined, and a superstitions nature worship, with endless polytheistic manifestations, occupied the minds of the people. The various provinces which now embraced the empire were more or less independent, and were often at war. Princes were corrupt and tyrannical, and their subjects were disheartened, reckless, and debased. Mencius, the commentator of Confucius, says of the times in which his great teacher arose: "The world had fallen into decay, and right principles were disregarded. Ministers murdered their princes and sons their fathers. Confucius was frightened at what he saw, and undertook the work of reform." These enumerations of this one great aim will go far to explain the character and teachings of Confucius and the history of his life. It was no part of his purpose to establish a religion, and as such his system cannot be considered. He was a political reformer, and with that end in view he became a teacher of general ethics. The State was the supreme object of his effort, but to secure the highest welfare of the state the family must be considered, and all the minor relations of mankind. It has been common among ancient monarchs and lawgivers to regard the state, or rather rulers, as of supreme importance. The state, the subjects were mere slaves, and little regard was had for the family. Confucius was wiser. He looked upon human society as a pyramid, and saw clearly that whatever entered into the lowest foundations concerned the whole structure. Both he and Laotze, even in that early age, taught that kings existed for the good of the people, and had no right to employ them merely as the means of furthering their own ambitious designs.

Confucianism emphasizes the worship of parents and ancestors, tho if strict definitions be observed, it might be difficult to draw any very clear distinction between the reverence to be paid to the dead and that which was due to those who were still living. In both cases reverence to parents, extending however far back, was supported to prove a salutary influence in maintaining the perpetuity of the state and the welfare of society. The worship of trees, mountains, rivers, and countless other objects is a part of Taouism or of the old nature worship. Both Confucianism and Taoism honor heroes, tho their images are generally found only in the Taouist and the Buddhist temples.
The Life of Confucius: The incidents given of the life of Confucius are simple and have not, as in the case of Gautama, Mohammed, and even Laotze, been overlaid with absurd legends. The source of all information was his own recollection, and the lapse of three years of age. At fifteen he evinced remarkable intellectual powers, and at twenty-two he was already instructing a class of disciples in the principles of government. At twenty-four he lost his mother, for whom he had a high regard. The conical tumulus which he raised over her grave is said to have been the pattern from which the circular grave-mounds of North China originated.

The earliest public recognition which Confucius received was his appointment, when he was about thirty years old, to the tutorship of two young princes of the Marquisate of Lu. At the dying request of their father they were taught political economy and the art of government. In accompanying his wards to the capital of the country, Confucius met Laotze. He is said to have sought instruction from the old sage, but he very soon found that there could be no agreement between them. Laotze was already suffering that keen disappointment which embittered his last days, and which Confucius himself at some stages of his development shared. The former pupil received the young teacher with critical disdain. He considered him a noisy and pretentious reformer, all of whose speculative theories were yet to be tested. For himself, Laotze was too proud and self-sufficient to be a successful leader of men. He was utterly destitute of magnetism, and repelled where he should have won to. He was much more of a philosopher than Confucius, but was far less practical. He gloried in reticence, and thought that the zealous remonstrances of his rival against the public vices only advertised them.

On the other hand, Confucius confessed himself puzzled by the character of Laotze, and could only compare him to the incomprehensible ways of the dragon. But two or three rather unsuccessful attempts as counselor of different provincial rulers, Confucius gave up political life, and devoted himself to teaching. He had been disgusted with the profligacy of those who had employed him, and despised of the princes of his time. They all came short of a practical appreciation of his high standards of either private or political virtue.

As a teacher he met better success. He is said to have had not less than three thousand disciples—a fact which reflects great credit not only on him, but upon the intellectual activity of his generation. Five hundred of these pupils became mandarins, and over seventy are said to have been distinguished scholars.

The last effort of Confucius as privy councilor was made with the Marquis of Lu, supposingly his former pupil. He was now fifty-two years old. For a time this prince by steady devotion to his public duties greatly prospered. He was becoming powerful, and to the neighboring princes formidable. The ruler of a rival province or chief city seeing this, sought to break the power of Confucius over him, and lead him into vice. A band of beautiful young dancing-girls were sent to him as a present, and with the desired effect. He soon became indifferent to the counsels of Confucius, and, giving himself up to pleasures, he crippled his power. The disappointed sage sought other similar engagements, but in vain. Many would gladly have employed him, but would not follow his high standards.

In the one great ambition of his life he met with constant disappointment, and in the other career he considered a failure. But, although not practically a statesman, he was one of the most successful political theorists that the world has known. Probably no other man ever stamped his ideas or his influence so deeply upon the institutions of the country as Confucius, which has been recognized long before his time, but not in the same clear form and in the same practical application. Confucius so exaggerated the efficacy of his theories as to exclude God. The Emperor stands virtually in the place of Deity, and Chinese ancestors are the great cloud of witnesses from whom all celestial impulse is thought to descend upon men. And there are other exaggerations affecting social and domestic life. The father may be an unresisted tyrant over his child, and the older brother may exact a humiliating fealty from the younger. No social system can be entirely sound which subordinates woman to a position so inferior as that which Confucianism consigns her. Confucius himself, the most reverent toward his mother, has been charged with impiety toward his wife. Compared with many other systems of the East, the ethics show a degree of respect to woman, but they fail of that symmetry and just proportion which the New Testament demands in all the relations of the house.

The Teachings of Confucius: From the age of sixty-six Confucius devoted his remaining years to the editing of books. He admitted that he was not an originator, but only a compiler and editor. Only one of his works, the Chun tsew, or "Spring and Autumn Annals," can be considered an original production.
Confucianism

His other works, the Shoo King or "Book of History," the She King or "Book of Odes," were only compilations or revisions. These, with the Yi King or "Book of Changes," had existed before his time, and in his revisions or abridgments they suffered at his hands. The Shoo King, especially, he cut down from about 3,000 paragraphs or verses, to less than 400. What might be considered the religious element in this work he almost entirely eliminated, reserving only those practical teachings which suited his theories of society and the government of the state.

Those remains of the Confucian ethics which are most highly valued by the Chinese are certain collections known as the Loo Yü or "Confucian Analects," the Ta Hee or "Great Learning," and the Chung Yang or "Doctrine of the Mean." The last two of these are supposed to have been edited by Tsee-see, a grandson of the sage. They all claim to reproduce the teachings of Confucius, especially the "Analects." The monopoly of Chinese wisdom was given to Confucius by a singular circumstance. About 220 B.C. the Emperor Che Hwang-te ordered all books to be burned, with the exception of the Zze King or "Book of Poetry," the Chun Tsew or "Book of History," the Le Ke or "Book of Rites," and the Chun-tsew or "Spring and Autumn Annals." These were in whole or in part compiled by Confucius. There are besides what are known as "the Four Books," viz.: the Yi King or "Book of Changes," the Shoo King or "Book of Poetry," the Oo Koo or "Book of History," the Le Ke or "Book of Rites," and the Chun-tsew or "Spring and Autumn Annals." These were in whole or in part compiled by Confucius. There are besides what are known as "the Four Books," viz.: the "Great Learning," the "Doctrine of the Mean," the "Confucian Analects," and the "Works of Mencius." These books have for ages constituted the text-books in Chinese education; they are also the basis of the competitive examination for public office. That so narrow a field of study—one so destitute of science or general history, one which is in every respect so far behind the spirit and movement of the age—should be supposed to supply all knowledge requisite for the intelligent performance of all possible duties of statesmanship and diplomacy, is a marvel. Such a standard cannot be maintained for many generations longer.

When we consider the low and corrupt state in which Confucius found the religion of his country, we are not greatly surprised that he neglected that element from which he hoped to rear, and depended on social and political ethics merely. He was not an atheist, nor, in the strictest modern sense, was he an agnostic. According to the conclusions of Martin, Legge, Douglas, and Max Müller, he really believed in a supreme being, known as "Shang-te," or the God of Heaven. He believed also in unseen spirits, and he taught his disciples to "respect the gods." He had, however, no moral sense of duty toward the gods, nor the consciousness of any special dependence on them. He taught his disciples, "but keep them at a distance," or rather, as Dr. Martin renders it, "keep out of their way."

The same author speaks of Confucianism as "the leading religion of the empire." Its objects of worship he divided into three classes—the powers of nature, ancestors, and heroes; and he adds: "Originally recognizing the existence of a supreme personal deity, it has degenerated into a pantheistic medley, and renders worship to an impersonal anima mundi, under the leading forms of visible nature. Besides the concrete universe, separate honors are paid to the sun, moon, and stars, mountains, rivers, and lakes." The Confucianism recognizes these objects, the system so far overlaps the pantheon of modern Taoism.

The teachings of Confucius must be acknowledged to have embodied many noble precepts. His political ethics were above the average of those practised by the most enlightened nations. The great end recommended to rulers was not their own gratification or glory, but the good of the people; and no teacher ever insisted more strenuously upon the duty of example. Princes were constantly reminded that public virtue could not be enforced in the face of royal vice and wickedness.

Reciprocity was one of Confucius' favorite expressions for social and political virtue. This, in the broad sense in which he employed the term, was nothing less than a practical application of the Golden Rule. Thus a father in exacting reverence from his son should be reverent toward the authority of the state, and he should render himself worthy of reverence by a proper regard to all his own relations and duties. The Prince in claiming loyalty from his ministers should fulfill all the conditions which might promote their fidelity.

Loyalty was another broad expression used by the sage. It included all duty, not only to a father or a prince, but to every interest of society. "Let the superior man," he said, "never fail reverently to order his conduct, and let him be respectful to others and observant of propriety; then all within the four seas will be his brethren."

Faithfulness was enjoined, as having, if possible, even a more sacred character than loyalty. "Hold faithfulness and sincerity as first principles," said the sage; "I do not see how a man is to get on without faithfulness." He maintained that while the subordinate must in all cases be faithful to his ruler, the latter must be equally faithful to his word and to his assumed character as the father of his people.

In the cultivation of social and political sincerity, Confucius taught that the very first step in the reform of a corrupt state was "The Rectification of Names." No vice or dishonesty should be allowed to take shelter under specious titles. All littleness or dishonor or incapacity should be exposed. Everything should be brought to par, and should be stamped accordingly. Men should be rated at their true value.

One great principle, which has doubtless had great influence in China, is known as the "Doctrine of the Mean." Confucianism assumes that many
evils flow from extreme opinions. There is always another side, and the balanced truth gener­ally lies between. Every opinion, therefore, is in danger of being overthrown by some other. For a very early ex­emplar, a minister of the great Emperor Shun, when asked what are the nine virtues, replied: “Affa­bility combined with dignity; mildness combined with firmness; bluntness combined with respect­fulness; celerity combined with reverenc­e; docility combined with boldness; straight­forwardness combined with gentleness; easiness combined with discrimination; vigor combined with sincerity, and valor combined with righteousness.”

It is but just to say that while reverence for sovereignty is so strongly enjoined, yet that rever­ence is coupled with discrimination. No his­tory of any country deals more severely with the memory of unjust rulers than that of China, and in many instances tyrants have been over­sown.

It is perhaps due to the “Doctrine of the Mean” and to the conscious dignity of moderation, that the Chinese Government has often shown so much self-poise amid the exasperations of foreign dis­proportion. But the character and teachings of Confucius are far enough from perfect. It has already been shown that his ideal virtues were distorted to promote his theories of society. Reverence to parents was pushed to such extremes as to destroy that reciprocity which he made a test of highest character. The authority of the parent is not duly balanced by parental consideration, and the worst of tyrannies is often seen in the Chinese home. Practically, there is no such symmetry of the domestic virtues as that found in Paul’s Epistles. Confucius was no model to parents was _pushed to such extremes as to promote his theo­ries of society. Reverence

Confucius evinced great weakness at the last, by being apparently more solicitous for his own good name than for the welfare of his country. When seized by a presentiment of death he said: “The course of my doctrine is run, and I am unknown.” “Never does a superior man pass away without leaving a name behind him. But my principles make no progress, and I—how shall I be viewed in future ages?”

The relation of Confucianism to the Ancient Worship of China: The sage had been peculiarly reticent in regard to a supreme deity and to the future life. “We do not know life,” he said; “how can we know death?” Yet when his life­work was done he gathered his books, and, ascend­ing a hill where the worship of Shangte was observed, he laid the books upon the altar, and then kneeling before them he gave thanks that he had been permitted to live to see their completion. There is a difference of opinion as to whether he believed in a supreme being, whom he saw fit to pass in silence for a purpose, or whether he was utterly agnostic. His teachings incline to general skepticism, but whatever may have been his personal views there is scarcely room for a difference on the question of whether a religious faith more or less monotheistic preceded Confucius. The best Chinese scholars agree so far, Real Chinese history can be traced no farther back than the reign of Yaou, 2356 b.c., and there we find clear and distinct traces of a worship of the supreme god Shangte. Yaou was the King Alfred of China, who by his wise admin­istration united all the warring states in one empire. He encouraged astronomical researches and all useful sciences. At thirty, he sacrificed with purity and reverence to the Six Hon­ored Ones, offered appropriate sacrifices to the hills and rivers, and extended his worship to all useful science. We are told that when he died the virtues of his colleague Shun “were heard on high,” and he was therefore appointed to the throne.

One of his first acts after coming to full power was to sacrifice to Shangte, the supreme god. “Thereafter,” we are told, “he sacrificed specially, but with the ordinary forms, to Shangte; sacrificed with purity and reverence to the Six Hon­ored Ones, offered appropriate sacrifices to the hills and rivers, and extended his worship to the hosts of spirits.” “This,” says R. K. Douglas, Professor of Chinese in King’s College, London, “is the first mention we have in Chinese history of religious worship, tho the expressions used (‘but with the ordinary forms’) plainly imply that the worship of Shangte at least had a theistic faith of the Chinese. In all probability there was a time when the worship of Shangte was the expression of the highest faith of the Chinese. By degrees, however, corruption crept in, and the Shangte always remained the supreme object of venera-
tion, they saw no disloyalty to him in rendering homage to the powers of nature which they learned to personify, and to the spirits of their departed ancestors who were supposed to guard and watch over in a subordinate manner the welfare of their descendants.

Professor Legge of Oxford, in "The Religions of China," has illustrated this distinction by quoting the prayers of an emperor of the Ming dynasty, which were offered in the Temple of Heaven in the year 1685 A.D., in which he first invokes the spirits of the mountains and woods, and asks their intercession with the supreme God, whose name he proposes slightly to change, that the change may be acceptable to Him. He then proceeds to pray directly to the God of heaven, whom he addresses as the creator and upholder of all things. These prayers, and they show also what great truths underlie the worship offered in the Temple of Heaven in Peking.

In his prayer to the spirits he says: "Before we inform you, all ye celestial and all ye terrestrial spirits, and will trouble you in our behalf, to exert your spiritual power and display your vigorous efficacy communicating our poor desire to Shangte, and praying him graciously to grant us his acceptance and regard, and to be pleased with the title which we shall reverently present."

"This prayer shows," says Professor Legge, "how there had grown up around the primitive monotheism of China the spirit of worship and worship of a multitude of celestial and terrestrial spirits, and yet the monotheism remained."

How differently does the Emperor proceed when, having thus invoked the interceding spirits, he approaches Shangte directly. He begins: "Of old, in the beginning, there was the great chaos, without form and dark. The five elements had not begun to revolve nor the sun and moon to shine. In the midst thereof there presented itself neither form nor sound. Thou, O spiritual Sovereign; earnest forth in thy presence, and first didst divide the grosser parts from the purer. Thou madest heaven; thou madest earth; thou madest man; all things got being with their producing power." After stating the title which he proposes to give to Shangte, he adds: "Thou didst produce, O spirit! the sun and moon and five planets; and pure and beautiful was their light. The vault of heaven was spread out like a curtain, and the square earth supported all on it, and all creatures were happy. I thy servant presume reverently to thank thee." In another he says: "All living things are indebted to thy goodness, but who knows whence his blessings come to him? It is Thou alone, O Lord, who art the parent of all things."

The temple-worship of Shangte (for real personality is still recognized, tho the name be changed for Tien, heaven) has always been associated with the Confucian system. There is no evidence that it was ever suspended, even temporarily, after Confucius came; and here, in the prayers of the Ming emperor, two thousand years after his time, we find the old name Shangte preserved.

No more impressive account has been given of this surviving monotheistic worship in Peking than the following from the pen of Dr. Wm. A. P. Martin, D.D.: "Within the gates of the southern division of the capital, and surrounded by a sacred grove so extensive that the silence of its deep shades is never broken by the noises of the busy world, stands the Temple of Heaven. It consists of a single tower, whose tiling of resplendent azure is intended to represent the form and color of the aerial vault. It contains no altar, and the solemn rites are not performed within the tower. But on a marble altar which stands before it a bullock is offered once a year as a burnt-sacrifice, while the master of the empire prostrates himself in adoration of the spirit of the universe. This is the high place of Chinese devotion, and the thoughtful visitor feels that he ought to tread the place with unsanded feet. For no vulgar idolatry has entered here; this mountain top still stands above the waves of corruption, and on this solitary altar still rests a faint ray of the primitive faith. The tablet which represents the invisible deity is inscribed with the name of Shangte, the supreme Ruler; and as we contemplate the majesty of the empire and the tributes which are annually paid from his burning sacrifice, our thoughts are irresistibly carried back to the time when the King of Salem officiated as 'Priest of the Most High God.'"

Protestor Douglass charges Confucius with having promoted the spread of polytheism by attempting to suppress the knowledge of the supreme God. He substituted for Shangte (god), Tien (heaven); and that change has survived. But the people, feeling a need of something less vague, have fallen into the worship of countless other objects, and particularly the worship of ancestors. "But," says the professor, "in spite of the silence of Confucius on the subject of Shangte, his worship has been maintained, not perhaps in its original purity, but with works of reverence which place its object on the highest pinnacle of the Chinese Pantheon. At the present day the imperial worship of Shangte on the round hillock to the south of the city of Peking is surrounded with all the solemnity of which such an occasion is capable."

"There is no need," says Dr. Martin, "for extended argument to establish the fact that the early Chinese were by no means destitute of the knowledge of God. They did not, indeed, know him as the Creator (evidently the prayer of the Ming emperor recognized Him as such), but they recognized Him as supreme in providence, and without beginning or end. Whence came this conception? Was it the mature result of ages of speculation, or was it brought down from remote antiquity on the stream of patriarchal tradition? The latter, we think, is the only probable hypothesis."

There has been a long and earnest discussion among missionaries as to how far the identity of Shangte with the true God once made known to men may be traced. Certainly if there be a real succession many attributes have been lost, and the conception in any Chinese mind is very dim. Yet is there not at least an important reminiscence, and may not the earnest missionary have the same grounds that Paul had for saying, "Whom ye ignorantly worship, declare I unto you"? The missionary has to meet in the Confucian that self-centered temper and that inclination to evil which is familiar enough in Christian lands.
Men of the non-Christian races do not escape such irreligion by being without knowledge of Jesus Christ. What the missionary also has to meet among the followers of Confucius is an imperfect code of morals that he must make his ally wherever possible rather than his enemy. Confucianism does not perfectly repel influences from outside. The lesson of the Boxer outbreak of 1900 is that the people of China need a new moral energy, and that Christian missionaries are the ones to give them this energy, making full use, for the purpose, of their knowledge of the maxims and the aims of Confucius.

CONGO FREE STATE: The exploration of the Congo by Stanley in 1876-77 opened a new door of entrance into the interior of Africa, and led to the establishment in 1884 of the Congo Free State. This is an independent state under the sovereignty of Leopold II., of Belgium. It lies between the French Congo and the Egyptian Sudan on the north, and Rhodesia and Portuguese W. Africa on the south, reaching from the Atlantic Ocean, which it touches by only a narrow coast, to Lake Tanganyika and German E. Africa on the east. It is drained chiefly by the Congo and its tributaries. Its rich flora, vast forests and fertile soil make it a tropical garden of great agricultural possibilities, while its mineral wealth, mostly unknown, may be also of great importance. A commerce amounting annually to an export of 17,000,000 and an import of 25,000,000 has been established (1900).

The lands of the Free State are divided into three classes: First, those in the actual occupation of the natives, who do not recognize private property in the soil, but hold their lands as long as they choose to cultivate them, but have no permanent title to them. The second class is composed of lands now occupied by foreigners, who hold by a government title. All these titles are registered, and there is no difficulty in the sale or transfer of these lands. The third class consists of lands as yet unoccupied. These to the extent of 25 acres can be occupied by a foreigner, if he comes to an understanding with the natives about them; but he cannot cut timber or open mines without a concession from the government.

The native population is difficult to estimate, more or less of it being nomadic, and but a small percentage sufficiently established in known localities to make calculation reliable. The estimates vary from fourteen millions to double that number. They are mostly of the Bantu race. There are some Azandes in the northeast and scattered tribes of pigmies in various sections.

The religion is mostly a revolting fetishism, and cannibalism is not uncommon. Sorcerers and wizards are found everywhere, and exercise a predominating influence over the superstitious natives. Belief in evil spirits is universal and the religious ceremonies for the most part are grotesque and barbarous. Polygamy and slavery are an integral part of the social fabric and of family life. Many parts of the country remain untouched and in a condition of primitive wildness, while in some of the eastern districts the inhabitants are still terrified by the raids of Arab slave traders. At the same time there appears to be indisputable evidence that a terror of the Belgian officials is depopulating some districts as effectually as in former days did the terror of the Arab slave hunter.

Protestant missionary enterprises are carried on in the Congo Free State by the ABMU, the BMS, the CMS, the Day, the PB, and the Swedish Missionary Society. These societies have established stations at 23 different places in the State.

According to official estimates there are 120 Protestant, and 180 Roman Catholic missionaries in the Congo Free State. Of the Roman Catholic missions there are four each under different organizations:

1. The Mission du Saint Esprit, at Banana and Boma. There are 4 priests and 2 lay brethren at these stations, and some small schools which give industrial training to the children.

2. The Belgian Mission: Established in 1888 at Kwamouth on the Upper Congo, with a second station projected at Luhaburg on the Luila River, a branch of the Kasai, just on the southern boundary line of the Congo Free State.

3. A New Mission at Bangala, on the northern bank of the Upper Congo, about 125 miles above Equatorville. This is under the care of the Jesuits. The Catholic mission steamer, Leo XIII., is plying on the Upper Congo.

4. The Mission du Fonds d'Algérie (Algerian priests), on Lake Tanganyika, in the southeastern part of the Free State. They have 2 stations, Kibanja on Burton Gulf, and Mpala at the mouth of the Lofuku, both on the lake. They are laboring among the Urua tribe, but do not report much success.

Congo, French. See French Congo.

CONSTANTINOPLE: Capital of the Turkish Empire, is located at the confluence of the Bosphorus and the Sea of Marmora and stands partly in Europe and partly in Asia. It is the natural center toward which converge the lines of interest, of trade, and population, of Southeastern Europe and Western Asia. Because it is partly in Europe and partly in Asia, it partakes of the character of both continents to such a degree that the natives of each find themselves at home nowhere in it. The beauty of its scenery is scarcely more marked than are the characteristics that make it a healthy residence at every season of the year, and a center whose influences make themselves felt in every portion of the empire. The value of its location has been much impaired by the restrictions upon trade of absurd custom-house regulations, and that jealousy of purely foreign investments that has characterized the Turkish Government. Produce that was formerly
Constantinople

Converts

brought from the ports of the Black Sea and reshipped at the Golden Horn for Europe, now go direct from Odessa, Varna, Port and Trebizond.

Topographically the city is divided into three parts: 1. Stamboul, or the city proper, between the Marmora and the Golden Horn, occupying the site of the old city. 2. Galata and Pera, where are centered the European commercial interests. 3. The shores of the Bosphorus, the islands, and Marmora suburbs. The city stands on several hills, so that there is the best of natural drainage. The climate is, in general, mild through the whole year, the winter being tempered by south winds, while in the summer the prevailing winds are from the north. There is usually some snow, but it does not lie long, and there is rarely much ice. In the summer the thermometer very rarely rises above 90°. The chief drawback is the prevalence of heavy winds, which are hard for delicate throats and lungs to bear. The spring months, April, May and June, are the most favorable for visiting the city.

The buildings were formerly almost entirely frame houses, poorly put together, which burned like tinder when a conflagration was once started. Successive disasters of this kind have resulted in the use of brick and stone in a great degree, too much that appears to be brick is really only stucco.

In its political relations Constantinople is the very key to the "Eastern Question," but, aside from this wider international importance, its political influence is a most important element in its national life. It is the seat of all government for the empire. Every local official, from Adrianople to Bagdad, from Trebizond to Tepedelen, feels the influence that binds him to the capital, and this in more ways than the mere reference to responsible chiefs there. The sovereign keeps his eye not merely upon the pashas, but on every little village and hamlet.

The same thing is true of the various hierarchies. The Armenian Patriarch resident in Constantinople is subordinate spiritually to the Catholicos at Etchmiadzin (in the Caucasus), but politically he is the head of the Armenian nation, and the supremacy of the Patriarchate is maintained in much the same way as is that of the Porte. So with the Greeks and other Christian communities.

So, again, Constantinople as the seat of the foreign embassies is the center for foreign influences which permeate the empire to a degree almost inconceivable to any one not acquainted with the country.

Thus Constantinople is the center of all interests of the remotest sections of the empire.

The population of Constantinople is variously estimated at from 900,000 to 1,100,000 souls, of whom considerably more than half are Mohammedans. The Armenians and Greeks number perhaps 80,000 each, the Jews, 70,000, while the remainder comprise almost every race of Europe and Western Asia, for thousands of men come up from the villages of all Western Asia, spend a few years, and then having amassed a little money, return to their homes. The number of these it is impossible to estimate at all accurately. They make up for by far the majority of the laboring class, the porters (hamals), thousands of men, carpenters and even the petty tradesmen.

In former times each religious sect occupied a distinct quarter of the city. Stamboul had its Mohammedan, Armenian, Greek and Jewish quarters, while the Euro Bible Society occupied chiefly in Pera, and social intercourse between those of different creeds was almost unknown. Of later years this has changed in a great degree; districts have encroached on each other until in some cases boundary-lines have been practically obliterated. The languages are as varied as the races. The official court language is Turkish. Greek, Italian, English and German are almost essential to any one whose business relations are extensive, while the language of diplomacy, and the common language which every educated person of any race or nation is assumed to know, is Arabic. Armenian is used only among Armenians, who, however, all speak Turkish, while many of them write it. Besides these there is heard a perfect jargon of sounds—Bulgarian, Russian, Arabic, Persian, Spanish, etc—as he passes through the streets or stops in a restaurant or café.

4. Mission Work: The above statements will readily explain the importance that has always been attached to the occupation of Constantinople as a center for missionary operations. The British and Foreign Bible Society occupied it as a post in 1823 and has now (1902) an agency and a depot with 17 colporteurs and Bible women. The American Bible Society established an agency there in 1856, and now has an agent and a book depot and 10 colporteurs and Bible women. Both of these societies, together with the mission of the ABCFM, have publishing and editorial rooms, besides book storage depots and salesrooms in the Constantinople Bible House.

The ABCFM (1831) was the first Society to establish missions in the city. The city itself has there 17 missionaries, of whom 13 are women, and in the city and its 3 outstations in neighboring districts, 31 native workers, men and women, 13 preaching centers, 6 elementary schools, 1 publishing house and 300 church-members. The American College for Girls is also connected with this Society. Robert College (1860), an offshoot from this mission, is not in any way connected with it, but is under its own Board of Trustees in New York.

Missions to the Jews were the next to be established in Constantinople, beginning with that of the London Society for the Evangelization of the Jews (1835), followed by that of the Free Church of Scotland (1842) and the Established Church of Scotland. These Societies now (1900) have in the city, 11 missionaries and men and women (one a physician), 25 native workers, 3 preaching centers, 2 orphanages, 4 elementary schools, 1 high school and 1 dispensary.

The Kaiserwerth deaconesses also have a station here (1852) with a hospital and a kindergarten school, with 17 deaconesses in charge of these institutions.

Later enterprises are the FCGMS (1879) and the Seventh Day Adventists' Mission (1887), which...
have both together 10 missionaries, men and women, and in the city and their 27 outstations in different parts of Asia Minor, 4 native workers, 5 preaching centers, 4 elementary schools and 462 professing Christians.

The political relations of the representatives of the missionary bodies in a center of influence like Constantinople is a phase of missionary life which is found to be of no small difficulty, but of great importance. The missionaries themselves often have cases affecting their rights as citizens which must be carried to the embassy; and there are innumerable instances when their kind offices are sought in behalf of people who have been for one cause or another imprisoned or persecuted in every part of the empire. This work requires time, tact, patience, and an intimate knowledge of the country and its people, their laws and customs.

While there is much valuable missionary work done in Constantinople, its chief importance after all is as a strategic point. To withdraw or even to weaken the force there would be to court disaster in the empire. If Constantinople could be held, the Levant will certainly be evangelized.

Amicis (E. de), Constantinople, New York, 1896; Crowenor (E. A.), Constantinople, 2 vols., Boston, 1896; Dwight (H. B.), Constantinople and Its Problem, New York, 1901; Prime (E. D. G.), Forty Years in the Turkish Empire, New York, 1873.

CONSTDERDINE, Rev. Charles: Born at Littleborough, Lancashire, September 15, 1869. From the time of his conversion at the age of fourteen he manifested the liveliest interest in Christian work, and in 1895 he was appointed by the Free Methodist Church, England, to Newton Abbott, in the Exeter Circuit, as pastor. As his heart was turned to the mission field, he soon offered his services to the Missionary Committee for East Africa, and, altho just before he sailed, the news reached him of the death of one with whom he hoped to be associated in his African work, which put new emphasis upon the malarial districts of East Africa; but, soon after the Assembly of 1897, he became the colleague of Mr. Ormerod at Goltanti, farther inland, and it was there that Mr. Sun, a venerable man, was a cloth seller with his stand on the great Hata Street, Peking. He became interested in the Bible, read it, pondered it, conversed about it with Christians, and was converted. His stand was well known, his patrons numerous. As a Christian he decided he must close his stand on Sunday. His patrons knew nothing about Sunday, and, finding every now and then when they came to make purchases that the stand was closed and the proprietor absent, began to transfer their patronage to others. This was a testing time for Mr. Sun, for a large family depended upon him. But he was loyal to his convictions, and held true until death, his influence being a power for good in the Peking community.

There are young men, trained in our mission colleges in Western countries, who are entering the Christian ministry and Christian educational work, at salaries not more than one-fifth the amount they could command in secular employment. The writer knows of a young man who graduated from college and
was accepted by the Imperial Maritime Customs, and was to be assigned to a position that would keep him there for a successful financial career. He wished to enter the customs service in order to help his father in the support of a large family. After accepting the position he spent a sleepless night in the conflict between desire and conviction, and the following morning reported that he must abandon his intention of a mercantile life, and give himself wholly to the work of the Church in saving others. To-day he is one of the most useful men in China. Every year graduates from mission colleges are manifesting the sincerity of their profession by turning aside from fine worldly positions to take up a life of toil, with small pay, for Christ's sake.

**Stability:** There may be sincerity of purpose, and yet purpose may fail under unusual strain. The cataclysm of 1900 in North China was calculated to test to the utmost the stability of the converts.

Hundreds died in the persecution who, by burning incense and bowing the knee to idols, might have saved their lives. In the London Mission a man named Fan, a gatekeeper, was captured by the Boxers, and asked if he would accept this substitute to let him go. He was carried into an open lot, a hole was dug of a depth so that when he was dropped into it his head was below the level of the surface. The loose earth was filled in up to his knees and he was called upon to recant; he refused. Up to the waist; he refused. Up to the chest; he refused. Up to the shoulders; he refused. He was carried to the top of a mountain, his arms and legs were cut off, his lips, his arms, his legs, and he died, faithful to the end.

One young man, a preacher, whose father, mother, sister and brother were massacred by the Boxers, when asked by the magistrate what he would do in case he was wanted by way of indemnity, replied that he asked only that he might have the privilege of preaching the Gospel to those who had put his family to death. One of the leading British merchants of Tientsin, in a letter to the Peking and Tientsin Times, a secular paper published in Tientsin, called attention, shortly after the siege of Peking, to the fidelity and stability of the native Christians, which, he said, had come as a revelation to himself and to many of his friends of the business world.

**Activity:** Converts on the mission field often are observed aggressiveness in attendance on public worship and in the performance of outward duties pertaining to their personal salvation, as they conceive it, while at the same time they are slow to apprehend their personal responsibility for the saving of their fellow-countrymen. This was the case with some of their number burning incense and bowing the knee before idols; they were married and from thenceforth went in and out among the church members, honored and happy. They were to the membership a revelation of the possibilities of faith, and their presence was, therefore, a blessing to the church, and those who had prayed in such perplexity spoke of the result with bated breath, and reverently, as if for the first time.

The Student Federation of the Young Men's Christian Association is enlarging the horizon of young men on mission fields and the ringing call of their motto, "The Evangelization of the World in this Generation," is awakening many young converts to splendid service.

In Peking the Christian young men have assumed responsibility for the street chapels, where they render effective service by their fervid testimony. They have also given themselves ungrudgingly to the distribution of Christian literature at the great examinations held in Peking, one of which, the Triennial Examination, calls together from ten to fifteen thousand students from all parts of the empire. This work calls for fortitude and forbearance and the efforts are not always well received. The Chinese have shown aggressiveness in all fields of industry, but not always in their aggressiveness in spiritual matters. They are essentially the dom-
COOK ISLANDS. See Hervey Islands.

COOKE, Miss M. A.: In 1820 Miss Cooke was sent to India by the British and Foreign School Society, at the request of a local educational body at Calcutta, with a view of starting a school for girls. As she could, she founded a school of fifteen girls, which was successfully begun at Serampur by Mrs. Marshman of the Baptist Mission; and Miss Cooke was transferred to the CMS, where she was enabled to carry out the desire of her heart by establishing a female orphanage at Agarpara. In 1842 she herself united with the Plymouth Brethren; but she transferred her labors zealously to the CMS, which speedily reached 3,000 rupees. Soon after this, Miss Cooke was married to Rev. Isaac Wilson by suggestion, skilful in affairs, who will follow anywhere, dare any danger, bear any hardship, stand true before the persecutor, and all sincere, steadfast and active in the service of the Great Captain to the last.

COOK, Captain. To the last.
THE ENCYCLOPEDIA OF MISSIONS

COPTIC CHURCH: The relic of a once powerful and progressive Egyptian Christianity, dating from the 1st century. According to its traditions St. Mark was its founder and first Patriarch. Its ritual appears to be a close reproduction of early Christian origins. Its doctrine is of the Jacobite class, defending the Monophysite heresy, and its relations to all other Christian bodies have been bitterly exclusive.

The Coptic Church was a missionary and aggressive body up to the 4th century, carrying its missions into Abyssinia and beyond, almost to the equator. It is now sunk in ignorance, atho beginning to give some small signs of intellectual awakening through the influence upon the common people of American (U. P.) and English missionaries. Several priests and one bishop of this Church were educated in the CMS seminary, formerly conducted at Cairo.

The Coptic clergy consist of monks, deacons, priests, arch-priests, bishops and metropolitan; the whole hierarchy being under the direction of the Coptic Patriarch of Alexandria. The Patriarch has the right to appoint the metropolitan of Abyssinia, and even the privilege of issuing the religious authorization when occasion befalls for the ordination of a king of Abyssinia.

The prelates of the Church as well as the monks are required to observe celibacy, but on the other hand marriage is an absolute condition precedent to ordination of a priest.

The Coptic clerical name of the Church of Egypt, 2 vols., London, 1897.

COPTIC LANGUAGE: Belongs to the Hamitic family of languages. It was once the vernacular tongue of Egypt, but it was superseded by the Greek, more especially by the Arabic, and is now a mere literary language cultivated by Biblical scholars and a very few of the Coptic priests. There are three principal dialects in Coptic, viz., the Memphitic, Sahidic and Bashmiric. The Memphitic, found in the neighborhood of Memphis, is the least pure of the three; the Sahidic or Thebaic, found in Upper Egypt, is more purely Egyptian and the Bashmiric, found in the Delta, differs from the others chiefly by certain changes in the vowels and in a some of the consonants. The Coptic alphabet is a slightly modified form of the Greek.

COPTS: A people of Egypt, numbering about 600,000 and supposed to be a survival from the Egyptians of the Pharaohs. The name Copt is a religious rather than an ethnic term, since it is applied to Christians only, while the Mohammedan Fellahin of Egypt are of the same stock and race.

The Copts are, however, far more intelligent and enterprising than their kinsmen who did not accept Christianity. Nevertheless when compared with other Oriental Christians, as Greeks and Armenians, or with Jews, they are seen to lack initiative. Wherever found the Copts are gentle and submissive to control; in lower Egypt and Tripoli they are clerks and traders, shrewd business men and able when under guidance. In upper Egypt they are more frequently industrious agriculturists.

American (UP) and English (CMS) Missions have done much toward stimulating the Copts into a new intellectual growth; and now the Copts have about 1,000 elementary schools which they seek to conduct somewhat upon Western principles. In these schools they now make it a point to teach the ancient Coptic language.

About one-half of the males in the Coptic community can read and write. See also Coptic Church.

COQUIMBO: A seaport town in the Department of the same name, Chile, S. America; situated on Coquimbo Bay, about 200 miles N. of Valparaiso. Population about 9,000. Station of the ME, with three native workers, 5 preaching centers, 3 Sunday schools, and 69 professing Christians.

COSTA RICA: A republic of Central America. Area, 22,000 square miles. Population, 243,205, chiefly mestizoes, negroes and Indians. Language, Spanish. Religion, Roman Catholic. The capital is San José, in a beautiful valley in the central part of Costa Rica. A fertile and productive country, it contains some rich gold-mines. The soil is very productive, and, tho less rich in minerals than some of the neighboring countries, it contains some rich gold-mines. It has a mild and delightful in the upper lands, hot on the plains, but everywhere healthful, except along the lagoons on the western coast. Commerce is carried on with the United King-
dom, the United States and Germany. The exports are chiefly bananas, coffee and hides.

The BPBS has a Bible depot and an agent at San José and the Central America Mission Society has a mission station there. The James Baptist Missionary Society and the West Indies Wesleyan Annual Conference have stations at Port Limon and Cartago.

COTA. See KOTTA.

COTTAYAM. See KOTTAYAM.

COVENANTERS; Missions of the. See Presbyterian, Reformed.

COWICHAN: A town on the eastern coast of Vancouver Island, British Columbia, situated on the Cowichan River. Population, about 1,500. Station of the MCC (1900), with 1 missionary and his wife, 1 Sunday school and 1 place of worship.

CRADOCK: Capital of a district in Cape Colony, S. Africa, situated on the railway, 56 miles S. E. of Middelburg, and at an altitude of 2,850 feet. Population, about 5,000. Circuit of the South Africa Wesleyan Missionary Society, with (1900) 6 native workers, 2 chapels, 12 outstations, 1 Sunday school, 1 elementary school, and 163 professing Christians.

CREE LANGUAGE: Belongs to the central group of the N. American family of languages. It is spoken by some 40,000 Indians found to the west and W. of Hudson Bay. It is written with Roman letters and syllabic characters.

CREEK LANGUAGE: Belongs to the central group of the N. American family of languages. It is spoken by the Creek and Seminole Indians in the Indian Territory, and is written with Roman letters.

CREEKTOWN: A town in Southern Nigeria, W. Africa, situated on the Crooked River 70 miles above its mouth. Climate, tropical. The population is composed mainly of the Ibo and Ewe tribes of negroes. Station of the UFS (1846), with (1900) 6 native workers, 2 chapels, 12 outstations, 1 Sunday school, 1 elementary school, and 163 professing Christians.

CROATIAN LANGUAGE: Belongs to the Slavonic branch of the Aryan language family, and, like the Servian, is spoken throughout Servia, Bosnia, Herzegovina, Montenegro, Croatia, Slavonia, Dalmatia, etc. The difference between the Servia and Croatian is largely in the written character, the Croat writing their language with Roman letters.

CROATS: To the Servian branch of the Slav race belong also the Croats, who inhabit Dalmatia, Slavonia, Croatia, and the western part of Bosnia, numbering hardly a million and a half of souls. The linguistic differences between the Servians and the Croats are insignificant; their chief distinction lies in their religious confession and in their alphabets. The Servians belong to the Eastern or Orthodox branch of the Christian Church, while the Croats are almost all Roman Catholics, and use the Latin alphabet in their literature. This distinction has led to a great deal of coolness and even hatred between the two peoples.

The Croats appeared on the Balkan Peninsula almost simultaneously with the Servians, and, like them, they received Christianity first from Rome, and then, in the second half of the ninth century, from Byzantium; but, unlike the Servians, they soon fell under the dominion of the Roman Church. Politically, the Croats remained independent till 1102 A. D., when they united themselves to Hungary and shared in the vicissitudes of Hungarian history. This union was a free and spontaneous union on the part of the Croats, and the Hungarian kings were styled kings of Croatia, Dalmatia, and Slavonia. The Croats had a constitution of their own, and the country was ruled over by royal commissioners or bans. But in the subsequent years the claims of the Hungarians to dominate over the Croats led to dissensions between the two nationalities, and to the bloody conflicts in 1848-50, since when the relations between them have been strained. The Dalmatian Croats, especially in the little republic of Ragusa, in the latter part of the 16th, the 16th, and 17th centuries a great literary development. A number of writers, especially poets, flourished in Ragusa,
THE ENCYCLOPEDIA OF MISSIONS

CROWSTAND

who were educated and trained under the influence of the Italian Renaissance, and who produced some very important poetical works. Other men who have gained a world-wide reputation, born in Ragusa, were the archaologist, Banduri, the mathematicians Boshovitch, Ghetalditch, etc.

Aside from the work of the Bible societies in distributing the Scriptures, no regular missionary work has been opened among the Croats.

CROWSTAND: A station of the Presbyterian Church in Canada, opened in 1877 and situated on Swan River in the N. E. part of Assiniboia, Canada. It has 1 missionary, 3 women missionaries, a chapel, a school, and 30 church-members.

CREOLE: Name applied to people born in or near the West Indies of foreign, and especially of Spanish or French, ancestry. When applied to negroes the term means that they are born in the country, as distinguished from those imported from Africa. The European Creoles are generally tall but not proportionally robust. They are distinguished for the suppleness of their joints, which enables them to move with ease, agility, and grace. From the same cause they excel in penmanship, and in everything requiring flexibility of movement. The women are generally beautiful, and of fine figure. The Creole negroes present a marked distinction from those imported from Africa, being more slender, agile, and graceful, the not less strong or capable of labor, with quicker perceptions and more volatile dispositions. The dialects which have sprung up in the W. I. and adjacent regions, formed by the corruption of Spanish, French, and English, are generally called Creole dialects.

CRETE, or CANDIA: An island in the Mediterranean Sea, belonging to Turkey. It is very irregular in form, about 160 miles long, and varying in breadth from 6 to 35 miles, with a total area of 3,226 square miles. Its population is 1,048. The predominating religion is that of the Greek Church (Orthodox). About ten per cent. of the population are Mohammedans and there are a few Jews in the island. The language is Greek (modern). The BFBS has an agent on the island, but there are no other Protestant societies here. The year 1899 was a province of the Turkish Empire. At that date four European powers intervened to end a continuous state of insurrection and made the island an autonomous state under a high commissioner of the powers, who nominally still subject to the suzerainty of the Sultan.

CRIM-TURKISH: A dialect of the Nogai Turkish language spoken by the Tartars of the Crimea. See Turkish.

CRITICISM OF MISSIONS: See Objections to the Missionary Enterprise.

CROWTHER, Samuel Adjai: A native of the Yoruba Country; rescued from slavery in boyhood. Soon after he was taken from the hold of a Portuguese slave ship to Sierra Leone he begged a half-penny to buy an alphabet card for himself; within six months he could read the New Testament; and after five years he was admitted the first on the roll of students of Fourah Bay College, of which a few months later he was a tutor. June 29, 1861, he was consecrated Missionary Bishop of the Niger Territory by the Archbishop of Canterbury, in Canterbury Cathedral; and in the same year the University of Oxford conferred on him the degree of Doctor of Divinity. He was the first native bishop; and in 1841 he accompanied the first Niger expedition. The Royal Geographical Society, in 1880, awarded him a gold watch for his travels and researches on the Niger. With the assistance of Rev. T. King, he translated part of the Bible and Book of Common Prayer into Yoruba; and his Yoruba Vocabulary and work on the Nupe and Ibo languages show his real ability. Bishop Crowther was eminently successful as a missionary; and, as one of his associates puts it out, dealing with the masses of the people, with heathen chiefs and with the astute followers of Mohammed, his directness and transparent simplicity of purpose won their confidence and conciliated their blind bigotry of opposition. Even more marked than his tact and wisdom was Bishop Crowther's humility. His lowliness of mind seemed to increase with his exaltation in office and in the esteem of the Christian world. He died at Lagos, December 31st, 1891.

CUBA: The largest island of the West Indies, formerly ruled by Spain; is now under its own government. It contains an area of 45,872 square miles; a coast line of 2,000 miles; and has a population (1899) of about 1,575,000, of whom 500,000 are negroes and 15,000 are Chinese. The island is largely under Roman Catholic influences; not 50,000 of the population attend school; and only twenty-four per cent. of the adults have formed legitimate marriages. Previous to the American occupation Dr. Alberto J. Diaz, a converted Romanist, labored successfully under the auspices of the Southern Baptist Home Mission Board, amidst great difficulties; and in the last four years, in the new atmosphere of religious freedom, encouraging work has been maintained by a number of societies. The following societies are now engaged in missionary labors in the island: American Baptist Home Mission Society; American Bible Society; American Church Mission; American Church Missionary Society; American Friends’ Board of Foreign Missions; African Methodist Episcopal Church; Independent Baptist Missionary Movement; Methodist Episcopal Church (South) Board; Foreign Missions of the Presbyterian Church in the United States (Southern); Foreign Mission Board of the Reformed Church; American Baptist Home Mission Society (1856), with (1900) 1 mission station, 2 chapels, 2 elementary schools, 2 high schools and 385 baptized Christians. Station also of the Leipzig Missionary Society, of which a few months later he was a tutor. June 29, 1861, he was consecrated Missionary Bishop of the Niger Territory by the Archbishop of Canterbury, in Canterbury Cathedral; and in the same year the University of Oxford

CUDDALORE: Capital of the district of South Arcot, Madras, India, situated on the sea coast, 65 miles N. of Negapatam. Climate, moderately healthy. Population (1901) 92,210, chiefly Hindus. A station of the Danish-Halle Mission was opened here in 1728, but was afterwards given up. The town is now occupied as a station by the SPG (1825), with (1901) 18 native workers, men and women, 6 places of worship, 13 outstations, 5 day schools, 2 boarding schools and 325 baptized Christians. Station also of the Southern Baptist Home Missionary Society (1856), with (1901) 1 missionary and his wife, 8 native workers, 3 outstations, 5 chapels, 2 elementary schools, 2 high schools and 413 baptized Christians.

CUDDAPAH: Capital of the district of the same name, Madras, India, 161 miles by rail from Madras city. It contains an area of 3,326 square miles. Its population is 894,542. The predominating religion is that of the Greek Church (Orthodox). The climate is one of the hottest in the district, unhealthy, malarious; mean tempe-
ture in summer 97° F. The town is badly built and squalid in appearance. Station of the LMS (1824), with (1901) 467 native workers, men and women, 30 outstations, 80 elementary schools and 1,185 church-members.

CULBERTSON, Michael Simpson: Born Chambersburg, Pa., January 18th, 1819; graduated at the Military Academy, West Point, 1839, standing high in character and scholarship; was Assistant Professor of Mathematics in the Academy 1839-40, with the rank of lieutenant of artillery, at Rouse's Point during the Canada border disturbances. Resigning his commission in the army, he entered the Theological Seminary at Princeton, N. J., graduating in 1843. He was regarded by Dr. Hodge as "among the foremost members of the institution." He sailed for China in 1844 as a missionary of the Presbyterian Board; was stationed at Ningpo 1845-51, and at Shanghai, 1851-62. He visited the foremost members of the institution." He sailed for China in 1844 as a missionary of the Presbyterian Board; was stationed at Ningpo 1845-51, and at Shanghai, 1851-62. He visited the foremost members of the institution. During his visit to this country he published a work entitled: Darkness in the Flowery Kingdom; or, Religious Nations and Superstitions in North China. There are 5 stations, Osaka, Wakanai, Tsu Ise, Tanabe and Shingu. There are 13 American missionaries, of whom 3,000 are Hindus and 2,300 Mohammedans. The place is noteworthy for an irrigation reservoir of 15 square miles area, built as a precaution against famine. The place is very unhealthy from malaria, especially when the water is low in this reservoir. Station of the ABMU (1882), with (1901) 2 missionaries and their wives, 75 native workers, men and women, 30 places of regular preaching, 31 Sunday schools, 90 common schools, 2 boarding schools and 2,292 church-members.

CUNNINGHAM: A town in the Transkei region, Cape Colony, S. Africa, situated about 15 miles S. W. of Butterworth. Station of the UFS (1856), with (1902) 1 missionary and his wife, 45 native workers, men and women, 16 outstations, 16 schools and 1,646 church-members.

CUPANG: Capital of the western, Dutch part of the island of Timor, East Indies. The Netherlands Missionary Society maintained a station here from 1819 to 1858, and gathered in 860 baptized converts. After the work was passed over to the Dutch Government the number of Christians increased to 3,400, but, as Warrack has said, they seem to lack sufficient oversight and to be on a rather low level of moral and religious life.

CURITIBA: Capital of the state of Parana, Brazil, S. America; situated in a pleasant open plain, where Europeans have settled, many of them French. A railway connects it with the port of Paranagua, about 80 miles distant. Population about 6,000. Station of the PN (1885), with (1901) 1 missionary and his wife, 2 missionary women, 7 native workers, of whom 6 are women, 1 commen and 1 high school and 1 Young People's Society.

CUTCH. See KATCHCH.

CUTCHI LANGUAGE: This is a dialect of the Sindhi; belongs to the Indo branch of the Aryan family of languages, and is spoken in the district of Cutch, W. India.

CUTTACK: Capital of the district of Cuttack, Orissa division, Bengal, India; situated in the delta of the Mahandai River at the head of its canal system. Population (1901) 51,364, of whom 75 per cent are Hindus. Station of the BMS (1882), with 9 missionaries, men and women, 18 native workers, 5 outstations, 16 common schools, 1 high school, 1 theological seminary, 2 orphanages, a printing-house and 1,037 communicants. Also station of the Baptist Zenana Missionary Society (1897), with 4 missionary women, 11 native women workers, 6 schools and 100 Zenana pupils.

CUZCO: Capital of the Department of Cuzco, Peru, and formerly the capital of the empire of the Incas; situated at an altitude of 11,350 feet, 330 miles S. E. of Callao. Station of the RBU (1897), with (1902) 2 missionaries and their wives.

CWENWEN: A settlement in the Transkei district, Cape Colony, S. Africa, situated about 15 miles S. W. of Umtata. Station of the South Africa Wesleyan Missionary Society, with (1900) 19 native workers, 8 outstations, 5 preaching centers, 3 schools, 4 Sunday schools and 390 professors and Christians.

CYPRUS: An island, the third largest in the Mediterranean, 60 miles from the coast of Asia Minor and 41 miles from the coast of Syria. It is almost 150 miles long and 55 miles broad, with an area of 3,584 square miles. The greater part
DACC: A town in Bengal, India, situated on the "old Ganges," 150 miles northeast of Calcutta. Formerly capital of Bengal, and a most populous and brilliant city. It now retains none of its former elegance. Population (1901), 90,542, of whom about half are Hindus and a little more than half Mohammedans. Station of the BMS (1816), with (1900) 3 missionaries and their wives, 10 native workers, 3 outstations, 2 schools, and 74 church-members. Station also of the Baptist Zenana Mission (1870), with 3 missionary women, 8 native women helpers, 8 elementary schools and 50 Zenana pupils.

DAGHESTAN: Name applied to that part of Caucasus lying on the eastern slope of the Caspian Sea. Parts of the country are very mountainous, with deep valleys, numerous lakes, streams and glaciers. Western Daghestan is the chief abode of the Lesghians, a powerful tribe, chiefly Mohammedans. Further north live Tatar tribes, all of them Mohammedans, more or less nomadic, living principally by the raising of cattle and horses. Most of them are peaceable Russian subjects. The few large towns, among them Derbent, the capital, are situated on the Caspian coast. There is no effective missionary work, the British and Foreign Bible Society has published the Gospel of Matthew in Kumuki.

DAHANA: A station of the Rhenish Missionary Society (1878) on the eastern coast of Nias, an island near the west coast of Sumatra, East Indies. It was partly an account of Mohammedan intrigues among the pagan tribes of the place that the Dahana station was established. It now has (1900) 1 missionary and his wife, 3 native workers, 2 schools and 302 professing Christians.

DACHAU: Formerly an independent negro kingdom, now a colony of France, situated on the Gulf of Guinea, between Togoland on the west and Lagos and Nigeria on the east. In 1900 the boundaries were extended on the north to join the French military territories in the Western Sudan. It comprises about 60,000 square miles and has a population roughly estimated at 1,000,000, mostly negroes of the Ewe family. The climate is very unhealthful, the soil remarkably fertile. Kotonu, the best harbor on the coast, has been chosen as the terminus of a railroad now being constructed to open up the interior. The chief coast town is Whydah, formerly a slave port, now exporting great quantities of palm oil. Abome, the capital, is 65 miles inland, and connected with Whydah by a road which continues to the Mahi country, 30 miles farther north. The religion of the natives is mostly the lowest grade of fetishism, and wholesale human sacrifices have been one of its characteristics.

The WMS has a station at Porto Novo, under charge of a French missionary and his wife, with some 20 outstations, at whose places of worship the average attendance is 2,200. The total of professing Christians is about 350 (1902). Sketchley, Dahomey as It Is, London, 1874; Aspe-Fleuriot, La Guinée Française, Paris, 1900; Forbes (E. F.), Dahomey and the Dahomeens, London, 1881.

DADA: Settlement in Rhodesia, S. Central Africa, lying N. W. of Bulawayo. Station of the National Baptist Convention (1900), with 1 missionary and 20 professing Christians.

DAKHANI LANGUAGE: This language belongs to the Indo branch of the Aryan family, being a dialect of the Hindi. It is used by the Mohammedans of Madras, is written in Arabic characters, and is sometimes called Southern Hindustani. It differs materially from the Urdu or Northern Hindustani.

DAKURA: A settlement in the northern part of the Mosquito coast, Nicaragua, Central America. Station of the Moravian Missions (1893), with 1 missionary and his wife, 16 native workers, men and women; 1 school, 1 Sunday school, 1 chapel and 107 professing Christians.

DAL-HOUSE: A sanitary hill station for the Punjab established in a portion of the Gurhaspur district which is detached and lies within the native state of Chamba, on the borders of Kashmir. The station lies at an altitude of 7,700 feet and has a population of about 2,000. The CEZ has a sanitarium here, with 1 missionary woman in charge.

Dalmatia: One of the provinces of the Austrian Empire; it occupies a narrow strip along the eastern shore of the Adriatic, between Croatia on the north and Albania on the south. Herzegovina and Montenegro lie to the west. With its adjacent islands it is the most southern crown-land of the Austrian Empire. Area, 4,949 square miles. The coast is steep and rocky, but numerous bays afford good harbors and ports. Spurs from the Dinaric Alps cross the interior, reaching an elevation of 6,000 feet in Mount

Czechs

Danish

THE ENCYCLOPEDIA OF MISSIONS

of the island is mountainous, a range 7,000 feet high running the whole length of the island. Cyprus was placed under British control by a special treaty in 1878, although it is still nominally Turkish territory. It is open to missionary operations because of the perfect security and religious liberty which British rule produces. Population roughly estimated at 150,000 in 1893; 182,736 are members of the Greek (Orthodox) Church and 51,309 are Mohammedans. There are also a few Armenians and some Syrians of the Maronite Church. The prevailing language is Greek, but Turkish is much used in business and knowledge of English is increasing.

Mission work is carried on in Cyprus by the RP (U. S. A.), which has stationed at Larnaca a missionary and his wife and 1 native worker. A dispensary and primary school are conducted and 22 communicants have joined the mission church. The BFBS has a Bible depot at Larnaca.

CZECHS. See Bohemians.
Orient, while on the north the Belebech Mountains rise to a height of 5,000 feet. The climate is warm and in general healthful. Most of the land is given up to pasture. The population (1900) is 593,784. With the exception of about 10 per cent., the people belong to the Morlacks of Dalmatians proper. The remainder are Italians, Albanians and Jews. Full liberty of faith and conscience is secured, and every religious body has the right of ordinary public worship or instruction. The majority of the population belong to the Roman Catholic and Greek Churches, but the Evangelical Lutheran, the Evangelical Brotherhood, the Gregorian Armenians and the Jewish churches are recognized by the state.

Dalmatians or Morlacks are a people belonging to the Servian race, and speak a dialect of Slavonic called the Illyric. Physically they are a fine race, tall, well-developed, with regular features and dark complexion. Those living on the coast are excellent seamen, noted for their daring and bravery. They were the chief strength of the military prowess of Venice during the Middle Ages. The Morlacks of the interior are lovers of liberty and independence, brave, self-sacrificing and successful in the aggressions of the Turks. They are noted for hospitality, while at the same time they are deceitful, rapacious and addicted to drunkenness.

Mission work among the Dalmatians is confined entirely to the colportage of the British and Foreign Bible Society.

DAMASCUS: Capital of the Turkish province of Sham, Syria, about 60 miles from the Mediterranean. One of the oldest cities in the world, and especially honored by the Muslims, who call it Sham-es-Shereef, Damascus the Holy. The Arabs call it one of the four terrestrial paradises. The view of the city as one descends from the range of Lebanon is very beautiful, the surrounding gardens almost concealing the city itself, except as the minarets rise above the mass of houses. Inside, however, it is very like other interior Oriental cities, with narrow streets and miserable houses. The population, numbering about 225,000, are almost entirely Muslims, the Christians and the Jews being not only few in numbers, but weak in influence. At the time of the Druse massacre, in 1860, the Christian and Jewish population were driven from the city and numbers of them slain. Since then they have returned in some numbers, but the city is still the scene of much Muslim fanaticism.

Station of the Jewish Mission Committee of the Presbyterian Church in Ireland (1843), with (1900) 6 missionaries, men and women; 42 native workers, men and women; 11 outstations, 12 preaching places, 15 elementary schools, 4 high schools and 207 professing Christians. Station also of the British Syrian Mission Schools (1868), with 3 missionary women, 14 native women helpers, 3 outstations, 3 schools, 1 chapel and 1 Sunday school. Station also of the London Jewish Mission (1869), with 7 missionaries (one with his wife), 8 native workers, men and women; 1 chapel, 1 Sunday school, a book depot and 1 school. Station also of the Edinburgh Medical Missionary Society (1884), with 2 missionary physicians (one with his wife), 2 missionary women, 1 dispensary and 1 hospital.

DAMOH: A town in the Central Provinces, India; situated 35 miles N. W. of Jabalpur. The population is (1891) 11,800, of whom 9,000 are Hindus. Station of the FCMS (1894), with 11 missionaries, men and women (one of them medical); 12 native workers, men and women; 2 dispensaries, a hospital, 1 elementary school, 1 industrial school, a Young People's Society and 60 professing Christians.

DANG-SENG: A town in the Fo-kien province of China, lying about 50 miles south of Fu-chau. Station of the CEZ (1893), with (1901) 2 missionary women, 3 native women helpers and 2 boarding schools.

DANISH MISSIONS: To King Frederick IV. of Denmark belongs the honor of having initiated foreign missions in the Protestant, or Reformed, Church. As Crown Prince he manifested much interest in the condition of the colonies, which since 1820 had been part of the Danish Kingdom, and when he came to the throne, with the cordial assistance of the court chaplain, Dr. Lütkens, he arranged to send Bartholomew Ziegenbalg and Henrik Pitschau to India, where they founded, in 1705, the “Danish-Tamil,” or “Danish Hall,” Mission in Tranquebar. Until the death of Christian Frederick, in 1798, this mission continued to receive partial support from the Danish Government, much of its material being furnished by the SPCK. The Royal College of Missions, founded in Copenhagen in 1714, did good work both for the Tamil Mission, that of Hans Egede in Greenland and Von Westens Finmark Mission. Rationalistic influences, however, were strong and after the death of Schwartz interest declined. The English gained control of Hindustan, the missionaries received support from the SPG, and in 1847 the church buildings and remaining interests were handed over to the Leipzig Society.

Meanwhile much work was done by Danish missionaries in the service of foreign societies, most of them among the Moravians. Ten were sent to Surinam, 10 to Tranquebar, 6 to the Mosquito coast, one to Labrador, of whom two had been in Greenland; seven to Danish West Indies, nine to English West Indies, one to North America, three to South Africa, one to the Mosquito coast, one to Australia. Altogether 55 Danish missionaries have been in the Moravian missions, among them the Greenland missionary, Jens Haven.

In 1843 the “Northern Schleswig Mission” was founded to help the Moravians in the Danish West Indies, which later Southern Jylland was separated from Denmark. This Society still has its branches in Jylland, from which it received donations as late as 1888.

Danish Missionary Society (Danske Missionsselskab): Headquarters, Fredericia, Denmark. It is a general society of all the Danish Church people, and is conducted by a committee. Its own particular work is among the Tamils in India, but it works harmoniously with other missions. Its own missionaries are all ordained, and those who have been on mission ground for three years direct the affairs of the Society on the mission field. A yearly report must be sent to the home committee in Denmark. This Society has on its list Danish Greenland Mission, Danish Malay Mission, New Danish Tamil Mission, and Northern Santal Mission. It has also assisted the Lovelath Mission.

The mission movement in the beginning of the 19th century reached Denmark also, and inspired priest Bone Falek Ronne to found the “Danish Mission Society,” June 17, 1821. Its motto
was, "Be not fearful: only believe" (Mark 5: 15). This Society seemed to him a necessity, for the Mission College was not kind, and the strength of the free workers was very great. In 1823, on a journey to Fyen, Ronne had asked many of the priests to hang up boxes in the parsonage for free gifts to the mission. Bishop Plumb indicted him in the court of chancery, and Ronne was rebuked. The ministers had to take down the boxes, and Ronne very great. The Danish Mission Society began to help the Greenland Mission by books, letters and donations, but the acts of the Mission College became more oppressive. They denied the mission in many ways, and would not allow the missionaries to write to any one else but the college about their work.

The Society supported for a little while from 1827 J. W. Cappellen, a Norwegian, in the Basel Missionary Institution, and in 1829 two men, P. P. Jager and Andreas Riis, were sent out from Copenhagen. In May, 1721, Hans Egede, a minister of Vaagen, sailed for Greenland from Copenhagen. His interest in that country had been aroused by the report of the degradation of the people, brought by a brother-in-law, and he had for several years tried to arouse the Danish Church about the welfare of the people. In 1832 arrived at Ussu, near Christiansborg, in what was then a Danish possession. Jager soon died, but Riis worked for 13 years, first at Akra and later at Akropong, for four years the only missionary at this station. After the sale of the Danish possessions in Africa to England the work of the Society was somewhat feeble. Later, attempts were made to carry on work in Smyrna, Turkey, but without great success.

In June, 1867, at a meeting held in Nyburg, it was decided that the Danish Society should become the leader in all mission work in Denmark, and that Unions should be formed, and that the bishop issue a call to the ministers to interest themselves in the matter. Two years later a mission school was founded. In 1863 a delegate was sent from Germany to inquire if the Society would take the independent mission at Bethanien in South India, which Missionary Ochs had begun, after he had left the Leipzig Society, and was formed by himself and the missionaries on the question of caste. Ochs was at that time in Europe, and came to Copenhagen, when the Danish Missionary Society promised to help him in India with gifts and workers.

This was the beginning of the New Danish Tamil Mission. In 1861 a large number of Danish missionary friends interested themselves in other mission work. A Greek-Danish Missionary Society was founded by Victor Block in 1865, with a plan to unite with the Greek (Orthodox) Church, and with this do a work among the Mokammedans, but the Danish Missionary Society would not consider it. In 1867 Pastor Block went to Athens, and the next year the mission was given up. In 1872 the first scholars of the Danish Missionary Society, Loventhal and H. Jensen, went to Vellur in India. They worked together till 1874, when Jensen went into the Danish Missionary Society's service, Loventhal carrying on an independent mission.
The principal aim is to baptize the natives, whom he accepts if they seem honest in their desire to believe as the missionaries do. But one station, 2 missionaries and 2 native workers were reported in 1902.

The Utakamund Danish Evangelistic Mission: Known also as the Emilies Minde (memorial), or Koefoed's Mission, is a small organization for voluntary work in Madras, India. The missionaries receive no salaries.

DAPOLI: A town in the Ratnagiri district, Bombay, India; situated a few miles from the sea and about 70 miles S. W. of Poona. Population a little over 5,000. It is one of the healthiest places in the Bombay Presidency. Station of the SPG (1878), with (1901) 1 missionary, 2 missionary women, 20 native workers, men and women; 1 place of worship, 4 day schools, 2 boarding schools and 20 baptized adult Christians.

DARAPURAM. See DHARAPURAM.

DARBHANGAH: Chief town of the district of the same name in Bengal, India; situated about 56 miles N. E. of Patna. Population (1901), 66,244. It was originally a purely Mohammedan city, but the Hindus now outnumber the Moham medans almost in the ratio of 3 to 1. Station of the Zenana Bible and Medical Missionary Society, with (1903) 2 women missionaries, 3 native workers and 1 school. Also a circuit of the ME, with (1902) 4 native workers, 2 Sunday schools and 240 professing Christians.

DAR ES SALAAM: A seaport town of German East Africa, lying about 40 miles S. of the island of Zanzibar. Population, about 13,000, Arabs, Indians and Bantu negroes. The town gives access to the interior of the province by well-made roads, and a concession has been issued for a railway which is expected ultimately to be extended to the southern end of the Victoria Nyanza. Station of the Berlin Mission to East Africa (1887), with (1900) 2 missionaries (one with his wife), 1 native worker, 1 chapel, 1 school and 12 professing Christians.

DARFUR. See SUDAN.

DARJILING: A town in the district of the same name, Bengal, India, 360 miles from Calcutta by rail. It is a hill station (7,000 feet) and contains 9,000 inhabitants. Station of the SPG (1885) (1891), 14,100, of whom 8,600 are Hindus and 3,700 Buddhists. It is a place of many languages, Nepali and the Bhutia here meeting the English, and organized an English church, of which he was the pastor. Having made several tours into the Telugu country, he fixed upon Nellore as the most suitable place for a mission, and in

1859, when he retired from active service and settled at Sydney, where he died December 6, 1867.

DARSI: A town in the Kistna district, Madras, India, situated about 25 miles N. W. of Ongole. Station of the ABMU (1894), but not occupied (1901), the work there being under care of the missionaries residing at Ongole and the statistics being summed with those of Ongole. The native Christian communicants at Darsi and its dependencies number about 3,250.

DASKA: A town in the district of Sialkot, Punjab, India, situated about 50 miles N. of Lahore. Population somewhat over 5,000. Station of the Church of Scotland Foreign Missions (1857), with (1900) 44 outstations, 1 missionary and his wife, 24 native workers, 1 chapel, 20 elementary schools, 1 high school, 1 theological seminary and 133 professing Christians.

DATAGANJ: Town in the Rohilkhand district of the United Provinces, situated about 20 miles S. W. of Budaun. Station of the ME, with (1901) 14 native workers, 16 Sunday schools, 2 common schools, a Young People's Society and 590 professing Christians.

DAVAO: A town and seaport on the island of Mindanao, P. I., situated on Davao Bay in the eastern part of the island and at the foot of the volcano of Apo. Station of the ADCEF (1902), with 1 missionary and his wife.

DAVID, Christian: Born in Moravia early in the 18th century, his father a Bohemian, his mother a German. He was a zealous Roman Catholic, but was converted to the Moravian views early in life and became a leader in the great Moravian emigration to Count Zinzendorf's estates. Of this, Zinzendorf writes: "Christian David was so intent on the Moravian emigration, that, when he was engaged in wainscoting the salon of my house at Berthelsdorf in 1723, and had about finished his work, he left his tools, and set off, without hat, on a journey of nearly 200 miles, to Moravia, to lead back emigrants. He made eleven or twelve journeys in all, and, tho often in the most imminent danger from the officers of justice who rode in search of him, he was passed by or preserved from them in the most wonderful manner." The removal to Berthelsdorf began in 1722 with ten persons, and within seven years 300 others had joined the little company and built the town called Herrnhut. In 1733 Christian David accompanied the first Moravian missionaries to Greenland. After various journeys in the service of the church and another voyage to Greenland, he in 1748 accompanied the great missionary colony to Pennsylvania. In August, 1749, after revisiting Greenland, he made another visit to America, and assisted in building the chapel-house at Nazareth, Penn. He died at Herrnhut, 1750.

DAY, Samuel Stearns: Born Ontario, Canada, May 13, 1808; graduated Hamilton Literary and Theological Institute; sailed as a missionary of the ABMU to India, September 29, 1855. He was stationed at Vizagapatam, then at Chintecola, and in 1837 at Madras. In Madras he spent three years preaching in Telugu and English, and organized an English church, of which he was the pastor. Having made several tours into the Telugu country, he fixed upon Nellore as the most suitable place for a mission, and in
1840 removed thither with his family. Mr. Day was the founder of the Telugu Mission. Amid many discouragements and obstacles he continued to labor, in firm faith that the Gospel would triumph in that heathen land. By reason of the length he spent there (1845-1848) in the United States, and returned to Nellore. But in 1853 he was compelled to return to America and after years of physical suffering he died at Homer, N. Y., September 17, 1871.

DAYAK LANGUAGE: This language is found in the island of Borneo in two main dialects and belongs to the Malay family. Missionaries of the Rhenish Missionary Society reduced the language to writing, using Roman letters, and have done some literary work in it. In German works on Borneo the name is spelled Dajak.

DEACONESSES: 1. History: Almost from the day of her birth the Christian Church had a two-fold ministry— the Ministry of the Word (diakonia tou logou), instituted by Christ Himself for the preaching of the Gospel and the administration of the sacraments (Matt. xxviii: 19, 20; Mark xvi: 15; John xx: 21), and the Ministry of Mercy (diaconia he kathemerin) or the Diac­onation (Acts 6: 1-6).

The latter was the direct outgrowth of the forest, the apostles, like their Divine Master, combined both ministries in their own activity. But when the number of the disciples was multiplied, and the Grecians in the congregation at Jerusalem began to murmur against the Hebrews, because their widows were neglected in the ministry of alms, Christ in order to secure such a systematic administration of the alms as their own growing duties of another kind made impossible, called the multitude of the disciples unto them and said: "It is not reason that we should leave the word of God, and serve tables. But we will give ourselves continually to prayer and to the ministry of the word." The assembled believers did as they were commanded, chose seven men having the required qualifications, set them before the apostles, and these, "when they had prayed, laid their hands on them," i.e., ordained them to this newly-created office of the Church.

To this ministry was committed the care of the poor and sick, under the supervision of the ministry of the Word. Tho Stephen preached (Acts vi: 8-10; vii: 1-53), and Philip both preached and baptized (Acts viii: 5, 38), the deacons were not primarily meant to be evangelists, but dispensers of charity and the more immediate overseers of the Church's temporal affairs. Thus they became the most direct and efficient "helps" of the ministry of the Word; and how beneficial this arrangement proved is evident from the further statement that the "word of God increased; and the number of disciples multiplied in Jerusalem greatly." To this ministry of mercy women were also admitted at a very early date. The necessity for this evidently made itself felt almost at once, inasmuch as the strict seclusion of the female sex in Greece and in some Oriental countries necessarily debarred them from the ministrations of men (Dean Stanley). That women deacons were already found in the Apostolic Church is manifest from Rom. xvi: 1, 2. In this passage Paul speaks of one Phebe, "our sister, which is a servant (Gr. diakone) of the church which is at Cenchreae." He indicates the character of her office and the nature of her work in the statement that she had been a succorer of many, and of himself also. For this very reason he commends her to the Christians at Rome, to whom she probably transmitted his letter, and admonishes them to "receive her in the Lord, as becometh saints," and to assist her in whatsoever business she had need of them. If, furthermore, the passage 1 Tim. iii: 11 refers, not to wives of the deacons, but to women deacons, as many able commentators contend, then the evidence is still more conclusive that the Female Diaconate was an established office in the Christian Church long before the close of the 1st century.

The office seems to have spread with the growth of the Church. At the beginning of the 2d century we find an undoubted reference to deaconesses in Asia Minor in the well-known letter of Pliny the Younger, Governor of Bithynia, to the Emperor Trajan. He writes: "In order to test the truth of the matter (i.e., concerning the life and customs of the Christians) I deemed it necessary to put to the rack two maids, who are called ministrae. But, beyond a most corrupt and boundless superstition, I could extort nothing from them." The Female Diaconate reached its highest development in the 4th century, and in the Church of the East. At this time the references to it are frequent, and many women of noble birth are found in its ranks. Very complete information regarding it is contained in that body of ecclesiastical writings known as the "Apostolic Constitutions." This document enjoins that faithful and holy women be set apart as deaconesses, because the Church had need of them for many things; directs that they shall be inducted into their office by the bishop, with prayer and the imposition of hands, in the presence of the presbyters, deacons and deaconesses; and even prescribes the prayer to be used at the service of consecration. It also defines the duties of the deaconesses. They were to instruct the female converts, "to give the necessary external assistance at their baptism, visit and relieve the sick, the afflicted and the distressed of their own sex, minister to the confessors in prison, prepare the bodies of women for burial, serve as doorkeepers at the women's entrances to the churches, assign women their places at worship, facilitate communication between the bishop or presbyter and the female members of his congregation, and in general engage in all those helpful services from which heathen sentiment excluded the deacons.

After the 4th century the Female Diaconate began to decline. The causes of this are to be sought partly in changed conditions, but chiefly in the growing belief that God could be better served in a quiet, ascetic life than by a life of activity devoted to the good of others. The consequent growth of monastic orders, the convent now became the retreat for pious unmarried women; and, by the 9th century in the Church of the West, and the 13th in the Church of the East, the Female Diaconate had practically disappeared. Only among the Walloon Brethren before the Reformation, and in some Mennonite congregations of Germany and Holland after the Reformation were traces of it left until its revival in the
first half of the last century by the Rev. Theodore Fliedner, at Kaiserswerth-on-the-Rhine. Fliedner became pastor of the small Protestant congregation at Kaiserswerth in 1822. On a collecting tour through Holland and England in behalf of his poverty-stricken church he became acquainted with numerous institutions of Christian mercy. These awakened in him the desire to undertake similar work himself. He began by helping a government official, Dr. von Steiner, to provide shelter for the prison women in the penitentiary at Dusseldorf. In 1826 he founded the Rhenish-Westphalian Prison Society, the first of the kind on the Continent. In September, 1833, the little summer house of the sonage garden temporarily sheltered the first discharged female convict, and became the cradle of the Kaiserswerth institutions. Three years later he inaugurated the work with which his name will always be associated. Among the Mennonites of Holland he had found deaconesses. Others before him (Kloenne, von Stein, Amalia Sieveking and then and Recke-Volmarstein) had advocated the restoration of the ancient office, but had found no practical way of doing so. He himself had become persuaded that no one was by nature and grace so well fitted for ministering love as a devoted, Christian woman, and to him the solution of the problem lay in establishing institutions for the special training of unmarried women in the various branches of charitable work, and in associating those in a close community. Accordingly, in the spring of 1836, with no money but with a large measure of faith, he bought the largest and finest house in Kaiserswerth, organized the Rhenish-Westphalian Deaconess Society, and on the 13th of October of the same year opened the Kaiserswerth Deaconess Motherhouse. Eight and two days later, Gertrude Reichardt, the daughter of a physician, became the first probationer. Now began a marvelous development. The number of sisters multiplied rapidly; one institution after the other was added at Kaiserswerth; outside "stations" were undertaken; Motherhouses were established in other places. Then Fliedner died in 1864; there were already 31 Motherhouses, with a total of 1,593 sisters engaged in 406 stations, the Kaiserswerth Motherhouse alone having 425 sisters working in four continents, on 111 stations.

In 1861 the Motherhouses organized on the Kaiserswerth model formed a Union or General Conference, which meets every three years at Kaiserswerth. In 1901 the number of houses belonging to the Union was 75, with 14,501 sisters in active service, and an annual income and outlay of $3,375,000. Forty-eight of these houses are in Germany, 7 in Holland, 7 in Russia, 4 in Switzerland, 2 in France, 2 in Austria-Hungary, 1 each in Denmark, Sweden and Norway, and 2 in the United States. One house in Germany, 2 in Holland and 1 in the United States have been received into the Union since 1901. Fifteen German houses have no connection with the Union.

The first effort to transplant the deaconess work to the United States was made in 1839, when at the earnest request of the Rev. Dr. Passavant of the Lutheran Church, Fliedner himself brought over four deaconesses to become the nucleus of a Motherhouse at Pittsburg. For various reasons this first venture proved a failure. In 1884 another colony of German sisters was installed in the German Hospital, Philadel-
Deaconesses

THE ENCYCLOPEDIA OF MISSIONS

208

ing. She retains her evangelical liberty to relinquish it when once conscientiously convinced that to do so would be a sin. This does not of course occur after one has been consecrated. Summarizing the advantages of the modern Motherhouse they may be stated as follows: It gives those who expect to devote their life to the work of Christian mercy in any of its forms a theoretical and practical training for that work such as they could not get in any other way, and at no other place; it affords the best possible opportunities for utilizing the special gifts of each one, and the gifts of all in common for the accomplishment of the largest measure of good; by the beauty of its worship, the frequency and variety of its services, the abundant preaching and teaching of the Word, the special pastoral care given each sister, and the healthful influence that comes from being closely associated with common aims in a common work, it is a most potent means for developing a strong Christian character and personal holiness; while, finally, it also serves as an outward protection and support by lifting the sister above the cares, frivolities and temptations of the world, providing for all her material necessities, sheltering her when disabled and offering her a quiet retreat in old age.

3. Fields of Labor: A deaconess of the Kaiserswerth type is not a female evangelist. The work embraces many an opportunity to speak the Word of instruction and comfort in private, and particularly in her work with the young has extraordinary advantages for religious teaching; she is nevertheless not called to the ministry of the Word, but, in accordance with Math. v: 16, is rather to demonstrate the saving power of the Word in what she is and does. Nor is she only a nurse of the sick, though such services are thus engaged in hundreds of institutions. Besides the nursing of the sick, her work embraces the care of the aged and infirm, the insane, the feeble-minded and the epileptic; the care and instruction of children in Day Nurseries, Orphans' Homes and Industrial Schools, Servants' Training Schools and Girls' High Schools; the recovery of the fallen in reformatories, prisons and Magdalen asylums; the protection of the impared in working girls' homes and hospires; and above all, and as the common work among the sick, the care of the bereaved, the ignorant and the needy of every kind in parishes, under the direct oversight of the pastor.

According to the statistics of the General Conference of 1901, a total of 98 deaconesses were then stationed in Asia, Africa and South America. In hospitals there were 14 at Alexandria, 9 at Cairo, 8 at Beirut, 8 at Jerusalem and 2 in the leper colony of Groot Chatillon, Surinam, South America; in orphan's homes 17 at Beirut, 11 at Smyrna, 10 at Jerusalem and 2 in the school and sanitarium at Acrey on Mt. Lebanon; in Protestant work at Alexandria and Haifa 2; 15 were also employed in the hospital and 2 in the little children's school at Constantinopole. On mission stations among the heathen there were 2 in Madagascar, 3 in Batavia, 2 in South Africa, 4 in West Africa and 4 in India.

4. Other Types: In the United States the deaconess cause has also struck roots in other Churches besides the Lutheran. In 1887-88 the work was taken up by the Methodist Episcopal Church, and in 1889, after various private efforts, the General Convention of the Protestant Episcopal Church adopted a canon authorizing the training and appointment of deaconesses. In the Methodist Church the work has had a remarkably rapid growth, extending to nearly all parts of the United States, but also into Europe, Asia, and Africa, with an enrollment in 1901 of almost 1,190 deaconesses; but in both Churches the work differs materially from the Kaiserswerth type. The Methodist deaconess is to a great extent an evangelist, and neither in the Methodist nor in the Episcopal Church are the so-called "training schools" and "deaconess homes" real Motherhouses, possessing those distinctive features which European experience has shown to be essential for the healthy and permanent development of the Female Diacocate.

Various institutions of a similar character, mostly interdenominational, and devoted almost exclusively to hospital work, conclude the list in the United States.

Schafer, Die weibliche Diakonie, 3 vols., Stuttgart (2d ed. 1887-94); Wacker, Der Diakonissenorden, Gotzenburg (1890). (Eng. trans. The Deaconesses Colling, Mary J. Drexel Home, Phila., (1893); Wurster, Die deaconess Movement for Inner Mission, Berlin, (1895); Uhhorn, Christian Charity in the Ancient Church, New York, (1893); Jacob, The Female Diacocate of the New Testament, Lutheran Church Review, January, 1892; Spaeath, Phoebe, the Deaconess, Lutheran Church Review, July and October, 1885.

DEAN, Rev. Williams: For many years a missionary in Siam, under the AMB. His work in that country began in 1835, and through his efforts the first Chinese church in Bangkok was organized two years afterward. On his return to America in 1845 he awakened great interest in his work by his addresses, and induced many to take a deeper interest in the cause of foreign missions. In 1864 he resumed his work at Bangkok, where he remained until 1884. He died at Sun Diego, August 13, 1895.

DESEA. See Disa.

DEHRA: A town in the Dehra Dun district, United Provinces, India. Prettily situated in a mountain valley more than 2,300 feet above the sea, and 75 miles east of Ambala. Population (1901), 27,500, of whom 75 per cent. are Hindus and nearly 25 per cent. Mohammedans. Mission station of the PN (1853), with (1901) 5 missionaries, men and women (one of them a physician); 17 native workers, men and women; 1 common school, 2 high schools, and 101 places of worship, 2 preaching places, 1 common school and special work for lepers.

DEINZERHOHE: Station of the Neuen Dettelsau Missionary Society, situated on the E. coast of German New Guinea. The force is composed of 2 missionaries, who conduct a common school there.

DELAGOA BAY: Station of the WMS south of Lourenco Marques, Portuguese East Africa, situated on Delagoa Bay. In 1899 there were stationed here 1 missionary, 20 native workers, men and women; with 3 places of worship and 3 common schools. The South African war disarranged many of the missionary enterprises of these regions and revised reports have not yet (1903) been obtainable.

DELENA: A station of the LMS, on the S. coast of British New Guinea, about 50 miles N. W. of Port Moresby. The station was occupied in 1882 and is worked (1902) by 1 missionary.
and 16 native workers, with 17 elementary schools and 462 professing Christians.

**DELHI:** A town of Punjab, India, 38 miles S. W. of Meerut. Noted for its wonderful old palaces and magnificent old buildings, in some respects rival and curious in the world. No city in India has finer thoroughfares than Delhi; most of its houses are of brick, well built and substantial. It is the easternmost of the great towns of the province, situated on a fertile plain on the right bank of the Jumna. It has been of great importance having been the splendid capital of the Mogul (Turkish) emperor Shah Jihan, whose fine mosque, Jama Masjid, is a magnificent monument of the 17th century. Because Delhi was the former residence of the great Mogul, many Turks, Afghans, and Mongols have settled here, and life among the upper classes has a decidedly Mohammedan character. Delhi was besieged by the English during the mutiny of 1857. Its population (1901) is 208,575, two-fifths of whom are Mohammedans and nearly three-fifths Hindus. It is a station of the BMS (1818), with (1902) 8 missionaries, men and women; 24 native workers, men and women; 20 common schools, 1 high school, a dispensary and 175 Zenana pupils. Station also of the Baptist Zenana Mission (Englands) (1890), with 8 missionary women, 20 native women workers, 6 common schools, 1 high school, a dispensary and 175 Zenana pupils. Station also of the SPG (1854), with (1902) 16 missionaries, men and women; 93 native workers, men and women; 10 places of worship, 19 common schools, 3 high schools and 873 professing Christians. Station also of the ME, with (1902) 11 native workers, men and women; 12 Sunday schools, a Young People's Society, and 999 professing Christians.

**DEMERARA:** A river and district in British Guiana (q.v.).

**DEOBAND:** A town in the Saharanpur district, United Provinces, India; situated 45 miles N. E. of Meerut. Population (1891), 19,300, of whom about 11,000 are Mohammedans and the most of the remainder are Hindus. Station of the ME, with (1902) 11 native workers, men and women; 1 place of worship, 10 Sunday schools, 1 Sunday school for Young People, and 705 professing Christians. Also written Deobund.

**DEGARH:** A town in the Santal Parganas, Bengal, India; situated 55 miles S. by W. of Bhagalpur. Population (1891) 8,300, chiefly Hindu. It contains 22 temples of Siva and is a famous center of pilgrimage. Station of the CWBM, with (1902) 2 missionary women, 2 native workers, men and women; 1 place of worship, 1 Sunday school, 1 Sunday school for Young People, and 705 professing Christians. Also written Deogur.

**DEOLI:** A town in Ajmere, India, 70 miles southeast of the town of Ajmere. Climate tropical. Population, 3,000, including Rajputs, low-caste Hindus and Minas. Station of the UFS (1871) and the CMS (1902) 1 missionary and his wife, 20 native workers, men and women; 2 common schools and 10 church members. The place has suffered severely from famine and the Christian community has been depleted by the removals of members to other places.

**DEPOK:** A village south of Batavia, Java, East Indies. It was Christianized in 1714, and was the seat of a Dutch Missionary Society (Nederl. Zending.) station from 1834 to 1852. In 1878 Schnurman having formed a Committee in Holland for its support opened a seminary here for training native workers for the whole archipelago. It has proved an efficient and valuable agency for bringing the different races of the islands into touch with each other and for cultivating closer relations between the various societies.

**DERA GHAZI KHAN:** A town in the North-west Frontier Province, India; situated 45 miles west of Multan. Population (1891), 27,900, of whom 16,000 are Mohammedans and the larger part of the remainder are Hindus. Station of the CMS and the CEZ (1879 and 1893), with (1902) 4 missionaries, men and women (2 of them physicians); 3 native workers, 1 elementary school, 1 dispensary, 1 hospital and 44 professing Christians. It contains many mosques and a fine bazaar.

**DERA ISMAIL KHAN:** A town of the North-west Frontier Province, India; situated on the W. bank of the Indus, 120 miles north of Multan. A well-planned town, well known for its fine bazaar and construction, but very badly drained. Population (1891), 26,900, of whom 15,200 are Mohammedans, including many proud descendants of old tribal chiefs and other aristocrats. Station of the CMS and of the CEZ (1861 and 1884), with (1902) 5 missionaries, men and women (2 of them physicians); 9 native workers, men and women; 1 elementary and 1 high school, 2 dispensaries, 1 hospital and 57 professing Christians.

**DERVISH:** A Mohammedan. Theosophist or Sufi; commonly a member of an order formed for the purpose of seeking mystical knowledge of God. Etymologically the word "dervish" means one who begs at a door, literally as a mendicant, or figuratively as a supplicant at the door of God's mercy. The latter meaning is the one which the older Dervish Orders insist upon. In Turkey popular contempt for the unattached, wandering, and begging Dervishes is expressed in a proverb which says, "The Christian's lazy man becomes a monk; the Mohammedan's, a Dervish" (Kris­ tianin tendeli keshish olour, Musulmaninki Der­ vesh). Yet comparatively few Dervishes are mendicants. It is customary to call Dervishes monks, but none of them are monks in the real sense, which implies vows of service in an order, celibacy or permanent residence in a monastery. Of themselves they prefer to say that they are "Fakirs," that is to say "poor" who desire to serve God. Therefore they have become followers of Sufism, or Theosophy (Ehli Tesavvuf). The order of Dervishes is called a "Way" (Tarkkat). It is a voluntary association, guarded in a few cases only by secret signs and passwords. The members are not bound to the Order by any promise of fidelity. Men from one Order to another, sometimes belong to two or more Orders at the same time, and lose no whit in regard of their fellows if they withdraw, even for the purpose of setting up a new and independent Order. The place of assembly of any Order, called a Tekke or a Zamâne, is built in some convenient place and endowed by legacies of the benevolent to serve for worship and other religious exercises according to the ritual of the Order. To this place all Mohammedans are permitted to resort for worship; there the special exercises of the Order are held, the public special exercises
occurring once, twice, or three times in the week; there are the rooms or cells in which the Elder (Sheikh) resides with such of the members as have a vocation to do so. The place is not a monas­tery, however, and it may be on the same premises with the rooms where the wives of the Der­vishes live. A tekke of the Bektashiye Dervishes commonly contains apartments for the wives, since they may be admitted to that order and are addressed as "Sister" by all the members.

What all the Orders of Dervishes have in common is, (a) the general doctrine of Sufism that man is capable of attaining to full knowledge of God, and to an ecstatic sense of union with God; (b) certain exercises of mind, of body, or of both, lead certainly to this knowledge of, and union with, God. These exercises constitute the "Way" to God (each Dervish order following its own method of attaining the common aim); (c) in order to follow the "Way," a perfect guide and absolute submission to his guidance is essential. This perfect guide is the founder of the order (called "Pir") and his successor (Kalb‘a); or the Elder, who has entire change from the tekke to lead in the particular district where the Tekké is established; (d) all those who seek God by any "Way" are brothers (Ikhwan); these yet learning are seekers or novices (Murid); those who are instructed and making progress in the way are "walkers" (Salik); and those of long experience may be a "guide" (Murshid) of novices and in due time perhaps a Sheikh of a separate chapter of the order; (e) the man who has many times repeated the ecstasy of the Divine Presence finally becomes so simple that he becomes annihilated as to self-will, so that he is insensible to material things, is used by God as an instrument for carrying out His purposes, and thus can heal the sick or slay the strong by a breath, can read the thoughts of men, can know distant occurrences, and can transport himself through space. He is then a saint whom there are always some hundreds in the world. The above tenets of Sufism are held by all Orders of Dervishes in common. The points of difference between the different Orders are, in the main, differences of method, but sometimes of doctrine. The differences do not, however, as a rule, interfere with brotherly relations between the various Orders.

In theory the Dervish Orders derive their doctrine and the main points of their "Way" from Mohammed himself through the Caliphs, Abu Bekr or Ali. This theory, however, is supported less by documentary evidence than by interpretations put upon detached sayings of the worthies of that ancient period, which are claimed to show belief in Sufism. Preferences chiefly as to minor points of their "Way" have led to a vast multiplication of Dervish Orders. But since each Elder or Sheikh at the head of any group of Dervishes must be able to prove himself possessed of the "grace" of God so that he is a trusty guide, each Order has a sort of a genealogical record of the Elders who have been its "Fir" or founder and by the successive generations of his followers. By study of these spiritual genealogies one may see that all the existing Orders are reducible to eight or ten which came into existence during the middle of the 12th century; these ten most ancient Orders are:

1. Kadiiriye (1150).  
2. Rufai‘iye (1170); popularly called Howling Dervishes.  
3. Mediniye (1180).  
4. Shaziliye (1254).  
5. Mevleviye (1260); called Whirling Dervishes.  
7. Nakshibendiye (1300).  
8. Saadiye (1320).  
10. Knaalvetejiye (1390).

Excepting 7 and 9 in this list, which claim each an exclusive spiritual lineage, the above Orders all claim to have received "grace" through a certain saint named Juneid, who flourished in Baghdad in the 9th century; and excepting the Nakshibendiye order (which carries its genealogy by way of Eokhara and Samarcand back to the Caliph Abu Bekr) all of them claim a spiritual descent from the Caliph Ali. Excepting the Mediniye (No. 3), which is of strictly Arab (Moorish) origin, the Orders all sprung from great men of Persia or Central Asia.

The Kadiiriye, Rufai‘iye, Knaalvetejiye, Mediniye and Bedaviye or their branches (Janayige, Dejaniye, Ebkeriye, Baygieye, etc.) are well known to all travelers in Egypt and North Africa as the men who howl, who cut themselves, who run "amok" on the ground for a horse to trample on them, etc. The fact should be kept in mind while watching such performances that these acts are deemed sure proof that the man who does them is insensible to material things because at that time self is annihilated and he is lost in God. This state, which has been called "auto-hypnosis," is the result of the religious exercises of the Order. The devotees (Fed‘a‘e), who made the Assassins famous in the 12th century, those who run "amok" in Malaysia, or those who followed the pseudo-"Mahdi" scitically to death before the British squares in the Sudan, are other examples of the same condition.

The exercises by which this condition of divine ecstasy is produced differ in the different Orders, but the theory of all divides the exercises into three parts: (a) Worship and withdrawal of the thoughts from earthly things; (b) Concentration of the mind on the Sheikh, then on the Pir or founder of the Order, and finally, by these stages, upon the Almighty himself; (c) Recitation (Zikr) of the phrase "There is no god but God" as the climax of a recapitulation of God's attributes continued until breathlessness. The Zikr is assisted by certain mechanical means; for instance, in the Kadiiriye and Rufai‘iye type, by swaying the body, stamping the feet, the whole congregation beating tambourines, etc., while the holy sentence is shouted in ceaseless repetition. In the Mevleviye method, the Zikr is inaudible the accompanied by plaintive music of reed flutes, while the devotees whirl like automatic tops. In the Nakshibendi "Way" the Zikr is also inaudible, while the tongue is doubled back upon the palate, the eyes are fixed upon the stomach, and the breath is retained as long as possible. In the Bektashiye system it is alleged that spirit­ual unctions are not prohibited after the assembly has gathered and before the Zikr commences. The use by several of the Orders of opium and hashish as an aid to religious fervor is a better attested evil.

The Dervish Orders are commonly at odds with the Mohammedan theologians because they exalt Ali almost as the Persian Shi‘ites do, while all their wretching of texts and traditions and all their documentary evidence of spiritual descent from Arabs cannot make their belief and practice...
conform to Mohammedan orthodoxy. But the Mohammedanism of the Koran and the schools is essentially a religion of outward observances which keeps the eye of its follower fixed upon himself, his washings, etc. It has no idea that character goes with what is believed. Consequently in its followers there is certainly none of spiritual needs in man which God is pleased to fill. The Dervish Orders promise Mohammedans a satisfaction for spiritual aspirations which otherwise would grieve their throbbing souls to the grave. It is but a little thing to find in such a straitened land as it is, and the Dervishes have ransacked Persia and India for the dogmas with which they attract tens of thousands who are not satisfied with the teachings of Mohammed and who go from one Dervish Order to another, still even groping after the true "Way of God," and the "perfect guide" who shall lead their souls to rest.

Altho the Ulama, or theologians, of Islam frown upon the Dervish Orders, the laity are their warm supporters. In Turkey many a minister of the Government and Sheikh attached to his household to give him private instructions in the way, while the Sultan himself is said to be a member of the Shazili Order. The influence of the Sheikhs is tremendous. The rule requiring perfect submission to their will unites with the influence of an austere life and a prophet's vehemence in denouncing patent corruption to make people hope from the Sheikh effective leadership in reform. It was such promise of reform that gave power to the leader of the Kadiriyya and Khalvetye Dervishes of the Sudan when the whole land followed him as Mahdi until they had given him a power too great for his hands to wield. It is such promise of reform by return to God which gave to the plain, simple Sheikh of a group of Shazili Dervishes in Tripoli, less than forty years ago, the leadership of the Senoussiyeh movement, which to-day is the most potent force in all North Africa, if not in Islam.

There is much in the teaching of the Dervishes which appears to be like a bridge between Islam and Christianity. The expressions of earnest desire to know God, of longing for exaltation of self and spiritual union with God and for escape from sin which are common in the mouths of Dervishes seem to be a ground on which every Christian may meet them. Closer study of this view and the words used in a special sense. "Desire for God" is desire for that feverish ecstasy produced by mechanical means, which the Sufis compare to drunkenness and which passes away leaving its victim morally what he was before. "Walking in the way to God," with escape from sin, does not imply loyal service, but suppression of responsibility for deeds done in the body. Union with God in the most of the Orders (the Nakešibendiyeh and the Melamiyeh; an obscure offshoot from the Khalvetye Order is exceptions to this interpretation) does not mean fellowship, but absorption of the being, as a raindrop is absorbed in the ocean. With the Christian, union with God implies a higher type of manhood abounding in good works for others. With the Dervishes, it implies such a superiority of a world's intelligence that the naked idiot is the favorite type of its highest degree. Any analysis of Sufism reveals its subordination to Indian Pantheism and probably to the Gnostic delirium of early Christendom. The missionary must approach Dervishes as he would approach those known to be saturated with these Asiatic perversions of great truths, and who need to be taught the first elements of faith in God.

DESTERRO. See FLORIANOPOLIS.

DEUTSCHE ORIENT MISSION, See GERMANY; MISSIONARY SOCIETIES IN.

DEVON: A CMS mission station in the Saskatchewan district, Canada. Station established in 1884; and about the Devon Dervishes have ransacked Persia and India for the dogmas with which they attract tens of thousands who are not satisfied with the teachings of Mohammed and who go from one Dervish Order to another, still even groping after the true "Way of God," and the "perfect guide" who shall lead their souls to rest.

Dharwar: A town of Bombay, India, capital of the district of the same name. It is situated 75 miles E. of Goa and is a railroad town and center of trade in produce, grain and cotton being extensively produced in the region. Population (1891), 6,200, of whom 23,900 are Hindus and 7,000 Muslims. Station of the CMS. Statistics included in Kangra.

Dharwar: A town of Bombay, India, capital of the district of the same name. It is situated 75 miles E. of Goa and is a railroad town and center of trade in produce, grain and cotton being extensively produced in the region. Population (1891), 6,200, of whom 23,900 are Hindus and 7,000 Muslims. Station of the CMS. Statistics included in Kangra.
DIADIA: A settlement in the Congo Free State; situated on the N. side of the Congo River, about 175 miles from its mouth. Station of the Swedish Missionary Society (1888), with 7 missionaries, men and women: 12 native workers, 1 preaching place, 1 high school, 1 orphan asylum, 1 dispensary and 394 professing Christians.

DIAMANTE: A town in the Argentine Republic, South America; situated on the Parana River, about 25 miles S. W. of Parana. Population about 2,000. Station of the SDA, with 2 missionaries and their wives. Statistics included under Buenos Aires.

DIAMOND HARBOR: A seaport in the district of the Tigris River. Being a center for trade, it has always been an important place. Population about 34,000, of whom about 20,100 are Mohammedans (Arabs, Turks, Kurds, etc.) and the remainder Christians of various sects. It was for many years a station of the ABCFM and was given up because of insalubrity as soon as the evangelical church was able to stand alone.

DIBBLE, Sheldon: Born at Skaneateles, N. Y., January 26, 1809; graduated at Hamilton College, 1825; Auburn Theological Seminary, 1830; ordained at Utica, October 6, 1830. Sailed of insalubrity as soon as the evangelical church was able to stand alone.

DIBRUGARH: Capital of the district of Lakhimpur, Assam, India; situated on the left bank of the Brahmaputra River, being the terminus of river trade by commercial steamers. Population (1891) 9,900, of whom 7,100 are Hindus and the remainder chiefly Muslims. Station of the ABM (1896), with (1901) 2 missionaries, men and women; 1 preaching place, 10 Sunday schools, 2 preaching places, 1 Young People's Society and 53 professing Christians.

DIARBEKIR: A city and capital of a province of the same name in North Mesopotamia, Turkey. It is the ancient Amida, called by the Turks Kara (Black) Amida, on account of the walls, which, being built of black basalt, have a peculiar forbidding appearance. It is situated on the Tigris River. Being a center for trade, it has always been an important place. Population about 34,000, of whom about 20,100 are Mohammedans (Arabs, Turks, Kurds, etc.) and the remainder Christians of various sects. It was for many years a station of the ABCFM and was given up because of insalubrity as soon as the evangelical church was able to stand alone.

DIBBLE, Sheldon: Born at Skaneateles, N. Y., January 26, 1809; graduated at Hamilton College, 1825; Auburn Theological Seminary, 1830; ordained at Utica, October 6, 1830. Sailed of insalubrity as soon as the evangelical church was able to stand alone.

DILDON: A town in Baroda, West India, lying about 20 miles W. S. W. from Cape Coast Castle. Station of the WMS, with (1902) 1 missionary, 54 native workers, men and women; 29 preaching places, 5 Sunday schools, 1 common school and 261 professing Christians.

DIANDJI MATOGU: A settlement in the Gold Coast Colony, situated on the coast about 60 miles W. S. W. from Cape Coast Castle. Station of the WMS, with (1902) 1 missionary, 54 native workers, men and women; 29 preaching places, 5 Sunday schools, 1 common school and 261 professing Christians.

DIP POINT: Station of the New Hebrides Mission on the island of Ambrym. See New Hebrides.

DIJOYAKARTA: See JAKARTA.

DINAPUR: A town in Bengal, India, situated on the left bank of the Ganges, 11 miles W. N. W. of Patna. Population (1891) 44,000, of whom 32,300 are Hindus and about 10,000 Mohammedans. Station of the BMS, with (1900) 1 missionary and his wife, 3 native workers and 2 elementary schools.

DINDIGAL: A town in Madras, India, 30 miles northwest of Madura. The name means, "Rock of Dindu" and is taken from a remarkable wedge-shaped rock, 1,200 feet high, on which a fort has been constructed. The place was formerly of considerable importance. Population (1891), 20,000, of whom 14,000 are Hindus. Station of the ABCFM (1831), with (1901) 1 missionary woman, 71 native workers, men and women; 19 preaching places, 12 common schools, 12 Sunday schools, 3 high schools, 1 dispensary, 1 hospital and 607 professing Christians. Also station of the Leipzig Missionary Society (1890), with (1900) 1 missionary and his wife, 9 native workers, 4 preaching places, 1 common school, 1 high school, and 400 professing Christians.

DISA: A town in Baroda, West India, lying about 20 miles W. of Palanpur. Station of the Presbyterian Church of Ireland (1893), with (1900) 1 missionary and his wife, 7 native workers, 4 common schools, 1 orphanage and 14 professing Christians.

DISCIPLES OF CHRIST. See FOREIGN CHRISTIAN MISSIONARY SOCIETY, and CHRISTIAN WOMAN'S BOARD OF MISSIONS.

DIX COVE: A settlement in the Gold Coast Colony, situated on the coast about 60 miles W. S. W. from Cape Coast Castle. Station of the WMS, with (1902) 1 missionary, 54 native workers, men and women; 29 preaching places, 5 Sunday schools, 1 common school and 261 professing Christians.

DJEMAA SAHRID: A village in Algeria, situated near the coast about 40 miles east of Algiers. Station of the North Africa Mission (1882), with (1902) 2 missionary-women, 1 assistant missionary and his wife, 2 native workers, man and woman; 2 preaching places, 1 Sunday school, 1 blind school and 40 Christians.

DJOCAKARTA. See JAKARTA.

DOANE, Edward Topping: Born at Tompkinsville, Staten Island, N. Y., May 3, 1820; graduated at Illinois College, Jacksonville, Ill., 1848; Union Theological Seminary 1852; ordained 1854, and embarked June 4, the same year, as missionary of the ABCFM for Micronesia, arriving February 6, 1855. Two circumstances made it necessary for him to be transferred temporarily to the Marshall Islands and to Japan, yet the people of Ponapi, where he was stationed, had his heart, and to them he returned and for them labored with unwearied gentleness and courage, and with cheering success. In 1887, when the Spanish forces occupied the island, Mr. Doane was seized, put in the hold of a vessel, and sent as a prisoner to the Philippine Islands. The natives
were so roused by his unwarrantable act, that, being without Mr. Doane's influence to restrain them, they rose and took the life of the Governor. Through the efforts of Julius Vogt, the Utrecht Missionary Society and Nicholas, Mr. Doane was liberated by the Spanish Government, and was returned with apologies to his station. His influence throughout the islands was increased by what had happened. Tho his health declined, he clung to his work till the spring of 1830, when he was conveyed by the "Morning Star" to Honolulu, where in two weeks he quietly breathed his last, at the house of the Rev. Dr. Hyde, on the 15th of May. He had been 35 years a missionary.

DOBER, Leonard: The first missionary of the Moravians to the Danish West Indies. He was a potter by trade. His attention was called to this field through a conversation in 1731 with a servant of Count Zinzendorf, who stated that he had a sister in St. Thomas, W. I., and desired some one to instruct the slaves in Christianity. Whoever went to 'these poor people on the island would be a welcome sight to them, and Leonard Dober offered himself to be sold as a slave, if necessary, in order to reach them. It was a year before anything was done. When it was determined by lot, in 1732, Dober was selected, and Nitschman, who was to go with him to St. Thomas and then return to Herrnhut. The Moravians at this time knew very little of missionary undertakings, and gave them only these instructions: "In all things follow the guidance of the Spirit of Christ." They set out for Copenhagen, with only their staves in their hands and only six dollars in their pockets. They were told at Copenhagen that it would be impossible to get a vessel to go to St. Thomas, but their steadfastness of purpose raised up some influential friends for them among the royal family, councilors of state, and her majesty's chaplains. They arrived in St. Thomas, December 13, 1732, and immediately found the servant's sister, who, with her companions, rejoiced to see them. For four months Dober and Nitschman worked happily together, when Nitschman had to return to Europe. Dober was left destitute, for there was no clay on the island suitable for the making of pottery. He found a place in the government of the governor's son, but this interfered with his missionary work among the negroes, and he went to Tappus, a small village, where he lived in great poverty. In 1733 helpers came from England to take his place. Two months later: Dober returned to Europe, to fill the office of superintendent elder in the Moravian congregation at Herrnhut.

DOBROUDJA: The portion of the Balkan Peninsula on the right side of the Danube, extending from Sistria and Varna to the mouth of that river, offering the most accessible military route from the north to Constantinople. The country is flat, containing several large swamps and lakes on the coast. Some parts are very fertile, and produce good crops of grain; others are covered with grasses. The population is made up of Greeks, Bulgarians, Wallachs and Tatars. Under the Treaty of Berlin (1878) this district was taken from Turkey and added to Rumania, of which it is now a part.

DOBU: A settlement on the northern end of Normandy Island, British New Guinea. Station of the Australian Wesleyan Methodist Church, with (1900) 2 missionaries and their wives, 2 missionary women, 37 native workers, 4 common
with (1902) 1 missionary and his wife, 2 native workers, 2 outstations, 2 common schools and 40 professing Christians.

DOTY, Eliah: Born 1812; graduated at Rutgers College 1835, and the Theological Seminary at New Brunswick, N. J., 1836; was ordained the same year as a missionary to the heathen. He was a member of the first mission sent by the Reformed Dutch Church and the ABCFM to Java, where he labored from 1836 to 1840, when he was transferred to Borneo and labored among the Dayaks there. Then he was sent to China in 1844. Mr. Doty was an excellent Chinese scholar and preacher; an indefatigable, courageous, self-denying laborer; a man of singular frankness; and was closely identified with the mission at Amoy from its origin until his death in 1866.

DOUGLAS: A town in Cape Colony, S. Africa, situated on the Orange River, about 60 miles S. W. of Kimberley. Population, about 1,500. Station of the Berlin Missionary Society (1894), with (1900) 1 missionary, 1 native worker, and 138 professing Christians.

DOUGLAS ISLAND: North of Admiralty Island, Alaska, and about 75 miles N. E. of Sitka. It is the site of the Tweedsmuir Gold Mine. Station of the American Friends’ Foreign Mission Board (1887), with (1902) 1 missionary and his wife, 2 missionary women, 1 native worker, and 1 outstation. Station also of the PE, with (1901) 1 missionary woman, 1 preaching place, supplied from Juneau, and 16 communicants.

DOUTHWAITE, A. W., M.D.: Dr. Douthwaite left for China in connection with the China Inland Mission, in 1874; and the first eight years of his life there were spent in the province of Che-kiang, at the stations of Shao-hsing-fu, Ku-chau-fu and Wen-chau-fu, successively. At Ku-chau-fu he formed a church of 90 members, and during his first year at Wen-chau-fu he treated 4,075 patients. At a time when the Mission was in great financial stress he was offered a government post at a handsome salary, but he resisted the temptation, and was faithful to his Christian work through years of severe trial. In 1882 he was obliged to recruit his health in the bracing air of Chi-fu. With this place his name is inseparably linked, and throughout the Shantung Province he won the confidence of thousands of Chinese patients. In 1884, when Korea opened its doors, Dr. Douthwaite left Chi-fu and entered that land. Journeying into the interior, he preached the Gospel, circulated copies of the Word of God and healed the sick. After a most effective work in Korea, he returned to Chi-fu in 1886, where he labored, in spite of bereavements and severe illness, for twelve years. During that time his medical work grew so extensively that his Chinese patients numbered 20,000 annually; and in 1896 the out-patients numbered 22,776; in-patients 216, and surgical operations, 856. Chinese, high and low, acknowledged the good results of his work, and from the official to the beggar all sought his aid. Yet, with all his skill and success, no one more readily recognized the very limited powers of a medical man and the absolute need of the hand of God in the healing of the sick. Decision and determination were strong features in his character, and enabled him to accomplish an amount of work which would have taxed the powers of younger and stronger men. The services of medical missionaries during the war with Japan were highly appreciated by the Chinese Government; and at the conclusion of the war, the emperor conferred on Dr. Douthwaite and ten other medical missionaries the Imperial Order of the Double Dragon (considered to be equivalent to the Order of the Bath in England). When Dr. Douthwaite was leaving Chi-fu the Chinese general came with a guard of honor and drew up in front of the hospital. After expressing to him the gratitude of the Chinese people for his services, they escorted him to the station. When his work was coming to a close, he said: “Had I a thousand lives instead of one, I would ask for no greater joy, no greater honor, than to be permitted to spend them all in the glorious work of winning China for Christ.” He died on October 6, 1899.

DOWLAISHVARAM: A town in the Godavari district, Madras, India, 32 miles by the shortest canal from Cocanada, and 4 miles south of Rajahmundry. Population (1891), 10,500, mostly Hindus. When first built, the town was a place of much importance; as permanent station of the district engineering staff, and the government workshops here turn out much work for the Public Works Department. The town is connected with several points on the coast, by navigable canals. Mission station of the Evangelical Lutheran General Council, with (1903) 1 missionary and his wife, 21 native workers, men and women; a preaching place, 24 common schools, and 700 professing Christians. Station also of the PB.

DRIEPONTEN: Station of the South African Methodist Missionary Society, situated in Natal, with (1890) 64 native workers, 4 preaching places, 6 common schools, and 1,045 professing Christians.

DRUSES: A peculiar race and sect living in North Syria, among the slopes of Mount Lebanon and Anti-Lebanon. There are also some settlements in the Hauran and a colony at Safed, Palestine. They are found as far north as Beirut, as far south as Tyre, and as far east as Damascus. About 120 towns and villages are occupied exclusively by them, and, together with the Maronites, compose the population of over 200 more. They are estimated at 65,000. Deir-el-Kamar, about 15 miles southeast of Beirut, is their chief town.

The origin and ethnographical affinity of the Druses are by no means settled. The most credible theory is that they have sprung partly from the Cuthites, by whom the devastated cities of Sazaria were repopulated under the rule of Esarhaddon; partly from the warlike Mards, who were brought to Lebanon by Constantine IV. in the 7th century; and partly from the Arabs, with, perhaps, a little of the blood of the Crusaders mingled with their very mixed ancestry. Whatever their origin, their characteristics had become fixed at the close of the 10th century. They speak Arabic as correctly as the people of Mecca; they possess a knowledge of the Chinese Empire, with which their own traditions connect them; and they exhibit a refinement in conversation and manners, and an appreciation of education, especially that of women, which is in striking contrast to the other Syrian races with which they are surrounded.

Hakim B’emrillah (the name is a title and means Ruler by command of God), Caliph of Egypt, who began to reign in 906, is the reputed
author of their peculiar religion. Twenty-five years of tyranny wild and terrible leave little doubt of his insanity, under the influence of which he obstinately held direct intercourse with the Deity, and proclaimed himself the incarnation of God.

His claims were made known in a mosque at Cairo by one Darazi, but they were received with such bitter hostility that Darazi fled to the mountain of Momaca, where his writings were published, and the word Druse is supposed by some to be derived from this first apostle. Hamza, a Persian, and vizier of Hakim, is regarded as the real founder of the sect, for he formulated the creed and succeeded in gathering together a large body of adherents.

The Druses believe in one only God, who is without form or substance, incomprehensible, without attributes, and before whom man is dumb and blind. Ten times has this God revealed himself in human form, Hakim being the tenth and the last incarnation. A fixed number of human souls exist which can neither be added to nor subtracted from, and all who are living now have lived before, and will continue to live in other bodies until the end of the world. At the death of one man the soul occupies a new body, of noble or base quality, according to the deeds done in the life before. After myriads of reincarnations, when the soul has been purified from every stain, it will enter rest in God. The correspondence of this part of the Druse doctrine with Indian pantheism is noticeable and probably came to them through Persian Sufism. Missionaries of the Baptist Missionary Society (BMS) and later of the Basel Missionary Society have done literary work in this language.

DUFF: A settlement in the Transkei region of Cape Colony, S. Africa, lying about 25 miles N. E. of Butterworth. Station of the UFS (1880), with (1902) 1 missionary, 18 native workers, men and women; 10 preaching places, 11 common schools, and 235 professing Christians.

DUFF, Alexander: Born April 26, 1806, in Perthshire, Scotland. He entered the university of St. Andrews at the age of fifteen, and studied under the celebrated Chalmers. The Church of Scotland having awakened to the duty of sending the Gospel to the heathen, Dr. Duff was appointed its first missionary, and at the age of 23 embarked, October, 1829, for India. During the voyage he was wrecked twice, first on a reef of rock while rounding the Cape of Good Hope, again on the coast of Ceylon, and barely escaped a third wreck near the mouths of the Ganges. In the first wreck he and his wife lost everything, including the library, plans of every mission and hundreds of valuable manuscripts. He reached Calcutta after a voyage of eight months. One of the chief objects he had in view in going to India was the establishment of a collegiate institute which should confer the highest education on native youth. His school was to be conducted on two great principles: (a) the Christian Scriptures should be read in every class, be the entire foundation and pervading salt of the school; (b) since the vernaculars of India could not supply the medium for all the requisite instruction, the sciences of the West should be taught through the English language. This was against the opinion of the government, all learned Orientalists and the most experienced missionaries in Bengal. All these insisted that higher instruction ought to be given in Sanskrit, or in some other language. With the exception of Dr. Roy, who entered fully into Dr. Duff's views, the school was opened July 12, 1830, under a banian tree, with five young men, but was soon removed to a commodious building. The instruction was in English, and the Bible held a chief place. Before the end of the first week there were more than 300 applicants. Of these, 250
Duff, Alexander
Dwarahat

THE ENCYCLOPEDIA OF MISSIONS

were received. At the end of the first year a public examination, attended by a large number of Europeans and natives of high rank, gave great satisfaction. The next year the number of applicants was more than trebled. In 1839 Dr. Duff wrote: "The five who entered the first day have since swollen to an average attendance of 800. The Governor-General, Lord Bentinck, considered the ablest and most enlightened Governor-General India has possessed, did homage to it by publicly proclaiming in the face of all India that it had produced unparalleled results." His pupils two from the educated and influential class. One was Babu Krishna Banerjea, a Brahman of high social position, editor of a newspaper, afterward a minister of the English Church, and a distinguished professor in Bishop's College, Calcutta. His influence on natives of all classes, especially the educated, has always been great. The other was Gopeelath Nundi, afterward a preacher in connection with the American Presbyterian Mission in the Northwest Provinces, who during the Sepoy mutiny, when threatened with death, nobly testified for Christ.

In 1834 Dr. Duff returned home in ill-health. On his recovery he made a tour through Scotland, and greatly increased the interest in the missionary cause by his thrilling appeals and the report of his successful work. The degree of doctor of divinity was at this time conferred upon him by the University of Aberdeen. He returned to India in 1839. At the disruption in the Church of Scotland in 1843 he cast in his lot with the Free Church, abandoning his beloved and prosperous institution, its valuable library and apparatus, and for twenty years conducted missionary work under that body. He built a new institution from the foundation, and equipped it as well as the old had been. The influence of his work continued to increase. His successors took place. In 1850, upon the death of Dr. Chalmers, he was offered the office of principal and professor of theology in the Free Church College in Scotland, and, urged by Presbyteries, Synods and General Assembly to sacrifice his own predilections and accept the call, he declined, begging them to "allow him to retain, in the view of all men, the clearly marked and distinguishing character of a missionary to the heathen." In 1850 he again returned home to work for the missionary cause, and sought to arouse the Free Church to more earnest efforts in India. In 1851 he was elected moderator of the General Assembly. In 1854, under the auspices of Mr. George H. Stuart, he visited the United States, where, as also in Canada, he addressed thousands on the missionary work in India. The University of New York honored him with the degree of L.L.D. Returning to India in 1857, he opened his school for high-caste girls in the house of a Brahman. At the first examination, attended by distinguished native gentlemen, who expressed great satisfaction, 62 were received. In 1864, his health having utterly failed, he took a final leave of India. On leaving Calcutta he received from all classes of the community, native and European, heathen and Christian, emphatic testimony of the great value of his services rendered for nearly thirty-five years in India. Dr. Duff spent in Scotland he urged with great eloquence upon the churches their duty to give the Gospel to the millions of India. His correspondence was extensive, many letters being to native converts and Hindu students. He had the chief management of the foreign work of the Free Church. In 1873 he was again elected moderator of the Assembly. In 1874 he was appointed professor of evangelical theology in the college of the Free Church, which office he held for eleven years. He died at Sidmouth, Devonshire, February 12, 1878, aged 72. He has been well described as "a man of dauntless will, consummate eloquence, impassioned piety, great self-reliance." His published works are: New Era of the English Language and Literature (1837); Missions the Chief End of the Christian Church (1839); India and Indian Missions (1839); The Indian Rebellion, its Causes and Results (1858). The Calcutta Review was mainly established by him.

Duke Town: A town in Lower Nigeria, W. Africa, situated on the left bank of the Old Calabar River, about 10 miles from the estuary. Population about 40,000. The climate is hot and unhealthy. Station of the UFS (1846), with (1902) 2 missionaries (one with his wife), 4 missionary women, 12 native workers, men and women; 1 high school, 1 industrial school, 1 dispensary, 1 hospital, 1 printing house and 394 professing Christians.

Dulles, John Welsh: Born Philadelphia, Pa., November 4, 1823; graduated at Yale College with high honor in 1844, and at Union Theological Seminary, New York, 1847; married Harriet Winslow, daughter of Rev. Dr. Miron Winslow; ordained October 2, 1848; sailed as a missionary of the ABCFM the same year for Madras. He was stationed at Rajapuram, having charge of the church and schools. In 1850 he made a tour with Rev. Henry Scudder with a view to establishing an outpost to the Madras mission, and on their advice Arcot was selected and afterward became the field of the Arcot mission. Mr. Dulles was well fitted by talents, education, acquisition of the language and genial manners for the missionary work. But his own ill-health and that of his wife compelled them to leave the field, and they returned in 1852. For three years after his return he served the American Sunday School Union. In 1856 he was appointed editorial secretary of the Publishing Committee of the Board of Publication in the New School branch of the Presbyterian Church. He was appointed to the same position in the reunited church in 1870, and, on the resignation of Dr. Schenck in 1885, was elected General Secretary of the Board. He wrote Life in India and The Ride through Palestine. Dr. Dulles died at his home in Philadelphia, April 18, 1887.

Dumagudeim: A town in Madras, India, on the Godavari River, 115 miles N. by W. of Masulipatam. Population (1890), 5,000, chiefly Kois; Mission station of the CMS and CEZ, with (1902) 5 missionaries, men and women; 20 native workers, men and women; 1 preaching place, 15 elementary schools, 1 dispensary, 30 Zenana pupils and 800 professing Christians.

aries and their wives (one of them a physician), 1 high school, with industrial classes, and 1 dispensary.

**DUMBOLE**: A settlement in British Central Africa, S. of Lake Nyasa, about 80 miles N. W. of Blantyre. Station of the Zambesi Industrial Mission, with (1903) 1 missionary and his wife, 1 chautauqua, 3 schools and 1 industrial school. Also written Domboli.

**DUM DUM**: Town in the district of the 24 Parganas, Bengal, India, 6 miles N. E. by E. of Ft. William, Calcutta. It is an important military station. Population (1891), 11,000, of whom 6,300 are Hindus and the remainder chiefly Muslims. Station of the WMS, with (1902) 1 missionary, 1 missionary woman, 8 native workers, men and women; 7 preaching places, 4 Sunday schools, 5 common schools and 44 professing Christians.

**DUMISA**. See **UMZINTO**.

**DUMAGUDEM**: See **DUMAGUDEM**.

**DUNDEE**: A town of Natal, 100 miles N. by W. of Pietermaritzburg. It has extensive coal fielid. Population, 1,500. Station of the Swedish Mission (1895), with (1900) 5 missionaries, men and women; 8 native workers, 3 preaching places, 7 schools, 1 industrial school, 1 hospital, 1 printing house and 267 professing Christians.

**DUNDEGAMA**: Station of the SFG in the diocease of Colombo, Ceylon, with (1900) 1 missionary, 6 native workers, 2 places of worship, 1 common school, and 1,023 professing Christians.

**DUNEDIN**: A city and seaport of New Zealand; situated 60 miles S. S. W. of Oamaru, on the south-western side of the bay running inland. It is the most important commercial city of New Zealand. First settled by members of the Free Church of Scotland in 1843. The discovery of gold near by changed the village into a city. Population (1891), 23,500, including suburbs. The Presbyterian Church of Otago has an enterprise here for heathen, with 1 missionary and his wife, 1 native worker, 1 common school and 8 professing Christians.

**DURANGO**: Capital of the State of Durango, Mexico; situated 195 miles N. W. of Zacatecas and near a remarkable hill of magnetic iron ore. Altitude, 6,320 feet. It was founded in 1551. Population (1889), 24,800. Station of the MES (1854), with 1 missionary and his wife, 2 missionaries, 1 native worker, 1 preaching place and 3 Sunday schools. Station also of the SBC, with (1902) 1 missionary and his wife, 3 native workers, 1 common school and 36 professing Christians.

**DURBAN**: Capital of Natal, South Africa, at the head of its harbor on Port Natal Bay, 45 miles above the town of Pietermaritzburg. It contains several public buildings of importance, and has a large trade. Population, 17,900. Mission station of the ABCFM (1892), with (1901) 1 missionary and his wife, 34 native workers, men and women; 40 preaching places. Also station of the SFG (1872) among the 72,000 Indian coolies with (1902) 1 missionary and his wife, 5 native workers, men and women; 1 orphanage, 1 dispensary and 100 communicants. Also station of the National Baptist Convention (1900), with 2 missionaries, 1 missionary woman, 1 preaching place, 1 school, and 210 professing Christians. Also station of the South African General Mission (1895), with (1900) 1 missionary and his wife, 2 native workers, 2 preaching places, 1 theological class, and 70 professing Christians. Also station of the South African Wesleyan Methodist Mission, with (1900) 9 native workers, 6 preaching places, 1 common school, and 213 professing Christians.

**DURU**: A village in the Ranchi district of Chota Nagpur. Station of the SFG, with (1902) 7 native workers, 3 common schools, and 449 professing Christians.

**DUTCH EAST INDIES**: Name given to Asiatic territories and islands which are under the sovereignty of the Netherlands. The East India Company, created by the Dutch in 1602, conquered these islands and ruled them for nearly two centuries, but since 1798 the Company has ceased to exist, and the mother country rules the possessions, comprising Java, Madura, Sumatra, Riau-Lingga Archipelago, Banca, Borneo, Celebes, Moluccas, Timor Archipelago, Bali, Lombok, and New Guinea to 141 degrees east latitude, with a total area of 736,400 square miles and a population (1900) of about 36,000,000. The total number of Dutch or Dutch connections is 60,277, and the whole number of Europeans in the islands is 77,297. Of the remaining population 460,000 are Chinese, 24,000 Arabs, and 32,000,000 natives.

The pioneer missionaries to Dutch Borneo were from the American Board, who labored on the west coast from 1839 to 1849; but at present the Reformed Society only is doing missionary work here, although the British and Foreign Bible Society has done some temporary work. On five of the islands, lying between New Guinea on the east and Sumatra and Borneo on the west, we find the largest remnants of the earlier Dutch government evangelisation; and here a new set of missionary societies are doing successful work. The work in Sumatra was begun in 1820 by a Baptist missionary; and now representatives of five German and Dutch missionary societies are reaping a rich harvest. Miracles of grace have taken place in Java and Celebes as the faithful labors of missionaries of six Dutch societies, the Neukirchener Mission and the agent of the British and Foreign Bible Society. Nearly 40,000 Mohammedans have accepted the Christian religion. In the whole Dutch East Indies, reports for 1897 show 652 government vernacular schools and 578 private vernacular schools, which give instruction to about 118,000 pupils. The whole number of Christians (native) reported in the census was 309,238. There were 133 Protestant and Roman Catholic missionaries in the islands in 1900.

**DUTCH MISSIONARY SOCIETY**. See **Netherlands Missionary Societies**.

**DUTCH (SOUTH AFRICA) REFORMED MINISTERS' MISSION UNION**. See **South Africa Dutch Reformed Church Mission**.

**DWARAHAT**: A town in the United Provinces, India, in the Kurnooon district. Station of the SBAE, with (1902) 1 missionary and his wife and 148 professing Christians. Statistics included under Bareilly.
DWIGHT, Rev. H. G. O.: Son of Seth and Hannah Strong Dwight, born at Conway, Mass., November 22, 1803, but reared at Utica, N. Y. Graduated at Hamilton College, 1825, and at Andover Theological Seminary, 1828. Appointed missionary of the ABCFM. Sailed from Boston for Malta in 1830. With Rev. Eli Smith he explored parts of Asiatic Turkey, the Caucasus, and Persia, in a journey which occupied the year from May, 1830, to May, 1831. The whole journey was performed on horseback amid great perils, the two missionaries being compelled, for the sake of safety, to wear the Turkish robes and turbans. These explorations led to the establishment of the ABCFM’s missions among the Armenians of Turkey and the Nestorians of Persia. In 1832 Dr. Dwight was associated with Rev. William Goodell in the establishment of the station at Constantinople. He studied the Armenian language, and was on the most friendly terms with the Patriarch and leading men of the Armenian Church. In 1837 his wife and one of his sons died of the plague. In the autumn of the year 1861 he went to the United States to tell the churches of the wonderful changes of which he had seen the fruits. While engaged in this work he was killed by a railroad accident near Shaftesbury, Vt., January 25, 1862.

Dr. Dwight loved to preach, and to visit the people in their houses and shops in order to win them to spiritual life. He had an important part in introducing evangelical Christianity in Rodostoa, Nicomedia and Adabazar, places which he used to visit repeatedly. He also gave much time to the preparation of books and tracts in Armenian, and, occasionally, to the editorial care of the weekly newspaper published by the mission in Armenian. He took a leading part in the publication of details of the persecution of evangelical Armenians by their own clergy, and was energetic in the steps taken to secure the intervention of the British government in behalf of religious liberty in Turkey.

Dr. Dwight had great executive ability, sound judgment, particularly in times of perplexity or danger, and an unfailing tact and courtesy in dealing with men.

The published works of Dr. Dwight are: A Memoir of Mrs. E. B. Dwight; Christianity Revived in the East; and a revised edition of the same, called Christianity in Turkey, published in London in 1854:

DYER, Samuel: Born January 29, 1804, at Greenwich, Eng.; educated at Gosport, and Missionary College; Hoxton; sailed, April 11, 1827, a missionary of LMS, for Malacca, but went to Penang, where he remained three years. In 1835 he removed permanently to Malacca. His most important achievement was the invention of movable metallic type for printing the Chinese Scriptures. He labored under every disadvantage, having only once seen the process of type-founding in England. He personally superintended all the work, and the type that he cast were remarkable for their beauty and finish. So great was the improvement over the old Chinese method of printing, that the Bible, formerly printed in half a dozen volumes, was reduced to one, and the New Testament to less than ninety pages. He also took an active part in the translation and revision of the Chinese Scriptures. He died at Macao in 1843.
writing by missionaries, with use of the Roman letters.

EDINBURGH: A town at the mouth of the Ogun River, Gold Coast, West Africa, about 25 miles N. of Lagos. It has a congregation of the Lagos Native Pastorale Association, which was founded by fugitives from Abeokuta and is under the supervision of the CMS. It has (1902) 3 native workers, 2 schools, and 541 professing Christians.

ECUADOR: A South American republic, lying, as its name implies, on either side of the equator. It is bounded by Colombia on the north, on the east by Brazil, on the south by Peru, and on the west by the Pacific Ocean. Boundary disputes with Colombia and Peru, which are still unsettled, render it impossible to define its exact limits. Its area is about 216,000 square miles. Much of the land consists of lofty plateaus. Descending from the snow-capped mountains a temperate climate is met with, which then increases to tropical warmth as the plains are reached. The rainfall, especially at the head waters of the Amazon and its tributaries, is excessive. Earthquakes frequently occur, and there are at least 16 volcanoes.

The population, estimated at 1,400,000, includes pure-blooded Indians (36 per cent.), mixed races (30 per cent.) and whites of Spanish descent. The religion of the republic is Roman Catholic. Primary education is gratuitous and obligatory. There is only one railway in course of construction, but there are 1,200 miles of telegraph lines. "The new régime inaugurated some years ago is firmer than ever, after crushing out armed revolution organized by priestcraft, introducing new reforms every year despite the revolutions, and setting forth the work of the country."

In 1900 the Department of Public Instruction established a series of Normal schools organized by ME missionaries and taught by Protestant teachers. Truly a brighter day is dawning in Ecuador.

EDEA: A settlement on the Edea, or Sanaga, River, Cameroon, W. Africa, situated at Edea Falls, 40 miles from the mouth of the river and at the head of navigation. Station of the Basel Mission (1877), with (1907) 2 missionaries, 1 missionary's wife, 21 outstations, 20 native workers, 1 high school, 23 common schools, and 189 professing Christians.

EDENDALE: A town in Natal, S. Africa; situated about 12 miles S. of W. of Pietermaritzburg; station of the South African Wesleyan Missionary Society, with (1900) 30 native workers, 5 preaching centers, 8 common schools, a Young People's Society, and 700 professing Christians.

EDINA: A town in Liberia, W. Africa; situated at the mouth of the St. John's River near Buchanan. Circuit of the ME, with a small congregation and some few church members.

EDINBURGH MEDICAL MISSIONARY SOCIETY (1841): In 1841 the Rev. Peter Parker, M. D., of the ABCFM Mission in China, visited Edinburgh. Dr. Abercrombie was so interested by his accounts of medical missionary work that he invited a few friends to his home to hear Dr. Parker's story of his work and to consider the formation of an association in Edinburgh for the promotion of medical missions.

A public meeting was held on November 30, when the following resolution was adopted and the Society formed: "That this meeting, being deeply sensible of the beneficial results which may be expected to arise from the labors of Christian medical men cooperating with missionaries in various parts of the world, this giving intelligent proofs of the nature and practical operation of the spirit of love, which, as the fruit of our holy religion, we desire to see diffused amongst all nations, resolve to promote this object and to follow the leading of Providence, by setting in every possible way the settlement of Christian medical men in foreign countries, and that for this purpose a society be formed under the name of the Edinburgh Association for Sending Medical Aid to Foreign Countries." It was at the same time resolved that "the objects of the Association shall be to circulate information on the subject, to endeavor to originate and aid such kindred institutions as may be formed to prosecute the same work, and to render assistance at missionary stations to as many professional agents as the funds placed at its disposal will admit."

At the second annual meeting (November 28, 1843) it was resolved that the association should be designated "The Edinburgh Medical Missionary Society.' For the first year the income of the Society was only £114, and at the close of its first decade the annual income had never exceeded £300. Until 1851 the funds of the Society were mainly expended in diffusing medical missionary information.

Lectures on the subject of medical missions were delivered by several of the directors, and afterward were published and widely circulated; prizes were offered for the best essays on the subject, and every available opportunity taken to advocate the claims of this new organisation. From time to time grants of money for the purchase of medicines and instruments were made to the few medical missionaries then at work in the foreign field.

The Main Point Mission Dispensary, the first home medical mission in Great Britain, was opened by Dr. Handside in November, 1853. This became, in 1861, the Edinburgh Medical Missionary Society's Training Institution. Soon after the death of Prof. Miller, a memorial fund of above £2,000 was raised, and the house at 56 George Square, now known as the "Miller Memorial Medical Mission House," was purchased and made over to the Society as a residence for the superintendent and students. Medical Mission dispensaries were also opened in Glasgow, Aberdeen, Liverpool, London, etc., and are recognized as powerful auxiliaries to the work at home.

In 1877 the laying of the corner-stone of the Livingstone Memorial Medical Missionary Institution marked a new era in the history of the Society; the widespread efforts made to raise the funds for the erection of this building gave a great impulse to the cause of medical missions. Besides the work at home, the Society supports Medical Missions at Nazareth and Damasacus, in Syria, and a training institution at Agra, India. For a time a Medical Mission was carried on at Niigata, in Japan, and the Society also helped to establish the Belleville Medical Mission in Paris. In addition to this regular work grants in aid are made to medical missionaries of all denominations the world over, for the purchase of instruments, medicines, etc. The Edinburgh Ladies' Auxiliary.
was organized in 1846 to assist the Medical Missionary Society in its work.

Missions, Agents and Students (1902): 1. Dispensary and Medical Mission College, Edinburgh; 2 physicians, 1 matron, 1 dispenser, 1 janitor, 21 men and 4 women students; 2. Nazareth Medical Mission; 1 physician, 2 native assistants, and 1 native nurse. 3. Damascus Medical Mission, called the Victoria Hospital; 1 medical missionary, 1 assistant, and 3 nurses; 4. Agra Medical Missionary Training Institution; superintendent and 21 native medical missionary students. 5. Hawthornbrae Convalescent Home, Duddingston; 239 patients during year.

The organ of the Society is a Quarterly Paper, published on the first of February, May, August and November at Edinburgh.

EDUCATION; Its Place in Missions: In the successful prosecution of foreign missions the need of education has come to be fully recognized. There may be differences of view as to its place and relative importance in the various fields, but there is general unanimity among missionaries as to its usefulness and desirability in all fields. All societies organized for general missionary work keep constantly in view as the great purpose of their existence the preaching of the Gospel. Educational, medical, literary and philanthropic work may conceivably be dispensed with; not so direct evangelistic endeavor for the conversion of the heathen. For this the disciples were commissioned by Christ; for this missionaries are commissioned. But long experience, particularly in Oriental lands, proves that Christian education is not only a valuable adjunct or complement to evangelistic effort—it is itself a means of evangelism. Firstly, it prepares the way for the Gospel by undermining the old systems, and showing (a) the falsity of much of the teachings of the heathen religions; (b) the groundlessness of their superstitions; (c) the immorality of many of their time-honored customs; and (d) the illogical and unphilosophical character of their explanations of the natural phenomena of the universe. Western civilization with its practical demonstrations effectually clears the opening mind of the fallacies and follies of Oriental wisdom, and prepares it for the reception of the fundamental truths of a faith which is not at war with science, philosophy, and reason. Thus, mental training and illumination may, and often does, prepare the way for the acceptance of the Christian faith.

Second, Christian education is indispensable to the highest type of Christianity. Men may have had saving faith in Christ while in a state of utter desuetude, and yet live and labor as Christian preachers among their own people, that the missionary society generally does not encourage candidates for the ministry to go to any Western land for their education.

Third, Christian education is necessary to fit men for business and professional positions in their own country. While the system of instruction provided by government in India is carried out under the direction of missionaries, is complete and thorough, it is purely secular, and aims to be impartial in its avoidance of religious topics. The churches of the United States believe that it is wise and necessary to have denominational institutions of higher education of equal grade with the best secular colleges and universities, that young men and women may be under positive religious influences and teaching during the most impressive periods of their lives; and this must have to be provided either in the countries where heathen and antichristian religions prevail. Christian colleges in India, China, Japan, and other countries prepare men to take service under the government, and for professional and business pursuits. Most of them enter as heathen; many of those graduate as Christians. Their conversion is earnestly sought by members of the faculty, who never forget in their function as teachers their character as missionaries. It is due to these missionary colleges and universities that some of those high in the councils of government or distinguished in professional and business pursuits are Christians; while many others, who do not openly break with all old customs and ceremonies, carry with them a high respect for Christianity, and use every reasonable opportunity to advance the interests of the institutions in which they have been educated. Their attitude is in no case one of hostility, but of friendliness. The value of education of the Western type is so fully recognized in many Oriental countries by government that Christian institutions meet with little or no opposition from the authorities. It is true that the schools and colleges in North China were destroyed in the Boxer movement of 1900, but simply because they stirred the hatred which the fanatical and superstitious rioters had for all things foreign. The potent influence of education in ameliorating the condition of women in the East is an element of vast importance in the working out of the great purpose of Christian missionary societies. There the woman, as among the Indians of the American continent and the savages of Africa and the South seas, is regarded as an inferior being, degraded, oppressed, abused, secluded, so that the finer qualities of the sex are in a state of suppression and she moves in a restricted sphere. Education not only enlightens the mind of her lord and master, but places her in her true position in the home and in society, but it tends to free woman herself from the chains of superstition and ignorance and reveals to her a nobler, sweeter and truer life, according to a larger and diviner plan than that to which she has been condemned by sin and ignorance. The educational institutions for girls are, therefore, quite as important in the working out of missionary purpose as are those for boys, and the growth
in the number of these schools and the pupils attending them is one of the most significant signs of missionary progress. For it is clearly recognized by missionaries in the countries of the Orient that in the devotion of the women is the strength of the idolatrous religions. They cling tenaciously to the tenets and customs and ceremonies of the outworn faiths long after the men have become neglectful and indifferent; and it would be impossible to Christianize the masses without reaching the women. The women exercise large influence over the children, and indoctrinate the girls in particular in all the superstitions they themselves receive. The education of women is, therefore, a necessity in missionary enterprise.

Mission schools may be classified according to grade as collegiate, preparatory, elementary, kindergartens; according to nature of instruction given, as theological, biblical, medical or industrial. In grade the institutions range from kindergartens and elementary day schools to the boarding or high schools and seminaries and to the college and university.

Of the latter class Dr. Dennis, in his Centennial Survey of Foreign Missions, reports 91, of which nearly one-half, or 44, are in India, including Ceylon, 13 in Japan, 8 in Korea, 8 in Africa, and the rest (22) in Australia, Canada, Madagascar, Persia, Syri, Turkey, South America and the West Indies. In these 94 institutions there were, at the beginning of the century, 35,539 scholars, all males except 2,099 in India, where education for women leads to have been most fully developed, nearly 26,000 of the total number are to be found. There are fewer in China, strange to say (1,814), than in Africa or Turkey.

Of the boarding and higher schools and seminaries in which preparation is made for the college or university, there are 879, with nearly 86,000 pupils. Of these, 406 are in India, 166 in China, 85 in Africa, and 40 in Japan, including Formosa. In this class of schools the feminine sex has had a more adequate representation than in the higher grade institutions, numbering 34,714, as against 49,612 male scholars. It is interesting to note that in China and Ceylon, Japan, Mexico, Oceania, Persia, Palestine, Syria, Turkey, South America, and the West Indies, girls predominate among the pupils. In India, Japan, and China the boys outnumber the girls more than two to one; in Japan, the tables are turned and the girls are nearly three to one, while in Mexico the proportion is nearly ten to one.

Of theological or training schools, for preachers and Christian workers there are 375. India leads with 126, China comes next with 68, Africa, third with 59, Japan, fourth with 38. The rest are distributed over the other missionary countries of the world. In these institutions 11,765 persons are being trained, 8,284 males and 3,515 females, there being predominating in number in Burma, Japan, Syria and Turkey.

Passing next to medical schools and schools for nurses we note that there are 67, with 651 pupils, of whom 200 are females. China takes the lead in the number of these institutions with 32, having 270 pupils, India coming second, with 101 pupils.

Of elementary or village schools there are 18,742, with 904,000 pupils, two-thirds being of the male sex. There are also 122 kindergartens, with 4,704 pupils.

It remains to note in this statistical survey, that there are 179 industrial training institutions and classes, in which 9,074 persons (of whom 2,382 are females) are being prepared for one or another branch of industrial life. Africa here takes the lead in the number of such institutions, tho not in the number of scholars. India has 51 institutions, with 4,305 pupils, while Africa has only 1,845 pupils.

The importance of industrial training in the Orient and in Africa and Oceania is more fully appreciated as Christian communities increase, as better methods of living are attained, and as converts are shut out of lines of work on account of their change of religion and customs. These schools are intended to prepare persons of both sexes for employment where skill is required and for which remuneration may be commanded. The Industrial Mission Aid Society of London seeks to secure opportunities for those so trained to engage in productive labor.

To summarise: Missionary societies have, in all, 20,458 educational institutions of all kinds, with 1,051,466 scholars, of whom 322,980, or about one-third, are females. The significance of these figures may easily be overlooked. Compared with the immense population of the fields in which these institutions are found in Japan, Africa and Oceania are almost infinitesimal. But they certainly bear a fair proportion to the number of Christian communities. The solidarity of the heathen and non-Christian populations, aggregating, perhaps, two-thirds of the grand total of the inhabitants of the world, is immense—an overwhelming fact. After a century, more or less, of endeavor in Asia, all that can be claimed is that a beginning, a most encouraging beginning, has been made in Christian work, the extent of which cannot adequately be represented by mere numbers. The crumbling process is everywhere at work on heathen solidarity, and the attitude of the masses toward the old religions is by no means the same as it was a century or even a half century ago.

Moreover, the propaganda of education is a rapidly expanding propaganda. The oldest college in the mission field, that at Serampur, founded by Carey and called “The first Christian college in the East,” dates back only to 1819. Of the 94 collegiate institutions reported at the close of the century, only twelve were founded before 1850. In the third quarter that number was increased to 25, while in the last quarter 57 were established. Thus, sixty per cent of these institutions were organized in the last twenty-five years of the century, and of these, twenty fall within the last decade.

Still more notable is the recent origin of the institutions of the preparatory class. By far the greater number have come into existence in the last quarter of the century, particularly in the last decade. Of kindergartens in the mission fields there are none that go back of the ninth decade; most of them sprang up in the last quarter. The growth of the educational institutions in mission fields in the ten years ending in 1900 is one of the most remarkable developments in the modern missionary movement. It is all the more remarkable when it is remembered that it is coincident with the multiplication of the hospitals, dispensaries, orphanages and other philanthropic agencies. It proves that those who are responsible for the shaping of missionary policy are convinced that education is an indispensable adjunct of evangelization.
The cost of the educational work of missionary societies is naturally a heavy charge upon their annual appropriations. The support of the missionaries who are charged with the responsibility of conducting it is provided usually in the annual budget, together with the wages of native leaders and others, with the items of rent, insurance, repairs, furniture, etc. Pupils may be expected to pay their board, and is certain classes of schools, fees for tuition, books, etc. Endowments, foundations, and bequests provide some for the support of the schools and the support of the home churches, classes in Sunday schools, young people’s meetings and other organizations often assume the support of a girl or boy while in school. In India a government subsidy is given to schools of a certain grade on the basis of examinations conducted by representatives of the educational authorities of the State.

**EFAT, or VATE.** See New Hebrides.

**EFATESE LANGUAGE:** Belongs to the Melanesian family and is spoken with several dialects in the island of Efate in the New Hebrides. It was reduced to writing by Scotch Presbyterian missionaries and an effort has been made to combine it with other languages so as to provide the people with a single literary language. Roman letters are used in writing Efatese. It is also called Fate and Vate.

**EFULEN:** A settlement in Kamerun, W. Africa, situated east of the coast belt and 70 miles S. of E. of Great Batanga. Station of the PN (1893), with (1903) 2 missionaries (one a physician) and their wives, 3 native workers, 1 boarding school, 1 dispensary, 1 hospital and 150 professing Christians.

**EGEDE, Hans:** See Danish Missions.

**EGEDESMINDE:** An Eskimo settlement on the west coast of Greenland, situated on Disco Bay. Population about 1,200. Formerly a station of the Danish Missionary Society. The inhabitants being now professing Christians the place is under care of the Danish Church and is not considered as a missionary field.

**EGYPT:** Egypt proper extends from the Mediterranean on the north to Wady Halfa at the second cataract of the Nile on the south, and from the Suez Canal and the Red Sea on the east to an indefinite line of desert on the west. Politically it includes also a strip of Arabia on the east by bdefinite line of desert on the west. Politically it includes also a strip of Arabia on the east. Éthologically it includes also a strip of Arabia on the east. Culturally it includes also a strip of Arabia on the east. Scientifically it includes also a strip of Arabia on the east. **Egyptian Family:** The Egyptian family and is spoken with several dialects of about 5,000 British troops in Egypt, partly paid by that province and styled “The Army of Occupation.”

The English control of Egypt (since 1883) altho advisory in form, is already revolutionising the life of the common people by securing justice to a marked degree and gradually the doing away with official corruption. The schools of all grades throughout the country are required to teach the English language besides the vernacular, and a date has been officially fixed after which English will be the language of all official transactions and correspondence.

Missionary work is carried on in Egypt by the United Presbyterian Church of the United States of America and the Church Missionary Society of England.

Of these two missions the former is much the more important. The latter has confined itself to work for Mohammedans, chiefly in connection with the schools established for Muslim children by Miss Whately, who died in 1889, leaving the schools under the general charge of the society. Missionary work among the Copts has never encountered so bitter opposition from the clergy as has been met in some other parts of the Levant. The government, too, has favored and valued the educational work of the missions. Under existing circumstances, government persecution of Mohammedans who incline to Christianity does not take place, and with the spread of knowledge of the English language and literature, an opportunity for evangelizing Mohammedans has been created which should be used to the full.

Besides the UP and the CMS, the BFBS, the Sudan Pioneer Mission (German), the Kaiserswerth Deaconesses, the (Dutch) Society for the Evangelization of Egypt, the North Africa Mission, the International Medical and Benevolent Association and the Egypt General Mission have missions in Egypt. The WMS and the London Jews Society and four other societies have missions limited to the Jews in Alexandria, Cairo, Port Said and Suez. The whole number of Protestants in Egypt is returned as 11,894.

**EHLANZENI:** A settlement near Greytown,
Natal, about 65 miles N. W. of Durban. Station of the Hermannsburg Missionary Society (1856), with (1902) 1 missionary and his wife, 11 native workers, 12 places of worship, 6 schools and 223 professing Christians.

EHLOMOHLOMO: A station of the Hermannsburg Missionary Society (1862) among the Zulus in the Vryheid district of Natal. The work has been very much interrupted by the Transvaal war and statistics later than 1901 are not at hand. There then were 1 missionary and his wife, 2 native workers, a chapel, a school and 175 professing Christians.

EKAMBA: Station of the Norwegian Missionary Society in Natal, S. Africa, about 40 miles east of Ladysmith.

EKUHLENGENI: Station, at present (1902) without a missionary, of the Hermannsburg Missionary Society, in the Vryheid district of Natal; situated about 40 miles N. of E. from Vryheid. Has about 350 professing Christians.

EKULALENI: Station of the Church of Sweden Mission in Natal, S. Africa, situated among the Zulus north of the Tugela River. It was founded in 1888 and in 1900 had 5 missionaries, men and women, and about 75 professing Christians.

EHWENDENI: Station of the UFS in the Central Africa Protectorate, west of Lake Nyasa and among the Angoni tribes. It was founded in 1899 and now has 1 missionary, 22 native workers, 50 schools with 144 teachers, 1 dispensary.

EL ARAISH: A seaport town in Morocco, 45 miles S. S. W. of Tangier. Station of the Gospel Missionary Union (1848) with 3 missionaries, Station also of the North Africa Mission (1899), with 2 missionary women and 1 dispensary.

ELAT: A town in the Kameruns, W. Africa, 75 miles E. of Efufen. Station of the PN (1896), with (1902) 5 missionaries, men and women (one a physician); an organized church, 2 schools, 1 hospital, and 184 baptized Christians.

ELIOIT, John: Born, 1604, in Nasing, Essex County, England. He had eminently godly parents, "by whom," to use his own words, his first years were "seasoned with the fear of God, the Word, and prayer." He was educated at the University of Cambridge, in 1623, where he acquired a thorough knowledge of the original languages of Scripture, was well versed in the general course of liberal studies, had a passion for philology, and was an acute grammarian. On leaving the university he became an usher in the grammar school of Rev. Thomas Hooker. To his connection with the latter he traces his conversion. Mr. Eliot resolved to devote himself to the ministry, and, being exposed to the tyranny of Laud on account of his non-conformity, followed Hooker to America, with sixty others, in the ship "Lyon," which reached Boston November 3, 1631. Some of his brethren who contemplated going to America exacted from him a promise that, if they came, he would be their pastor. On his arrival he supplied the place of Mr. Wilson, the pastor of the Boston church, then absent in England. In 1632 the brethren whom he had left came and settled in Roxbury. Mr. Eliot was installed as their pastor, continuing in that station till his death, nearly sixty years. In 1639 he was appointed, with Welde and Mather, by the civil and ecclesiastical leaders of the colony to prepare a new version of the Psalms. This Psalter, issued in 1640, was the first book printed in America. It was entitled The Psalm Book, faithfully translated for the Use, Edification, and Comfort of the Saints in public and private, especially in New England. It was called The Bay Psalm Book, but afterward The New England Version of the Psalms. The book passed through twenty-one editions. Soon after Eliot was settled in Roxbury he became deeply interested in the Indians, and, the legislature having passed an act for the propagation of the Gospel among them, he resolved to learn their language that he might preach to them. Through a young Pequot, who had learned a little English and whom he had received into his family, he obtained some knowledge of their language. He soon became sufficiently familiar with its vocabulary and construction to translate the ten commandments, the Lord's Prayer, some texts of Scripture, and a few prayers. In October, 1646, he made his first visit, with three others, to their camp near the site of Brighton, on the border of Newton, and preached to them, assembled in the wigwam of Waban, their chief, the first sermon ever preached in North America in a native tongue. The service continued three hours, the Indians asking many questions. Two weeks
after he made a second visit, when an old warrior asked with tears if it was not too late for him to come to God. In another fortnight he made a third visit. He talked to them about what they had seen and heard. Desiring to civilize as well as Christianize the Indians, Eliot had those to whom he had preached gathered into a community on the site of their old camping ground. This was about five miles west of Boston, and to it, at the suggestion of the English, they gave the name Nonan­
tum, signifying rejoicing. Eliot exerted great influence over them with rare tact and sagacity to encourage them to adopt the modes of civilized life. A simple civil administration was established, and in 1647 the General Court established a court over which an English magistrate pre­
sided. With social and industrial improvements they were trained with the aid of some native helpers in religious duties. These Indians received the appellation of “praying Indians.”

Another place for religious meetings and instructions was Neponsets, within the limits of Dorchester, among a body of Indians whose chief was the first sachem to whom Eliot preached. A sachem at Concord now induced his people to petition for a tract near the English, that they also might be instructed. Their request was granted, a teacher was given them, and religious services were commenced. They adopted a code of rules regulating their civil and religious duties and their social comfort. In 1648 Mr. Eliot visited Pawtucket, 35 miles southward, where was a powerful chief. He and his two sons gave evidence of true conversion, and desired Mr. Eliot to live with and instruct them, offering him the choicest location. About this time came an earnest request from a chief living 60 miles from Roxbury, on the present site of Brookfield, that Mr. Eliot might visit and instruct his people. As the journey would take him through a region where his life would be in danger, a sachem through whose country he must pass came with twenty of his warriors to escort him. He set out on horseback. The exposure and fatigue severely taxed his strength. “I have not been dry,” he states, “night or day from the third day of the week until the sixth, but so travel, and at night pull off my boots to wring my stockings, and on with them, and so continue. But God stepped in and helped.” Not only did the sachems violently oppose him and persecute the praying Indians, but he had received no aid or cheer from others. His own countrymen even aspersioned him. It was declared both in Old and New England that the whole scheme was to make money, and that the conversion of the Indians was a fable. Of this work Edward Everett said: “The history of the Christian Church does not contain an example of resolve, untiring, successful labor superior.” In 1651, 1,500 copies were printed, and 2,000 in 1685. He translated also Baxter’s Call to the Unconverted, and various other treatises on practical religion. His original works were A Catechism, an Indian Primer, and the Indian Grammar. At the end of the latter he wrote: “Prayers and pains, through faith in Jesus Christ, will do everything.”

In English he published The Communion of Churches, The Glorious Prospect of the Gospel among the Indians, and other works. When, through age and infirmity, he was unable to preach or visit the Indians, he induced several families to send their negro servants to him once a week, that he might instruct them in Gospel truth. He died May 20, 1690, aged eighty-six.

ELITUBEN. See Rainy.
EL KSAAR. See KASR EL KEBIR.
ELLICE ISLANDS: A group of small islands, S. E. of the Gilbert Islands. There are eight islands and small groups of islets, with an area of fourteen square miles and about 2,400 inhabi-
tants. The LMS has worked this field with a number of native workers from Samoa, a missionary visiting them once or twice a year. This has not had entirely satisfactory results, and in 1901 a missionary was stationed at Beru, in the southern portion of the Gilbert Islands, who will give a closer supervision to the work in the Ellice group.

ELLICHPUR: A city in Berar, Central Provinces, India, situated 32 miles N. W. of Amraoti. It was once a great city. Population (1891), 26,500, of whom 19,000 are Hindus and about 7,000 Muslims. Station of the Kurku Island Mission (1889), with 6 missionaries, men and women.

ELLIS, William: Born August 29, 1794, in London. Studied at Gosport and Homerton. Having offered himself at the age of twenty as a missionary to the LMS and been accepted, he spent a few months in acquiring a knowledge of printing and bookbinding; was ordained November 8, 1815, at Kensington, and sailed January 23, 1816, for the South Seas. He labored for a while at the islands of Eimeo and Huahine, setting up in Tahiti the first printing press in the Sandwich Islands, February 24, 1822, in company with Messrs. Tyerman and Bennet, the Society's deputation, reaching Hawaii March 21; visited Oahu in April, and, because of the affinity of the Tahitian and Hawaiian languages, was able to preach to the Hawaiians with facility in two months after his arrival. Being requested by the king and chiefs to join the mission in the islands, and the American missionaries cordially concurring in the request, he returned to Huahine, and removed his family to Oahu, February 5, 1823. Before two years had elapsed, illness of his wife compelled Mr. Ellis's return to England. During five years he served the LMS by addressing meetings in behalf of missions, and afterward, during nine years, he was Foreign Secretary of the Society. While filling that important office he wrote his great work on Madagascar, which is one of the classics of missionary literature. Ten years after he had resigned his office as Secretary, Mr. Ellis was again called to serve the LMS in 1853—this time by going to Madagascar in order to supervise the reopening of the LMS mission there. After several disappointments this was accomplished in 1862, and, his work being done, he returned to England in 1865, retaining connection with the LMS until his death, June 9, 1872.

ELLORE: A town of Madras, South India, in the Godavari district, 58 miles north of Masulipatam. Population (1891), 29,400, for the most part Hindus. Mission station of the CMS (1854) and of the CEZ (1881), with (1902) 4 missionaries, men and women; 103 native workers, men and women; 1 high school, 76 common schools (of which 65 are under the district church), 202 Zoniana pupils, and 4,240 native professing Christians.

ELMINA: A town a few miles west of Cape Coast Castle in the Gold Coast Colony, W. Africa. Station of the WMS, where, in spite of many difficulties and much opposition, the church is in a healthy condition. It has (1903) 89 native workers, men and women; 46 outstations, 44 preaching places, 5 schools and 496 professing Christians.

ELUKOLWENIS: A town in Griqualand East, Cape Colony, S. Africa. Mission station of the Moravians (1875). It was at first dependent for instruction on the weekly visits made by the missionary stationed at Ezimeuka. It has now (1900) 16 native workers, men and women, and 210 professing Christians.

EMAKOSINI: A town in the Vryheid district of Natal, S. Africa; situated about 20 miles N. W. of Vryheid. Station of the WMS, with 1 missionary and 12 native workers of both sexes.

EMERSON, John S.: Born at Chester, N. H., December 28, 1800; graduated at Dartmouth College 1826; graduated at Andover Theological Seminary 1850; sailed as a missionary of the ABCFM for the Sandwich Islands November 26, 1831, reaching Honolulu, May 17, 1832. He was stationed at Wailua, on Oahu. There he spent the whole of his missionary life except four years, 1842-46, when he was professor at Lahainaluna Seminary. While there he published, with the assistance of Messrs. Alexander and Bishop, an English-Hawaiian Dictionary, based upon Webster's Abridgment, a closely-printed volume of 184 pages, containing 16,000 words in English, with definitions in Hawaiian. He died in 1867.

EMFUNDSHWIKI: A settlement in the northeastern part of Cape Colony; situated about 30 miles S. of Kokstad. Station of the South Africa Wesleyan Methodist Missionary Society, with (1900) 1 missionary, 43 native workers, 18 outstations, 10 places of worship, 14 schools and about 500 professing Christians. The Woman's Association of the WMS also has a high school here.

EMGWALI: A town in Cape Colony, S. Africa; situated about 25 miles E. by N. from Stutterheim and not far from the Great Kei River. Station of the UFS (1857), with (1903) 1 missionary and his wife, 2 missionary women, 13 native workers, men and women; 10 outstations, 7 schools, and 438 communicants.

EMKINDINI: A settlement in Natal, situated in Zululand not far from the Umfolosi River. Occupied in 1900 as a station of the Zululand Missionary diocese.

EMLALAZI: A settlement in the Weenen district of Natal. Station of the Hermannsburg Missionary Society (1858), with (1901) 1 missionary, 5 native workers, 3 preaching places and 186 professing Christians.

EMMAUS (Natal): A station in the Upper Tugela region of Natal, situated about 30 miles N. of W. from Estcourt. Station of the Berlin Missionary Society (1847), with (1903) 2 missionaries, 13 native workers, 2 outstations, 8 preaching places and 365 professing Christians.

EMMAUS (Transvaal): A settlement in the Transvaal Colony, S. Africa, situated about 10 miles N. E. of Lichtenburg. Station of the Hermannsburg Missionary Society (1868), with (1901) 2 missionaries, 1 native worker, 2 preaching places and 1,150 professing Christians.

EMMAUS (West Indies): A station of the Moravian Missions in the northwestern part of the island of St. John, West Indies. It was established in 1782, and in 1900 had 1 missionary.
and his wife, and 8 native workers, men and women.

EMTBENI: A settlement in Natal, S. Africa, situated on the Tugela River about 35 miles from its mouth and about 35 miles E. of Greytown. Station of the Hermannsburg Missionary Society (1897), with (1902) 1 missionary and 1 native worker.

EMUREMURA: A settlement in Southern Nigeria, W. Africa, situated on Cross River about 80 miles W. by N. of Duke Town. Station of the UFS (1889); at present (1903) unoccupied.

ENDWEDWE. See INDWEDWE.

ENFIELD: A town in the Island of Jamaica, West Indies, situated about 18 miles E. by N. of Kingston. Station of the United Methodist Free Churches (1891), with (1902) 1 missionary and 6 native workers.

ENGCHUN. See YUNG-CHUN-CHAU.

ENGLAND; ENGLISH: See English.

ENGLISHMAN: A settlement in the Cape Colony, S. Africa, situated 63 miles S. from The Slang River. Station of the Berlin Missionary Society (1861), with (1902) 1 missionary and his wife, 2 preaching places, 2 schools and 349 professing Christians.

ENHERAT: A settlement in the Missionary District of Natal, S. Africa. Station of the Hermannsburg Missionary Society, with (1900) 8 preaching places, 5 schools and 455 professing Christians.

ENYANISWENI: A settlement in the Transkei region of Cape Colony, S. Africa. Station of the South African Wesleyan Methodist Missionary Society, with (1900) 8 preaching places, 5 schools and 455 professing Christians.

ENYANYADU: A settlement in Natal; circuit of the South African Wesleyan Methodist Missionary Society, with (1900) 40 outstations and 850 professing Christians.

ENYEZANE: A settlement in the Kranzkop district of Natal, S. Africa. Station founded by the East Frisian Missionary Society in 1859 and at present carried on by the Hermannsburg Missionary Society, with (1902) 1 resident missionary.

ENZINCUKA: Settlement in Griqualand East, Cape Colony, S. Africa, situated about 15 miles N. W. from Mount Frere. Station of the Moravian Missions (1881), with (1902) 1 missionary and his wife, 2 preaching places, 2 schools and 349 professing Christians.

EPHRA: A settlement in the Mosquito Reservation, Central America. Station of the Moravian Missions (1860), with (1903) 1 missionary and his wife.

EPWORTH: A station of the WMS, near Salisbury, Rhodesia, Central Africa. There are about 500 people living here who are all nominally Christians. One missionary and 22 native workers.

ERITREA: A colony of Italy in Egypt with autonomous administration. It lies on the Red Sea and is bounded landward by the Egyptian Sudan, Abyssinia and French Somaliland. The coast line is about 640 miles. The area is 99,500 square miles; population about 450,000, of whom about 2,000 are European. There is a military railway from Massaua to Maiatal, 23 miles, and 519 miles of telegraph line. The Swedish National Missionary Society has 5 stations in Eritrea, with 17 missionaries, men and women, and 133 communicant Christians.

ERODE: A town in the Coimbatore District, Madras, India, situated on the Cauvery River, 36 miles S. W. of Salem. Population (1891), 12,300, of whom over 10,000 are Hindus. Station of the Leipzig Missionary Society (1888), with (1903) 1 missionary and his wife, 10 native.
workers, men and women; 3 preaching places, 4 common schools, 1 high school, and 272 professing Christians. The Society lists give the name as Irod.

ERROMANGO. See New Hebrides.

ERUNGALUR. See Irungalur.

ERZERUM: Capital of the province of the same name in Asiatic Turkey and an important fortress, situated 110 miles S. E. of Trebizond and a little south of the western branch of the Euphrates River. It is an important station of caravan trade between the Black Sea and Persia. Its altitude is 6,600 feet. Population about 39,000, of whom 26,500 are Mohammedans and the remainder Christians of different sects. Station of the ABCFM (1839), with (1902) 1 missionary and his wife (the wife being a physician), 2 missionary women, 35 native workers, men and women; 22 outstations, 16 preaching places, 28 common schools, 2 high schools and 350 evangelical Christian communicants. Many of the members are emigrating in order to find security for life and property.

ERZINGAN: A city of Asiatic Turkey, 96 miles southwest of Erzerum. Situated on the Euphrates, in the midst of the mountains, it is an important military center and is noted for the energy of its people, both Turks and Armenians.

An outstation of the ABCFM worked from Erzurum.

ESIDUMBIN: A settlement in Natal, S. Africa, about 55 miles N. E. of Durban. Station of the ABCFM (1849), with (1902) 1 missionary and his wife, 1 missionary woman and 10 native workers, men and women.

ESKIMO LANGUAGE: A branch of the North American family of languages which is found in the Arctic coast regions. It is spoken in varying dialects in the most northern inhabited regions of America, from Greenland to Alaska, and by a small section of the Arctic dwellers in Eastern Asia. It has been reduced to writing by missionaries and used in some cases by the invention of syllabary characters which better suit the nature of the language.

ES SALT: A town in Syria, lying east of the Jordan and 15 miles N. W. of Heshbon. Station of the CMS (1873), with 1 missionary and his wife, 7 native workers, men and women; 4 schools and 380 professing Christians.

ESPIRITU SANTO. See New Hebrides.

ESSEQUIBO: A settlement near the mouth of the Essequibo River, British Guiana, S. America, about 15 miles N. of Queenstown. Station of the Wesleyan Methodist Church of the West Indies (Eastern Conference), with 1 missionary and his wife, 5 preaching places, 3 schools and 360 professing Christians.

ESTABLISHED CHURCH OF SCOTLAND; Foreign Missions of. See Scotland, Established Church of.

ESTACION CATORCE. See Catorce.

ESTACION TATROC. See Catorce.

ESTECOURT: A town in Natal, S. Africa, situated about 55 miles N. W. of Pietermaritzburg. Outstation of the SPO.

ESTRIDGE: A Moravian Mission Station on the northern coast of the island of St. Kitts, West Indies. The station was opened in 1845 and has 19 native workers, with 1 preaching place, 1 school and 450 professing Christians.

ETAH: A town and district in the United Provinces, India, situated 75 miles S. W. of Bareilly. Population (1891) 7,800, of whom 5,000 are Hindus and nearly 2,000 Mohammedans. Station of the ME, with (1903) 18 native workers, 1 preaching place, 24 Sunday schools and 1,340 professing Christians. Station also of the PN (1900), with (1903) 3 missionaries and their wives, 35 native workers, men and women; 25 outstations, 48 common schools, 1 high school, 1 evangelistic training class, 1 training class for women workers and 950 baptized Christians.

ETAWAH: A town in the United Provinces, India, on the Jumna River, 85 miles west by north of Cawnpore. It is a pleasant place, very picturesque, and contains several buildings of importance. It is regarded as the healthiest town on the plains of India. The population is (1891) 38,800, of whom 26,000 are Hindus and about 11,000 Mohammedans. Station of the PN (1863), with 1 missionary, 1 missionary woman and 11 native workers.

ETEMBENI (Natal). See Tsembeni.

ETEMBENI (Cape Colony): A town in the eastern part of Cape Colony, situated about 15 miles W. by S. of King Williams Town. Station of the Berlin Missionary Society (1868), with (1903) 1 missionary, 4 native workers, and 255 professing Christians. Station also of the South African Wesleyan Methodist Mission, with (1890) 1 missionary, 3 native workers, 38 schools and 1,620 professing Christians.

ETINAN: A settlement in the eastern part of the British Colony of South Nigeria, W. Africa, situated on the Kwo-Ibo (or Qua-Ibo) River, about 40 miles from its mouth. Station of the Qua-Ibo Mission (1898), with (1903) 1 missionary, 3 native workers and 2 outstations.

ETTAMANUR: A town in Travancore, S. India, situated about 30 miles to the eastward of Kotayam. An itineracy of the CMS, superintended from Tiruwella, with (1902) 18 native workers, men and women; 7 outstations, 9 schools and 1,165 professing Christians.

EURASIAN: A term employed to denote the offspring of European and Asiatic parentage, without regard to the proportion of the mixture. Such children are, in most cases, illegitimate, tho not necessarily so, and too often try to imitate the bearing of the European while living in subordinate positions like lower class Asians. Frequently they exhibit the worst moral characteristics of both races. Physically they are well formed, lithe, graceful, and often beautiful, and show great dexterity in all that requires dexterity and delicacy of touch, such as is required in clerical work. They do not have strong constitutions and are particularly subject to pulmonary complaints. By reason of their parentage, the Eurasian girls are often neglected and sink in the social scale.

In recent years missions have found means of reaching numbers of Eurasians effectively in India and China, so as to help them make the most of whatever abilities their mixed blood has given them.

EVANGELICAL ALLIANCE, The: An association for the defense of religious liberty and promoting the unity of all believers in the essentials of Christianity and their cooperation for its progress. It sprang from the labors of some great exponents of the Christian faith in different lands.
Evangelical Alliance

THE ENCYCLOPEDIA OF MISSIONS

228

toward the close of the first half of the 19th century. Notable among these were Thomas Chalmers of Scotland, John Angell James of England, George Fische of France, Merle D'Aubigné of Switzerland, and William Patton, Samuel H. Cox, Lyman Beecher, and others in the United States. In 1842 a meeting of the Congregational Union of England gave large consideration to the question of greater unity among the various denominations of Christendom. In that year also the Established Church of Scotland appointed a committee to report on the same matter. A celebrated letter, dated March, 1843, outlining such an organization, and asking that a meeting should be called in England to consider it, was written by Dr. William Patton, one of the founders of the Union Theological Seminary of New York, to John Angell James. The project made an important topic in the bicentenary of the Westminister Association held in Edinburgh, July, 1843. A conference of different denominations held in the Wesleyan Centenary Hall in February, 1845, also discussed the movement. John Henderson, a wealthy banker of Glasgow, collected, and in 1845 published, a volume entitled "Essays on Christian Union." A meeting preliminary to organization was held in Liverpool, October, 1845. At this meeting there assembled as many as two hundred ministers and laymen representing nearly twenty denominations.

A call was decided on for a great meeting to be held in the following year in London, and the provisional committee held its meeting in April, 1846. Several delegates were present from the United States. The meeting for organization assembled in the Freemasons' Hall in London, opening on August 25, 1846. Eight hundred delegates represented fifty denominations of Christians, and were in session fifteen days. It was in this meeting that John Angell James in an address gave to Dr. William Patton of New York the honor of first conceiving the idea of the alliance. This resolution was passed asking that branches of the Evangelical Alliance be formed in Great Britain and Ireland, United States, France, Belgium, French Switzerland and the Waldensian Valleys, North Germany, South Germany and German Switzerland, British North America and the West Indies, and additional branches from time to time.

Prominent among the subjects of discussion were sectarianism, infidelity, Popery, the Sabbath, and Christian education. There was great interest in this meeting among all the denominations and in the missionary centers of the world.

This organization has held a number of great ecumenical meetings, which have discussed the foremost questions of human thought and progress. Few religious conferences have engaged an interest so profound and widespread.

Branch national organizations have been formed in Scotland, Ireland, United States, Canada, New Brunswick, France, Switzerland, Germany, Holland, Denmark, Italy, Spain, Turkey, Greece, Syria, Egypt, South Africa, Japan, China, Persia, East Indies, Palestine, Australia, New Zealand, Chile, and Mexico.

Besides the aid to the Christian faith throughout the world, the Evangelical Alliance has been most practically useful in averting and ameliorating persecutions and oppressions from time to time in various parts of the earth. By united action in the way of remonstrance and petition, and by creating a wholesome and strong public opinion, religious liberty has been promoted in many countries, especially in Spain, Italy, Austria, Sweden, Turkey, Russia, Japan, and Persia.

By emphasizing in statements of doctrine only essentials in which all are agreed, by collecting statistics which exhibit the religious condition and progress of the whole world, and by discovering the signs of the times in the discussion of advanced measures, these cooperating bodies have opened an ameliorating influence among widely differing churches, which results in better conformity of their denominational standards to the spirit of union and progress.

A few missionaries of different schools held a three days' meeting for prayer in Lodiana, India, in 1858, and the suggestion arose that a request be made to all the Christian world for an annual week of prayer. The Alliance soon published the call, and has since sent forth the program of topics to all Christendom, before the beginning of the year. Many are the revivals that have followed this annual call to prayer, now identified with the Alliance, which has for its motto "Unum corpus sumus in Christo."

The organ of the Society is Evangelical Christendom, monthly, London.

EVANGELICAL ASSOCIATION, Society of: The Society was organized in 1839. For ten years its efforts were confined to New York and Canada, but in 1850 work was begun in Germany and later in Switzerland. The first distinctively foreign mission field was Japan, where a station was established in 1876. A new mission in China has long been contemplated.

There are (1903) 600 missionaries in the United States and Canada; 121 in Germany and Switzerland. In Japan there are 6 American missionaries and 24 workers, 1 station, 39 outstations, 901 church members.

The Woman's Missionary Society of the Evangelical Association was reorganized in 1892 and is auxiliary to the Missionary Society of the Evangelical Association. It includes 11 Conference Branch Societies and 133 auxiliaries. It aids in all departments of the work and supports 2 missionaries.

EVANGELICAL LUTHERAN CHURCH. See LUTHERAN CHURCH.

EWÉ LANGUAGE: Belongs to the negro family and is spoken in Dahomey by an unknown number of people. It has been written with Roman letters. It has two known dialects, called Anlo and Popo.

EZINCUKA. See ENZINCUKA.
FAA: A parish in the extreme northwest of the island of Upolu, the most beautiful of the Samoan islands in Polynesia. Formerly occupied by the LMS as a station (1830); it is now (1902) the center of a Christian community of about 5,000, of whom 1,400 are church members. There are 90 native workers, 33 places of worship and 33 schools.

FAA-SALELEAGA: A settlement district on Savaii, Samoan islands, Polynesia. Formerly occupied by the LMS as a station (1830); it is now (1902) the center of a Christian community of about 5,000, of whom 1,400 are church members. There are 90 native workers, 33 places of worship and 33 schools.

FAIRBANK, Samuel Bacon: Born in Stamford, Conn., December 14, 1822. He fitted for college at Monson, Mass., and in Jacksonville, Ill. Graduated from the Illinois College in 1842 and from Andover Theological Seminary in 1845. He went to India as a foreign missionary under the ABCFM in 1846, arriving at Bombay the same year. He was located at Ahmadnagar for four years, when he removed to Bombay and took charge of the mission press there. In 1857 he went to Vadals, in the Bombay Presidency, which was his headquarters until 1869. When Dr. Fairbank reached the usual limit of active service he decided to remain in India and devote his time to translation and literary work. Dr. Fairbank's language was the Marathi, and in this language he did much for the literature of the Marathi-speaking people, especially in the line of hymnology. He prepared the first book of musical notation for Western India. He was exceedingly fond of nature and a great student of the flora of India. Probably he did more than any man of this generation to teach the Indian farmers with whom he came in contact in his missionary work wise methods of agriculture. This brought him personally into direct spiritual relations with many whom otherwise he could not have reached. In his own district he was chief spiritual authority for many Hindus as well as for Christians. He died of heat apoplexy on May 31, 1898, having served in India 52 years. In that time more than 1,500 of them have been baptized.

FAKU-MEN: A town in Manchuria, China, situated about 50 miles N. of Mukden. Station of the Presbyterian Church in Ireland (1899), with (1900) 1 missionary, 18 native workers, 6 outstations, 7 preaching places, 4 day schools, 1 boarding school and 225 professing Christians. Name also written Fa-ko-men.

FALASHA KARA: This language belongs to the Hamitic group of African languages, and is spoken by the Falasha Jews in the Kara district of Abyssinia. It is written with the Amharic characters.

FALASHA JEWS: These Jews live in Abyssinia, numbering about 200,000 souls. They occupy, according to Gutz, the anomalous position of not being Semitic either in blood or in speech. Mission work among them was commenced in 1858 by the London Society for the Promotion of Christianity among the Jews, and since that time more than 1,500 of them have been baptized.

FALEALI'I: A district on the southern shore of Upolu, the most beautiful of the Samoan islands. Station of the LMS (1836), with (1902) 1 missionary, 58 native workers, 31 preaching places, 31 schools and 4,926 professing Christians, of whom 1,248 are church members.

FALLANGIA: A settlement town on the Lesser Ponga River, French Guinea, W. Africa. It was the starting point for the mission among the Susus by the West Indies Church Association, Barbados. The first white missionaries who visited those regions were killed by the slave-dealers, and in 1818 the mission was abandoned. The next who tried succeeded to the climate; but colored missionaries from Codrington College, Barbados, who arrived at Fallangia in 1855, had a fair success. The work is now carried on by the Pongas Mission in connection with the SPG.

FALLSCHER, Christian (of Germany): Forty-three years before his death on February 11, 1901, Christian Fallscher went to Jerusalem to work under the late Bishop Gobat. Six years later he was sent by him to Nablus, as a lay preacher, and there he remained for thirty-seven years, first in connection with Bishop Gobat and later with the CMS. Through his agency a church, schools, mission house and house for the mission ladies were built, and a year before his death a firman was obtained which enabled the CMS to build a large and handsome hospital. In 1891 medical work was opened in Nablus and...
ladies were sent to help in schools and hospital duties. He was loved and honored by Christian, Muslim and Jew, and by his patient endurance and unpretending piety his influence became, potent and far-reaching. Notwithstanding his active evangelistic work among the people, he learned the difficult Arabic language, and by his perpetual intercourse with the natives he gained a clear insight into their idioms and intricacies. He was enabled, in a remarkable degree, by the grace of God, to identify himself with the people among whom he lived, and in many legitimate ways to follow their customs. He learned, in the Christian sense of the term, to lay aside much of his own personality and by coming into close sympathy with the people he was enabled to apprehend the Eastern point of view.

FAN-CHENG-HSIEH: A town in the province of Hupei, China, about 10 miles north of Halangyang-fu. Station of the Hauges' Synod China Mission (1843), with (1900) 6 missionaries, men and women, of whom 2 are physicians; 8 native workers, men and women; 4 schools, 1 hospital, and 1 opium victims' refuge. Station also of the Swedish Evangelical Mission Covenant of America (1890) with (1900) 7 missionaries, men and women. Name also written Fan-cheng.

FANTI LANGUAGE: Belongs to the negro group of African languages, and is spoken by some of the tribes in the Gold Coast Colony, W. Africa, being a dialect of the Ashanti allied to the Otshi dialect. It was reduced to writing by missionaries of the WMS, who made use of the Roman letters. The beginnings of a literature have been created.

FARAVOHITRA: The favorite European quarter of Antananarivo, capital of Madagascar. It is situated at the northern extremity of the rocky ridge on which the city is built, and was bare and desolate in 1868, when the LMS chose it for a center of work. A memorial church was erected here in 1870 on the spot where in 1849 Christians were burned alive for refusing to give up Christ. The LMS has (1902) connected with Faravohitra and in the district 1 missionary and his wife, 256 native workers, 30 common schools and 4,412 professing Christians. Name also written Faravesmiti.

FARIDPUR (Bengal): Chief town of a district of the same name in Bengal, India, situated on one of the delta outlets of the Ganges about 120 miles N. E. of Calcutta. Central station of the Faridpur Mission (1867), with (1900) 5 missionaries, men and women, one a physician; 3 native workers, 6 schools and 1 hospital. Outstation of the SPG, with 250 professing Christians. Name also written Fureedpore.

FARIDPUR (United Provinces): A village 15 miles S. E. of Bareli, United Provinces, India. Population (1901), 6,400, of whom about 3,500 are Hindus and 2,500 Mohammedans. Circuit of the ME, with 20 native workers, men and women, and 360 professing Christians.

FARM AMSTERDAM. See AMSTERDAM FARM.

FARRINGIA: A settlement on the River Ponga in French Guiana. Station of the Pongas Mission.

FATÉ LANGUAGE. See EFATESE LANGUAGE.

FAZAHGANJ WEST: A village in the United Provinces, India, situated 10 miles N. W. of Bareli. Circuit of the ME North India Mission, with 27 native workers, men and women; 1 preaching place, 8 day schools, and 725 professing Christians.

FATEGHARH (Punjab): A town situated about 15 miles N.E. of Batala, Punjab, India, occupied (1903) as an outstation of Batala by the CEZ.

FATEGHARH (United Provinces): A town in the United Provinces, India. Capital of the district of Farukhabad, adjoining the town of Farukhabad and situated 70 miles S. of Barei. It was the scene of a massacre of about 200 Europeans during the mutiny of 1857. Population about 12,000. Station of the PN (1844), with (1903) 10 missionaries, men and women; 53 native workers, men and women; 6 outstations, 5 preaching places, 16 day schools, 4 boarding schools, 1 theological training class, 1 orphanage, 4 organized churches and about 400 professing Christians.

FATEHPUR: A town in the United Provinces, India, situated 70 miles N. W. of Allahabad. Population (1891), 20,000, of whom 10,000 are Hindus and 9,000 Mohammedans. Station of the PN (1853), with (1903) 5 missionaries, men and women; 9 native workers, men and women; 1 chapel, 2 schools and 2 outstations.

FAT-SHAN: A manufacturing town and river port on the Canton River, 9 miles W. S. W. of Canton, Kwangtung, China. A great part of the traffic on the three rivers which unite to form the Canton River passes through this place, and people from all parts of Kwangtung, Kwangsi, and even Yunnan are met with. In former years the hatred of foreigners was great, and at any time preaching was likely to cause commotion and trouble. Population about 400,000. Station of the WMS, with (1903) 3 missionaries, of whom 2 are physicians; 7 native workers, 6 outstations, 3 preaching places, 1 day school, 1 hospital, and 115 professing Christians.

FAURESMITI: A town in the Orange River Colony, S. Africa, situated 65 miles S. S. E. of Kimberley; the Jagersfontein diamond fields are near this town. Population about 2,000. Station of the South African Missionary Society, with (1903) 23 native workers, 28 outstations, 3 preaching places, 2 day schools, and 414 professing Christians.

FAYUM: A large town of Central Egypt, in the oasis of that name. Population of town and oasis, 150,000. Mission district of the United Presbyterian Church of America.

FEN-CHAU-FU: A city in the province of Shan-si, China, situated on the plain, 60 miles S. W. of Tai-yuen-fu. Elevation, 3,000 feet. Temperate climate; lowest thermometer 50° F. A population of over a million is reached here, among whom are many Roman Catholics and a few Mohammedans, but the majority are followers of Confucius and Buddhism.

Station of the ABCFM (1887), which was broken up during the Boxer rising of 1900. Reopened in 1901, but the missionary has not yet (1903) taken up permanent residence there. There are (1903) 94 church members.

FENG-CHEN: A town in the province of Shan-si, China, situated 83 miles S. W. of Kalgan. It is a station of the CIM (1902), with 2 missionaries, 1 with his wife. It is also a station of the CA.

FENG-HSIANG-FU: A town in the western
part of the province of Shan-si, China. Station of the CIM (1898); broken up by the Boxer rising in 1900. Now occupied (1903) by 1 missionary and his wife and 1 foreign assistant. The name is also written Feng-siang.

FENG-HWA-HSIEN: A town in the province of Che-chiang, China, situated about 15 miles S. W. of Ningpo. Station of the CIM (1866), with (1903) 1 missionary and a number of professing Christians. The work suffered considerable disturbance during the Boxer rising of 1900. The name is also written Feng-hua.

FENG-HWANG-CHENG: A town in Man-churia, about 100 miles S. E. of Mukden. Station of the Danish Missionary Society (1899), with (1903) 2 missionaries, 1 missionary's wife, 1 dispensary, 3 professing Christians.

FENG-KANG: A town in the province of Kiang-si, China, situated about 25 miles E. by N. of Kan-chau-fu. Station of the CIM (1907), which was broken up at the time of the Boxer rising in 1900, and now (1903) is still vacant.

FENG-TSIANG: See FENG-HSIANG-FU.

FERGHANA: A territory of Asiatic Russia, formerly Khokand, one of the Khazates of Western Turkestan. It is enclosed by lofty mountains, and is for the most part well watered and fertile. The climate is severe in winter, and in the valleys is very hot in summer. It is noted for its fruits and its silk manufactures. The population is (1897) 1,500,000, composed of various tribes of Turks and Tatars. It was forced to accept a Russian protectorate in 1868 and annexed to Russia in 1876. It is one of the regions where no Protestant missionary enterprise is allowed.

FERNANDO PO: An African island lying in the Gulf of Guinea, off the Kamerun coast, forming with the islands of Elobey, Annobon, Corisco, and other small islands, a colony of Spain. The area of all is 950 square miles; population 23,770, mainly Bubi negroes (of Bantu race). The island of Fernando Po is volcanic. Fernando Po has served at various times as a base of operations for missionaries wishing to enter Africa. The Primitive Methodist Missionary Society has 4 stations there, with about 280 native Christians. The Spanish laws throw many restrictions about the missionary enterprise.

FEROZEPORE. See Firozpur.

FETISISM: It is common for those who have a theory of evolution to support, extending to religions as well as to physical life, the assumption that fetishism is invariably the lowest step in the ladder of man's ascent to higher religious conceptions; that, beginning with this simple alphabet, the race has gradually advanced through more and more complex and elaborate systems toward Christianity, which is the goal of the religions of the world. It is in one sense flattering to the Christian faith, but, in another, it is utterly subversive of some of its most fundamental doctrines.

It was better in approaching this subject to leave theories aside for a time, and to deal with simple facts.

What is fetishism as it is found still surviving among savage tribes in our time? What are the objects of worship to which we apply the name of Fetish?

It would take a volume to name and describe the Zulu's superstitions and give account of his religious views and practices. His superstitions are well nigh numberless. If a turkey-buzzard lights near a tent, something will happen. For one of these birds to be caught in a snare is a bad omen. The man who kills one of them will die. If a cock crows in the early part of the night, some of the people or cattle will be sick or die. Feeding dogs on the beaks and claws of birds will make them fierce and swift for the chase. To wear the claws of birds or beasts or small horns of cattle about the neck will make a man courageous and give him prowess. Bits of bark, roots, or bones suspended from the neck will protect a man against poison, lightning, or the designs of an enemy. In the virtues and uses of charms, amulets, love potions, incantations, the African has great faith. Throughout Africa the curiously endowed objects known to us as fetishes are found to be of great variety, embracing amulets and charms worn about the neck, and consisting of tiger's teeth, serpent's fangs, stones washed into unusual forms, curious shells, bits of wood carved in fantastic fashion, etc. In Asia a passage from the Veda incased in a frame of transparent horn, or a potent verse of the Koran, or a line from the Avadana, is supposed to be powerful in driving away evil influences; in Africa a stone or rock of fantastic shape at the door of a hut, or a skull hung above its lintel; in America a totem raised on a scaffold by some Indian tribe—all these are virtually fetishes, since they are arbitrarily chosen objects to which is attached some supernatural power. As a rule they are not supposed to be divine in or of themselves, but rather to embody a divine influence of a mysterious and somewhat spiritual character.

The fundamental idea is that of an indwelling power that is concentrated and peculiar. This point may be illustrated by popular superstitions which still exist among civilized nations. The horseshoe has in itself no more efficacy than any other object, but in that peculiar position it is supposed to embody a lucky influence. Certain coins or rather sacred keepsakes, carried in the pockets or worn upon the person, are sometimes supposed to be attended by mysterious influences. No individual member of a group of thirteen persons embodies any supernatural influence, but there are many in civilized countries who fear the vague fatality of that total number seated at a table. In fact the number of objects, incidents, relationships, etc., etc., to which is ascribed a sort of magic influence, by the lowest of all lands, is very great.

In North China and in various other countries certain uncanny animals, like the weasel, the fox, or the serpent, are supposed to be attended by baleful influence.

Wherever found, fetishism gives opportunity to the witch-doctor or the diviner. This again opens the door to the most terrible cruelty, through the "smelling out," and the appeal to trial by ordeal inevitably leading to sacrifice of human life and legalized butcheries, as in Dahomey or other "ju-ju" centers of West Africa. In its mildest form the appeal to the witch doctor may still be seen among the Kaffirs and Zulus in South Africa. If one of the family, as the father, is taken sick, a divination is sent with a cow or other present to the inyanga, or medical priest, to inquire what is the matter...
Indeed, many remedies are mere fetishes, and "itments. A certain medicine may have been out with a message f,om the divinities to the of these performances the priest always comes. the gods will be appeased, and the sick man get well. neighbors gather, the beef is roasted and con­
gress, and in the morning the people pro­
the night, and in the morning the people pro­
ction for entering upon any particular enterprise.

The absurd and wide-spread superstition

So far from fetishism representing always the first stage of religious development, and that only, it proceeds side by side with higher forms of religion and intermingle with them. Many of its objects supposed to represent supernatural power have sprung up long after the higher faith was entertained.

Fetishism abounds in China. India, Burma, and Ceylon, in spite of the teachings of Confucius and Gautama. It has really more prac­
tical influence with the people than all the so-called book religions of the East. A distinguished civilian of Ceylon has declared that nine-tenths of the inhabitants of that country are really not Buddhists at all, but are the devotees of various superstitious fancies. The staple of the popular religion is devil-worship, or the fear of evil spirits. Pharmacy and superstition go hand in hand among savage races, and are rarely separated. In both cases there is supposed to be a connection between the objects chosen and the mysterious power of unseen spirits.

The theory of Comte that fetishism was the a westruck recognition of divine influence in all natural objects was incorrect; either any particular object be chosen, why one stone or tree or stream more than another? That which makes a fetish is the differential which distin­
guishes it from other objects and concen­
trates in it the divine and available power which is supposed to be caused by evil spirits. Pharmacy and superstition form a right the movements of armies or plan success­
ful expeditions.

THE ENCYCLOPEDIA OF MISSIONS

Fetish is

and what is to be done. The priest accepts the present and retires with the deputation to some nook near by, asks them to smite the earth with their rods, and so arouse the spirits, that he may hear what they have to say. After some of these performances the priest always comes out with a message from the divinities to the deputation that the sick man has neglected his religious duties; that it is a long time since he has slaughtered an animal in honor and for the benefit of these performances the priest always comes. If not, the doctor is denounced as a great humbug; he has got their cow, but they have got no good. And now they go with another cow to another ingle and go through the same process, until finally the man does either recover or die.

How have these ideas gained currency among men? If when found among civilized peoples popular superstitions notions are empirical, if they are the result of slow growth and an imag­
inary experience, as they certainly are, we may assume that fetishism among savage tribes has had a similar development. Men have chosen their fetishes as they have come to place their confidence in certain remedies for bodily ail­
ments. A certain medicine may have been selected by mere fancy at first, but if in repeated instances good results were supposed to follow, it gained currency. And so with the fetish. Indeed, many remedies are mere fetishes, and are given to drive away savage races, and are rarely separated. In both cases there is supposed to be a connection between the objects chosen and the mysterious power of unseen spirits.

So far from fetishism representing always the first stage of religious development, and that only, it proceeds side by side with higher forms of religion and intermingle with them. Many of its objects supposed to represent supernatural power have sprung up long after the higher faith was entertained.

Fetishism abounds in China, India, Burma, and Ceylon, in spite of the teachings of Confucius and Gautama. It has really more prac­
tical influence with the people than all the so­called book religions of the East. A distinguished civilian of Ceylon has declared that nine-tenths of the inhabitants of that country are really not Buddhists at all, but are the devotees of various superstitious fancies. The staple of the popular religion is devil-worship, or the fear of evil spirits. Pharmacy and superstition have gone hand in hand among savage races, and are rarely separated. In both cases there is supposed to be a connection between the objects chosen and the mysterious power of unseen spirits.

The absurd and wide-spread superstition known in China as Fung Shui is practical fe­
tishism; it is a supposed mysterious and super­

atural something, which inheres in certain objects, resides in certain localities, or hovers over the abodes of the living or the dead. It is a system of geomancy, and is especially related to the graves of the departed.

It is estimated that in South America there are 7,000,000 of people who still adhere more or less openly to the fetishes of their forefathers. In almost all nations, that which is unusual—a river issuing from a cave, a tree growing in a peculiar shape, a rock which the waters have worn into grotesque forms, certain deformities of the human body—is supposed to be attended by weird and preternatural influence. And the functions of witch-doctors, jugglers, medicine­
men, etc., are supposed to be directed to the proper management of these occult forces. The choice of lucky days or fortunate sites for build­
ings is supposed to belong to their province. Of the same class were the haruspices of the Romans, who inspected the entrails of animals or observed the flights of birds in order to direct the movements of armies or plan success­
ful expeditions.

The theory of Comte that fetishism was the a westruck recognition of divine influence in all natural objects was incorrect; either any particular object be chosen, why one stone or tree or stream more than another? That which makes a fetish is the differential which distin­
guishes it from other objects and concen­
trates in it the divine and available power which is supposed to be caused by evil spirits. Pharmacy and superstition have gone hand in hand among savage races, and are rarely separated. In both cases there is supposed to be a connection between the objects chosen and the mysterious power of unseen spirits.

So far from fetishism representing always the first stage of religious development, and that only, it proceeds side by side with higher forms of religion and intermingle with them. Many of its objects supposed to represent supernatural power have sprung up long after the higher faith was entertained.

Fetishism abounds in China, India, Burma, and Ceylon, in spite of the teachings of Confucius and Gautama. It has really more prac­
tical influence with the people than all the so­called book religions of the East. A distinguished civilian of Ceylon has declared that nine-tenths of the inhabitants of that country are really not Buddhists at all, but are the devotees of various superstitious fancies. The staple of the popular religion is devil-worship, or the fear of evil spirits. Pharmacy and superstition have gone hand in hand among savage races, and are rarely separated. In both cases there is supposed to be a connection between the objects chosen and the mysterious power of unseen spirits.

The absurd and wide-spread superstition known in China as Fung Shui is practical fe­
arrests attention, and are only too ready with the fancy to clothe it with divine influence. It is not strange that when they hear the voice of the thunder, or the roar of the distant waterfall, or the soughing of the waves in some dark, mysterious cave of the rocky shore, they are awe-struck. To them there is no true existing, there is nothing articulate or intelligible in the voices of nature which they hear, and they have learned no wisdom. Having no divine revelation, recognizing no Father above, and only bowed down with vague and mysterious fear, they are ready to accept any religious form. And to some designing doctor or juggler, witnessing their bewilderment and affliction, proffers his aid to relieve from drought or pestilence or famine, they must trust him; tho he has failed a hundred times they have no option. The totem on the scaffold, the rites about the necks, are equally a sham and have often failed; but they have no other resource. Generation after generation they grope on amid failures; and such is the imperative necessity that man shall put his trust in something beyond the range of his own powers, that fetishism has for ages been the resource for ages barren as Sahara, yet it still exists and must exist till the knowledge of God, the Father of all, and Jesus Christ, the only Savior, shall be made known. Fetishism is something too serious to be regarded with ridicule. It is the most pathetic illustration of human ignorance and desultion. To one who knows that man is made in God's own image and destined to worship and enjoy Him forever, no spectacle can be more melancholy than to see him embracing and abhorring faith a senseless amulet, a bleached bone, or a carved stick. As an appeal to missionary zeal, the fetishism of the world is pathetic and eloquent. It proclaims in strongest terms the desolation of a soul that was made to be a temple of the Holy Ghost, but is but too often wrenched out.

As to the manner in which the missionary should approach those who are under the thrall of fetishism we may quote from the remarks of Rev. Dr. George Robson, of the United Free Church of Scotland, at the Ecumenical Conference of 1900:

... The more one learns of these fetish religions, the more is the conviction deepened that they are not wholly inventions of wickedness and formal adherence to cruelty ... and underneath customs and practices in themselves utterly to be reprobated, there are to be found relics of truth, survivals of purposes and aspirations that, however misdirected, were originally pure. To some, it may seem as if the proper attitude of Christianity (over against these degraded religions) is one of simple antago-

ism. ... But this is not the manner of Christian society. It is not a dispensing of sacred mysteries, exhibiting the glory of Christianity as the final religion for all mankind; and to accomplish this in all directions is the function of the missionary enterprise. I venture to think that this department of missionary apologetic has been comparatively neglected, and that it is most desirable that it should receive immediate and systematic attention.

LITERATURE: Britton (D. G.), Religions of Primitive Peoples, New York, 1897; Lyall (A.), Natural Religion, in 1899; London, 1901; Schultze (F.), Fetishism, New York, 1901.

FZ: A city in Morocco, situated at an altitude of 1,300 feet, 36 miles east by north of Mequinez. It is one of the three residences of the Sultan, and is a very holy city, founded in 793. The tomb of its founder is a sanctuary for criminals of all kinds. It has a fine mosque. Station of the North Africa Mission (1858), with (1902) a missionary and his wife, 3 missionary women, 1 theological training class and a dispensary. It is also a station of the Gospel Mission Union (1894), with a missionary and his wife.

FIANARANTSOA: The capital of Betsileo, Madagascar, situated about 500 miles S. of Antananarivo. Population about 10,000. It is the center of the work of the London Missionary Society in Betsileo province (1868), with (1902) 10 missionaries, men and women; 435 native workers, men and women; 6 Sunday schools, 158 day schools, 2 boarding schools, 1 dispensary, hospital and 1,450 church members. Also a station of the Paris Evangelical Mission Society, to which in 1897 the LMS transferred one of the three districts of the town. It has (1902) 7 missionaries, men and women; 31 schools, 1 theological training class, 1 high school and 600 communicants. Station also of the Norwegian Mission.

FIFE BAY: A settlement on the southern coast of the eastern part of British New Guinea. Station of the LMS (1896), with 1 missionary and his wife and 16 native workers.

FIHAONANA: A town in Imerina, Madagascar, situated about 30 miles N. W. of Antananarivo. Station of the Paris Evangelical Mission Society, transferred from the LMS in 1897. It now (1902) has one missionary and his wife, 1 missionary woman, 45 native workers, 20 day schools, an orphanage and 450 professing Christians.

FIJI ISLANDS: A group of islands in the Pacific Ocean, lying about 1,000 miles north of New Zealand and 300 miles distant from the Samoan group on the northeast. It is composed of more than 200 islands, of which about 80 are inhabited. Viti Levu, area 4,250 square miles, is the largest, and Vanua Levu, area 2,600, the next in size. Suva, the capital, is on the southeast coast of Viti Levu. Including Rotuma Island the total area of the group is about 8,045 square miles.

There is very little level country. The greater part of the islands consists of alternating hills and valleys, the peaks sometimes rising to the height of four or five thousand feet. The climate, tho warm and somewhat enervating to Europeans, is not unhealthy. The supply of water is abundant, as there are numerous streams. Tropical vegetation grows here in great abundance and luxuriance. The aborigines, or Fijians proper, are classed midway between the Malay and the Papuan, or negro, type of races. The name Fiji was formerly synonymous with every cruelty and abomination that savages are capable of. Cannibalism was indulged in, sick and aged relations were killed, widows were not allowed to survive the death of their husbands, and slaves were slain to accompany their dead masters; yet hospitality and politeness characterized this savage race in a remarkable degree. The Fiji savages believed in a future existence, and in two classes of gods—a one immortal (a large serpent was the chief god of this class), the other, the spirits of heroes and chiefs. The priest spoke the will of the gods.

FIJI: A group of islands in the Pacific Ocean, lying about 1,000 miles north of New Zealand and 300 miles distant from the Samoan group on the northeast. The name Fiji was formerly synonymous with every cruelty and abomination that savages are capable of. Cannibalism was indulged in, sick and aged relations were killed, widows were not allowed to survive the death of their husbands, and slaves were slain to accompany their dead masters; yet hospitality and politeness characterized this savage race in a remarkable degree. The Fiji savages believed in a future existence, and in two classes of gods—a one immortal (a large serpent was the chief god of this class), the other, the spirits of heroes and chiefs. The priest spoke the will of the gods.

The one prevailing language, Melanesian, is one of simple antago-

nism. ... But this is not the manner of Christian society. It is not a dispensing of sacred mysteries, exhibiting the glory of Christianity as the final religion for all mankind; and to accomplish this in all directions is the function of the missionary enterprise. I venture to think that this department of missionary apologetic has been comparatively neglected, and that it is most desirable that it should receive immediate and systematic attention.
most degraded and to turn an entire people to the worship and service of the living God.

The complete Old and New Testaments are in circulation in the islands; day schools and colleges are maintained, and 1,000 churches, with an attendance of 100,000, are changing the moral circulation in the islands; day schools and colleges are also maintained, and 1,000 churches, with an attendance of 100,000, are changing the moral circulation in the islands. In the Fiji Islands there are now (1901) 2,247 native preachers and 31,422 native church members, besides 10,107 candidates for membership. In Rotuma, a solitary island lying between Fiji and the Ellice Islands, but politically connected with Fiji, there are 35 native workers and 460 church members. These churches are the fruit of the labors of the WMS, but are no longer connected with that Society, being in ecclesiastical relations with the Wesleyan churches in Australia.

When first discovered Fiji had a population estimated at 200,000, but diseases imported by European colonists have caused great mortality. In 1901 the population numbered 117,870. Of these, 94,397 were Fijians, 21,026 were Indians and Polynesians and 2,447 Europeans. Of the non-European population 91,526 habitually attended the Wesleyan churches and 9,338 the churches of the Roman Catholic Mission.

The complete Old and New Testaments are in Fijian. This has resulted in absorbing the time of a large number of missionaries with but measurably satisfactory results. Improved postal and banking facilities in even the countries most remote

Faithful and intelligent accounting is essential to the proper adjustment of the entire fabric of mission effort in its correlated departments. This can be best attained by sending to the field trained accountants whose entire time shall be given to the duties of mission treasurer and financial agent.

Estimates, Appropriations and Grants: These are the basis of all disbursements. The estimates are prepared on the field by the mission, and are intended to cover in detail the estimated expense of the coming fiscal year. The estimates should embrace the following items:

Cost of given work for the current year.

Estimated cost of the same work for the ensuing year.

Amount needed for additional or new work.

Estimate of field receipts from medical fees, tuition, subscriptions, press receipts, etc.

The estimates should closely follow the analysis of disbursements, and may be properly classified as follows:

**CLASS I.—MISSIONARIES ON FIELD.**

Sub-Class A.—Salaries.

B. —Children.

**CLASS II.—MISSIONARIES NOT ON FIELD.**

Sub-Class A.—Home Allowance.

B. —Children.

C.—Wives (if in United States).

D.—Freight.

E.—Travel.

**CLASS III.—NEW MISSIONARIES.**

Sub-Class A.—Outfit.

To be filled in New York:

B.—Travel.

C.—Freight.

D.—Salary.

E.—Personal Teacher.

**CLASS IV.—EVANGELISTIC.**

Sub-Class A.—Native Ministers.

B.—Licentiates.

C.—Bible Women.

D.—Other Helpers.

E.—Sunday Schools.

F.—Itinerating.

G.—Any other Work.

**CLASS V.—EDUCATION.**

Sub-Class A.—Boarding Schools.

B.—Day Schools.

C.—Colleges.

D.—Theological Seminaries.

E.—Other Schools or Work.

**CLASS VI.—HOSPITALS AND DISPENSARIES.**

Sub-Class A.—Assistants (Foreign and Native).

B.—Medicines, etc.

C.—Expenses.

**CLASS VII.—PROPERTY (IN USE).**

Sub-Class A.—Houses.

B.—Taxes.

C.—Insurance.

D.—Repairs.

E.—Attendants.

F.—Lights and Heating.

**CLASS VIII.—PROPERTY (NEW).**

Sub-Class A.—Cost of Land.

B.—Cost of Building.

C.—Alterations and Additions.

D.—Title Expenses.
THE ENCYCLOPEDIA OF MISSIONS

FIJIAN LANGUAGE

FINANCES

Class IX.—Mission and Station Expenses.
Sub-Class A.—Mission Meetings.
B.—Books, Printing, etc.
C.—Stationery, Postage, etc.
D.—Medical Allowance.
E.—Sanitariums.
F.—Personal Teachers.

Class X.—Mission Press.

All estimates excepting those for Classes I., II., and III. are properly made in native currency, and this requires careful consideration by the home office of the probable course of exchange to ascertain the equivalent in American currency of the amount asked for in the estimates.

The next step is a calculation by the Finance Committee of the probable amount of income available for the ensuing year. This can never be determined to a certainty. It depends upon the degree of spiritual interest in the home church and upon the financial conditions prevailing. An average of receipts for a decade, provided the conditions mentioned are favorable, is a safe basis for estimate. The amount of probable receipts being determined, an allotment, based on the mission estimates, can be made, which allotment is termed “The Appropriations” (or Grants) for the ensuing year. When communicated to the missions, these are the authorization for the making of contracts and the planning of the work. They should not be changed during the year, save as larger receipts than expected warrant an increase where enlarged operations are demanded and justifiable.

Disbursements: The disbursements under appropriations or grants call for great care on the part of the mission treasurer. The accounts with each station should at the end of each month show whether any class of expenditure has exceeded the appropriation or grant. Some excess disbursements must be expected owing to unforeseen emergencies, but these are offset by a rule requiring a reversion to the general secretary of all savings. A voucher system should be used in connection with all disbursements. This is not only a safeguard to the treasurer, but facilitates a satisfactory audit. Mission field receipts cover receipts from all sources except the home office of the mission. The mission treasurer, besides keeping a full set of accounts, must at the end of each month send to the home office a statement of materials or stock on hand at the close of the fiscal year. These statements are a safe record of the material or stock available for the work. Disbursements should be classified, and separate schedules given covering the various classes of work for which appropriations or grants are demanded and justifiable. The disbursements under appropriations or grants for the ensuing year. When communicated to the missions, these are the authorization for the making of contracts and the planning of the work. They should not be changed during the year, save as larger receipts than expected warrant an increase where enlarged operations are demanded and justifiable.

An item of no small importance is that of travel. The expenditure varies with the size of the mission board or society, the number of missionaries employed and the location of the missions and stations. This expenditure should be carefully safeguarded in order to avoid unnecessary cost whether from extravagance or inexperienced home office should be a bureau of information and should require a careful accounting in detail of all expenditures, for its audit and approval.

Mission presses, colleges, schools, hospitals and dispensaries should be placed on a business basis, each keeping a full set of accounts. The balance sheet sent to the home office should show clearly all items of receipts and the sources from which derived. The disbursements should be classified, and separate schedules given covering the amount put into the plant, with a full inventory of materials and to a considerable extent, fed from America and Europe; schools and hospitals must be equipped with modern appliances and the dispensaries supplied with large supplies of drugs and medicines. To the original invoices must be attached the cost of transportation, insurance, commission, etc. Shipment of drugs and medicines, payable to the field treasurer, drawn on the home office for payments in Europe or America, and, on the other hand, friends in America can procure money orders payable on the field. By this method insurance premiums, payments for purchases, and transference of gifts can be facilitated. The method is simple, but calls for care and precision in accounting. The factor of exchange enters into all charges and credit, and is frequently a matter of some complication owing to the wide fluctuations of a depreciated paper currency in the countries, and the absence of banking facilities capable of furnishing reliable rates at the time needed. The average rate at which mission bills of exchange were sold during the previous month is a fair basis for adjustment in the succeeding month. Loss in exchange, resulting from the sale of bills of exchange for authorized work under the appropriations or grants, is properly chargeable to the home office unless an item has been included in the estimates for that purpose. Under certain exceptional conditions it may be desirable to make for some missions all appropriations or grants in gold. In 1902 the peso of one of the South American countries, which had been worth 25c. gold, fell to a value of 2½c. In this case, unless special relief had been extended, the savings sent to the mission treasurer would have resulted in disaster to the classes of work for which appropriations or grants had been made in local currency. The serious consequences of a worthless or fluctuating currency have become so apparent that many countries are considering the adoption of a currency on the gold basis, and when this becomes general a serious embarrassment in mission accounting will be overcome.

An item of no small importance is that of insurance. The account varies with the size of the mission board or society, the number of missionaries employed and the location of the missions and stations. This expenditure should be carefully safeguarded in order to avoid unnecessary cost whether from extravagance or inexperienced.
the unnecessary accumulation of unsalable stock.
Outfit and freight allowances are properly limited to actual necessity, in each case a maximum limit being fixed as a precaution. Outfit lists should be carefully prepared and revised annually, and expenditures permitted only for such items as are recommended in the lists.
Freight allowance is designated in measured tons, and necessitates careful measurement of all freight at the point of shipment, excess above the allowance being a personal charge. As payment of charges to destination is rarely possible, all charges should follow the freight to the field, such amount as covers the tonnage allowance being charged back to the home office.

Real Estate Property: The value of property held by the leading boards or societies amounts to many millions of dollars, and these values are constantly increasing. The amounts needed for the purchase of land, erection of buildings, improvements and extensions, are usually included in the annual appropriations or grants. The value or cost of property should be shown set up on the books of the home office so as to appear in the annual statement and balance sheet of the board or society. The showing of such a large amount of invested funds gives a credit in business transactions appreciated by the bankers of the world who purchase mission bills of exchange or drafts.

Careful attention to this matter naturally leads to an intelligent investigation of land titles. The tenure of much mission property is still uncertain and insecure. There has been a great improvement in this regard during the past decade, and it is well to take advantage of the liberal tendency now shown by most governments in this particular.

Reports of Receipts and Expenditures: The success and efficiency of a system of accounting depends in the last analysis on the reports made to the home office. These should be sent quarterly and at the close of the fiscal year. The value of quarterly reports lies in the opportunity to correct errors and explain disputed or misunderstood items before the preparation of the annual report. These reports should show the following items:

1st. Receipts, being debit items.
   - Balance, Cash on hand first of year.
   - Balance Bills of Exchange or Drafts on hand first of year.
   - Bills of Exchange or Drafts received from Home Treasurer.
   - Drafts made upon Home Treasurer.
   - Charges by Home Treasurer (monthly statements).
   - Certificates of Credit issued.
   - Receipts on the field.
      - Contributions.
      - Rent.
      - Interest.
      - Sales.
      - Medical Fees.
      - Press Profits.
      - Civil Receipts.

2d. Disbursements, being credit items.
   - Disbursements under Appropriations or Grants, by stations.
   - Property Disbursements.
   - Outfits.
   - Freight.
   - Advances for travel.
   - Money Orders from Home Office.

Credits from Home Office.
Receipts on the field used in current work as authorized.
Balance of Cash on Hand.
Balance Bills of Exchange or Drafts on Hand.

The reports must be accompanied by schedules giving in sufficient detail the items which in the quarterly or annual reports are given in totals. The annual report in every instance should bear the certificate of the mission auditing committee. With such reports in hand the home office can determine the balance of appropriations expended, the balance of cash or negotiable bills in the hands of the mission treasurers, and the sums needed to complete fully the work of the year. They also furnish a reliable basis for the compilation of an annual report for presentation to the home constituency of the board or society.

The annual report of a mission board or society is incomplete and unintelligible without the presentation of a balance sheet. This, if accompanied by sufficient explanatory schedules, will furnish a report that will be appreciated by the laymen of the churches and will create a degree of confidence in the management that is essential to the best success.

FINNISH MISSIONARY SOCIETY (1859)
(Names in Finnish, Suomen Lahetyseura): Finland was the last northern land to become Christianized after a crusade of King Eric the Holy, of Sweden, under the Upsala Bishop Henrik, in 1157. Through Michael Agricola, Paul Junsten and other Finnish clergymen, the Lutheran doctrine was spread, and the whole Finnish people became Lutheran Protestants in the 16th century, but not till two centuries had elapsed was there any missionary interest. In 1742 a carpenter named Nyberg met with some Moravians at Copenhagen, and later went to Herrnhut and was sent out under the Moravian Church to Surinam, where he died. During 1820-1839 a religious movement spread over all Finland, and many clergymen, especially in Osterbotlen, wished to follow the example of the motherland, Sweden, which in 1835 founded its first missionary society. The most zealous of these was Jonas Lagus, who bought a house with the intention of opening a training school for missionaries, training being deemed an essential preliminary to good service. He asked permission of the government to found a missionary society, but all religious work not ordered in the ecclesiastical laws and manual was suspected and his request was refused. Later Lagus and other priests were summoned before the courts for placing collection boxes for missions before their doors. At this time Pastor Rainquist, of Sordavala, was also an earnest believer in missions, and was collecting funds, which he handed over to the Swedish Society. He also wrote books and pamphlets, which had much to do in keeping alive the missionary interest.

In 1857 it was proposed by the Bishops of Finland that a solemn feast should be held in commemoration of the introduction of Christianity 700 years before. Emperor Alexander II. approved, and ordered a jubilee on the eighteenth of June. All Finland was aroused and some young priests seized this propitious moment to propose the formation of a missionary society. A petition, signed by 200 persons of all classes, was presented to the Imperial Senate of Finland. In 1858, and after consultation with the Emperor Alexander II., the Senate gave its approval
to the plan, and prescribed that the 16,000 Finnish marks (34,200) given at the Jubilee feast should be turned over to the new society, and that in memory of this feast a collection for foreign missions should be taken on one Sunday in each year. Directors were chosen in Helsingfors for the new organization, and in memory of the first Christian preacher, Bishop Henrik, January 19, 1859, was chosen as the day of the first general meeting, and the name "Finnish Missionary Society" was formally adopted. During the first years of its existence the Society worked through the Leipsig Missionary Society, the Gesner Society, and the Hermannsburg Society of Pastor Harms; and it maintained a missionary from 1861 to 1867 in connection with the Gesner mission in Chota Nagpur, India.

In 1860 the first Finn presented himself to be trained for foreign work, and the first two scholars, Jurvelin and Malmström, were sent to Hermannsburg. In 1862 a missionary training school was opened at Helsingfors, and nine young men were chosen for a six years' course. The funds of the Society had reached the sum of 147,000 marks, and missions under Finnish management were seriously contemplated. That year Dr. Carl Hugo Hahn, a Rhenish missionary from South Africa, gave an account in Helsingfors of a journey he took to the Ovambo country among the Hereros, what is now Southern Southwest Africa. The Finnish people became deeply interested, and after he had made a second journey, in 1863, sent 1,200 marks to Hahn's school for the education of native preachers among the Hereros. Two years later Hahn sent the Society his journal account of a tour to Ovamboland, and with it a strong appeal that they undertake work in that region. Accordingly an extra meeting of the members of the Society was held, and it was decided that in 1868 five of the mission scholars and three colonists should be sent to establish a mission in Ovamboland, arrangements being made with the Rhenish Society to divide the field. The Finnish missionaries remained for a time in the Rhenish Mission Institute in Barmen and at their stations among the Hereros there, but might become accustomed to the climate and people, and study the language with Hahn in Otjiuanglue.

Missions: Ovambo Mission. The Ovambos people inhabit the lands along the border between German Southwest Africa and the Portuguese Colony of Angola. The southern tribes of Ovambos belong to the German Colony, while the northern are under Portuguese jurisdiction. The first Europeans to visit the country were Mr. Galton from England and Mr. Andersen from Sweden, who traveled in this region in 1851. Several exploring tours were subsequently made among the Ovambos by Dr. Hahn of the Rhenish Society, and, in 1869, the first Finnish missionaries were sent out. At first they remained in Hereroland with Dr. Hahn, studying the Herero language, whiambo, and the Ovambo; and learning the veteran missionary the best methods of work. In 1870 they established a station at Omondonga, receiving a cordial welcome from king and people. Four of their number remained here to carry on the work, while the others pushed on; and by the following year five stations had been established among four Ovambo tribes. In 1872 the resident Portuguese stirred up the natives against the missionaries resident among the northern tribes, and during the succeeding years sickness and death decimated the working force, so that during 1878-1882 the Finnish Mission consisted of but three stations and four missionaries. The first convert of Ovamboland was a young girl whom one of the missionaries took to Finland, where she was baptized in 1876. Subsequently she returned to her native land and married a native evangelist. In 1880 four young men were converted and went to the Rhenish missionaries in Hereroland to be baptized, so as to escape the hostility of their own people. The first baptism in Ovamboland was in 1883, when nine young men were received into the Church. It was noticeable that more converts were made in times of famine or sickness, when conjurers and sorcerers failed to provide remedies. In such times of trouble the people turned to the missionaries.

After the death of King Kambonda, in 1885, there were political disturbances which threatened to break up the work. His immediate successor was friendly to the missionaries, but unfortunately he lived but a short time, and at his death the tribes under his jurisdiction were divided into two parts. The two rival factions were at war for many years. The king of one of these rival kingdoms, in which part of the mission stations were located, was friendly to the missionaries, and in 1888 the missionaries in the other section were compelled to flee, abandoning their stations. In 1889 an unsuccessful attempt was made to reopen one of the old stations; but sickness and death had so reduced the mission force that in 1890 there were but two workers in the field.

From 1890 to 1900 the tide turned in favor of the Christians. Hahn sent out to meet the demand of the natives for Christian teaching. The chief, one by one, ceased their opposition; old stations were reopened and new ones established. The people began to manifest great confidence in the missionaries. The German occupation of the southern part of the Ovamboland territory has greatly improved the political situation among the tribes. In 1903 work was resumed among the Ookuambi and Oungandjera tribes. A printing press has been established; the New Testament and part of the Old Testament have been translated, as well as other Christian books and leaflets.

There are (1903) 5 stations, 15 outstations, 11 Finnish missionaries and 39 native helpers; 1,235 baptized Christians, of whom 435 are communicants, and 1,100 scholars in the various educational institutions.

2. China (1901): A station was established in 1901 in the northern part of the Province of Hunan, at the market town Chen-shu, a region previously untouched by the missionary. The Finnish missionaries who founded the station studied the language and peoples with the older missionaries at Hankow and Changteh. So far the Finnish Mission in China consists of this 1 station with (1903) 2 missionaries.

Firozabad: A town in the United Provinces, India, situated 20 miles E. of Agra. Population (1891), 15,300, of whom 8,506 are Hindus and 4,500 Mohammedans. Station of ME, with (1902) 8 native workers, men and women; 12 Sunday schools and 380 professing Christians.

Firozpur: A city in the Punjab, India, situated on the old high bank of the Sutlej River, 32 miles from its present bed and 47 miles S. E. of Lahore. It is capital of a populous district,
in which are hundreds of villages. The climate is regarded as exceptionally healthful. The population is (1891) 50,400, of whom 23,000 are Hindus and 22,000 Mohammedans. Station of the PN (1882), with (1893) 4 missionaries, men and women, and one of them a physician; 2 dispensaries and 2 hospitals.

FISKE, Fidelia: Born at Shelburne, Mass., May 1, 1816; in 1831 was a pupil and then teacher at Mt. Holyoke Female Seminary with Miss Mary Lyon. She embarked March 1, 1843, for the Nestorian Mission of the ABCFM at Urmiya, Persia, in company with Mr. and Mrs. Perkins and Mar Yohannan (returning to Persia). Miss Fiske’s work was in the girls’ school, and it was upon this school that she left the impress of her consecrated life. Not only the pupils but the women of the neighborhood learned to look to the school and to Miss Fiske for spiritual instruction. After laboring there 14 years impaired health compelled Miss Fiske to return to the United States in 1858.

She was usefully employed in the United States, giving addresses on missions, and taking part in revival work at South Hadley. She died in Shelburne, Mass., July 26, 1864.

FLETCHERVILLE: A town in Griqualand East, Cape Colony, S. Africa. Station of the South African Wesleyan Methodist Missionary Society, with (1900) 23 native workers, 9 outstations, 4 preaching places, 7 day schools and about 2,000 professing Christians.

FLORIDA ISLAND. See Solomon Islands.

FLORIDA ISLAND LANGUAGE: Belongs to the Melanesian family and is one of those purely local languages without affiliation to others which seem to be so numerous in the western Pacific. It is used by the people of Florida Island (see Solomon Is.) and has been reduced to writing by Roman letters have been used for the purpose.

FLORIANOPOLIS: A town and capital of the Province of Santa Catherina, Brazil, South America; situated on the west side of the island of S. Catherina, 246 miles N. E. of Porto Alegre. Population (1890), 15,000, but rapidly increasing by immigration of Germans, Italians and Syrians. Station of the PN (1860), with (1901) 2 missionaries, 7 outstations, 1 Young People’s Society and 35 professing Christians. Formerly called Desterro.

FOOCHOW. See Fu-chau-fu (Fo-kien).

FOREIGN CHRISTIAN MISSIONARY SOCIETY (Disciples of Christ; 1875): As early as 1849 foreign mission work was carried on by the Disciples of Christ, but the missionary society was not formally organized until 1875. According to the constitution the society is composed of life directors, life members, annual members, and representatives of churches, Sunday schools, Sunday school classes and missionary associations. Its officers are a President, five Vice-Presidents, Secretary, Corresponding Secretary and a Treasurer, elected annually. These officers constitute an executive committee, and, with the life directors, a board of managers.

The missions of the Society are as follows:

1. Scandinavia: The first intention of the new Society was to send missionaries to the heathen lands, but in 1876, a young Dane who had been converted in this country was, at his own request, sent to Denmark as a missionary. As he had opportunity he visited Norway and Sweden. From this beginning the work has grown till now there are (1903) 13 stations, 5 ordained missionaries and 11 churches, with 659 communicants.

2. Turkey: In 1879 a young Armenian convert in America was sent to Turkey at his own request, locating at Constantinople. In 1897 there were 17 stations and outstations, 4 missionaries and 23 native helpers, 18 churches, with 603 communicants. These results after twenty-one years of labor seemed to the Society “very meager and disappointing,” and believing that Turkey as a foreign mission field is both limited and precarious, the executive committee recommended the Society to withdraw from the field as soon as practicable.

3. India: In 1882 work was begun in the Central Provinces of India with a station at Harda. In 1885 Bilaspur was occupied, Mungeli in 1887 and Damoh in 1895.

Evangelistic tours are made through the outlying districts and educational, industrial and medical work is carried on. Much time has been devoted to famine relief. A boys’ orphanage has been established at Damoh, where the inmates are trained to be self-supporting; boy carpenters, weavers, shoe makers, farmers, blacksmiths, etc., are doing much work for the mission. A leper asylum is carried on, the finances coming from the Mission to Leper in India and the East. There are (1901) 4 stations and 6 outstations, 22 American missionaries and 64 native workers, 5 churches, with 411 communicants, 9 day schools, 1 orphanage; total under instruction, $127.68.

4. Japan: A mission in Japan was established in 1853. The first station was in the district of Akiti. The work is chiefly evangelistic, the beginning has been made in educational work. There are (1901) 7 stations, 23 outstations, 13 American missionaries, 21 native workers, 13 churches, with 832 communicants, 15 day schools.

5. Africa: A station has been established at Bolengi, on the Congo. There are 7 missionaries (two of whom are physicians), and a very promising beginning has been made in medical, educational and industrial work, while evangelistic tours are made into the surrounding country.

6. Philippine Islands: In 1900 work was begun in the Philippines, special grants being made for this purpose, and a station was established at Manila.

In Cuba a station has been established at Havana, where preaching services are held in English and Spanish, and Sunday schools and day schools are doing much work for the mission.

7. Hawai: In the Hawaiian Islands work has been begun at Honolulu, in a district peopled by Hawaiians, Portuguese, Chinese and Japanese.
The purpose is to work through the local church rather than build up a separate work. Two new missions have been begun; Sunday schools and day and evening schools established.

This Society also conducts missionary work in England and has missionaries in readiness to press into Tibet when the way shall be open.

**ORGAN:** Missionary Intelligence, monthly Cincinnati, O.

**FORMAN, Charles William:** Died at Kussaul, India, August 27, 1894. Dr. Forman was a native of Kentucky, a graduate of Princeton Theological Seminary, and at the time of his appointment as a missionary a member of the Ebenezer Presbytery. He sailed for India, August 11, 1847, as a missionary of the American Presbyterian Board (N), while its mission work in that vast empire was still in its infancy. In 1846, at the close of the first Sikh war, the mission had crossed the Sutlej and planted a station at Jalandhar, within the Punjab. Soon after Dr. Forman's arrival in India, the annexation of the Punjab by the British Government, and the Board of the Board of Administration which included the two Lawrence, Henry and John, opened the way for the occupation of Lahore, the capital of the new province, and the late Rev. John Newton and Mr. Forman were appointed to the station. It was in another form this center of influence that Dr. Forman did his missionary work. That work was varied as necessity or opportunity required. It consisted mainly, perhaps, in the organizing and superintending of a system of schools under mission control where the Word of God was habitually taught and from which thousands of young men have gone forth with at least an intellectual conviction as to the truth of Christianity, while it is believed that not a few have felt its regenerating power.

Dr. Forman was universally beloved. The devoutness of his spirit, the simplicity of his life, the strength of his character, the breadth of his views and sympathies, his indefatigable zeal, his grasp of the situation in India, and, above all, his interest in and affection for the native population of all classes won for him universal esteem. During the early part of his illness, when a rumor of his death was circulated, a native population of all classes won for him universal esteem.

No missionary work has as yet been attempted among the wild savages of the eastern part of the island.

**FORMOSA:** An island lying between latitude 21° 53' 30" north and latitude 25° 33' north, about 90 miles from the mainland of China, from which it is separated by the Straits of Formosa. Its total length from north to south is 235 miles, and its greatest width is about 80 miles. Through the island from N. to S., but nearer the eastern than the western coast, runs a chain of mountains. The coasts are rocky and uninviting, with few good harbors. The climate is in general more salubrious than that of the opposite mainland.

The inhabitants are of three classes—the Japanese and the Chinese immigrants, the civilized aborigines, and the uncivilized ones. Some of the Chinese are from the Amoy district and some are Hakka from Swatow. Those of the aborigines who have adopted in part the customs of the Chinese are called Pe-pa-hwan, while the untamed savages are called Che-hwan.

These aborigines are partly of the Malay stock, and are broken up into many tribes and clans. Physically they are of middle height, muscular and broad-chested, large head, broad nose, and large mouth. Their language possesses no written characters, and there are many dialects. In the district of Posia alone, eight entirely different dialects have been recognized. The social condition of the natives is very low. The entire population of the island, according to the census of 1898, is 2,705,906.

The island of Formosa was known to the Chinese at an early date. In 1480 emigration to it was recorded. In 1624 the Dutch built a fort, Zealandia, at the place where now stands Taiwan, and their power was maintained for thirty-seven years. In 1682 the power of the Emperor Kang Hi was recognized, and Formosa formed a part of the Chinese Empire, the outbreaks on the part of the aborigines were common until 1895, when it was ceded to Japan. The treaty of Tientsin, 1880, opened it to European commerce, and Formosa tea is now found the world over.

With the cession of Formosa to Japan, the Japanese came to the island in large numbers. The officials show a sincere desire to maintain a righteous administration, and missionaries are now subject to the Japanese regulations.

The Presbyterians of Canada, under the consecrated labors of Mackay, accomplished much for the northern third of the island, and the Presbyterians of England have brought great blessings to the southwestern and central sections. Mr. Mackay, aided by a single foreign colleague and about 80 native assistants, gathered in his churches nearly 2,000 communicants, while his schools had in training 1,314 pupils, and Oxford College 43 students. An interesting feature of the situation is the presence of a number of evangelists sent by the Christian churches in Japan, and supported by them, to labor among Japanese in Formosa.

No missionary work has as yet been attempted among the wild savages of the eastern part of the island.

**FORMOSAN LANGUAGE:** The language of the aborigines of Formosa belongs to the Malay family of languages. It was reduced to writing by a Dutch missionary in 1655, and has been written in Roman letters by English Presbyterian Missionaries.

**FORSYTH, Nathaniel:** The first missionary of the LMS to India. Of very few missionaries is so little known. In the last decade of the 17th century a certain landowner in Scotland named Holdane became fired with missionary zeal for the conversion of India, sold his magnificent estate, and proposed to devote his substance to this object, going himself and taking other workers with him. The British Government, however, could not tolerate any such schemes, and refused the enterprise so persistently that the mission was abandoned.

One of the party, Mr. Forsyth, then offered himself to the LMS, was accepted, and went out to India as a missionary but without salary, supporting himself from his own property. He landed at Calcutta in the latter part of 1780, while Carey was still in the deserts of his fruitless Indigo culture. He promptly learned that he would be expelled from India if he stayed in
CALGARY: A town in Alberta, Canada, situated on the right bank of the Bow River. Station of the CMS (1880), with (1902) 1 missionary and 142 professing Christians.

FORT AICHAL: A settlement in the territory of Athabasca, Canada, situated on the N. side of Athabasca Lake, 92 miles S. by E. of Calgary, at an altitude of 2,400 feet. Station of the CMS (1888), with (1903) 3 missionaries, 1 a physician; 2 native workers and 200 professing Christians.

FORT ALEXANDER: A settlement in the eastern part of Manitoba, Canada; situated at the entrance of Winnipeg River into the lake of the same name, and 65 miles N. E. of Winnipeg. Station of the CMS (1864).

FORT AIJAL: A military post among the Lushai Hills in Southern Assam, British India. Station of the Welsh Calvinistic Methodist Missionary Society, with (1900) 2 missionaries.

FORT ALEXANDER: A settlement in the eastern part of the Ungwa peninsula, Labrador. Station of the CMS, with (1902) 1 missionary and his wife, 3 native workers, and 80 professing Christians.

FORT AYSHPEWAN: A military post and settlement on the N. side of Athabasca Lake, Athabasca, Canada. Station of the CMS (1867), with (1902) 1 missionary and his wife, and 1 native woman worker.

FORT CHURCHILL: A station of the Hudson Bay Company, situated in the territory of Kewatin, Canada, at the mouth of Churchill River, in a region whose mean annual temperature is 14.2°. Station of the CMS (1886), with (1902) 1 missionary and his wife, 1 native worker, 1 day school, and 798 professing Christians.

FORT DAUPHIN: A town on the S. E. coast of Madagascar, which has a somewhat important trade in India rubber. Station of the United Norwegian Lutheran Church of America, with (1900) 14 missionaries, men and women; 31 native workers, men and women; 16 outstations, 16 day schools, 3 high schools, and 100 professing Christians.

FORT GEORGE: Station of the Hudson Bay Company on the east side of James Bay, in the W. part of the Ungava peninsula, Labrador. Station of the CMS, with (1902) 1 missionary and his wife, 3 native workers, and 2 day schools.

FORT HAKA: A Government port among the Chin Hills in W. Burma, situated about 130 miles N. of Paukoku. Station of the ABMU (1859) with (1902) 1 missionary, 1 physician, 2 wives of missionaries, 4 native workers, and 2 schools.

FORT McLEOD: A town in Alberta, Canada, situated 92 miles S. by E. of Calgary, at an altitude of 2,400 feet. Station of the CMS (1880), with (1902) 1 missionary, 2 native workers, 1 dispensary and 80 professing Christians.

FORT MACPHERSON: A settlement in the northwest territory of Canada, situated on Peel River about 125 miles from its mouth in Mackenzie Bay. Station of the CMS, with (1902) 2 missionaries and their wives, 6 native workers, men and women; 1 day school, and 503 baptized Christians.

FORT NORMAN: A settlement in the northwest territory of Canada, situated on the Mackenzie River, at the junction of the Great Bear River and about 60 miles W. of Great Bear Lake. Station of the CMS (1871), with (1902) 1 missionary and his wife, 3 native workers, 1 school and 200 professing Christians; all the people having abandoned heathenism.

FORT PEDIE: See PEDIE.

FORT PITT: A settlement in the province of Saskatchewan, Canada, situated on the Saskatchewan River, about 90 miles N. W. of Battleford. Station of the CMS (1888), with (1902) 1 missionary and his wife (who is a physician), 1 school, a dispensary, and 253 professing Christians.

FORT SIMPSON (Canada): A settlement in the territory of Mackenzie, Canada, situated at the junction of the Liard and Mackenzie Rivers. Station of the CMS (1888), with (1902) 1 missionary and his wife.

FORT SIMPSON (British Columbia): A town at the N. end of the Taimson Peninsula, British Columbia, with a fine harbor. Station of the SPG, with 1 missionary.

FORT SMITH: See KEHRUKO.

FORT VERMILLION: A trading post in the territory of Athabasca, Canada, situated on the right bank of Peace River. Station of the CMS (1876), with (1902) 1 missionary and 142 professing Christians.

FORT YUKON: A military station in Alaska, situated on the Arctic Circle, at the mouth of the Porcupine, on the Yukon River. Station of the P. E. with 1 missionary and his wife and 500 baptized Christians (Indians and Eskimos).

FOTUNA. See NEW HEBRIDES.

FRANCKE, Aug. Herm.: The missionary movement of Pietism, which arose in Germany during the 18th century, produced remarkable results. Baron von Leibnitz, a philosopher of world-wide fame, came forward at this time as a vigorous advocate of missions; and in his celebrated Novissima Sinica and in the charter of the constitution of the Berlin Academy of Sciences, he embodied his views of the subject. The book of Leibnitz came into the hands of Francke, who addressed the author a letter in reference to it. That letter is not extant; but we have the interesting answer which Leibnitz wrote, which shows his genuine interest in the cause of missions. The missionary ideas of Leibnitz bore fruit in Francke and helped toward the first missionary activity of Protestant Germany. "Pietism united itself with missions, and this union alone enabled missions to live." Indeed, Lutheran Pietism was the spring and support of missions; and Francke was the real leader in the matter.

The a pious layman, Baron von Weizs, in the 19th century tried to convince his fellow-Christs of their duty to send the Gospel to the heathen, it was not until the beginning of the 19th century, under the leadership of Zinzendorf, Francke and Speyer, that a real impulse was given to this great cause; but within the space of thirty years, despite many difficulties, seven large missionary societies were founded. The pioneers
of evangelical missions in India were sent out by Frederick IV. of Denmark. These were the pupils of Francke at Halle; and several of their successors were also Germans and Pietists.

FRANZPONTEIN: A settlement in German Southwest Africa, about 200 miles N. by W. from Walfish Bay. Station of the Rhenish Missionary Society among the Herero-speaking tribes, with (1903) 1 missionary and his wife, 2 native workers, men and women; 4 day schools, and 400 professing Christians.

FRAUENVEREIN für Christliche Bildung des weiblichen Geschlechts im Morgenlande. See GERMANY; MISSIONARIES THERE IN.

FRAZER, Edward: A negro slave born in Barbados, W. L., 1798. He was taught to read and write by his mistress, joined a Methodist Church in 1819 and was appointed missionary of the WMS to Dominica in 1828, his master giving him manumission that he might accept the appointment.

FREE BAPTISTS: General Conference of (1833): The Foreign Missionary Society of the Freewill Baptists owed its organization to a correspondence between Elder John Russel, leader of the Freewill Baptists, and Revs. James Pegg and Amos Sutton, two of the earliest missionaries sent to India by the General Baptists of England. Their letters were published in the Morning Star, and resulted in the formation of the Society in "the old meeting house" at North Parsonsfield, Maine, in 1832, and in January the new organization was incorporated under the laws of the State. In 1835, after three years, the income of the Society amounted to $2,660; with this sum they sent their first four missionaries to India, Mr. and Mrs. Noyes and Mr. and Mrs. Phillips sailing from Boston in September of that year, arriving in Calcutta after a voyage of one hundred and thirty-six days. They at once proceeded to Cuttack, a station of the General Baptist Society of England, where they remained while acquiring the language. In January, 1837, they established a station at Sambalpur, in the hill district of Orissa, but the location proving unhealthful, it was abandoned the following year. In 1838 the General Baptists surrendered to them their work at Balasore, the northern district of Orissa. A station was established and the foundations of permanent missionary work were laid. From this beginning there has been steady growth. Much work is done among the Santala, and schools for them have been established throughout the jungles, taught by natives who have been trained in the mission schools. From 1848 to 1850 a school was sustained at Balasore for victims destined for human sacrifice who had been rescued by the British Government. In 1840 medical work was begun by Dr. Bachelor, who established a dispensary at Balasore. In 1862 this was transferred to Midnapur. That year a printing press was established, which has not only been self-supporting but of late years has contributed to other branches of the work. In 1865 Zenana work was begun. Schools have been established, orphanages opened, and Sunday schools and Christian Endeavor Societies organized. Book rooms have been maintained, and special attention is paid to the circulation of Christian literature. From 1833 to 1882 the name Free Baptist Foreign Missionary Society was retained, but the latter year the title was changed to the General Conference of Free Baptists. There are (1902) 14 principal stations and 31 missionaries, 12 churches with 861 communicants, 76 Sunday schools, with 3,463 scholars, 32 schools through all grades, with a grand total of 3,555 under instruction; total contributions 1,408 Rs.

The Free Woman's Missionary Society, organized in 1875, cooperates with the General Conference of Free Baptists. It has a separate organization, sends out and supports missionaries and teachers, especially for women and children, and establishes schools. The United Society of Free Baptist Young People, established in 1888, is auxiliary to the General Conference of Free Baptists.

Headquarters: Auburn, R. I.

FREE CHURCH OF SCOTLAND MISSIONS. See SCOTLAND; UNITED FREE CHURCH OF.

FREEMAN, John Edgar: Born in the City of New York, December 27, 1809; was apprenticed at the age of fifteen to a trade; in 1829 publicly professed his faith in Christ, and in the same year decided to study for the ministry; purchased the last year of his time for $80; graduated at Princeton College 1835, at Theological Seminary 1838; was ordained July 12, 1838, by Presbytery of Elizabethtown; sailed for India October 12 same year, as a missionary of Presbyterian Board of Foreign Missions; was stationed at Allahabad, having charge of orphan boys and girls until the death of Mrs. Freeman in 1849. In impaired health, he visited the United States April 28, 1856, with his two children. In 1851 he returned, with his second wife, and was stationed at the time at Mainpuri for six years. In 1856 he removed to Fatehgarh. At the breaking out of the mutiny he attempted with others to reach Allahabad for safety, but was made a prisoner by the Sepoys and put to death at Cawnpur by order of the rebel chief, Nana Sahib, June 14, 1857.

FREE METHODIST CHURCH. General Missionary Society (1885): In the latter part of 1880 the Rev. E. F. Ward and his wife went out as foreign missionaries, partly at their own expense and in part supported by the Free Methodist Church, and were recognized as its missionaries. Their going was the immediate cause of the formation of the General Missionary Society, which was incorporated in June, 1885. The organization consists of a president, secretary and treasurer; a board of five directors, meeting each month for the transaction of business; a general board of sixteen members, advisory to the board of directors, composed of the four general superintendents, who are ex officio members; the general secretary and treasurer; seven members, representing the missionary districts of the church, elected by the General Conference, and three women, representing the Woman's General Foreign Missionary Society, and nominated by it, though elected by the General Conference. The missions of the Society are as follows:

1. Africa (1886-1905): This was the first mission contributed to by the Society sent to Africa. Mr. and Mrs. R. R. Shemeld, arrived at Durban in June, 1805, and went inland to Estcourt, where they opened a mission which was continued for some years and then abandoned.

The latter year the title was changed to the General Conference of Free Baptists. There are (1902) 14 principal stations and 31 missionaries, 12 churches with 861 communicants, 76 Sunday schools, with 3,463 scholars, 32 schools through all grades, with a grand total of 3,555 under instruction; total contributions 1,408 Rs.

The Free Woman's Missionary Society, organized in 1875, cooperates with the General Conference of Free Baptists. It has a separate organization, sends out and supports missionaries and teachers, especially for women and children, and establishes schools. The United Society of Free Baptist Young People, established in 1888, is auxiliary to the General Conference of Free Baptists.

Headquarters: Auburn, R. I.
ness and death. In 1890 the work was extended to Natal and in 1897 to Johannesburg.

There are (1903) 6 stations and 5 outstations, 15 American missionaries and 30 native helpers, 4 churches with 250 communicants, and 4 day schools.

2. India (1885): The first workers to be sent to India were Misses M. L. Rauf and Julia Zimmerman; other missionaries have been sent out from time to time. Schools and orphanages have been established, and churches and Sunday schools organized.

There are (1903) 2 stations and 1 outstation, 9 American missionaries and 13 native workers, 1 church with 80 communicants, 2 schools and 2 orphanages.

3. Japan (1885): Work was commenced by a Young Japanese who had been educated in America. The special field has been the island of Awaji, the work has been done in Osaka, with the object of making it the headquarters of the mission.

There are (1903) 3 stations, 4 American missionaries and 6 native workers, and 2 churches with 51 communicants.

4. Norway (1882): Work was begun by three missionaries, but after a few years the mission was discontinued.

5. San Domingo: Work was begun here in 1893 and continued till 1899, when the field was abandoned.

Headquarters: 14-16 No. May St., Chicago, Ill.

FREETOWN: Capital of the British Colony of Sierra Leone, W. Africa. It is situated on the south side of the estuary of the Sierra Leone River. It is enclosed landward by encircling mountains. It has pure water and the climate is equable, but the town partly overlooks the marshes of Kroo Bay. It has a good harbor and is the greatest seaport in West Africa. The population is 34,500. The Europeans, half-castes, and immigrants occupy distinctive quarters of the town. The Church Missionary Society commenced its work in 1816, which is now conducted with the expenditure of making it the headquarters of the mission.

There are (1903) 3 stations, 4 American missionaries and 6 native workers, and 2 churches with 51 communicants.

The region, between the ocean and the Congo, and extending from 5° south latitude to 3° north latitude, consists of a series of terraces rising from the coast and skirted by chains of hills which vary from 1,000 to nearly 6,000 feet in height. It is well watered. The Kivu has a total course of 360 miles, the Ogowe 720, and the Gabun an estuary 40 miles long and 7 broad. There are two rainy seasons, September to December, and then, after an interval of fine weather, the rain sets in until May. During the hottest days in March and April the thermometer varies from 78° to 93° Fahr., and in the cool months of July and August 73° to 86° Fahr. The climate is insalubrious, both on account of its humidity and the poisonous exhalations from the morasses. The soil is sandy, and vegetation consequently not as rich as the abundance of moisture would lead one to expect.

The original inhabitants have been largely displaced by immigrants from the interior. The Mpungwe, of the Gabun, the remnant of a once powerful nation, are intelligent but frivolous. The Benga or Corisco are related to the Bakale, south of the Ogowe. These are now traders, packmen, etc. The Bangwe dwell between the upper and lower course of the Ogowe. The Fangs, who occupy most of the region east of the Gabun and north of the Ogowe, are two groups constantly at war with each other. Their language is light-complexioned, muscular and vigorous, the most energetic and industrious of all tribes of the region. They practise cannibalism in the inland districts. Among the Ashango forests and toward the Congo, the Abongo are shy and timid, of small stature, and dwell remote from the beaten tracks. The Balumbo, or Bavia, are largely runaway slaves from the Gabun and Congo factories who have found refuge in the inhospitable regions south of the Nyanga River. Of all varieties of the Bantu, the Mpongwe is the most widely diffused in the coast lands. It was reduced to writing by American missionaries. A mission was established by the ABCFM in Gabun in 1842 and transferred to the PN in 1871. The Paris Evangelical Society has two stations on the Ogowe River and the BM has one at Wathen farther south. Roman Catholic missions are of considerable importance. Wadai and the northern regions are still largely unexplored and are Mohammedan, chiefly following the great Sheikh es Senoussi in doctrine.

FRENCH, Thomas Valpy: Born in 1825, in Bury Trinity vicarage, Bury-on-Trent. Died at Muscat, May 14, 1891. Educated at Rugby School under Dr. Arnold, and at
University College, Oxford. B. A., 1846; M.A. 1849. In September, 1850, went to Agra, North India, as principal of proposed St. John’s College. In 1854 he conducted with Pflander the famous public discussion with the Mullahs at Agra, which was the means of the conversion of Maulvie Imadun, an and Maulvie Safdar Ali. In 1862 he was appointed to the Derajat Mission. On December 20, 1877, he was consecrated in Westminster Abbey the first bishop of Lahore (jurisdiction, Punjab and Sindh) fourteenth bishop from the CMS ranks. Dr. French was always a pioneer. Four times he went to India to begin new agencies, and as a missionary his career may be divided thus: (1) as founder and principal of St. John’s College, Agra, 1850-58; (2) as founder and leader of the Derajat Mission, 1861-63; (3) as founder and principal of the Lahore Divinity School, 1869-74. In all three enterprises he did most important service. Dr. French was a great missionary to Mohammedans, and through his influence not a few were brought to a knowledge of salvation by Christ. It was by the natives of India that French was called the “Seven-Tongued Man,” because he could preach in the English, Urdu, Hindi, Punjabi, Persian, Pushu and the Arabic. Besides this remarkable linguistic knowledge, he could use in teaching, if not in preaching, the Latin, Greek, Hebrew, Sanskrit and German languages. He was the author of a number of able works and published several volumes of sermons. In 1887 he resigned his see, and in the 40th year of his missionary service he went to Mascat to found a new mission that might, he hoped, reach the hearts of the people of neglected Arabia. But his worn body was not equal to the strain of that trying climate and at Mascat his labors came to an end.

FREDERICKSTED: A village in British East Africa situated 2 miles N. N. E. of Mombasa, on the eastern side of the inlet which separates Mombasa from the mainland. It is also known by the native name of Kisauni. Station of the CMS (1874), with 2 missionaries, men and women; 15 native workers, men and women; 1 day school, 1 high school, 1 theological class with 12 native workers, men and women, and 432 professing Christians.

FREDENSBERG: A station of the Moravians in the western part of the island of St. Croix, West Indies. It was begun in 1721, in order to reach the large number of slaves on the surrounding plantations. The mission house stands on a hill in the outskirts of Frederiksted. There are now at this station (1866) that Rachel Metcalf went to India, two missionaries, men and women; 12 native workers, men and women; 432 professing Christians.

FREDENSFELD: A town on St. Croix Island, W. I., situated near the center of the island. It has the only country church in St. Croix, all the others being in the towns of Christiansted and Frederiksted, which are fifteen miles apart. Outstation Missions of the Moravians (1804), with (1900) 361 professing Christians.

FREDENSTHAL: Mission station of the Moravians (1764) in the island of St. Croix, W. I. It is situated on a hill to the west of the town of Christiansted, which, together with a great expanse of ocean, reaching as far as St. Jan and Tortota, is seen from the windows of the mission house. It is the scene of the labors of Frederick Martin, whose tomb is venerated to this day. At the station there are now (1900) 1 missionary and his wife, 18 native workers, men and women, and 435 professing Christians.

FRIENDLY ISLANDS. See TONGA ISLANDS.

FRIENDS’ (AMERICAN) Board of Foreign Missions. See AMERICAN FRIENDS, ETC.

FRIENDS’ FOREIGN MISSIONARY ASSOCIATION (England, 1865): The subject of foreign missions was brought before the central yearly meeting of the Society of Friends in England for the first time in 1835, at its meeting in London, and was seriously considered. From this time the matter was never lost to sight; in 1859 the interest was increased by George Richardson of Newcastle, who wrote to his fellow-members urging them to concerted efforts for the salvation of the heathen. Stirred to action by this appeal, in 1861 an address was issued by the central governing body of the Society, calling on all its members to aid the cause of missions, and this action was emphasized by appeals from William Ellis, LMS missionaries, Hoshangabad, in Madaga­scar; the Rev. Mr. French, in 1865; to the formation of a provisional committee to promote the cause of missions among English Friends, the nucleus of the present Friends’ Foreign Missionary Association. All annual subscribers are members of the association, which is governed by a board appointed annually by the meeting of members. This board appoints the treasurer and secretaries and has power to delegate any portion of its business to the care of committees from its members. Missionary work is carried on in India, Madagascar, Syria, China and Ceylon.

1. India (1866): The first missionary of the newly formed association was Rachel Metcalf, who went to India to assist Mrs. Leupold of the CMS in an industrial school at Benares. In 1869 Elkanah and Irene Beard of America were sent out, and a separate station was opened, first at Benares, but removed to Jabalpur in 1870, where it remained till 1874. It was then permanently located at Hoshangabad, the center of a large district in the Narbada Valley, with a population of three or four millions, then unreached by Christianity. In 1881 the work was extended to Sohagpur. The next years were spent in laying the foundations of various lines of work. Evangelistic tours were made in the outlying districts; schools were opened, orphanages established for both girls and boys, an orphan industrial system started and Zennah and medical work begun. In 1890 two new stations were opened at Sioni Malwa, and Sihore in Bhopal. In 1892 industrial works were established at Rasulia, Hoshangabad, with funds contributed especially for this purpose; this work has been continued with only occasional aid from the FFMA. In 1895 the Itarsi station was opened and in 1898 Bankheri was occupied by the Society. There are (1903) 6 stations and 10 outstations, 34 missionaries, 42 native workers, 6 churches, with 379 members, 4 boarding and high schools, with 748 students, 24 other schools, with 1,203 pupils, 5 hospitals and dispensaries.

2. Madagascar (1867): In the same year (1866) that Rachel Metcalf went to India, two American Friends, Louis and Sarah Street, and James S. Sewall, of Hitchin, England, interested
in the mission work by the addresses of Dr. Ellis, offered themselves for service in Madagascar, where they arrived in 1867, just at that juncture when the adoption of the Christian religion by the queen had given an immense impulse to the existing missions. The Friends did not attempt to divide the entire allotted mission district was 2,000 square miles, and when first taken in charge by J. S. Sewall, in 1868, contained 6 chapels, a number which was increased in 1872 to 52 congregations with 37 schools. At Antananarivo, the society established a boys' high school in the Ambobijavoro quarter, and one for girls in the Faravohibitra quarter. In 1872 a printing office was started, which issues a monthly magazine for adults and one for children, and where the native boys are taught printing, lithography, map-making, etc. In 1880 the society joined with the LMS in carrying on a hospital and medical mission at Analekely. In 1888 stations were opened at Arivonimamo and Mandrindrano, in 1893 at Ambobimidiana and in 1899 at Ambocianitra. In accordance with the regulations of the French government the teaching of carpentry and agriculture has been added to the curriculum of the boys' high school at Antananarivo, thus entitling it to substantial government grants. The schools in and about Antananarivo (Ambobijavoro, Faravohibitra, etc.) are incorporated in the FFM, and the French name of the capital, Tanaarive. There are (1903) 5 stations, 23 missionaries, 830 native workers, 185 churches, with 2,452 members, 8 boarding and high schools, with 1,304 students, 180 other schools, with 11,254 pupils, 16 other schools, with 1,204 pupils and 3 dispensaries.

5. Syria (Commenced independently 1869, organized 1874, under the name "Friends Syrian Mission;" transferred to the FFMA 1898): Meetings held by Eli and Sybil Jones in Syria and Palestine led to further missionary work. Three schools were established by them at Ramallah, Jaffa and Ramleh, and continued at their expense until 1874, when the Friends Syrian Mission Committee assumed their support. The following year a training home for boys and an industrial school were established near Ramallah, in the Lebanon, and in 1881 a cottage hospital and a dispensary were opened and a girls' school established, mainly with funds raised by the New England Friends' Committee. The Ramallah mission has a school for boys, another for girls, a boys' high school, and a dispensary. In 1898 this mission was transferred to the New England Committee, in return for their share in the Brumana mission. In 1893 the entire work of the Friends Syrian Mission Committee was amalgamated with the FFMA. Schools have been established in the other stations. Tuition in the first three grades is free, but in 1902 the principle of having the children pay a small fee was made general in all schools and was considered a success. Educational, industrial and medical work is carried on and many evangelistic tours are made; Bible women also make house to house visits.

There are (1903) 1 station, 10 outstations, 13 missionaries, 47 native workers, 1 church, with 35 members, 2 boarding schools, with 109 students, 16 other schools, with 1,204 pupils, and 3 hospitals and dispensaries.

6. China (1866): The first station of the society was opened at Han-chung by Robert J. and Mary J. Davidson. In 1890 Chung-king, Sze-chwan Province, was occupied, and in 1900 another station was opened by the Friends Syrian Mission Committee in the same province. Schools for boys and for girls have been established; village schools, a Bible school for women and a school for training native helpers have been organized. Medical work is carried on at Tung-chwan and a vigorous evangelistic campaign is organized in each station. Street chapel preaching meets with success, and many tracts and copies of the Scriptures are sold and distributed. There are (1903) 2 stations, 12 outstations, 18 missionaries, 24 native workers, 2 churches, with 30 members, 2 boarding schools, with 36 students, 4 other schools, with 169 pupils and 1 dispensary.

5. Ceylon (1896): Work is carried on in the district around Matale (Clodagh) in the hill country north of Kandy, and in the district around Mirigama, in the low country within forty miles from Colombo, the missionary in charge residing for the present in Colombo.

Work was begun at Matale in 1896 by Joseph and Frances J. Malcolmson. Both the Sinhalese and Tamil languages are used.

In the Matale district itinerating evangelistic work is carried on, schools have been established for both boys and girls, and cloth and food are distributed.

The Mirigama district is divided into two parts, each having a resident evangelist and one or two schools. So far the principal work is digging deep and laying foundations.

There are (1903) connected with these 2 stations, 13 outstations, 13 Sunday schools, with 266 in attendance, 15 schools, with 640 pupils.

Turkey (1881): Two Armenians who had become connected with the English Friends were sent to Constantinople by private benevolence in 1881 to open a medical mission. This enterprise has extended into educational, evangelistic and industrial efforts and is reported in the Friends' Magazine of Foreign Missions, although not included in the list of the FFMA. Our Missions, monthly, London, contains letters from the various missions carried on by Friends.

FRIENDS SYRIAN MISSION. See Friends Foreign Missionary Association.

FRIENDSHIP: A station of the Wesleyan Eastern Annual Conference of the West Indies, near Georgetown, British Guiana, with (1900) 2 missionaries, 1 missionary's wife, 5 preaching places, 5 day schools and 814 professing Christians.

FU-CHAU-FU (Fo-kien): Capital of the province of Fo-kien, China, situated on the Min River, 34 miles from its mouth. It is a treaty port, opened after the British war of 1842. The location is healthful, begirt by hills four miles distant. The wall of three miles incloses the city, with its extensive suburbs extending to the river bank and beyond on the south side. A foreign settlement has been built up on Nantai Island in the river. The two banks of the river are connected by bridges and a large population is housed in boats upon the river. The city has an extensive trade in tea and produces many kinds of porcelain. The population is estimated at 650,000. Station of the ACPFM (1850), with
(1901) 18 missionaries, men and women, of whom three are physicians; 62 native workers, men and women; 11 preaching places, 31 day schools, 5 high schools, 1 college, 1 theological seminary, 1 training class for women workers, 1 kindergarten, 2 dispensaries and 1 hospital. Station also of the CMS (1850) and CEZ (1884), with (1903) 30 missionaries, men and women, of whom two are physicians, 90 native workers, men and women; 9 outstations, 6 preaching places, 40 day schools, 5 high schools, 1 industrial school, 1 woman's training class, 1 theological seminary, 2 dispensaries, 1 hospital and 1 school for lepers. Station also of the ME, with (1903) 29 missionaries, men and women, of whom three are physicians, 55 native workers, men and women; 10 outstations, 11 preaching places, 59 day schools, 2 high schools, 1 college, 1 theological seminary, 1 industrial school and 1 printing house. The aggregate number of professing Christians reported by these societies is (1903) 3,660. The name is also written Foo-chow and Fuh-chau.

FU-CHAU-FU (Kiang-si): A town in the province of Kiang-si, China, situated 128 miles S. by E. of Niigata. Station of PE, with supervision of the SBC (1893), with (1903) 2 missionaries, men and women; 8 outstations, 2 preaching places, 1 training school for lepers. Station also of the CMS (1850), with (1885) 1 missionary, 10 native workers, men and women; 2 dispensaries, 1 hospital and 1 school for lepers. Station also of the SPG (for Japanese residents), with 1 missionary and 1 hospital.

FU-SAN: A town in the province of Kiu-Shiu, Japan, situated about 170 miles S. W. of Chissho. Station of the German China Missionary Union of the Presbyterian Church of Victoria (1891), with (1900) 5 missionaries, men and women. Station also of the Woman's Missionary Union of the Presbyterian Church of Victoria (1891), with (1900) 9 missionaries, men and women; 12 outstations, 14 day schools, 1 high school, 1 training school for women workers, 3 hospitals, and 1,331 professing Christians.

FU-SHUN: A town in the province of Sinkiang, China, situated 120 miles S. by W. of Sinking. Station of the Berlin Missionary Society (1885), with (1903) 1 missionary, 10 native workers, 10 outstations, 1 school, and 397 professing Christians.

FUFU: See FU-FU.

FU-KUO: A town in the province of Foo-kien, China, situated about 70 miles N. E. of Foochow. Station of the CMS (1850), with (1882) 8 missionaries, men and women, of whom 3 are physicians; 33 native workers, men and women; 10 outstations, 14 day schools, 1 high school, 1 training school for women workers, 1 hospital, and 2,041 professing Christians.

FU-WANG: A town in the province of Korea, situated about 15 miles S. E. of Seoul. Station of the CMS (1850), with (1903) 1 missionary, 10 native workers, 10 outstations, 1 school, and 397 professing Christians.

FUTAI: A town in the province of Shantung, China, situated about 20 miles N. of Taipho. Station of the CMS (1850), with (1882) 8 missionaries, men and women, of whom 3 are physicians; 33 native workers, men and women; 10 outstations, 14 day schools, 1 high school, 1 training school for women workers, 1 hospital, and 2,041 professing Christians.
GAGAEMALAE: A settlement on the island of Savaii, Samoan Islands. Station of the Australian Wesleyan Mission, with (1900) 15 native workers, 3 preaching places, 3 schools and 104 professing Christians.

GALELA: A settlement on the northeast coast of the island of Halmahera, or Jilolo, in the Moluccas, Dutch East Indies. Station of the Utrecht Missionary Society (1866), with (1900) 1 missionary and his wife.

GALKISSE: A town in the outskirts of Colombo, Ceylon, East Indies. Station of the SPG (1846), with (1902) 12 native workers, men and women; 1 preaching place, 4 common schools and 251 baptized Christians.

GALLALAND: A country formerly of Abyssinia but now included, for the most part, within the bounds of Italian Somaliland, Africa. The people, called Gallas, seem to form a connecting link between the negro and the Semitic races. They are intelligent, vigorous and warlike. Some of the northern Galla tribes have adopted Abyssinian Christianity. The Gallas found to the south and southwest of Abyssinia are believers in fetishism. Three dialects of the Galla language—the Shoa, the Ittu and the Barareta—are known. All attempts made by missionaries to reach the Southern Galla tribes have failed through the fanaticism of the Arabs of Somaliland and the disturbed state of religion.

GALLE: A town and port on the south western coast of Ceylon, 66 miles S. by E. of Colombo, which has superseded it as a port of call for mail steamers from the Mediterranean to China. The population (1901) is 37,000, composed of many races, including Singhalese, Hindus, Parsees, Arabs, Eurasians and Europeans. Station of the CMS, with (1902) 5 missionaries, men and women, one of whom is a physician; 36 native workers, men and women; 2 outstations, 19 day schools, 1 dispensary, and 5,828 professing Christians. Circuit station also of the ME, with (1903) 28 native workers, men and women; 11 places of worship, 18 schools, 1 high school, and 1,555 professing Christians. Also called Hok-chiang.

GARDINER, Captain Allen F.: Founder of the South American Missionary Society. He was born in England in 1794, and manifested even in childhood the spirit that controlled his later life. When found sleeping on the floor rather than in his bed, he gave as the reason that it was his intention when a man to travel all over the world, and therefore he wished to accustom himself to hardship. He began active service in the navy in 1810, when he was 16 years old, but resigned after the death of his wife in 1834, and wholly consecrated himself to his life-work: "to become the pioneer of a Christian mission to the most abandoned heathen."

FU-TSENG-HSIEN: Geddie, John

FUTUNA. See NEW HEBRIDES.

FUTUNAN LANGUAGE: Belongs to the Malayan family, and is spoken by a few hundred people in the island of Futuna, New Hebrides. It was reduced to writing by missionaries of the New Hebrides Mission Society and is written with Roman letters.

FU-YIU-TSUN: A town in the province of Shen-si, China, situated about 32 miles N. E. of Hei-yung-fu. Station of the B&M (1898), closed (1903) since the Boxer outbreak of 1900.

FWAMBO. See KAWIMBE.

GAUHATI: The largest town in Assam; situa
ted on the Brahmaputra River, 45 miles N. by
W. of Shillong. Climate unhealthful. Population
(1891), 10,800, of whom 7,800 are Hindus and the
remainder nearly all Muslims. Station of the
ABMU (1843), with (1903) 3 missionaries, men
and women; 21 native workers, men and women; 17
preaching places, 17 schools, 1 high school, and
778 church members.

GAYA: A town in Bengal, India, situated 58
miles S. by W. of Patna, among ridges running
out of the Ganges valley, and in a region filled
with traditions of early Buddhist history. Six
miles S. of the town is Buddh Gaya, the.dwelling
place of the founder of Buddhism. There is
shown a lineal descendent of the Pipul tree, under
which he sat in meditation. The population of
Gaya is (1901) 71,288, nearly three-fourths being
Hindu and about one-fourth Muslim. Outstation
of the BMS (1872) and station of the Baptist
Zenana Mission (1890).

GAYAZA. See GYAZA.

GAYAZA: A town in Palestine, situated 26 miles
N. W. of Beersheba, on the road leading to Egypt,
between the Mediterranean and the desert, about
three miles from the sea. It is built partly on
the sides of the steep hill which was crowned by
the ancient town and partly on the plain below.
It is in the seat of a Greek, and also of an Armenian,
bishop. It is a station for the caravans traffic
between Egypt and Syria, and has a population
of 15,000, mainly Arabs. Station of the CMS
(1875), with 5 missionaries, men and women, and
a hospital.

GEDDIE, John: Born at Banff, Scotland, 1815;
brought up and educated in Nova Scotia, whither
his parents immigrated in his infancy. They
were earnest Christians, strongly imbued with a
missionary spirit, and at his birth dedicated him
to be a missionary. He received his academical
and theological education at Dalhousie College.
There being then no organization in Nova Scotia
to send him to a mission field, he was ordained in
1838, and settled as pastor of the churches of Cavendish and New London, in Prince Edward Island.
Soon after his ordination he wrote a series of let-
ters on foreign missions, addressed to the minis-
ters and members of the Presbyterian Church of
Nova Scotia, which were published in the provin-
cial papers, and resulted in the commencement of
a foreign mission by the Synod. The field
selected was the South Seas, and Mr. Geddie,
offering his services, was accepted as their first
missionary. He had been settled seven years,
and had a wife and three children. To prepare
himself more fully for his work, he took lessons in
printing, and obtained some instruction in medi-
cine. He left for the South Seas in 1846 via
Cape Horn, stopping at the Sandwich Islands and
waiting two months for a vessel for Samoa. There
he remained eight months waiting for the
"John Williams" from England. At Honolulu
and Samoa he obtained much valuable knowl-
dge from seeing the working of the London and
American Societies missionaries. On the advice
of the missionaries of Samoa he chose for his field
Aneitium Island, New Hebrides, and Rev. Mr.
Powell, one of the most experienced of their num-er, was appointed to assist in establishing the
mission. Mr. and Mrs. Geddie had a hard and
trying experience in dealing with a low and savage
people. Hurricanes, diseases and deaths were
attributed by the natives to the missionaries; the
natives stole their property, threatened to burn
their houses and take their lives. Mr. Geddie
had, however, great aptitude for so treating the
heathen as to gain their confidence and in his
efforts to dissuade them from the cruel custom of
strangling widows his success was marvelous.
Gradually several attended his instruc-
tions, and in two years forty-five assembled on the
Sabbath to listen to his words and to worship
God. Mr. Geddie had great readiness in acquir-
ing the native language, and a remarkably reten-
tive memory. He made early and extensive use
of the press; was an excellent translator of the
Scriptures; had great inventive power and was fer-
tile in expedients; he could turn himself with facil-
ity to building a church, translating a Gospel
printing a primer, administering medicine,
teaching a class, or preaching a sermon, travers-
ing the island on foot, or sailing round it
in his boat. In 1850 some of the chiefs and even
sacred men joined him, of whom one, Waihit,
supposed to have power over the sea, a man of
fierce and cruel temper and much feared by the
people, had his mind opened to the truth, and
showed great eagerness to impart to others the
truth he had himself discovered. Another chief
of great authority in the district, and who joined
the worshipers, was Nohoi. To prove his sin-
ogeneity, which many doubted, he cut off his long
hair, abandoned polygamy, and, the sixty years old, attended the school every morning and the worship on the Sabbath. Official persons among the heathen, whose craft was in danger, and other parties, not native, whose proceedings were interfered with by the new teachers, combined in repeated attempts to rid themselves of the missionary. In 1851 his house, in which himself and family were sleeping, was set on fire at midnight. The excitement among the friendly natives over this dastardly act, tho held in check by the missionary, convinced the perpetrators that such opposition could be continued only at their peril. Subsequently, when the people of a heathen district planned to attack the people of a Christian village, the Christians from all parts of the island assembled to reason with the hostile people, and to persuade them to live in peace. These events rallied and strengthened the friends of Mr. Geddie, and from that day the Christian cause triumphed. In 1852 the first converts, 13 in number, were baptized, and a Christian church formed on Anéitium. In 1854 the whole population had abandoned heathenism. Mr. Geddie translated the Gospels of Matthew and John and most of the Epistles of Paul into the Anéitium language, and printed them himself.

His health being impaired he visited Nova Scotia in 1864, after 18 years' absence. He took with him the Book of Psalms, which he had translated, and had it published at Halifax. He was received at home with great enthusiasm. The Queen's University at Kingston conferred on him the degree of D.D., and the Synod honored him with the appointment of Moderator, which he declined. He returned to the island in 1865. In 1871 he went to Geelong in Victoria, his home, and his wife and children. There he died, December 15, 1872.

GENADENDAL. See GNADENDAL.

GEOGRAPHY of the Expansion of Christendom: At the beginning of the geographical expansion of Christianity we can, on an ordinary atlas map, cover up all there was of Christendom in the world with the point of one finger; at the end of a century a whole hand will not suffice; at the end of three centuries the whole Roman Empire must be included; by the close of the 19th century all of Europe, including the Russians, has become Christian; while Persia, Syria, Africa and Spain are lost to Mohammedanism; the 15th century map shows losses in Asia Minor and the Balkan regions, gains on the Iberian peninsula, and displays a new hemisphere which brings the full extent of the missionary problem to the heart of Christendom. From that day the march was forward, until at the close of the 19th century every section of the globe had been reached with more or less effect.

1. The Pentecostal Church: The geographical conditions which surrounded the infant church assembled in that upper room in Jerusalem make very manifest the small extent of the known world. As far as civilization was concerned, it was a Mediterranean world. A stretch of three thousand miles east and west, and of fifteen hundred miles north and south, contained it all. Britain was still unconquered. The warlike Parthian was the greatest organized enemy of Rome. This Scythian monarchy had learned some of the refinements of civilization from the downtrodden Persians, but was still essentially barbaric. India was known to navigators, and caravan routes were open through to China. Travelers occasionally brought in accounts of strange lands and peoples, but all about this confined area of terra cognita lay the great cloudland of terra incognita.

The immediate task before Christianity was the conquest of the center of civilization—the Roman Empire. The geographical characteristics of this Mediterranean civilization as related to the company of Christian believers in Jerusalem deserve notice. (1) It was an empire of cities. Christianity must needs handle centers of population, especially in the West. From four to five thousand cities must be reached. (2) The Mediterranean furnished easy access from city to city. It was covered with sail employed in a thrifty commerce. (3) Roman roads connected all parts of the empire, so that news was carried rapidly. Along these splendid highways trudged the messenger of the Gospel from city to city. (4) One hundred million people were thus by land and waterways connected, so that a portion of the globe furnishes so interesting a field for religious conquest as the territory of the old Roman Empire.

Roman civilization spread itself outside its own regions by two methods—commercial and military—and Christianity must needs follow in the track of armies and merchants. The caravan routes all led into the common basin of the Mediterranean, from Central Africa through Sahara by several ways, down the Nile; from Yemen along the Red Sea; from the Persian Gulf through the Syrian desert; from Mesopotamia, the center of the trade of Central Asia, to which came the treasures from the Persian Susa, Hyrcania and Bactria, which in turn came down upon China through Statia Mercatorum, and from Hindustan and Ferther India via Clisobra. Turning to the sea the routes are quite as numerous. The whole coast of southern Asia was familiar to the merchants, and regular routes by sea were open, finding their natural termini in the Persian Gulf and the Red Sea. Another thrifty line of commerce came pouring into the outlet of the Mediterranean from distant Britain, and daring navigators pushed along the coast of the North Sea and penetrated the Baltic lands in search of trade. That a little later Christianity should be found firmly planted in far-away places is not surprising. The door was open, and the disciples could easily go in.

Garrisons of Roman soldiers were stationed all along the borders of the empire. These military barracks soon became centers from which Christianity spread outside the civilized world, and these isolated spots along the Rhine, the Danube, the Euxine and the Euphrates became oases of the faith. When the armies pushed beyond the boundaries of the empire, Christianity was sure to go with them. Christian soldiers captured
and enslaved by barbarians were the means of converting whole nations.

The geographical condition of the greatest importance to Christianity was the wide extent of territory over which the Greek and Latin languages were spoken. At the opening of the Christian era Hellenistic Greek was the lingua franca of the Roman world. Greek colonies had been established all around the Mediterranean, and these had determined the language of commerce. Greek letters and arts had conquered Rome more effectually than the legions of the republic had overcome the peninsula of Hellas. The New Testament was composed in this universal language, and all through the early centuries Christian churches were Hellenistic. Later on the Latin tongue took the supremacy in the Western world, evidenced by the fact that it still remains the liturgical language of the majorities of Christians.

More important, however, to the Christian Church than any of the conditions mentioned was the geographical distribution of the Hebrew race. Everywhere synagogues were the early preaching places of the apostles, and the majorities of their congregations of the 1st century were of Jewish extraction. Christianity, as the fulfillment of the Old Testament religion, naturally turned to the believers in that revelation. Providentially, it seems, these seven millions of people, with their monotheism, their noblest conceptions of God and their purer ethics of life, had been scattered broadcast over the Roman world, and even beyond its boundaries. There were about four million Jews in Syria and Palestine at the opening of our era. One million lived in Mesopotamia and down the Tigris and Euphrates rivers. More than a million more were dwelling along the Nile and in the Delta, Alexandria having a large quarter entirely devoted to this people. A million more were estimated to have been distributed elsewhere about the Mediterranean. Paul and the other apostles found them everywhere. Most cities had a Jewish section. This race was especially numerous along the north coast of Africa, in Spain, up the Rhone and about Rome, the commercial center of the world. The Sibylline Oracle says that “every land and every sea” was filled with them. Strabo, writing of the century before our era, says that the Jewish people had already come into every city and that it was not easy to find a place in the world which had not received this race and was not occupied by them. We find them in Southern Arabia (Yemen), Ethiopia (Abyssinia), Armenia, Parthia, Iberia, Crimea, Hyrcania, and even China. Wherever there were Jews the door was open to the preachers of the Messiah.

With a Roman government to police the world, with highways and harbors facilitating journeys by land and sea, with a universal language at their command, and with Jewish people and prayer-houses distributed all over the empire, the apostles went forth to conquer. As the centuries went on we shall find the Christian churches most numerous and thriving where these conditions were most favorable.

II. The Apostolic Church. At the close of the 1st century a very inadequate presentation of the extent of the advance of the Christian Church is possible. The persecuted Church was more or less in hiding for three centuries, and the notices of geographical matters in Christian or heathen literature are only incidental. Legends and doubtful traditions have thrown a haze over the whole subject of the range and triumphs of the apostles. By the time of the death of the apostle John there were Christian churches all over Syria, Asia Minor, Macedonia, Greece proper, the islands and Italy. There seems to be every probability that Paul may have carried out his desire to visit Spain between the two imprisonments of Peter, and Peter was probably at Babylon and Mark in Egypt. Beyond this there is little certainty. The list of the converts on the day of Pentecost (Acts ii: 9-12) would lead us to infer that Christianity got a footing in Parthia, Media, Elam, Cappadocia, Pontus, Asia, Phrygia, Pamphylia, Egypt, Cyprus, Rome, Crete, Arabia “and in every nation under heaven” (Acts ii: 3). Ethiopia (of doubtful location) may have learned of Christ through the eunuch baptized by Philip. The apostle James familiarly addresses “the twelve tribes which are of the dispersion.” Peter addresses the “sojourners of the dispersion in Pontus, Galatia, Cappadocia, Asia and Bithynia.” He sends greetings from Babylon (Rome? in Egypt? or on the Euphrates?)—probably the latter. The innumerable traditions about the places where the apostles labored must be regarded as unreliable and misleading—such as that of Paul in Britain, Lazaurus in Gaul, Thomas in India, Bartholomew in Parthia, Andrew in Russia, Thaddeus in Edessa, Philip in Scythia, Matthew in Ethiopia and Judas the Zealot in Arabia. Yet these men were certainly busy somewhere, preaching the Gospel and building up churches.

This is certain—Christianity found a lodgment during the 1st century from Spain to Babylon (3,000 miles) and from Rome to Alexandria. It had taken the whole Mediterranean as its field of work. In 30 A. D., at Jerusalem there were at most 500 Christians; 100 A. D. there were probably 500,000. A map of the Christian world at this date, containing only certainties, would not give a true impression of the geographical extent of Christianity. From the unexampled spread a little later, it may well be inferred that the growth was a large growth in these early times before the great persecutions. The map should show the routes Paul took on his missionary journeys and on his way to Rome. The cities of Zella Capitolina (Jerusalem after 70 A. D.), Samaria, Jeppa, Cessara, Phoenaea (Acra), Tyre, Sidon, Damascus, Salamis, Antioch, Tarsus, Derbe, Lystra, Iconium, Antiochia, Hierapolis, Colossae, Philadelphia, Sardis, Thyatira, Pergamus, Ephesus, Smyrna, Philippi, Thessalonica, Berea, Corinth, Colossae, and Rome should be plainly marked. The following cities and countries should be put down as probable: Babylon, Edessa, Arabia, Petrae, Alexandria, Cyrene, Ancyra (in Galatia), Perga, Tarsus, Athens, Rhodes, Crete, Mileta, Puteoli, Carthage and Southern Spain. It is possible that Dalmatia, Britain and the Rhone valley should be included. Clement of Rome (30 A. D.—102 A. D.), in his first epistle to the church at Corinth (§ 42), says there was “preaching everywhere in country and town.”

The Apostolic Church was to all intents and purposes a Greek-speaking church, largely drawn from the Jewish element, although Gentiles took more and more a prominent part. Christian prejudice against the Jew as a Jew had not yet arisen. The hopeful, buoyant tone of the apostolic letters indicates a growing success in the work. The churches do not seem to have
been thoroughly organized as one church and consequently there were no internal geographical divisions.

III. The Ante-Nicene Church: The Church of the 1st to 3rd centuries is under a denser cloud than that of the 1st. The absence of apostolic writings leaves us to rely upon the casual references of historians or other indications. The era of representative Church councils was just beginning. Justin Martyr (105-167), the still more reticent Irenaeus, bishop of Lyons, on the upper Rhone (130-202), and Tertullian, who wrote in the 2nd and 3rd centuries, unite in representing the Christians as a "great multitude," "a majority of every state," "dispersed eyes to the ends of the earth," and including "every sex, age and condition, and persons of every rank also." Among nations enumerated are the Gæstulians (Moors), "all the limits of Spain," "the diverse nations of the Gauls," "the haunts of the Britons, inaccessible to the Romans, but conquered by Christianity," the Sarmatians, Dacians, Germans, and Scythians.

Church councils and martyrologies furnish some information concerning the spread of Christianity in this obscure period. Eight savage Roman persecutions of the Church took place before Christianity won for itself imperial recognition, and the universality of several shows how widely the faith had spread. The fact that the wisest Roman emperors ordered the severest persecutions, because they feared the spread of its secret religio-political cultus, as they considered it, is another indication of the numerical strength of the Christians. It is estimated that by the opening of the 4th century there were 10,000,000 Christians in the Roman empire, as contrasted with the 500,000 at the close of the 1st century. A conservative guess as to the number of churches at the close of this period places them at 1,000 Oriental and 800 Occidental, but the data are very unsatisfactory. Important Church councils were held at Carthage (254), Elvira (Spain, 305), Arles (Gaul, 314), Ancona (Asia Minor, 314) and Nicaea (Asia Minor, 325). Contemporary documents give the names of the bishops or presbyters who were present, but not a third of the churches could have been represented. Martyrologies help out somewhat. The 525 cities where there were churches at the time Christianity was coming out from under persecution were distributed as follows: In Europe, 183 in all (Britain 3, German lands 3, Gaul 38, Spain 45, Italy 52, Southeastern Europe 37); in Asia 214 (Asia Minor 136, Northern Syria 30, Palestine 24, Arabia 18); in Africa 123 (Egypt and Lybia 28, North Africa 95). A map indicating this distribution of things would be sprinkled all over with cities containing Christian churches. Multiply them by three or four and it becomes apparent why the secular mind of Constantine the Great led him to throw in his lot with the Christians. From the Vlach on the Black Sea, the Goths (in the 5th century), the Sarmatians, Dacians, Germans, and Scythians, the Roman and Persian, was the first nation, as such, to embrace Christianity, early in the 4th century. The whole country seems to have received the Christian faith. Schools and churches were built and the Bible was translated. Since that time the Armenian Church has had continuous life.

During days of persecution Christianity made its way around the border of the Euxine, pushed into the interior of the Caucasian range and won over the Albanian and Iberian tribes. A most interesting mission of this period was to the Goths, various tribes of whom had been moving along the north shore of the Euxine and up the Danube. During their inroads they penetrated in the 3rd century as far as Ephesus and Athens. A large number of Christian captives from Cappadocia were dragged northward across the Danube to the Dacian rendezvous of these rude northmen, and thus the first Gospel seeds were planted. Progress must have been made, for the Gothic bishop Theophilus was present at the council of Nicaea (325). The apostle of the Goths, however, came a little later in the person of Ulfilas, a son of the Cappadocian captives. Beginning early in the 4th century (313), his work was spread over the century. He and his converts went through fifty persecutions (350 and 370), but the work of conversion seems to have gone on with increasing momentum. Both the East and West Goths were reached effectually, and through all their wanderings disseminated a more or less helpful Christian faith.

From the first Christianity had been pushing rapidly eastward. Mesopotamia must have had a large Christian population. Bishops came to Nicaea from as far east as Arabela and Nisibis. Persia had been reached at an early period. During the reign of Sapor II. (309-379) terrible persecutions indicate a large Christian population. When the Nestorians were driven from the Roman dominions, they commenced their missionary march eastward, making a first lodgment in Persia in the 5th century, at a time when Christianity was tolerated, and in the 6th and 7th centuries, sending missions into the south of Arabia, to the southeast into India and Ceylon, and eastward to China; but it is impossible to know the extent of the spread of Christianity with churches. Christianity is still strictly municipal, as might have been predicted.

IV. The Imperial Church (311-600): With Constantine's decree of amnesty to Christians (311) the Church entered upon a new era. Christianity became a state religion. The centers of civilization were won. Within the empire paganism was slowly going to pieces. Under Julian the Apostate it made one spasmodic effort to regain its ascendancy, and then gradually disappeared, or was absorbed by the Church or by some heretical sects. At the close of this period there were probably thirty or forty million Christians in the territory occupied by the empire when at its widest extension. Besides the heretical sects already mentioned, some of which did most of their work in this period (Arianism, Donatism and Manicheism) are to be noted the Nestorians at work in the far East early in the 5th century, the Monophysites in Syria and Egypt a little later, and a century after, the Monothelites.

Outside the empire, this propaganda, which had been going on for several centuries came to notice and was carried on more systematically. Armenia, the battle-field between Roman and Persian, was the first nation, as such, to embrace Christianity, early in the 4th century. The whole country seems to have received the new religion. Schools and churches were built and the Bible was translated. Since that time the Armenian Church has had continuous life.

During days of persecution Christianity made its way around the border of the Euxine, pushed into the interior of the Caucasian range and won over the Albanian and Iberian tribes. A most interesting mission of this period was to the Goths, various tribes of whom had been moving along the north shore of the Euxine and up the Danube. During their inroads they penetrated in the 3rd century as far as Ephesus and Athens. A large number of Christian captives from Cappadocia were dragged northward across the Danube to the Dacian rendezvous of these rude northmen, and thus the first Gospel seeds were planted. Progress must have been made, for the Gothic bishop Theophilus was present at the council of Nicaea (325). The apostle of the Goths, however, came a little later in the person of Ulfilas, a son of the Cappadocian captives. Beginning early in the 4th century (313), his work was spread over the century. He and his converts went through fifty persecutions (350 and 370), but the work of conversion seems to have gone on with increasing momentum. Both the East and West Goths were reached effectually, and through all their wanderings disseminated a more or less helpful Christian faith.

From the first Christianity had been pushing rapidly eastward. Mesopotamia must have had a large Christian population. Bishops came to Nicaea from as far east as Arabela and Nisibis. Persia had been reached at an early period. During the reign of Sapor II. (309-379) terrible persecutions indicate a large Christian population. When the Nestorians were driven from the Roman dominions, they commenced their missionary march eastward, making a first lodgment in Persia in the 5th century, at a time when Christianity was tolerated, and in the 6th and 7th centuries, sending missions into the south of Arabia, to the southeast into India and Ceylon, and eastward to China; but it is impossible to know the extent of the spread of Christianity with churches. Christianity is still strictly municipal, as might have been predicted.
in these vast regions. The St. Thomas Christians in India and the Christians of the Syrian cult at Urnia in northwestern Persia are all that have remained faithful up to modern times.

Turning to Africa there was a most interesting expansion of Christianity in Abyssinia during this period. Under the Syrian missionary, Frumentius, this great upland of Africa seems to have received the Gospel. Axum, the capital, was first reached. The Bible was translated into Ethiopic, and long before the Mohammedan invasion became the written national religion. The king or Negus was in communication with the court of Constantinople, and at various times championed the cause of Christianity in Arabia. Nubia and the upper Nile were reached, but not as effectively as the mountainous regions of Abyssinia proper.

It is not certain when missionary work on the peninsula of Arabia began. Doubtless the desert south and east of Syria furnished a refuge to Christians during times of Roman persecutions, and the much-frequented caravan routes gave easy access to all parts of the peninsula. Hermits betook themselves to the rocky fastnesses of Pella and the Sinai peninsula, and at an early date came in contact with Bedouin tribes. During the 4th century there were missionaries among the Himyarites in the extreme southwest of Arabia, and a traveling bishop followed the wandering tribes of the Syrian desert. A number of tribes were completely won over to Christianity—the Ghassanites, the inhabitants of Najran, part of the tribes of Tay and Kudaa, the Rabia, Taghlab, Bahra and Tunukh tribes, as well as the Arabs of the Arabian peninsula. There was also a terrible persecution of the Christians of Najran by the Jewish usurper, Dhu Nowas. By 600 Arabia was thickly sprinkled over with indications of Christianity.

Turning to the extreme northwest limit of the known world, we find the Christian faith in this period laying hold of an island that long before it learned of Christianity was called "The Sacred Island." We are told of the anger of Druids against Cormac, a prominent monarch in Hibernia or Scotia Major or Ireland about the middle of the 6th century, who turned from them "to the adoration of God." For many years Christianity seems to have quietly spread from individual to individual. It was not, however, until the 5th century that Christianity had any substantial following in Ireland. The career of Patrick, a native of Brittany in Gaul, as a missionary to Ireland began early in that century and lasted probably until very near its close. Through his exertions the faith seems to have spread in every direction and to have taken possession of the island, although paganism still lurked about. The inroad of the pagan Picts from the north of Great Britain and the heathen Angles, Saxons and Danes from the east, during this century, drove the British Christians into the western mountains, and thousands of them must have flocked across the channel to Ireland. Thus religious work reached its most substantial advance, so that at his death (497) the whole island was Christian, although the statement that he founded 365 churches in the island must be received as legendary.

Columba, or Columbkille (521-597), after a rather successful career on his native island, in 563, with twelve companions retired to Iona, off the Scottish coast, and established a monastery which became a beacon-light of the faith in northwestern Europe.

Britain proper was lost to Christianity, and the heathen Saxons and kindred tribes exterminated the faith except in Cornwall, Wales and Cambria. The Isle of Man seems to have been Christianized during this period. Clovis the Frank became a Christian after the Roman type and led his followers to accept the Gospel.

The German border was in constant turmoil owing to the ceaseless invasions from the north and east. The Gothic hordes that swept over the country had received a crude sort of Christianity, and so had the Vandals; but Attila the Hun was a heathen. Many of the Christian institutions founded in the 4th century were swept away. However, Valentine preached the Gospel in the Tyrol (441). Paulinus was martyred at Ratisbon (470), Severus, bishop of Treves, was making efforts to spread the truth in Germany (435), and Severinus in Noricum and Pannonia (453). The Burgundians, the Franks and the Lombards were reached effectively, as well as the Alamanni and the Suevi. The Slavonians and Avars in Illyria and Mesia received Christianity about 550.

Few, if any, Teutonic or Slavonic tribes were converted during this era before they entered the confines of Christendom. At the close of this period, however, all about the borders of Christendom there was a lacework of Christian missions. The only striking loss was southern Britain, which was soon to be won back.

V. The Feudal Church (600-1065): Great changes took place in the geography of Christendom during the feudal period, gains and losses balancing each other. The greatest organized enemy of Christianity, Islam, began its decimating work early in the 7th century. Arabia, Syria, Persia, Egypt, the north coast of Africa to the Atlantic, Spain and the Mediterranean islands were successively conquered. Christianity was wiped out in Arabia, Nubia and North Africa. Feeble churches remained in Persia, Egypt and Syria. In Spain Christianity still was vigorous. The mountainous regions of the peninsula were never wholly conquered, and even in the conquered portions Christianity flourished under the lenient reign of the Caliphate of Cordova. In the Asturias and Navarre the Christians were independent of Muslim rule. In Egypt and Nubia the monophysite Christians for the most part turned traitors, caring less for orthodoxy than fanned protection from Medina. Nestorianism was cut in two by the conquest of Persia and already began to decline, tho its work went on in the Far East. Timothy, Patriarch of Syria (775-820), sent missionaries to China and India. In 945 Christians were proscribed in China, although they had been tolerated all through the 8th century. The Taurus range and the highlands of Armenia remained the frontier fortresses of the Eastern Church for many centuries, but as this period was closing, being successfully penetrated by a new scourge from the East—the Moslem.

All through Europe missionary work made substantial geographical gains. Pagan England was declared and thoroughly Christianized. The heathen made a fierce struggle, but between the Irish Church on the north and the zealous followers on the south, the victory of Christianity was inevitable, and
England with Ireland, Scotland and Wales, was thoroughly Christian at the close of the feudal period.

In the meanwhile the fervid missionary zeal of, the Irish Church was at work on a larger arena. In the 7th century Ireland was called "the Isle of Saints," largely because of its numerous monastic establishments. Having won over the Picts and Scots to the faith, thousands of Irish monks looked longingly toward the heathen wilds of the Continent. Columbanus (born about 543), a disciple of Comghall, Abbot of Bangor, went from place to place, and finally settled among the Vosges Mountains, on the German frontier. St. Gallus, his disciple, gave name to an illustrious monastery and to a Swiss canton. Other Irish missionaries set the rather sluggish churches of the Continent examples of simplicity, piety and missionary zeal that electrified the whole of western Christendom. From Gaul went forth Amandus (died 681 or 684) and Eligius (died 659), from England, Willebrord (Clement) and Boniface (Winfrid), "the apostle of Germany."

The Frisians were slowly won over from an unusually savage paganism. The last and overwhelming argument came from the sword of Pepin D'Heristal. Willebrord made a futile attempt to reach the Danes. A century later Ansgar (800-855) became the apostle of Denmark.

About this time the sword of Charlemagne compelled the stubborn Saxons to cast away their idols and accept the Cross. Sweden was reached by Ansgar, but the real influence that brought Denmark, Sweden and Norway to Christianity came somewhat later from England. Siegfried, Trygvason and St. Olaf were the leaders. In 912 Rollo the Norman obtained Neustria and was baptized as Robert, Duke of Normandy.

While the Belgians, Normans, English, Frisians, Danes, Swedes, Norwegians, Saxons and other Teutonic tribes in Germany were being won over largely if not exclusively by the Irish, English, and Gothic missionaries, the Roman Church was fighting for life itself with marauders from the north and Saracens from the east and south. The heathen Magyars crossed the Carpathian Mountains in the 9th century and settled on the Theiss and Danube. In 895 Prince Géza, who had been converted during a stay at Constantinople, German missionaries pushed down into the country more and more. In 994 Adelbert of Prague baptized with the name of Stephen Goya's son Volc, who was afterward famous as St. Stephen, the patron-saint of Hungary. Under his lead Hungary became thoroughly Christianized and has ever since been a firm adherent to the Roman Church.

Turning to the Greek Church we find a more promising field for missionary zeal. The Bulgarians received Christianity during the 9th century. Cyril, the theologian, and Methodius, the painter, both natives of Salonica, were the apostles of this race. King Borogis was impressed by a painting representing the Judgment Day, and the conversion of the whole nation followed. After a sharp conflict between the ecclesiastical powers at Rome and Constantinople, the Bulgarians received an archbishop from the Greek Church, and have ever since been loyal to that body. The Servians and Croats were reached by these same missionaries.

Christianity reached the Crowns of Bohemia and Moravia, also a Slavonic race, a little later in this same century (9th). Methodius spent the last years of his life in this work. The Czechs had already been reached by German missionaries, but not until the baptism of Barbriway, the Duke of Bohemia, and his wife, and the arrival of Methodius, was much progress made. Even then there were several reactions. Under Boleslas II. Christian influence predominated and a bishopric was established at Prague (973). A century later all traces of paganism had vanished, and in 1092 the sacred forest cut and the last heathen priests were banished.

The most important conquest of Christianity during this period was the conversion of the Russians at Kief. The traditions linking the Apostle Andrew to this country must be set aside entirely. During 965 Princess Olga visited Constantinople, and was so impressed with the Christian ceremonial that she was baptized and adopted the Christian faith. Returning to her northern home, her attempts to spread the faith were for a long while ineffective. When her grandson Vladimir came to the throne, missionaries from Muslims, Jews, Roman and Greek Christians urged upon him their respective religions. After some superficial investigation the decision was in favor of Greek Christianity, which brought with it the hand of the sister of the Byzantine emperor in marriage. In 988 Vladimir, his court, and all his subjects were baptized at one time in the river Dnieper at Kief. The story of the spread of Christianity through the vast European tracts from Russia to-day is obscure. The consequences of the conversion of Vladimir, however, are immeasurable.

Greek missionaries from Moravia reached another Slav race, the Poles, early in the 10th century. In 966, their ruler, who had married a Bohemian princess, was baptized, and a large number of his court and people followed him.

The gain of territory that must have astonished Christendom most during this period was far across the Northern Atlantic, in Iceland and Greenland. Iceland was visited in the latter part of the 8th century by Irish monks, and was settled a century later by Norwegian pagan emigrants. Through their mother country they became acquainted with the Gospel, and by the year 1000 Christianity was officially recognized as the religion of the settlement. Greenland was discovered in the 9th century and two small Christian settlements were established.

Christendom also made notable gains during this period through the checking of the Saracens at Constantinople by Leo III., the Isaurian, and Tours by Charles Martel (762). Crete and Cyprus were soon won back by the Byzantine Empire. The Muslims were out of place in France, and soon were driven out of Narbonne, Aries and Nimes. In Spain Charles the Great
pushed them back to the Ebro. In 1017 Sarabia was reclaimed from the Saracen, and, in 1080, Cosica. Turkey in the geographical status of the feudal church. Although it was a dark age, and Mohammedanism almost pressed out life of the church, it must be considered on the whole an age of astonishing progress. The dark age was above all a missionary age. It prepared the soil for the future Russian state to be received in a later and happier era. Its gains were mainly superficial and so were its losses. Vital Christianity was not swept away by Islam.

VI. The Crusading Church (1095-1500): The geographical gain of Christendom during this period was almost altogether military in character. The appeal everywhere was to the sword. It was a desperate fight for life with Islam and paganism in Spain, Sicily, Palestine, Asia Minor, the Balkan peninsula, Russia, and along the Baltic.

The Crusades did little or nothing for the expansion of Christendom. They may, however, have partly check upon the Seljuk Turk, which the Christian emperors of Constantinople had crossed the Danube, taken Hungary, Christendom further to the north. Genghis Khan, after spreading his rule through vast the coast of the Black Sea. During the last part of the 17th century the tide turned and European European armies under Henry the Pious at Wahlstatt (1241). Then the Mongols retired from Europe, leaving the “Golden Horde” on the lower Volga, which for two centuries kept Russia in turmoil. At length, late in the 15th century, Moscow and Novgorod and other dependent Russian states were able to defend themselves against the several khans into which the “Horde” had been broken up, and, under such leaders as Ivan the Great and Ivan III, succeeded in making the Tatars dependent. The long drawn battle between Russian and Tatar (Turk) still goes on, and must to the entire. The Nestorians seem to have been favored by the Tatars of this time, who accepted their missionaries. The mysterious Prester John was a Tatar prince converted in the 12th century. In this period another Mongol appears—Tamerlane, a descendant of Genghis Khan, but a Muslim who made himself master of the countries from China to the Mediterranean and from the Volga to Egypt. He defeated the “Golden Horde,” and thus indirectly helped the Russian Christians, but in his bloody advances in Asia he ruined himself and the Nestorian churches in the far East and Central Asia. Christianity was almost completely blotted out of those regions. A few colonies of Nestorians remained, which were visited by Roman Catholic missionaries in the 13th and 14th centuries. Tamerlane died in 1405.

Turning to the southwestern corner of Europe there were in this period substantial geographical gains for Christendom. As in Russia so in Spain, no outside forces were called in during the long, successful crusade. At the middle of the 14th century the Moors were harnessed up in the mountainous retreats of Granada. At length, through the joint efforts of the King of Aragon and the Queen of Castile, Ferdinand and Isabella, the last rampart was taken, and in 1492 Boabdil, the last Saracen ruler, sailed away to Africa. The Nestorians were left behind.

Turning to the land of the Baltic, a most interesting gain to the territory of Christendom during this period, came through the valor of the Teutonic knights. In the 11th century some progress had been made among the Wends, a Slavonic people living on the Baltic between the Oder and the Vistula. Gottschalk, their ruler, suffered martyrdom in 1066. Vicelin worked among them in the following century successfully, and the Wends slowly accepted Christianity. In 1155 Saint Eric, the Swedish king, undertook the conquest and conversion of Finland, across the Gulf of Bothnia. This crusade against heathenism went on for centuries with varied success, but the Christianity of Finland was superficial until after the Refor movement. The Knights of the Sword, or Sword-bearers, conquered Lapland early in the 13th century, and Prussia was gained by the Teutonic Knights, or Knights of St. Mary, a little later. Lithuanian and Pomerania were next won. Heathenism gave way to the Cross at nearly every point, and at last Russian Christianity had made half way by the militant faith from the west.

Enough has been said to justify the calling of this the crusading era of Christendom. Very little missionary work of the ordinary kind was done during these stirring centuries. Only 1,500 mendicant friars were sent among the Magyars by Innocent IV. In 1315 a disastrous attempt was made...
made to convert Muslims in Africa. Franciscans in Northwestern Persia are said to have had several thousand adherents at the close of the 14th century. In 1544 the Canaries, off the coast of Spain, became a part of the Pope. The Madeiras (1418-20), the Azores (1432-57) and the northwest coast of Africa (1486-97) received missionaries. The Cape of Good Hope was reached, the way to the East Indies opened up, and a new world was discovered just at the close of this period and the whole geographical problem that faced the Christian Church began to be understood.

VII. The Colonizing Church (1500-1700): Great as had been the expansion of Christendom in each of the previous periods, that of the 16th and 17th centuries was unprecedented. The Russian Church, after the defeat of the “Golden Horde,” quickly spread all over the territory now occupied by European Russia. In 1580 Russia, Yermak crossed the Ural Mountains, and within eighty years the Pacific was reached and over 4,000,000 square miles were added to the territories of Christendom—the whole upper half of the largest continent in the world. Church and state went hand in hand. The zeal of the Church carried it over the straits to Japan, and subsequent attempts to push up the St. Lawrence and the Mississippi were pushed vigorously in the East. The French and Spanish were the vanguard. The bishopric of Goa was established at Rome. Francis Xavier went to India and Japan. Father Ricci was in China. In 1622 the Propaganda was established at Rome. Francis Xavier went to India and Japan. Father Ricci was in China. In 1622 the Propaganda was established at Rome. In 1602 the Dutch East India Company was chartered. Ceylon was taken (1636), as well as Java, Formosa, Sumatra, Celebes and other islands. The natives were forcibly Christianized.

The map of the globe by the year 1700 was fairly complete. The great discoveries had all been made. The Christian world was last fully aware of the nature of the world-problem. Siberia, South America, Central America and Mexico, the West India Islands and the Atlantic seaboard in North America were the special additions to the territory of Christendom; in all fully 12,000,000 square miles.

VIII. The Church Evangelistic (1700-): It is not until we enter this period of the geographical expansion of Christendom that we find the Church pushing forward at all systematically to the conquest of the globe for Jesus Christ, and regaining the apostolic principle that such expansion only is gain as carries with it the hearts of the people of any territory newly occupied. The Propaganda was founded at Rome in 1622, but during the 18th and 19th centuries all the religious bodies of Western Christendom were one by one awakened to the duty of overcoming paganism and Mohammedanism. With experiments of the German pietists in the Danish mission in Tranquebar in 1705, and the organization of the little Moravian Church at Herrnhut in 1732, a new spirit appeared among Protestant Christians. A desire to obey the command of Jesus began to spread which was not alloyed by political aims or entanglements. Men in the different denominations began to feel for means of securing the extension of the kingdom in lands entirely closed to the influence of the Gospel. Among these prophetic for a new era for the Protestant world, Carey stood almost alone in 1792, but his words carried conviction, and the great missionary societies sprang up one after another and sent out their messengers until the pagan world is covered with a network of the agencies of evangelization; the Gospel is being preached and printed in every great language and in numbers of lesser dialects; the children and youth of heathendom are having their minds molded in Christian schools and a new type of manhood, purer, kindlier and more spiritually-minded, is attracting the people to enquire whence it has come. A summary of progress and results during this period will be found in the article Modern Missions, and need not be repeated here.

As we look on the map and discover small parcels of pagan territory like Hawaii, Samoa, Fiji, New Zealand and other islands of the Pacific which have been entirely Christianized within a century, and as we see men who were heathen like the people of these islands, like those of southern India, Japan, of South Africa, of Uganda, who are seriously taking up the work of evangelization, it is clear that this period of the expansion of Christendom is to continue until the maps of the world show no point which has not heard and adopted in some sort the gracious laws of the King of Kings.

GEORGENHOLTZ: A settlement in the Transvaal Colony, S. Africa, situated in the Zoutpansberg region on the River Pafuri. Station of the Berlin Missionary Society (1877), with 1 missionary and 5 native workers.
9. African Company in 1888 acquired a fifty years' lease of the coast territory, and in 1890 the German Government bought the rights of the Sultan of Zanzibar, by whom the lease had been made, and several European species flourish. Mournful vegetation luxuriant. All the tropical plants and several European species flourish. Mountain ranges, toward which the coast region gently rises, separate this region from the plateau which form the water-shed between the sources of the seaward rivers and of those of the Congo region. The regions west of Usagara and Ngoro, consisting of waterless plains, have a dry climate and are largely sterile. The first of these plains separates the Usagara from the populous district of Ugego. Beyond that district a second and plain is crossed, and the water-shed, averaging from 4,000 to 5,000 feet above the level of the sea, is reached. Hence flows the Shimuya River northward to the Victoria Nyanza, whence, emerging, it becomes the Nile. The Kufji also rises here and flows eastward to the Indian Ocean.

and streams which empty into Lake Tanganyika, and thence find their way to the Congo, have their birth here. A railway is open from Tanga to Mombo (82 miles). There are well-kept roads between the principal towns.

1. The Swahili (or coast tribes), the people of the coast and island of Zanzibar. They are of Bantu stock, and now intermingled with immigrants from all the neighboring regions, have a national unity supplied by their profession of the Mohammedan religion. The Arab element has enriched and extended their language, modified their usages, and developed their trading instincts.

The Swahili language is the general medium of intercourse with the tribes of the interior, and is spoken of as one of the 12 most important languages of the world, with reference to the vast area over which it is spoken. Besides the Bible and many religious tracts, it possesses already collections of proverbs, legends, poems, etc., and its literature is receiving constant additions. The Arabic alphabet is being replaced by the Roman.

2. The Wasagara, inhabiting chiefly the Usagara highlands, which separate the coast regions from the interior plateaus, have, in some of their clans, become more or less civilized through intercourse with explorers, while other clans remain in unrelieved barbarism. Their language is widely extended. The pierced lower lobe of the ear, which sometimes hangs down so as to touch the shoulder, serves to hold tobacco-pouches, instruments, etc., and is a mark of freedom. Slaves are forbidden to pierce or ornament the ears.

3. The Wasaramo are coextensive with the Swahili tribes on the west. Contact with the coast people has had a civilizing influence upon some of the tribes, who wear the Arab dress and have discontinued many of the ferocious practices which still prevail among their kin in the remoter districts. They do not practise circumcision, tho in many respects under Mohammedan influence. Their possession of firearms renders them formidable slave-hunters.

There are 7 Protestant missionary societies operating in this region: the German East Africa Mission, the Berlin, the Leipzig, and the Moravian societies and the Universities Mission and the CMS. The whole number of stations occupied is 36.

The Roman Catholic Missions have their headquarters at Bagamoyo.

GERMAN EVANGELICAL SYNOD of North America (1884): Previous to 1884, all the foreign missionary work of the Synod was done through European societies. Those interested in the work, however, felt that they should have work of their own, and a monthly periodical called The Missionary was issued to stir up the people with this end in view. Another element in the denomination, intimately connected with the Basel Society, the North German Society (of Barmen), etc., desiring that these societies should be supported, began the publication of the Evangelical Friend of Missions, to advocate their cause. Many members of the Synod deprecated this course, and a committee of nine was appointed to consider the advisability of the Synod's undertaking an independent foreign work and to report to a general meeting of the Synod in 1885.

GERMAN EAST AFRICA: A German protectorate and sphere of influence, lying between Portuguese E. Africa and British Central Africa on the south and British E. Africa and Lake Victoria Nyanza on the north. It has a coast line on the Indian Ocean of about 620 miles, and extends west to Lake Tanganyika and the Congo Free State. The area is 383,079 square miles, the population (estimated) 6,750,000, mostly Bantu negroes. The German E. Africa Company in 1888 acquired a fifty years' lease of the coast territory, and in 1890 the German Government bought the rights of the Sultan of Zanzibar, by whom the lease had been made, thus acquiring a protectorate over a territory larger by one-half than the entire German empire in Europe. A convention with England has fixed the boundaries between the protectorate and the British E. African territories. The seacoast (the Swahili coast) is a swampy and alluvial region, intersected by numerous streams. The climate is malarious, the rainfall abundant, and vegetation luxuriant. All the tropical plants and several European species flourish. Mountain ranges, toward which the coast region gently rises, separate this region from the plateau which form the water-shed between the sources of the seaward rivers and of those of the Congo region. The regions west of Usagara and Ngoro, consisting of waterless plains, have a dry climate and are largely sterile. The first of these plains separates the Usagara from the populous district of Ugego. Beyond that district a second and plain is crossed, and the water-shed, averaging from 4,000 to 5,000 feet above the level of the sea, is reached. Hence flows the Shimuya River northward to the Victoria Nyanza, whence, emerging, it becomes the Nile. The Kufji also rises here and flows eastward to the Indian Ocean.

The principal inhabitants of the German Protectorate are:

1. The Swahili (or coast tribes), the people of the coast and island of Zanzibar. They are of Bantu stock, and now intermingled with immigrants from all the neighboring regions, have a national unity supplied by their profession of the Mohammedan religion. The Arab element has enriched and extended their language, modified their usages, and developed their trading instincts.

The Swahili language is the general medium of intercourse with the tribes of the interior, and is spoken of as one of the 12 most important languages of the world, with reference to the vast area over which it is spoken. Besides the Bible and many religious tracts, it possesses already collections of proverbs, legends, poems, etc., and its literature is receiving constant additions. The Arabic alphabet is being replaced by the Roman.

2. The Wasagara, inhabiting chiefly the Usagara highlands, which separate the coast regions from the interior plateaus, have, in some of their clans, become more or less civilized through intercourse with explorers, while other clans remain in unrelieved barbarism. Their language is widely extended. The pierced lower lobe of the ear, which sometimes hangs down so as to touch the shoulder, serves to hold tobacco-pouches, instruments, etc., and is a mark of freedom. Slaves are forbidden to pierce or ornament the ears.

3. The Wasaramo are coextensive with the Swahili tribes on the west. Contact with the coast people has had a civilizing influence upon some of the tribes, who wear the Arab dress and have discontinued many of the ferocious practices which still prevail among their kin in the remoter districts. They do not practise circumcision, tho in many respects under Mohammedan influence. Their possession of firearms renders them formidable slave-hunters.

There are 7 Protestant missionary societies operating in this region: the German East Africa Mission, the Berlin, the Leipzig, and the Moravian societies and the Universities Mission and the CMS. The whole number of stations occupied is 36.

The Roman Catholic Missions have their headquarters at Bagamoyo.

GERMAN EVANGELICAL SYNOD of North America (1884): Previous to 1884, all the foreign missionary work of the Synod was done through European societies. Those interested in the work, however, felt that they should have work of their own, and a monthly periodical called The Missionary was issued to stir up the people with this end in view. Another element in the denomination, intimately connected with the Basel Society, the North German Society (of Barmen), etc., desiring that these societies should be supported, began the publication of the Evangelical Friend of Missions, to advocate their cause. Many members of the Synod deprecated this course, and a committee of nine was appointed to consider the advisability of the Synod's undertaking an independent foreign work and to report to a general meeting of the Synod in 1885.

GERMAN EVANGELICAL SYNOD of North America (1884): Previous to 1884, all the foreign missionary work of the Synod was done through European societies. Those interested in the work, however, felt that they should have work of their own, and a monthly periodical called The Missionary was issued to stir up the people with this end in view. Another element in the denomination, intimately connected with the Basel Society, the North German Society (of Barmen), etc., desiring that these societies should be supported, began the publication of the Evangelical Friend of Missions, to advocate their cause. Many members of the Synod deprecated this course, and a committee of nine was appointed to consider the advisability of the Synod's undertaking an independent foreign work and to report to a general meeting of the Synod in 1885.
Besides the above named missionary interests an independent, union mission society had been organized during the year 1855, in New Brunswick, N. J., by members of various churches and denominations, including Lutherans, German Presbyterians, Moravians, German and Dutch Reformed, and Evangelicals. The official name of the society was German Evangelical Mission Society in the United States. It sent the Rev. Oscar Grossmann of Leipzig). In social works of mercy J. Fr. Oberlin (1740-1826), the uplifters of the Alsatian Steinthal; Freiherr v. Kottwitz (1757-1843), the provider of churches and the poor in Berlin (1806); Johannes Falk (1768-1826), the founder of the orphans' home at Weimar; Christian H. Zeller (1779-1860), founder of the Institute of Mercy and for Teachers among the poor in Beug- gen; Amalia Sieveking (1794-1859), "the Tabitha of Hamburg," are to be here especially noted.

In 1833 Wichern founded a home for the rescue of depraved children in Horn, near Hamburg (Das Rauhe Haus), and developed a brotherhood. Independently, Theo. Fliedner (1838) unilaterally renewed the idea of the "Denkschrift," Die Innere Mission der Deutschen Evangelischen Kirche (1849), Wichern outlined the whole program of Inner Missions. It was necessarily necessitated by special, epidemic conditions of sin, which could not be met by family, State and Church. Inner Missions, twin-sister to Foreign Missions, sought especially the baptized that had lapsed. But in charitable work they had a wider scope, for the Church, under the cooperation, the churchly offices were to be respected, the confessional limits were not to be disturbed, but each confession was to work separately in the common spirit of Christ's love. Of the State and its ecclesiastical administration, the right of free association was asked. A central board and district societies were to be organized. The spiritually dead were to be revived, the general social condition was to be raised by Christian methods to be determined by the special needs and the locality. Wichern's program gave the whole outline of Inner Missions and largely determined their development. They were at first opposed by confessional Lutheranism, especially by Petri in Hanover, as leading to wrong unionism, checking the activity of the ministerial office, and usurping the work of the church. But confessional Lutheranism agreed with the spirit of love begotten of faith, and in Wilhelm Loehle in Neuenstettelsau, Bavaria (1808-1872), arose the promoter of Inner Missions in the strict Lutheran acceptance.

The union of all forces since 1848 caused such developments as the homes for laborers (Pethes in Bonn), Martha Homes for servants, the Christian foundling asylums, and the Christian care of idiots and epileptics (the largest epileptic home is in Bielefeld; Pastor Bodelschwingh). Systematic care of the poor was stimulated by Pastor Shunk in Erlangen, and by work in Elberfeld. Social cooperation in loan societies was promoted by Fr. W. Raffeisen in Flammersfeld, while G. Werner in Reutlingen sought by "brother-houses" to develop a Christian socialism. Since 1871 Inner Missions received scientific recognition, and are now taught in the universities. In practical work all lines of evangelistic and charitable endeavor have been begun, but of special importance are the Christian social work to unchristian socialists (Court Preacher Stoecker of Berlin), and evangelization (Pastor Schrenk).

Purpose: The purpose of Inner Missions in the evangelistic branch is to bring the Gospel to the masses, and to care for souls whom the regular work of the state church does not reach. Indirecdy and without criticizing or hindering the

German Southwest

THE ENCYCLOPEDIA OF MISSIONS

GERMAN INNER MISSIONS: Inner Missions embrace the whole work of loving faith in Christ as Rescuer, and seek by the Gospel and its applied truths in deeds of mercy "to renew, within and without, the condition of those multitudes in Christendom upon whom has fallen the power of manifold external and internal evils, which spring directly or indirectly from sin, so far as they are not reached by the usual Christian offices with the means necessary for their renewal." (Wichern).

All evil of every kind, in every social form and every class of men, is to be overcome (1) by the fullest, freest spreading of the Gospel, (2) by careful, comprehensive Christian charity.

History: While the unified labor as well as the definition of Inner Missions did not begin before Johann Hinrich Wichern (born 1808, died 1881), its direct precursors in evangelization, apart from the indirect stimulus of the Reformation and Pietism, were the "Christenthums-Gesellschaft," founded by J. A. Uhlrisperger (Augsburg, 1730), a mutual aid company of living Christians, the actual replacement of the literal destruction of the masses, the Bible societies (the earliest: Nuremberg, 1804; Stuttgart, 1812; Berlin, 1814), the Tract societies (Wupperthal, 1814; Berlin, 1814; Hamburg, 1820), the Gustav Adolf Society, to aid evangelical Christians in Roman Catholic countries with churches and pastors (founded November 6, 1832 by Dr. Johann Hinrich Wichern (born 1808, died 1881), by members of various churches and denominations, including Lutherans, German Presbyterians, Moravians, German and Dutch Reformed, and Evangelicals. The official name of the society was German Evangelical Mission Society in the United States. It sent the Rev. Oscar Grossmann of Leipzig). In social works of mercy J. Fr. Oberlin (1740-1826), the uplifters of the Alsatian Steinthal; Freiherr v. Kottwitz (1757-1843), the provider of churches and the poor in Berlin (1806); Johannes Falk (1768-1826), the founder of the orphans' home at Weimar; Christian H. Zeller (1779-1860), founder of the Institute of Mercy and for Teachers among the poor in Boug- gen; Amalia Sieveking (1794-1859), "the Tabitha of Hamburg," are to be here especially noted.

In 1833 Wichern founded a home for the rescue of depraved children in Horn, near Hamburg (Das Rauhe Haus), and developed a brotherhood. Independently, Theo. Fliedner (1838) unilaterally renewed the idea of the "Denkschrift," Die Innere Mission der Deutschen Evangelischen Kirche (1849), Wichern outlined the whole program of Inner Missions. It was necessarily necessitated by special, epidemic conditions of sin, which could not be met by family, State and Church. Inner Missions, twin-sister to Foreign Missions, sought especially the baptized that had lapsed. But in charitable work they had a wider scope, for the Church, under the cooperation, the churchly offices were to be respected, the confessional limits were not to be disturbed, but each confession was to work separately in the common spirit of Christ's love. Of the State and its ecclesiastical administration, the right of free association was asked. A central board and district societies were to be organized. The spiritually dead were to be revived, the general social condition was to be raised by Christian methods to be determined by the special needs and the locality. Wichern's program gave the whole outline of Inner Missions and largely determined their development. They were at first opposed by confessional Lutheranism, especially by Petri in Hanover, as leading to wrong unionism, checking the activity of the ministerial office, and usurping the work of the church. But confessional Lutheranism agreed with the spirit of love begotten of faith, and in Wilhelm Loehle in Neuenstettelsau, Bavaria (1808-1872), arose the promoter of Inner Missions in the strict Lutheran acceptance.

The union of all forces since 1848 caused such developments as the homes for laborers (Pethes in Bonn), Martha Homes for servants, the Christian foundling asylums, and the Christian care of idiots and epileptics (the largest epileptic home is in Bielefeld; Pastor Bodelschwingh). Systematic care of the poor was stimulated by Pastor Shunk in Erlangen, and by work in Elberfeld. Social cooperation in loan societies was promoted by Fr. W. Raffeisen in Flammersfeld, while G. Werner in Reutlingen sought by "brother-houses" to develop a Christian socialism. Since 1871 Inner Missions received scientific recognition, and are now taught in the universities. In practical work all lines of evangelistic and charitable endeavor have been begun, but of special importance are the Christian social work to unchristian socialists (Court Preacher Stoecker of Berlin), and evangelization (Pastor Schrenk).

Purpose: The purpose of Inner Missions in the evangelistic branch is to bring the Gospel to the masses, and to care for souls whom the regular work of the state church does not reach. Indirecdy and without criticizing or hindering the
in the pastoral stage. The Rhénan Missionary Society and the Finnish Missionary Society have established themselves in this country. Missionaries have great influence among the people. Their work commenced in 1842, and they have established centers in all parts of the territory.

**GERMANY:** Missionary Societies in: the actual names of many of the German Missionary societies being unfamiliar to English readers, search for them in their alphabetical place might prove fruitless. It has seemed best, therefore, to group them in this place, with more reference to the alphabetical order than to the chronological order.

The work of the Basel Society, territorially distinct from societies established within the German Empire, and that of the Moravian Brethren, which has an international quality, will be found described in the alphabetical place of each. As to the order in which the societies are named in this article, the alphabetical, rather than the chronological, order has seemed to offer advantages to our readers, also the year book of the General Missionary Conference of Saxony, to which we are much indebted, follows the other order of arranging the subjects.

**BAPTIST MISSIONARY SOCIETY (German):** This Society has relations with the BMS, but carries on independent work in the Kameruns. Its offices are in Berlin, and in 1902 it had in the Kameruns 5 stations, 14 missionaries, men and women; 49 native workers, 47 schools, and 2,170 professing Christians.

**PERIODICAL: Unsere Heidenmission, monthly, Berlin.**

**BERLIN MISSIONARY SOCIETY (Gesellschaft zur Beförderung der Evangelischen Missionen unter den Heiden. Often mentioned in German reports by the name "Berlin I. "):** The originator of the missionary movement in Berlin was "Father" Jänike (1748-1827), a man of honest, tho often rude, earnestness, who was an almost solitary witness to the Gospel in a time of little faith. He founded in Berlin in the year 1800 a school for training missionaries which rendered noble service to the cause of foreign missions during more than 25 years.

It was interested in missions by works of the school which, in 1823, led ten men, including Neander, Tholuck, von Gerlach, LeCoq, and others, to issue "An Appeal for Charitable Contributions in Aid of Evangelical Missions." The appeal was translated into English and German, and again the revised rules of 1882, require of them that their belief and teaching shall be that of the "canonical books of the Old and New Testaments, according to the Augsburg Confession and the Luther Catechism." These directions are not regarded as being in conflict with the principles of the statutes, but were occasioned by the necessity of the case. Instruction, church organization, preaching, must, if they are to go beyond the first principles, be in accordance with some one of the great religious systems. In practice the disputed points can be kept in the background, and the spirit of the liberal principle that was laid down can be the ruling one.

In 1840 and 1851, while, on the one hand, the work was taking on a more confessional character, there was a movement on the part of a minority of the committee for a broader platform. The majority, however, were against such abandonments of Lutheran organizations; the crisis was reached when one of the inspectors attempted to introduce ultra-Lutheran ideas into the seminary. This was intolerable to some of the students and committee; the withdrawal of the inspector upon his lapse to the Separated Lutheran party restored peace to the Society.

An important element in the general policy of the Society is the aim, constantly kept in view, to make the stations self-supporting, and that not only through the beneficence of the converts, but by profitable enterprises within the limits of the stations.
The usual method of establishing a station is to acquire by purchase or by cession a property which may not simply serve for a lot on which to erect the buildings of the mission proper, but will be large enough to furnish dwellings for the native converts who are to constitute the parish. The community thus gradually grows in numbers by settlement upon mission land; church and dwelling-house are erected; a school is established and, perhaps, a store, a mill, or whatever enterprises are fitting, one aim in it all being to engage the natives in some civilizing employment. If the size of the station warrants it, a catechetical school comes to the aid of the missionary; native helpers are employed; outstations are opened up, and other preaching places in addition. These in turn are made independent of the original one as their growth or prospects warrant. In localities where there are German immigrants as well as natives, the work among the latter often begins as a branch of the activity of the former in their own church.

Missions: I. Africa, (1) Orange River Colony: The first missionaries of the Berlin Society went in 1838 to work among the Boshagens of South Africa. They were unsuccessful and three of the five men first sent out founded a station called Bethanie in Orange River Colony. Other stations founded in that mission were, Peniel, (1841), Adamsfontein (1857), Blumenfontein (1875), and Beaconfield (1885). The opening of the diamond mines brought into the field a mass of the worst elements, and a controversy with the British Government as to the legal ownership of the land occupied by the station had a depressing influence on the work. Of late the situation has improved and the mission reports: (1903) 8 stations, 65 outstations, 15 missionaries, 125 native helpers, 3,254 communicants, 1,084 pupils.

(2) Kaffraria: In 1837 work was begun at Boshagen, but without much apparent success for some years, largely due to the disturbed political condition. Other stations are Petersburg (1857), Emdizeni (1864), Etembeni (1868). There are reported (1903) 5 stations, 9 outstations, 7 missionaries, 26 native helpers, 500 communicants, 366 pupils.

(3) Cape Colony: Work in this section was commenced at Zoar (1838) in connection with the South African Missionary Society, and conducted with varying fortunes until 1867, when the entire work was assumed by the Berlin Society. The principal stations are Amalienstein (1856), Riversdale (1868), Herbertsdale (1872), Mosselberg (1879), Laingsberg (1883). There are reported (1903) 7 stations, 31 outstations, 20 missionaries, 89 native helpers, 2,712 communicants, 1,100 pupils.

(4) Natal: Emmaus was occupied in 1847; other stations are Christianenberg (1848), Stendal (1860), Emangweni (1863), Hofhennet and Königsberg (1868). There are reported (1903) 6 stations, 38 outstations, 10 missionaries, 72 native helpers, 1,345 communicants, 390 pupils.

(5) Transvaal: In 1848 the Society decided to discontinue work that it had undertaken in the East Indies, and after some years it enlarged its work in Africa, occupying the Transvaal, with a mission which has become the largest and most prosperous one under its care. The first station was Gerlachshoop (1860), afterward destroyed in the tribal wars. So also Khatilolo (1861) had to be abandoned for some years. Botshabelo (1865) grew rapidly even through the English and Boer troubles, a printing establishment and training school being established there. Other stations in South Transvaal are Pretoria (1866), Wallmanstad and Neuhalle (1869), Potchefstrom (1872, formerly under care of the WMS), Heldergar (1875), Wogenshin (1876), Arkona (1877), Lobethal (1877), Mossegu (1880) and Johannesburg. In the South Transvaal Mission are reported (1903) 13 stations, 112 outstations, 17 missionaries, 191 native helpers, 6,000 communicants, 1,085 pupils, and in the North Transvaal 16 stations, 167 outstations, 19 missionaries, 195 native helpers, 2,550 communicants, 1,700 pupils.

(6) German East Africa: With the partition of Africa and the adoption of European spheres of influence the different German missionary societies undertook to care for the German sections. As early as 1891 the Berlin Society occupied Wangemaenschöp, near the upper end of Lake Nyassa, and it extended its operations in that vicinity, establishing stations at Manow (1892), Muakereri and Ikombe (1896), and Bulongoa in 1895. Two years later, with the termination of boundaries, there was a great advance, and in 1897 6 stations were established—Kidugala, Ilembule, Lupembe, Mbejela, Mutedi and Mufanga, this last being the farthest north. There are reported (1903) 14 stations, 26 outstations, 25 missionaries, 20 native helpers, 115 communicants, 300 pupils.

II. China: In 1846 Gutzlaff, who had been in China nearly twenty years, most of the time as an independent worker, appealed to the Rhenish and Basel societies for assistance, and four years later by a personal visit aroused much interest. Various unions were formed, but eventually consolidated into two, at Stettin and Berlin. The three organizations worked on with varying success until the prosperity of the Berlin mission in South Africa made it seem feasible for it to undertake a wider work, and in 1882 it took over the work in Canton, arranging boundaries with the Basel Society, and since then it has been prosperous. Most of its work is in the vicinity of Canton, but 2 stations, Syuyin (1869) and Tochhchin (1898), are some distance to the north. There are reported (1903) 11 stations, 88 outstations, 28 missionaries, 140 native helpers, 1,418 communicants and 500 pupils.

In sending out its statistics the Society reports a class of native Christians in almost every instance very nearly double the number of communicants.

The periodical publications of the Society are: Berliner Missionarische, monthly; Missionsfreund, monthly; Kleiner Sammler, quarterly; Kleiner Missionar, weekly; Hosianna (for children), quarterly; Sunday schools, monthly; Hosianna (for children), monthly. All these are published in Berlin.

BERLIN WOMAN'S MISSIONARY SOCIETY FOR CHINA (Berliner Frauen-Missionare für China): This Society, organized in 1850, largely under the influence of Gutzlaff, has for its special purpose the care of Chinese girls who have lost or been separated from their parents, and their training into Christian workers. Its sole enterprise is the Bethesda orphanage at Hongkong, where 3 missionaries have 115 girls under their care.

PERSONAL, for members: Mitteilungen der Berliner Frauenvereine, etc., quarterly.

BLIND OF THE FEMALE SEX IN CHINA; GERMAN MISSION TO THE: This Society has its headquarters at Hildesheim. Its work has been limited to the
established church, Inner Missions spiritualize those who lack living faith. In diaconic work Inner Missions seek to perform the tasks of mercy which rest upon family, state, and church, and which are the work of the establishment or the church, normally to undertake and accomplish with their means, but which they cannot, or cannot yet accomplish because of accidental, historical reasons.

Workers: As its agents, Inner Missions employ mainly as itinerants, or superintendents of institutions or city missions, trained male workers like the brothers of the Rauhe Haus, or deacons, patterned after the service of the ancient church, and frequently deaconesses, who represent the ancient female ministry of mercy (See Deaconesses). But in addition many free laborers are required, and, by emphasis upon the spiritual priesthood of believers, all Christians are encouraged to help.

The Work: This includes (1) training of children in day nurseries, Christian kindergartens, Sunday schools, orphanages, or educational societies; (2) the protection and education of the young in industrial schools for girls, homes for servant girls, young women's and men's associations, homes for apprentices and for traveling work, a financial agency to meet the regular costs of the sick in asylums for deaf and dumb, blind, idiots, epileptics, insane, cripples, children's hospitals; by fresh-air work, and through nursing of the sick poor in their homes; (4) the protection of the endangered, as workmen wandering from place to place with their families, for out-of-work men and emigrants; (5) the reclamation of the lost in refuge for neglected children, homes for Magdalens and inebriates, farm colonies for tramps, and religious work among prisoners; (6) efforts to suppress social evils through city missions, parish work, care of the poor, savings banks, loan societies, Christian socialistic endeavors; (7) evangelizing the people by free addresses, preaching, distribution of sermons, tracts, Bibles, and Christian literature, and by free libraries.

The Methods are determined with care and deliberation. Besides the individual workers there is a central advisory board, and there are district associations and conventions to discuss the problems. To obtain what is needed, societies are organized. The society (Gesellschaft) is largely a financial agency to meet the regular costs of the sick poor in their homes; masters and workmen, mistresses and servants are brought together in common bonds. As Inner Missions attempt to uphold the family, so they also aid the state. By doing work which is the state's, by opening up the understanding of real needs, they induce the state finally to a larger and better care of the poor, the socially neglected, and the criminal. Better legislation is fostered, and the public conscience aroused. The Church is the goal of all this work. Many workers are pushed toward the spiritual work. While the social work is directed into churchly channels. The state church and its governmental administration will not allow the incorporation of Inner Missions in the church, because they would lose their vitality, become official and fail in interesting and finding support from the common people. But whenever occasion permits, and when the work can be carried on successfully by the organized state church, it is transferred. Still the principle of free association is maintained as the most effective stimulus.

The efficiency of Inner Missions is best seen in their development of all works of mercy. Almost every field has been occupied. The evangelistic work has constantly grown. The general religious life is sober, constant rather than intermittent, sensational, emotional. Southern Germany, especially Wurttemberg, has a larger element of feeding in its religion. The fruitfulness of consistent life is not, however, larger. Least effective have been the endeavors to meet socialistic ideas by Christian counterorganizations on the basis of a Christian socialism. The ideals of Christian socialism are either too advanced for the present ethical standard, or unjustly depreciate true individual ownership and right. The response has, therefore, been comparatively small.

B.), The Inner Mission; Wilhems, Religious Life in Germany; Wenner (G. U.), The Inner Mission of Germany (Evang. Alliance, 1895); Henderson (Chas. R.), The German Inner Mission (American Journal of Sociology, March, May, July, 1890).

GERMAN SOUTHWEST AFRICA: A German dependency on the west African coast which it borders for a distance of 950 miles from the boundaries of Angola on the north to Cape Colony on the south. The territory reaches to the east as far as the 17th parallel and is bounded east by the British territory of Bechuanaland. It includes Damaraland and Namakauland. The area is estimated at 326,117 square miles and the population at 250,000, of whom 4,674 are Europeans, in great part Germans.

The cliffs stretch with greater or less regularity parallel to the coast, and at an average distance inland of about 120 miles. From the coast to this ridge the land is terraced. The land west of this ridge passes through deep depressions off into the Kalahari Desert and the Kubango basin. The rainfall is very slight, and much of the coast is a sandy waste, tho on the uplands much pastureage is afforded, and in the northern districts are vast fertile plains. Rich copper ores have been found in many of the plateaus. The population is very scanty, especially in the south, where droughts and famines have well-nigh depopulated the country. Hottentots occupy about three-fourths of the land, and constitute about one-fifth of the population. To the north are the Bantu tribes, Hereros and Ovambos, described as robust, intelligent, and industrious, but still
single station of Tso-kiwong, near Hongkong, where it carries on a school for blind Chinese girls and where it has 2 women missionaries and 6 native workers, 16 pupils in the school, and 20 converts. It has now (1903) opened another school for the blind, in Kow-long, the territory on the mainland facing the island of Hongkong, which has been placed under the protectorate of Great Britain.

BREKLUM MISSIONARY SOCIETY (Schleswig-Holsteinische Evangelisch-Lutherische Missionsgesellschaft in Breklum): Among the churches uniting in the North German Missionary Society were a number in the province of Holstein. After some years one of the pastors, Jensen, who for a few years had edited a paper in which mission work was a special feature, was urgent that the churches of that section should have their own society. He did not at first receive much support, but went forward on his own account and in 1876 bought the ground for a mission institute, later securing the endorsement of about fifty churches. A board of twelve directors, clergymen and laymen, was elected. Its number, when augmented, the Lutheran Church Confessions adopted, and the institute was dedicated the next spring at Breklum.

The first missionaries were sent out from the institute in the winter of 1882; two went in the service of the Netherlands Missionary Society, and two under the auspices of the new organization. The field to be occupied was suggested by a missionary of another society—viz., the kingdom of Bastar, in the Central Provinces of India. The difficulties in this inland region, however, were very great, and after some delay the missionaries removed to the Vizagapatam district and formed a station at Sahir. The work was fairly inaugurated in 1885, and since then it has developed until there are (1903) 7 stations, 51 outstations, 23 missionaries, 70 native helpers, 3,741 baptized Christians, 1,988 pupils.

PERIODICALS: Schleswig-Holsteinische Missionsblatt, monthly; Sonntagsblatt fuer Haus, weekly; Frauen-Missionsblatt, monthly; Der Kleine Missionskalender, monthly; (in Danish) Fort Missionsblad, monthly, Breklum.

CHINA INLAND MISSION, German Branches: (1.) China Alliance Mission, Barmen: This Society, organized in 1884, has 7 stations in the provinces of Che-kiang and Kiang-si, China. In 1902 it had 15 missionaries, men and women; 19 native workers, 3 schools and 73 professing Christians.

ORGAN: Der China-Bote, monthly, Barmen.

(2.) German Branch, Liebenzoll in Wurtemberg: It was organized at Hamburg in 1899, and has 3 stations in the provinces of Kiang-su, Eunam, and Shansi, China. It has (1902) 7 missionaries, men and women; 1 native worker, and 2 schools.

ORGAN, China's Millions, monthly.

DEUTSCHE ORIENT MISSION: This organization grew out of sympathy for the needs of destitute Armenian survivors from the Turkish massacres of 1895-96. It is under the general direction of Dr. Lepsius, its founder, and devotes itself chiefly to school and orphanage work wherever Armenian refugees are found in Bulgaria, Persia, and Turkey.

PERIODICAL: Der Christliche Orient, monthly, Berlin.

EVANGELICAL MISSIONARY SOCIETY FOR GERMAN EAST AFRICA (Evangelische Missionsgesellschaft fur Deutsche Ostafrika; Berlin III): This Society, organized in 1886 by Pastor Dietelkamp, carries on an extensive work on and near the coast of German East Africa. There are two centers, Dar-es-Salaam, just south of Zanzibar, and Tanga, near the border of British East Africa, opposite the Island of Pemba. The temptations to have occurred some temporary difficulty, but to have been settled on a broad, liberal basis.

In the southern section there are (1902) 3 stations, and in the northern 6 stations occupied in the following order: Dar-es-Salaam 1887, Tanga 1890, Honbofiefried 1891, Kissarawe 1892, Bethel (Neubothel) 1893, Manerumango 1895, Vuga 1895, Bumubi 1899, Bungu 1903. There are reported (1902) 28 missionaries, 22 native workers, 642 native Christians, 889 pupils in schools.

GENERAL EVANGELICAL PROTESTANT MISSIONARY SOCIETY (Allgemeine Evangelisch-Protestantische Missionverein); Under influences from Switzerland this Society was organized at Berlin in 1884, to represent the more liberal theological views in the Lutheran and Reformed churches of that country, particularly among the upper classes, in the more civilized countries, and it lays special stress upon literary work and scientific instruction. It has (1902) 2 stations in Japan (Tokio and Kioto) and 2 in China (Shanghai and Kiao-chau). Altogether in both countries it has 1,150 missionaries, 140 baptized Christians, with 189 pupils in its schools.

The Society publishes two monthly periodicals: Zeitung, fuer Missionstrande und Religionswissenschaft; and Missionar, des evangelisch-protestantischen Missionsvereins.

GOSSNER MISSIONARY SOCIETY (Gossnersche Missionsgesellschaft, Berlin II): Johannes Evangelista Gossner (1773-1858) was baptized and educated in the Roman Catholic Church, and held a small benefice at Munich. He came early under the influence of Martin Boos and gradually adopted his evangelical tendencies became so apparent that in 1817 he lost his benefice. But he did not publicly embrace Protestantism until 1826. From 1829 to 1846, when he retired as pastor emeritus, he had charge of the Bethlehem Church in Berlin.

The missionary zeal which he had from his peculiar character of grandeur may have been awakened by Martin Boos, who, the he never left the Church of Rome, was himself a kind of evangelical missionary, and for that reason was violently chased from place to place by the Jesuits. But otherwise it was a spontaneous outgrowth of his own nature, and he received his specific impulse toward the preaching of the Gospel to the heathen from his intimate connection with Spittler, one of the founders of the Basel Mission Society and a representative of the Pietist circles in Germany, and from the Moravian Brethren, who for a whole century had been the sole representatives of the missionary idea in German civilization. He became, in 1831, one of the directors of the Berlin Missionary Society, but in 1836 withdrew because he adopted his ideas of what a Christian missionary should be into harmony with the Society's ideas of how a Christian mission should be worked. He had his eyes fixed upon the Apostle—a man driven onward by the fire of his faith and throwing all his cares on God, while the he adopted the English model of a mission—a thoroughly organized institution, supported but also governed by the Christian community that estab-
lished it. Gossner felt perfectly certain that he was not wrong, but it was a long time before he came to understand that the Society was not wrong either. He seems to have given up despair, and felt very much perplexed when, seven months after, eight young men, artisans, who could and would support themselves wherever they went in the world, came to him and asked to be instructed and prepared so as to be sent out by some mission society, or to go out on their own account to preach the Gospel to the heathen. However, "this comes from the Lord," he said to himself, and undertook the task. After about six months' preparation these young men went, under the leadership of the Scotichan, Dr. Lang, to South Australia, and in the meantime new pupils had been received.

Then came difficulties with the ecclesiastical authorities and the government, but in 1842 the Society received royal sanction. This, however, made no essential change in methods, the missionaries being transferred to other societies or left to their own conduct. Such a system could not continue, and Gossner was forced at last to accept an organization on a broader foundation.

In 1844 a number of Gossner's pupils had their attention directed to the Kols of Chota Nagpur, in India. The race was degraded and it was five years before a single convert was baptized. Then came such overwhelming success that the question was not about a more or less slow progress by single converts, but about the conversion of a whole people. "We will have them all," explained Gossner in his enthusiasm; "every one of them." But it was evident that in such an organization—a loose association of individual efforts—the mission was not able to manage the affair. When the missionaries fell out with each other, Gossner had no other means of settling them right than telling them: "If you don't agree, I shall stop praying for you." Then two great calamities befell the undertaking—the Sepoy rebellion and the death of Gossner. At first the rebellion actually threatened to extinguish the mission. The missionaries fled to Calcutta; their houses, schools, and churches were demolished, and the native members of the congregation were exposed to harsh persecution. When this news reached Berlin, Gossner made an offer to transfer the mission and all his personal property to a Curatorium; from his accounts it was not wrong, but it was a long time before he became a full pastor of the church. From the first it was supported by the peasants, without special canvassing for funds, and the men chosen to go out as missionaries were from peasant homes.

Good public-school training was the only educational qualification required for admission to the institute established. The course was at first four years, later lengthened to six. In this school not only books were taught, but also farming, carpentering, and the like; for one prominent feature of the proposed mission was that colonization should be united with evangelization. Thus the development of agriculture and the civilization should be introduced together. Moreover, the mission station should be largely self-supporting, in order that the home contributions might be devoted chiefly to defraying the expenses of sending out men. Music was emphasized from the first, as is also the case on the field. Practical homiletical training was gained by the pupils by holding mission meetings in the neighborhood.

In 1853, the first men—eight missionaries and as many colonelees—were ready to enter the "Candace," one of the mission ships that played so important and romantic a part in the history of missions. A printing establishment was founded in 1856-7, and in the latter year the mission was chartered. It was to remain a private affair, yet to be under direction of the Hanover Consistory, in so far as that ordination was to be by this body; a report was to be made to it annually, and the right of inspection to be yielded to it. An advisory committee of ten was established, to which the property of the mission was transferred. In 1860 a second Mission House was erected, the property of the mission being represented on the Board.
Of special interest is the policy of the Society, carrying out that of its founder. This was to Christianize the land into which his laborers should go; not simply to convert certain heathen, and attend to their spiritual welfare, but to infuse into heathendom the leaven of Christianity, that it should influence the whole land, and that thoroughly. This was his reason for sending out colonists; this led him to be satisfied with slow advance if only his object was reached in the territory already occupied; this led him also to counsel the establishment of a central station from which the new ones should be supported and supplied—a veritable swarming process. There was in his scheme not a little touch of old apostolical fervor; for example, among the settlers upon a station there should be perfect community of property; each was to work for the common good, and all acquisition was to be applied to mission purposes. The ordained missionaries, tho not working for material prosperity, were none the less employed in mission work; and, on the other hand, the colonists were to be regarded as of equal rank with the clergy, tho their chief work was to supply the physical needs of the community. There has been from the first a most intense Lutheran spirit in the Society. Harms would have all the ordinances of that church practiced on the mission stations, and church and church government, as well as creed, should be identical with the home church. The stations should have a complete organization, ecclesiastical and also political, tho it has been found necessary to modify the forms of the churches, to adapt them to the peculiar needs of mission communities.

In all these respects the influence of the founder has maintained itself, and yet many changes have been introduced in the course of the years in the details of practical management. The stations were never quite self-supporting. Community of property has been abandoned; it was found impractical, for it was but natural that the farmers attached to the mission dislik ed to be entirely destitute of property, while those not attached to the station were making provision for their families. So long as the colony remained composed of unmarried men (and none others were sent) life in common could be maintained; but so soon as their brides were sent to them from home it was found impossible to maintain the custom. Separate homes must be established. Moreover, there was friction continually arising between the ordained missionaries and the colonists as to the division of the work; the latter demanding more assistance from the former than they were inclined to give, the former asserting their superiority in unimportant ways; so the colonist feature of the work was discontinued in 1869. Quite early in the history of the Society superintendents were appointed over the various sections of the field.

Missions: 1. Africa: The first colony was established in Co-ulla territory in East Africa, but met with such difficulties that the settlement was made, not there but in Natal. From this the Zulu mission was developed, with stations at Hermannsburg, Ehlansen, and various points on the Tugela River. This mission had some hard experiences.

After waiting in vain for fruit of their hard labor, the experiment was tried of requiring all natives who were cultivating mission land to send their children to school, or pay rent, or vacate; the first they would not, the second they could not, and the third they did do, until the experiment thus proving unsuccessful, they were allowed to come back. Another more successful scheme was the establishment here of a seminary for training native pastors, from which the new ones should be supported and supplied—a veritable swarming process. There was in his scheme not a little touch of old apostolical fervor; for example, among the settlers upon a station there should be perfect community of property; each was to work for the common good, and all acquisition was to be applied to mission purposes. The colonization scheme was never employed in this mission. Beginning in 1858, gradually a network of stations was formed over the whole western half of the Transvaal Colony, and the extended also into the British Bechuanaland on the west. This extreme western section had been occupied by English missionaries, but they had retired before the Dutch Boers; later the Hermannsburg Mission gave up the field to the LMS. There were reported (1900) 46 stations, 103 native workers, 45 missionaries, 396 native workers, 25,400 communicants, about 40,000 baptized Christians and 6,058 pupils.

2. India: In 1866 an appeal came to the Society for work among the Telugu of India, and men were at once sent out who established a central station at Naidupet. The work has increased but slowly, and there were reported (1900) 9 stations, 13 outstations, 12 missionaries, 91 native workers, 1,693 communicants, 870 pupils. Other enterprises commenced have been subsequently abandoned. One to New Zealand was given up, and one to Australia was handed over to the Evangelical Lutheran Immanuel Synod of Australia. A work was also begun in Persia, which, however, has not been developed.

Periodicals: Hermannsburger Missionsblatt, fortnightly; Missionsblatt für unsere liebe Jugendl; Hermannsburg, Hanover.

JERUSALEM UNION IN BERLIN (Jerusalemsverein zu Berlin): Founded by Court-preacher Strauss in 1852. In aid of German evangelical institutions in the Orient, in the vicinity of Jerusalem, this Society supports schools, hospitals, and hospices, for the “inner and outer mission” among the native inhabitants of that region, and among Germans resident there. The conduct of its affairs is in the hands of a committee of at least 16, who elect their own successors. The Union has, from the first, enjoyed royal support, and for long years was under the special protection of Empress Augusta. Since the present Emperor’s visit to the Levant, in 1897, it has received special support and encouragement. The chief activity of the Union is in Jerusalem, where it has a large distinctively mission character than in other stations. Here the funds are supplied to support in part various German institutions which have a mainly national character. It contributes to the salary of the pastor of the German church, who makes quarterly visits to the Germans in Haifa and Jaffa, and to that of the assistant preacher, who is also teacher in the German school. As early as 1867 a collection was made in Germany for church building in Jerusalem; in 1869 the Prussian crown came
into possession of the Murestan, the site of the old convent Santa María Magda; the locality was extended to include now a Ziegenbalg and Schwartz. There are 2 Mission stations, 1 native worker, 11 pupils. For the rest of the southeastern Asia, see Table of Missions.

OTHER MISSIONS. The Women's Aid Society of the Leipzig Evangelical Lutheran Mission (Frauen-Hilfs Verein der Evangelisch-Lutherischen Missionsgesellschaft zu Leipzig) is auxiliary to the Society, with special reference to its work for women in India.

Periodicals: Evangelisch-Lutherische Missionsschrift; Neu-Deutsche Missionsgesellschaft: also the following: Der Missions und Heidenbote, monthly, with supplement relating to work in North America, Australia, and New Guinea; Der Missionsbote, fortnightly, Kiel; and Der Missions und Heidenbote, monthly, Neukirchen.

Leipzig Evangelical Lutheran Mission Society (Evangelisch-Lutherische Mission zu Leipzig): As early as 1819 there was in Dresden a missionary association closely affiliated with and working through the Basel Society. With the development of the Church, the need for a more aggressive and direct missionary movement became apparent. In 1823 the Dresden association established its own mission school, which in 1826 developed into a complete missionary seminary, and in the latter year it also constituted itself an independent mission society, which was removed to Leipzig in 1846.

In 1844 Dr. Karl Graul became president of the Society and director of its seminary. He traveled extensively in the East and came to conclusions which resulted in the complete dissolution of the connection between the Leipzig and the Basel societies. The Basel Society, in accordance with all pietistic missionary labor, aimed simply at individual conversions. Dr. Graul, on the contrary, looked for a national conversion, and he consequently demanded more support from the missionaries he sent out, namely, an intimate acquaintance with the whole state of civilization,—religious, scientific, literary, political, and social—among the people to whom they were sent. He also wished to make the Leipzig Society the center of the entire missionary activity of the Lutheran Church, and he gave its labor a strictly Lutheran character, which imposed upon the laborers a certain reserve toward the collaborators of other denominations.

missions. 1. India: As was natural, the attention of the Society was turned to India, and some of its missionaries commenced work among the Tamils in 1840. This gave good occasion for the transfer of the property of the old Danish-Tamil Mission (itself conducted on high-church Lutheran principles), when Tranquebar was ceded to England in 1845. Two years later the transfer was complete, and the Leipzig Society entered into the inheritance of Ziegenbalg and Schwartz.

The case question at one time threatened to endanger the success of the work, as the policy of the Society in regard to it was rather too lenient. That, however, was overcome, and the growth and strength of the mission is indicated by the following figures (1902): 49 stations, 769 outstations, 41 missionaries, 743 native workers, 19,178 communicants, 9,407 pupils.

2. Africa: In 1892 the Leipzig Society joined the number of German organizations working in Africa, and took charge of a mission in British East Africa, which had been founded by a Bavarian Society. This mission, called the Mahamba Mission, has (1902) 3 stations, Jumpa (near Mombasa), Ikutha (near Mt. Kenya), and Mulango, with 9 missionaries.

A little later the Society began a distinct mission in the vicinity of Mt. Kilimanjaro, in German territory, known as the Majagga Mission. This reports 6 stations, and 16 missionaries.

The Women's Aid Society of the Leipzig Evangelical Lutheran Mission (Frauen-Hilfs Vereine der Evangelisch-Lutherischen Missionsgesellschaft zu Leipzig) is auxiliary to the Society, with special reference to its work for women in India.

Periodicals: Evangelisch-Lutherische Missionsschrift; Neu-Deutsche Missionsgesellschaft; also the following: Der Missions und Heidenbote, monthly, with supplement relating to work in North America, Australia, and New Guinea; Der Missionsbote, fortnightly, Kiel; and Der Missions und Heidenbote, monthly, Neukirchen.

Neuendettelsau Missionary Society (Gesellschaft für Innere und Aussere Mission im Sinne der Lutherische Kirche): This Society was organized first, in 1849, with special reference to work among Lutherans in America, and to some extent, among the Indians. Later, in 1885, in connection with the Immanuel Synod of Australia, it commenced work among the natives, and the same year celebrated the occupation of Kaiser Wilhelm's New Guinea by sending missionaries there. It reports (1902) 7 stations, 15 missionaries, 30 communicants, 90 pupils.

Periodicals: Freimund's kirchliches und politisches Wochenblatt, weekly (with supplement relating to work in North America, Australia, and New Guinea); Die Uhren­serin auf dem Missionsfelde, monthly, Neukirchen.

Neukirchen Missionary Institute (Neukirchener Missionsanstalt): This Society was founded in 1882 by Pastor Doll of Neukirchen, with the intention of carrying on the work which Dr. Graul, in consequence of his death in 1847, was unable to complete. The institution represents the standpoint of the China Inland and similar faith missions. It has, however, come to be conducted on the same general principles as the other societies.

The fields of work are Java and British East Africa. There are reported (1902), in Java, 7 stations in the two districts of Samarang and Rembang, 9 missionaries, 46 native helpers, 565 baptized adults, 562 pupils. The classes reached are Mohammedans, Javanese, Chinese and some Arabs.

In Africa the work among the Mohammedans, along the Tana River, has not proved successful, but one baptized adult being reported at Lamu after 14 years of effort. Among the Swahili there has been better success. There are (1902) 4 stations, 8 missionaries, 142 baptized adults, 171 pupils.

Periodicals: Der Missions und Heidenbote, monthly, with supplement; Jugendmissionsschrift, monthly; Die Uhren­serin auf dem Missionsfelde, Neukirchen.

North German Missionary Society (Nord­deutsche Missionsgesellschaft): As early as 1802 there was formed in East Friisia, in response to
influences from the Moravian and the London Missionary Societies, a "Mission Society of the Mustard Seed," for the purpose of collecting funds in aid of missions. Other similar unions were formed throughout North Germany, the most important being one in Bremen in 1819. The collections were sent to Janicke in Berlin and to Basel, and two men presenting themselves for service aroused great interest. Other unions were organized at Lübeck (1820) and Hamburg (1821), but movement was made until 1834. In 1836 seven unions, Bremen, Stade, Hamburg, Lauenburg, Ritzebultel, Leba, and Bremerhaven, organized the North German Missionary Society, with headquarters at Hamburg, where in 1837 a Missionary Institute was established.

From the beginning there were in these unions numbers of both the Lutherans and the Reformed bodies, and this resulted both in difficulties on the field and divided counsel at home. Gradually, as the discussion grew sharper, several of the more interesting Lutheran unions withdrew; the headquarters were removed to Bremen, and the Society gradually became largely Reformed, the union feature never disappeared, and there are Lutheran as well as Reformed members on its committee.

Mission. The first movement of the Society was toward New Zealand, where work was commenced in 1842 but not developed, the one of the two missionaries remained for some time and continued to receive help. The next year men were sent to the Telugus in India, but that work was handed over to the American Lutherans, and the Society concentrated its efforts on the west coast of Africa, just east of the Gold Coast Colony. Among the principal stations are Accra, Anyako, Keta, etc. The terrible climate has been a heavy drawback, but the Society has persevered and reported (1902) 5 stations, 37 outstations, 27 missionaries, 74 native workers, 2,908 communicants, 1,487 pupils.

Periodicals: Monatsschrift der Nord. Miss.-Gesellschaft, monthly, Bremen.

RHENISH MISSIONARY SOCIETY (Rheinische Missions-Gesellschaft in Barmen): A small missionary union of twelve laymen was formed in 1799 in Elberfeld. As it grew in numbers it inaugurated the Bergische Bible Society and the Tract Society, with headquarters at Bremen. In 1819 a mission was formed at Barmen, which worked in connection with the Basel Missionary Institute but organized its own school in 1825. Three years later these two, joined by unions at Cologne and Wesel, formed the Rheinish Missionary Society, with headquarters at Barmen. The first missionaries went to South Africa and landed at Cape Colony in October, 1829. In that region 40 missionaries under the direction of the Moravian Brethren, the London Missionary Society, the Wesleyans, and the Scotch Free Church were already at work at 30 stations among the Hottentots, Kafirs, Negroes, Bastards, etc. Therefore the Rheinish missionaries hesitated where to go. Finally, in the beginning of 1830, they founded their first station at Wupperthal, and in 1832 they had consecrated their first church at Unterbarmen.

In 1834 the Society found that they had more missionaries ready for work than could be employed in Africa, and, moved by what they had heard from the American missionary, Abel, and the LMS missionary, Medhurst, they decided to open a new field in Borneo, to which they afterward added two other islands in the Dutch colonies of the East Indies, Sumatra in 1862, and Nias in 1865. In 1846 they also began a Chinese mission, and in 1887 inaugurated work in Kaiser Wilhelmland, in New Guinea. In its general character the Rheinish Society has followed the main lines of the Basel Missionary Society, and carries the cordial support of both Lutherans and Reformed. It met with financial difficulties in 1851, which compelled the transfer of parts of its Chinese mission to the Basel and Berlin societies, but it soon regained lost ground and continued to enlarge its work.

Missions. 1. Africa: There are three missions in Africa: Cape Colony, Namaqua-Herero, and Ovambo. The Cape Colony mission covers the region in the vicinity of Cape Town, altho one station, Carnavon, is in the center of the colony, and three others, Steinkopf, Concordia, and Komaggas, are in the northwest part of the colony. The work is among the Hottentots, Negroes, half-breeds, etc. The mission met with financial difficulties in 1851, which compelled the transfer of parts of its Chinese mission to the Basel and Berlin societies, but it soon regained lost ground and continued to enlarge its work. The Namaqua and Herero mission is in German West Africa, and covers the entire territory occupied by the Namaqua Hottentots and the Herero Negroes. There are (1902), 24 stations, 35 outstations, 35 missionaries, 123 native helpers, 8,303 communicants, 2,405 pupils. The Ovambo Mission is on the border of German West Africa and the Portuguese district of Angola. The youngest of the missions, it has 24 stations, 5 missionaries, 2 native workers, 500 communicants, 130 pupils.

2. Dutch East Indies: The work of the Rheinish Society in Borneo was commenced in 1842 among the Dyaks of the southeastern portion of the island. The first efforts met with little success, no convert being baptized in eight years. They adopted two measures, both of which miscarried: i.e., the ransoming of "pandelings," or slaves, for industrial and commercial elements of the work are well developed. There are (1902) 10 stations, 14 missionaries, 136 native helpers, 6,547 communicants, 2,547 pupils.

The Namaqua and Herero mission is in German West Africa, and covers the entire territory occupied by the Namaqua Hottentots and the Herero Negroes. There are (1902), 24 stations, 35 outstations, 35 missionaries, 123 native helpers, 8,303 communicants, 2,405 pupils. The Ovambo Mission is on the border of German West Africa and the Portuguese district of Angola. The youngest of the missions, it has 3 stations, 5 missionaries, 2 native workers, 300 communicants, 130 pupils.
situated at an altitude of 2,000 feet or more. The soil is well filled up, and the Battas, the Malay tribe among which the mission works, are possessed of some civilization. They have themselves reduced their language to writing, and they like to read. Dutch missionaries have long ago mastered the language for all scientific and literary purposes, and the whole Bible has been translated into Battas. Very fortunately it was that the Rhenish missionaries early came in contact with the Battas. Hence the sensitiveness shown elsewhere concerning missions to Islam was not allowed free play. When the Mohammedans of Sumatra petitioned the king of the Netherlands for the expulsion of the Christian missionaries, the request was refused.

There are reported (1902) 22 stations, 205 outstations, 60 missionaries, 1,152 native workers; 22,524 communicants, 10,902 pupils. There was a mission in Nias commenced in 1885. It reports (1902) 12 stations, 12 outstations, 20 missionaries, 77 native workers, 3,904 communicants, 820 pupils.

The youngest mission of the group, in the island of Mentawei, south of Nias, was organized in 1901, and reported in 1902 1 station, 2 missionaries, 1 native worker, 7 communicants, 10 pupils.

3. China: Since 1846 the Rhenish Society has had a mission in Hongkong and vicinity, and 1 station, Tai-yip, in the southwestern part of the Kwang-si province. The report shows (1902) 8 stations, 16 outstations, 14 missionaries, 29 native helpers, 833 communicants, 296 pupils.

4. New Guinea: Soon after the formation of the Colonies in New Guinea the Rhenish Society felt the responsibility for mission work among the Papuans and in 1887 opened a station at Bogadjim. There are (1902) 4 stations, 7 missionaries, 128 pupils.

Women's Society for Christian Education of the Female Sex in Eastern Countries (Frauen verein für Christliche Bildung des Weiblichen Geschlechts im Morgenlande): This Society, organized in 1842, is known also as the "Berlin Woman's Missionary Association" and the "Woman's Oriental Union." Its chief work is the sending out of teachers and deaconesses to various fields, chiefly India, who work in connection with other societies. Many of these teachers are under the CMS. The Society has for its own chief work a foundling asylum at Sikandra, North West Provinces. In 1900 and 1901 two women were sent to China. The principal of the Talitha Kumi orphanage of the Jerusalem Union was sent out by this Society.}

The German Foreign Missionary Societies have united in forming an "Executive Committee" (Ausschuss der deutschen Evangelischen Missions-gesellschaft), which has advisory functions when called upon by the societies to discuss questions that affect the whole missionary interest, and which represents the united societies in all relations with the Government. This Executive Committee is composed of five members elected annually, and meets, whenever necessary, at the call of the secretary. The secretary for the year 1903-04 is Rev. A. Merenski, D.D., of the Berlin Missionary Society.

GERTRUDSBERG: A settlement in the extreme north of the Transvaal Colony, S. Africa, situated in the Zoutspanberg district, on the slopes toward the Limpopo River, and among the Bawemba tribes. Station of the Berlin Missionary Society (1899).

GHAZIABAD: A town and railway junction in the United Provinces of India, situated 15 miles E. N. E. of Delhi, in the district of Meerut. Population (1891), 10,000, of whom about 6,000 are Hindus and about half that number Muslims. Circuit station of the ME, with (1900) 12 native workers, 1,000 professing Christians. Station also of the CMS (1894), with (1903) 2 missionary women and a dispensary.

GHAZIPUR: A city in the United Provinces, India, situated 40 miles E. N. E. of Benares, on the lowlands bordering the Ganges. The district of Ghazipur is one of the hottest and dampest in this part of India. The city has a monument to Lord Cornwallis, who died there in 1806. It is the center of the government opium monopoly and manufactory. Population (1891), 45,000, of whom about two-thirds are Hindus and one-third Muslims. Station of the Gossner (German) Mission, and of the Zenana Bible and Medical Mission.

GHEG LANGUAGE. See Albanian.

GIATWANGA Kin: A settlement in British Columbia, situated on the Skeena River, about 120 miles from Metlakatla. Station of the CMS (1882), with a constituency both among the Indians and among Chinese employed in salmon canning works.

CIBARA. See Jibara.

GIBSON: A station of the Rhenish Missionary Society in German Southwest Africa, situated about 190 miles N. E. of Angra Pequena. It has (1903) 1 missionary and his wife, 3 native workers, one a woman; 1 day school, and 383 professing Christians. The people among whom this station is established are Namaquas in the main.

GIFU: A town and railway station on the main island of Japan, situated 75 miles E. N. E. of Kioto. It is the capital of the prefecture of the same name, and has a population (1888) of about 31,000. Station of the CMS (1890), with (1903) 4 missionaries, men and women, and 7 native workers, men and women. Two interesting features of the work here are the home for ex-convicts and the school for the blind.

GIKUKI: A settlement in Portuguese East Africa, situated on a high bluff overlooking Inhambane Bay. Station of the ME (1884), with (1903) 1 missionary and his wife, 9 native workers, men and women, a printing house and a high school.

GILBERT ISLANDS: A cluster of coral islands in Micronesia, lying on both sides of the equator. Population estimated at 32,500. The climate is equable, and the warm is not oppressive. The inhabitants resemble the Malays. Before the advent of missionaries they were fond of war and prone to suicide; kind to their children, hospitable, generous, and more considerate of
women than is usual among savages. They ate human flesh occasionally, but were not habitual cannibals. These islands are now under British, and missionary work at the beginning of the 20th century is under the Hawaiian Evangelical Association (in cooperation with the ABCFM), greatly aided by the new conditions which foreign control supplies. The training school for the Gilbert Islands is at Kusai (Caroline Is.), where one of the missionaries resides. Literary work for the islands occupies another missionary residing at Honolulu, H. I. A third missionary spends his time in touring from island to island in a vessel chartered for the purpose. One missionary and his wife (Hawaiians) reside on the island of Maiana. On the islands of Marakei, Aranaka, Kuria, and Nonouti the additions to the Church (1901) numbered 92. Three other Hawaiian islands of this group have been under care of the LMS and are virtually Christianized.

GILBERT LANGUAGE: Belongs to the Micronesian family of languages and is spoken by the people of the Gilbert Islands. It was reduced to writing by missionaries of the ABCFM with the use of Roman letters.

GILL, William: Born January 14, 1813, at Totness, England; sailed April 11, 1838, as a missionary of the LMS for Raratonga; stationed at Arorangi in that island. In 1842, in the absence of Mr. Buzacott from Raratonga, he took charge also of his station and of the institution at Avarua. Between 1843 and 1846 he visited the other islands of the Hervey group, spending six months in Mangaia and the New Hebrides, New Caledonia, and the Loyalty Islands, returning by way of Samoa to Raratonga. In addition to his evangelistic and pastoral work he revised the Raratonga version of the Scriptures, and wrote several books in that language. His wife devoted herself to the elevation of the native women. In 1853 he went to England and did not return to the mission field. Before his connection with the Society ceased he printed the second edition of the Raratongan Bible, besides other books in that language. In October, 1856, he was settled as pastor at Woolwich, and died at Blackheath in 1878.

GILLESPIE: A settlement in Griqualand East, Cape Colony, S. Africa, situated near Mt. Ayliff. Station of the UFS (1889), with (1903) 1 missionary and his wife, 15 native workers, men and women; 11 outstations, 1 day school, and 600 baptized Christians.

GILMOUR, James: Born near Glasgow, June 12, 1843. Died in Mongolia, May 21, 1891. With his master's degree won at Glasgow he entered Cheshunt College, near London, where he took a two years' theological course. On February 22, 1870, he sailed from Liverpool as a missionary of the LMS, and on May 18 he reached the Chinese capital, which was to be the headquarters of his future work, so far away over the Great Wall on the Mongolian highlands. He arrived in China at the critical time when an anti-foreign storm was on the eve of breaking out in Peking; but the young missionary, within three months after his arrival, started up through the famous South Pass, toward the frontier city of Kalgan. The Mongolian field stands as a buffer state between Siberia and China proper, with an area more than one-third as large as the United States. Much of Gilmour's missionary life was spent among the agricultural Mongols; and singlehanded he addressed himself to the work of introducing the Gospel among 2,000,000 of the most superstitious and exclusive persons in all the East. Between the years 1818 and 1841, the missionaries Sullybrass and Swan had labored at the little mission of the Great Dome, with several assistants; and they left, besides the graves of some of their number, a Burial-Mongol translation of the Bible and several earnest converts. Save for a few copies of the Scriptures found here and there, preserved carefully by a few native Christians, Gilmour found little to build upon; but this itinerant evangelist for years was untiring in his journeys, living usually with the nomadic tribes in their tents, and witnessing for Jesus as they gathered about him in the fields or along the mountain sides. As a lay physician, Gilmour was greatly aided in securing the confidence of the Mongols; and at his street-tent dispensary in towns, nearly 300 miles northeast of Peking, he blessed the bodies and souls of hundreds of this rude people. After 1886 he made Chao-yang his headquarters. Mrs. Gilmour was a genuine helpmeet to her husband, and her educational work among the women and children was far-reaching in its influence. Besides his work far from the cities, Gilmour labored also at Peking, Tien-tsin and Shantung; but on the Mongolian plains he loved most to witness for his Master.

Gilmour (J.), Among the Mongols, 1884; Loveson (R.), Gilmour of Mongolia, London, 1892.

GISBORNE: A town and port of entry in New Zealand, situated on Poverty Bay, on the E. coast of the North Island, 85 miles N. E. of Napier. Population, about 3,000. Station of the CMS, with (1903) 2 missionaries, one missionary's wife, 99 native workers, men and women; 11 outstations, 2 village schools, 1 theological training institute and 4,000 baptized Christians.

GIZ LANGUAGE: Giz is another name for the ancient Ethiopic language of Abyssinia, now found in books only and displaced by Amharic in ordinary use. It is written with the same letters as Amharic except that it lacks one or two letters added to the latter language under influence of the Arabic.

GLEASON, Anson: Born at Manchester, Conn., May 2, 1797. In 1822 he became an assistant missionary of the ABCFM, and in January, 1823, started for the Choctaw country. He traveled the long journey on horseback. After eight years of service among the Indians, the health of his family obliged him in 1831 to return north. He then came into connection with the Mohicans settled near Norwich, Conn., and a church having been formed, he was ordained as its pastor. For a time he was district secretary of the ABCFM in Vermont and New Hampshire; for ten years he labored among the Seneca Indians near Buffalo, and he afterward became a city missionary, serving with unabated interest until his death, in Brooklyn, N. Y., February 24, 1885.

GLEN HAVEN: A town in the eastern part of Jamaica, W. I., situated in Portland, about 7
GLENTHORN: A settlement in Cape Colony, S. Africa, situated near Linton in the district of Bedford. Station of the UFS (1840), with (1903) 1 missionary and his wife and 2 native workers.

GNADENDAL: The oldest mission settlement of the Moravians in South Africa. It was founded in 1737 by George Schmidt. On his expulsion from the colony the work was suspended for nearly fifteen years; it was then, in 1792, renewed, an old convert of Schmidt's being discovered still residing there, and carefully preserving a Dutch Testament he had given her. The settlement is situated in the district of Caledon, 65 miles E. of Cape Town, near the junction of a rocky glen called Barian's Kloof with the valley of the Sonderend, down which it extends nearly a mile and a half. The name means "Valley of Grace," and was chosen, it is said, by one of the old Dutch Governors, who was moved by sight of the work of the mission. It has 14 missionaries, men and women; 87 native workers, men and women; 4 preaching places, 4 day schools, 1 theological seminary (founded 1838) and 740 communicants.

GOALPARA: A town in Assam, British India, situated on the left bank of the Brahmaputra, 70 miles W. of Gauhati. It is a very miserable situation, as unhealthy for natives as for Europeans. The civil officials live on a hill 250 feet above the plain. Population (1891), about 5,500, of whom 3,500 are Hindus. Station of the ABMU (1867), with access to the Garos and Rabhasas.

GOBAT, Samuel: Born at Crémone, Berne, Switzerland, January 26, 1799. At the age of nineteen, having an earnest desire to be a missionary, he entered the Basel Missionary Institution, previously perfecting himself in the German language. In 1823 he was sent to Paris to study Arabic at the Missionary Institution. He studied also Amharic and Ethiopic. At the end of a year, on recommendation of the directors of the Basel Institution, he was accepted as a missionary candidate by the CMS, and resided some months in the CMS College in Islington, devoting himself chiefly to Oriental study. Appointed in 1826 to commence a mission in Abyssinia, he returned to the continent, received Lutheran ordination, and sailed for Egypt in September of that year. He spent three months at Jerusalem in 1827 in making acquaintance with the Abyssinians at the monastery in that city, and from 1830 to 1833 he traveled extensively in Abyssinia proclaiming the Gospel to priests and people. His health having failed, he left for home at the close of 1836, and was associated in 1839-42 with the Society's missionaries at Malta, in superintending the translation of the Bible into Arabic, and taking charge of the printing press. He was appointed vice-president of the Malta Protestant College. In 1843 he died. The site which is a deep glen in a spur of the Piquet range, down which it extends nearly a mile and a half, the name meaning "well guarded," refers to the nature of the site, which is a deep glen in a spur of the Piquetberg, overlooking St. Helena Bay. Station of the Missionary Society in the eastern part of German Southwest Africa, situated among the Namaquas, about 300 miles S. E. of Walvis Bay and 260 miles N. E. of Angra Pequena. It has (1903) 2 missionaries, and 200 professing Christians.

GODDA: A town in the Santal Parganas, Bengal, India, situated W. of the Rajmahal Hills, about 140 miles S. E. of Bhagalpur. Station of the CMS, with (1903) 1 missionary and his wife, 232 native workers, one of them a woman; 7 outstations, 18 day schools, 1 boarding school, 1 dispensary, and 432 baptized Christians.

GODHRA: A town in the Bombay Presidency, India; situated in the Panch Mahals district, about 40 miles N. E. of Baroda. The town is almost entirely surrounded by jungle. Population (1891), 14,700, of whom 7,500 are Moham medans and the most of the remainder Hindus. Station of the ME, with (1902) 1 missionary and his wife, 45 native workers, 1 orphanage, and 522 professing Christians.

GOEDE HOOP. See Good Hope.

GOED FORTuin: A settlement in British Guiana, S. America, situated on the Demerara River, about 12 miles S. by W. of Georgetown. Station of the West Indies Wesleyan East Conference, with (1901) 1 missionary and his wife, 5 outstations, 5 preaching places, 4 day schools, and 200 professing Christians. This, with other work of the W. I. Wesleyan Conferences, was transferred back to the WMS in 1903.

GOEDERWACHT: A settlement in Cape Colony, S. Africa, situated about 35 miles west of Fiquetberg and about 90 miles N. by W. of Cape Town. The place was originally a Hottentot settlement founded by a planter who bequeathed the land to his faithful slaves. The name, meaning "well guarded," refers to the nature of the site, which is a deep glen in a spur of the Fiquetberg, overlooking St. Helens Bay. Station of the Moravian Missions (1845), with (1900) 2 missionaries and their wives, 25 native workers, men and women; 1 chapel, 1 day school, and 200 professing Christians.

GOGO (Gogha): A town in Kathiswar, Bombay Presidency, India; situated in the district of Ahmadabad, on the W. side of the Gulf of Cambay, 45 miles W. of Cambay, is temperate and healthful. The natives are considered the best sailors in India. Population (1891), 6,600, of whom 3,200 are Hindus and the most part of the remainder Muslims. Gujarati is the language of the district, but a dialect peculiar to the Muslims is also used and known as Musulmani. Station of the Presbyterian Church in Ireland (1843), with 1 missionary and his wife and 2 native workers.

GOGO LANGUAGE: Belongs to the Bantu family, and is spoken by about 100,000 people living in the central part of German East Africa, west of Mpywapwa. It was reduced to writing by missionaries of the CMS and is another case of the use of Roman letters by illiterate tribes.

GOKHAS: A station of the Rhenish Missionary Society in the eastern part of German Southwest Africa, situated among the Namaquas, about 300 miles S. E. of Walvis Bay and 260 miles N. E. of Angra Pequena. It has (1903) 1 missionary and his wife, 3 native workers, 1 day school, and 383 baptized Christians. The name is written by the Society according to German rules, Gochas.

GOLAGHAT: A village in Assam, situated S. W. of Buff Bay. Station of the AFM (1881).
miles S. W. of Dibrugarh, in the district of Sibsagar. Population, about 5,000. Station of the ASMU (1895), with (1903) 1 missionary and his wife, 17 native workers, men and women; 14 preaching places and outstations, 2 day schools, 1 high school, and 900 professing Christians.

GOLBANTI: A village in British East Africa, situated on the Tana River, 116 miles north by east of Mombasa. It is also spoken of sometimes by the name Borabini. Station of the United Methodist Free Churches (England) (1886), the mission being directed especially to the Gonds, tho reaching to some extent the Pokomo also. It has (1903) 1 missionary and 3 native workers. It is preparing for industrial instruction of the people, and owns an estate of four miles frontage on the Tana River and two and a half miles depth.

GOLD COAST: A British colony on the Gulf of Guinea, having a coast line of about 360 miles. The protectorate that embraces Ashanti and Adumasi is included with the colony proper under the general designation of Gold Coast. The colony proper has about 42,000 square miles, the whole territory about 72,000 square miles. The population is estimated at 1,500,000 negroes, chiefly of native workers and Tombs (0).

In the Upper Volta basin and interior highlands the aborigines have held their ground as separate groups. But the distinctions of language, customs, and physical characteristics are rapidly disappearing. The aborigines are called Fono, that is, "barbarians," by the Ashanti conquerors. Their language is the Gwany, Nta, and allied idioms, which, tho unintelligible to the Accra and Tschi (or Otji) tribes, are used for their translation of the Bible, prayer-book, hymns, etc., the Akwapem dialect. The incredible cruelty and carnage of Ashanti power, with human sacrifices and slaughter, have largely been stopped by the British annexation. A railway has been opened from Sekondi on the coast to Kumasi.

The WMS and the Basel, and the North German Missionary Society occupy 22 stations in this colony.

GOLOVIN BAY: A settlement on the W. coast of Alaska, situated at the head of Golovin Bay and about 40 miles N. E. of Cape Nome. Station of the Swedish Evangelical Mission Covenant of America (1892), with 2 missionaries and 2 missionary women.

GOND LANGUAGE: Belongs to the Dravidian family, and is spoken by 1,500,000 people inhabiting the Central Provinces, India. It is related to both Tamil and Telugu. It has no alphabet peculiar to itself, but attempts have been made to induce the Hindu (sagor) characters among the northern Gonds and the Telugu characters among those bordering on the Telugu country.

GONDA: A town and capital of a district in the United Provinces, India; situated 69 miles E. by N. of Lucknow. The name means a "safe fold," and is due to the origin of the settlement, which was built about a cattle fold in the center of a dense jungle. Population (1891), 17,409, of whom 11,600 are Hindus and the remainder chiefly Mohammedans. Station of the ME, with (1902) 2 missionary women, 110 native workers, men and women; 5 preaching places. 62 Sunday schools, 12 day schools, 1 orphanage, and 1,150 professing Christians.

GONDA: A village in the Central Provinces, India; situated on the railway about 50 miles E. by N. of Nagpur. Station of the Pentecost Bats of the World (1899), with 3 missionaries, one a man, and an industrial school.

GONDS: A non-Aryan race of Central India, numbering some 2,000,000 and forming the largest remnant of the Dravidian aborigines, so called, who were pushed back by the later Aryan immigration into the mountainous, ill-watered, jungle covered region known as Gondwana (the land of the Gonds), which is some 400x300 miles in extent and lies between 18° 40' and 23° 40' Lat. and 78° to 82° Long., mostly within the Central Provinces, Bastar and Berar. The Gonds are thinly scattered over this region, and inhabit the more accessible plains with the Hindus. The Rajputs of Malwa early intermarried with the Gonds, forming the Raj-Gonds, who have retained the physical peculiarities, but have laid aside the rough habits of the Gonds and taken on some elements of Hindu civilization.

The wild Gonds form the mass of the population of Bastar, whose ruler is a Gond. In the north of this state they are called Muriyas (forest people); southward the Godavari and Nauhita valleys swell a branch known as Koils (hill people), while those who live higher up in the hills are known as Gu-te-koi (high-hill people). The Khonds, another branch, are found in Orissa east of Gondwana. The long-continued independence of the Gonds as a race has been due to the arid, inaccessible character of their country, and the unifying of the people, and owns an estate of four miles frontage
The priests exercise large power. The more advanced Gonds have borrowed from the religion of the Hindus, worshiping Siva and Kali especially, and the Raj-Gonds have developed a system of caste which is foreign to Gond tradition.

The Free Church of Scotland began in 1845 a mission to the Gonds, under Rev. S. S. Hislop, who took into the employ of the mission the remaining members of an earlier German effort. The United Free Church of Scotland Mission, with headquarters at Nagpur, no longer distinctly a mission to the Gonds, now carries on this work for this people. The "Bhalagat Mission" to the Gonds, begun in 1874, had, in 1902, some half dozen European agents, who labored among the wild Gonds in the forests, with a center at Behir. The Swedish Evangelical National Society has undertaken work for the Gonds in Chhindwara and the Methodist Episcopal Church (U. S.) at Sirora, by the chief mission to this people is that of the Church Missionary Society, which established in 1854 a station at Jabalpur, in part as a basis for a Gond mission, with which, however, the pressure of other work seriously interfered. Upon the initiative of two earnest Christian workers stationed in that region, Colton and Capt. Haig, the mission to the Kois of the Gonds was begun in 1896, the first fruit of which has, however, been more among other races than among the Kois. As a result of the Conference on non-Aryan Missions in 1877 a Gond Mission was established at Mandla, to which stations at Marpha and Patpara have been added. Five hundred converts were enrolled by the CMS in 1900, but many of them were not Gonds, the low caste Hindus proving more accessible and progressive. Thus, while the Gonds during a long period have been regarded as a field of singular promise, missions to them are still in the day of small things. Gondwana was the most sorely stricken region in India during the famine of 1877; while the Gonds proved more accessible.

For several years there was an almost continuous outpouring of the spirit, and hundreds of converts from heathenism were baptized. Largely through his own instrumentality the one church existing in 1884 multiplied to four before his final removal from that field in 1893. During his last year or two on the Ogowe, when burdened with the care of the widely scattered churches, he also revised the entire New Testament in Mpongwe and the Hymn Book then in use, adding quite a number of hymns of the latter. During this period and also later Dr. Good made some valuable contributions to natural history by sending many choice specimens to the Western University of Pennsylvania.

Dr. Good made three distinct journeys into the unexplored interior, with no companions save native carriers. Aitho he made light of the discomfort encountered and of the danger to which he was exposed, no one can read his unvarnished narrative of travel without being impressed with the heroic spirit of the man. He marched day after day along the beds and on the edge of streams, sometimes through mud a foot deep, his clothing constantly soaked with the dense foliage kept wet by frequent tropical showers. But these were small matters in his estimation compared with the joy of being able to open a pathway for the Gospel to the savage tribes of the interior. The joy increased as the range of his vision widened and he found the Bule people to belong to the great Fang family, and to be widespread and quite accessible.

He was pushing exploration and translation with all his might, with the intention of joining his family in America the next spring; intending while here to prosecute his literary work and see through the press the Gospels and possibly other parts of the Scripture through his life closed in 1893.

GOODELL, William: Born in 1792, at Templeton, Mass. Graduated at Dartmouth College and Andover Theological Seminary. Appointed as missionary of the ABCFM, he sailed December 9, 1822, for Beirut, where, after a few months spent at Malta, he arrived September 26, 1823, for the Kois. As a result of the Conference on non-Aryan Missions in 1877 a Gond Mission was established at Mandla, to which stations at Marpha and Patpara have been added. Five hundred converts were enrolled by the CMS in 1900, but many of them were not Gonds, the low caste Hindus proving more accessible and progressive. Thus, while the Gonds during a long period have been regarded as a field of singular promise, missions to them are still in the day of small things. But these were small matters in his estimation compared with the joy of being able to open a pathway for the Gospel to the savage tribes of the interior. The joy increased as the range of his vision widened and he found the Bule people to belong to the great Fang family, and to be widespread and quite accessible.

He was pushing exploration and translation with all his might, with the intention of joining his family in America the next spring; intending while here to prosecute his literary work and see through the press the Gospels and possibly other parts of the Scripture through his life closed in 1893.
Brother Temple would say, to throw wide open the twelve gates of the New Jerusalem to this immense population.”

In 1851 he visited his native land, where he remained two years. In 1853 he returned to Constantinople, where he labored with enthusiasm and success till 1865, when, on account of failing health, he requested a release from the Board, after forty-three years of missionary work. He died in 1867, aged 75, at the residence of his son in Philadelphia.

**GOOD HOPE:** A settlement in the northern part of the Transvaal Colony, S. Africa, situated in the Zoutspanberg district, about 60 miles E. of Blauberg. Station of the WMS, with (1903) 1 missionary, 105 native workers, men and women; 22 outstations, 48 preaching places, 20 Sunday schools, 4 day schools and 783 professing Christians. Station also of the Hannover Evangelical Lutheran Free Church, with (1900) 2 missionaries, 2 native workers, 6 outstations, 2 schools and 287 professing Christians. The form given to the name by the German Society is Goede Hoop.

**GOOTY:** A town in Madras, India, 50 miles east of Bellary. The place is celebrated in history for its very strong fort, captured by the British in 1799 from Mysore. The climate of Goaty is dry and hot. Population (1891) 6,600, of whom 4,500 are Hindus and 2,100 Muslims. Station of the Bengal Evangelical Mission (1894), with (1901) 21 native workers, 5 preaching places, 9 day schools, 1 boarding school, 1 industrial school, 1 dispensary and work among lepers. See UMSINGA.

**GOPALGANJ:** A city in the United Provinces, India, situated on the Rapti River, 100 miles N. of Faridpur and on one of the streams of the Ganges Delta. Station of the Bengal Evangelical Mission (1894), with (1901) 21 native workers, 5 preaching places, 9 day schools, 1 boarding school and orphanage, 1 college and 1,042 professing Christians. Station also of the Zenana Bible and Medical Mission, with 3 women missionaries and 18 native women workers.

**GORDON, Andrew:** Born in Putnam, N. Y., September 17, 1828; graduated at Franklin College, O., 1850; studied theology at Canonsburg, Pa., 1853; appointed by synod missionary to Sialkot, North India; sailed February 14, 1854. Dr. Gordon was the founder of this mission of the United Presbyterian Church. He was a devoted and useful laborer with pen and tongue, and returned to the United States in 1865 greatly debilitated, but having gained sufficient strength to warrant active labor again, he reembarked in 1875 and was stationed at Gurdaspur, Northern India. He returned home the second time because of illness of members of his family and looked forward confidently and eagerly to a return to his work in India. After a long and painful illness he died in Philadelphia, August 13, 1887. Dr. Gordon was preparing a version of the Psalms in the Urdu language when he returned. He published a valuable work, Our India Mission (1886).

**GORDON, Marquis Lafayette, M.D.:** Born in Waynesburg, Pa., July 18, 1843. Graduated from Waynesburg College in 1868 and from Andover Theological Seminary in 1871 and from Long Island College Hospital, Brooklyn, N. Y., in 1872. He also studied in the College of Physicians and Surgeons, in New York, from which he received the degree of M.D. While securing his education he spent three years in the army during the Civil War. He entered Japan as a missionary of the ABCFM in 1872 and was stationed at Osaka. He early became identified with the work of the Doshisha at Kioto and was soon recognized as one of the ablest and most efficient of the missionaries of any Board in Japan. Although Dr. Gordon had qualified as a physician, after reaching the field he was convinced that he could work successfully in but one profession. He chose the ministry of the Word, gave up the practice of medicine, and devoted himself entirely to evangelistic and educational work. Through his marked ability, his affection for the people and his great tact, as well as the spiritual power of his life, he won a strong position for himself in the affection and the confidence of the people. This position he held to the time of his death. In 1893 he published the volume, An American Missionary in Japan. At the time of his death, in Auburndale, Mass., on the 4th of November, 1900, he had in press his second volume, Thirty Eventful Years in Japan. These two books contain a comprehensive history of the work and methods of the American Board in that empire. Dr. Gordon was married to Miss Agnes Helen Donald at Andover, Mass., in 1852. Two daughters of his are now in Japan.

**GORDON MEMORIAL:** A station of the United Free Church of Scotland, in Natal, S. Africa. See UMSINGA.

**GOSHEN:** A settlement in Cape Colony, S. Africa, situated about 7 miles N. by W. of Cathcart. Station of the Moravian Missions (1892), with (1901) 2 missionaries and their wives, 13 native workers, men and women; 1 chapel and 1 school.

**GOSPEL IN FOREIGN PARTS:** See SOCIETY FOR THE PROPAGATION OF THE GOSPEL.

**GOSSNER MISSIONARY SOCIETY:** See GERMANY; MISSIONARY SOCIETIES IN.

**GOVERNMENTS; Relation of Missionaries to:** This is a matter of great perplexity, difficulty and importance. The missionary is in one sense a man without a country. In another sense, a man of many countries. He does not renounce his nationality or citizenship. As Paul at times fell back on his high position as a Jew and Pharisee, so the missionary must often assert his privileges of birth and country. At the same time he is a resident of foreign lands and inevitably related to foreign governments, on his own account, as an individual; in behalf of the property and other local interests acquired by his mission, and in behalf of converts and adherents, who rely on him for advice and sympathy as to enjoyable justice and protection in secular things. As Paul appeared now before Ananias, the high-
priest; now before Felix and Festus, Roman governors; now before Agrippa, and finally before Cæsar, the missionary may find himself tossed between different, often conflicting, sources of authority, seeking to reach some supreme Cæsar, often finding only Herods and Pilates who will make friendship over his defeat.

The relation which he sustains to the government of the country where he works may have to be one of virtual defiance. Ever since the Apostles met the prohibition of their persecutors by saying. "We ought to obey God rather than men," and rejoiced "that they were counted worthy to suffer dishonor for His name," the first preachers of the Gospel have encountered in most, non-Christian countries the hostility of the powers that be. From Stephen to Bishop Hanington they have found hostile peoples and rulers arrayed against them, and yet have persisted in gentle defiance of threat and command and force.

The first Protestant work in Japan was in quiet disregard of hostile laws, proclamations and penalties. And for years before, Catholic priests had been at work sustaining suppressed Christianity, "sleeping," as one of them expressed it, "by day, working by night." Long had they also done the same in Korea, where, at last, our own missionaries entered for the understood purpose of establishing a prohibited religion. Their position at Seoul, the capital, afforded for some years a most interesting instance of the curious intermingling of possible relations with different governments. As foreigners at an open port they were under the diplomatic protection of their home governments. As court physicians, heads of hospitals, asylums, schools, etc., they were under the protection of the Korean government, received distinct appointment as Korean officials of a certain rank, and had a kind of private policemen assigned them for protection and service. In private they were also recognized as missionaries. Yet in all this public capacity, mission labor was prohibited; in any capacity it was liable to be stopped at any moment. The situation was full of complications both for the judgment and the conscience. But Christianity has taken root in Korea; it has made progress more rapidly than in Japan at the start and it has won for itself a place in the land.

In Japan one restriction long remained which involved the question of the true relation of the missionaries to the Japanese government. Outside of the open ports, passports were required and could be had for travel only for purposes of health and science. It was often a question among missionaries whether such traveling passports ought to be used for evangelistic purposes.

The first missions to India were in defiance, not so much of heathen as of Christian government. The history of the East India Company's friendship with heathenism and hostility to Christian effort is one of disgrace, happily relieved however by noble exceptions, and steadily improved by the pressure of the better sentiment of England until, with the assumption of rule by the British government in 1837, the present policy of friendly neutrality was adopted. At the time, however, there was often nothing for the departed or prophet missionaries to do but seek some other country, like Burma, or cast themselves on the help of a friendly government like that of Denmark at Serampur, or wait in quiet and disguise for reluctantly extorted permission to go on with work.

In Turkey the Christian laborer stands under the protection of his own government, with explicit recognition of his missionary. Yet so far as his work touches Mohammedanism, he is engaged in an endeavor to lead persons to violate by a change of religion the most stringent provisions of the law of the land. This change only the most persistent pressure on the part of Christian governments could get the Turkish government to relieve, in theory, from punishment by death. Practically it is still bitterly opposed and severely punished. The relation of a missionary to a government thus compelled against its will is of necessity strained. He must have constant dealings with lower and higher officials who on the most flimsy pretext, or with no pretext at all, seek to close his schools and chapels, stop his printing press and silence his native preachers, while the unthinking multitude are stirred up to riot against Protestants, and wildest excesses are committed, until the claims of humanity force the powers at Constantinople to interfere. The censorship of the press exercised in Turkey and especially directed against the missionaries in many cases only more ignorant than it is severe. To keep in communication with hostile officials, to endure oppressive edicts while contending for equitable treatment promised by treaty or by law, to press important cases on the attention of the American consul or minister—these are among the great embarrassments and hardships of a missionary's life, not only in Turkey, but in China, Korea and possibly to some extent in Japan.

To specify one further question that is full of embarrassment to the missionary: When a missionary is hampered by the unwillingness of local officials to give him rights secured by law, how far may he follow usages that prevail in Turkey or in China and secure his civil rights by payment which will induce the official to do his duty instead of evading it? Backshish is expected and demanded in Turkey and Persia. Yet its influence is demoralizing. How far shall the missionary seem to sanction the prevailing corruption? How far must he resist it? This most practical question repeatedly recurs. The missionary's difficulties are more subtly perplexing in case he enters into anything like an alliance with any government. But these difficulties are not peculiar to the foreign field. They must be dealt with as they are dealt with at home. For every such alliance is in effect a union of Church and state. The failings of Roman Catholic missions in this respect, whether in North and South America, in Japan, China, India, or other countries, are too well known to be told. They form a most instructive part of the history of missions. France and Germany to-day are eager to offer such alliances to missionaries. France, in particular, has sought to advance its diplomatic and colonial interest through claiming to be the protector of all the missions of the Roman Propaganda. It has long sought to gain political power in China by posing as the patron of all Roman Catholic missionaries of whatever national allegiance. Protestant missions regarded their own emissaries in pushing its colonial schemes. The Legion of Honor medal has been recently conferred upon M
Casalis, an old French Protestant missionary, for extending the influence of France in Basuto, in the sphere of British influence in South Africa.

Germany, too, has the colonial fever, and the interest in missions has been increased all over the land because it is believed that, even if missionaries are not successful as Christianizers of heathendom, they can be useful wisely as Germanizers of certain parts of it. As a veteran missionary friend in Germany puts it: "The opinion of the German African Society with regard to missionary societies is that they are not unselfish attempts to spread the Gospel, but merely handmaids to colonial politics—a cow to give milk to the mother-country."

This alliance with the government on missionary ground gives rise to a new set of hostile relations. France wants only French, Germany only German, missionaries. The langauge and sentiments of the missionary must be exclusively taught in the colonies of that country. Missionaries of other nationalities must be excluded, for they neither could nor would enter into such alliances for political and national schemes.

The missionary may be often tempted to assume an attitude of critic or mentor to half civilized officials of the land where he is preaching the Gospel. For a large class of questions is added to those which perplex the missionary when he is appealed to by native Christians to secure government aid or interference in behalf of them and their interests. The expectation and hope of such aid and protection from the missionary is one of the motives most damaging to the sincerity of new converts. It harms the missionary, too, by filling his time and thoughts with civil matters, lawsuits, appeals, etc.

For instance, in Travancore, the question of the caste privileges of Christians comes up. They are said to be low caste, which would shut them off from much. They claim to be no caste. One typical case decides many. The privileges of emigrants from such cities are at stake; the courts must decide, the missionaries must make up, present, and push the case. That may keep them in the courts for years. Anywhere in India the right of Christians to use the village well or fountain may be denied. But the government has decided the wells free to all. The missionary is impelled by kindly compassion to bring such a case before the collector.

In China and in Turkey or Persia officials are not strict observers of the laws. When they oppress the Christians the influence of the missionary is inexcusably invoked to help his adherents. Natural sympathy for those in distress and the desire to see fair play have made some men allow much of their time for years to be consumed by such lawsuits, whose result, of whatever sort, was sure to be harmful to their spiritual work.

Another such connection with the local government often appears to work for good. From their superior education and ability missionaries are often appointed to some official position. Dr. Verbeck was for some time a state official of Japan. President Martin, of Peking, at the head of Imperial College, was appointed by the government of China. Dr. Allen and Mrs. Bunker were the court physicians of the King and Queen of Korea. Dr. McKenzie at Tien-tsin was closely related to the Viceroy Li Hung Chang. Others have served for a time as diplomatic agents of the home government, like S. Wells Williams or Dr. Whitney, of Tokio. The appointment of such men to such position was the way for the Gospel and commands it to strangers.

Yet as a rule, contrasting the high calling of a simple missionary with any other position, one might say of some who turn aside from the mission to official work what Dr. Carey wrote regretfully of his son: "Felix has shrunk to an ambassador."

The general rule of the Church Missionary Society, as published among its regulations, is as follows: "Every missionary is strictly charged to abstain from interfering in the political affairs of the country or place in which he may be laboring; "Never assume a position of hostility to the ruling powers; "Stand aloof from all questions of political leadership and political partisanship; "Substitute to whom tribute is due, custom to whom custom, fear to whom fear, honor to whom honor."

It is not strange, when one sees what a snare is spread in all dealings with magistrates and civil authorities, that many of those who are most consecrated and experienced should decide that the only safe plan for missionaries is one of silent abstention in all such matters. The best they can ask from any government is to let alone, and regarded with friendly neutrality. The best they can do for the mission is to lean on no arm of flesh, invoke no aid of consul or magistrate, but rely on God and what He may do for His servants. They are not the foes of any people, they should not be the political engines of any government, nor should they make any government their engine.

Another complication of this question is the attitude toward missionaries sometimes adopted by ill-informed officials of the home governments. Such officials sometimes regard missionaries as pestiferous lunatics whose object in life is to get themselves into trouble with a view to disturbing the peace of officials abroad who are charged with the protection of their wandering fellow-countrymen. The ignorance which fosters such opinions may be gauged by perusal of the article in this book on The International Service of Missions. We cannot better close the discussion of these delicate problems than by the following suggestions which we feel are necessary for the missionary and student of missions, Rev. James S. Dennis, D.D., which foreshadow, perhaps, opinions to be set forth in the third volume of his Christian Missions and Social Progress:

"We shall not undertake to call in question the fact that under exceptional circumstances, under the pressure of misunderstandings, or as the outcome of religious fanaticism, the entrance of Christianity into non-Christian lands has been unwelcome, and awakened more or less opposition. This is natural, perhaps inevitable, and historical precedents would lead us to expect it. It seems to be incidental to the propagation of Christianity, and yet so long as the missionary teacher is within recognized and acknowledged treaty rights, and does not transgress international agreements, he is not called upon to refrain from pursuing his calling by feasted by the government of men, without attempting to exact an unwilling adherence by any expedient which forces the conscience, he is strictly within the bounds of that universal exercise of moral
freedom which belongs to man as man. It is not
in fairness or justice within the sovereign rights
of any government, despotic or liberal, to exer-
cise lordship over the conscience in the realm of
religious freedom. That would be to usurp a
duty which is sui generis in history. He may be
hindered, opposed, persecuted and martyred, but
his credentials are authoritative, and cannot be
destroyed. He may be silenced temporarily, or
banished for a time, but his opportunity is certain
to come, and he is bound to avail himself of it.

"It becomes him under these exceptional con-
tions to discharge his duty with meekness,
patience and tact, to exemplify in his own charac-
ter and conduct the wisdom, gentleness and sin-
cere love of the religion he teaches, and to seek the
moral victory by legitimate spiritual means.
Where the missionary service is rendered in this
spirit it is rarely, if ever, offensive, and any possi-
BILITY of disturbing goodwill is reduced to a mini-
 mum. In fact, the charge which has sometimes
been made indiscriminately that missions are the
cause of international alienation has been greatly
exaggerated. There has been much misunder-
standing on this point, and some considerable
misrepresentation. The conspicuous illustration,
of course, has been China, and on the basis of ac-
true induction, a sweeping and railing accusation
has been made against missions in general as a
cause of trouble among the nations. While it is
no doubt true that the political assumptions of
Roman Catholic missions in China are offensive
to the Chinese officials, yet it can be safely said
that Christianity as exemplified in Protestant
missions, exercising its simple and legitimate
function as a teacher in the sphere of morals and
religion, is guiltless in the matter of political
meddling. In reference to the Boxer disturb-
sance of 1900 and other similar outbreaks which preceded it, it is sufficiently clear
that the aversion of the Chinese to foreigners, and
especially their resentment at foreign encroach-
ments upon official prerogative, territorial integ-
rity and native industries, are adequate explana-
tions of the uprising, which has aimed at the
foreigner of whatever class as an intruder, but
chiefly in his official and commercial character
rather than at the missionary as a religious
teacher. In fact, the missionary, all things con-
sidered, has made it safer and more possible than it would have been for all foreigners to reside in China. Numerous friendly acts and
proclamations by high officials of the empire,
where the convulsions of 1900, have indicated a
specially kindly feeling to missionaries. The
Missionary Peace Commission of 1901 in Shansi
is one of the many testimonials of this consider-
sation shown to missionaries by many Chinese
officials since the troubles of 1900. The recent
opening of Hunan province by the mission-
aries of the London Society has reclaimed in a
measure an immense section of China to foreign
residence, which will be a boon both to missions
and commerce.
4 preaching places, 3 day schools, and 492 professing Christians.

GRAN CHACO. See Argentine Republic and South American Missionary Society.

GRAND CAYMAN: One of the Cayman Islands, West Indies, 176 miles northwest from the west end of Jamaica. The island is 17 miles long and 4 to 7 miles broad. Climate, tropical; population, 4,500, composed of English mulattoes and pure negroes; language, English; religion, Protestant. The United Free Church of Scotland has (1902) 2 stations on Grand Cayman, with 2 missionaries and 8 native workers, and 594 church members.

GRANT, Asahel, M.D.: Born at Marshall, N. Y., August 17, 1807; died April 24, 1844. Graduated in medicine at Pittsfield, Mass. Practised medicine at Baintrim, Pa., until the death of his wife. Appointed medical missionary of the ABCFM among the less civilized Christians. In 1834. Arrived at Urmia, Persia, November 20, 1835. The medical skill of Dr. Grant was at once called into active exercise. Alto the ignorance and superstitions of the people hampered his efforts, he soon acquired great influence. Patients came from all parts of mediaeval Persia, from the Caucasus or from the desert. A haughty Mohammedan mollah kissed the hem of his garments; in his life in the wild mountain regions he was more than once indebted for his safety to recognition by some patient who had seen him in Urmia.

Dr. Grant's thrilling adventures among the Nestorians of the mountains made his name famous. His work there was broken up by the death of his wife. Appointed medical missionary of the ABCFM among the less civilized Christians. In 1834. Arrived at Urmia, Persia, November 20, 1835. The medical skill of Dr. Grant was at once called into active exercise. Alto the ignorance and superstitions of the people hampered his efforts, he soon acquired great influence. Patients came from all parts of mediaeval Persia, from the Caucasus or from the desert. A haughty Mohammedan mollah kissed the hem of his garments; in his life in the wild mountain regions he was more than once indebted for his safety to recognition by some patient who had seen him in Urmia.

Grassman subsequently labored as a missionary in Greenland. He was made Bishop of the Moravian Church in 1756. He died March 25, 1785.

GRECO-TURKISH LANGUAGE: The Turkish language as written with Greek letters by Greeks of Asiatic Turkey.

GREECE: The Hellenic Kingdom embraces a territory of about 25,000 square miles, and has a population of (1896) 2,433,806, Greeks and Albanians. Scotland has the same extent of territory and almost twice as many people. As for wealth and natural resources, Greece is proverbially the poorest country in Europe.

Agriculture occupies the attention of the majority (seven-eighths) of the inhabitants. Only seven cities can boast of more than 10,000 people. Fifteen cities (from Athens, 114,585, to Missolonghi, 6,324) contain only 250,000 inhabitants, or about one-ninth of the whole population of Greece. Nearly ten per cent. are shepherds; as many as seafarers. There are 100,000 Albanians scattered about the kingdom. They began migrating southward over four hundred years ago, at the time of the Turkish conquest. These people, who still speak their unwritten language, have become largely Hellenized, yet are easily distinguished from the Greeks proper. They are found mainly in Attica, about Thebes, on the Isthmus of Corinth, throughout ancient Argolis, in the southern district of Euboea, and in a few neighboring islands.

The war of the revolution (1821-9) left Greece in a deplorable state. The Protocol of London declared her a kingdom under the protectorate of England, France and Russia. Prince Otto of Bavaria ascended the throne January 25, 1833. King George, son of the King of Denmark, succeeded King Otto in 1863. Under both these reigns the kingdom has seen slow but steady advancement. Under the present constitution (adopted October 29, 1864) the whole legislative power is vested in a single chamber of representatives, called the Boul, and the executive power is in the hands of the king and his responsible ministry. The fact that only a fraction (2 millions out of 8 millions) of the Greek-speaking people in the Levant are included in the present kingdom of Greece keeps the ambitious little country continually in a restive condition, and the great powers have frequently been obliged forcibly to compel the Greeks to keep the peace. This restriction is received with bad grace by the people. An extension of the territory of the kingdom to the north (1881) only whetted its appetite for more. The island of Crete has been in a chronic state of unrest and now looks toward annexation to Greece at no distant day.

Athens has been the capital of the Kingdom in the Kamerun Colony, W. Africa, situated S. of the Lokunje River in the S. W. part of the colony and 176 miles N. of the Gulf of Camerun. In climate, the district is one of the healthiest and most agreeable on the coast, and German and English traders resort there. Station of the PN (1885), with (1903) 10 missionaries, men and women, one of whom is a physician; 15 native workers, men and women; 10 outstations, 10 day schools, 2 boarding schools (closed temporarily), 1 dispensary and 800 professing Christians.

GREAT SANGI ISLANDS. See SANGI ISLANDS.

GREBO LANGUAGE: Belongs to the negro class of African languages and is used in the regions inland from Liberia. It was reduced to writing by missionaries of the PE, and is written with Roman letters.

GRECO-TURKISH LANGUAGE: The Turkish language as written with Greek letters by Greeks of Asiatic Turkey.
of the Haljones' since 1830, and has grown from a squalid Turkish village, clinging to the northern slope of the Acropolis, to a large, clean and beautiful city, with its palace and gardens, its fine hotels and boulevards, its cathedral and university, its art museums and its public schools. To the scholar and student of modern life it is one of the most interesting cities in the world. The city is a busy hive of educational institutions. The English Church and the Protestant Evangelical Greek Church are to the east of the Acropolis, near the foot of the temple of Jupiter Olympus. The British and American schools for research in Greece are on the southern slope of Mount Lycebettus.

The Boule meets November 1 (old style) every year, and the city thereafter presents a brilliant scene, in which the royal retinue, the deputies, the foreign ambassadors, the military classes, the church hierarchy, the throng of students from the whole Greek world, together with foreigners from every clime, make the modern city vie with its ancient self in picturesqueness and interest. The inhabitants of the kingdom are mostly adherents of the Greek Orthodox Church.

The most encouraging thing about modern Greece is its splendid system of schools. There has never been a time when Greece has been absolutely destitute of educational facilities. Even during that long period of abject oppression under Turkish rule—which lasted from the opening of the 16th century until the war of independence, 1821-29—the rudiments of an education had been taught by the clergy of the Greek Orthodox Church. Even during the revolution schools were covertly carried on. When the country came out of this baptism of blood the national mind was roused as only a great struggle for freedom can rouse it, and efforts were immediately put forth to put its schools on a solid foundation. It was necessarily a most difficult undertaking. The country was bankrupt. At that critical hour in the nation's life the influence of English, French and American sympathizers was a large factor in starting the whole long and interesting development of educational affairs in Greece. To the American influence, felt especially in two directions—the study of the Bible in all languages of the East were printed. Very soon there was a much greater demand for those in Greek than in any other language. In 1830 the Rev. Mr. King was transferred to its service and Mr. King was transferred to its service and removed from Tenos, where he, too, like Dr. Hill, had begun his work, to Athens, where he established schools of a high grade for boys, held preaching services, and also devoted much time to the preparation of religious literature, for which he was particularly fitted by his great and varied attainments as a Christian scholar. In 1834 Dr. and Mrs. Elias Riggs opened a school at Argos, and were subsequently joined by Mr. Benjamin. This station was given up in 1837, Mr. Riggs going to Smyrna.

About this time (1837) the Rev. S. Houston and Rev. G. W. Leyburn of Virginia, also in connection with the American Board, went to Arcopolis, in Laconia, in response to an earnest invitation of Pietro Bey Mavromihalis. They soon had two schools for boys in successful operation, in one of which the Rev. M. D. Kalópáthakes, now so long associated with evangelistic work for his countrymen, received his earliest religious impressions. The Baptists also began a mission under Mr. Buel and Mr. M. Arsekes, whose school, originally from Epirus. It was the result of the American idea fostered by Dr. and Mrs. Hill. To-day it is by far the finest girls' school in Greece. The institution is graded carefully up from the kindergarten to the normal department, becoming a gymnasium for girls of fifteen up to eighteen or twenty. It is a custom for far-away villages to select their brightest girls, collect money for their expenses, and send them to the Arsakeion, that they may have efficient teachers for their village girls. Since its start this school has scattered more than 2,500 graduates over Greece and Greek-speaking lands, and most of them teach.

The list of private benevolences for educational purposes might be indefinitely increased. In proportion to her size, population, and wealth, the little Hellenic kingdom surpasses even open-handed America in this point.

Mission Work: Even in the struggle for independence called the attention of the civilized world to Greece, Christian work was begun in the land by various churches of America. The CMS had already sent missionaries in 1815, their operations being mainly confined to the Ionian Islands.

The PE sent out Rev. J. J. Robertson in 1828 to see whether Greece presented an encouraging field for the efforts of this Church. This mission was reinforced in 1830 by the arrival of Rev. Dr. and Mrs. Hill. They went first to the island Tenos, where they spent six months; then removed to Athens, and their long and successful educational work, carried on in the spirit of the instructions given, with a careful avoidance of anything that might look like a wish to proselyte from the Greek Church.

In 1828 Rev. Jonas King of the ABCFM, whose previous sojourn in Jerusalem and Smyrna had given him an opportunity to acquire some knowledge of the modern Greek, and also awakened a deep interest in their spiritual condition, was chosen by a committee of ladies in New York to take charge of supplies for the physical wants of the impoverished Greeks. His knowledge of the language enabled him at once to do something to meet their still deeper spiritual wants, and he was permitted to remain, supported by these ladies, till 1831, when the American Board decided to enter Greece as a mission field, and Mr. King was transferred to its service and removed from Tenos, where he, too, like Dr. Hill, had begun his work, to Athens, where he established schools of a high grade for boys, held preaching services, and also devoted much time to the preparation of religious literature, for which he was particularly fitted by his great and varied attainments as a Christian scholar. In 1834 Dr. and Mrs. Elias Riggs opened a school at Argos, and were subsequently joined by Mr. Benjamin. This station was given up in 1837, Mr. Riggs going to Smyrna.

Very soon there was a much greater demand for those in Greek than in any other language. In 1830 the Rev. Mr. Temple, who was in charge of this department of the work, reported that the previous year the press had been employed...
of the United States. So also with the work of Dr. Kalopothakes is connected. This work, even the native Greek Evangelical Church with which carried on under the Baptist Missionary Union on the same premises—under the efficient direction of her niece, Miss Masson.

empiricism. The American
le Marche, who, besides preaching, did much valuable
sion from office of the Metropolitan and the
sanction of the Metropolitan of Athens and
transition of the Scriptures in the vernacular, the
Bible into modern Greek. There were riots in
Athens, and in the end the clamon was only appealed by the stoppage of Bible work and the expulsion from office of the Metropolitan and the Prime Minister supposed to be responsible.

After the Americans withdrew, about 1863, the native element became prominent. Dr. Kalopothakes, Rev. G. Constantine and Rev. D. Sakellarios worked for some years together under the American and Foreign Christian Union. Later there were distinct organizations. The Baptists were represented by Mr. Sakellarios. The Congregationalists sustained Mr. Constantine, who, besides preaching, did much valuable work through the press.

The organization known distinctively as the Greek Evangelical Church was under the care of the Southern Presbyterian Church during the thirteen years previous to 1886.

At the close of 1885 the Evangelical Native Church withdrew its connection with the Southern Presbyterian Church and become independent.

Since that time there has been no "mission work," so called, in Greece, except the primary school for poor children founded by the late Mrs. Hill, entrusted to him, the same assistance to the work of the British and Foreign Bible Society being continued. On the withdrawal from Greece in 1886, the agency of the British and Foreign Bible Society being entrusted to him, the same assistance to the work and moral support comes through it.

Through the kindly assistance of the Religious Tract Society of London thousands of tracts are printed and circulated yearly. The work of the American Bible Society was for more than 25 years under Dr. Kalopothakes' care, and on its withdrawal from Greece in 1886, the agency of the British and Foreign Bible Society being entrusted to him, the same assistance to the work and moral support comes through it.

GREEK CHURCH: Several names and titles are used by writers who mention this church: e.g., The Greek Orthodox Church, The Eastern Church, The Orthodox Imperial Church, The Greek Catholic Church and The Orthodox Eastern Church of Christ. The name and title preferred by the Greeks themselves and claimed by them as the most correct is "The Holy Catholic and Apostolic Orthodox Church of the East," (Ἡ Ἁγία Καθολικὴ καὶ Ἀποστολικὴ Ὑπερκοινωνία τῆς Ἑσσαρόντος).

Adherents: It claims as its adherents those who accept and abide by the decisions of the first seven ecumenical councils, viz.: (A) the First Council of Nicaea, 325, and 7th, 787; Constantinople 2d, 381, 5th, 555, 6th, 680; Ephesus 3d, 431; Chalcedon 4th, 451. It represents the state religion of Greece, Russia, Bulgaria, Servia and Rumania, and of the larger part of the Greek and Slavic people in Turkey and other parts of the world. Its numerical strength is estimated at 400,000,000 souls. These, in round numbers, are distributed as follows: In Greece, 2,400,000; in Turkey, 5,000,000; in other parts of Asia, 4,000,000; in Africa, 3,000,000; America, 50,000; Bulgaria, 2,000,000; Servia, 900,000; Monte­

History: The claim of the Greeks, that this is the oldest Christian Church, is founded on the facts (a) that they are the heirs of the original Greek Empire of Byzantium or Constantinople; (b) that they still use in their worship the Greek of the Apostles and the liturgy of the early Far

When under the mission, differed to a consider­
from the East), the decisions made and the doctrines established being largely colored by Greek philosophy and Greek thought, and finally (3) that the church history begins to assume the form of Great Week, or "The Great Week," of our Lord's life. The Syrian Church claims the precedence because (Acts xi: 20) "The disciples were called Christians first at Antioch." But the Greeks point to John xiv: 28: "There were certain Greeks among them that came up to worship," and to the Master's words: "The hour is come that the Son of man should be glorified.

It is fair to state that the Armenian Church makes the claim (which the Greeks dispute) that these so-called Greeks were Armenians sent from their King Abgar and that under the preaching of the Apostles Thaddeus and Bartholomew they were the first to accept Christianity as a nation. Greek tradition tells us that the earthquake at the time of the Crucifixion was felt in Athens and that Dionysius the Areopagite exclaimed: "Either God suffers or the universe is being destroyed," and that thus he and certain others were prepared for the preaching of Paul.

The political and organic history of the Greek Church begins with the conversion of Constantine, 312 A.D. This was followed by the cessation of persecutions and the establishment of Christianity as the state religion. A more perfect organization was secured by the council of Nicaea in 325. In this year also was begun the Cathedral Church of St. Sophia, and the founding of the first Christian city, "New Rome," or Constantinople, dedication to "The service of Christ" May 11, 330. The natural jealousy of Rome, the former imperial city, and the rivalry springing up between the two cities, created parties not only in political but in religious life as well.

The Bishop of Rome was not ready to yield precedence to the Bishop of Constantinople, or even to acknowledge the latter's equality with himself. Decisions of various councils in regard to this matter were acceptable to neither party. (The Council of Constantinople in 381 declared that the Bishop of New Rome should be inferior only to that of Old Rome.) Seventy years later the equality of the two was decreed at Chalcedon.

In the latter part of the 6th century the Patriarch of Constantinople claimed precedence over all Christian Churches, but in 606 the Emperor Phocas gave this honor to Boniface of Rome. Minor differences in customs and in forms of theological statement were enlarged as the centuries moved on. There were endless controversies as to methods and times of fasting, the administration of the Sacraments and the procession of the Holy Spirit. While the Latins declared that the Holy Ghost proceeds from Father and the Son, the Greeks claimed that the procession was from Father alone. Pope Leo III., at the Council of Aix-la-Chapelle in 809, approved of the expression "Filioque" (and from that year). In order to give greater authority, the canons of the great Council of Constantinople were falsified by the interpolation of the disputed clause. This was deemed by the Easterns the greater sin of the Western Church and has never been forgiven.

As the Greek Empire decreased in power and resources, the power of the Papacy became more deeply rooted, and when the Pope of Rome, aiming at universal supremacy, began to interfere indirectly with the affairs of the East, and Michael Cerularius, Patriarch of Constantinople, protested, papal legates visited Constantinople and on the 16th day of June, 1054, repairing to the great church of St. Sophia, they there in the name of the Pope excommunicated the Patriarch and all his adherents. "After pronouncing this dread anathema, they placed their sentence on the High Altar of the Church, and shaking the dust off their feet they left the city."

The separate histories of the Eastern and Western Churches may properly begin at this date—June 16, 1054.

The great missionary work of the Greek church began in 861, when the brothers Cyril and Methodius went from Thessalonica to Bulgaria. The Slavic alphabet and literature, and the Bible in the vernacular, are the result of their work. Thus the way was opened for the evangelization and instruction of the Servians and Rumanians, and in due time of the Russians also. The conversion of the Russians following the baptism of St. Sophia of the envoys sent by Vladimir; the baptism of Czar and people in the Dnieper at Kiev; the building there of the first Christian Church and the marriage of Anne, sister of the Emperor Michael, to Vladimir the Great in 989; and the Czar himself: Kievel remained the metropolitan city until its destruction by the Mongols in 1240, when the see was removed to Vladimir and afterward transferred to Moscow.

Church Government: The government of the Greek Church is Episcopal, with orders of Patriarch, Bishops, Priests, Deacons, Sub-deacons, etc. In the Turkish Empire it is divided into four metropolitan sees—Constantinople, Alexandria, Antioch and Jerusalem. Each of these is presided over by a Patriarch. All have equal rights, but special honor is conceded to the Patriarch of Constantinople. The latter presides over the "Grand Synod," which is made up of the Bishops of the surrounding provinces. It is theirs to elect or rather nominate the Patriarchs. The full election waits upon the approval of His Majesty the Sultan. He recognizes the Patriarch of Constantinople as the responsible head of the Church and the medium of communication between the sovereign and the Greek people.

In Greece the supreme authority of the Church is the Synod at Athens, which consists of five clerical and two lay members. Their former dependence upon the Patriarch of Constantinople ceased in 1833, tho a few external rights and honors (the preparation of the anointing oil, etc.) are still reserved to that prelate. For six centuries the Russian Church was dependent on the Patriarchate of Constantinople and was governed by Metropolitans, some of them Greeks sent directly from the Patriarch, others Russians elected to the office. Even up to the middle of the 17th century the Patriarch or Primate of Moscow had to have his appointment confirmed by the Patriarch of Constantinople. Peter the Great in 1712 curtailed the authority of the Primate of Moscow and substituted that of the "Holy Synod," over which the influence of the Czar is supreme. Thus the Czar became head of the Church as well as of the state in Russia. Without the presence of the procurator of the Czar the "Holy Synod" can hold no meetings nor are their decisions valid. In Rumania the government of the Church rests with two Archbishops, the first of them styled the Primate of Rumania, the second the Arch-
The Greek Church lays stress on its acceptance of the seven ecumenical Councils, and on its doctrine that the Sacraments of the New Testament are seven, the Jewish symbol for completeness. The seven sacraments are: Baptism, The Lord's Supper, Chrism, Confession, Ordination, Marriage, and the Anointing of the Sick. She believes in baptismal regeneration and at baptism receives each child into full church membership. She uses candles and incense in worship; she rejects images, but adores pictures. The worshipper in kissing the picture of the saint and bowing before the shrine, tells us that "the worshipper thus turns his back upon the deeds of darkness and his face toward the Sun of Righteousness who is to arise with healing in His wings."

The Greek Church calendar still follows the old style, and was during the 19th century 12 days and since 1900 (which in the Orient was regarded as Leap Year), 13 days behind the new style introduced by Gregory XIII.

The Greek Church is governed by the Synod of Bishops, all the ecclesiastical officials being under the control of the Minister of Education and Public Worship. The Greek Church of Bulgaria was dependent upon the Patriarch of Constantinople until April, 1870, when the various Bulgarian sees were united under one chief bishop known as the Bulgarian Exarch.

**Church Buildings and Services:** The Eastern hierarchy resembles the Jewish type, and the Eastern church building is a reminder of the Jews. It has three divisions: (1) The Holy Place; (2) The Body of the Church, and (3) the Narthex or Porch. Above the latter is the latticed apartment for the women. The narthex was originally set apart for catechumens or for penitents under discipline and the body of the church for the congregation. The Holy Place, separated by the screen of wood or marble covered with pictures, is for the priests and their attendants and for preparation of the bread and wine upon the "Table. The church but the choir stand or sit and worship in the Holy Place. The entrance is always at the west, so that the worshipers may face the east. The schoolboy who (not in a Sunday school but in the ordinary primary school) is taught the mystical meaning of all parts of the church building, and of each portion of the priest's dress, tells us that "the worshiper thus turns his back upon the deeds of darkness and his face toward the Sun of Righteousness who is to arise with healing in His wings."

the Greenland Trading Company. After years of discouraging efforts on the part of missionaries, all the natives have been converted to Christianity. The religious instruction of the people is in the hands of the LMS for purposes of trade, but made great efforts to assist the persecuted Christians. Returning to England in 1842, he became pastor at Welsh Ray. He published History of Madagascar in Welsh, revised the Malagasy version of the Bible, and prepared numerous works in the Malagasy language. He died at Machynlleth, March 21, 1863.

GROOT CHATILLON: A settlement in Dutch Guiana, S. America; situated on the Surinam River, about 12 miles S. of Paramaribo. Station of the Moravian Missions, with 4 missionaries, men and women; 1 native worker, 2 preaching places, 1 school and a leper asylum known as Bethesda.

GROOT SANGIR ISLANDS. See SANGIR ISLANDS.

GUADALAJARA: A town in Mexico, the second in importance of the republic, and capital of the State of Jalisco; situated on the Santiago River 120 miles S. W. of Zacatecas, and at an altitude of 5,000 feet. It was founded in 1532, and has many churches and convents, a university, a mint, and an academy of painting. Population (1900), 101,208. Station of the ABCFM (1882), with (1902) 5 missionaries, men and women; 4 native workers, 5 outstations, 1 girls' boarding school, 1 theological seminary and training school. Station also of the International Medical Association (Seventh Day Advent), with 3 missionaries, 1 dispensary, and 1 hospital. Station also of the MES (1884), with (1901) 6 missionaries, men and women, and 1 native worker.

GUADALCANAR ISLAND. See Solomon Islands.

GUAM, or GUAMAN: An island of the Ladrone or Marianne group, in the Pacific Ocean, N. of the Caroline Islands. It is the largest island in the group and was ceded to the United States by Spain in 1898. It is about 32 miles long, contains about 200 square miles, and is surrounded by coral reefs. It is thickly wooded, well watered, and fertile in soil. The population (1903) is estimated at about 9,000, two-thirds of the whole number living in Agana, the capital.

They are mostly of mixed blood and have been chiefly engaged in the potato and sugar industries. Of the Indians, who have come into contact with the white man elsewhere, liquor is prohibited in all the settlements.

GREENVILLE: A town in Mexico, the second in importance of the republic, and capital of the State of Jalisco; situated on the Santiago River 120 miles S. W. of Zacatecas, and at an altitude of 6,500 feet. It lies in a rich mining district, and has a population (1900) of 41,486. Station of the MES, with (1902) 1 missionary and his wife, 2 women missionaries, 1 native worker, 11 preaching places, 2 day schools, 1 dispensary, 1 hospital, and 314 professing evangelical Christians.

GUANAJUATO: A town in Central Mexico, 160 miles northwest of Mexico City. A pleasant city, built on both sides of a narrow defile in the mountains at an altitude of 6,500 feet. It lies in a rich mining district, and has a population (1900) of 41,486. Station of the MES, with (1902) 1 missionary and his wife, 2 women missionaries, 11 native workers, 11 preaching places, 2 day schools, 1 dispensary, 1 hospital, and 314 professing evangelical Christians.

GUANTANAMO: A town in Cuba, W. I., situated 40 miles east of Santiago, in a very productive region of sugar estates. Population, about 24,000. Station of the American Baptist Home Missionary Society (1899), with 1 missionary and his wife.

GUARANI LANGUAGE: Belongs to the South American family of languages, and is spoken by the native population (mixed blood) of Paraguay. It is written with Roman letters.

GUATEMALA: A republic of Central America, bounded on the north by Yucatan, east by British Honduras, the Bay of Honduras, and the republics of Honduras and San Salvador; south by the Pacific, and west by the Mexican State of Chiapas. Its greatest length, from northeast to southwest, is 325 miles, its greatest breadth about 300 miles; area, about 48,800 square miles. Climate, exceedingly hot in the low, and cool in the high, regions, is generally healthful. The soil is exceedingly fertile, but poorly cultivated. Population (1900), 1,647,300; about sixty per cent. are pure Indians, very few descendants of Europeans, and the rest mestizos, a mixture of Spanish and Indian blood. The Indians live mostly by themselves, and the civil authorities immediately governing them are chosen from their own race. Indolence and licentiousness are the besetting vices of all the people. Language, Spanish; religion, Roman Catholicism the religion. The people of different creeds have liberty of worship. The government is republican; the legislative power is vested in a congress, and the executive is a president, assisted by three ministers, elected for four years. The capital is Guatemala, by far the finest city in Central America, situated in a broad plateau in the southwest part of the republic. The missionary societies operating in Guatemala are the PN, with 2 stations, and the Central American Mission, with 1 station. The ABS also has an agency at Guatemala city.

GUATEMALA LA NUEVA: Capital of Guate-
There are 159 schools which receive government capital and principal city. Of East Indians there are 115,463 on the sugar plantations, but about 1870 all there are now only about 4,000 Chinese in the colony. Station of the FN (1882), with 1 missionary and his wife. Station also of the Central America Mission (1899), with 6 missionaries, men and women. Agency of the American Bible Society.

Guayaquil: A seaport in Ecuador, S. America, capital of the province of Guayas, situated on the right bank of the Guayas River, 35 miles above its mouth, and 165 miles S. W. by S. of Quito. Population, 51,000, of whom about 5,000 are foreigners, the most of the remainder Indians and half-breeds. Station of the Gospel Missionary Union (1896) and of the PB.

Gudur: An extensive territory on the north-east coast of South America, bounded on the north by the Atlantic, on the east and south by Brazil, and on the west by Brazil and Venezuela. The country slopes from the south, where the mountains reach an altitude of 7,000 feet, to the lowlands of the north. Six large rivers, whose general trend is north, drain the country. In the lowlands the hot climate is tempered by the easterly breezes, which blow all the year. Terrible thunderstorms often occur, and at times earthquake shocks may be felt. The fertility of the soil is unsurpassed in South America.

The three Guianas are the only European colonies on the continent, and combined they are not larger than Wyoming and Colorado.

1. British Guiana, formally ceded to Great Britain in 1814, is the largest of the three colonies, and includes the settlements of Demerara, Essequibo, and Berbice, named from the three rivers. It extends from 6° to 1° north latitude, and from 57° to 60° west longitude, including an area of 93,880 square miles. The government is administered by a governor, assisted by a court of policy. There are over 150,000 acres under cultivation, half of which is devoted to the raising of sugar. Population (1861), 278,477, composed of negroes, whites, East Indians and half-breeds. During the past twenty years Chinese immigrants were brought to work on the sugar plantations, but about 1870 all organized importation was discontinued, and there are now only about 4,000 Chinese in the colony. Of East Indians there are 115,463. There are 159 schools which receive government grants, with 21,834 pupils. Georgetown is the capital and principal city.

Mission work in British Guiana is carried on by the Moravian Brethren, the National Baptist Convention, the LMS, the SPG, the SDA, and the PB.

2. French Guiana (Cayenne) was acquired by France in 1626, and includes an area of 46,850 square miles. It is by far the hottest of the three colonies, is poorly cultivated, and though its climate is very insignificant. Cayenne is the capital and largest city. This is the only colony in South America untouched by Protestant missions. Its total population is about 35,000.

3. Dutch Guiana (Surinam) is separated from French Guiana on the east by the river Marowijne, and on the west from British Guiana by the river Oranjestad. It was first acquired by the Netherlands in 1667 in exchange for New Netherlands in America, and was finally surrendered to its possession by the peace of Paris, 1815. The area is 46,060 square miles, much of it consisting of flat and swampy land, while the high mountains are found toward the south. The population is (1900) 68,988, exclusive of the negroes living in the forests, engaged principally in agriculture. Sugar is the principal product. Paramaribo is the capital. The government is in the hands of a governor and the council, who are nominated by the queen. Entire liberty is accorded to the members of all religious con­fessions, and in 1902 there were the following connections: Reformed and Lutheran church members, 9,584; Moravian Brethren, 28,027; Roman Catholics, 12,771; Jews, 1,100; Hindus, 11,158; Mohammedans, 3,918. Mission work in Surinam is carried on by the Moravian Brethren (1755).

Guinea: Name formerly applied to much of the western coast of Africa south of the Gambia River. It is now commonly applied to Portuguese Guinea lying adjacent to Senegambia, and to French Guinea south of the former and north of Sierra Leone.

Portuguese Guinea: A colony of Portugal, is on the coast, entirely surrounded on the land side by French territory. It has an area of only 4,440 square miles, and a population of 820,000 (estimated). It includes the Bissagos Islands off the coast. The chief port is Bissau, or Bissau.

French Guinea: A colony of France on the western coast of Africa, detached from the colony of Senegal in 1890, and organized as a colony in 1893. It has an area of about 95,000 square miles, and an estimated population of 2,200,000. It extends from Portuguese Guinea on the north to Sierra Leone and Liberia on the south, and is bounded on the east by the French dependencies behind Senegal and the Ivory Coast. The coast is low and unhealthful.

Gujarat: A region in Bombay, India. The name does not refer to any political division of the Bombay Presidency, but rather to the area within which the Gujarati language is the ordinary vernacular of the Hindu inhabitants. This region is composed in part of districts belonging to the Bombay Presidency, and in part of the territories of many different native states. It lies along the shore of the Indian Ocean, at its northeastern angle, and between the coast and the Western Ghats, which stretch along about 30 miles from the sea, north and south. On the south it reaches the principal port 70 miles north of Bombay; its most northern point, where it touches Rajputana, is in latitude 24°
45°. It includes the peninsula of Kathiavar, Kachchh, the native states of Baroda, Cambay, those of Mahi Kantha, Rewa Kantha, and Palampur, and several other inferior chieftainships. It also includes five districts of the Bombay Presidency, which contain together a population of 3,000,000. The total area, including feudatory states, is 70,000 square miles, and the total population about 10,000,000. The city of Surat is one of the oldest missionary stations in India; it was occupied by missionaries of the London Missionary Society as early as 1815. In 1846 the mission was transferred to the Irish Presbyterians, who now have 10 stations in that district. The ME and the CA have latterly established stations in this region also.

GUJARATI LANGUAGE: Belongs to the Indic branch of the Aryan family of languages, and is spoken by some 3,000,000 people in the northern part of the province of Bombay, India. It is near of kin to the Hindi, and is written with the Devanagari letters derived from the letters of Devanagari.

GUJRANWALA: A town in the Punjab, India, 40 miles north of Lahore, in a dead level plain which lacks natural drainage. Climate, cool, with frost in winter, extremely hot in summer. Population (1891), 26,800, of whom 14,000 are Mohammedans and 9,000 Hindus. It is the birthplace of Ranjit Singh, the organizer of Sikh nationality. Station of the UP (1863), with (1903) 8 missionaries, men and women; 25 native workers, men and women; 21 day schools, 3 boarding schools, 1 orphanage and industrial school, and about 500 professed Christians. Station of the PS, which, in 1902, voted to withdraw from the place, but the local presbytery has not agreed to this course.

GUJRAT: A town in the Punjab, North India, between the rivers Chenab and Jhelum, 70 miles north of Lahore. Climate, unusually changeable, subject to very severe extremes of temperature. The place has abundant water and good sanitation. It is noted for its brassware and inlaid metal work. Population (1891), 18,100, of whom 12,700 are Mohammedans. Station of the Church of Scotland Foreign Mission Committee (1866) and of the Church of Scotland Woman's Association for Foreign Missions (1877), with a hospital, dispensary, orphanage, and 17 missionaries, men and women.

GULBARGA. See KULBARGA.

GULEGUDDU: A town in the Bombay Presidency, India, situated 53 miles south of Bijapur. Population, 15,506, of whom 13,600 are Hindus. Station of the Basel Missionary Society (1851), with (1903) 4 missionaries, 1 missionary's wife, 21 native workers, men and women; 4 outstations, 6 day schools, and 668 professed Christians.

GULICK, Peter J.: Born at Freehold, N. J., March 12, 1879; graduated at Princeton College 1895, and at Princeton Theological Seminary 1897; sailed November 3, the same year, a missionary of the ABCFM, with the second reinforce- ment for the Sandwich Islands. He was stationed first at Waimaia; then Koloa, on Molokai, till 1847; then at Waialua, Oahu, till 1857, when he removed to Honolulu. In 1874, after forty-seven years of service, he went with his wife and daughter to Japan, and was stationed at Kobe, December 8, 1877. Six of his children became missionaries of the American Board.

GUMLA: A village in Chota Nagpur, India, situated about 35 miles south by west of Lohardaga. Station of the Gossner Missionary Society, with (1903) 2 missionaries, 20 native workers, men and women; 13 primary schools, 7 middle schools, 2 day schools, and 1,911 professed Christians.

GUMPUR: A town in the Madras Presidency, India, situated 50 miles N. of Chinecole in the District of Visagapatam. Station of the Breckenridge Missionary Society (1900), with 1 missionary and his wife and 1 native worker.
**Gundert, Herman:** Born in Stuttgart, 1814. Died in 1893. He joined the Basel Mission in Malabar, India, in 1839, and for twenty-four years he exerted a wide and potent influence in India and other lands. Dr. Gundert was a man of great learning, and his pen was a blessing to the cause of missions. He was the author of many Malayalam books; his dictionaries did much toward the development of the language and dialects of the people among whom he labored, and his Bible translations were painstaking and scholarly. His failing health necessitated his return home, where he became editorial secretary and principal of the “Calwer Verlagsverein.”

**Gunnaur:** A town in the district of Budaus, United Provinces, India, situated about 3 miles from the left bank of the Ganges. Population (1891) 5,500, of whom 3,200 are Mohammedans. Circuit station of the ME, with (1901) 500 professing Christians.

**Gunong Simili:** A town on the E. coast of the island of Nias, Dutch East Indies, W. of Sumatra. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, 1 missionary’s wife, 13 native workers, men and women; 2 outstations, 4 day schools, and 853 professing Christians.

**Guntur:** A municipality and district in the Presidency of Madras, India, situated in the region of the Kistna, about 20 miles W. of the river, in a region that is quite healthful but rather difficult of access. Population (1891) 23,400, of whom 17,300 are Hindus. Station of the ELGS, with (1902) 18 missionaries, men and women; 62 native workers, men and women; 22 preaching places, 42 Sunday schools, 32 day schools, 1 college, 1 orphanage, 1 hospital and dispensary, and 4,848 professing Christians.

**Gurdaspur:** A town in the Punjab, North India, 44 miles northeast of Amritsar. Unimportant except as a trading center for the produce of the neighboring villages. In appearance and sanitary arrangements it is fairly good. Climate, cool and pleasant. Population (1891) 6,000, of whom 3,000 are Hindus and 2,600 Mohammedans. Station of the UP (1872), with (1903) 1 missionary and his wife, 3 women missionaries, 12 native workers, men and women; 39 outstations, and 16 village schools.

**G urzalla:** A town in the Madras Presidency, India, situated on the Kistna River, about 85 miles S. E. of Haidarabad. Station of the ABM (1895), with 1 missionary and his wife, 23 native workers, men and women; 8 outstations, 4 preaching places, 12 day schools, 1 boarding school, and 5,000 professing Christians, of whom 1,800 are baptized adults.

**Gutus:** A settlement in Rhodesia, Central Africa, situated about 175 miles E. N. E. of Bulawayo. Station of the Berlin Missionary Society (1892), with (1903) 3 missionaries, 1 missionary’s wife, 1 native worker, 13 outstations, 12 preaching places, and 150 professing Christians.

**Gutzlaff, Karl Friedrich August:** Born at Pyritz, in Pomerania, July 8, 1803. He early showed great zeal in study, and expressed a strong desire to be a missionary, but, his parents being too poor to educate him, he was apprenticed to a saddler at Stettin. At the age of twenty, he made known his wishes for a missionary life in a sonnet which he addressed to the King of Prussia, which led to his being admitted to the Pedagogium at Halle, and afterward to the mission institute of Jäncke in Berlin. On leaving the school he visited England, and meeting Dr. Morrison, the Chinese missionary and scholar, his mind turned strongly to China as his ultimate field of labor. In 1826, under the auspices of the Netherlands Missionary Society, he sailed for Batavia, where, by his untiring and indefatigable personal efforts for the cause of religion and Christian civilization in China deserve to be held in grateful remembrance by the Church. He made a translation of the New Testament into Siamese, and was associated with Medhurst in translating the Bible into Chinese (Wenli). He also, aided by shipwrecked Japanese sailors, translated the Gospel of John into Japanese in 1838. In 1849 he visited England, Germany, and other countries in Europe, and by his addresses gave a new impulse to missionary effort in China. He returned to China in 1851, and died at Victoria, Hongkong, August 9 of the same year.

**Gwambé Language:** Belongs to the Bantu family of African languages. The term is used by a subtribe in the Transvaal. Better acquaintance with them has revealed the fact that the name is merely a local name for the Tonga language.

**Gweló:** A town in Rhodesia, Central Africa, situated about 100 miles N. E. of Bulawayo, among the Matabili. Station of the SPG (1895).

**Gyaza:** A settlement in Uganda, Central Africa, situated about 15 miles N. of Mengo. Station of the CMS (1835), with (1903) 1 missionary and his wife, 119 native workers, men and women; 1 preaching place, 3 day schools, and 2,437 professing Christians. The name is also written Gayaza.
HAI-CHENG-HSIEN: A town in the province of Liao-tung, Manchuria, China, situated about 32 miles E. by N. of Newchwang. It was the scene of a defeat of the Chinese army by the Japanese in the war of 1894. Station of the UFS (1876), with (1903) a missionary and his wife, 25 native workers, 8 outstations, 5 day schools, and 865 professing Christians.

HAIDARABAD: Capital of the native state of the same name in S. Central India, situated on the Musi River, a tributary of the Kistna, amid wild and picturesque scenery. Towering above all other buildings is the splendid pile of the British Residency. The city was founded in 1689, and its population, numbering (1901) 448,466, is the most varied in India, as well as the most turbulent in appearance. The inhabitants are, for the most part, Mohammedans, making Haidarabad the largest Mohammedan city in India and second in the world of Islam to Constantinople alone. It is a station of the CMS (1901), with (1902) 1 missionary, 5 native workers, and 30 professing Christians. Station also of the WMS, with (1903) 3 missionaries, 60 native workers, men and women; 4 preaching places, 11 day schools, and 193 professing Christians. Station also of the ME, with (1902) 1 missionary and his wife, 3 women missionaries, 19 native workers, men and women; 8 day schools, an orphanage, and 28 professing Christians. The YWCA also has a representative there.

HAIDARABAD: A city in Sind, India. The city is a naturally and artificially fortified town, formerly the capital of Sind. It stands on a low limestone ridge E. of the Indus, and is noted for its silks and its manufactures of fine work in the precious metals. Population (1891) 54,600, of whom 32,000 are Hindus and the remainder nearly all Mohammedans. Station of the CMS (1856) and the CEZ (1856), with 1 missionary and his wife, 3 women missionaries, 22 native workers, of whom 8 are women; 10 day schools, and 1 boarding school. There are also 356 pupils in the zenanas.

HAIDARABAD: One of the largest and most important of the so-called feudatory states of India, governed by a native prince. The ruler is called the Nizam, who is a Mohammedan, the descendant of the “Nizam-ul-Mulk,” or viceroy of the Deccan, who ruled the country as viceroy of the Mogul emperors of Delhi nearly two centuries ago, but in the decadence of the Delhi power rebelled and set up as an independent prince. A British resident is maintained at the Nizam’s court. This state is often called “the Nizam’s Dominions.” Among the people it is popularly spoken of as “the Mogalai,”—in allusion to the Mogul origin of its rulers. It lies in the center of the great tableland which occupies almost all of India south of the Vindhyas. The area of the state is about 80,000 square miles. The population (1901) is 11,141-142. Of this number about 10 per cent. are Mohammedans, and as the ruling dynasty is Mohammedan, persons of that faith occupy not only the principal positions of trust and authority but also pervade the lower ranks of both civil and military employment. The state lies just where several language areas meet; accordingly there is a great diversity of dialect within its borders. Marathi is spoken by the Hindu population of the west and northwest; Kanarese by the Hindus of the southwest; Telugu by those of the eastern districts; Hindustani by the Mohammedans throughout, the Persian is the court language; and the aboriginal tribes (Gonds, etc.) have, as elsewhere, each its own tongue. The habit of carrying weapons is quite universal among Mohammedans throughout the state; to some extent Hindus also adopt it. It is not unusual to see, in some village bazaar, a man with a long matchlock musket over his shoulder, a curved sword in his hand, two or three daggers and knives of different patterns stuck into his girdle, and a shield of ancient pattern hanging down his back. The presence everywhere of these walking arsenals, together with the violent and bitter fanaticism of the average Mohammedan, and the feeling prevailing in the minds of the Muslim inhabitants of the Haidarabad State that it is a territory sacred to their faith and power, often renders missionary work there difficult, not to say dangerous; no Christian preacher has, so far, been actually assailed, tho sometimes threats of violence are made. While it was considered unsafe, some years since, for strangers to enter Haidarabad City without protection, this is not the case at present. In other parts of the territory life and property are usually safe. Education in the Nizam's state is rather backward, and the general condition of the country, as shown by its roads, postal system, and other appliances of civilization, attests the inefficiency and carelessness of Oriental rule. Yet the constant example of the British Government is not altogether without success, to pattern its operations after the model thus set before it. Three lines of railway pass through the territory, and thus the capital is brought into direct communication with outside civilization. The WMS, the SPG, the ME, and the ABMU are the missionary societies chiefly engaged in the territory of Haidarabad.

The whole number of missionaries in the 19 stations is 54, both male and female. They carry on 136 schools of all grades, and the number of communicants connected with these stations is about 5,500. The whole number of Christians reported from the Nizam's territory by the census of 1901 is 22,996. On the whole, although this Mohammedan area in the midst of territories under the control of an enlightened Christian nation, is still to a degree benighted, yet rays of light are beginning to dawn over it, and civilizing influences are slowly penetrating it from all sides.

HAIIFA: Also called Caifa; it is the Scaminium of St. Jerome, a seaport in Syria, situated at the foot of Mt. Carmel, 9 miles S. S. E. of Acre. It is the terminus of a railway from Damascus to the coast through the Hauran. There is a German colony and a colony of Russian Jews at this place. Population about 3,000. Station of the Jerusalem Verein (1891), with (1903) 1 missionary and his wife, 1 deaconess, 1 place of worship, and 1 village school. Station also of the Jerusalem and the East Mission Fund; outstation of the CMS, the statistics being included in Acre (or
Among which Mandarin, Hakka, and Cantonese from this mouth. It is a well-built city of 100,000 is the port. All the thirteen district towns lie on the coast, and the interior of the island is given up mainly to the aborigines.

Missions: In 1630 the Roman Catholics commenced a mission at Kiung-chau. All that remains of their work now is the cemetery of the missionaries and a few hundred descendants of the early converts. Protestant missionary work began in 1881 with the medical and missionary labors of Mr. Jeremiassen, an independent self-supporting missionary. In 1883 Rev. B. C. Henry, of the Presbyterian Board Mission (U. S.) at Canton, made a visit to the island. In 1884 a preaching place to the Hakkas was opened at Noda, a Hakka settlement. In 1886 the PN sent two missionaries who made Kiung-chau the center of their work. During the last decade the Gospel has been preached in nearly every part of the island, several chapels have been built, hospitals have been opened, schools have been established, and largely through medical missions many have been won to Christ.

HAINANESE LANGUAGE: Belongs to the Tai group of the Indo-Chinese family of languages, being spoken by the inhabitants of the island of Hainan, South China. The Roman letters have been used in writing it for missionary purposes by missionaries of the PN.

HAIG General F. T.: Born in 1827. Died in 1901. General Haig, though not a missionary, for many years was an active Christian worker in India, and later in relation to the North Africa Mission. In 1883 he visited Algeria, and when the mission was reorganized later in the year he consented to join the Council of the Society. He was a most active member of it, and several times visited the mission field, and also by his pen and his voice stirred up interest at home. After he retired from the army his thought was largely given to mission subjects; and his wide experience made him a most valuable adviser on almost every missionary topic, while his self-denying generosity forwarded the good work. It was largely as a result of his journeys, and at his suggestion, that the North Africa Mission Society began work in North Africa. And it was then a letter of his that the Hon. Ion Keith Falconer went out to Aden, and the CMS sent Dr. Harpur to the Arabian coast of the Red Sea. His work in Upper Godavari, Calcutta, Arabia, Egypt and other parts of Africa was attended always by the warmest interest from one who knew him well. He well said of him: "Of all the men I have met I never knew one who seemed more thoroughly true-hearted and devoted in the service of Christ." In 1885 he published a pamphlet on the spiritual needs of Arabia, and wrote a number of articles urging the evangelization of that long-neglected land.

HAI-LUNG-CHENG-TING: Town in Manchuria, situated about 130 miles N. E. of Mukden. Station of the UFS (1897), with (1903) 1 missionary and his wife, 4 native workers, 5 outstations, 4 day schools, 1 dispensary, and 735 professing Christians.

HAINAN: An island lying off the coast of Kwangtung, China, between lat. 20° 8' N. and lat. 17° 52' N. It has a total length of 150 miles from north to south, and a width of 100 miles from east to west. It is separated from the peninsula of Luichau by the Strait of Hainan, which is twenty miles wide.

On account of its insular position the climate is more moderate than that of the mainland; 97° F. is the extreme of heat even during the heated term. Its inhabitants are estimated at a million and a half, and consist of three different elements—Chinese immigrants, partially civilized aborigines, and the rude savages. The Chinese language used in the island is a dialect which has been called the Hainanese and resembles the Fo-kien dialect. It is understood even by the aborigines. Many other Chinese dialects are also found, among which Mandarin, Hakka, and Cantonese are the most prominent. Among the aborigines numerous dialects are found which seem to be allied to those of the Shan tribes of Burma. The people are disposed to be friendly to foreigners. The island is a political part of Kwangtung province, and the obstacles to missionary work arise from the officials more than from the common people. The aborigines differ from the Chinese in having higher cheek-bones; they are of a copper color, and their eyes are not oblique. The capital is Kiung-chau, on the Limu River, four miles from its mouth. It is a well-built city of 100,000 inhabitants. Hoi-hau, at the mouth of the river, is the port. All the thirteen district towns lie on

HAITI, or HAYTI: An island of the West Indies, next in size to Cuba, and lying between Cuba on the west and Porto Rico on the east. It is mountainous, with the ranges running from east to west throughout the island. The soil is exceedingly fertile, and mineral wealth is supposed to be considerable. About two-thirds of the island is occupied by the Republic of Santo Domingo. The western part, comprising a little more than one-third of the whole area, belongs to the Republic of Haiti. The island was discovered by Columbus in 1492 and entered by Spaniards in 1493. The western part was occupied by French buccaneers in 1632 and annexed by France in 1697. A century later the slaves revolted against the French and after bloody wars proclaimed their independence in 1801. The eastern or Spanish part of the island was conquered by the Haitians in 1822-23, but revolted in 1843-44, becoming the Dominican Republic. The present part of the island was ruled by emperors for some years and finally adopted the republican form of government. The area of the whole island is 28,250 square miles.

HAITI, or HAYTI, Republic of: An independent territory in the western part of the island of Haiti. The republic is of the French type and has suffered from numerous revolutions and wars. The people are largely blacks (some 10,000 of whom are immigrants from the United States) and a very few whites. The population of the republic was about 950,000 in 1887; a church census in 1901 claims that it is now 1,294,400. The language is a dialect of French, and the religion is Roman Catholic, although the voodooism of the Africans is extensively mingled with the Christianity of the common people.

Protestant missions were begun in Haiti by the WMS in 1816. They received a fresh impulse in connection with the emancipation of negroes from the United States, in 1824. Many of these were Methodists and others were Baptists. Several preachers were among these American negroes, and a Methodist Conference organized among
them in connection with the African Methodist Church of the United States continues to this day. The Baptists also have several churches in Haiti which were not established in consequence of this emigration. The American Baptists, maintained missionaries in three or four places for several years, but gave up the field to the BMS, and, at present, the Jamaica Baptist Missionary Union aids some smaller Baptist congregations, the general oversight being under charge of the Haitian Baptist Union, composed of the pastors of churches which have no financial aid from abroad.

Colored Episcopalian from the United States having emigrated to Haiti in 1861, the field was taken up by the PE, and there are now six regular congregations, superintended by a Bishop, and with a theological seminary for training a native ministry. The field is very needey, since the people of the country districts are ignorant and rather to be classed as fetish worshipers than as Christians. 

Justin (L.), Études sur les institutions Haïtiennes, Paris, 1894; St. John (Sir. Spencer), Haiti, or the Black Republic, London, 1889; Missionary Review of the World, Vol. VIII.

HAJIN: A town in Asiatic Turkey, about 30 miles north of Adana, in the heart of the Taurus Mountains. The population is almost entirely Armenian. Station of the ABCFM (1889), with (1902) 1 missionary and his wife, 3 women missionaries, 38 native workers, men and women; 7 outstations, 4 preaching places, 2 village schools, 2 high schools, an orphanage; a Young Woman's Christian Association, and 915 church members.

HAKA: See Fort Haka.

HAKCA: A distinct race found in the Canton province, China, near Canton and Swatow. They are of a lower social rank than the Foo-ti or native Chinese, and speak a different dialect. They are also found in the island of Hainan.

HAKKA LANGUAGE: A dialect spoken by a peculiar race or tribe who inhabit the mountains of Kwangtung province in China. It is written with the Chinese characters. Missionaries of the Basel Society have had some success in introducing the Roman letters as a more convenient means of writing it.

HAKODATE: A seaport on the southern extremity of the island of Yezo, Japan. The town is built along the base of a rocky headland, and is not unlike Gibraltar in its situation. A landlocked bay affords ample shelter and anchorage for the largest vessels. The governor of Yezo resides at Hakodate, where there are a government hospital and medical college. The streets are clean and well kept. Population (1890) 56,700. Station of the CMS (1874), with (1903) 3 missionaries and their wives, 5 women missionaries, native workers, men and women; 4 outstations, 5 preaching places, 5 day schools, 1 boarding school, 1 theological class, 1 industrial school, 1 hospital, and 675 professing Christians. Station also of the ME, with (1902) 2 missionaries and their wives, 5 women missionaries, 41 native workers, men and women; 9 outstations, 16 preaching places, 2 day schools, 1 high school, and 749 professing Christians.

HALL, Gordon: Born at Tolland, Mass., April 8, 1784; graduated at Williams College 1809 with the highest honors of his class; studied theology with Dr. Porter (afterward professor at Andover); was licensed to preach, but, declining several invitations to settle, his heart being set on going to the heathen, he entered Andover Seminary in 1810. For two years he worked with Mills, Richards, and a few other kindred spirits, who prayed and conferred in reference to personal labor among the heathen. After studying medicine he was ordained at the same time with Judson and others, and sailed February 18, 1812, as a missionary of the ABCFM for India, reaching Calcutta August 8. Peremptorily required by the East India Company to leave its territories, and unsuccessful in his attempts to obtain permission to establish a mission, he presented to the governor of Bombay an earnest appeal, which brought him official permission to remain. In Bombay he labored thirteen years, visiting the temples and bassars with the Gospel message, discussing with the Brahmans and translating the Bible. Having completed the translation of the New Testament into the Marathi, he left Bombay for a preaching tour on the continent. At Nasik, a hundred miles distant, he found multitudes dying of cholera, and ministered to the sick till his medicines were exhausted. He then started to return to Bombay. At Durliapbour, spreading his mat in the veranda of a heathen temple, he lay down to sleep. At five o'clock in the morning he resumed his journey, he was violently seized with cholera, and, after eight hours of great suffering, breathed his last at the age of forty-two, March 20, 1826. The lads who were with him buried him shrouded in his blanket, without a coffin. A stone with an inscription in English and Marathi marks the place of his interment, "No missionary in Western India," says one, "has ever been more respected among the Brahmans and higher classes for his discussions and pulpit discourses." His tract, The Conversion of the World, or the Claims of Six Hundred Millions, which he prepared in connection with Mr. Newell, was widely circulated in America and England and produced a profound impression.

HALL, William Nelthorpe: Born in Sheffield, Yorkshire, England, April 19, 1829. In 1849 he was called to the regular ministry, having already been a lay preacher. But his health failed, and he went into business. In 1859, the Methodist New Connexion having decided to commence a mission in China, Mr. Hall offered to go, and in the autumn of 1859 he sailed with the Rev. J. Innocent as a missionary of the Methodist New Connexion. On their arrival in China they remained for a brief period in Shanghai. Mr. Hall was anxiously desirous of settling at Su-chau-fu, which was then in all its glory. He visited the place, then made it the center of his operations, while Mr. Innocent went to Hangchow, which had just been opened by treaty. The Taeping rebels devastated Su-chau, and prevented the establishment of a mission there, and Mr. Hall went to Tien-tsin and united with Mr. Innocent in laying the foundations of a very prosperous mission. During the Tien-tsin massacre of 1870 the Protestant churches, eight in number, were ruined and the members dispersed, many of them being beaten and some of them killed. Mr. Hall remained in the city during the awful cutlass. He at length went, with a party of Chinese Christians, to rescue those who were in danger. The storm exhausted itself, quiet was restored, compensation was demanded and to some extent made, and the work of the mission was resumed. But it took a long time to retrieve the losses incurred.
In 1873 he returned home on furlough, and devoted his whole time to obtaining money to support an institution for the training of native preachers. He obtained $25,000 and then went to China and built the Training College at Tien-tsin.

Mr. Hall was pursuing his manifold works with intense enthusiasm, when in the spring of 1878, already weakened by his labors, he was smitten by typhus fever. He died March 21, aged 49 years. He was a man of vigorous and cultured intellect, copious eloquence, and undying energy. He had an iron will and dauntless courage. His one purpose found expression in words which were constantly on his lips—"China for Christ."

HAMADA: A town in Japan on the west coast of Honshin, 200 miles N. E. by N. of Nagasaki. Station of the CMS (1895), with 2 women missionaries and 3 native workers.

HAMADAN: A city in Persia, supposed site of the ancient Ecbatana; situated at the E. base of Mt. Elvend, 185 miles W. S. W. of Teheran. Altitude, 6,000 feet. A trade center for caravans between Baghdad and Teheran. Population, 50,000. Station of the PN (1880), with (1903) 100,000 confessed evangelical Christians.

In his interview with the Empress at the beginning of his mission, he impressed on her the necessity of the largest excommunications being hurled at "free thinkers" by their ecclesiastical chiefs. There is rarely to be found in the history of missions a more picturesque spectacle than that of Dr. Hamlin during the Crimean War (1854-56), observing the wounded English soldiers landed on the quays of Constantinople; abandoning his school duties in order to verify and remedy the facts; berating English officers of every grade for the red tape that made possible a criminal neglect of suffering soldiers; finally taking contracts to supply the hospitals and depot camps with eatable bread and thoroughly cleaned linen, and then executing the contracts with brilliant and beneficent efficiency by turning to the work all his energies and those of all of his students and teachers, and of scores of poor creatures who had been left without work because of their faith. And there is hardly a more impressive figure of self-forgetfulness among the many devoted missionaries of the world than that of Dr. Hamlin, after having carried through by his own wonderful and unaided abilities, taking the $25,000 which fell to him as his legitimate profit, and covering it all into the missionary treasury to be used in aiding the little native communities to build chapels and churches. The whole episode of his services to the English army was magnificent as an achievement and thrilling as revealing the man. But the inceptive theological seminary became almost obliterated under the weight of the flour mill and bakery. While the question was under discussion of improving its efficiency, the seminary for training the native agency needed by the mission, Dr. Hamlin resigned his connection with the ABCFM at the invitation of Christopher Robert, of New York, in order to establish Robert College at Constantinople. The first class of this college was received in 1863. The enormous difficulties in securing a site, authorization, and construction of the college buildings were overcome by the same indomitable energy, resource, and pluck which made Dr. Hamlin inimitable, and the structure on the Bosphorus hills, which is the enduring monument to his memory, was opened in the summer of 1871.

In 1873 Dr. Hamlin returned to the United States and his connection with Robert College ceased. He excelled in works of preparation and in dealing with initial difficulties. Others could endure better than he the steady drudgery of organizing and developing the College in order to carry it satisfactorily forward into the place assigned to it in the preconceived plan.

Dr. Hamlin was professor of dogmatic theology at Bangor Seminary from 1877 to 1889, and president of Middlebury College in Vermont from 1880 to 1885, and after his retirement to Lexington, Mass., was much sought after for lectures and information for newspaper articles.

He was a most spiritually-minded man and of very deep feelings. A little quick in temper, and sometimes disposed, in a land of turbulence like Turkey, to take the law into his own hands, to a hopelessly irremediable deed. But when it was remediable, he was extraordinarily ready to make amends, in a tender, whole-souled way that did really make amends, for any injustice done in
haste. No American missionary, without exception, ever gained such hold upon the hearts of the evangelical native community in Turkey, nor is regarded by them as having accomplished so much, as Dr. Hamlin for the spiritual and moral renovation of that land of darkness.

**HANAMAKONDA**: A town in the native state of Haidarabad, India; 86 miles northeast of the capital. Climate, tropical; population, 8,000. Station of the ABMU (1879), with (1903) 1 missionary and his wife, 2 women missionaries, 27 native workers, men and women; 15 outstations, 14 day schools, 1 hospital, and 513 church members.

**HAN-CNENG-HSIEY**: A town in the province of Shen-si, situated on the Hoang-Ho River, 120 miles N. E. of Hsi-nan-fu. Station of the CIM (1897), with (1903) 1 missionary and his wife and 3 women missionaries.

**HAN-CHUNG-FU**: A town in the province of Shen-si, China, situated on the Han River, 225 miles N. E. of Cheng-tu-fu, at an altitude of 2,000 feet. It is a center for trade with Sze-chuan. Station of the CIM (1879), with (1903) 2 missionaries and their wives.

**HANG-CHAU-FU**: A city in the province of Che-kiang, China, situated at the southern terminus of the Grand Canal, and at the head of Hang-chau Bay, 110 miles southwest of Shanghai. Its beauty of location is celebrated in a popular Chinese proverb, and, with the beautiful western lake, in which are fairy-like islands, and around which stand villas and monuments, with its extensive marts and temples, 15 miles in well-paved streets, and numerous public buildings, it well deserves the name of an earthly paradise. It is a great center of Chinese commerce and learning. Marco Polo celebrated its beauty under the name of Kinsai, and in a northeast corner of the city is the Nestorian Church of which he speaks. The population is estimated at 500,000. Station of the PN (1859), the CMS (1864), the CIM (1866), the PS (1867), and the ABMU (1899). These societies together report (1903) 35 missionaries, men and women; 72 native workers, men and women; 32 outstations, 11 places of worship, 19 day schools, 2 boarding schools, 5 dispensaries, and 5 hospitals. The WMS has special work among the blind, and the CMS has a theological school and a training school for women evangelistic workers. The National Bible Society of Scotland has here a printing house under charge of two agents (with their wives), and 27 native workers. Name also written Hankow.

**HANKEY**: A village in Cape Colony, S. Africa, situated in the Humansdorp division, 46 miles W. of Port Elizabeth. Population, about 1,600. This settlement was established by the LMS in 1828 as a refuge for freedmen, upon land which the Society had purchased. After some years the quality of the negro population began to deteriorate, and in 1875 the LMS ceased to provide for their care and spiritual nurture. In 1900 it took up this work again and established a school there for the higher education of the children of colored Christians throughout the colony. It now (1903) has 2 missionaries and their wives, 18 native workers, 1 boarding school, and about 1,600 professing Christians, of whom 370 are church members.

**HANNINGTON, James**: Born at Hurstpierpoint, England, September 3, 1847. Love of nature, of fun, and of adventure was phenomenal with Hannington. He shrank from no risk which promised a view or a specimen. Averse to study, he left school at the age of fifteen, and was put in his father's counting-room at Brighton. To whatever suited his tastes or habits he applied himself with unflagging perseverance, never to be outfaced, and never to be foiled. As captain of a battery and as commander of a steam yacht he early displayed ability in the control of men, and resource under exigencies. But he was as disinclined to business as to study. In boyhood the love of his mother was the sheet-anchor of his life. He not only never neglected the externals of life apart from God. About the age of twenty-one he decided to prepare for the ministry of the Church of England, and to that end, in October, 1868, entered St. Mary's Hall, Oxford. He soon established an ascendency over his fellow-students, which he maintained without a break through his university course, and this influence was often beneficial, but it cannot be said that he was studious, except in the line of his pursuit as a

HANNAK: A city in the province of Hu-pe, China, situated on the north side of the Yangtse River, at its junction with the Han, about 450 miles west of Shanghai. It is the largest commercial center of China, and the foreign trade in 1858, and is connected with Shanghai by regular steamships. The British settlement is on the river front in the eastern portion of the city, where foreign houses and roadways are built. The native city is surrounded by a wall eighteen feet high and four miles in circumference. It contains a population estimated at 300,000. Wu-chang, the capital of the province, is on the southern bank of the Yangtse, opposite Han-kau, and the two are often spoken of together with Han-yang, which faces Han-kau on the other side of the Han River, as one city. The population of the three cities together is about 1,200,000. Station of the LMS (1861), the PE (1868), the WMS, the CIM (1889), the American Norwegian Lutheran Church (1891), and the United Evangelical Church (1900). These societies together have (1903) 33 missionaries, men and women; 72 native workers, men and women; 32 outstations, 11 places of worship, 19 day schools, 2 boarding schools, 5 dispensaries, and 5 hospitals. The WMS has special work among the blind, and the CMS has a theological school and a training school for women evangelistic workers. The National Bible Society of Scotland has here a printing house under charge of two agents (with their wives), and 27 native workers. Name also written Hankow.
naturalist. He was ordained a deacon in 1874, and took charge of a small parish in Devonshire. There he experienced a new conversion, and in 1875 a conversation on missions with two ladies led him to study that subject thoroughly. Three years later the cruel death of Messrs. Smith and O'Neill, two missionaries on the shores of the Victoria Nyanza, in Africa, greatly moved him. Believing that he had certain elements of character as well as experiences of life that fitted him for pioneer mission work, and obtaining the consent of his wife, who could not accompany him, he offered himself to the CMS for the African field for five years. The offer was accepted, and he was entrusted with the leadership of a party of six to reenforce the Central African Mission at Rubaga. An appeal from him in the *London Times* for subscriptions to enable him to take a boat to navigate the lake was successful. He sailed with his party May 17, 1882, for Zanzibar. On the voyage he studied Swahili, the language spoken by the natives on the coast, and the knowledge so obtained was very useful to him. The party set out for Uganda by the "old route," via Mombasa, Mvui and Masala, then by boat across Victoria Nyanza to Rubaga. He soon had severe attacks of African fever, dysentery and rheumatic fever. His health being greatly shattered, it was decided that he must return to England. In January, 1883, he started for working there, reaching England June 10. After his health was restored he was consecrated Bishop of Equatorial Africa, and in January, 1885, returned again to the Dark Continent. On reaching Freretown, which he intended to make his home, he began the visitation of every prominent mission station within 250 miles of the coast. To reach the important station at Taita, on the mountain Ndara, 2,500 feet above the plain, he had to traverse swamps and 200 miles of difficult and dangerous desert. He had frequently formulated in his mind the idea of opening up a new route to Uganda, through a shorter, more elevated and healthier region than the one which had shattercd his constitution two years earlier, and early in 1885, after careful consultation, he started with 200 porters from Mombasa. The party set out for Uganda by the "old route," via Mamboia, Myui and Msalala, then by boat across Victoria Nyanza to Rubaga. Bishop Hannington pushed forward with a part of his men to Uganda. On November 8 word was brought to those left at Kwa Sundu that the bishop and his party had been killed. Four only of the fifty escaped to bring the sad news and to tell the manner of his death. The encroachments of the various foreign powers on African soil had naturally awoken suspicion of whites, including missionaries. There was a strong prejudice in Uganda against the approach of foreigners from the north. When Mr. Thomson penetrated to Usoga two years before, his arrival occasioned new alarm and suspicion. A report of the high-handed proceedings of the Germans in Zanzibar added fuel to the flame, and the chiefs at once counselled all the missionaries, "who," he said, "were only the forerunners of invasion." At this critical time the arrival of Bishop Hannington at the north side of the lake was announced, and the council decided that he should be put to death. Mwanga was at first unwilling, and said to the soldiers appointed to kill him: "Go, tell Mwanga that I die for the Baganda, and that I have purchased the road to Uganda with my life." His last words to his friends in England, scribbled by the light of some camp-fire, were: "If this is the last chapter of my earthly history, then the next will be the first page of the heavenly—no blots and smudges, no incoherence, but sweet converse in the presence of the Lamb."
A town in Asiatic Turkey, situated near the Murad Su branch of the Euphrates, about 60 miles N. of Diyarbekir. It stands at an altitude of 4,100 feet on a hill that overlooks a most fertile plain. The population of the town is about 12,000, chiefly Mohammedans, but with a certain number of Armenians and a few Syrian Christians. At Mezār, a small village 3 miles distant, is the tomb of Sharafeddin, Governor-General of the province of Manuret-ul-Aziz (commonly called the province of Harput). The Armenian part of the town and the villages of the plain were devastated in November, 1895, and thousands of the Armenian inhabitants massacred after the authorities had first induced the villagers to give up, as a token of loyalty, what guns they possessed. At the time of the massacre artillery was turned upon the Armenian quarter of the town, and eight of the buildings of the American Mission were looted and destroyed. Station of the ABCFM (1855), with (1902) 13 missionaries, men and women; 119 native workers, men and women; 40 outstations, 38 preaching places, 58 village schools, 5 high schools with graduate course, and 1,450 evangelical Christians. The most important feature of this station is the Euphrates College, which offers higher education to the people of a wide expanse of country in the heart of Asiatic Turkey. The college has a department for girls, which is wholly separate from the department for young men, altho under the same administration. In 1901 there were in all departments, from kindergarten up, 1,057 students, of whom 476 were girls, and 100 boys and girls were in the four college classes. The buildings burned in 1895 have been rebuilt. The indemnity paid by the Turkish Government was not, however, enough to cover the cost.

HASBEITJA: A town in Syria, Asiatic Turkey, situated 22 miles E. S. E. of Sidon, in a deep glen on the ridge of Mt. Hermon. It has asphaltum in its neighborhood. Population about 5,000. Station of the British Syrian Schools Committee (1866), with (1900) 2 women missionaries, 6 native women helpers, and 7 day schools in the place and neighboring villages.

HASKELL LECTURESHIP for India. See BARNHORNS LECTURESHIP.

HASSAN: A town in Mysore, India, situated 63 miles W. by N. of the City of Mysore. Population about 6,000. Station of the WMS, with (1903) 1 missionary, 54 native workers, men and women; 6 places of worship, 13 day schools, 1 orphanage, and 169 professing Christians.

HASTINGS, Euorats Parmelee: Born at Clinton, N. Y., April 17, 1821; graduated at Hamilton College 1842, and Union Theological Seminary at New York 1846; ordained at Clinton, October 6, 1846; embarked for Ceylon, November 18, the same year, as missionary of the ABCFM. On his arrival he was appointed by the mission as an instructor in the Batticotta Seminary, where he remained for six years. In 1853 he embarked for the United States, and engaged with Mr. Sanders in collecting funds for a college in Jaffna. Returning, he was appointed in 1872 president of the college. After occupying the presidency of the college for seventeen years, he retired in 1889, on account of increasing physical infirmities, and removed to the Manepoy station, of which he took charge. He died July 31, 1890, after an illness of two or three days. Altho Dr. Hastings devoted himself largely to educational work, this did not prevent his preaching. He had the active superintendence of several churches while ostensibly burdened with the care of Jaffna College.

HASTINGS: A village in Sierra Leone, situated about 12 miles S. E. of Freetown. Station of the WMS, with (1903) 33 native workers, men and women; 4 preaching places, 2 day schools, and 319 professing Christians. Station also of the Sierra Leone native church in cooperation with the CMS, with (1903) 6 native workers, men and women; 2 preaching places, 2 day schools, and 613 professing Christians.

HATHRAS: A town of the United Provinces, India, situated in the district of Aligarh, about 22 miles S. of that city. Population (1891) 30,200, of whom 23,700 are Hindus and about 5,000 Muslims. Station circuit of the ME, with (1902) 21 native workers, men and women; 11 day schools, and about 800 professing Christians.

HATTON: A village in Ceylon, situated 25 miles S. W. of Kandy and just north of Adam's Peak. Station of the WMS.

HAUSA LANGUAGE: Belongs to the negro group of African languages. It is the medium of intercommunication between the inhabitants of extensive districts in the Niger region in West Africa. It is customary to speak of "the Hausa people," "Hausa land," "Hausa language," etc. Since CMS missionaries went to live in that country, however, it has become apparent that these terms exist outside of Africa only. Hausa means "the language," and the name is applied to the language of the Habes race, which has spread until it is spoken by a number of different tribes within and without the Fulani Kingdom. Some of these tribes are Mohammedans in religion and some are still heathen. The language has been printed with Roman letters by missionaries of the CMS.

HAVANA: Capital of Cuba, situated in the western part of the island and on the N. coast. It has a beautiful harbor. Population, 225,000. Station of the American Church Missionary Society (1876), the AFFM (1889), the FCMS (1899), the MES, and the African Methodist Episcopal Church. These societies have 12 mission- ary, men and women, and 11 native workers. The ABS also has a depot in the city in charge of an agent.

Total expenditures for foreign missions (1901):
Salaries $911.10, publications $177.31, fund
73.70; grand total $1,162.01. Publications
(190; chiefly hymn books and Bibles), $1,931.37.
Receipts for (1901) purpose of $515.71,
invested funds $146,619, property $102,800.
The organ of the Society is The Friend, monthly, Honolulu,

(1823): Less than five years from the landing of
the first missionaries on Oahu of the Hawaiian
Islands, a “General Meeting” of the missionary
fathers was convened. This was held annually,
for thirty-one consecutive years, from 1823-1854,
with but seven exceptions. At the first meeting
the object of the gathering was stated:
“With the signed, ministers and mission­
aries of the Lord Jesus Christ in the Sandwich
Islands, being set for the defense of the truth
and the enlightening of the Gentiles, agree to
unite in an association for mutual improvement
and mutual aid in laying the foundation, main­
taining the order, and building up the house of
the Lord in these islands of the sea.” In 1854
this General Meeting became the Hawaiian
Evangelical Association; three years before, in
1851, the Hawaiian Missionary Society of the
fathers had been formed, for the purpose of coop­
erating with the American Board in its new
missions in the island world; this was continued
till 1863, when the Hawaiian Evangelical Associa­
tion was remedied by being opened to represen­
tatives of the native churches, and the Board of
the Hawaiian Evangelical Association, commonly
known as the Hawaiian Board, was formed. This
Association consists of “all ordained clergymen,
both native and foreign, of the Congregational
and Presbyterian orders on the various islands of
Hawaii, and of Micronesia and the Marquesas
Islands, together with such laymen as may be
elected from time to time by a two-thirds vote,
and lay delegates appointed annually by the
local island associations; six from Hawaii, four
from Maui and Molokai, four from Oahu, and
three from Kauai and Niihau.” This Associa­
tion appoints the members of the Hawaiian
Board, of whom twenty-two are white men
and eleven are natives. It is the duty of this Board
to perform any agency requested of it by the
Prudential Committee (American Board), in
respect to former missionaries of the ABCFM at
these islands; and the education of their children
at the islands, and to take charge of home mis­
sions on the Hawaiian Islands, the education of
a native ministry, and of females who may become
teachers and pastors’ wives; of the preparation,
publishation, and circulation of useful books and
tracts, and also of foreign missions, so far as the
conduct of them from these islands shall be
found practicable and expedient, and shall take
charge of and disburse funds contributed for
these objects. The home mission work of the
Hawaiian Board consists of evangelistic and
educational work among the native Hawaiians,
and the English-speaking population, and among
Chinese, Japanese, Portuguese, and Gilbert
Islanders resident in the islands. Total expen­
diture for home missions, $31,801.12, as follows:
home missions $7,968.07, Japanese missions
$5,371.35, North Pacific Missionary mission
$5,731.35, North Pacific Missionary
Institute $2,435, Kohala Girls’ School $2,280.
The foreign work of the Hawaiian Board began
in 1852, when three Hawaiian families went with
the American Board missionaries to establish
the Micronesian Mission. A year later a chief
from Maui’s islands visited the Micronesia Islands
and Lahaina, and asked that missionaries be sent
to his islands. Two Hawaiian pastors volunteered
to respond to the call, and one of them still
remains there. Since the beginning of its foreign
work, the Hawaiian Board has sent more than
thirty Hawaiian families to the Micronesian and
Marquesas Islands, and the native church has
given, upon a conservative estimate, not less than
$112,000 to this work

HAWAI'I, or SANDWICH ISLANDS: A group
lying in the middle of the Pacific Ocean, in lati­
tude 19° to 22° north, and longitude 155° to 160°
west, about 2,000 miles from San Francisco, and
constituting a territory of the United States.
The islands were discovered by Captain Cook in
1778, and were named by him the Sandwich
Islands, but they have always been called Hawaii
by the natives themselves. The principal islands
and their respective areas are: Hawaii, 4,850
square miles; Maui, 750 square miles; Oahu, 700
square miles; Kauai, 780 square miles; Molokai,
170 square miles; Lanai, 170 square miles; Niihau,
110 square miles, and Kahulawake, about
48 square miles.

Almost the entire surface of Hawaii is com­
pared of the slopes of four volcanic mountains.
Mauna Loa, 13,600 feet high, is one of the few
active volcanoes. Mauna Kea, on the opposite
north side of the island, is 13,805 feet in height
and is the highest peak in the Pacific Ocean.
This island is of historical interest as being the
place where Captain Cook was killed, and a monu­
ment is erected at Kealakekaua Bay. Maui has
also mountains of volcanic origin, with fertile
valleys lying between. Kahulawake, together with
Lehua, is a large sheep pasture. Molokai is formed
by a backbone ridge, with lateral spurs enclosing
ravines. A leper settlement is the only object of
interest found on this island. Oahu is noted
for the beauty of its scenery. Peaks, cliffs,
ravines, cascades, and tropical vegetation unite
to please the eye. It is traversed from southeast
to northwest by two parallel ranges of hills. By
some volcanic upheaval a bay of the sea has been
converted into a plain some twenty-five feet
above the level of the ocean, and this is the site
of Honolulu, the capital of the territory. Kaupai,
like the rest of the islands, is mountainous, but
has many valleys which are very fertile, and the
north side of the island is the choicest land for
growing sugar in the whole group. Niihau has a
dry, fertile soil, and is used for pasturing sheep.
The climate of nearly all the islands is noted
for its healthfulness, for, tho warm, it is equable,
and there is very little variation in temperature
between the winter and summer. Clear skies
and regular land and sea breezes combine to
render the islands one of the most delightful
habitations in the world. The rainfall is quite
excessive, especially on the windward side of the
larger islands.

The natives of the Hawaiian Islands belong to
the Malay race, as modified in the Polynesian
type. Physically, they are among the finest
races in the Pacific, and they have shown con­
siderable intellectual capacity. Previous to the
introduction of Christianity they were not much
superior in moral character to any of the other
savages in the Pacific. Polygamy, infanticide,
and polyandry all prevailed. The idolatry of the Kanakas, as the natives are called, was barbarous and bloodthirsty, for human sacrifices were frequently offered during the sickenss of a chief, at the dedication of a temple, or at the inception of a war. On the other hand, the natives are even-tempered, light-hearted, and a pleasure-loving race. When the islands were discovered the natives were estimated at 400,000, but they seem to be dying out, for the census of 1900 gives only about 30,000 natives, and it is feared that in the course of a few years the total extinction of the race will ensue. The remainder of the population consists of 7,355 half-castes, 28,553 white foreigners and people of foreign descent, 58,500 Japanese, and 25,742 Chinese. There are restrictions on Chinese immigration. The language is a branch of the Malay-Polynesian, and can be understood by New Zealanders. It is a soft, liquid, vocalic tongue, containing only five consonants, k, l, m, n, p, an aspirated k, five vowels, and a diphthong.

The former scanty costume of the inhabitants has now given place to modern European dress, too the women still cling to the holoka, a loose white or colored garment with long sleeves.

Leprosy is prevalent, and the government has established a settlement on Molokai, where sufferers from this disease are isolated.

Religion: Since the spontaneous movement of 1819-20, when idols and temples were destroyed by the natives, the Gospel has been preached until the whole nation is now practically Christian. The American missionaries arrived in 1820, and, in addition to accomplishing the conversion of the islanders to the Christian religion, they taught them to read and write, reducing their language for the first time to a written form.

All denominations of religion are tolerated. Roman Catholics, Anglicans, and Congregationalists are the principal denominations. Schools are established all over the island.

Mission Work: The history of the mission work of the ABCFM in Hawaii relates one of the most significant triumphs of the Gospel. Its work in the islands has all been passed over to the Hawaiian Evangelical Association. The SPG has carried on work among the Chinese in the United States their work was transferred to the Hawaiian Evangelical Association. The SPG has now given place to modern European dress, with 2 preaching places, 1 village school, and 141 professing Christians.

HEBRON (Labrador): A village in a sterile and forbidding region on the E. coast of Labrador. Population, 2,000. Station of the Moravian Missions (1880), with (1900) 3 missionaries and their wives.

HEBRON (Natal): Station of the Hermannsburg Missionary Society (1882), situated in the E. part of Natal, near the Tugela River, and about 60 miles from Pietermaritzburg. It has (1902) 1 missionary and 6 native workers.

HEBRON (Palestine): A town in Palestine, Asiatic Turkey, situated in a long, narrow valley about 20 miles S. W. of Jerusalem, at an altitude of about 2,200 feet. It has an important relic of antiquity in its "sanctuary" built over a cave traditionally known as the Cave of Machpeleah. Station of the CA. Outstation of the Jerusalem Verein of Berlin. The town is known locally by the title given to Abraham, El Khaltik: the Friend (of God).

HEBRON (Transvaal): Station of the Hermannsburg Missionary Society (1872; opened at Matlare in 1866), with (1903) 2 missionaries, 1 missionary's wife, 5 native workers, 4 preaching places. They were before the war 1,044 professing Christians here, but the present situation has not been reported by the Society. Hbreon is situated in the Transvaal Colony about 18 miles N. W. of Pretoria.

HEERENDYK: A substation of the Moravian Missions in Dutch Guiana, S. America. It is one of a number of plantations situated on the northern banks of the Comowye, where a large number of converts were gathered by the traveling missionary. In 1856 a piece of land was purchased, a church and mission house erected, and a regular congregation formed. It now has 26 native workers and about 250 professing Christians.

HEIDELBERG: A town in the Transvaal Colony, S. Africa, situated about 25 miles S. E. of Johannesburg. Station of the WMS, with (1903) 1 missionary, 25 native workers, 10 outstations, 6 places of worship, 5 Sunday schools, 1 day school and 530 professing Christians. Station also of the Berlin Missionary Society (1875), with (1903, as far as can be learned since the war) 19 native workers (the missionary in charge being in Germany), 15 outstations, 1 day school, and 525 professing Christians.

HENG-CHAU: A town in the province of Hu-nan, China, situated on the Hsiang River, 50 miles S. of Hsiang-tan. Station of the PN (1902), with 2 missionaries and 1 dispensary. The name is sometimes spelled Heng-chow.

HENZADA (Henthada): An important and growing town in Lower Burma, British India, situated on the Irawadi River, 100 miles northwest of Rangoon. It is the center of a large rice trade. Population, 19,800, of whom 15,000 are Buddhists. Station of the ABMU (1853), which has two distinct fields of labor—the Karem and the Burmese. "It now (1903) has 7 missionaries, men and women; 172 native workers, men and women; 81 preaching places, 63 day schools, 3 boarding schools, 53 Sunday schools, 74 organized churches, and about 10,000 Christian adherents, of whom 3,693 are church members."
HERBERTSDALE: A village in Cape Colony, S. Africa, situated about 40 miles N. W. of Mossel Bay, with (1800) 1 missionary, 1 woman missionary, 2 native workers, men and women, 2 outstations and 662 professing Christians, of whom 167 are communicants.

HERMANNsburg: A settlement in Natal, situated in the Umvoti division, about 15 miles E. of Greytown. Station of the Hermannsburg Missionary Society (1854), with (1902) 1 missionary, 10 native workers, men and women; 2 outstations, 2 preaching places, 2 day schools and 625 professing Christians.

Hermannsburg Missionary Society. See Germany; Missionary Societies in.

HERMON: A village in Basutoland, S. Africa, situated near the W. frontier, about 5 miles E. of Wepener. Station of the Paris Evangelical Society, with (1840) 1 missionary and his wife. 2 native workers, 8 outstations, 9 preaching places, 9 day schools and 1,639 professing Christians, of whom 984 are church members.

HERmosillo: A town in Mexico, capital of the State of Sonora, situated on the Sonora River, 110 miles north of Granpemas. Population 7,100. Station of the ABCFM (1886), with (1902) 1 missionary and his wife, 3 native workers and 21 outstations.

Herschel: A village in Cape Colony, S. Africa, situated in the angle between Basutoland and the Orange River, 22 miles E. by N. of Allwal. Formerly mission of the SFG (St. Michael's parish), with (1902) 1 missionary and 1,646 professing Christians.

Hervy, or Cook, Islands: A small group in the Pacific, between 18° and 22° south latitude, and 157° and 170° west longitude. The population consists mainly of emigrants from Tahiti and Samoa, and numbers about 12,000. In 1888, at the invitation of the chiefs and people, a British protectorate was proclaimed, and in 1901 the islands were annexed to New Zealand and a British resident stationed at Rarotonga to control enactments. Owing to the efforts and careful work of the London Missionary Society, whose missionaries commenced evangelizing these islands in 1823, the majority of the inhabitants are now Christians, and take high rank among the converts in Polynesia. The principal islands are the following: Rarotonga, 20 miles in circumference, with about 2,000 inhabitants; it was occupied by the LMS in 1823, and there are now (1901) on the island 2 missionaries and 1 missionary's wife, 5 native workers, 5 Sunday schools, 6 common schools and 524 communicants. Mountongi, 6 miles from Rarotonga, was occupied by the LMS in 1823. There are now there 1 missionary, 78 native workers, men and women; 3 Sunday schools, 5 common schools and 524 communicants.

HIAO-I: See Hsiao-yi-hsien.

HIAO KIAN: See Hsiao-kan-hsien.

HIAO KAN: See Hsiao-kan-hsien.

Hill, John Henry: Born 1791; graduated at Columbia College, New York; for several years was engaged in commercial pursuits; pursued a theological course at the seminary, Alexandria, Va., and was ordained deacon and presbyter by Bishop Meade in November, 1831. Dr. Robertson were appointed by the American Episcopal Missionary Society as missionaries to Greece. They sailed October, 1830, landing on the island of Tenos, where they remained six months, and then removed to Athens. In 1832 Mrs. Hill, aided by her sister, Miss Mulligan, opened a female school in their own house, with the Bible as a text-book. From the first the school was crowded and within two years more than 300 children were daily instructed in a stone building erected for it. Three generations of Greek women have there received a Christian education. Other schools for boys and girls were soon established. The schools of the missionary were the models for the municipal and national schools afterward established, and furnished teachers for them. Dr. Hill, too, was placed in charge of graduates from the Hill institution. Once a week Mr. Hill met the boys of all the schools for the study of the Septuagint, which they translated into modern Greek and which he then explained. On Sunday the scholars were taught the Gospel for the day, or the Bible in course containing the history of Christ's life. Four years later he wrote: "When we think of our humble origin from a dark, dirty, vaulted cellar of an old Venetian tower, our miserable chambers, and gradually to our own commodious schoolhouse, the largest in Athens, completely filled from top to bottom with industrious children, numbering nearly six hundred, we are astonished." In 1845 Mr. Hill was appointed chaplain to the British Legation, and for many years officiated as such in the English Chapel of St. Paul at Athens. The appointment was unsolicited by him, and he performed other useful labor. He was duly due to lire for his great services to the English residents for twelve years past." In 1869, in view of his advanced years and that of his wife, he handed in his resignation to the Board. The committee resolved to "provide for his comfortable support in Athens, the city of his adoption and life's work, until his death." In token of the appreciation by the nation of his educational work, Dr. Hill received from the Minister of Education an official document, dated June 18, 1881, in which occurs the following paragraph: "Upon the fiftieth anniversary of your school, which was the beginning of the more systematic education of the young women of Hellas, I take pleasure in transmitting hereunto the congratulations of his Majesty." While Dr. Hill's main work was the education of the young, he performed other useful labors. In connection with Dr. Robertson and others of the mission he translated valuable English textbooks, secular and religious, into modern Greek. By his preaching, teaching and personal influence he communicated much Christian truth to the clergy. He died at Athens July 1, 1882.
aged ninety. The Greek Government gave him a public funeral.

HILL, Joseph Sidney: Born 1852. Died 1894. Native of Barnach, Swindon; educated at Ialington C. M. College. On October 14, 1876, he went to Leke, Lagos, W. Africa, and in September, 1878, was stationed at Wairoa, New Zealand Mission, where his connection with the CMS closed in 1882. In 1883 he became chaplain of H. M. Prison, Auckland; in 1892 was appointed Commissary of the Archbishop of Canterbury and Director of the Niger Mission, and in the same year was made Bishop-Designate of the Niger. In 1893 Durham University conferred on him the Hon. D.D. Degree, and in the summer of this year he was consecrated in St. Paul's Cathedral second Bishop of the Niger, now named "Western Equatorial Africa," with two native Assistant Bishops. Both Bishop and Mrs. Hill died at Lagos of fever, January 5, 1894. Bishop Hill combined the highest standard of spirituality with a singularly forbearing spirit, and his influence left a lasting impression on the Niger.

HINDERER, David: Of Schorndorf, in the Kingdom of Wurttemberg. Missionary in Lagos, Western Africa, under the CMS. He was a graduate of the Basel Missionary Training School. After a short time of preparation at Abeokuta he was directed to go forward into the further interior and try to reach the Mohammedan Haussa people. This he did not succeed in doing; but on May 20, 1851, he was the first white man to enter the great town of Ibadan, the name of which was ever afterward associated with his own. In the following year he visited England and married Anna Martin, whose missionary life was so active and successful as her husband's. During twenty-eight years of labor in Western Africa, Mr. Hinderer did much pioneer work; and in 1874-5, when he paid his last visit to his old field, he opened a new work to the east of Lagos, leading in 1876 to the occupation of Ode Ondo by Charles Phillips, afterward bishop. Mr. Hinderer died in 1890, and in 1898 a new church was completed at Ibadan as a memorial to David and Anna Hinderer.

Mr. Hinderer's literary work was in the Yoruba language, and included a translation of the book of Isaiah, of the Pilgrim's Progress, and of some hymns. He also revised Bishop Crowther's translation of the Bible.

HINDI LANGUAGE: The language of the Hindus in distinction from that of the Mohammedans of India. It is based upon the ancient Sanskrit, and is called by the literary class Prakrit in contrast to the purer Sanskrit of literature. It is written like Sanskrit, with the Devanagari letters. Traders and in general the lower class of natives often write (and print) the Hindi in an imperfect imitation of the Devanagari, which is called Khaidi. The Hindi language is the vernacular of more than fifty millions of people in the width of India, and possesses an extensive literature aside from the ancient Sanskrit literature.

HINDUISM: In order to gain a clear understanding of the religious systems of India it is important to observe a distinction in names. Brahmanism and Hinduism are not interchangeable; in fact, they were free from all connection, one stage of development in the faith of the Hindus; Hinduism denotes that more complete and composite system which embraced all previous stages, and, like a spreading banyan-tree, covered all the superstitions and philosophies which had been known to the Indo-Aryan race. If we go back to the earliest teachings of the Vedas and attempt to characterize the faith disclosed in those ancient hymns, we may properly call it Aryanism or Vedism. It is a simple and well-nigh monotheistic nature worship, largely imported by the Indo-Aryan conquerors from the original cradle of the Aryan race in the high tablelands of Central Asia. Nature, under the more frequent name of Varuna or Purusa, is worshiped as the source and the upholder of all things and is invested with moral attributes and a moral government of the world. Some of the hymns to Varuna seem truly devout. At that early period we find no well-defined polytheism, though there is a tendency toward it in the disposition to address separate powers of nature,—the sun, the sky, the dawn, the rain, fire, etc.,—as embodying the one deity who is supreme.

There is no trace of idolatry or the worship of images and symbols; there is no developed pantheonism, no system of caste, no doctrine of transmigration, no widow-burning, nor authorized infanticide. The dead were buried in that early period instead of being burned, and the oppression of woman was comparatively mild. There was no hint of divine incarnations, and no Trimurti or Hindu Trinity.

The next development may be called Brahmanism. It was a galling and oppressive system of asceticism, instituted and enforced by the Brahman or priestly caste. It was well developed by about 500 B.C., and it bore undisputed dominion for 300 years. It made use of such portions of the Vedas as supported, or seemed to support, its assumptions; and by comment and interpretation, and additions to the sacred hymns, it produced what were known as the Brahmanas. These were based upon such allusions in the Vedas as were supposed to relate to forms and acts of worship, and they became, under the Brahman's hands, complete rituals. They dealt with every question and every interest which concerned the Brahman caste. The Brahman traced its divine origin, set forth its superiority and its relative rights. They assigned bounds and limitations to the three subordinate classes, viz.: the Kshatriya or warrior caste, the Vaisya or farmer caste, and the lowly Sudra or the menial caste. These distinctions were fixed immovably. Barriers were raised which might not be passed, and disabilities were laid upon the lower orders from which there was no escape. Marriage, social relations, industries, and vocations, military service, rights of property, laws of inheritance—every interest of human life was subordinated to the dominion of caste.

The privileges and exemptions of the Brahmanas involved an intolerable oppression of every other caste. The life of a Brahman was inviolate even by kings. In connection with this caste system the most absurd and burdensome system of sacrifice sprang up. It has been common for the races of mankind to observe the custom of offering sacrifices to deities. They have generally been expiatory; often they were offerings expressive of gratitude, sometimes made in the hope of securing favor and the bestowment of some desirable boon. In Vedic times there were significant
traces of vicarious sacrifice—even of a divine and altogether voluntary sacrifice made by deity for the benefit of others. One is reminded of the Great Sacrifice made once for all, as set forth in the New Testament; and it has been claimed by eminent Oriental scholars that these Vedic references denote strange traditional reminiscences of a prediction once made to man of the “Lamb slain from the foundation of the world.”

But under the teachings of the Brahmana period the doctrine of sin became a monstrous evil. It was a system of bargaining between earth and heaven. A sort of tariff of values was fixed, which the gods could not disregard. If one were rich enough in sacrificial gifts he might bankrupt the gods by hopeless obligations. It was claimed that the sacrifice of a hundred horses might demand the throne of India. Sometimes even demons placed the gods in their power and wrought anarchy in the universe by the abundance of their sacrifices. Of course the explanation of these extravagances is found in the fact that the Brahman or priestly caste derived an immense revenue from their bloody offerings. In a real sense they ate what the gods were supposed to eat in a spiritual sense, and in all the endless ritual of worship they were handsomely paid for their services. Not only for the living but for the dead were sacrifices demanded. Not even the Church of Rome in the palmy days of Tetzl and Leo X. derived such revenues from the doctrines of Purgatory and Indulgences as accrued to the Brahmanical priesthood of India. They alone and was deluged with sacrificial blood, while people groaned under the awful burden, and the day of reckoning drew near.

About 500 B.C. the more intellectual classes of India became restive; schools of philosophy sprang up; men were led to consider the great mysteries of life, and, if possible, to solve the problems of human destiny. They were no longer content to be mere ignorant slaves under a galling sacerdotalism. Men rose up and threw off the system of sacrifice or greatly weakened its power. At the same time Buddhism arose with its protest not only against the system of sacrifice, but against the whole system of superstition which the Brahmins had created. Tired of the extreme religiousness of Brahmanism, it went to the opposite extreme of rejecting all religion. Gautama became atheistic. For six years he had tried ascetic Brahmanism and found it barren and illusive. He therefore taught a system of ethics and of self-reliance and self-righteousness, as a substitute for the national religion.

The development of Buddhism and the Darsanas or Six Schools of Philosophy had been preceded by the Upanishads—a system of speculative teachings partly drawn from, and partly reared upon, the philosophic portions of the Vedas, as the Brahmanas had been built up from their scattered references to ritual. These Upanishads were the earliest sources of Hindu philosophy, and from them the way was first drawn which crippled the power of the Brahmans.

But over against this movement was a desperate effort of the Brahmans to resist its rationalistic influence. Its results are seen in the so-called Sutras or Smritis, the six great codes of Manu. Of these the Smriti or Rules of Ritual, and Upanishads or Vedic Philosophy, are known as Sruti or Direct Revelations. Those subsequent works now to be considered are called Smriti or unrevealed teachings of eminent sages.

The Darsanas or Six Philosophic Schools were all in agreement on certain points, such as the eternity of matter past and future; the eternity of soul—both the infinite and the individuated soul; the necessary connection of soul with matter in order to enable it to act (even the infinite soul is unconscious until it evolves the universe which is its body); the attendant evil of all such connection with matter, however necessary; the need of transmigration in order to throw off by long discipline the evil consequences of such connection; and that pessimistic doctrine which makes it the great end of human existence to get rid of itself by being absorbed into deity.

In their separate and distinctive characters the Six Schools were these:

(1) The Nyaya, founded by the Brahman Gotama, and which maintained that all the evils of life result from false knowledge or misconception, and that the remedy is to be found in acquiring right methods of investigation and reflection. It proposed an elaborate classification of knowledge, and framed a syllogism more elaborate than that of Aristotle. It was really a system of salvation by logic.

(2) The Vaisheshika, founded by Kanada, was an advance upon the Nyaya, in the same direction. Both were analytical. The latter applied logical and analytical processes to all the facts of nature and of life. It claimed to solve the mystery of creation on an atomic theory like that of Lucreius and the extreme evolutionists of our day.

Like some more modern evolutionists, divided as to the existence of a first and moving Cause, the adherents of these two systems resolved themselves into two classes: the Agnostic or Atheistic school; and those, especially of a later day, who recognized the being of Is'ara (God).

(3) Another important school was the Sankhya, founded by Kapila. This was synthetic rather than analytic. It ascribed the origin of the visible world to an active principle, regarded as the pre-existing substance (hypostasis), the sub-atomic entity, the “rootless root” of all things. In order to the activity of this universal source of being it must come into contact or cooperation with soul. It is active, but not intelligent. Soul is intelligent, but inactive and helpless. Each supplements the other.

The existing substance called Prakriti constantly invests them with life; and so the teeming universe is produced.

This dualism of Prakriti and soul was illus-
treated among philosophers by the relation of the
two sexes, and with the low and unphilosophic
classes this led to the notion of the male and
female principles in the gods, and to the endless
corruptions which have been developed in India
along these lines.

(4) A fourth system of philosophy was the
Yoga philosophy. In one view this was
rather a ritual than a philosophy, since it related
wholly to the observances of the ascetic life, and
gave endless rules therefor. But in prescribing
methods for ridding the soul of the corrupting
influence of matter, it dealt with subtle meta-
physics and deeply eloquent, instead of logical
analysis, and often evinced a marvelous philo-
sophic acumen.

(5) A fifth school was the Maimeh by Jay-
ini. It was a reaction against the rationalism
of the Nyaya and the Sankhya, and aimed to
equal the word and testimony of the Veda equal
to the place of God. In its root-principle it was
a system of book-worship. It made the Veda
self-existent and eternal; even the sound of its
spoken words was eternal, and had always been
audible. In its details it was an elaborate ritual
for the right reading and interpretation of the
sacred hymns. A false syllabic quantity in read-
ing, or an inspiration where there should have
been an expiration of the breath, was a heinous
if not an unpardonable sin. The Veda was a fetish
in the fullest sense.

(6) The sixth school was the Vedanta, founded
by Vyasa. This was out-and-out pantheism—
a fuller development of it than has appeared in the
Upanishads. "Brahman (neuter noun for the
Self-existent) is this very universe, and he has
in him all things exist. The visible world and even
our consciousness are only phenomenal and
illusory, as when in his evening walk one thinks
he sees a snake and makes it very real, while in
fact it is only a rope lying across his path. The
Vedic school has many of the Veda equal to
the Sankhya classes of India through all subsequent ages.
Whatever superstitions have grown out of the
Sankhya, and whatever extravagances may have attended the asceticism of the Yoga, the men of
thought have been Vedantists, and are to this day.
In the famous famous Ganapati school of Benares this
prevailing philosophy. And it is that which
chiefly gives to Indian thought its strong hold
over the non-Christian and naturalistic minds
of all lands.

The Laws of Manu: There is some evidence
that the Laws of Manu preceded the full develop-
ment of the Schools of Philosophy, tho they bear
internal evidence of having followed the
Upanishads. They do not allude to Buddhism
by name, tho the certain references to "Atheists"
are supposed to some to refer to the followers of
Gautama. The supposition is not necessary, as
there were other Atheists besides Buddhists.
Manu makes no reference to the Trimurtis—
Brahma, Vishnu, and Siva—nor to the doctrine of
Bakti (faith) in relation to Krishna. Both
that and the doctrine of Saktism (the worship of
the female energy) were of later date. The
position was severe in his humiliation of women; yet her
position in his time was not so degraded or so
degrading as in later days. Widow-burning is not
alluded to in his code, tho in the time of Alex-
ander’s conquest it had been introduced, and
from 327 b.c. (or earlier) to 1829 its terrible
Thus Manu, speaking to the sages, says: "But know me, O most holy of the twice-born, to be the Creator of this whole world, whom Viraj himself produced, having performed austerities. Then I, desiring to produce created beings, performed very great austerities, and thereby called into existence ten great sages, lords of created beings. They created seven other Manus, possessing great brilliancy, gods and classes (ranks) of gods, and great sages of measureless power. Then many other creations are named. Thus was the whole creation produced by those high-minded ones by means of austerities, and at my command."

Thus Manu has pronounced upon her the most blighting curse.

The Fully Developed Hindu System: Without dwelling longer on this remarkable code, probably the most widely influential that was ever promulgated, we notice briefly the irradiation of Buddhism into the Hindu system, and its influence upon it. Sprunging up about 450 to 500 B.C., it gradually superseded and finally persecuted Brahmanism embodied so much of Buddhism as served its purpose, while it strongly compromised the influence of the Sangha or Buddhist order. Thus it gradually superseded and finally persecuted the rival system, and drove it from India. Nevertheless, Buddhism bore with it to other lands many fundamental principles borrowed from the Brahmans. Meanwhile Brahmanism had captured the two popular epic poems which celebrated the military exploits of the heroes Rama and Krishna, and turned them to its purpose by interweaving with them many doctrinal and mythological elements. The popularity of these heroes, both of whom belonged to the soldier caste, had excited the jealousy of the Brahmans; yet they could not resist the tide; they must utilize it. They therefore raised Rama and Krishna to the rank of deities, and so brought them new issues of pedantry into the system. Meanwhile they had gradually developed the doctrine of the Trimurti or Trinity, of Brahma the Creator, Vishnu the Preserver, and Siva the Destroyer and Renovator. Vishnu was the most popular as the preserver and sympathizer, and it was a natural and easy device to make all the alleged deliverers of Hindu tradition incarnations of Vishnu. Buddha was finally added as the ninth avatar, and prophecy predicted a tenth, who shall yet come as a spiritual deliverer to establish a kingdom of righteousness.

It not only embraced the systems above named, but it also borrowed many popular superstitions from the Dravidians, Kolis, Santals, and other previous invaders whom the conquering Aryans found in the country. The system, which we may call Hinduism. Its distinction from the earlier sacerdotal system known as Brahmanism will readily be seen.

Its distinction from the earlier sacerdotal system known as Brahmanism is now as ancient as Vedism, Brahmanism, Buddhism, and philosophy, was developed the all-embracing system which we may call Hinduism. Its distinction from the earlier sacerdotal system known as Brahmanism will readily be seen.

It not only embraced the systems above named, but it also borrowed many popular superstitions from the Dravidians, Kolis, Santals, and other previous invaders whom the conquering Aryans found in the country. The system, which we may call Hinduism. Its distinction from the earlier sacerdotal system known as Brahmanism will readily be seen.
which enables it to parry all attempts to find a lodgment for the saving truth of the Gospel.

Rev. Ram Chandra Bose has said that the first challenge which an agnostic foreigner in India presents to the missionary is the alleged resemblance of the Bhagavad Gita to the New Testament, and generally with the assertion that the former, as being the older, must be the source of the latter. The most extravagant laudations are heaped upon its ethics and its philosophy. The Bhagavad Gita is supposed to have been written by some unknown author about the beginning of the 2nd century A.D., and it was thenceforth embodied in the epic poem Mahabharata. It attempted to reconcile the conflicting schools of philosophy, and to gather into one dramatic production all the loftiest sentiments found in previous literature. Its alleged resemblances to the New Testament are largely due to the Christian conceptions which have been read into it by modern translators, and by the use of words which would convey to Hindus and Christians respectively entirely different meanings.

**Subtle Influence of the System:** The practical influence of Hinduism on individual life and character presents a marked contrast with that of Christianity. The life of the high-caste Brahman is intensely religious; no other system is so exacting as his, and his wearisome services are abortive, and even belittling. The code of Brahmanism never deals with general principles in the regulation of conduct, as does the Gospel. It inculcates no such great central motives and sources of action as faith and love. In particular, prescribing, as Christ did, the comprehensive law of love to God in supreme degree, and love to our neighbor as to ourselves, it makes endless petty exactions. "Unlike Christianity, which is all spirit and life," says Dr. Duff, "Hinduism is all letter and death."

The Infinite, Brahman, left no thinking or judging to be done by man in the sphere of religious duty, but revealed from heaven every act and observance, every posture and motion of the hand or turn of the eye, connected with worship. A devout Brahman must bathe in a particular kind of water, and offer certain prayers. Another of his morning duties is to salute the sun, which must be done with a lock of his hair tied in a particular way on the top of his head, while a large tuft of grass is held in his right hand, and three spires of a different grass in his right hand. He must also be sure to sip water, and with his wet hands touch his head, eyes, ears, nose, shoulders, breast, and feet. Should he happen to sneeze or spit, he may not sip water till he has first touched his right ear.

In the Ganges, especially amid the crowds at Benares, or at the great Melas or bathing festivals, this sipping goes on, however filthy the water may have become by the constant treading of the multitudes.

The whole life of a Brahman, if he be supposed to follow his ritual, is a slavish round of petty observances—sippings, and sippings of the
mouth; changes of attitudes and of apparel; drawings of lines on the ground, and smearings with clay, or men, or cow-dung; kindlings of fires to expel evil spirits; kindlings of sacred threads or hallowed dishes; compounding of herbs, and rice, and fruit; wreathings of flowers, and repetitions of endless prayers, and texts of the Vedas, and sacred names.

We have given only a small portion of the daily practices to show nothing of the greater acts of worship rendered to particular gods in the temples. All acts of life are according to program. In marrying, a Brahman must select a girl with neither too much nor too little hair, and it must not be red. She should not be deformed nor talkative, nor afflicted with an unlucky name.

This holy man must be a close student of the Vedas, but should never read them with a sour stomach, nor with his limbs crossed, nor with his feet on the bench. He must not read in a conversation, nor in any place of offensive odors. He must close his book if a dog has barked or a jackal howled or an ass has brayed. He must never cut his own hair, nor bite his nails, nor step upon hair or ashes. He must not look at his wife when eating or anointing or yawning. He must not stand under the same tree with idiots or washermen. He must never run when it rains, nor spit in a stream of water, nor step over the tether of a calf, nor ride after oxen with imperfect horns or ragged tails.

Reforms and changes: There have been many attempts to reform or to supplant Hinduism, and all except that of Christianity have failed. The impression made by Buddhism was altogether the most profound, and came nearest to permanent success. But, as we have seen, after centuries of contact and rivalry, it failed. The advantage of an appeal to the supernatural, toward which the hearts of men naturally incline. Moreover, it recognized the being of God and the real entity of the human soul. Doubtless, also, it found substantial aid in the entrenchments of caste, and in the power of venerable custom. Each system was greatly influenced by the other, but the mastery remained with the Brahman. Even in far-distant lands Buddhism has always recognized, however inconsistently, the power of Hinduism. The twelve Buddhist sects of Japan as they find them in our day, have one thing in common—it may almost be said only one, viz., that in all their temples the images of the gods of Hinduism are invariably found. Protesting as it does against polytheism and idolatry, and virtually atheistic as it is, at least of its older Brahmanic teachings, Buddhism yet clings to Hindu polytheism with all its dumb idols.

Nearly a thousand years ago Mohammedianism swept into India with all the power and prestige of a conquering race, and a fanatical and every-where victorious faith. Raised to the seat of arbitrary power, and strong in the clear and consistent monotheism, which it had borrowed from the Old Testament Scriptures, it might have been expected to supplant Hindu idolatry as it had overcome other faiths in many lands. Yet, after more than eight centuries of opportunity and power, it left Hinduism still triumphant; and the forty millions of Mohammedans, less than a fifth of the total population, still give evidence of having received from the old Brahmanical cult quite as much as they imparted.

Sikhism was another attempt at the reform of Hinduism. Nanak, its founder, in his disgust with the prevailing idolatry, hoped to effect a compromise between Hinduism and Islam. Upon the monothelism of the latter a superstructure of the best teachings of the Vedas was to be reared, and an ideal faith thus secured. But Sikhism has also failed to make any serious impression on Hinduism. For a time it won military and political supremacy in the Punjab; but it is little more than the worship of a book; it knows nothing of the true God; the essence of Hindu idolatry still remains.

The influence of the Somajis of our own time upon the heterogeneous, changeful, and yet ever vital Hinduism has not been slight. The Brahmo Somaj of Mohun Roy and Chunder Sen were indeed disappointing in their results, yet they promoted the disintegration of the old system, and did much to bring discredit upon the foul corruptions of modern Hindutva. In the monothelism and Sikhism, they urged a return from polytheism to the simple monothelistic worship of Vedic times, and they opposed the injustice and cruelty so long visited upon woman. Chunder Sen exalted the Messiah of the Christians as the chief of all the world's prophets and teachers, but his system has declined.

The most imposing of all these monotheistic movements at the present time is the Arya Somaj. So far as the Arya Somaj or any other form of reformed Aryanism hopes to reverse the situation in India, it is doomed to disappointment. It cannot long utilize the forces of Christian ethics and Christian civilization under Vedic labels. The fraud will be discovered. The world cannot be convinced that this modern creed is real Hinduism, and the reaction will be proportionate to the illusion. On the other hand, when the real teachings of the Vedas come to be known, as they are sure to be, the emptiness of the old cisterns will fully appear. Prof. Max Muller in one of his many lectures has dwelt upon the disappointment and dismay with which intelligent Hindus have observed the disclosures which modern scholarship has made of the sterility of the Vedic literature, and he ascribes to this cause the virtual collapse of the earlier Somajis.

In reply to the confident assumptions of the leading Aryas, Rev. Martin Clark, D.D., of Anritisar, has also exposed the rotten foundation on which they build, by publishing some literal and damaging Vedic translations.

The Contrasts of Hinduism and Christianity: Hinduism has some elements in common with Christianity which it is well to recognize. It is theistic; it is a religion, as distinguished from the agnostic ethical systems of the world. Hinduism recognizes a direct divine revelation which it regards with profound reverence, and through all its variations and corruptions it has inculcated in the minds of the Indian races a deeply religious feeling. It has been claimed that the literature of the most thoroughly religious people in the world, Like Christianity, Hinduism appeals to man's intellectual nature; it is inwrought with pro-
found philosophy; it has its trinity, its incarnations, and its predictions of a Messiah who shall restore the truth and establish righteousness.

But, compared with Christianity, the contrasts of Hinduism are far greater than its resemblances. First, as to the nature of God. There is an infinite distance between the cold and unconscious Brahman, slumbering age after age, without thought or emotion, or any moral attribute, and the God of Israel, Whose power and wisdom and grace, and mercy and truth and tender compassion, are so constantly set forth in the Scriptures. The latter compares Himself to a father who cares for his children, and who has redeemed the world by an infinite sacrifice. Second, there is a striking contrast in the comparative estimates which Hinduism and Christianity place upon the human soul. Unlike Buddhism, Hinduism does recognize the existence of a real soul, but it is only a temporary emanation, like the moon's reflection in the water. It resembles its source as does the moon's image, but coldly and in a most unsatisfactory sense; there is no capacity for fellowship, and the end is absorption. On the other hand, Christianity teaches us that we are created in God's image, but not that we are His image. We are separate, the dependent; and if reunited to Him through Christ, we shall dwell in His presence forever. Third, the two systems are in strong contrast in the comparative encouragement and hope which they hold out for the future. The doctrine of transmigration casts a gloom over all conscious being; it presents an outlook so depressing as to make life a burden, and the acme of all possible attainment is individual extinction; Christianity promises an immediate transfer to a life of unalloyed blessedness, and an endless growth of all the noblest human powers and capacities. Hinduism finds the explanation of life's mysteries and inscrutable trials in the theory of sins committed in a previous existence; Christianity recognizes the same trials, but mitigates them, with the hope of solutions to be found in a future life of compensating joys, if their turns be passed through with unchanging, and hopeless, and finds only sudden despair; the other finds encouragement in immortal hope. Fourth, Hinduism has no Savior and no salvation. It is, therefore, not a religion in the highest sense, for by the very derivation of the word, religion is the reuniting of the soul to God; it implies the ruin of sin, but provides a rescue from it. That is unworthy of the name which presents no omnipotent arm stretched forth to save. Hinduism provides nothing above the low level of unsaved human strength and merit, and there is no sacrifice, no mediator, no regenerating spirit. It has no glad tidings to proclaim, no comfort in sorrow, no victory over the sting of death, no resurrection unto life.

There are a thousand other peculiar principles in Hinduism whose subtle influence is felt in society and in the State, and to which the faith and influence of the Gospel present the very strongest contrasts.

Christianity has raised woman to a position of respect and honor, and made her influence felt as the mother in the family and in society, in the State. Hinduism has brought her down, even from the place which she held among the primitive Aryans, to ever-increasing degradation; it has made her life a burden and a curse.

The following impassioned prayer, quoted by Ramabai from the lips of a high-caste woman who had spent her life from childhood as a "child widow," reveals the anguish which falls to the lot of woman under the Hindu social and religious system:

"O Father of the world, hast Thou not created us? Or has perchance some other God made us? Dost Thou only care for men? Hast Thou no thought for women? Hast Thou not power to make us other than we are, that we too may have some part in the comforts of life? The cry of the oppressed is heard even in the world; then canst Thou look upon our vicissitudes, and shut Thy doors of justice? O God Almighty and unapproachable, think upon Thy mercy, which is a vast sea, and remember us. O Lord, save us, for we cannot bear our hard lot."

In its broad influence, Christianity has raised the once savage tribes of Europe to the highest degree of culture, and made them leaders in civilization, and rulers of the world. Hinduism has so weakened and humbled the once conquering Aryans that they have been an easy prey to every invading race. Christianity shows in its sacred books a manifest progress from lower to higher moral standards; from the letter to the spirit; from the former sins that were winked at to the perfect example of Christ; from the narrow exclusiveness of Judaism to the broad and all-embracing spirit of the Gospel; from prophecy to fulfilment; from types and shadows to the full light of redemption. The sacred books of Hinduism have degenerated from the lofty aspirations of the Vedic nature-worship to the brutality of Saktism and the Lings, from the noble praises of Yaruna to the low sensuality of the Tantras, from Vedic conceptions of the creation sublime as the opening of John's Gospel, to the myths of the divine turtle and the boar, or the amorous escapades of the supreme and "adorable Krishna."

Christianity breaks down all barriers which divide and alienate mankind, and establishes a universal brotherhood in Christ; Hinduism has raised the most insurmountable barriers, and developed the most inexorable social tyranny and corruption of which the human race can boast; Christianity enjoins a higher and purer ethic than it has ever found in the natural moral standards of any people; it aims at perfection; it treats the least infraction as a violation of the whole law; it regards even corrupt thoughts as sins; it bids us be holy even as He is holy in Whose sight the heavens are unclean; Hinduism, on the contrary, is below the ethical standards of respectable Hindu society. The better classes are compelled to apologize for it by asserting that that which is immoral and degrading in men may be sinless in the gods, and the excesses of Krishna and Arjuna would not be condoned in mortals; the vile orgies of the "lefthanded worshipers" of Siva would not be tolerated but for their religious character. The murders committed by the thugs in honor of Kali were winked at only because a goddess demanded them.

It is the peculiar distinction of India that it has been the theater of nearly all the great religions. Brahmanism, Buddhism, and Mohammedanism have all made trial of their social and political power, and have failed, and have left all the systems which preceded it had had centuries of opportunity, and yet Christianity has done more for the elevation of Indian society in the last fifty years than they
had accomplished in all the ages of their dominion. Neither Buddhism nor Mohammedanism had made any serious impression upon caste; neither had been able to mitigate the wrongs which Brahmanism had heaped upon woman. Mohammedanism had rather increased them. The horrors of the Satti (Suicide) and the murder of female infants, these bitterest fruits of priestly tyranny, were left unchecked till the British Government, inspired by missionary influence and a general Christian sentiment, branded them as infamous, and made them crimes.

The sentiment even of the better classes of natives in India is now greatly changed by these influences, and the conventional morality is rising above the teachings of the national religion. Widow-burning and infanticide belong almost wholly to the past. Child-marriage is coming into disrepute, and caste, tho not destroyed, is crippled, and its preposterous assumptions are falling before the march of social progress.

Perhaps the very highest tribute which Hinduism can pay to Christianity is called the Hislop Mission. In this fact, already noticed, that the modern Arya Somaj has borrowed its ethics and some of its religious doctrines, and is promulgating them upon Vedic authority. It has renounced those corruptions of Hinduism which can no longer bear the light, together with such social customs as caste, child-marriage, child-widowhood, and the general oppression of woman. It denounces the incarnations of Vishnu as mere inventions, and, therefore, cuts up by the roots the whole Krishna cult, having no desire for education, his position was lost. He was assisted by three German missionaries. One only true God, self-existent, the Creator and Upholder of all things, but an actual need, and no theoretical conception, but an actual need, and no

HIROSHIMA: A town in Japan, situated 155 miles W. of S. of Kobe. It is noted for its great temple of Miyajima. Population (1898), 122,306. Station of the MES (1886), the FN (1887), the CA (1891), and the CMS. Major-General Hill, stationed at Jalta, in the Nizam's territory, presented to the Free Church of Scotland the sum of £2,500 for the founding of a new mission. Mr. Hislop, who had distinguished himself as an accomplished scholar, was secured for the mission. He began his work in February, 1845, at Kamptee, ten miles from Nagpur city, cordially welcomed by Captain Hill and other British officers, who handed over to him a school which they had established, and otherwise greatly encouraged him. He was assisted by the local Sepoys and artisans. In 1848 he removed to the city of Nagpur, containing a large Mahrratta population, and opened, with thirty scholars, a school in the vicinity of the Rajah's palace. The school soon took a high position as a missionary institution and for many years sent forth annually between 250 and 300 pupils. It is called the Hislop Missionary College. The Central Provinces being ruled by a heathen government, and the people having no desire for education, his position was a trying one. His life was often in peril. In 1853, in connection with caste prejudices and the baptism of several natives, a serious riot occurred, and an attack was made on the mission house, which, but for his heroic defense by the native clergy, would have resulted in the death of the missionary. The next year he was attacked by a fanatic Mohammedan mob, but rescued by the aid of an old pupil and some Sepoys. He was conveyed to the mission house in an apparently dying state, ten deep gashes appearing on his head, and his body greatly bruised. In 1857, having received information privately from a Mohammedan of a combined plot of the up-country Sepoys and the Mussulmans of the city to massacre all the Europeans on a given day, he informed the authorities, so that the design was frustrated, and the Madras and Bombay Presidencies were thus saved from the retribution. This devoted missionary met with an early and tragic death. On September 4, 1863, he rode into a river in the night and was drowned.

HISISSAR: A town in the Punjab, India, situated 98 miles W. N. W. of Delhi. Population (1891), 16,906, of whom 10,000 are Hindus. Station of the SPC, with 2 women missionaries.

HISTORY OF MISSIONS: The true history of missions is far more than the mere record of the extension of Christianity. It includes the development of the missionary idea within the Church as well as its outward application in the conduct of mission enterprise. It covers, too, the development of method and organization. The present complicated machinery of missions, which seems to many so cumbersome and so unlike the simple evangelization of the apostolic days, or even of the earlier missions of the present era, is really but a growth. Each new wheel or band or cog in the mechanism has been added not to meet a theoretical conception, but an actual need, and no
history can be complete that does not touch at least upon this element in mission progress. The history of missions has to do also with the effect of missions upon the world apart from the results usually tabulated. Aggressive Islam, reviving Hinduism, Buddhism, Shintoism, each must be dealt with in reckoning up the sum total of results of mission effort. It is evident that so wide a reach is impracticable within the limits of this work, which must be content with the more common consideration of a conception of a record of the extension of Christianity through the agency of missionary enterprise, merely indicating some of these other topics as suggestive for further reading and study.

To facilitate this, the general topic is treated under five titles: Geography of the Extension of Christendom, summarizing the article in the first edition on the Historical Geography of Missions, and giving a bird's-eye view of the extension of Christianity over the world in the different periods; Apostolic and Early Christian Missions, giving a survey of the general character and methods of the first six centuries; Medieval Missions, describing the movements and influences that made Europe Christian, and covering the period up to the Reformation; Reformation Missions, from the Reformation to the present day, and Modern Protestant Missions, covering the same period. These different articles, of necessity, somewhat overlap, but no more than seems essential to the accurate conception of each subject, and the four periods are so distinct that separate treatment is inevitable.

HOBSON, Benjamin: Born January 2, 1816, at Vergennes, Vt., August 23, 1801; learned the printer's trade in 1815 in Buffalo, and pursued it in Utica and New York. He fitted for college under Dr. Armstrong at Bloomfield Academy; graduated at Williams College in 1828, and Auburn Theological Seminary in 1831; ordained and settled in Aurora, N. Y., the same year; sailed as a missionary of the ABCFM for Ceylon in 1833. In 1834 he was sent with Mr. Todd to the city of Madura to establish a new mission. In 1836 Mr. Hoisington returned to Jaffna, and was placed at the head of the seminary. On account of ill-health he visited the United States in 1842, and returned to Jaffna in 1843, but continued ill-health compelled him to give up his life-work as a missionary in 1849. Mr. Hoisington possessed a vigorous and acute mind, and his work as instructor of Tamil youth led him to study profoundly Hindu science, metaphysics and theology, and in the department of higher Tamil literature he had, perhaps, no superior in Southern India. After his return home he wrote for the American Oriental Society a syllabus of the Siva Gnana Pothum, a Tamil translation of an old Sanskrit Agama, which treats of deity, soul, and matter; also an English translation of the same work, with an introduction and notes. He published also in the Bibliotheca Sacra an essay on the tenets of philosophical Hinduism. He died at Centre Brook, Conn., May 16, 1858.

HOK-AU: A town in the province of Kiang-si, China, situated in the N. W. part of the province about 155 miles S. E. of Kiu-kiang. Station of the CIM (1878), with 3 women missionaries.

HOK-CHIANG. See Fu-Tsings-hsien.

HOK-KEO. See Ho-Kau.

HOK-SU-HA: A town in the province of Ho-chau, China, situated about 100 miles S. W. of Ta-yuen-fu. Station of the CIM (1886), with 2 women missionaries, 6 native workers, men and women. The work of reorganization after the disasters of the Boxer outbreak has hardly (1903) proceeded to the point of definite information of the status of the church members at this place.

HOKKONDO: A settlement in Natal, S. Africa, about 40 miles W. S. W. of Colenso. Station of the Berlin Missionary Society (1868), with (1903) 2 missionaries, 10 native workers, 6 outstations, 1 day school, and 257 professed Christians.

HOFFENTHAL, or HOPEDALE: A settlement of the east coast of Labrador. Station of the Moravian Missions (1782), with (1900) 6 missionaries, men and women; 10 native workers, 1 day school, 1 dispensary, 1 hospital, and 70 church members.

HOFMAN: A settlement in Liberia, situated at Cape Palmas and near Harper. Station of the EI (1856), with (1902) 1 missionary, 2 native workers, 6 outstations, 2 day schools, and 144 professed Christians.

HO-CHAU. See Ho-Chau.

HOHENFRIEDEBERG: A settlement in German East Africa, situated in the Usambara region about 70 miles N. W. of Tanga. Station of the German East Africa Mission, with theological and industrial schools and a leper asylum.

HOISINGTON, Henry R.: Born at Vergennes, Vt., August 23, 1801; learned the printer's trade in 1815 in Buffalo, and pursued it in Utica and New York. He fitted for college under Dr. Armstrong at Bloomfield Academy; graduated at Williams College in 1828, and Auburn Theological Seminary in 1831; ordained and settled in Aurora, N. Y., the same year; sailed as a missionary of the ABCFM for Ceylon in 1833. In 1834 he was sent with Mr. Todd to the city of Madura to establish a new mission. In 1836 Mr. Hoisington returned to Jaffna, and was placed at the head of the seminary. On account of ill-health he visited the United States in 1842, and returned to Jaffna in 1843, but continued ill-health compelled him to give up his life-work as a missionary in 1849. Mr. Hoisington possessed a vigorous and acute mind, and his work as instructor of Tamil youth led him to study profoundly Hindu science, metaphysics and theology, and in the department of higher Tamil literature he had, perhaps, no superior in Southern India. After his return home he wrote for the American Oriental Society a syllabus of the Siva Gnana Pothum, a Tamil translation of an old Sanskrit Agama, which treats of deity, soul, and matter; also an English translation of the same work, with an introduction and notes. He published also in the Bibliotheca Sacra an essay on the tenets of philosophical Hinduism. He died at Centre Brook, Conn., May 16, 1858.

HOLD FOR HOPEDALE: A settlement of the east coast of Labrador. Station of the Moravian Missions (1782), with (1900) 6 missionaries, men and women; 10 native workers, 1 day school, 1 dispensary, 1 hospital, and 70 church members.

HOMAN: A settlement in Liberia, situated at Cape Palmas and near Harper. Station of the EI (1856), with (1902) 1 missionary, 2 native workers, 6 outstations, 2 day schools, and 144 professed Christians.

HOK-KA: A town in the province of Kiang-si, China, situated in the N. W. part of the province about 155 miles S. E. of Kiu-kiang. Station of the CIM (1878), with 3 women missionaries.

HOK-CHIANG. See Fu-Tsings-hsien.

HOK-KEO. See Ho-Kau.

HOK-SU-HA: A town in the province of Shan-si, China, situated in the N. part of the province, about 28 miles W. N. W. of So-ping-fu. Station of the CA.

HOMES MISSIONS in the United States: The
United States is one of the greatest mission fields of the world. Ever since the days when the discovery of the New World and the condition of the savage Indians stirred up the Christians of the Old World to send mission work into the United States, the United States has been one of continual and almost unabated zeal and earnestness. The work has gone through the various stages of evangelistic and pastoral agencies in the older and more settled districts of the country, where there are always new regions to be cared for and new people to evangelize. The urgency, diversity, and magnitude of the work of Christian missions in the United States can best be understood by looking at the different elements which compose the population, and the influences which affect the efforts of the church.

1. Work for the Native Population: Under this head we can consider the term "native" as including that part of the people who are native born or who have been located in the country for a period long enough to be naturalized: the Indian, negro, and as well as the native Americans. This work will be shown in the detailed account of the various Home Missionary societies, which follows. The general facts in regard to this element of the population may be dwelt upon but briefly.

The development of the great territories in the West, and the consequent migration of the inhabitants of the older and more settled states, has caused the growth of mission work, and the division of Christian work into two heads, pastoral and evangelistic. Pastoral work is carried on in the settled states; in the large cities it is combined with the work of City Missions in order that the poor and the rich may have an equal chance to hear and profit by the teachings of the Gospel. But, as has been well said, man is kept in the right path as much from fear of the closure of the surrounding community as by the desire and purpose to do right for right's sake; and when the adventurous ones leave the well-ordered communities to go where they will be pioneers of civilization, they, too, often bring other influences which go with the right of franchise—all foreigners is regarded as the greatest of dangers to the civil and religious life of the country. The time is past when the immigrant was hailed with joy. There is now not great urgency for his labor. His morals, his socialistic, anarchistic tendencies, his conception of liberty as license, his inability to appreciate the honor and responsibility which go with the right of franchise—all make the average European immigrant one of the most objectionable of strangers. The influence upon this immigration are seen distinctly upon the statistics of crime. Many of these immigrants come from Christian communities, but they are influenced in the same way as the European emigrants of Southern and Eastern Europe. The Church has officially abolished polygamy, but even if this were other than a purely formal and nominal abolition, it is still the foe to the best interests of the individual and the state; of the papacy, which makes the field of the Home Missionary societies one of paramount importance by reason of the enormity of the extent of territory, the number of the people, the interests at stake, and the conviction that the future of this nation will depend upon the success with which the Church fulfills the obligations thus imposed upon her.

Home missions is the name given to the work of the church for those in our own country, whether it be among aborigines, immigrants, or frontier settlers; and every denomination is actively engaged in this work, whether or not it is
made a separate department, and classified and reported separately from the general work of the church. The ways are many, but the end is the saving of souls. The contributions and expenditures were thus classified.

We give here a sketch of the work of some of the older and larger bodies laboring in the Home Mission field in the United States.

Baptist: The American Baptist Home Missionary Society was organized April 27, 1822, in New York City, where it has its general offices. Its object is "to promote the preaching of the Gospel in North America." Until its organization, missionary work in the new settlements of the West had been prosecuted to a limited extent by some of the Baptist Convention, and especially by the Baptist Missionary Society of Massachusetts, organized in 1802. This Society took the initiative in the formation of the General Society. Rev. John M. Peck, who for many years had rendered remarkable service as a missionary in the Mississippi Valley, and Rev. Jonathan Going, of Massachusetts, who was sent out to confer with him, were foremost spirits in the new movement. Dr. Going became its first Corresponding Secretary, serving for five years; then, in succession, Rev. Luther Crawford, then Benjamin H. Smith, D.D., twelve years, 1840 to 1862; Jay S. Backus, D.D., twelve years, 1862-74; James B. Simmons, D.D., seven years, 1867-1874; E. E. Taylor, D.D., five years, 1869-1874, the work being divided among them during the period of their contemporaneous service; Nathan Bishop, LL.D., two years, 1874-76; S. S. Cutting, D.D., three years, 1876-79; H. L. Morehouse, D.D., fourteen years, 1874-76; S. S. Cutting, D.D., three years, 1880-1883; T. J. Morgan, LL.D., nine years, until his death in 1902, when Dr. Morehouse, who had been Field Secretary for this period, was recalled to the general secretarship, and E. E. Chivers, D.D., was appointed Field Secretary.

Until 1845 its constituency included Baptists of the whole country, numbering then about 385,000, fully half of whom were in the South. The question of slavery and the withdrawal of Southern Baptists to form an organization of their own. The West was the chief field of the Society's operations—Detroit, Chicago, and many other important cities were occupied. The pioneer missionaries traversed whole states and territories by most primitive methods. In 1845, its first missionaries went overland to Oregon, and in 1849 via the Isthmus to California. With the expansion of civilization in the West, as precious metals were discovered, railroads constructed and lands opened to settlement, its pioneer missionaries were quickly on the new fields. Its first one year of its history its force of laborers was fifty; in 1854, one hundred and seventy-five. For the thirty years ending 1874 its receipts were $795,259. In that period 1,242 churches were organized and 27,911 persons baptized. After the war the Western work assumed greater proportions and has continued to make heavy demands upon the Society. In many states and territories now being occupied, churches were organized and 27,911 persons baptized. Of its entire missionary force in 1903 (aggregating 1,310), 881 were in the Western states and territories. Its missionary expenditures there have been about $4,000,000, of which the Church Edifice department of the Society was contemplating in 1854 and a little was done during subsequent years. In 1869 it was definitely organized, and by 1875 about $275,000 had been secured as a loan fund to aid churches in erecting houses of worship. By 1879, chiefly in the West, 808 churches were thus aided. The Loan Fund was established, and large contributions were secured for it, the Society by 1885 was aiding over 100 churches annually in gifts and loans, amounting to $1,866,000 in the erection of church edifices, chiefly in the way of gifts. Its permanent Loan Fund is $150,000 and the Permanent Gift Fund, the income only to be used, $158,000.

The Society's work for the Freedmen, began in 1862, expanded into a large educational department, in addition to the distinctively missionary efforts put forth in their behalf. The total expenditures for these purposes have been about $4,000,000. It aids wholly or in part twenty-nine schools, twelve of which are higher and seventeen secondary institutions; the much needed work in this field was done by the larger institutions. Most are coeducational, two are for young women only, viz., Hartshorn College, Richmond, and Spelman Seminary, Atlanta, the latter probably the largest and best-equipped school of its kind in the world. There is a high-grade theological school as a department of Virginia Union University, Richmond; while in all the other higher schools considerable attention is given to the training of teachers, and there are well-equipped industrial departments at several schools. The total enrollment for 1902-3 was 6,947. It is estimated that the total enrollment from the first is quite 80,000. A pronounced religious and missionary spirit dominates all these institutions, which have powerfully affected the freedmen. The million negro Baptists of the land but multi­tudes besides. The valuation of these school properties is approximately $1,500,000. The Society's annual expenditures for these purposes is about $150,000, and as large funds as needed. The total funds of this character being only $288,132. Many capable negro teachers, a number as heads of schools, are in the force of instructors.

Among the foreign populations the Society in 1903 had 282 missionaries laboring among fifteen nationalities from Europe and two from the Orient, the total number of nationalities or peoples among which it labors being twenty-one. The work begun in 1846 among the Germans has grown to large proportions, the membership in the German Baptist Churches of the United States being over 24,000. Similarly the work begun among the Swedes in 1848, also among the Danes and Norwegians about the same time, has enlarged until now the Scandinavian Baptists number over 27,000. Missions to the French Canadians, chiefly in New England, since 1870 have resulted in the acquisition of at least 3,500 converts from Romanism. In recent years missions from the Germans, Hungarians, Poles, Italians, Portuguese, Finns, Hungarians and Russians. The enormous immigration of recent years has afforded a great opportunity for the evangeliza-
tion of multitudes ignorant of the essential truths of the Gospel.

To the Chinese, after ineffectual attempts to see a responsible labor sooner, the Society appointed a missionary at San Francisco in 1870. There were many hindrances to this enterprise during the anti-Chinese agitation on the Pacific coast. The chief missions now are in San Francisco, Portland, Seattle, Spokane, Butte, Chicago, and New York City. There is a flourishing mission to the Japanese in Seattle.

The North American Indians have been included in the Home Mission Society's field since 1865, when the Indian missions of the Missionary Union were transferred to it. Continuously since then have missions been maintained among them. For many years work was limited mostly to the five civilized tribes, among whom very gratifying progress has been made. Within the last decade missions have been established among the 'blanket Indians,' with truly remarkable results among the Kiowas. The Society's missions embrace twelve Indian tribes, among whom there are over 4,000 members of Baptist churches. There are two excellent schools for the Indians, at Tahlequah and near Muscogee, Indian Territory. The missionary and teaching force among them in 1903 was twenty-nine.

The Spanish-speaking peoples of this continent and adjacent islands are part of the Society's field. The first evangelical preacher to go to Mexico was a Baptist minister, Rev. James Hickey, in 1862, which led to the organization of a Baptist Church at Monterey in 1864. During the troublous period of the war and the unsettled state of affairs in Mexico, until the overthrow of the Maximilian Empire, missionary work there was difficult. In 1870 the Society appointed its first missionary and has gradually extended and strengthened its work in that Republic until now there are ten churches, several having good church properties, and about 600 members.

The Society's printing press at the City of Mexico issues the 'Blanket Indian' paper, edited by Rev. W. M. Sloan, who also has prepared and published a Spanish concordance of the Bible.

Hardly had the smoke of war with Spain cleared away before the Society took steps to occupy Cuba and Porto Rico. By an amicable arrangement with the Home Mission Board of the Southern Baptist Convention, the Society has the two eastern provinces of Cuba and all of Porto Rico as its field. In January, 1899, missionaries were appointed to both these islands, where the work has been wonderfully prosperous. There are now 22 Baptist Churches, with over 1,000 members and about 2,000 enrolled in Sunday schools, while several valuable church properties have been secured and other edifices are in process of erection at a cost of quite $50,000.

City mission work in cooperation with City Mission Societies was taken up in 1896 and the Society is now prosecuting missions in this manner in six of the chief cities of the land. In 1903, in response to the expressed will of the denomination, the Society undertook the organization of a general evangelistic effort in cooperation with other Baptist missionary organizations, with promise of excellent results.

During its entire history of seventy-one years the Society has issued 28,117 commissions, and its laborers have reported 5,730 churches organized, 179,107 persons baptized and nearly as many others added by letter to mission churches. Its receipts for all purposes have been about $13,500,000; its permanent invested funds of all kinds are $870,000, besides $516,000 annuity funds. Its receipts for 1903 were $621,387.32. For all this vast and varied work of three great departments, Missionary, Church Edifice and Educational, covering every state and territory, Alaska, some Canadian Provinces, Mexico, Cuba and Porto Rico, there is one Board of Managers, one Corresponding Secretary, and one Treasurer, with necessary assistants, the cost of administration being only about six per cent. of its receipts.

Congregational: When the American Home Missionary Society was organized, in 1826, several local organizations for home missions were in operation, some of which originated in the last century. The Society for Propagating the Gospel among the Indians and others in North America was founded in 1787; the Missionary Society of Connecticut, and the Berkshire Missionary Society, in 1798; the Massachusetts Missionary Society in 1799. Others of a later origin existed in the other New England States and in New York. Some of them confined their operations within their own geographical limits. Others had missionaries to the Indians in the new settlements of Northern New England, and the remote wilderness, even to the banks of the Mississippi. But as these societies acted independently of each other, some sections were over-supplied with laborers and others were left in utter destitution. Moreover, the laborers sometimes came into competition and conflict with each other, and the funds contributed for their support were worse than wasted. It was evident that a more comprehensive and effective system must be devised to supply the destitute portions of the country with Gospel ministry; but no direct steps were taken toward the solution of this problem till 1825, when plans were formed which resulted in the organization of the American Home Missionary Society.

The United Domestic Missionary Society, undenominational in its principles and spirit, was formed in 1822. At an important meeting, composed of eminent New England ministers, held in Boston January 11, 1826, a resolution was adopted recommending that the United Domestic Missionary Society of New York become the American Home Missionary Society. The Executive Committee of the UDMS cordially responded to the overture from the Boston meeting and issued a circular to friends of Home Missions in all parts of the United States, inviting them to meet in New York to form an American Home Missionary Society. One hundred and twenty-six individuals, representing thirteen States and four denominations, responded to this invitation, and met in New York (Brick Church) on May 10, 1826. On May 12, the United Domestic Missionary Society, in responding to the proposition made by the convention meeting in the Brick Church, adopted the following resolution:

"Resolved, That the recommendation of the convention be adopted, and the UDMS now become the American Home Missionary Society, under the constitution recommended by the convention."

Officers were at once elected and the work begun.

Its Constituency: Of the churches cooperating, the Associate Reformed shared but little either in its labors or benefactions. The Reform
Dutch churches withdrew when their own Board was organized in 1826. The Presbyterian churches continued to cooperate until 1861, when the General Assembly instituted its own Board of Home Missions. Thus, the AHMS, without any change either in its constitution or principles of action, became the organ of Congregational churches only. On the 1st of October, 1893, by permission of the Supreme Court of the State of New York, the corporate name of the Society was changed to "The Congregational Home Missionary Society" and it has ever since been known as such.

The object was "to assist congregations that are unable to support the Gospel to the destitute within the United States." It was to supply the destitute everywhere, but especially those in the new settlements on the northern, western and southern frontiers, with the privileges of the Gospel through the ministry of the Word and the Church of God.

Its method has been to supplant the former plan of mere missionary tours, pursued by the Domestic Missionary Societies, by providing permanent homes and missions, entering into partnership with each church in sustaining its minister, stipulating that it shall bear its full share of the burden, an annually increasing share, until the church shall become self-supporting. The stimulating effect of this system is seen in the fact that, during the last ten years, about forty churches have been annually brought to self-support; and the average annual expenditure for a year of missionary labor has been $500.

Through the Woman's Department no inconsiderable portion of revenue has been obtained. The estimated value of gifts sent in "missionary boxes" during the last twenty years has exceeded $50,000 annually.

Its Foreign Department: When the Society was organized, our population was being increased by only 10,000 immigrants annually. In view of the peril to our country involved in this vast increase of foreign immigration, the Society in 1883 entered upon a more distinct systematic effort in behalf of this class of our population. In these twenty years the work has made rapid progress and the number of missionaries who have preached in foreign languages during the last year (1903) is 230, including German, Scandinavian, Bohemian, Polish, French, Mexican, Italian, Spanish, Finnish, Danish, Armenian, Greek and Welsh.

Summary: Of the 5,650 Congregational churches in the United States, more than four-fifths of the whole were planted, and many more have been fostered by the Congregational Home Missionary Society and its auxiliaries. Since its organization in 1826, 507,072 members have been added to churches under its care.

In 1902-3, 1,907 home missionaries were employed, 4,946 hopeful conversions were reported, 8,250 members were received into home missionary churches, 2,573 churches were regularly supplied with the Gospel, 57 churches reached self-support, 95 new churches were organized, 72 houses of worship were built, 102 parsonages were erected, 141,269 Sunday schools were held, 159 Sunday schools were organized, 60 young men connected with home missionary churches were preparing for the ministry, 230 home missionaries were laboring among the Germans, Welsh, French, Swedes, Norwegians, Danes, Bohemians, Spanish, Indians and Mexicans. Total expenditures in 47 States and Territories, $569,734.47. The work of church erection is carried on by a distinct organization, the Congregational Church Building Society.

Lutheran: The Lutherans have been actively engaged in missionary work in Alaska and among the American Indians and negroes. As early as 1840 a house of worship was erected at Sitka, the capital of Alaska, and the membership at one time numbered 150. Ethokin, one of the governors, was a native of Finland and a Lutheran, and when he entered upon the duties of his office he brought with him a Lutheran minister. This work came very near dying out. The Swedish Missionary Union, composed of members from the Waldstetten party, have been sending missionaries to Alaska since 1886, and the Swedish Lutherans of America have lately become greatly interested in Alaska as a mission field. The entire work of the early Indian missionaries had only a temporary existence, and altho the Lutherans did faithful work among the red men, for years they found that congregations were organized and schools were planted only to be disbanded and broken up in course of time. The onward march of immigration into the territory of the Indian and its fruits of immorality and unjust treatment made the Indian suspicious of the white man's dealings. In 1845, Yrimester, afterward professor in Concordia College, Springfield, Ill., began work among the Chippewa Indians by establishing a school for children, and largely through this agency he became acquainted with the language and was enabled to speak to large assemblies of Indians. The work grew, and Baierlein was sent out from Germany. Baierlein traveled about, visiting one tribe after another, and he established a station about sixty miles from Frankenmuth, built a log house for living and school purposes, which proved to be a center of good. Miessler, sent out by the Leipzig Society, came to assist Baierlein. In his study of the language, Baierlein's reader and spelling book in the Chippewa language was of great service. The mission was eventually transferred to the Missouri Synod. The general uprising of the Indians in defense of their rights put an end to the station in Minnesota under the faithful supervision of the missionary Cloeter. The American Norwegians are carrying on a successful work among the Indians in the neighborhood of Win­ter­berg, Wis., where, in 1885, they erected a schoolhouse, and under the care of Rev. Mr. Morstad the work has prospered. The United Synods of Wisconsin, Minnesota and Michigan are conducting mission work among the Apache Indians, and a missionary plant has been established near San Carlos, Arizona. The Synods have recently appropriated a considerable sum of money to be used in the erection of houses for missionaries.

The Lutherans are also doing excellent missionary work among the American negroes.

Methodist Episcopal: The origin of Domestic Missions in the Methodist Episcopal Church was in 1812. Bishop Asbury about this date began soliciting funds for the support of ministers upon missionary circuits. The conferences were very vigorous, aggressive work in the then Far West and in the New England States. In 1819 the Missionary Society of the Methodist Episcopal Church was formed, the organization growing out of a
revival among the Wyandot Indians. In the Preachers' Meeting of New York, held April 5, 1818, on the Fourth Street Church, it was “Resolved, That it is expedient for this meeting to form a missionary and Bible Society of the Methodist Episcopal Church in America.” Article XIII of the Constitution provided that the Society should be established “wherever the Book concern may be located.” The General Conference was authorized to insert articles into the Constitution for such purpose, and to make the book-agents treasurers, and also to provide for the appropriation of funds within the object specified.

The plan of procedure was to organize auxiliaries in all the principal cities. The first auxiliary formed was the Female Missionary Society of New York, about ninety days after the parent Society was instituted, one of the earliest missionary organizations of women in the land. The General Conference in Baltimore, May, 1820, adopted the report of a committee on organization, and gave the Society and the missionary cause a great and effectual impulse. The existence of the Society really dates from this General Conference of 1820. The Society actively began its operations, sending Rev. Ebenezer Brown of the New York Conference to labor among the French people of Louisiana.

Present Scope: The Domestic Missions, as to language used, may be classified as English-speaking and non-English-speaking, the latter including work among the Bohemians, Chinese, Finns, French, Germans, Indians (14 tribes), Italians, Japanese, Portuguese, Scandinavians, and Welsh. The field embraces the Arizona, Atlantic, Black Hills, Gulf, Kalispell, Nevada, New Mexico English, New Mexican Spanish, North Montana, North Pacific German, Pacific Japanese, Porto Rico, Utah and Wyoming Missions, together with those administered by Annual Conferences. All Domestic Missions are administered under the direction of the presiding bishops, who (except for Missions outside of Annual Conferences) draw upon the Missionary Society for grants-in-aid not to exceed in amount sums fixed yearly in advance by the Missionary Conference. The representative body acting under the authority of the General Conference of the Methodist Episcopal Church. Disbursements for Domestic Missions in 1902 amounted to $482,811. Appropriations for 1903 amounted to $495,297.

Work for Bohemians is carried on in five Annual Conferences, the Upper Iowa Conference alone conducting Bohemian missions in three of its districts. There are four missions in Chicago, besides those in Baltimore and Cleveland, and the Coke Mission of the Pittsburg Conference.

The ME Church has missions for Chinese in several cities of California, with headquarters at San Francisco, besides the work carried on in New York, Boston, and Portland, Ore. Seven missionaries and 6 local preachers are engaged in this work. For Finns the ME Church conducts special work in California, Michigan and Minnesota.

There are thriving Methodist societies of French-speaking people in Worcester and Lowell, Mass., and in Dover and Manchester, N. H. In addition to these the French Church in Chicago, Illinois, reports 37 members and probationers, and the French Mission in Crowley, La., reports 120 members and probationers.

From the time of the conversion of William Nast, in 1835, the ME Church has labored among German-speaking people. There are nine regular Annual Conferences and the North Pacific German Mission Conference, with a combined membership of 62,480. In charge of this membership is a corps of 541 pastors, 266 of whom receive financial aid from the Methodist Missionary Society.

Indians: Twenty-one Methodist Episcopal missionaries and 22 local preachers are reaching about 12,006 Indians. At present there are Indian missions within the bounds of 13 Conferences, 17 of which missions are in Michigan, 5 in New York State, 9 on the Pacific Coast, 1 in Minnesota and 1 in Wisconsin. The tribes reached are these: Ukiah, California Digger, Onondaga, Oneida, Chippewa, Seneca, Tonawanda, Ottawa, Paintes, Washoe, Black Feet, St. Regis, Klamath and Nez -yack.

The ME Church has missions among Italians in Boston, Buffalo, Chicago, Cincinnati, New Orleans, New York, Philadelphia, and Providence, besides those in smaller towns.

The Pacific Japanese Mission Conference of the ME Church covers the work in Hawaii and the Pacific Coast. There are 14 stations, with 18 missionaries, 6 local preachers and a membership of 1,100.

There are 20 Negro Conferences in the ME Church, with membership of 273,000, aided for by 1,420 pastors, 806 of whom receive financial aid from the Missionary Society. These charges which are helped by funds of the Missionary Society are almost all in the Southern states.

Work among Portuguese is confined to the New England and New England South Conferences. There are missions in East Cambridge and New Bedford, Mass., and in Providence, R. I.

In 1845 the work of the ME Church among the Scandinavians was begun by Olaf G. Hedstrom, a member of the New York Conference. Since that time work has grown to such an extent that there are 4 Annual Conferences among the Swedes and 2 Norwegian and Danish Conferences, besides the work carried on under the administration of 7 English-speaking Conferences. Of the 218 Methodist pastors laboring among Scandinavians, 212 are supported in part by the Missionary Society.

Spanish: This work includes the efforts put forth in the New Mexico Spanish and Porto Rico Mission Conferences. In the New Mexico Spanish Mission Conference there are 46 stations and circuits, 34 of which have church buildings. There were 2,704 members and probationers in 1902. The work in Porto Rico was begun by Dr. C. W. Drees, formerly in the South America Mission. He arrived in San Juan March 25, 1900. There are already 13 stations on the island, with 17 missionaries, 14 native workers and 888 members and probationers.

Besides the work among the classes mentioned above, the Methodist Episcopal Church contributes, through its Missionary Society, to the support of 520 pastors among white people of the Southern States, many of whom are working among the illiterate thousands in the mountains of Tennessee, Kentucky, the Virginias and the Carolinas; to the support of 1,785 churches among other white people in the United States; to the Deaf-Mute Missions of Baltimore and Chicago, to the Mission among the Hebrews of Boston and other cities, and to the City Mission enterprises
of Brooklyn, New York, Jersey City, Hoboken, Newark, Paterson, Philadelphia, Pittsburgh, Detroit, St. Louis, Kansas City, and St. Paul, Minn.

In addition to the work above set forth, the other benevolent societies of the Methodist Episcopal Church, such as the Board of Church Extension, the Sunday School Union and Tract Society, the Board of Education, the Freedmen's Aid at Southern Edgewood, and especially the Woman's Home Missionary Society, which is auxiliary to the parent board, expend large sums on work having a distinct home missionary outcome.

Methodist Episcopal Church, South: By the law of the General Conference of the Church each annual conference is authorized to organize a Board of Missions auxiliary to the General Board. Said Conference Board appoints its own officers, regulates its own affairs, and has control over the missions it may establish within its bounds and of the funds raised for their support, provided it is responsible for the maintenance of such missions, and provided it secures the consent of the Bishop presiding over the conference. These Conference Boards of Missions have work in all the South, in its smaller conferences and in the centers, among mining populations, and in remote rural districts. The number of home missionaries supported in part or in whole for 1902 was 1,270, and the amount raised by the several conference boards for this purpose was $188,259.

The General Board makes some appropriation annually to the work in the Western fields. No greater moral heroism has been displayed in any field than by many of those men who have gone to the firing line at the call of the Church. In view of the peculiar conditions and of the tremendous drift of population unreached by any church, in many cases lying along the watershed east and west of the Rocky Mountains, appropriations are made to a number of smaller conferences and assistance given to those who are entrencing Christianity at strategic points. In addition to this the General Board at its last annual meeting in St. Louis, Mo., face to face with the rapid growth of urban and factory population, authorized the adoption of a plan of city missions which looks not only to the strengthening of Christian forces in our cities, but to the training as well of those who are to become leaders in evangelistic work.

The Woman’s Home Mission Society of the Methodist Episcopal Church, South, was established in 1868. The returns for the year 1902-3 are as follows: Members, 14,414; teachers and missionaries, 58; day and night schools, 11; pupils, 1,324; parsonages helped, 112; value of supplies distributed, $14,309, and total collections, $87,685.

The work of the Society includes aid in building and sustaining both through the local and connectional organizations, the distribution of supplies for orphanages, missionaries, mission schools and Rescue Homes, the maintenance of schools, of which there are three in Florida for Cuban children, two for the children of mountaineers in North Carolina, one on the Pacific Coast for Chinese and Japanese, a Rescue Home and Training School, an annex to Paine College, Augusta, Ga., for the industrial training of negro girls and a school for Indians at Anadarko, Indian Territory. A mission has also been maintained among the miners of West Virginia. The Society also is interested in the Scarritt Bible and Training School in Kansas City, Mo., where five deaconesses have been trained and consecrated for work among the needy. These cooperate with the pastors of churches and with the sixteen missionaries and twelve City Mission Boards which have been formed. No missionary organization in the church has made greater progress and managed its affairs more wisely than this.

While the General Board of Missions appropriates funds to the German and Indian Mission Conferences they fall in the same class with those in the remote West as domestic or home missions. The German work began over fifty years ago among the immigrants who were coming to New Orleans. Later the mission extended into Texas and in 1890 became the German Mission Conference. The results of this work have been most encouraging. The membership of 11,440 contributes annually for missions one dollar per capita and from eight to ten dollars for other purposes. A Joint Commission of representatives of the other Texas Conferences, with one from the German Conference, has done much to inspire and bind these German Methodists into closer union with the white towns and villages.

The earliest missionary work of the Church was in behalf of the Negroes and Indians. The former have been set apart into the Colored Methodist Episcopal Church, with an independent organization and presided over by bishops of their own race and selection. The Indians are still the wards of the Church, but the rapid influx of the white population into Oklahoma and the Indian Territory has steadily driven them in upon themselves until the work has become narrowed down to a limited area where full-bloods and ‘blanquitos’ Indians are preached to by a few of their own men and by white preachers of the Indian Mission Conference through interpreters. The policy which has been pursued in the Indian Mission work has not been as wise nor as effectual as that adopted in the foreign field. The membership has become so thoroughly intermingled with that of the white population that it is impossible to give correct statistics.

Presbyterian: About the time of the founding of the first Presbytery (1700-1705), the ministers of the early church followed the colonists wherever they went, and the Gospel was preached along the Atlantic coast, up to the foot of the Alleghanies and beyond, not only to English but to all settlers of whatever tongue or faith. Missions to the Negroes and the Indians were established. Records of the first Synod show that continual demands were made upon Princeton College in its earliest days for means to support missionaries and open missions in destitute places. An interesting item is the fact that the first recorded grant of missionary money was made to the First Presbyterian Church of New York City. At the first meeting of the General Assembly, which was organized in 1789, it was resolved to send forth missionaries to the frontiers to organize churches and attend in general to the religious and educational needs of the people.

In 1802 the work had grown to such dimensions that the first regularly constituted Board was formed under the name of the Standing Committee of Missions. Nominations of missionaries were made by it and presented to the General Assembly for confirmation.

After the War of 1812 the Committee felt
unable to cope with the increased needs and opportunities of the work, and the General Assembly in 1816 organized a larger and more continuous body to take up the work, called "The Board of Missions." Its power was such as to enable it to conduct the missions and decide all questions as to the appointment of missionaries and the payment of salaries without waiting for the approval of the Assembly; it was further empowered to organize branch societies, and the Church was urged to cooperate in such organizations.

Other churches felt the need of evangelizing the masses seeking homes in what was then the West, and in 1826 the American Home Missionary Association was formed. In its directorship were many Presbyterians, and Presbyterian Churches contributed to its support and benefited by its aid.

When the division took place in the Presbyterian Church in 1839, the Board of Missions remained in connection with the Old School branch, and in 1857 underwent a change in name, being called "The Trustees of the Board of Domestic Missions of the General Assembly of the Presbyterian Church in the United States," the New School branch. In its allegiance for a time with the AHMS (see above), but gradually separated from it. The first step in departure was the organization in 1855 of the Church Extension Committee, which carefully disclaimed all intention of interfering with the work or support of the AHMS; but the differences grew, until finally in 1861 the New School Presbyterian Church withdrew the work in New York, New Jersey, Pennsylvania, Baltimore, Kentucky, Ohio, Indiana, Illinois, Michigan, Wisconsin and Iowa.

As an adjunct to the Board of Home Missions and the Woman's Board, vitally connected with them both, stands the Young People's Department, which has for its special care the enlistment of the young people's societies in home mission work, the assigning of practical "specials" and the gathering and disseminating of information concerning the mission fields.

Self-supporting Synods: In 1886 the Synod of New Jersey assumed charge of the home mission field within its own bounds. Other Eastern Synods have since taken the same action till in 1903 the Board is relieved, wholly or in part, of the work in New York, New Jersey, Pennsylvania, Baltimore, Kentucky, Ohio, Indiana, Illinois, Michigan, Wisconsin and Iowa.

Results: The whole work of the Board for the century closing with 1900 may be briefly summarized as follows:

First Standing Committee on Home Missions appointed, 1892; Board of Home Missions organized, 1816; Number of commissions issued since that time, each representing one year's work, 74,063; Whole amount expended in this work from the beginning, $23,000,000; Number of missionaries in 1900, 1,371; Number of missionaries aided by self-supporting Synods in 1900, 784; Whole number of missionaries in 1900, 2,125; Whole number, including teachers in mission schools, 2,373.

Protestant Episcopal: Early in the 19th century home missionary work was undertaken to a limited extent under the auspices of voluntary societies in the Dioceses of New York and Pennsylvania. These efforts, however, tho they accomplished much good at the time, were not steadily sustained or adequately supported, and did not reach beyond the western borders of the States named. It was not until 1835, the year in which the principle was accepted that the Church itself is the divinely constituted missionary society, that aggressive mission work at home was undertaken on any extended scale in the name of the whole Church. In that year the Rev. Dr. Jackson Kemper was elected the first missionary bishop and was sent by the Board with a jurisdiction covering the territory now comprised in the states of Indiana, Missouri, Kansas, Nebraska, Iowa, Minnesota and Wisconsin. In truly apostolic spirit Bishop Kemper devoted himself to the religious welfare of the people in what was then the Far West. With the work done, he began his work he found a few small and scattered congregations, still fewer clergy and
but a few communicants. In the section over which he once exercised supervision there are two bishop, 556 ordained clergy and 69,000 communicants. This is but one instance, tho perhaps the most striking, of the rapid growth of the Protestant Episcopal Church in the Far West during the last half of the 19th century.

The work of the Protestant Episcopal Church is organized on the principle that every foot of territory over which the flag of the nation waves, whether on the North American Continent or elsewhere, shall be under the supervision of a bishop. These areas of supervision in sections of the country where the Church is strongest are known as dioceses, and support their own bishops. In other parts of the country where the population is still comparatively scattered and the Church less strong, these areas of episcopal supervision are known as missionary districts and the support of the bishops is provided by the Domestic and Foreign Missionary Society. The dioceses are being steadily divided and subdivided and number at the present time 69, with 68 bishops. The missionary districts on the continent number 13, with 17 bishops. These are also the extracontinental districts of Porto Rico, Honolulu and the Philippines, each with its own bishop.

Broadly speaking, there are three different kinds of home mission work: (1) That carried on by the Church as a whole, under the general supervision of the Board of Managers of the Domestic and Foreign Missionary Society, and known as "Domestic Missions." (2) That carried on by each diocese under the direction of its bishop and the local board of missions, and known as "Diocesan Missions." (3) That carried on generally under diocesan supervision, among the poor and the foreign-speaking populations of nearly all the large cities, and known as "City Missions." It is only of the home mission work carried on by the Church as a whole, that this paper is supposed to treat. This general work naturally follows four lines:

(I) Among White People: Missions among the white people are maintained in all of the missionary districts, and at the present time in some 33 of the dioceses, whose local resources are not sufficient to do all the aggregative work that should be done in establishing the Church in new centers. This work varies widely in extent and in character. Aid is given for the maintenance of missionary work in an old State like Maine, as well as in the newer commonwealths of the Middle and Far West. It may be carried on in a New England college town, in the midst of a Western farming community, or among the mining camps of the mountain States. In all cases the aim is to build up strong self-supporting congregations which may in turn give aid to other places. In some places elementary schools are maintained, as among the mountaineers of North Carolina and Kentucky. Again, aid is given to boarding schools of high grade, and in a number of localities excellent work is being done through Church hospitals. The value and success of this home mission work are seen in the fact that in a number of cases, and district, where this aid is given, the baptisms and confirmations form a much larger percentage of the Church population than is the case in many of the older and stronger dioceses.

(II) Among the Negroes: The Church's work among the Negroes is done in twenty-four dioceses, first, by providing opportunities for worship through mission churches and chapels in many county districts as well as in the larger cities of the South; secondly, through 90 day schools and 3 general industrial schools, in which latter training is given the boys and young men in various trades, and the girls and young women in domestic economy; and thirdly, through 3 hospitals exclusively for colored people. One hundred clergy are at present working successfully among the colored people, many of them Negresses themselves. There are at present 22,000 baptized members and about 8,500 communicants connected with the Negro congregations.

(III) Among the Indians: The Church has been exceedingly successful in its missions among the Indians, particularly in the Northwest. Great pioneer missionaries, like the Right Rev. Henry B. Whipple, D.D., sometime Bishop of Minnesota, and the Right Rev. William Hobart Hare, D.D., the present Bishop of South Dakota, with their devoted work have carried the Church to these aboriginal Americans and have demonstrated how thoroughly adapted it is to meet their moral and spiritual aspira­tions. The strongest Indian missions are found in Minnesota and South Dakota, but the work is also carried on in 12 other dioceses and districts. At the present time there are in the Episcopal Church between 15,000 and 18,000 baptised Indian Christians, of whom about 6,000 are children. The Indian clergy number about 30, and services are conducted by scores of other Indians, as catechists and lay helpers.

(IV) Among Foreign-speaking People: Among foreigners, comparatively little has been done by the Church in this direction being generally left in the hands of the local diocesan and parochial authorities. One general missionary is maintained among the Swedish congregation of the East, and aid is given to a number of smaller congregations in the Central West and Northwest. Aid is also given in the maintenance of the mission and home for Japanese in San Francisco. In some localities thorough work is being done among Chinese by the parishes.

Four domestic missionary districts present conditions differing so greatly from what is usually known as home mission work that a few words may be said about them individually.

1. Alaska: Nothing was done by this Church in Alaska, beyond a preliminary investigation, until 1886, when the Rev. Octavius Parker was appointed to begin work wherever he might find it practicable among the Indians along the Yukon River, the Presbyterians already having excellent missions in the southeastern section. The work thus begun has been gradually extended along the whole length of the river, and the white population increased missions were established in the centers occupied by them. At the present time the Church in Alaska is ministering to white people, Indians and Eskimos. Day schools and boarding schools are maintained at a number of Indian stations; and mission buildings are now rendering valuable service. The development of the Alaska missions is due chiefly to the heroic work of Bishop Rowe and pioneer helpers like the Rev. John W. Chapman, the Rev. Jules L. Prevost and Dr. John B. Driggs.
2. Porto Rico: Prior to the war with Spain there existed at Ponce a congregation connected with the English diocese of Antigua. When Porto Rico became American territory this church was transferred to the Protestant Episcopal Church in the United States. Services were also begun in 1898 in San Juan by an Episcopal army chaplain. The work has been continued by the appointment of regular missionaries under the leadership of the Right Rev. Raymond Buren, S.T.D., who was consecrated Bishop in 1902. Stations are now maintained at San Juan, Ponce, Puerta de Tierra and in Porto Mula, on the island of Vieques. The Bishop plans to open missions in other points as rapidly as the equipment can be provided.

3. Hawaiian Islands: Here again missionary work had been undertaken by the Church of England prior to the annexation of the islands to the United States. The Right Rev. Henry B. Reed, D.D., who was consecrated Bishop in 1902, found that work was already being carried on among the Hawaiian and English-speaking people in Honolulu and vicinity, as well as among the Chinese of the city. Two good boarding schools, Iolani College for boys and St. Andrew's Priory School for girls, established under the English mission, have been greatly strengthened. The work has also been extended to all of the larger islands. It is carried on not only in the towns, but in some instances among the large plantation communities. The work among the Chinese has been increased by additional Sunday schools and by schools under the leadership of the Right Rev. Charles H. Brent, D.D., who reached his jurisdiction in 1902. Manila has been made a strong center, and work has been begun upon the erection of the cathedral church and parish house. Medical, settlement and kindergarten work is also carried on, and one missionary has been assigned exclusively for work among the large Japanese population, upon the arrival of a native clergyman from the Protestant Episcopal Mission of Japan.

4. Philippine Islands: The first work of the Church in these islands was undertaken by army chaplains in 1898. The beginning thus made has been steadily followed up by the appointment of a number of missionaries, including 5 clergymen, 1 physician, 3 nurses, 2 parish workers and 1 kindergarten teacher, under the leadership of the Right Rev. Charles H. Brent, D.D., who reached his jurisdiction in 1902. Manila has been made a strong center, and work has been begun upon the erection of the cathedral church and parish house. Medical, settlement and kindergarten work is also carried on, and one missionary has been assigned exclusively for work among the large Chinese population. Outside of Manila stations have been opened at Iloilo to the south and at Baguio and Bontoc in the north. The latter points are centers of a region peopled chiefly by the Igorrote tribes, among whom no other Christian work has yet been attempted.

The home missionary staff of the Protestant Episcopal Church includes 20 bishops, 790 other clergymen, 160 laymen and 225 women. The annual receipts of the Domestic and Foreign Missionary Society for home work are about $600,000. In addition to this amount it is estimated that $350,000 is given annually through various diocesan channels for home mission work in the several dioceses.

In the same light we view the Church's work in the several dioceses. In 1835 there were 15 bishops, 763 other clergy and 36,500 communicants. In 1903 there were 88 bishops, 5,000 other clergy and 760,000 communicants.

Reformed (Dutch): Until the independence of the American Reformed Churches in 1784 they were themselves missionary ground. At the close of the Revolution the list shows 55 churches, 32 ministers serving 53 of these churches, and 2 licentiates.

In 1786 the General Synod took the first action on the subject of church extension, and appointed a committee to devise some plan for sending the Gospel to destitute localities. They reported to the next Synod, and recommended that voluntary collections be taken up in all the congregations to aid in the extension of the church. This was the first effort made. The monies collected were to be transferred through the Classes to the Synod.

The subject of church extension is found inserted as an item in the regular business of each Classis as early as 1790. A Classis at this time would collect from $50 to $100 annually. At the close of the century all the Classes were forwarding money (most of the churches contributing), except the Classis of Kingston, for the cause of church extension.

The Synod of 1800 formally appointed the Classis of Albany to take charge of all the missionary operations in the northern States.

1806-1822. The Synod now appointed a committee of ministers and elders, with plenary powers, to whom should be confided all her missionary operations. They were located in Albany till 1819, when they were directed to locate in New York. They were known as the "Standing Committee of Missions for the Reformed Dutch Church in America."

The committee began their operations on the old plan—short tours by settled pastors; but such efforts proved unsatisfactory. Settled ministers were wanted.

With the transfer of the committee to New York the mission to the Canadian churches was abandoned. Some of the Classes now began to retain their money for their own missionary purposes. At the annual meeting of the Synod, in January, 1822, organized themselves into a society, to be known as "The Missionary Society of the Reformed Dutch Church in America."

This act was made known to the Synod, and the matter was referred to the Committee on Missions. The birth of the society was hailed with joy. Its board of managers was made Synod's Committee on Missions, and the churches were exhorted to form auxiliary societies.

1822-1832. The policy of the new Society was to employ as many of the graduates of the Theological Seminary at New Brunswick, N. J., as were willing to undertake mission work, to have auxiliary societies in every congregation, and to take up collections at the monthly concerts for prayer. During the ten years of its existence the Society collected more than $30,000, aiding about 100 churches or stations and 130 missionaries.

It also started, in 1826, the Magazine of the Reformed Dutch Church, which, four years later, was transformed into the Christian Intelligencer. Shortly after the present auxiliary society was created, the board decided to meet biennially. The first ...
were enough churches to organize the Classes of Illinois and Michigan, and ten years later the Classis of Holland. Later the name of the Board was changed from the “Board of Missions” to the “Home Missions of the Reformed Protestant Dutch Church.” In 1849 the Board was reorganized, and in 1866 it was incorporated under the name of the Board of Domestic Missions of the Reformed Protestant Dutch Church. In 1870 the corporate name was changed to the present title, viz.: The Board of Home Missions of the Reformed Church in America. Its administrative offices are at the Reformed Church Building, 25 East 23d Street, New York City.

In 1854 the plan of a Church Building Fund was adopted, the object being to raise funds to aid feeble churches by loans to erect houses of worship and parsonages. In 1882 the Women’s Executive Committee was organized as an auxiliary to the Board. Beginning with the specific work of raising money for the erection of parsonages, they have extended their efforts, till now, besides furnishing many mission churches, providing comforts for pastors’ families and Christmas boxes for Sunday schools, they wholly support missions and schools among the Indians in Oklahoma and the mountain whites in Kentucky. In the year ending April 30, 1903, they collected $30,257 for their work. The original charter of the Board restricted its work to “aiding weak and founding new churches of the denomination.” In 1900 the charter was amended so as “to allow its missionaries to engage in evangelistic work which may not immediately eventuate in the founding of new churches.”

In the year ending April 30, 1903, the Board had under its care 245 churches and missions located in twenty States and Oklahoma Territory, and helped to support 175 missionary pastors, besides student missionaries. In that year the Board received and expended $98,965.

The object of the movement was declared in the first paragraph of the Constitution adopted, which stated it to be “for the purpose of carrying into effect the benevolent intentions of our constituents by organizing a plan of eliciting, combining and directing the energies of the whole denomination in one sacred effort to the propagation of the Gospel.”

The Convention created two boards, one for Foreign Missions located at Richmond, Va., the other for Home Missions located at Marion, Ala., where it remained until 1882, when it was removed to Atlanta, Ga.

The Home Mission Board has been, and is still, the special agency for carrying forward the purposes of the Southern Baptist Convention as expressed above. Its work, therefore, has been largely along the line of discovery, development, and combining.

The policy of the Board from the date of its organization has been that of cooperation. Under instructions from the Convention it has sought to form auxiliary relationships with State Conventions, District Associations and Missionary Societies. Its field of labor has, during these years, become more clearly defined and may be described as follows: Maryland, Ken-ucky, Indian Territory, Oklahoma, and all the States south of these, together with the four Western Provinces in the island of Cuba, the Board having relinquished its work in the two Eastern Provinces of Cuba in favor of the Home Mission Society of New York.

The work of the Board has naturally become divided into the following distinct departments: Frontier Missions, which includes a portion of Arkansas, Texas, Oklahoma and Indian Territory; The Mountain Regions, embracing a large area of territory extending from West Virginia through Virginia, the Carolinas, Tennessee, Kentucky and Georgia into Alabama; Work in the Cities, such as New Orleans, Memphis, St. Louis, Baltimore, etc. The imperative needs of this feature of the work are being pressed upon the Board with renewed emphasis, work among the foreign population rapidly becoming one of the most important features of the work of the Board; Cuba, in which gratifying progress has been made and which is exceedingly promising for the future. The other department of the Board’s work is that of Work among the Negroes, to which more special attention is likely to be directed in the immediate future than ever before. The spiritual welfare of the negro, however, has been a matter of concern to Southern Baptists ever since Africans were imported to this country. During the ante-bellum days they were baptized and received into fellowship of the white churches. Since their separation and organization into churches of their own race, the Board has constantly aided them in the proper formation of church government, as well as in moral and theological training.

The first annual report of the Board showed the appointment during that year of six missionaries, one in Virginia, one in Florida, one in Alabama, one in Louisiana and two in Texas. The work accomplished by the Board has constantly increased until its last Annual Report shows the following summary of work:

Missionaries, 671; weeks of labor, 23,955; churches and stations, 3,133; sermons and addresses, 95,005; prayer meetings, 12,232; total additions, 18,690; churches in their early struggles in the capital of the nation, as well as nine-tenths of all the cities of every State, save one, including the capital of the nation, as well as nine-tenths of all the States.

The work of the Board has been so successful that it has been able to establish six new churches of their own race, the Board has constantly aided them in the proper formation of church government, as well as in moral and theological training.

The Board has been instrumental in establishing something over 17 per cent. of all the white Baptist Churches within the bounds of the Southern Baptist Convention. It has aided weak churches in their early struggles in the capital city of every State, save one, including the capital of the nation, as well as nine-tenths of all the points of importance in the Southern States.

The constituency of the Home Mission Board consists of 1,737,466 white Baptists, organized into 127; houses of worship built and improved, 250; Sunday schools organized, 494; Bibles and Testaments distributed, 17,903; tracts distributed (pages), 3,944,888.

Since its organization the Board has had under annual appointment an aggregate of 10,190 missionaries. They have reported 222,505 additions to churches, and 3,504 churches constituted. The Board has been instrumental in establishing something over 17 per cent. of all the white Baptist Churches within the bounds of the Southern Baptist Convention. It has aided weak churches in their early struggles in the capital city of every State, save one, including the capital of the nation, as well as nine-tenths of all the points of importance in the Southern States.

The constituency of the Home Mission Board consists of 1,737,466 white Baptists, organized into 10,190 churches. In the same territory the number of negro Baptists is estimated to be 1,927,089.

**HONAN-FU**: A town in the province of Honan, situated in the W. part of the province about 20 miles S. of the Hoang-ho. Station of the CIM (1902), with 2 missionaries.
HONDURAS: A republic of Central America, lying between the Caribbean Sea on the east, the Pacific Ocean and San Salvador on the west, and separating Nicaragua from Guatemala. It became part of the Central American Confederation in 1822, but asserted its independence in 1838, and is now governed by a president elected by popular vote for four years. It has almost the exact area of Mississippi, with a population of (1900) 587,500, the majority of whom are aboriginal Indians and Mestizos, with 5,000 descendants of the early Spanish settlers, and 5,000 negroes. In general, the country is mountainous, the Cordilleras crossing it from north to south. There are many rivers, most of them flowing east. On the highlands the climate is pleasant and equable, but along the Caribbean coast it is hot and malarious. The soil is extremely fertile, and luxuriant, tropical vegetation is found along the coast. Roman Catholicism is the religion of the country. The coming in of North Americans and other foreigners is introducing good roads and improved methods of living, so that a better future is before the republic. When the President of Honduras visited the Bay Islands in 1900 he invited the Protestant workers to come into the interior, and the invitation is being accepted.

HONDURAS, British: A crown colony on the Caribbean Sea south of Yucatan, east of Guatemala, and 660 miles west from Jamaica. It has an area of 7,662 square miles and a population of 27,542. The capital is Belize, with 5,800 inhabitants. Mission field of the CMS (1852), the SPG, and the Jamaica Baptist Missionary Society. Over 2,000 members are gathered in 35 organizations, 2,500 pupils are taught in 20 day schools and many more in Sunday schools, and 12 missionaries are doing valiant service throughout the colony.

HONGKONG: An island at the mouth of the Canton River, off the southeast coast of China, about 40 miles E. of Macao and 90 miles S. of Canton, while numerous lines ply between Victoria and the coast ports of China. The population (1901) is 283,905, of whom 6,000 are white of all nationalities (only one-third English), and 233,263 Chinese. The government supervises 178 schools, attended by 7,700 pupils. In these schools English is taught. Mission work in Hongkong is identified with the early history of the various missionary societies who work in China. The societies at present laboring here are the LMS (1843), the Basel Society (1852), the CMS (1862), the ABCFM (1883), the WMS, the SDA, the Rhenish Society (1847), the Berlin Ladies' Society, and the German Mission to Chinese Blind. Together, these Societies have (1903) 40 missionaries in Hongkong, men and women; 122 native workers, men and women; 24 outstations, 18 preaching places, 4 boarding schools, 50 day schools, 1 orphanage, 1 blind asylum, and 2,500 professed Christian adherents. The BPBS has an agent here, and the YMCA has made it a regular station since 1899, with a man and his wife to foster the extension of the YMCA.

HONOLULU: The seat of government and principal seaport of the Hawaiian Islands, situated on the southeastern coast of Oahu, is a large commercial city. Its mild and equable climate ranges from 67° in January to 83° in August, making the annual mean 75°, with a variation in either direction of only 7°. It is a port of call for the steamers plying between San Francisco and Australia, and occasionally for the steamer between San Francisco and Hongkong, while it is the terminus of a line of steamers running semi-weekly to San Francisco. The inhabitants number 39,305, among whom are a great many Japanese, Chinese, half-breeds, and natives of various islands of the Pacific. The P. E. Church has a bishop at Honolulu. There is also a Roman Catholic bishop. Mission work is carried on by the Hawaiian Evangelical Association, and by other denominational agencies. The ABCFM (1819) was first in the field, and the Hawaiian Evangelical Association has taken up its work. The ME, the FCMS, the PE (taking over the work of the SPG), the SDA, and the Peniel Society all have enterprises in Honolu, largely among the Japanese, the Chinese, and other immigrants, many of whom are Portuguese and Roman Catholics.

HORWAR: A town in the Bombay Presidency, India, situated about 18 miles W. S. W. of Bijapur. Station of the Basel Missionary Society (1846), with (1903) 1 missionary and his wife and 9 native workers. The name is written Honor in the Basel Society’s publications.

HO-NYEN: A village in the province of Kwang-tung, China, situated in the highland district not far from Ho-su-van. Station of the Basel Missionary Society (1901), with (1903) 2 missionaries, 1 missionary’s wife, 23 native workers, men and women; 17 outstations, 8 day schools, 2 boarding schools, and 626 professed Christians.

HOOCHOW. See Hu-Chau-Fu.

HOOGHY. See Hu-gul.

HOPE FOUNTAIN: A settlement in Rhodesia, South Central Africa, situated about 7 miles S. W. of Bulawayo. Station of the LMS (1890), with (1903) 2 missionaries, 1 missionary’s wife, 3
HOPE VALLEY: A settlement in the N. part of Queensland, Australia, situated on the seacoast near Cookstown. Station of the Neuen­detelsian Missionary Society (1856), with (1900) 6 missionaries, men and women.

HORDEN, John: Born in 1828; died in 1893. In 1851 left England to work as a lay missionary in an extremely remote corner of Rupert's Land, but soon afterward he was appointed by the CMS as missionary to Moose Fort, Northwestern Canada. In 1852 Bishop Anderson visited Moose and Mr. Horden was ordained deacon and priest the same year. When the diocese of Rupert's Land was divided in 1872, he was chosen Bishop of Moosonee, a diocese coextensive with the shores of Hudson Bay, and running from 800 to 850 miles inland, and as far north as human beings exist. Owing to the difficulties of locomotion his episcopal duties were confined entirely to the south of the bay until 1879, when, in visiting the northern portion of his diocese, he had to descend south for several hundred miles, then go west by the Canadian Pacific Railway, through three dioceses, then take a northerly direction through Rupert's Land, and finally veer round to northeast to reach York Factory. This journey required the greater part of the summer; and during the winter his time was fully occupied in day school work, visiting, personal interviews with all classes of the community, in learning the vernacular and in giving instructions respecting the verbal construction of the language. In February, 1880, he took the journey by sled to Churchill, when the thermometer averaged 37° below zero, and he remained there until April, working among the people at the post and among the Chipewyans and Eskimos. In the summer of this year, amid the greatest difficulties, he visited the outstations of York Factory. These visits were very successful and hundreds turned from heathenism and accepted Christianity. When death came to him at Moose, January 12, 1893, he was engaged in revising his own translations and Dr. Mason's Cree Bible, after forty-two years' service as missionary and bishop. His literary works consist of Bible translations, prayer book, hymn book, Gospel history into the Cree languages, several translations into the Saulto, Eskimo and Ojibbeway languages, and other minor translations.

HOSCHUWAN: See Ho-su-wan.

HOSHANGABAD: A town in the Central Provinces, India, situated on the left bank of the Narbada River, about 40 miles S. E. of Bhopal. It is on the high road to Bombay, having an excellent trade. Population (1891), 12,500, of whom 9,910 are Hindus and the larger part of the remainder are Mohammedans. Station of the FFMA (1874), with 9 missionaries, men and women; 8 day schools, 1 boarding school, 1 industrial school, and 1 dispensary.

HOSHIARPUR: A town in a district of the same name in the Punjab, India, situated 45 miles N. of Ludhiana. Population, about 20,000. Station of the PN (1897); at present (1903) not occupied by missionaries. It is in charge of a native worker with his wife and 1 native woman worker who is a physician. There is an orphanage, with industrial department, a hospital, and 1,206 professed Christians, of whom 774 are communicants.

HOSTEL: Some of the missionary societies apply this name to boarding houses for students established at a missionary station in connection with or near a high school or college which attracts young men from a distance. Hostels are sometimes established for Christian students in order to strengthen them against influences to which they are exposed while living at a distance from their Christian homes. Others are opened for non-Christian students, and such become a most effective method of evangelization in view of the influences which they bring to bear on heathen or Mohammedan students who, during their education, are removed from the anti-Christian pressure surrounding them in their homes. The SPG missionaries in Delhi, India, for this reason regard such a hostel as the heart of their Christian work in that city.

Hostels are being established by some missions in places where they have no higher educational institutions, and with the direct purpose of bringing non-Christian students at secular colleges under moral and Christian influence.

HO-SU-WAN: A town in the province of Kwang-tung, China, situated in the highlands near the headwaters of a branch of the Tung River, about 40 miles N. E. of Hwei-chau-foo. Station of the Basel Missionary Society (1855) with (1903) 1 missionary and his wife, 7 native workers, 4 outstations, 2 day schools, 1 boarding school, and 346 professed Christians. Name written by the Society, Hoschuwan.

HO-TSIN-HSIEN: A town in the province of Shan-ai, China, situated in the S. about 32 miles W. of Kiang-chau, and a little above the confluence of the Fen-ho and Hoang-ho. Station of the CIM (1893), with (1903) 1 missionary and his wife.

HOTTENTOT-BUSHMAN RACE: When the southern angle of Africa was first visited by Diaz and De Gama four centuries since, as when it began to be colonized also by Europeans in 1652, it was found to be occupied by a somewhat peculiar aboriginal race, which is best known as the Hottentots. Out of this parent stock have come several affiliated groups known as Bushmen, Namaquas, Korannas, and Griquas. The Hottentots called themselves originally Khói-Khoi, "Men of Men." Prichard regarded their present name as a corruption of Houteniqua, the name of an extinct tribe. But those who know the language, finding in it no roots of such a word, prefer the opinion advanced by T. Hahn, a scholar who knew the language as his mother tongue, having been born and bred among them as the son of a missionary, that the Dutch gave them this name, Hottentot, because of the curious sounds, especially in the clicks, in which their language abounds, as if they stammered and stuttered. Indeed, in Low German, the word Hottentot, or Huttentut, is found, meaning, it is said, a "quack." More to the point is the word, quot, as in "quick." More recent authorities, again, say, "quock."
been taken over and adopted into some of the neighboring languages, especially into Kaffir and Zulu. The Hottentot abounds also in harsh consonants and aspirated gutturals, which, with the clicks, are hard for a foreigner to acquire. The eminent comparative philologist, Dr. Bleek, who has given the Hottentots for means of speech a suffix-pronominal, sex-denoting language, and classes it with the Hamitic of North Africa. According to T. Hahn, it is strictly monosyllabic, and every root ends in a vowel. It uses suffixes and postpositions, has three grammatical genders and three numerals, four clicks and three tones. It has an extensive oral literature of songs and animal stories, is highly developed, and anything but the mere jargon which the early Dutch settlers fancied it to be.

Grout, in his Zulu-Land, says: "The geographical position of the Hottentot, from the time he was first known to the European, situated as he was at the southern extreme of the African continent, and flanked from sea to sea on his north and inland side by a broad belt of people of a very different language and appearance, would seem to indicate that any search for his pedigree and ancestry, provided the present be not his original home, must be made in regions far removed in respect to both time and place. Happily, within the last few years, a careful study of his language and a comparison of this with the old Egyptian and Coptic tongue have given a clew to his ancient abode. If we may credit some of the most learned and acute philologists of the present day, and those who have had the best opportunities for studying the Hottentot and Bushmen, together with other African dialects, this Gariepine tongue of the southern extreme belongs to the same family as the old Egyptian and Coptic, the Berber, and Ethiopic, in the farthest north of the continent; and what is also highly interesting and important, this southern branch of the family is found to surpass all the rest in the integrity with which it has preserved the more essential characteristics of the original stock.

"Admitting the correctness of these views, we can have no doubt as to the early ancestry of the Hottentot and Bushman class, including the Koranna and Namaqua, and that their origin is the same as that of the nations of northern Africa, the old Egyptian, and kindred tribes, including, perhaps, the Libyan or Berber and the Guanches."

The likeness of the Hottentot, in many respects, to the old Egyptian family would indicate that the former was once a part of the latter. It follows, then, that these extreme southern tribes were once sundered by some dividing wedge from the extreme northern, and by this new incoming power or alien race, of a very different language, were driven on southward from age to age, till they finally reached their present abode in the southern angle of the continent, from which they could be driven no farther inland. The Hottentots, as we know from the incoming of the Bushmen, were not uncommon, as we know from the incoming of the Bantu race, that the former was once a part of the latter. Eruptions from that quarter, in those early ages, were not uncommon, as we know from the incoming of the Bushmen and of the Shepherd Kings.

As the families in the northeast grew and multiplied, it was but natural that some of them should press to the south and west, as from the Euphrates onward to the south, like one wave after another, till finally that in the lead was crowded into the extreme south and flanked by the other on its northern border, the former now called the Hottentot, the latter the Bantu race, each of them continuing to keep up its distinctive aboriginal traits in a remarkable manner.

In personal appearance the Hottentot is short in stature, of a yellowish brown in color, like a faded leaf, with high cheek bones, chestnut eyes, nose flat, hair twisted into clusters. When first mentioned by the Portuguese, Hottentots are described as pastoral in their pursuits, rich in cattle, scant in dress, living in huts, and remarkable for the excellence of their morals. But almost everything in respect to their freedom, mode of life, and morais was greatly changed, often for the worse, by the coming in of the white man. Subsequently, by the introduction of a better rule and much missionary work in their behalf, the condition of many of them was greatly improved. Some of the tribes have been civilized, and many of the people become good citizens, intelligent, steady, and industrious, and not a few are brought to embrace the Gospel.

Many are in the employ of the Dutch farmers; but their tribal home, so far as they have any, is on the Orange River, from the Atlantic eastward half across the continent.

Out of this original Hottentot stock, at an early date, came a large branch, the San tribe, now called the Bushmen. This name is an Angli-
sized form of the Dutch Boers men. Indeed, some speak of the original stock as opening out into two branches, the Khoikhoi and the San, the former being, primarily, given to the pastoral mode of life, the latter to hunting. For this wandering, hunting, predatory kind of life the Bushmen of to-day have the same love as their ancestors, the San, had when first seen centuries ago by Europeans. Their habitat is here and there along the wild region that lies between the Orange, in the grass bush, among the rocks and ravines of the hills, or secluded recesses of the mountains, on the outskirts of other tribes. They build no houses, have neither flocks, herds nor tents. They are very diminutive in stature, of a dark yellow color, their hair like wool twisted together in small tufts. They have no nationality, and it would seem that their religion consists chiefly in a few superstitious notions concerning evil demons.

In their unsettled, wandering condition it has been difficult to carry on mission work among them, some have been induced to join stations among other tribes, being in this way brought to a knowledge of the Gospel. They speak essentially the same language as the Hottentots, and yet the points of difference are many. In one respect they are an enigma, that is, in the"signs they have given of intelligence and artistic skill; for," as Dr. Cust says, "they have exhibited a wonderful power of graphic illustration. The rocks of Cape Colony and the Drakenberg have everywhere examples of San drawing, figures of men, women and children, animals characteristically sketched, and as a proof that the art is not extinct, figures of their enemies, the Boers, appear unmistakably. Rings, crosses, and other signs have given rise to the speculation, quite unsupported, that they may represent some form of indigenous writing, but the facts, such as they are, must not be stretched beyond what they actually evidence, and this is sufficiently noteworthy."

Another tribe of Hottentots, the Namaquas, living as nomads near the Atlantic along the Orange River, the Great Namaqua on the north side, and the Little Namaqua on the south, essentially the same language, have the same complexion, kind of eyes and hair, as the Bushmen and other Hottentots, and yet are tall, well-proportioned, and under the training of missionaries have become intelligent, industrious, Christian men, while others have continued to prefer the savage life.

A negro race on the west coast, north of the Orange, having been subdued by the Namaquas and called Damara, or "conquered," the adopting the language of their conquerors, do not really belong to the Hottentot race. Those of the Damara who speak the Hottentot are called the Hill Damara, to distinguish them from the Herero, who are of the Bantu race, and called Cape Damara.

For all these tribes much good mission work has been done. Through the patient endurance of many trials, in face of much opposition from those who should have been helpers together with them, the missionaries laboring to raise these benighted, persecuted tribes to a higher plane of life have seen their labors greatly blessed, have seen great secular, social, civil good brought to them, and souls, not a few, fitted for immortality.

HOWNARD, William Ware: Born in West Brookfield, Mass., on the 28th of February, 1817. His father was the fifth generation from John Howland, who was one of the first band of Pilgrims who sailed in the Mayflower. Mr. Howland graduated from Amherst College in 1841, and from Union Theological Seminary in New York in 1845. He reached Jaffna, Ceylon, early in 1846 as a missionary of the ABCFM, and was located at Batticotta, where he assisted in teaching a select class in the seminary for young men, but he gave most of his time to preaching in the vernacular and in village work. In 1858 he moved to Tillipally, and for ten years had charge of the vernacular training and theological institution. After the death of "Father Spaulding" in 1873, Mr. Howland became the senior missionary in the American Mission in Ceylon. He also succeeded to the title "Father," and even to-day, among both missionaries and natives, Hindu and Christian, he is reverently known as "Father Howland." For fifteen years he was located at Odooville and had charge of the station where he died August 26, 1892, after nearly half a century of life and labor among the Tamils of Jaffna, making only one visit to the homeland during the period. Howland was preceded in death by his wife Susan Reed in 1846, herself a trained educator. Four of their children entered missionary service under the American Board. Dr. Howland was preeminently an evangelist and preacher of the Gospel of Jesus Christ.

HOWRAH: A large town and important railway center on the Hugli River, Bengal, India, opposite Calcutta, of which it is practically a suburb. Population (1901), 157,594, about three-fourths of the people being Hindus and
one-fifth Muslims. Station of the BMS (1821) and BZM (1881), with (1903) together, 2 missionaries and their wives, 1 woman missionary, 10 native workers, men and women; 5 day schools, and 215 professed Christian adherents, of whom 60 are church members. Station also of the SPG (1821), with (1903) 14 native workers, 2 outstations, 3 places of worship, 3 day schools, and 299 baptized Christians, of whom 148 are converts. Station also of the CEZ (1891), with 4 women missionaries, 14 native women workers, and 4 day schools.

HSIANG-CHENG-HSIEN: A town in the province of Ho-nan, China, situated about 20 miles W. by S. of Hsu-chau. Station of the CIM (1892), with (1903) 1 missionary and his wife. Name written by the Society, Si-hsiang.

HSIN-AN-HSIEN: A town in the province of Ho-nan, China, situated about 20 miles W. of Ho-nan-fu. Station of the CIM (1893), with (1903) 1 missionary and his wife and 1 woman missionary. Name written by the Society, Si-an-hsien.

HSIN-CHANG-HSIEN: A town in the province of Che-kiang, China, situated about 20 miles E. of Hu-chau. Station of the PS (1892), with (1902) 2 missionaries, one with his wife, 1 woman missionary, 4 native workers (one a woman), 1 boarding school, and 100 professed Christians. Name written by the Society, Sin-chang.

HSIN-CHANG-HSIEN: A town in the province of Che-kiang, China, situated about 30 miles S. W. of Ning-po. Station of the CIM (1870), with (1903) 1 missionary and his wife. Name written by the Society, Sin-chang.

HSIN-CHAU: A town in the province of Shan-si, China, situated about 40 miles S. of Chang-te. Station of the Presbyterian Church in Canada (1892), but since 1900 an outstation of Wuhwei.

HSIN CHOW. See HSIN-CHAU.

HSIN-FENG-HSIEN: A town in the province of Kiang-si, China, situated about 40 miles S. by W. of Kan-chau. Station of the CIM (1899), with (1903) 2 missionaries. Name written by the Society, Sin-feng.

HSI-NGAN-FU: A town in the province of Shen-si, China, situated in a vast wheat field, S. W. of the confluence of the Wei-ho and King-ho Rivers, and at the convergence of many natural trade routes. It was founded in the 12th century, n. c., and for 2,000 years was the capital of Eastern China. Its environs are rich in antiquities. One of the most important relics preserved in this city is the tablet setting forth the relations of Nestorian missionaries of the 8th century to the Chinese government. The place is probably the same as the Thaul of Ptolemy, and it is called Changan by Marco Polo. The town stands at an altitude of 1,500 feet, surrounded by high walls which enclose considerable pieces of cultivated land. The streets are straight and clean. Population, about 500,000.

Station of the CIM (1893), with (1903) 4 missionaries and 2 wives of missionaries, who are engaged in giving an impulse to the work checked by the Boxer movement. Station also of the BMS (1894), who have now (1903) no missionary actually in the city. Station also of the Swedish Alliance Mission, and agency of the BFBS. Name also written Singan.

HSING-HWA-FU: A town in the province of Fo-kien, China, situated on the coast 50 miles S. W. by S. of Fu-chau. It is built at the foot of hills looking out over a fertile plain and over the Hing-hwa Bay. An important literary center; it has an examination hall seating 3,000 students. Station of the ME (1864), with (1903) school.
1 missionary, 3 women missionaries, 119 native workers, 6 outstations, 48 places of worship, 34 Sunday schools, 3 day schools, 2 boarding schools, special work among lepers, 1 printing house, 1 industrial school, and 1,769 professing Christians. Station also of the CMS (1894), with 3 missionaries (one wife of a missionary), 2 women missionaries, 13 native workers, 9 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 661 professed Christians.

HSING-I-FU: A town in the province of Kwei-chau, China, situated 140 miles S. S. W. of Nangan-fu. Station of the CIM (1891), with (1903) 1 missionary and his wife. Name written by the Society, Hing-li.

HSING-MIN-TING: A town in Manchuria, China, situated 30 miles E. N. E. of Mukden, on the Sia-ho River. Station of the PCI (1899), with (1901) 1 missionary, 21 native workers, 15 places of worship, 2 day schools, and 300 church members. Name written by the Society, Hsien-min-ting.

HSING-NGAN-FU: A town in the S. of the province of Shen-si, China. Station of the CIM (1898), with (1903) 3 missionaries and their wives. Name written by the Society, Hing-an.

HSING-NING-HSIEN: A town in the province of Kwang-tung, China, situated about 78 miles N. W. of Swatow. Station of the Basel Missionary Society (1887), of which the headquarters have been removed to Pyang-kuo, with 2 missionaries, 1 missionary's wife, 6 native workers, 5 outstations, and 420 professed Christians. Name written by the Society, Hsin-nen.

HSI-NING-FU: A town in the province of Kan-su, China, situated on the Hsi-ho River, 35 miles E. of Lake Kukunor, in a fertile and populous district. It is a center for caravan trade with Lhasa, Tibet. Altitude, 7,500 feet. Population, 60,000. Station of the CIM (1885), not now (1903) occupied. Name written Si-ning by the Society.

HSIN-TIEN-TSZE: A town in the province of Sze-chuan, China, situated about 20 miles N. of Pekmg. Station of the CIM (1899), with (1903) 2 women missionaries. Name written Sin-tien-tsi by the Society.

HSIN-TU: A village in the province of Sze-chuan, China, situated about 12 miles N. N. E. of Cheng-tu-fu. Station of the CMS (1894), with (1903) 3 missionaries, two of them with their wives. Work was very much broken up in 1902 by the renewal of Boxer disturbances. Name also written, Sia-tu.

HSIN-YANG-CHAU: A town in the southern part of the province of Ho-nan, China, situated 119 miles N. N. W. of Han-kau. Station of the American Norwegian China Mission. Name written by the Society, Sin Yong.

HSIAPAW: A city in Burma, situated 95 miles N. W. of Mandalay. Station of the ABMU (1890), with (1903) 1 missionary (a physician) and his wife, 8 native workers, men and women; 1 hospital, 2 dispensaries, and 1 boarding school.

HSU-CHAU: A town in Manchuria, China, situated about 100 miles S. E. of Mukden. Station of the Russian Mission Society (1899), with (1903) 1 missionary in charge.

HSU-CHAU-FU: A town in the province of Sze-chuan, China, situated 166 miles N. W. of Nanking. Population, about 120,000. Station of the PS (1897), with 7 missionaries, men and women, two of whom are physicians; 2 native workers, 4 preaching places, and 1 dispensary. Name written by the Society, Hsuehou-fu and Chuchow-fu.

HUACHO: A town and seaport of Peru, South America; situated about 78 miles N. W. of Lima, with which it is connected by railway. Station of the PB, with 1 missionary and a printing house.

HUAIN: An island of the Society group in the South Pacific Ocean, lying 120 miles N. W. of Tahiti. The surface is mountainous and the soil fertile. Population, 2,000. Mission field of the Paris Evangelical Missionary Society, with 576 church members.

HUBLI: A town in the Presidency of Bombay, India, 13 miles S. E. of Dharwar, on the main road from Poona to Harliar. The center of the cotton trade of the Marathi country. Population (1901), 60,214, of whom about two-thirds are Hindus. Station of the Basel Missionary Society (1839), with (1903) 3 missionaries, 2 native workers, men and women; 2 outstations, 3 day schools, and 472 professed Christians. Outstation also of SPG, with (1902) 2 native workers, 1 place of worship, 1 day school, and 116 professing Christians. The YWCA has a missionary here and a young women's society.

HUME, Robert Wilson: Born at Stamford, Conn., November 9, 1809; graduated at Union College, 1833, taking high rank as a scholar in a large class; studied theology at Andover and Princeton; attended medical lectures; ordained in 1839, and sailed April 1, the same year, as a missionary of the ABCFM for Bombay. He was stationed for fifteen years at Bombay, spending a part of the cool months making tours. For some years he was secretary of the Bombay Temperance Union, and editor of its journal, called the Temperance Repository, which attained a high place for ability and usefulness. For ten years he was secretary of the Bombay Tract and Book Society. It was through his influence that, instead of gratuitous distributions, as had formerly been the custom, colporteurs were employed, who went into all the districts and sold hundreds of thousands of these publications. One of the Bombay journals, referring to this
Society, says: "The rapid advance the Society has made of late years has been due mainly to Mr. Hume's prudent and energetic management."

... In 1854 he was in Iceland through the Kassi country for Ro-Ghere, he was murdered by an insurgent. In 1868, Humphrey went to Peking, a veteran of twenty-nine years' service in a foreign field, to fill a post which his generous sympathy endeared him to a wide circle of friends. He had the charge of the mission, in both of which departments he discharged his duties with great fidelity. He greatly improved the style of Tamil printing. The Tamil Bible and the dictionary of Dr. Winslow, both printed by him, are monuments of his skill and painstaking efforts.

On the discontinuance of the Madras mission he went to Peking in 1868, a veteran of twenty-nine years' service in a foreign field, to fill a similar post. His labors were invaluable to the mission. He established the first printing office in Peking in which the foreign press and metallic movable type were used. He died May 29, 1878.

HUNT, Phineas R.: Born at Arlington, Vt., January 30, 1816. From his conversion in early life he was an active and zealous Christian. He went to India in 1839 as a missionary of the ABCFM, and was stationed at Madras. His warm-hearted, Christian efforts among the English-speaking population, native and foreign, and his generous sympathy endeared him to a wide circle of friends. He had the charge of the mission press in Madras, and was also treasurer of the mission, in both of which departments he discharged his duties with great fidelity. He greatly improved the style of Tamil printing. The Tamil Bible and the dictionary of Dr. Winslow, both printed by him, are monuments of his skill and painstaking efforts.

The enclosure of the Madras mission he went to Peking in 1868, a veteran of twenty-nine years' service in a foreign field, to fill a similar post. His labors were invaluable to the mission. He established the first printing office in Peking in which the foreign press and metallic movable type were used. He died May 29, 1878.

HUMPHREY, William John: Educated at Queens College and Ridley Hall, Cambridge; B.A. in 1884; M.A., 1888; ad eundem, Durham, 1893. On July 17, 1888, he was accepted as a missionary by the CMS; in September, 1890, entered Sierra Leone Mission as principal of Fourah Bay College, Sierra Leone; in 1890 also in charge of the work at Cline Town, and after this date, although his health was failing, he was incessant in his labors. In his last week, he wrote, "Humphrey killed," reached England from Sierra Leone. Early in this year the imposition of a "hut tax" by the British Government upon the natives of Sierra Leone caused discontent and revolt among the Temnes and other tribes. The insurgent chiefs had several encounters with the British troops and covered the country between Port Lokkoh and the mission stations at Makomp and Ro-Gbere. On March 12, 1898, Humphrey, who had been sent to Grand Canary for his health, returned to Sierra Leone, and immediately as secretary of the mission, hurried to Port Lokkoh to look after the interests of the missionaries and their fellow-workers. This first journey was made in safety, but on a second occasion, as he, accompanied by two porters, was passing through the Kasei country for Ro-Gbere, he was murdered by an insurgent.

HUGLI: A town in Bengal, India, capital of a district of the same name. It is situated on the right bank of the Hugli River, 25 miles N. of Calcutta. It is said to have been founded by the Portuguese in 1537, and the adjoining town of Chinsurah was a Dutch town. The population, with Chinsurah (1891), is 33,100. Station of the LMS in 1798 and transferred to the UFS (1849), with (1903) 3 missionaries, 1 wife of a missionary, 2 women missionaries, 124 native workers, 50 day schools, 3 boarding schools, and, including Kalna also, 330 communicants. Station also of the Chinsurah and Hugli Zenana Mission (1875), with 1 woman missionary, 10 native women workers, 5 day schools, and 100 Zenana pupils.

HUMENE: A settlement on the east coast of the island of Nias (near Sumatra), Dutch East Indies. Station of the Rhenish Missionary Society, with (1903) 1 missionary, 20 native workers, men and women; 10 outstations, 11 day schools, and 1,458 professed Christians.

HUN-YUEN-CHAU: A town in the province of Shan-si, China, situated north of the great wall, in the E. part of the province. Station of the CIM (1898), vacant (1903) since the Boxer outbreak of 1900, when the missionaries were killed.

HURDA. See HARDA.

HURRICANE HILLS: A settlement in Assiniola, Dominion of Canada, situated 30 miles S. E. of Regina. Station of the Presbyterian Church in Canada, opened in 1897 as an Indian Reserve, where are about 200 souls, all pagans.

HUTA BARAT: A village in the island of Sumatra, Dutch East Indies, situated between Siboga and Toba Lake, about 3 miles from Pea Raja. Station of the Rhenish Missionary Society among the Battaks, with (1903) 1 missionary, 62 native workers, men and women; 10 outstations, 11 day schools, and 3,076 professed Christians, of whom 1,731 are communicants.

HWAI-KING. See HU-EI-KING.

HWAI-NGAN-FU: A town in the province of Kiang-su, China, situated on the Grand Canal, 100 miles N. E. of Nanking. Population about 150,000. Station of the PS (1895), at present (1903) unoccupied.

HWAI-YUEN: A town in the province of Ngan-hwei, China, situated at the confluence of the Hwa and Ko rivers, on a low site which is flooded every three or four years. The river is...
an artery of commerce for the provinces of Ngan-hwei and Ho-nan. Population 20,000. Station of the PN (1902), with 4 missionaries (2 with their wives), 1 woman missionary, 2 native workers, 1 hospital, and 1 dispensary.

HWANG-HSIENT: A town in the province of Shantung, China, situated about 50 miles N. W. of Chifu. Station of the SBC, with (1900) 7 missionaries, men and women, 1 of whom is a physician.

HWANG-YEN-HSIENT: A town in the province of Che-kiang, China, situated about 75 miles S. of Ning-po. Station of the CIM (1896), with (1903) 1 missionary and his wife, 2 women missionaries, 13 native workers, 12 outstations, and 1,019 professed Christians.

HWELI-CHAU-FU: A town in the province of Ngan-hwei, China, situated 97 miles W. by S. of Hang-chau. Station of the CIM (1884), with (1906) 1 missionary and his wife, 6 native workers, and 4 outstations.

HWEN-YUEN. See HUN-YUEN-CHAU.

HWO-LU-HSIENT: A town in the province of Chi-li, China, situated 218 miles S. W. of Peking. It is an important commercial center, lying at the foot of a pass over the Shan-si Mountains, by which the road leads to Tai-yuen-fu. Station of the CIM (1887), with (1903) 1 missionary and his wife and 1 woman missionary.

HWUY-CHAU. See HWELI-CHAU-FU.

HWUY-LUH. See HWO-LU-HSIENT.

HYDE, Rev. Charles McEwen: Born in New York, June 8, 1832. Died at Honolulu, October 13, 1899. Educated at Williams College and Union and Princeton Seminaries. He was ordained at Brimfield, Mass., in 1862, and was pastor there and in Haverhill until 1876. On May 31, 1877, he arrived at Honolulu. Soon after his arrival in the foreign field he took a prominent part in the mission work among the Hawaiians, and as a preacher, a teacher, and an organizer his influence was felt. He reorganized the theological school at the North Pacific Missionary Institute, and until his death he was a leader, especially in educational matters, on this important field. He labored effectively among the Chinese, Japanese, and Portuguese, as well as among the Hawaiians.

HYDERABAD. See HAIDARABAD.

HYDRABAD. See HAIDARABAD.

I

IAIAN LANGUAGE: A language of the Melanesian group, which is peculiar to Uvea, the most northerly of the Loyalty Islands.

IARINDRANO: A district in the province of Betsileo, Madagascar, lying south of Fianarantsoa. Mission field of the LMS (1864), with (1903) 1 missionary, 13 native workers, men and women; 4 day schools, and 2,744 professed Christians, of whom 351 are communicants.

IBADAN: A walled city in the Yoruba country, W. Africa, situated 83 miles N. E. of Lagos, with which it is connected by railway. Population, about 120,000. Station of the CMS (1852), with (1903) 1 missionary, 2 women missionaries, 11 native workers, men and women; 113 Sabbath schools, and 2,744 professed Christians, of whom 918 are communicants.

IBANG: A town in the Congo Free State, N. Africa, situated about 45 miles N. by E. of Luebo, at an altitude of about 1,000 feet. It is an important center of trade for the Bakuba tribe. Station of the PS (1897), with (1903) 2 missionaries, 1 with his wife; 10 native workers, men and women; 2 outstations, 2 places of worship, 1 day school, and 600 professed Christians, of whom 197 are communicants. Name also written Iban and Ibang.

IBO LANGUAGE: Belongs to the negro group of African languages and is spoken by an unknown number of tribesmen found in the Calabar region, between the Niger and Cross rivers in W. Africa. It has been reduced to writing by missionaries of the CMS, Roman letters being used for the purpose. Some beginnings of a literature have appeared.

IBUNO: A settlement in Southern Nigeria, W. Africa, situated on the Kwa Ibo River not far from the coast. Station of the Qua Iboe Mission (1887), with (1903) 1 missionary, 5 native workers, 3 schools, 1 dispensary, 1 printing house, 1 industrial farm, and 525 professed Christians. The mission has also a steam launch for river touring.

IBWJIJI: A settlement in German East Africa in the Chigogo district, not far from Mปพปива. Station of the CMS (1901), with (1903) 1 missionary and his wife, 3 native workers, 1 day school, 1 dispensary, and 20 professed Christians.

ICELAND: A large island in the North Atlantic Ocean, subject to the Danish crown, 160 miles northeast of Greenland and 600 miles west of Norway. Area, including adjacent islands, 39,758 square miles, of which 16,243 are habitable. Iceland is of volcanic origin, and therefore all its mountains are volcanoes. It is remarkable for its numerous geysers and intermittent hot springs. The climate is colder than when it was first settled, since great masses of ice yearly drift from Greenland to its shores and remain for months encircling the island in a compact mass. The Gulf stream makes the southern portion warmer and more rainy than the northern. Population (1901), 78,470, who are descendants of the first Norwegian settlers, speaking the purest Norse. The men are tall, fair-complexioned and blue-eyed, with frames hardened by frequent exposure to rough weather. They perhaps inclined to idleness and intemperance, they are strictly upright, truthful, generous, and hospit-
able. The women are industrious and chaste. Religious faith and the domestic virtues are traditional in every household. Education is universal, and it is hard to find an adult who is unable to read and write. Their church is exclusively Lutheran, but lately three missionary stations have been established by the Roman Catholics. Foreigners have the same rights of residence, holding property, etc., as natives.

ICHANG-FU: An important inland town and trading center of Hupeh, China, situated on the left bank of the Yangtse River, 165 miles W. of Hankow (363 miles by river). Lying at the outlet of the river after it has come 350 miles through mountain passes and rocky ravines, the town is exposed to considerable risk from floods, and in 1870 many houses were washed away. It stands at the head of steam navigation on the Yangtse, but access to it is so hampered by rocks that its value for foreign trade is slight. Altitude, 500 feet. Population, 33,000. Station of the Church of Scotland Foreign Missions and Woman's Committee (1878), with (1900) 10 missionaries, men and women; 14 native workers, men and women; 6 day schools, 1 hospital, and 206 professing Christians. Station also of the PE (1859), with 4 native workers. Station also of the CIM (1895), with (1903) 1 missionary and his wife. Station also of the Swedish Missionary Society (1894), with a dispensary and a day school.

ICHENG: A town in the province of Shan-tung, China, situated 220 miles N. by W. of Nanking. Station of the PN (1891), with (1903) 11 missionaries, men and women; 12 of them physicians; 5 day schools, 2 dispensaries, 2 hospitals, 1 medical class, and 364 church members. Name written by the Society Ichow.

IDAYANGUDI: A town and district in Madras, India, situated on the seacoast in the extreme south of Tinnevelly, about 40 miles S. W. of Tuticorin. The inhabitants are chiefly of the Shanar or Palmyra rearing caste, and poorer and more ignorant than those farther north. The majority became Christians early in the 19th century, but afterward, through neglect, were suffered to relapse into evil ways and heathenism. Station of the SPG (1825), with (1903) 43 native workers, men and women; 24 places of worship, 12 day schools, 2 high schools, and 3,882 professed Christians, of whom 791 are communicants.

IDUTYWA: A district or reserve in Cape Colony, S. Africa, situated in the Transkei region, some 70 miles N. of East London. Station of the SPG (1893), and the Episcopalian Church in Scotland (1896), with (1905) 1 missionary, 31 native workers, 17 outstations, 12 places of worship, 17 day schools, and 2,800 professed Christians, of whom 763 are communicants.

IGATPURI: A town in the Bombay Presidency, India, situated in the district of Nasik, 72 miles N. E. of Bombay. Population (1891) 7,500, of whom 4,800 are Hindus. Station of the MS; with (1904) 9 native workers, 1 preaching place, 4 Sunday schools, 1 day school, and 277 professed Christians.

IH-YANG. See I-YANG-HSIEN.
missionaries and Muslim doctors; received into the Church at Amritsar, April, 1866, and became the native preacher at Amritsar. He was appointed Examining Chaplain to the Bishop of Calcutta for Hindustani candidates, and afterward became Chaplain to the Bishop of Lahore. In 1884 the degree of Doctor of Divinity was conferred on him by the Archbishop of Canterbury, and his pen produced the following works: *Hidayat-ul-Muslimeen; Haqiqat, being 12 tracts on the Christian Religion; A Short Commentary on the Book of Revelation; A Popular Life of Mahomet; A Tract on the Resurrection; A Commentary on St. Matthew’s Gospel,* and a number of other able works.

As a young man Imad-ud-din was full of Muslim bigotry and fanaticism, and he was arrayed against Dr. P. F. and Mr. French in their famous discussions with Mohammedans at Agra. It was a wonderful time. The mutiny had yet to come, and the city had yet to be humbled, politically as well as spiritually. The old confronted the new, and who could foresee that three out of the four leading opponents of Christianity would one day bow the knee to the Christ they then despised? The fourth, Maulvi Raimat Ullah, a close friend of Dr. Imad-ud-din’s, fled to Mecca after the mutiny and there died. The history of Imad-ud-din’s struggles before he accepted Christianity is one of thrilling interest. Learned in all that Islam had to teach and soul-hungry for something higher, he turned to that eucharistic philosophy, which as the Vedanta, and as Sufism, the Transcendentalism of the East, purports to offer to the longing soul the peaceful vision of God and communion with Him. For many months he obeyed its precepts and sounded its lowest depths, and finally, worn in body and wretched in soul, he was brought under the influence of Rev. Robert Clark in the Mission Church at Amritsar, where he surrendered to the call of Christ, and from that time throughout his long and eventful life he never wavered in his loyalty to his divine Master. This distinguished convert from Islam to Christianity was a preacher as of the Gospel; but he was a more remarkable writer of Christian truth. A long series of volumes, dealing with every type and phase of Mohammedan controversy, came in rapid succession from his pen, and his books have found their way to all Mohammedan lands, and their effect has been felt in places as far apart as Java and Montenegro. He had the joy of seeing his aged father and younger brother enter into the Christian life.

**IMPOLWENI:** A settlement in Natal, S. Africa, situated 12 miles N. N. W. of Pietermaritzburg. Station of the UFS (1872), with (1903) 1 missionary and his wife, 5 native workers, 2 outstations, 6 day schools and 381 professed Christians.

**IMPUR:** A village in Assam, British India, situated in the Naga hills, near the Burman frontier. Station of the ABMU (1876), with (1903) 3 missionaries and their wives, 15 native workers, men and women; 8 preaching places, 9 day schools, 1 boarding school and 467 professed Christians.

**IMVANI:** A settlement in Cape Colony, S. Africa, situated in the Queenstown district, about 20 miles S. E. of Queenstown. Station of the Episcopal Church in Scotland (1854), with (1900) 2 missionaries, 1 woman missionary, 47 native workers, 10 outstations, 12 schools and 620 professed Christians.

**INDIA:** A region of Asia between the Himalaya Mountains on the north, the Arabian (or Indian) Ocean on the west and southwest, and the Bay of Bengal on the east. Its extreme northern point is in latitude 35°; on the south it stretches to within 8° of the Equator. North and south its greatest length is about 1,900 miles; east and west—from the mouth of the Indus to the head of the Bay of Bengal—the distance is about as great. Yet the shape of the land is not four-sided, but triangular; its northern parts are the broadest; toward the south it narrows gradually to a point at Cape Comorin. Politically, Assam and Burma, on the east, the people of races bearing slight affinities with those of India proper, and Baluchistan, on the west, are comprised in the Anglo-Indian empire. The area of the whole vast territory is nearly one and a half million square miles, and the population (according to the census of 1901, the last taken, which will be the basis of reference throughout this article) more than 224,000,000. Three well-marked areas, each characterized by its peculiarities of physical structure, divide India proper between them. These are: 1. The Himalayan strip, lying along its northern frontier, and forming on that side a wall of protection and demarcation from the rest of Asia. Much of the Himalayan territory, however, is outside of the political limits of India. 2. The great valley of the Ganges, of which the Himalayan area forms the northern slope. 3. That part of India bounded on the north by the valley just mentioned, on the southwest by the Indian Ocean, on the east by the Bay of Bengal. This is for the most part a tableland, broadening gradually toward the south, and butted by the mountain range (the Western Ghats) rising in some cases to 4,000, 5,000 and even 8,000 feet above sea-level, is about 2,000 feet above the sea, and slopes gradually eastward toward the Bay of Bengal. India presents to our observation not a united and coherent nationality pervaded by the oneness of a national life, but merely a vast number of peoples, differing in language, in religion, often in race, and held together by the strong and external pressure of British might. Physically also, the India can hardly be called a continent, yet it is certainly the epitome of a continent on a very large scale. Vast mountain chains and mighty rivers, arid deserts and fertile valleys, wild jungles, forests of tropic density, broad alluvial deltas, and plains rolling in gentle undulations over wide areas of surface, are all found within its limits. Its climate, too, varies from the Arctic cold of the Himalayas, with their perpetual snows and their glaciers, which feed fertilising and navigable rivers, hot desert winds, deluging rains, atmospheres now like a vapor-bath and now like a blast from a furnace, bracing breezes from the sea, and the parching heat of unclouded suns falling upon treeless plains.

This vast and various territory is for the most
part under the rule of the British crown and Parliament. In many scattered portions of Indian territory the original power of native rulers is still acknowledged; these states sometimes cover large tracts of country, with their millions of inhabitants, and sometimes embrace but a single town, with its dependent villages, or a bit of mountain jungle where the authority of some half-savage aboriginal chief is owned by the handful of his tribe. But even these native states are subject to the power and watchful care of the paramount English power; the authority of their ostensibly independent native rulers is circumscribed within definite limits at the dictation of that power, while its actual exercise is carefully superintended, with more or less minute-ness of detail, by English officials appointed for that purpose.

Political Divisions: Such a diverse territory can be best described in the present work by treating of its separate political divisions in their proper alphabetical order under separate headings, with the exception of the native states, all of which come more or less directly under the supervision of the paramount power through a class of officials known as "residents," all of India is governed, in the name of the British sovereign, by a Viceroy, or Governor-General, assisted by a Council, whose seat is at Calcutta. For purposes of administration the country is divided into eight great "provinces," each under the control of a governor, lieutenant-governor or commissioner, according to rank of the province. The provinces are: Madras, Bombay, Bengal, United Provinces of Agra and Oudh, Punjab, Burma, Assam, Central Provinces. In addition to these provinces there are four "minor charges," each under a Chief Commissioner. These are Coorg, Ajmere-Merwara, British Baluchistan and the Andaman Islands. The Northwest Frontier Province, with seat of administration at Peshawar, is administered by a military officer whose title is Agent to the Governor-General.

Population: The people of India, with whom in their religious relationships our interest now principally lies, are divided by race, by caste, by language, and by religion into many different classes. The broadest division is that by religion. The census of 1901 shows the distribution of the population according to religion (including the native feudatory states) to be as follows: Of the 294,233,345 souls comprised in the total population of the Indian Empire, 207,146,422 are classed as Hindus; 62,458,061 as Mohammedans; 9,476,750 are Christians; 2,195,268 are Sikhs; 294,233,345 souls comprised in the total population of the Indian Empire, 207,146,422 are classed as Hindus; 62,458,061 as Mohammedans; 9,476,750 are Christians; 2,195,268 are Sikhs; 2,923,241 are Parsees; 2,686 are of other shades of belief. Among these classes the names of the old titles still exist of Kathatriyas and Vaisyas. The Rajputs of Northwestern India are descendants of the old second or soldier caste; the merchants (in many places known as Wanz or Banyas) may usually be regarded as belonging to the old third or merchant caste; the subdivisions are exceedingly numerous. Thus, while in the old nomenclature still exists with reference to the Brahmanas and the Sudras, it has been for the most part superseded with reference to the soldiers and the merchants, owing to the divisions of these old castes, and the origin of new, as the development of Hindu society progressed. In addition to the classes already mentioned, the followers of every species of trade and handicraft form a caste by themselves. Thus there is the caste of goldsmiths, of tailors, of carpenters, of blacksmiths, of weavers, of shoemakers and leather workers, of potters, etc. Some of these castes occupy a position above the Sudras; some, especially the shoemakers and potters, below them. Below all these respectable castes of Hindism are ranged the great body of the outcaste population, who are not allowed to live within the village limits, who are sometimes debarred even from entering the street in which Brahmanas reside, who must not draw water from the wells or streams used by those of higher rank, and whose very touch (often the offspring of such marriages occupying a social position midway between that of their parents), and partly due to the inevitable complication of social relations, as the process of social evolution went on. Among this mass of caste names the old titles still exist of Kathatriyas and Vaisyas. The Rajputs of Northwestern India are descendants of the old second or soldier caste; the merchants (in many places known as Wanz or Banyas) may usually be regarded as belonging to the old third or merchant caste; the subdivisions are exceedingly numerous. Thus, while in the old nomenclature still exists with reference to the Brahmanas and the Sudras, it has been for the most part superseded with reference to the soldiers and the merchants, owing to the divisions of these old castes, and the origin of new, as the development of Hindu society progressed. In addition to the classes already mentioned, the followers of every species of trade and handicraft form a caste by themselves. Thus there is the caste of goldsmiths, of tailors, of carpenters, of blacksmiths, of weavers, of shoemakers and leather workers, of potters, etc. Some of these castes occupy a position above the Sudras; some, especially the shoemakers and potters, below them. Below all these respectable castes of Hinduism are ranged the great body of the outcaste population, who are not allowed to live within the village limits, who are sometimes debarred even from entering the street in which Brahmanas reside, who must not draw water from the wells or streams used by those of higher rank, and whose very touch, some even whose offspring, is pollution. Yet they often perform important services in the social life of an Indian village. These outcasts are often spoken of collectively as Pariahs—which is the term used to designate them in Tamil—though all the Indian vernaculars possess words by which individuals of this description are locally denominated. The origin of the caste system is lost in the dimness of remotest antiquity. It is probable that it originated in some such way as this: The Aryans, who entered India from the Northwest some fifteen centuries before the Christian era, found the land as they advanced already in the possession of a previous population. This population, the Aryans with their stronger character, higher civilization and more cultivated language (the Sanskrit), in process of time overcame. Gradually the diversity of races or principalities that occupied the highest place; the second caste is that of the Kathatriyas, or soldiers; merchants, or Vaisyas, form the third; while the fourth, including the vast body of the people, is that of the laborers, or Sudras. In modern times, however, this should follow the handyman; the oldest and most complicated. The Brahmanas still maintain their preeminence as the first and highest caste, alo
degree—the in an inferior form and with many corruptions—the language of their Aryan conquerors has been reached by the lowliest to the lowest position in the social scale, that of laborers or agriculturists. Thus the three higher castes were of Aryan origin, while the fourth or Sudra caste, between which and the three that range above it there is a much wider gap than between any two of the higher themselves, was composed of the great body of the previous population. It is probable that the outcaste bodies (Pariaks, Mahars, Mangs, Dheds, etc.) represent early aboriginal tribes, brought into some degree of union with the new social organism arising after the Aryan invasion, but too low to become actually incorporated in it, as members in good repute, as those composing the fourth Hindu caste were. Probably the tribes still existing apart and usually spoken of as aboriginal tribes (Santals, Gonds, etc.) are descendants of tribes who refused to yield to the Aryan invaders, or to accept the low position to which their brethren—the progenitors of the outcastes of to-day—were consigned.

Languages: It is exceedingly probable that the tribes which were thus overrun by the Aryans had themselves overrun, in previous ages, still other and inferior races who held the soil before them. Repeated invasions and conquests must have marked the earliest history of India, as they have its later developments; and these repeated processes of invasion have left their evidences in the strata of tribes and races which to-day make up the complex population of Hindustan. Not only can the diversity of caste be in part accounted for in this way, but also the great diversity of language which characterizes India. It is stated by philologists that within the limits of both Hither and Farther India (meaning by the last term that peninsula which includes Burma and Siam, of which only a part is politically connected with the Anglo-Indian empire) three hundred distinct languages and dialects are in actual use at the present time. The variety of the aboriginal tribes already many times alluded to, of which each one has usually its own distinct form of speech, accounts in large measure for the great number. The principal languages of India, each of which is spoken by millions, and which have all received more or less literary culture and development, are much fewer in number.

The Indian languages can be conveniently distributed into several groups, according to their affinities. The first division consists of the most important tongues used in northern and western India. These are: The Bengali, spoken in the province of Bengal by about 8,000,000 of people. The Hindi language, occupying an immense tract northwest of Bengal, covering the North India (excluding the Himalaya and the Punjab), which is the country lying on every side into the surrounding regions, is the most widely used tongue of all of the modern languages of India. The number of those to whom it is vernacular is estimated at 80,000,000. More than half of these, however, use the Hindustani of Urdu, which is the dialect formed by the Mohammedan conquerors of India, with many Arabic and Persian words and written with Arabic instead of Hindu letters. Other dialectic variations are numerous. The Bengali, the Urya, the Assamese, the Hindi, the Sindhi, the Gujarathi and the Marathi, with their many dialects, are sister-tongues of the Aryan family, the incorporating into their substance many elements of grammar, of idiom, and of vocables from the non-Aryan languages with which the spoken Sanskrit of ancient period gradually became corrupted. Of these Aryan vernaculars only three—the Bengali, the Hindi, and the Marathi—have received any high degree of cultivation, or possess any important literature. It is possible that the other languages of this group will one day disappear; but these three are widely prevalent and cultivated tongues, which seem destined to permanence.

The Hindu population of South India presents us with the second great family of languages, much farther removed than those of the north and west from the Sanskrit, and owing to it smaller—the important obligations. These languages are usually spoken of as the Dravidian group. The term “Dravir” or “Dravida” is found in Sanskrit literature as applied to the chief of the Indian peninsula where the chief languages of the group are now spoken. The most important of them all is the Tamil, covering the area from a few miles north of the Mădras to the extreme south of the eastern side of the peninsula, and running more than half the distance around the peninsula toward the Indian Ocean. North of the Tamil area, on the east side of Lower India, lies the Telugu country, along the Bay of Bengal, and up into Central India, until it meets the Urya language along its northern border and the Marathi along its northwestern. West of the Tamil and Telugu areas lies that of Kanarese, which also meets the Marathi on the northwest. The Malayalam stretches along the western coast of India from Cape Comorin northward nearly 300 miles. The Tamil, the Telugu (sometimes from its abundance of vowel and liquid sounds called the Indian Italian), the Kanarese, and the Malayalam are all cultivated languages, possessing a literature and a distinctive alphabetical character. The Tamil is by far the most important and richest of them all, and is used by the largest number of people—nearly 15,000,000 in all. Tamil is also used extensively in Northern Ceylon, and by many emigrants to Burma, the Straits Settlements, Mauritius and the West Indies.

Besides the cultivated language of the Dravidian group just described, languages of the same family are used by some of the jungle tribes of India, as the Gonds and Khonds, the people of Chota Nagpur and of the Nilgiri Hills and some others. The total number of persons using Dravidian forms of speech must be more than 60,000,000.

Religions: Regarding the religious condition of
India

THE ENCYCLOPEDIA OF MISSIONS

324

the people, it will be sufficient to refer the reader to several articles in this work in which the different religions practised in India are treated in detail; with the remark that for the most part the people cling to those religions with the tenacity—often an unthinking tenacity—which is to be expected of those who have been educated from their earliest years to observe that adherence to the customs of one's ancestry, and to the religious rites practised by one's forefathers, is the first and highest law of life. In them the intense conservatism of all Oriental nations is thus reenforced by religious sanctions, and is exalted to the position of religious obligation. Hinduism has been interwoven with the developing life of the Hindu people for a period of more than thirty centuries; it has previded over the formation of their philosophies, their social customs, their intellectual habits, and in literature; and it lies at the very basis of their lives in all possible relations to a degree which is hardly paralleled elsewhere. These facts account for the extreme difficulty and slowness of Christian progress among the Hindus. The Mohammedans in India do not despise their religion from ages so remote as the Hindus, and on this account their momentum along the line of present religious development might be supposed to be less, yet they show fully as much determination in upholding their peculiar tenets as the Hindus do in theirs; they are characterized by the same intense conviction that they are God's chosen people, commissioned to take and purify the earth, which has made Mohammedan armies so often victorious in battles, which renders them immeasurably more impervious to temptation and reason, and even leads them to deeds of private, personal violence in support of their faith.

Civilization: The people of India have their own civilization developed gradually through long ages of progress, different from that of the West, yet wonderful to contemplate, and in many respects admirable. The main resource of the people being agriculture, the process of tilling the soil and making it yield its wealth have been carefully studied; and the implements are clumsy and their methods those of a bygone age, to which they still cling with that tenacious conservatism which they show in everything, yet the results of their efforts are by no means contemptible. They have especially constructed immense tanks and reservoirs for storing water and complicated sluiceways and canals for distributing it in the dry season over their fields, which in size and utility are remarkable. These are found chiefly in Central and South India. The English Government has done much to extend facilities for irrigation by the construction of costly systems of canals, fed by the rivers, whose waters are diverted into them by finely constructed dams. Such works exist in all parts of India, and the canals are sometimes of sufficient size to be available for purposes of navigation. Their manufactures—the entirely by hand—especially of certain fabrics, such as cottons, as also of jewelry and brass ware, have long been famous in the markets of the world. In the development of social and political life they have wrought out a system of efficient communities, the different classes of which have been the subject of careful study by European lawyers and historians. Its object, in a word, was to make each village self-supporting and independent, furnishing it, within its own walls and by means of its own organism, with farmers, artisans and day-laborers, in sufficient number, variety and proportion to provide everything within the province of ordinary use—both clothing and implements of every sort—which the village could need; while the public affairs of every village were regulated, and all disputes between villages settled, by the best educated and elders of the village, whom long usage had relegated those duties. In literature the Indian civilization has given to the world the Sanskrit language—one of the most copious and highly polished tongues with which scholars have ever become familiar; poetry and philosophy have been especially cultivated; to some degree also mathematical and astronomical science. In geography but little has been done, in history nothing; in fact the historic sense seems to be largely wanting in the Indian mind. Their achievements in art are confined chiefly to the department of architecture; in painting they have done nothing; in sculpture they have merely succeeded in fashioning images of their gods and heroes of a character hardly rising above the level of caricature, and sometimes falling to that of absolute hideousness; sometimes the sculptures of a cave temple (for instance that of Elephants in Bombay harbor) will be found to possess a considerable degree of dignity and artistic excellence. But such exceptions to the general character of grotesqueness are not frequent. Numerous temples—some cut from the solid rock; some built of stone with neither mortar nor cement; some whose towers arise to imposing heights, like those of Southern India; some merely stone-built shrines, a simple cube with a pyramidal roof; some built last year, and others in various stages of decay attesting their foundation centuries ago; some covered with rudely fashioned images of gods and of animals esteemed sacred, oftentimes in various obscene attitudes; and some wholly plain, and with no attempt at ornament—are the sole creations of their architectural skill. In music the Indians have perfected a system of their own, with notation, time, and intervals different from those of Western music, wholly destitute of harmony, yet not without a certain plaintive beauty in its melodies. Their singing is apt to be rather nasal, and their instrumental music seems to a European nothing but a discordant clamor of drums and screeching of shrill wind-instruments; but some of the stringed instruments in use among them are more pleasing in tone. For a long time the associations of Hindu music, being almost wholly those of the Hindu temple, and the Hindu festival were considered insuperable objections to its use among Christians. But of late years, in more than one part of the great Indian mission field, native poets have arisen, who have composed Christian hymns in the meters of Hindu prosody and have adapted them to such Hindu melodies as seemed best fitted for the purpose. In many churches of Indian Christians these hymns and tunes are now used with most excellent effect.

Preachers and evangelists in the basars and villages find many of these native tunes with Christian words most useful in gaining the ear of the people for the proclamation of Christian truth. This conversion of Indian poetry and song to the use of the Christian church was a decided step of progress in the work of naturalizing Christianity among a people the essential genius of whose mind seemed in some respects ill adapted to receive it.
It is difficult to describe in a few words the intellectual condition of the Indian people. In some respects, and among certain classes, an intellectual cultivation has existed for centuries whose twofold result is seen to-day, in a keenness of mind and a faculty of profound speculative thought which is remarkable, in the philosophical treatises, the commentaries upon them, the hymns and the poems which compose the body of Hindu classic literature. On the other hand, the people as a rule are unable to read, and are content to live on, generation after generation, with no intellectual progress, content if they get rice or other grain enough to keep them from starvation, and careless of mental or spiritual sustenance. It is among the Brahmanas that the intellectual cultivation of India has reached its fullest result. They have been not only the priests, the religious leaders of the people, but also the creators of its intellectual, philosophical and literary development, and the depositaries of its intellectual wealth. With the exception of an occasional lyric poet arising from among the lower orders of the people, whose homely verses in the vernacular of his own district would often obtain an immense currency and exert a vast influence, especially over the class from which the poet himself had sprung, nearly all the thinkers, students, and authors of India have been Brahmanas. The elaborate grammar of the Sanskrit language is due to their assiduous cultivation; Indian theology, philosophy, poetry, and science have been developed almost wholly by them. The Brahman intellect is keen, acute, subtle, and speculative; but their logic is apt to be fallacious and their argumentation specious rather than profound and thorough. The education of the merchant class consists of but little else than reading, writing, and such practical operations of arithmetic as will make ready and correct accountants. The royal and soldier castes have been apt to adopt a lofty contempt for all literary accomplishments, as things fit only for Brahmanas; and have paid the penalty of their folly in many a case by being compelled to employ Brahman secretaries, prime ministers, and soldiers, or else sunken in ignoble debauchery. The great masses of the people are not to-day, and never have been, able even to read their own vernacular; thus they have become on the one hand the dupes of a crafty priesthood and on the other the prey of cunning money-lenders. They have no written history. But the caste authorities. Intemperance is not a vice of the Hindu people, the introduction of cheap foreign liquors, often miserable adulterations, and the course of the government in licensing drinking-places, has stimulated the use of intoxicating liquors among all classes. The disposition of the people is mild, and crimes of violence are not more common among them than among the people of other races. The ranks of the professional thieves and bandits are largely recruited from certain of the wild jungle tribes, who have been robbers from time immemorial.

Modern History: The Aryans, entering India some twenty centuries before Christ, gradually extended themselves—first through the valley of the Ganges, then into Southern India. They have left behind them no written history. But the Hindustan princes of various families founded dynasties and ruled over realms of greater or less extent, until they were in turn reduced to submission by the Mohammedans. These fierce and relentless conquerors entered India through the same northwestern door as those who had preceded them. The year 1000 may be taken as marking approximately their first appearance in Hindustan. Mahmoud, King of Ghazni, a city in Afghanistan, was the first Mohammedan leader to undertake the conquest of India. He made twelve expeditions into the country—the first a few years before the approximate date given. Mohammedan power slowly grew; one dynasty after another continued the work of invasion, until first the Punjab, then the Ganges valley, and at last all of India was reduced to Muslim sway, tho the country was never long at peace. Rebellions were constantly keeping the Mohammedan upstarts, sometimes by a Hindus whose limbs were galled by the chains of Muslim rule. In the middle of the 17th century
a Mahratta chieftain named Sivaji consolidated into a formidable power the strength of the Mahratta race and made great inroads upon the power of the Mohammedans. He overran all India, and desolation followed in his train. His power was broken at the battle of Pannipat, near Delhi, in 1761, when they contended unsuccessfully against an army led by Ahmed Shah of Afghan-

The English came to India very early in the 17th century, first as merchants in a small and humble way. Their mercantile operations were conducted by the East India Company, whose original charter was signed by Queen Elizabeth, near the close of her reign. Little by little their power and the scope of their influence extended itself. Establishments, or "presidencies," defended by forts and armies, under the command of this company of merchants, were placed at Madras, at Calcutta, at Bombay. From these points the authority of the Company silently but steadily grew. When the Mahratta power fell in 1761, the English were already strong enough to step into the first place of power in Hindustan; in fact, the question of English supremacy in India, carried desolation wherever he went, was broken at the battle of Pannipat, near Delhi, in 1761, when Clive defeated the troops of Suraj-ud-Daula, the Mohammedan ruler of Bengal. From these small beginnings and along a path providentially prepared for them by the fall of the Mahrattas, the only native race capable of offering an effectual resistance, the East India Company proceeded to its manifest destiny of absorbing and ruling—not as merchants, but as conquerors and princes—the whole of India. When the great mutiny of 1857 burst upon India—a movement fomented among the native troops in the employ of the Company, and used by certain dispossessed heirs of old Indian princes in the hope of destroying the English supremacy, and regaining the lost control of their own land—English power for a moment trembled; but the result of the mutiny was merely the transfer of the supreme power in India from the hands of the East India Company to the direct control of the British crown and Parliament.

More and more have the English rulers of India realized that they have a duty and mission to perform in that land. They have governed the country with a stern and rigorous justice, with a benevolent and paternal despotism. If they have not always been conciliatory toward the natives, and have failed largely in winning the love of the subject races, they have always respected their just rights and integrity, and their rule has been prized for the good order, the peace, the prosperity, which they have given to the country. They have encouraged and fostered education; they have established post-offices, post-roads, railroads, telegraphs; they have developed agriculture, manufactures, and commerce; they have provided hospitals and medical treatment for the diseased, and have fed the multitudes in time of famine.

Missionary work in India is carried on under the strong protection of a government, which, while religious matters, undertakes to assure to every one religious liberty, and to protect all in the exercise of it.

Christianity in India: While we may regard the tradition that the Apostle Thomas introduced Christianity in India during the 1st century as unauthentic, we know that a representative of the Christian College at Alexandria found Christians on the Malabar coast before the close of the 2d century who were in possession of the Hebrew Gospel of St. Matthew, and we learn that a Bishop of India was present at the Council of Nicea in A.D. 325. In the 6th century Syrian missionaries of the Nestorian faith propagated the Gospel in India, and Christian churches still existed on the Malabar coast and in Ceylon. From the time of Marco Polo's visit to India, in the 13th century, when he reported seeing Christians at many points where he touched, until the dawn of the 19th century, when the era of modern missions began, nearly every century witnessed earnest work by Roman Catholic missionaries in India; but in the 18th century Christianity had comparatively few consistent followers in the land.

The King of Denmark began the work of evangelical missions in India. Bartholomew Ziegenbalg and Henry Paltzschau, Germans from Halle, who were sent out by Frederick IV. of Denmark, reached Tranquebar, a Danish possession, in 1700; and they may be regarded as the pioneers of the great missionary host that wrought so faithfully during the following century for the redemption of this great land.

The details of the modern missionary history of India must be sought under the titles treating of the several districts, races and missionary societies in this land; but here we may appropriately refer to the following interesting facts: As to the societies doing Christian work in India, America furnishes 35; England, 34; the Continent, 9; and the international societies and missions from other lands number 15. We are witnessed by the words of Sir William Hunter in his work, The Indian Empire: "Between 1851 and 1890 the number of mission stations increased three-fold, while the number of native Protestant Christians has multiplied more than five-fold, the number of communicants nearly fifteen-fold and the number of churches or congregations sixteen-fold. This was largely due to the extended employment of native agency in the work. The native ordained pastors increased from 21 in 1851 to 797 in 1890, and the native lay preachers from 493 to 3,491."

The Statesman's Year-book gives the following facts concerning education in India: Number of educational institutions, March 31, 1901, 147,344, of which 62,039 are private and unaided; scholars under instruction, 4,417,422; number of colleges, 7,528. The numerical increase of the evangelical forces in India during the last decade of the 19th century should inspire gratitude and kindle hope.

We may hope for far greater blessings than these to come to India during the opening decade of this century of our Lord: but if the percentage of increase is equal to that of last decade the year 1910 will witness a Protestant community
of more than one million and a quarter in this great empire.

INDIAN HOME MISSION TO THE SANTHALS (1867): This Missionary Society is not indigenous in India and its title may mislead some. It should therefore be noted at once that the Society is to be reckoned among Danish Missionary Societies. It was founded in 1867 by the Rev. H. P. Boeersen of Copenhagen and the Rev. L. O. Skreslet. The last named missionary, who is a Norwegian, was sent out under the Gossner Society in 1863, and Mr. Boeersen went out the following year with the intention of joining him in the Gossner Society at Cuttack, Orissa. After finding the situation such as they had expected, they, before long, withdrew and began an independent work among the Santals, their design being to set up a "Home" which should be a center of all those influences which flow from the home. The first three Santals to be converted were baptized in 1859, one of whom was afterward ordained. Schools were established and the pupils brought to the Middle-vernacular standard, while also receiving manual training after the custom of the people. In 1880 a colony was started in Assam for Christian Santal emigrants, the soil being more fertile than in Bengal; in 1890 the mission purchased a tea garden near the colony for its benefit. The Ebenezer Missionary Society supports a work at Dinapur, fifty miles distant, in the care of native helpers. A mission press has been established at Ebenezer, from which a monthly paper, The Friend of the Santhal, is issued, and school books, hymn-books, the catechism and other Christian literature have been printed. The Gospels have for some time been in circulation, and the whole Bible is now being printed at the expense of the British Bible Society.

In 1902 there were 10,600 baptized Santals connected with this mission. There are 5 stations, 15 outstations, 5 missionaries, 46 native helpers, 9 day schools, with 375 pupils. The support of the mission comes partly from tea plantations (in 1902 the tea culture brought in 30,000 rupees), and in the main from collections. British Bible Society.

INDORE: A town and capital of a district in the native State of Bhopal, in the Indian seas, situated 35 miles N. by W. of the city of Bhopal, Station of the WMS, with (1903) 1 missionary and 7 native workers, men and women. Name written by the Society Indur.

INDORE: The capital of the native state of Indore, and Residency of the Governor General's Agent for Central India. It is situated 107 miles W. S. W. of Bhopal, in a high region, at an altitude of 1,750 feet. Population (1891) 83,000, of whom 60,000 are Hindus, 18,000 Mohammedans, and 2,500 Jains. Station of the PCC (1877), with (1903) 10 missionaries, men and women, 2 of whom are physicians; 2 dispensaries, 1 hospital, 1 orphanage, 1 mission home, and 1 college affiliated to Calcutta University.

INDRAMAYU: A town and seaport on the north coast of Java, Dutch East Indies, situated at the cape of the same name, about 105 miles E. of Batavia. Station of the Netherlands Missionary Union (1864), with (1900) 1 missionary. Name written by the Society, Indaramajo.

INDUSTRIAL MISSIONS AID SOCIETY: This Society was established in London in 1897 by Mr. W. H. Fry, and marks a wider effort in industrial missions. The Society proposes to develop the industrial element in missionary operations by associating, where practicable, agriculture and other industries with the work of Foreign Missions, financially separate, but linked in close fellowship. The Society supports industries at Ahmednagar for the manufacture of rugs, metal work, etc., thus giving employment to those trained in the mission orphanages and schools and to other Christians. It plans to do for missions generally such a work as the Basel Industrial Committee is doing for the adherents of the Basel Missions. It has sent out to India a skilled operator, whose business it is to study Indian products and the world's markets that he may advise wisely regarding the articles to be produced by industrial schools and plants, and be able to market the output to advantage. An organization having a similar purpose and called the Foreign Missions Industrial Association has been organized by Mr. Fry in New York. It was incorporated early in 1904, and has in connection with it a Ladies Auxiliary Committee.

INDUSTRIAL TRAINING IN MISSIONS: Industrial education and training institutions have a growing place in missions because they are found to supply economic and moral deficiencies and necessities of converts, and to be an effective instrumentality for the Christian regeneration of heathen communities. These economic necessities of the convert are due, for one thing, to his isolation. By alloying himself with the new religion, he cuts himself off from his family, his tribal relations and rights, his interest in common land, cattle, implements, and cooperative business enterprises; he loses caste; he is precluded from all low and immoral occupations, from parasitic dependence upon a rich or high-caste master, and from the priesthood and all the occupations associated with idols, superstitions and heathen-worship. Because of the ill-will of his former coreligionists, he is usually at a disadvantage in legitimate lines of trade and adventure. He is further assisted also and given an impulse by the adoption by the society of responsibility for his condition. Not only so, but new
wants and necessities are the speedy fructification of the Gospel. Decent clothing instead of a loin cloth, decent housing instead of herding in a one-room hovel, care for health through sanitation and medical treatment, education for the children, a Bible, and at least a few masters as ways essential to him as a man and a Christian. He may be unable to meet the expense of the old grade of living; much more is he helpless before that of the new ideals, which the missionary has inspired. Either the essentials of decent life must be supplied him as a gift to the sapping of his manhood, and to the increasing burden of missionary treasuries, or the way must be opened for him to earn that whereby he may pay for them himself; and, more than this, he ought to be earning something for the extension of the kingdom among his own people.

The embarrassment is greater still in the case of the thousands of orphans whom Christian charity has compelled the missionaries to shelter during famine, persecution, or other disasters, and whom they cannot turn out again to die. How shall they be supported, and what shall they do while it is time for them to leave the orphanage? In the first stage of missions, when converts are few, the most of them may be utilized as servants or helpers of the missionary and as Christian workers; but all are not fitted for such service; false hopes are generated by the system, and as the Christian community grows larger, the proportion that can be thus provided for becomes smaller. The demand for clerks, teachers and the like is very limited in most missionary lands, and in India the multiplication of over-educated non-producers is the cause of the alarms to the authority. Under such conditions restlessness and discontent are a natural result. Industrial helplessness is settling down upon the Christians of India.

 Educational Value of Manual Training: The solution to which the working missionary early in his ministry reluctantly came, was that industrial education and work must be provided; and the theory of missions has been adjusting itself more slowly to a like conclusion. This conclusion would have seemed to impose an intolerable burden, had it not been soon discovered that not only the most fields is not that of finding preachers and pastors than it is of developing thrifty laymen to support them. Nor does the time given to manual labor hinder general education. Government examinations in India and South Africa show that pupils in schools with industrial courses are on a level in literary attainments with their competitors from purely literary schools, the time given to manual labor compensated for by the greater alertness and application of the industrial pupil. The same testimony comes from the schools for the American negro.

 The Growth of Industrial Training in Missions: Under the impulse of such motives manual industry has always had some place in the history of missions. Our Lord and His apostles honored labor and were mindful of the physical and material welfare of their followers. The early missionaries to the new Christian countries of Europe were pioneers of industry as well as of religion, introducing the ideal of peaceful toil in settled homes as an offset to the wild life of adventure and rapine, which was the ideal of early barbarism. The Moravians from the first sent out artisans as well as teachers, and the methodical societies were getudial, needing artisans, on the same principles as that of the British and American in Industrial mission work. Care was supposed that missionaries could support themselves, and so set an example to their converts; a larger proportion of the earliest missionaries of the London Missionary Society also were artisans. Missionaries have been ahead of educationalists at home in their appreciation of the value of manual training, household industries being a usual feature of the earliest girls' boarding schools. Cyrus Hamlin, with his bakery and his stove and rat-trap factory, was a generation in advance. Lovedale in Africa had been doing its work for the negro some twenty years before Hampton was founded by Gen. Armstrong, himself the son of a Hawaiian missionary.

 Much of the industrial work of missions has been begun without aid from the boards at home, the cost incurred stirring up the spirit of those who saw the need of this form of effort. Up to the year 1880 but 29 industrial schools and classes were reported in the whole field of foreign missions. By 1890 there were 55. In his "Centennial Survey" (statistics to
1900) Dr. Dennis reports 179 industrial institutions and classes with 9,074 pupils, of whom 6,622 were males and 2,452 females. Of these schools 63 with 1,845 pupils were in Africa, and 62 with 5,288 pupils in India and Ceylon. Since 1900 the number of such industrial enterprises has grown more rapidly. Husband's Protestant Mission Directory for 1902 enumerating 87 missionary institutions in India and Ceylon in which trades were taught.

_Nature of the Existing Industrial Enterprises:_ These may be loosely classified as follows: (1) Schools with industrial features whose chief object is discipline and self-help. An increasing number of orphanages and boarding schools are of this sort. At the Ecumenical Conference of 1900, Miss Barnes described such a school in India, in which the girls cultivate the cotton, spin the cloth, make their clothes, tend garden, cook, keep house, and take care of the clothing, food and health of the younger children, at the same time heading the schools of the district at the Government examinations. The Ramabai schools and orphanages at Poona and Mukti are of this class. The girl graduates of such schools are in demand as wives and are a power in domestic and social regeneration. (2) Schools where trades are taught, aiming not only at a disciplinary education, but to fit the pupil for a definite life work. They require a larger equipment and expenditure. Of these, the UPS institution at Lovedale, S. Africa, is one of the oldest and most useful. Normal and theological, as well as industrial, courses are maintained, but all the students are given careful instruction in ordinary school studies and in religion, and all are required to do some kind of manual work as a discipline and contribution to self-support. Its enrollment includes pupils from almost all the South African peoples, as well as Dutch and English, and from all denominations, the unsectarian character of the instruction being carefully guarded. The school receives support from the missionary funds and from government grants. A full course is given in printing, book-binding, blacksmithing, wagon-making, basketry, carpentry, farming, telegraphy, and domestic science. At least eighty per cent. of the 2,000 who have received its training have led useful lives; very few have reverted to their former conditions, and the majority have proved strong, energetic Christians. A large proportion of the present pupils are children of the Christian negroes whom Lovedale taught a generation ago. Blythswood Institution, also in S. Africa, is an offshoot, and Livingstonia, in Nyasaland, owes much to its assistance. Another typical trade school is the Lutheran Industrial Mission at Muhlenburg, South Africa, in whose well-ordered settlements the freed slaves, in whose well-ordered settlements the freed slaves of 1885 were received, cared for, fed, and work and weaving, are further examples. The trades taught in schools of this class include carpentry and cabinet-making, blacksmithing and metal work, printing and bookbinding, weaving, tailoring, shoe-making, masonry, and embroidery. The largest number of such institutions are in India, with Africa second, and they have been an important agency in planting Christian civilization in the South Sea Islands and the New Hebrides, and agricultural schools especially have done much for the aborigines of North America.

(3) The Industrial community, in which industrial establishments where Christians may find temporary or permanent employment are added to trade schools, is a further development. The classical example is found in the Basel Society's Industrial Missions, with factories at Calicut, Cannore, Codacal in Malabar, and Paibhat in Madras. The Basel Society missionaries began, as far back as 1842, various experiments to meet the necessities of their destitute converts, and the Home Committee took up the problem. A circular issued in 1854 by its Industrial Commission defined its object as two-fold: first, to lessen the dependence of the converts, as far as possible, upon the duties which the institution of caste opposes to the missions in their endeavors to establish new congregations, and second, what may perhaps be called a mission in itself, not by preaching, but if possible by power of example, by Christianity in its practical, everyday life, a mission by the exemplification of Christian diligence, honesty and respectability. Later the whole control of the industrial enterprises was transferred to the Basel Industrial Committee, whose only connection with the Committee of the Basel Missionary Society is that some members are common to both, and the two committees work in close cooperation. The funds for the industries have been sufficiently supplied by donations, upon which the donors receive five per cent. interest, and the remaining profits are devoted to the extension of the industries, to charities, and to contributions to the Basel Mission. An improved native product, "Basel Mission cloths" (including the Khaki cloth now adopted for military uniforms), and roofing tiles of a novel pattern have been the most notable products of the Basel enterprise in India. Larger numbers of converts are employed in these works, but a considerable proportion now work independently as carpenters, bookbinders, and weavers, having been assisted by the mission in making a start for themselves. They are even employed in the establishments of rival firms which copy the Basel tiles and Basel cloth. By the last report of the Basel Industrial Missions, after paying 5 per cent. on the capital invested and various donations to funds for the support of invalids, widows, and orphans, $57,760 was turned over to the Evangelistic work of the Basel Society. The many difficulties have been overcome, the progress of the work and reasons for discouragement are not wanting, the supporters of the mission are convinced that it has done a great good and is on the right lines. A similar mission has been maintained by the Basel Society in Africa, with gratifying results ethically and financially. Another example that will repay study is Prere Town, Mombasa, East Africa, established by the CMS as a refuge for freed slaves, in whose well-ordered settlements the freed slaves of 1885 were received, cared for, fed,
clothed, and taught by the freed slaves of 1875, now baptized Christians and leading a life of quiet industriousness, demand his brethren, and the other Missionary and Industrial centers, as illustrations of the difficulties and successes of industrial communities. The most extensive industrial mission undertakings yet attempted are in Central Africa. In 1876 the Free Church of Scotland, at an initial expense of $50,000, sent out for the founding of Livingstonia Mission, on Lake Nyassa, a company under the guidance of Lieut. Young, consisting of Dr. Laws and another minister, a carpenter, blacksmith, engineer, agriculturist, and seaman, who first established civilization at Cape McClear and then at Bandawe, where the wilderness has been transformed into a cultivated field, and idle, war-loving savages into an industrious Christian community. Those trained in the mission established workshops and market facilities. The mission was beset with peculiar difficulties, at place growing emphasis upon the soil as furnishing the most wholesome, permanent, and promising employment for those whom they seek to benefit. (3) Equipment and Superintendence: Efficient equipment for trained superintendents and liberal capital and equipment are essential. The employment of native artisans as instructors has proved a failure, and in few cases have ordained missionaries been found competent as instructors or superintendents of industrial work. The successful superintendent is a trained artisan with equal breadth and culture to enable him to study the conditions and adapt the work. He will be the better for knowing something of a variety of trades. He might well be apt to teach, but one thing he must be, he must be the disciplinarian of the Christian, who puts the kingdom of God before all else as the purpose of his mission. Such a man should be placed on an equality with other missionaries, and experience has proved him worthy of it. Industrial education is expensive at home and cannot be otherwise conducted. In the mission field the greatest care is taken to develop manhood; wages are only paid for value received, charity being administered from a fund. Malua made it a rule not to sell any of the products of the school farm, as this was found to cultivate selfishness and commercialism in the pupils. "The harmonious training of the head, hand and heart is the key to the redemption of Africa," says Dr. Day of Muhlenberg.

(2) Adaptation: Equal need does not exist for industrial missions in all fields. Where there is a well-developed industrial system, as in China and Japan, there may be no need of them, except as a means of self-help and discipline, or the need may be small compared with that in the fields where the people are of inferior race and where Mohammedan or Hindu supremacy denies industrial opportunity to the Christian. There must be adaptation of the industrial experiment to the varying conditions of each community; to the genius and capacities of the people; to the materials at their disposal; to the market available for the goods produced, and to the openings for the production of varied trades. The mission fields are strung between the works of industrial enterprises and their machinery, resulting from the blind imitation of useful institutions elsewhere. That the convert may overcome the prejudice against him as a Christian, have permanent employment, maintain his self-respect and bring honor to the cause, he must be trained to be a better workman than his heathen competitor and the Christian workshop must turn out the better goods. The same reasons advise the giving of a more expensive training in trades which promise a reasonably sure and adequate return rather than of short, cheap courses in easier trades which can never yield enough to meet the Christian's enlarged necessities. It has been found unwise to attempt the production of articles in competition with Western manufacture, unless protected against these by distance or other cause. Either a new article or an improved article for home consumption or native products of fine quality suitable for export have proved most remunerative. It should be added that those who labor for the submerged classes in great cities, for the American negro and Indian, for the African and the islander, and those who are interested industrially in India, where land-owning and agriculture are beset with peculiar difficulties, alike place growing emphasis upon the soil as furnishing the most wholesome, permanent, and promising employment for those whom they seek to benefit.
Station of the South Africa Wesleyan Methodist Church, with 29 native workers, 20 outstations, 2 schools, and 265 professed Christians. Name written by the Society, Endwedwe.

ING-CHUNG: A city and district in the province of Foo-kien, China. The district begins 125 miles southwest of Fuchau and extends 100 miles in a northwest direction. Its mountains are high, its hill roads are long, its villages sparse, and the workers few. Station circuit of the ME, with (1906) 3 missionaries and 1 wife, 2 women missionaries, 26 native workers, 10 preaching places, 3 day schools, 15 Sunday schools, and 403 professed Christians.

INGHOK. See Yung-fu-hsien.

INGLE, James Addison: Missionary bishop of Han-kau, China; born in Frederick, Md., March 11, 1866; died in Han-kau, December 7, 1903. After his graduation from the University of Virginia in 1888 he studied for the ministry of the Protestant Episcopal Church at the Virginia Seminary in Alexandria. In 1891 he received an appointment as missionary of the ME to China and was assigned to the charge of the important station at Han-kau in the province of Hu-pei. For four years he worked here with great success and in 1902 was consecrated first bishop of Han-kau. During his episcopate of less than two years he greatly strengthened the work of his Church in Central China. He gave special attention to the training of native clergy, catechists, and teachers; and through them, as well as through his staff of American clergy, was enabled to carry on a widely extended and very successful evangelistic work. He also greatly developed the boarding and day schools of his district and enlarged the service of the mission hospital.

INHAMBRANE: A village and seaport in Portuguese East Africa, situated on the E. side of the bay of the same name, and about 230 miles N. E. of Lorenzo Marques. Station of the SPG (1895), with 3 missionaries. Also outstation of the Free Methodist, America, (1885), with a day school. The original native pronunciation of the name is Inyambane, the name Inhambane being the Portuguese spelling of the African name.

INNER MISSIONS. See GERMAN INNER MISSIONS.

INTELLECTUAL UPLIFT BY MISSIONS: A few preliminary postulates must stand at the outset of even a brief discussion of this topic. Thus it is freely granted that in all mission lands other factors coming from without besides Christianity exert an intellectual influence upon the people; and it is often difficult to differentiate between the work done by missionaries and that accomplished by the Christian civilization which enters with them or precedes their coming. Again, it is evident that thus far Protestant missions, which are alone being considered here, have been numerically but a small factor in the life of most non-Christian nations. Thus, in China, in 1900, there were some 140,000 Chinese to ten by the Society, Endwedwe, among whom were about 400 of his countrymen. A third postulate has to do with the grades of society affected. As will be shown, the intellectual influence of missions varies largely with the original status of the people among whom and women. Finally, it should be remembered that the very aim of missions differs from that of commerce or political conquest in that Christianity has as its sole object the salvation and uplifting of the community. The very nature of the system thus necessitates the elevation rather than the degradation of society. For the present purpose a threefold classification of mission lands will suffice to show the varied intellectual effects of missions upon non-Christian peoples.

1. The very presence of the missionary and his belongings constitute an intellectual quickening. Before his ship reaches the land, if it happens to be an unvisited island of the South Seas, its appearance suggests that he came from heaven and was borne on the wings of the wind to these shores, and this gives rise to questionings. In more advanced countries, as soon as he lands, he is an object of intellectual curiosity. With him the garb and furnishings of the Occident, many of them being new to the natives. In countries where there is no native press, gossip supplies its place, and hence the story of his possessions and their use spreads through large regions and is everywhere the subject of remark and wonder.

2. His study of the language is a new impulse to discussion and thought. He asks questions concerning their native tongue which never occurred to them. Other queries are raised by him which tax the knowledge of the wisest of savage peoples.

3. In those races where there is no written language, an unspokenable impulse to intellectual development is imparted through the introduction of the alphabet. In some 100 languages this wonder-working process has been wrought through the missionary; and from the New Hebrides, where the "talking chip" with its speaking characters aroused wonder, to the heart of Africa, where the introduction of alphabetical writing was regarded as little short of miracle, there is a remarkable impulse given to thought through the introduction of writing. A little later, when the same missionary produces the first printed literature of a tribe or a nation, this intellectual influence is widened and broadened. In this latter process, especially among the nations where there is already a rude form of written speech, the language is greatly enriched by new ideas and the more systematic use of an already existing tongue.

4. A concomitant of the two processes just mentioned is the enlistment from among the people of a body of the best educated men obtainable as evangelists and teachers. When mental culture becomes indigenous, it raises men to a position of intellectual predominance and awakening desires the spirit of multitudes of others. Even those who have never studied an hour feel the contagion of this transformation of a few.

5. Education is especially necessary to the program of missions among the lower races. In many cases it is the very first work of the sort ever attempted. So simple a matter as the use of a picture to enable the missionary to explain what is being taught those who are studying, raises the onlookers far above their former position of mental sluggishness. Thus, on one of the great African lakes, when this process was first employed, it took much time for the older ones...
to see a picture and only gradually were the dog, ox, etc., made out. While education in these countries is usually elementary, it is for that very reason more widely diffused and more extensive than in the old religious countries. Among the lowest races the only possibility for education is found in the mission school. The religious instruction is the main aim, the elements of science are taught; and thus the rude philosophy of nature races, which has supplanted animism, fetishism, etc., is gradually displaced, and true knowledge for the first time shines upon the people.

6. The Bible, or those portions of it which are usually translated at an early stage of the enterprise, aside from its religious value is, likewise, a very strong intellectual stimulus to the masses. Its varied contents, its practical doctrines affecting the daily life, and the portion of the earth which forms its background, are a help to the great mass of the people and a stimulus toward intellectual unity. Just as all western countries have the Bible as a common heritage, and as its institutions have insensibly influenced them, thus bringing them together, so as an intellectual bond the Bible first unites savage or uncivilized tribes to a higher civilization.

7. The Christian books which are numerously prepared act upon the few as a strong motive to leaven others. Teaching the alphabet and simple reading is the key to religious truth, and thousands gain possession of the key who do not enter into the religious treasures which it was the primary purpose to open to them. They have, nevertheless, come to a position of intellectual enlightenment which would not have been brought to them from commercial or anti-religious sources.

8. In these countries of lower development it frequently happens that the missionary is the pioneer and abettor of commerce and trade. Elements of material culture are thus indirectly the fruitage of his efforts, and there can be no larger development in this direction which is not at the same time a stimulus to the intellect. While it is true that there are dangers in this direction such as are seen in the cultured countries of the old world, they do not so greatly affect peoples just emerging from the savage or barbarous state.

9. The stimulating intellectual forces above named are broadly scattered in this class of races. Comparatively few such races have an intensive work done among them, but the very fact that the missionary found them without a developed mind has made his presence a more marked factor in the national or tribal life.

II. The cultured races of the old world are, on the one hand, less open to the intellectual influence of missions than the races just named, while at the same time they furnish better material for development. Here, therefore, the work is more intensive than extensive in its character, considering the amount done by a single missionary.

1. The missionary brings not merely a new religion to these peoples, but also new theories of life which constitute the basis of enlarged intellectuality. The discussion between a missionary and a Brahman in India, or between representatives of Christianity and Buddhism in Japan, quickens the thought of hundreds of outlookers who carry away with them the main arguments of the disputants. These are in turn talked over by new groups of interested listeners. Moreover, a prominent theory which the missionary is likely to defend is that of the necessity for education on the part of the believer of the new religion. This gives the first impulse to the education of women, and implants or strengthens the desire to learn in many from lower walks in life.

2. A new science brought to such nations and empires frequently occasions a revolution in prevailing theories. China's literati have been astounded, not outwardly manifesting interest, at the rational explanation of an eclipse or the arguments adduced to prove the rotundity of the earth. One remembers what a revolution it caused in the minds of those boys who constituted Dr. Duff's first school in India, when he gave them their first lesson in English based upon the unimportant word O-X. Upon those simplest letters of the English alphabet he hung truths which burst in a moment the bonds of ignorance. Superstition must always abound until a true philosophy of the external world is made known to a people, and the simpler explanations of its phenomena often fly with great rapidity from lip to lip.

3. Missionaries have also carried into this class of countries new means of intercommunication. The languages had hitherto been committed to writing and a considerable literature may have existed, the missionaries introduce ready impartation of ideas through the publication of periodical literature and interesting tracts and books. Thus the Christian Literature Society of India, through its present and earlier organization, has stimulated Hindus to similarly impart information. Almost the sole influence in the earlier history of missions in China, India and Japan, leading to the rapid development of native periodical literature, came from the work of missions.

4. Such literary efforts, however, cannot long be carried on without the production of a reformed language. Just as the New Testament in the early Christian Church enriched the classical Greek, and as the literary efforts of Dante affected Italy, and Luther's translation of the German Bible enriched that tongue, so to-day China is coming into the possession of a form of the Mandarin which is hardly conceivable, had there been no missionaries in that country. The same is true in all lands of this class, since before the coming of the missionary there has been an aristocracy of letters which selfishly kept to itself a monopoly of learning, with the result that the language was far above the comprehension of the ordinary people.

5. The more rational method of teaching, and the scientific material brought to these nations through the schools established, have been an impetus toward intellectual life. Turkey and Egypt owe to missionaries the stimulus which compelled them to self-defense to establish schools in great numbers. While in India the government has aided native schools, it has done it largely through missionaries, both by encouraging them to enter the work and by its grants-in-aid. It is to be remembered also that in such an empire as Japan the educational system owes more to a missionary, Dr. Verbeck, and to Joseph Niesima, a native apostle of Christian education, than to almost any other source, the Mr. Fuku-zawa advocated it, in private life, and in later years the Government assumed the guidance and expense of educational reform.
6. Only through missions have the lowly and despised classes in the community been touched intellectually through education. In Mohammedan countries, as well as in great empires like India and China, women and girls have not hitherto been considered as fit subjects for intellectual culture. The Christian school aims to reach these strategic factors in society quite as much as it does to educate boys and men; so that in India to-day and in Mohammedan countries the educated women and girls are the product almost wholly of missionary schools.

III. There is a question in the minds of many authorities on missions about the wisdom of conducting Protestant missionary work in nominally Christian lands, most of them Papal countries, missions do exist among such peoples. Here the intellectual contribution of missions is naturally less marked than in the two classes previously named.

1. The representative of Protestantism who comes in contact with a perverted or less developed form of Christianity must naturally spend much of his time in discussion. He must give a raison d'être for his presentation of Protestantism. His opponents are often keenly intellectual, and even where they are not well educated they strongly present the claims of their ancestral faith. Listeners are keenly alert and their thought processes are quickened as never before by the arguments adduced.

2. The stimulus coming to the native press through the publication of Protestant literature in those countries is helpful to all. Even in the shadow of the Vatican, where the Scripture is now being published, in periodicals and in the vernacular, at a low rate and under Papal sanction, it is hardly probable that it would have been done were it not for the strong Methodist work carried on in the Holy City. In South America and Mexico it is naturally true that Protestantism has imparted a wide stimulus to the thought of the people.

3. Mission schools in Papal lands have been an unexpected help to education, particularly in Latin America. The work done in Brazil, which has influenced education in that extensive republic, and in less degree other institutions in South America, Mexico, Austria and Spain have been an intellectual blessing to the people. Probably nothing in the latter country has been so helpful as an object lesson as the Institute for Girls under the charge of the late Mrs. Alice Gordon Gullik.

4. Protestant efforts in these lands have developed a native leadership of wide influence. Diaz in Cuba is an illustration of many who in Latin America and in the Philippines have come to a position, not only of religious influence, but of intellectual power.

IV. A few illustrations of the positions above taken will indicate the extent to which tribes and nations are indebted to the intellectual uplift of missions.

1. A few instances are adduced of communities which have been most thoroughly leavened by the Gospel and its accompanying intellectual life. The Hawaiian Islands, now a part of the United States, are both intellectually and spiritually the product of the American Board's work. Schools were quite as much emphasized as in New England, and they became the foundation of present-day Hawaiian society and the stepping-stones to her present political position. The Fiji Islands, which in the childhood of many now living were without missionaries and the abodes of cannibal cruelty, are not only the banner country of the world in the matter of church-going, but in 1901 the Wesleyans alone had 1,473 schools, accommodating 28,491 scholars. At that time the entire population of the colony was only 117,870, so that about one-fourth of the entire number of inhabitants were studying in the schools of one Protestant missionary society. The Karens in Burma are another illustration of a despised race, hardly deemed worth evangelization, who, through the efforts of the American Baptist Missionary Union, were brought to an intellectual and spiritual condition which is most remarkable, the Karen schools of the Union having in 1901 some 13,049 scholars. Uganda, too, in the very heart of Africa, owes its marvelous intellectual progress of the past few years to the educational work accomplished by the Church Missionary Society. An even stronger illustration is derived from the history of missions in Madagascar, where, until recent times, the representatives of the London Missionary Society have been almost the sole educators of the entire people.

2. Figures may give a better view than the above illustrations of what is actually being accomplished in intellectual lines and the thought processes are quickened as never before by the arguments adduced.

3. The statistics of which are mainly those of 1900, gives the number of educational institutions conducted by Protestant missions, 24,728, in which there were 1,127,853 pupils or students. This includes institutions in a variety of educational institutions, from the kindergartens to the full-fledged universities. Dr. Dennis' Centennial Survey of Foreign Missions, which gives the condition at the end of 1899, states that the entire Bible had been translated by missionaries into 99 languages or dialects, while the entire New Testament had been rendered into 121 additional tongues. Portions of the Bible had been translated into 236 other tongues, making the total number of missionary translations of a part or all of the Bible, 456. There were, according to the same authority, 150 mission publishing houses and printing presses, with an output for the year reported of 381,166,106 pages. This included 379 periodicals published by the missionaries, which were generally religious in character. One can imagine the intellectual as well as the spiritual value of such a record as the above. It does not suggest, however, the intellectual stimulus imparted, which can best be realized by a comparison of sections of the same country or tribe, which have been reached by missions, with other portions not so touched. In Burma, the Karens, who are intellectually below the Burmans, have been so benefited by the mental and religious instruction received that they now outstrip in many respects their naturally stronger neighbors. The same is, to a less degree, true of certain low castes in Northern India, who, through teaching, have become the peers of those several degrees higher in the social scale. In China, the late vicerey, Li Hung-chang, applied to a Christian educational institution for all its graduates, promising to permit them to observe Sunday, tho living in a Sabbathless land. These men are from the lower ranks in life, who were desired merely because of their intellectual attainments, and were thus preferred to native scholars possessing
high degrees. Christianity has in mission countries, especially a quickener of thought, so that the traditions of ages or generations are replaced with the science of the West, and lives have been changed to correspond with this new light.

INTERNATIONAL MEDICAL MISSIONARY AND MEDICINE: ASSOCIATION (Battle Creek, Mich., 1893): While this Association is denominationally connected with the Seventh Day Adventists, its work is not sectarian. The object for which it was formed was to "erect and manage homes for orphan children and for friendless aged persons; hospitals and sanitariums for the sick poor and others; to establish dispensaries and medical missions at home and abroad; to provide visiting nurses; to educate missionary physicians and nurses; to provide for the needy poor, and to promulgate the principles of health and temperance."

INTERNATIONAL MEDICAL MISSIONARY SOCIETY (New York, 1881): In the spring of 1881 a meeting was held at the house of Dr. T. A. Sabine, New York City, to consider the formation of an organization similar to the Edinburgh Medical Missionary Association. Six persons were present: the Rev. Wm. M. Taylor, D.D., three physicians, one lawyer, and a business man. Geo. D. Kowkoutt, M. D., explained the character, scope and aim of the proposed work; and it was at once decided to organize a society to aid and train candidates, of either sex, for service as medical missionaries under any evangelical mission society. The society thus organized has since then served all sections of the Christian Church under a strictly inter-denominational constitution.

Besides the original undertaking of the Society, the generosity of an individual has enabled it to establish a "Place of Rest" for missionaries and other Christian workers, together with a summer training school for missionary candidates. The seat of the Society and the home for medical students is in New York, but the Place of Rest and summer school are on the property belonging to the Society at Goshen, Mass., a summer resort 1,500 feet above sea level.

The aid given to medical students who are preparing for missionary service is based upon the plan of aiding for last bills only, after the student and his family or friends have done what they can for his support.

Since the organization of the Society nearly 150 medical students whom it has aided have been sent to the foreign field by various missionary societies, and its former students are now laboring in Syria, Persia, India, Ceylon, Burma, China and the New Hebrides.

INTERNATIONAL MISSIONARY UNION (1884): The founder of this unique organization was the Rev. J. T. Gracey, D.D., of Rochester, N. Y. After assisting at a series of missionary meetings at the campground at Niagara Falls, Ont., where he had stipulated that all the speakers should be missionaries, he conceived the idea of an organization of missionaries of all denominations the world over, who should come together once a year to talk over the varied missions of their work, compare notes, and profit by one another's successes or failures. The project was laid before an assembly of missionaries who were on furlough, and met with an enthusiastic response. A simple constitution was drawn up, and the title, "International Missionary Union," was given to the new organization. Foreign missionaries of both sexes, of any evangelical denomination, are eligible for membership, whether on the active or retired list, as well as all missionaries under appointment. The sole condition of membership is that the missionary must be in good standing with his Board.

The entire dues of the members consist of an initial fee of fifty cents; there are no yearly dues. In 1896 the Union had grown so rapidly that it became necessary to reorganize, and the constitution was revised. Its officers consist of a president, vice-president, secretary, treasurer, and librarian, with a board of control and an executive committee appointed to act as occasion may require.

For several years the annual meetings of the Union were held at different places, but in 1890 Dr. Henry Foster, of the Clifton Springs Sanitarium, Clifton Springs, N. Y., suggested that thereafter all the annual meetings of the Association should be held at that place, offering free entertainment to all members of the Union during the week of the annual session. This generous offer was accepted, and the following year Dr. Foster erected a beautiful and commodious tabernacle on the sanitarium grounds for the use of the Union so long as it should hold its meetings at Clifton Springs.

With an initial membership of forty, the Union now has over 1,200 members. In 1902 many young men and women under appointment to the foreign missions' field were present. Consequently, special classes were held for them, and opportunities arranged for them to confer with experienced missionaries from the fields to which they were going. This proved so valuable that it is now to be made a permanent feature of the annual meetings of the Union. These annual meetings are held for one week, beginning the first Wednesday in June. The Union has no income; a collection is taken on the one Sunday of the year when it is in session, to defray the expense of the publication of the annual report, the International Missionary Index, and of notices, etc.

INTERNATIONAL SERVICE OF MISSIONS: Missions were not established to promote diplomatic amenities or aid backward nations in assuming international functions. They have, nevertheless, accomplished much incidentally in these directions by forging connecting links of contact and intercourse, cultivating good will, solving difficulties, giving friendly advice, familiarizing acquaintance with Western administrative systems, mediating between foreign diplomacy and native misunderstandings, encouraging that status of mutual confidence which promotes
peaceful relationships, and often ministering as the almoners of international philanthropy in times of calamity and distress. If these statements are well founded, missions are proving themselves to be among those evolutionary forces which work for the kindly recognition of mutual obligations among the nations of mankind.

Illustrations of this can be discovered not only in modern times, but in the history of missions during earlier centuries. It is the missionary, quite as much as the political or commercial motive, which seems to assert itself in many of those early ventures which we trace on to the exploration of an unknown world, and the making and molding of new nations. The apostolic age of the Church was international in the expansiveness of its evangelistic aims, and in the scope of its missionary activities. Subsequent centuries bear witness to the outreaching touch of Christianity, bringing nation into contact with nation. The Nestorians pushed boldly into China as early as the 7th century, and into India probably at a date still earlier, following Pan­tanes, who had preceded them in the latter part of the 2d century. Ulphilas was a messenger to the Goths in the 4th century, as were Cyril and Methodius to the Slavs in the 9th. In Central and Northern Europe, including the British Isles, we can trace the entrance of Columbus, Augustine, Columbanus, Gallus, Eligius, Boniface, Wllilbrord, Anguar, and many others equally zealous the less conspicuous in the annals of those formative centuries. Hans Egede linked Denmark with Greenland in the 18th century. The Moravian missionaries followed, and from that time Herraht became an active factor in the international contact of the world. Labrador was reached by Jens Haven in 1764; Francis Xavier linked Portugal with India in the 16th century; Heurnius was a connecting bond between Oolland and the Dutch East Indies in the 17th century, and in the 18th century Ziegen­hals, Flutschau, and Schwenkfeld opened the way into spiritual relations with India. These were all international messengers upon an errand of peace, good will, and friendship.

The maritime discoveries of the 15th century were undertaken, among other motives, with a definite missionary purpose. That ponderous work entitled The Jesuit Relations and Allied Documents reveals to us immense and prolonged contributions of Roman Catholic missionaries toward the establishment of international intercourse between France and America for nearly two hundred years. The footsteps of those indefatigable missionary pioneers can be traced during the 17th century along the St. Lawrence, and on both sides of the Great Lakes, on into the Far West. They deflect southward into Maine, into Illinois, and even as far as Louisiana, and penetrate northward toward the inhospitable, icy wilderness of Hudson Bay. The British colonial establishments in North America, moreover, were missionary in spirit to an extent which makes them almost the forerunners of the foreign missionary societies of a later age. Their char­acter was given a strong tenor by their noblest men were Christian pioneers as well as statesmen. They sought not only religious liberty and opportunity for themselves, but they were in many conspicuous instances intent upon the dissemination of the Gospel among the aborigines. In the first Charter of Virginia, given by James I., in April, 1606, it was stipulated that "the Word and service of God be preached, planted, and used as well in said colonies, as also as much as might be among the savages bordering among them." In a letter to Sir Walter Raleigh, referring to the project of the Virginia colony, Hakluyt expresses his pleasure in Raleigh's plans, because "you mean to sende some such good Churchmen tilther (to Virginia) as may truly say with the Apostles to the Sauvages, wee seeke not yours but you." Bradford declared the propagation of the Gospel of the Kingdom of Christ as one of the great hopes of his pilgrimage. Winthrop confided to the same motive, and in his journal are numerous references to his desires for the conversion of the aborigines. The Charter of Massachusetts Colony emphasizes the missionary motive as one of the inspirations which prompted its establishment. Macdonald's Select Charters and Other Documents Illustrative of American History, 1606-1755 (Pages 2, 3, 16, 25, 42, 126, and 184), gives the text of some of these chartered assertions of missionary aims in our early colonial history.

Those mighty and unfurmed spiritual in­fluence which now link India with all Christendom are the outcome of missions. In their own sphere of moral and religious influence missionaries have cooperat­ed with English statesmen, and rendered a service of value both to Great Britain and to India. The strange and unwarranted attitude of the old East India Company toward missionary effort has long ago changed, and the value of missions to British interests in India is now freely recognized. Since the days of the mutiny it has become more and more apparent that a native Church community is a valuable ally of English rule, and, so far as its influence goes, a moral guaranté of fidelity and good will. The sailing of Captain James Wilson and thirty-six missionaries in the Duff, which was owned and sent out by the London Missionary Society in 1796, opened the South Pacific to those largesses of light and civilization which missionary effort has sent there during the past century. The west coast of Africa first felt the touch of Christian sympathy and helpfulness when Peter Creig, the Scotch missionary, went there in 1797. The cooperation of the Church Missionary Society of England, the Wesleyan Missionary Society, and the United Presbyterian Missions of Scotland, has contributed in no small measure to the opening up of the vast regions of the Niger Basin, and has been a factor in furthering the present political supremacy of Great Britain throughout Nigeria. The marvelous story of African colonization during the 19th century is indissolubly linked with missionary devotion and achievement. Such names as Vanderkemp, Philip, Krapf, Rebbmann, Moffat, John Mackenzie, Livingstone, and Bishop Mackenzie of the Zambesi, as well as many others later in the century, certify to the truth of this statement. We may almost reckon the Uganda Protectorate as virtually the outcome of missions, with that colossal achievement of a railway from Mombasa to the Victoria Nyanza as a necessary result. Many clauses of the new constitution of the whole British Central Africa, including the upper waters of the Zambezi, where the French Mission labors among the Barotsi, serve the same purpose of illustrating an international value in missionary enterprise.

Turning to China, we find Morrison and Gut-
laff, the former in the double capacity of mission-
ary and interpreter for the East India Company,
serving in international affairs before its formal
opening to the foreigner. The Rev. E. C. Bridg-
man and Dr. Peter Parker were associated with
the Rev. Caleb Cushing in negotiating the first
treaty which the United States made with China,
in 1844. Both these men were masters of the
Chinese language, familiar with the customs of
the country, and acceptable media of communi-
cation. The aid which they rendered was ex-
spressed in the act of Mr. Cushing that, "they were invaluable as advisers." It was in the
early British negotiations that Morrison and
Gutzlaff rendered a similar service. The former
was associated with Lord Amherst in 1816, being
for some years interpreter, and secretary to
the French Minister, in 1844; the latter participated in
the negotiations and rendered important aid.

It would thus appear that the initial word of
friendly diplomatic intercourse between China
and two great governments of the West was
spoken through the medium of missionary secre-
taries and interpreters.

A few years later, in 1858, when the notable
Treaties of Tientsin between the four govern-
ments of the United States, Great Britain, France,
and Russia were drawn up with China, in the case
of the United States treaty two American mis-
ionaries whose services in the negotiations were
of historic importance and value were associated
with the Hon. W. B. Reed, the minister who
represented the United States on that occasion.
Dr. S. Wells Williams and Dr. W. A. P. Martin,
both missionary scholars and diplomats, took
an active part in the preliminary conference, and
in fixing the provisions of the document, as well
as securing its acceptance. It was due to Dr.
Williams that the memorable Toleration Clause,
inserted substantially in the British

(continued)
inaugurated the opening of both China and Japan to an era of modern progress destined to be the most wonderful in their history. The commemoration by Commodore Perry erected in 1901 on the shores of Japan was an appropriate and grateful tribute, but the services of Dr. Williams were conspicuously worthy of a grateful commemoration on the part of Christendom.

The services of several distinguished missionaries in Japan have been of international import. Dr. Guido F. Verbeck and Dr. S. R. Brown were especially useful and helpful to the Japanese during the critical period of the reorganization of their national life, since the introduction of those monumental changes which have characterized the Meiji era of modern times. Dr. Verbeck suggested the plan of the now historic embassy sent by the Japanese Government to America and Europe in 1871, and the project was finally executed, in large part under his advice and cooperation. Its results proved to be of decisive influence in permanently establishing the friendly relations of Japan with the nations of Christendom, and in furthering that religious toleration which has distinguished the Empire of Japan in the modern history of the East. It is a matter of further interest that the recent revision of Japanese treaties, which has established a basis of equality with Western nations, as of July, 1899, has been both favored and facilitated by resident missionaries out of a sense of justice and fairness to Japan. By manifestoes, resolutions, and public meetings, as well as by private influence, they have made it known that they regarded the aspirations of Japan in this matter with sympathy and favor.

The diplomatic relations of the United States with Korea have been also facilitated by the services of Dr. Horace N. Allen, who was the first American missionary to arrive in Korea. He went there in 1844, and was soon appointed physician to the Court. He subsequently, in 1887, accompanied the first Korean Embassy to Washington as its secretary, returning to Seoul in 1890 as secretary of the United States Legation. In 1897 he was appointed United States Minister to Korea, a position which he still (1904) occupies.

Not only have the treaty relations of Christian nations with the great Asiatic governments of China and Japan been facilitated by missionary cooperation, but diplomatic negotiations with smaller tribes and kingdoms—especially in Oceania—have received aid from the same sources. Missionaries have often prepared the way for the establishing of such international ties by initial intercourse and friendly residence, thus becoming the pioneer media of information and contact. A capital illustration of this is New Guinea, where Chalmers and Lawes, and other missionaries of the London Society, became the forerunners of the present British protectorate. The services of Bishop Henry Ward and Burton in the same region, have been cordially acknowledged by Sir James E. Erskine and Sir Cyprian Bridge, both high officers in the British Navy. In the same way missionaries have been engaged in placing the chiefs of this important and powerful clan, who, in February, 1840, at Waitangi Falls, were the first signers of the treaty accepting British supremacy. Nearly two-thirds of the entire Maori population had professed Christianity in 1859. Marsden, as early as 1814, and Selwyn, later, were all of them successful pioneer empire-builders in New Zealand. The peaceful, and even cordial, ceding of Fiji to Great Britain by its chiefs and people, in 1874, followed long years of successful missionary toil by the English Wesleyans, resulting in a marvelous preoccupation of native hearts throughout the islands by the Gospel which the Wesleyans brought. A British protectorate was established over the Tonga group by peaceful negotiations in 1900, but years before that English missionaries had labored there in friendly contact with that proud and vigorous race. The Samoan Islands, now portioned out between Germany and the United States, were annexed to Christianity half a century or more before their political destiny was determined. The Cook or Hervey Islands were Christianized and dominated by the methods of the Missionary Society over a generation before the British protectorate was established, in 1888. As early as 1864 the natives petitioned Great Britain for annexation, but a protectorate only was instituted in 1888, which at the request, again repeated, of the native chiefs was changed to annexation to New Zealand in 1900. Thus a reclaimed race was made ready by missions for relations of peaceful diplomacy with a great nation of Christendom. The Santa Cruz group—now part of the British Empire—on the scene of the martyrdom of Young and Nobbs, in 1864, and of John Coleridge Patteson, in 1871. Thousands of hearts throughout Christendom have read the story with tender interest, and some day no doubt a fitting memorial of Patteson will commemorate under the British flag that pathetic incident which, as Gladstone said of Patteson himself, was a "pledge of nobler destinies."

The virtual preemption of the New Hebrides, as destined in all probability to have their political future linked with the British Empire, may be regarded as the outcome of a missionary occupation which has been sealed by martyrdom, and crowned by the uplifting transformation of savage tribes into aspirants for political order and moral civilization. In 1829 two English missionaries—Ward and Burton—endeavored to secure a foothold in Sumatra among the fierce Battaks, but were unable to do so. In 1832 two American missionaries—Munson and Lyman—made another attempt, but were martyred by cannibals. Thirty years later a third effort, on the part of the Rhenish Society, was successful, and a region in North Sumatra, previously wholly inaccessible to the white man, was opened by a peaceful missionary occupation. From that martyr seed has sprung a Christian population and a region in a state of peace and good order which promises a developed civilization. The Dutch Government in the East Indies is surely a debtor for this missionary achievement.

Hawaii, with its large Maori population, was largely molded and fashioned for her destiny by missionary pioneers whose labors have assumed an importance which may fairly be regarded as of international interest. During the whole of the 19th century, while by the irresistible growth of
economic and political ties, and the manifest
trend of history, it belonged in posse to the United
States, missionary toil was fitting it for the con-
summation when it would become so in esse.
Ex-Secretary the Hon. John W. Foster, in
his admirable volume, American Diplomacy in
the Orient (page 108), places a high estimate upon
the beneficial effects, social and political, of
American missions in Hawaii. There are other
groups whose political destiny is now linked with
Europe—British Guiana, French Guiana, New
Zealand, and Brazil, and the Marshall and Caroline,
with Germany—which have long been under the
careful training of missionary teachers from
America. Whatever opinion may be held of the
political wisdom of the occupation of the Philip-
pines by the United States, there is no valid
reason to doubt that beneficent results are most
assuredly to follow in those islands from this
foreign occupation. The recognition of mission-
ary obligation on the part of American Chris-
tianity is, moreover, a strenuous and clearly
manifest result, which, let us hope, will be fruitful
in moral good and social betterment to the people
of the islands.

Not only in connection with diplomacy, but in
times of war and public calamity, the services of
missionaries have been of benefit. During the
mutinies and uprisings in Uganda they served in
defense of life and property. At the siege of
Peking the conspicuous and brilliant services of
missionaries in defense of the Legations during the
perilous summer of 1900 were universally ac-
cknowledged. The successful issue of this crisis was due in no
small measure to the skilful and heroic participa-
tion of missionaries in that victorious defense.
Not only were the lives of the ambassadors saved,
but consequences were averted which might have
depended upon unparalleled calamities. There is a
manifest international value, moreover, attach-
ing to the efforts of missionaries in the sphere
of philanthropy. In times of famine, earth-
quake, epidemics, and great disasters, sympathy
and help are given, and charitable funds adminis-
tered largely by the initiative of missionary teach-
ers and statesmen. They have sought to intro-
duce the humane provisions of the code in times of
war, and they have secured also, in an
all-round summary of human duty. Here seems to be an admirable hint for the reformer and the
earnest advocate of higher standards of citizen-
ship.

The immensely effective and beneficial influ-
ence of Christianity in evolving throughout Christendom that remarkable code of national
chivalry—voluntary in its sovereignty and sacred
in its dignity—which we have come to designate
as international law, has been perpetuated and
extended among Asiatic and other foreign peo-
ples largely by the influence of missionaries and
missionaries. On the other hand, missionaries have not been unmoved spectators of infractions or
dubious applications of the international code by
Western powers in their contact with Oriental
countries. The missionary protest in the face of
some notable lapses in these respects, especially
in China, has been vigorous and uncompromising.
On the subject of opium the missionary body is
a unit, and this is substantially true of their oppo-
sition to the territorial dismemberment of the
Chinese Empire.

It would thus appear that the messenger of the
Gospel in mission lands has long been assigned
an international role—not, to be sure, in any
formal or official capacity, but as contributing
incidentally, and sometimes unconsciously, to
the sum total of good-will and friendship among
the nations. Missionaries have borne their part
in promoting kind feeling between widely sepa-
rated races, and in breaking down barriers
between distant and alien peoples; they have also
struck the note of brotherhood—stirring on the
one hand generous impulses, and on the other
awakening gratitude. They have facilitated
diplomatic relations, and aided in establishing peaceful and mutually beneficial ties between the nations. This remarkable service, it may be noted, has been coincident with monumental changes in world-politics and with ethical intercourse brought about by discovery, colonization, and commercial enterprise. Missionary expansion has thus given a certain impetus, as well as kindly tone, to that interchange of intellectual, spiritual, and material commodities which has become unique for our age, and is lending as much as any other single influence to the goal of universal peace and unity. Imperialism—the irrefutable note of the age—is given an ethical significance, and directed toward a sublime ideal, by this international leaven of missions. Paul's conception of the relationship of superior to inferior races has hardly been taken seriously among the nations. That great missionary-apostle and statesman regarded himself as "debtor even to the barbarians—an aspect of inter-racial obligation which has been to a surprising extent a negligible consideration in the diplomatic intercourse of the nations. The spirit of missions, however, like a voice crying in the wilderness of international selfishness, has sought diligently to promote kindly consideration, good will, and fair dealing, and has endeavored faithfully to exemplify them in its own sphere.

INYATI: A settlement in Rhodesia, South Central Africa, situated among Matabele tribes, about 47 miles N. E. of Buluwayo. Station of the EMS (1860), with (1903) 1 missionary, 4 native workers, 430 professed Christians, of whom 60 are communicants.

IPOLI: A village on the Malay Peninsula, situated on the Kintah River in the state or district of Perak. The climate is healthy. Station of the ME, with (1903) 2 missionaries, 1 missionary's wife, 11 native workers, men and women; 3 outstations, 2 day schools, 2 boarding schools, and 287 professed Christians. The work in this place is chiefly among the Chinese, but it also reaches the Hindu coolies, and what is of considerable importance in such a mission field, it reaches the English and English-speaking foreigners, whose example is set for so much among the native Hindus. The BFBS furnishes the ME funds for employing a colporteur and 2 Bible women in this district.

IPOLELA: A village in Natal, S. Africa, situated 46 miles W. by S. of Pietermaritzburg. Station of the SPG (1874), with (1903) 1 missionary and 460 professed Christians, of whom 220 are communicants.

IQUIQUE: A seaport town in Chile, S. America, situated on the west coast. It is an export center for the nitrate trade. Water is very scarce in the neighborhood. Population (1895), 33,031, and January, 1902 (estimated), 42,498. Station of the ME, with (1903) 4 missionaries and their wives, 2 outstations, 3 Sabbath schools, 1 boarding school, 1 Seamen's Bethel, and 342 professed Christians. Station also of the SDA.

IRELAND; Presbyterian Church in. See Presbyterian Church.

IRELAND, William B.: Born near Oswesty, Shropshire, England, December 21, 1821; graduated at Illinois College 1845, Andover Theological Seminary 1848; ordained the September following; sailed as a missionary of the ABCFM for Africa, October 14, 1848, being stationed at Infumi in Natal. In 1855 he was appointed by the mission to take charge of the boys' seminary at Amanzimtote, and for seventeen years he devoted his heart and strength to its welfare. But his impaired health prevented his bearing the burden of so responsible a work. He occupied a large place in the mission, and in the affections of the Zulus and of all who knew him. He died in Boston, October 12, 1888.

IROD. See ERODE.

IRUNGALUR: A town in the Presidency of Madras, India, situated to the N. of the Coleroon branch of the Cavury River and about 12 miles N. of Trichinopoly. It was a stronghold of the Jesuits, who came there in the 18th century, and had influence enough to prevent Schwartz, the early Halle missionary, from being allowed to preach there. In 1830 some 16 neglected congregations of the descendants of the early converts of the Jesuits put themselves under the care of an SPG missionary. The place has been occupied by the SPG since that time, with (1903) 62 native workers, men and women; 17 places of worship, 15 day schools, 1 girls' boarding school, and 1,294 professed Christians, of whom 647 are communicants.

IRWIN HILL: A village on the northern side of the island of Jamaica, West Indies, pleasantly situated on a slight ridge about 4 miles from Montego Bay. Mission station of the Moravians (1825), at present in charge of native workers.

ISABEL ISLAND LANGUAGE. See Bougu.

ISFAHAN. See Isphah.

ISHI-HSIEN: Town in the S. of the province of Shansi, China, situated about 20 miles N. W. of Ki-si-chau. Station of the OIM (1881), with 6 missionaries, men and women, who are (1903) reorganizing the work broken up by the Boxer uprising.

ISIMID. See Nicomedea.

ISOAYINA: A town and district in Madagascar, situated about 11 miles E. of Antananarivo. Station of the LMS (1867), with (1903) 1 missionary and his wife, 194 native workers, men and women; 32 day schools, and 4,157 professed Christians, of whom 1,319 are communicants.

ISOTRY: A ward in the city of Antananarivo, Madagascar, and a missionary district connected with the church in that ward, under the LMS. It now has 11 native workers, 20 day schools, and 488 professing Christians, of whom 238 are communicants.

ISPANAH: A city of Persia, 226 miles south of Tehran, on the Zenderud River. It was formerly capital of the Empire and a great center of trade, especially with Baghdad. It has never recovered from the Afghan invasion of 1722. Like many Oriental cities, large sections of it are deserted, the people finding it cheaper and easier to remove than to rebuild. The population, estimated at 80,000, is mostly Persian, tho there are about 13,000 Jews and some Kurds. Connected with the city by bridges across the river is the suburb of Juffs, which is the real center of missionary work for Isphahan. Isphahan is the residence of the Anglican bishop, and CMS missionaries from Juffs keep up a dispensary also. Station also of the London Jews Society (1847), with (1902) 1 missionary, 5 native workers, 2 day schools, 1 industrial school.
ITARS: A town and railway junction in the Central Provinces, India, situated in the district of Hoshangabad, about 10 miles S. of the town of that name. Station of the FFMA (1893), with (1901) 1 missionary and his wife, 1 dispensary, and 2 day schools.

IVORY COAST: A French colony on the Gulf of Guinea, West Africa, lying between Liberia and the Gold Coast Colony, and joining on the north the French Military Territories and Sene­gambia. It has an area of about 116,000 square miles, and a population estimated at 2,000,000. The colony has vast valuable forests and gold mines of unknown riches. The capital is Bingerville (formerly called Adjame). The principal rivers are the Tanwé, Kindjasa, and Akba, the last said to be 240 miles in length, affording splendid access to the interior. The origin of the inland peoples is not definitely known. The trading tribes about Ebene Lagoon are called by the English nickname “Jack-Jack.” west of the Lahu are the Avekoms, commonly called Qua­Quas; while farther west are the Koomen. The coast tribes are mild and trustworthy.

The only Protestant mission in this territory consists of 3 settlements, which fall within the field of the PE mission in Liberia.

I-YANG-HSIEN: A town in the province of Kiang-si, China, about 180 miles S. E. of Kiu­kiang. Station of the OIM (1890), with (1902) 4 women missionaires. Name given as Ih-yang in CIM publications.

J

JABALPUR: A town in the Central Provinces, India, 160 miles northeast of Nagpur. It stands at an altitude of 1,460 feet, in a rocky basin, surrounded by a series of lakes which are shaded by fine trees and bordered by rocky crags. Its streets are wide and regularly laid out. It is perhaps the most important railway center in all India. Population (1891), 84,500. Of whom 60,900 are Hindus and 19,400 Mohammedans. Station of the CMS (1854), and CEZ (1871), with, together (1900), 4 missionaries, 3 with their wives; 4 native workers, men and women; 3 outstations, 19 elementary schools, 1 boarding school, 137 professed Christians, and 337 Zemana pupils. Station also of the ME, with (1900) 2 missionaries and their wives, 2 women missionaries, 46 native workers, 4 outstations, 5 day schools, and 389 professed Christians. Station also of the WMS, with (1900) 2 missionaries, 17 native workers, men and women; 4 day schools, and an orphanage.

JACORTE: A name given to the Monophysite churches of the East, especially the Syrians residing in Northern Syria, Southern Asia Minor, and Mesopotamia. Their principal headquarters are at Mosul, Diarbekir, Maadan, and Aleppo. They have also a bishop at Jerusalem. Other important centers are Oora, Mardin, Jazireh, and a district of Jabel Tour, east of Diarbekir. They have found it difficult in many places to cope with the aggressive influences of the Roman Catholics, who have sent large numbers of monks to establish themselves especially in Mesopo­tamia, in the cities of Mardin and Mosul, and, having enticed many of the priests, have succeeded also in forcing the congregations to follow them by refusing any of the sacraments except as they adopted the Roman Catholic faith.

Protestant mission work among the Jacobites has been somewhat successful, especially as carried on from Mardin, Diarbekir, and Mosul. The relations between the Jacobite leaders and the American missionaries have been quite cordial, and the constant effort to come into pleasant relations with them has been productive of good results. The larger part of the Protestant communities of Mardin, Jabel Tour, and the villages about Diarbekir are made up from the Jacobite communities.

JAESCHKE, Heinrich August: Born in Herrnhut, Saxony, May 17, 1817. He was descended from a family of those Moravian exiles who found refuge and freedom on the estates of Count Zinzendorf at the settlement of Herrnhut. After two years' study in the theological seminary at Gnadenfeld he was appointed, in 1837, a teacher at the settlement of Christiansfeld, where the Danish language chiefly was used. He acquired the language so rapidly that in a short time he was able to compose and preach in Danish. Five years later he was appointed a professor in the Niesky Pedagogium, where he instructed in ancient and modern languages. He here began the study of Arabic, Persian, and Sanskrit. He was a proficient in Greek. He became acquainted also with Hungarian, Bohemian, Polish, and
Swedish. His diary was kept in seven languages. In 1856 he joined Messrs. Pagell and Heyde in mission work at Kailang, a village in the province of Lahoul, on the borders of Tibet, intending as soon as the way was open to enter with them and labor among the Chinese Mongols. Having acquired the language he compiled a German-Tibetan, and some years later an English-Tibetan, Lexicon, both of which are considered standard authorities. The British Government published the English-Tibetan Lexicon for the use of English officers in Kashmir. He also wrote and translated several books and tracts for the converts, for pupils in schools, and for distribution among the people. He prepared also a small Tibetan grammar in the English language for the use of missionaries and others. He now began the translation of the Bible, but after ten years of almost incessant labor his health failed, and he was obliged to return to Europe. There, in great weakness, he continued the work, and completed the translation of the New Testament, which was published by the British and Foreign Bible Society. He left materials which were used by Mr. Redslob in the translation of the Old Testament. He died at Herrnhut, September 24, 1883.

JAFFA: A town in Syria, lying 33 miles N. W. of Jerusalem, of which it is the seaport and with which it is connected by railroad. It is regarded as an important center for missionary work, because all pilgrims and visitors to Jerusalem, whether Christians, Jews, or Muslims, naturally land there. There are fourteen colonies of Jews from abroad in the immediate neighborhood of the town, making with those in the town itself a body of some 6,500 Jews. The population of Jaffa is about 16,000. It is a station of the Tabestha Mission Schools (1863), of the CMS (1876), of the Jaffa Medical Mission (1878), of the London Society for the Promotion of Christianity among the Jews (1882), of the Jerusalem Union (Berlin), and of the Christian and Missionary Alliance. Together these societies have at Jaffa 20 missionaries and 29 native workers, men and women, with 12 day schools, 1 boarding school, 1 night school, 1 hospital, and 2 dispensaries.

JAFNA: A town in Ceylon, situated on the S. coast of the island on the peninsula of Jaffna, 116 miles N. W. of Trincomalee. It is the district town, and has the administrative buildings, a college, and a public library. The fort is the most perfect little military work in Ceylon—a pentagon built of blocks of white coral. Traces of the Dutch occupancy of the town can still be seen, and not a few of the churches date back to the time of the Portuguese. The industry of the Tamil inhabitants has changed the sandy soil to a fertile district, with luxuriant tropical vegetation. Its trade is mainly in tobacco and Palmyra timber. Population (1891), 43,000. Station of the WMS, with (1903) 3 missionaries, 2 women missionaries, 67 native workers, men and women; 6 outstations, 21 day schools, 2 boarding schools, 1 college, and 455 professed Christians. The Society uses the name Pettah to designate its station here.

JAGATAI TURKISH LANGUAGE. See TURKISH LANGUAGE.

JAGDALI DIALECT. See MULTANI.

JAINS: A religious sect in India, who are found in Upper Hindustan, in the provinces of Mewar and Marwar, along the Ganges, and in Calcutta. They are also found in some other parts of India, especially along the Malabar coast. They are considered heterodox by the Hindus, and in their belief they adhere to some of the tenets of Buddhism and to some of the teachings of the Brahman. Like the Buddhists, they deny the origin and authority of the Vedas, and they worship some of the same saints. Like the Brahman, they recognize the distinctions of caste, and worship some of the deities of the Hindu pantheon, tho they reject all the rites which cause the sacrifice of animal life. They believe in final emancipation, when the vital spirit is released from the bonds of action, and they define the size of such souls, their home, their qualities, their length of life, and all that pertains to them. The Jains are divided into two orders—the priest and the layman. The former leads a life of abstinence and general self-denial. He carefully avoids the destruction of animal life, even covering his mouth to avoid inadvertently swallowing insects. The layman is supposed to practise the virtues of liberality, gentleness, piety, and penance. He also carefully strains the water which he drinks, and covers all liquids lest an insect may be drowned therein. There are other differences among them which govern their dress and decorations. They worship a number of deified saints, called Jina, to whom they ascribe attributes of the most extravagant character. Two of these are now the principal objects of worship. The origin of the sect is lost in obscurity, but it probably was subsequent to the rise of the Buddhist religion.

JAIPUR: A town in Chota Nagpur, India, situated 8 miles W. of Purulia. Outstation of the SPG (1869), with (1902) 11 native workers and 831 professed Christians, of whom 399 are communicants. Name also written Jeypur.

JAIPUR: A town in the Madras Presidency, India, situated in the district of Vizagapatam, 95 miles N. W. of the town of that name, at an altitude of 2,000 feet. Population (1891), 5,000. Station of the Breklum Missionary Society (1887), with (1903) 1 missionary and his wife, 7 native workers, men and women, and 750 professed Christians, of whom 299 are communicants. Name written by the Society, Jeypur.

JAIPUR: A city in Rajputana, India, the capital of a native state of the same name, situated at an altitude of 1,438 feet, about 80 miles E. N. E. of Ajmere. It stands in a small plain which seems to have been the bed of a lake. The city was founded in 1728 by Jai Singh II., and its streets are regular and wide. It is the chief commercial center of Rajputana. Population (1891), 159,000. Station of the UFS (1869), with (1903) 2 missionaries, 1 with his wife; 3 women missionaries, 39 native workers, men and women; 11 elementary schools and 1 dispensary. Name also written Jeypore.

JALA: A town in Chota Nagpur, India, situ-
Jalalpur: A town in the Punjab, India, situated about 20 miles N. of Wazirabad. Station of the PN (1897), with (1903) 1 missionary and his wife, 4 native workers, men and women. Name also written Jellisore.

Jalapa: A town in the State of Vera Cruz, Mexico, situated 56 miles W. N. W. of Vera Cruz City, at an altitude of 4,300 feet. Jalap grows wild in the vicinity and takes its name in medicine from the town. Population about 18,000. Station of the CMS and CEZ (1899), with (1903) 1 missionary and his wife, 1 dispensary and hospital.

Jalna: A town in the district of Aurungabad, in arid land but surrounded with fruit gardens which are famous. Altitude, 1,632 feet. Population, 6,300. Station of the UFS (1882), with (1903) 2 missionaries, one with his wife; 2 women missionaries, 1 native workers, men and women; 13 outstations, 12 elementary schools, 1 boarding school, 1 dispensary, 1 hospital and 268 communicants.

Jalpaiguri: A town in Bengal, India, situated about 50 miles S. E. by S. of Darjiling, at an altitude of 700 feet. Population (1891) 1,570. Station of the CMS and CEZ (1891), with (1903) 1 missionary and his wife.

Jalpur: A town in the Bombay Presidency, India, situated 18 miles S. by W. of Surat. Station of the German Baptist Brethren Church.

Jalpaur: A town in the Punjab, India, situated 47 miles E. S. E. of Amritsar. Population (1846), with (1903) 1 missionary and his wife, 2 women missionaries, 41 native workers, 6 day schools, and 1 boarding school. Name written by the Society, Jullundur.

Jalpur: See Jalpur.

Jaleswar: A town in Orissa, Bengal, India, situated 24 miles N. E. of Balasore. Station of the Free Baptist Missionary Society (1885), with (1900) 1 missionary and his wife and 11 native workers, men and women. Name also written Jella.

Janicke, "Father": Born of Bohemian parents in Berlin in 1748; died in 1827. He was a weaver by trade, but having conceived an ardent desire to possess a university education, he turned all his energies upon this, and, with many interruptions, succeeded, after enduring great privations, in fitting himself to enter Leipzig University, whence he graduated in due course, and in 1779 became pastor of a Bohemian Church in Berlin.

Early in life he was much under Moravian influences, and his own brother was a missionary in India. Hence missions in every form were close to his heart. He was a very earnest man, and had the not uncommon trait of earnest men in a brusque manner that aroused violent opposition among some whose offices in the Church ought to have ensured him their sympathy.

It was a layman, von Schnirding, who suggested to Janicke the idea of founding a training school for missionaries in Berlin. This school, whose influence had a large place in the founding of the Berlin Missionary Society, was opened in 1800. In 1805 Father Janicke founded a Bible Society, which developed into the Prussian Central Bible Society. In 1811 he founded a Tract Society which has become renowned.

It was characteristic of this great-hearted man that when he opened his Training School for Missionaries, he made its needs his own. He had in the school seven scholars, for whose expenses he depended upon von Schnirding. That gentleman suddenly lost his property and the enterprise seemed to be doomed. But Janicke, with only 47 thalers in hand, decided to carry on the school. In spite of all obstacles and much opposition he succeeded, and in 1820 he had the gratification of receiving the sanction of the King of Prussia to the enterprise. This gave the school a secure basis. Up to the time of his death in 1827 Janicke had trained for the foreign field eighty missionaries, some of whom became men of high renown in the annals of the English and Dutch societies which sent them out to different parts of the world.

Janvier, Levi: Born at Pittsgrove, N. J., April 25, 1816; graduated at Princeton College 1835; Theological Seminary 1838; ordained December 31, 1840; sailed in 1841 as a missionary of the PN for India; was stationed at Fatehgarh, Ludhiana, Ambala and Sabathu. He was much occupied in the translation of the Scriptures, and was connected with the press from the beginning to the close of his work. After he had mastered the Punjabi language, he, with his cousin, Dr. Newton, of the same mission, commenced the preparation of a dictionary of that language. It was completed and published at
the mission press in 1854, a quarto of 438 pages, in the Gurmukhi character. Dr. Janvier possessed great energy of character, and was full of zeal for the salvation of the heathen. He died March 24, 1864, at a melo in Anandpur, where he was engaged in preaching and distributing tracts. In the evening he was met by a fanatic Sikh, and fell to the ground with a club. He lingered insensible till morning, when he died.

JAO-CHAU-FU: A town in the province of Kiang-si, China, 60 miles S. E. of Kiu-kiang. Station of the CIM, with (1908) 1 missionary and his wife and 2 native workers. Name written by the Society, Rao-chau.

JAPAN: The archipelago and empire of Dai Nippon (great dayspring), called "Japan" by foreigners, consists of a chain of islands bordering the Continent of Asia between Russia at Kamchatka and the Chinese coast opposite Formosa and the Pescadores. It is set in a quadrilateral nearly 9,000 miles wide and 2,000 miles long. The most northern island is Araiato (latitude 50° 56'), the most southern Formosa (latitude 21° 42'), the most eastern Shishumlu (longitude east 150° 32'), the most western Yonakoto (longitude east 146° 45°). Of the great quadrilateral thus drawn about Japan's extremities, the total land area is but 150,000 square miles; the remaining 17,840,000 square miles being ocean water which surrounds nearly 4,000 islands having 45,000 miles of coast line. The largest island is Hondo or Hon-shiu, that is, main island, or main country, and on unrevised maps is called Niphon, which is the Dutch spelling of the name of the whole empire, the native common name being Nippon, or Nihon. Hondo, Kiu-shiu, Shikoku and Yezo, or Hokkaido, are the four largest islands. The lesser groups of islands, besides Riu Kiu and Chishima, are Awaji, Tsu-shima, Goto, Iki, Oki, Sado, Shichijima, ogasawara (Bonin), etc. All the outlying islands from Tsu-shima to Sado are on the western side of Hondo, which is, in general, destitute of harbors; while the eastern front is well indented and contains numerous places suitable for anchorage and commerce. The general shape of the main group of islands is that of an archery's bow recurved at each end, the cord or string bisecting the Sea of Japan, the arrowrest being at Tokio, the capital, which is thus almost exactly at the center of the empire.

Physical Features: Geologically, Japan is part of the chain of volcanoes stretching from Kamchatka into China, the islands being the tops of otherwise submerged mountain plateaus of granite and old schists and clay slates on which late and active volcanoes have superimposed their peaks, and the islets being the fragments of the great lines of upheaval, once long causeways but now broken into fragments and fantastic shapes by ages of wave-action. The geographical division of the empire into nine do (circuits or roads) is made in general accordance with the physical features of the country, especially the great lines of mountains and islands. The whole surface of the country consists of mountains and valleys, large plains and great rivers being nearly unknown, while lakes, except Biwa and Inawashiro, are few and small. The scenery is rarely wild and imposing, tho in general beautiful, and in many places exceedingly lovely. Most of the mountains are rounded and forest-covered.

Only about ten per cent. of the total area is cultivated, which, however, is nearly all that is available, since the arable land is almost wholly in the valleys and river bottoms. The climate of Yezo, where the climate is cooler, furnishes the same possibilities of health as in the same latitude in Europe or America. The months liable to the dreaded typhoons are, in a decreasing order of severity, September, August, October, and July. Four or five typhoons pass over Japan annually, of which Tokio receives about one. Occasionally a typhoon comes as early as April. The native houses, admirable for summer use, are not usually habitable by Europeans in winter. The numerous mountain resorts, and the easy accessibility of Yezo, where the climate is cooler, furnish Japan with sanitariums for rest, recuperation, or prolonged vacation.

The peculiarities of the climate of Japan are reflected in its vegetation. During eight months...
of the year plant life is active, during four almost at a standstill, the herbage in early summer and autumn being at its best. Evergreens are the characteristic features of the landscape. Nearly all types of vegetation, temperate, arctic and tropical, pyraval, and the Mediterranean, Pacific and north European coasts will be recalled by travelers. These types meet, especially in central Japan, where, at the higher elevations, the birch and the beech are still common, while the bamboo and the camphor-laured flourish in the lower lowlands.

Japan is the land of the monkey and the giant salamander. Except the ass, sheep and goat, most of the common domestic animals exist here. The chief mammals are the monkey, bat, bear, badger, marten, dog, wolf, fox, squirrel, rat, hare, wild boar, stag, antelope. About 400 species of fish have been cataloged, with 1,200 species of mollusca, the seas being amazingly rich in life of every form able to exist in salt water.

Japan was discovered: In round numbers, the population of Dal Nippon in 1899 was 44,000,000.

Except the Ainus, in Yezo, the people are now a homogeneous race, made up of several stocks. The chief peculiarities in physical appearance, language and customs are found in Lu Chu and other outlying islands. The language spoken in the capital, Tokio, is now the standard, and using this a good speaker can be understood easily all over the empire, as the variations in dialect, the numerous, are comparatively slight, and are vastly less than in China. In comparison with China, India, Siam or indeed with any Asian country, Japan is particularly more of a unit, another people the most homogeneous of any Asiatic nation. The Xuzok or gentry include the former samurai (servants of the emperor) whose ancestors served the feudal lords as retainers, or who have in various ways risen to social rank, and who, altogether, under the old order constituted the military and literati of the empire. The Heimin, or common people, were formerly divided into several distinct classes, beneath which were the eta, outcasts, and hi-nin (not human); but all the people—farmers, artisans, merchants, etc.—are now equal before the law, and subject to the same political and social forces and liabilities. The agricultural people comprise one-half of the population, after which in order come traders and artisans.

In physical stature the Japanese are an undersized people, the average height of the men being 5.5 feet, and that of the women 4.5 feet. Further, the native is not proportionately developed. The invertebrate habit, continued for ages, of sitting on their knees without chairs, the hams resting on the heels or ankles, has resulted in a curious malformation, or, rather, lack of growth, by which the upper part of the body is disproportionately longer than the lower. The Japanese do not smoke opium or bind the feet of their women, but the use of tobacco in the form of "drinking" or filling the lungs with the volatile substance may be one of the causes of the common lung diseases and flat breasts of the men. The most common fatal diseases of the Japanese are, in their order, those of the nervous, digestive and respiratory organs, the skin disorders are frightfully common, and epidemics are not rare.

In mental traits the Japanese are bright, quick, perceptive and in general clever, maturing in intellect probably earlier than the European, and from fifteen to forty years of age being peer, probably, to any people in the world, tho it appears that arrested mental development and decay come earlier than with the Germanic races.

In universal courtesy and politeness, the Japanese people have probably no peers, the kindly greetings and gentle manners being common to all grades of society, even the language (between equals, only) being infused with the eminently Christian idea of each esteeming the other better than himself.

Government: The government is that of a monarchy, the chief ruler, the Mikado, being hereditary emperor, who is assisted by a senate, a privy council, and a cabinet of ministers, each of whom has charge of a department. For administrative purposes the empire is divided into 46 ken or prefectures, the three large municipalities, Tokio, Osaka, and Kioto, being organized as f, or imperial cities. These ken consist, as a rule, of two of the old geographical divisions of kuni or provinces united, there being in the empire 85 provinces, 805 kori or districts, 12,185 cities and towns, and 58,456 villages. The sub-prefectures number 566, and the towns and cities having mayors number 11,377. The smaller villages and hamlets, the care of a matsu or head-man, and the entire populace is arranged into responsible groups of five households—a system which enables the government to keep the most minute oversight of all subjects of the Mikado. For further details of the government, the reader is referred to the constitution of Japan, proclaimed February 11, 1889. This being the culminating point of Japanese history, since it has led to the suppression, by consent of the Western nations, of the extraterritorial causes of the treaties, we now turn to a survey of the origin and history of the empire, and to the condensed story of the religious and political development of the nation, which, by adopting such a constitution, solemnly declared its purpose to change its political system from an Asiatic despotism to a modern representative government.

Political History: The true history of Japan is now in process of construction out of the materials obtained by a critical study of geology and natural history, the native legends, poetry and mythology, and a comparison of Chinese, Korean, and Japanese historical records. The most ancient literature extant is not older than the 8th century, and the early writers draw no clear line of demarcation between myth and history. Hence there is little to be depended on until the 4th century.

At the dawn of history, the archipelago is found populated. The conquerors from the Asian highlands, who, by way of Korea, landed in Kitashu and by gradual conquest northward established themselves in central Hoodo near Lake Biwa, at Nara and Kioto, and cre their arrival inhabitants who were hunters and fishermen. To these the conquerors were a superior race of men, and they parceled out the land among themselves, compelling the aborigines to be their serfs. To this day, at least two types of countenance are easily distinguishable, and the
characteristics of a mixed race appear in the people. The round, flat, "pudding-face" of the lower classes and the more oval countenance of the nobility, with its more delicate features and profile, are in noticeable contrast, being, according to some writers, types of the Ainus and the invading Yamato, respectively. Others argue that Japan was peopled by two different streams of immigration from Korea, which supplied the nobility, and the lower classes, and that neither recorded history, nor tradition, nor mythology shows any traces of migration from the southward, we are to look upon the Koreans as the nearest congeners of the Japanese. The historically the Ainus occupied the soil of Honshu, it is claimed by some able writers that the Japanese and Ainus are as distinct in race as the whites and Indians in North America.

From about the year 409, when calendars, writing, and Chinese appliances of civilization were introduced, Japanese history becomes clearer. Ancestor-worship was the religion of the invaders, and out of their method of defying their famous patriarchs and heroes grew up the Kami-no-Michi, or, in later Chinese phrase, Shinno (theos-logos), the way or doctrine of the gods, in a compound of divine nature and of deified human beings. This is a cardinal feature of the Japanese system. The Mikado rules over Japan by divine right from all eternity, and the divine origin and right of the ruler is the central doctrine of Shinto as the national religion. Upon this religion the fabric of government was built. What a blended religious and political system might have developed into we have no means of knowing, but immediately upon the importation of foreign influences from China, the germs were planted for mighty growths in politics, social, religious, and intellectual life, which were profoundly to affect and notably modify the nation and its development. From the 6th to the 12th century the history of Japan includes on its political side the abolition of the native feudalism of the conquerors, and the gradual centralization of the government in Kioto, with the adoption of codes of law, boards or ministries, the division of the empire into provinces, governed by officers sent out by, and directly responsible to, the central government, and the granting of franchises to the landholders and outlying portions of the population into one homogeneous people. Such a result was not accomplished without much military energy, and many bloody victories of the disciplined imperial troops over the brave but poorly armed mountaineers and distant tribes. A far-reaching effect on society was the gradual separation of the military from the agricultural class, the physically strong and intellectually gifted becoming permanent soldiers, continually in camp and clothed constantly in armor and helmet. Such a body or bodies of men on the distant frontiers were far more likely to know, respect, believe in, obey, and follow their favorite commander than to heed the mandates of the distant and shadowy court at Kioto. The foundations of a new feudal system were thus laid. Out of the military class, or buke, has been evolved the samurai, the soldier-scholar, the most picturesque and interesting figure in the national history. From this class, which now constitutes over one-twentieth of the populace, have its more remote features, warriors, statesmen, scholars, reformers, Christian thinkers, and philanthropists of modern times, while the man of the agricultural class is still the typical ultra-conservative. The buke or Samurai were the military, the Kupó or civil court nobles and officers were the civil, servants of the Mikado, who was in theory the owner of all the land.

The further growth of government in Japan can best be viewed from the standpoint of the relation of religion to its development. We therefore turn to the subject of the religions of the Empire.

Religions: In religion the Ainus are fetish-worshippers, and the superstitions of fetishism, shamanism, the worship of the reproductive powers of nature, and the veneration of ancestors are ingrained in the people of the Nippon archipelago. These primitive beliefs underlie the other national religions, Shinto and Buddhism; the former being the possibly indigenous cult based on ancestor-worship and the deification of heroes, and the latter having been imported from India and burdened with the influences of China and Korea, with remarkable developments and varied on Japanese soil. Shinto is the state religion, as has been noted already.

Buddhism: In the formation of the total product of evolution in Japan Buddhism has been a most potent factor. The two great systems of religious growth from Korea, with its elaborate systems of ethics, ritual, dogma, and scriptures, it soon completely overshadowed the bald and impoverished cult of Shinto. Its complete victory was heralded when Kôbô, the reputed inventor of the Japanese syllabary, the profound scholar of mighty intellect, who had visited China and mastered the Sanskrit, proclaimed in the beginning of the 9th century his scheme of reconstruction and reconciliation, by which the older and indigenous faith was swallowed by the foreign religion. This man, the Philo and Euhemerus of Japan, declared, after revelation from the gods, that all the Shinto deities were avatars or incarnations of Buddha. He therefore baptized them with Buddhist names, and in place of the Shinto festivals appointed others to be celebrated according to the Buddhist liturgies. Having already obtained a foothold in the palace, and by its influence turned the emperors into cloistered monks and empresses into nuns—thus dealing a blow at Shinto in its vitals, and by weakening government prepared the way for the decay of the imperial authority and the supremacy of the military classes—the victory of Kôbô's system was easy. Further, the Buddhist monks were explorers, road-makers, bridge-builders, improvers of diet and living, chaplains of the army, almost the only scholars and learned men apart from the court, the benefactors of the people, the exponents of civilization, and the foster-fathers of art, of literature, and of material development. From the 6th to the 12th century is the missionary period of Japanese Buddhism. After which for two centuries the development of doctrine followed, in which emerged those new and startling forms of the faith of Sakamuni which have made Japan the land of dreadful heretics to the corrigilists of Siam and China. In Shin-shū, or "reformed" Buddhism, we see the circle of development complete, and the beginning and the end meeting in what seems a caricature of Christianity. Of the six great sects in Japan, one originated in India, one in China, and four in Japan, viz., the Chan, Nichiren.
I. THE RELIGION OF JAPAN

The religion of Japan is Buddhism, and that when excited by civil troubles between the adherents of Buddhism, while the gentry, or samurai, hostile to Buddhism, were the leaders of the Christians immersed in ethics have been instructed almost wholly in Buddhism; while the gentry, or samurai, hostile or indifferent to Buddhism, have been nurtured in the virtues as well as in the vices of feudalism,—the Chinese system fitting admirably into the needs of the samurai feudal bond. Now that the feudal system has been abolished, the samurai, in a sense not so true of the common people, is left without a religion,—a sect which may explain why most of the Christian converts thus far made, as well as the agnostics, skeptics, and indifferents, are samurai, while the mass of the people are still Buddhist.

Roman Christianity: It will thus be seen that the religion of Japan is Buddhism, and that when in 1549, ten years after its first sight by a European, Roman Christianity reached Japan in the person of its pioneer and then ablest exponent, Francis Xavier, the only serious obstacle to propagation and conversion was the cults imported originally from India. Shinto was out of sight, and buried in mythology, and the first missionary efforts were aided rather than hindered by the contemporaneous political condition of Japan, which was that of civil war, during which Hideyoshi humbled the pride and mightily diminished the power of the Buddhists by his military persecution of them. At Kagoshima, in Sakaeu, Xavier made one hundred converts in a year, and labored for short periods at Hirado, and Yama-guchi, in Nagato, having also fruitlessly visited Kioto. Leaving Torres and Fernandez, his fellow-missionaries, Xavier left for China, dying on his way thither, at Sancian. In 1553 reinforcements arrived, and the driven out of Yamaguchi by civil outbreaks, the Portuguese friars assembled at Bungo, Vilela, visiting also Kioto and Sakai and gaging converts. Some years of prosperity followed, and in 1583 a mission was dispatched to the Papal See, headed by three Jesuits, noblemen.

The Pagan Reaction: When, however, in 1587 the Taiko Hideyoshi succeeded to power and subdued the southern daimios and provinces, in which were most of the Christian converts of rank, including the famous generals Kuroda and Konishi, he issued an edict ordering the foreign missionaries to Hirado, and Yama-guchi, in Nagato, having also fruitlessly visited Kioto. Leaving Torres and Fernandez, his fellow-missionaries, Xavier left for China, dying on his way thither, at Sancian. In 1553 reinforcements arrived, and the driven out of Yamaguchi by civil outbreaks, the Portuguese friars assembled at Bungo, Vilela, visiting also Kioto and Sakai and gaging converts. Some years of prosperity followed, and in 1583 a mission was dispatched to the Papal See, headed by three Jesuits, noblemen.

In the first place, he declared war against Korea, and sent armies of invasion thither, in which were many Christians and soldiers, among them Generals Konishi and Kuroda. Now that of the empire determined to root up the laws of exclusion. During two and one-half centuries the Dutch and the Japanese lived in har-
Christianity in Japan were prior to the coming of Commodore Perry. Indeed, it will be found on examination of the antecedents of nearly every reformer and leader in the modern progress of Japan, that his first enlightenment, or motive to renovation of mind, came from his own or his father's contact with the Dutch or Dutch learning. Further, abundant facts coming to the light in these days, when New Japan is so busily engaged in building the monuments of the martyrs she once imprisoned and beheaded, show beyond doubt that the beginnings of modern Protestant, the unorganized, Christianity in Japan were prior to the coming of the missionaries, and sprang from the Dutch. Some of the sons and grandsons of these inquirers or martyrs are now pastors of Christian churches, and this wide area of propedeutics for modern civilization and Christianity gives strongest hope of its reality and permanence in the hearts of the people. Other disconnected events belong to the story of the revival of ideas of progress in Japan. With the opening of the Pacific to American commerce and the development of the fur trade and whale-fishery, the number of rescues of Japanese waifs became every year increasingly numerous. To return these involuntary exiles to the land they loved was dictated by humanity. One notable attempt of this class was that made by the owners of the ship "Morrison," who, in 1837, shipped their vessel to Japan seven Japanese, with Dr. S. Wells Williams and Dr. Gutzlaff as interpreters. The ship was fired on at Uraga, July 30, in Yedo Bay, and also repulsed at Kagoshima, in Satsuma. From these waifs Messrs. Gutzlaff and Williams in China learned the language, and translated into it portions of the Bible. In the gradual evolution of a complete version of the Holy Scriptures in Japanese, this work of Gutzlaff and Williams, and that of the British and American mission, obtained at Deshima, with that of Bettelheim, a missionary supported in the Lu Chu Islands by a British Naval Society from 1846 to 1854, may be considered historical links. The settlement of California and the discovery of gold there again called the attention of the American Government to Japan. By a coincidence that suggests the hand of Providence, the present Emperor of Japan was born November 3, 1852, on the very day that Perry was ready to sail into Yedo Bay. The success of this naval diplomat was matter of history, but the necessities signed by the Shogun, or military commander-in-chief, offended the nation. A condition of anarchy and this wide area of propedeutics for modern civilization and Christianity gives strongest hope of its reality and permanence in the hearts of the people. Other disconnected events belong to the story of the revival of ideas of progress in Japan. With the opening of the Pacific to American commerce and the development of the fur trade and whale-fishery, the number of rescues of Japanese waifs became every year increasingly numerous. To return these involuntary exiles to the land they loved was dictated by humanity. One notable attempt of this class was that made by the owners of the ship "Morrison," who, in 1837, shipped their vessel to Japan seven Japanese, with Dr. S. Wells Williams and Dr. Gutzlaff as interpreters. The ship was fired on at Uraga, July 30, in Yedo Bay, and also repulsed at Kagoshima, in Satsuma. From these waifs Messrs. Gutzlaff and Williams in China learned the language, and translated into it portions of the Bible. In the gradual evolution of a complete version of the Holy Scriptures in Japanese, this work of Gutzlaff and Williams, and that of the British and American mission, obtained at Deshima, with that of Bettelheim, a missionary supported in the Lu Chu Islands by a British Naval Society from 1846 to 1854, may be considered historical links. The settlement of California and the discovery of gold there again called the attention of the American Government to Japan. By a coincidence that suggests the hand of Providence, the present Emperor of Japan was born November 3, 1852, on the very day that Perry was ready to sail into Yedo Bay. The success of this naval diplomat was matter of history, but the necessities signed by the Shogun, or military commander-in-chief, offended the nation. A condition of anarchy followed which was full of hostility to foreigners. This was regarded by the Western nations as wanton disregard of treaties, which was chastised by the combined fleets. Shortly after the Japanese had thus felt the power of the West a reaction took place in favor of learning the secret of this power. The popular ferment was accompanied by a determination to suppress the military form of government which had opened the door to Western influence. As early as 1846 the Pope had nominated a bishop and several missionaries, who in the Lu Chu islands awaited the opening of the country. At Usakami and other places near Nagasaki there were found, in 1865, thousands of people who possessed some prayers and books and resorted to arms as the champion of the rights of China and Korea, but with a zeal which showed that the Dutch East India Company had not been forgotten. One feature of the case which should be born in mind is that in 1902 the British Government entered into an engagement with Japan to support her at any time when the integrity of either China or Korea might be about to be destroyed by any hostile coalition. This agreement between the Asiatic and the European island empires contains as much of danger to the peace of Europe as it does of consolation to Japan in undertaking war against Russia.

**Missions in Japan since the Reforms: The Roman Catholics.** On the opening of Japan, missionaries of Greek, Roman, and Reformed Christianity at once entered the empire, the Roman Catholics to discover their brethren and continue the old methods of propaganda, and the Russians or Greek (Orthodox) and the Protestant missionaries to break new ground. As early as 1846 the Pope had nominated a bishop and several missionaries, who in the Lu Chu islands awaited the opening of the country. At Usakami and other places near Nagasaki there were found, in 1865, thousands of people who possessed some prayers and books and resorted to arms as the champion of the rights of China and Korea, but with a zeal which showed that the Dutch East India Company had not been forgotten. One feature of the case which should be born in mind is that in 1902 the British Government entered into an engagement with Japan to support her at any time when the integrity of either China or Korea might be about to be destroyed by any hostile coalition. This agreement between the Asiatic and the European island empires contains as much of danger to the peace of Europe as it does of consolation to Japan in undertaking war against Russia.

**Japan**
Shinto worshipers. Until toleration became the fact, which was even before it became the law, in 1872, many of these people were imprisoned, exiled, and otherwise persecuted, as indeed were occasionally even the converts of Protestant missionaries. Many interesting relics and survivals of Roman Christianity of the 17th century have been discovered by the priests, and here and there small bodies of descendants of former believers have been more easily converted because of the sentiment of historic continuity. In the fifty years of their revived labors, making diligent use of the methods peculiar to Roman Catholic missionary operations, they have again established themselves widely over the empire, but especially in Kiushiu. The missionaries are mostly French, and their zeal and consecration are worthy of praise.

The Greek Church: The missionaries of the Church of Russia began operations at Hakodate in 1870, and have steadily continued their labors. A large native ministry has been trained, the Bible being used, and in the freedom allowed their converts the Russian priests are much like the Protestants. Among the most magnificent buildings in the capital of Japan are those of the Russian Church, the indefatigable head being the archimandrite Nicolai, who is assisted by three other Russian clergy, and having about 1,700 baptized converts and 25,000 adherents. In a recent informal conference of native Christian workers without reference to the branches of the Church universal, the Greek Church was well represented. In some parts of the empire, where these churches have been planted, they have not held their own, the weak converts lapsing into heathenism and the earnest Bible-readers passing into Protestant churches.

Protestant Missions: The gates of Japan were first opened to the world through the influence of Americans, and the first Protestant missionaries to enter the country were Americans. The Protestant Episcopal, the Presbyterian, and the (Dutch) Reformed Churches in the United States sent out missionaries—Williams, Hepburn, and Verbeck—who settled in 1859 at Nagasaki and Yokohama. These missionaries first obtained the right of residence only as teachers of English in Japanese schools; and when Goble, of the American Baptists, came to Japan in 1860, and Ensor, of the CMS, in 1869, and Greene, Culick, and Davis, of the American Board, in 1871, they were allowed at first to work as teachers rather than as preachers of the Gospel. This "silent sowing" continued until 1873, when the old edict against Christianity was repealed. After this date many missionary societies, from America, England, Scotland, and Germany, entered the promising field. The revolution in 1868 left Japan in a state of unrest; and during the next fifteen years, as a witness of the events narrates, the condition of affairs is almost without parallel. "Missionary schools were crowded with the sons and daughters of high and low. A missionary was called to lay the foundation of a national university, and to be a general adviser of the government. State men, men of wealth, government, and lower officials became the patrons of Christian schools and sometimes opened their houses for religious services. From all quarters came requests to hold meetings in school-houses and theaters; audiences numbering several hundreds, sometimes 1,000 or 1,500, were readily got together, and they would listen to a succession of speakers through four or five hours, or even longer. We have seen the power of God to-day was a frequent ejaculation. Witnesses of these scenes will never forget them. In every three years the Church was doubled. These years of the appropriation and more or less thorough assimilation of the best of Western thought and life were the most momentous in the nation's history. This period more than all others was creative of the New Japan. Indeed, until 1889 the Japanese missions grew steadily in power; from that time until now the work has been marked by lessening progress, pause, and even retrogression. From 1884 untill 1889 the number of adult evangelical Christians rose from 5,000 to 29,000; but in 1899 it was only about 41,800. In 1888 the number of adult baptisms for the year reached 7,700; but in 1892 it was only 3,700, and now it scarcely keeps up to this number. As Warneck says: "The rapid advance was occasioned far less by a universal hunger and thirst after religious knowledge, and in the freedom allowed their converts the Russian priests are much like the Protestants. Among the most magnificent buildings in the capital of Japan are those of the Russian Church, the indefatigable head being the archimandrite Nicolai, who is assisted by three other Russian clergy, and having about 1,700 baptized converts and 25,000 adherents. In a recent informal conference of native Christian workers without reference to the branches of the Church universal, the Greek Church was well represented. In some parts of the empire, where these churches have been planted, they have not held their own, the weak converts lapsing into heathenism and the earnest Bible-readers passing into Protestant churches. The reaction that followed lasted until nearly the close of the last century; but the period of opposition seems to have reached its culmination. Since the revision of the treaties, in 1899, and the attitude of Japan in the Chinese Boxer uprising of 1900, a change for the better is apparent, and the forces that make for righteousness are moving forward. The latest statistics available give the following data for 1900: Missionaries 757, stations 157 (including many where more than one society labor, so that the number is too large by about fifty); organized churches 443, of which 95 are self-supporting; church members 42,451, native ministers 422, unordained preachers and helpers 558, Bible women 224. There are 16 boys' boarding schools, with 2,270 pupils, 45 girls' boarding schools with 3,361 pupils, 85 day schools with 6,856 pupils, 949 Sunday schools, with 36,310 pupils, 13 theological schools with 129 students, 13 schools for Bible women with 175 students, 6 hospitals and 8 dispensaries, at which 2,121 patients had been treated during the year. Of the societies at work in Japan, there are thirty-one from America and Canada, seven from Great Britain, one from the Continent, and these are enforced by the work of the Salvation Army, the Hephzibah Faith Mission and four local societies. Christian literature in the vernacular is one of the most powerful forces in the evangelization of Japan. From 1895 to 1900 the Tract Society issued 2,460,000 tracts, and the religious press has been busy in this line of work. The Bible in Japanese: A veteran missionary ascribes one-half of all the results of Christian missions in Japan to the work of the Bible societies. Of these, the American Bible Society, the British and Foreign, and the National Bible Society of Scotland have agencies in Japan, and have diligently
prosecuted the work of publication and distribution, besides making generous contributions for the expenses of translation. The work of giving the Bible to this nation was begun, as said above, by Rev. Karl Gutzlaff and Dr. S. Wells Williams, and vigorously pressed forward by Rev. J. Goble, S. R. Brown, D. D., and Dr. J. C. Hepburn on the opening of the country by treaty. In 1872 all the Protestant missionaries were invited to meet in Yokohama to form a Translation Committee, which, in June, 1874, began its sittings, and on the 30th of November, 1879, finished its work of translation and revision of the New Testament. In April, 1880, the complete New Testament was in the hands of the native Christians. A few months previously Rev. Nathan Brown, D. D., published a version of the New Testament in which the words relating to baptism were translated, and not, as in the union version, translated, from the Greek. Plans for translating the Old Testament were not made until 1876, nor perfected until 1882. On the 3d of February, 1888, at a large meeting held in Tokio, the complete version of the entire Bible in Japanese was celebrate. Besides many missionaries there were in hearty and able cooperation with the committee the native scholars, Matsuyama, Takahashi, Yemura, Ibuka, and others. These brethren have enabled their foreign teachers to present to the Japanese people a version at once scholarly, idiomatic, readable, rhythmic, and destined in all probability to be the standard for generations to come. In the language of this union version of the Holy Scriptures special prominence is given to the native element, as against the Chinese-Japanese so fashionable during the last half-century or more.

Since January, 1890, the total sales and gifts of Bibles have been 29,156; New Testaments 116,371 and portions 749,455, making a total of 944,000. One Bible seller sold (largely portions) during the last four months of 1899, 22,298 volumes. While in 1883 there were only four religious journals, in 1894 there were forty, and in 1900 there were ninety-five reported, of which four are newspapers and seventy were monthly.

Tokio, the capital, is largely the distributing center of the Gospel in Japan; and here twenty per cent. of all the workers are located, and institutional Christianity has a plant established at this commercial emporium valued at $1,200,000 yen, or about $600,000.

A notable meeting of the Evangelical Alliance of Japan was held at Osaka in April, 1900, and it was decided to enter upon special evangelistic work throughout the Empire at the beginning of the new century. The General Conference of Missionaries, which met at Tokio in October, 1900, appointed a committee of ten to cooperate with the Committee of the Alliance in furthering this special work for Japan’s evangelization. These efforts have been attended by blessed results. From May 12 to June 30, 1901, meetings were held in fifty-two churches in Tokio alone, attended by more than 100,000 persons resulting in 5,307 converts or inquirers. Japanese students have been deeply affected by this evangelistic movement; and in October, 1901, during the meetings held by Mr. John R. Mott, over three hundred, within thirty days, decided to become disciples of Jesus Christ. Many are praying, working and hoping for the redemption of Japan during the first generation of the 20th century; and this blessed result depends upon the faith and works of the people of God.

JARKEND. See YARKAND.

JARO: A suburb of Ioloio, in the S. E. of the island of Panay, Philippine Islands. Station of the ABMU (1900), with 1 missionary and 1 native worker.

JATKI LANGUAGE. See MULTANI.

JAUNPUR: A town in the United Provinces, India, situated on the Gumti River, 37 miles N. W. by N. of Benares. It was formerly the capital of a large Muslim kingdom. It has many fine buildings, and is celebrated for its manufactures of perfumes. Population (1891), 42,000, of whom 26,000 are Hindus and 16,000 Mohammedans. Station of the Zenana Bible and Medical Mission, with (1900) 3 women missionaries, 10 women native workers, 6 day schools and a dispensary.

JAVA: An island of the Indian Archipelago, situated in latitude 5° 2' to 8° 50' south, and longitude 105° 12' to 114° 39' east, is one of the richest colonial possessions of the Netherlands, and in respect to its population, its natural beauty, the mildness of its climate, and the industry of its people, is the most important of all the islands of the archipelago. The area of the island is 50,260 square miles. Its greatest length is from east to west, 666 miles, with a breadth varying from 56 to 136 miles. With Madura included in the official Java, its area is 50,554 square miles. The mountain range which forms the central ridge is of volcanic nature, and there are still many active volcanoes. The highest is Semeru, 12,238 feet. The climate of Java, with the exception of some marshy districts in the northern plains, is healthful and very salubrious. The heat is not intense, but the long continuance of it proves trying to European constitutions, which at first are not affected by it. In the interior tablelands the climate is colder and more bracing.

Java is under the government of the Netherlands. The East India Company, created by the Dutch in 1602, gradually conquered the Dutch East Indies, and when the Company was dissolved in 1798 the mother country took over the control of all its Dutch possessions, and since 1830 the Netherlands has been undisturbed in its supremacy. The island is divided into residences, each governed by a resident, who, with his assistants, exercises almost absolute control by means of a vast hierarchy of native officials. There are 22 of these residences, including Madura. The population is very dense, numbering in 1902, 23,745,098. Of these, over 50,000 are Europeans, 2,225,000 Chinese, 6,000 Arabs, and the remainder natives. The natives belong to the Malay race, and are divided into the Javanese proper, the Sundanese, and the Madurese. The Malay type is best retained in the Sundanese, while the Javanese are the most civilized. In early times a warlike, ferocious spirit must have characterized the Javanese, but now they
are peaceable, docile, sober and industrious. Under Dutch rule the condition of the people has been greatly improved, and is improving rapidly under their wise and judicious administration. Religion: Nominally the natives are Mohammedans, since the Hindu dynasty was overthrown in the 15th century by the Mohammedans; in former times they were Buddhists and Jains; in former times they were Buddhists and Hindus. The inhabitants were peaceable, docile, sober and industrious.

Language: Javanese is the prevailing speech, and is found in two distinct styles—the court speech and the plain talk among the people.

The three principal towns of Java are Batavia (115,887), Samarang (89,286), and Surabaya (146,944).

Mission work is carried on by the Netherlands Missionary Society in East Java, where the Dutch Baptist Society has also one station. The Netherlands Missionary Union has stations in West Java. These societies have the following associations: The Protestant Church in Netherlands East Indies, Java Comité, Mennonite Missionary Society, Ermelo Missionary Society, Christian Reformed Church, and the Dutch Missionary Society. The Netherlands Missionary Union has at this date (1902) 13 missionaries employed on the island, and a church membership of 25,060.

The chief station of all missions on the island is Modjowarno, but in connection with this center of missionary activity there are a number of churches, a seminary for native preachers, several schools and 1 hospital. The Christian community under the care of these missionaries amounts to about 4,000.

JAVA COMITÉ. See NETHERLANDS; MISSIONARY SOCIETIES OF THE.

JAVANESE LANGUAGE: Belongs to the Malay family and is spoken by about 13,000,000 people in the island of Java. It has been used for literary purposes by missionaries of Dutch societies, and sometimes written with Roman letters. It is more often written with the Javanese characters, however, and sometimes with Arabic letters.

JAYPUR. See JAIPUR.

JEHLAM: A town in the Punjab, India, on the north bank of the Jehlum River. Population (1891), 12,900, of whom 7,400 are Mohammedans and 4,300 Hindus. Station of the UP (1873), with 13 missionaries employed on the island, and a church membership of 25,060.

JEULASORE. See JALEWSAR.

JERICO: A settlement in the Transvaal Colony, S. Africa; situated 28 miles N. N. W. of Pretoria. Station of the Hermannsburg Missionary Society (1850), with (1900) 1 missionary and his wife, 1 native worker, and 1 day school.

JERUSALEM: From the time of the Crusades Jerusalem has been a special point for missionary work. Each of the different branches of the Christian Church, European and Oriental, have had their representatives there. The strongest element has been and is still the Greek, the Greek Patriarch receiving the support and encouragement of the Russian Government.

Next in strength come, perhaps, the Armenians, who have a large convent and church. The Latins have not been very strong until recent times. The conflicts between these different branches of the Church have been such as to excite the derision and contempt of the Muslims, who have been compelled to guard the holy places by sending in times of event Christians from destroying each other in the places that they affect to reverence. Jerusalem has also been, naturally, a gathering place of the Jews, and numerous efforts have been put forth, like the present Zionist movement, to establish this race in their ancient capital. It has not, however, as if the very presence of the Holy Place acted upon them so as to destroy all sense of religion, and the Jews of Jerusalem have been notoriously the worst specimens of their race. Of late years, however, with the efforts of such men as Sir Moses Montefiore, and those who with him have sought to establish Jewish colonies, not in Jerusalem itself, but in the country, somewhat of a change has taken place. Modern Jerusalem is the capital of a detached district of Asia Minor, the government being directly under the control of Constantinople. A large, new city has grown up outside of the walls. The population is estimated at about 40,000. Station of the London Society for Promoting Christianity among the Jews (1823), with (1903) 38 missionaries, men and women; 29 native workers, 3 day schools, 1 industrial school, 2 dispensaries, 1 hospital, and a printing house. Station also of the CMS (1837), with (1903) 17 women missionaries, 1 elementary school and 1 hospital. Station also of the Berlin Jerusalem Union, and of the Christian and Missionary Alliance, and of several independent missionary enterprises. When the ABCFM sent its first missionaries to the Levant in 1810, they were expected to establish themselves at Jerusalem and thence go forth to other parts of Turkey. This was quickly found to be impracticable, and from that day to this there has been no disposition on the part of either of the American societies working in Turkey to enter a place already occupied by many missionaries. All the branches of the Eastern Church have patriarchs or bishops at Jerusalem. It is an important center of the Roman Catholic Church, and the Church of England also maintains a bishop there.

JERUSALEM UNION (in Berlin). See GERMANY; MISSIONARY SOCIETIES IN.

JEWETT, Fayette: Born at Newbury, Vt., August 15, 1824; graduated at Vermont University 1848; studied medicine and practised at Nashua, N. H. In September, 1852, he decided to devote himself to the foreign mission work, and being accepted by the ABCFM, sailed for Turkey March 14, 1853. He was first stationed at Tocat, then at Sivas, and in 1858 at Yozgat, these changes being required by the necessities of the work and the missionary families. He was a pioneer in medical work in these places. He was ordained as an evangelist at Constantinople May 28, 1857. In 1860 he returned to the United States to seek relief from a peculiar and distressing affliction, and on the return journey he died at Liverpool, June 18.

JEWETT, Rev. Lyman: Born in Waterford, Me., March 9, 1813; graduated from Brown University in 1843 and took a course of study at Newton Theological Institution. He was appointed a missionary of the AMB in 1847.
He began his labors at Madras, afterward removing to Nellore; but in the closing years of his missionary service he returned to Madras, there closing a period of thirty-eight years of consecrated, wise and successful work in the foreign field. He was notable for a rare combination of tried humility and great self-reliance. For years he was the only missionary on the Telugu field, and it was largely due to his self-sacrifice and firmness of purpose that the field was not abandoned by the Baptists of America. He lived to see the fruitage of his early toil. He died at Pittsburg, Mass., January 7, 1897.

JEWS, THE: Locality and Religious State: In the time of Christ, Jewish communities had spread through all the countries bordering on the Mediterranean, and only a small part of Israel was still living in Palestine. This part was still further reduced, if not completely destroyed, by Titus in 70, Hadrian in 135, and Herodius in 628, and not once the 19th century did Palestine once more become the abode of a large Jewish population. As civilization advanced toward the north, Jews became domiciled also in Central European countries in the middle ages they were chiefly settled in Spain and Germany. But persecution drove many Spanish Jews to the other Mediterranean countries, especially to Italy, Asia Minor and Palestine; and for the same reason many German Jews moved toward the East, into the Polish empire, at that time reaching from the Baltic to the Black Sea. Still earlier some emigrations had taken place to Arabia, Persia, India and China; but as those sporadic settlements—with which must also be reckoned the Falsahas of Abyssinia, who had adopted Judaism—maintained no regular communications with the main bulk of the people, they actually lost the knowledge of their own religion, and the revival which lately has taken place among them is due to the exertions of the Jews in Europe. The Jews also took part in the European colonization of America, going mostly to the northern part of that continent, less frequently to the southern and central; and recently both Australia and South Africa have received some smaller and less important Jewish colonies. The table below, based on the Jewish Year Book for 1902, gives a general view of the distribution of the Jewish race. It being remembered, however, that, as stated below, such tables are estimates impossible of verification.

These ten and one-half million Jews are, as the table shows, very unequally distributed over the earth, and it seems apparent that the missionary activity developed among them should stand in some proportion to the density and strength of each single settlement. Thus, as long as there are countries which have only one missionary for every 50,000 Jews, new mission stations should not be established in countries which have a much smaller Jewish element in their population. Nor should the activity ever be concentrated to such a degree as is the case in Palestine, where there is a missionary for every one thousand Jews.

The medieval division of the Jews into Sephardim or Spaniards, Ashkenazim or Germans, and Moghrabim or North Africans, has lost to some extent its significance. Other distinctions have become more prominent than that of descent. Nevertheless in some connections it is still instructive.

Sephardim communities, numbering in all hardly more than 400,000 members, are found in Italy, Greece, Turkey and sporadically also in France, Holland and England. The Ashkenazim, who form the principal mass of the Jewish people and number over five millions, have their chief seat in Germany, Austria-Hungary and Russia, but make also the larger part of the Jewish population in France, Italy, England and Palestine. The North American Jews are almost without exception Ashkenazim. The Moghrabim, numbering about 150,000, live in North Africa and Palestine.

On account of their common German descent all the Ashkenazim used originally the German language, is an old and somewhat mutilated dialect, strongly mixed up with Hebrew words, and in Poland and Russia also with Slavic words. This language was by the Jews themselves called simply "Jewish," but by others either Judeo-German, or, by a mistake, "Judeo-Polish." In Germany it has now nearly disappeared. There, as in Hungary, England, France and America, it has, at least among the educated Jews, been wholly superseded by the language of the land. In Russia, Poland and Galicia, however, and among the numerous emigrants thence to England, North America and Palestine, "Jewish" is still the common speech, and a missionary among them must understand it. The Sephardim in the Orient have also retained their Spanish dialect. The Moghrabim generally speak the Arabic dialect common in the land in which they live.

All three classes of Jews—that is, so far as their members can be designated as belonging to the old faith—follow the rabbinical law such as it has been laid down in the Talmud, and afterward codified in the Mischna, Tora and Schul-
Jews, the

THE ENCYCLOPEDIA OF MISSIONS

chan Aruch. Their form of worship has a common basis, fixed in Babylonia between the 6th and 9th centuries. Through different additions and changes in the different countries, there developed from this common basis quite a number of different rituals, but most of these have afterward given way either to that of the Ashkenazim or to that of the Sephardim.

No religious belief, however, there are, as above indicated, Jews of the old faith and Jews of the new faith. When toward the close of the 18th century the Jews began in great numbers to take part in the development of modern civilization, those concerned in the movement could not fail to recognize that the rabbinical law contains much which is superstitious and inhumane; that the divine service needed a reorganization, especially by the introduction of sermons in the language of the land; that the youth ought to have a fuller instruction in the Bible and the elements of divine and ethical teaching; and, acting on this conviction, the natural result was that there arose a distinction between the Jews living in central and western Europe, or in the United States, and the Jews settled in, or coming from, eastern Europe. The latter retained Judaism in its old medieval form; the former entered upon a development demanded by the times.

Among the Jews of the new faith there must further be made a distinction between the orthodox party and the party of the reform. The orthodox follow the rabbinical law, the purged from its extravagances; use Hebrew in their own worship, with occasional sermons in the language of the land; and expect, through confidence in the promises of the Prophets, that all Israel shall some day return home to Palestine. The reformers reject the rabbinical law, use partially or wholly the language of the land in their divine service, and consider themselves genuine citizens of the state to which they belong. But most of them have given up confidence in the infinite development of the moral and religious truths contained in the law and the Prophets, and many of them have lost all religious conviction, and become absorbed in mere materialism.

In the 18th century there also developed two larger groups among the Jews of the old faith, namely, the Peruschiim or Mithnagdim and the Chasidim. The Peruschiim are followers of the Talmud, the Chasidim of a later form of the mysticism of Theosophy. This must not be understood, however, as if the Peruschiim stood in no relation to the Kabbala, for the Kabbala has so thoroughly permeated medieval Judaism that it has left traces of itself on every leaf of it. Nor is the Chasidim in opposition to the Talmud; they only wish to keep the study of it within certain limits, in favor of prayer and contemplation. Characteristic of them is their reverence for holy men who through prayer and contemplation are said to have come into close relations with God, and thereby to be able to give infallible counsel and to confer heavenly blessings on their adherents.

Violent controversies take place between the Peruschiim and the Chasidim, between the orthodox and the reformers, between those of the old faith and those of the new. The latter is by far the larger party, and it is relatively more favorable to Christianity; one party of thousands" (Acts xxii: 20), which believed, one of the four parties that is any nearer to Christianity than the other three. The orthodox are prevented from accepting the Gospel by their strict but superficial legality, the reformers by their loose religious sense, the Peruschiim by their hair-splitting subtlety—the result of their Talmudic studies—and the Chasidim by their blind fanaticism.

Missions among them: The mission among the Jews is as old as the Christian Church, and the Church can never fully do justice to the last words of the Savior without preaching the Gospel unto the Jews. Altho the cross was a stumbling block to them, yet the first Christian community consisted entirely of Jews.

Commencing with the family of Jesus, Himself, we have Mary, Joseph, with the at first unbelieving brothers, but afterward all united with one accord in prayer and fasting; James and Joseph and Simon and Judas (Matt. xii: 55); further, Mary, the wife of Cleopas (John xix: 25), and, then, the greater number who were converted by the miracles of Christ on His travels (John viii: 20; x: 42). We must not omit Mary Magdalene (Luke viii: 2), Joanna, the wife of Chuza, Herod's steward (Luke viii: 3; xxii: 10), Susanna (Luke viii: 3), Salome, the mother of the apostles John and James (Matt. xx: 20); Mary and Martha, the sisters of Lazarus of Bethany (John xi), and Mary, the converted sinner.

In the higher ranks we find Nicodemus, Jairus, one of the rulers of the synagogue (Mark v: 22); the nobleman at Capernaum with his whole house (John iv: 46); Zaccheeus, the chief among the publicans (Luke xii: 5); Joseph of Arimathaea, an honorable counselor (Mark xii: 45; Luke xxiii: 50). To these are to be added the multitudes who were healed by Christ's miracles, and who therefore believed in Him—such as blind Bartimaeus (Mark x: 46); the disciples of John, who were by Him directed to the Lamb of God; the twelve apostles, with Matthias (Acts ii: 25); the seventy disciples, who were appointed and sent forth after the twelve (Luke x: ). According to 1 Cor. xv: 6, Christ was, after His resurrection, seen of above five hundred brethren at once. When Matthias was numbered with the eleven apostles, there were about one hundred and twenty members of the congregation called together. By the preaching of Peter at the Pentecost three thousand souls were added (Acts II.). By the preaching and bold confession of Peter and John the number was increased to about five thousand, when it is said believers were the more added to the Lord, multitudes both of men and women (Acts v: 14), and the number of the disciples multiplied in Jerusalem greatly, and a great company of the priests were obedient to the faith (Acts vi: 7). At his last sojourn in Jerusalem Paul finds there "many thousands of Jews," or rather "tens of thousands" (Acts xxii: 22). One party accuses the other of having dealings with Gentiles (Christians) and the other turns off the accusation by scoffing at the superstitions of its antagonists. But they all agree in the profession of belief in one single God, with whose very essence the idea of a trinity is as incongruous as that of an incarnation, and in the conviction that Israel is specially selected to represent this faith among the nations of the earth. Thus, while the monotheism of the Old Testament is directed against polytheism, the monotheism—or rather, unitarianism—of modern Judaism is in protest against Christianity. One of the four parties that is any nearer to Christianity than the other three.
The assistants of the apostles, who left Jerusalem in order to preach the Gospel were: first, Saul, the Benjamite; then Joseph Barsabas, surnamed Justus (Acts i: 19); Aquila, the Levite of Cyprus (iv: 36); Ananias, disciple at Damascus (ix: 10); John Mark the Levite, evangelist, son of Mary (xii: 2; xv: 37); Timothy, son of the Christian Jews, Eunice (xvi: 1); Euodius, with his wife Priscilla (xviii: 2); Apollos of Alexandria (xviii: 24); James, the lawer who preached the Gospel in Crete (Titus III: 13); Rufus and Alexander, the sons of Simon the Cyrenian (Mark xv: 21; Rom. xvi: 13).
